1.0 INTRODUCTION

1.1 Overview

To comply with the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA) Section 15087, the Federal Transit Administration (FTA) and the Los Angeles County Metropolitan Transportation Authority (Metro) prepared a Draft Environmental Impact Statement/Environmental Impact Report (EIS/EIR) for the Eastside Transit Corridor Phase 2 Project. The Notice of Availability (NOA), which serves as a notice to the public regarding the availability of the environmental document and seeks public opinion and comment, was released on August 22, 2014.

1.2 Project Description

The Eastside Transit Corridor Phase 2 Project (Project) area covers over a 50 square mile area to the east and southeast of downtown Los Angeles. It includes portions of the cities of Commerce, Los Angeles, Montebello, Monterey Park, Pico Rivera, Rosemead, Santa Fe Springs, South El Monte, Whittier, and portions of unincorporated Los Angeles County, including East Los Angeles and west Whittier-Los Nietos.

The Draft EIS/EIR discusses the purpose and need for the project and identifies and evaluates proposed transit improvement alternatives. The following four alternatives were evaluated in the Draft EIS/EIR: No Build, Transportation Systems Management (TSM), and two build alternatives utilizing Light Rail Transit (LRT) technology: the State Route 60 (SR 60) LRT Alternative and the Washington Boulevard LRT Alternative.

Depending on the selected alternative, the Project would extend the existing Metro Gold Line Eastside Extension LRT system from its current terminus at the Atlantic Station to the east by 6.9 to 9.5 miles to either Peck Road in the city of South El Monte or Lambert Road in the city of Whittier. See *Appendix A* for a map of the project area.

1.3 Draft EIS/EIR Release and Comment Period

The public review and comment period for the Draft EIS/EIR began on August 22, 2014 and lasted for 60 days, ending on October 21, 2014. The deadline for all public comment submissions was 5:00pm on October 21, 2014.

During the comment period, agencies and members of the public were encouraged to submit comments on the Draft EIS/EIR to:

Ms. Laura Cornejo, Director
Countywide Planning
Los Angeles County Metropolitan Transportation Authority

One Gateway Plaza, MS 99-22-2
Los Angeles, CA 90012
E-mail: eastsidephase2@metro.net

1.3.1 NOA Mailing

In preparation of the public comment period, the NOA was mailed out to property owners within ¼ mile of each of the proposed alternatives, which resulted in 1,424 potentially impacted properties and businesses. In addition, the 2,847 contacts in the stakeholder database were mailed and emailed a copy of the NOA to ensure the community was aware of the Draft EIS/EIR release and upcoming outreach activities. See *Appendix B* for a copy of the NOA.

1.3.2 Draft EIS/EIR Repositories

The Draft EIS/EIR was available on Metro's project website at http://www.metro.net/eastsidephase2. CDs of the Draft EIS/EIR were available by request from Ms. Laura Cornejo at the address shown above. Paper copies of the Draft EIS/EIR were also available for public viewing at the public hearings and at the following repositories:

Commerce Public Library 5655 Jillson Street Commerce, CA 90040	Pico Rivera Public Library 9001 Mines Avenue Pico Rivera, CA 90660	Los Nietos County Library 11644 East Slauson Avenue Whittier, CA 90606
East Los Angeles County Library 4837 East 3rd Street Los Angeles, CA 90022	Rivera County Library 7828 Serapis Avenue Pico Rivera, CA 90660	Sorensen County Library 6934 Broadway Avenue Whittier, CA 90606
Chet Holifield County Library 1060 South Greenwood Avenue Montebello, CA 90640	Rosemead City Library 8800 Valley Boulevard Rosemead, CA 91770	Whittier Public Library 7344 Washington Avenue Whittier, CA 90602
Montebello Public Library 1550 West Beverly Boulevard Montebello, CA 90640	Santa Fe Springs Public Library 11700 Telegraph Road Santa Fe Springs, CA 90670	Whittwood Branch Library 10537 Santa Gertrudes Avenue Whittier, CA 90603
Monterey Park Public Library 318 South Ramona Avenue Monterey Park, CA 91754	South El Monte City Hall Reception Desk 1415 N. Santa Anita Avenue South El Monte, CA 91733	South El Monte Library 1430 North Central Avenue South El Monte, CA 91733

1.3.3 Public Hearings

Metro hosted one agency meeting and four public hearings to allow for and encourage public participation and comment. The following table lists the meeting dates and locations. Detailed information regarding the public hearings can be found in Section 2.0.

Meeting	Date and Time	Location
Agency Meeting	Monday, September 8, 2014 8:30am – 12:00pm	Metro Union Station Conference Room One Gateway Plaza, Los Angeles, CA 90012
Public Hearing #1	Saturday, September 27, 2014 9:00am – 11:30am	Pico Rivera Senior Center 9200 Mines Avenue, Pico Rivera, CA 90660
Public Hearing #2	Monday, September 29, 2014 5:30pm – 8:00pm	Quiet Cannon Banquet Center 901 Via San Clemente, Montebello, CA 90640
Public Hearing #3	Tuesday, September 30, 2014 5:30pm – 8:00pm	Uptown Whittier Senior Center 13225 Walnut Street, Whittier, CA 90602
Public Hearing #4	Wednesday, October 1, 2014 5:30pm – 8:00pm	South El Monte Senior Center 1556 Central Avenue, South El Monte, CA 91733

2.0 PUBLIC HEARINGS

2.1 Public Hearing Format

The public hearings were held on September 27, 29, 30 and October 1, 2014 for community participation and comment on the Draft EIS/EIR. The meetings were spread out geographically throughout the corridor to make it convenient for stakeholders throughout the project study area to attend.

Each hearing was preceded with an open house session of 30 minutes. Participants would sign in and receive a packet of handouts and review approximately 40 display boards that discussed information found in Draft EIS/EIR. Project team members were station around the room to answer any questions on the information provided. Copies of the display boards can be found in *Appendix C.*

Metro's Dave Hershenson, Community Relations Manager, served as the hearing officer, he initiated the meeting by providing the public a general description of the purpose of the hearing, notification methods, Draft EIS/EIR repositories and formats to provide comments. Subsequently, Laura Cornejo, Director of Central Area Planning and Project Manager, provided a PowerPoint presentation summarizing the results of the environmental analysis. See *Appendix D* for a copy of the PowerPoint presentation. During the public comment forum portion of the hearing, speakers were invited up to the microphone and were each given two minutes to provide their comments on the Draft EIS/EIR. Spanish interpreters were available as well as a court reporter to transcribe the hearings. During the public hearings, 20+ attendees requested Spanish translation.

2.2 Public Hearing Notification

2.2.1 Post-Card Mailer, Eblasts and Take One Flyers

Metro produced and mailed an 11x6 inch bilingual (English/Spanish) postcard to notify the 2,847 stakeholders in the project database and 19,925 parcels within ¼ mile of the proposed build alternatives. A copy of the postcard can be found in *Appendix E* and the full notification list can be found in *Appendix F.*

A letter invitation was also mailed to all properties located within 750 feet of the outer edges of the United State Army Corp of Engineers (USACE) designated flood plain known as the Whittier Narrows Flood Control Basin. ADD LETTER TO APPENDIX

In addition, a total of 700 colored, bilingual trifold Take One's, found in *Appendix G*, were distributed by direct mail and placed on 20 city and chamber public counters for distribution. In addition the Take One's were placed in the following bus routes XX, XX,XXX to inform the bus riding community.

Email notifications and reminders were emailed to the project database and posted on social media outlets. Copies of both eblasts can be found in *Appendix H.*

2.2.2 Advertisements

Legal advertisements were published on August 22, 2014 in 3 publications: LA Times, La Opinion and Chinese LA Daily. In addition, Metro placed display advertisements in eight local publications: Eastern Group Publications, San Gabriel Valley Tribune, Whittier Daily News, Impacto, West Valley Journal, Mid-Valley News, and Pico Rivera Community Newspaper. Online meeting advertisements were also displayed in six local publications: Eastern Group Publications, Whittier Daily News, San Gabriel Valley Tribune, West Valley Journal (SGVjournal), Mid-Valley News, Pico Rivera Community Newspaper and Facebook. These publications were chosen based on their circulation boundaries, cultural representation and popularity. Each of the online ads linked directly to Metro's project website where detailed meeting information was provided. The proof of publication for each ad can be found in *Appendix I.*

2.2.3 Earned Media

In addition to placing advertisements in local newspapers, Metro sent out two press releases to newspapers that cover the project area on August 22 and September 23, 2014. As a result, a number of articles were published during the comment period. The table below lists articles published. To see a copy of each press release and the published articles see *Appendix J.*

2.2.4 Extend Outreach

Extended outreach coordination efforts were also implemented and requested support to promote the meetings through websites, enewsletters, social media sites, membership eblast and counter distribution. The number of organizations the extended outreach efforts targeted is 8 cities, 12 chambers of commerce and stakeholder groups and 12 elected officials' offices. See *Appendix K* for a complete list of extended outreach contacts.

2.2.5 Social Media Posts

Meeting invitations, calendar events, reminder emails and posts were distributed through the project's Facebook and Twitter pages as well as through participating stakeholder pages prior and during the meetings for followers to view. The Facebook page was established in May 2009 and currently has 778 page likes while the Twitter page has 172 followers. See *Appendix L* for sample posts on the project Facebook.

2.3 Public Hearing Handouts

A set of handouts were developed to clearly explain the project process and alternatives being considered. These materials were designed as bilingual (English/Spanish) pieces to make the project easy to understand and encourage participation. The following materials were provided at the registration table: Draft EIS/EIR

comment information sheet, four project fact sheets (Overview, Alternatives, Environmental, and What is LRT?), comment card and speaker card.

The display boards were also translated into Spanish and made available as a handout upon request. In addition, a Translation of Materials Request Form was also made available for participants who did not speak English and was translated into five other languages including: Spanish, Vietnamese, Traditional Chinese and Armenian. This form provided a mechanism for non-English speaking participants to understand that project information and materials would be made available upon request. See *Appendix M* for a copy of each of the handouts.

2.4 Public Hearing Summary

The following table documents the details from each of the public hearings.

Meeting	No. of Attendees	No. of Comments Received	No. of Speakers
Public Hearing #1 – Pico Rivera	62	9	14
Public Hearing #2 – Montebello	97	10	28
Public Hearing #3 – Whittier	161	116	46
Public Hearing #4 – South El Monte	208	13	32
Total	528	148	120

See *Appendix N* for copies of the sign-in sheets, comments received, and speaker cards received at each of the meetings. The transcripts for each of the meeting can be found in *Appendix O*, and various meeting photos can be viewed in *Appendix P.*

Eastside Transit Corridor Phase 2 LRT Build Alternatives

Metro

LOS ANGELES COUNTY

METROPOLITAN TRANSPORTATION AUTHORITY

(METRO)

NOTICE OF AVAILABILITY FOR THE EASTSIDE TRANSIT CORRIDOR PHASE 2 PROJECT DRAFT ENVIRONMENTAL IMPACT STATEMENT/ENVIRONMENTAL IMPACT REPORT

To comply with the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA) Section 15087, the Federal Transit Administration (FTA) and the Los Angeles County Metropolitan Transportation Authority (Metro) have prepared a Draft Environmental Impact Statement/Environmental Impact Report (EIS/EIR). This Notice of Availability serves as a notice to the public regarding the availability of the environmental document and seeks public opinion and comment. FTA is the lead agency for the purposes of NEPA, and Metro is the lead agency for the purposes of CEQA.

Project Description and Location

The Eastside Transit Corridor Phase 2 Project (Project) area covers over a 50 square mile area to the east and southeast of downtown Los Angeles. It includes portions of the cities of Commerce, Los Angeles, Montebello, Monterey Park, Pico Rivera, Rosemead, Santa Fe Springs, South El Monte, Whittier, and portions of unincorporated Los Angeles County, including East Los Angeles and west Whittier-Los Nietos. An optional maintenance yard is located in the city of Los Angeles.

The Draft EIS/EIR discusses the purpose and need for the project and identifies and evaluates proposed transit improvement alternatives. The following four alternatives were evaluated in the Draft EIS/EIR: No Build, Transportation Systems Management (TSM), and two build alternatives utilizing Light Rail Transit (LRT) technology: the State Route 60 (SR 60) LRT Alternative and the Washington Boulevard LRT Alternative.

Depending on the selected alternative , the Project would extend the existing Metro Gold Line Eastside Extension (MGLEE) LRT system from its current terminus at the Atlantic Station to the east by 6.9 to 9.5 miles to either Peck Road in the city of South El Monte or Lambert Road in the city of Whittier.

The SR 60 LRT Alternative would extend the MGLEE approximately 6.9 miles east to Peck Road. The majority of this alignment would operate in an aerial configuration, primarily within Caltrans right-of-way (ROW) along the southern portion of the SR 60 Freeway. This alternative includes the following four stations, each with supporting park-and-ride facilities: Garfield Avenue station at Garfield Avenue and Via Campo; Shops at Montebello station located on the west end of currently private property adjacent to the Shops at Montebello; Santa Anita Avenue station located on the south side of the SR 60 Freeway to the east of Santa Anita Avenue; and the Peck Road station located within Caltrans ROW to the east of Peck Road.

This LRT system would also include traction powered substation (TPSS) sites, pocket tracks, switches, tail tracks, and other ancillary facilities. One potential new maintenance site location the Mission Junction Maintenance Yard Option, is located in the city of Los Angeles northwest of Cesar Chavez Avenue and Mission Road. A maintenance yard currently under construction in the city of Monrovia is also an option to be the maintenance yard that would service this line.

The SR 60 North Side Design Variation, is an option for this alternative. With this variation, the LRT alignment would transition from the south-side to the north-side of the SR 60 Freeway just west of Greenwood Avenue, continue east along the north-side of the SR 60 Freeway within Caltrans ROW, and return to the south-side of SR 60 Freeway approximately one-quarter mile west of Paramount Boulevard.

The Washington Boulevard LRT Alternative would extend the MGLEE approximately 9.5 miles east to the city of Whittier at Lambert Road. This alternative is proposed to operate in an aerial configuration with columns located in the roadway median or sidewalks, as well as in an at-grade street running configuration, where the street widths are sufficient to accommodate the alignment and proposed stations. The proposed alignment would use Pomona Boulevard, the south-side of the SR 60 Freeway within Caltrans ROW, Garfield Avenue, and Washington Boulevard, and include six new stations located at: Garfield Avenue and Via Campo; Whittier Garfield Avenue and Whittier Boulevard; Washington Boulevard and Greenwood Avenue; Washington Boulevard and Rosemead Boulevard; Washington Boulevard and Norwalk Boulevard; and Washington Boulevard and Lambert Road. All of these stations, except the Whittier Boulevard station, include supporting park-and-ride facilities.

This LRT system also includes TPSS sites, pocket tracks, switches, tail tracks, and other ancillary facilities. Three potential sites have been identified for the location of a new maintenance yard: Mission Junction Maintenance Yard Option (adjacent to the existing Mission Junction maintenance facility); Commerce Maintenance Yard Option in the city of Commerce; and the Santa Fe Springs Maintenance Yard Option in the city of Santa Fe Springs. Another maintenance yard currently under construction in the city of Monrovia, is also an option to be the maintenance yard that would service this line.

Two design variations are also being considered for the Washington Boulevard LRT Alternative. Under the first design variation, the alignment would be grade separated at Rosemead Boulevard. The second design variation would include an aerial crossing over the San Gabriel River/I-605 and a grade separation at Pioneer Boulevard compared to the original street running configuration in this area.

Public Review and Comment Period

The public review and comment period for the Draft EIS/EIR shall begin on August 22, 2014 and last for 60 days, ending on October 21, 2014. All public comments must be received by 5:00PM on October 21, 2014. During this time, agencies and members of the public may submit comments on the Draft EIS/EIR to:

Ms. Laura Cornejo, Director
Countywide Planning
Los Angeles County Metropolitan Transportation Authority
One Gateway Plaza, MS 99-22-2
Los Angeles, CA 90012
e-mail: eastsidephase2@metro.net

Comments may also be submitted at public hearings, which will be held at the following times and locations:

- Saturday, September 27, 2014; Open House 9am, Public Hearing 9:30 a.m. to 11:30 a.m. at the Pico Rivera Senior Center, 9200 Mines Avenue, Pico Rivera, CA 90660
- Monday, September 29, 2014; Open House 5:30pm, Public Hearing 6:00 p.m. to 8:00 p.m. at the Quiet Cannon Banquet Center, 901 Via San Clemente, Montebello, CA 90640

- Tuesday, September 30, 2014; Open House 5:30pm, Public Hearing 6:00 p.m. to 8:00 p.m. at the Uptown Whittier Senior Center, 13225 Walnut Street, Whittier, CA 90602
- Wednesday, October 1, 2014; Open House 5:30pm, Public Hearing 6:00 p.m. to 8:00 p.m. at the South El Monte Senior Center, 1556 Central Avenue, South El Monte, CA 91733

The buildings used for the public hearings are accessible to persons with disabilities. Any individual who requires special assistance, such as a sign language interpreter, to participate in the scoping meeting should contact Mr. Dave Hershenson, Community Relations Manager, Metro, at (213) 922-1340, or hershensond@metro.net.

For more information regarding the Draft EIS/EIR or to request a copy, please contact Ms. Laura Cornejo at the address above or:

Ms. Mary Nguyen, Environmental Protection Specialist
Federal Transit Administration
888 South Figueroa Street, Suite 2170
Los Angeles, CA 90017
e-mail: mary.nguyen@dot.gov

Upon conclusion of the selection of the locally preferred alternative (LPA), the Metro Board may select to initiate a Final EIR. Initiation of a Final EIS or the FTA's participation is contingent upon having funding in place. The Final EIS/EIR will include and address all of the comments received during the Draft EIS/EIR public review period. Issuance of the Final EIS/EIR will depend on Metro's ability to develop a constrained financial plan which demonstrates construction initiating within three years after issuance of the Record of Decision (ROD), the time frame by which information within an EIS/EIR is still valid. The project is currently included within the constrained component of Metro's Long Range Transportation Plan and the 2012-2035 Regional Transportation Plan, which commit funding to the project starting in 2026 with construction anticipated between 2027 and 2035 and operations in 2035.

Significant Environmental Effects

The Draft EIS/EIR addresses the existing conditions and environmental setting in the project area. Based on guidance contained in NEPA and CEQA, the Draft EIS/EIR studied the potential

environmental consequences associated with construction and operation of the project alternatives. After implementation of mitigation measures, the SR 60 LRT Alternative would have no unavoidable adverse effects under NEPA and no unavoidable significant impacts under CEQA. After implementation of mitigation measures, the Washington Boulevard LRT Alternative would have unavoidable adverse effects/significant impacts in the following four areas: visual and aesthetic resources (NEPA and CEQA), community and neighborhoods (NEPA only), surrounding intersections (NEPA and CEQA), and cumulative impacts (NEPA and CEQA).

Section 4(f) Findings

In compliance with 23 CFR 774 this notice also serves as a public notice and an opportunity for public review and comment concerning the effects on the protected activities, features, or attributes of the Section 4(f) resources (recreational ,natural, and historic resources) potentially affected in the project area. The LRT alternatives would not result in the use of any historic properties protected by Section 4(f). As discussed in Chapter 5, Section 4(f) Evaluation of the Draft EIS/EIR, the LRT alternatives would result in de minimis impacts that would not substantially affect the recreational activities, features, or attributes that make the property eligible for Section 4(f) protection.

Ways to Obtain the Draft EIS/EIR

The Draft EIS/EIR will be distributed on Metro's website at http://www.metro.net/projects/eastside_phase2/. CDs and paper copies of the Draft EIS/EIR may be requested from Ms. Laura Cornejo at the address shown above. Paper copies of the Draft EIS/EIR will also be available for public viewing at the public hearings and at the following depositories:

Commerce Public Library
5655 Jillson Street
Commerce, CA 90040

Sites Enumerated Under Section 65962.5 of the Government Code

The Eastside Transit Corridor Phase 2 Project is located on sites enumerated under Section 65962.5 of the Government Code (which requires identifying certain hazardous sites). The following sites enumerated under Section 65962.5 of the Government Code are located within the boundaries of the LRT alignments and stations, as specified below.

Sites within Both LRT Alternative Alignments

- Texaco Service Station: 892 Garfield Ave, Montebello, CA 90640; LUST; two cases both completed - cases closed.

Sites within SR 60 LRT Alternative and/or North Side Design Variation Alignment

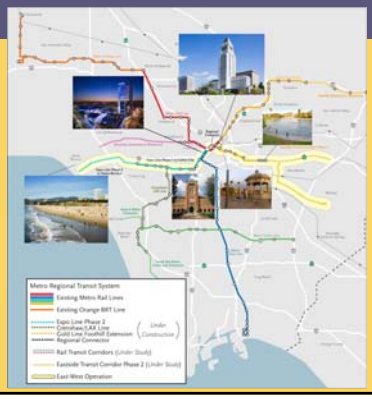
- San Gabriel Valley Superfund Site – South El Monte and Whittier Narrows Operable Units (OU); city of South El Monte and Whittier Narrows; EnviroStor and CERCLIS; Region-wide USEPA Superfund site with volatile organic compound (VOC)-impacted groundwater beneath the SR 60 Freeway.
- Semou Shallow-Zone Extraction: SR 60 Freeway at Rosemead Blvd., South El Monte, CA 91733, cleanup program site; open site assessment.
- Mobil #18-EQO; 1220 N. Peck Rd., South El Monte, CA 917334524; LUST; completed and case is closed.

- Former Shell Station #204-7389-0232: 1130 N. Peck Rd., South El Monte, CA 91733; LUST, HIST, and Cortese; gasoline and diesel leak affecting groundwater; open case remediation; a second case with gasoline leak affecting groundwater is a closed case.

Sites within Washington Boulevard LRT Alternative Alignment

- AMPT Montebello Inc.:500 Garfield Ave., Montebello, CA 90640; LUST; case is closed
- California Target #100: 869 Washington Blvd., Montebello, CA 90640; LUST, HIST, and Cortese; gasoline leak affecting groundwater; open site assessment.
- Chevron #9-7441: 12376 Washington Blvd., Whittier, CA 90606; LUST; completed case is closed.
- American Medical Enterprises: 12508 E. Lambert Rd., Whittier, CA 90606; LUST, HIST, and Cortese; waste oil leak affecting groundwater; case is open and under remediation.
- Omega Chemical Superfund Site: 12504 E. Whittier Blvd., Whittier, CA 90606; EnviroStor; USEPA Superfund site with VOC impacted groundwater beneath Washington Blvd.

Sites within the Santa Fe Springs Maintenance Yard



- Delta Industries: 8137 Allport Ave., Santa Fe Springs, CA 90670; cleanup program site; completed and case closed.
- Sur Lite Corp.: 8124 Allport Ave., Santa Fe Spring, CA 90670; DTSC Site Type: HAZ WASTE – RCRA; non-operating status.

Purpose of the Public Hearing

- Provide a brief summary of the Draft Environmental Impact Statement/ Environmental Impact Report (EIS/EIR)
- Describe the decision process to identify the Locally Preferred Alternative (LPA)
- Summary of next steps
- Listen to public comments
  - Part of official record
  - Responses in Final EIS/EIR

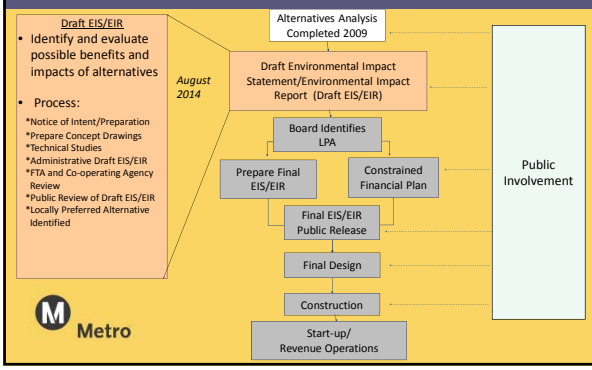
Eastside Transit Corridor Phase 2 Purpose

Draft EIS/EIR Chapter 1

- Alleviate **peak-hour congestion on the roadway network** by providing transit alternatives.
- Provide additional travel options given the project area's **high travel demand and connectivity constraints.**
- Effectively get people to the **concentration of activity centers** that exists within and adjacent to the project area.
- Address the demand for transit service and meet the needs of **transit-dependent populations**.
- Accommodate increased **population and employment growth.**
- Encourage **transit-supportive land use** and economic development opportunities.
- Increase **environmental benefits** to meet air quality mandates.

Activity Centers in Project Study Area

Metro



Eastside Transit Corridor Phase 2 Project Need

Draft EIS/EIR Chapter 1

- ***Increasing travel demand*** – Work trips to/from study area will increase 32% by 2035 (from 2006)
- ***Increasing travel times*** – By 2035, average peak-period travel time in the study area will increase by 25%/34% in the AM/PM
- ***Serving transit-dependent population*** – Within the study area, 38% are under age 18 or over age 65, 16% of households are categorized as low-income, and 12% of all households have zero vehicles
- ***Increasing freeway/arterial congestion*** – No major freeway improvements approved; major arterials in the project study area experience heavy AM and PM peak period congestion
- ***Heavy truck traffic*** – The SR 60, I-5 and I-10 freeways and arterials such as Washington Boulevard experience heavy truck traffic
- ***Population and employment growth*** – Population and employment densities in the study area will increase 12% by 2035
- ***Limited travel options*** – There are limited regional rail system connections and only a bus system operating on the existing roadway network

Eastside Transit Corridor Phase 2 Construction

Draft EIS/EIR Chapter 2

- Construction duration for either build alternative is estimated at four to six years
- Construction in one-mile segments (duration approximately 4 months per segment)
- Typical construction activities include:
  - Utility relocation
  - Street widening
  - Surface track work
  - Retaining wall/fill construction
  - Station construction
  - Operating systems installation
  - Parking facilities
  - Elevated guideway

1st Street west of Lorena

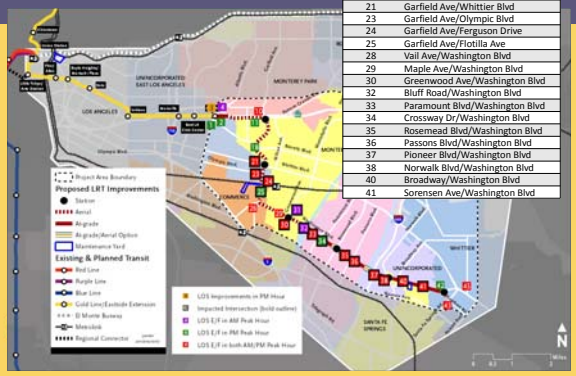
Environmental Impact Analysis Topics

Draft EIS/EIR Chapter 3 and Chapter 4

- Traffic
- Regional Facilities (Freeways)
- Transit
- Parking
- Bicycle & Pedestrian
- Land Use/Socioeconomics
  - Land Use & Development
  - Displacements & Relocations
  - Environmental Justice
  - Economic & Fiscal
  - Community and Neighborhood
- Aesthetics & Visual Quality
- Air Quality
- Climate Change
- Noise and Vibration
- Energy
- Geologic & Seismic Hazards
- Hazardous Waste & Materials
- Ecosystems/Biological Resources
- Water Resources
- Safety & Security
- Parklands
- Historic, Archeological & Paleontological Resources
- Growth Inducing Impacts
- Cumulative Impacts



Metro

Comparison of Alternatives

Criteria	No Build Alternative	TSM Alternative	SR 60 LRT Alternative	Washington Blvd LRT Alternative
Project Objectives				
Enhance service to transit dependent/low-income population	No	Yes	Yes	Yes
Increase access to activity and employment centers	No	Yes	Yes	Yes
Leverage transit investments to provide connections farther east	Low	Low	High	High
Alleviate roadway congestion	No	No	Yes	Yes
Improve mobility options	No	No	Yes	Yes
Provide a convenient/reliable alternative to the automobile	No	No	Yes	Yes
Alternative Features				
New Daily System-wide Linked Trips in 2035	N/A	22,798	28,683	29,575
Average Weekday Daily Boardings	N/A	N/A	16,700	18,900
Travel Time (minutes)	50-60	30-42	13	17.5 to 22
Capital Costs (millions, 2010$)	None	100.1	1,271 to 1,296	1,425 to 1,661
Alternative Length (miles)	N/A	N/A	6.9	9.5
New Stations	0	0	4	6
Environmental Impacts Remaining After Mitigation			Adverse/Significant	
Transportation: Intersection impacts during operation	No	No	No	Yes
Community and Neighborhood Impacts: Changes to the physical character of the existing community; community/resource events	No	No	No	Yes (adverse but not significant)
Visual and Aesthetic Impacts: Visual alteration of the existing community	No	No	No	Yes
Cumulative Impacts: Visual and aesthetic impacts	No	No	No	Yes
Cumulative Impacts: Intersection impacts	No	No	No	Yes

**All traffic impacts can be mitigated to less than significant levels for the SR 60 LRT Alternative.*

Displacement & Relocation

Draft EIS/EIR Section 4.3

- Metro will provide relocation assistance and compensation to businesses and residents as required by both the Uniform Act and the California Act.
- Where acquisitions and relocations are unavoidable, FTA and Metro will follow the provisions of both acts and their amendments. All real property acquired by Metro will be appraised to determine its fair market value (FMV).

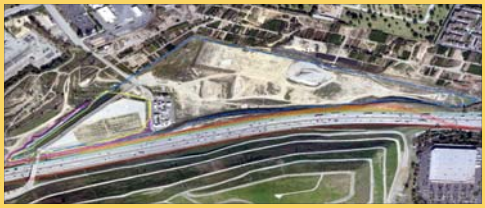
**Build alternatives result in air quality reductions due to fewer automobiles on roadways.*

Metro

Noise/Vibration Results

Draft EIS/EIR Section 4.9

- **Construction impact mitigation:**
  - Use of alternative construction methods at sensitive receptors
  - Use of temporary noise barriers
  - Locating construction equipment and material staging areas away from sensitive receptors
  - Re-routing construction traffic and haul routes
  - Requiring contractor to use best available control technologies
  - Construction activities during the daytime and during weekdays, whenever possible
  - Notify the public of construction schedule
  - Maintain 24-7 hotline and a field office
- **Operational impact mitigation:**
  - Relocation of switches and cross-overs to less sensitive locations
  - Installation of ballast mats where possible
  - Median barriers similar to the current operating line
  - Installation of a small sound wall along aerial structure



Metro

SR 60 LRT Alternative: OII Superfund Site

Draft EIS/EIR Section 4.11

OII Site Considerations

- Coordinated with US EPA and New Cure, Inc.
- Reviewed proposed methods for building on North and South Parcels
- Assessed soil, slope stability, erosion controls and ground water conditions related to project operations and construction
- Considered piling options and construction methods to minimize impacts

Metro

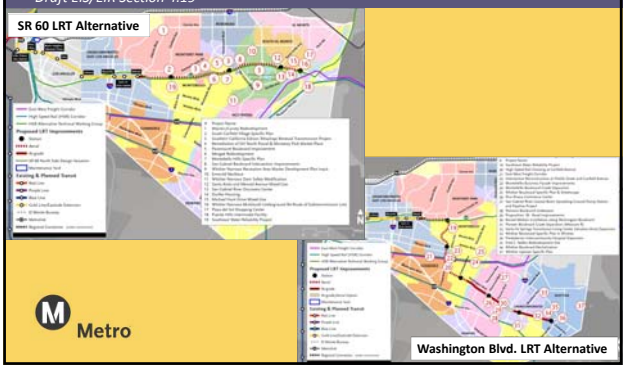
SR 60 LRT Alternative: Whittier Narrows

Draft EIS/EIR Section 4.12

Whittier Narrows Considerations

- Coordinated with US Army Corps of Engineers
- Addressed Executive Order 11988 on Flood Plain Management for alignment and Santa Anita station
- Evacuation plan in the event of Whittier Narrows flooding
- Prepared Flood and Inundation Analysis within Whittier Narrow Flood Control Basin for alignment and Santa Anita station

Metro



Cultural & Historic Resources

Draft EIS/EIR Section 4.14

Future Planned Developments in Project Study Area

Draft EIS/EIR Section 4.19

Metro

Unavoidable Adverse Effects/ Significant Impacts

- SR 60 LRT Alternative would have no unavoidable adverse effects/ significant impacts after implementation of mitigation measures
- Washington Blvd. LRT Alternative would have the following unavoidable adverse effects/significant impacts:
  - **Transportation** – 16 intersections cannot be mitigated due to ROW constraints
  - **Community and Neighborhood** – Social and physical character altered along Garfield Avenue due to removal of community resources (i.e., Chinese Garden Restaurant and mature trees), an adverse effect would also remain after mitigation along Washington Blvd.
  - **Visual and Aesthetics** – Changes visual character of Garfield Avenue due to aerial guideway; shade and shadow impacts along Garfield Avenue between Via Campo and Whittier Blvd.
  - **Cumulative Impacts** – Considerable contribution to cumulative visual impacts and cumulative impacts on 16 intersections.

Metro

Project Funding

- 2008 Measure R passed - $1.271 Billion for Eastside Phase 2
- Approved Regional Transportation Plan and Metro's Long Range Transportation Plan commits $2.4 Billion in funding starting 2026
- Remaining funding is yet to be identified
- The Metro Board is working to accelerate Measure R funding and identify additional funding sources for second and third decade projects
- Initiation of Final EIS is contingent upon having funding in place

Objetivo del Corredor de Transporte hacia el Este Fase 2

Borrador de la EIS/EIR Capítulo 1

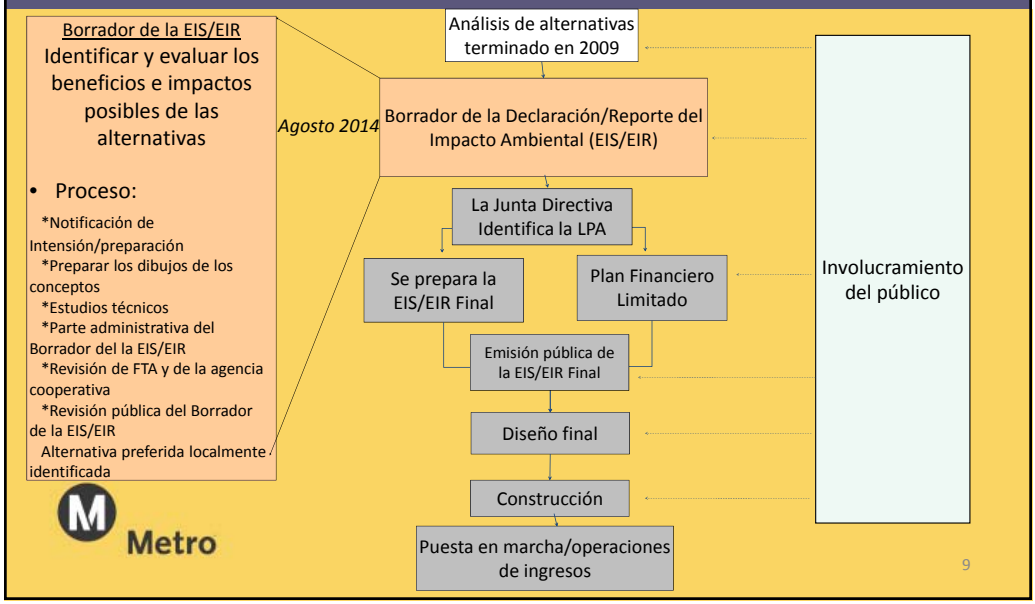
- Aliviar **la congestión en las horas pico en la red de calles** ofreciendo alternativas de transporte público.
- Ofrecer opciones de viaje adicionales dada la **alta demanda de viaje y las limitaciones de conectividad** en el área del proyecto.
- Dar acceso a las personas de manera eficiente a los **centros de concentración de actividades** existentes en o cerca del área del proyecto.
- Atender la demanda de servicio de transporte público y dar respuesta a las necesidades de la **población dependiente del transporte público**.
- Dar lugar a la **creciente población y volumen de empleos**.
- Fomentar el **uso de terrenos de apoyo para el transporte público** y las oportunidades de desarrollo económico.
- Incrementar **los beneficios medioambientales** para ajustarse a los mandatos de calidad del aire.

Centros de actividad en el área de estudio del proyecto

Metro

7

Necesidad del Proyecto del Corredor de Transporte hacia el Este Fase 2



Borrador de la EIS/EIR Capítulo 1

- ***Incremento en la demanda de tráfico*** – Los viajes hacia/desde el trabajo en el área de estudio se incrementarán en un 32% para 2035 (en relación con 2006)
- ***Incremento de los tiempos de viaje*** – Para 2035, el promedio de tiempo de viaje en horas pico en el área del estudio se incrementará en un 25%/34% en las horas AM/PM
- ***Servicio a la población dependiente del transporte público*** – En el área del estudio, el 38% de la población es menor de 18 años o mayor de 65, el 16% de los hogares son catalogados de bajos ingresos, y el 12% de todos los hogares no tienen vehículos
- ***Incremento en la congestión de autopistas/calles principales*** – No se han aprobado mejoras significativas a las autopistas; la mayoría de las calles principales en el área del proyecto experimentan gran congestión en las horas pico de la mañana y de la tarde
- ***Alto volumen de tráfico de camiones*** – Las autopistas SR-60, I-5 e I-10 y calles principales como Washington Boulevard tienen un alto volumen de tráfico de camiones
- ***Crecimiento de la población y lugares de empleo*** – Los destinos para la población y generación de empleo en el área del estudio se incrementarán en un 12% para 2035
- ***Opciones de viaje limitadas*** – El sistema de trenes regional tiene conexiones limitadas y sólo opera un sistema de autobuses en la red de calles existente

Metro

Proceso de Desarrollo del Proyecto

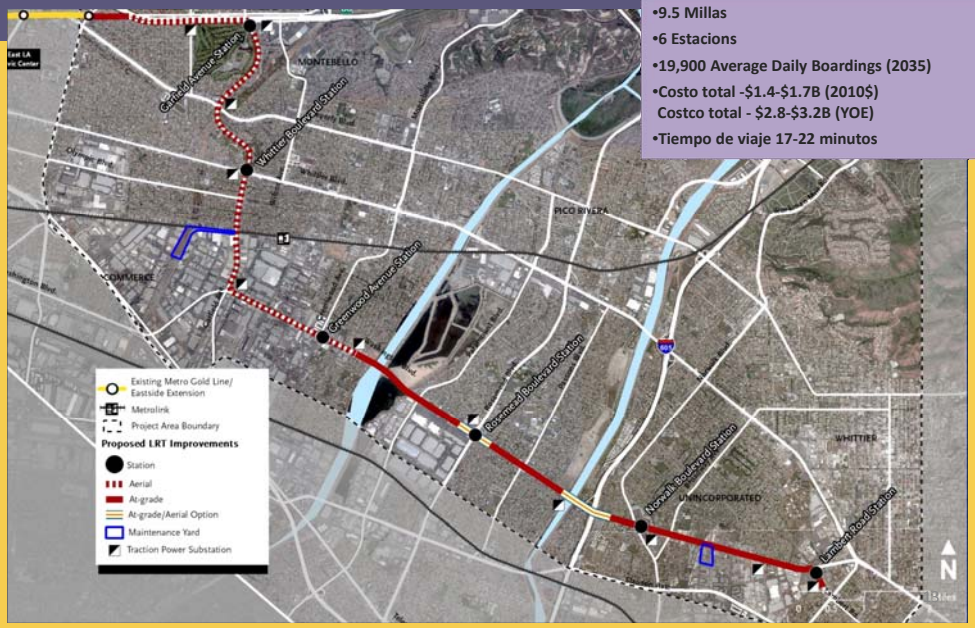
Alternativas de Construcción del Corredor de Transporte hacia el Este Fase 2

Borrador de la EIS/EIR Capítulo 2

Alternativa de Administración del Sistema de Transporte

Borrador de la EIS/EIR Capítulo 2

LRT Alternativo de el SR 60



Borrador de la EIS/EIR Capítulo 2

- 6.9 millas
- 4 Estaciones
- 16,700 abordajes diarios en promedio (2035)
- Costo total- $1.2-$1.3B (2010$)
  Costco total-$2.5B (YOE)
- Tiempo de viaje 13 minutos

Alternativa Washington Blvd. LRT

Borrador de la EIS/EIR Capítulo 2

- 9.5 Millas
- 6 Estacions
- 19,900 Average Daily Boardings (2035)
- Costo total -$1.4-$1.7B (2010$)
  Costco total - $2.8-$3.2B (YOE)
- Tiempo de viaje 17-22 minutos

Construcción del Corredor de Transporte hacia el Este Fase 2

Borrador de la EIS/EIR Capítulo 2

- La duración de la construcción para cualquier alternativa de construcción se estima entre cuatro y seis años
- Construcción en segmentos de una milla (duración aproximada de 4 meses por segmento)
- Las actividades de construcción típicas incluyen:
  - Reubicación de servicios públicos
  - Ampliación de calles
  - Trabajo en la superficie de las calzadas
  - Construcción de paredes de retención/relleno
  - Construcción de estaciones
  - Instalación de sistema operativos
  - Instalaciones de estacionamiento
  - Carril guía elevado

1st Street al oeste de Lorena

Puente sobre la Autopista101 al sur de la estación Union Station

Metro

Tópicos del Análisis del Impacto Ambiental

Borrador de la EIS/EIR Capítulos 3 y 4

- Tráfico
- Instalaciones regionales (autopistas)
- Transporte público
- Estacionamiento
- Bicicletas y peatones
  - Uso de terrenos/socioeconómicos
  - Uso de terrenos y desarrollo
  - Desplazamientos y reubicaciones
  - Justicia medioambiental
  - Económico y fiscal
  - Comunidad y vecindario
- Estética y calidad visual
- Calidad del aire
- Cambio del clima
- Ruido y vibración
- Energía
- Riesgos geológicos y sísmicos
- Desechos y materiales peligrosos
- Ecosistemas/recursos biológicos
- Recursos de agua
- Seguridad
- Zonas verdes
- Recursos históricos, arquitectónicos y paleontológicos
- Crecimiento de impactos inducidos
- Impactos acumulativos

24

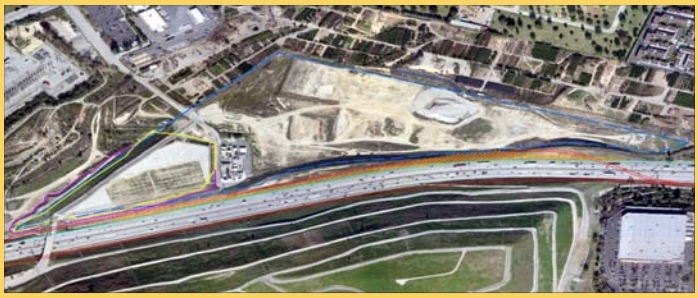
Resultados en Cuanto al Ruido/Vibración

Sección 4.9 del Borrador de la EIS/EIR

- **Mitigación del impacto de la construcción:**
  - Uso de métodos alternativos de construcción en lugares sensibles
  - Uso de barreras temporales contra el ruido
  - Ubicación de equipo de construcción y áreas administrativas y de almacenamiento temporal distanciadas de lugares sensibles
  - Redirigir el tráfico de la construcción y camiones de carga
  - Requerir al contratista que use la mejor tecnología de control disponible
  - Actividades de construcción durante el día y los fines de semana, en la medida de lo posible
  - Notificar al público acerca del calendario de la construcción
  - Mantener una línea de asistencia las 24 horas del día, 7 días a la semana, y una oficina en el terreno

- **Mitigación del impacto operacional:**
  - Reubicación de interruptores y cruces a lugares menos sensibles
  - Instalación de capas de balasto donde sea posible
  - Barreras en la mediana similares a la línea de operación actual
  - Instalación de una pared contra el sonido pequeña a lo largo de la estructura aérea

Metro



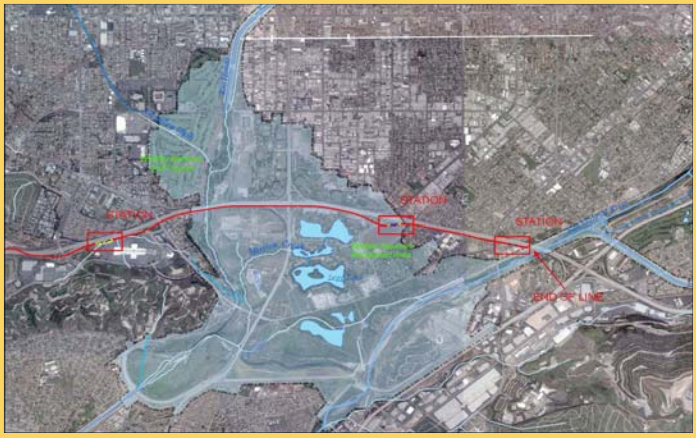
25

Alternativa SR 60 LRT: Obra OII bajo la ley “Superfund”

Sección 4.11 del Borrador de la EIS/EIR

Consideraciones de la obra OII

- Coordinada con la US EPA y New Cure, Inc.
- Métodos propuestos revisados para construir las Parcelas Norte y Sur (North and South Parcels)
- Se han evaluado el suelo, estabilidad de las laderas, controles de erosión y las condiciones del agua en el terreno relacionados con las operaciones del proyecto y la construcción
- Se han considerado opciones de pilotes y métodos de construcción para minimizar los impactos



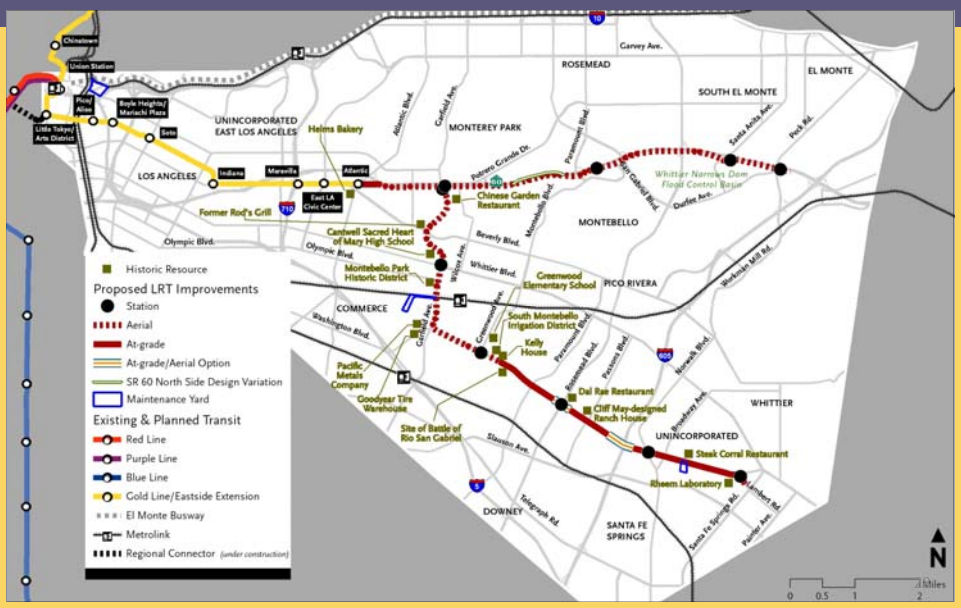
Metro

Alternativa SR 60 LRT: Whittier Narrows

Sección 4.12 del Borrador de la EIS/EIR

Consideraciones acerca de Whittier Narrows

- Coordinado con el US Army Corps of Engineers
- Orden Ejecutiva 11988 emitida en Flood Plain Management para el alineamiento y la estación Santa Anita Station
- Plan de evacuación en caso de inundación en Whittier Narrows
- Se ha preparado un Análisis de Desborde e Inundación entre la Cuenca de Control de Inundación Whittier Narrows (Whittier Narrows Flood Control Basin) para el alineamiento y la estación Santa Anita Station



Metro

Metro

29

Efectos adversos inevitables/impactos significativos

- La Alternativa SR 60 LRT no tendría efectos adversos inevitables/impactos significativos después de la implementación de las medidas de mitigación
- La Alternativa Washington Blvd. LRT tendría los siguientes efectos adversos inevitables/impactos significativos:
  - **Transporte** – 16 intersecciones no pueden ser mitigadas debido a las limitaciones del Derecho a la Vía
  - **Comunidad y vecindario** – Carácter social y físico alterado a lo largo de Garfield Avenue debido a la remoción de recursos comunitarios (Ej. Chinese Garden Restaurant y árboles maduros), un efecto adverso también prevalecería después de la mitigación a lo largo de Washington Blvd.
  - **Visual y estética** – Cambios al carácter visual de Garfield Avenue debido al carril guía elevado; impactos debidos a la sombra a lo largo de Garfield Avenue entre Via Campo y Whittier Blvd.
  - **Impactos acumulativos** – Contribución considerable a los impactos visuales acumulativos e impactos acumulativos en 16 intersecciones

Metro

30

Financiación del Proyecto

- Medida R de 2008 pasada - $1,271 millones para la Fase 2 hacia el Este
- El Plan de Transporte Regional (Regional Transportation Plan) aprobado y el Plan de Transporte de Largo Alcance (Long Range Transportation Plan) de Metro se comprometen a financiar con $2,400 millones a partir de 2026
- Los fondos restantes todavía deben identificarse
- La Junta Directiva de Metro está trabajando para acelerar la financiación de la Medida R e identificar fuentes de financiación adicionales para la segunda y tercera década del proyecto
- La iniciación de la EIS Final depende de que se cuente con la financiación

Eastside Transit Corridor Phase 2 Public Hearings – Sept. 27, 29, 30 and Oct. 1

Corredor de Transporte hacia el Este Fase 2 audiencia pública 27, 29, 30 de sept. y 1ro de oct.

Metro

Draft EIS/EIR Available for Review & Comment

The Draft Environmental Impact Statement/Report (Draft EIS/EIR) for the Eastside Transit Corridor Phase 2 is available for 60 days of public review and comment through October 21 at 5pm.

Each of the public hearings will have displays, a copy of the Draft EIS/EIR and a short presentation summarizing the results of the environmental analysis. Attendees will be able to provide verbal and written comments.

The Draft EIS/EIR is available for review at *metro.net/eastsidephase2* and other locations along the corridor. Visit the project website for a complete list of where you can view the document.

Borrador EIS/EIR disponible para revisión y comentarios

El Borrador de la Declaración/Reporte del Impacto Ambiental (Borrador EIS/EIR) para el Corredor de Transporte hacia el Este Fase 2 está disponible por 60 días para revisión y comentarios del público hasta el 21 de octubre a las 5pm.

Cada audiencia pública contará con exhibiciones, una copia del Borrador EIS/EIR y una presentación resumiendo los resultados del análisis ambiental. Participantes podrán someter comentarios verbales y por escrito.

El Borrador EIS/EIR está disponible en metro.net/eastsidephase2 *y en otros lugares a lo largo del corredor. Visite la página del proyecto para una lista completa de donde puede ver el documento.*

Stakeholder and Community Outreach

1.0 Executive Summary of Public Participation

In November 2014, the Metro Board directed staff to proceed with further study on the two build alternatives evaluated in the 2014 Draft EIS/EIR for the Eastside Transit Corridor Phase 2 project:

1) State Route 60 Alternative
2) Washington Boulevard Alternative

Metro Board direction focused on the need to further respond to comments received from cooperating agencies, including Caltrans, US Environmental Protection Agency (USEPA), US Army Corps of Engineers (USACE), California Fish and Wildlife Service (CDFW) and Southern California Edison (SCE), develop a new north-south connection to Washington Boulevard, and explore the option of operating both alternatives.

In response to the Metro Board direction, the technical scope of work included completing additional technical studies and supporting public outreach activities over an eighteen-month period to respond to the Metro Board motion. This involved a Community Engagement Program throughout the Technical Study process.

Work on the Technical Study began in August 2015. The purpose of the stakeholder and community engagement plan was to coordinate outreach effort throughout the study area to provide project updates, receive feedback on the route concept development process and seek guidance on the overall community engagement strategy.

1.1. Stakeholder Meetings

Engagement efforts focused not only on general project awareness, but also toward engaging the Washington Boulevard Coalition and SR-60 Coalition stakeholders as well as the County of Los Angeles unincorporated East Los Angeles community.

During the Technical Study phase, Metro held a total of 110 briefings throughout the Study Area and hosted two tours of Metro facilities and construction sites.

The following key stakeholders have been reached:

- Monthly Coalition Briefings (30 meetings)
  - SR-60 Coalition
  - Washington Boulevard Coalition
- Other Stakeholder Briefings (80 briefings)
  - City Council members and staff
  - East Los Angeles resident, business, neighborhood and community groups
  - State and Local Elected Officials
  - Chambers & Business Associations
  - Major Property Owners/Developers
- Councils of Government and Service Councils
  - San Gabriel Valley
  - Gateway Cities

- Tours of Maintenance Facilities/Construction Sites
  - Santa Monica Maintenance Facility
  - Monrovia Maintenance Facility
  - Regional Connector Construction Site

1.2. Community Meetings

Metro also hosted two rounds of public meetings (10 meetings total). The first round occurred in March and June of 2016 and the second round of meetings took place in February 2017. Meetings were held in the following communities:

- East Los Angeles (3 meetings)

- Whittier (2 meetings)
- Montebello (2 meetings)
- South El Monte (2 meetings)
- Commerce (1 meeting)

Collectively the meetings were well attended by 735 participants with 106 written comments received.

1.3. Overarching Themes

The overarching themes below emerged from the community feedback and comments received from Rounds One and Two of community meetings:

1. Overwhelming support for the Eastside Phase 2 project, including Washington Boulevard LRT Alternative via the Atlantic Below-Grade Concept, SR60 NSDV LRT Alternative, and the Combined Concept
2. Interest in **connecting communities** and improving access to **employment centers** and Metro's **regional transit system**
3. Concerns regarding **impacts to businesses** during construction
4. Interest in **economic development opportunities** along the corridor
5. Emphasis on station **accessibility and safety**

The following report provides complete details for each round of meetings. Appendix A includes a full list of the coalition, community group, stakeholder and public meeting listings.

2.0 Round One of Public Meetings (March and June 2016)

2.1. Attendance and Participation

In March and June of 2016, Metro hosted a first round of four (4) public meetings in the cities of Whittier, Montebello, South El Monte, and unincorporated East Los Angeles as well as a follow-up meeting in June of 2016 in East Los Angeles to update the community and receive input on the Eastside Transit Corridor Phase 2 project Technical Study. Collectively, the meetings were attended by 417 participants and 75 comments were received.

Table 1 below summarizes the meeting attendance for the individual meetings held in Round One. Appendix B includes a copy of the community meeting sign-in sheets and completed comment cards.

2.2. Meeting Format

The community meetings began with an open house session where the Project Team welcomed the attendees to look at poster boards depicting the project study background, process, two project alternatives and the Washington Boulevard Alternative north-south route concepts under study that included Arizona Avenue, Atlantic Boulevard, and Garfield Avenue.

Metro staff gave a presentation on the refinement of the SR-60 North Side Design Variation Alternative (NSDV) and the study effort underway to identify new Washington Boulevard route concepts as well as the next steps for the Technical Study.

After the presentation, attendees participated in breakout group discussions and provided feedback related to the alternatives. The objective of the breakout groups was to gain the community's knowledge and perspective regarding the two alternatives; SR-60 NSDV Alternative and the three north-south route concepts to Washington Boulevard. Each table had two staff to facilitate and transcribe the discussion. Project study area rollout maps with the project alternatives and routing concepts were provided to assist with the discussion. Participants were encouraged to write down comments and questions on the rollout maps or the flip charts, after which a designated spokesperson summarized the group's comments to the entire room. Metro concluded the meeting by taking general questions from participants.

For the second East Los Angeles meeting in June 2016, Metro staff presented supplemental information on two primary construction methods for underground light rail lines and stations: tunnel boring machine (TBM) and cut-and-cover. During the breakout group discussion, participants provided feedback on additional topics such as preferred north-south alignments through East Los Angeles, potential locations for construction staging and stations, potential TBM launch sites, identification of properties to avoid, and areas to target for transit oriented development and economic development. Appendix C includes community meeting boards, presentations and meeting materials.

2.3. What We Heard

General take-aways and common themes from the Round One of meetings include:

- Place station locations where there are existing bus routes in order to simplify connectivity.
- Residents and business representatives shared the desire to see a transit system and/or station that supports economic development.
- Residents had concerns about safety, construction impacts, traffic, noise, and air pollution.
- Many attendees expressed a desire to ensure minimal impact to residents, businesses and motorists during construction.

- Populated areas need public transit options, providing connections to colleges, work activity centers and key destination points.
- Place stations at key destination points and/or activity centers.
- Desire for accessibility to other transit systems within the Metro regional system.
- There were concerns about for the potential loss of business, specifically during construction.
- Provide a cost-effective and convenient mode of transportation in dense communities.
- Traffic in East Los Angeles is a major quality of life issue. Solution is needed to alleviate street traffic in East Los Angeles.

2.4. Individual Meeting Summaries

2.4.1. City of Whittier - Monday, March 28, 2016

General

Participants were strongly in favor of the Washington Boulevard Alternative and shared several general comments. Station locations are vital to the success of a system. Residents suggested strategically placing locations where there are existing bus routes in order to simplify connectivity. Design of park-and-rides also weighed heavily on this community and the majority agreed that ample parking and clean restrooms are a must. Further, most agreed that minimizing impacts to residents is highly important and should be greatly considered regardless of the alternative that is chosen. Lastly, participants agreed that car ownership is becoming more and more expensive and younger and older generations need alternative means of transportation.

SR-60 NSDV Alternative

Meeting participants stated their concern for a lack of ridership, particularly on the weekends, and the environmental impact it would have at several locations. Additional comments included that the SR-60 currently serves as a transportation facility serving the adjacent communities

unlike the communities along the Washington Boulevard corridor, where there is a lack of freeways connecting to Whittier. It was also reported that the SR-60 NSDV Alternative will not serve those who need it most, referring to working class communities in the East Los Angeles and Commerce areas.

Washington Boulevard Alternative

Whittier residents and stakeholders reported the need for transit connectivity in the city and shared their preference for the Washington Boulevard LRT Alternative. It was reported that Whittier is in the process of planning a vast amount of opportunities for economic development and would like direct transit connections to the regional hospital, Uptown Whittier, the many social services facilities and to several colleges in the city. Those present also noted the benefit to East Los Angeles in regards to connectivity and the possibility for economic growth in that area also.

Participants were heavily in favor of a light rail system, although support leaned strongly towards the Washington Boulevard Alternative. There was concern of the impact the Arizona Avenue route concept would have on the East Los Angeles residents. Attendees expressed a preference support for the Atlantic Boulevard Below-Grade route concept over the Arizona route concepts but several voiced concerns with an Atlantic route concept. Some of these concerns pertained to potentially worsening traffic and impacts to businesses along Atlantic Boulevard during construction and operation. Participants expressed only minimal support for the Garfield Avenue route. Those present were concerned about the cost of an underground configuration and were not certain it served East Los Angeles and Commerce as well as the Arizona Avenue and Atlantic Boulevard concepts.

Concerns about the Washington Boulevard option were related to lack of ridership and the possibility of increased traffic on Washington Boulevard as that is the major thoroughfare for diesel trucks travelling east of the City of Los Angeles. Those present were also concerned for emergency responders who may not be able to get through the street with the addition of a light rail train as there is already an issue of congestion.

Comment Cards (27)

Written comments received closely paralleled the verbal comments made during the meeting. The Washington Boulevard Alternative was favored for the following reasons: connectivity for students, accessibility for East Los Angeles residents, serves communities, less environmental impacts, greater ridership and will serve a community that lacks transit options. There was great support for a subterranean configuration regardless of the north-south route concept.

There were some concerns regarding the Washington Boulevard Alternative. Some reported the possibility of crime increase and construction impacts to residents. A few attendees mentioned the possibility of eminent domain and the need for greater community involvement. The greatest concern was for the use of Washington Boulevard as a major truck route and the impact the light rail system would have on the transportation of cargo along that route.

Attendees comments regarding the SR-60 NSDV Alternative suggesting that the route does not connect communities and would only be used by weekday commuters. Many were concerned about the environmental impacts and ultimately most were not in favor of an alternative that does not directly serve the City of Whittier. There was minimal support for the SR-60 NSDV Alternative and a perception that it could be selected over Washington Boulevard because it is believed that the route would be less impactful on residents and less expensive to build.

Participants identified a great need for parking and connectivity to other transit options, particularly at the end of the route. There were also many that asked that the project be completed sooner than what is currently planned.

2.4.2. East Los Angeles - Tuesday, March 29, 2016

General

Participants at this meeting shared several general comments regarding Metro, including Metro Gold Line Eastside Extension (MGLEE) Phase 1 small business impacts and the need for additional community outreach. Attendees suggested project designers be aware of existing and planned bike paths and bus routes during the Technical Study. Additionally, they shared a desire for designing aesthetically pleasing stations with the community in mind, especially when it comes to scale. East Los Angeles residents and business representatives shared desire to see a transit system/station that supports economic development to encourage nearby communities to shop in East Los Angeles.

Meeting participants continue to be concerned about the outreach in their community. Comments echoed a long standing history with Metro and what the community deems to be a complete lack of engagement and transparency. Other common comments were related to the transportation impacts the community has had to bear with the construction of Interstate 710 (I-710), Interstate 5 (I-5), SR60, and MGLEE Phase 1.

SR-60 NSDV Alternative

Meeting participants voiced marginal support for the SR-60 NSDV Alternative. East Los Angeles residents are concerned about who the SR-60 NSDV Alternative would serve. Comments spoke

to the uncertainty of how the Alternative will serve the communities as much as merchants along the freeway. There was also concerned voiced regarding the environmental impacts that the route would have on the Whittier Narrows Recreation area, the Tehachapi electric power lines and the Superfund site. Support garnered for this alignment was mostly due to the route being less impactful to residents, the possibility of a future connection to the Inland Empire and the supposition that it would have greater ridership than the Washington Boulevard Alternative.

Washington Boulevard Alternative

Meeting participants voiced support with the stipulation that it be built underground. There was overall support for the project, but East Los Angeles residents were adamant that the configuration had to be subterranean. There was a desire for accessibility to other transit systems as well as to surrounding areas for shopping and employment opportunities, but had major concerns regarding an at-grade or an aerial alignment. Concerns reported at the tables included safety, construction impacts, traffic, loss of already limited parking, noise pollution (steel on steel and horn), impacts to businesses, specifically those already financially struggling, complication of alignment, and lack of ridership.

Comments Cards (7)

A total of seven comment cards were submitted by attendees during the meeting in East Los Angeles. Commenters shared support for the SR-60 NSDV Alternative due to the minimal impact on the East Los Angeles community and that it could be built sooner than the Washington Boulevard Alternative, given that it has been analyzed further in the 2014 Draft EIS/EIR. Suggestions included: building the system on the center of the freeway and providing a station at Whittier Narrows.

The majority of the participants favored the alternative with the condition that it is built as a subterranean alignment either on Arizona Avenue or Atlantic Boulevard. Other commenters shared a preference for the Washington Boulevard Alignment since it would provide access to the Whittier Boulevard shopping district, Citadel Outlets, and Commerce Casino. Attendees expressed support for Arizona Avenue as well as Atlantic Boulevard. Although there was support for both if the alignment is built underground, concerns for Arizona Avenue ranged from safety for motorists and pedestrians to property impacts. Concerns for Atlantic Boulevard mostly centered on business disruption and traffic impacts.

Participants expressed concern about any at-grade and aerial alternative regardless of the location, due to the potential decrease in property values, traffic impacts, and adverse health effects to the community. Other general comments centered on the history of East Los Angeles and the perception of not being treated equitably as compared to surrounding areas. There were also comments expressing a perceived history of inadequate outreach to the East Los Angeles community and facilitation concerns at the workshops. Lastly, commenters included a suggestion to survey current MGLEE Phase 1 riders to garner feedback.

2.4.3. City of Montebello - Wednesday, March 30, 2016

General

Participants at this meeting expressed support for the Eastside Phase 2 Project. Most participants expressed any light rail system alternative chosen must be placed underground to avoid impacts to communities, businesses, and traffic. Participants expressed supportive comments to build both alternatives, pointing out the benefits. The SR-60 NDSV Alternative would run alongside the SR-60 freeway, encouraging motorists out of their cars and freeway as well as potential future connections with activity centers and schools, such as Rio Hondo College and Cal Poly Pomona.

The Washington Boulevard Alternative (north –south concept built underground) would provide a cost-effective and convenient mode of transportation to a highly densified community, creating the opportunity for transit-oriented development near stations. Comments expressed that if the Washington Boulevard Alternative is chosen, the north-south connector streets should be either Arizona Avenue or Atlantic Boulevard (underground). General comments regarding the construction of the portals for either north-south route concept is of great concern. There was no support expressed for the Garfield Avenue underground alignment.

Other comments including connecting with Pomona Boulevard to Gerhart Avenue to Beverly Boulevard to head east and cross over the San Gabriel River and I-605 Freeway and connecting to Washington Boulevard to the City of Whittier.

SR-60 NSDV Alternative

Participants voiced support for the SR-60 NSDV Alternative and expressed concerns about the Tehachapi electrical power (SCE) wires with a request to place the utilities underground. This route would have minimal impact to residents, businesses, and motorists during construction and during operation, as the majority of the route would be adjacent to the SR-60 freeway.

Supporters of the SR-60 NSDV Alternative commented that the route could potentially continue east and connect with Cal Poly Pomona and an entire corridor with better potential for north-south connectivity at streets like Santa Anita Avenue and Rosemead Boulevard. Further, attendees commented that the SR-60 NSDV Alternative is a shorter route than the Washington

Alternative and may be cheaper and faster to build as well as providing a system with faster speeds.

Washington Boulevard Alternative

There were several comments supportive of the Washington Boulevard Alternative, but participants emphasized that the alignment needs to be underground, specifically the north-south route concepts in East Los Angeles in order to minimize impacts to the community, businesses, traffic, and acquisition of property. Participants also mentioned that this option would provide the nearby communities the opportunity to connect to activity centers such as East Los Angeles College, Garfield High School, shops, and more. Some suggested that having a transit center at Atlantic Boulevard and Whittier Boulevard would be beneficial for the transit-dependent community. This route would also spur potential for transit-oriented development, creating more opportunity and connectivity for a densely populated area.

Comment Cards (9)

Participants favored the Washington Boulevard north-south concepts for the following reasons: the route travels through a densely populated area that needs public transit options, providing connections to colleges, work activity centers, and new opportunities. A comment was submitted to not build on Garfield Avenue due to possible impacts to three schools, a church, and numerous small businesses.

One attendee expressed support for the SR-60 NSDV Alternative and suggested eventually continuing the route south on the I-605 freeway to the I-405 freeway, ending at Veteran's Hospital. Further, continuing on the I-405 freeway to end at Beach Boulevard or even further to Costa Mesa, reducing traffic on two freeways.

2.4.4. City of South El Monte - Thursday, March 31, 2016

General

Participants at this meeting were in favor of the Eastside Phase 2 project. The majority of participants expressed support of the SR-60 NSDV Alternative. Comments received during the

presentations included: placing the alternative underground and even fewer to underground it at the Paramount Boulevard on-ramp.

Comments about the SR-60 NSDV Alternative related to several issues: the minimal impacts to communities, businesses, and future opportunity to continue east along the SR-60 freeway to connect to other activity centers and colleges.

SR-60 NSDV Alternative

There were multiple supportive comments for extending the Eastside Phase 2 project utilizing the SR-60 NSDV Alternative. Comments in support of the SR-60 NSDV Alternative include that it is the most shovel-ready project, there are minimal impacts to communities and businesses, there are few environmental impacts, there is potential for extending further east, it is the most practical, it alleviates freeway congestion, it is a shorter route and therefore, has faster travel times. Additionally, it was mentioned that stations at key destination points and/or activity centers such as Whittier Narrow Regional Park, shopping centers and at Rosemead Boulevard should connect with major arterial north-south buses. Also, a recommendation was made to move the identified station at the Shops at Montebello Mall east of the of the mall to allow the City of Rosemead to also have a station. One commenter requested the SR-60 NSDV Alternative be placed underground or grade-separated Paramount Boulevard on-ramp.

Washington Boulevard Alternative

The Washington Boulevard Alternative was discussed as a secondary alternative. Recognition was acknowledged by several tables that the Washington Boulevard Alternative may alleviate street traffic in the East Los Angeles area and would provide the densely populated area with transportation access, economic growth opportunities and may reduce buses on streets.

Comment Cards (12)

The SR-60 NSDV Alternative is largely supported by those who submitted comment cards for the following reasons: the project would be more shovel-ready, minimal impacts to communities, businesses and traffic, connections to major north-south arterial streets, more opportunity to connect with other activity centers and colleges along the SR-60 freeway, east of the I-605 freeway. Participants also noted that the SR-60 NSDV Alternative is the most feasible with the least amount of disruption, provides ample room for growth of supporting infrastructure and connecting business opportunities. Further, the SR-60 NSDV Alternative would connect to Whittier Narrows, provide transportation connections for the southern portion of the San Gabriel Valley, would mitigate air pollution by creating the opportunity for motorists on the SR-60 freeway to use light rail and alleviate overcrowding on the heavily used east-west bus routes.

2.4.5. East Los Angeles - Wednesday, June 22, 2016

General

Participants at this meeting were supportive of extending the Eastside Phase 2 project further east and reported some general comments. A few participants shared their desire to have both alternatives constructed, but the strong support was for the SR-60 NSDV Alternative. Overall, most felt it was a better project and would relieve the East Los Angeles community of on-going construction. The Washington Boulevard Alternative via Atlantic Boulevard or Garfield Avenue garnered negligible support. Furthermore, the majority of those present were adamant that the Washington Boulevard Alternative via Arizona Avenue would gravely impact residents. Because the local community has experienced lots of development over the years, residents expressed some concern regarding construction, but were generally supportive of the SR-60 NSDV.

East Los Angeles residents continue to be concerned about the level of outreach in their community. A few workshop group leaders alluded to the desire for more engagement. The community shared their concerns of Metro's notification strategy. The community's paramount concern is that they would continue to be fractured by freeways and transit systems, such as the proposed Eastside Transit Corridor Phase 2 project. In their opinion, each new project jeopardizes their quality of life for the benefit of the cities around them.

SR-60 NSDV Alternative

Although many reported concern regarding the environmental impact the SR-60 NSDV Alternative would have on the Whittier Narrows area and the Superfund site, it was less poignant than the apprehensions reported regarding environmental effects the Washington Boulevard Alternative would have on the East Los Angeles community. Support for the SR-60 alignment stems from the desire to keep the light rail system from further diminishing quality of life in East Los Angeles, as well as reducing impacts on residents and businesses, the potential this alignment provides to extend further east to the Inland Empire, and the supposition that it would have greater ridership than the Washington Boulevard Alternative.

Washington Boulevard Alternative

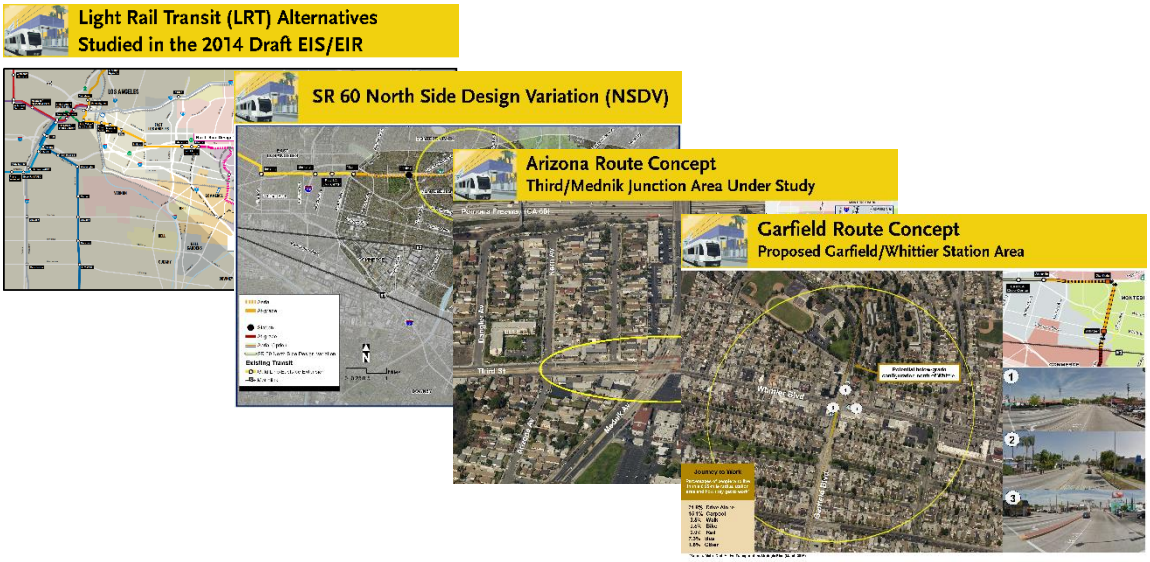
There was a desire for accessibility to other transit systems as well as to surrounding areas for reasons of shopping, employment, etc. However, they also reported that the community already has public transit that provides those services. For this reason, they were more focused on resolving their concerns of the project.

Concerns reported included safety, construction impacts, traffic, minimization of already limited parking, noise pollution (steel on steel and horn), impacts to businesses specifically those already financially struggling and mom-and-pop shops, and lack of ridership. The overall consensus was that the Washington Boulevard Alternative, if constructed through Arizona Avenue or Atlantic Boulevard, regardless of configuration, would only serve to further fragment a community that is struggling to maintain any communal semblance and that is already deeply polarized from cities adjacent to it. Although residents acknowledge the potential development and economic growth that may occur after construction, attendees stated the minimal benefit is not worth the risk of potentially further disenfranchising an already marginalized community.

Comments Cards (17)

Attendees described concern related to the possible configurations, including concern for severe environmental impacts from noise pollution during construction, degradation of air quality during construction, and significant increase in congestion, both during construction and once the project has been completed. Participants' comments centered on what many believed to be less outreach and a continued lack of transparency from Metro. Commenters questioned Metro's intentions for withholding cost figures as well as the accuracy of the timeline provided.

Attendees provided support for the SR-60 NSDV Alternative, as well as some support and dissent of the Washington Boulevard Alternative. Most commenters favored the SR-60 NSDV Alternative, because the alternative would keep the project out of the East Los Angeles community. The SR-60 NSDV Alignment is favored by many, because it would have the least amount of impact on residents and businesses and because it would provide direct service to The Shops at Montebello and direct access through the San Gabriel Valley. Many participants commented that the SR-60 NSDV is the better option, because it would be less costly and could be built much sooner than the Washington Boulevard Alternative. It was also suggested to build the SR-60 NSDV Alternative, then bring it south on Rosemead Boulevard to Washington Boulevard.



Some attendees shared statements in dissent of the Washington Boulevard Alternative with an overwhelming opposition to the Arizona Avenue north-south concept. The most resounding reason centered on the impact it would have on the residential neighborhood, coupled with what many shared, as a lack of substantial benefits.

Many commenters included statements of concern for safety, particularly to children, as Arizona Avenue is home to a heavily attended middle school. There was only minimal support expressed for the Atlantic Boulevard north-south concept. There was also great concern expressed for the

potential loss of business, specifically during construction. Based on the written comments, it appears most participants feel that the only area that may benefit from the Atlantic Boulevard Alternative is the Citadel and businesses along Whittier Boulevard. Several participants commented on the inequity to East Los Angeles residents based on the perceived ongoing burden of projects to the area, while other cities reap the benefits.

2.5. Meeting Materials for March 2016 Meetings

Participants were provided with a bilingual English/Spanish meeting agenda to help orient them around the room as well as a comment card. During the open house session, 26 bilingual English/Spanish exhibit boards and two Google Earth videos were strategically placed around the meeting room covering three main topics: 1) Technical Study background, 2) SR-60 NSDV Alternative and 3) Washington Boulevard Alternative north-south route concepts.

2.6. Notification for March 2016 Meetings

The notification of the public meetings was accomplished through a variety of methods. The combination of communication tools guaranteed the majority of the targeted stakeholders would be reached. Traditional methods provided information to stakeholders in a proactive way making it available without logging on to a computer or checking a mobile device. Conversely, social media users take a more participatory role in the way they receive information, and usually maintain a Facebook, Twitter, or email account. For the March 2016 meetings, notification was accomplished through the following methods:

Direct Mail Noticing

For direct mail notification of the public meetings, Outreach staff used the Eastside Transit Corridor Phase 2 master project database, which includes 3,893 stakeholders. The project's master database was initiated during the early scoping period in 2007 and has been refined and updated throughout the life of the project.

Mailers were developed in a user-friendly format designed for quick public consumption in full color, bilingual English/Spanish and included a brief project summary, meeting dates, times and locations. Notices were sent to approximately 8,500 stakeholders (property owners, business and residential occupants within 500 feet of alternatives or north-south route concepts) on March 10, 2016.

The rationale for incorporating such an extensive property owner and occupant listings was to ensure communication with stakeholders who may have been involved at various stages of the project and ensure the all parties were informed of the latest project information.

E-blast Invitations

Outreach staff produced a bilingual English/Spanish electronic "e-vite" noticing the meeting purpose, dates, times and locations, as well as a brief project background. Electronic notices were e-mailed to database contacts that had previously provided their e-mail address to Metro. E-blasts are the most cost effective method of providing meeting notifications and reminders. An initial e-blast was sent to 2,216 contacts from the stakeholder database on March 11, 2016 with a reminder e-blast sent out to the same group on March 25, 2016.

Project Website

The project website serves as a public portal for easy, fast and inexpensive information dissemination. The website was updated on March 14, 2016 to show community meeting information.

Metro Facebook

A key component in achieving overall public awareness in today's digital world is social media. Utilization of Facebook has been instrumental in the notification of project events and dissemination of information for this project. Metro's project specific Facebook page was updated with community meeting information on March 14, 2016.

Electronic Boards

The City of South El Monte noticed the meeting on their electronic board, located at City Hall.

Street Banners

To increase meeting awareness, Outreach staff coordinated with project cities and placed banners along heavily traveled corridors and public areas within the study area. Banners were placed in the cities of Commerce, Rosemead, Santa Fe Springs, Whittier, South El Monte, Monterey Park and the community of East Los Angeles.

Door-to-Door Notice Delivery

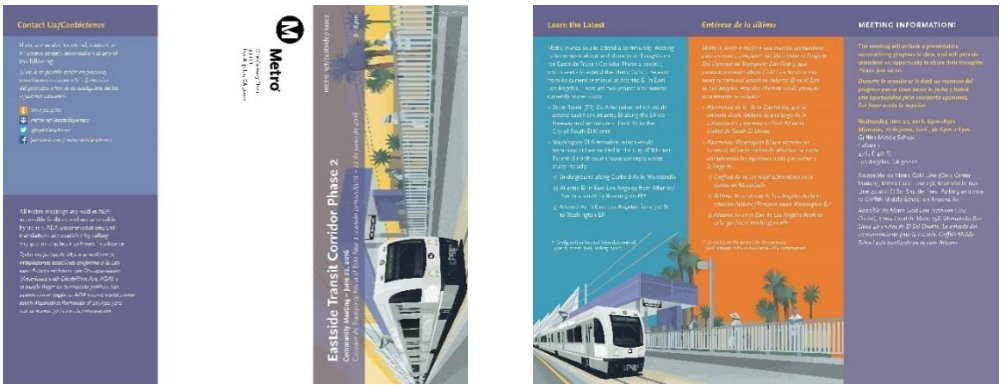
Door-to-door noticing was completed on March 16, 2016. Arellano Associates staff members, hand-delivered notices to businesses and residences along Arizona Avenue from 3rd Street to Whittier Boulevard as well as Atlantic Boulevard from the SR-60 Freeway to the I-5 Freeway.

Flyers

Flyers were placed on City Hall counters and distributed at 14 public libraries across the project corridor.

Project Helpline

The project helpline was updated with meeting details, including dates and times.



Metro's 'The Source'

An article promoting the community meetings was posted to Metro's 'The Source' on March 21, 2016.

Other Extended Outreach

As part of the extended outreach, the Outreach staff identified stakeholders to target for assistance with supplemental outreach activities and project awareness. These included corridor cities, local Chambers of Commerce, corridor city libraries, community groups, schools, and elected officials' offices. These stakeholders were contacted and encouraged to promote the community meetings and disseminate notification information through a variety of methods, including e-blast, website posts, social media posts, and hard copy meeting flyers on public counters.

Notification for June 2016 Meeting

Notification for the June 22nd community meeting in East Los Angeles was accomplished through various communication tools including: printed materials, direct mailers to residences within the 90022 ZIP code (within the boundaries of I-710 on the west, I-5 on the south, Gerhart Avenue on the east and Floral Avenue on the north), the issuance of a press release to appropriate media outlets (such as the Eastern Group Publications), advertising in the local paper, public signage, street banners, distributing flyers door-to-door on Arizona Avenue and Atlantic Boulevard, distributing flyers at Metro Gold Line stations, an article on Metro's webpage and notice on the project page, e-blasts to the project database, social media and various briefings to elected officials' representatives and other key stakeholders. The project database for the e-blast was expanded to include participants from the previous March 2016 community meetings. Noticing materials were published in English and Spanish.

Copies of all notification materials and a comprehensive list of notification activities are included in Appendix D.

3.0 Round Two of Public Meetings (February 2017)

3.1. Attendance and Participation

Metro hosted a second round of five (5) public community meetings in February 2017 in the cities of Whittier, Montebello, South El Monte, Commerce, and the unincorporated community of East Los Angeles to update the community and receive input on the Eastside Transit Corridor Phase 2 Project Technical Study. Collectively, the meetings were attended by 318 participants with a total of 31 written comment cards received. The table below summarizes the meeting attendance for the individual meetings held in Round 2.

Table 2: Round Two Community Meeting Information

Date	Meeting Location	# of Participants	# of Comment Cards
Monday, February 6, 2017 6:00 PM to 8:00 PM	Whittier Senior Center 13225 Walnut St, Whittier, CA 90602	96	10
Tuesday, February 7, 2017 6:00 PM to 8:00 PM,	Quiet Cannon 901 Via San Clemente, Montebello, CA 90640	65	8
Wednesday, February 8, 2017 6:00 PM to 8:00 PM	South El Monte Senior Center 1556 Central Av, South El Monte, CA 91733	48	2
Wednesday February 15, 2017 6:00 PM to 8:00 PM	Commerce Senior Center 2555 Commerce Way, Commerce, CA 90040	39	4
Thursday February 16, 2017 6:00 PM to 8:00 PM	AltaMed PACE Center 5425 East Pomona Bl, Los Angeles, CA 90022	70	7
Emailed comments			1
Total:		318	32

To see a copy of the community meeting sign-in sheets, speaker cards and completed comment cards, please refer to Appendix B.

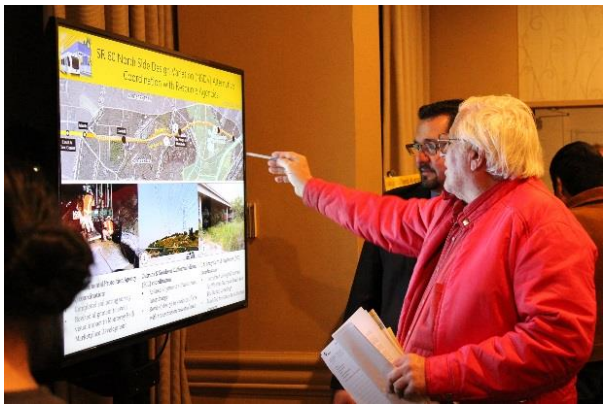
3.2. Meeting Format

The community meetings began with an open house session where the Project Team welcomed the attendees to review poster boards and electronic screens depicting the project study background, process, and the two project alternatives: SR-60 NSDV Alternative and Washington Boulevard Alternative north-south route concepts under study (Arizona Avenue, Atlantic Boulevard and Garfield Avenue).

Metro staff gave a presentation which provided an update on the SR-60 NSDV Alternative technical investigations as well as the results of the Washington Boulevard Alternative routing concepts, which resulted in the recommendation to carry forward Atlantic Boulevard Underground as the new Washington Boulevard Alternative. Funding through Measure M for the project was also briefly discussed. Finally, the topic of a Combined Alternative was introduced and explained. The Combined Alternative was illustrated on a white board to depict how operations of a Combined Alternative can service three different routing concepts:

A) Santa Monica to South El Monte

B) Santa Monica to Whittier



C) South El Monte to Whittier

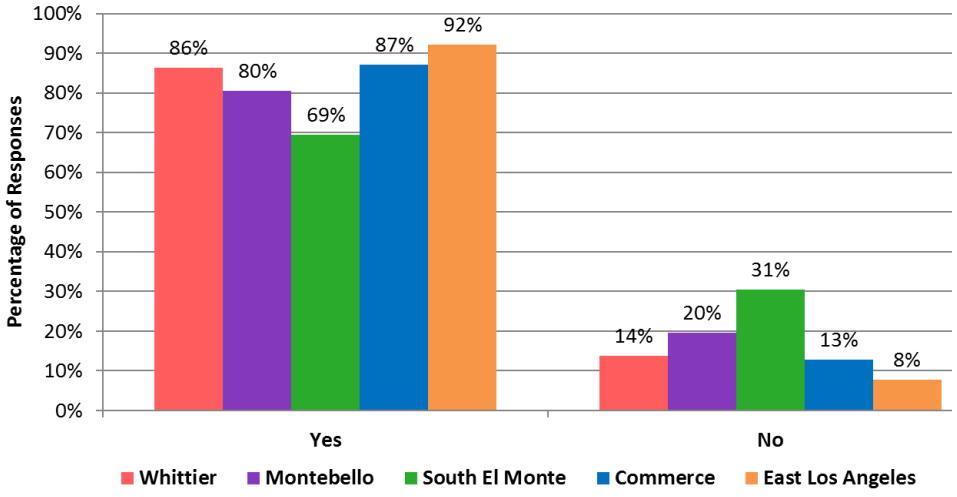
Following this portion of the presentation, attendees participated in a survey exercise, conducted using Turning Point polling software. This software utilizes a remote wireless device given to each participant allowing anonymous real-time audience response and preference voting that is compiled immediately as a pie or bar chart on the PowerPoint slides. This tool enables better facilitation of meetings and gives participants an equal voice in the process, limiting vocal audience members from dominating the meetings with their individual opinions. This exercise resulted in a robust discussion and question-and-answer session between community members and the Project Team. The combined results are

provided below, with detailed reporting per meeting provided in Appendix C. Metro concluded the meeting by taking additional questions and comments from participants.

3.3. What We Heard

Individual summaries of what was discussed at each public meeting are provided in the following pages. However, a brief compilation of the overarching comments and themes with aggregate survey results from the meetings is below. Individual meeting survey results are provided in the appendices section of the report.

1. Overall, there is overwhelming support for the Eastside Phase 2 project and the initiation of the environmental document.
2. Community members and stakeholders emphasized that the community within the project study area is highly dependent on public transportation and would like to see implementation of this project.
3. Comments received from these outreach meetings generally communicated a high level of support for the Washington LRT Alternative with the Atlantic Underground Routing Concept as the new connection to Washington Boulevard. There was also support for the SR-60 NSDV LRT Alternative and a moderate level of support for the Combined Concept.

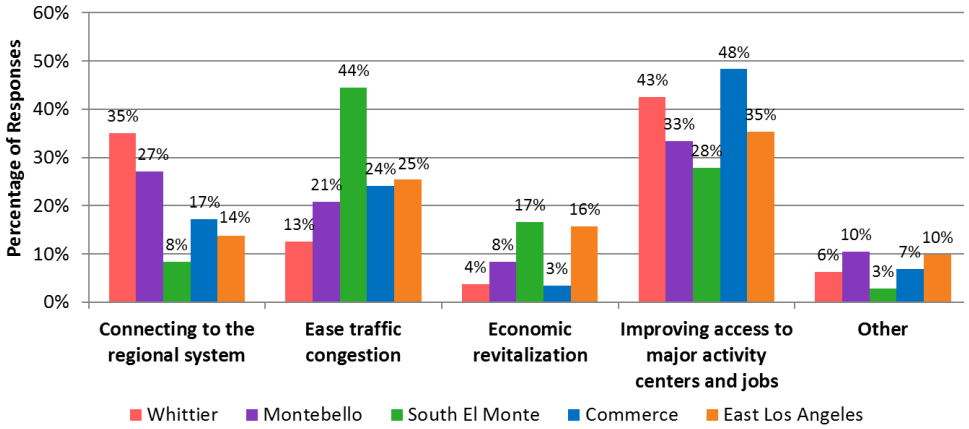


4. Although the project is highly supported, the participants shared concerns regarding the potential impacts during the construction of the system especially regarding traffic and business disruption and/or relocation.
5. The community values access to jobs, activity centers within the study area and connectivity to the transit system throughout the Los Angeles Region. Participants highlighted the importance of designing the stations with ease of access for pedestrians, and cyclists and to park-and-ride lots.
6. Outreach to youth and the younger generation is suggested during the next phase of work. The design of this project should have the younger generation in mind given that they will be the ones who ultimately will benefit from this system as it is more than a decade away from becoming a reality.

3.4. Survey Results

Toward the end of the presentation, attendees participated in a survey, conducted using Turning Point polling software. This exercise resulted in a robust discussion and question and answer session between community members and the Project Team. Several key areas of consensus and themes emerged based on survey results and comments made. First, there was strong support expressed for the Atlantic Underground Option as the new Washington Boulevard Alternative. Of 235 respondents surveyed at the February 2017 community meetings, 63% agreed that the Atlantic Underground Option has sufficient merit to be recommended as the new Washington Boulevard Alternative. This result was strongly corroborated by sentiments expressed at the community meetings, particularly from attendees who made comments at the East Los Angeles meeting on February 16, 2017. Second, there was openness to studying the "Combined" Alternative in the next phase of work, as evidenced by the 50% of respondents who felt that the "Combined" Alternative had enough merit to study in the next phase plus an additional 16% of respondents who expressed the Combined Alternative may have some merit to be further studied. The consolidated survey results from all five community meetings are summarized below, with detailed reporting per meeting provided in Appendix C.

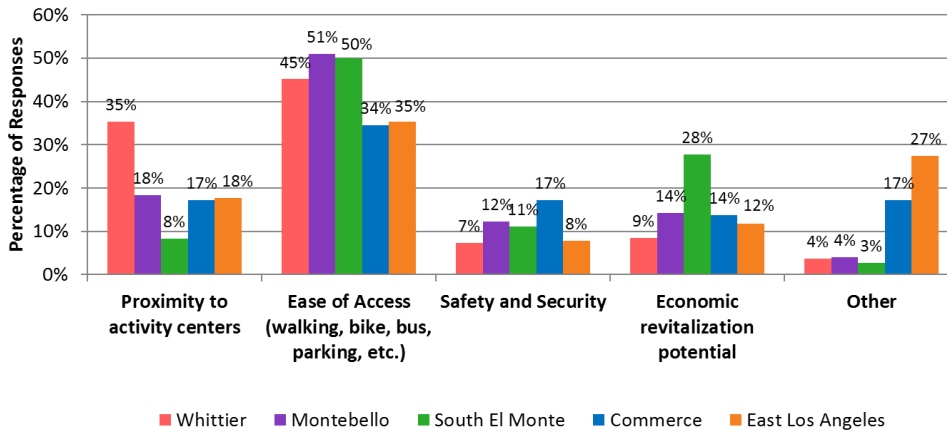
1.) Have you ever taken a trip on the Metro Gold Line? (multiple choice)



Response	TOTAL	%
Yes	201	84%
No	38	16%
Total	239	

Summary:
84% voted "yes" they have taken a trip on the Metro Gold Line

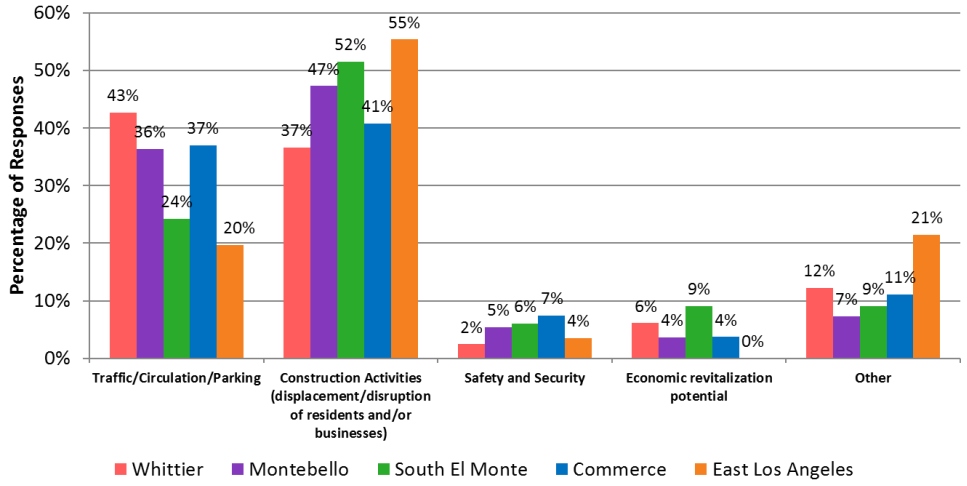
2.) What is the most important reason for implementing the Eastside 2 extension? (multiple choice)



Response	TOTAL	%
Connecting to the regional system	56	23%
Ease traffic congestion	56	23%
Economic revitalization	22	9%
Improving access to major activity centers and jobs	92	38%
Other	18	7%
Total	244	

Summary:
38% voted for "Improving access to major activity centers"
23% voted for "connecting to the regional system "
23% votes for "ease traffic congestion"

3.) What is the most important consideration for a Metro Rail station? (multiple choice)

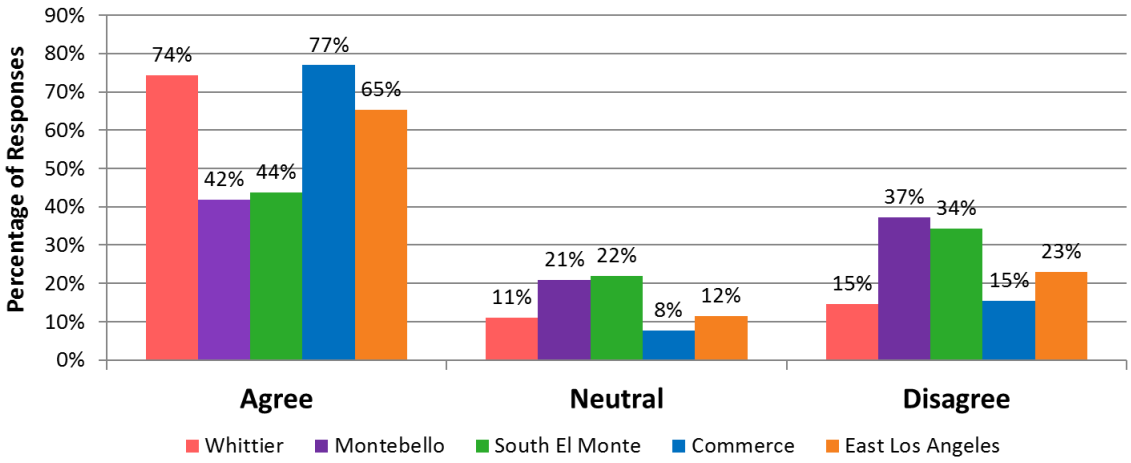


Response	TOTAL	%
Proximity to activity centers	55	22%
Ease of Access (walking, bike, bus, parking, etc.)	108	44%
Safety and Security	25	10%
Economic revitalization potential	34	14%
Other	25	10%
Total	247	

Summary:
44% expressed Ease of Access (walking, bike, bus, parking, etc.) consideration for a Metro Rail Station

4.) Based on what you heard today, what is your biggest concern? (multiple choice)

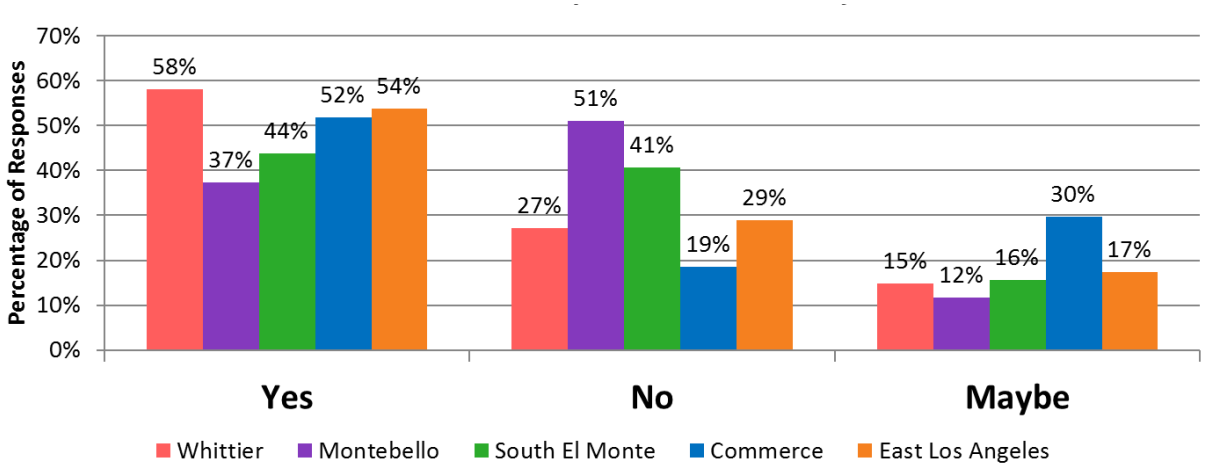
Response	TOTAL	%
Traffic/Circulation/Parking	84	33%
Construction Activities (displacement/disruption of residents and/or businesses)	115	45%
Safety and Security	11	4%
Economic revitalization potential	11	4%
Other	32	13%
Total	253	



Summary:

45% of the voters expressed Construction Activities (displacement/disruption of residents and/or businesses) is their biggest concern

5.) Do you agree or disagree with the following statement: "The Atlantic underground concept has enough merit to be recommended as the new Washington Boulevard Alternative." (multiple choice)



Response	TOTAL	%
Agree	147	63%
Neutral	33	14%
Disagree	55	23%
Total	235	

Summary:
63% of the voters agreed "The Atlantic underground concept has enough merit to be recommended as the new Washington Blvd Alternative

6.) Based on what you heard, is there merit in adding a Combined Alternative that includes both SR-60 and Washington Boulevard in the next phase of the study? (multiple choice)

Response	TOTAL	%
Yes	122	50%
No	81	33%
Maybe	40	16%
Total	243	

Summary:

- 50.2% of the voters voted "Yes" that "…there is merit in adding a combined Alternative that includes both SR-60 and Washington Blvd in the next phase of the study".
- 33.3% voted "No"
- 16.5% voted "Maybe"

3.5. Individual Meeting Summaries

3.5.1. City of Whittier - Monday, February 6, 2017

Overall, Whittier residents are very supportive of the project and are excited about the Eastside Phase 2 project providing access to the rest of the Los Angeles region. Most attendees agreed that public transportation infrastructure is necessary in Los Angeles County, and especially in Whittier. The City is a bedroom community with limited freeway access and public transportation options. The Eastside Phase 2 project would provide the much needed transportation support and access to the neighboring communities.

Some attendees voiced concern regarding what they perceive to be an unfair treatment of projects on the Eastside of Los Angeles, particularly when it comes to underground routes. Whittier residents feel that since they are also contributing to Measure R and Measure M funding, they are entitled to transit services in their city, as well as consideration and access to underground alternatives.

3.5.2. City of Montebello - Tuesday, February 7, 2017

Local residents are very interested in learning more about the alternatives and the potential impacts to the City of Montebello. Recurring concerns included financial contribution to maintenance of facilities, perceptions of safety on the trains and at stations, impacts to traffic, businesses, and communities; and preferential treatment to West Los Angeles over the Eastside of the county. Residents want to ensure that underground options are considered and offered for the project. Residents also highlighted the importance of active transportation and the integration of bike amenities to all stations. Some participants requested that residents in South Montebello also be notified of future meetings, as there did not seem to be awareness of the project in this area of the city.

3.5.3. City of South El Monte - Wednesday, February 8, 2017

Participants expressed that alleviating traffic was the most important reason for implementing the Eastside Phase 2 project. There are a large number of residents along the SR-60 cities that are transit dependent and would use the system to commute to their place of employment and other daily activities. In addition, vehicular traffic is a major problem and having a transit system would help alleviate the issue. Community members agreed that having easy access to the station would encourage more people to use light rail. Residents would like to see a better connection from South El Monte to the rest of the Metro regional transit system. The majority of the community agreed that there is merit in adding a Combined Alternative that includes both SR-60 NSDV and Washington Boulevard Atlantic Underground in the next phase of the study.

3.5.4. City of Commerce - Wednesday February 15, 2017

Participants at this meeting believed that improving access to major activity centers and jobs was the most important reason for implementing the Eastside Phase 2 project. As was the case in other cities, community members agreed that having easy access to the station would encourage more people to use the light rail system. Residents also voiced concerns over construction activities and security and safety at the stations. The majority of the community agreed that there is merit in adding a Combined Alternative that includes both SR-60 NSDV and Washington Boulevard in the next phase of study. A suggestion was made to conduct targeted outreach to millennials, since this project, to a great extent, will serve their generation.

3.5.5. East Los Angeles - Thursday February 16, 2017

East Los Angeles residents were extremely pleased to learn the Arizona Avenue route alternative is no longer being considered and voiced strong support for the Atlantic Underground route to Washington Boulevard. Factors leading residents to oppose a surface route include negative impacts to businesses and increases in traffic. Business owners and residents voiced concern that the Eastside Phase 2 project will cause many businesses to close or relocate. Residents want to ensure that the project brings economic benefits to their community, with limited impacts, regardless of the selected preferred alternative.

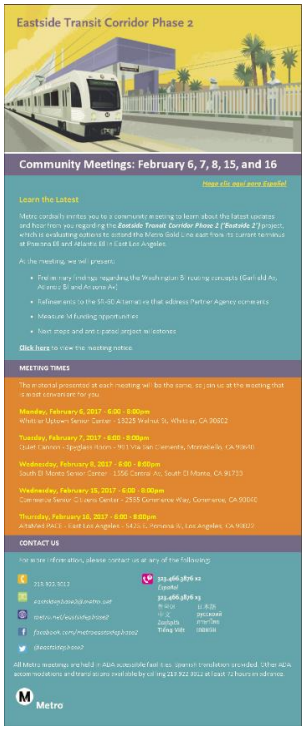
3.6. Meeting Materials

Upon arrival, meeting participants were given a bilingual English/Spanish meeting agenda and fact sheet to help orient and provide project background. Comment and speaker cards were also provided for their use. During the open house session, 23 exhibit boards (a combination of traditional meeting boards and 4 electronic viewing screens) were strategically placed around the meeting room covering three main topics:

1) Technical Study background
2) SR-60 NSDV Alternative
3) Washington Boulevard Alternative north-south route concepts.

Eastside Transit Corridor Phase 2
Community Meeting
Agenda

Spanish speaking participants were given an 8.5”x11” copy of the exhibit boards translated into Spanish. The PowerPoint Presentation provided an overview of the project history and an update on the Metro Board directed Technical Study, Alternatives details, study schedule, and next steps. To see community meeting boards, presentations, and meeting materials, please refer to Appendix C.



3.7. Notification for February 2017 Meetings

Consistent with Metro's ongoing commitment to a robust outreach program to inform and engage stakeholders throughout the project process, a variety of noticing methods were used in advance of the five community meetings to encourage public participation. All forms of noticing provided meeting details (dates, times, locations, and language needs) as well as contact information for accessing additional project details. All notifications were prepared in English and Spanish to address the stakeholder language needs. Both the electronic and print notice distribution was completed approximately two weeks prior to the meetings. Electronic reminders were sent out during the days leading up to the meetings. The following outlines the methods utilized for the meeting notification.

Direct Mail Noticing

For direct mail notification of the public meetings, Outreach staff used the Eastside Transit Corridor Phase 2 master project database consisting of approximately 3,600 stakeholders. (The project's master database was initiated during the early scoping period in 2007 and has been refined and updated throughout the life of the project.) Mail pieces were developed in a user-friendly format designed for quick public consumption. Notices were sent to approximately 15,503 stakeholders (property owners, business and residential occupants) within the project corridor area on January 20, 2017.

Incorporating these extensive property owner and occupant lists ensured communication with stakeholders who may have been involved at various stages of the project and made certain that all parties were informed of the latest project information.

E-blast Invitations

Outreach staff produced a bilingual English/Spanish electronic "e-vite" noticing the meeting purpose, dates, times and locations, as well as a brief project background. Electronic notices were e-mailed to database contacts that had previously provided their e-mail address to Metro. E-blasts are the most cost-effective method of providing meeting notifications and reminders. A 'Save the Date' e-blast was sent out on January 9, 2017, followed by a complete e-blast invitation on January 24, 2016. Reminders were sent out on January 30, 2017

and February 2, 2017. E-blast notification was sent to 2,080 contacts from the stakeholder database.

Project Website

The project website serves as a public portal for easy, fast and inexpensive information dissemination. The website was updated to show community meeting information.

Metro Social Media (Facebook/Twitter)

Social media is a key tool for achieving overall public awareness in today's digital world. Utilization of Facebook has been instrumental in the notification of project events and dissemination of information for this project. Metro's project specific Facebook page was updated with a 'Save the Date' announcement on January 9, 2017. This was followed by community meeting information posts on January 24, 2017, January 30, 2017 and February 6, 2017. The project's dedicated Twitter account was also updated with meeting announcements going out on the same dates as above.

Street Banners

To increase meeting awareness, Outreach staff coordinated with project cities and placed banners along heavily traveled corridors and public areas within the project study area. Banners were placed in the cities of Commerce, Whittier, Rosemead, Montebello, Santa Fe Springs, Pico Rivera, Monterey Park and the community of East Los Angeles. By request, the City of South El Monte was provided with two street-size banners for display. Metro also displayed a banner at the Metro Gold Line Pomona/Atlantic station parking structure.

Advertisements and Media

Newspaper advertisements were placed with Eastern Group Publications and the San Gabriel Valley Tribune. These display ads appeared in print approximately 10 days before the first public meeting.

Numerous other media outlets announced the meeting dates and times. These include the following:

Date	Organization	Type of Media
Multiple	City of South El Monte	Electronic Board
1/24/17	San Gabriel Valley Tribune	Article
2/2/17	Los Angeles Wave	Article
2/4/17	Pasadena Star News	Article

How you can learn more about a possible Gold Line extension from East LA to Whittier

In this March 16, 2016 staff file photo, train patrons board the East Side Gold Line at its terminus at Atlantic and Pomona boulevards in East Los Angeles. Photo by Leo Jarzomb, San Gabriel Valley Tribune/SCNG/File

POSTED: 01/24/17, 9:55 PM PST | UPDATED: 5 DAYS AGO
2 COMMENTS

Ten years have passed since Metro proposed extending the eastern half of the Gold Line as a way to connect San Gabriel Valley and southeast Los Angles County residents with work centers in Los Angeles and Santa Monica.

But instead of shovels in the ground, the Los Angeles County Metropolitan Transportation Authority will host another round of public meetings starting next week, with the earliest estimate of any ground breaking another 10 years in the future.

Flyers

Flyers were placed on City Hall counters and distributed at 14 public libraries across the project corridor. Flyers were also left at 12 community centers and public access centers within the project area.

Project Helpline

The project helpline was updated with meeting details, including dates, times and was checked daily to ensure stakeholder inquiries were answered in a timely manner.

Other Extended Outreach

As part of the extended outreach the Outreach staff identified stakeholders to target for assistance with supplemental outreach activities and project awareness. These included corridor cities, local Chambers of Commerce, schools and elected officials' offices. These stakeholders were contacted and encouraged to promote the community meetings and disseminate notification information through a variety of methods, including e-blast, website posts, social media posts, and hard-copy meeting flyers on public counters.

Copies of all notification materials and a comprehensive list of notification activities are included in Appendix D.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

WASHINGTON BLVD ROUTE appears to
offer more BUSINESS ALLEYS for RIDERS.

WRITTEN COMMENTS: Comments may also be mailed to: Dave Hershenson, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 or emailed to *eastsidephase2@metro.net.*

Citizens' Concerns for the "Goldline Washington- Alternative" (David Tracy)

1) High Cost? (Hidden Costs?)
   There's just no way to build such a complex transportation system, without it costing a lot of money, and taking a long time to complete, and would it truly be worth it? Will there be new Transit Taxes applied in L.A. County? Will they issue new State Highway Bonds to complete the work?

2) **Just what are the existing local businesses going to do once construction on such a system begins?**
   It would be a huge lie to suggest that building an entire light rail train system won't have a negative impact on local restaurants, car shops, drug stores, markets, laundromats, and all other local Washington Blvd businesses! **Do they expect us "to vote" for the "destruction" of all these hardworking people have built here in Whittier?**

3) **JUST *WHO* (?) are supposed to be in this expensive, complex system's "*TARGET MARKET*?" *WHO WILL IT SERVE*?! Will it be in the best interests of the Hospital (PIH) to become a TRAFFIC HUB? OR will it relieve alleged congestion at the "FIVE POINTS???"**

4) Maybe a Light Rail is just "too much of a solution" for too little a problem! **Have other transportation options been considered? What's wrong with the CNG Buses we now use (Montebello bus lines, #10)?? If some other "alternative" were considered, say "Electric Buses" would anything change? Both are already, cheap, simple, easy to make changes, or to reroute, and best of all, are "already paid for!" WHY CHANGE??!**

5) **WOULDN'T A "TELEGRAPH RD-ALTERNATIVE" BE EASIER???**
   Telegraph Road was once where the actual "Telegraph wires" ran, connecting the Pacific Stock Exchange to the Orange County Fruit Exchange! It is the "ancestral corridor into Orange County!" This would also avoid a number of other problems, such as having a lower environmental impact on the sensitive Legg Lake area, and offer systems planners an easier tie-in with the proposed ECO-FastRAIL coming from Cudahy. After all, who needs a *SLOW TRAIN RIDE* all the way to Orange County? Just using the regular Metro and OCTA Busses takes forever? (Has Light Rail systems promoter- "Joe Vinatieri" ever tried taking the existing bus system to Santa Ana? It would take him about 4 hours! By car its only 20 miles! You can get there in about 20 minutes at 60 mph!)

   (Eco-RAPID RAL)

6) **The Article in L.A. Weekly; "Will the Train be L.A.'s Savior?" it was conceded the Washington Blvd corridor traffic "*was atrocious*!" So where's all this assumed "capacity" coming from, which is alleged to relieve traffic congestion? The article goes on to criticize "unrealistic planning"**
   "They are far underestimating the reality of traffic! *Nothing they did was illegal or wrong. But the reality is all Fu_ _ed Up*!" (L.A. Weekly March 18-24, 2016; p.10)
7) **Watch out for those who overly optimistic viewpoints will lead all of us into a huge "White Collar Crime!" One, which we can't reverse easily!!!**

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

1) I want to stress that whatever stop is chosen in East LA (Arizona, Atlantic, Garfield) should be chosen with as much input from those communities. I wouldn't want this project to add to the displacement of all those communities. Metro has the responsibility to engage them and create culturally competent development.

2) I would love to see a way where both options are constructed and where we are not pitted against each other.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

Los Nietos/West Whittier is 2,519 SQUARE Miles with A population of 25,540 AS of 2010 CENSUS.
We Need this TRANSPORTATION System AS SOON AS Possible,
IN the NEXT 5,10,15 YEARS The Population is going to Double.
IN the FUTURE, Metro CAN TRAVEL DOWN LAMBERT ROAD THRU Whittier, LA HABRA, BREA, YORBO LINDA TO CORONA.

WRITTEN COMMENTS: Comments may also be mailed to: Dave Hershenson, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 or emailed to *eastsidephase2@metro.net.*

Charles Bennett, 6055 Washington Avenue, Whittier

I believe the Whittier alternative to be the preferable alternative. I would like to cite the following reasons as to why:

1. It has greater ridership
2. It has much, much greater ridership within walking or biking distance (the South El Monte alternative would require nearly all riders to arrive by bus or car)
3. It has greater opportunities for development
4. It does not have to contend with the Superfund site adjacent to the Pomona Freeway
5. It does not duplicate an already-existing project. The South El Monte Alternative runs parallel to, and within two and a half miles of, the Silver Line Busway; while the Whittier Alternative is much further away from any existing project.

And that brings me to one of my major concerns: how isolated Whittier is from Los Angeles County's transit network. Whittier is 8 miles away from the El Monte Bus Station, 8 miles away from the Atlantic Gold Line Station. It has no Metrolink Station and no buses that connect it to ANYWHERE at a frequency of 20 minutes or better. No city of 50,000 or larger is as isolated from the transit network as Whittier is.

I would like to add that the Gold Line is the long-term solution...but it is not the only solution. When the Gold Line comes to Whittier (and I *do* say when), I will probably be in my 40s. Whittier needs better transit, and it needs it now! I urge Los Angeles Metro and Montebello Transit to consider operating a BRT between Whittier and the Atlantic Gold Line Station in the 10-15 years it takes to build and approve the Gold Line.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

First and foremost, the SR-60 ROUTE FROM AN OPORATING PERSPECTIVE WOULD BE A FINANCIAL SNAFU OF GINORMIOUS COST OVERRUNS. The expansion of the EAST ALAMEDA CORRIDOR project along SR-60 COUPLED WITH THE TRAIN TRAIN FACILITY DUE TO OPEN IN 2020. The operating specifics along Washington Blvd would benefit a greater number of rider ship instead of hauling numbers of displaced Metro Bus riders from EL Monte along SR-60. With 38 years of professional operating experience with Union Pacific Railroad and 31 years as an elected labor union (UT) legislative rep it beehooves me to recommend Washington BLVD.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

- The Gold Line extention @ Whashington will benefit students at Whittier College with numerous opportunities. Some of these are internships in Downtown Los Angeles & even West LA; it could help our Expierences with excursions for Programming which will benefit all of LA County; This will provide Academic, Cultural, & Professional expierences for students. Whittier College has an average of 1500 students, 100+ faculty & staff along with international students (Study Ab... who will all benefit from this extention. From an Academic & Cultural perspective there are tons of opportunities to visit Latino & Chicano studies. Also, the residents of Whittier Blvd & Atlantic Blvd. & Arizona Ave. will benefit especially since it is very improverished communities. Please take these comments into consideration & help the future.

- Robert L. Duarte Jr.

President of Student Body at Whittier College
2015-2016

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

① Park + Ride s.b. free, need sticker if necessary.

② 60 route is out of way for Whittier, Montebello + Commerce residents

③ Serves more than double the amount of residents, than Route 60. (Wa. Blvd)

④ How will Line impact Emergency Service Vehicles at PIH

⑤ Undecided about at, Atlantic + Garfield Ave. – Suggest "underground" to maintain residential feel for residents at Arizona

⑥ Consider impact of Route 60 on Whittier Narrows.

⑦ Considers – Milleniums do not use cars! Chose the Washington Route

⑧ The savings we will make in time will greatly benefit society in So. Ca.

Park + Ride structure at Lambert – 500 spaces
very necessary
Space for station ??

SR-60 – does not serve communities – barely connects with S. El Monte
Montebello - NOT
Pico Rivera

* Washington Blvd goes through many communities and facilitates getting to medical + commercial locations – Commerce, Pico Rivera, Montebello, W. Whittier, & LA

SR60 – necessary not good to go through Whittier Narrows or through the OI methane plant & under high transmission lines

Maintained Restrooms + large parking structures

Don't want to wait until 2030

Need to build in maintenance funding to keep trains running on time

Potential to extend to Orange County along Lambert

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

I am ready for mass transit. When it takes 2½ hours on the freeway from LAX to Whittier + PLH. what a waste of time + gas. (Hospitals)

I want a connection to LAX, UCLA and the Music Center.

I think Arizona + a bo Line ~~are~~ necessary — Two Lines —

*I prefer the Arizona Line

Related to Whittier termination. [Washington Blvd Alt.]

1. Good ending to promote people getting to work in areas like LA city.
2. You should show greater detail about:
   a. Station (underground/surface)
   b. Keeping businesses at the station area
   c. Buss line connection at last station

[for great example of this look at Flushing in Queens New York City]

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

The Washington route will knit together transit-impoverished communities, enhance employment, health care, educational, cultural, & social opportunities for the whole region, and create more public transit opportunities for the future.

Though both routes would be great, the Washington Blvd. route should take priority.

Thank you for your careful consideration.

MY CONCERN IS THE EASE OF CRIME HAPPENING BECAUSE OF QUICK ON AND OFF, AND GOING FROM WEST SIDE TO EAST SIDE.

SECOND CONCERN IS WASHINGTON BLVD. PROPERTY WHICH IS PART OF THE WASHINGTON BLVD. EASEMENT WASHINGTON IS 6 LANES WIDE W/CENTER TURN LANES, ARE LANES GOING TO BE USED FOR THE TRAIN. I AM ON THE CORNER OF WASHINGTON BLVD AND LOCH ALENE AND BEQUETTE. THE NOISE LEVEL AND VIBRATION RIGHT NOW IS IMPOSSIBLE. TO ME THIS WILL AFFECT PROPERTY VALUES. ONE PROPERTY IS A MORTUARY THE OTHER PROPERTY IS LOOKING RIGHT OUT AT WASHINGTON BLVD.

THIRD THE TRAFFIC IS TERRIBLE ON WASHINGTON BLVD IF YOU TAKE AWAY LANES, TRAFFIC WILL BE

OVER→

WORSE. I DON'T THINK IT WILL STOP THE AMOUNT OF CAR OR TRUCK TRAFFIC I THINK THE TRAFFIC WILL BE WORSE. I DON'T MIND THE ROUTE ALONG THE 60 FRWY. BECAUSE PEOPLE ARE ALREADY DEALING W/ FRWY. NOISE AND TRAFFIC I THINK THE END OF THE TRAIN WILL BRING MORE CRIME TO PICO RIVERA.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

(1) Washington Blvd. route preferred

(2) Garfield Ave. route ~~preferred~~ preferred - underground

(3) Great opportunity to access social/public services in whittier
- social security
- Health Care (PIH, Kaiser, private practice)

(4) HAS GREAT POTENTIAL TO EXPAND IN THE FUTURE TO THE O.C.

(5) SUGGESTION TO CREATE AN EXPRESS RIDE DURING RUSH HOUR, SIMILAR TO N.Y.C. METRO

(6) Arizona route shorter for underground

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

1. I do not want the 60 Fwy option - does not connect communities
2. Prefer - Washington option because - serves more communities esp
3. Consider
   - Sufficient Parking at Stations
   - Restrooms @ Stations
   - Bus schedules @ stations
4. Arizona - less costly option / Olympic

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

(1) Don't believe the 60 Route serves communities. The Washington Blvd. is the one that serves communities.

(2) Rail lines & public transit should serve those who cannot afford a car, not just those who drive. As gas & gas taxes get more expensive, fewer people will be able to afford cars. For a future labor force, public transit needs to serve residential communities.

(3) Concerns about the at-grade ~~LAVC~~ rail lines, but lines should serve residential communities. So communicating w/ those communities to find a way to make it work.

(4) Great to end line at 5 points w/ PiH but also greenway trail for those who bike/walk.

THE CITY OF WHITTIER HAS ITS SHARE OF CONTENTION AND CONTROVERSY, REFERENDUMS AND LAWSUITS. BUT ON THE POSSIBILITY OF EXTENDING LIGHT RAIL TO LAMBERT (AND EVENTUALLY BEYOND), THERE IS UNANIMITY AMONG ALL FACTIONS. WE ADVOCATE FOR THAT OPTION BY WHICHEVER ROUTE SERVES THE MOST PEOPLE. THE OPTION THAT ACCESSES THE CITADEL WILL HAVE ADVANTAGES FOR OUR RESIDENTS. THE WHITTIER AREA ENVIRONMENTAL COALITION HAS CONCERNS ABOUT THE ENVIRONMENTAL IMPACTS OF THE ALTERNATIVE THAT RUNS THROUGH THE WHITTIER NARROWS ON THE NATURAL AREA. WE OPPOSE THAT ALTERNATIVE.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

(1) Alantic station Route seems more direct & cut commute - Prefer Washington to Whittier

(2) more direct route to commute to DTLA seems best. from Whittier

(3) like stops at Commerce Citadel Casino & Atlantic

~~No preference on Alignment~~

(4) Major Concerns on Environmental impacts of 605 option on Whittier Narrows

WRITTEN COMMENTS: Comments may also be mailed to: Dave Hershenson, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 or emailed to *eastsidephase2@metro.net.*

Citizens' Concerns for the "Goldline Washington- Alternative" (David Tracy)

1) High Cost? (Hidden Costs?)
   There's just no way to build such a complex transportation system, without it costing a lot of money, and taking a long time to complete, and would it truly be worth it? Will there be new Transit Taxes applied in L.A. County? Will they issue new State Highway Bonds to complete the work?

2) Just what are the existing local businesses going to do once construction on such a system begins?
   It would be a huge lie to suggest that building an entire light rail train system won't have a negative impact on local restaurants, car shops, drug stores, markets, laundromats, and all other local Washington Blvd businesses! Do they expect us "to vote" for the "destruction" of all these hardworking people have built here in Whittier?

3) JUST *WHO* (?) are supposed to be in this expensive, complex system's "*TARGET MARKET*?" *WHO WILL IT SERVE*?! Will it be in the best interests of the Hospital (PIH) to become a TRAFFIC HUB? OR will it relieve alleged congestion at the "FIVE POINTS???"

4) Maybe a Light Rail is just "too much of a solution" for too little a problem! Have other transportation options been considered? What's wrong with the CNG Buses we now use (Montebello bus lines, #10)?? If some other "alternative" were considered, say "Electric Buses" would anything change? Both are already, cheap, simple, easy to make changes, or to reroute, and best of all, are "already paid for!" WHY CHANGE??!

5) WOULDN'T A "TELEGRAPH RD-ALTERNATIVE" BE EASIER???
   Telegraph Road was once where the actual "Telegraph wires" ran, connecting the Pacific Stock Exchange to the Orange County Fruit Exchange! It is the "ancestral corridor into Orange County!" This would also avoid a number of other problems, such as having a lower environmental impact on the sensitive Legg Lake area, and offer systems planners an easier tie-in with the proposed ECO-FastRAIL coming from Cudahy. After all, who needs a *SLOW TRAIN RIDE* all the way to Orange County? Just using the regular Metro and OCTA Busses takes forever? (Has Light Rail systems promoter- "Joe Vinatieri" ever tried taking the existing bus system to Santa Ana? It would take him about 4 hours! By car its only 20 miles! You can get there in about 20 minutes at 60 mph!)

   (ECO-RAPID RAIL)

6) The Article in L.A. Weekly; "Will the Train be L.A.'s Savior?" it was conceded the Washington Blvd corridor traffic "*was atrocious*!" So where's all this assumed "capacity" coming from, which is alleged to relieve traffic congestion? The article goes on to criticize "unrealistic planning"
   "They are far underestimating the reality of traffic! *Nothing they did was illegal or wrong. But the reality is all Fu_ _ed Up*!" (L.A. Weekly March 18-24, 2016; p.10)
7) Watch out for those who overly optimistic viewpoints will lead all of us into a huge "White Collar Crime!" One, which we can't reverse easily!!!

David Lara (Chair) Email: dave.lara007.dl@gmail.com
of the Coalition for the Metro Light Rail on Washington Blvd

The Washington Blvd route is the best choice because:

- **More riders**: Serves the most riders at the lowest cost per rider. The Washington route goes to where more people live, shop and work than the freeway route.

- **More access**: Provides the most access with 6 stations, and at the lowest cost per station. There will be stations where residents can get on and off in Commerce, Montebello, Pico Rivera, Santa Fe Springs and Whittier. More residents will be able to walk to these stations than the alternative route that focuses on drivers hopping off the freeway, parking their cars at the station, and hopping on the light rail.

- **More miles**: Provides the most miles of service at the lowest cost per mile. With 9 miles of service, a larger section of southeast LA County will be served than with the shorter freeway route.

- **Support**: City councils of Commerce, Pico Rivera, Santa Fe Springs, La Habra Heights, La Habra, La Mirada, and Whittier have endorsed the Washington Boulevard route, as has the Gateway Cities Council of Governments that serves 27 southeast Los Angeles County cities; LA County Supervisor Don Knabe; and Congresswoman Linda Sanchez.

- Lower cost per mile

- Less right of way acquisition

The Washington Blvd route is the best choice because:

- PSA mobility goals of providing improved regional connectivity are achieved with this alternative by connecting with the regional Metro rail system, providing additional transportation capacity to serve increasing travel demand, reducing vehicular travel on the regional highway system and attracting new transit riders.

- This alternative would build a strong ridership base by providing service for the following trip purposes:

    - Short, frequent trips within the communities it operates through.
    - Work trips to and from Washington Boulevard employment sites.
    - Work and other trips to and from the southern portion of the PSA including the Gateway Cities and I-5 Freeway corridor.
    - Work trips west to downtown Los Angeles and destinations beyond.
    - North-south bus feeder networks and parking structures at most stations for additional accessibility.

The Washington Blvd route is the best choice because:

Stepping Up for Health, Equity, & Sustainability

Citizen Concerns for the Eastside Transit Corridor- Phase 2 (David Tracy)

I would simply like to express my concern over just a few of the vital points of this proposed plan:

Photos #1: A) A Light Rail Train in San Jose, CA moving slowly through the congested downtown area (*"This what you'll get!" "But would such a "system" really help local small businesses in Whittier, CA??!"*)

B) High Voltage "Power lines" hanging over the street, which power the Electric motors in the train

My Concerns include:

1. **COST (?)** Anything that ***highly engineered*** will prove both expensive, and hard to remove someday, as well! What if the ***economic patterns*** of Whittier vary even more wildly than they have in the last twenty years?

2. **Probable Negative Effect on Local Business along Washington Blvd!** *(Just how long will the street be torn up by construction crews working??! Or will Whittier need to buyout all of the small businesses operating there today? Won't that add considerable COST? And in the meantime, where will our citizens eat?*

Photo #2: An "Electric Bus" on Market St. in SF, CA (note the high voltage wires overhead!)

3. **ELECTRIC BUS ALTERNATIVE** (cheap, quick to build, effective, semi-permanent and removable! "Win-Win-Win!" **Aren't the existing "CNG Buses" now running down Washington Blvd effective enough?** Other CNG or Electric Buses could bring riders north, along Santa Fe Springs Rd, Painter, and Colima (others?), from the existing **Transportation Center**, which is already near ***Imperial Hwy*** **and** ***Bloomfield Ave*** in Norwalk, CA.
4. **TARGET MARKET (???)** (Just *who* really *needs a ride* down Washington Blvd, who isn't already served by **Montebello Bus 10** anyway? (Also, **Should the Hospital (PIH) be a *Transportation Hub*?** Most people, who need to go to the hospital, either go in ambulances, or they drive their cars!)

5. **EXTENSION ALTERNATIVE-"ALTERNATIVE"** (Maybe your *NEW ROUTE* should consider "**Telegraph Road**," the "***ancestral corridor***" *connecting* L.A. to Orange County. It's roomier too! With more room for "expansion," and more *blighted businesses willing to move*, especially near **Ferguson Dr.** (just a mile away) where it can ***join up with Telegraph Rd, and remain just to the north of FWY 5 all the way down to Anaheim*** (connecting to Norwalk Transportation Hub, Disneyland, Angel Stadium, Honda Theater, etc.)) (It even has a ***Lower Environmental Impact*** (since it would be further away from ***sensitive wildlife and water conservation areas*** near Legg Lake area) Even Gene Maddaus' article for L.A. Weekly said Washington Blvd traffic was "atrocious" and they were "underestimating reality" (p. 10)

Photo #3 & 4: Another Electric Train Car designed by Hermann Einstein (the father of the famous physicist) & BART (Bay Area Rapid Transit) it is vital to have all of the forms of public transit meet at a central "hub," like the Embarcadero, in San Francisco, CA

Photo #5: The CAL_TRAIN serving the San Jose to Palo Alto (Stanford Univ.) and San Francisco route

- Transit Tax? (Mayor Ken Hahn) Who wants higher and more taxes?
- 70% support for a ballot measure? (p.9 L.A. Weekly "Will the train be L.A.'s Savior?")

Photo #6: Showing an Arial (Alignment) Train Station in San Jose, CA connecting the METRO Light Rail (above) with the CAL-TRAIN (below). This could also be done for the "Extension Alternative-Alternative" to Telegraph Rd!

Photo#6: The San Jose light Rail ("VTA"-Valley Transit Authority) really only serves the downtown area! This photo was taken near the "Pita Pit" and the "San Jose Camera Theater, near San Jose State College. Consider just how much "physical space" such a huge system takes up, how many years it will take to "break-even" on such a large project, how difficult it would be to remove, or reroute such permanent rails, and how many "outlying areas" are not serviced! The locals still remember all of the political fights over the building of this system, and many residents are still mad about it, regarding it as having been a boondoggle! It's SLOW TOO! Who needs a slow train to D.C.?

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

- I am a resident of the northwest community of Montebello just south of Via Campo. I do not support any rail line that runs at grade and is visually visible to the suburban community between Gerhardt and Findlay. It does not matter if the proposed line is within the SR60 right of way. I will only support a line if it runs within the walls of the 60 freeway. I suggest that the freeway be widened to allow the Gold Line Extension to run above grade adjacent to freeway traffic. Installing a visible rail will hurt my property values and will destroy the suburban quality of life of this specific community.

- Another concern I have is that an at-grade intersection crossing at Atlantic & Pomona will worsen traffic through the intersection, on the 60-freeway offramp and in both directions along Atlantic. Right now I spend 1/3 of my commute time from Downtown Los Angeles to Montebello trying to exit the 60 fwy and cross Atlantic & Pomona. My suggestion is that the intersection be redesigned so that either the rail line, or better yet, vehicular traffic cross Pomona via an undercrossing so that the rail can stay at grade. An undercrossing would allow Atlantic traffic to move unimpeded.

Gracias por su interés en el Proyecto del Corredor de Transporte hacia el Este Fase 2. Sus comentarios son bien recibidos.

I've been told that METRO has been conducting broad public outreach about the Eastside Extension. In the 6 years that I've lived in my Montebello neighborhood that is within ~~the~~ proximity of a proposed route, I have not received ANY single piece of information. NOT ONE. No mailings, no banners, no bill boards, no tv commercials, no radio announcements. The information that I've come across has been by ~~myself~~ independently searching for information on the web or by emailing Metro reps. Almost none of my neighbors are aware of the proposed project. There is also a safety concern ~~with~~ in this neighborhood due to Bella Vista Elem. The project should not adversely affect the Kids getting to school. This includes traffic, signaling and access.

I object to any extension of the Gold Line along Garfield, even if its underground.

But I do support the extension of the Gold Line along the SR60 but only if its impact to East LA and Montebello are minimal.

What is the purpose of this project? Who is it for? Who will it benefit? East Los Angeles, Montebello, Pico Rivera, and Commerce should NOT be sacrificed for the benefit of Whittier residents.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

1. Meeting at E.L.A. Public Library heard from plenty of "NIMBY" residents, but Metro should consult more with those who already ride Metro Rail + buses very regularly. Most (local) NIMBY residents seldom if ever ride mass transit. → Should ask how many attenders used bus/rail to get to this meeting tonight.

2. Arizona makes most sense — especially if underground — to get to Washington alignment. Southern leg is better to build farther west than Garfield — Arizona, Eastern, even Atlantic (if underground).

MANY tourists (especially from abroad) take transit to the Citadel to shop for clothes and things to take home. Locals take transit to Commerce Casino

3. Metro needs to pay attention to those who already use transit heavily.

3. Trains will reduce auto emissions that negatively impact health of local residents

4. Staff facilitator at Table 2 failed to stop participants from harassing participants who disagreed with them.

5. SR 60 (train) route is redundant to existing freeway, and would be very expensive because of crossing freeway twice to avoid Superfund site. However, if built, it should provide a station in or close to Whittier Narrows recreation area, which now has [redacted] public transit access only via Metro 266 on Rosemead

I am indifferent to the SR-60 Alignment. From a ridership standpoint an underground Atlantic route is the best option considering current ridership patterns.

The above mentioned route could replace the current city of commerce shuttle between union station and Citadel.

A station on Atlantic and whittier connects to popular routes of Montebello 10, MTA 260, MTA 18, MTA 720(?) that will serve the gentrification of the populace

With the completion of the regional connecton the MTA can promote ridership between Santa Monica and the whittier county area.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

The Eastside Gold Line, which line been riding since it began operating, slows down because it turns underground on Indiana to Mariachi Plaza & Pico also.

If you want people to ride the Eastside Gold line, you need to build it so more people can drive (park & ride) the Gold line.

I prefer the SR 60 because it looks like the train ~~with~~ will operate faster (60 mph) as oppose to having to slow down (@ Indiana & 3rd Street). If you build a train # with several turns & heavy rail & lite rail, you won't get many riders.

If city of Whittier still wants rail, then bring back the subway to east L. A. plan. Even if it takes another 30 years!

No matter how many Rails / Subways are built, there are always Angelinos which prefer to drive.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

I think that Metro going thru Washington Blvd will Help Not only Business But, Help move People who live in the Area Which their Are a lot of ~~People~~ People (east L.A, Montebello Area of Whittier).. This will Also Help Students Going from East los Angeles to the colleges in Whittier like Rio Hondo college ect. Citi Del Amo other shopping Centers will Also No good if Metro choose this Route, As for the Start to cross I would choose ~~Garfield~~ Atlanta Blvd. to Cross to Washington BLVD. This would Also Help Ds Congest the 5 Freeway AT Commerce.

WRITTEN COMMENTS: Comments may also be mailed to: Dave Hershenson, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 or emailed to *eastsidephase2@metro.net.*

Comments for Eastside Transit Corridor Phase 2
March 29th, 2016

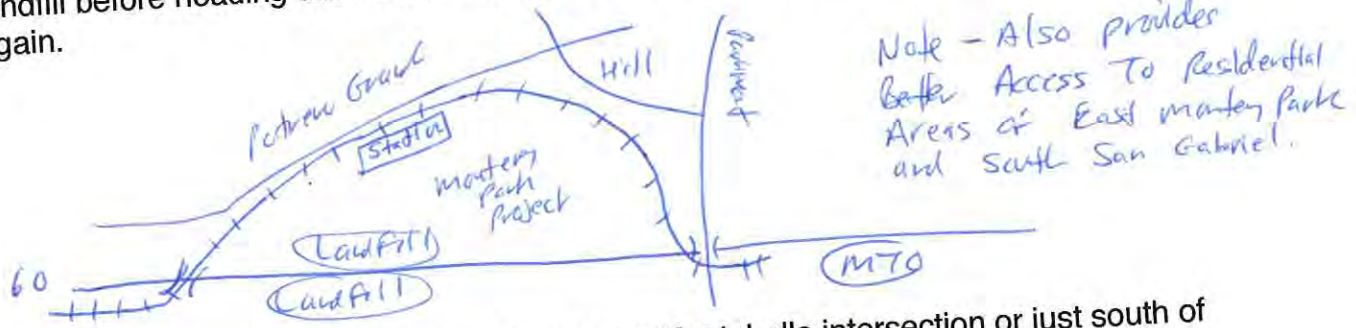
Neither the 60 freeway route or the Washington Blvd route are really what this corridor needed. It needed the Purple or Red Line coming down Whittier Blvd through the downtowns of ELA, Montebello, Pico Rivera and into downtown Whittier. Would have cost more and taken longer, but would have been a much better option. Could have been built in phases much like the Purple line phases are being done now.

Now you are left with 2 poor options being tacked onto ELA Phase 1 which has many of its own problems. (Slow, route zig/zags, needed a few more sections of subway, poor connections into downtown LA that are only being resolved now)

Please simply do not build the Washington blvd route. It has many flaws:

1/ Light Rail is slow and needs the straightest route possible. Washington zigs and zags and will take forever to get out to Whittier.
2/ The community does not want the elevated sections on Garfield and it is ridiculous to build a subway just to 'shoehorn" this route into the streets chosen.
3/ This route doesn't really come near any of the downtowns on the Eastside, especially Whittier with the college. Ending up in the unincorporated area of south/southeast of Whittier serves no purpose. We don't need another line to "nowhere'.
4/ Spend the money you would have spent on the Washington route to get the 60 route done better and faster.
5/ Not sure what Whittier really wants. Went to other hearings where people were against better routes down Whittier , Beverly or the greenway or combinations of them.
6/ This route goes by, but does not serve the major Metrolink/Bus station at Montebello/ Commerce. We need to connect all our services- this is just plain wrong otherwise.
7/ I think Whittier is better served by a extension of the Green Line from Norwalk and possibly the Route 60 extension if money becomes available to move the 60 line beyond Peck Road in the future.

The 60 Route is better, but needs some upgrades and additions:



1/ Much straighter than Washington Blvd and thus faster end to end to partially offset the slowness of the ELA section. And with this route being through-routed into the Expo Line to Santa Monica, this will become an extremely long and slow route otherwise.
2/ This route competes with the 60 freeway, so it needs to be straighter and faster.
3/ It almost needs to be "Metrolink Style"- a lot of parking in your last 2-3 stations.
4/ When money becomes available, it really needed to go beyond Peck Road hitting the Metrolink Riverside line and ultimately, down the river or 605 freeway into Whittier proper.

5/ It appears the communities along this route are much more in agreement that they want this route and the route selected is in general agreement.
6/ This route has the great ability to serve 2-3 shopping centers, serve a public recreation area , offer much more park and ride parking than typical MTA stations and serve as catalysts for South El Monte and transit villages.

This route has very many similarities to the Mission Valley Route following I-8 in San Diego. Jumps back and forth across the freeway serving many shopping centers and commercial areas. (They do have a major university that does help)
Having said those thoughts, ideas to improve this route and in order from west to east:

1/ Garfield station looks good. Pedestrian bridge into shopping center, parking structure, make sure decent connections to the north/south buses. How many golf courses could say they have rail access ? Not many !

2/ Route should then jump to the north side into the area where Monterey Park wants that large project built. YOU NEED A STATION HERE. You don't very often get to plan a route and a station into a large planned development before that project starts.Your route needs to hug the east side of Potrero Grande to stay away from more of the landfill before heading east to the Paramount Blvd area and heading south to the 60 again.

3/ Next station needs to be around Paramount/Montebello intersection or just south of the 60 at Town Center Drive. I would work the station into the bridge and then have pedestrian bridges/access into the large shopping center west of Paramount where the AMC movie theatre is and another bridge/access leading into the western entrance of the MTC. You need to work decent connections into the bus service at this point.

4/ Similar on the east side. Bridge over San Gabriel with station built in. Serves the east entrance to MTC, the hotel and office buildings on San Gabriel. Also north/south bus service.

NOTE- The reason for better service to these 4 shopping centers is now people in ELA and South El Monte have access to better shopping options without driving.

NOTE 2- If you do not want 2 stations in this area, then your 1 station needs to be on the south side of the mall on Montebello blvd where the bus center/stop is for connections to all the bus lines in this area.

5/ YOU NEED A STATION AT ROSEMEAD BLVD. You have an opportunity much like the shopping to provide residents in ELA and South El Monte access to recreation area. You can get triple use from this station=
>>>>Recreation access- always some kind of event going on here.
>>>>Huge Park N Ride option.. During the week commuters use the parking when park use is low. On weekends when commuter use low, park use will be up. You really need lots of parking at this location to get people off the freeway since I don't think the stations at Santa Anita or Peck will have enough parking and I don't think that community wants to be the parking lot for people coming from all over. Rosemead BL is in an area that can support traffic without to much negative affect on neighborhoods.
>>>>North/South Bus lines. MTA I believe runs a route the whole length of Rosemead Blvd. You could also add addition bus use to points north with Foothill transit and to the south with Montebello transit.

6/ Your stations at Santa Anita and Peck are good and I like the transit village concepts. Worried much of the parking will be taking up by local usage, so Rosemead becomes important. All 3 of these last stations need large electronic signs at the off ramps indicating how much parking is available. These last 3 stations need to be like a Metrolink Park N Ride.

Would have nice to get this line beyond Peck- needed a connection to the Metrolink Riverside Line and then turn down to Whittier. I believe if you don't waste the money on the horrible Washington Blvd route, you can build a better 60 route and can still serve Whittier. (that route by the way is from Peck Station east on the 60 to the 605, down the shoulder of the 605 to the UP railway bridge and turns left/east on the old railway line since it would serve the core of Whittier. Yes I know its the Greenway and the citizens will revolt, but that is why Whittier doesn't deserve a line at this time. With money tight, cities that want transit should get it, others need to wait)

Thank you for your time. Many more ideas from where these come from.

Mark R. Johnston

Atlantic Blvd alignment should not be over ground. If you make it overground it would be a big mistake. Nor, going from 4th to Washington Blvd takes me more than 30-45 min and that takes to long (by car).

3rd Street, for example is too congested. Atlantic ~~Blvd~~ to Indiana would be the same. Can not have that.

The U.S. Census is conducting a test this year in preparation ~~of~~ for the 2020 Census. The test will include Montebello, E.L.A., and the San Gabriel Valley. I don't know what type of data will be collected. If it has anything to do with population, there should be a waiting period to see what data will be collected before any decisions are made about which project to take (providing the collected data will be made public.) Of course, population is not the only variable that has to be taken into account. Could this Census test have any effect on the decisions of the Metro Eastside Transit routes, if you know?

* Would like to see the metro to go down the 605 FWY down to 405 FWY
605 FWY to end at Veterans Hospital
405 FWY to end at Beach Blvd - Bella Terra Center or even to Costa Mesa - reduce traffic on both FWYs

60 FWY to Peck has my vote along with Washington underground

What about Rosemead S. from 60 to Washington? I would go through Pico Rivera to Washington. Traffic calming would be a result as is Temple City of the tracks would go on both sides of the large ficus trees. That would look really nice also. Subways Suck We already have a great Bus line which goes all over the area including to downtown LA. People would get to the recreation area also from San Gabriel Mountains North to the Whittier Hills to the Ocean. Glad you are taking into account the people. Please keep this up — we do know about and are very practical! People riding metro along crowded freeway would be glad they aren't stuck in traffic. Traffic makes sense the routing is how to make an extreme right angle turn from the current end of the line? Consider this. This would bring more business & riders — logical —

Not the ones who advocate Bus Rapid Transit

This problem could have been solved very easily if Whittier & other cities all over SoCal had kept control of the Pacific Electric (street car) and Railroad rightsofway.

(1) Very well run meeting. Knowledgeable staff.

(2) How can I see the summary of comments provided tonight & @ all meetings?

(3) My vote is for the least disruptive route, that which would displace residents & businesses the least.

(4) Sounds like most people tonight voted for underground tunneling @ the Washington route. I tend to agree.

Fix fonts to be consistent.

- CLARIFY TERMINOLOGY → BELOW-GRADE VS. UNDERGROUND
- IF CHOOSING BETWEEN THE TWO, PLEASE CONSIDER:
  - WASHINGTON ALIGNMENT ALREADY SERVED BY TWO NEARBY METROLINK LINES; SR60 HAS NO NEARBY STATIONS/SVC, ONLY METROLINK EL MONTE & CSULA STNS.
  - SR60 ALIGNMENT HAS POTENTIAL FOR CONNECTIVITY TO CAL POLY POMONA AND WHOLE CORRIDOR
  - BETTER POTENTIAL (W/SR60) FOR NORTH/SOUTH CONNECTIVITY TO PASADENA-AREA GOLD LINE (N/S CONNECTIVITY MUCH NEEDED)
  - SR60 COULD SERVE MPK MARKET PLACE W/ STATION
  - SR-60 SHOULD BE CHEAPER/FASTER TO BUILD; MUCH LOWER IMPACT TO RESIDENTIAL/COMMERCIAL
- PLEASE POST UPDATED INFO TO WEBSITE
- IF PROCEEDING

I attended the Eastside Corridor Mtg on Wed, Mar. 30 at the Quiet Cannon. It was a wonderful meeting - well prepared & well presented. However, I have one question about the LA Times Article on 3/19/16, which implies that the Ext. of the Gold Line - El Monte vs Whittier was included in Measure R. Why is it now put on hold & the Claremont end gets preference. Why can Montebello & the San Gabriel Valley Valley suddenly pushed back "50 years"? If the money comes from the same pot, it should be equitable. I don't drive any more, I take the gold line & local buses mostly. Would totally favor the Gold Line near the 60 Fwy to El Monte - but not when my grave is growing daisies East LA should not be bypassed. The experts can figure out the details of the route. I live in Montebello. Thank you for all you do to make life easier for non-drivers & those who can't afford cars.

Sister Eileen Tuohy, 441 No Garfield Ave, Montebello.

THE SOUTHERN SECTION OF THE SAN GABRIEL VALLEY NEED TO HAVE PUBLIC TRANSPORTATION. WE ARE OFTEN LEFT OUT OF CONSIDERATION. IN OUR VICINITY IS MONTEBELLO MALL, WHITTIER NARROWS NATURE CENTER, RIO HONDO COLLEGE, LEGG LAKE RECREATION PARK. COMING ALONG THE 60 FREEWAY HAS LESS DISRUPTION OF BUSINESSES, RESIDENTS. I WAS RAISED IN ELA. AND I SEE WHAT IT DID TO FIRST STREET AND THIRD STREET I WOULDN'T CONSIDER IT ANYWHERE EXCEPT THE 60.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

SR60 is a long time in the coming. Since I first went To Disneyland in 1969, I invisioned a Metro-rail like the Monorail to service my neighborhood. Given that Whittier Narrows is the largest park in Los Angeles county with many recreational activities; given that both Rosemead Blvd. and Peck Blvd access colleges; given that So El Monte, Rosemead, Monterey Park are fast growing traffic concerns; given that Rosemead Blvd. connects the Ocean to the foothills and given that South El Monte is in the center of all these connections, I believe that the SR60 Metrolink would best service Los Angeles County with the least amount of displacement of any homes or business. It makes the most sense to me for SR60 with stops at Rosemead Blvd. and Peck Blvd. Thank you for your consideration to make this happen.

I am in favor of R-60. We have been waiting for a very long time since 2006. We have got public support residents have been waiting for a long time. We have many different places on this route. Rio Hondo College, Lake Legg county park. the Montebello Mall that is very popular with our surrounding communities. We also have many seniors that would be able to use this transportation.

Today an article came out in the San Gabriel tribune stating that "Residents give cold reception to light-rail route to Whittier". Hopefully we can get this project completed. We have been waiting for 10 years, so lets get busy and make it happen!

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

- I support the SR60 alternative. Its the most efficient build-out.

- Please implement Complete Streets designs at the stations. Please keep in mind the need to keep the Whittier narrows recreation area as natural as possible.

- All stations should reflect through art its' communities.

- Please prioritize SR60 Gold line Attenative Extension in future Ballot Measures + Priorities.
- If possible, complete both the alternatives to Whittier + S. El Monte.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

Would like to see light rail in South El Monte instead of Whittier. Support the SR-60 Alternative because our El Monte / South El Monte residents need affordable, safe, accessible public transit to connect to greater transportation system. Matter of equity & social justice, increase mobility, the increase # of ppl visiting Whittier narrows our greater San Gabriel Valley as a region.

SR 60 is shovel ready and doesnt have bugs. Washington route is far from ready. SR 60 should be built first.

WRITTEN COMMENTS: Comments may also be mailed to: Dave Hershenson, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 or emailed to *eastsidephase2@metro.net.*

I have noticed that there are very few, if any, buses that run through Whittier after 8 p.m. and into the night, making trips to L.A. on public transportation almost impossible during the night if you travel to L.A. for sporting events, nightlife, dinner, etc.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

1. construction impact — traffic concerns
2. stations - safety - who would provide security (transit or city)
3. would ANY property be taken from residents.
4. Do cities have to provide anything.

I BELIEVE THE SR60 ALTERNATIVE IS THE MOST FEASIBLE ALTERNATIVE, THE DISRUPTION TO THE IMMEDIATE AREA IS MINIMAL. THERE IS AMPLE ROOM FOR GROWTH OF SUPPORTING INFRASTRUCTURE AND CONNECTING BUSINESS POSSIBILITIES.

THE SR60 WOULD CONNECT SENIORS WITH THE OPPORTUNITY FOR MORE TRAVEL DESTINATIONS WITHIN LOS ANGELES COUNTY. IT WOULD ALSO LINK THE WHITTIER NARROWS RECREATIONAL AREA TO MORE VISITORS WHICH WILL IN TURN, NECESSITATE MORE AMENITIES AT THE LOCATION TO MAKE FOR A MORE PLEASANT AND ENJOYABLE EXPERIENCE.

- Do not build the connection in East L.A.
- Build it in Rosemead.
- Let other communities and neighborhood share on the human cost.

East L.A already has a lot of pollution - Don't put all the burden on the less affluent communities. —

* THE SR-60 ROUTE IS THE ONLY OPTION THAT MAKES SENSE AT THIS AGE & TIME.
- GOING SOUTH ON ARIZONA WILL DETRIMENT THE RESIDENCES AND SECONDLY, IT CREATES ~~THE~~ A SHORT PORTAL FROM ARIZONA TO ATLANTIC. WHERE ~~RIDERSHIP~~ RIDERSHIP WILL BE DIMINISHED AT ATLANTIC.
- GOING SOUTH ON ATLANTIC ~~GOE~~, UNLESS UNDERGROUND, WILL DESTROY MANY BUSINESSES IN THE NEIGHBORHOOD
- PLEASE LOOK AT THE HISTORY, WHEN PHASE I WAS BUILT MANY SMALL BUSINESSES CLOSED, WENT OUT OF BUSINESS ON POMONA. THE CONSTRUCTION PERIOD WAS VERY LONG, (2+-YEARS) MADE ACCESS ONE DIRECTION DUE TO THE ON GRADE LINE; AT THE STATION, THE PLATFORMS ARE RAISED AND BLOCKS VISIBILITY OF THE BUSINESSES.

In my opinion we should not place a commuter line through Atlantic Blvd. - But continue from Atlantic Station to Garvey on the "Pomona Freeway" would be suitable least impact. (SR60)

I am definitely in favor of the R60 with stations at Garfield, Shopping Mall in Montebello & Santa Anita. Montebello should be serviced.
I am not against Washington - but so much of Montebello & the San Gabriel Valley would be overlooked.
Cost of R60 seems less than the other option & would not take forever to build.
Ideal would be to have both options built.

let's get something done for East LA & eastward, again preferably by the R60 Freeway.
I don't drive. I depend on the metro lines and buses for getting everywhere. Too bad transfers can't be made between metro lines & buses.

Gracias por su interés en el Proyecto del Corredor de Transporte hacia el Este Fase 2. Sus comentarios son bien recibidos.

Todo muy bien pero un poco triste que Casi no hay informacion en Español. Es Entendible que debe ser en Ingles. Pero gente como yo, que es minoria. No hablamos y Entemos es un poco dificil Opinar en Voz. Alta. Aun que nos traen Interpretes el Sonido es muy bajo y a veces no se entiende mucho. Aun asi Gracias Lamento tener tan pobre opinion y nada mas que opinar, Sobre agrandar una ruta inecesaria en la Calle Arizona Aun asi me agrada participar en silencio y oir a los demas en tradociones un poco incompletas.!

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

Keep it out of East LA. It provides almost no benefits because the busses fufill our needs. I feel rushed making this decision. I want more meetings! Arizona does Not work. It is a residential area and you are surrounding a Middle School with Metro lines. Not only is this dangerous to the children but you are afecting the residents. Underground Does NOT WORK! It takes too much work and it affects too many people. You are killing the small businesses that contribute to East LA. The intersections proposed are vital to our community. You can find other alternatives. This link offers no substantial benefits to East LA and so there is no reason why we should have it there. We need to talk about this more and explore more alternatives.

- Kill the Arizona Ave ~~ave~~ alternative
- Dont take corners with businesses to build a station, instead build plaza about a block or two away where there are empty lots
- Build underground so it does not impact traffic any more.
- Atlantic extension would bring more money to Citadel as well as businesses on Whittier blvd and along Atlantic

WRITTEN COMMENTS: Comments may also be mailed to: Dave Hershenson, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 or emailed to *eastsidephase2@metro.net*.

Que No se construya nada en Arizona Ave por muchas razones

* El medio Ambiente → Mala calidad en el aire para nuestra Salud
* Mucho Ruido
* Mucho Trafico
* Por tener muchos años viviendo en esta area tranquilos y sin problemas y no puede ser que por un tren que se pueda poner en otras calles ó areas

NO TREN EN ARIZONA AVE

MORE SPACES AND OPPORTUNITIES FOR COMMUNITY MEMBERS TO VOICE THEIR CONCERNS THAT COME WITH THESE PROJECTS. YOU NEED TO DISSEMINATE THE ENTIRE PROCESS FROM PROPOSED BUDGETS, PROPOSED TIME LINES AND PROPOSED END DATE. THIS COMMUNITY HAS MORE HISTORY THAN MOST OUTSIDE LOOKERS CAN UNDERSTAND. ALTHOUGH THERE ARE LESS CORPORATIONS PER CAPITA, WE HAVE SMALL BUSINESSES WHO DEPEND ON THE INCOME. MORE OUTREACH, ESPECIALLY TO THE RESIDENTS WHO RENT. THERE IS A LARGE DIFFERENCE BETWEEN RESIDENTS AND PROPERTY OWNERS.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

I am a City of Commerce Resident. Some how we have become the hub of transportation. The I-710 tried to expand from Long Beach to the 60 freeway, six lanes going each way. This project was going to take 220 homes in the Bristow and Bandini Park areas. Currently, all cities have signed on from Long Beach to Bell Gardens. Right Now we are going through the Washington Blvd Expansion Project that will benefit the Railroad Companies and trucking industry the losers are the residents of the city of Commerce. We are still waiting on the I-5 consortium (expansion). Commerce is one of the most polluted communities in the nation. There is no land in Commerce, unless you take our properties and displace our residents.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

First Choice: State Route 60; cause go to glamorous shops in Montebello.

Second Choice: "Both" State Route 60 "AND" Washington Blvd. We need easier and more effective ~~transpo~~ and ~~faster~~ transportation for both routes.

WRITTEN COMMENTS: Comments may also be mailed to: Dave Hershenson, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 or emailed to *eastsidephase2@metro.net*.

Gracias por su interés en el Proyecto del Corredor de Transporte hacia el Este Fase 2. Sus comentarios son bien recibidos.

Necesitamos más tiempo para estudiar las opciones. Metro no nos ha dado suficiente detalles sobre los impactos y beneficios de cada opción. No queremos que la comunidad del Este de Los Angeles sea dividida aún más con proyectos como éste. Considero que la opción de Garfield es la mejor~~o~~ ~~ya que~~ Ya es hora de que otras comunidades empiecen a compartir los impactos negativos de estos proyectos.

COMENTARIOS POR ESCRITO: Comentarios pueden ser enviados a: Dave Hershenson, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 o por correo electrónico *eastsidephase2@metro.net.*

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

My main concern is pollution and the effect it has already had on the community over a long period, since the ELA interchange and 710, 5, 60 were put in place. Further study needs to be done on the air quality in 90022, in which all these studies have been done. All the information from the 710 was done in 2010, which is out date and complete. Also, we that live in Arizona do not need another LTR, we already have one. Have residents need to be informed of the impact physically, mentally and to our future.

WRITTEN COMMENTS: Comments may also be mailed to: Dave Hershenson, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 or emailed to *eastsidephase2@metro.net*.

East Los Angeles Residents and Businesses -- Metro Phase II

East L.A. Advisory Council Meeting

June 8, 2016

Concerns pertaining to the Pomona/Atlantic 60 East Proposal

1. How will the construction affect the area of the current station at 3rd and Atlantic?
2. Could an underground station be constructed at Atlantic/Pomona?
3. It is necessary that we retain all parking in unincorporated East LA – also ingress & egress changes.
4. How will traffic flow be sustained during construction at Metro Plaza & McDonald's Plaza?
5. Metro Plaza and McDonald's Plaza request assistance and approval for the Conditional Use Permit (CUP) for directory signage.

Concerns pertaining to the Atlantic/South Washington proposal

1. How many businesses on Atlantic Blvd/Telegraph Rd. would the new tracks connect?
2. Possible boring sites? N/E corner Atlantic/Pomona, Beverly/Atlantic -- N/E or S/W corner?
3. Are there other alternatives (North/South) that are being considered?
4. Complete street elements after construction --- make sure improvements promised are completed.
5. A station will be required at one of the corners at Atlantic and Whittier.

Concerns pertaining to the Arizona/ South Washington proposal

1. Resident's concerns: Sink holes along the homes on the west side of Arizona.
2. Southwest corner Mednick and 3rd Street: boring site?
3. What is the impact (or future) of the existing 3rd Street station if this option is selected?

East L.A. Advisory Council Meeting

June 8, 2016

Concerns pertaining to ALL THREE proposed options

1. Exactly how many businesses/residents will be affected by the construction of each option?
2. What will be the benefits to the community? (community beautification projects - - trees planted, sidewalk improvements, assistance in bringing in new businesses – e.g. new movie theater, bowling alley, etc. etc.)
3. How will the businesses/residents affected by the construction be compensated? (marketing/advertising funds, tax credits, etc. etc.)
4. Is eminent domain being considered?
5. Mandate air quality monitoring system along the 5, 10, 710, and Pomona freeways.
6. Request rendering with aerial and elevation views – 3D preferably. Demo Model to follow in the following phase.
7. Request restrooms and drinking fountains at the stations.
8. Request all signage (in addition to the required ADA compliance) to be bilingual.
9. Request installation of a system that will allow commuters to alert the proper authorities of an emergency.
10. Request an area to attend emergency victims
11. The community STRONGLY opposes at grade and aerial construction.
12. How would traffic be (re)directed during construction at any impacted areas?
13. What is the difference between boring and cut & cover?
14. How is the ridership count conducted? We would like access to this information for the East L.A. and Boyle Heights areas for the last 4 yrs.
15. What are the factors that determine the routes/station stops? We want to ensure that they are established in areas that are most beneficial to the community. How are the time schedules determined?
16. The community wants its fair share of census tract data funds for establishing future projects in East LA.
17. Has any research been conducted to investigate the possibility of an alternate route? Example: What is the possibility of running the line onto the Long Beach (710) freeway to the Santa Ana (5) freeway? Or: running on the 60 freeway to either the 605 freeway or an alternate route to give access to the cities that don't have freeway access. (Similar to the Gold line on the 210 freeway – a route that has proven to be very popular.)

Comments or requests for additional information – please contact: **Tony DeMarco** at: **westernloan@aol.com**
Eddie Torres at: **eddie.torres@att.net**

PRESENTATON STARTED ABOUT 6:30 PM

~~2 MTGS~~ -

(7 pm)

1st STEP - (34) MONTS - PRIOR JOBS

BEFORE 1/2 GENERALLY (24-28 months)

WHERE WAS THE ONE - (TBM JUNE BEFORE MARTINO)

WHERE SIGNUP — (SIGN IN)

4 FOOTBAL SECTIONS

WHERE WAS THAT PROPERTY IN P/H BEFORE

ALL ~~THE~~ ~~OTHER~~ OF OR MOST IS SGV (COSTS DE GOOD UW EXCEPTION)

I FEEL THAT WE SHOULD KNOW MORE ABOUT ALL ALTERATIVES — WE WILL BE IMPACTED

BUT HOW ARE WE BENEFITED

TO BE AWARE

Date

- unfair to ask for feedback without presenting a discussion of env. impacts
- how can we evaluate routes + stations without study of economic impacts?
- concerns about gentrification - as happened in Boyle Heights
- how will the project impact Bob's Freeze ice cream location and other businesses?
- make sure community residents are represented in project discussions esp. regarding env. justice concerns
  - what is the overall goal of the project? local access? tourists?
- Atlantic and Arizona are "no goes"
  - Arizona: residential
  - Atlantic: too busy; businesses would be impacted
  → but would route along GO have low ridership?
- don't want to create separate barrios with train line as divider
- what transformation does Metro foresee taking place as a result of the project?
- if we stay away from Superfund, Arizona, and Atlantic, it's a narrow path that's left
  → businesses would be severely impacted by necessary land acquisition
- Washington Blvd alignment is preferred as method to connect communities
  - SR60 alignment doesn't connect communities; it's primarily for commuters
  - Washington Blvd ~~corridor~~ alignment can provide an alternative to travel by car
- least impact to East LA is SR60, given existing density
- history of damages on 3rd St. to small ~~businesses~~ businesses is evidence of potential damages
- Highland Park ~~bookline~~ is evidence of impact to people's backyards
- Atlantic Blvd is too busy; there are too many businesses that would be impacted

Page

Date

- go through town center to increase ridership

ATLANTIC + WHITTIER

- place construction staging on Stetzler's, quarter site, 76 station
- platform: south of Whittier
- transit plaza: on 76 gas station

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

As a daily rider of Metro buses, I think it would be good to have an extension of the Gold line to Whittier or to El Monte. However, I would recommend the Whittier route for several reasons. My top concern is that Metro already cut the 270 line route that used to go through Whittier, which has since made it very difficult to reach the Gold line or Green line. If there was a line that went into Whittier it would be helpful not only for Whittier residents, but college students going both ways; it could also potentially extend to Orange County in the future. Moreover, there are already better methods of getting to LA from El Monte, such as the silver line. As much as I like El Monte, it just doesn't make as much sense to extend the Gold line into that area.

WE DRIVE FREQUENTLY TO THE ATLANTIC STATION AND USE METRO TO REACH VARIOUS DESTINATIONS. BOTH ALTERNATIVES HOPEFULLY WILL BE BUILT BUT WE BELIEVE THE WASHINGTON BLVD ROUTE PROVIDES A UNIQUE OPPORTUNITY TO CONNECT THE GREENWAY BIKE TRAIL WHICH WILL EVENTUALLY STRETCH ALL THE WAY TO THE 57 FREEWAY. THE IMPORTANCE OF BIKE TRAVEL TO THE REGIONAL METRO SYSTEM WOULD VERY MUCH BE REINFORCED BY THE WASHINGTON BLVD. ROUTE.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

It's interesting to learn that both routes are being considered. However if one route wins over the other I hope it is the Washington route. I'm also concerned about the environmental impact on the Whittier Narrows wetlands if the SR-60 Alternative goes through. The SR-60 route is also very close to the Silver Line so that neighborhood is already served. I'm very happy that my tax dollars are being invested in much needed infrastructure. That means jobs and economic stimulation. I hope I live long enough to ride on the Washinton Blvd extention of the Gold Line.

Thank You!

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

- If more than 1 route is built, will both be built at the same time? Will construction completion permit operation to occur in phases as sections are completed?

Some of the materials reflect a new station at Atlantic. What would be done with the current station and parking? What would be the impacts to surrounding businesses & residents?

What would be the projected completion & operation date if only one route is built vs. both alignments?

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

(1) My concerns are the 60' extention of SCE Towers, Health & Safety

(2) Why doesn't SR 60 start on the northern side of 60 fwy then only cross over once, not three?

WRITTEN COMMENTS: Comments may also be mailed to: Lilian De Loza-Gutierrez, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 or emailed to *eastsidephase2@metro.net*.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

I enjoyed the presentation and the ability to vote on several topics. The comments by the community members were, in general, those of people who were highly informed.

I do believe that the new alternatives have merit but only one should be built. If the 60 ALTERNATIVE IS BUILT PLEASE CONSTRUCT SOUND WALLS ON THE N/S OF THE 60 Fwy FROM WILCOX AVE. TO ATLANTIC AVE.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

- I am concerned about the SR60 Alternative running so close to a Superfund site. Will construction not pose a danger?
- The routes don't seem to serve Montebello residents. Who is this serving? This doesn't seem to help our commuters
- the way it would work is people driving and parking to use the train, but I don't see any plans for parking lots.
- Why would we have a Commerce station? Who really goes there? YOU are not serving Montebello w/ this.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

I live in Whittier near the proposed stop along ~~the~~ Washington Bl at Norwalk Bl. I support the Washington Bl option. I have no problem with any of the technical issues.

I support the idea of both Alt 6D and Washington. If I had to choose, I would choose the Washington option.

Thank you.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

I'm really happy to see this project in my community. It will provide important linkages between DTLA, Citadel Outlets, Montebello Town Center, Whittier and South El Monte.

Slightly off-topic but it would be nice to see a stronger connection to El Monte Station (either bus or rail)

- ~~Line 270 - Foothill Transit - N-S on Peck~~
- Line 7 - Norwalk Transit - Very limited service - hourly, ends at 8pm - no Sunday service.
- Line 269 - Foothill Transit - decent link between Montebello Mall + El Monte Station but can be unreliable.

Don't rail road East L.A.!

How many businesses will be affected by A+B+C? We've lost too many businesses from Gold Line phase 1 and our community was lied too. We have no Mayor nor Councilmember to represent us. Will our community get the same ammenities as other Citys?

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

Definitely the Gold Line extension should go through Commerce and down Washington Blvd into Whittier. It would serve so many more people than the Freeway (60) alternative. Even though the costs would probably be more (underground drilling, right-of-way expense etc) in the long run the usage by riders would justify the added building expense.

I prefer an old alternative.
Expand the subway from 7th & Metro thru Whittier Blvd. ending at Whittier & Atlantic.

You're working on the Regional Connector 7th & Metro to Little Tokyo. Why not give us the ELA subway which was previously planned?!!

The former Red Line first opened from 7th & MacArthur Park. Why not do the same for ELA: build a subway!

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

My main concerns of the State Route-60 project are traffic, noise pollution and pollution. (Atlantic to Garfield)

Traffic: An increase of traffic on Atlantic Blvd., freeway exits on Atlantic Blvd, Findlay Ave and Garfield Ave. This project will further increase both street and freeway exit traffic.

Noise pollution: increased noise that will carry onto the adjacent neighborhood. An elevated train will produce sound that will carry farther and affect more local residences.

Pollution: Increasing, further increasing the level of pollution from the 60 freeway and an ariel train that will disburse that pollution even further.

WRITTEN COMMENTS: Comments may also be mailed to: Lilian De Loza-Gutierrez, Community Relations Manager, Los Angeles County Metropolitan Transportation Authority, One Gateway Plaza, MS 99-13-1, Los Angeles, CA 90012 or emailed to *eastsidephase2@metro.net*.

Thank you for your interest in the Metro Eastside Transit Corridor Phase 2 project. We welcome your comments.

For SR-60 Alt route: consider having a stop at new Marketplace in Mont Pk. Senior housing & new home development on Potrero Grande does not have access to any public transportation currently.

- How does this fit into Regional public transport ~~rapid~~ master plan

- Consider how much worse traffic is going to be along Pomona Blvd if SR-60; already terrible & will be made worse when we lose a traffic lane.
  - ↳ Big concerns over surface st traffic already being terrible to get worse.

Overall, I appreciate the open communication and meetings

As an East L.A. home owner I believe this project will increase the value of my home, which is why I'm interested. I also ride the Metro and love public transportation. I lived in the Bay Area and didn't need a car for 8 years because of the awesome public transportation system. I think a lot of the naysers are just too reliant on the comfort of their cars and don't realize that in order to decrease traffic, we need to use public transportation. I support the A + B alternatives.

From: Sam Orona [mailto:sorona1960@gmail.com]
Sent: Thursday, February 02, 2017 6:17 PM
To: EastSidePhase2
Cc: executiveoffice@bos.lacounty.gov
Subject: suggestion

Hi I suggest you build a metro station behind the pep boys as right now the parking lot is being overrun by vagrants, drug addicts, homeless encampment. It is becoming a high crime area.

You can put an underground tunnel which connects to the existing metro station as it is already usually full capacity on most workdays.

I suggest that the train continues to the san gabriel river and then go south through the riverbed but elevated like the monorail at Disneyland. Using the san gabriel riverbed is ideal because there is no land rights issue since the property is already owned by the government. There will be less impact of construction delays since the train will be away from the main boulevards being built upon the riverbed.

It can go as far south as the riverbed as well. Being roughly the length of the 605 freeway.

There is also no checking of tap cards or enforcement such as a blocked passage way at Atlantic station. Most of the homeless, criminals are aware and congregate at Atlantic station. Sometimes it seems like a free for all because there is no man traps at Atlantic station.

Can Metro look into using security cameras with remote enforcement to see who is not paying and facial recognition software to identify those not paying their fare? This needs to be addressed at Atlantic station a main hub.

Turning Point Results

Metro Eastside Transit Corridor Phase 2
February 2017 Community Meetings
Aggregate Turning Point Results

1.) Have you ever taken a trip on the Metro Gold Line? (multiple choice)

Response	Whittier	Whittier	Montebello	Montebello	South El Monte	South El Monte	Commerce	Commerce	East L.A.	East L.A.

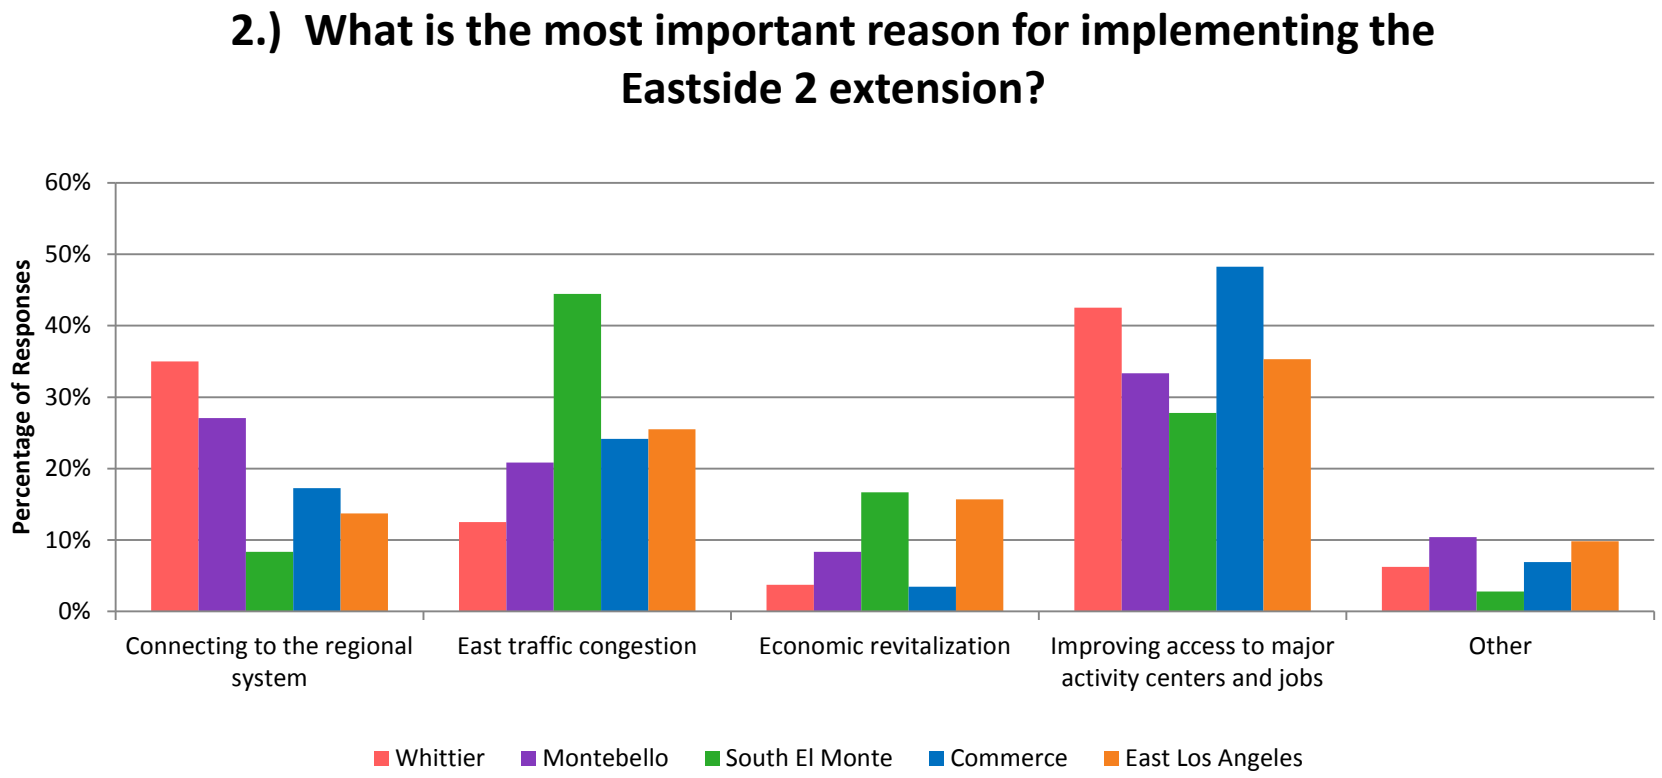
Total	**82**		**43**		**32**		**26**		**52**	

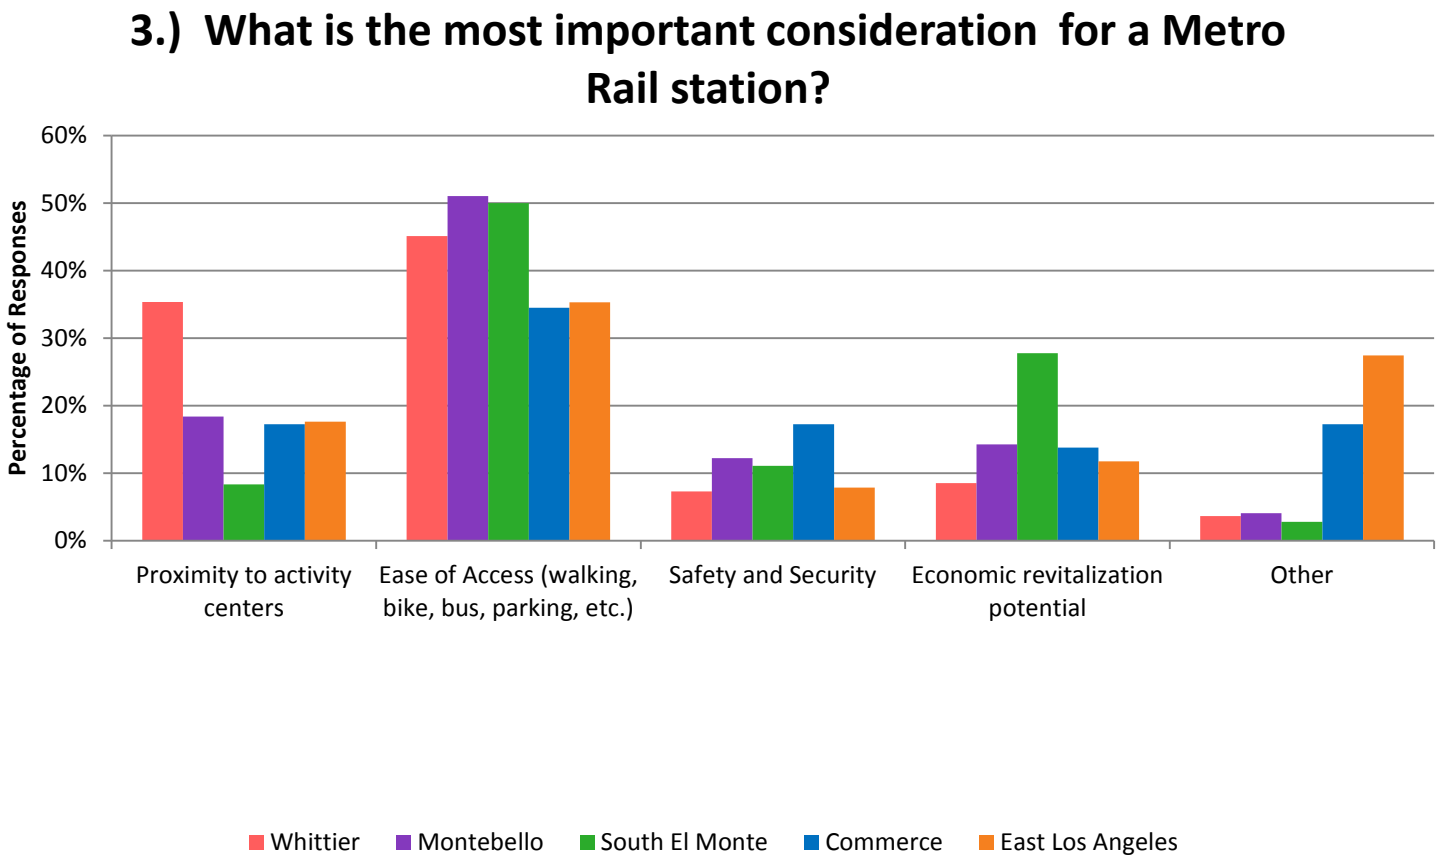
6.) Based on what you heard, is there merit in adding a combined Alternative that includes both SR-60 and Washington Blvd in the next phase of the study? (multiple choice)

Response	Whittier	Whittier	Montebello	Montebello	South El Monte	South El Monte	Commerce	Commerce	East L.A.	East L.A.
Yes	47	58%	19	37%	14	44%	14	52%	28	54%
No	22	27%	26	51%	13	41%	5	19%	15	29%
Maybe	12	15%	6	12%	5	16%	8	30%	9	17%
Total	**81**		**51**		**32**		**27**		**52**	



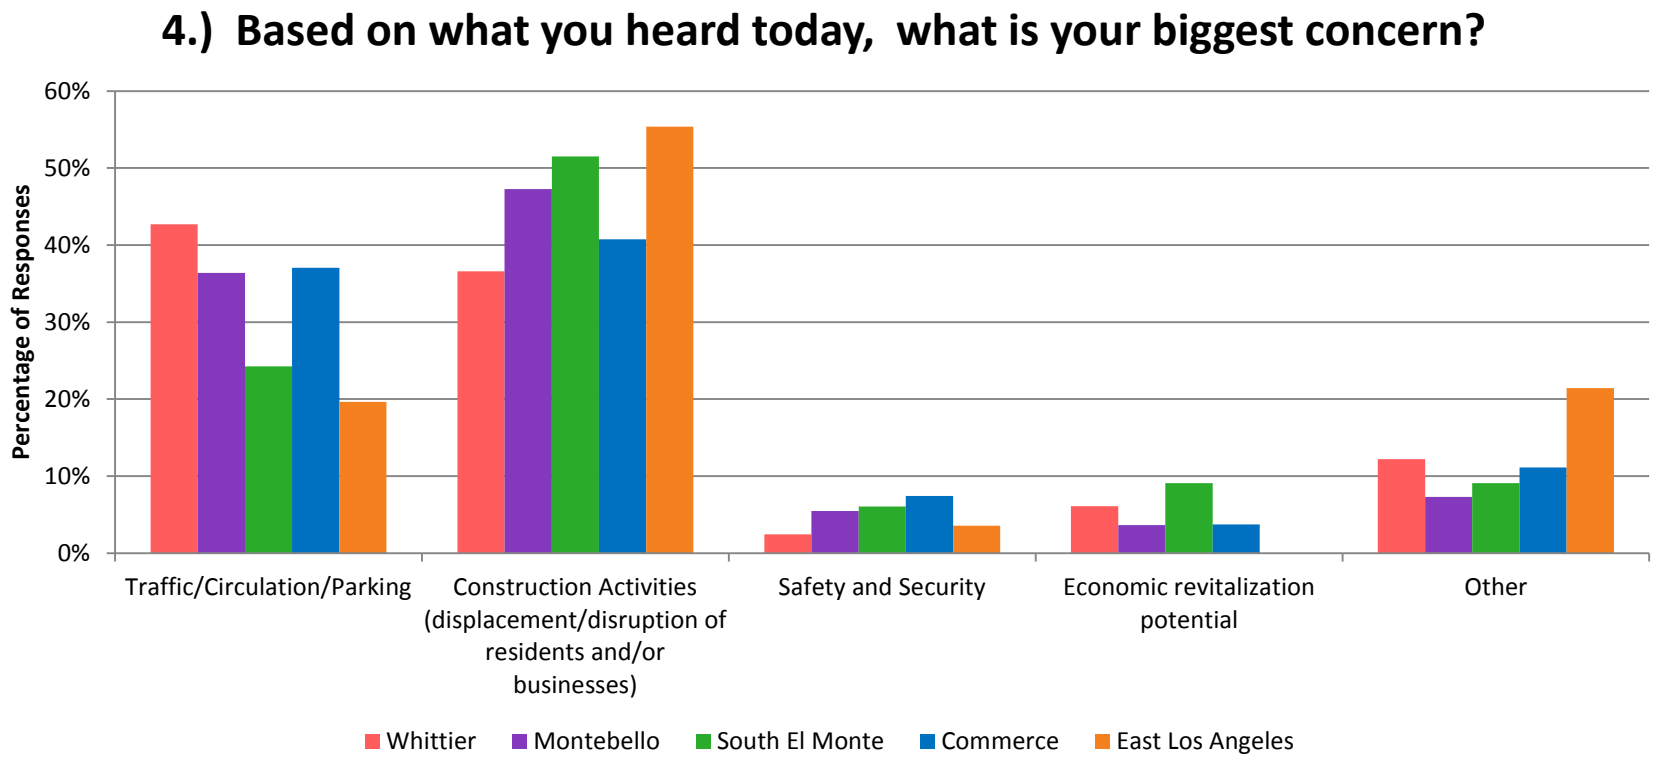
1.) Have you ever taken a trip on the Metro Gold Line? (multiple choice)

Response	Yes	No	Total
Whittier	86%	14%	80
Montebello	80%	20%	41
South El Monte	69%	31%	36
Commerce	87%	13%	31
East Los Angeles	92%	8%	51



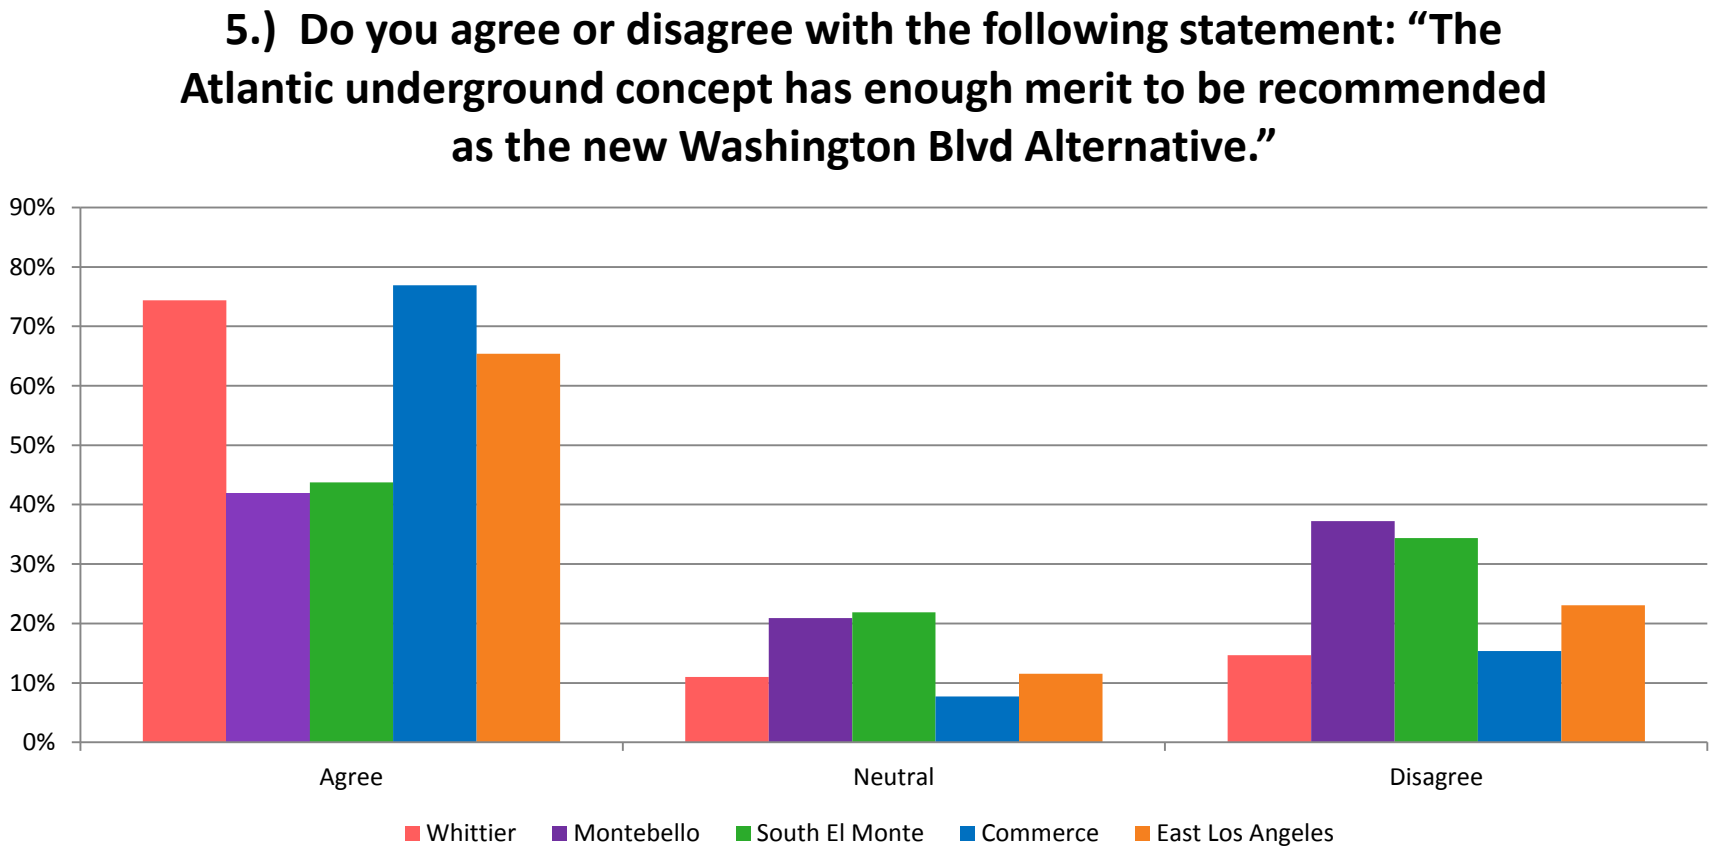
2.) What is the most important reason for implementing the Eastside 2 extension? (multiple choice)

Response	Whittier	Montebello	South El Monte	Commerce	East Los Angeles
Connecting to the regional system	35%	27%	8%	17%	14%
East traffic congestion	13%	21%	44%	24%	25%
Economic revitalization	4%	8%	17%	3%	16%
Improving access to major activity centers and jobs	43%	33%	28%	48%	35%
Other	6%	10%	3%	7%	10%



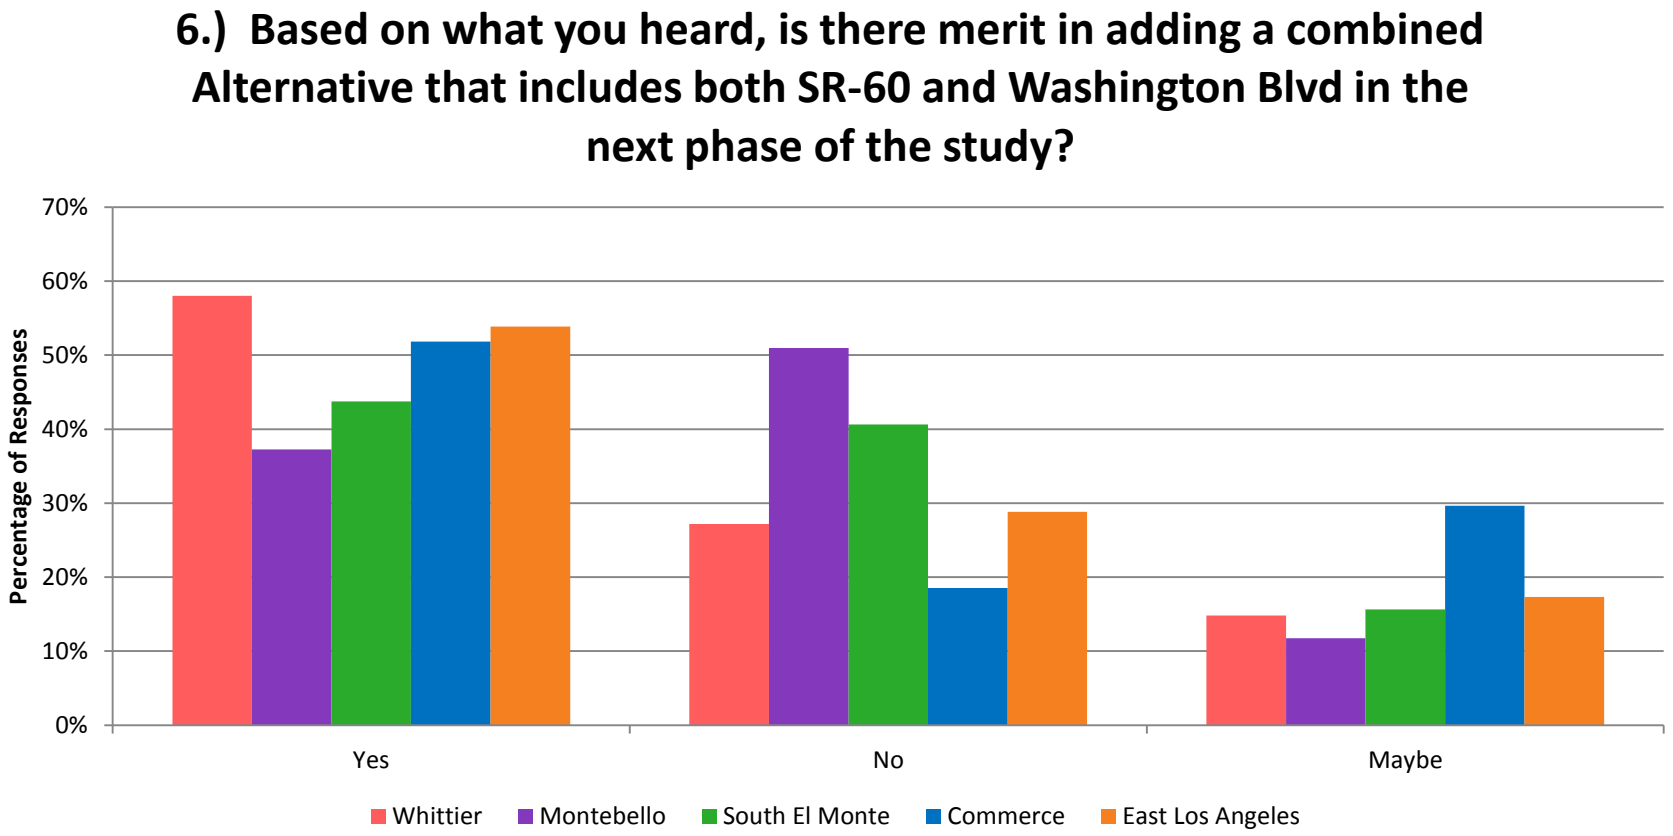
3.) What is the most important consideration for a Metro Rail station? (multiple choice)

Response	Proximity to activity centers	Ease of Access (walking, bike, bus, parking, etc.)	Safety and Security	Economic revitalization potential	Other
Whittier	35%	45%	7%	9%	4%
Montebello	18%	51%	12%	14%	4%
South El Monte	8%	50%	11%	28%	3%
Commerce	17%	34%	17%	14%	17%
East Los Angeles	18%	35%	8%	12%	27%



4.) Based on what you heard today, what is your biggest concern? (multiple choice)

Response	Traffic/Circulation/Parking	Construction Activities (displacement/disruption of residents and/or businesses)	Safety and Security	Economic revitalization potential	Other
Whittier	43%	37%	2%	6%	12%
Montebello	36%	47%	5%	4%	7%
South El Monte	24%	52%	6%	9%	9%
Commerce	37%	41%	7%	4%	11%
East Los Angeles	20%	55%	4%	0%	21%



5.) Do you agree or disagree with the following statement: "The Atlantic underground concept has enough merit to be recommended as the new Washington Blvd Alternative."

Response	Agree	Neutral	Disagree
Whittier	74%	11%	15%
Montebello	42%	21%	37%
South El Monte	44%	22%	34%
Commerce	77%	8%	15%
East Los Angeles	65%	12%	23%

6.) Based on what you heard, is there merit in adding a combined Alternative that includes both SR-60 and Washington Blvd in the next phase of the study?

Response	Yes	No	Maybe
Whittier	58%	27%	15%
Montebello	37%	51%	12%
South El Monte	44%	41%	16%
Commerce	52%	19%	30%
East Los Angeles	54%	29%	17%

*Station location and park-and-ride structure design concept are subject to change as technical analysis continues.

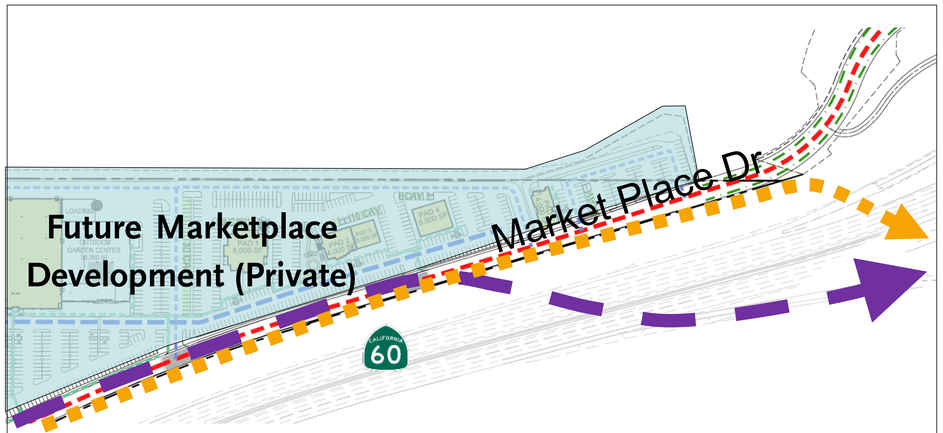
SR 60 North Side Design Variation (NSDV) Alternative
Coordination with Resource Agencies

U.S. Environmental Protection Agency (EPA) coordination:

- Completed soil boring survey
- Revised alignment to avoid visual impact to Monterey Park Marketplace Development

Caltrans & Southern California Edison (SCE) coordination :

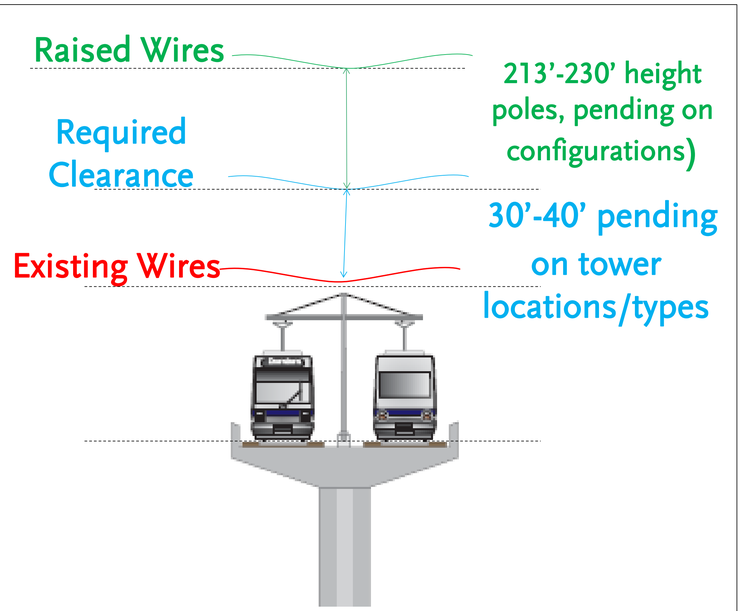
- Refined alignment at Paramount Interchange
- Revised design to avoid conflicts with transmission towers/lines



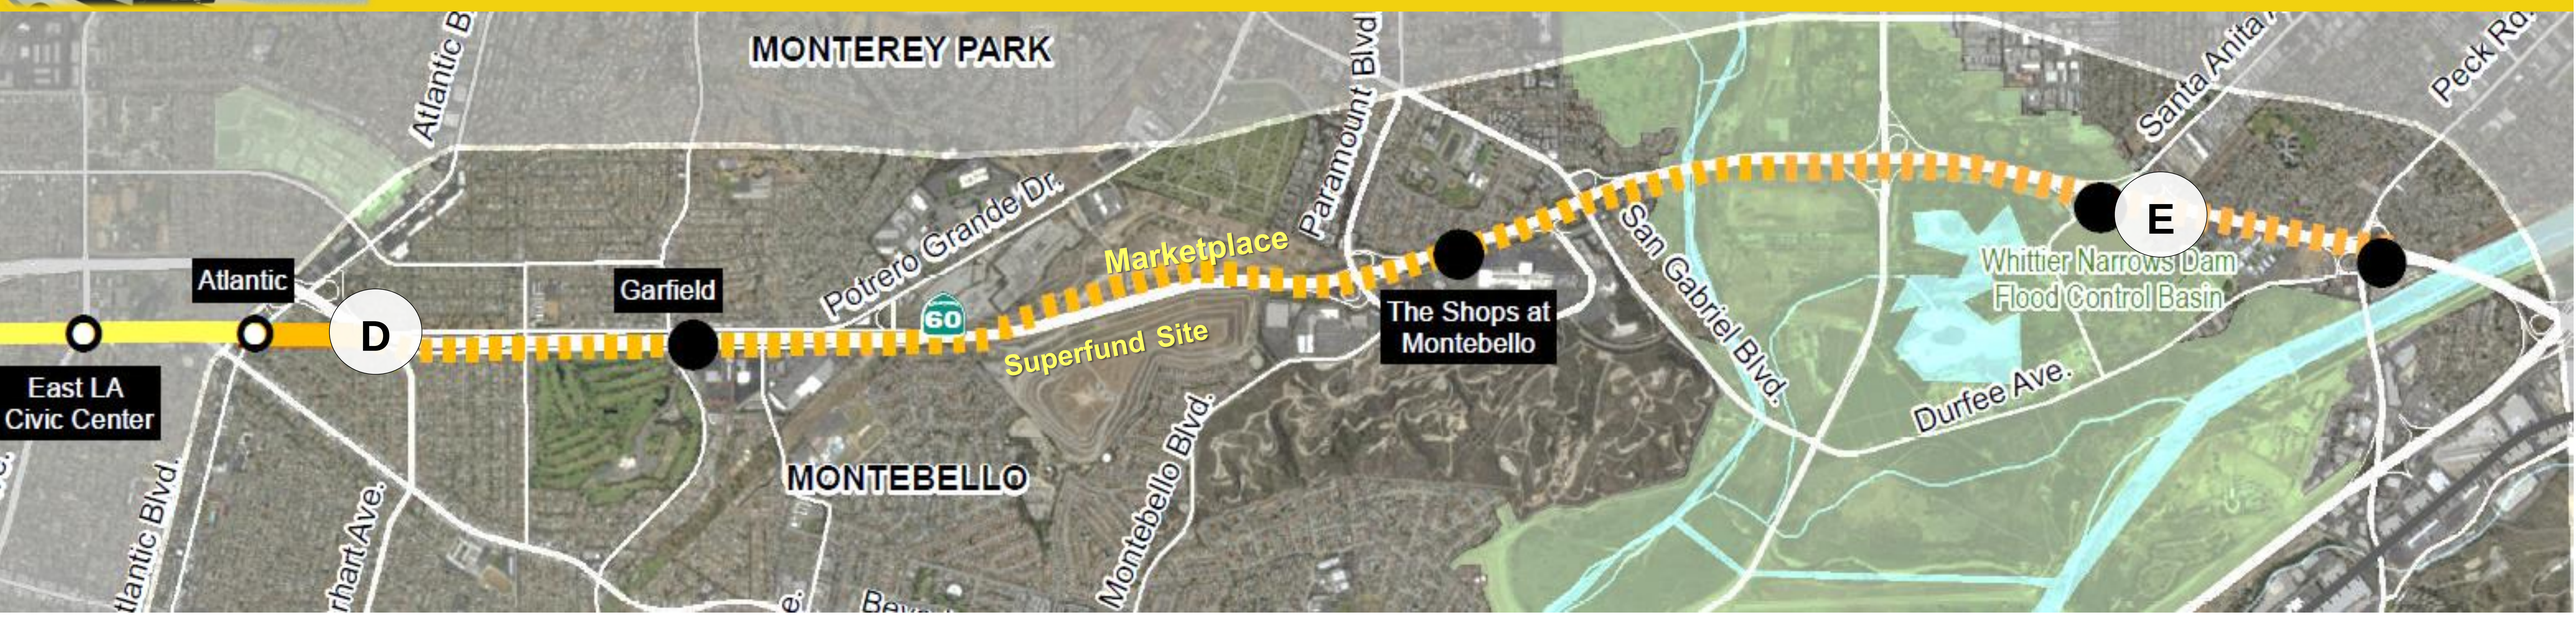
U.S. Army Corp of Engineers (ACE) coordination :

- Completed biological surveys for Whittier Narrows Basin and Rio Hondo Crossings
- Advanced Santa Anita Station concept

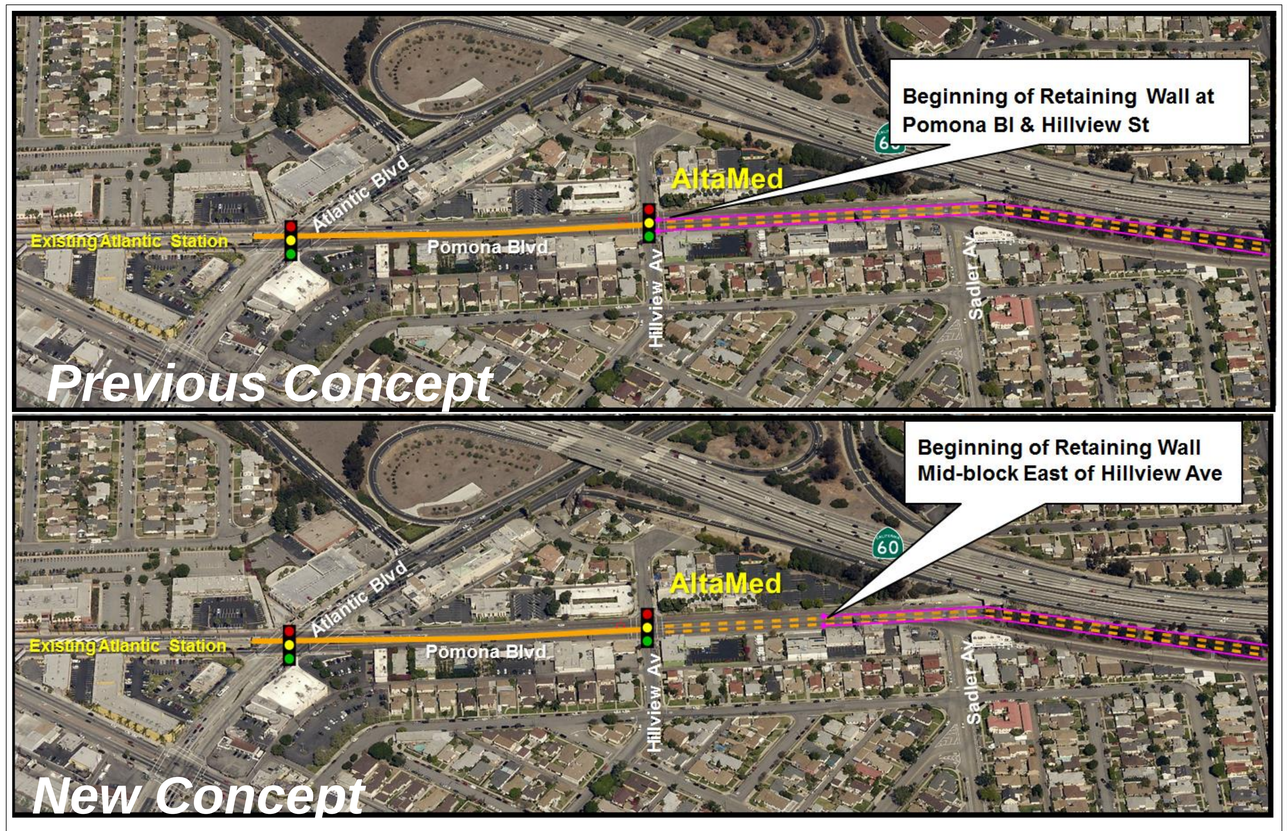
SR 60 North Side Design Variation (NSDV) Alternative
Post Draft EIS/EIR Refinements (Part 1 of 2)



A Shifted Light Rail Flyover Further East and Lowered Grade Profile To Minimize Visual Impact to Marketplace Development



B Relocated Light Rail Alignment Column Placement Locations to Avoid Conflict with Caltrans' Ramp Improvement Project



C Raised SCE Transmission Wires at SR 60/Paramount Interchange

Third Street Specific Plan

Adopted November 12, 2014

3rd Street Plan Goals

Goal 1: Enhance and preserve East Los Angeles' distinctive community character

Goal 2: Improve economic vitality and create jobs

Goal 3: Provide a range of housing

Goal 4: Activate the public realm

Goal 5: Improve mobility and transportation choices

Goal 6: Create a sustainable community

Maravilla Station and Civic Center Station Area Vision

A parking garage with retail uses lining the ground floor

A pedestrian-oriented light rail station

Lined garage with shop fronts and street access to parking

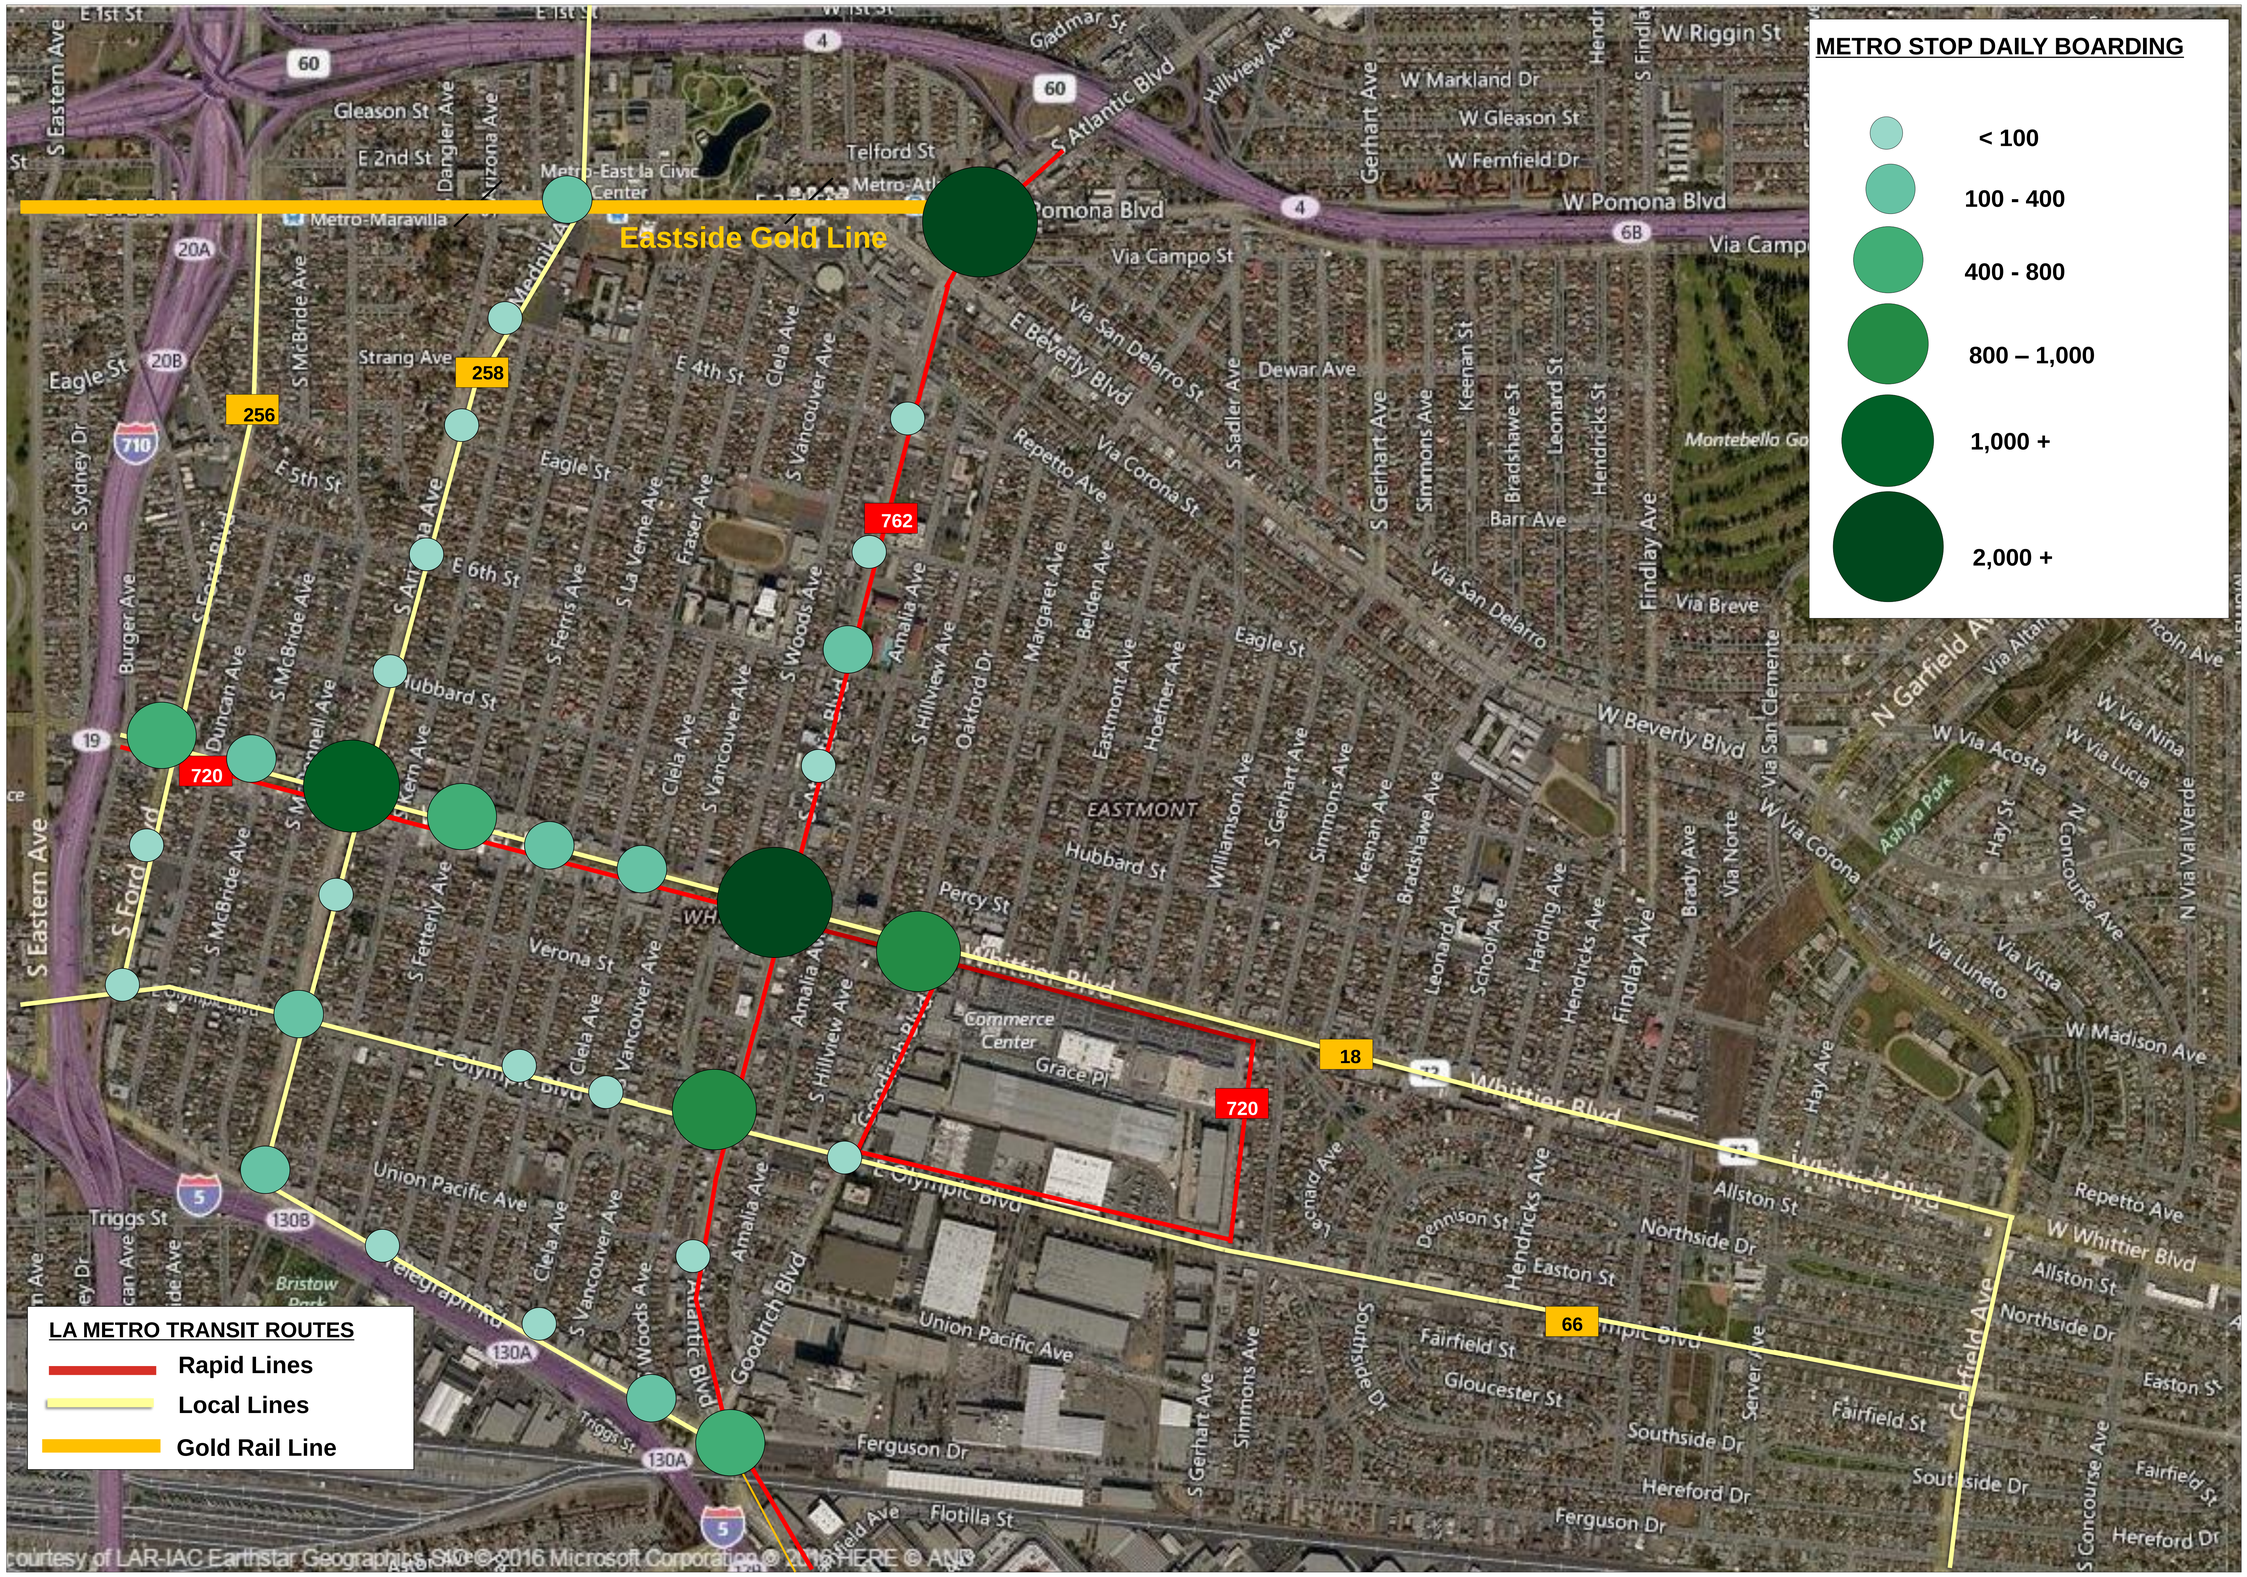
- The Civic Center station area should be transformed through the gradual infill and redevelopment of underutilized parcels into a vibrant, mixed-use environment.
- It will serve as a distinctive, welcoming place for residents, and a destination for visitors and employees, and a focal point for community gatherings and civic activities.
- The areas around the stations will provide a variety of quality housing and commercial opportunities, with an expanded employment market.

Atlantic Station Area Vision

Mixed-use building with ground floor retail and upper floor office uses

A pedestrian passage provides access from street to center of block

Mixed-use buildings flanking a light rail station



Mixed use buildings with housing and/or offices above retail

- The station area should be transformed into a mixed-use, pedestrian friendly transit-oriented environment through the gradual infill of its underutilized parcels. Parcels currently occupied by one-story commercial buildings and parking lots will be redeveloped at a higher intensity.
- Pedestrian passageways and smaller plazas should connect parking areas to the street and provide convenient circulation for shoppers, increase the visibility of shops to motorists, and provide buildings that are in scale and character of the corridor.

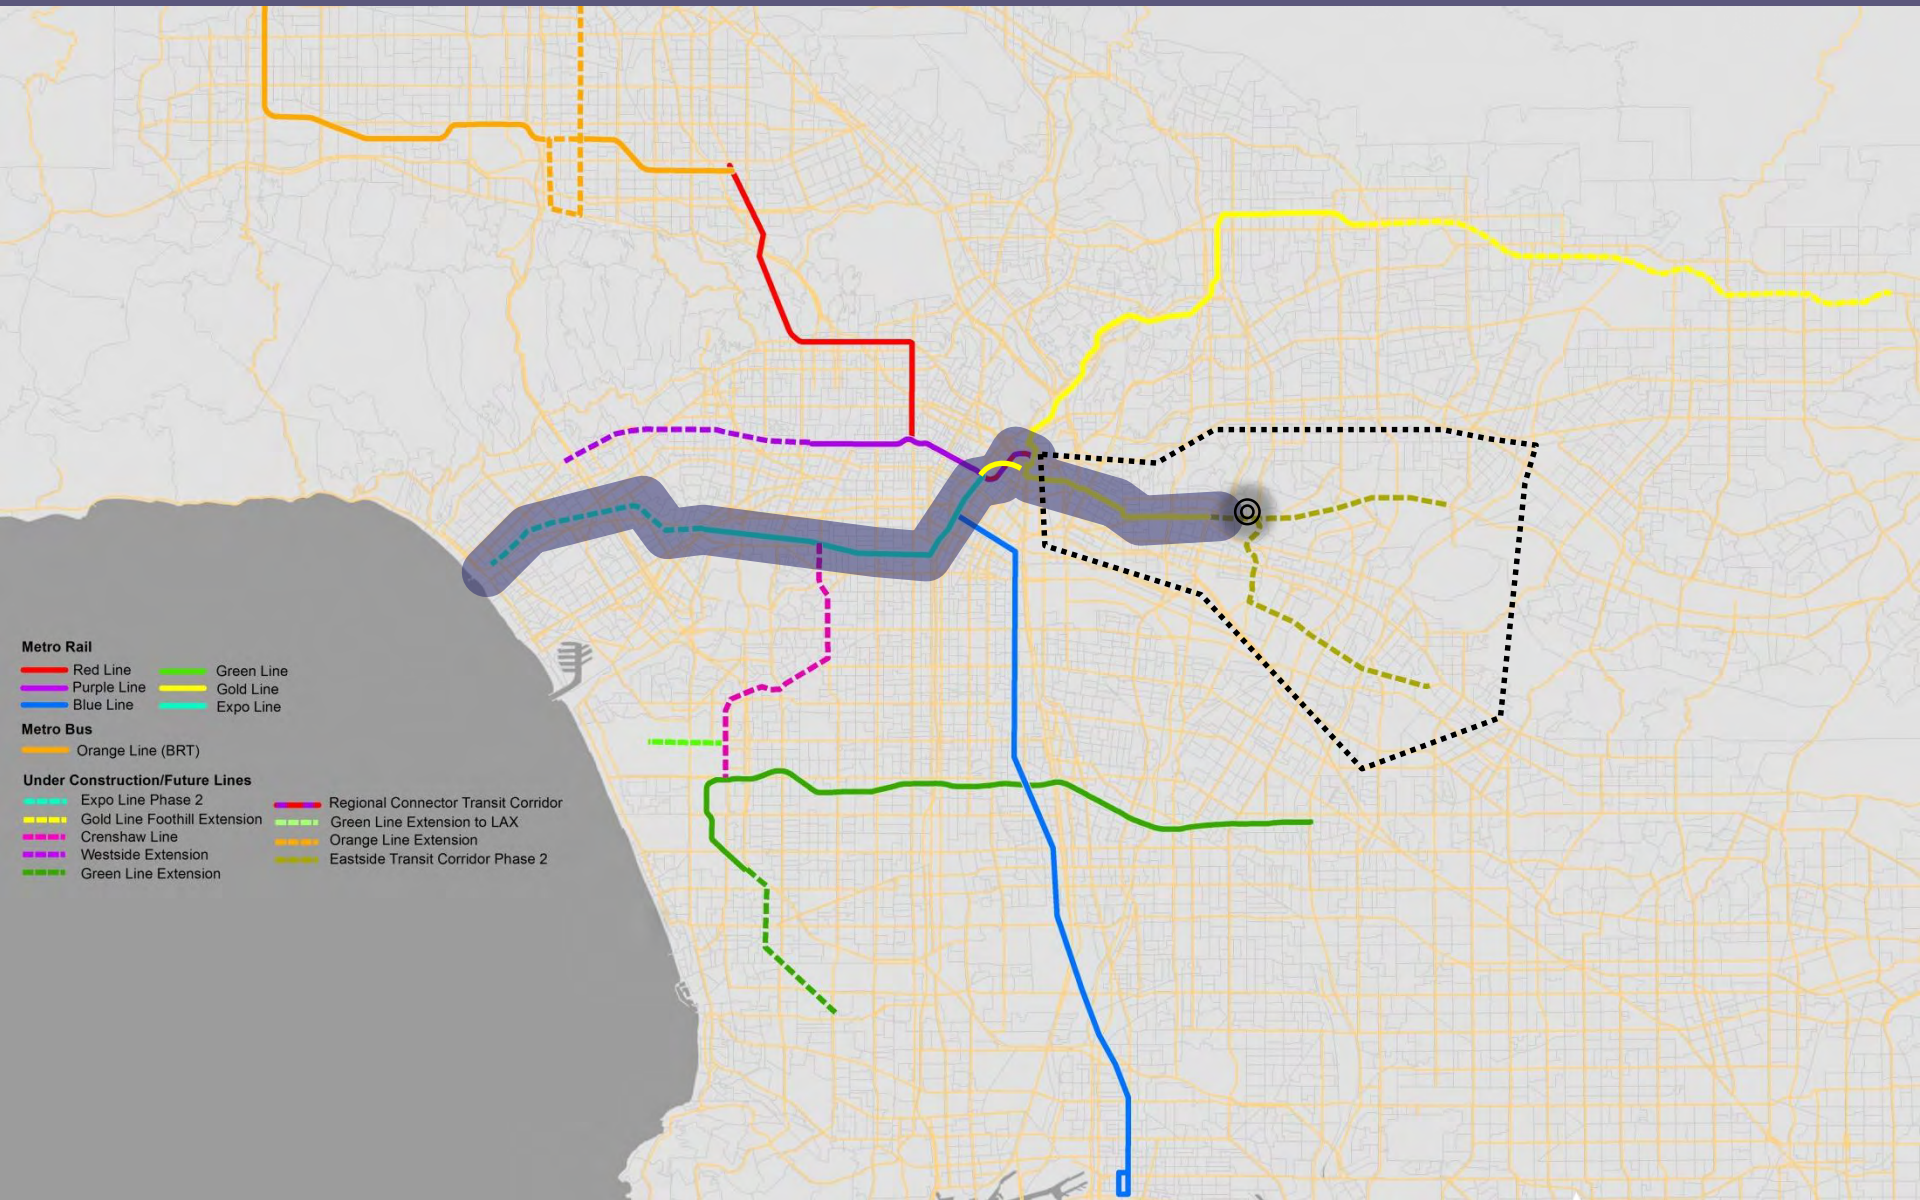
Presentations

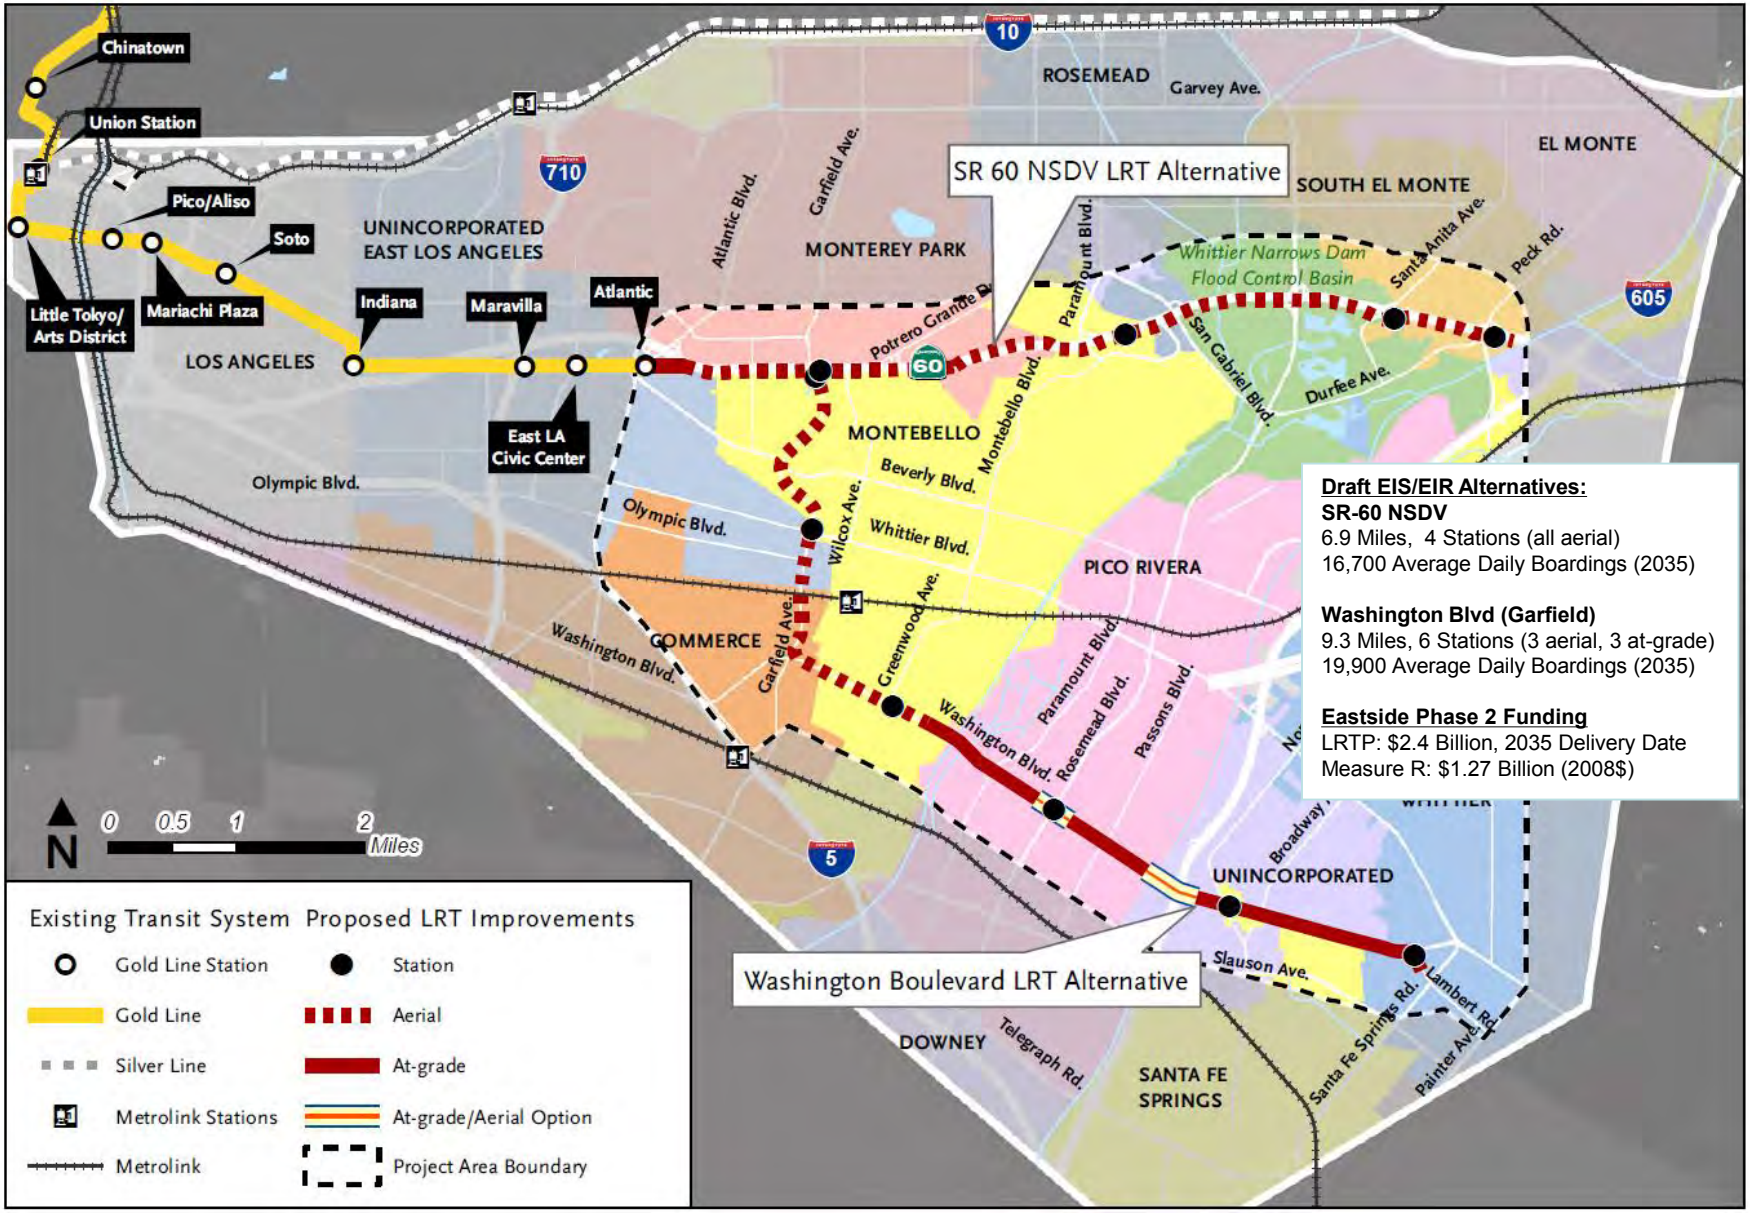
Eastside Transit Corridor Phase 2

Community Meetings, March 28-31, 2016



Purpose of Tonight's Meeting

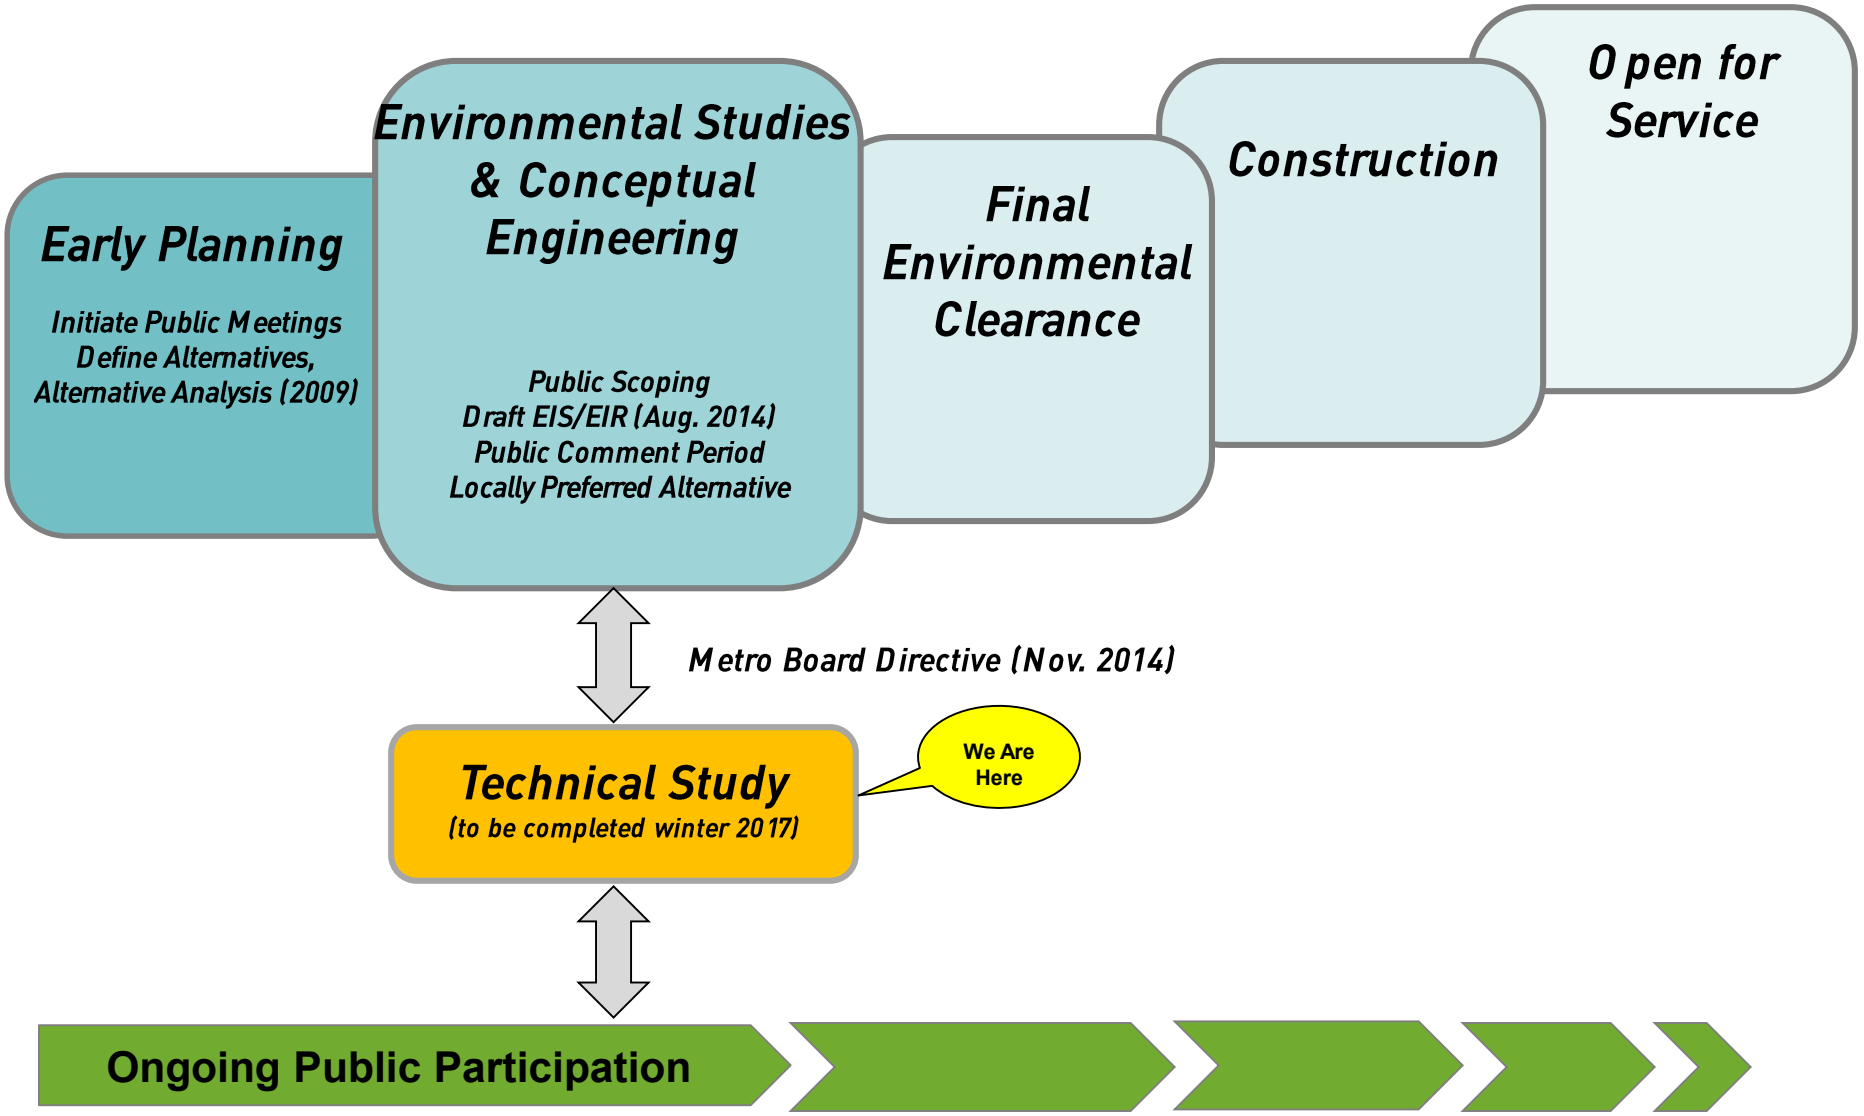
- Project History
- Update on Metro Board directed Technical Study (Nov. 2014)
  - SR-60 Alternative
  - Washington Blvd Alternative
- Interactive Discussion
- Next Steps



Eastside Phase 2 Study Area

Eastside Phase 2 Study Area in Los Angeles County

Alternatives Studied in 2014 Draft EIS/EIR

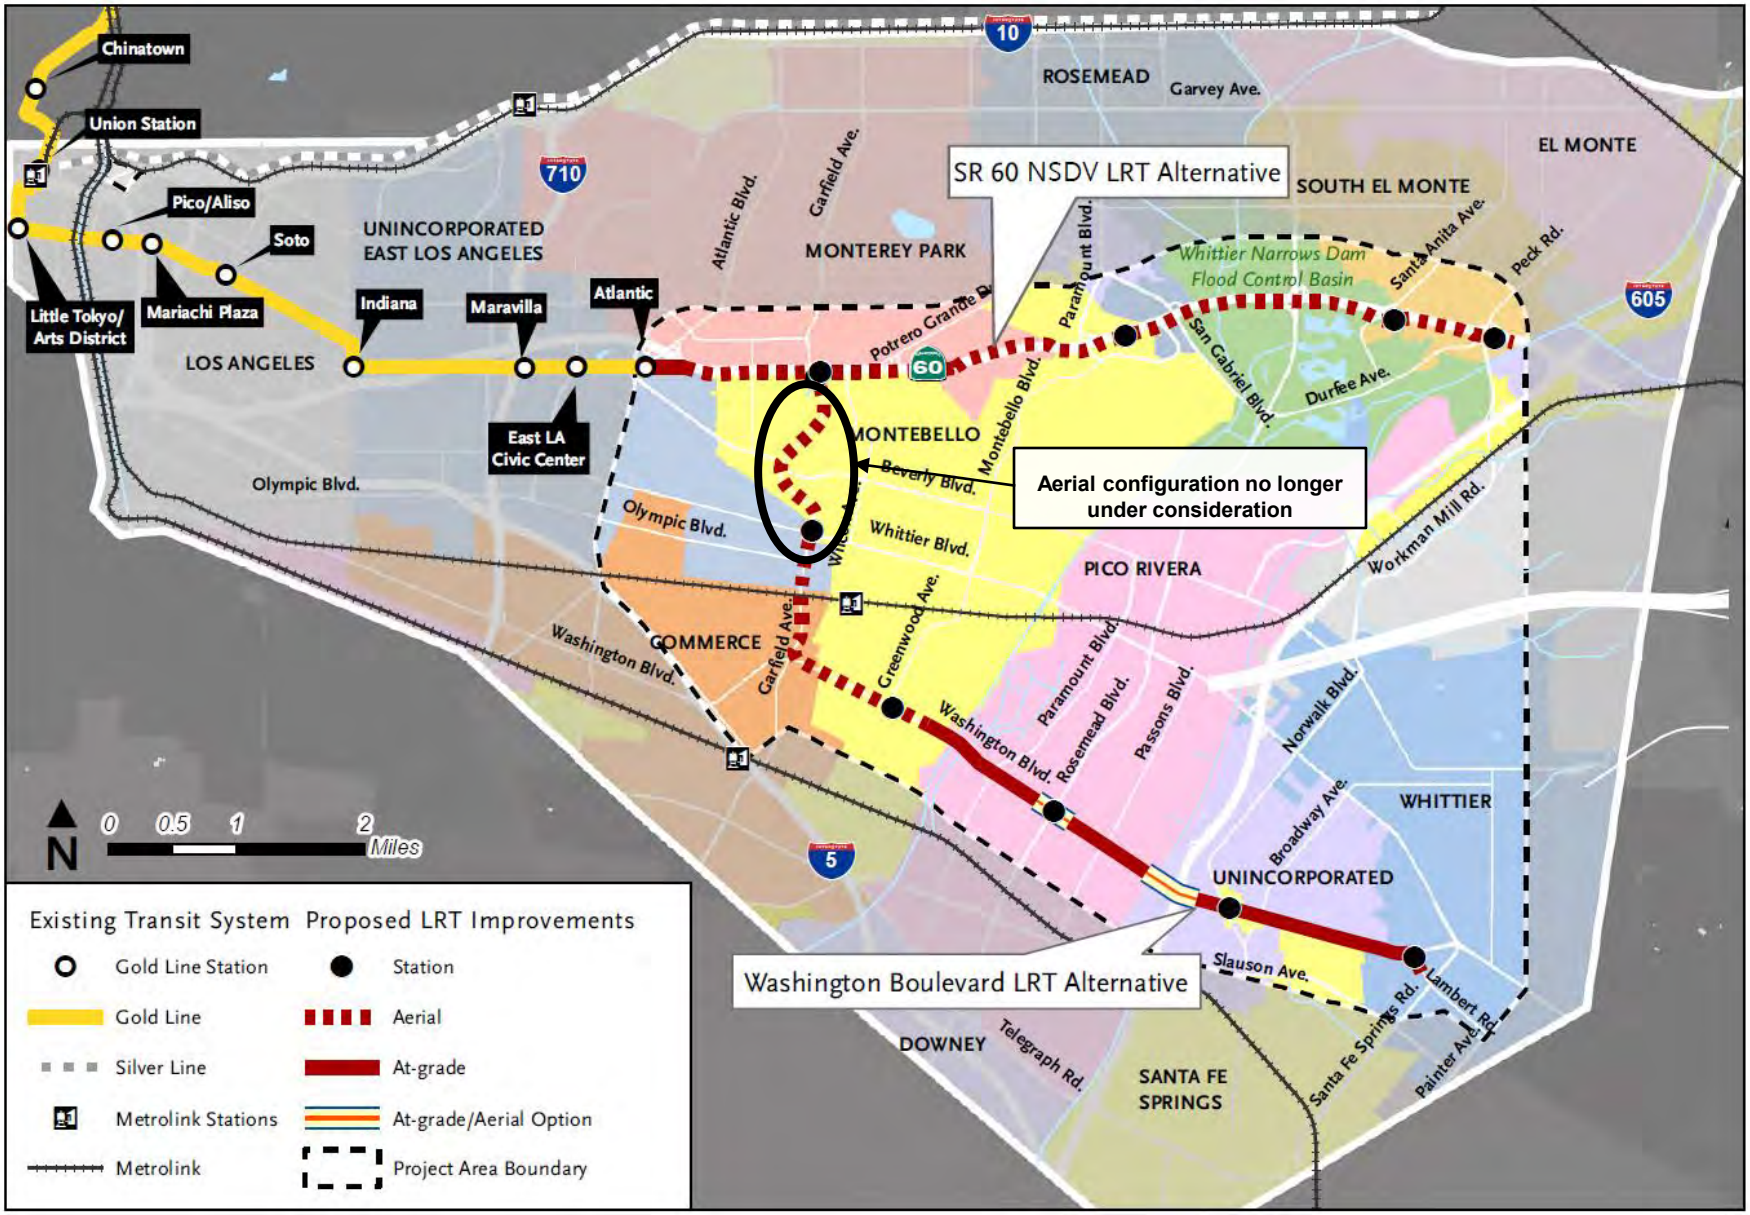


Draft EIS/EIR Alternatives:

SR-60 NSDV
6.9 Miles, 4 Stations (all aerial)
16,700 Average Daily Boardings (2035)

Washington Blvd (Garfield)
9.3 Miles, 6 Stations (3 aerial, 3 at-grade)
19,900 Average Daily Boardings (2035)

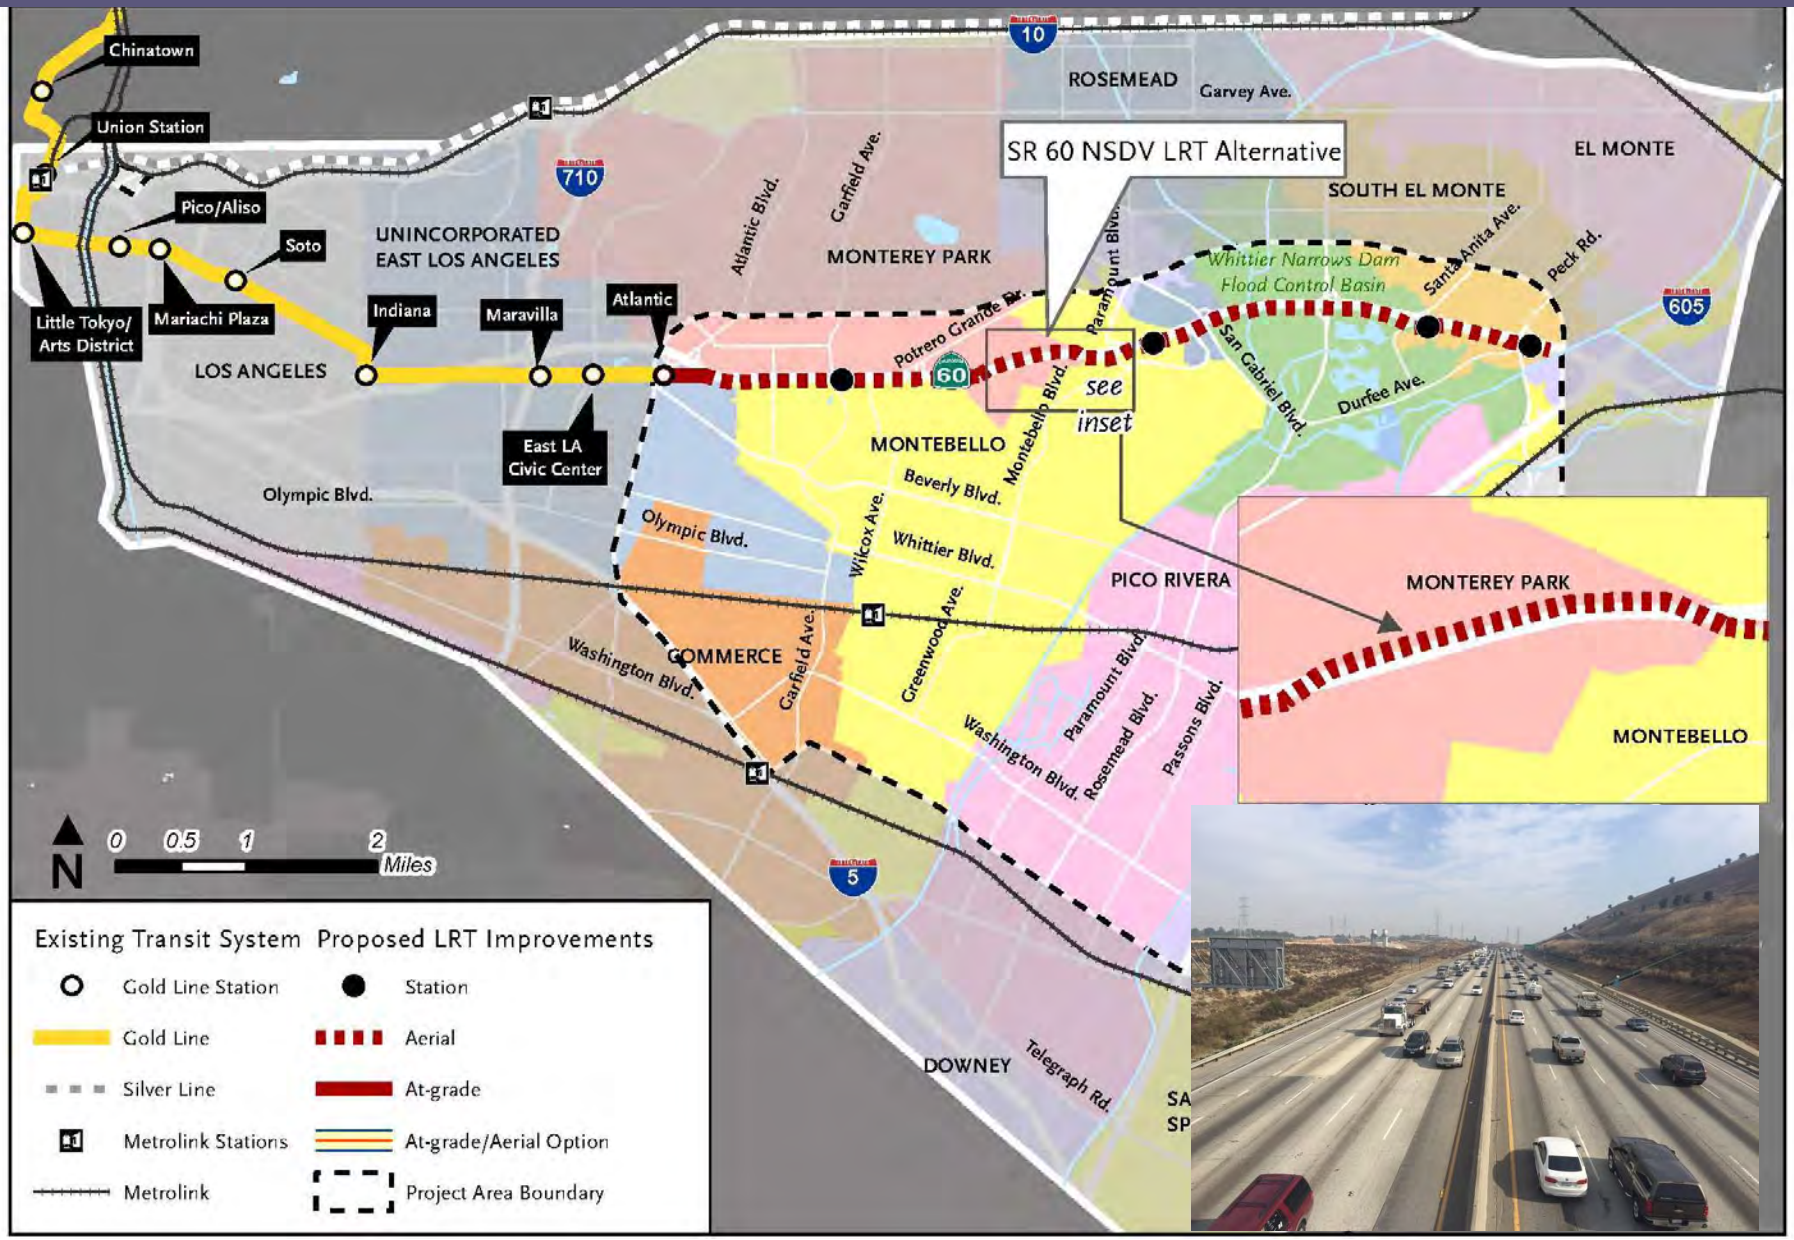
Eastside Phase 2 Funding
LRTP: $2.4 Billion, 2035 Delivery Date
Measure R: $1.27 Billion (2008$)



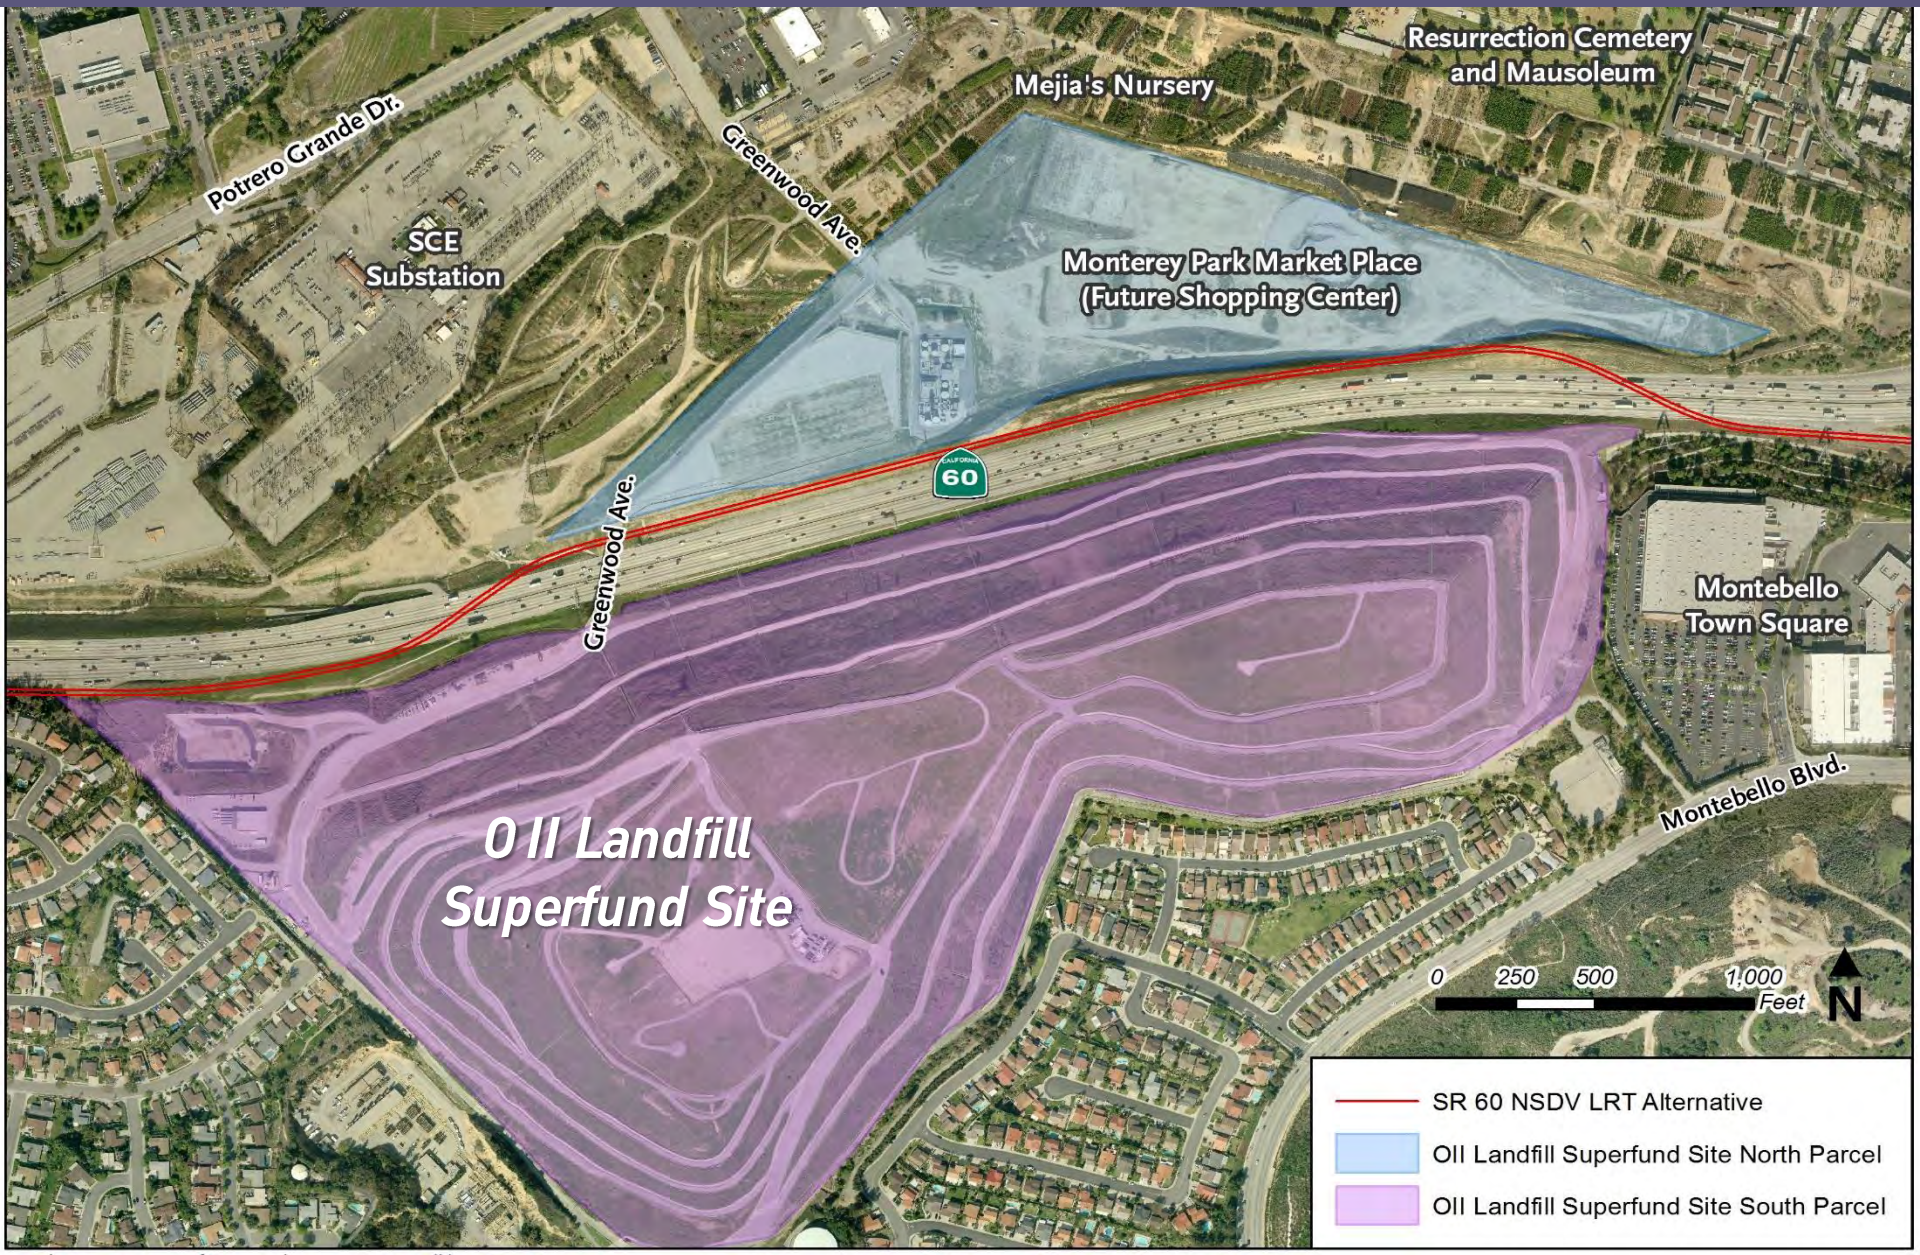
Phases of Project Development

Metro Board Action (Nov 2014)

- ❑ *Continue Studying SR 60 North Side Design Variation (NSDV) option*
- ❑ *Address Comments from Cooperating Agencies*
  - *Environmental Protection Agency (EPA)*
  - *California Department of Transportation (Caltrans)*
  - *Southern California Edison (SCE)*
  - *US Army Corp of Engineers (USACE)*
- ❑ *Explore feasibility of operating both alternatives*
- ❑ *Eliminate aerial on Garfield Avenue between Via Campo and Whittier Blvd, and identify a new north-south connection to Washington Blvd*

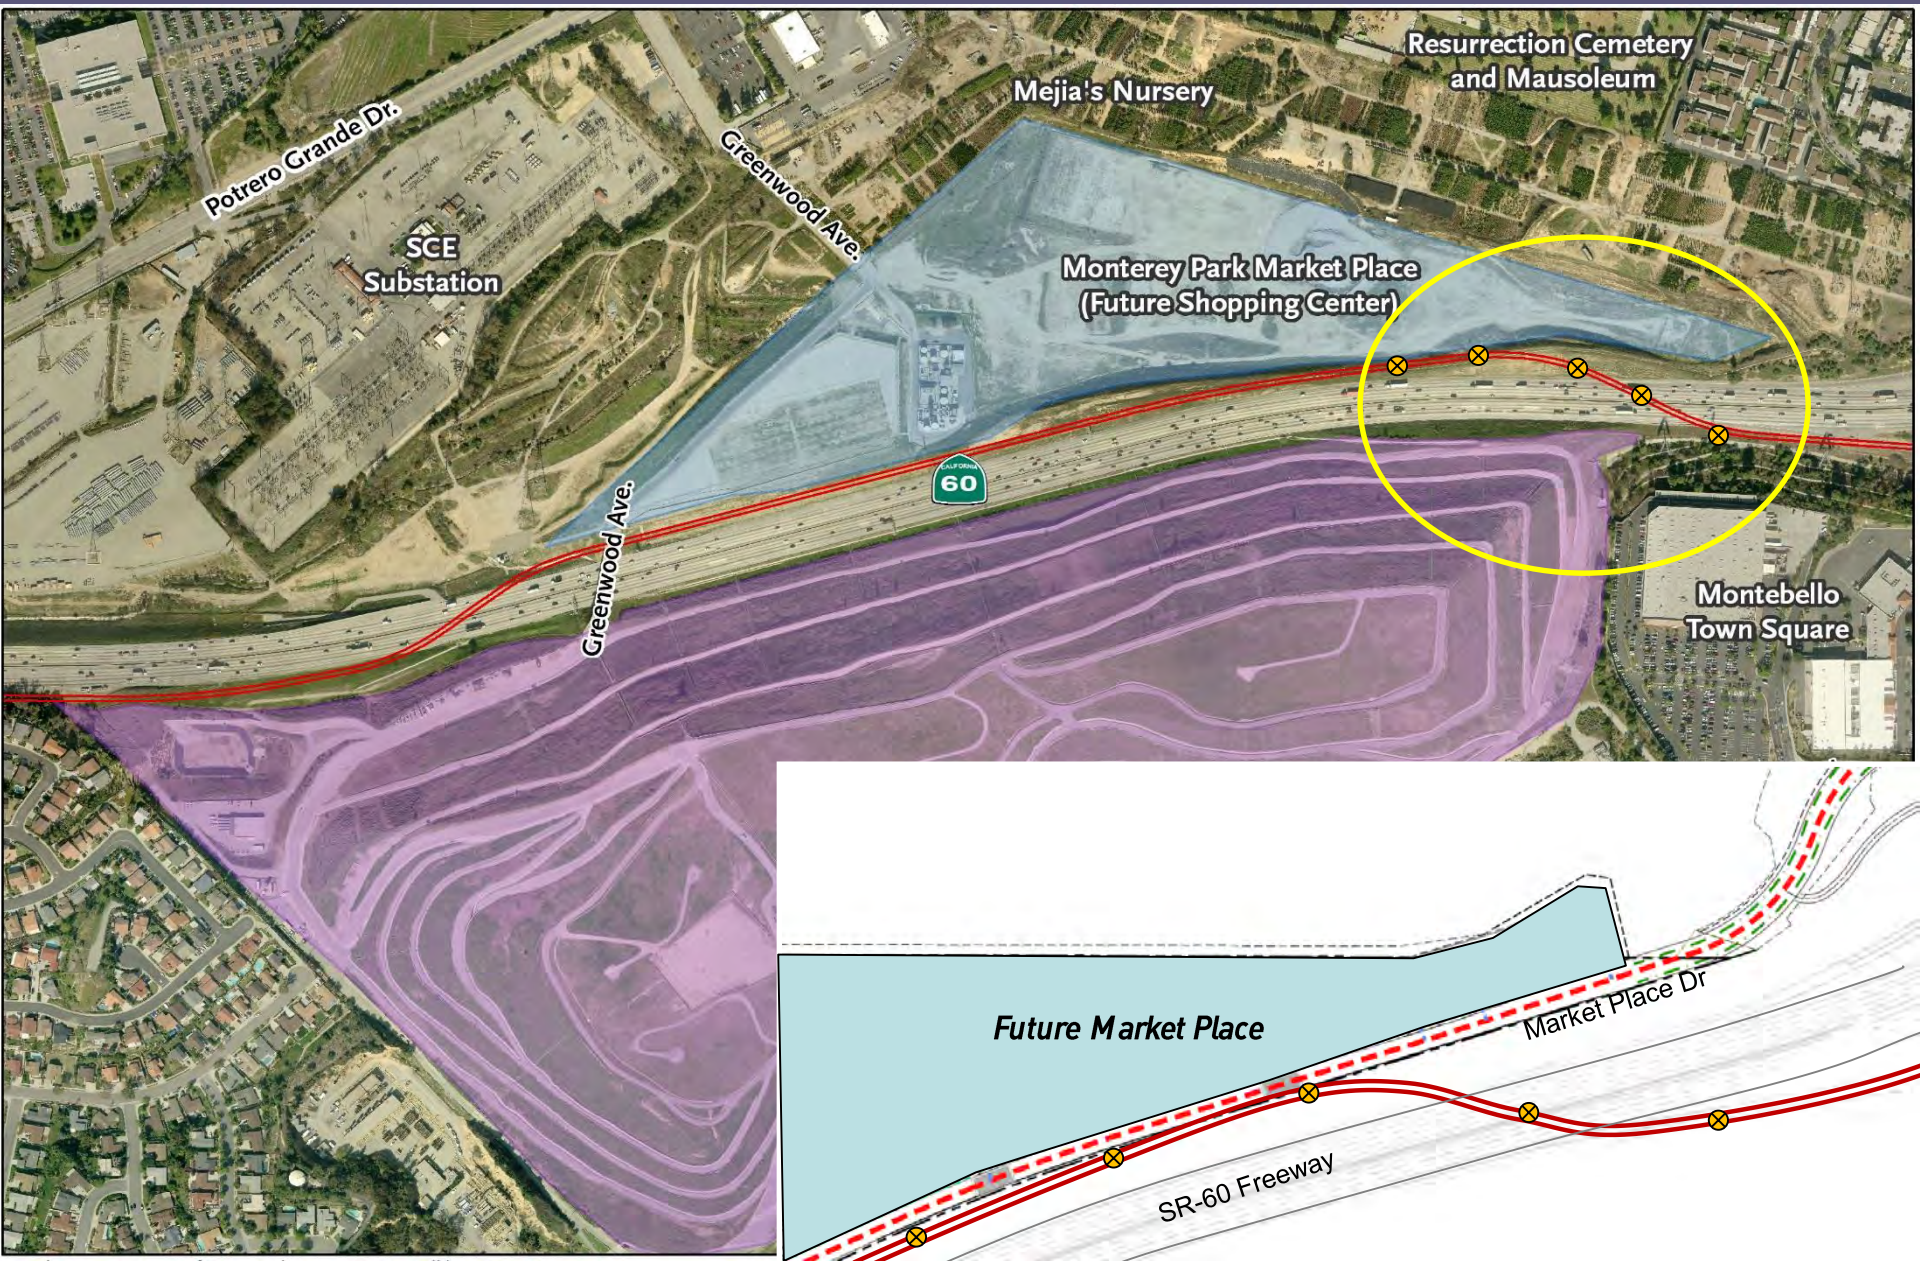


Alternatives Studied in 2014 Draft EIS/EIR



SR-60 North Side Design Variation (NSDV) Alternative

SR-60 North Side Design Variation (NSDV) Alternative



SR-60 North Side Design Variation Segment

SR-60 NSDV flyover west of Greenwood Ave affects the ability to widen SR 60 to full standard + HOV lanes

Marketplace Development in Monterey Park

Alignment Refinements at Paramount Blvd. On-ramp

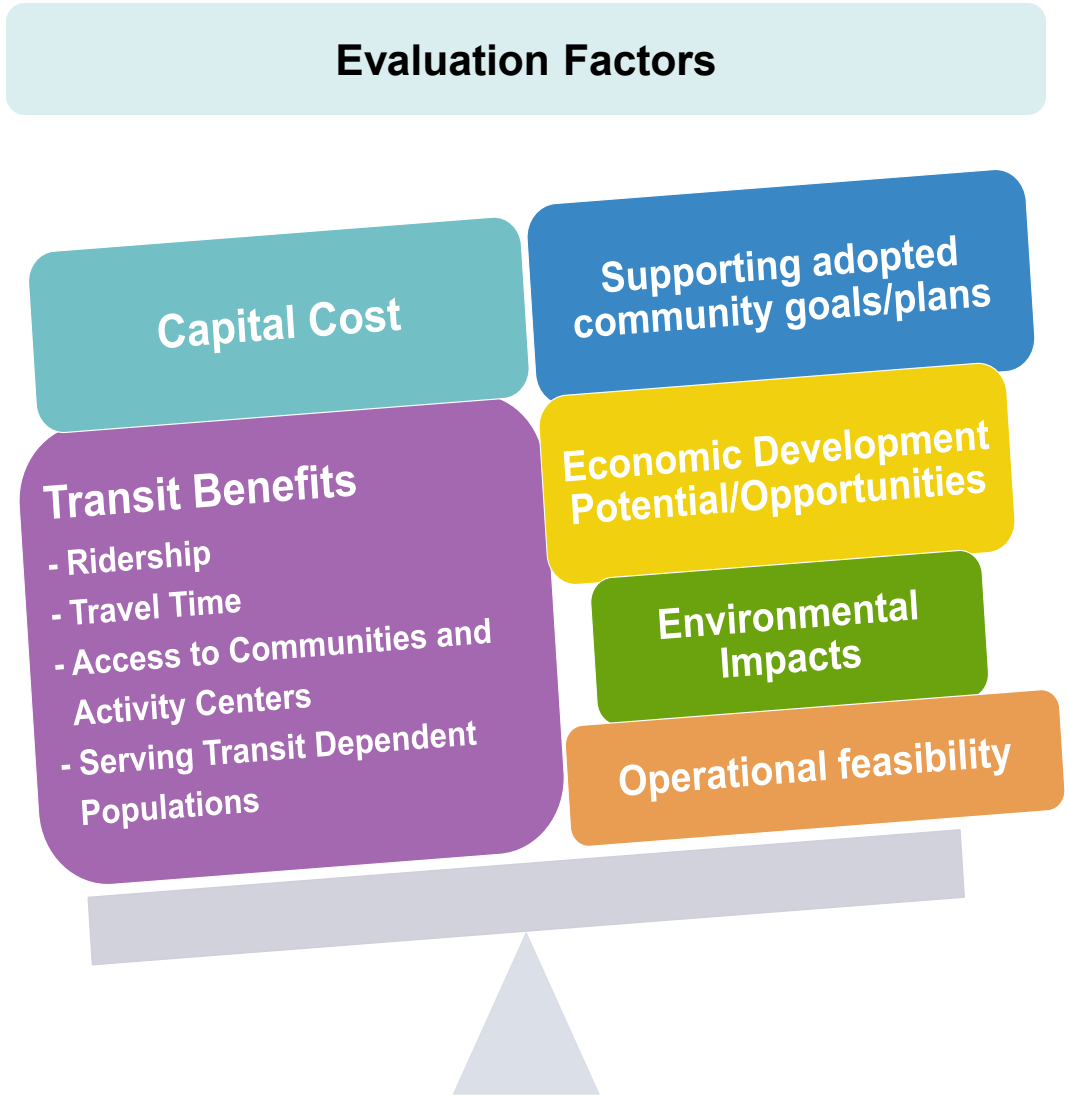
Southern California Edison Transmission Lines

Whittier Narrows Dam Flood Control Basin

Santa Anita Station – Preliminary Concepts

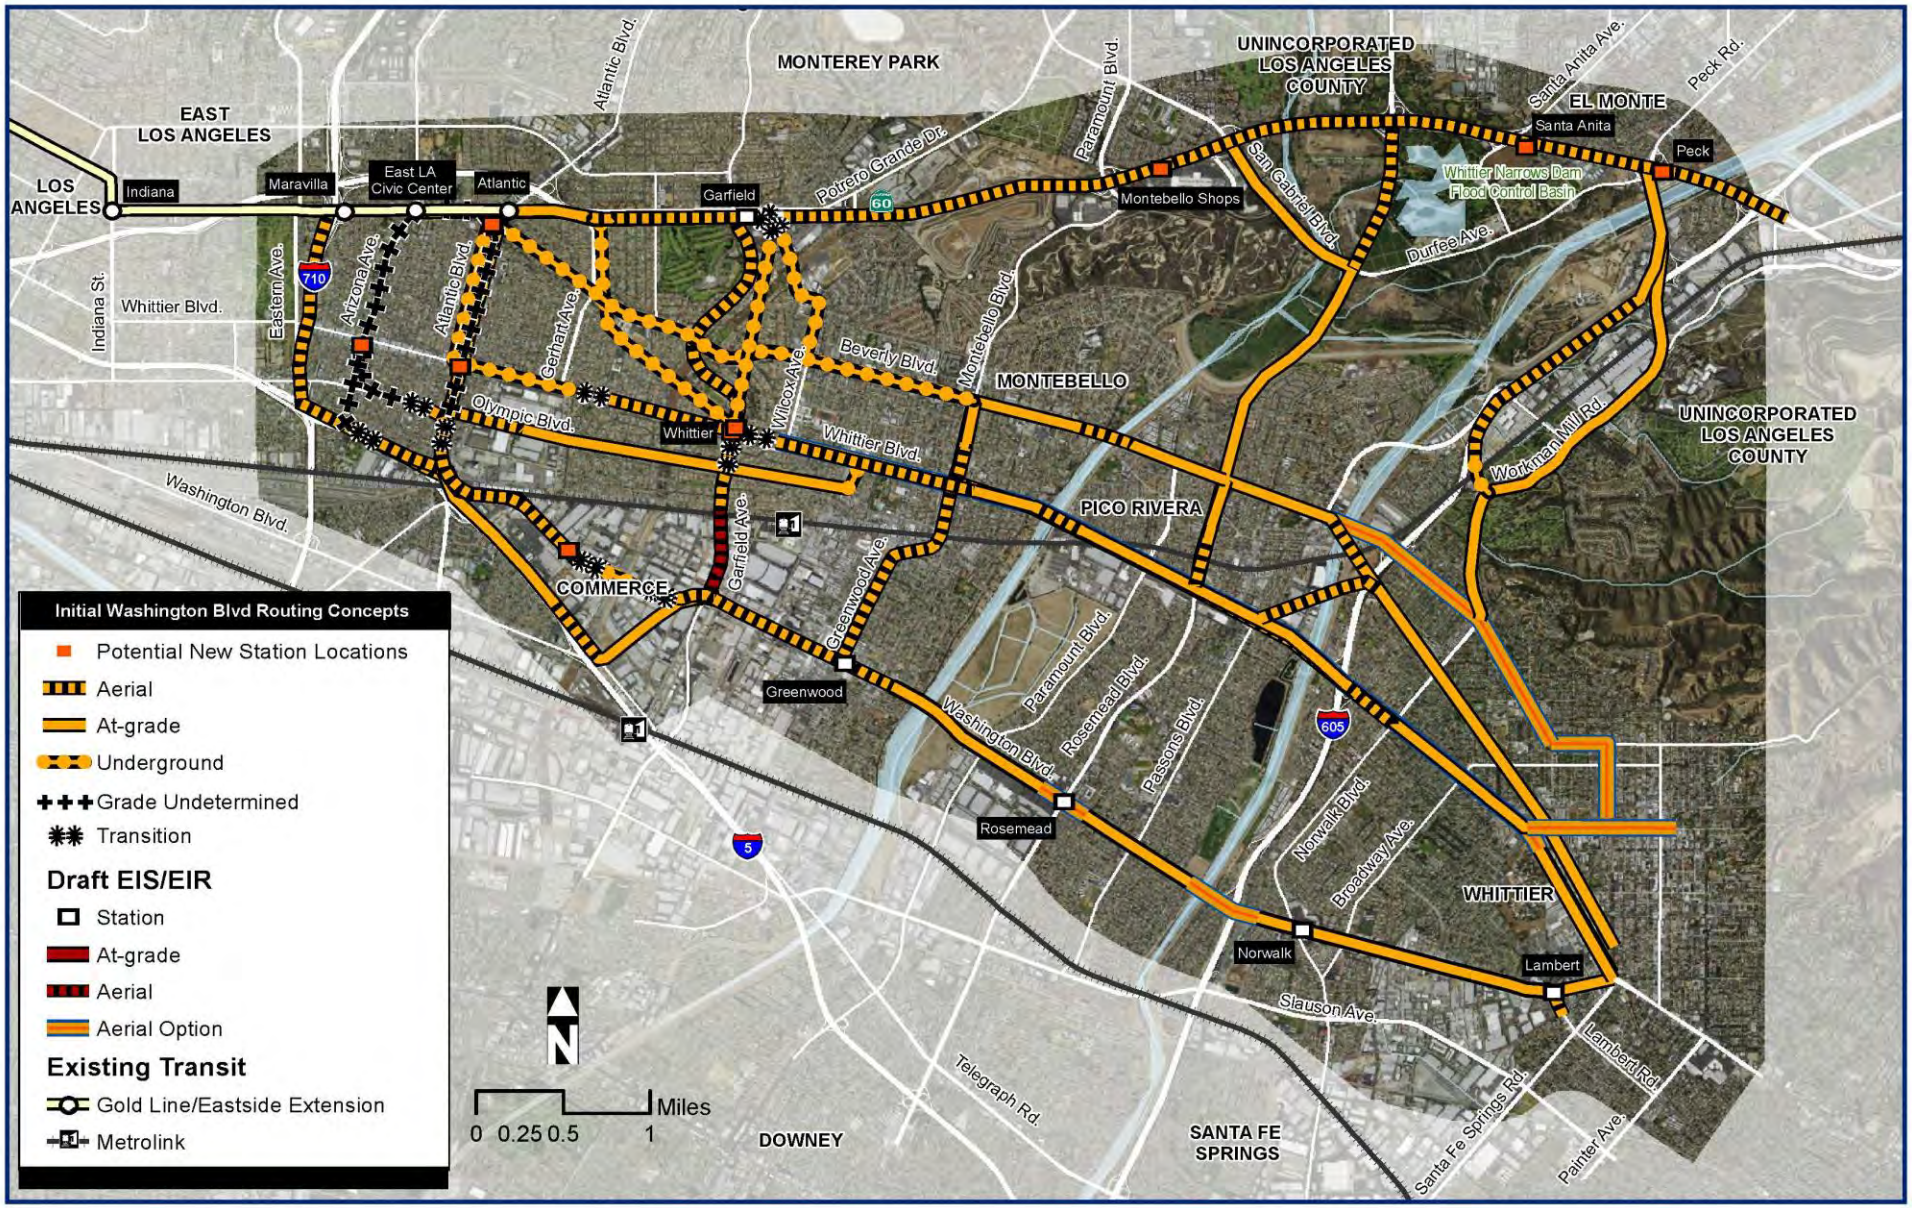
*Station location and park-and-ride structure design concept are subject to change as technical analysis continues

SR-60 NSDV Alternative – What's Next?

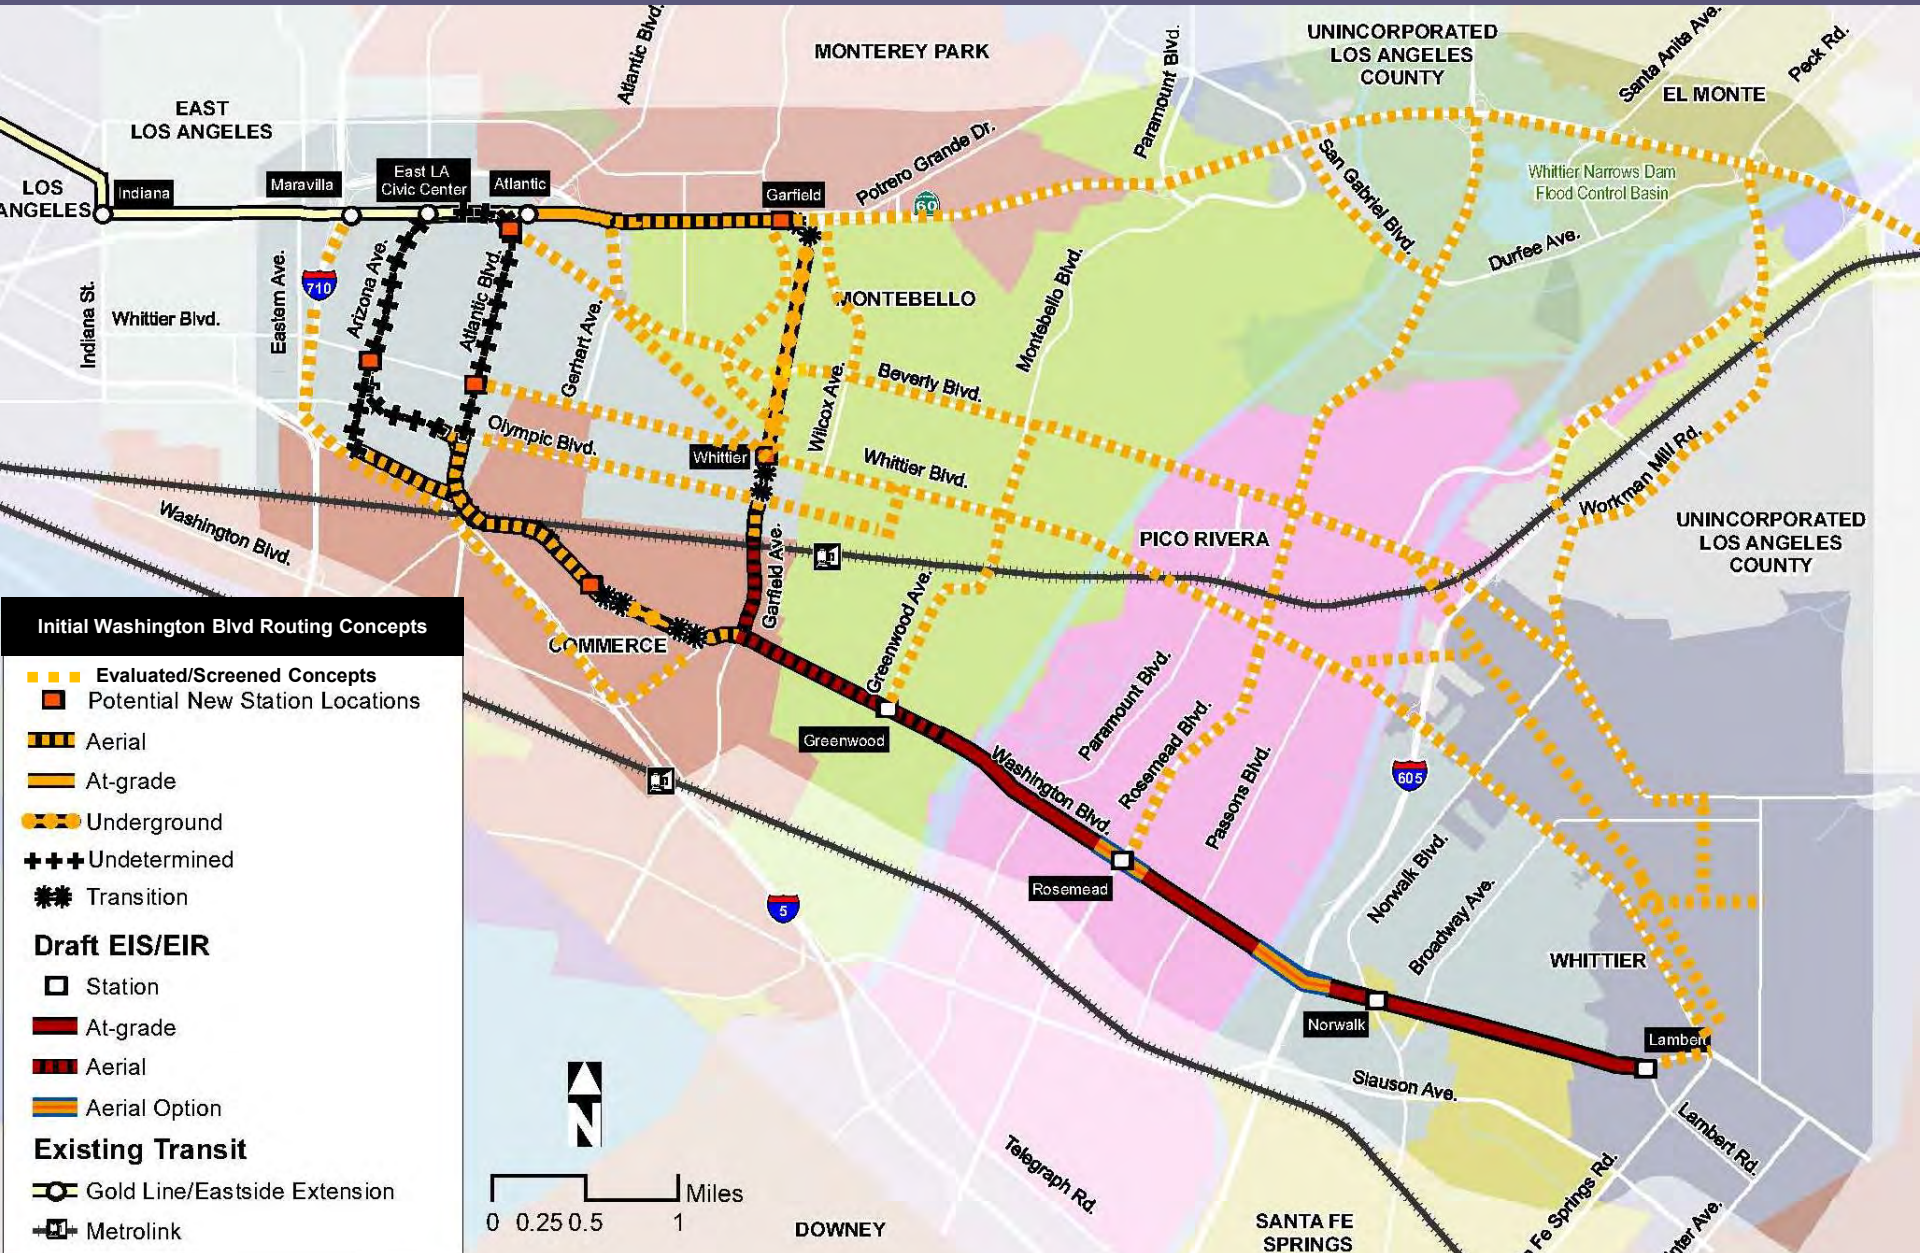


- ***Continue Technical Study to investigate comments from cooperating agencies***
- ***Continue design refinements***
- ***Review topographic survey results for current height of transmission lines and towers with SCE***
- ***Share soil boring survey results with USEPA and Caltrans***

New N/S Connection to Washington Blvd



Washington Blvd Alternatives Study Process



- *27 Routing Concepts*
  - *17 identified in 2009 Alternative Analysis (AA)*
  - *10 new concepts identified in Technical Study*

Universe of N/S Alignments Concepts Considered (27)

Potential Washington Blvd Routing Concepts

Feedback From Stakeholders

Corridor		Opportunities	Key Challenges
Arizona/ Telegraph		Economic revitalization on Whittier Corridor	Preserving on-street parking (between 3rd and Whittier)
Atlantic		Transit Oriented Communities (TOC) in Atlantic and Whittier Corridors	Traffic/circulation impacts with at-grade LRT
Garfield (Underground)		Helps revitalize south Montebello along Washington Blvd	Property impact during and after construction of subway portals; Sewer line and storm drain issues

Washington Blvd Alternative – What's Next?

- Grade Crossing Analysis
- Siting and Design of Tunnel Portals (if applicable)
- Station Planning
- Right-of-Way Impacts
- Utility investigations
- Engineering studies in support of new cost estimates

Next Steps for Technical Study

- ❑ *Continue stakeholder/community outreach meetings*
- ❑ *Incorporate feedback in project planning*
- ❑ *Continue technical analysis*
- ❑ *Share Washington Blvd Concepts with Metro Board (May 2016)*
- ❑ *Present findings of Technical Study to Metro Board (early 2017)*

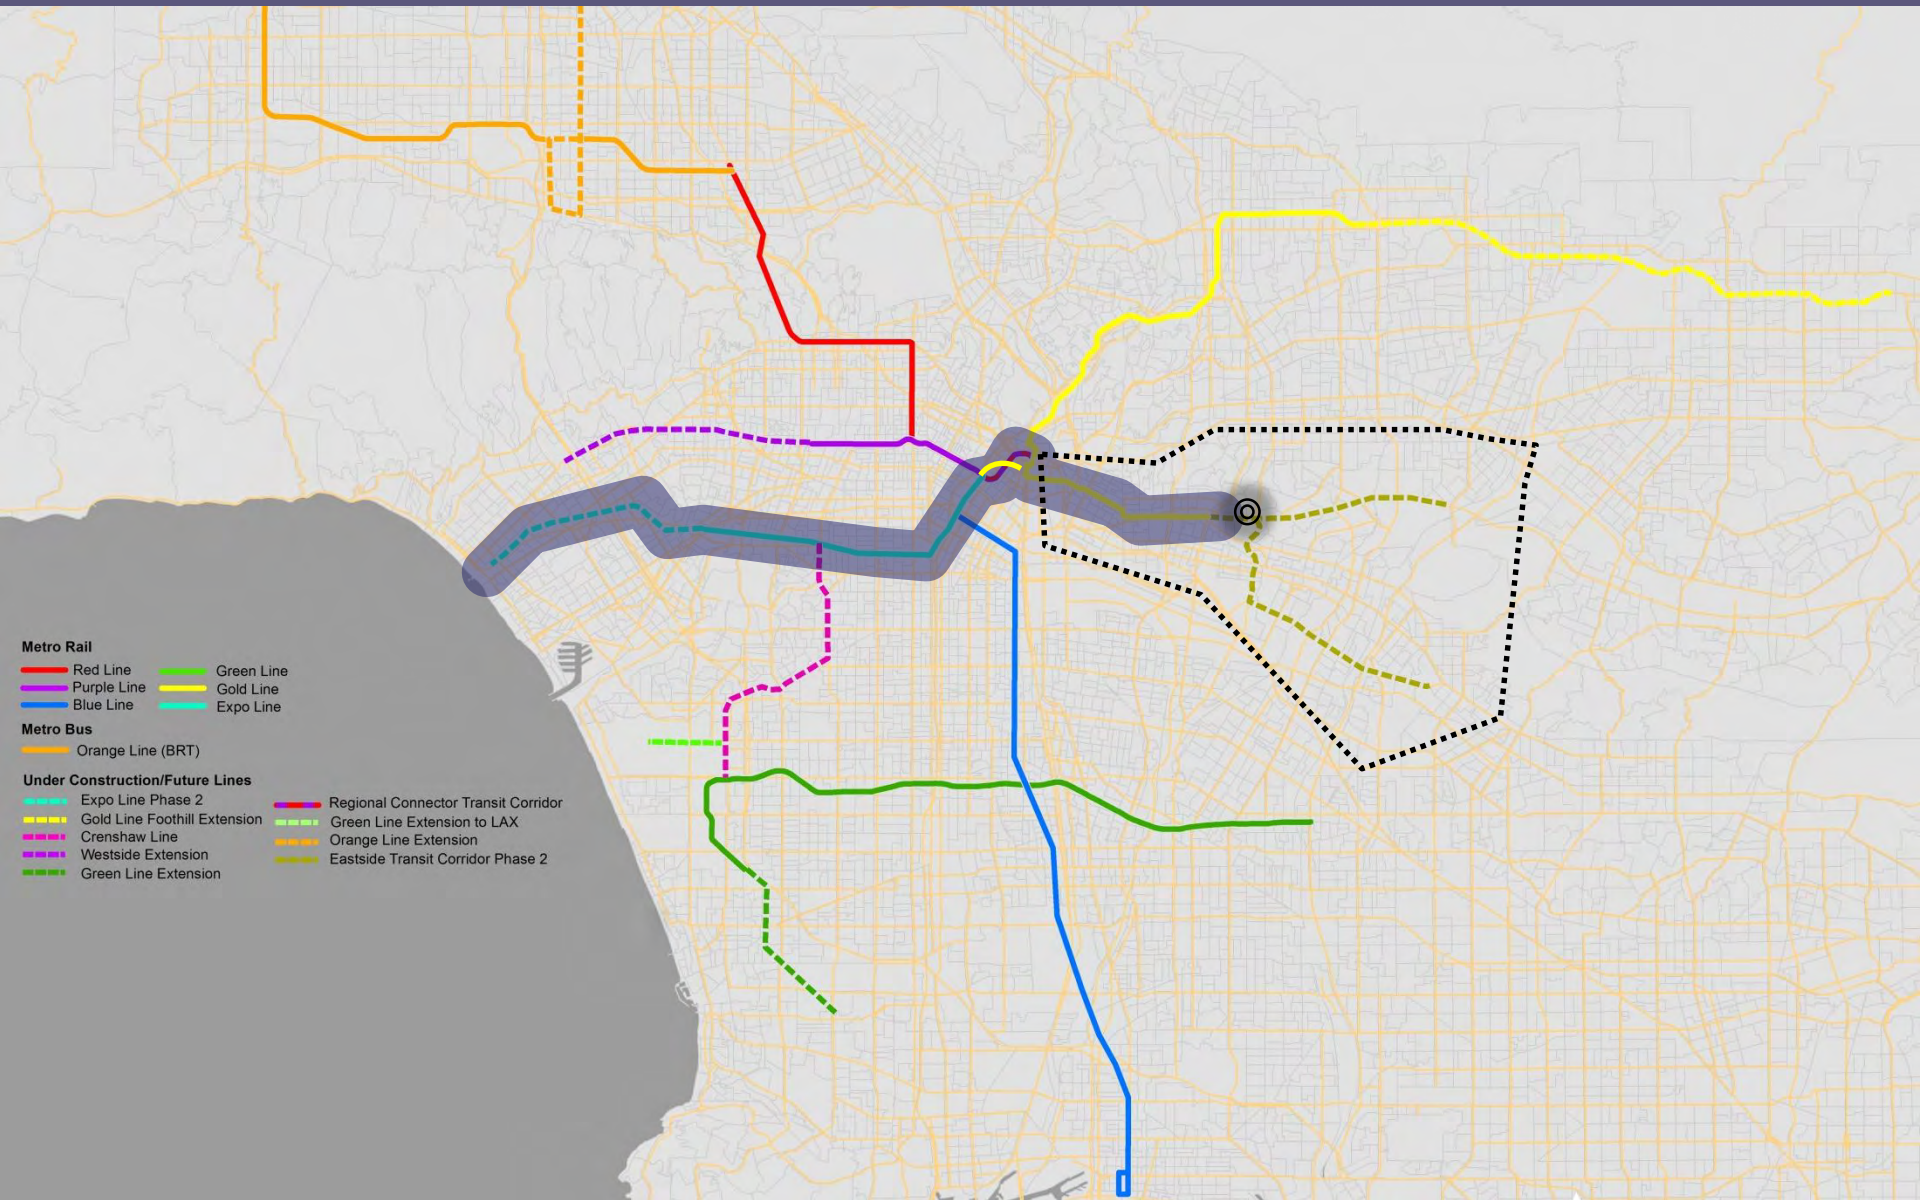
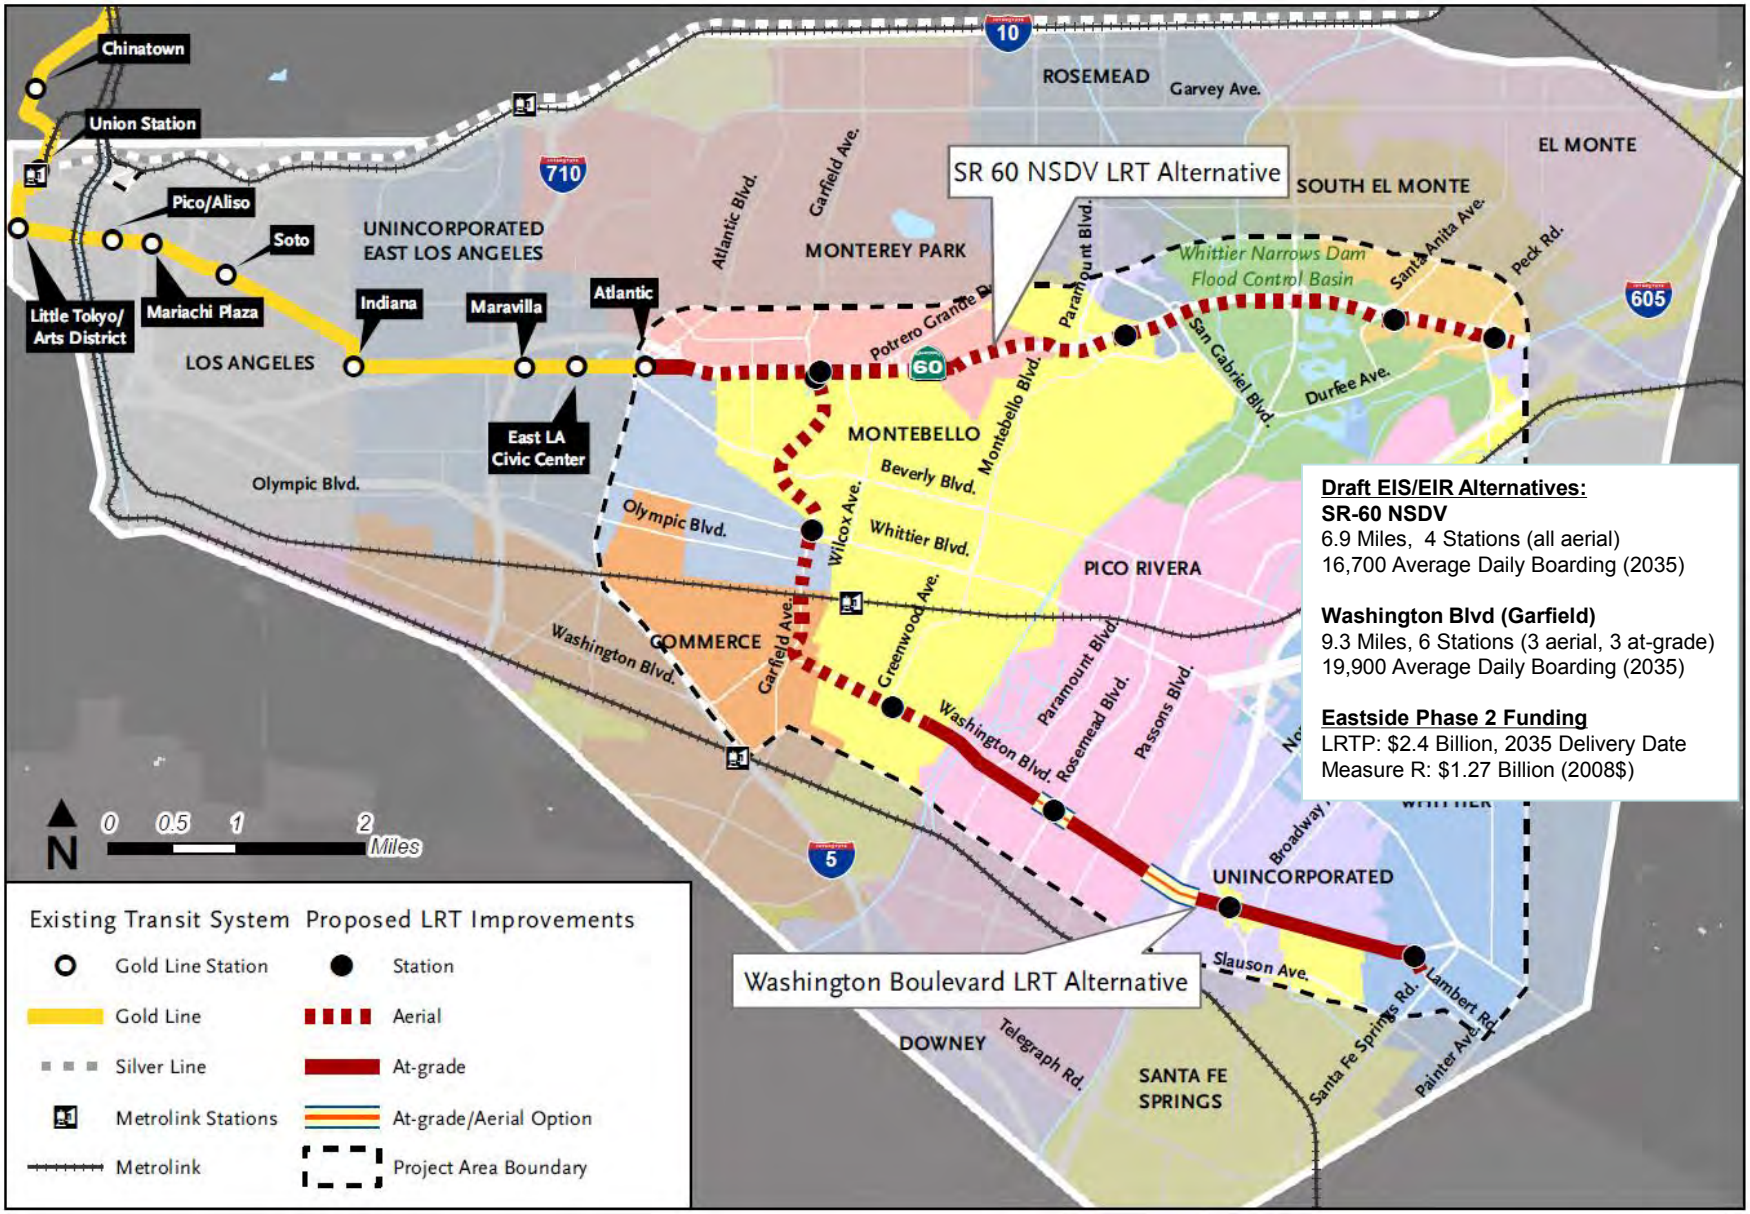
Corredor de Transporte hacia el Este Fase 2

Reuniónes Comunitarias, March 28-31, 2016



Propósito de la reunión de esta noche

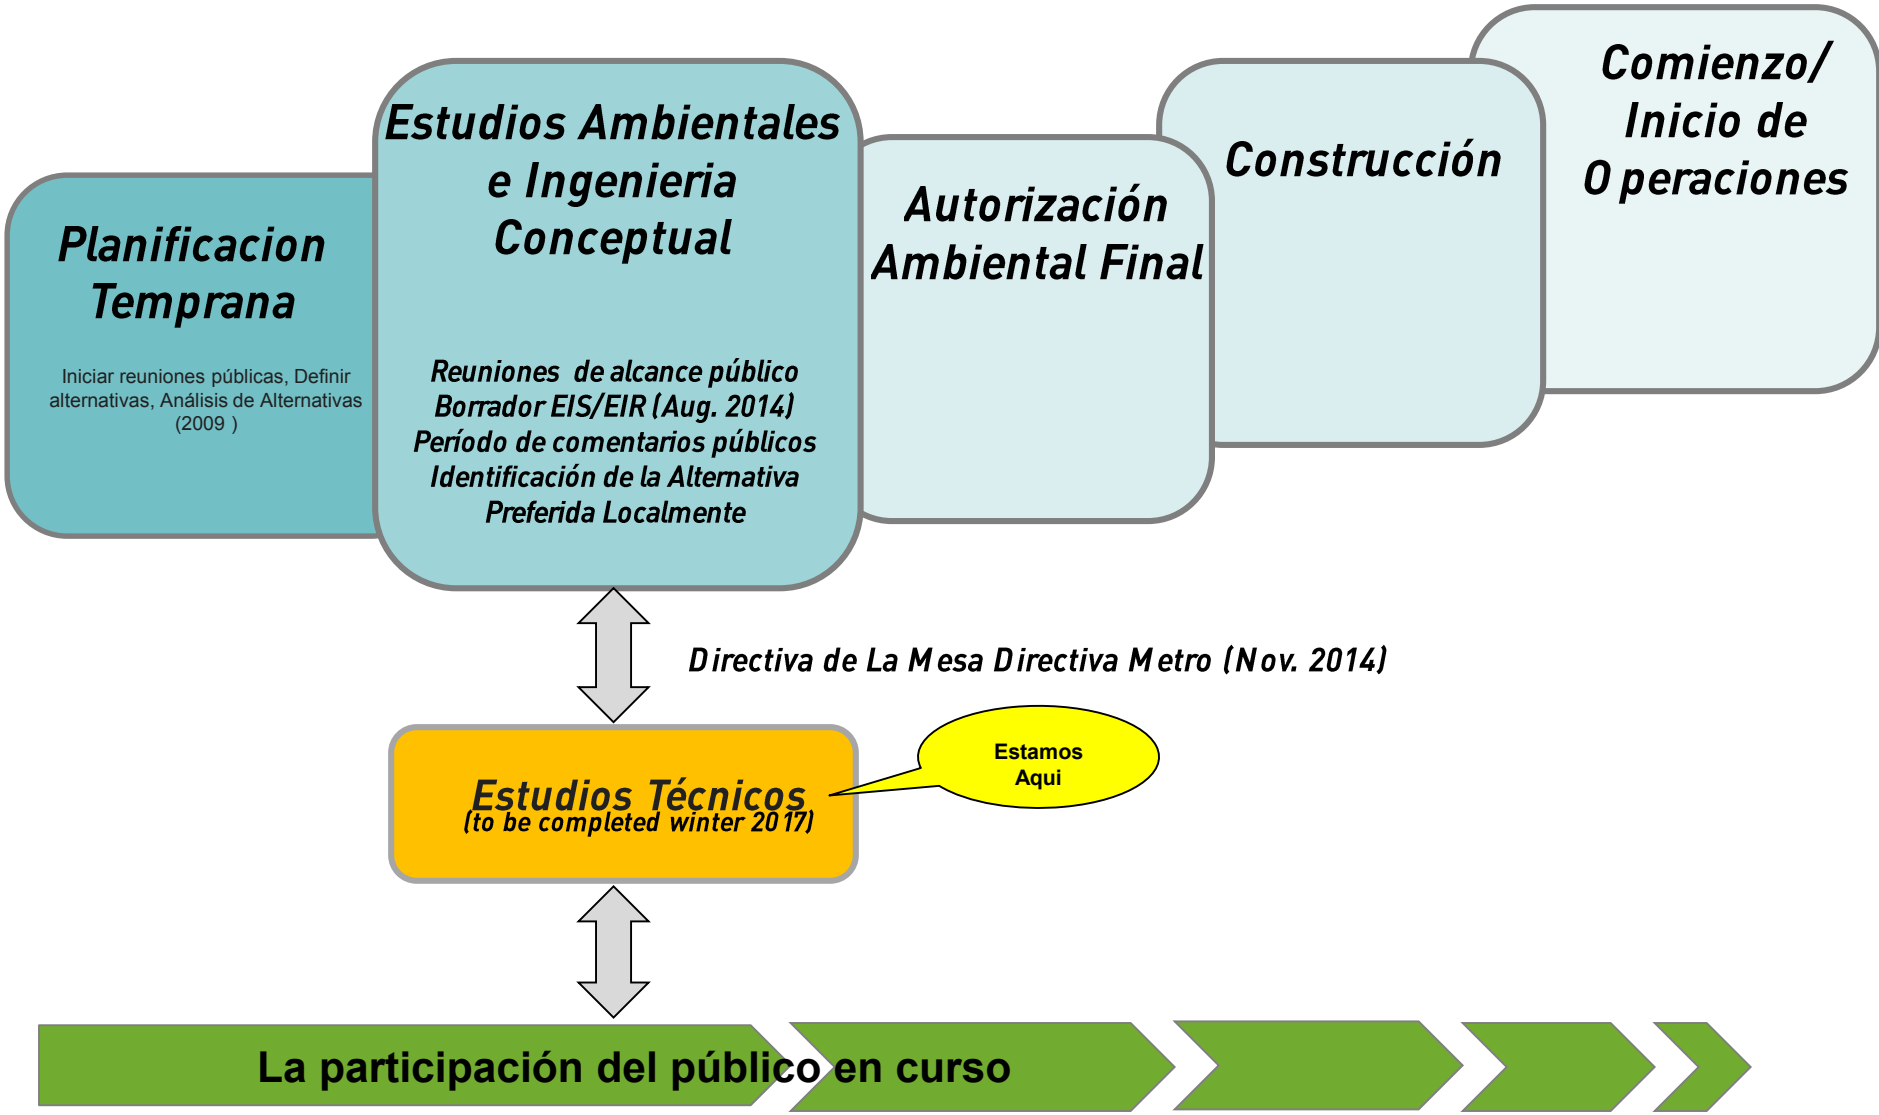
- ***Historial del Proyecto***
- ***Actualización sobre el estudio técnico dirigido por la mesa directiva de Metro (Nov. 2014)***
  - ***Alternativa SR-60***
  - ***Alternativa Washington Blvd***
  - ***Discusión Interactiva***
- ***Próximos pasos***



Area del Estudio

Corredor de Transporte hacia el Este Fase 2 Área de estudio en el Condado de Los Angeles

Alternativas estudiadas en borrador EIS/EIR del 2014

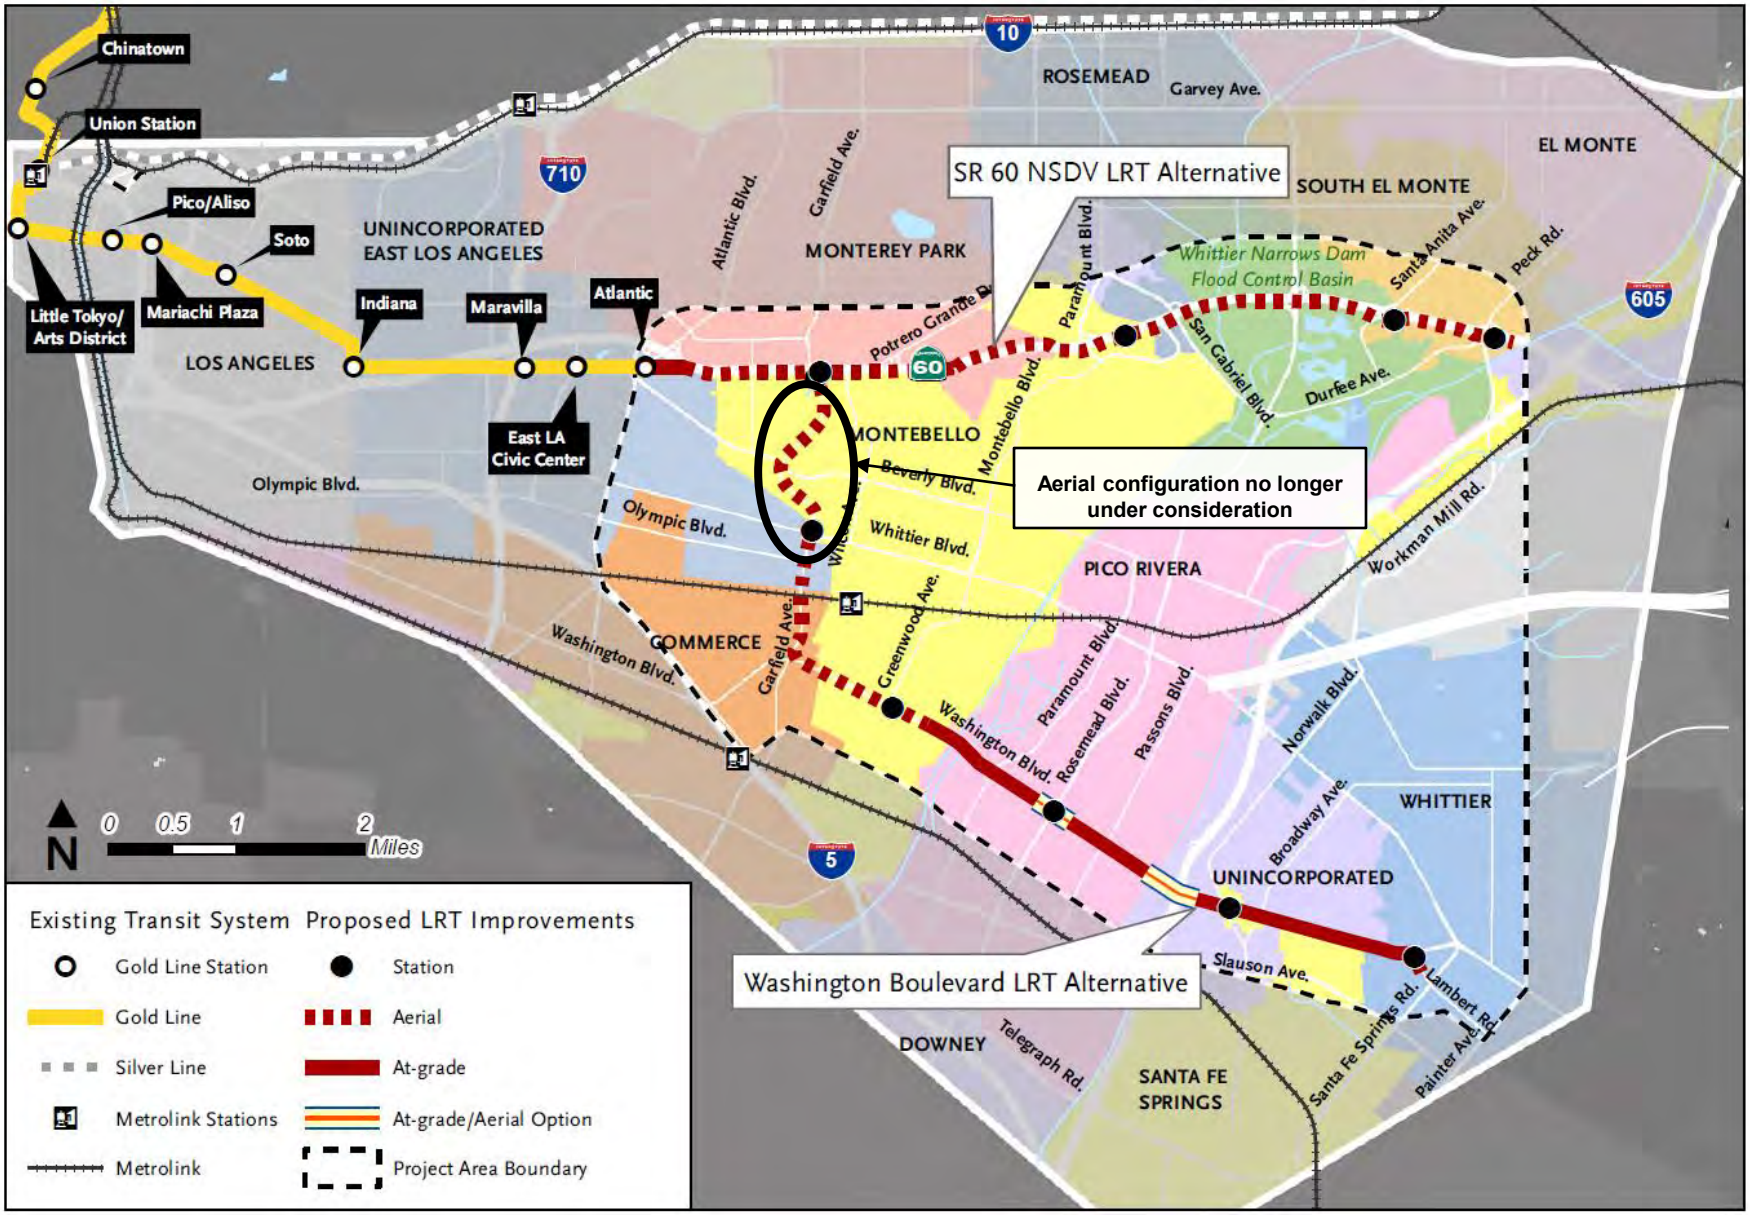


Draft EIS/EIR Alternatives:

SR-60 NSDV
6.9 Miles, 4 Stations (all aerial)
16,700 Average Daily Boarding (2035)

Washington Blvd (Garfield)
9.3 Miles, 6 Stations (3 aerial, 3 at-grade)
19,900 Average Daily Boarding (2035)

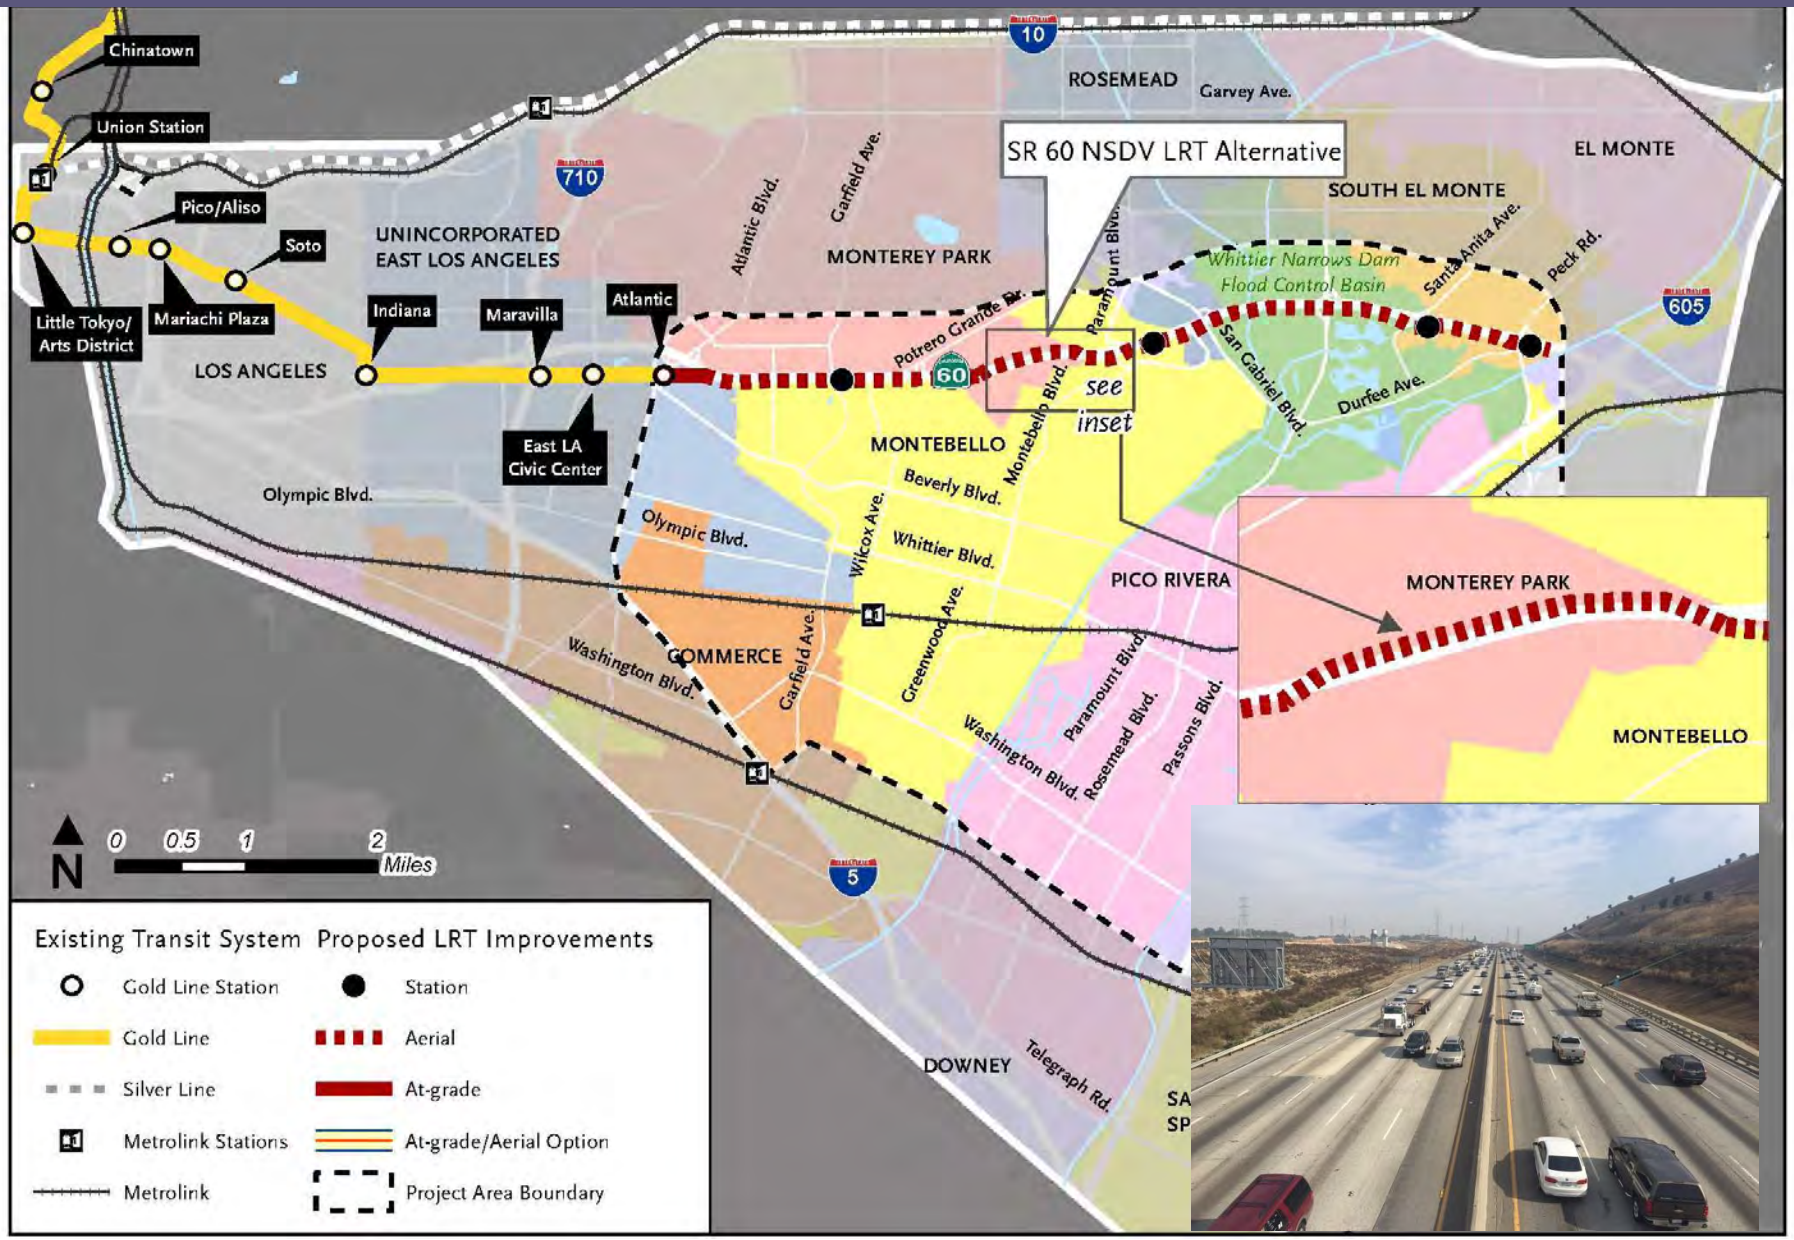
Eastside Phase 2 Funding
LRTP: $2.4 Billion, 2035 Delivery Date
Measure R: $1.27 Billion (2008$)



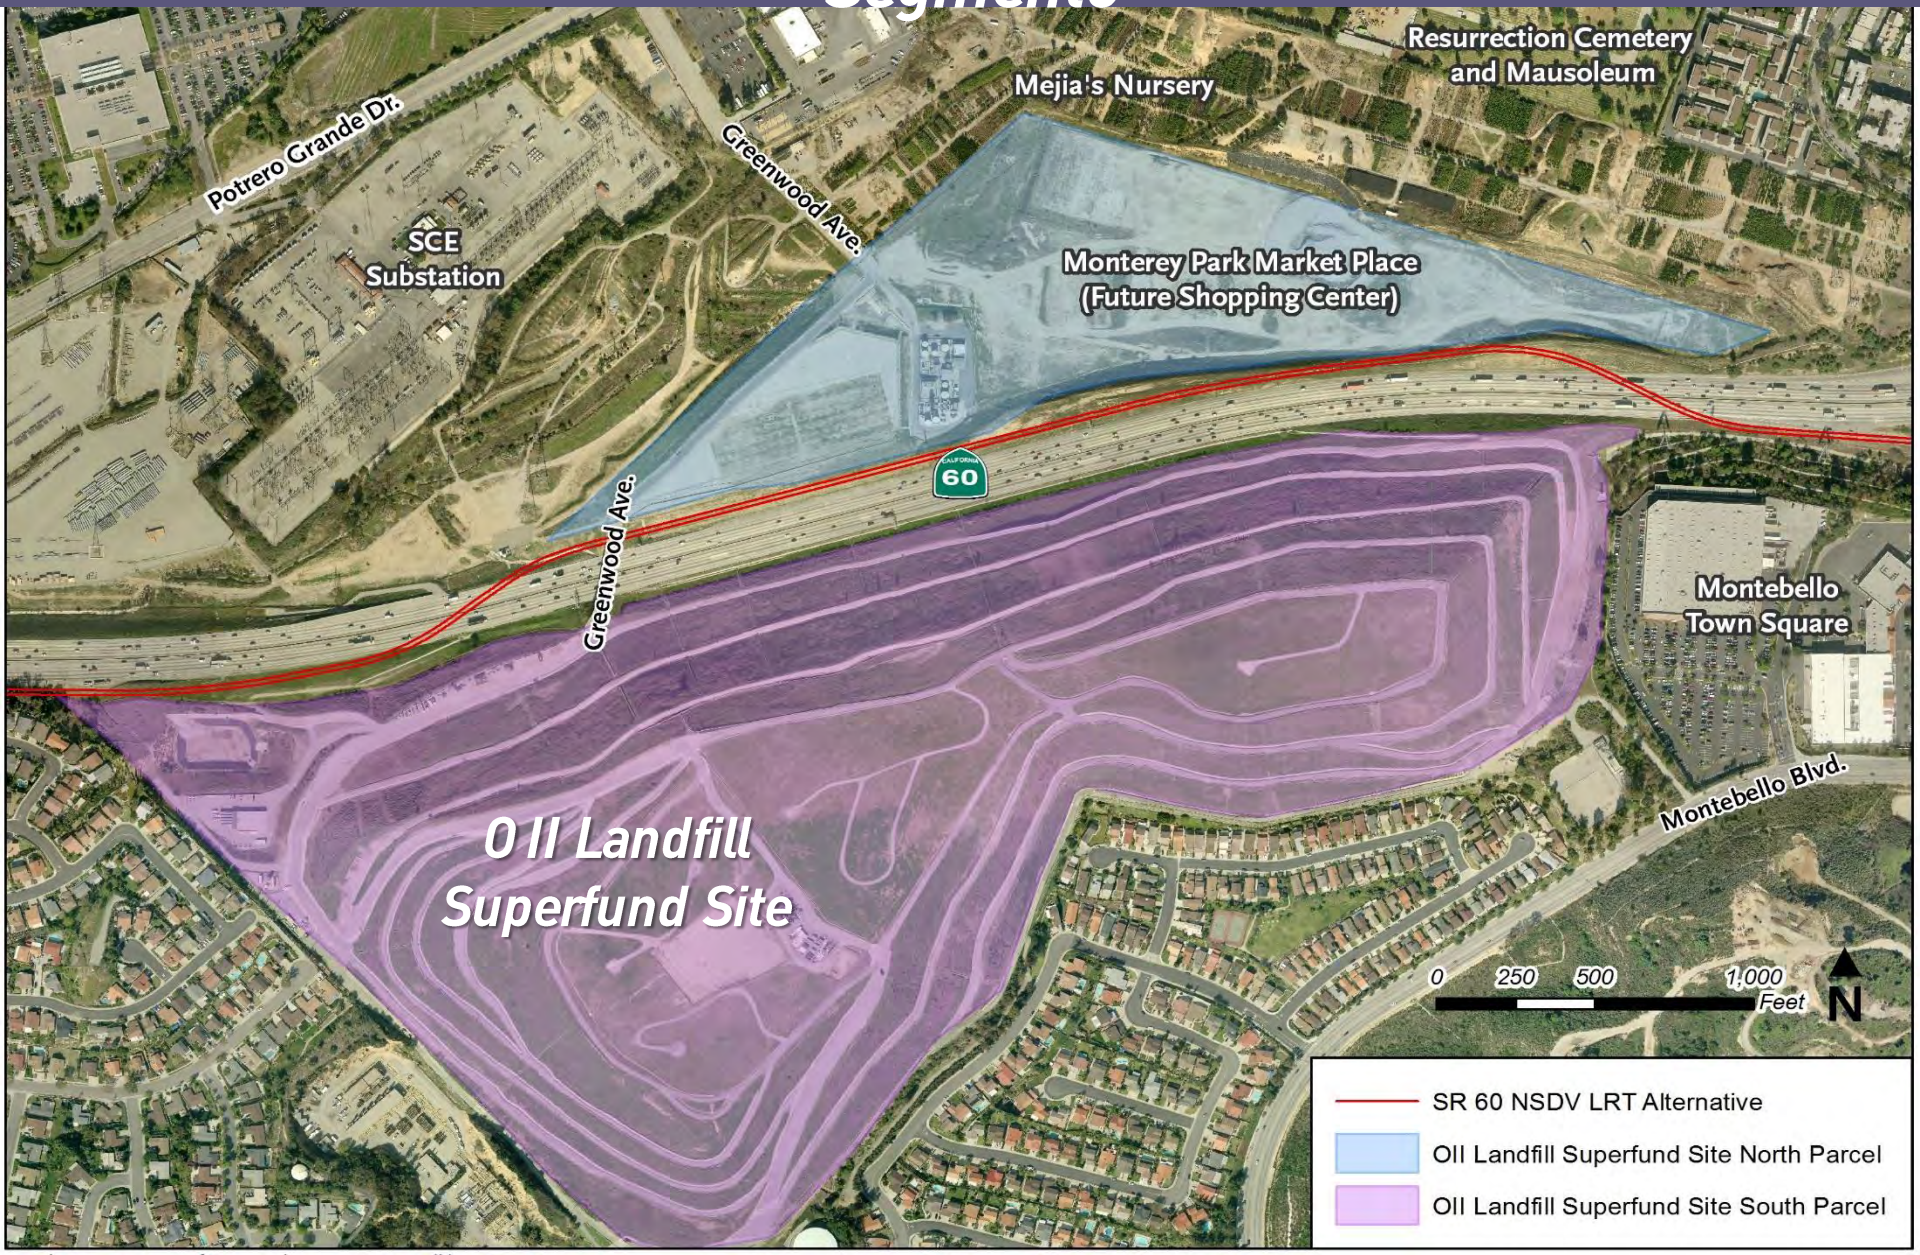
Faces de Proyecto

Acción de la Mesa Directiva, Metro (Nov 2014)

- ***Continuar con la opción de la Alternativa de diseño en el lado norte, SR 60 (NSDV)***
- ***Responder a Comentarios de Agencias de Cooperación***
  - ***Agencia de Protección Ambiental (EPA)***
  - ***Departamento de Transporte de California (Caltrans)***
  - ***Southern California Edison (SCE)***
  - ***Ejército de EE.UU. Cuerpo de Ingenieros (USACE)***
- ***Explorar la viabilidad de operar ambas alternativas***
- ***Eliminar la opción aérea en la avenida Garfield entre Via Campo y Whittier Blvd, e identificar una nueva conexión norte-sur a Washington Blvd***

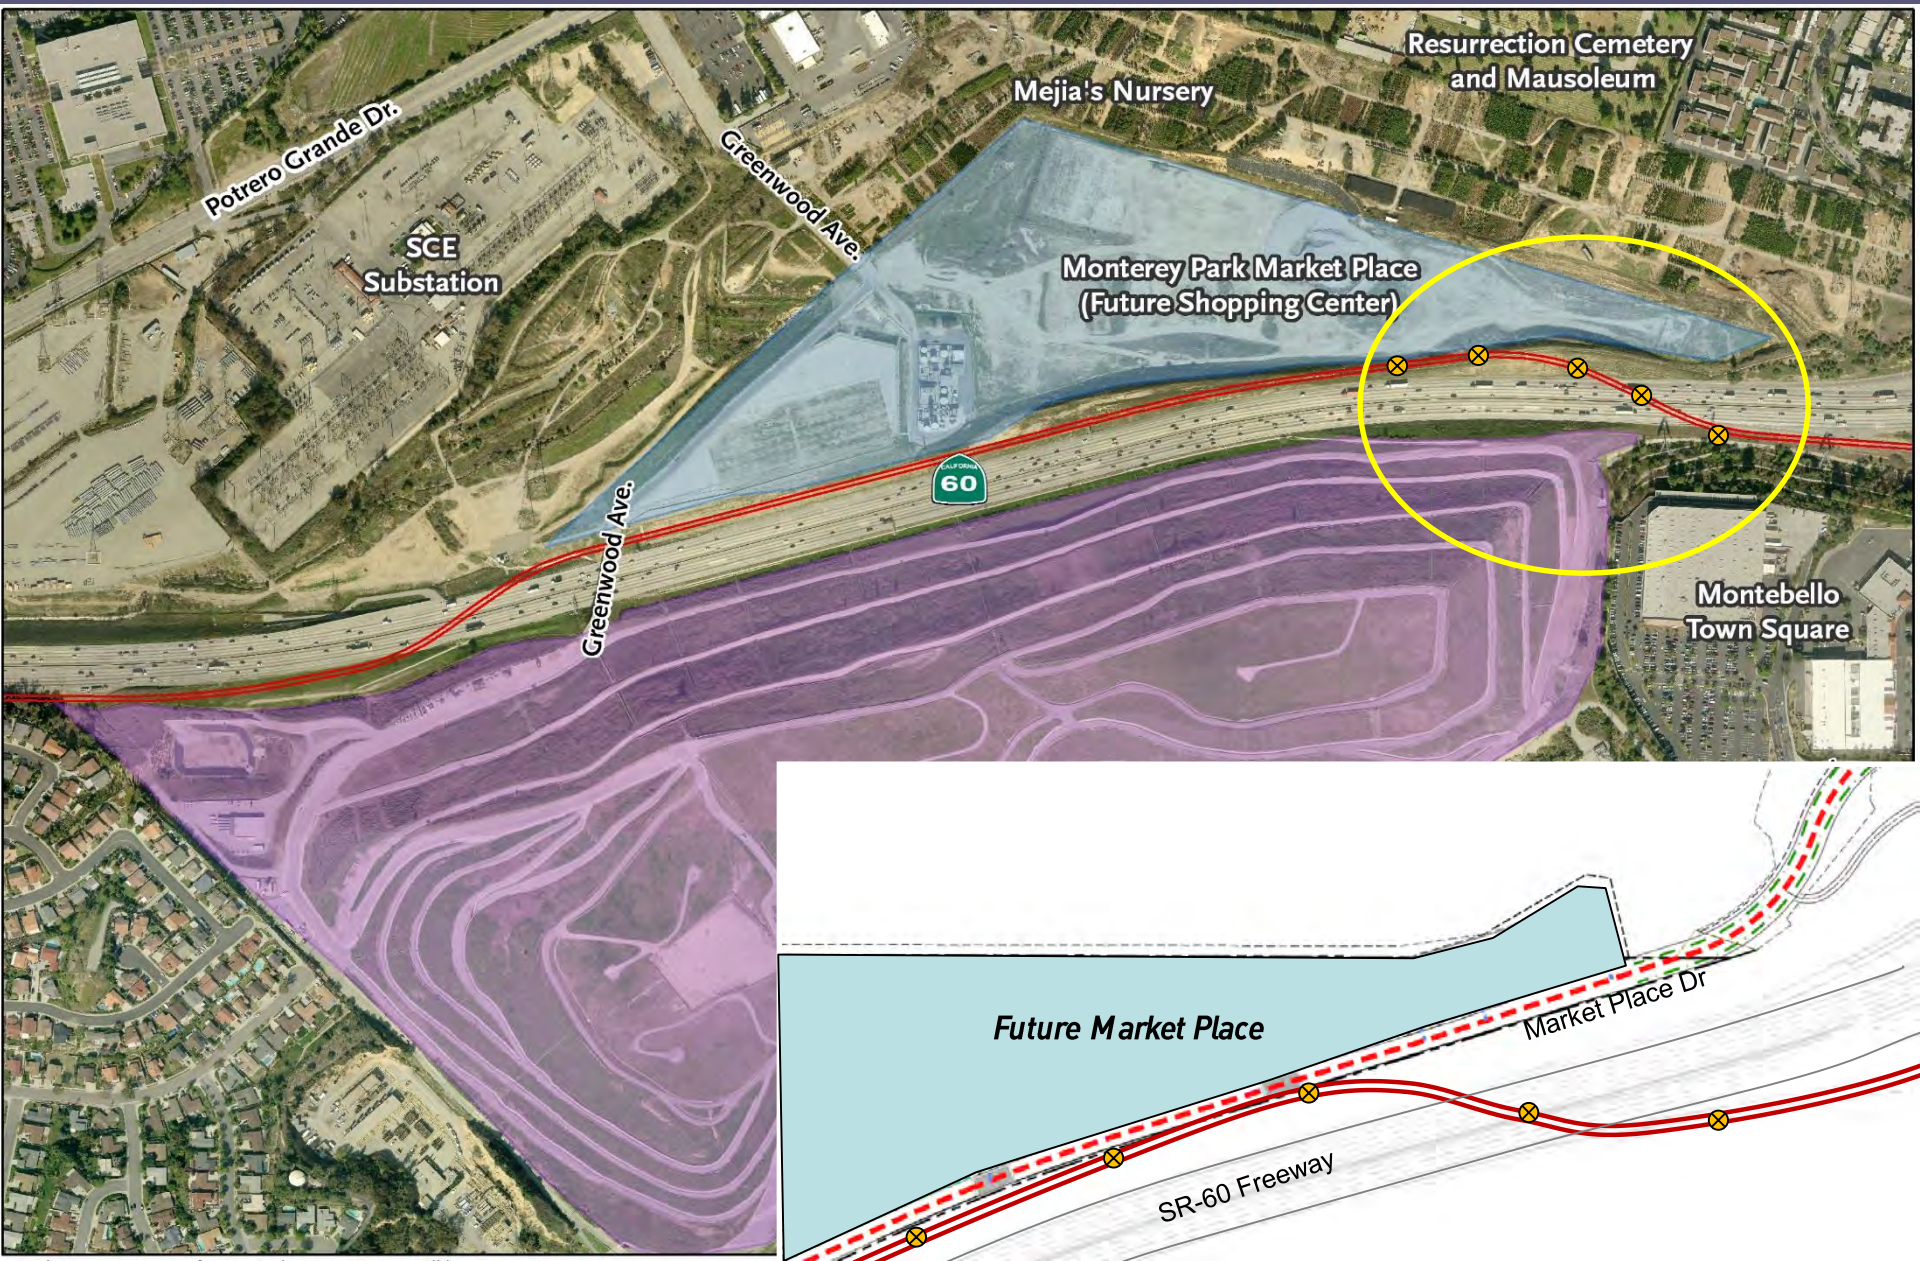


Alternativas estudiadas en borrador EIS/EIR del 2014



Alternativa de diseño en el lado norte, SR 60 (NSDV)

Alternativa de diseño en el lado norte, SR 60 (NSDV)



Alternativa de diseño en el lado norte, SR 60 (NSDV) Segmento

SR-60 paso elevado NSDV al oeste de Greenwood Ave afecta a la capacidad de ampliar carriles a completa estándar y carriles de HOV

Desarollo de Marketplace en Monterey Park

Los refinamientos de alineación en la rampa; Paramount Blvd.

Southern California Edison, Líneas de transmisión

Whittier Narrows, Cuenca de Control de Inundaciones

Estación Santa Anita – Conceptos Preliminares

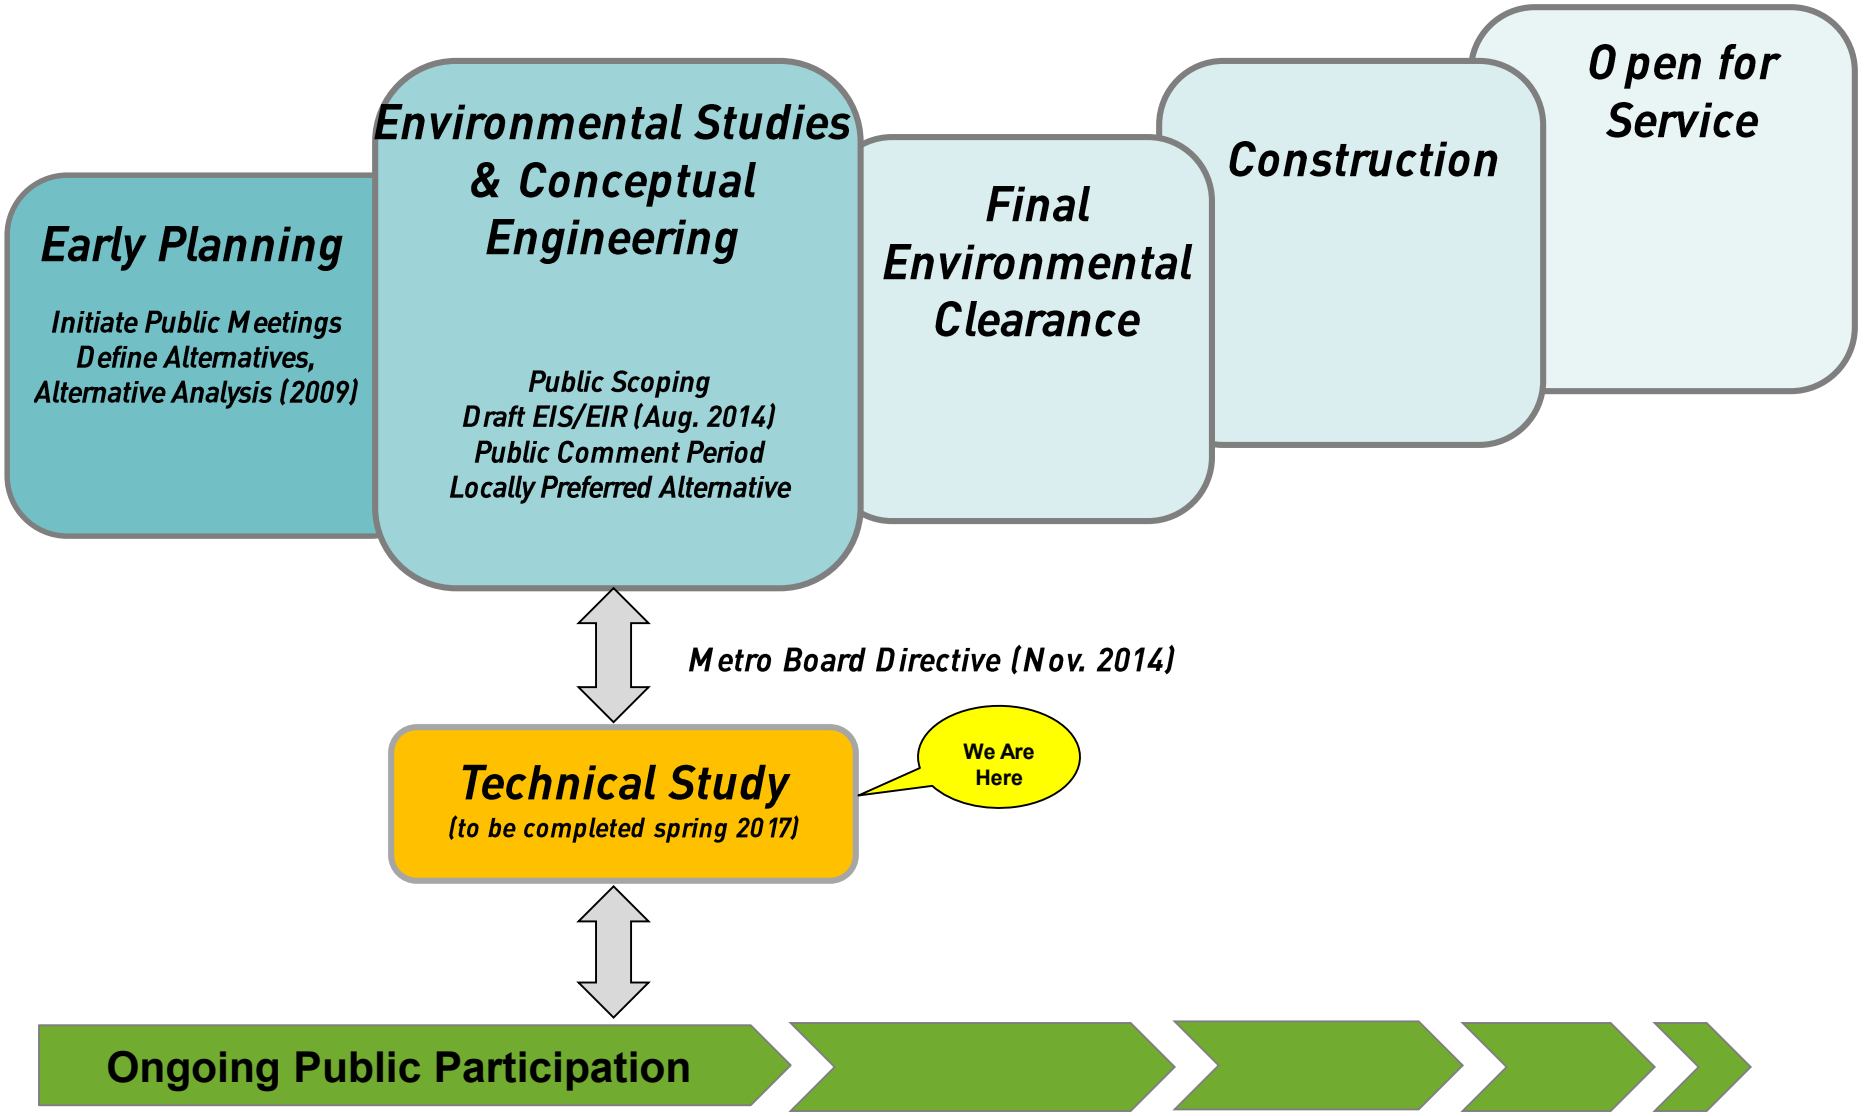
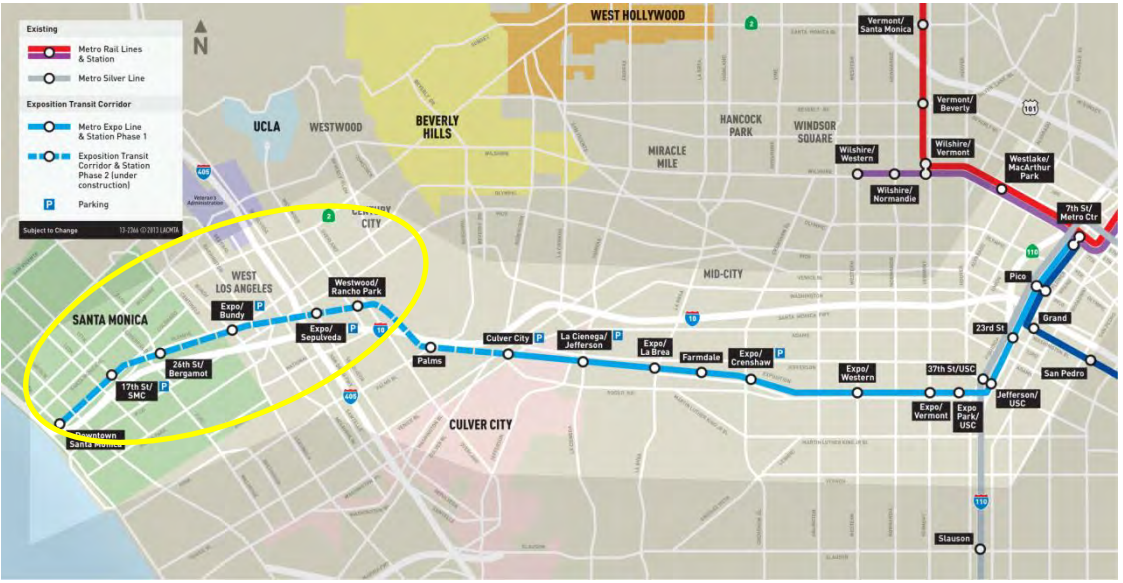
Eastside Transit Corridor Phase 2



Community Meeting, June 22, 2016

Purpose of Tonight's Meeting

- ***Update on Metro Board directed Technical Study (Nov. 2014)***
  - ***SR-60 Alternative***
  - ***Washington Blvd Alternative***
- ***Recap of Routing Concepts***
- ***Construction Methods***
- ***Break out Groups***



Phases of Project Development

Eastside Phase 2 Study Area in Los Angeles County

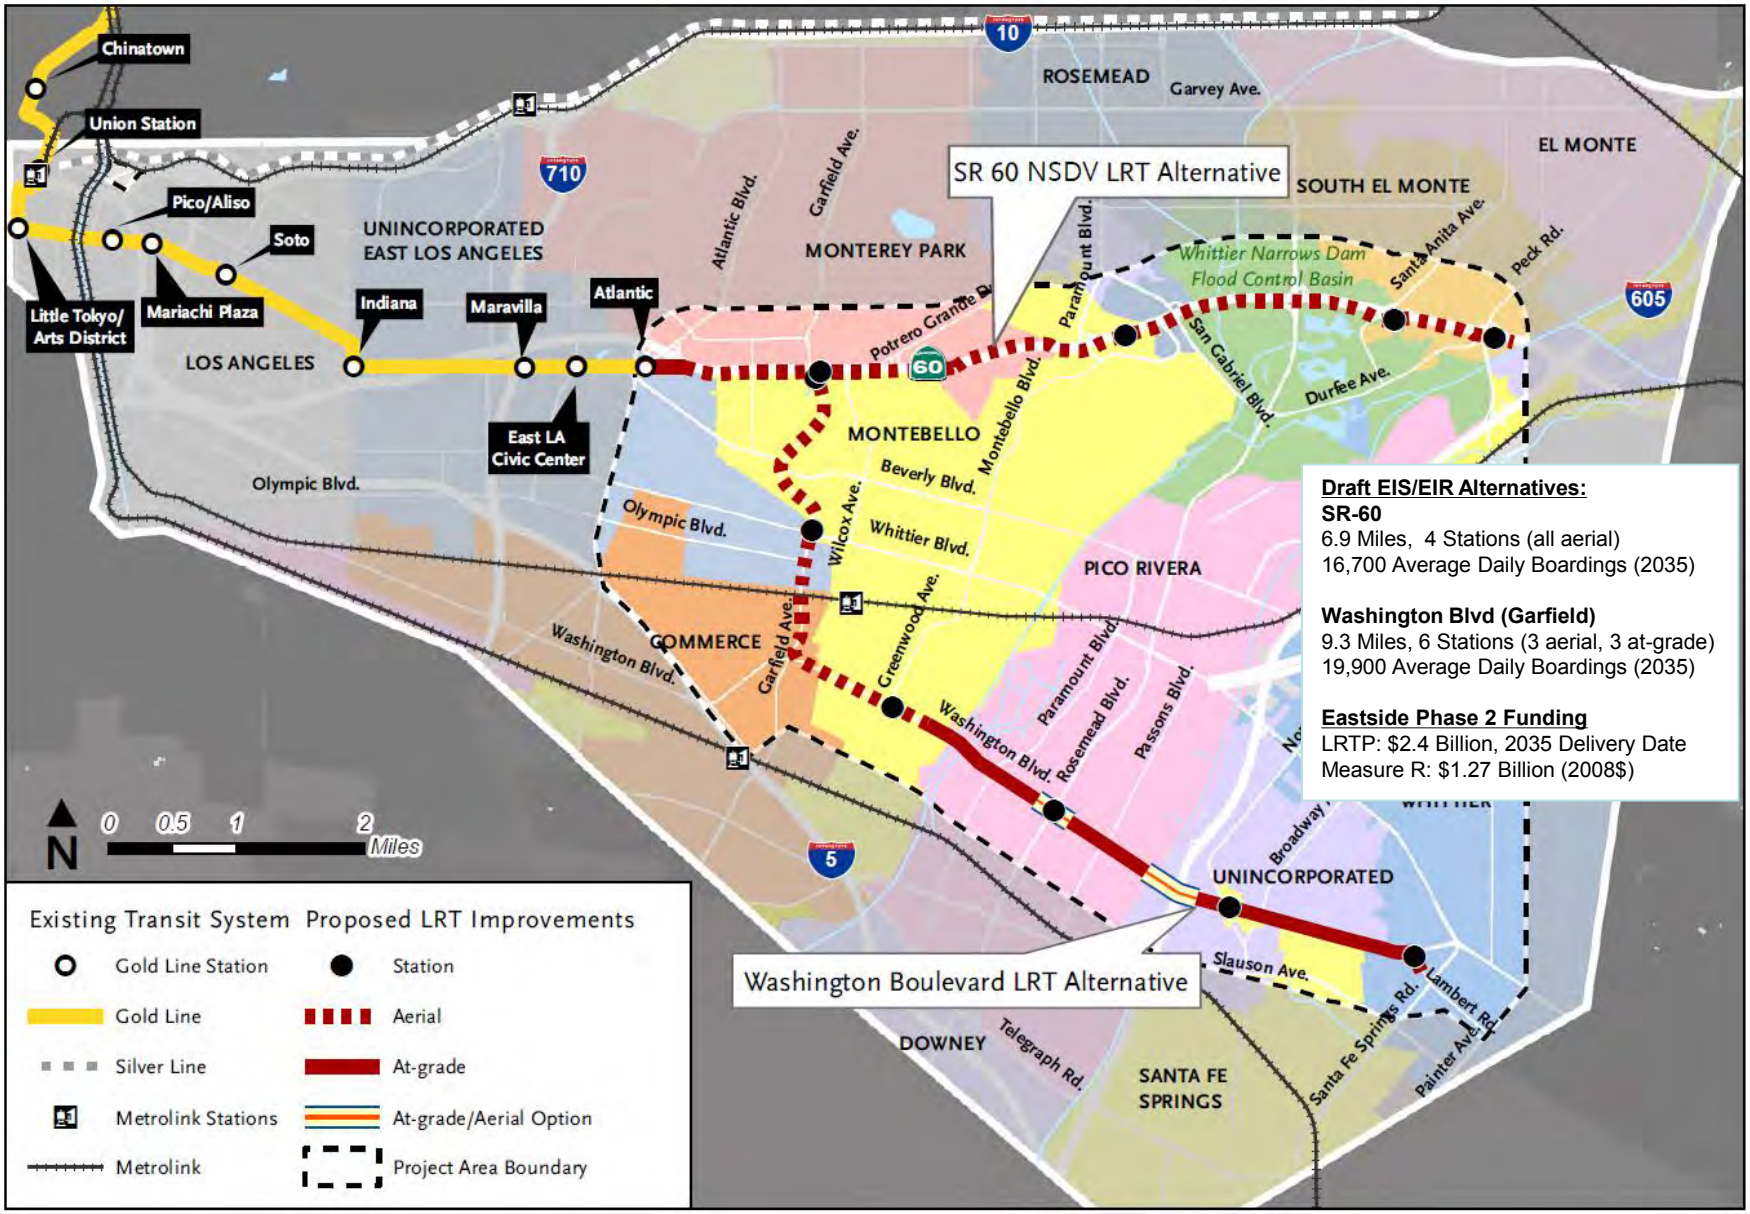
Expo Line Extension (Phase 2) to Santa Monica

- 6.6 mile corridor
- 7 Stations (4 at-grade and 3 aerial)
- 3 Park-and-ride lots
- Frequency - every 12 minutes
- 46 min trip from Downtown LA to Santa Monica)
- Estimated 64,000 boardings by 2030
- Cost of $1.5 billion

Expo Phase 2 Opening Weekend (May 19-21, 2016)

- Opening Ceremony 5/20
- Free rides 5/20 & 5/21
- Events held at all stations free to the public
- Thousands attended opening weekend events

Regional Connector Transit Project



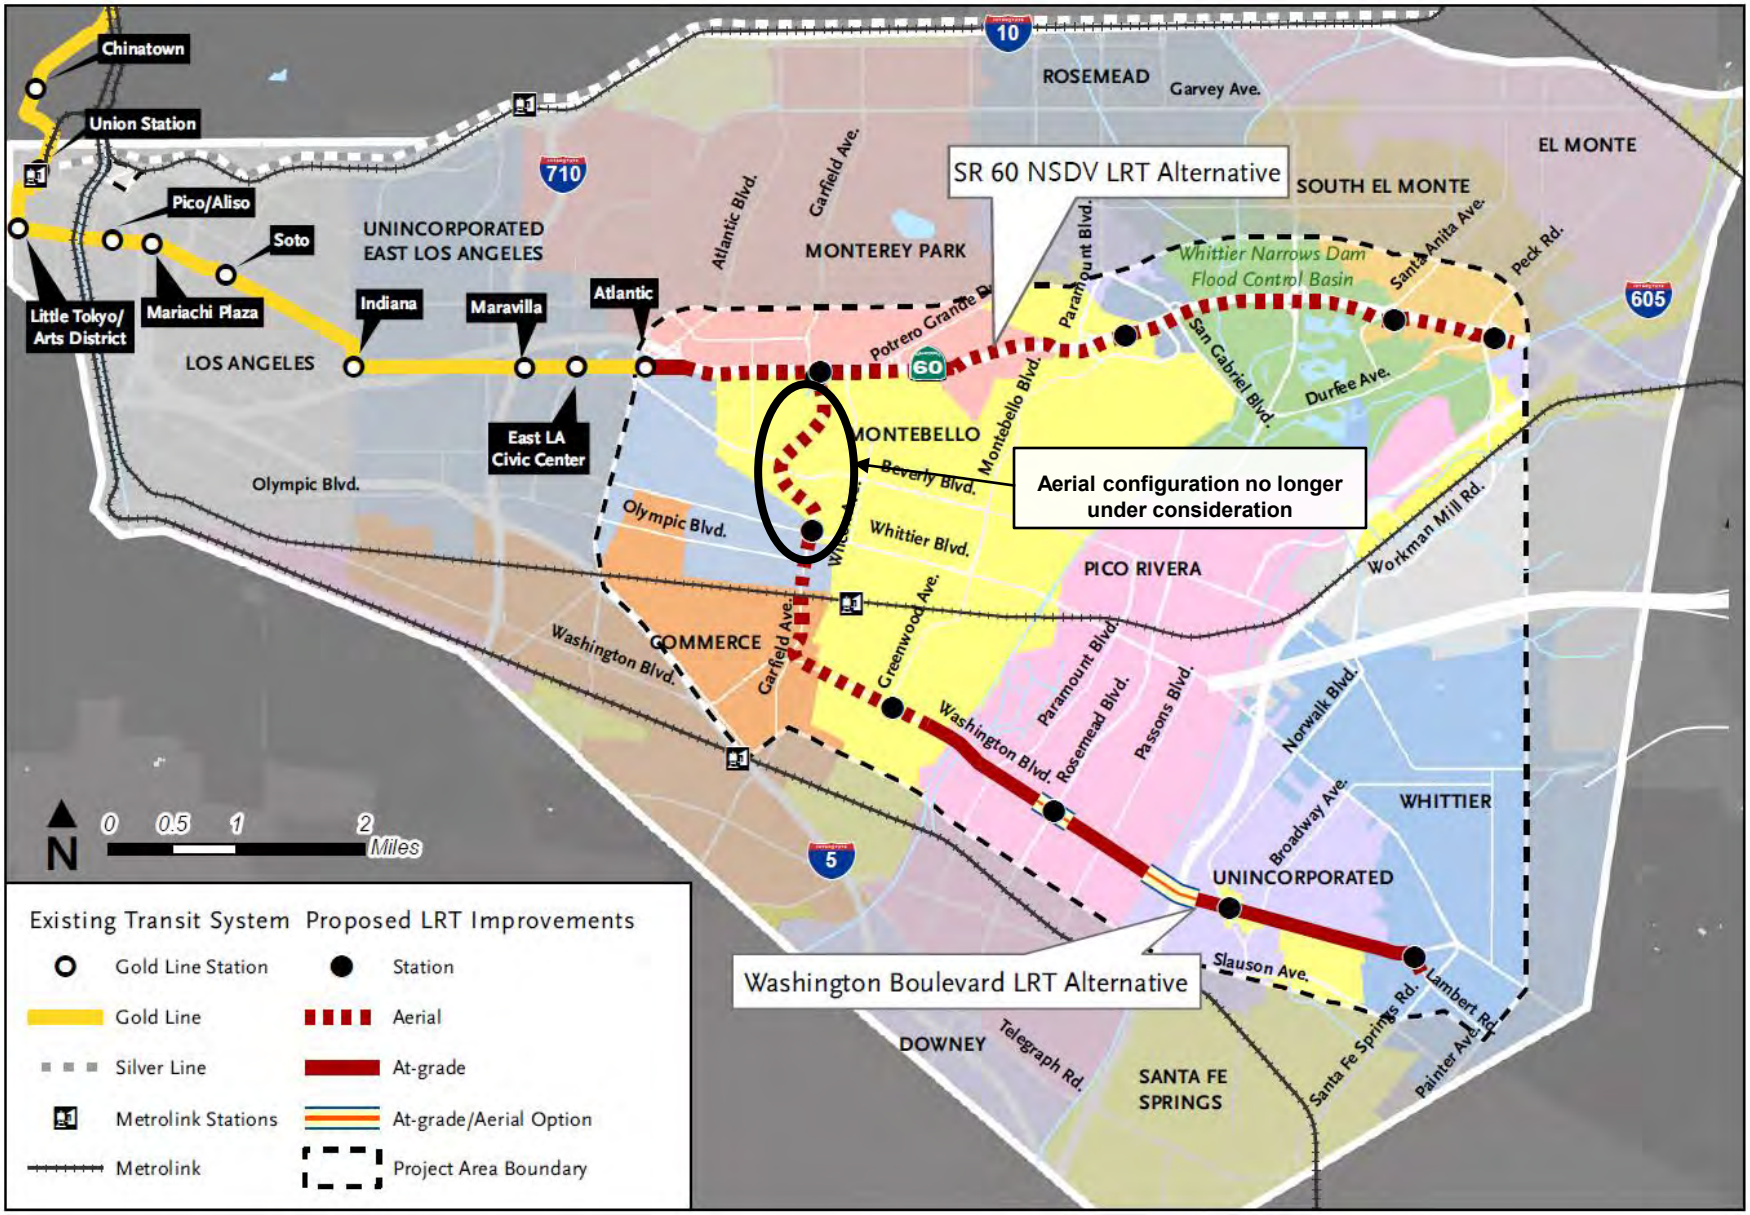
- 1.9 mile underground line in Downtown LA
- Extend Gold Line from Little Tokyo Station to 7th/Metro Station with 3 new stations
- 1 trip ride (no transfer):
  - Eastside Gold Line Extension to Santa Monica
  - Azusa to Long Beach
- Opening year in 2020
- $1.4 Billion

Eastside Phase 2 Study Area

Alternatives Studied in 2014 Draft EIS/EIR

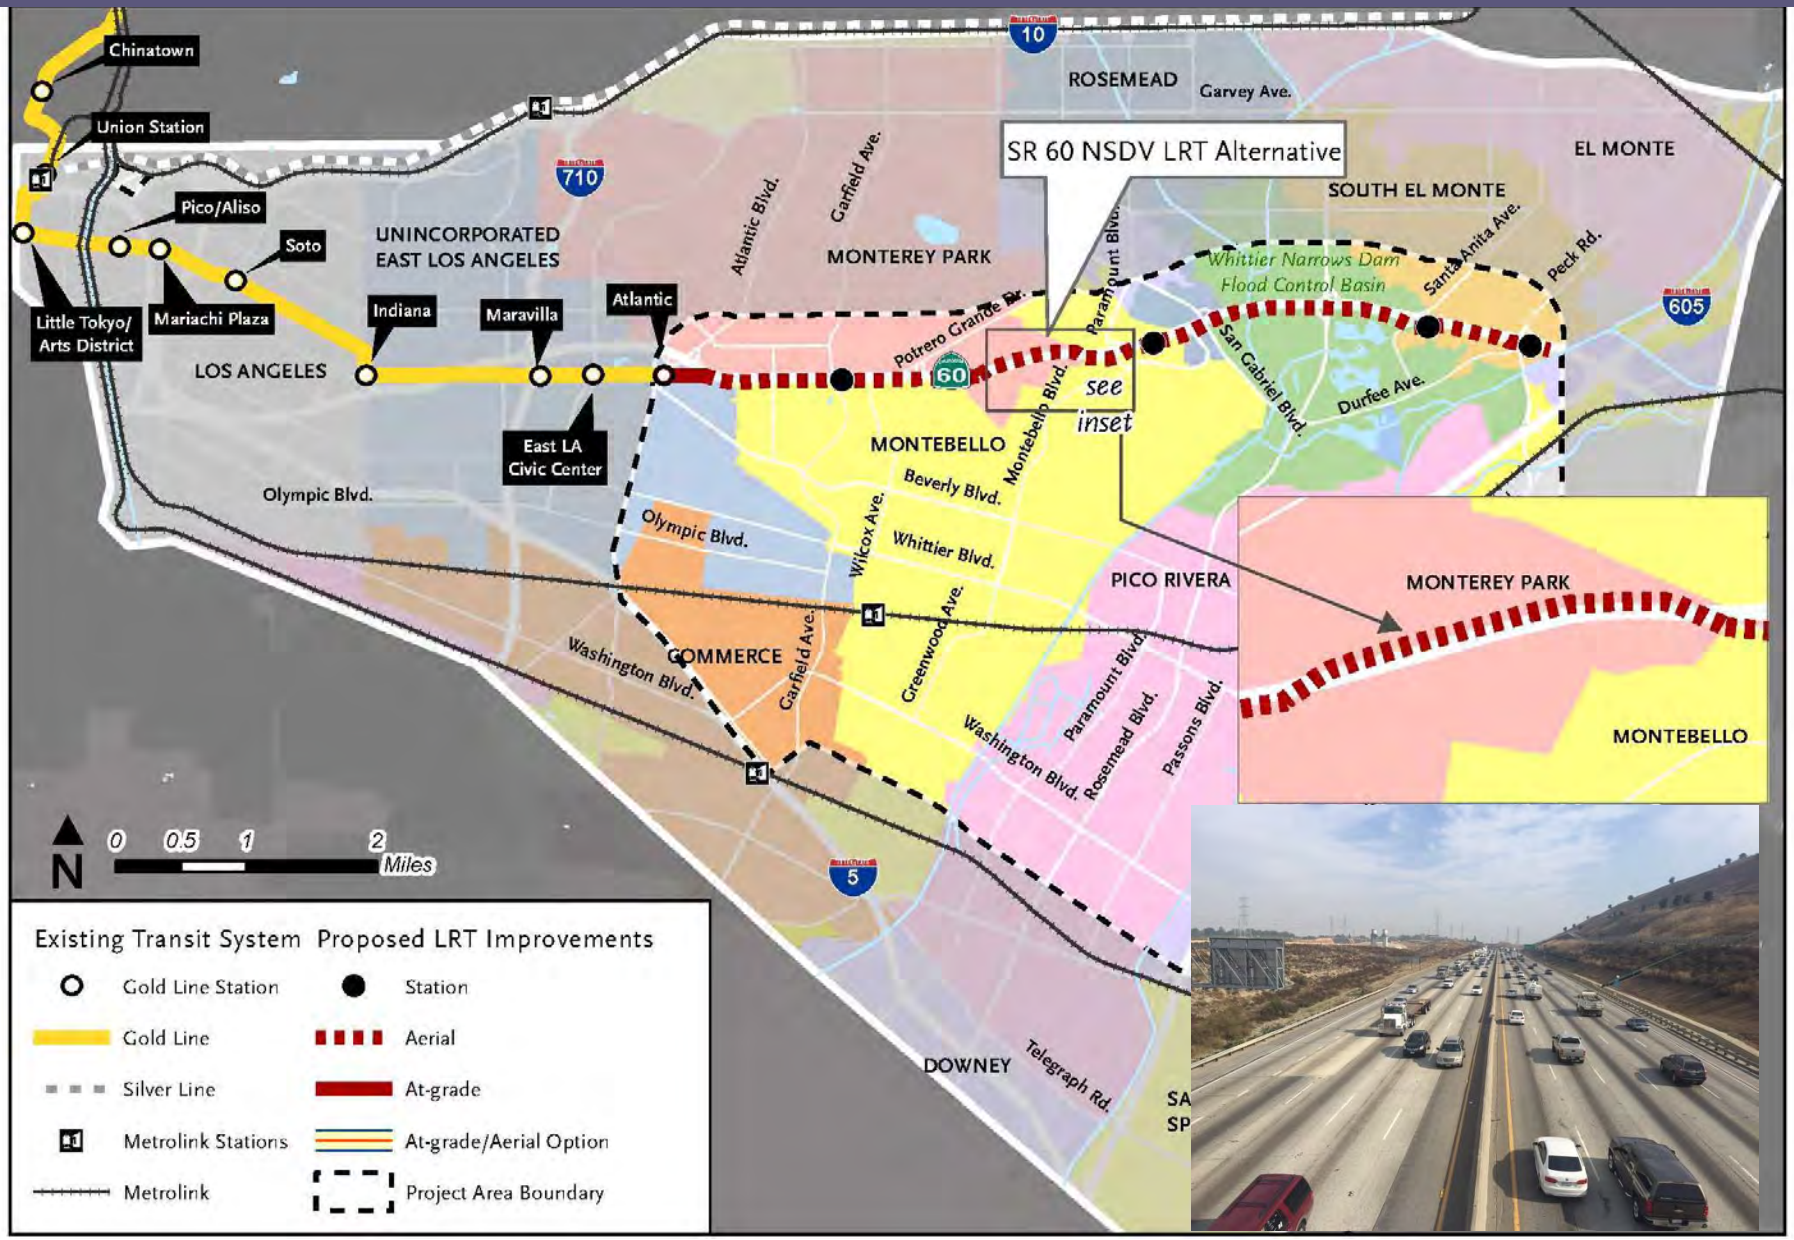
Draft EIS/EIR Alternatives:

SR-60
6.9 Miles, 4 Stations (all aerial)
16,700 Average Daily Boardings (2035)



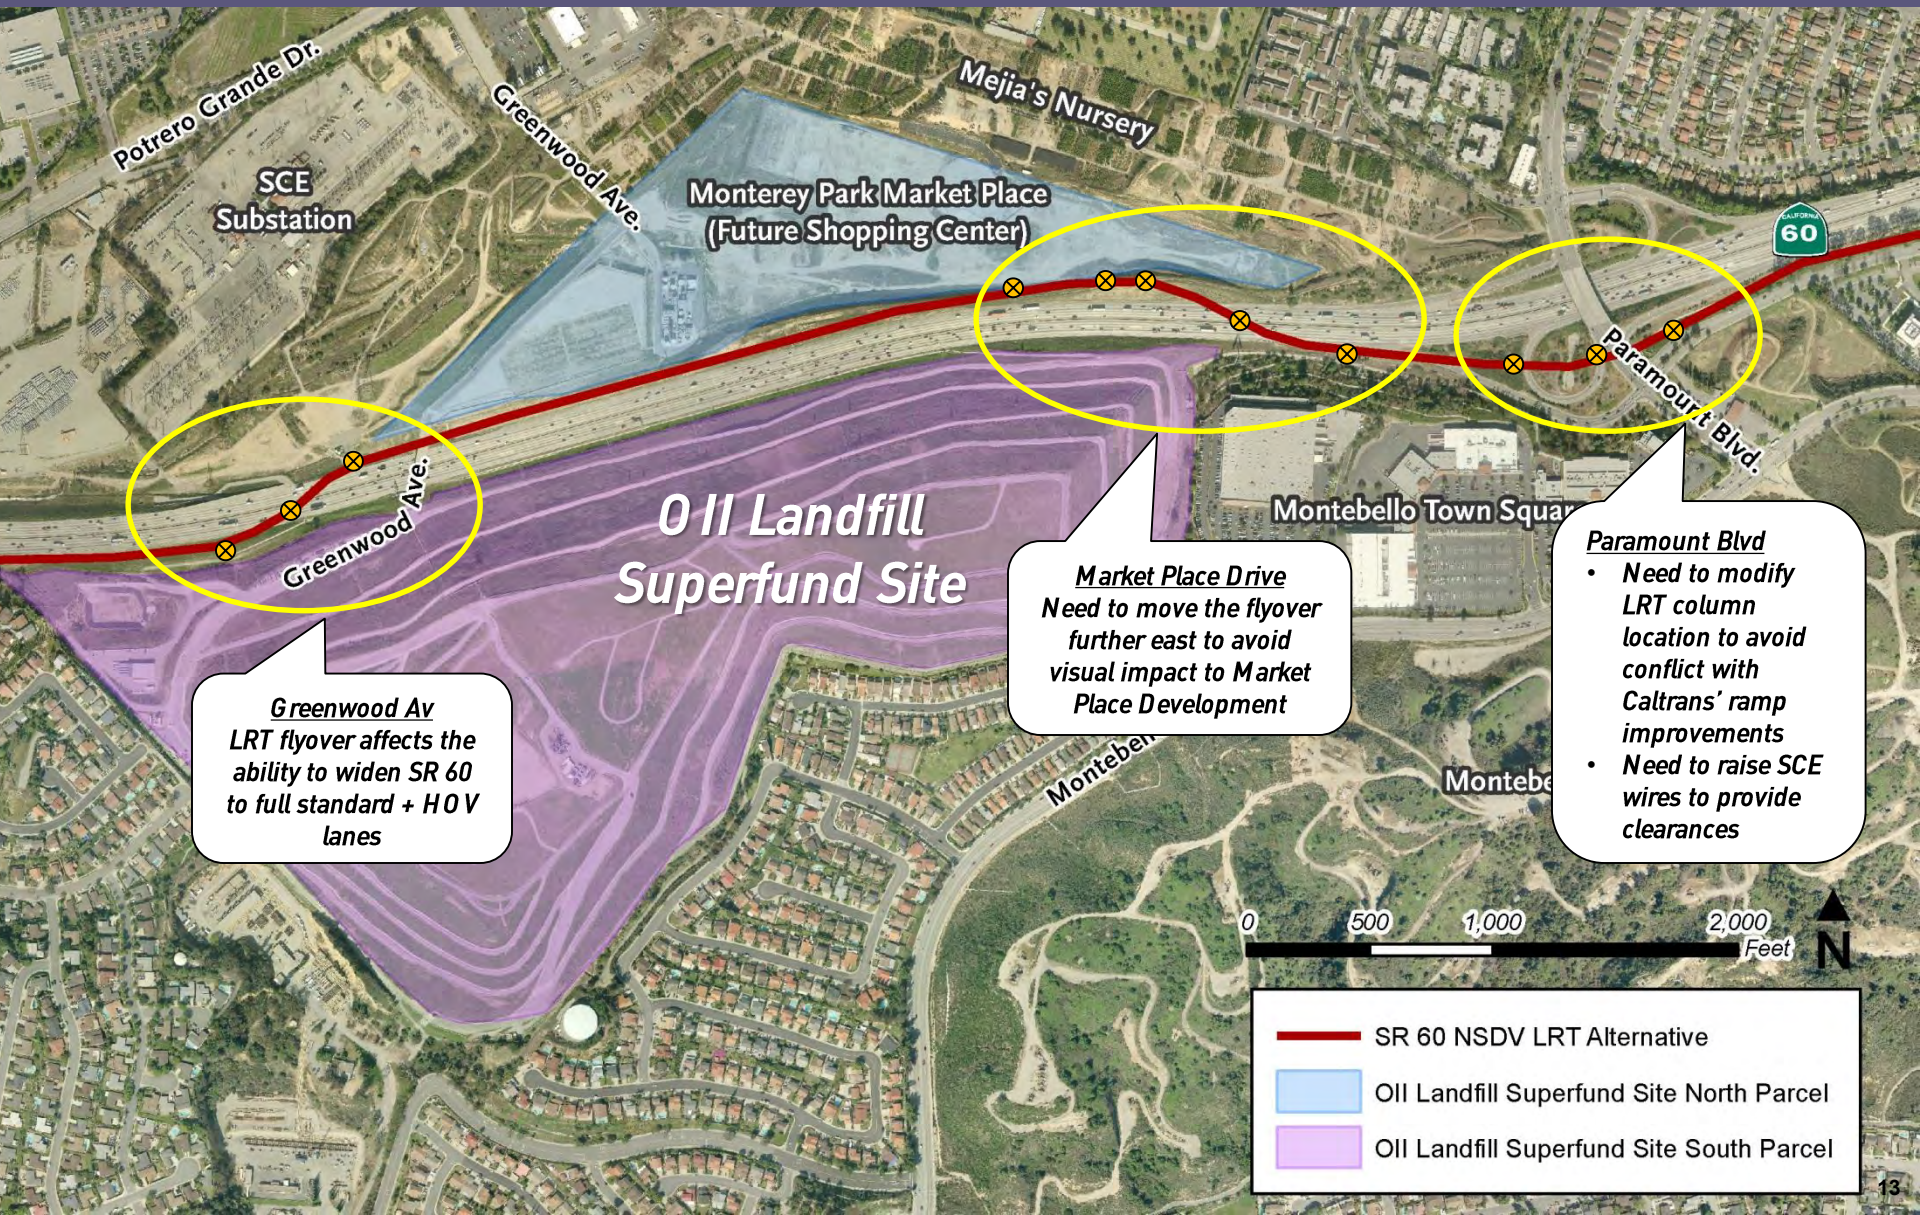
Washington Blvd (Garfield)
9.3 Miles, 6 Stations (3 aerial, 3 at-grade)
19,900 Average Daily Boardings (2035)

Eastside Phase 2 Funding
LRTP: $2.4 Billion, 2035 Delivery Date
Measure R: $1.27 Billion (2008$)



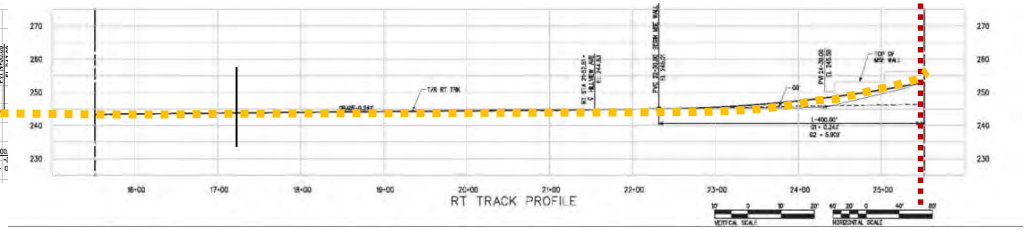
Metro Board Action (Nov 2014)

- ❑ *Continue Studying SR 60 North Side Design Variation (NSDV) option*
- ❑ *Address Comments from Cooperating Agencies*
  - *Environmental Protection Agency (EPA)*
  - *California Department of Transportation (Caltrans)*
  - *Southern California Edison (SCE)*
  - *US Army Corp of Engineers (USACE)*
- ❑ *Explore feasibility of operating both alternatives*
- ❑ *Eliminate aerial on Garfield Avenue between Via Campo and Whittier Blvd, and identify a new north-south connection to Washington Blvd*

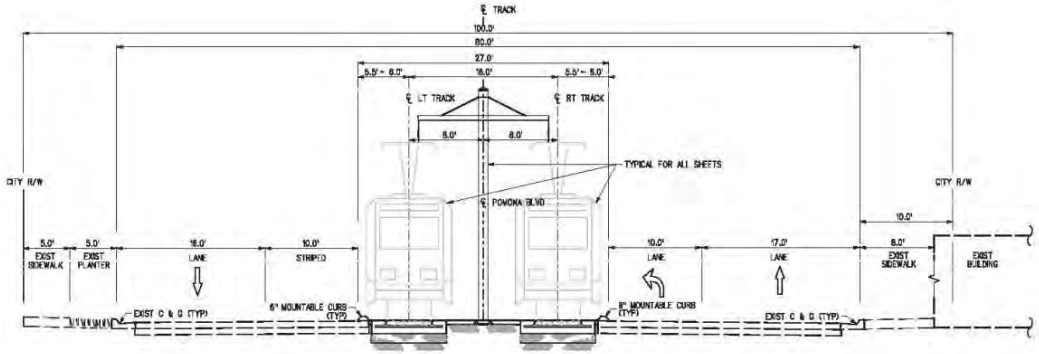


Alternatives Studied in 2014 Draft EIS/EIR

SR-60 North Side Design Variation (NSDV) Alternative

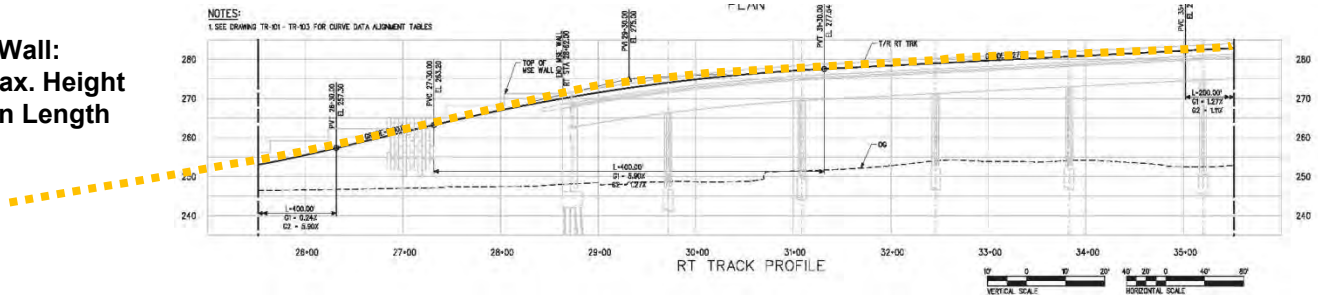


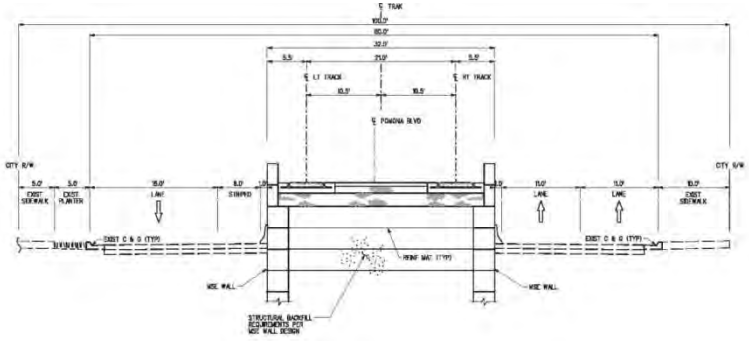
SR-60 North Side Design Variation Segment



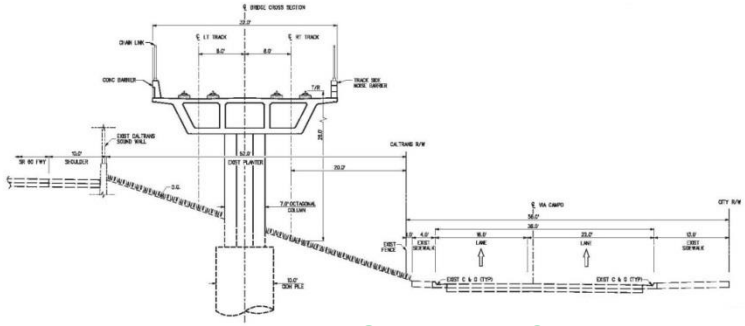
SR 60 Alternative Transition from At-Grade to Aerial
Pomona Blvd

Retaining Wall Max Height -12' at this location



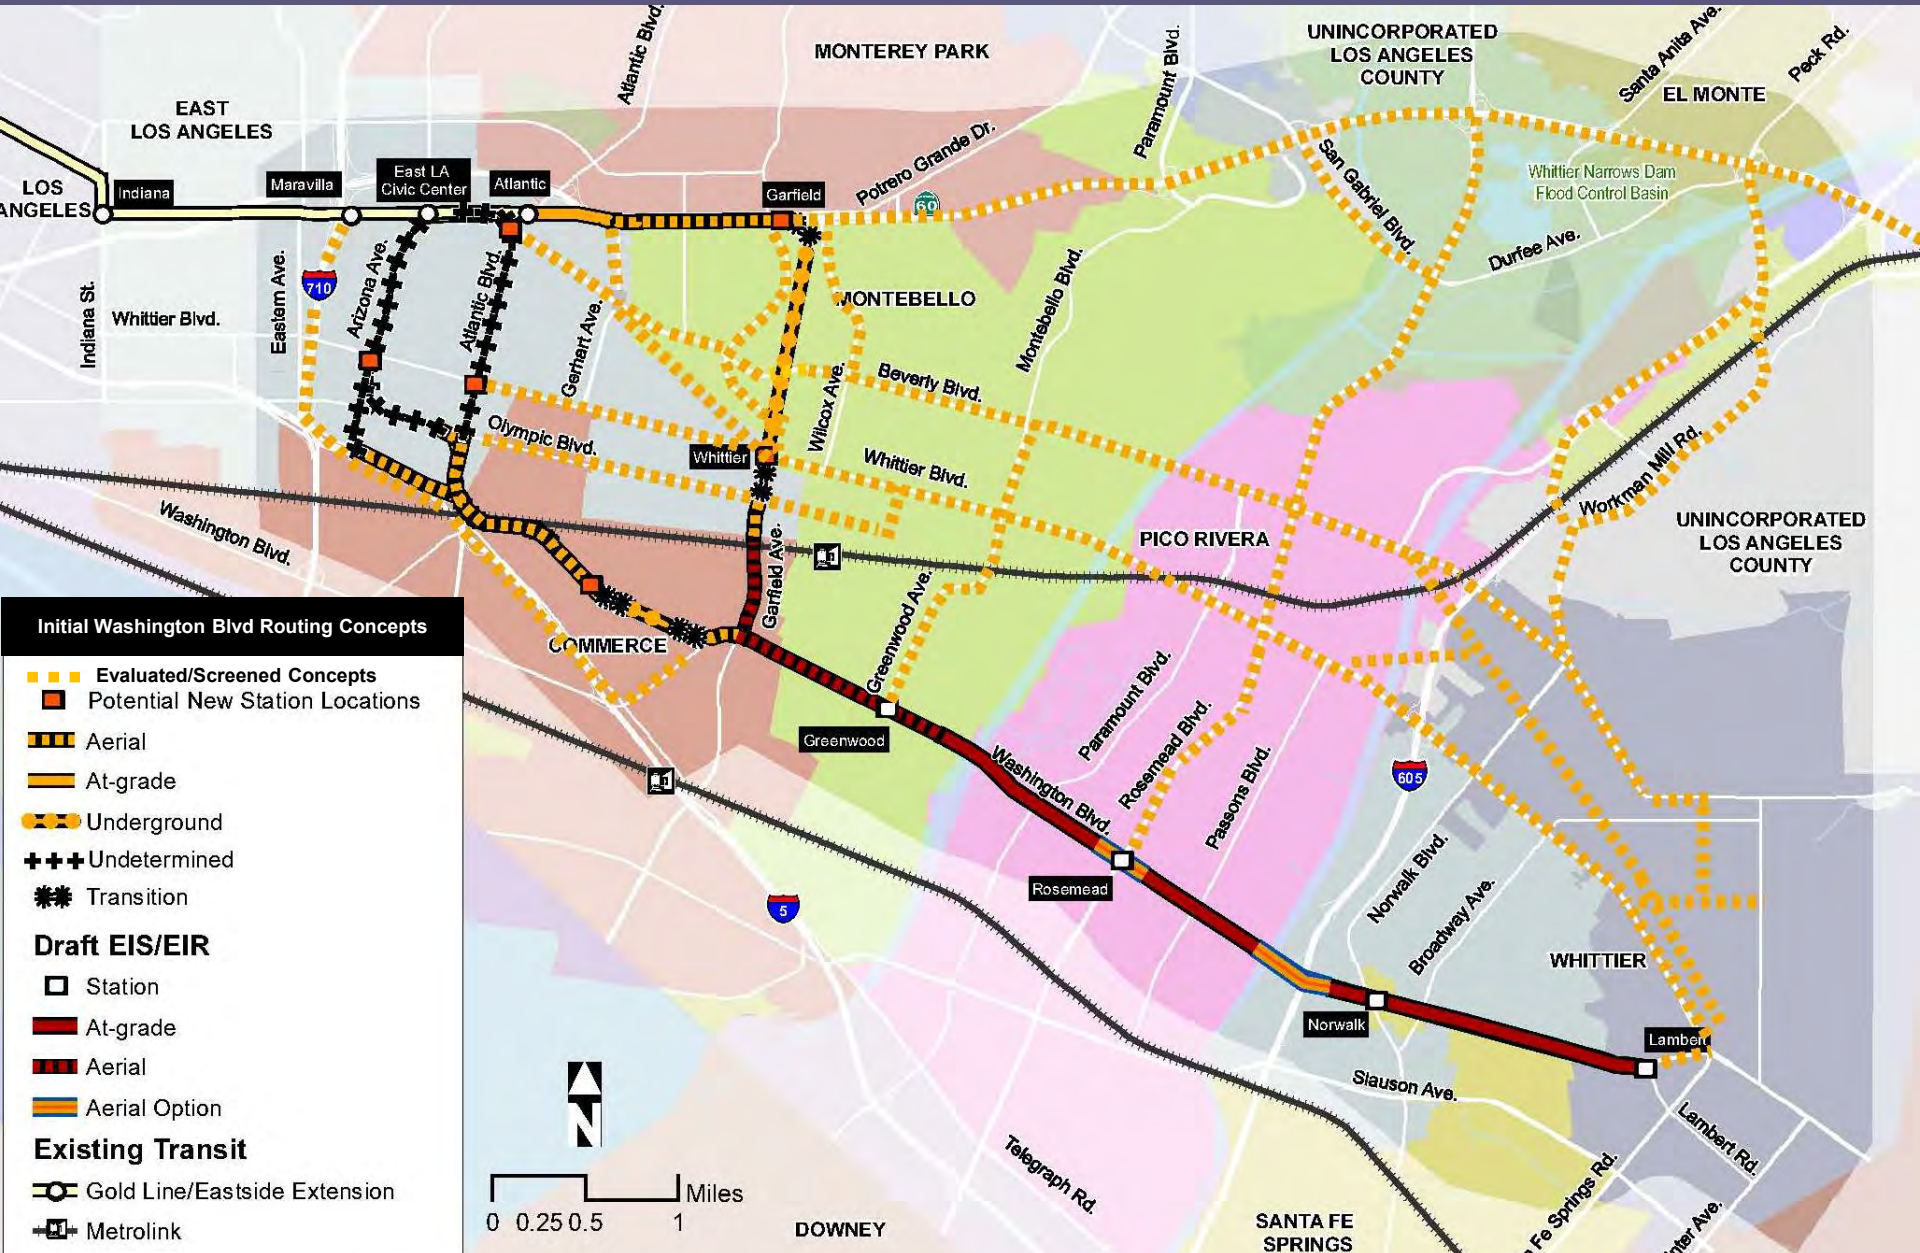


Section A



SR 60 Alternative Transition from At-Grade to Aerial
Pomona Blvd

MSE Wall:
20' Max. Height
400' in Length



New N/S Connection to Washington Blvd

Potential Washington Blvd Routing Concepts

Feedback From Stakeholders

Corridor		Opportunities	Key Challenges
Arizona/ Telegraph		Economic revitalization on Whittier Corridor	Preserving on-street parking (between 3rd and Whittier)
Atlantic		Transit Oriented Communities (TOC) in Atlantic and Whittier Corridors	Traffic/circulation impacts with at-grade LRT
Garfield (Underground)		Helps revitalize south Montebello along Washington Blvd	Property impact during and after construction of subway portals; Sewer line and storm drain issues

Initial Grade Crossing Analysis

Map of Study Locations

- Collected new traffic data for 33 Intersections
- Conducted field observations for:
  - Driveways and access conditions
  - School crossings (6)
  - Potential visibility issues (if any)
  - Queuing Issues (if any)
- Developed future traffic data (2040)
- Initial Results:
  - At-Grade operations may be feasible at some intersections on Arizona and Atlantic, pending on further investigation
  - Additional safety and operations analysis are recommended for 8 locations (25%)

Washington Blvd Alternative – What's Next?

- Grade Crossing Analysis
- Siting and Design of Tunnel Portals (if applicable)
- Station Planning
- Right-of-Way Impacts
- Utility investigations
- Engineering studies in support of new cost estimates

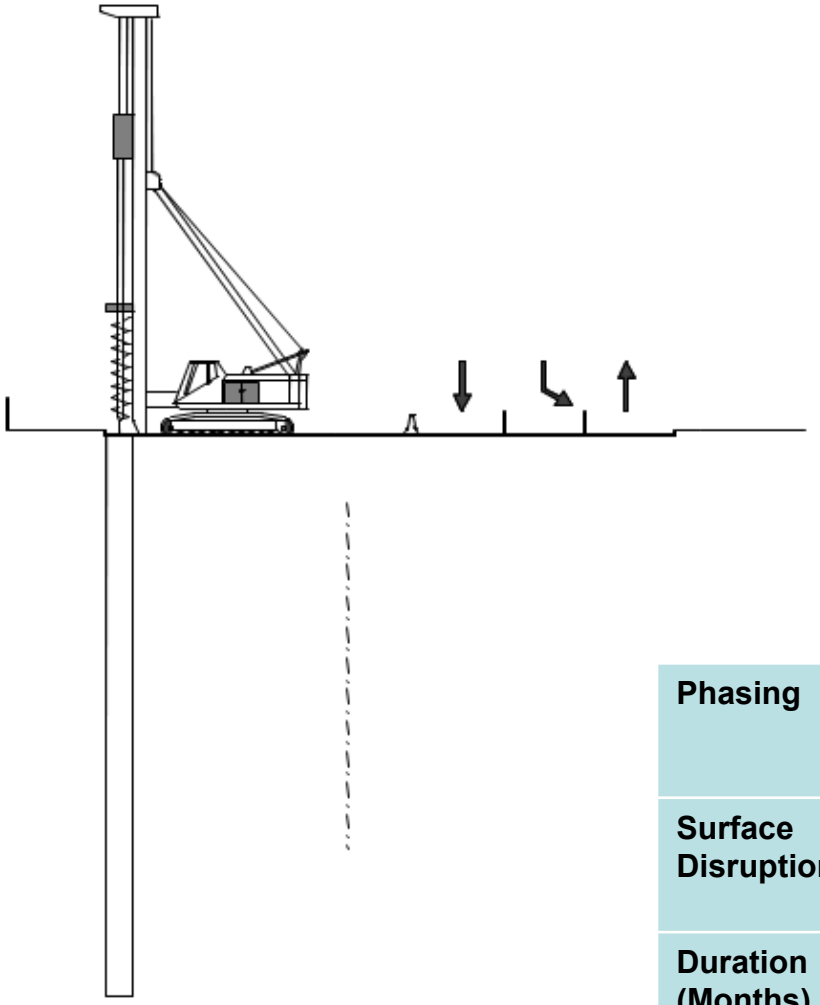
Two Primary Methods of Underground Construction

Cut & Cover

definition: shallow tunnel dug from the surface, then covered

Cut & cover construction (Mariachi Plaza)

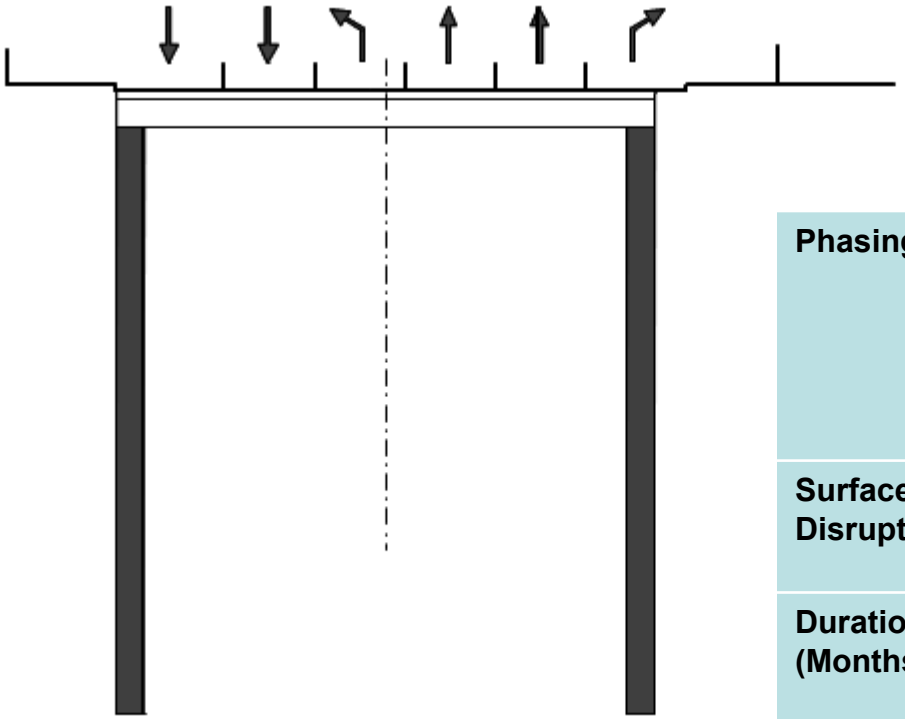
Bored Tunnel



definition: deep tunnel burrowed via a boring machine

Tunnel Boring Machine (TBM)

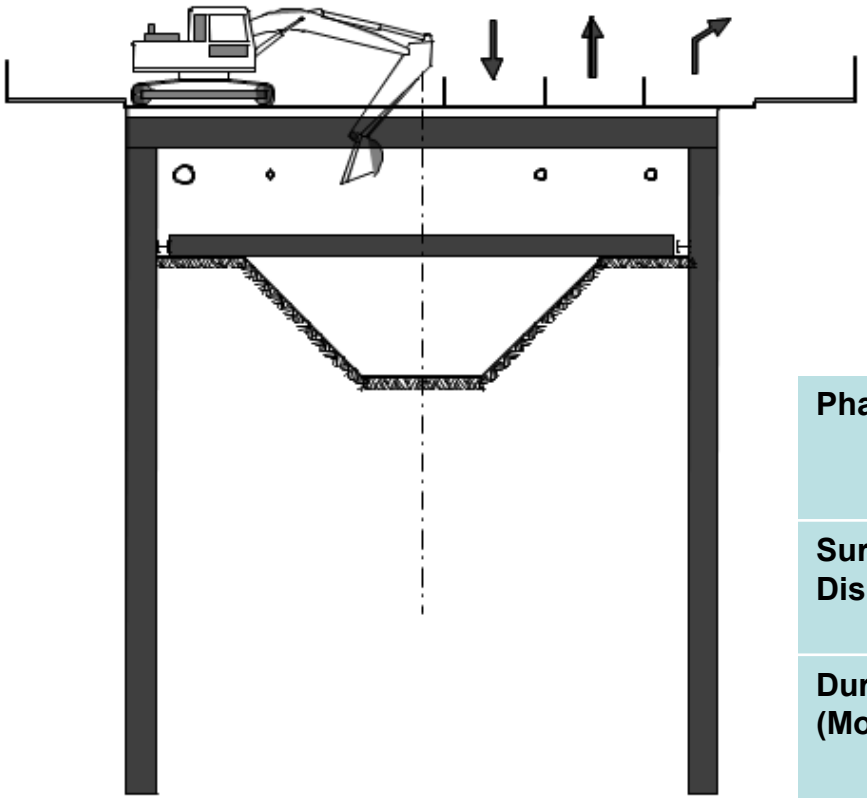
Stage 1 – Install Soldier Piles



Cut and Cover

Phasing	• Implement Traffic Control • Install Soldier Piles
Surface Disruptions	Potential partial & complete street closures
Duration (Months)	3-4 months

Stage 2 – Install Decks

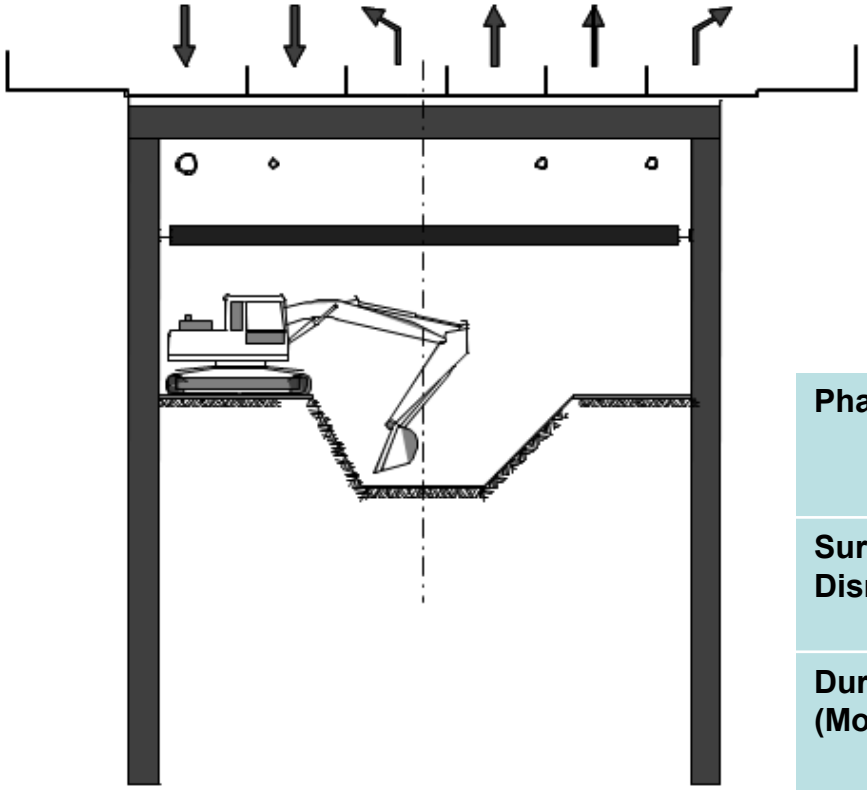


Cut and Cover

Phasing	• Close Street • Excavate 12’ below OG • Install Deck Beams • Support Utilities • Install Decking
Surface Disruptions	Potential complete street closures
Duration (Months)	2-3 months

Stage 3 – Excavate Station from Surface

Cut and Cover

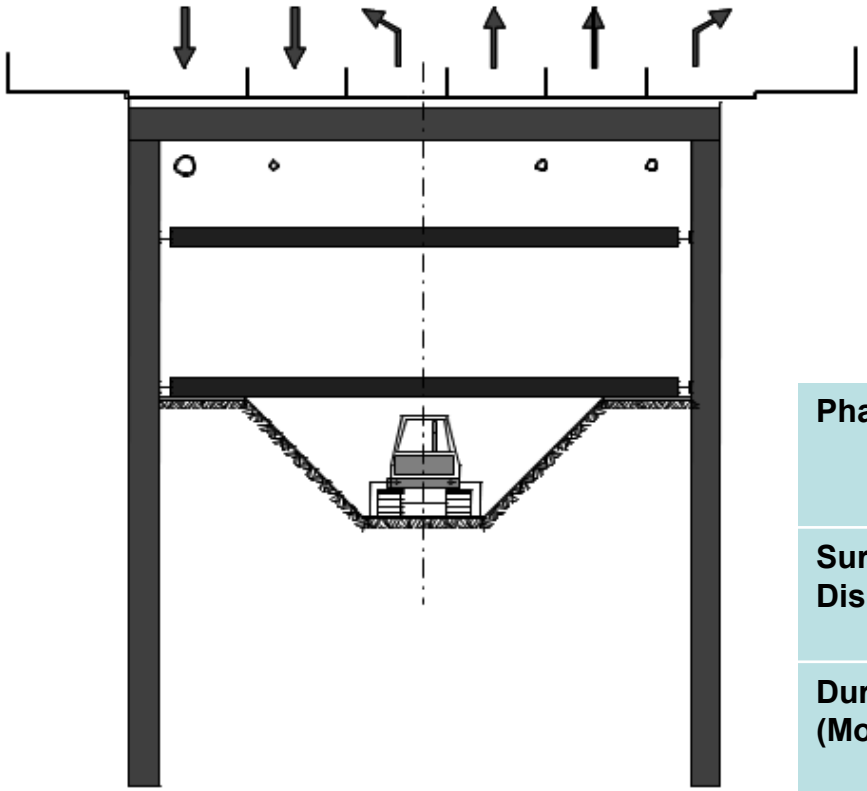


Phasing	• Detour Traffic • Excavate Trench • Install Struts
Surface Disruptions	Potential partial & complete street closures
Duration (Months)	2-3 months

Metro

Stage 4 – Excavate Station from Below Surface

Cut and Cover



Phasing	• Excavate Below upper strut • Install Lagging
Surface Disruptions	Occasional partial street closures
Duration (Months)	6 months

Metro

Stage 5 – Excavate Lower Levels of Station

Cut and Cover

Phasing	• Install Struts • Excavate Middle strut • Install Lagging
Surface Disruptions	Occasional partial street closures
Duration (Months)	6 months

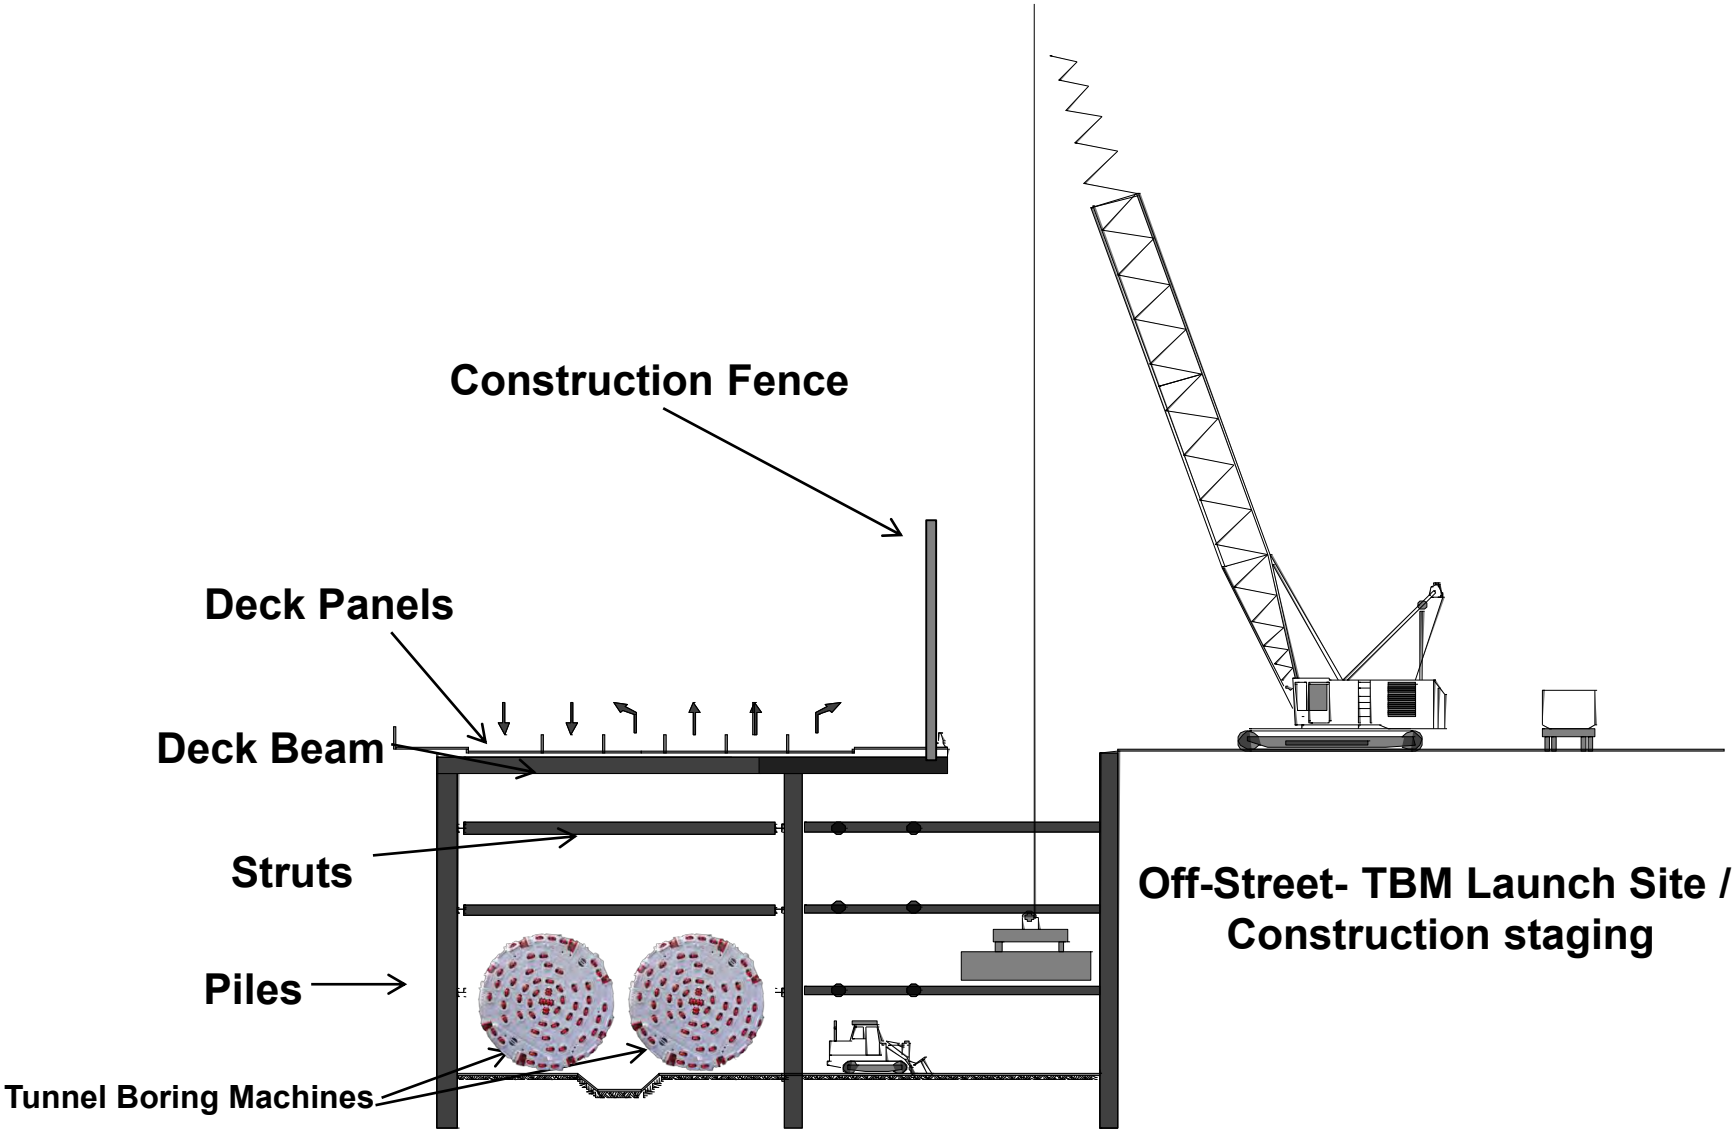
Metro

TBM Launch Pit at Metro Gold Line Little Tokyo

TBM

Steps to launch TBM:

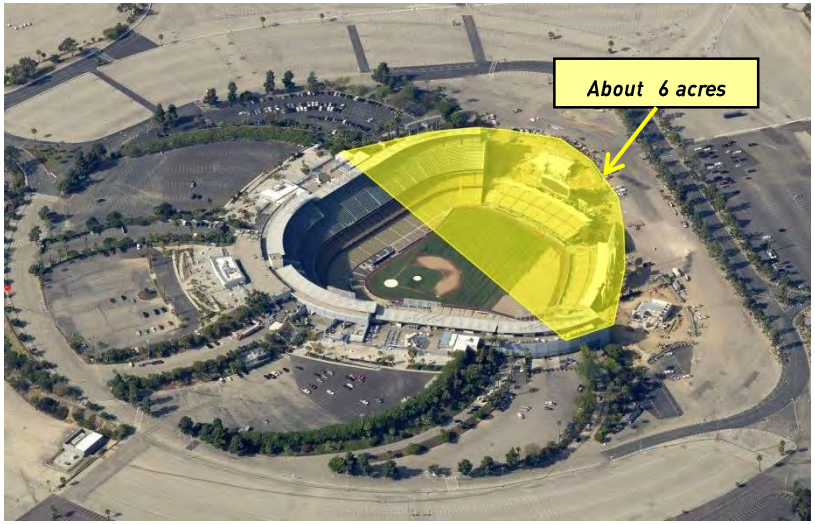
1. Space Need (4-6 acres)
2. Demolition and utility relocation
3. Dig Launch Pit
4. Install piles, struts and decking
5. Lower TBM into position



Tunnel Boring Launch site

Tunnel Boring Machine for Metro Crenshaw/LAX

Tunnel boring machine (TBM) Launch Site Cross Section
- *Cut & Cover Construction at Launch site*

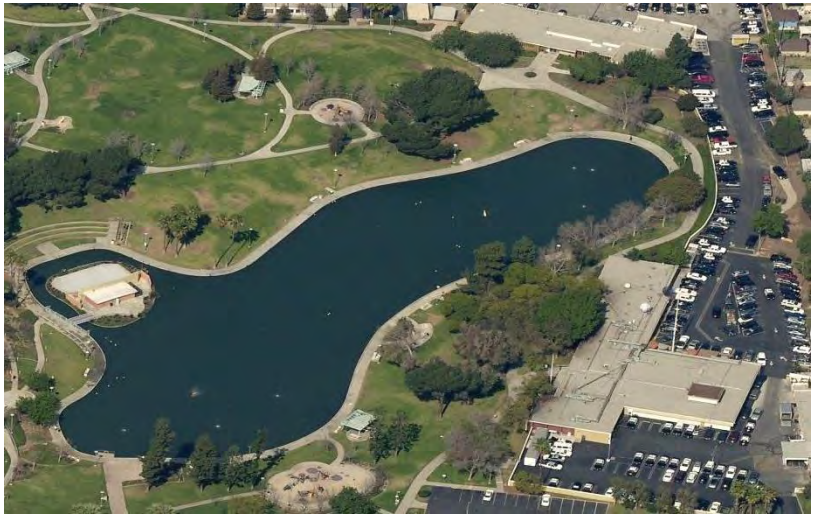


TBM vs. Cut & Cover Durations from Regional Connector Project

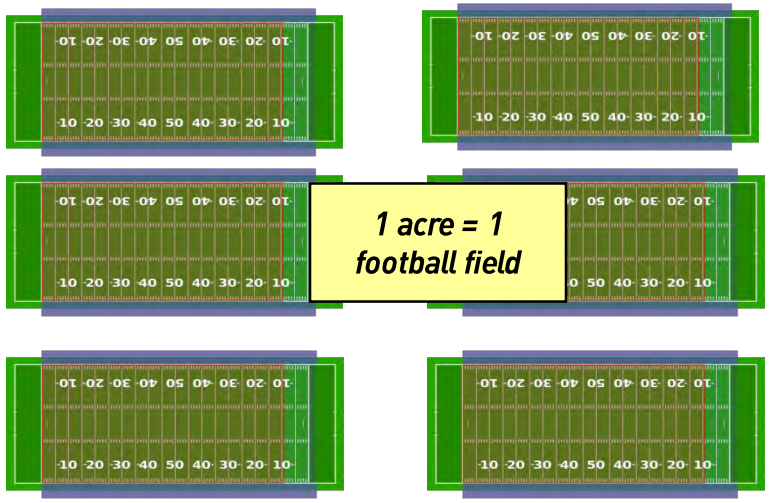
Activity	Duration (Months)
Pre-construction	4-6 months
Site preparation	12-18 months
Cut & cover at Portal & station	24-48 months
2nd St TBM Tunnel	24-48 months

Durations listed are for the Regional Connector Project and not for the Eastside Project.
Durations will vary from location to location based on site conditions. Some activities can overlap.

Space Needed to Launch TBM: 4 to 6 Acres



Dodger Stadium ~12 acres



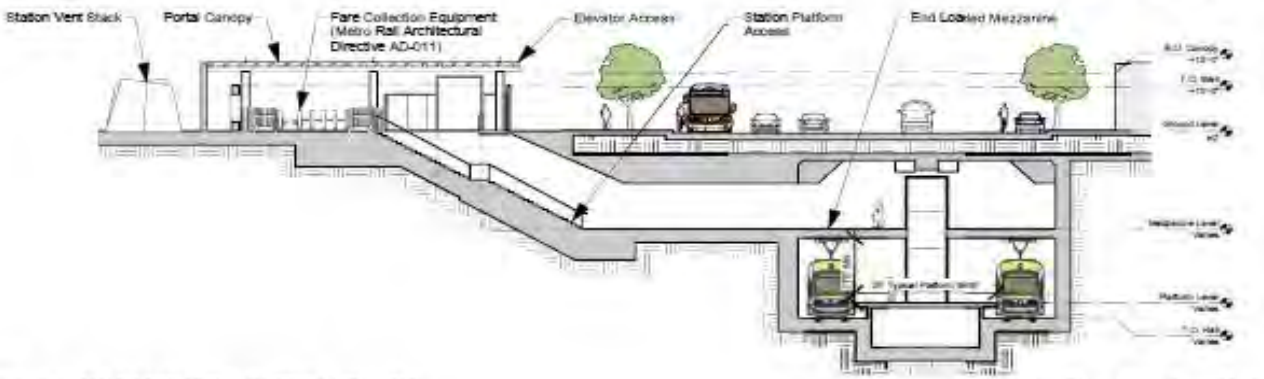
Staples Center ~ 5.5 acres

Belvedere Park Lake ~ 3 acres

4-6 Football Fields

Cut & Cover vs. TBM: Advantages and Disadvantages

Tunneling Method	Advantages	Disadvantages
Cut & Cover 	• Less noise/vibration, visual impacts if temporary decking installed	• Major ROW acquisition • Major traffic disruptions along alignment for extended durations • Major disruption to access to residences and businesses along entire alignment for extended durations • Noise and visual impacts until temporary decking is installed
TBM 	• Less construction activity on surface • Avoids most typical utilities • Can improve schedule	• Major ROW acquisition for large staging area needed for launching/extracting TBM • Similar disruptions to Cut and Cover but only at station and launching/extracting TBM and for shorter period of time • More expensive



Below-grade LRT Station

01 LRT ENTRY PORTAL ILLUSTRATION

02 BELOW GRADE LRT PLATFORM SECTION
Scale: 1" = 50 ft

03 BELOW GRADE LRT PLATFORM SECTION
Scale: 1:400

Interactive Discussion

- ***Join a discussion group***
- ***Nominate a group spokesperson***
- ***Share what you discussed***
- ***Comments and Questions***

Topics to Discuss

- ***Based on what you've heard, which corridors are most promising? Why?***
- ***Where should stations be located? Why?***
- ***What do we need to know?***

Next Steps for Technical Study

- ❑ *Continue stakeholder/community outreach meetings*
- ❑ *Incorporate feedback in project planning*
- ❑ *Continue technical analysis*
- ❑ *Present findings of Technical Study to Metro Board (early 2017)*

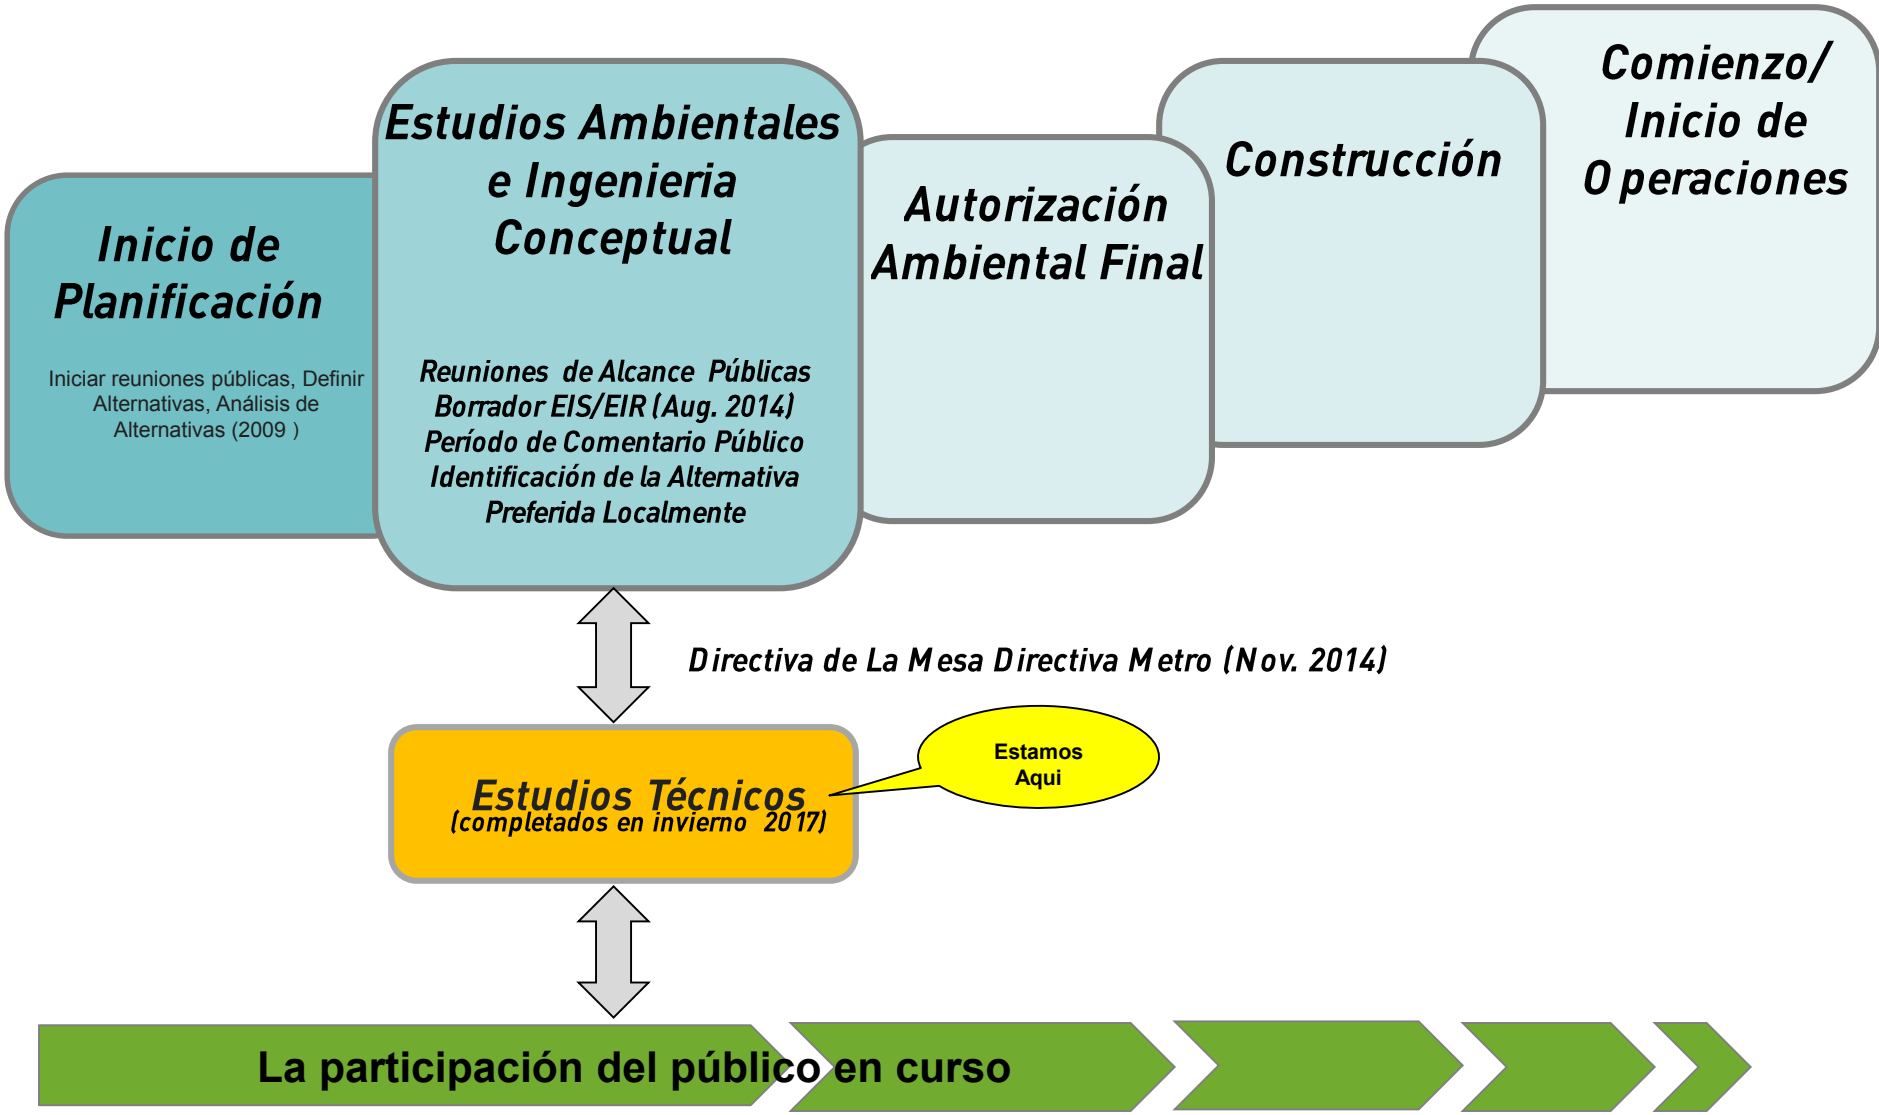
Q &A

Metro

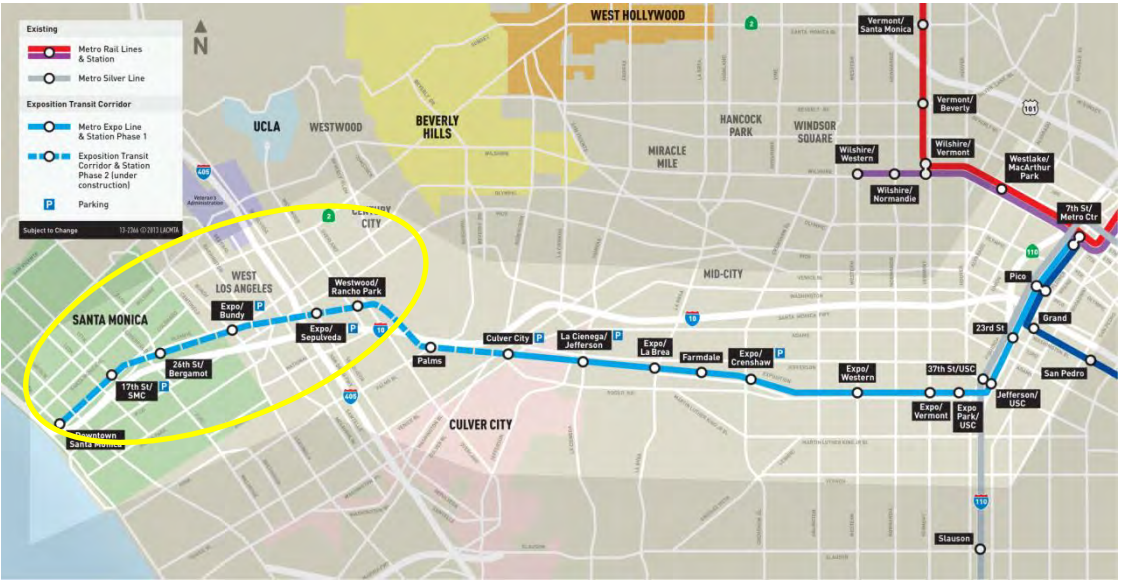
Corredor de Transporte Hacia el Este Fase 2



Reunión Comunitaria, 22 de junio, 2016

Propósito de la Reunión de esta Noche

- ***Actualización sobre el estudio técnico dirigido por la mesa directiva de Metro (Nov. 2014)***
  - ***Alternativa SR-60***
  - ***Alternativa Washington Blvd***
- ***Resumen de Conceptos de Rutas***
- ***Métodos de Construcción***
- ***Sesión Interactiva***



Fases del Dessarrollo del Proyecto

Aérea del Estudio del Proyecto Eastside Fase 2 en el Condado de Los Angeles

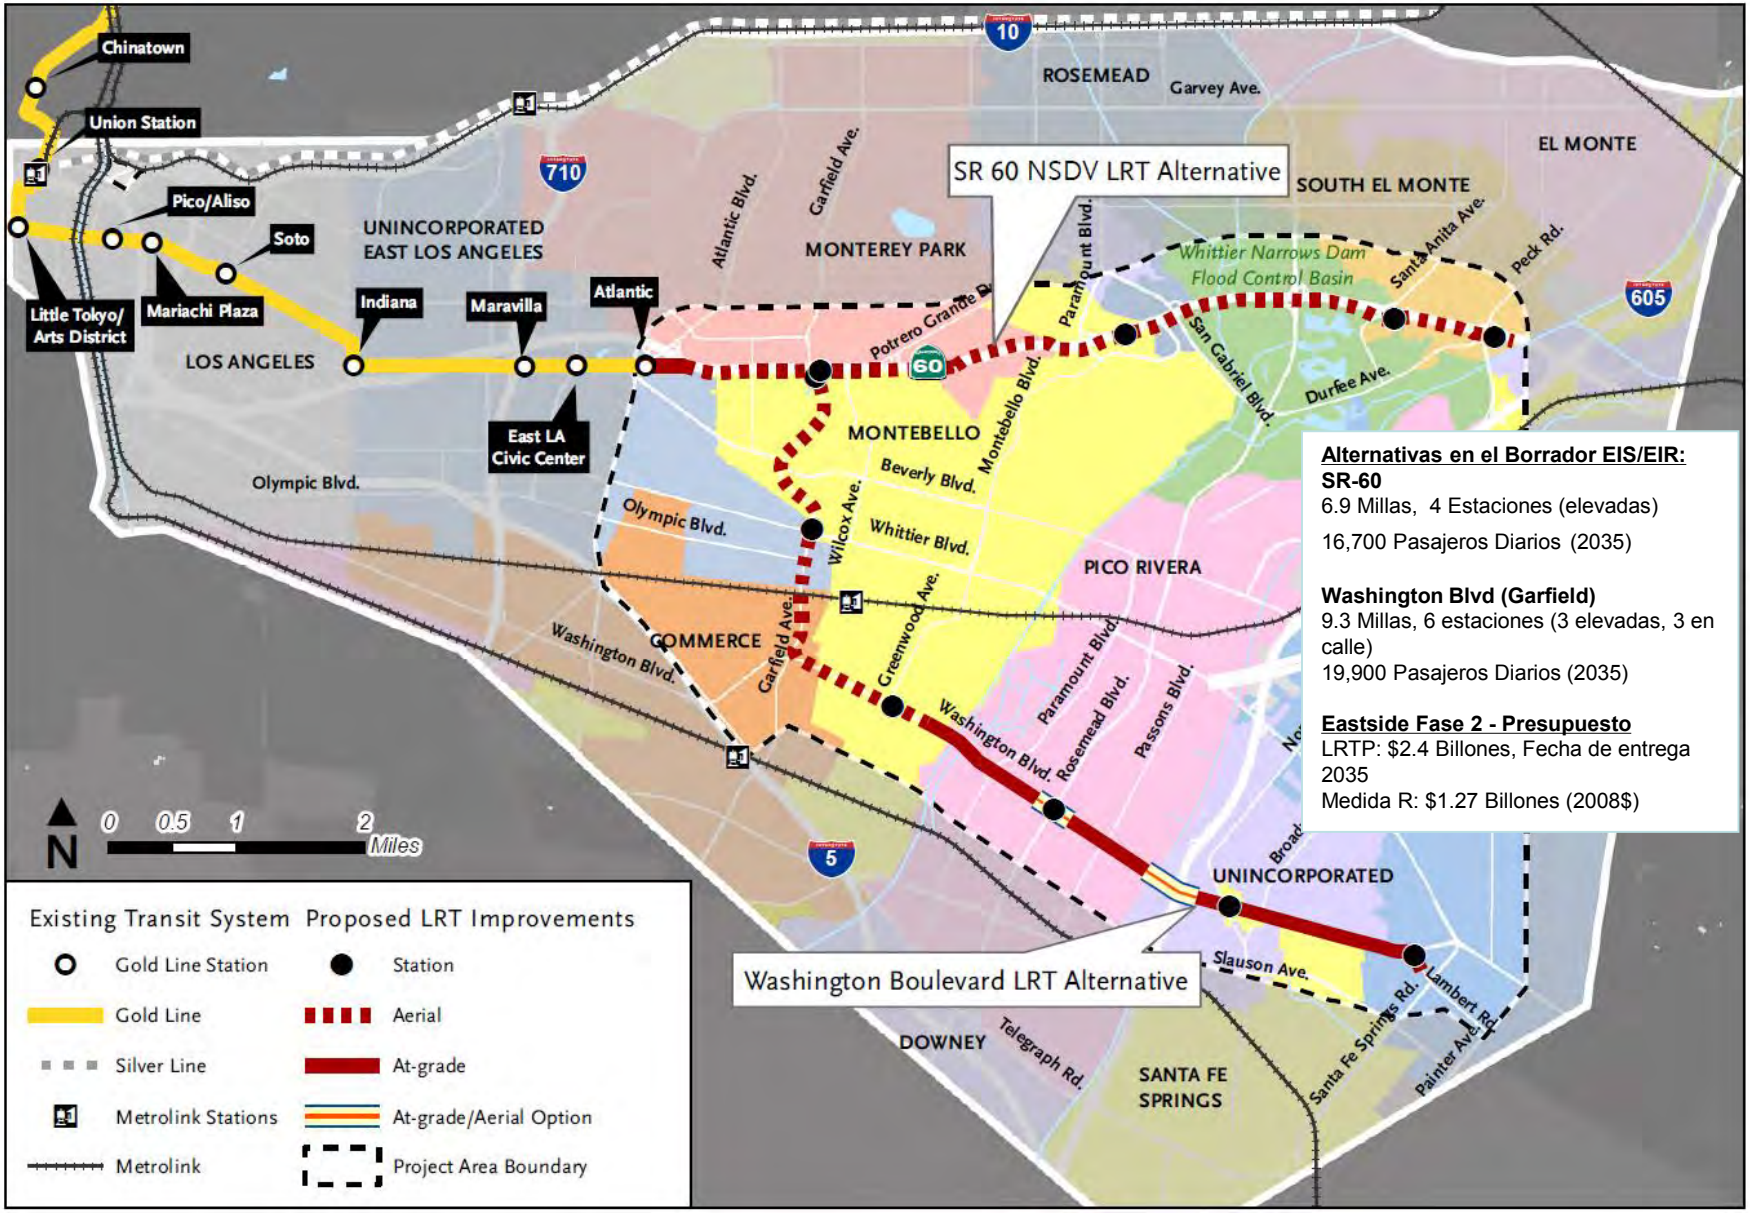
Extensión de la Linea Expo (Fase 2) Hacia Santa Monica

- Corredor de 6.6 millas
- 7 estaciones (4 a nivel y 3 elevadas)
- 3 lotes de estacionamiento
- Frecuencia - cada 12 minutos
- Viaje de 46 min del Centro de Los Angeles a Santa Monica
- Se estiman 64,000 abordajes para el 2030
- Costo de $1.5 billones

Expo Fase 2 Fin de Semana de Inauguración (19-21 de mayo, 2016)

- Ceremonia de Inauguración 5/20
- Tarifa gratis 5/20 y 5/21
- Eventos gratis al público en cada estación
- Miles asistieron los eventos del fin de semana de inauguración

Proyecto Conector Regional de Transito



- 1.9 millas de línea subterránea el Centro de Los Angeles
- Extender la línea Gold de la estación Little Tokyo a la estación 7th/Metro con 3 estaciones nuevas
- 1 viaje (sin transferencias):
  - Extensión de Este de la Gold Line a Santa Monica
  - Azusa a Long Beach
- Año de Inicio: 2020
- $1.4 Billones

Área del Estudio de Eastside Fase 2

Alternativas Estudiadas en el Borrador EIS/EIR del 2014

Alternativas en el Borrador EIS/EIR:

SR-60

6.9 Millas, 4 Estaciones (elevadas)

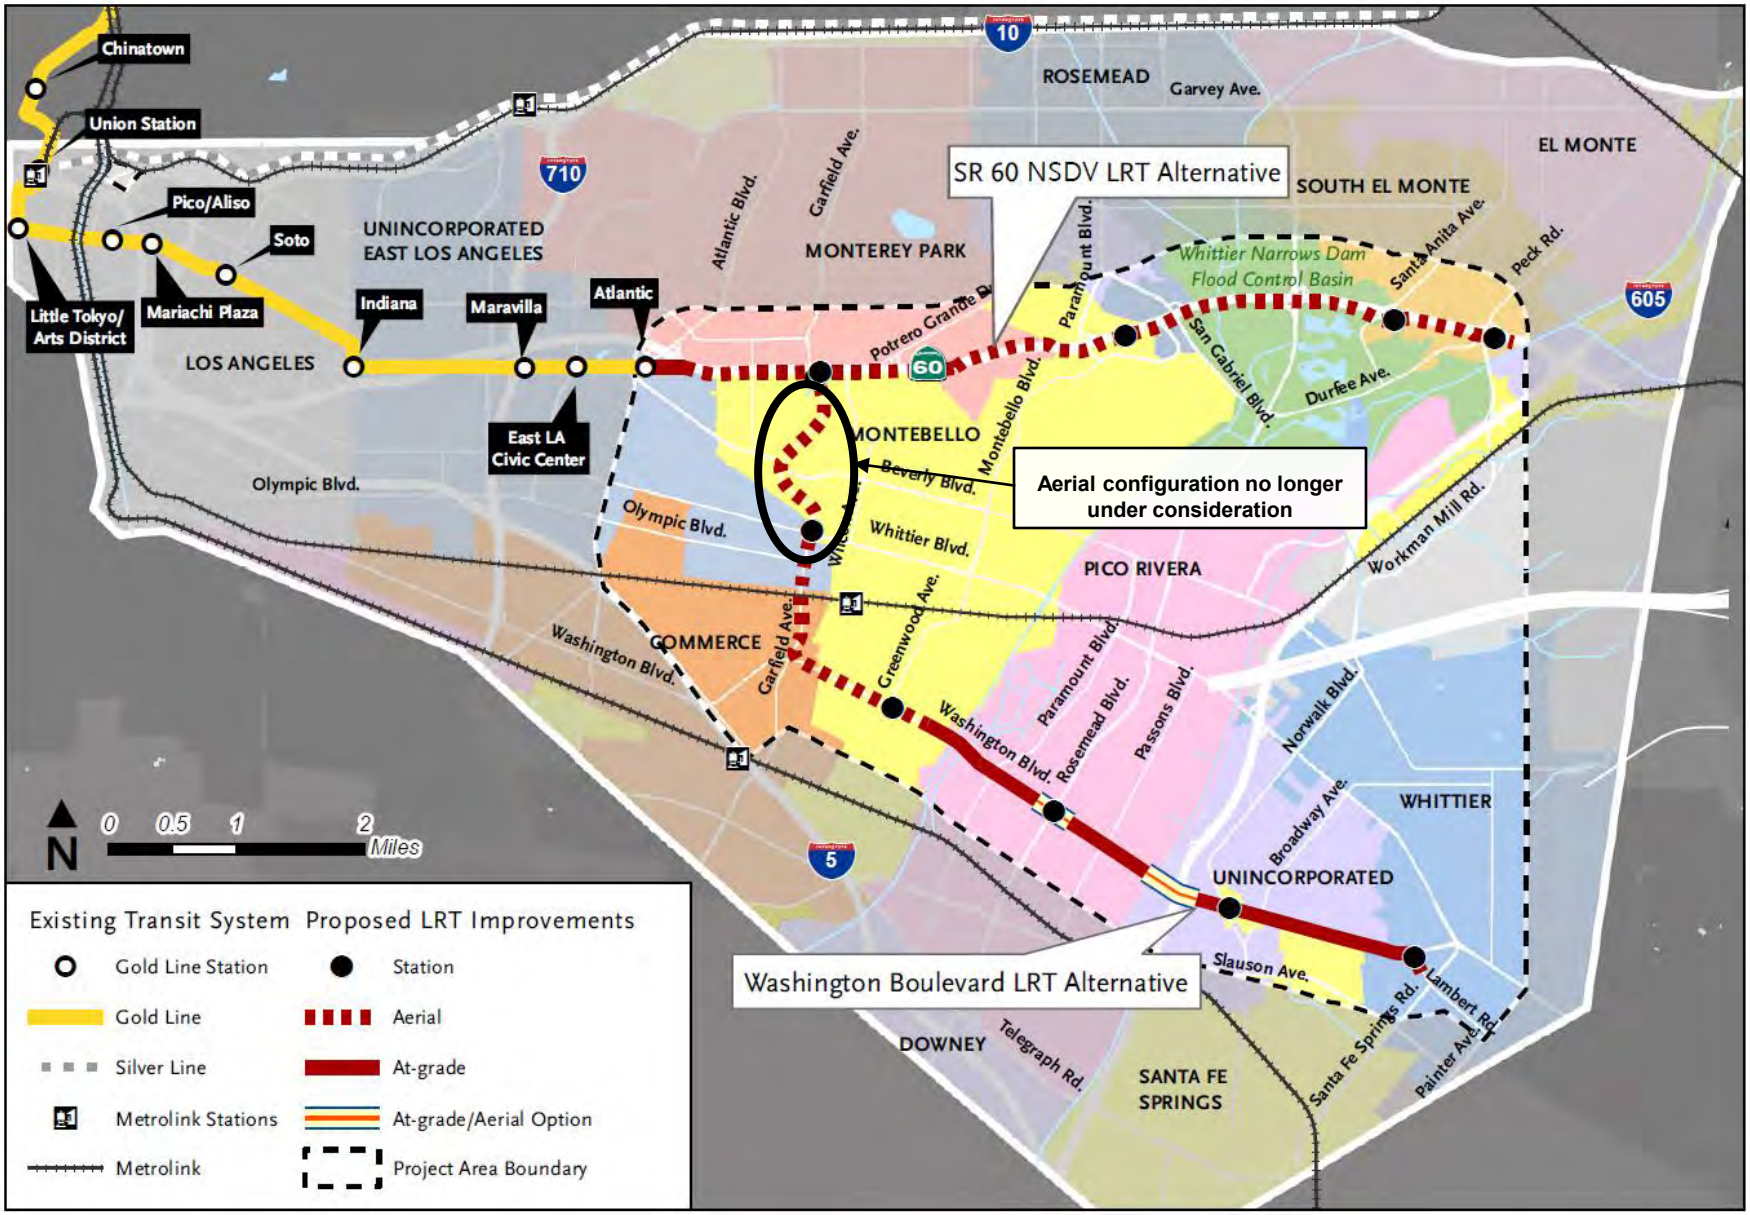
16,700 Pasajeros Diarios (2035)

Washington Blvd (Garfield)

9.3 Millas, 6 estaciones (3 elevadas, 3 en calle)

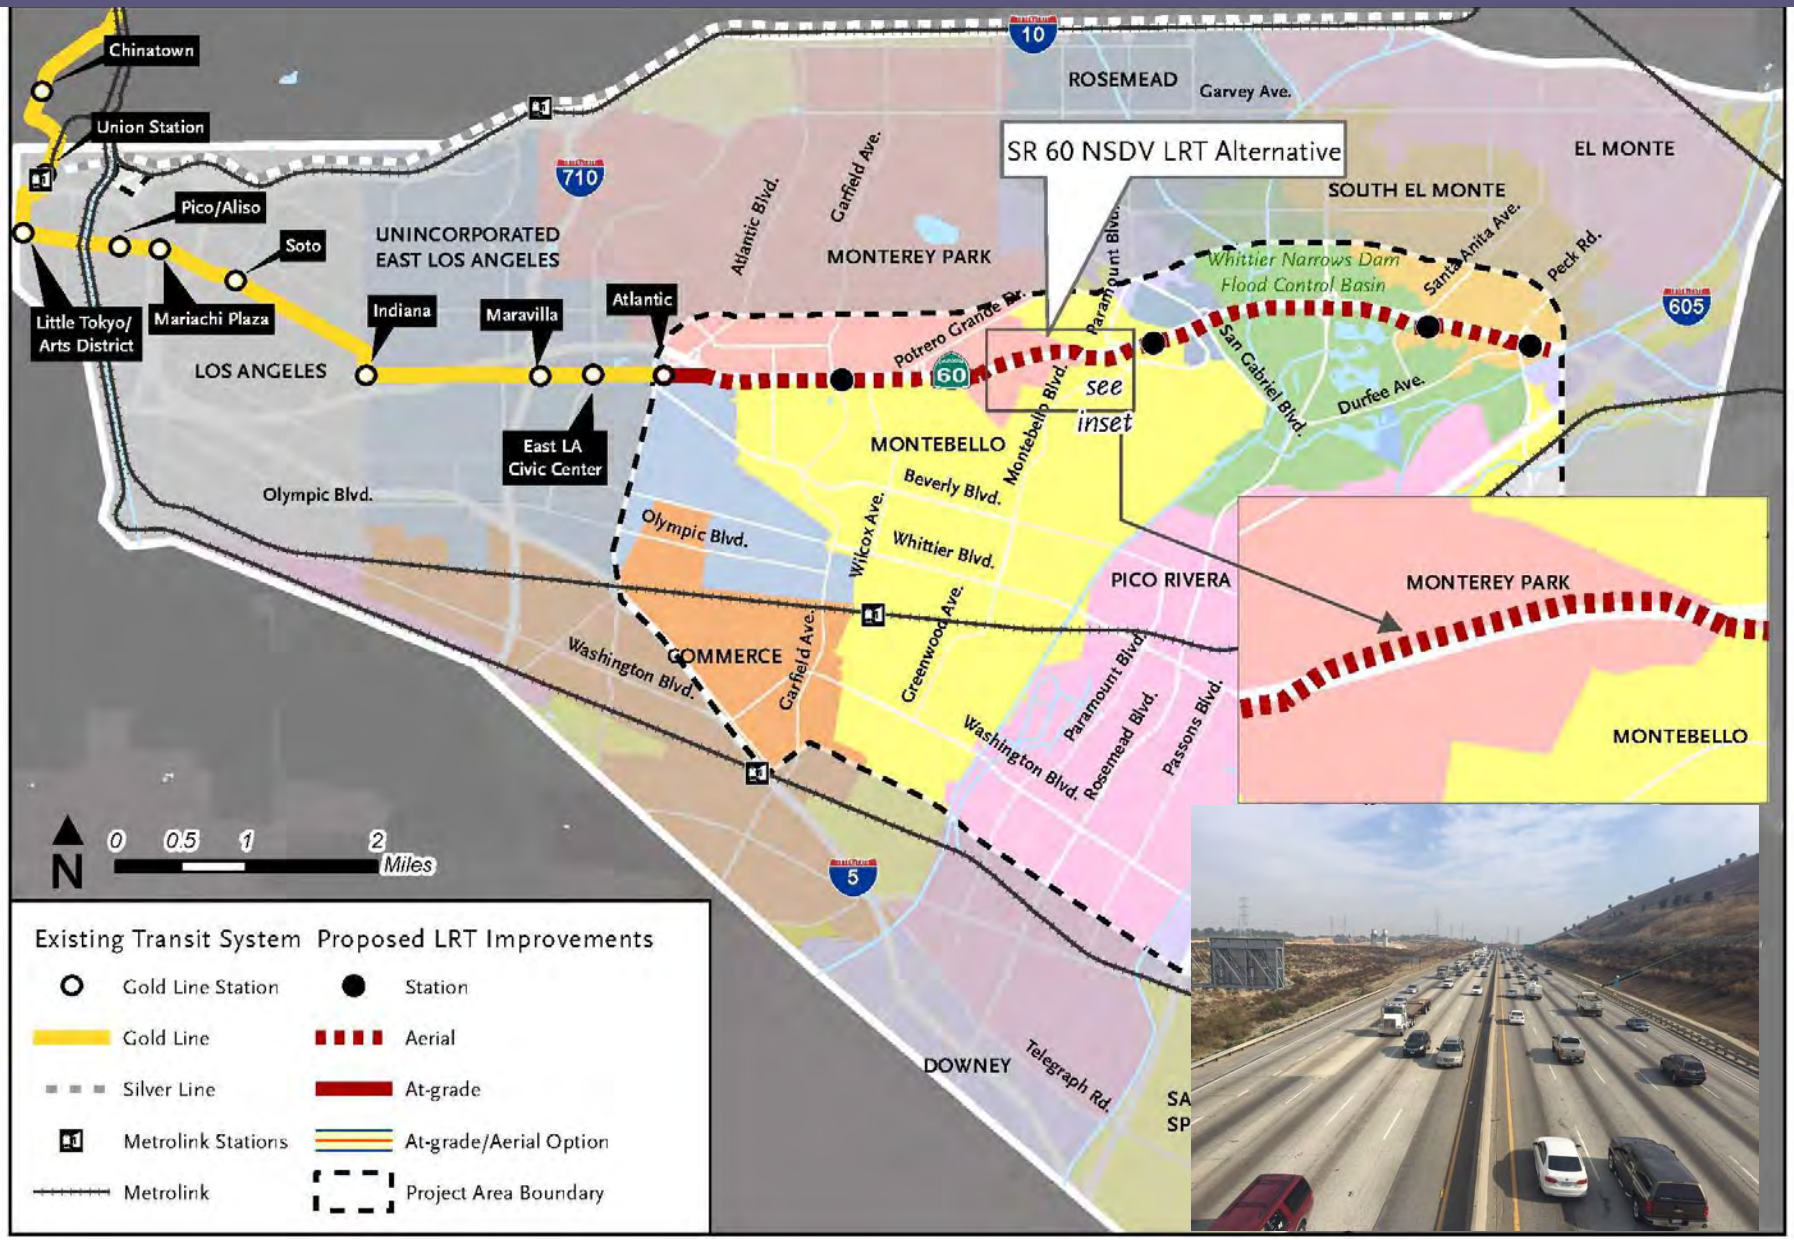
19,900 Pasajeros Diarios (2035)

Eastside Fase 2 - Presupuesto



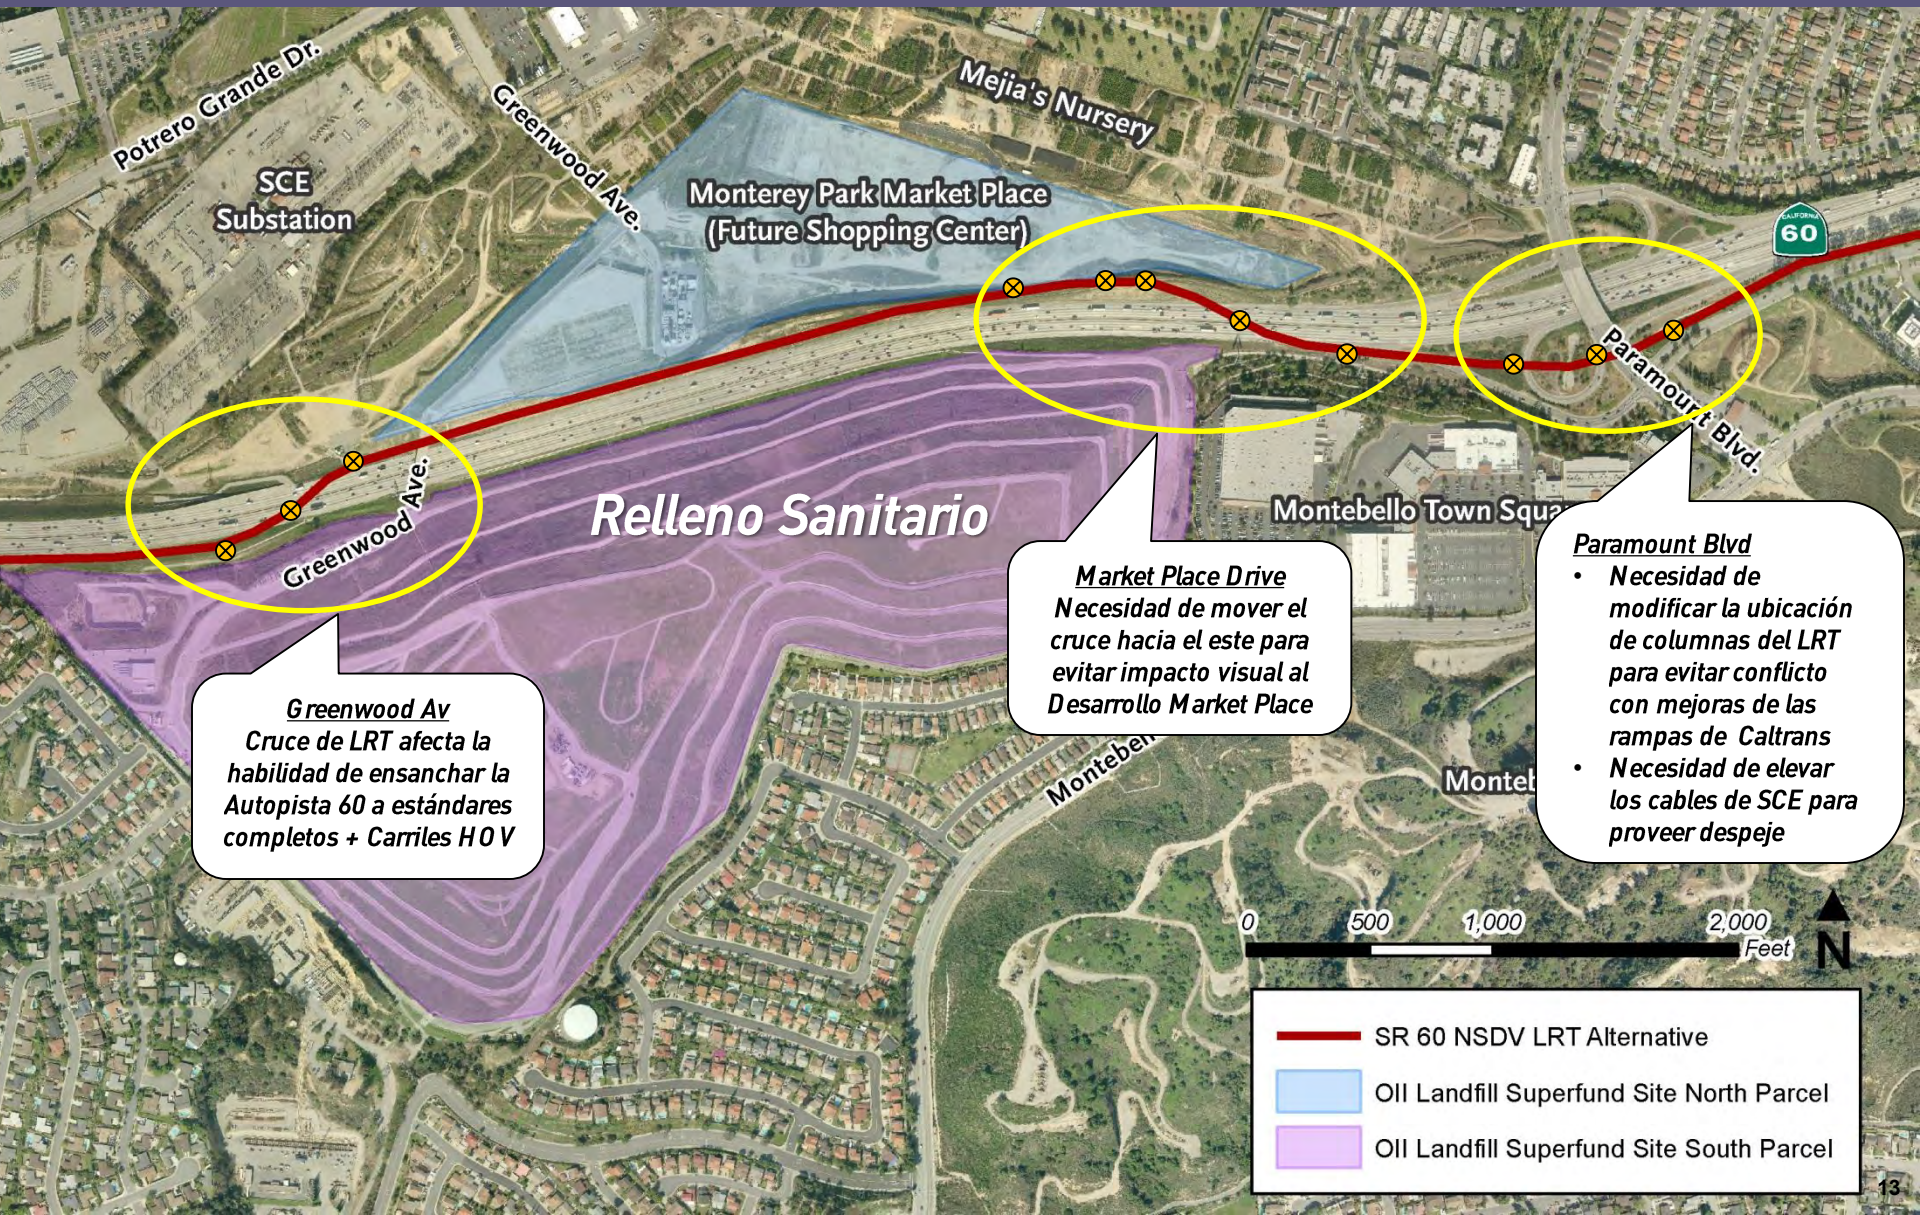
LRTP: $2.4 Billones, Fecha de entrega 2035

Medida R: $1.27 Billones (2008$)



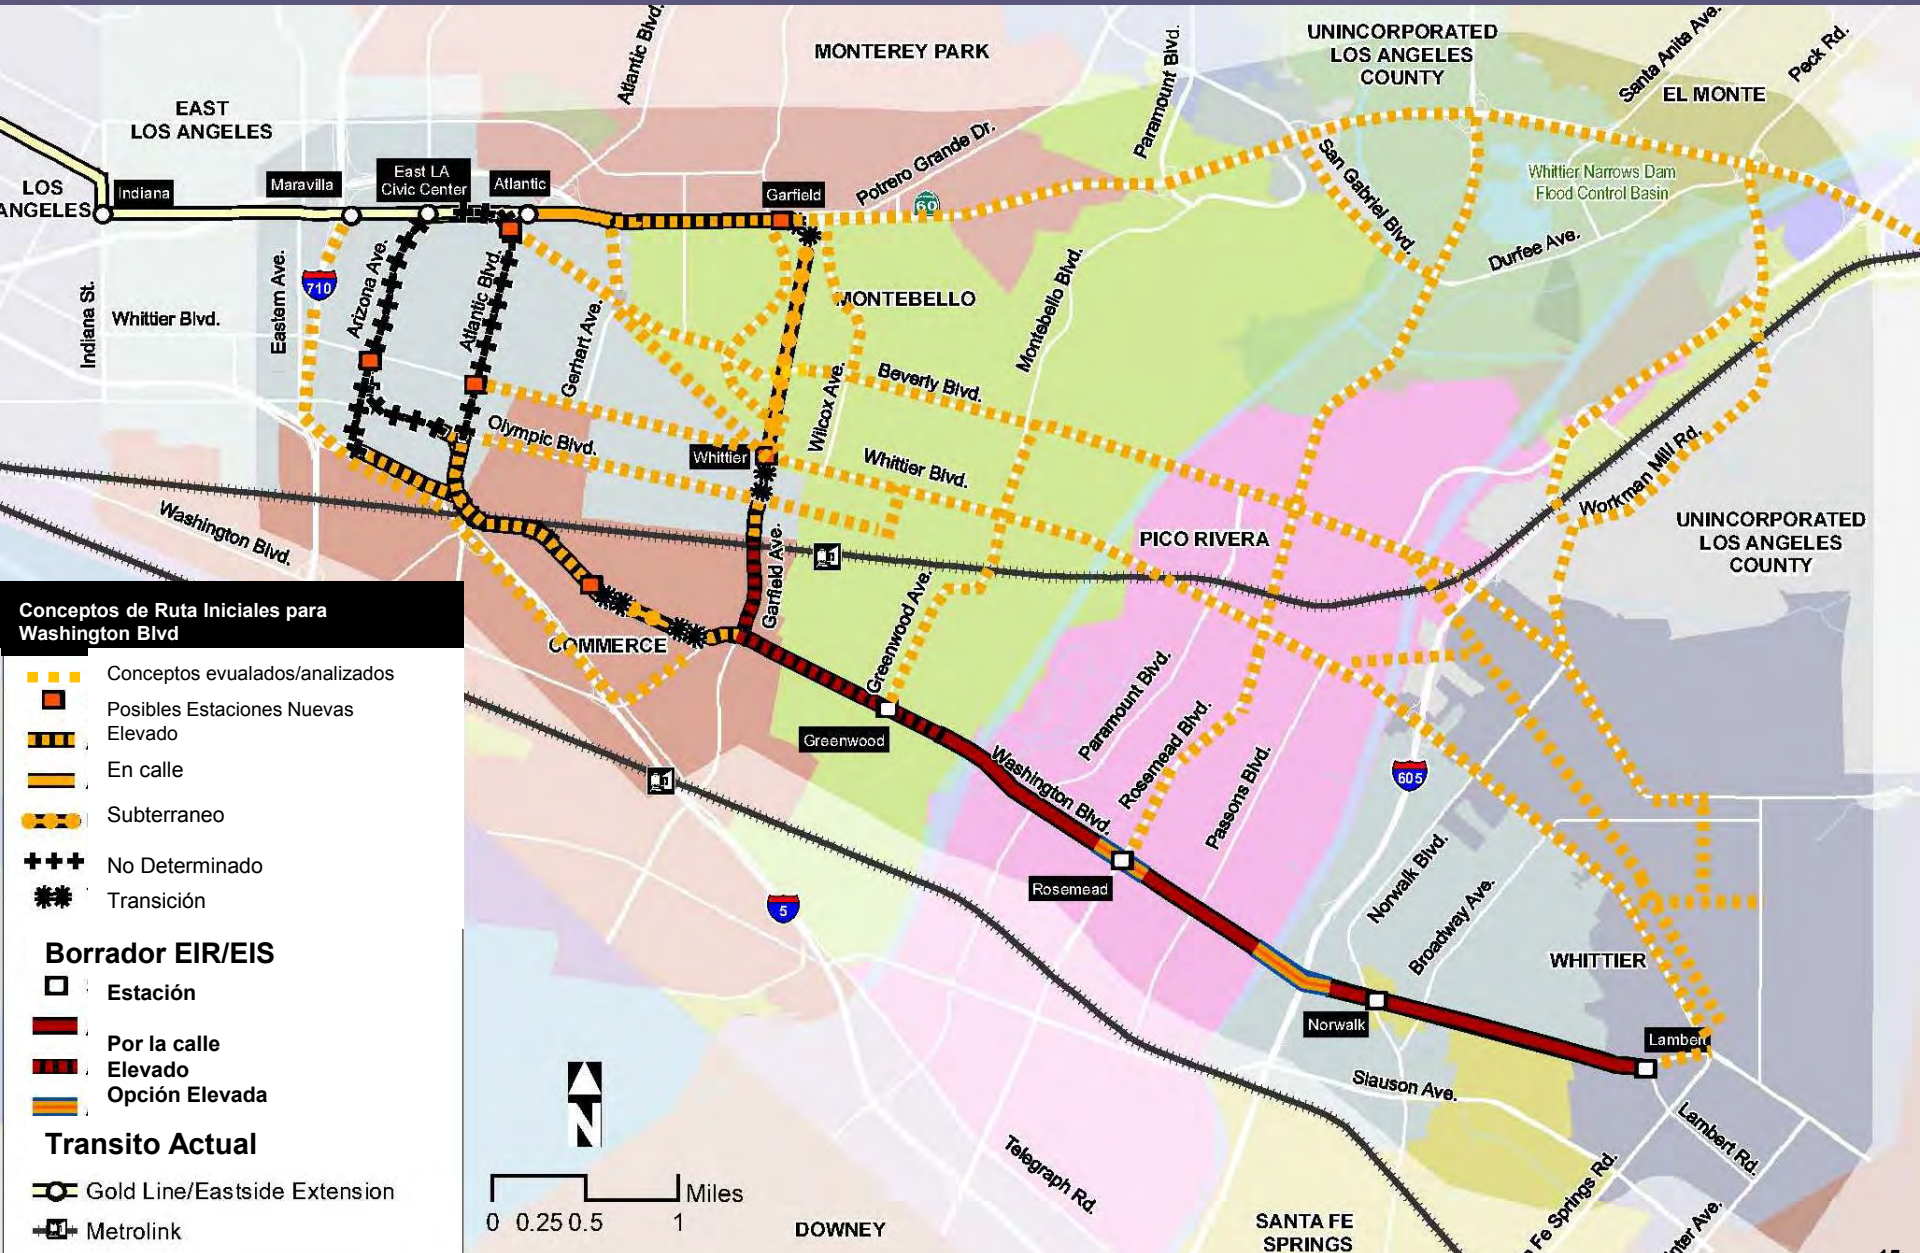
Acción de la Mesa Directiva, Metro (Nov 2014)

- ***Continuar con la opción de la Alternativa de Variación de Diseño hacia el Lado Norte de la Ruta Estatal 60***
- ***Responder a Comentarios de Agencias de Cooperación***
  - ***Agencia de Protección Ambiental (EPA)***
  - ***Departamento de Transporte de California (Caltrans)***
  - ***Southern California Edison (SCE)***
  - ***Ejército de EE.UU. Cuerpo de Ingenieros (USACE)***
- ***Explorar la viabilidad de operar ambas alternativas***
- ***Eliminar la opción elevada en la Avenida Garfield entre Via Campo y Whittier Blvd, e identificar una nueva conexión norte-sur a Washington Blvd***



Alternativas Estudiadas en el Borrador EIS/EIR 20014

Alternativa de Variación de Diseño al lado Norte de SR-60



Segmento de Variación de Diseño en el lado Norte del SR-60

Nueva Conexión Norte-Sur a Washington Blvd

Conceptos de Ruta Potenciales a Washington Blvd

Retroalimentación de Entidades Interesadas

Corredor		Oportunidades	Retos Claves
Arizona/ Telegraph		Revitalización económica del corredor	Preservación de estacionamiento en la calle (entre 3ra y Whittier Blvd)
Atlantic		Desarrollado Orientado al Transito en Atlantic y Whittier	Impactos de Tráfico/circulación con LRT sobre la calle
Garfield (subterráneo)		Ayuda a revitalizar el sur de Montebello sobre Washington Blvd	Impactos a propiedades durante la construcción del segmento subterráneo; Impactos a línea de alcantarilla y drenaje de aguas pluviales

Análisis Inicial de Cruces a Nivel

Mapa de Localidades de Estudio

- Se colecto nuevos datos de tráfico para 33 Intersecciones
- Se observaron:
  - Vías de acceso y condiciones de acceso
  - Cruces escolares (6)
  - Posibles problemas de visibilidad
  - Impactos de fila de tráfico (si los hay)
- Se desarrollaron datos futuros de tráfico (año 2040)
- Resultados iniciales :
  - Más tráfico en Atlantic Bl (horas pico y mediodía)
  - Análisis de seguridad y operaciones adicionales se recomiendan para 8 ubicaciones (25%)

Alternativa Washington Blvd – ¿Q ue Sigue?

- ***Análisis de paso a nivel***
- ***Emplazamiento y Diseño de Portales de Tunel (si aplicable)***
- ***Planificación de Estaciones***
- ***Impactos de Derecho de Paso***
- ***Investigaciones de Utilidades***
- ***Estudios de ingeniería en apoyo de nuevos estimados de costo***

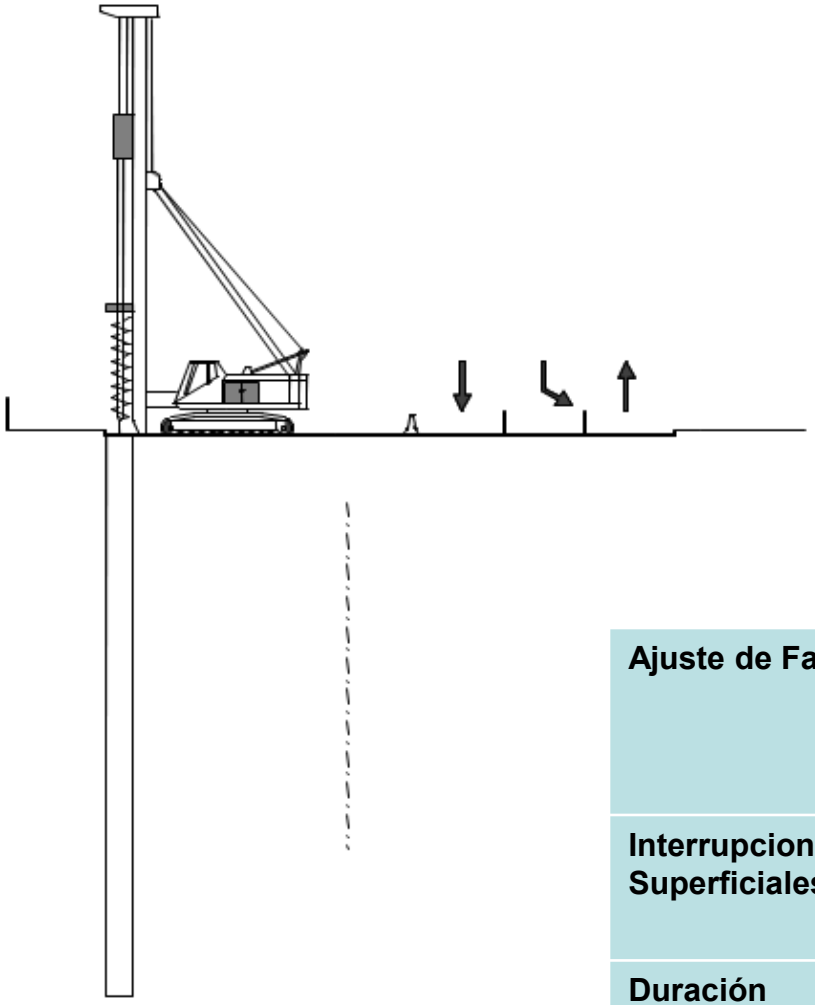
Dos Métodos Primarios de Construcción Subterránea

Corte y Cubierta

definición: excavación de túnel poco profundo de la superficie, luego se cubre

Construcción de Corte y Cubierta (Mariachi Plaza)

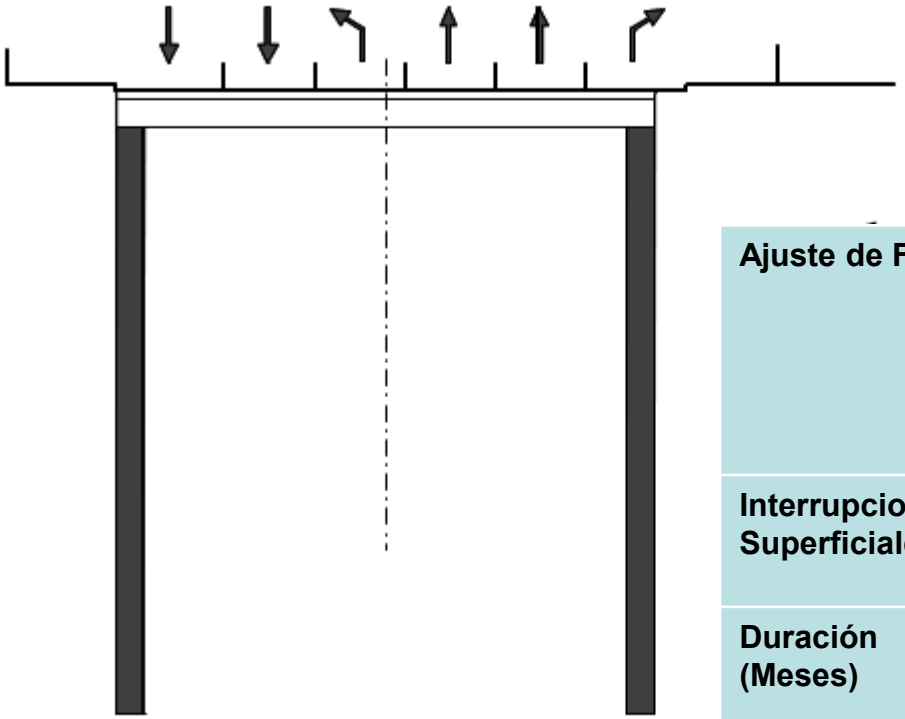
Túnel Excavado



definición: excavación de túnel profundo a través de una maquina perforadora

Maquina de Excavación de Túnel (TBM)

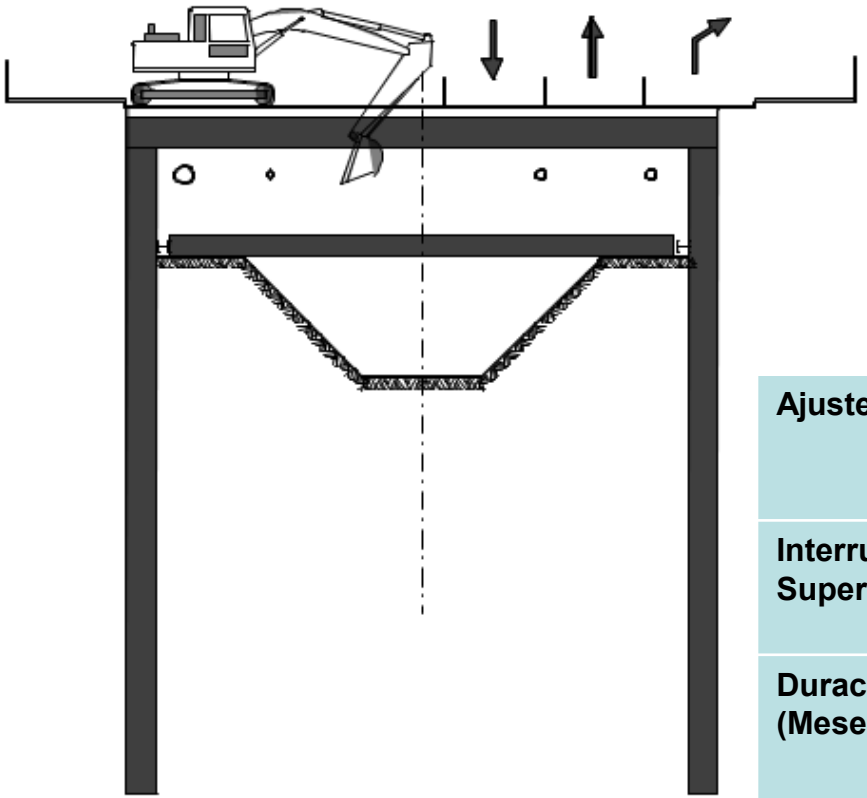
Etapa 1 – Instalación de Pilotaje Soldado



Corte y Cubierta

Ajuste de Fase	Implementar Control de Trafico Perforación de Pilotaje Soldado
Interrupciones Superficiales	Potencial de cierres parciales o completos de calles
Duración (Meses)	3-4 meses

Etapa 2 – Instalación de Cubiertas

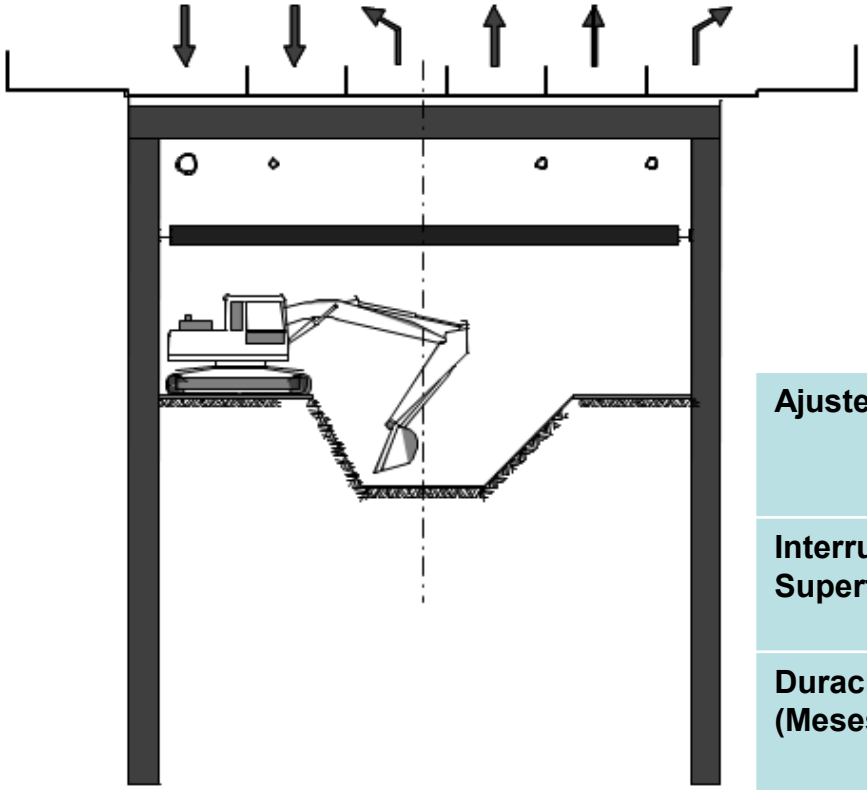


Corte y Cubierta

Ajuste de Fase	• Cerrar Calle • Excavar a 12’ bajo de superficie • Instalar vigas de la cubierta • Apoyo de utilidades • Instalar la tarima
Interrupciones Superficiales	Potencial de cerrar la calle completamente
Duración (Meses)	2-3 meses

Etapa 3 – Excavar Estación de la Superficie

Corte y Cubierta

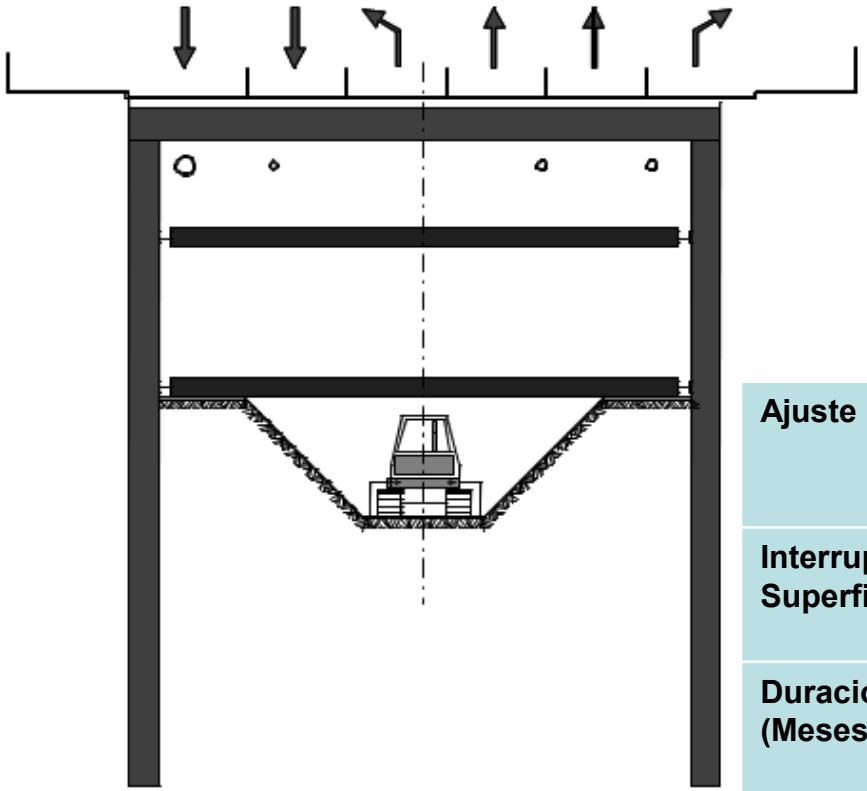


Ajuste de Fase	• Desvío del tráfico • Excavar zanja • Instalar riostras
Interrupciones Superficiales	Potencial de cerrar calles parcial- o completamente
Duración (Meses)	2-3 meses

Metro

Etapa 4 – Excavar Estaciones bajo la Superficie

Corte y Cubierta

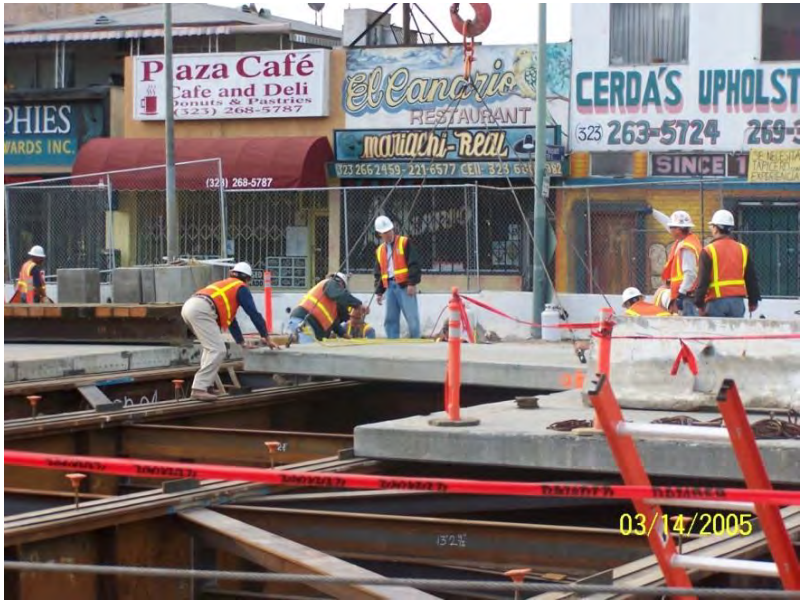


Ajuste de Fase	• Excavar bajo las riostras de mas arriba • Instalar revestimiento
Interrupciones Superficiales	Cierre de calles parcialmente en ocasiones
Duración (Meses)	6 meses

Metro

Etapa 5 – Excavar Estación a lo mas profundo de la Superficie

Corte y Cubierta



Ajuste de Fase	• Instalar riostras • Excavar riostras de medio • Instalar el revestimiento
Interrupciones Superficiales	Cierres de calle parcialmente en ocasiones
Duración (Meses)	6 months

Metro

Construcción de Corte y Cubierta (Mariachi Plaza)

Pozo de lanzamiento de TBM en la Gold Line de Metro en Little Tokyo

TBM

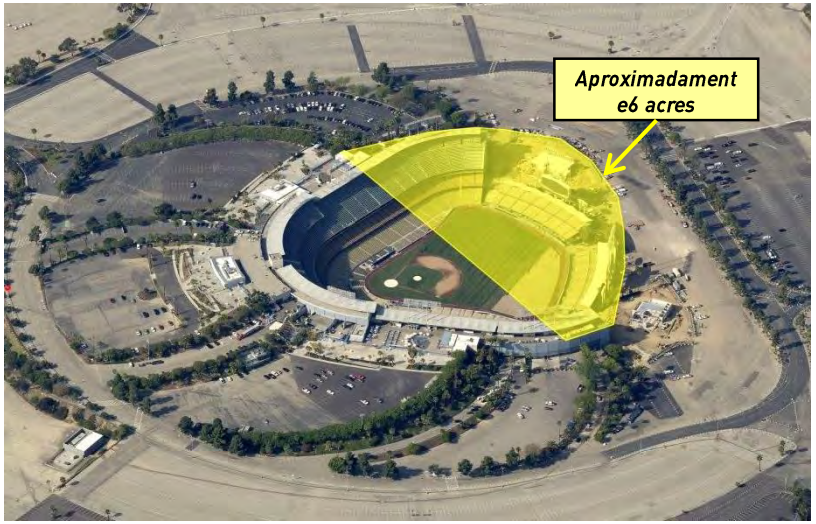
Pasos para poner en marcha la maquina de excavación (TBM):

1. Espacio Necesario (4-6 acres)
2. Demolición y Reubicación de utilidades
3. Excavar Pozo de Lanzamiento
4. Instalar pilataje, riostras y cubiertas
5. Bajar TBM a posición

Sitio de Lanzamiento para la TBM

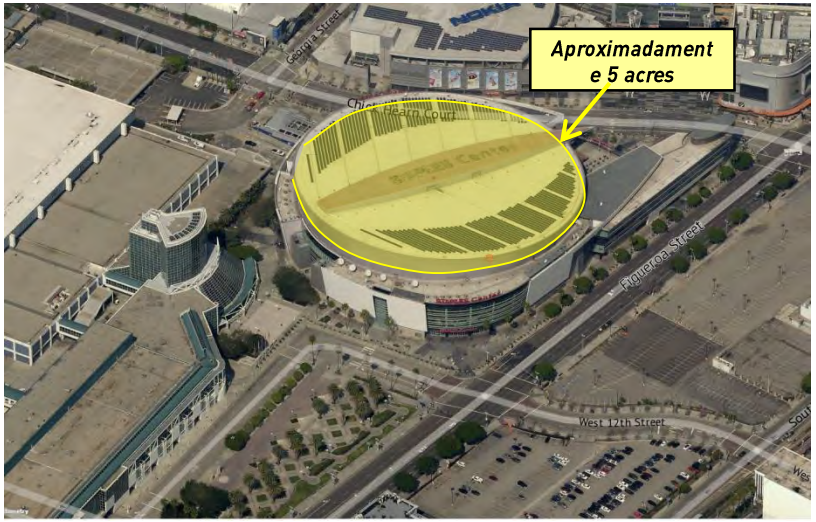
Maquina para Excavación de Túnel para Metro Crenshaw/LAX

Sección transversal de sitio de Lanzamiento con Maquina de Excavación de Túnel



- *Corte y Cubierta de Construcción en la Localidad de Lanzamiento*

Duración de construcción de tunel Del Proyecto de Transito Connector Regional



Actividad	**Duración (Meses)**
Pre-construcción	4-6
Preparación de sitio	12-18
Corte y cubierta en el Portal y la Estación	24-48
Calle 2da Túnel TBM	24-48

Espacio Necesario para Lanzar a TBM (4-6 acres)

Estadio de Dodgers ~12 acres

Centro de Staples ~ 5.5 acres

4-6 campos del fútbol

Corte y Cubierta vs. TBM: Ventajas y Desventajas

Método de Excavación	Ventajas	Desventajas
Corte y Cubierta 	• Menos impactos de ruido, vibración y visual despues de instalar plataforma temporal (comparado a construcción a nivel de calle)	• Adquisición de mayor derecho de paso • Mayor interrupción de tráfico a lo largo de la alineación por tiempo extendido • Desviación de trafico a calles paralelas • Interrupción de acceso a residencias y negocios a lo largo de alineación por tiempo extendido • Impacto de ruido y visual hasta que se instalen las cubiertas temporales
TBM  *Tipicamente usado para segmento de una milla o más largo*	• Menos actividad de construcción en superficie • Evita las utilidades más típicas • Puede reducir el tiempo de construcción	• Adquisición grande de derecho de paso es necesaria para la área de lanzamiento y extracción de la TBM • Interrupciones similares para corte y cubierta pero sólo en las areas de estaciónes y en el area de lanzamiento/extracción de la TBM de corto-plazo

Discusión Interactiva

- ***Unirse a un grupo de discusión***
- ***Nombrar a un portavoz del grupo***
- ***Compartir lo que ustedes discutieron***
- ***Comentarios y preguntas***

Temas para Discusión

- ***¿Basado en lo qué ha oído, qué rutas son las más prometedores? ¿Por qué?***
- ***¿Dónde deberían estar localizadas las estaciones? ¿Por qué?***
- ***¿Qué necesitamos saber?***

Siguientes Pasos para el Estudio Técnico

- ❑ *Continuar reuniones comunitarias para obtener retroalimentación*
- ❑ *Incorporar los comentarios en la planificación del proyecto*
- ❑ *Continuar el análisis técnico*
- ❑ *Presentar los resultados del estudio técnico al la Mesa Directiva de Metro (principios de 2017)*

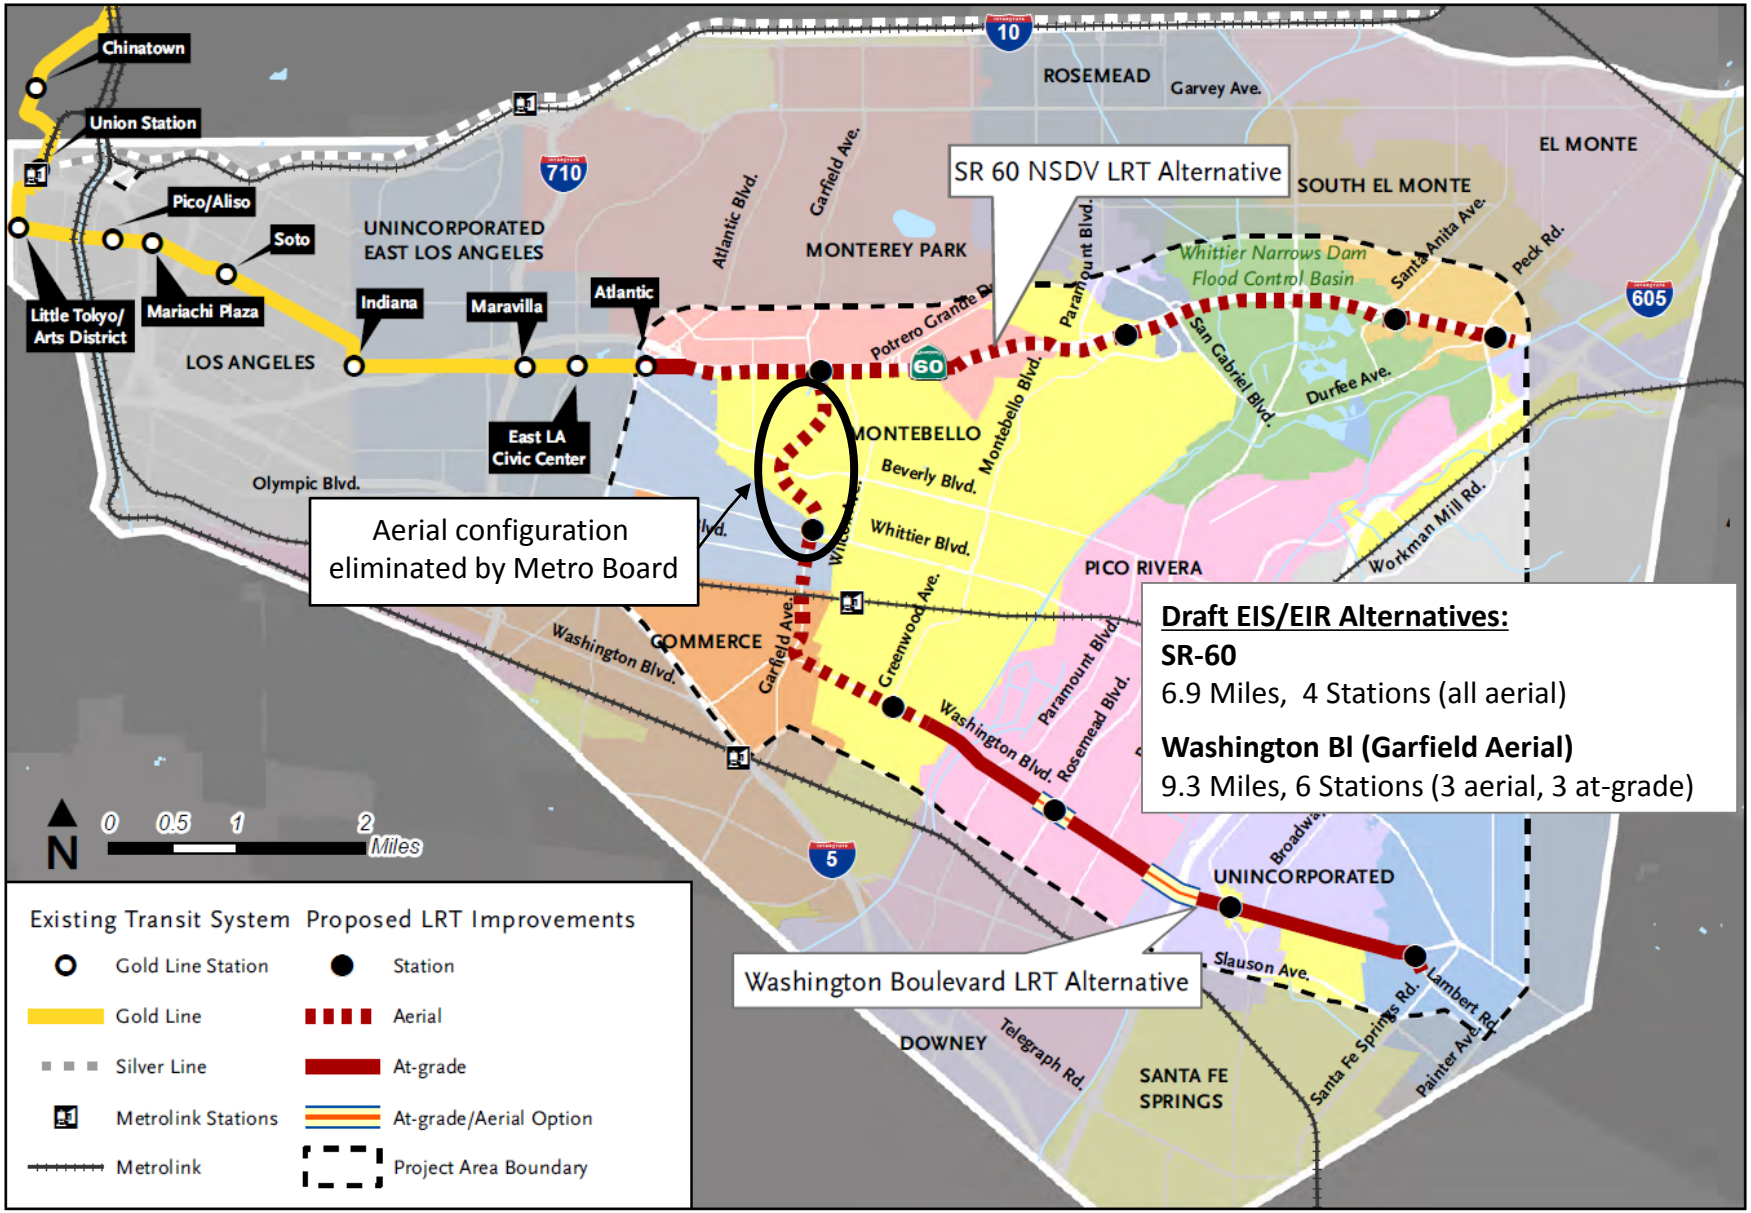
Preguntas y Respuestas

Metro

Eastside Transit Corridor Phase 2

Technical Study Update



Community Outreach Meeting – February 2017

Purpose of Tonight's Meeting

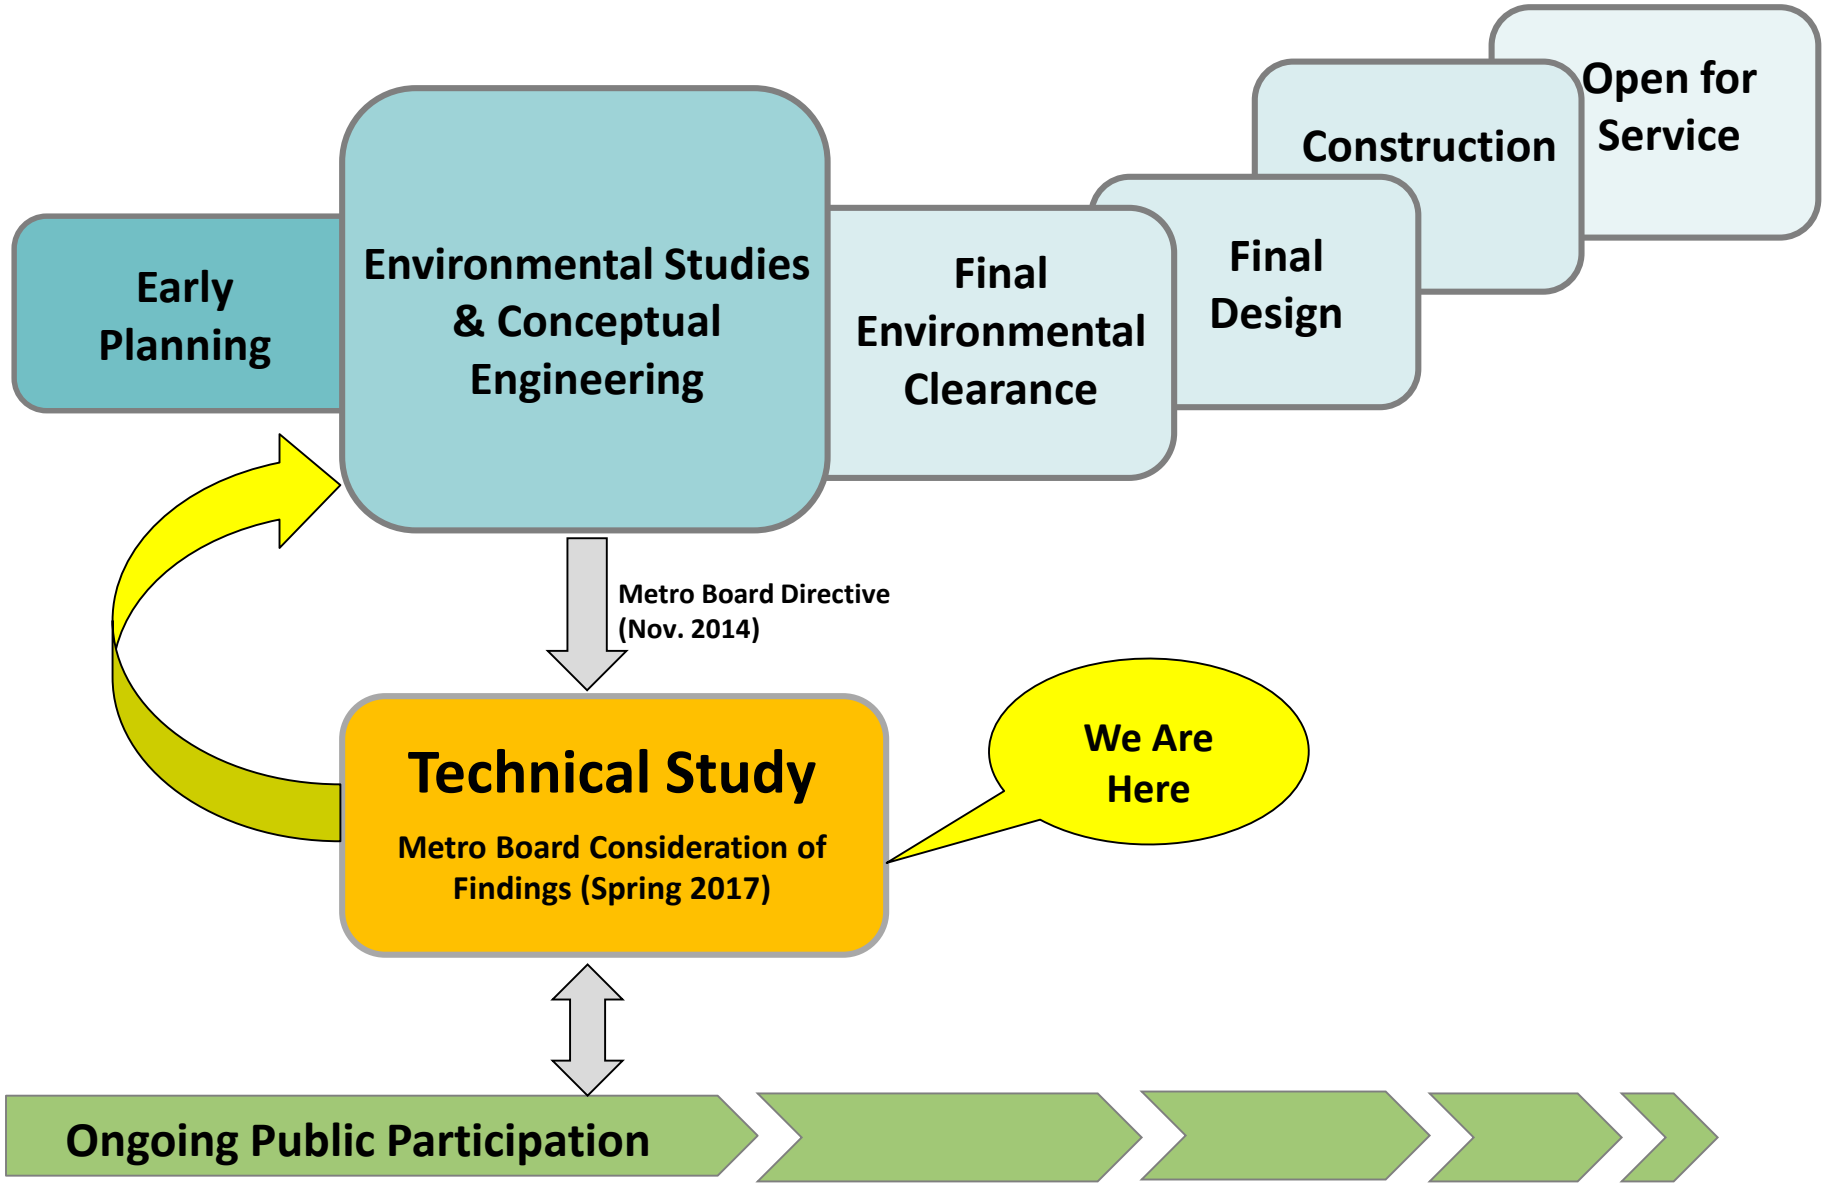
- Recap of Board motion (2014) and technical study process
- Provide update on SR-60 Alternative technical investigations
- Share results of the Washington Blvd. Alternative Routing Concepts
- Receive feedback from you
- Discuss next steps

Alternatives Studied in 2014 Draft EIS/EIR

Draft EIS/EIR Alternatives:

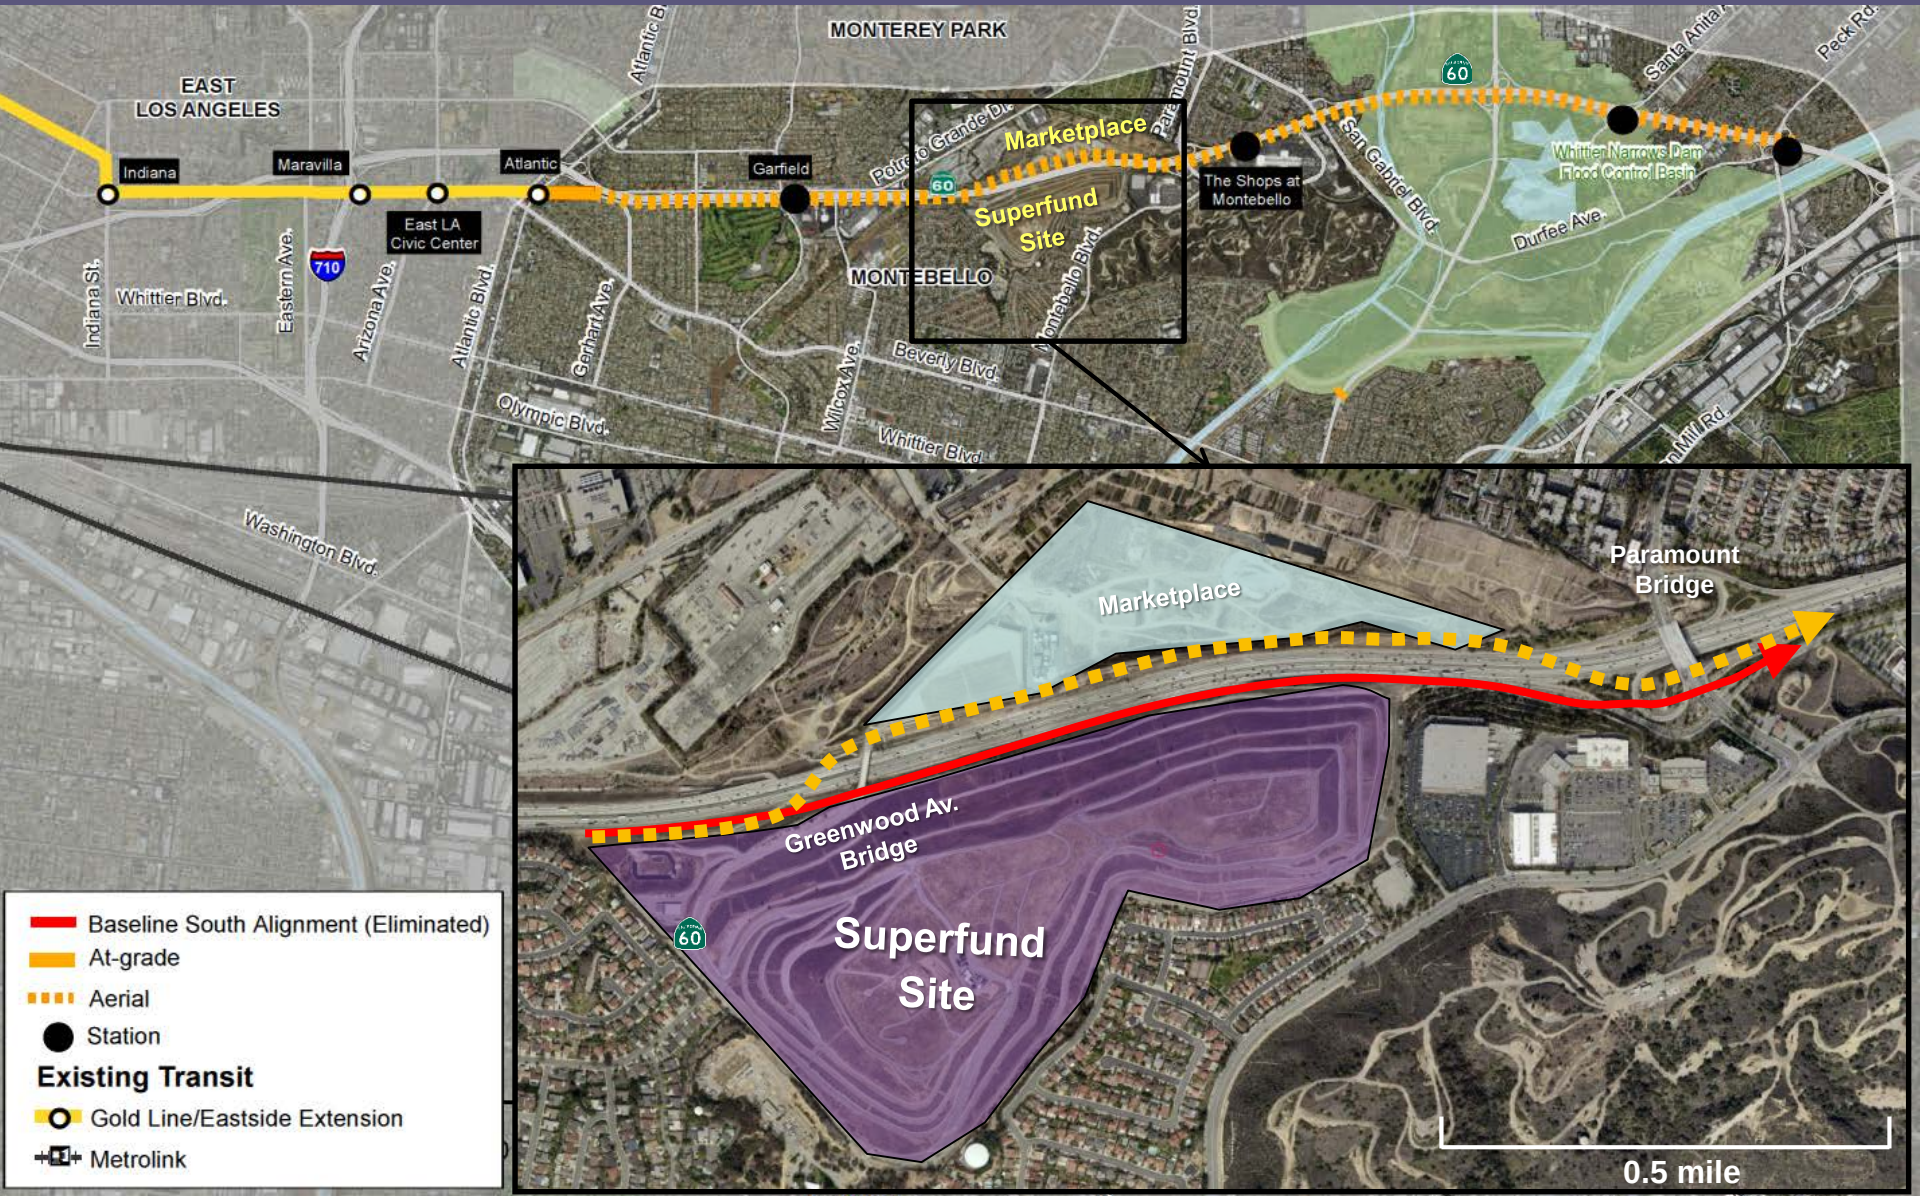
SR-60

6.9 Miles, 4 Stations (all aerial)



Washington Bl (Garfield Aerial)

9.3 Miles, 6 Stations (3 aerial, 3 at-grade)

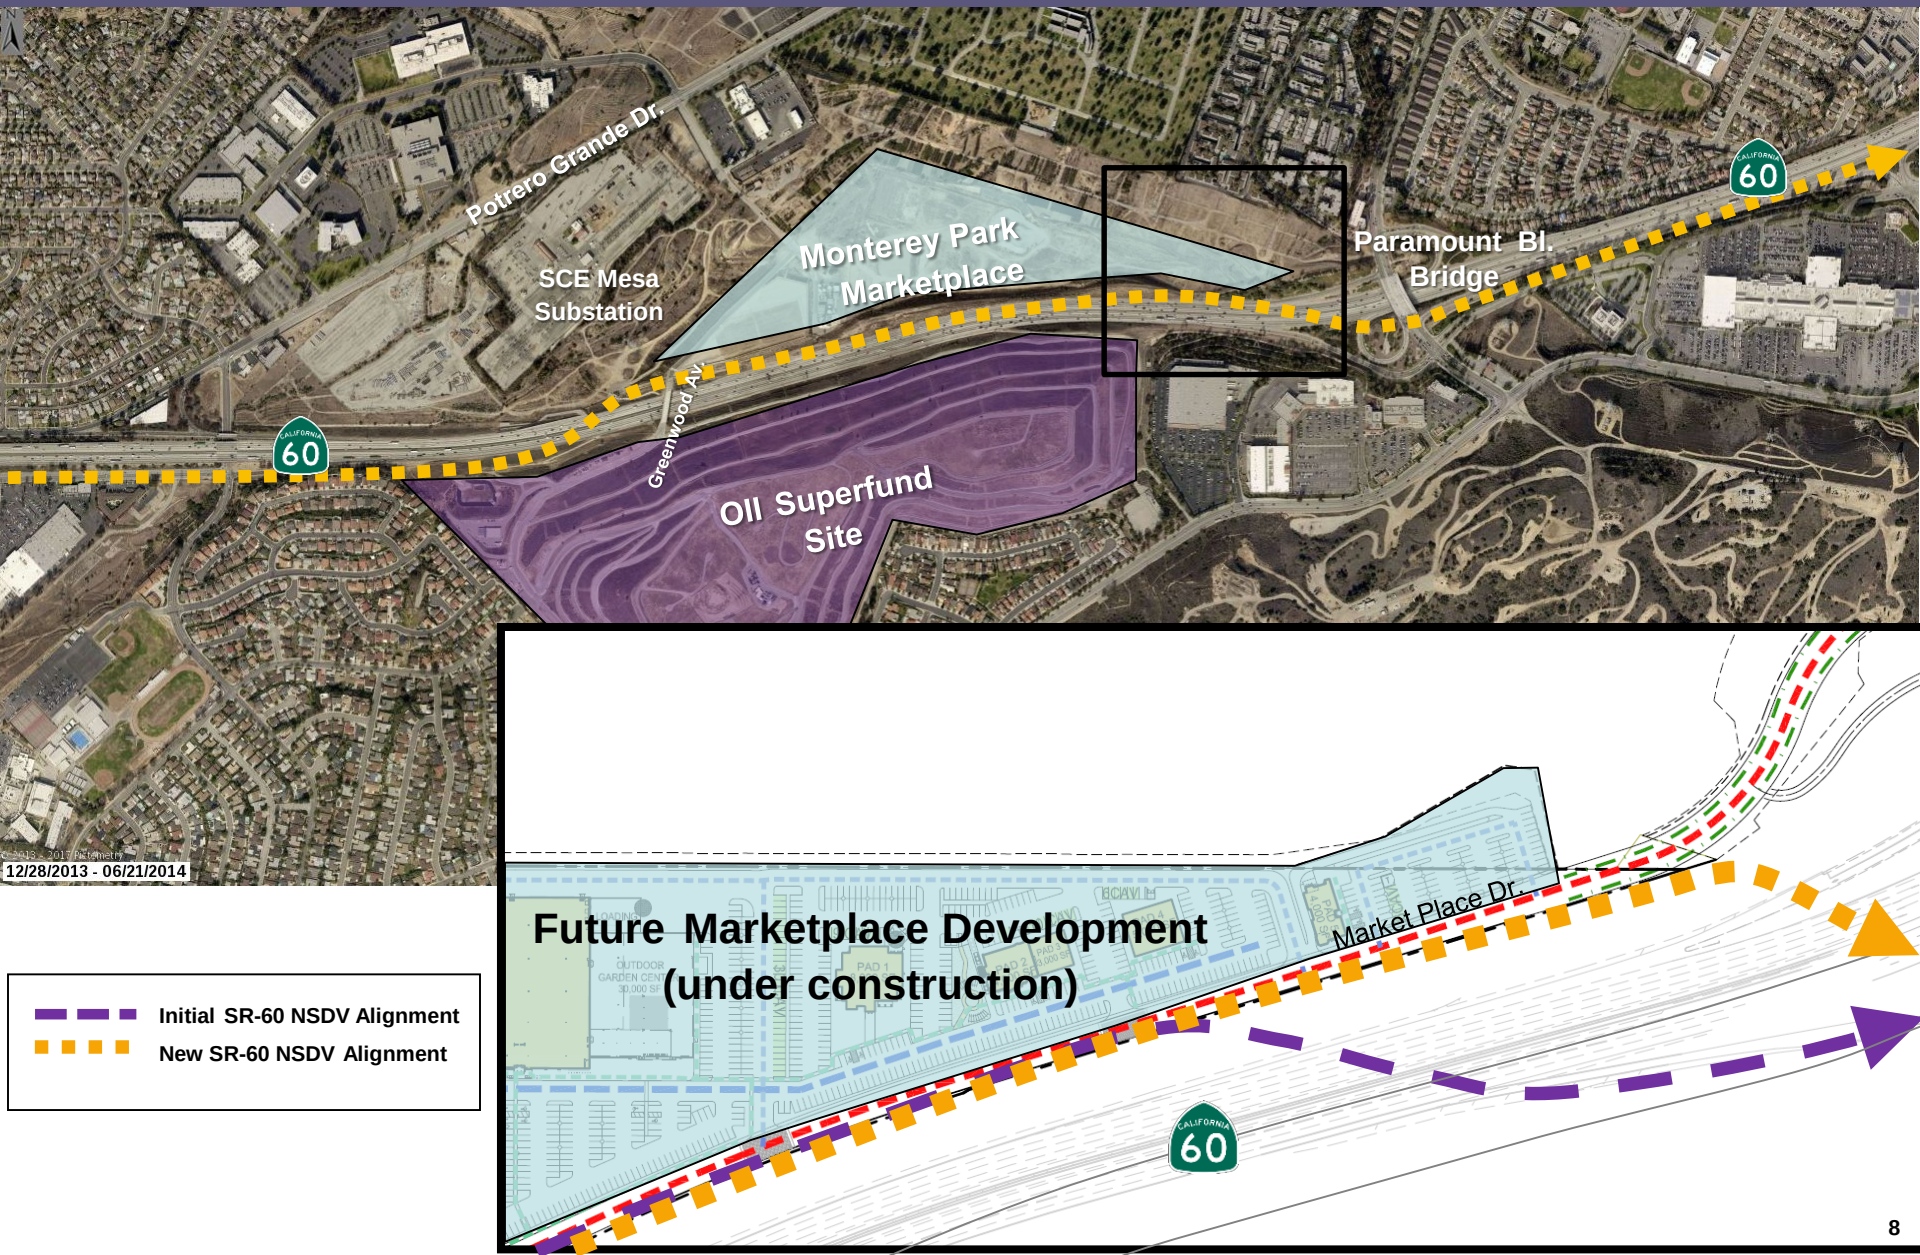


Board Motion

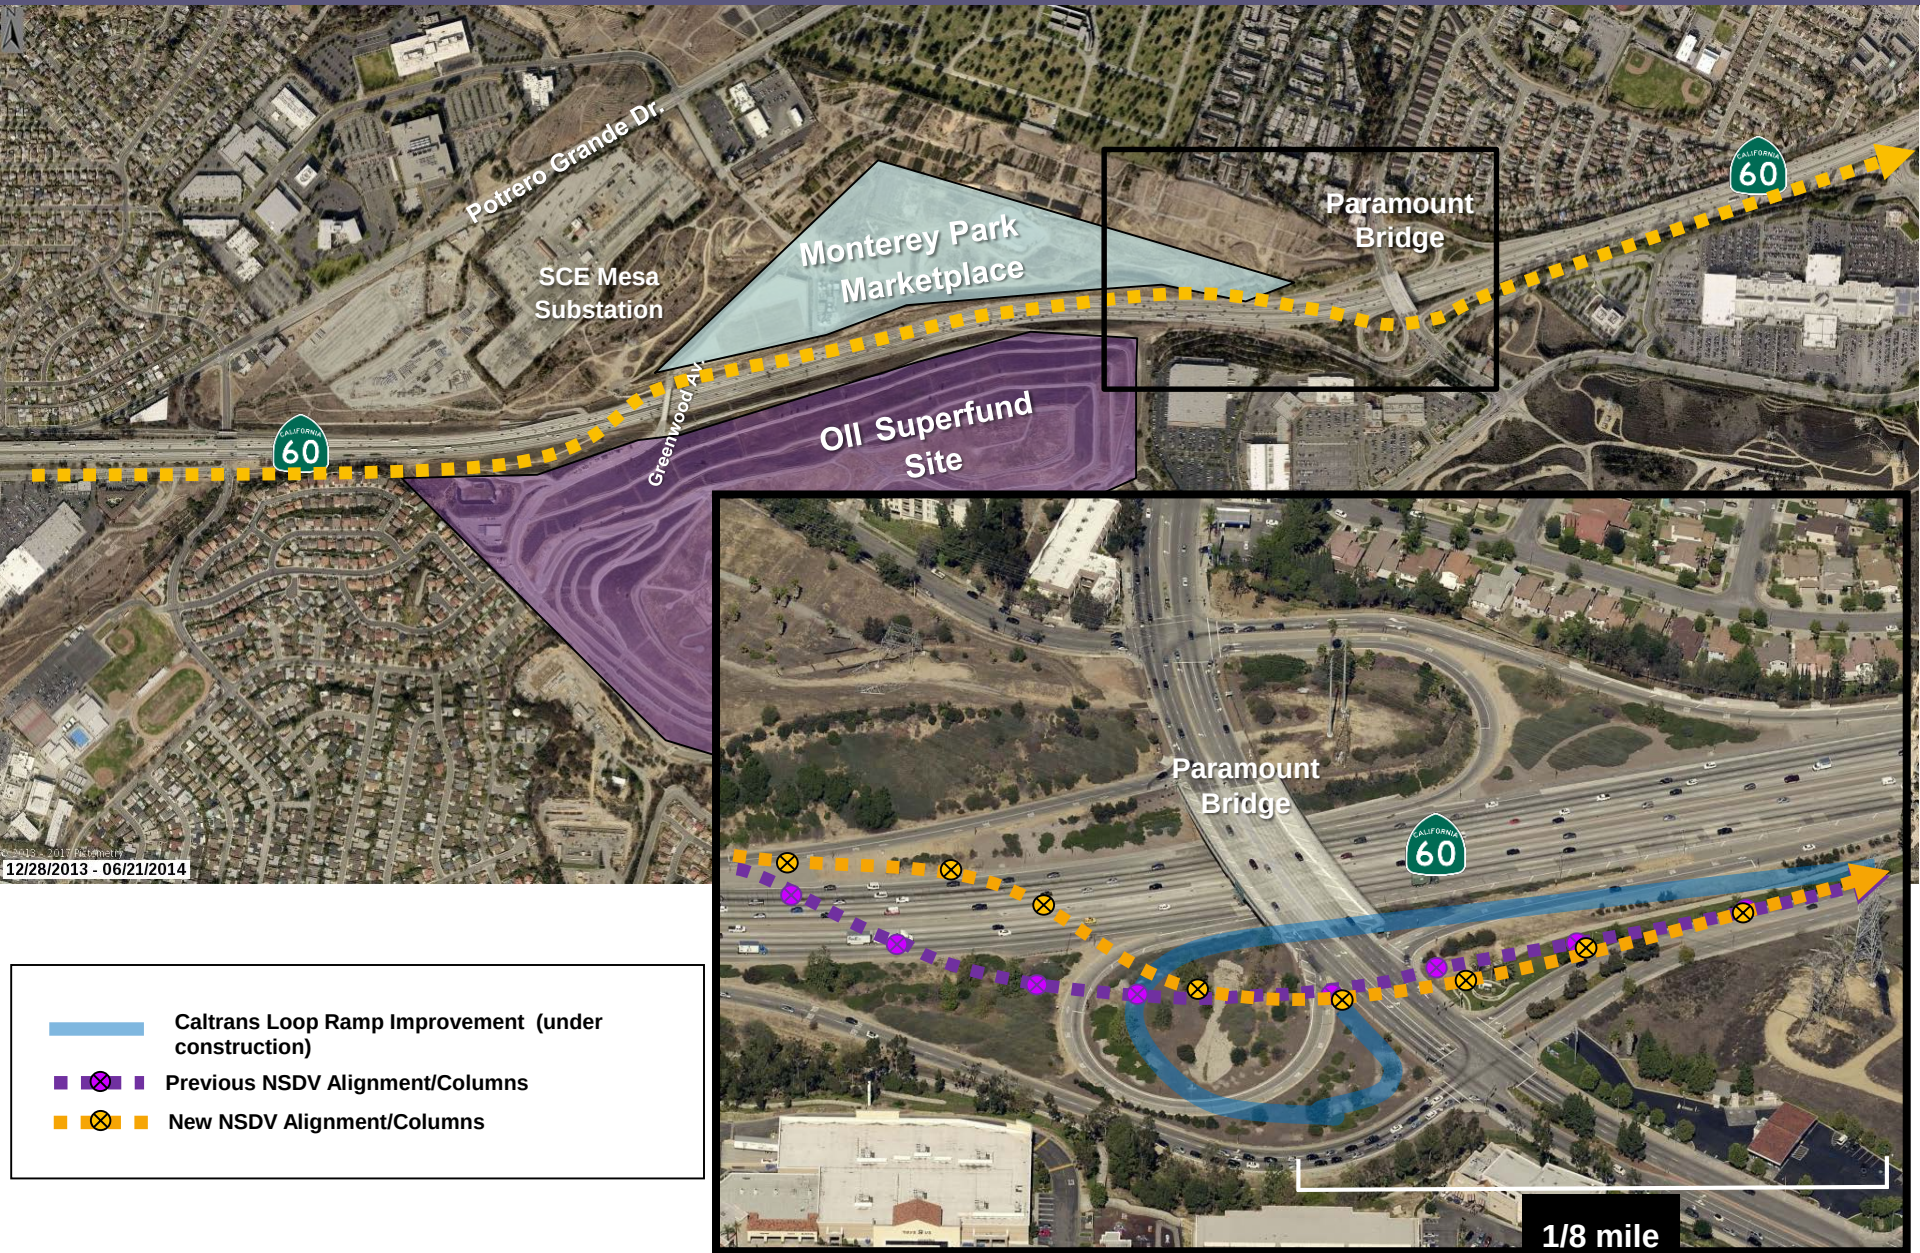
- **Nov 2014: Board-directed Technical Study to:**
  - ✓ **Address Agency Comments**
    - US Environmental Protection Agency (USEPA)
    - US Army Corps of Engineers (USACE)
    - California Department of Transportation (Caltrans)
    - California Department of Fish and Wildlife (CDFW)
    - Southern California Edison (SCE)
  - ✓ **Eliminate Aerial on Garfield Av between Via Campo and Whittier Bl.**
    - Draft EIS/EIR eliminated at-grade
  - ✓ **Identify a New North/South Connection to Washington Bl.**
  - ✓ **Explore Feasibility of Operating Both SR-60 and Washington Bl. Alternatives**

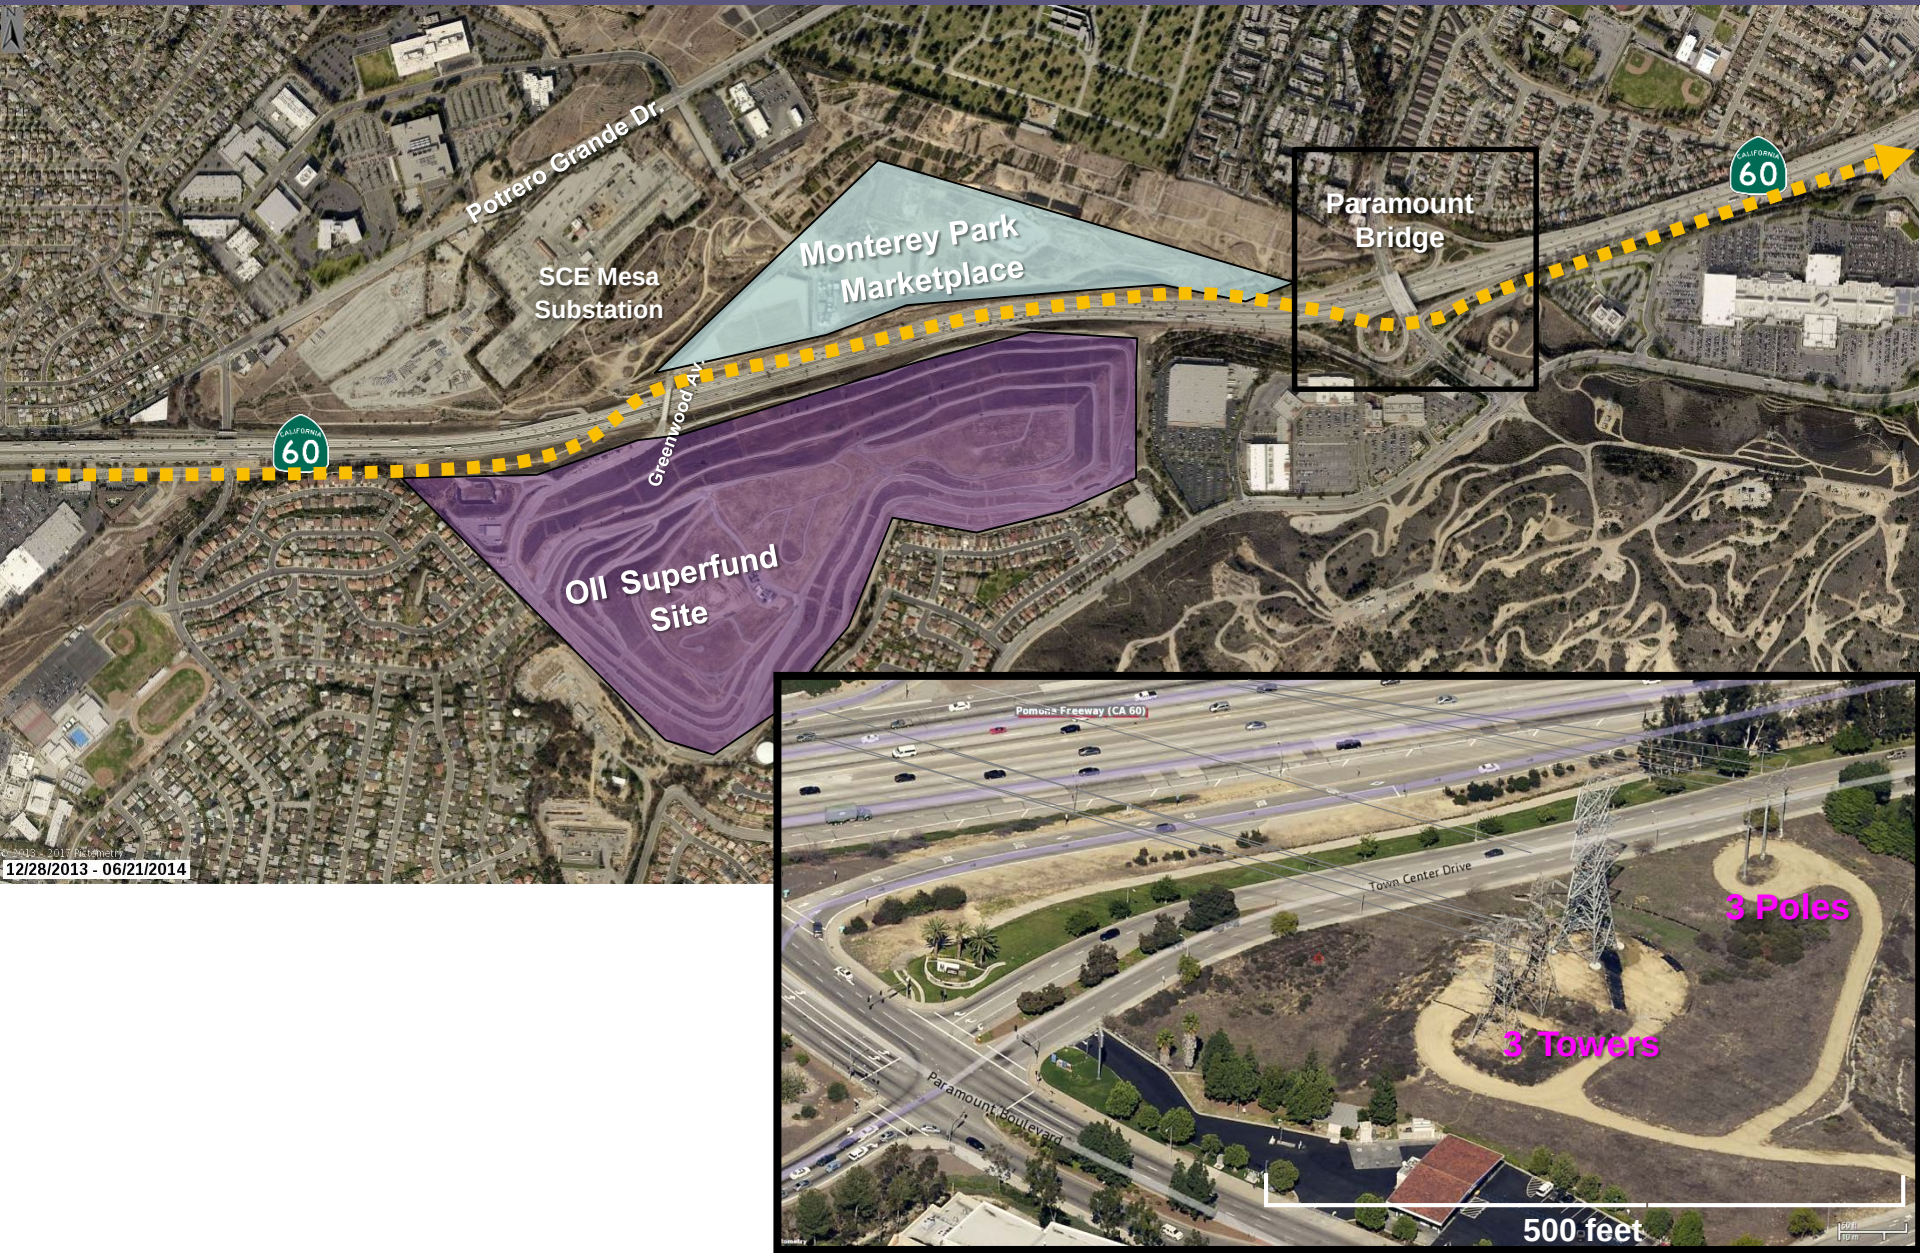
Phases of Project Development

SR-60 North Side Design Variation (NSDV) Alternative

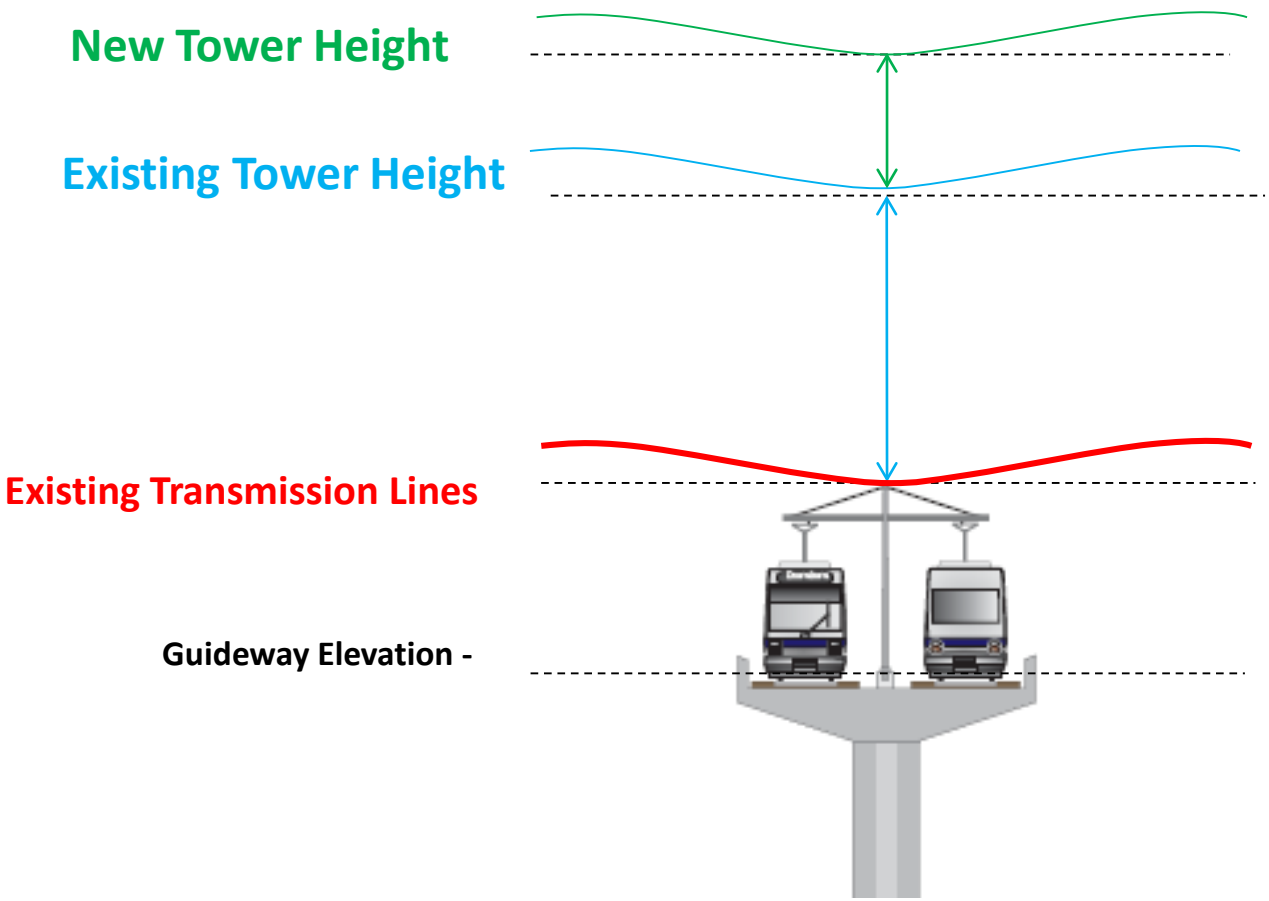


Caltrans: SR-60 NSDV flyover west of Greenwood Ave affects the ability to widen SR-60 to full standard + HOV lanes

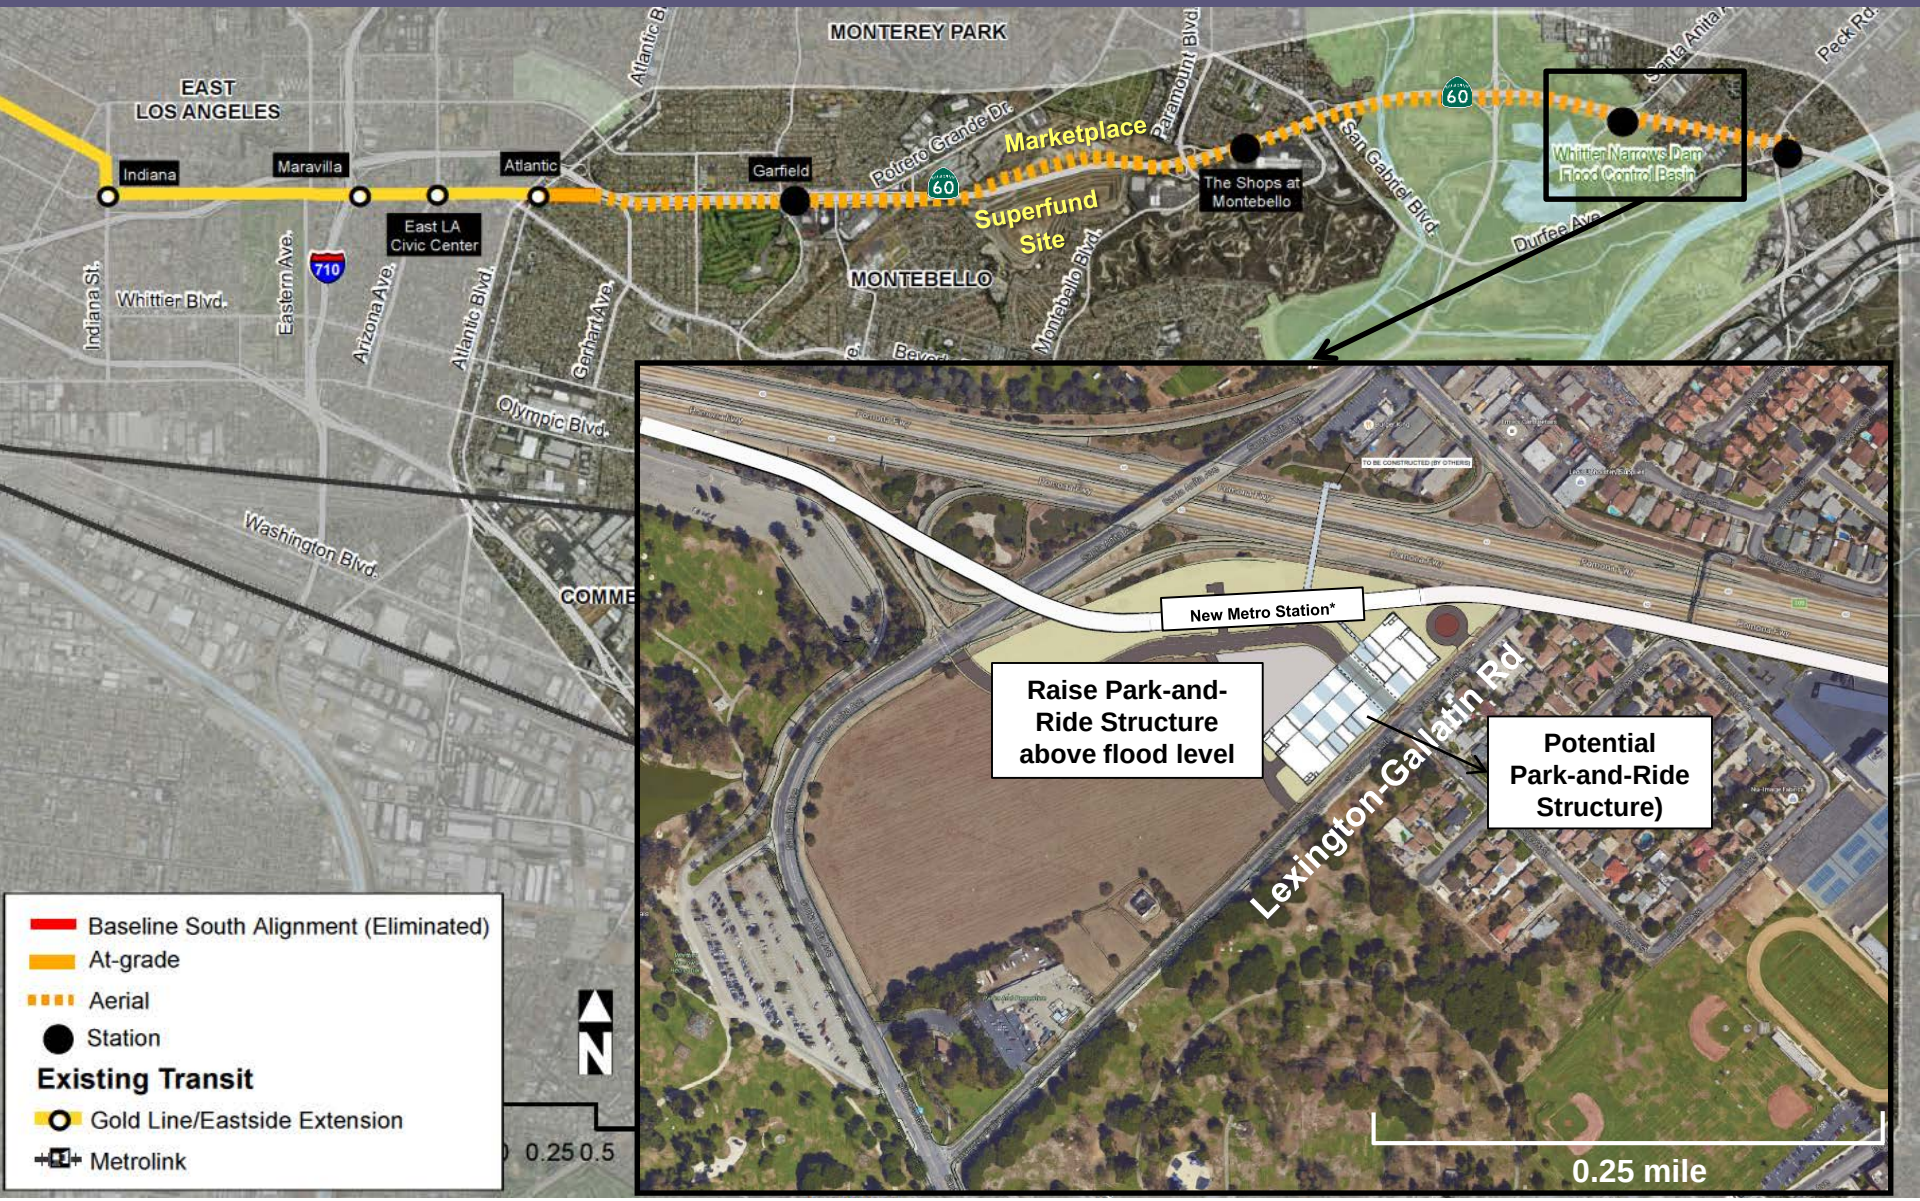




Shifted SR-60 NSDV Flyover Further East and Lowered Grade Profile To Minimize Visual Impact to Marketplace Development

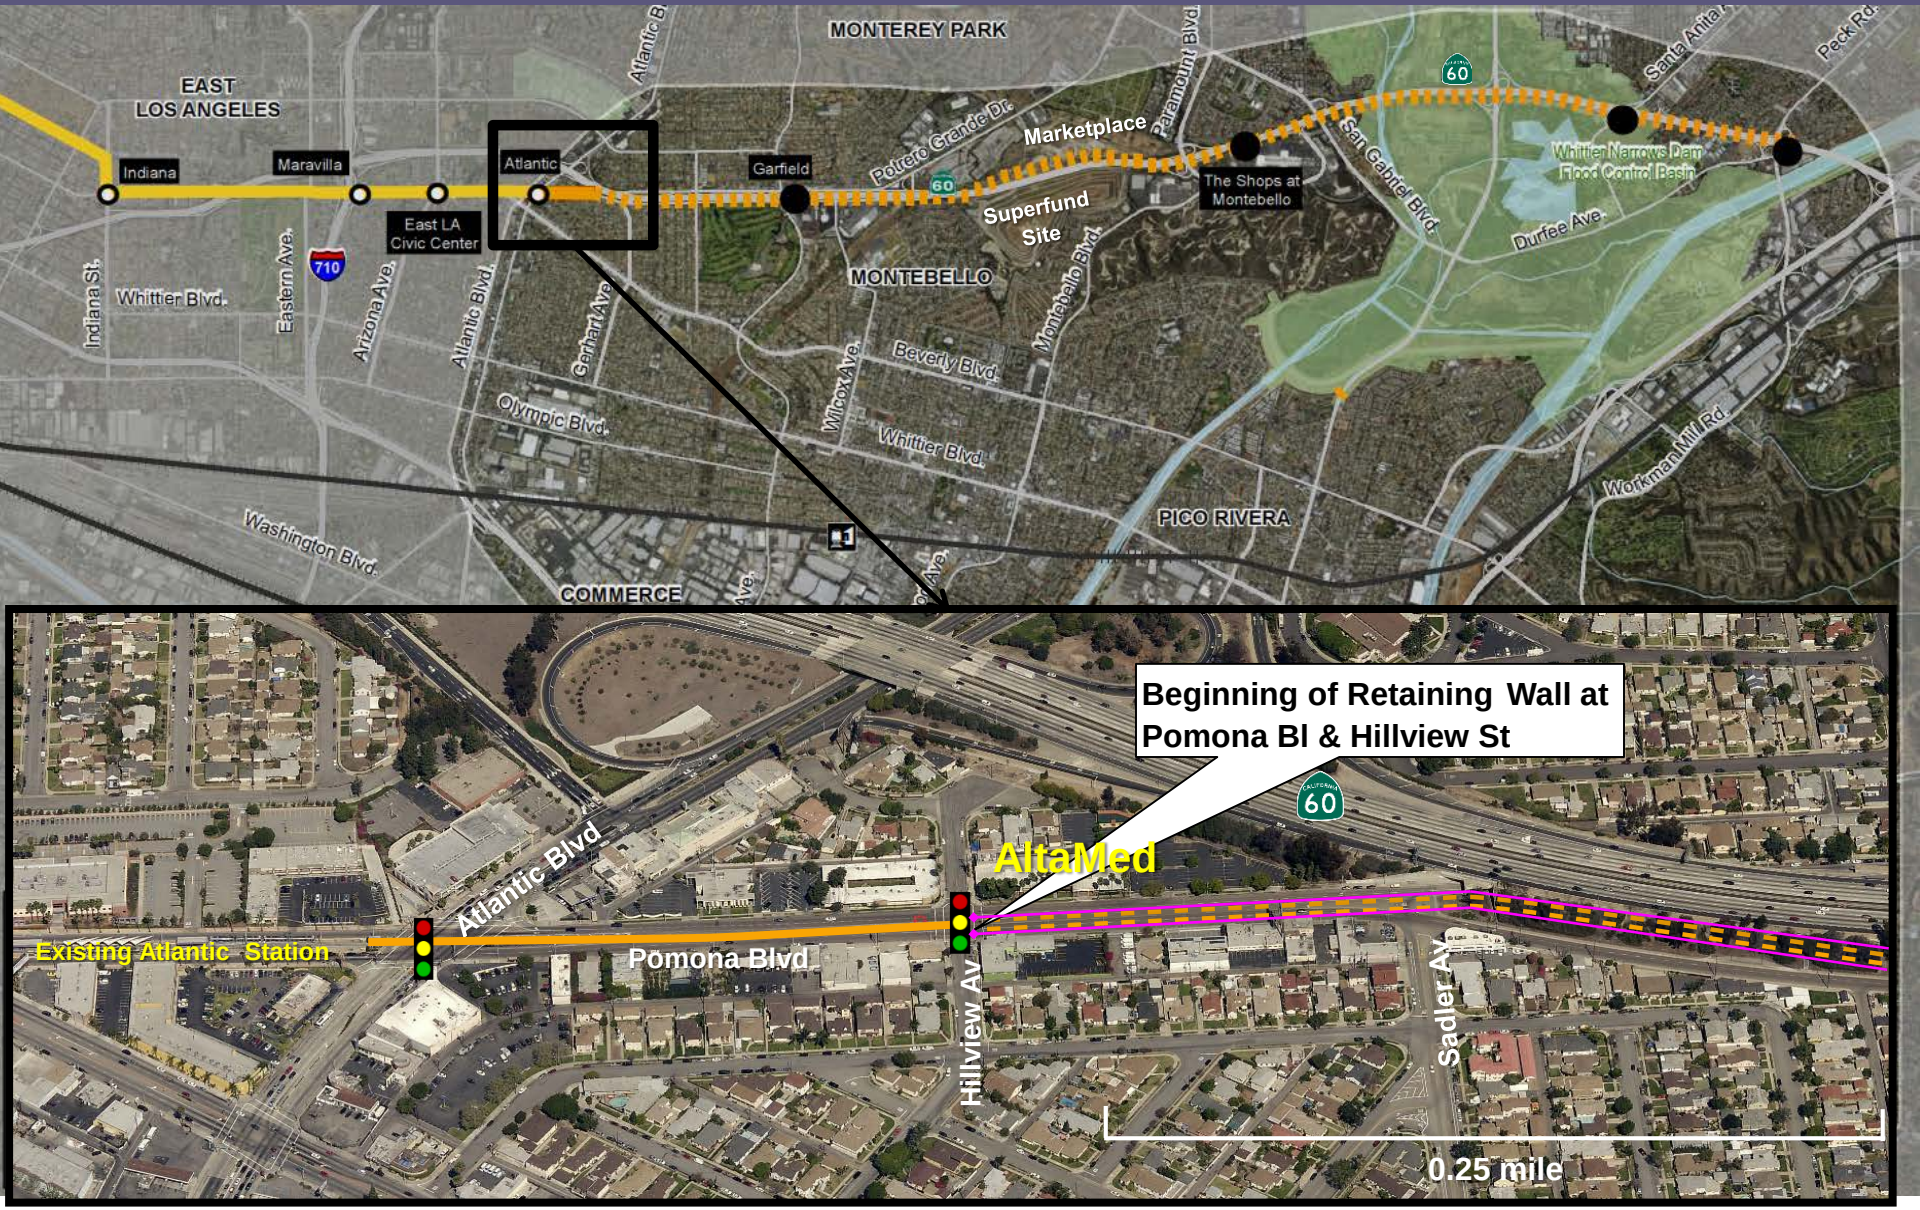


SR-60 NSDV Alignment Column Placement Relocation To Avoid Conflict with New SR-60 Ramps

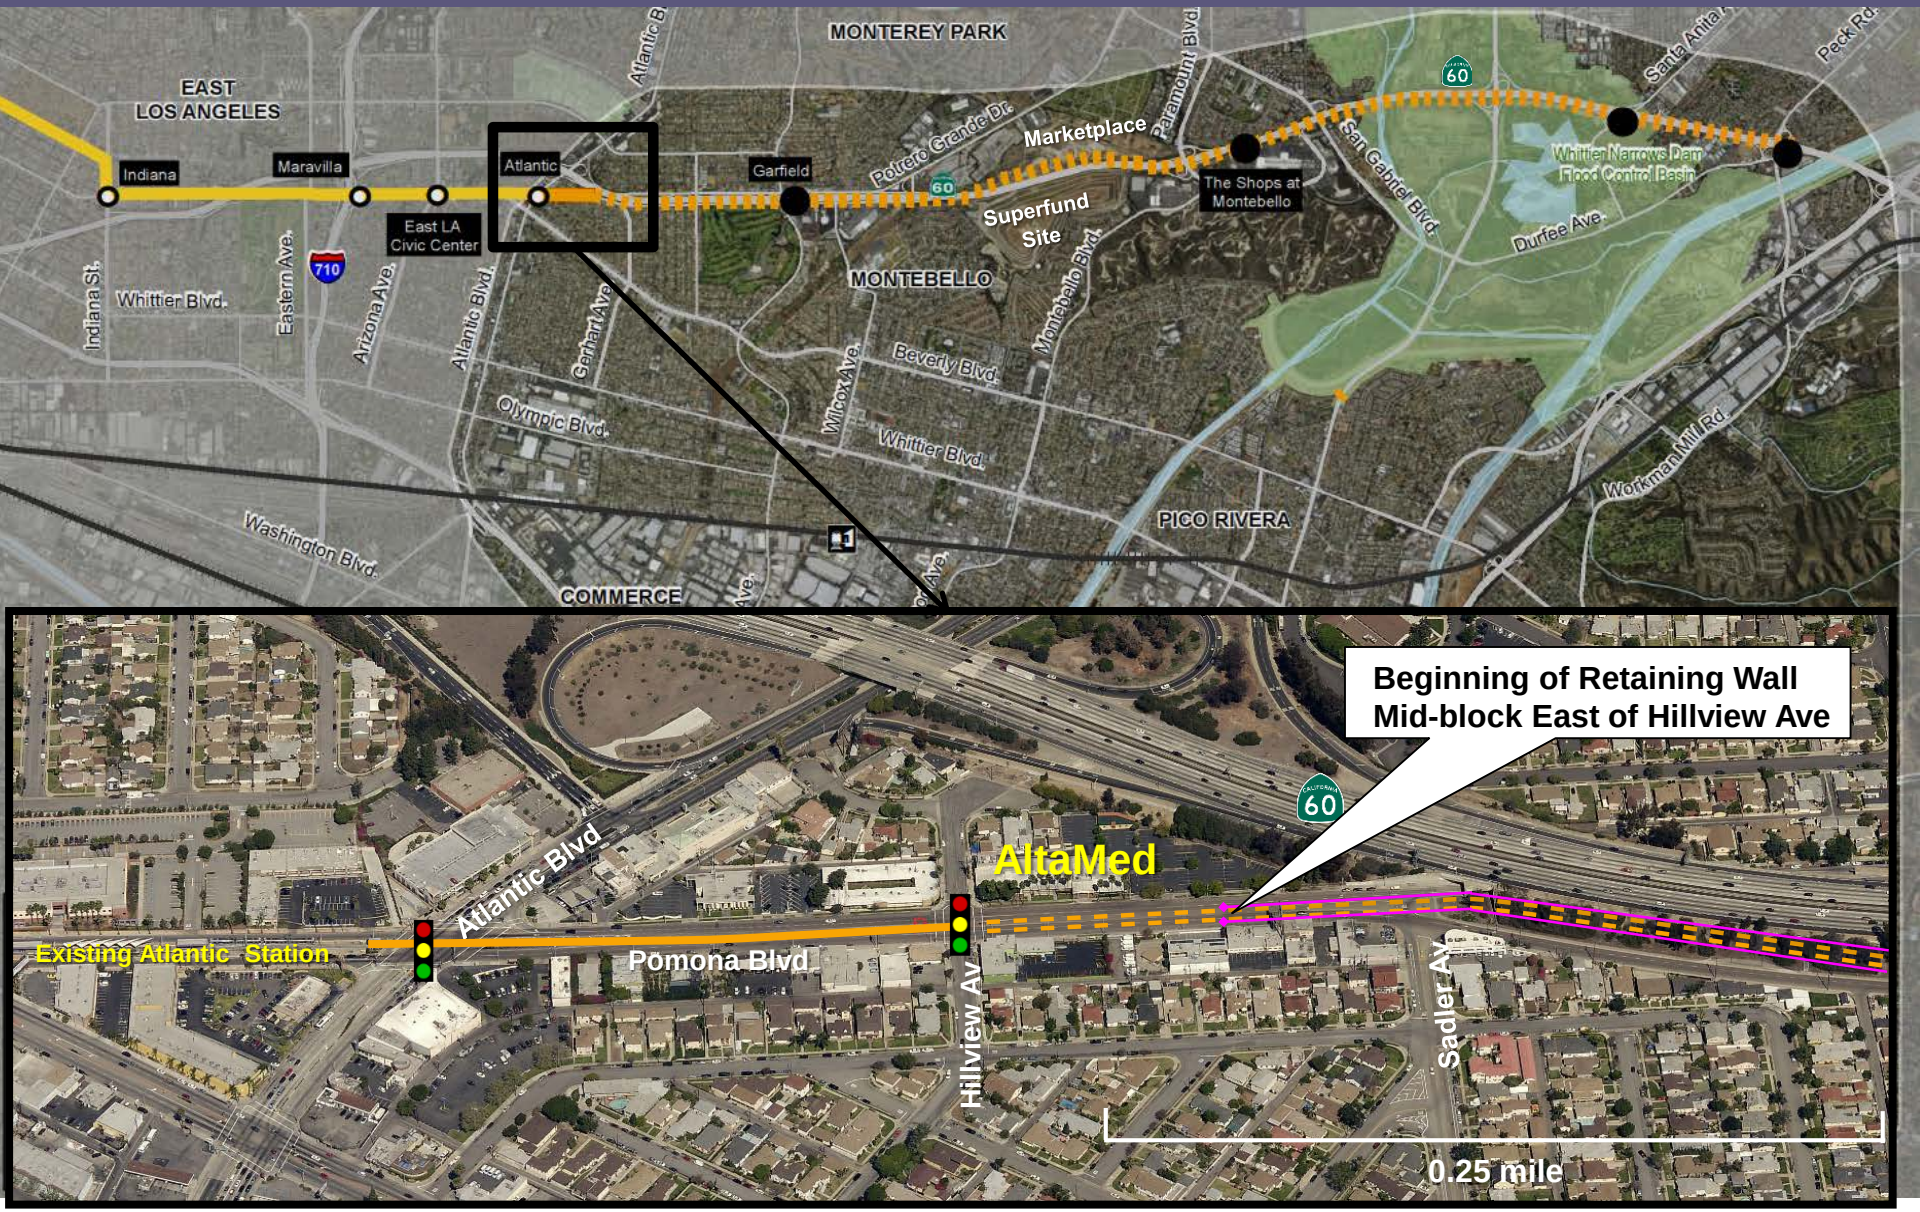


Raised SCE Transmission Lines at SR-60/Paramount Interchange

Raised SCE Transmission Lines at SR-60/Paramount Interchange



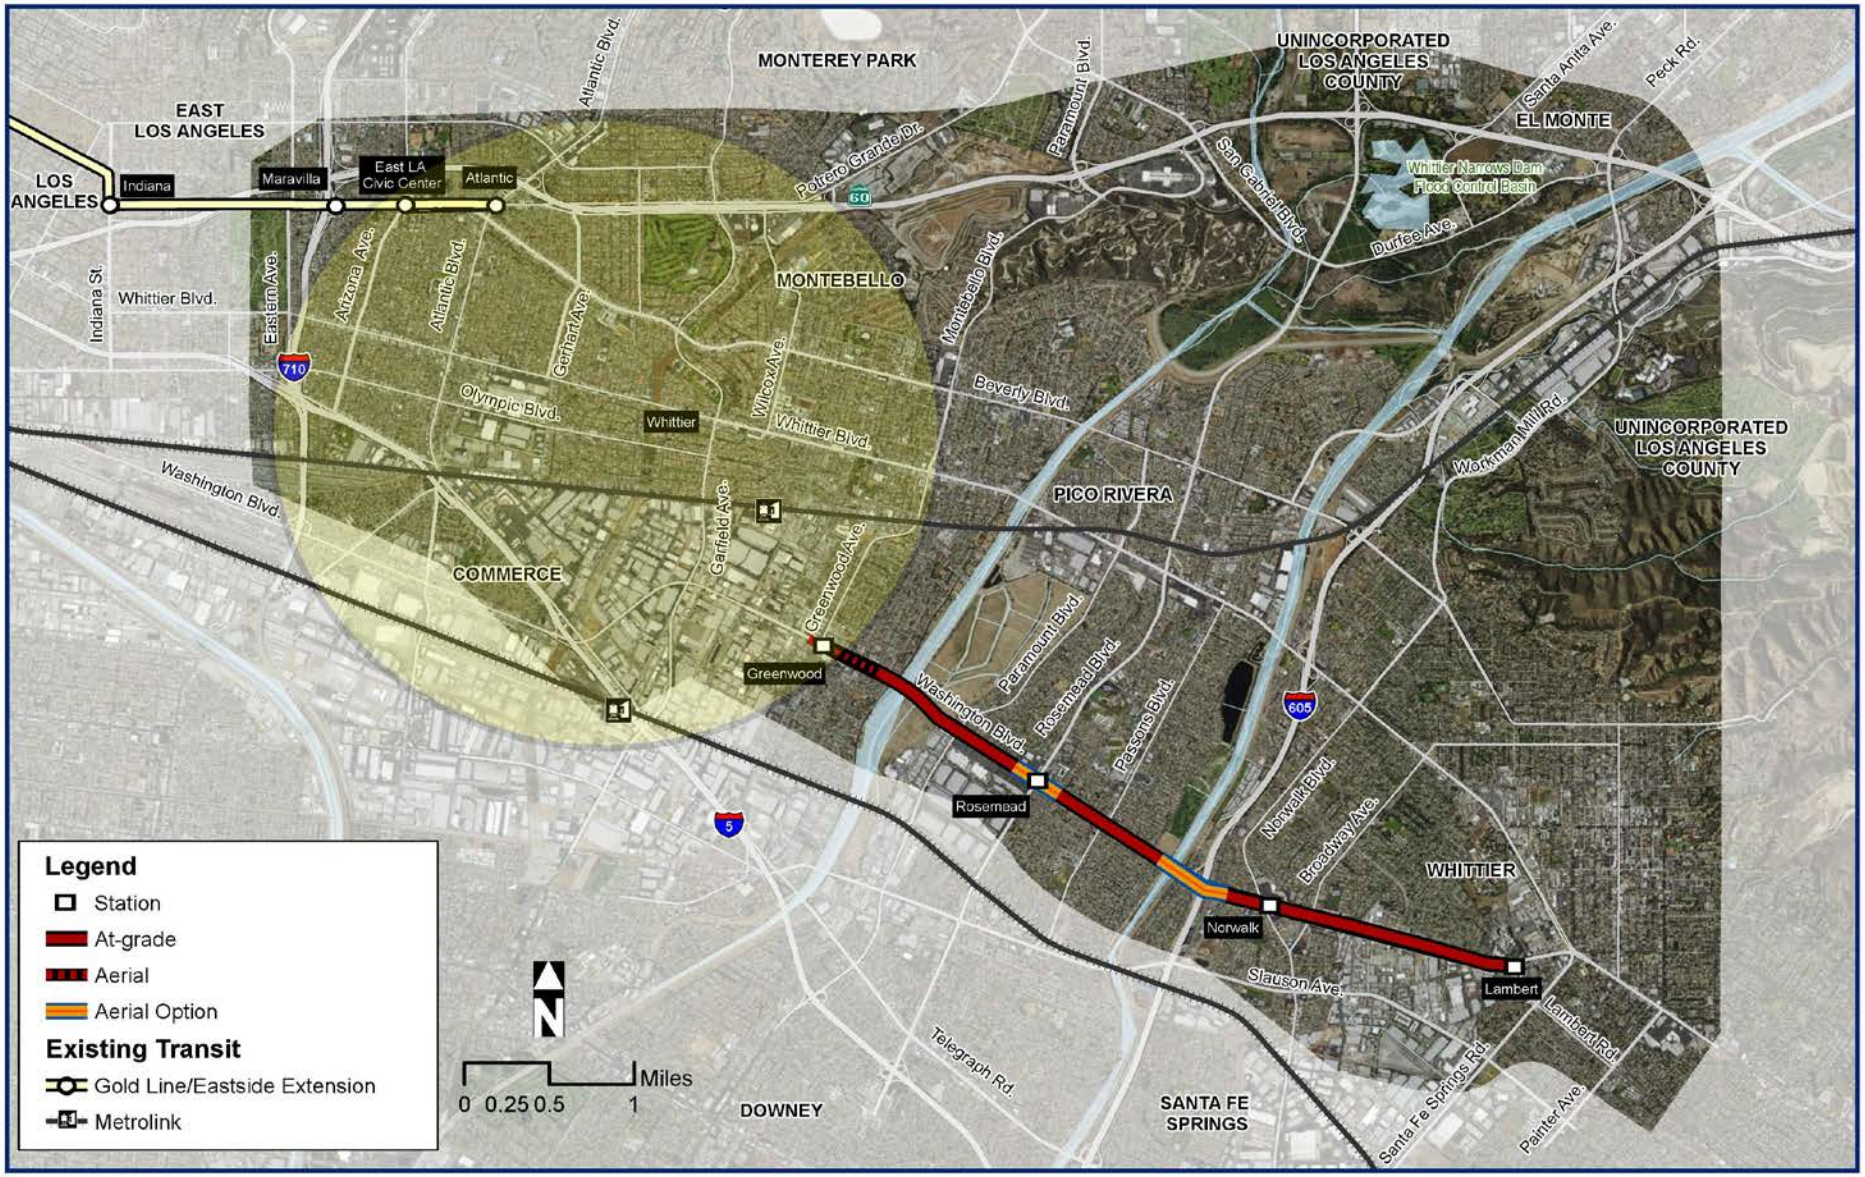
Whittier Narrows Dam Flood Control Basin
Refined Santa Anita Station Concept



*Station location and park-and-ride structure design concept are subject to change as technical analysis continues

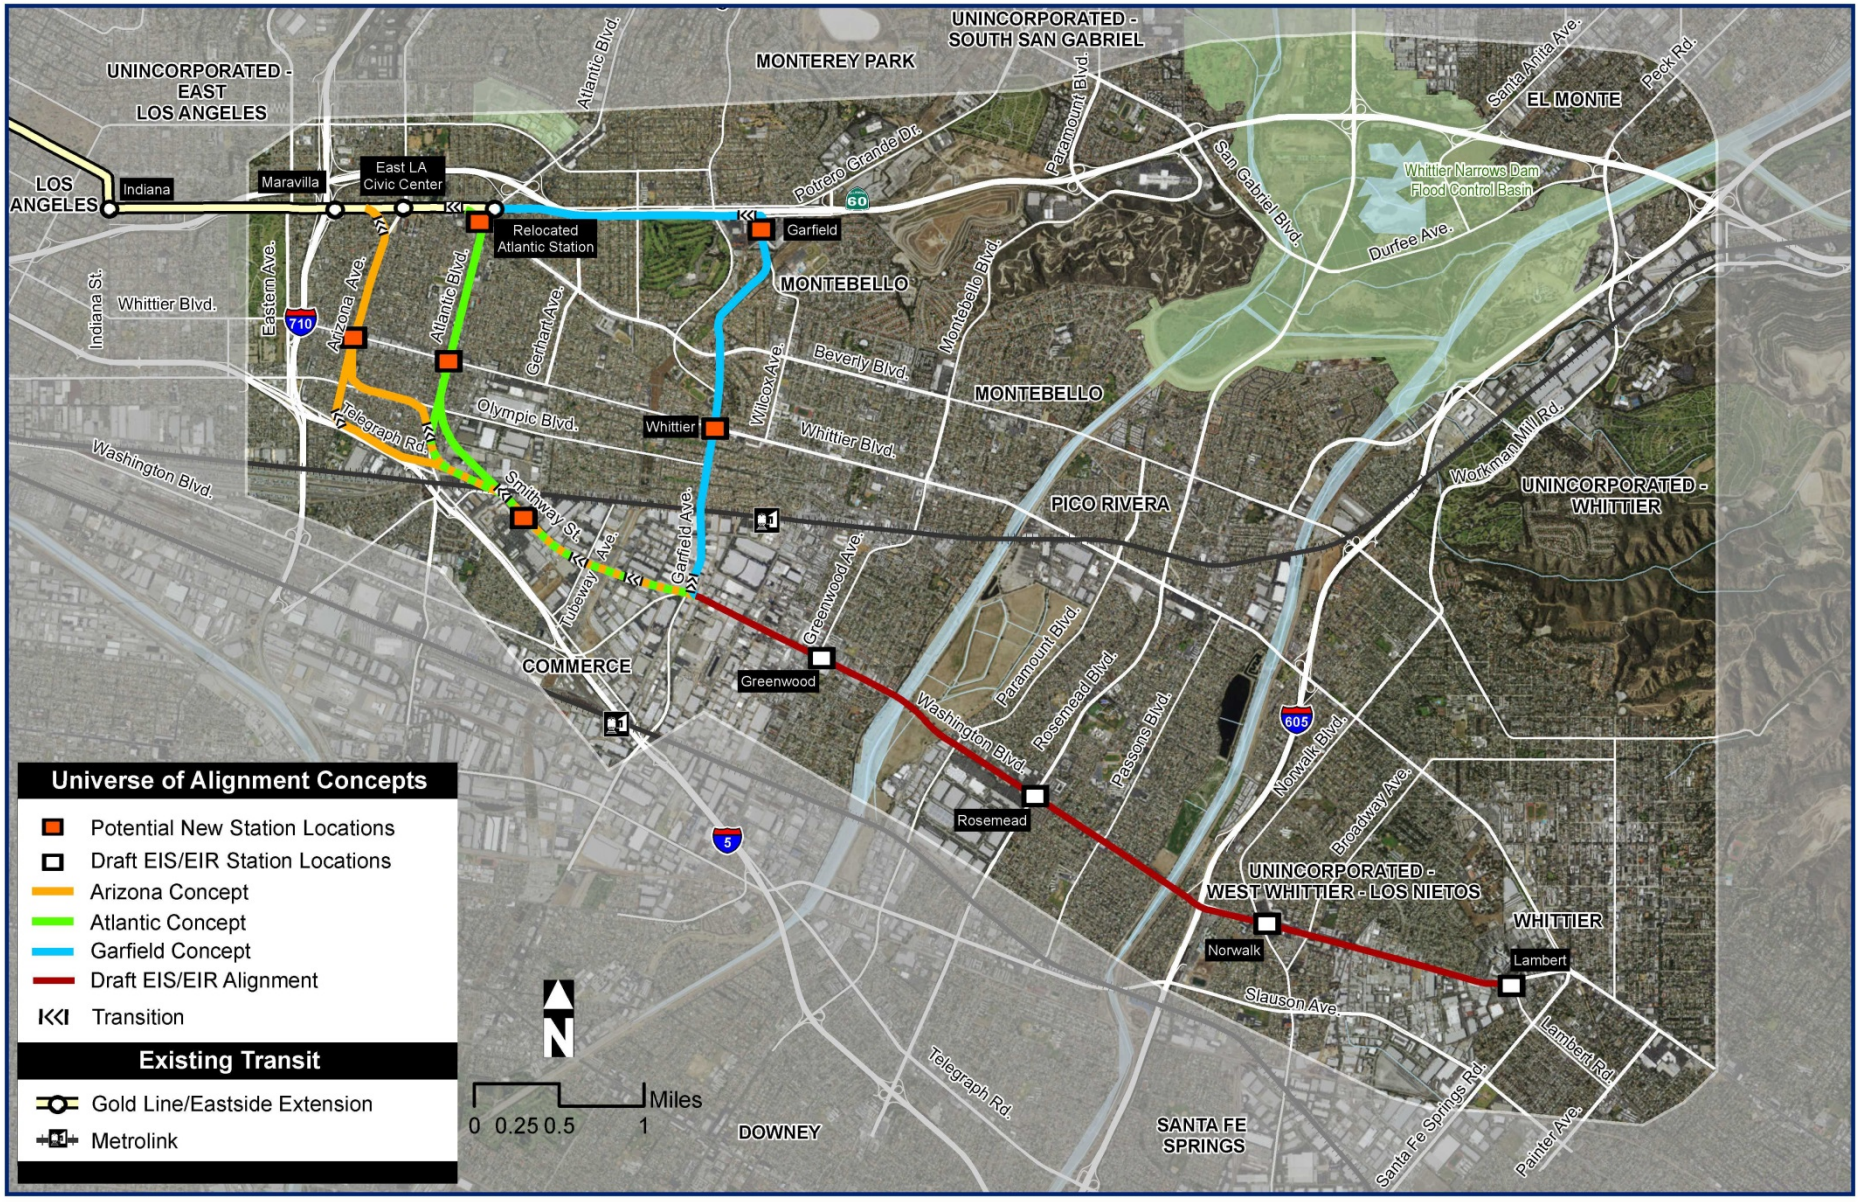
SR-60 Alternative Transition from At-Grade to Aerial
2014 Draft EIS/EIR Assumptions

SR-60 Alternative Transition from At-Grade to Aerial
Moved Retaining Wall Further East (Proposed Refinement)



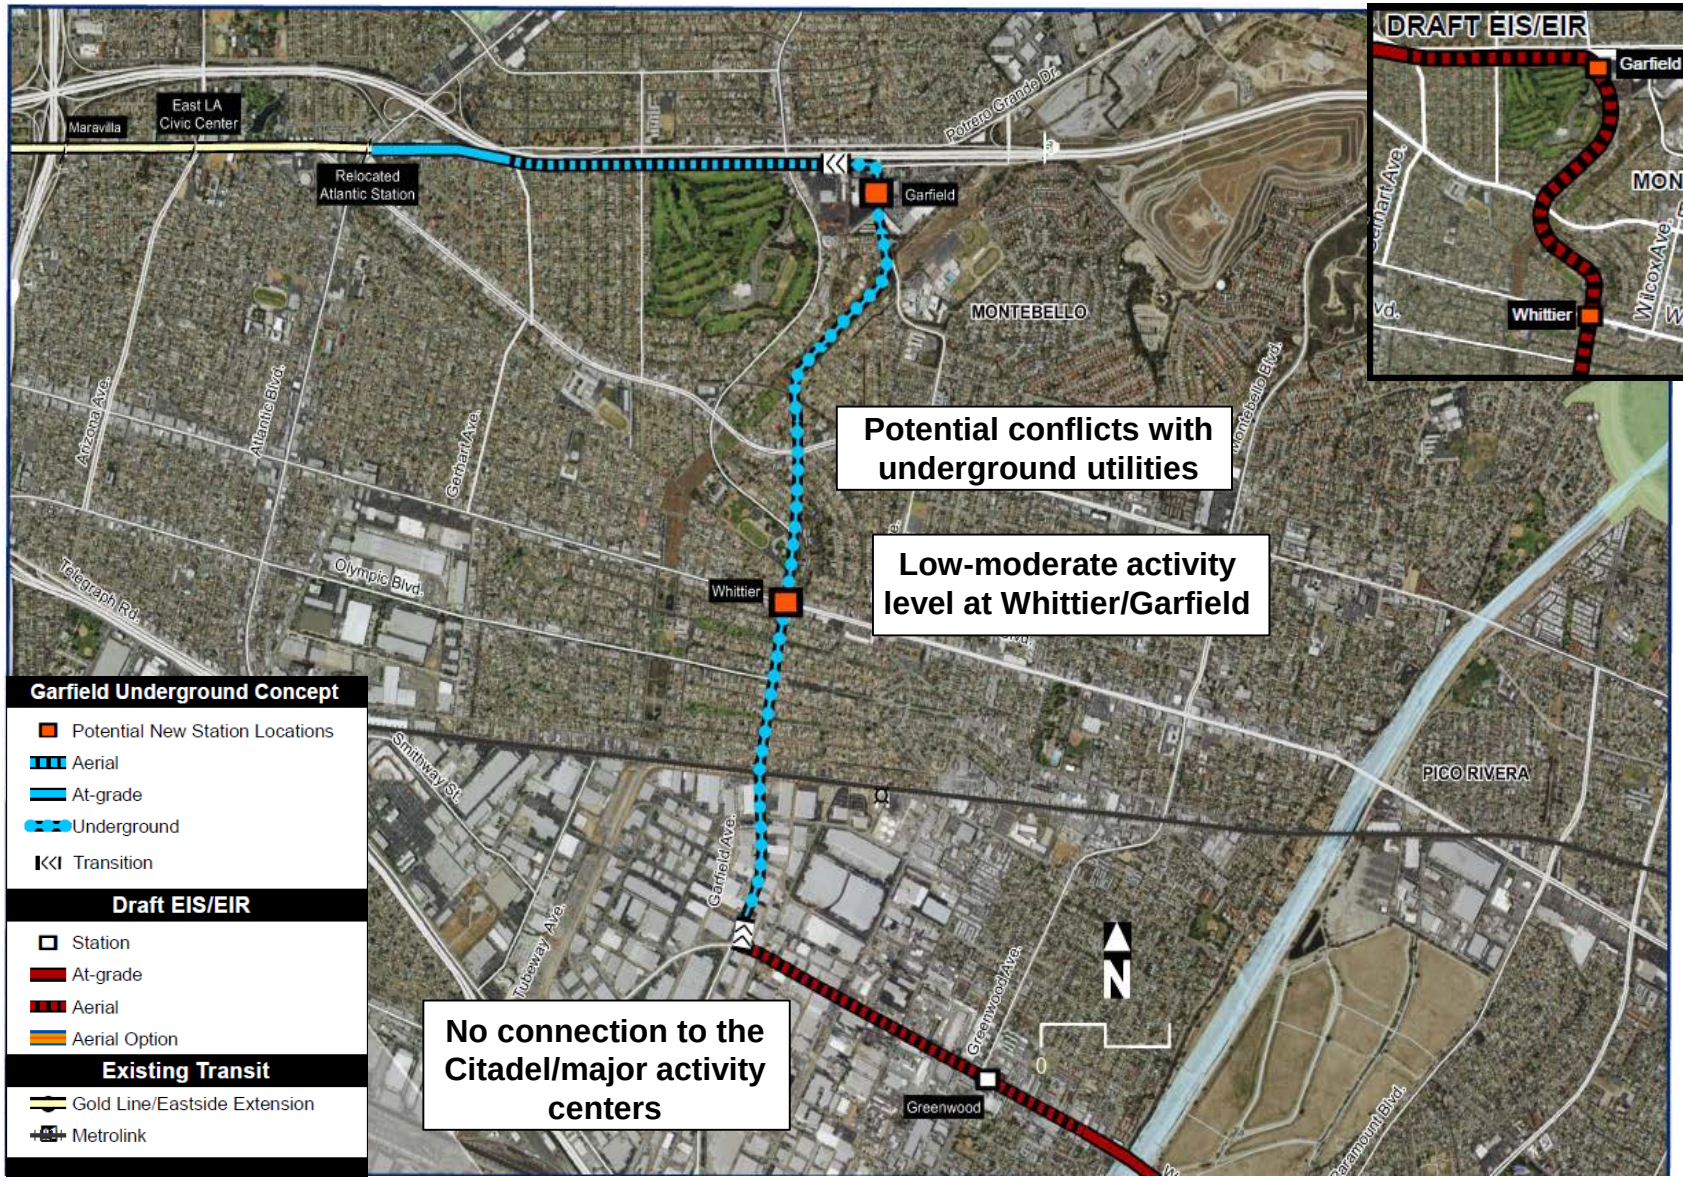
Metro Board Item Checklist

SR-60 Alternative



- ✓ **Coordinate with Agencies to Address Comments**
- ✓ **US Environmental Protection Agency (USEPA)**
- ✓ **US Army Corps of Engineers (USACE)**
- ✓ **California Department of Transportation (Caltrans)**
- ✓ **California Department of Fish and Wildlife (CDFW)**
- ✓ **Southern California Edison (SCE)**

No major Resource Agency issues with resuming environmental review of the SR-60 Alternative.



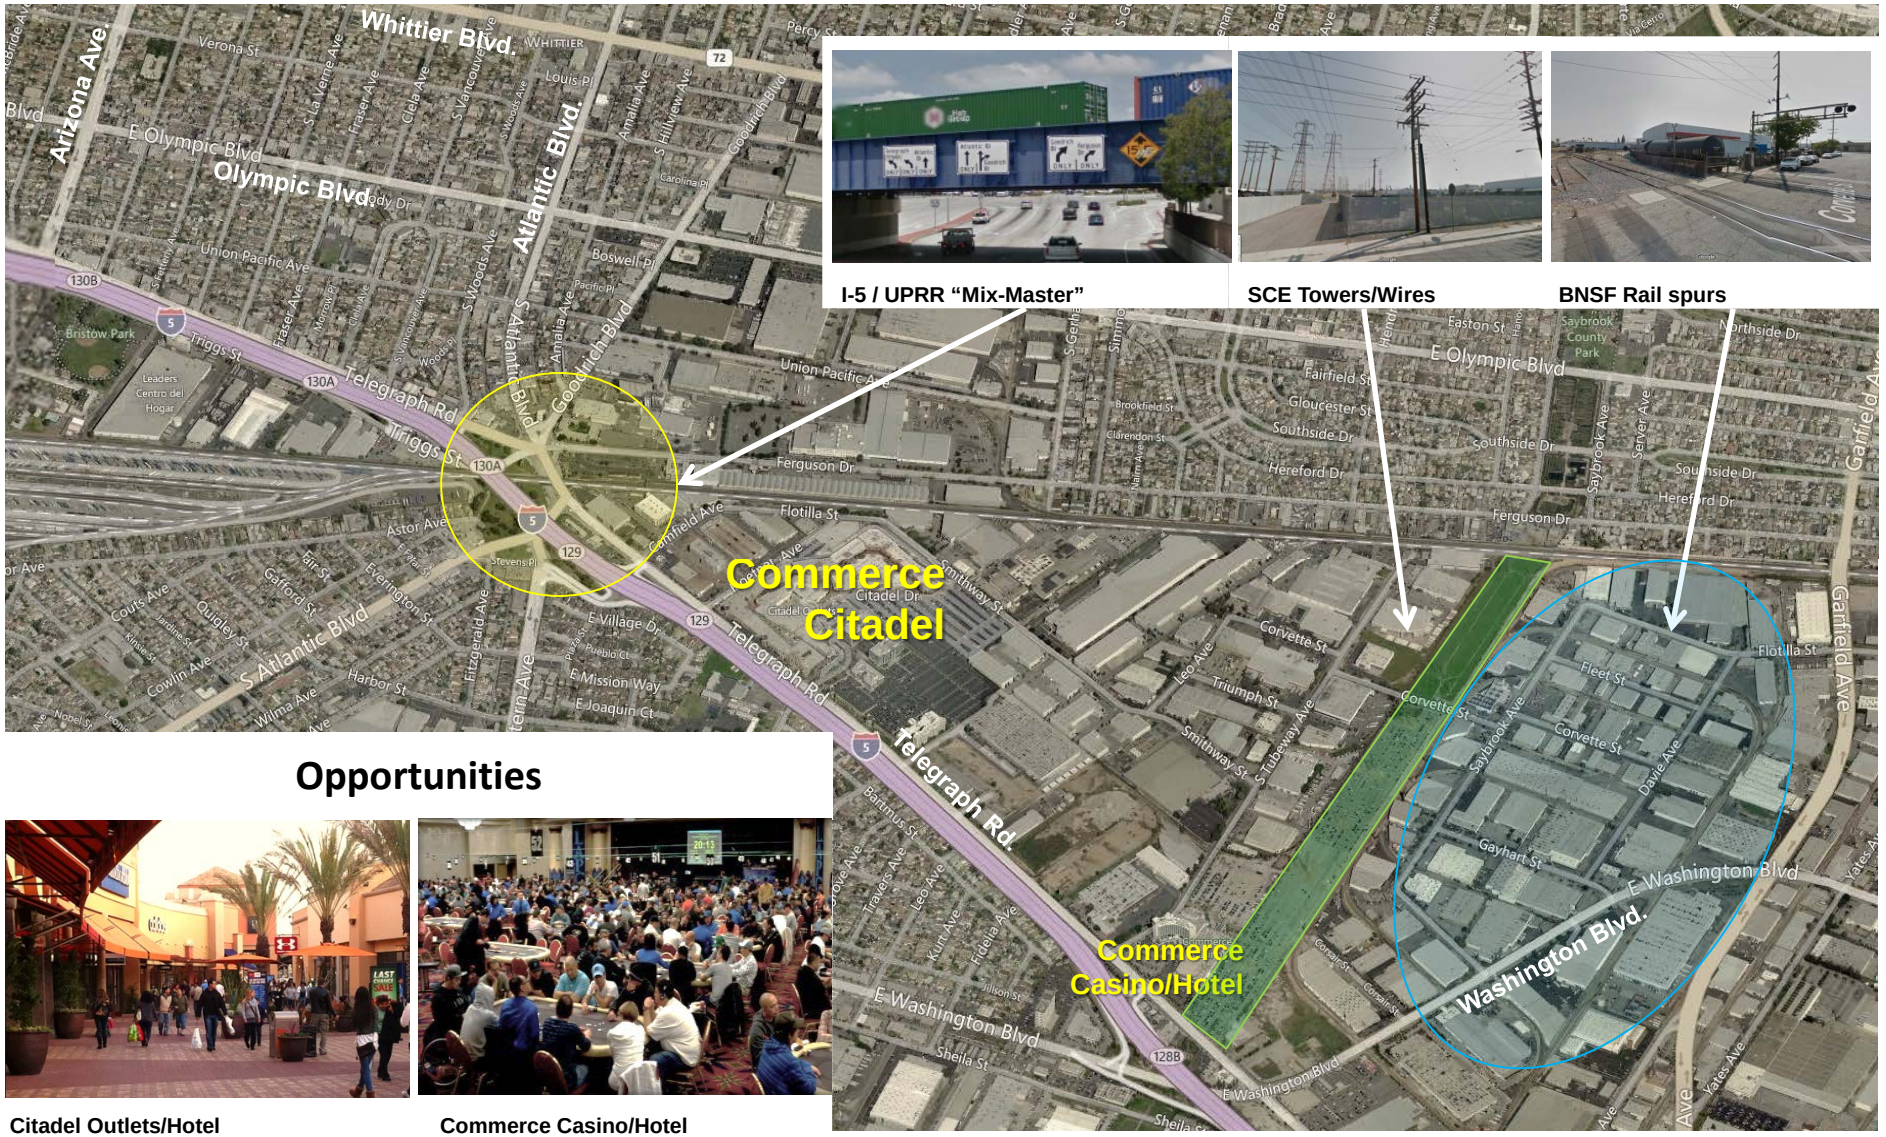
Identify New North-South Connection to Washington Boulevard

Washington Boulevard Alternative
North-South Connection Concepts

Garfield Avenue Underground Concept

Arizona: 3rd/Mednik Junction Issues
At-grade and Underground Concepts

Potential Impacts to:



- Existing Civic Center Station and Gold Line operations
- Sensitive uses
- Residential properties
- Traffic, access and parking
- Pedestrian and bicycle safety

Arizona Avenue

Arizona Av. at Whittier Bl. (Looking South)

South Atlantic Blvd Concept - Opportunities and Challenges

I-5 / UPRR "Mix-Master"

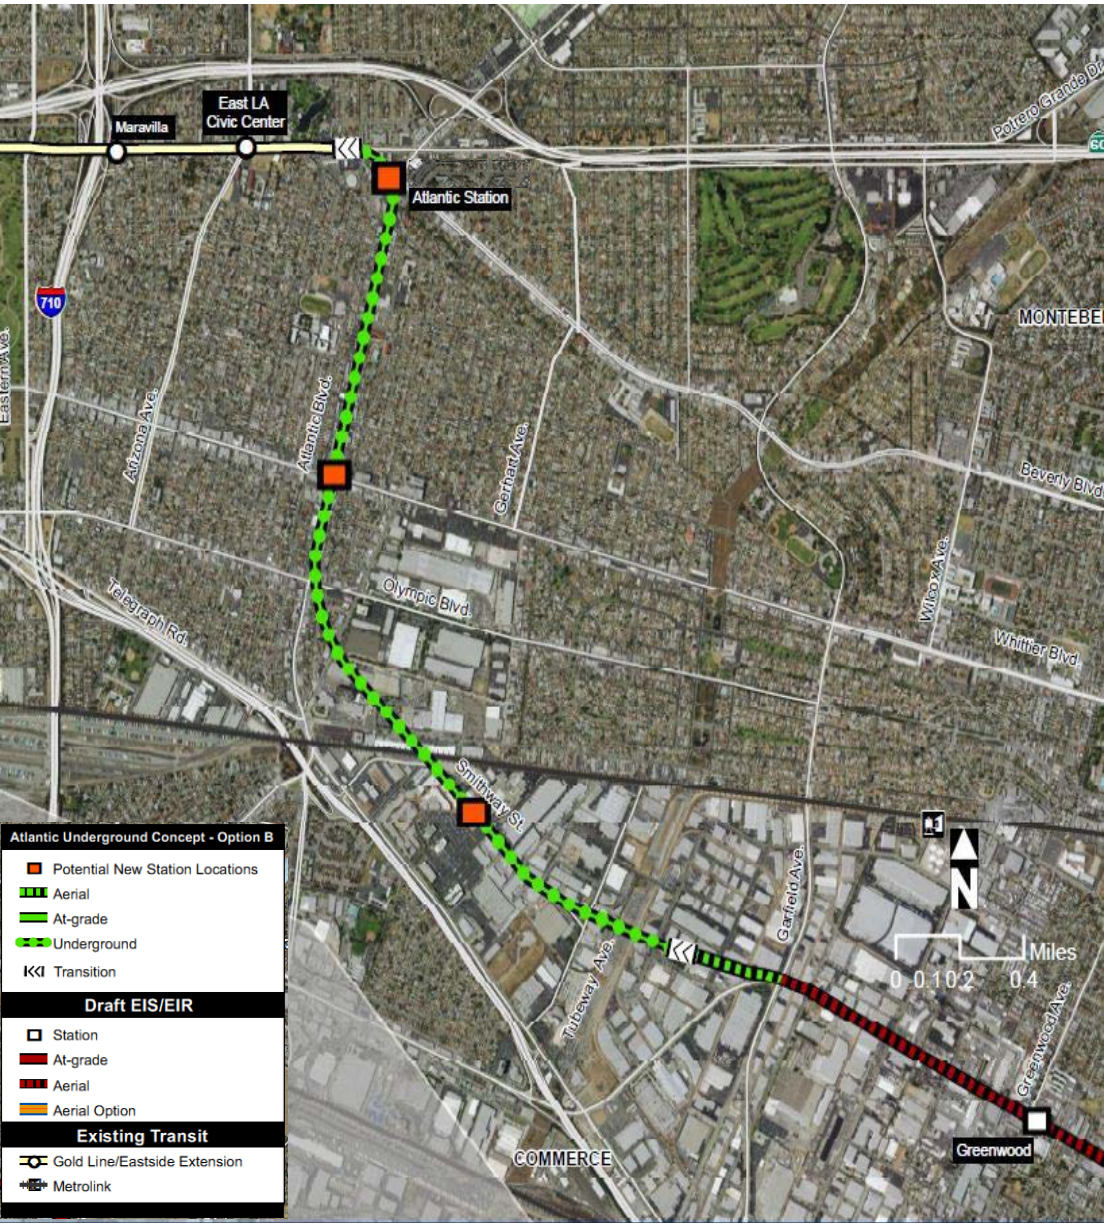
SCE Towers/Wires

BNSF Rail spurs

Opportunities

Citadel Outlets/Hotel

Commerce Casino/Hotel



Draft - For Discussion Only

Atlantic Boulevard – Existing Condition

Atlantic Bl. at Whittier Bl. (Looking Southbound)

Atlantic Underground Concept – What's Needed?

- **Two tunnel portals – one north and one south**

- **Two locations to launch and extract a TBM – exact locations unknown**

- **Excavation of station boxes**

Atlantic Underground

Staff Recommendation:

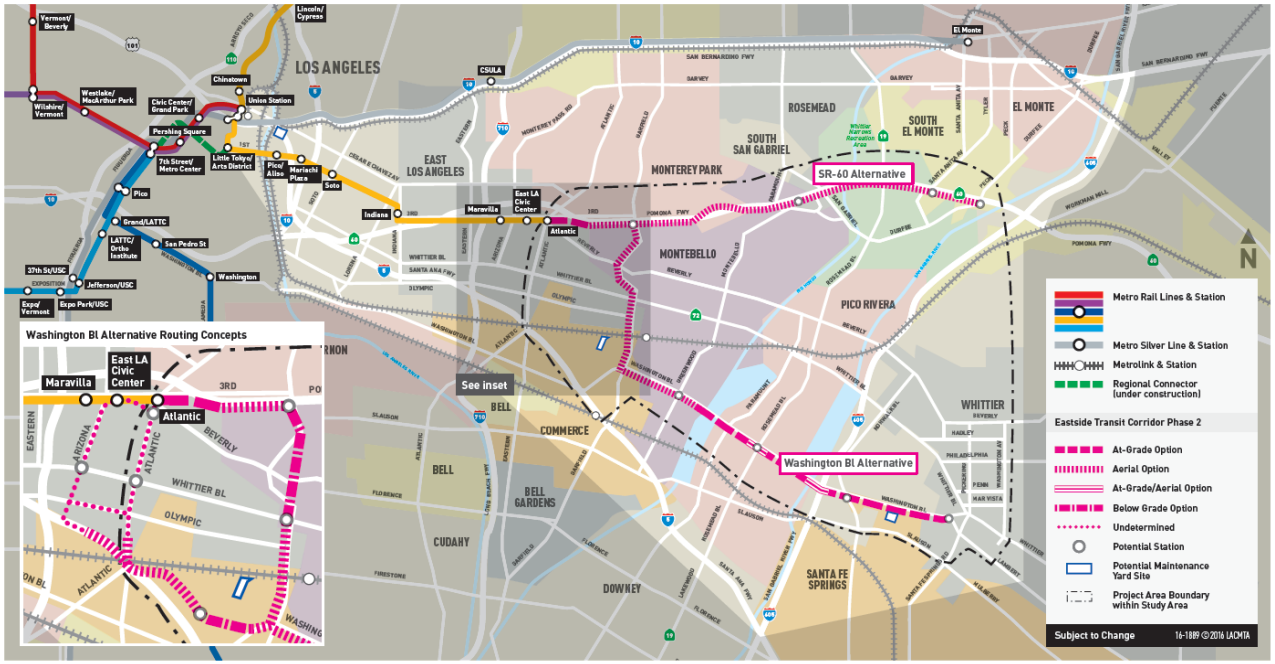
✓ Carry Atlantic Underground forward as the new Washington Alternative

Metro Board Item Checklist

Washington Alternative

✓ **Eliminate Aerial on Garfield Av between Via Campo and Whittier Bl.**

Draft EIS/EIR eliminated at-grade



✓ **Identify a New North/South Connection to Washington Bl.**

Measure M Funding

Total Funding: $6.0 Billion

Funding delivered in two phases:

- Phase 1: $3.0 Billion in 2029
- Phase 2: $3.0 Billion in 2053

Combined Alternative

Can You Operate a Combined Alternative with SR-60 and Washington Alternatives?

Metro Board Item Checklist

- ✓ Explore Feasibility of Operating Both SR-60 and Washington Bl Alternatives

Share Your Thoughts

- We would like to ask you some questions about the alternatives. The following Preference Survey is designed to obtain your input on the Eastside Transit Corridor Phase 2 project.
- The survey consists of five questions.
- Please respond by using the clicker:
  - Multiple choice answers correspond with the numbers on the voting devices
  - There are no right or wrong answers

Test Question

Have you ever taken a trip on the Metro Gold Line?

0% 1. Yes

0% 2. No

Question 1

What is the most important reason for implementing the Eastside 2 extension?

0% 1. Connecting to the regional system

0% 2. Ease traffic congestion

0% 3. Economic revitalization

0% 4. Improving access to major activity centers and jobs

0% 5. Other

Question 2

What is the most important consideration for a Metro Rail station?

0% 1. Proximity to activity centers

0% 2. Ease of access (walking, bike, bus, parking, etc.)

0% 3. Safety and security

0% 4. Economic revitalization potential

0% 5. Other

Question 3

Based on what you heard today,
what is your biggest concern?

0% 1. Traffic/Circulation/Parking

0% 2. Construction activities
(displacement/disruption of residents and/or businesses)

0% 3. Safety and security

0% 4. Air quality impacts

0% 5. Other

Question 4

Do you agree or disagree with the following statement: “The Atlantic underground concept has enough merit to be recommended as the new Washington Blvd Alternative.”

0% 1. Agree

0% 2. Neutral

0% 3. Disagree

Question 5

Based on what you heard, is there merit in adding a combined Alternative that includes both SR-60 and Washington Blvd in the next phase of the study?

0% 1. Yes

0% 2. No

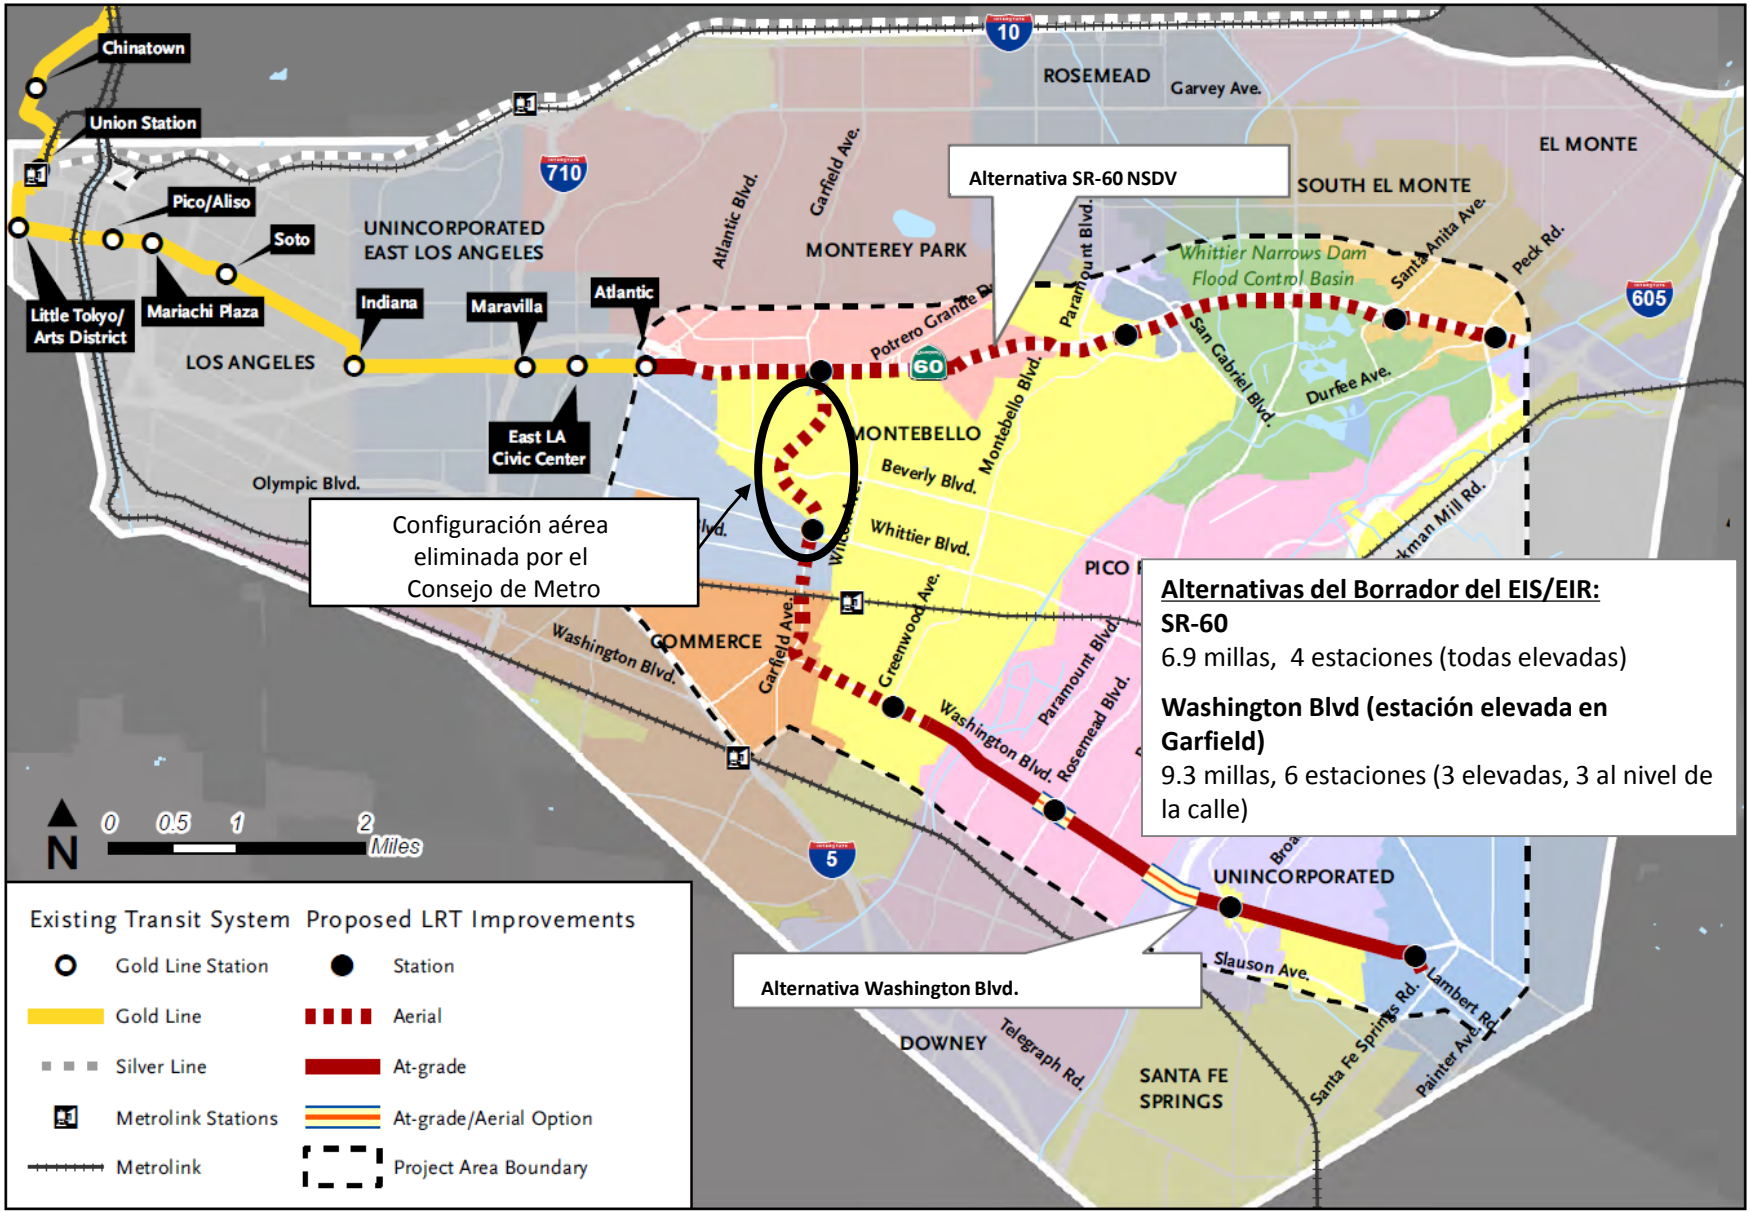
0% 3. Maybe

Next Steps/Schedule

- Spring 2017 – Metro Board consideration of Technical Study findings
- Summer/Fall 2017 – Reinitiate Environmental Process

Fase 2 del Corredor de Tránsito del Lado Este

Actualización del Estudio técnico



Reunión de alcance comunitario - Febrero de 2017

Propósito de la reunión de esta noche

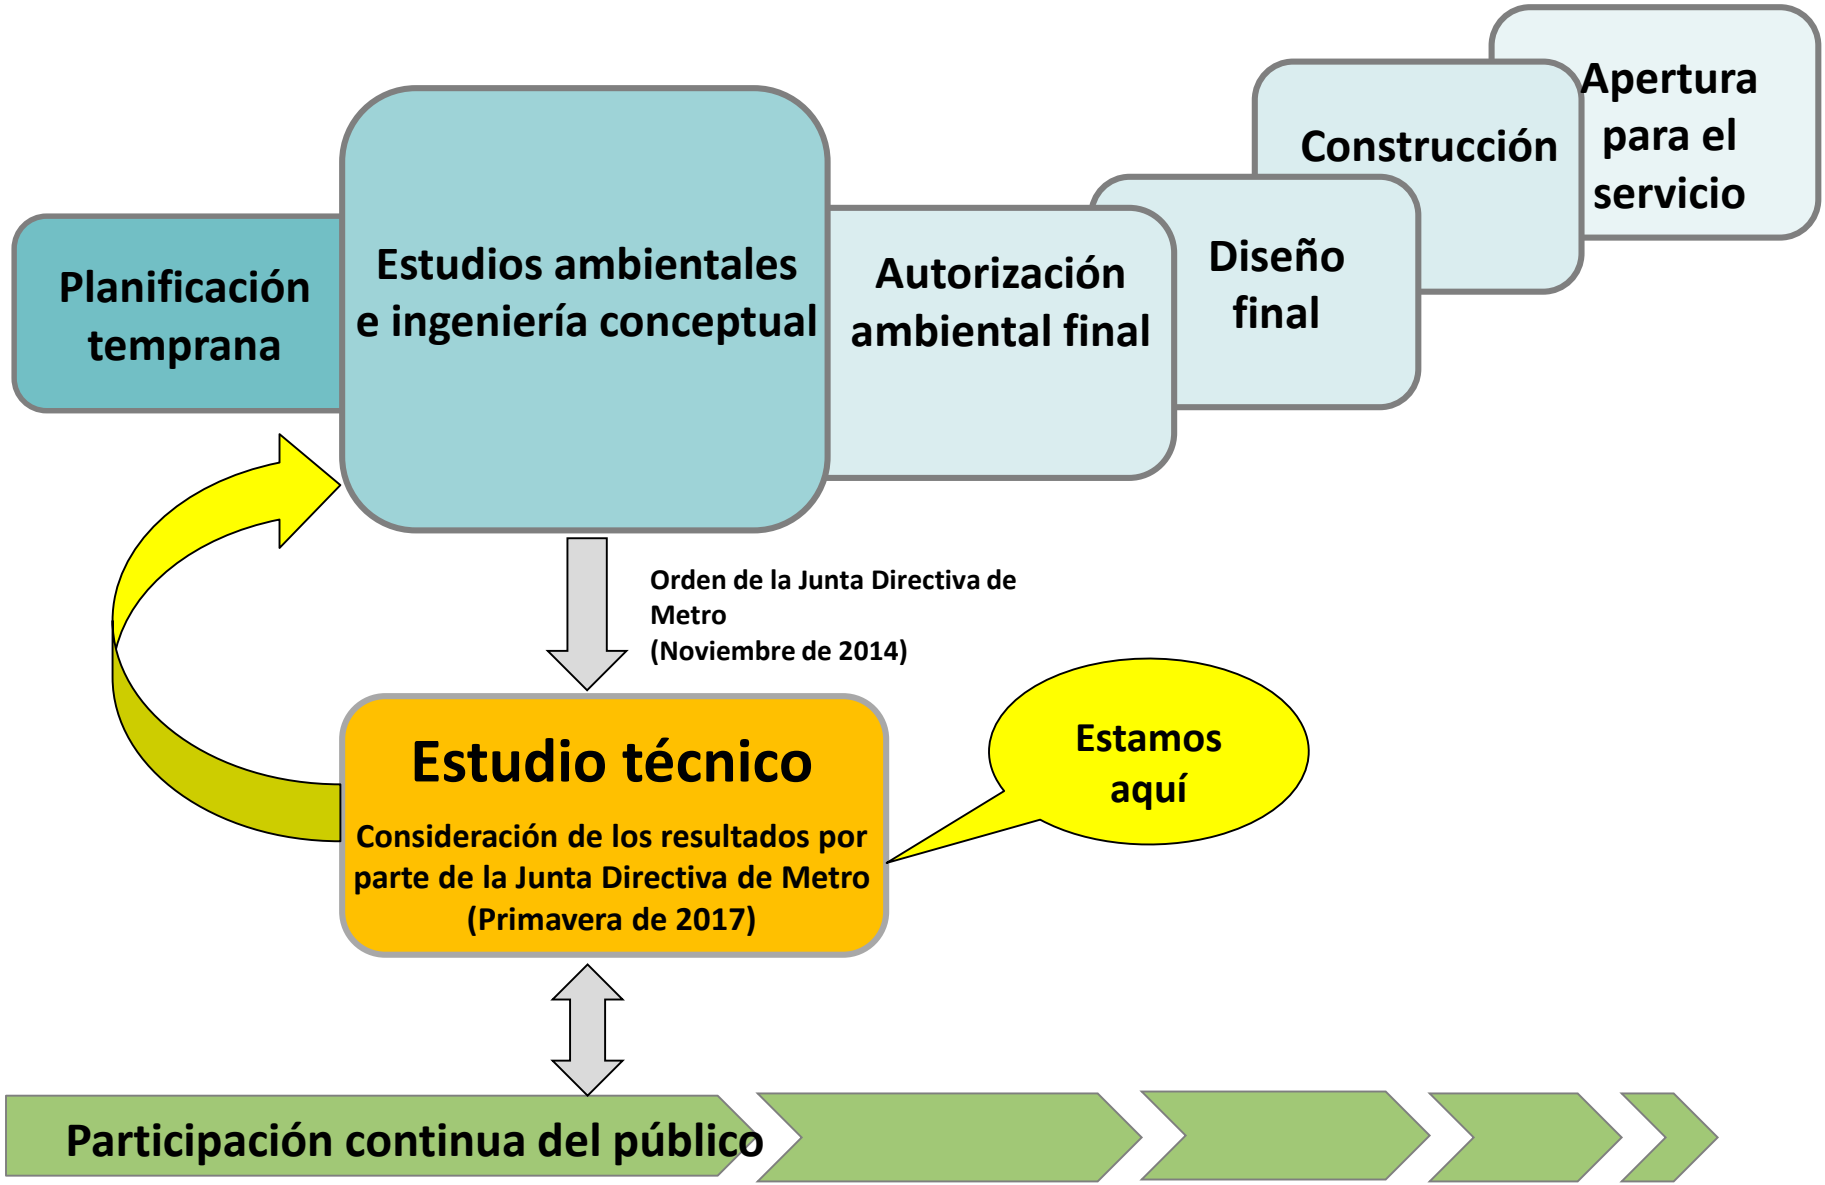
- Recapitulación de la moción de la Junta Directiva (2014) y el proceso del Estudio técnico
- Proporcionar una actualización sobre las investigaciones técnicas de la Alternativa SR-60
- Compartir los resultados de los conceptos de ruta de la Alternativa de Washington Blvd.
- Recepción de comentarios del público
- Discutir los próximos pasos

Alternativas estudiadas en el Borrador del EIS/EIR de 2014

Alternativas del Borrador del EIS/EIR:

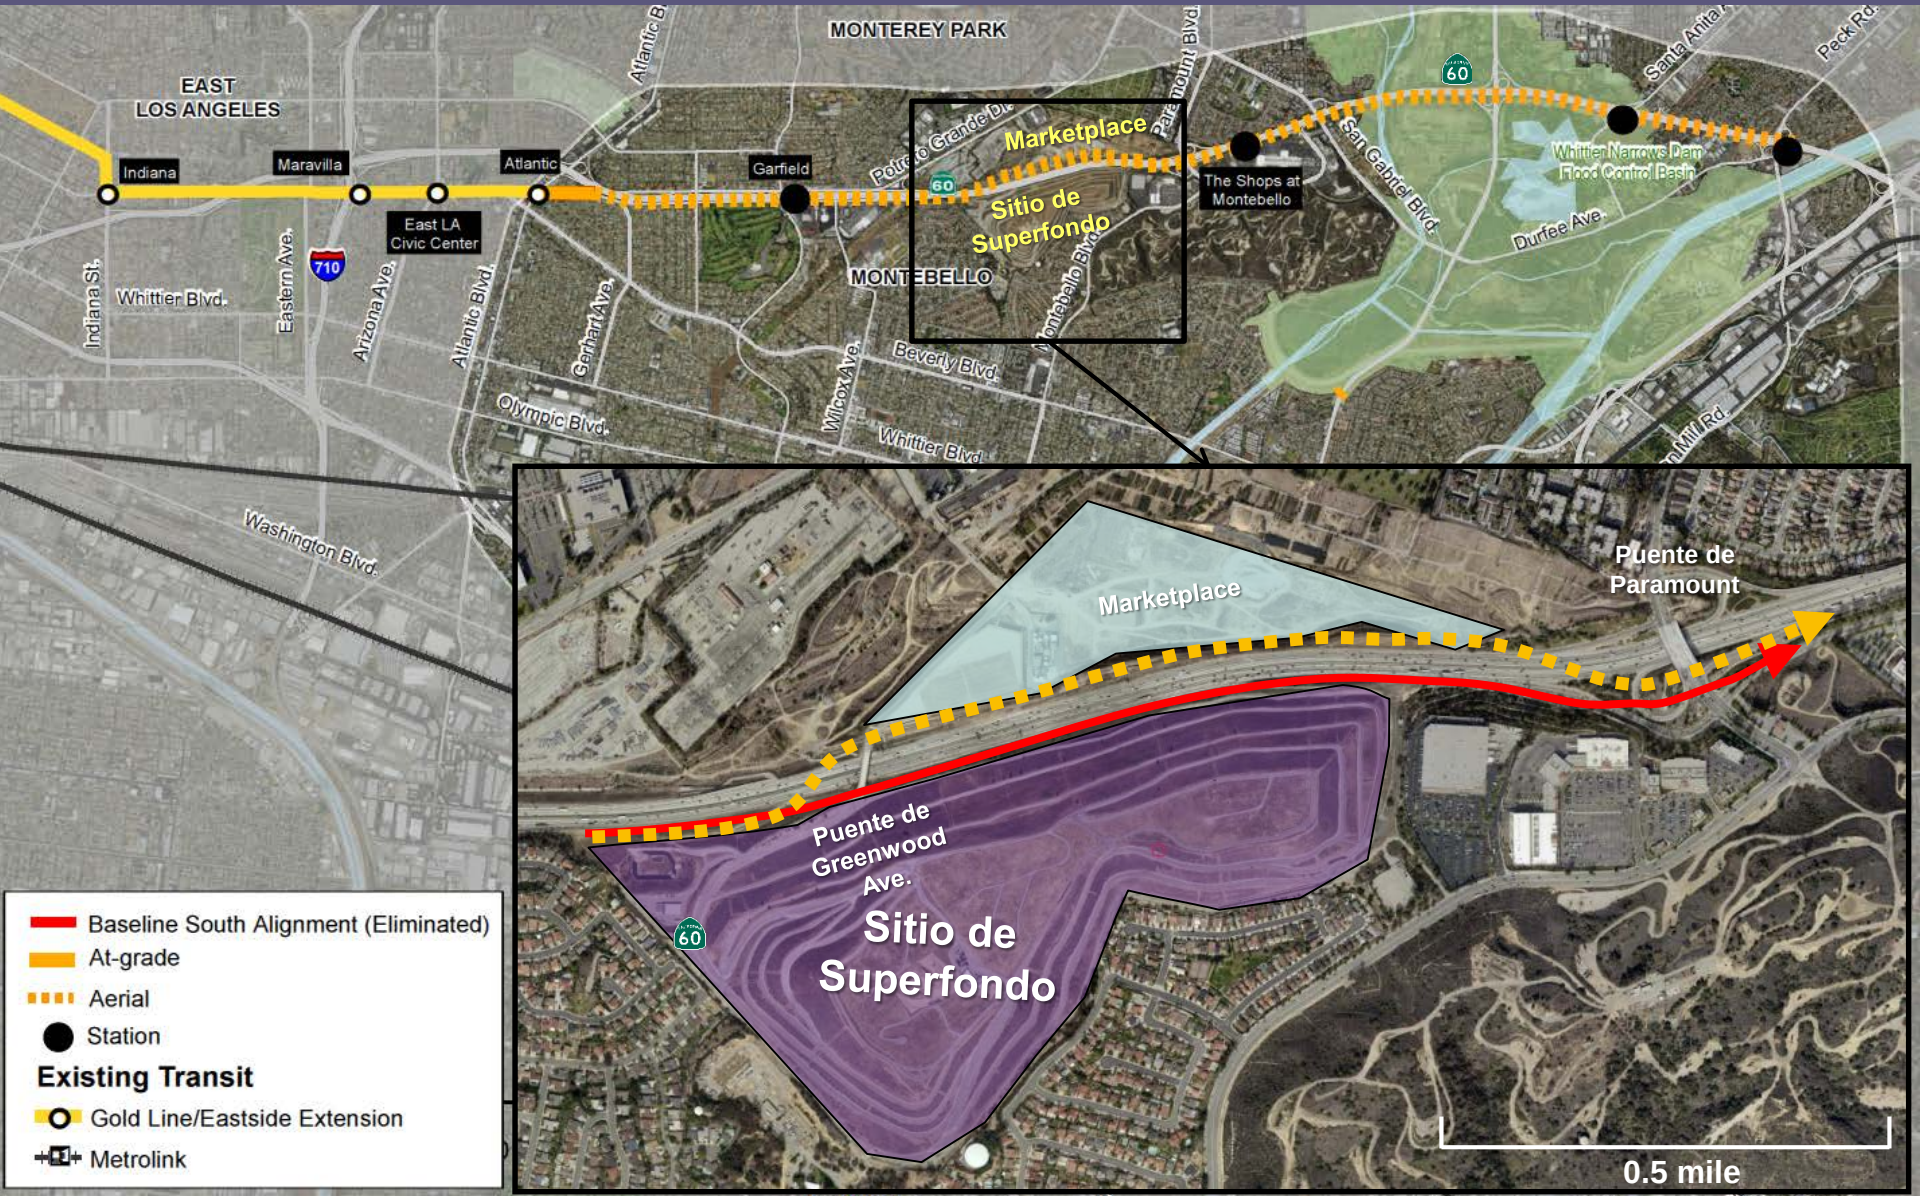
SR-60

6.9 millas, 4 estaciones (todas elevadas)



Washington Blvd (estación elevada en Garfield)

9.3 millas, 6 estaciones (3 elevadas, 3 al nivel de la calle)

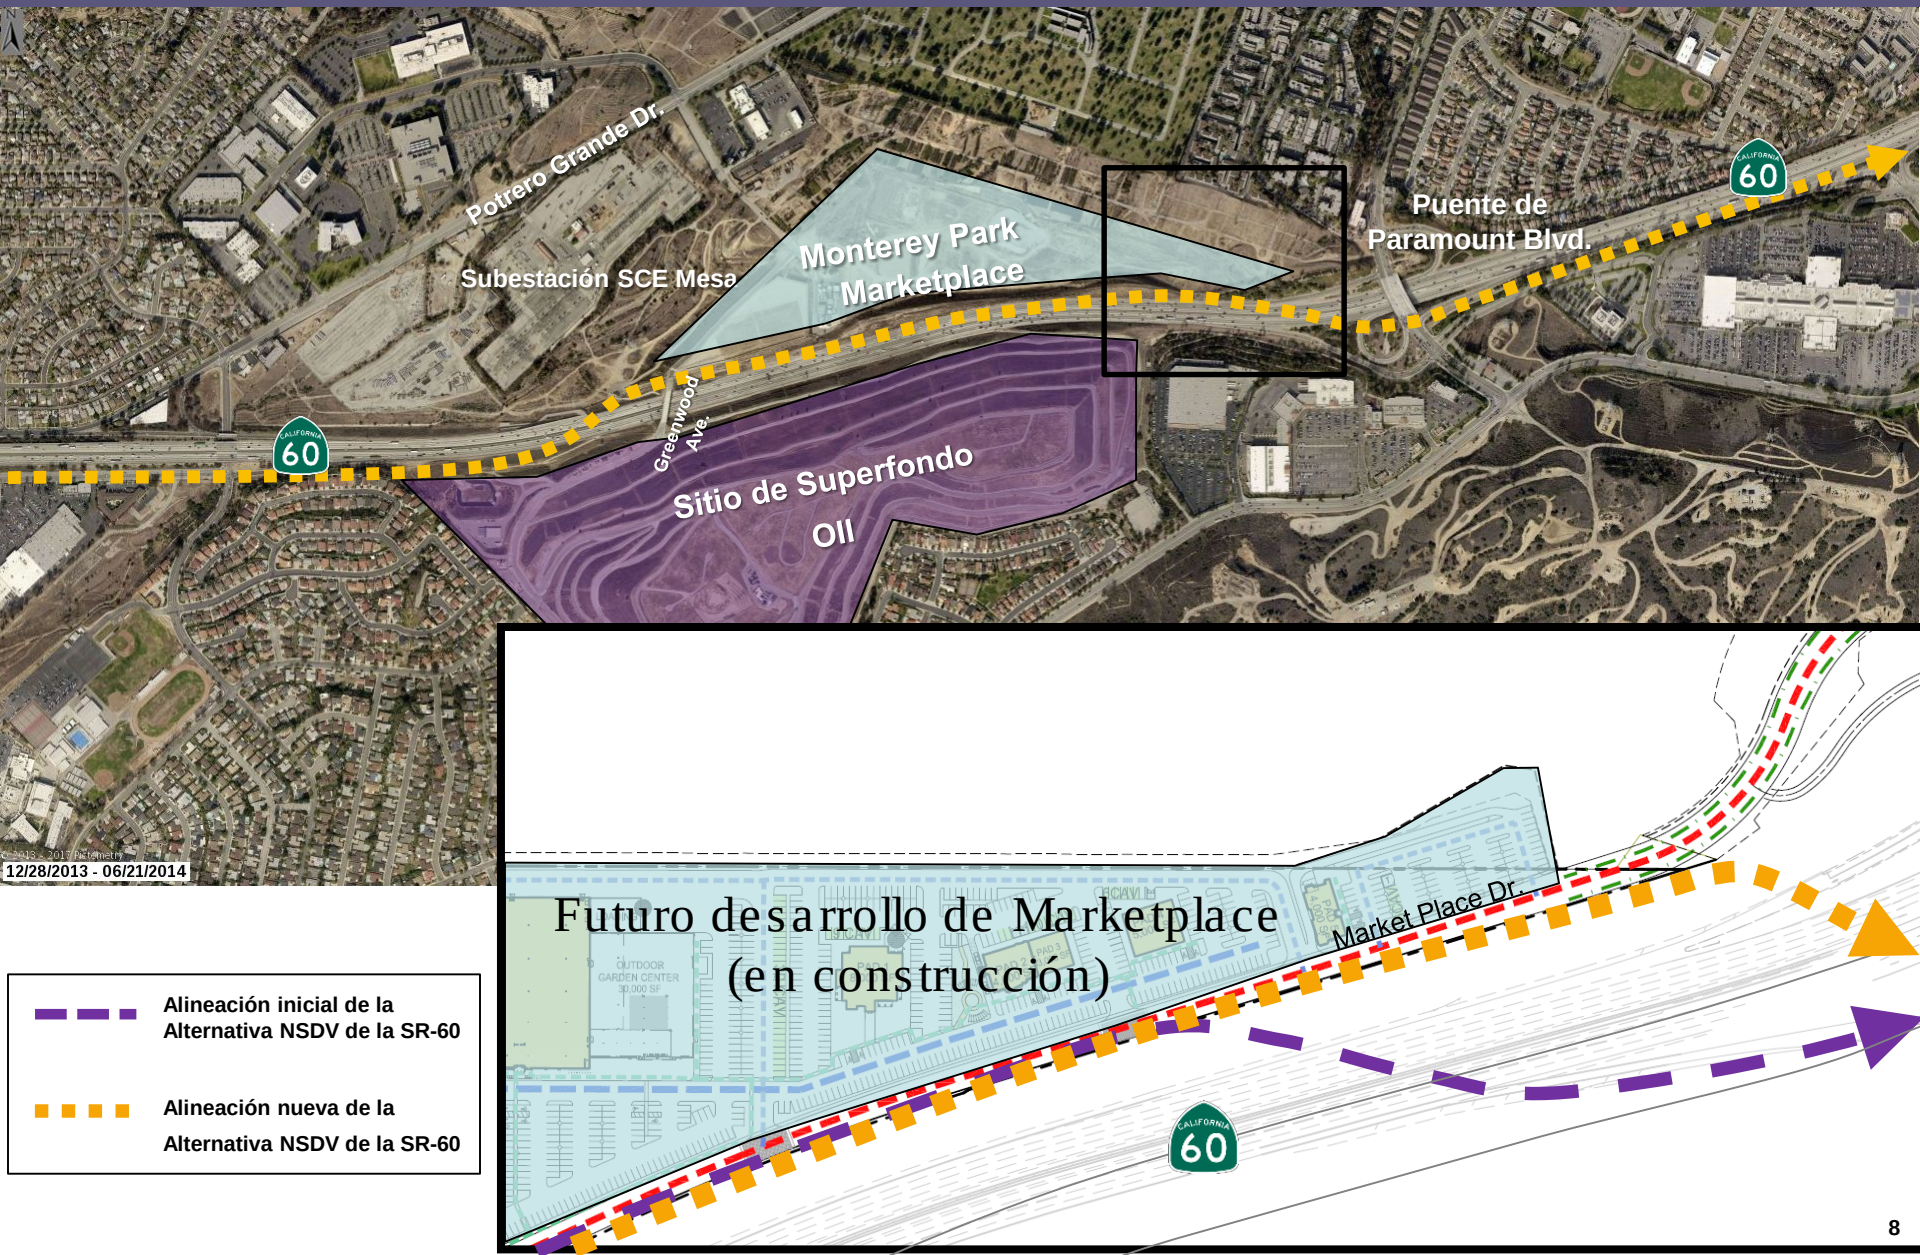


Moción de la Junta Directiva

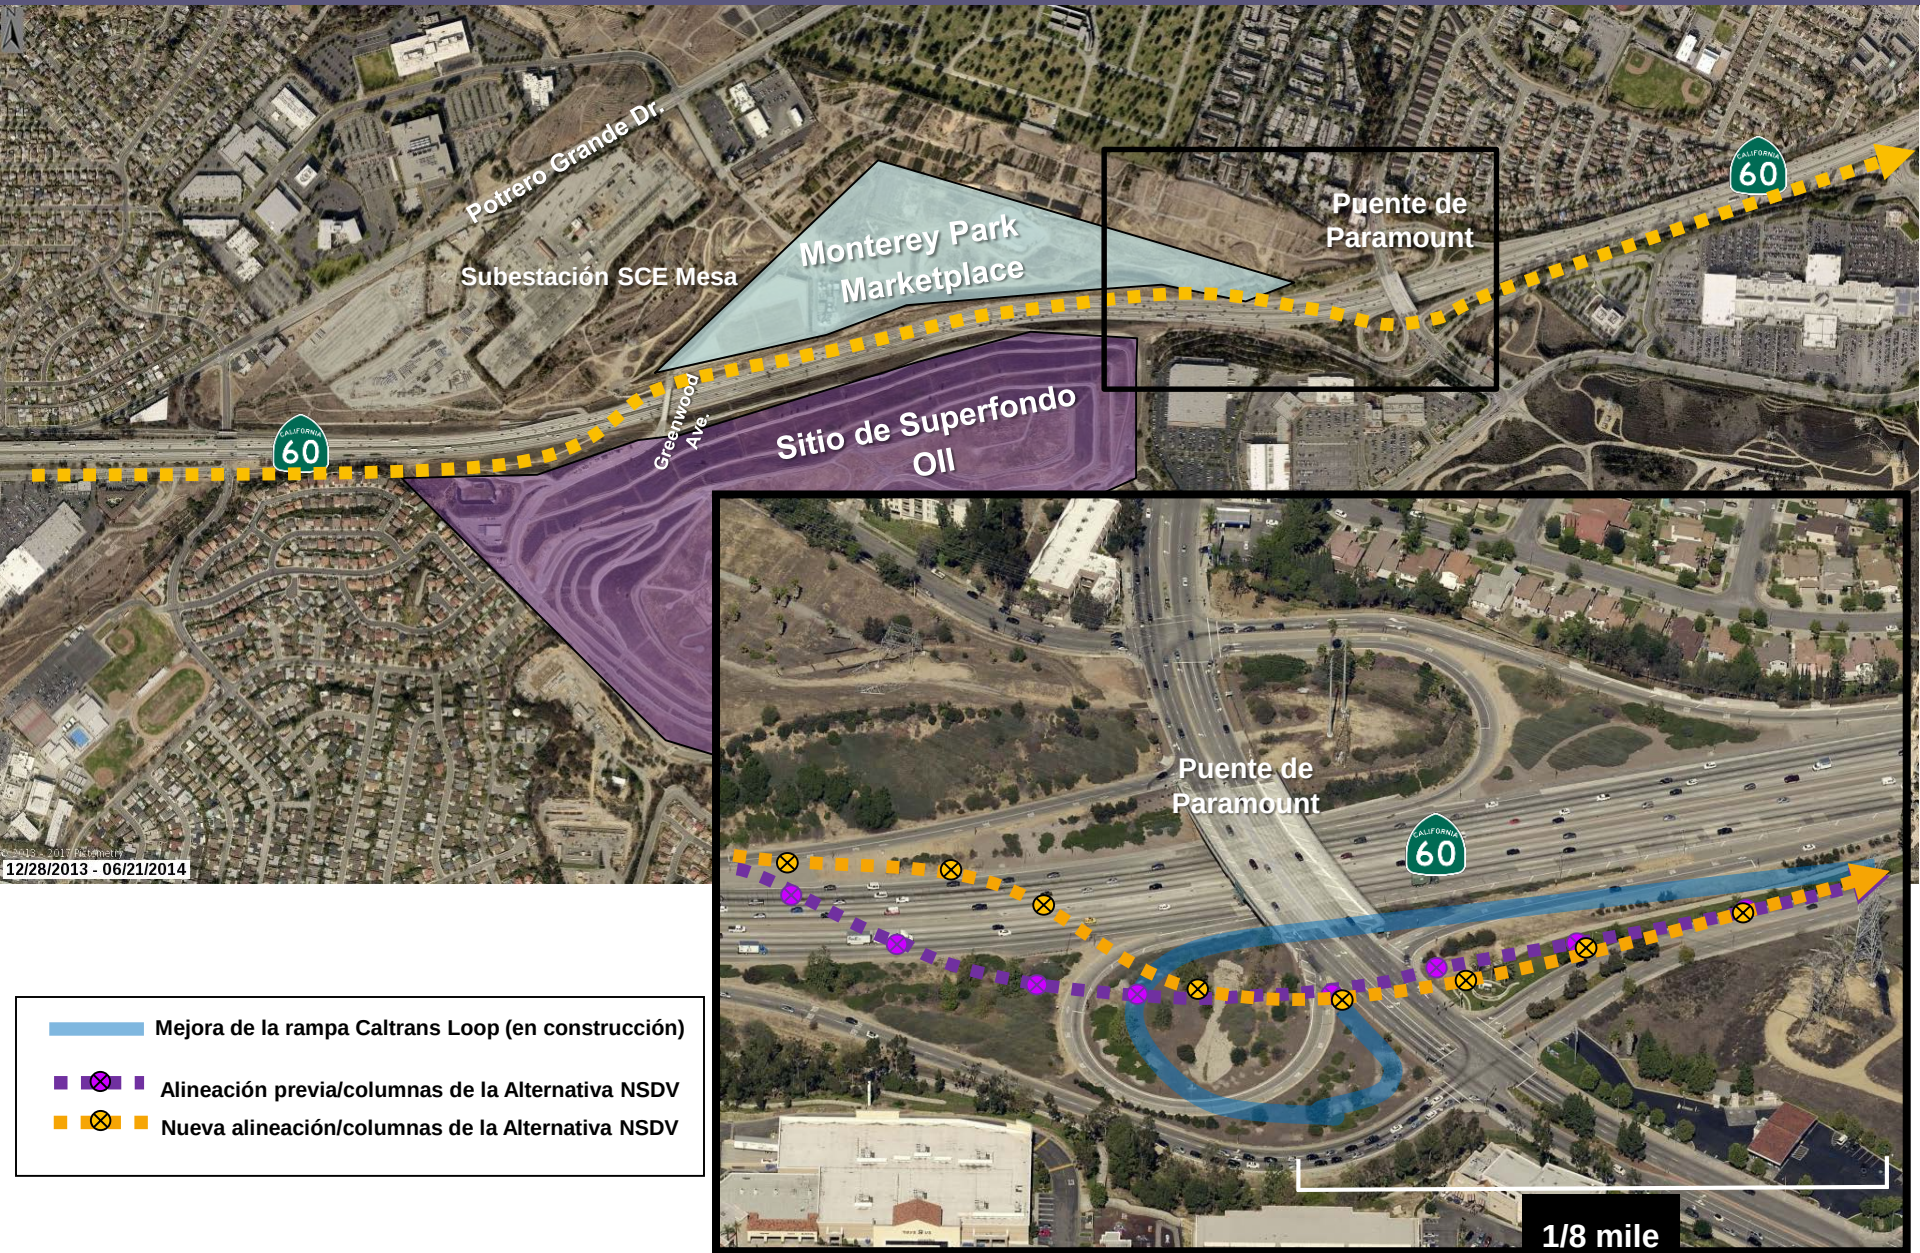
- **Noviembre de 2014: Estudio técnico dirigido por la Junta Directiva para:**
  - ✓**Responder a los comentarios de las agencias**
    - Agencia de Protección Ambiental de Estados Unidos (USEPA)
    - Cuerpo de Ingenieros del Ejército de Estados Unidos (USACE)
    - Departamento de Transporte de California (Caltrans)
    - Departamento de Pesca y Vida Silvestre de California (CDFW)
    - Southern California Edison (SCE)
  - ✓**Eliminar la elevación en Garfield Ave. entre Via Campo y Whittier Blvd.**
    - El Borrador del EIS/EIR eliminó la opción al nivel de la calle
  - ✓**Identificar una nueva conexión norte/sur a Washington Blvd.**
  - ✓**Explorar la viabilidad de operar las alternativas SR-60 y de Washington Blvd.**

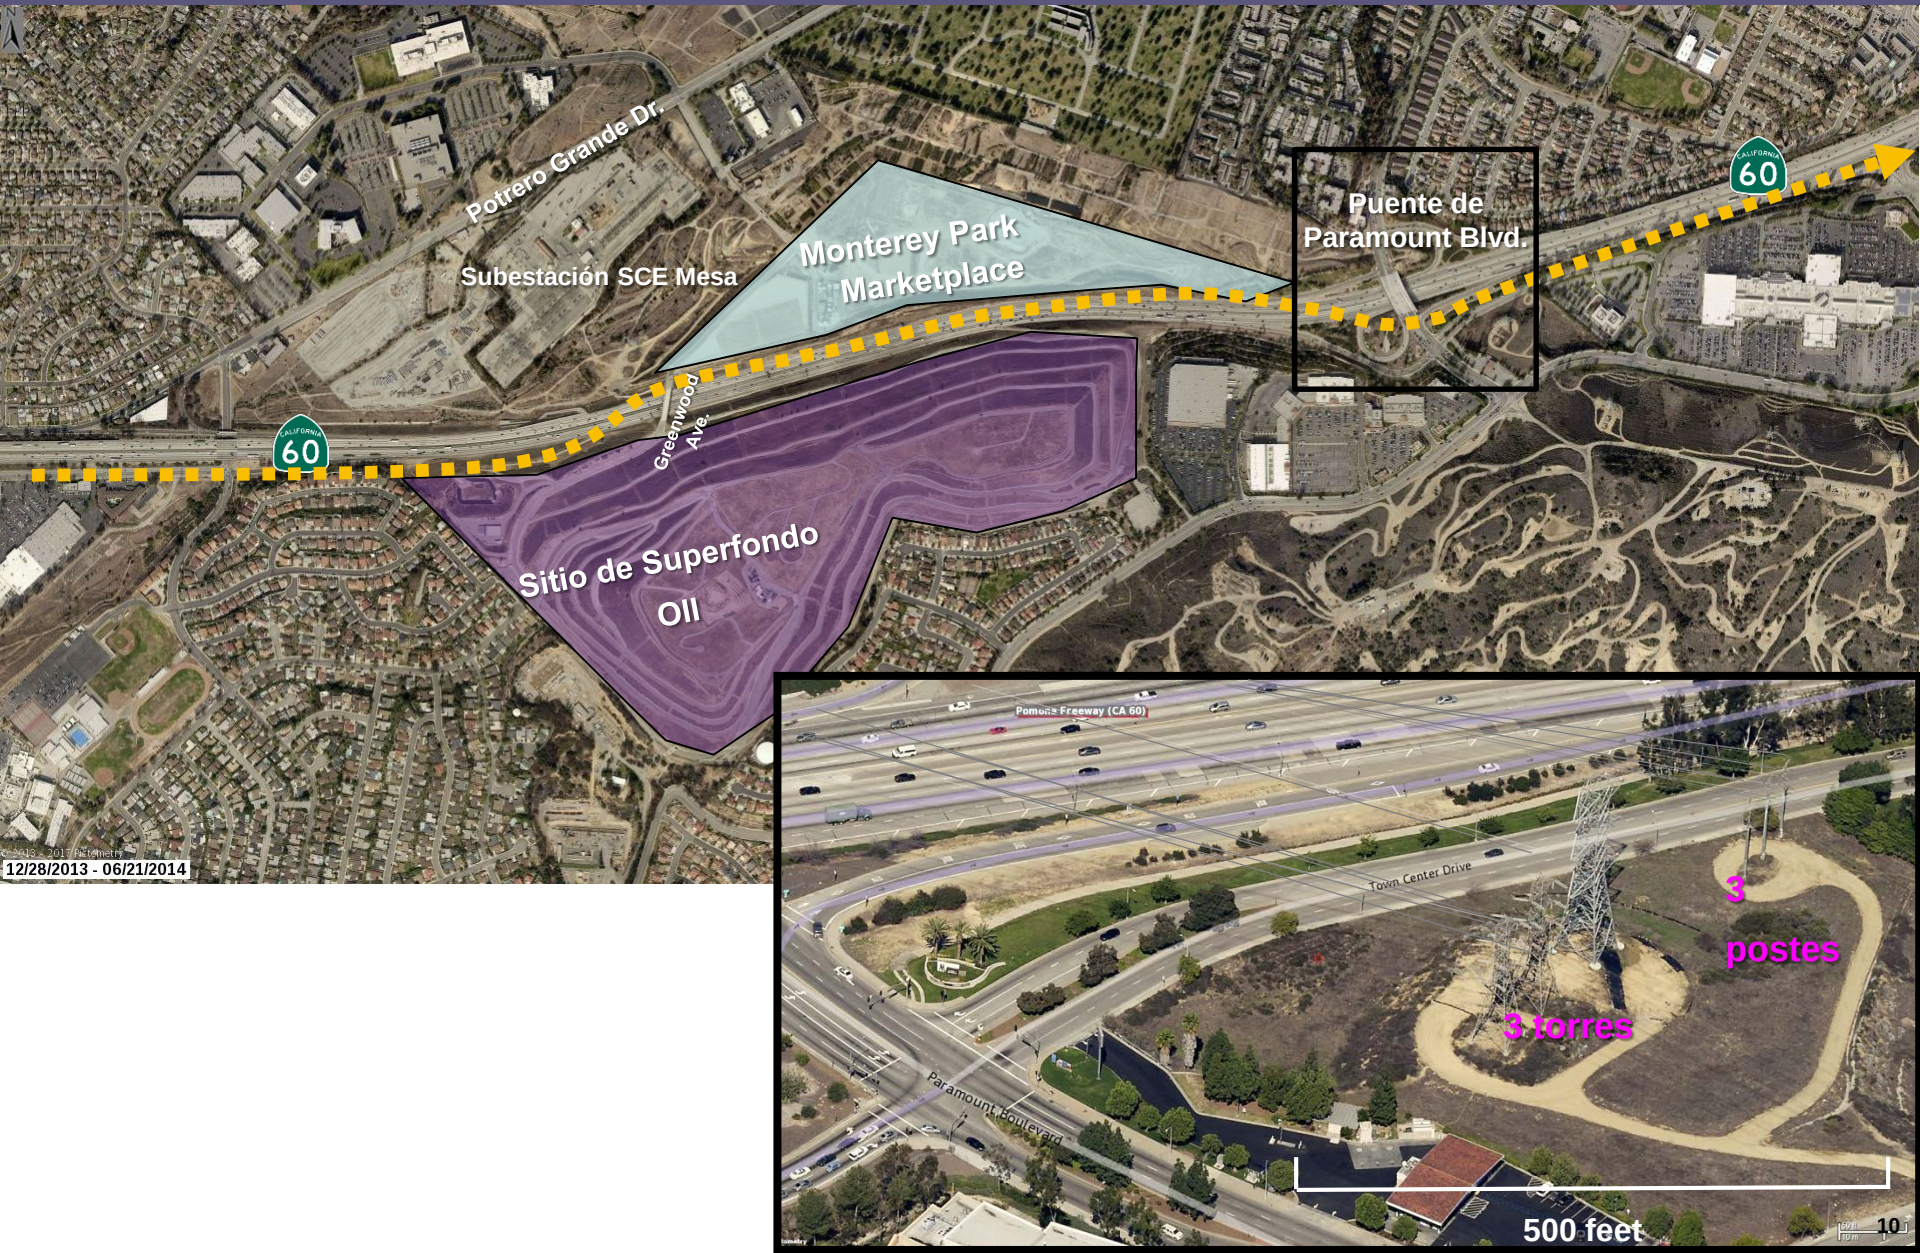
Fases del desarrollo del proyecto

Alternativa de Variación de Diseño del Lado Norte (NSDV) de la SR-60



Caltrans: Paso elevado de la NSDV en la SR-60 al oeste de Greenwood Ave afecta la posibilidad de ensanchar la SR-60 para crear carriles completos estándar y para vehículos de alta ocupacion (HOV)

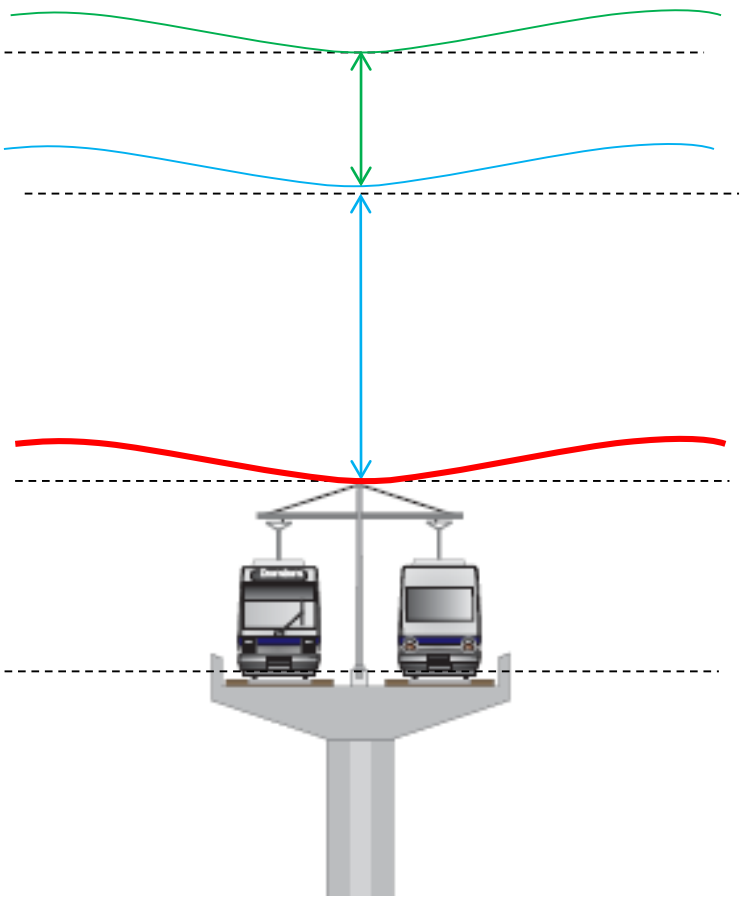




Desplazamiento del paso elevado de la NSDV en la SR-60 más hacia el este y con un perfil de grado reducido para minimizar el impacto visual en el desarrollo de Marketplace

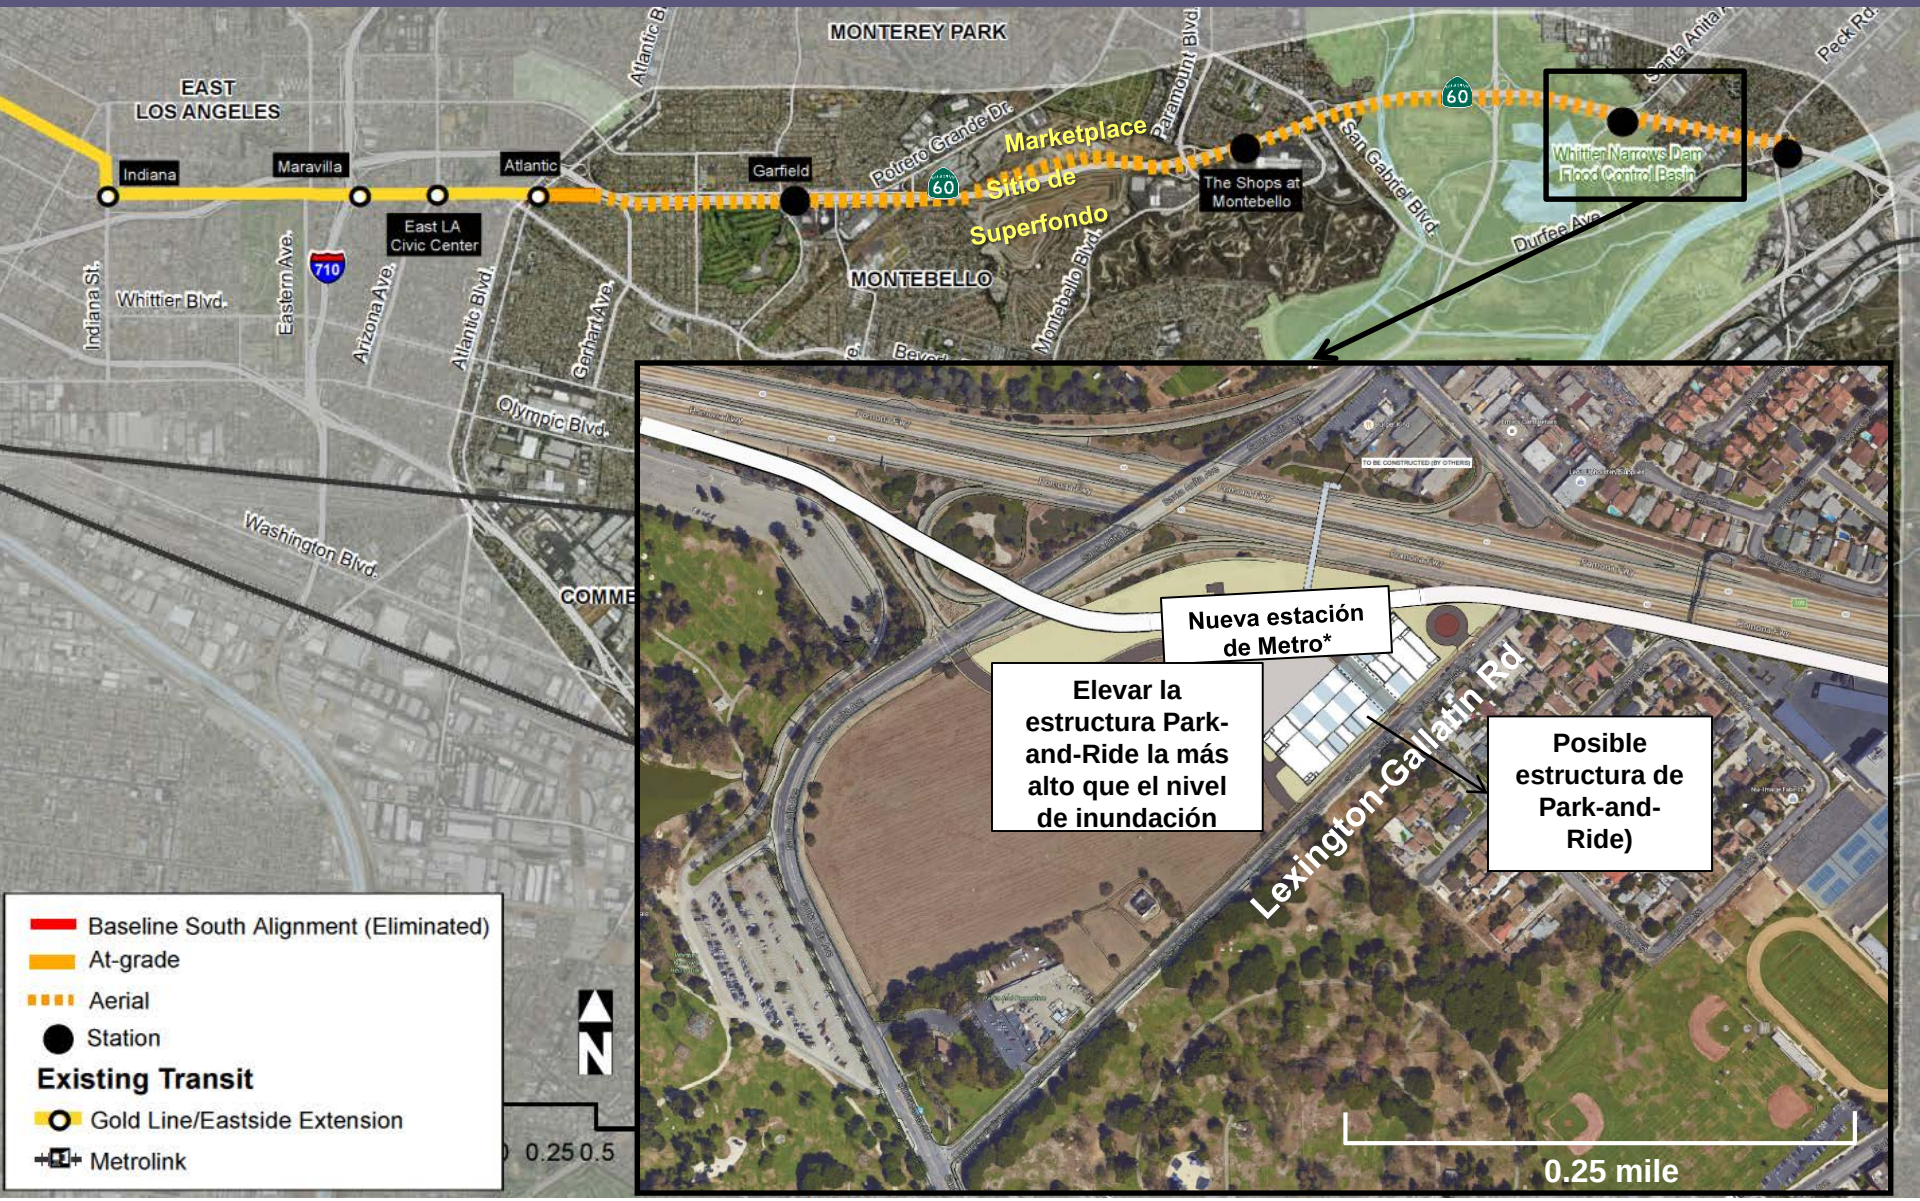
Reubicación de la colocación de columnas en la Alineación de la NSDV de la SR-60 para evitar conflictos con las nuevas rampas de la SR-60

Líneas de transmisión elevadas de SCE en el Intercambio de la SR-60/Paramount



Líneas de transmisión elevadas de SCE en el Intercambio de la SR-60/Paramount

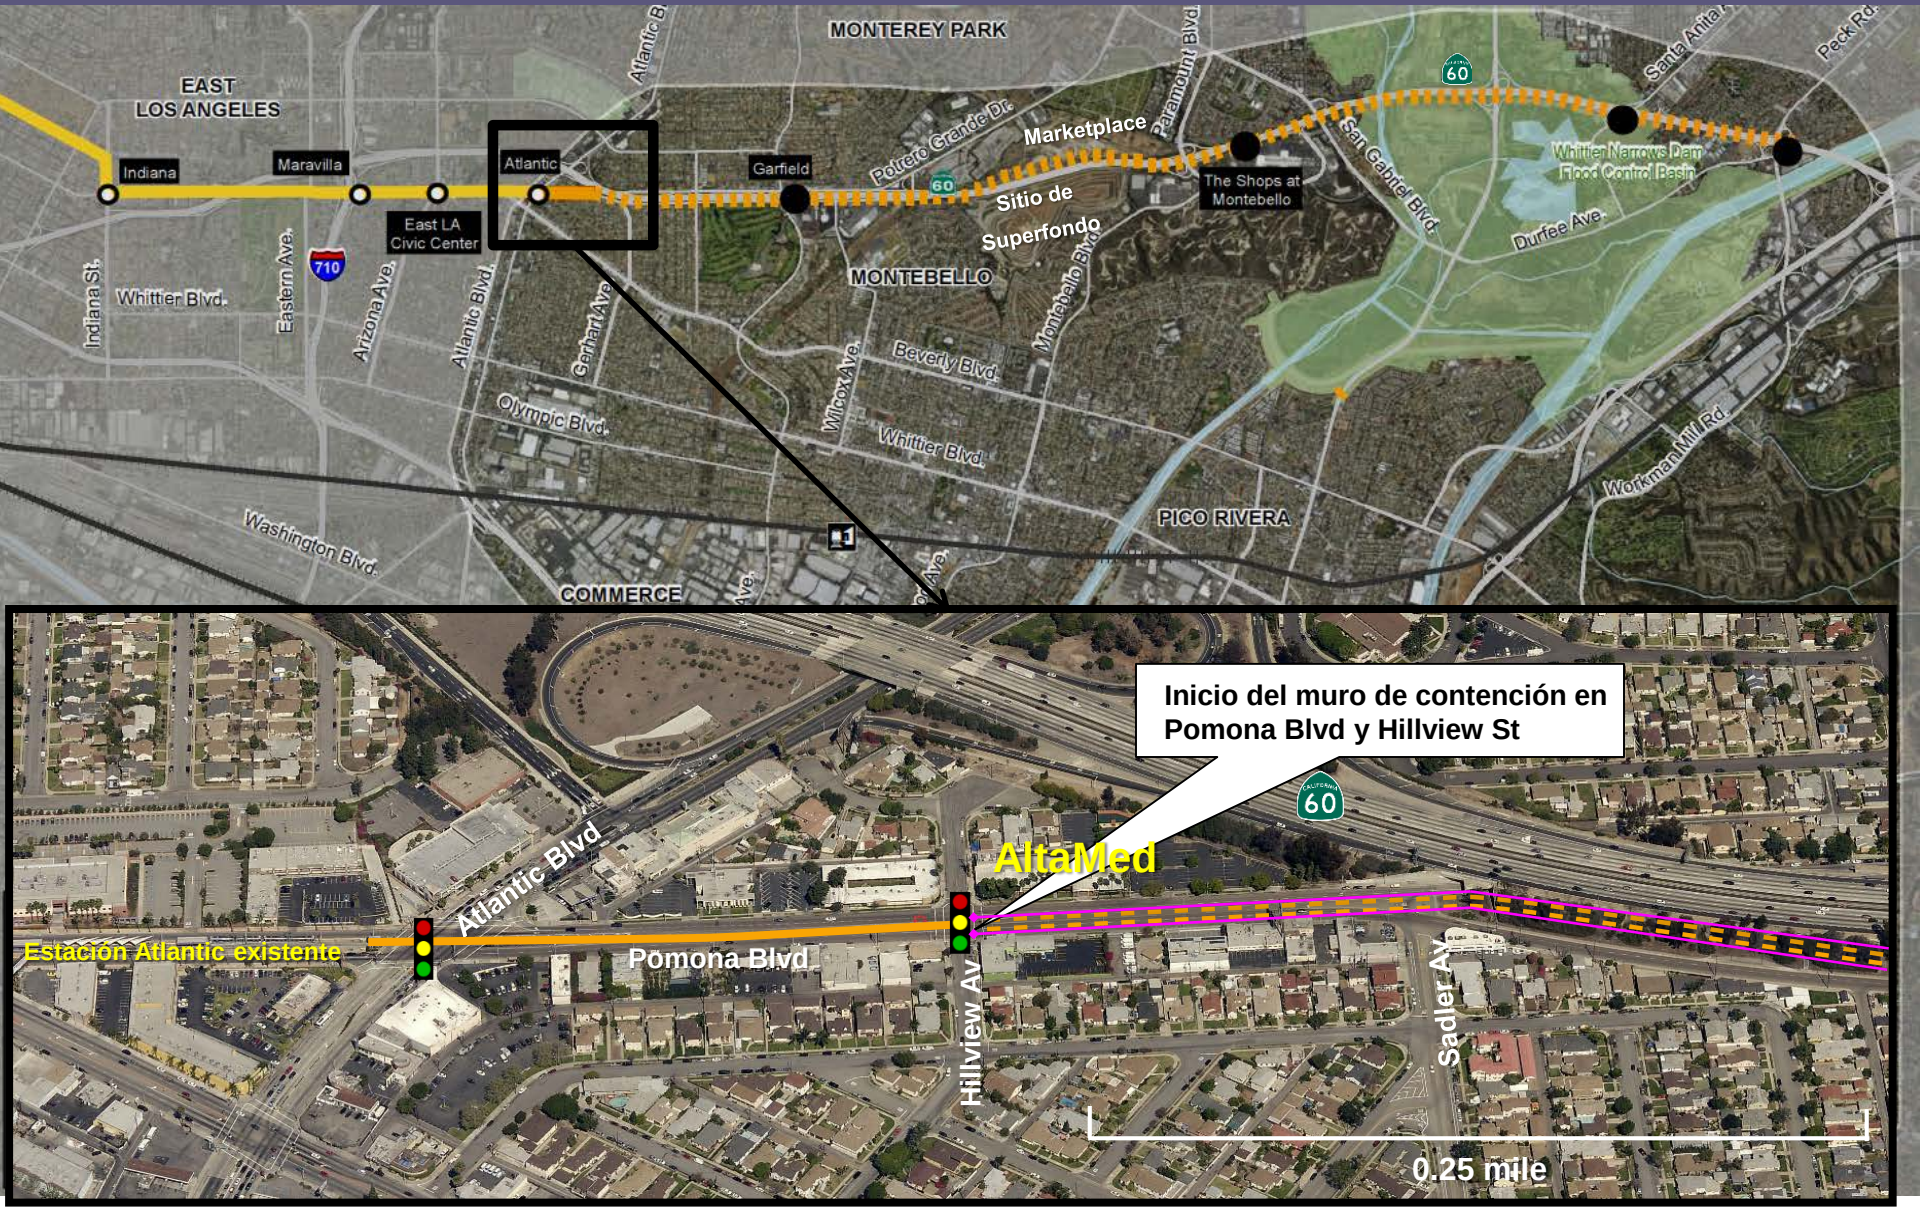
Nueva torre



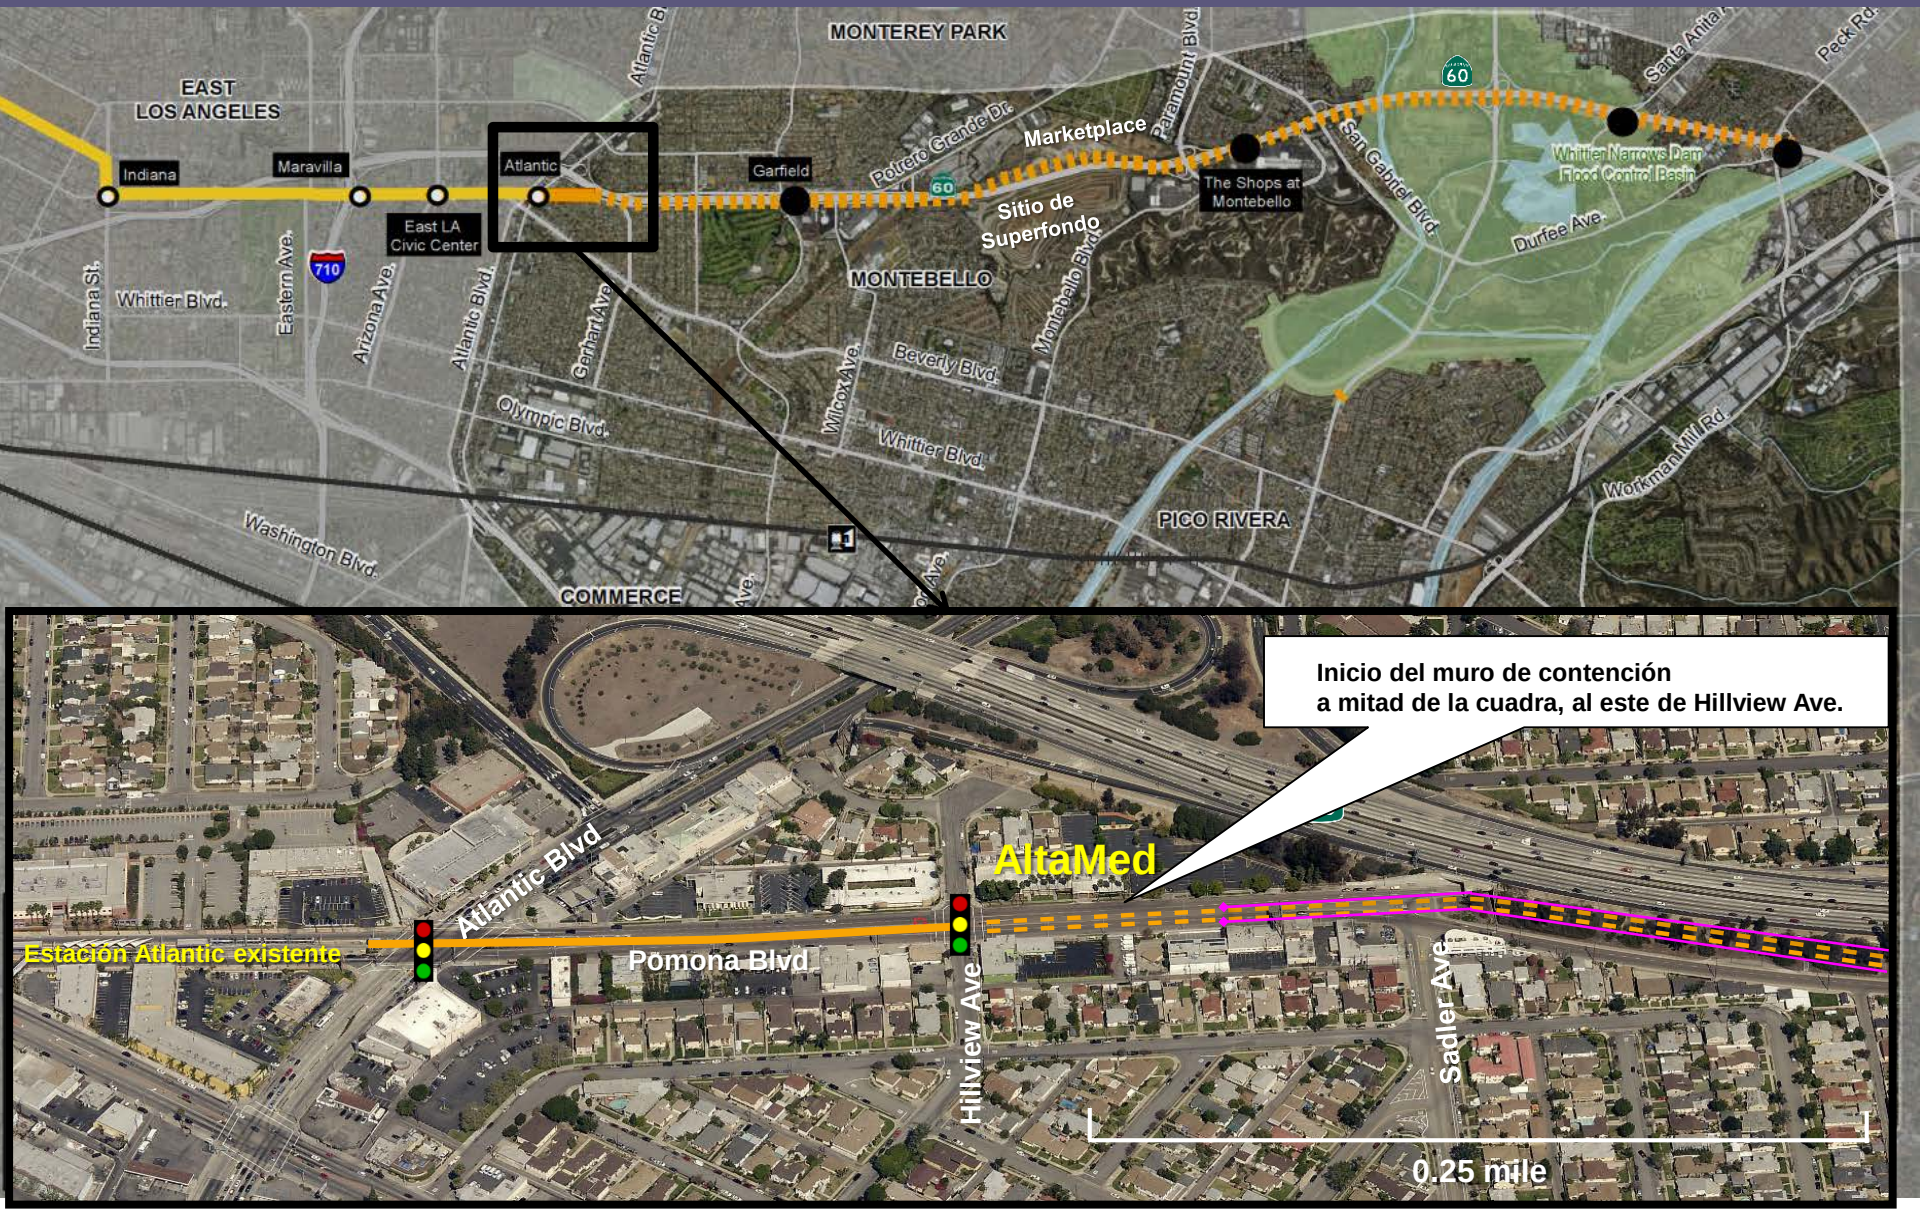
Altura de torre existente

Cables de transmisión existentes

Elevación de la guía



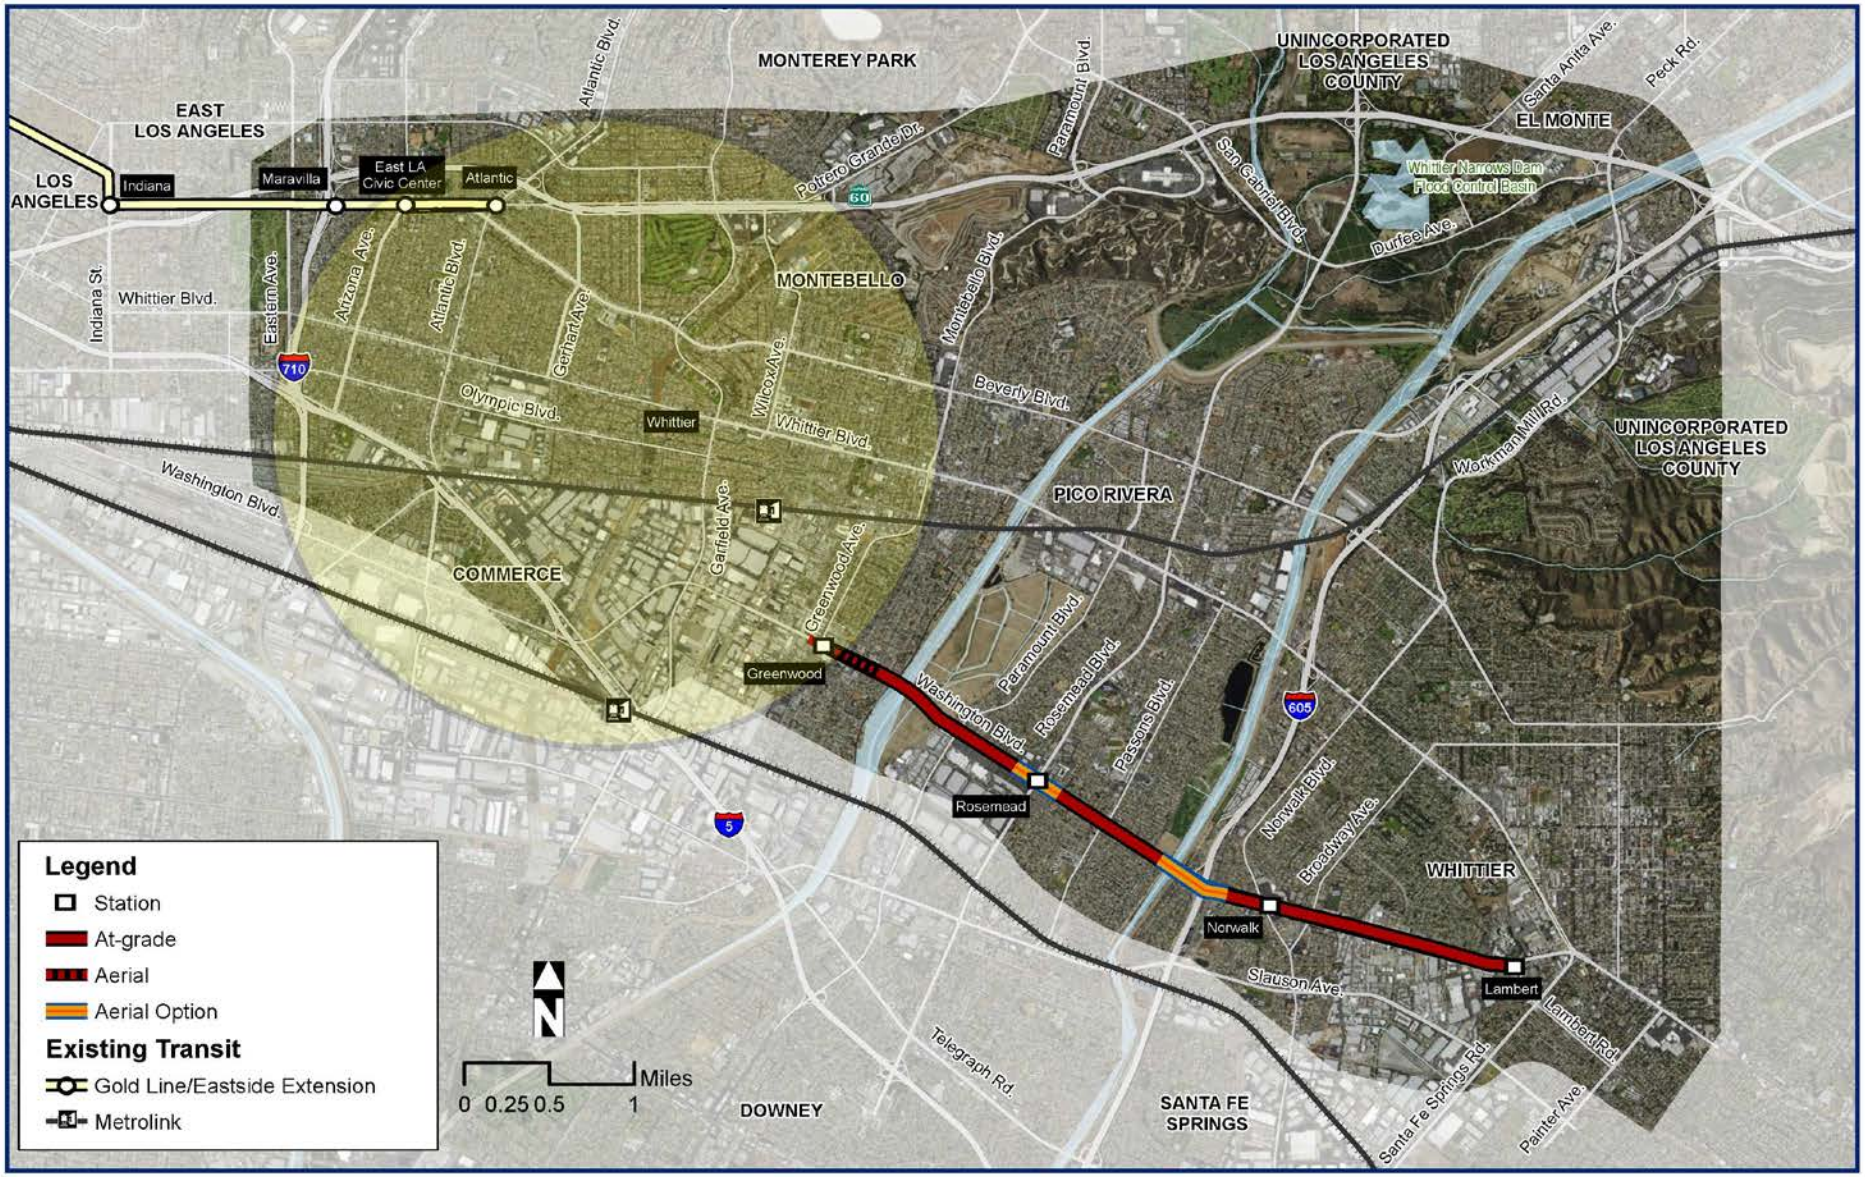
Cuenca de Control de Inundaciones de la Presa de Whittier Narrows
Concepto refinado de la Estación Santa Anita



*La ubicación de la estación y el diseño y concepto de la estructura de park-and-ride están sujetos a cambios a medida que continúa el análisis técnico

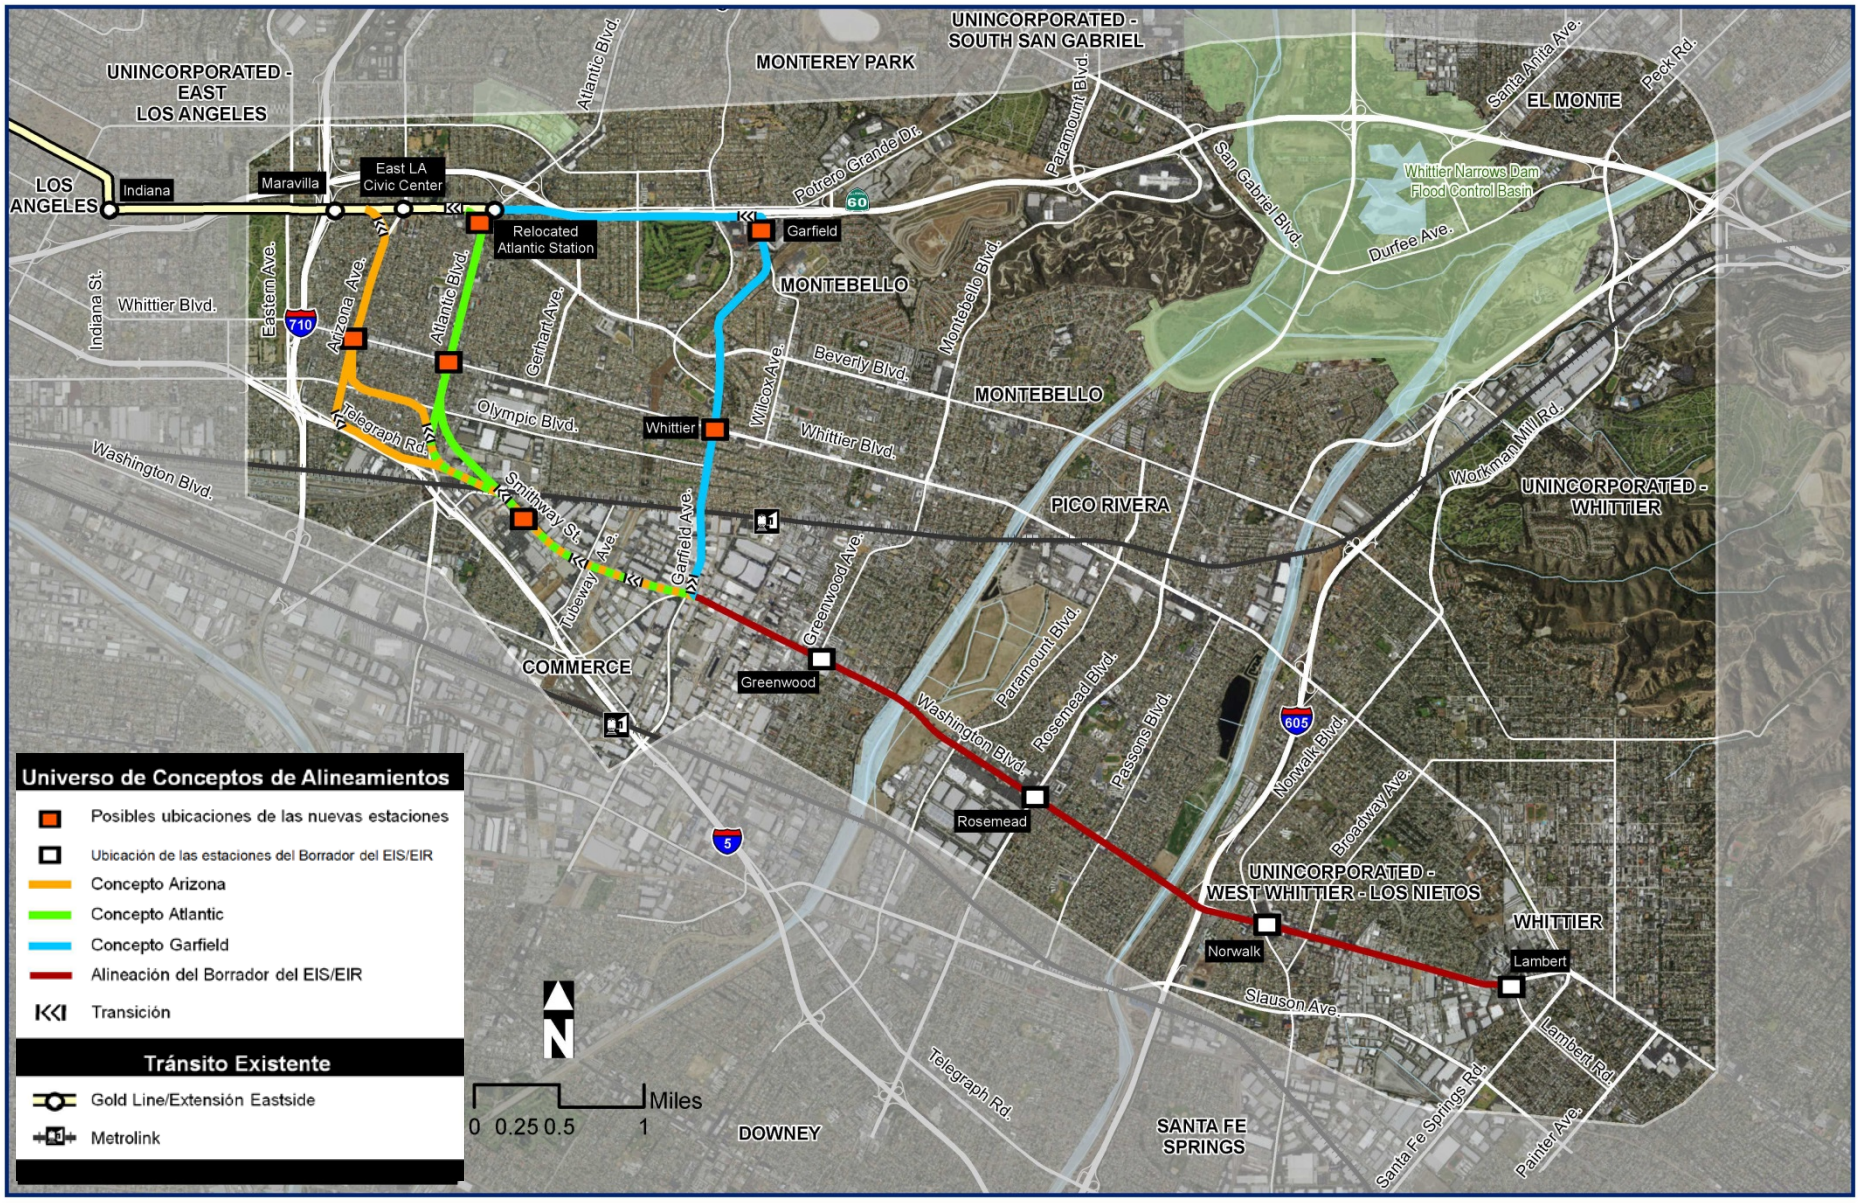
Transición de la Alternativa SR-60 del nivel de la calle a estructuras elevadas Suposiciones del Borrador del EIS/EIR de 2014

Transición de la Alternativa SR-60 del nivel de la calle a estructuras elevadas
Reubicación del muro de contención más hacia el este (Refinamiento propuesto)



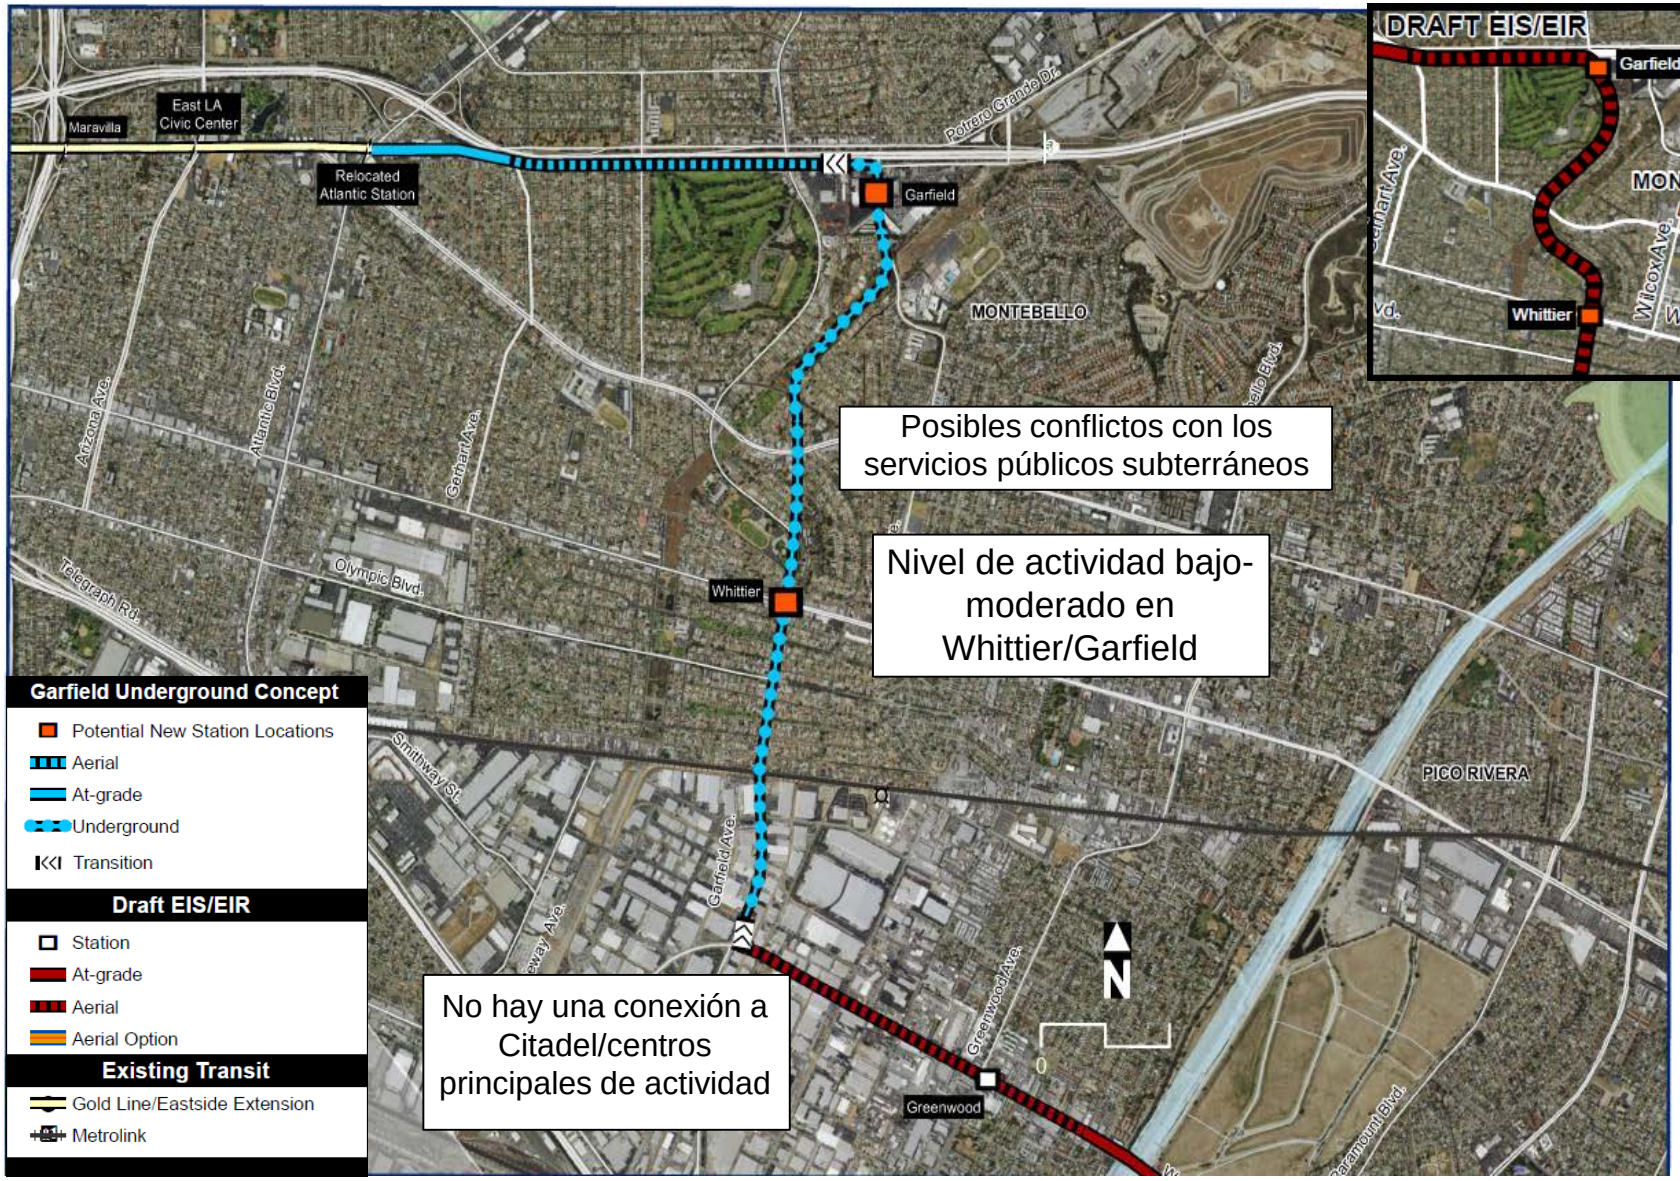
Lista de verificación de la Junta Directiva de Metro

Alternativa SR-60



- ✓ **Coordinación con las agencias para responder a sus comentarios**
- ✓ **Agencia de Protección Ambiental de Estados Unidos (USEPA)**
- ✓ **Cuerpo de Ingenieros del Ejército de Estados Unidos (USACE)**
- ✓ **Departamento de Transporte de California (Caltrans)**
- ✓ **Departamento de Pesca y Vida Silvestre de California (CDFW)**
- ✓ **Southern California Edison (SCE)**

No hay asuntos mayores pendientes con las agencias que prevengan resumir con los estudios ambientales de la Alternativa SR-60.



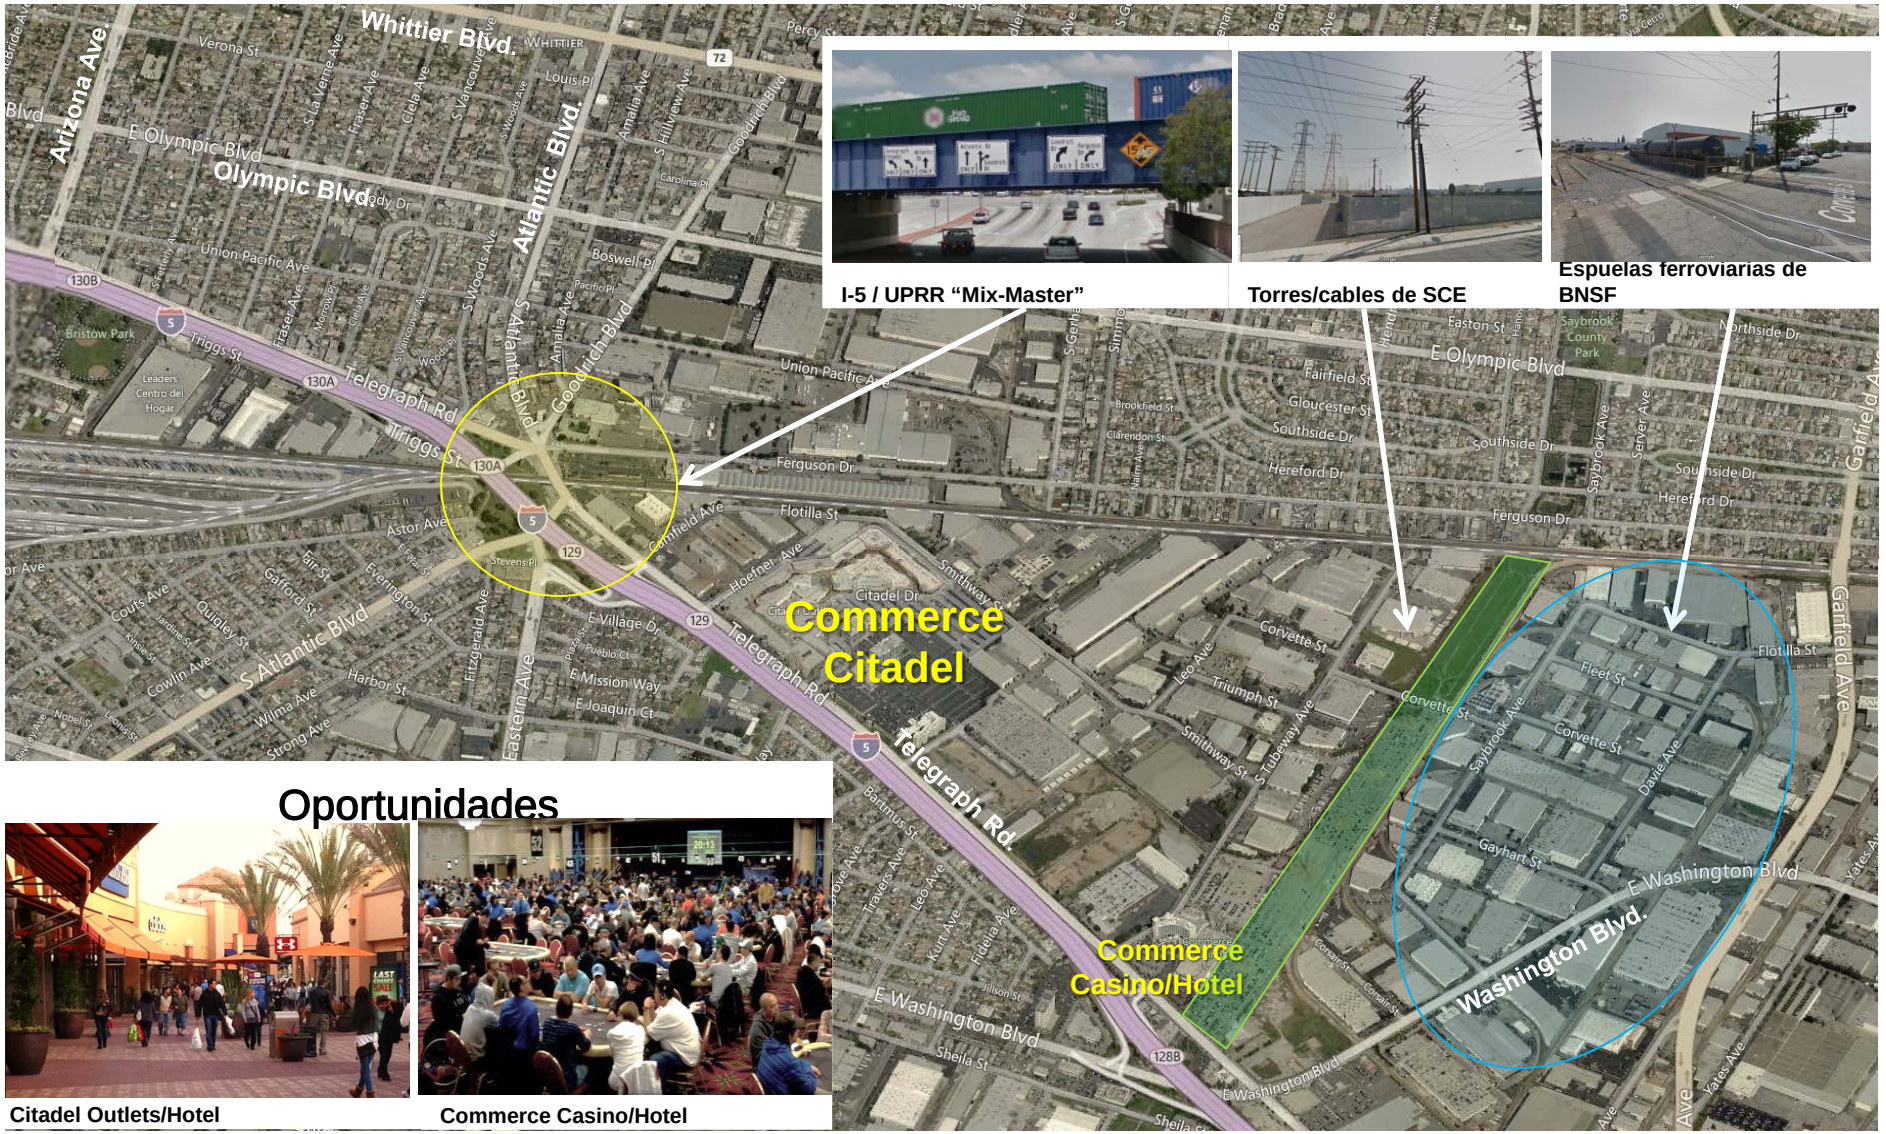
Identificar una nueva conexión norte-sur a Washington Boulevard

Alternativa de Washington Boulevard
Conceptos de conexión norte-sur

Concepto subterráneo de Garfield Avenue

Arizona: Problemas con la intersección 3rd/Mednik
Conceptos a nivel de calle y subterraneo

Posibles impactos a:



- Estación Civic Center existente y operaciones de la Gold Line
- Usos sensibles
- Propiedades residenciales
- Tráfico, acceso y estacionamiento
- Seguridad para peatones y ciclistas

Arizona Avenue

Arizona Ave. y Whittier Blvd. (Mirando hacia el sur)

Concepto de Sur Atlantic Blvd. - Oportunidades y Retos

I-5 / UPRR "Mix-Master"

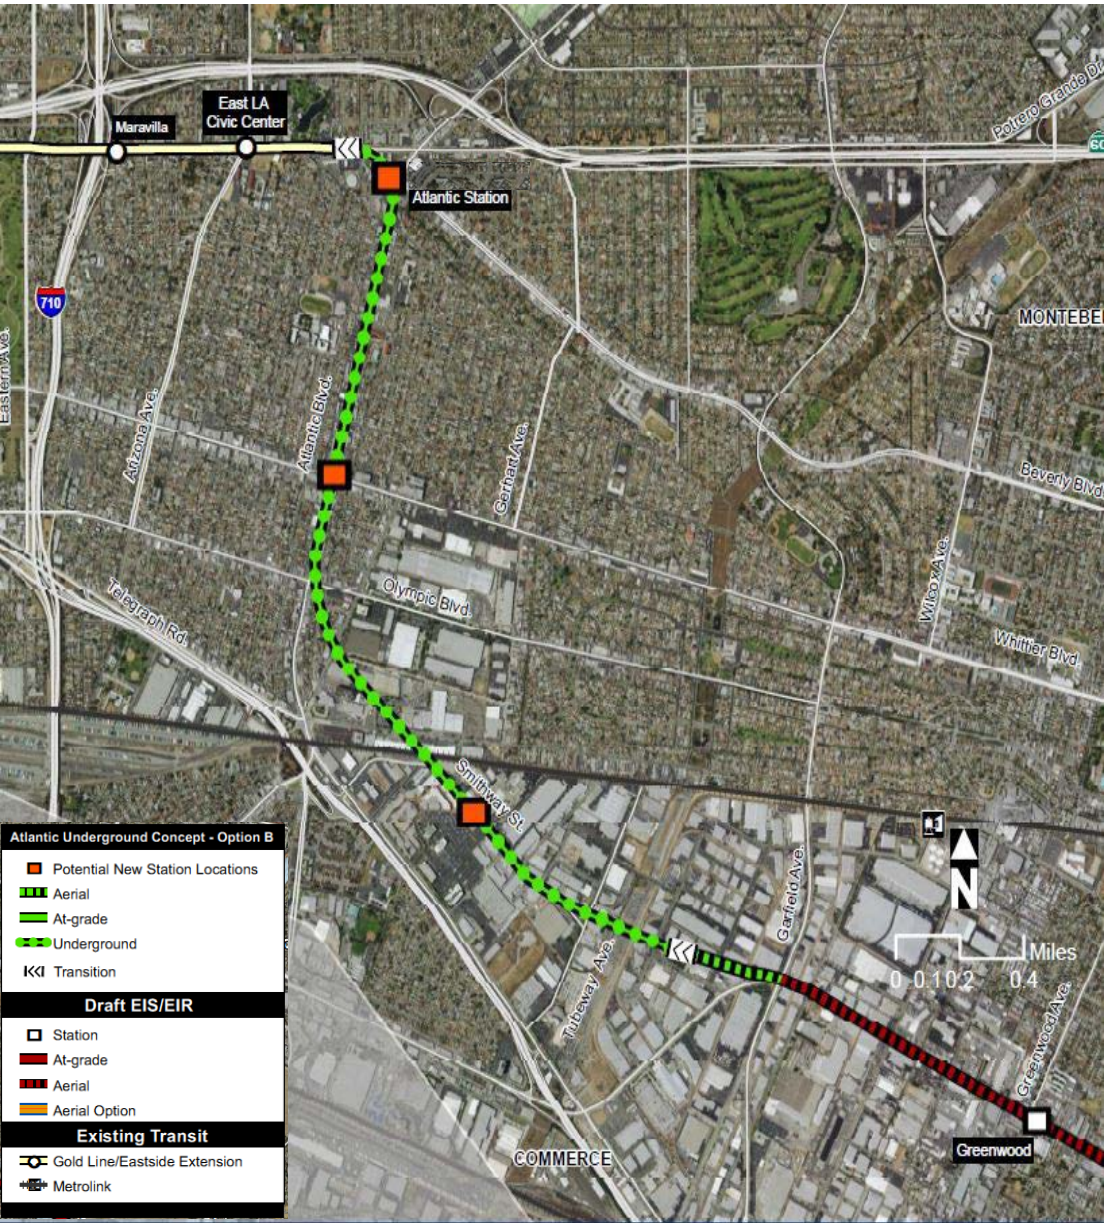
Torres/cables de SCE

Espuelas ferroviarias de BNSF

Oportunidades

Citadel Outlets/Hotel

Commerce Casino/Hotel



Borrador - Sólo para discusión

Atlantic Boulevard – Condición existente

Atlantic Blvd. y Whittier Blvd. (Mirando hacia el sur)

Concepto subterráneo de Atlantic – ¿Qué se necesita?

- **Dos portales para el túnel - uno en el norte y uno en el sur**

- **Dos lugares para lanzar y extraer la máquina tuneladora TBM – ubicaciones exactas desconocidas**

- **Excavación de las cajas de las estaciones**

Opción Subterránea de Atlantic

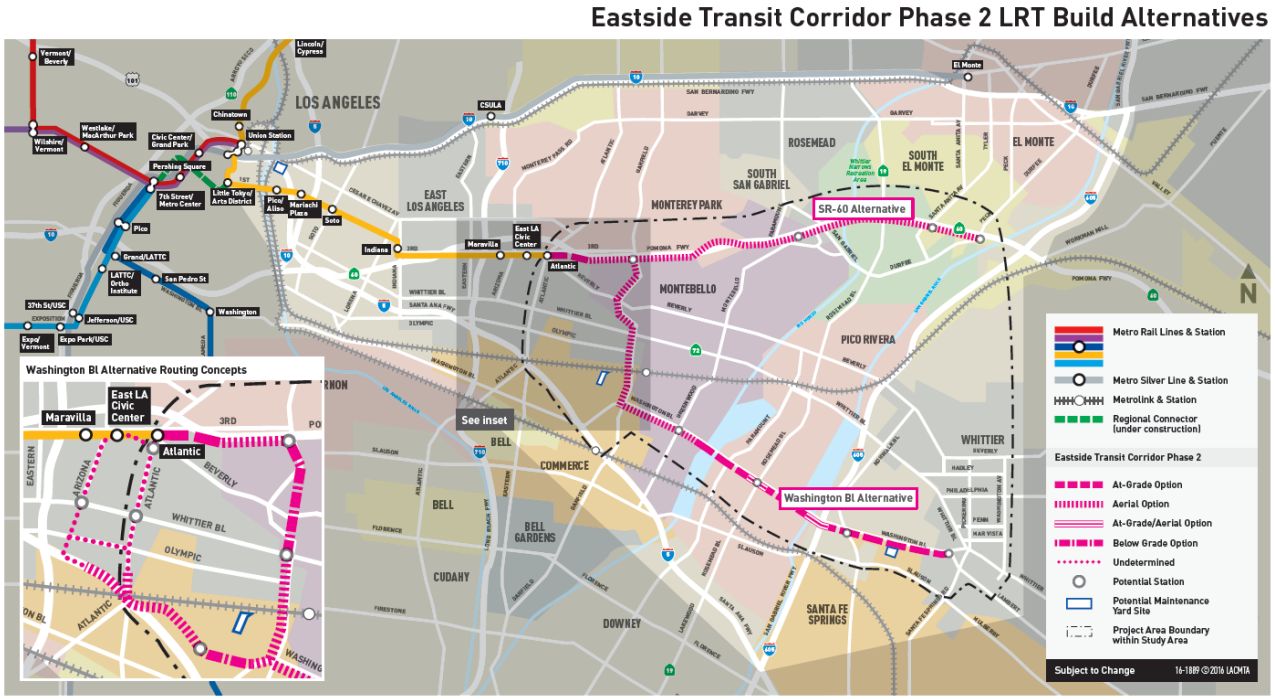
Recomendación del personal:

✓ Proceder con la Opción Subterránea de Atlantic como la nueva Alternativa para Washington

Lista de verificación de la Junta Directiva de Metro

Alternativa Washington

✓ **Eliminar la elevación en Garfield Ave. entre Via Campo y Whittier Boulevard.**
El Borrador del EIS/EIR eliminó la opción al nivel de la calle



✓ **Identificar una nueva conexión norte/sur a Washington Boulevard.**

Fondos de Medida M

Financiamiento Total: $6.0 Mil Millones

Fondos repartidos en dos fases:

- Fase 1: $3.0 Mil Millones en 2029
- Fase 2: $3.0 Mil Millones en 2053

Alternativa combinada

¿Podría funcionar una Alternativa combinada usando las alternativas de SR-60 y Washington?

Lista de verificación de la Junta Directiva de Metro

- ✓ Explorar la viabilidad de operar las alternativas SR-60 y Washington Blvd.

Comparta sus ideas

- Nos gustaría hacerle algunas preguntas sobre las alternativas. La siguiente encuesta es diseñada para obtener sus opiniones sobre el proyecto del Fase 2 del Corredor de Tránsito del Lado Este.
- La encuesta consiste de cinco preguntas.
- Por favor, responda utilizando el aparato
  - Las respuestas de las preguntas de opción múltiple corresponden con los números en los aparatos de votar
  - No hay respuestas correctas o incorrectas

Pregunta de prueba

¿Alguna vez ha viajado en la Gold Line de Metro?

1. Sí
2. No

Pregunta 1

¿Cuál es la razón más importante para implementar la extensión al Este 2?

1. La creación de una conexión con el sistema regional
2. La congestión de tráfico en el este de la ciudad
3. Revitalización económica
4. Mejorar el acceso a los principales centros de actividad y empleos
5. Otro

Pregunta 2

¿Cuál es la consideración más importante para una estación de Metro Rail?

1. La cercanía a los centros de actividad
2. Facilidad de acceso (caminando, en bicicleta, autobús, estacionamiento, etc.)
3. Seguridad y protección
4. Posibilidad de revitalización económica
5. Otro

Pregunta 3

En base a lo que escuchó hoy,
¿cuál es su mayor preocupación?

1. Tráfico/circulación/estacionamiento

2. Actividades de construcción
(desplazamiento/inconvenientes para los residentes y/o negocios)

3. Seguridad y protección

4. Impactos a la calidad del aire

5. Otro

Pregunta 4

¿Está usted de acuerdo o en desacuerdo con la siguiente declaración? "El concepto de la Opción Subterránea de Atlantic tiene suficiente mérito para ser recomendado como la nueva Alternativa de Washington Blvd."

1. De acuerdo
2. Neutral
3. En desacuerdo

Pregunta 5

Basado en lo que escuchó, ¿hay mérito en agregar una alternativa combinada que incluya las alternativas SR-60 y de Washington Blvd. en la siguiente fase del estudio?

1. Sí
2. No
3. Tal vez

Próximos Pasos/Programa

- Primavera de 2017 – Consideración de los resultados del Estudio técnico por parte de la Junta Directiva de Metro
- Verano/Otoño de 2017 – Reinicio del Proceso ambiental

Agendas

Eastside Transit Corridor Phase 2
Community Meeting
Agenda
6-8 PM

Monday, March 28	Tuesday, March 29	Wednesday, March 30	Thursday, march 31
Whittier Senior Center	**East Los Angeles Library**	**Quiet Cannon**	**So. El Monte Senior Center**
13225 Walnut Street	4837 E. 3rd Street	901 Via San Clemente	1556 Central Avenue
Whittier, CA 90602	Los Angeles, CA 90022	Montebello, CA 90640	South El Monte, CA 91733

Welcome Desk – Please sign in to be added to our project database

1. **Open House –** Visit stations to learn more about:
   - Eastside Transit Corridor Phase 2 Technical Study Background
   - SR 60 North Side Design Variation (NSDV) Alternative
   - Washington Boulevard North-South Connection Concepts

2. **Opening Remarks –** Welcome, introductions, and overview of meeting format

3. **Presentation –** Get an update on recent project developments

4. **Interactive Discussion –** Break out into discussion groups and share your thoughts

5. **Comments –** Provide your comments on comment cards

Thank You for Coming!

Corredor de Transporte hacia el Este Fase 2
Reunión Comunitaria
Agenda
6-8 PM

Lunes, 28 de marzo	Martes, 29 de marzo	Miércoles, 30 de marzo	Jueves, 31 de marzo
Whittier Senior Center	**East Los Angeles Library**	**Quiet Cannon**	**So. El Monte Senior Center**
13225 Walnut Street	4837 E. 3rd Street	901 Via San Clemente	1556 Central Avenue
Whittier, CA 90602	Los Angeles, CA 90022	Montebello, CA 90640	South El Monte, CA 91733

Mesa de Bienvenida - Por favor inscribirse para ser incluido en la lista de interés del Proyecto

1. **Casa Abierta** - Visite estaciones para aprender más acerca de:
   - Antecedentes del Estudio Técnico del Corredor de Transporte hacia el Este Fase 2
   - SR-60: Alternativa de diseño en el lado norte (NSDV)
   - Conceptos de conexión norte-sur a Washington Boulevard

2. **Bienvenida** - Introducciones y formato de la reunión

3. **Presentación** – Actualizaciones del proyecto

4. **Sesión Interactiva** – Formar grupos para discusión y para compartir comentarios

5. **Comentarios** - Por favor deje sus comentarios en las tarjetas proporcionadas

¡Gracias por Acompañarnos!

Eastside Transit Corridor Phase 2
Community Meeting
June 22, 2016
Agenda

6-8 PM
Griffith Middle School
Cafeteria
4765 E 4th St
Los Angeles, CA 90022

Welcome Desk – Please sign in to be added to our project database

1. **Open House –** Visit stations to learn more about:
   - Eastside Phase 2 Technical Study Background
   - State Route 60 Alternative
   - Washington Boulevard Alternative (North-South Connection Concepts)

2. **Opening Remarks –** Welcome, introductions, and overview of meeting format

3. **Presentation –** Get an update on recent project developments

4. **Interactive Discussion –** Join any discussion groups and share your thoughts

5. **Comments –** Provide your comments

Fact Sheets

What is Light Rail Transit?

¿Qué es transporte de Tren Ligero?

EASTSIDE TRANSIT CORRIDOR PHASE 2

CORREDOR DE TRANSPORTE HACIA EL ESTE FASE 2

SUMMER 2014

VERANO DEL 2014

Metro®

LRT Fact Sheet

Hoja informativa de tren ligero

What is Light Rail Transit?

Light Rail Transit, or LRT, is designed to provide residents and businesses safe, affordable, and efficient transportation options. LRT operates on fixed rails in right-of-way that is separated from other traffic for part or most of its route. LRT rail cars run relatively quietly on electricity, powered by an overhead electric line that the trains connect with, and typically operate with two-car or three-car trains. LRT functions best as a local service with station stops approximately one mile apart.

LRT provides communities with a transportation option that reduces congestion and is dependable. Unlike automobiles and most bus service, LRT systems enjoy signal prioritization, dedicated right-of-way, and can carry up to three times the passenger capacity of a bus. LRT riders can reach their destination faster without the stress of driving. In addition, congestion can be reduced as a result of fewer automobiles on the road.

LRT technology isn't new. Used extensively around the world and throughout the U.S., LRT has a proven track record. For example, in Los Angeles County, the old street car and electric interurban railways provided service from the 1890s through World War II. Today, newer and more environmentally friendly LRT cars are providing service again throughout Los Angeles County, including the Metro Gold, Blue, Green, and Exposition Lines.

¿Qué es el Tren Ligero

El Tren Ligero (LRT) es un tren diseñado para brindar a los residentes y negocios opciones de transporte seguro, económico y eficiente. Este tipo de tren opera sobre una vía de derecho que está separada del tráfico por la mayor parte de su ruta. LRT viajan relativamente silenciosos con electricidad, normalmente con tres tranvías conectados. El LRT funciona mejor como un servicio local con paradas frecuentes en estaciones, usualmente a una milla de distancia.

El LRT brinda a las comunidades una opción de transporte que reduce la congestión y es confiable. A diferencia de los automóviles y autobuses, el sistema LRT tiene prioridad de señalización, rutas dedicadas y puede transportar hasta tres veces la cantidad de pasajeros de un autobús. Usuarios del LRT pueden llegar a su destino más rápido sin el estrés de conducir y, por otra parte, conductores pueden tener un viaje más suave con menos vehículos en las calles.

La tecnología LRT no es nueva. Usada ampliamente en todo el mundo y a lo largo de los Estados Unidos, la efectividad del LRT ha sido comprobada. Por ejemplo, en el Condado de Los Ángeles los servicios de los tranvías y interurbano eléctricos antiguos fueron usados desde la década de 1890 hasta la Segunda Guerra Mundial. Hoy en día, los tranvías LRT modernos son más ecológicos y están proporcionando servicio otra vez a lo largo del Condado de Los Ángeles, incluyendo el Metro Gold, Blue, Green y Exposition Lines.

LRT is safe.

Metro uses federal and state standards, as well as accepted industry standards for LRT designs and operations.

LRT is a proven safe and reliable mode of travel. When traveling on local streets, trains follow posted speed limits and traffic signs and have synchronized signal timing to allow them to pass safely through intersections. Stations are designed with platforms that have large loading areas for people entering and exiting the trains, including pedestrian walkways that connect to the nearest public sidewalks. Elevated stations provide elevators, escalators, stairs and ramps that can also accommodate persons with disabilities and/or special emergency needs.

El LRT es seguro.

Metro usa estándares federales y estatales, así como estándares industriales aceptados, para diseños y operaciones del LRT.

La seguridad y confiabilidad del LRT como medio de transporte está comprobada. Cuando viajan por calles locales, los trenes siguen los límites de velocidad y están sincronizados con los semáforos para que se les permite pasar de manera segura por las intersecciones. Las estaciones están diseñadas con plataformas que tienen áreas amplias para que las personas puedan entrar y salir del tren, incluyendo vías peatonales que se conectan a las banquetas públicas más cercanas. Las estaciones elevadas cuentan con elevadores, escaleras eléctricas, escalones y rampas que ayudan a las personas con discapacidades y/o necesidades especiales en casos de emergencias.

Don't Confuse LRT with Commuter Rail...

It is common for people to think rail systems are all the same, however, nothing could be further from the truth. LRT service is different from "commuter rail," which includes Metrolink and Amtrak. Though both modes usually use standard gauge tracks, commuter rail usually involves larger trains with regional stations spaced several miles apart.

Commuter rail trains are designed for longer distance commutes between counties, with faster speeds. Another operational difference between the two types of rail service is the frequency of service. While LRT and commuter rail both provide high frequency service during peak morning and evening hours, only LRT maintains 15-20 minute intervals throughout the entire day, with higher service frequencies offered in peak hours.

No se confunda.

Es común que la gente piense que todos los proyectos de trenes son iguales, sin embargo, esto no es correcto. El servicio del LRT es diferente al servicio de larga distancia como Metrolink y Amtrak. Aunque los dos sistemas usan vías estándar, el tren de larga distancia normalmente cuenta con trenes más grandes cuales incluyen estaciones regionales distanciadas por varias millas.

Los trenes de larga distancia están diseñados para ofrecer servicio de transporte entre condados a velocidades más altas y distancias de viaje más largas. Otra diferencia operativa involucra la frecuencia del servicio. Aunque el LRT y el tren de largas distancias ofrecen un servicio de alta frecuencia en las horas pico de la mañana y la tarde, sólo el LRT mantiene intervalos de servicio de 15 a 20 minutos durante todo el día.

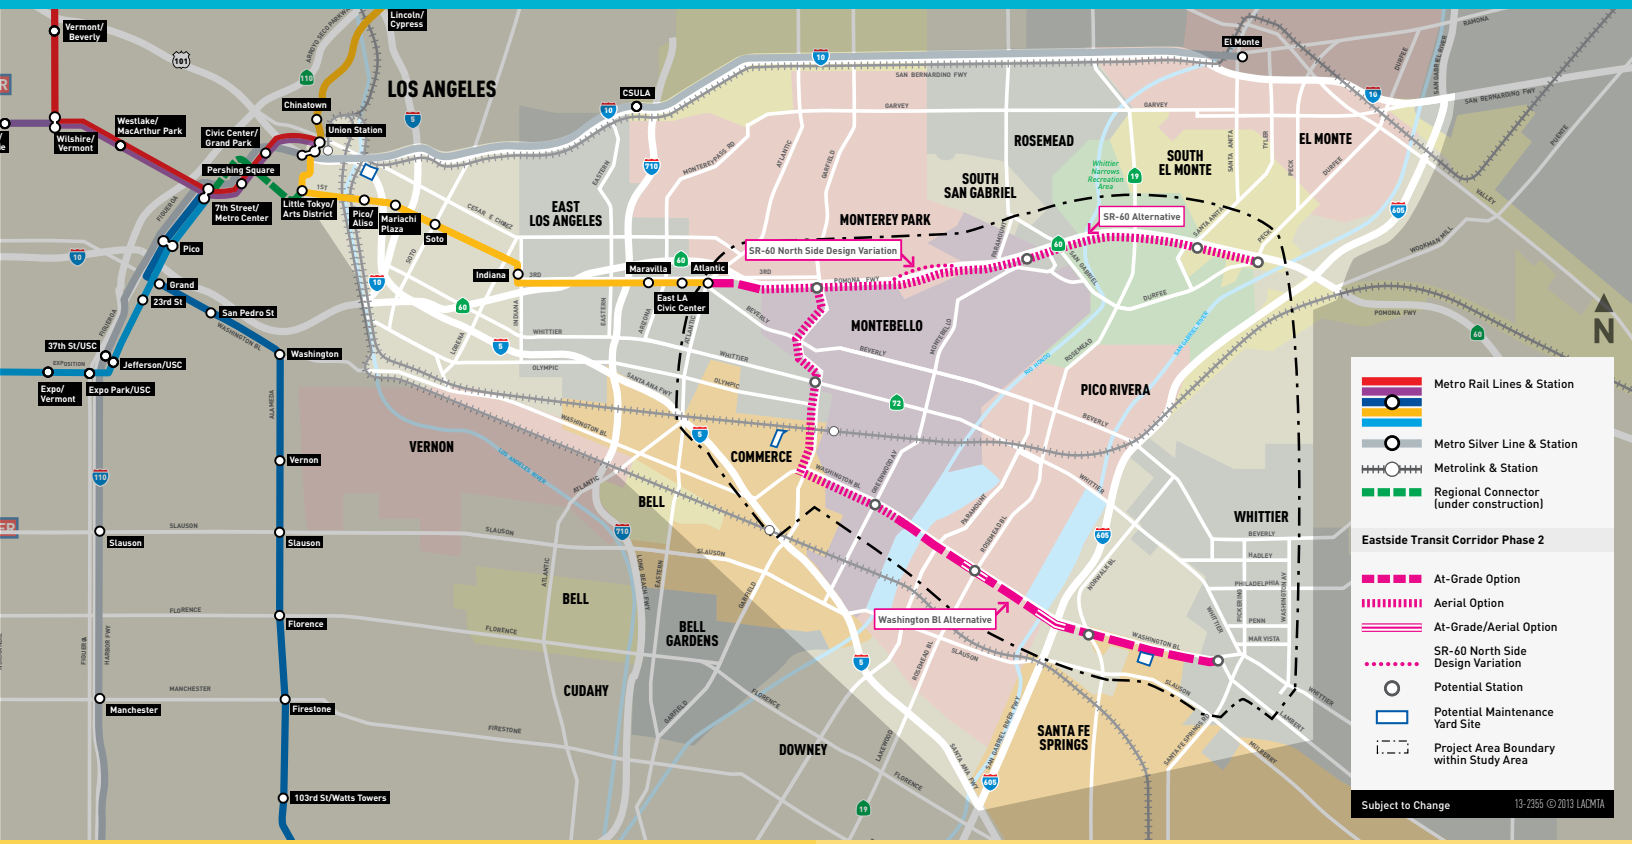
EASTSIDE TRANSIT CORRIDOR PHASE 2

CORREDOR DE TRANSPORTE HACIA EL ESTE FASE 2

SUMMER 2014

VERANO DEL 2014



Metro®

Overview Fact Sheet

Información General

Eastside Transit Corridor Phase 2 *Corredor de Transporte hacia el Este Fase 2*

Metro is studying alternatives to extend the first phase of the Metro Gold Line Eastside Extension farther east from where the line currently ends at Pomona Bl and Atlantic Bl in East Los Angeles.

The Phase 2 project area includes portions of 8 cities and portions of Unincorporated Los Angeles County.

The project area is home to approximately 720,850 residents, representing 7% of the Los Angeles County population. Over the next 25 years, the population is expected to grow by 12%, with a 7% employment growth projected during the same period.

The project area includes a number of highly congested freeways and arterials, including I-5, SR-60, I-10, Beverly Bl, Whittier Bl and Washington Bl. Every day, approximately 55% of commuters leave the project area bound for Central Los Angeles, Gateway Cities, West San Gabriel Valley and other regions; 45% make local trips within the project area itself.

La Autoridad de Transporte Metropolitano del Condado de Los Ángeles (Metro) está estudiando alternativas para extender más hacia el este la Extensión hacia el Este de Metro Gold Line Fase 1, desde la terminal existente en Pomona Bl y Atlantic Bl en el Este de Los Ángeles.

El área del proyecto de la Fase 2 incluye 8 ciudades y porciones no incorporadas del Condado de Los Ángeles.

Hay aproximademente 720,850 residentes en el área del proyecto, representando un 7% de la población del Condado de Los Ángeles. Durante los próximos 25 años, se espera que la población crezca un 12%, incluyendo un 7% de crecimiento de empleos durante el mismo periodo.

El área del proyecto tiene autopistas y arterias altamente congestionadas, incluyendo la I-5, SR-60, I-10, Beverly Bl, Whittier Bl y Washington Bl. Cada día, aproximadamente el 55% de los viajeros salen del área del proyecto hacia la área central de Los Ángeles, Gateway Cities, el Valle de San Gabriel y otras regiones. El 45% hacen viajes locales dentro del área del proyecto.

Communities within the Project Area *Comunidades en el área del proyecto*

Commerce
Montebello
Monterey Park
Pico Rivera
Rosemead
Santa Fe Springs
South El Monte
Unincorporated Los Angeles County
Areas no incorporadas del Condado de Los Angeles
Whittier

Goals of the Project

There are four main goals to the project:

1. Identify alternatives that provide a transit connection to the Metro Gold Line Eastside Extension
2. Link cities and communities farther east of Los Angeles with the regional transit network
3. Improve mobility in the project area by enhancing transit options
4. Plan for projected growth in a sustainable manner

Study Process

The project development process is defined by federal and state environmental requirements. The flow chart below highlights the major milestones in the process from beginning to end. The project is currently in the Draft Environmental Impact Statement/Report (Draft EIS/EIR) study phase.

Project Alternatives

In 2007, Metro began the Alternatives Analysis study (AA) that analyzed how to extend transit services farther east from the terminus of Metro Gold Line Eastside Extension at Pomona Bl and Atlantic Bl. Initially, 47 alternatives were considered in various combinations of alignments, technologies, and configurations. Throughout the AA process, evaluation criteria and community input were used to refine and reduce the alternatives. In October 2009, the Metro Board approved two light rail transit (LRT) alternatives for further environmental analysis in the Draft EIS/EIR:

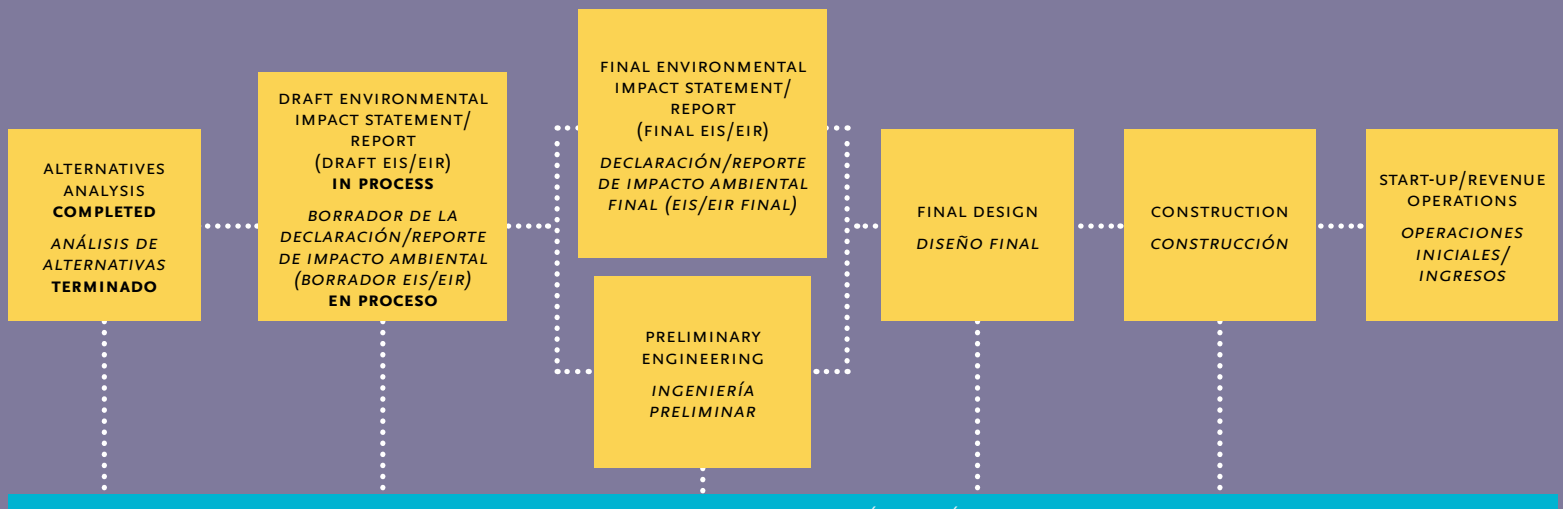
> SR-60 LRT
> Washington Bl LRT

Metas del proyecto

Hay cuatro metas principales del estudio:

1. *Identificar alternativas que proveerán una conexión de transporte a la Extensión hacia el Este de Metro Gold Line*
2. *Unir las ciudades ubicadas más al este de Los Ángeles con la red de transporte regional*
3. *Mejorar la movilidad en el área del proyecto al mejorar las opciones de transporte*
4. *Planear para el crecimiento proyectado de forma sostenible*

Proceso del estudio



El proceso de desarrollo del proyecto está delineado por requerimientos ambientales federales y estatales. La tabla mostrada abajo, resalta los acontecimientos importantes del proceso, de principio a fin. Actualmente, el proyecto está en la etapa del Borrador de la Declaración/Reporte del Impacto Ambiental (Borrador EIS/EIR).

Alternativas del proyecto

En el 2007, Metro inició el estudio de Análisis de Alternativas (AA), el cual consideró cómo expandir los servicios de transporte hacia el este desde la terminal de la Extensión cacia el Este de Metro Gold Line en Pomona Bl y Atlantic Bl. Inicialmente, se consideraron 47 alternativas en varias combinaciones de alineamientos, tecnologías y configuraciones. A través del proceso de AA, de la evaluación de criterios y de los comentarios de la comunidad, las alternativas fueron refinadas y reducidas. En octubre de 2009, la Junta Directiva de Metro aprobó dos alternativas de tren ligero (LRT) las cuales fueron avanzadas al posterior análisis ambiental en el Borrador EIS/EIR:

> *LRT de la Ruta Estatal 60*
> *LRT de Washington Bl*

EASTSIDE TRANSIT CORRIDOR PHASE 2

FASE 2 DEL CORREDOR DE TRÁNSITO DEL LADO ESTE

SUMMER 2016

VERANO DE 2016

Metro

Alternatives Fact Sheet

Hoja Informativa de las Alternativas

Eastside Transit Corridor Phase 2 *Fase 2 del corredor de tránsito del lado este*

Overview

Metro is currently studying alternatives to extend the Metro Gold Line Eastside Extension (MGLEE) farther east from the current terminus at Pomona Bl and Atlantic Bl in East Los Angeles. This would connect residents seamlessly, without transferring, to the existing MGLEE line and provide direct access to the Metro system.

Alternatives

There are two light rail transit (LRT) alternatives as defined in the Draft EIS/EIS:

State Route-60 (SR-60), which generally follows the southern edge of the SR-60 Freeway and terminates at Peck Rd in the City of South El Monte. There would be a short segment on the north side of the freeway between Greenwood Av and Paramount Bl.

Proposed stations include: Garfield Av, The Shops at Montebello, Santa Anita Av, and Peck Rd.

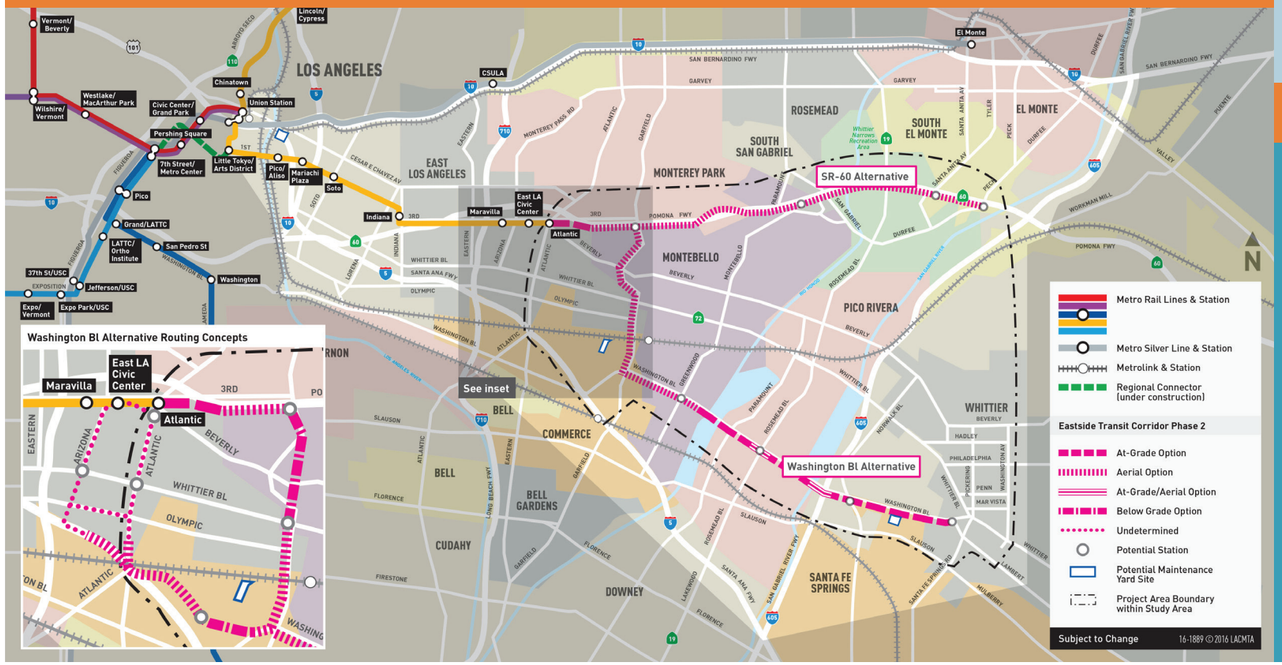
Washington Bl which travels along Washington Bl to the City of Whittier. The route was originally planned to follow the SR-60 Freeway to an aerial structure on Garfield Av, and then on to Washington Bl, ending at Lambert Rd in the City of Whittier. However, to address public concerns, the Metro Board eliminated the aerial segment on Garfield Av between Via Campo and Whittier Bl and directed staff to identify a new north-south connection to Washington Bl. (see map below and the Ongoing Technical Studies section for a description of route concepts being considered).

Resumen

Actualmente, Metro está estudiando alternativas para ampliar la Metro Gold Line Eastside Extension (MGLEE) más hacia el este de la terminal actual en Pomona Bl y Atlantic Bl en el Este de Los Ángeles. Esto conectará a los residentes sin ningún problema, sin tener que transbordar, a la línea existente de la MGLEE y les proporcionará acceso directo al sistema de Metro.

Alternativas

Existen dos alternativas de trenes ligeros (light rail transit, LRT) tal y como se definen en el borrador de la Declaración del Impacto Ambiental (Draft Environmental Impact Statement, DEIS)/Informe del Impacto Ambiental (Draft Environmental Impact Report, DEIR):



Ruta estatal 60 (SR-60)

La SR-60, que generalmente sigue el borde del sur de la autopista de la SR-60, y termina en Peck Rd en la ciudad de South El Monte, será un segmento corto en el lado norte de la autopista entre la calle Greenwood y Paramount.

Las estaciones propuestas incluyen: Garfield Av, The Shops at Montebello, Santa Anita Av y Peck Rd.

***Washington Blvd** que sigue lo largo de Washington Bl hacia la ciudad de Whittier. Esta ruta fue planeada originalmente para seguir el SR-60 a una estructura aérea sobre Garfield Ave, y luego a Washington Bl, terminando en Lambert Rd en la ciudad de Whittier. Para hacer frente a las preocupaciones del público, la Junta Directiva de Metro eliminó el segmento aéreo sobre Garfield Av entre Via Campo y Whittier Bl y dirigió el personal a identificar una nueva conexión norte-sur a Washington Bl. (Vea mapa abajo y la sección de Estudios Técnicos en curso para una descripción de los conceptos de la ruta en cuestión).*

Project Map *Mapa del proyecto*

Metro Board Direction

At the November 2014 Metro Board Meeting, staff received direction to:

1. Continue studying both alternatives and also explore the option of operating both.
2. Follow-up on comments received from partner agencies to evaluate and address concerns raised regarding the SR-60 alignment.
3. Eliminate the aerial section on Garfield Av and develop a new north/south connection to Washington Bl.
4. Prepare a cost containment plan.

Ongoing Technical Studies

In response to the Board's direction, Metro Staff is undertaking technical studies that refine the proposed alternatives and explore new options. As part of this effort, Metro is engaging both the SR-60 and Washington Bl Coalitions, elected officials, city staffs, project stakeholders and community members along both corridors to receive feedback and provide project updates.

For the SR-60 Alternative, the focus is to address comments received from partner agencies and further investigate issues to be resolved in securing regulatory approval. For the Washington Bl Alternative, Metro is exploring the following new north/south routing concepts: Garfield Av (underground, since at-grade was ruled out in technical evaluations and the Board eliminated the aerial alignment), Atlantic Bl and Arizona Av. Profiles for the potential Atlantic and Arizona concepts (at-grade, aerial or underground) have not been determined yet.

The technical study process and ongoing communication will result in a new set of recommendations for the Board to consider in Spring 2017.

Indicación de la Junta de Directores de Metro

En la reunión de la Junta de Directores de Metro de noviembre de 2014, el personal recibió indicaciones para:

1. *Continuar estudiando las dos alternativas, además de considerar la opción de llevar a cabo las dos.*
2. *Dar seguimiento a los comentarios que recibimos de las agencias asociadas para evaluar y hacer frente a las preocupaciones que surjan en relación con la alineación de la SR-60.*
3. *Eliminar la sección aérea en Garfield Av y desarrollar una nueva conexión norte/sur a Washington Bl.*
4. *Preparar un plan de contención de costos.*

Estudios técnicos en curso

En respuesta a las indicaciones de la Junta de Directiva, el equipo consultante y el personal de Metro están llevando a cabo una serie de estudios técnicos que mejorarán aún más las alternativas propuestas y analizarán nuevas opciones. Como parte de este esfuerzo, Metro planea recurrir a las coaliciones de la SR-60 y Washington Bl, conformadas por los funcionarios electos de las ciudades de los corredores y el personal de las ciudades, y los accionistas del proyecto y miembros de la comunidad a lo largo de ambos corredores, para informarles sobre los procesos de mejoramiento que están en curso, y recibir sugerencias valiosas.

Para la alternativa de la SR-60, el objetivo es abordar los comentarios que recibimos de las agencias asociadas e investigar más a fondo los problemas que se deben resolver al obtener la aprobación reglamentaria. Para la alternativa de Washington Bl, Metro está analizando las nuevas opciones de norte/sur, que incluyen: Garfield Av (subterráneo, ya que se descartó el nivel en las evaluaciones técnicas y la Junta de Directores eliminó la alineación aérea), Atlantic Bl y Arizona Av. Aún no se determinan las configuraciones para las posibles opciones de Atlantic y Arizona (nivel, aéreo o subterráneo).

La comunicación y el proceso técnico en curso tendrán como resultado varias recomendaciones que la Junta de Directores considerará en la primavera de 2017.

Five Phases of Project Development *Cinco fases en el desarrollo del proyecto*

We're heading further east.

Nos dirigimos más hacía al este.

EASTSIDE TRANSIT CORRIDOR PHASE 2

FASE 2 DEL CORREDOR DE TRÁNSITO HACÍA EL ESTE

FEBRUARY 2017

FEBRERO DE 2017

Metro®

Alternatives Fact Sheet

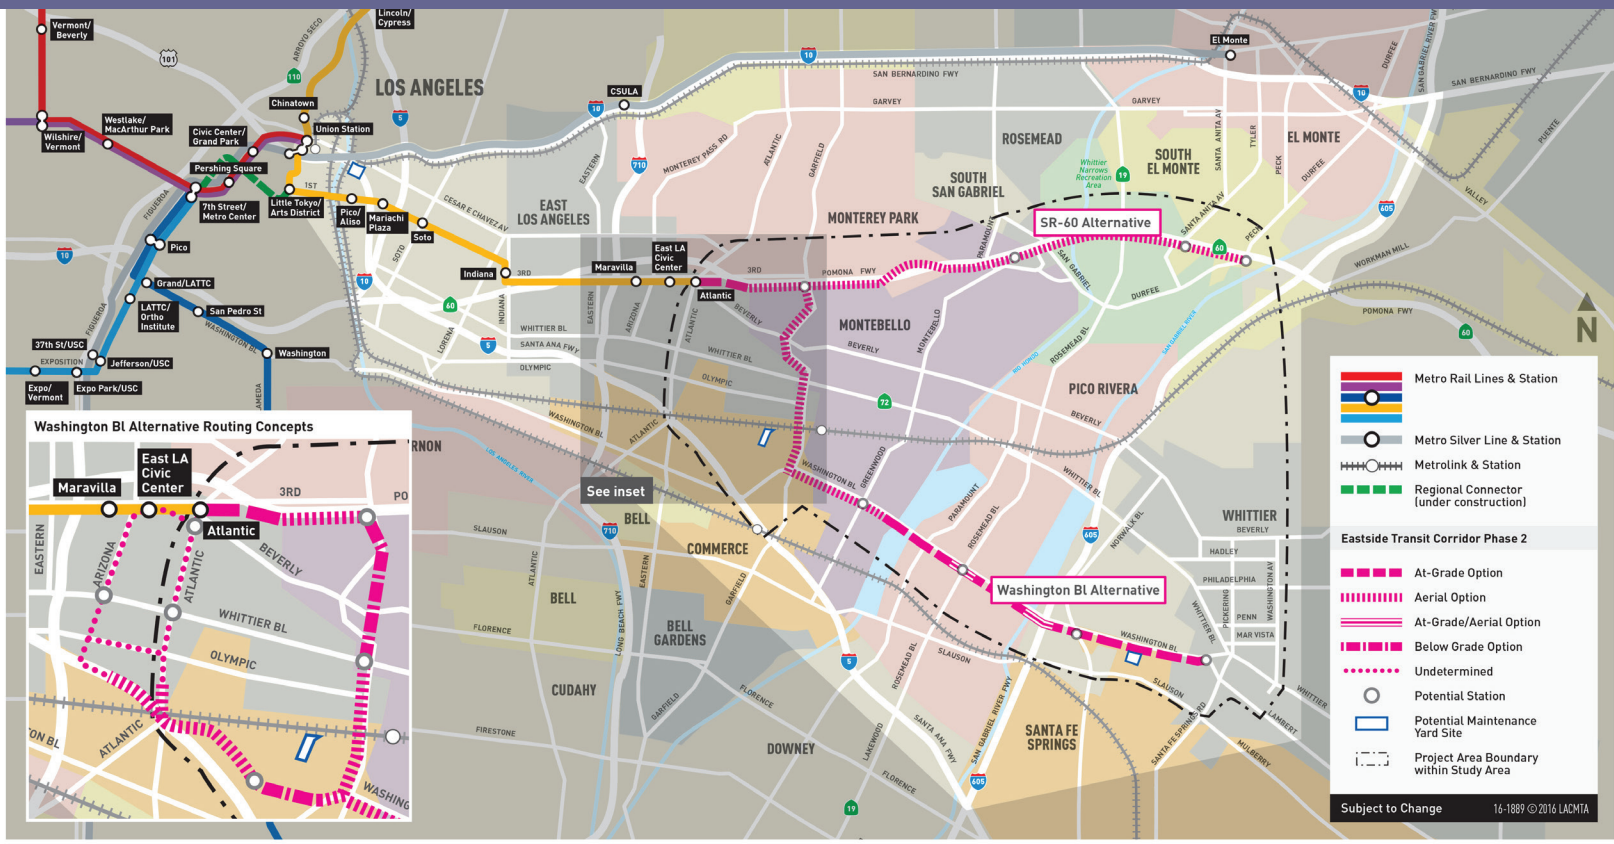
Hoja Informativa de las Alternativas

Overview

Metro is currently exploring options to extend the Metro Gold Line further east from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles. The goal of the proposed study is to improve transit access and mobility in the study area by connecting Eastside communities to Metro's regional transit system, including Commerce, unincorporated East Los Angeles, Montebello, Monterey Park, Pico Rivera, Rosemead, Santa Fe Springs, South El Monte and Whittier. The Eastside Transit Corridor Phase 2 Project Draft Environmental Impact Study/ Environmental Impact Report (EIS/EIR) evaluated two Light Rail Transit (LRT) alternatives:

State Route-60 generally follows the southern edge of the State Route-60 (SR-60) Freeway and continues to Peck Rd in the City of South El Monte. A short segment shifts to the north side of the freeway, between Greenwood Av and Paramount Bl. Proposed stations along this route include: Garfield Av, The Shops at Montebello, Santa Anita Av and Peck Rd.

Washington Bl Alternative travels along Washington Bl to the City of Whittier. The route was originally planned to follow the SR-60 Freeway on an aerial guideway over Garfield Av and then proceed east, at street-level (at-grade), along Washington Bl, ending at Lambert Rd in the City of Whittier.



Resumen

Metro actualmente está explorando opciones para extender la Metro Gold Line hacía el este aún más desde su terminal actual en Pomona Bl y Atlantic Bl en el Este de Los Angeles. El objetivo del estudio propuesto es mejorar acceso a tránsito y movilidad en el área de estudio mediante la conexión de las comunidades del este del Condado de Los Angeles al sistema de tránsito regional de Metro, incluyendo Commerce, Este de Los Angeles, Montebello, Monterey Park, Pico Rivera, Rosemead, Santa Fe Springs, South El Monte y Whittier. Un Borrador Reporte/Declaración de Impacto Ambiental para el Proyecto de la Fase 2 del Corredor de Tránsito hacia el Este del Condado de Los Angeles (Eastside Phase 2) evaluó dos alternativas de tránsito para extender el tren ligero:

***Alternativa Ruta Estatal-60** que generalmente sigue el borde sur de la autopista Ruta Estatal-60 (SR-60) y sigue hasta llegar a Peck Rd en la ciudad de South El Monte. La ruta incluye un segmento corto que se desplaza hacia el lado norte de la autopista, entre Greenwood Av y Paramount Bl. Estaciones propuestas a lo largo de esta ruta incluyen: Garfield Av, The Shops at Montebello, Santa Anita Av y Peck Rd.*

***Alternativa Washington Blvd** que viaja a lo largo de Washington Bl hasta llegar a la ciudad de Whittier. La ruta fue planeada originalmente para seguir hacia el este al borde de la autopista SR-60, después seguir sur en una guía aérea sobre Garfield Av y seguir este, a nivel de calle (en-grado), a lo largo de Washington Bl, terminando en Lambert Rd en la ciudad de Whittier.*

Project Map *Mapa del proyecto*

The Draft EIS/EIR for the Eastside Transit Corridor Phase 2 was released on August 22, 2014, and was available for a 60-day public comment period that ended on October 21, 2014. Based on comments received, the Metro Board in November 2014 eliminated the aerial segment on Garfield Av between Via Campo and Whittier Bl and directed staff to undertake a Technical Study to:

1. Explore the option of operating both alternatives simultaneously.
2. Address comments and concerns received on the SR-60 Alternative from partner agencies.
3. Develop a new north-south connection to Washington Bl.
4. Prepare a cost containment plan.

Technical Study Progress

Since 2015, Metro staff has been working on the Technical Study to respond to the Board-directed items described above. As part of this effort, Metro has engaged the SR-60 and Washington Bl Coalitions, elected officials, city staff members, project stakeholders, key groups within East Los Angeles and many community members along both corridors to receive feedback and provide updates.

In Spring/Summer 2016, Metro hosted five community meetings to share preliminary routing concepts for the Washington Bl Alternative, and other project updates. At these meetings, staff presented three potential north-south connections to Washington Bl:

> **Garfield Av:** Underground Option (at-grade was ruled out in technical evaluations and aerial was eliminated by the Metro Board of Directors)
> **Atlantic Bl Option*** (at-grade, aerial or underground) with new stations at Atlantic Bl/Whittier Bl and Citadel Outlets
> **Arizona Av Option*** (at-grade, aerial or underground) with new stations at Arizona Av/Whittier Bl and Citadel Outlets

Based on feedback received, staff has focused on corridor design studies, continued advancing several technical investigations on the SR 60 Alternative, and explored profiles for Atlantic Bl and Arizona Av. In Spring 2017, Metro staff will present the findings and recommendations of the Technical Study to the Metro Board of Directors.

**Profiles (at-grade, aerial or underground) for Atlantic and Arizona concepts have not yet been determined.*

El Borrador EIS/EIR para el Proyecto de la Fase 2 del Corredor de Tránsito hacia el Condado de Los Angeles fue publicado el 22 de agosto del 2014 y estuvo disponible para un período de comentario público de 60 días que terminó el 21 de octubre del 2014. De acuerdo con los comentarios recibidos, la Junta Directiva de Metro, en noviembre del 2014, eliminó el segmento aéreo sobre Garfield Av entre Vía Campo Av y Whittier Bl y ordenó un Estudio Técnico que debería:

1. *Explorar la opción de operar las dos alternativas simultáneamente.*
2. *Responder a comentarios recibidos por agencias asociadas referente a la Alternativa SR-60.*
3. *Desarrollar una conexión norte-sur nueva a Washington Bl.*
4. *Preparar un plan de contención de costos.*

Actualización del Estudio Técnico

Desde el 2015, el personal de Metro ha estado trabajando en el Estudio Técnico para responder a la orden de la Junta Directiva de Metro. Como parte de este esfuerzo, Metro ha colaborado con las Coaliciones SR-60 y Washington Bl, funcionarios electos, ciudades locales, interesados del proyecto, grupos del Este de Los Angeles y muchos miembros de la comunidad a lo largo de las dos rutas, para recibir comentarios y proporcionar actualizaciones.

En Primavera/Verano del 2016, Metro organizó cinco reuniones comunitarias para compartir conceptos preliminares de ruta para la Alternativa Washington Bl y otras actualizaciones del proyecto. En estas reuniones, Metro presentó tres posibles conexiones de norte a sur a Washington Bl:

> ***Garfield Av: Opción Subterránea*** *(en-grado fue eliminado en las evaluaciones técnicas y la Junta Directiva elimino una ruta aérea)*
> ***Opción Atlantic Bl**** *(en-grado, aéreo o subterráneo) con estaciones nuevas en Atlantic Bl/Whittier Bl y Citadel Outlets*
> ***Opción Arizona Av**** *(en-grado, aéreo o subterráneo) con estaciones nuevas en Arizona Av/Whittier Bl y Citadel Outlets*

Basado en información recibida, el personal de Metro se ha enfocado en estudios de diseño del corredor, ha avanzado varias investigaciones técnicas de la Alternativa SR 60 y explorado diferentes perfiles para Atlantic Bl y Arizona Av. En la primavera del 2017, el personal de Metro presentará las conclusiones y recomendaciones del Estudio Técnico a la Junta Directiva de Metro.

**Perfiles (en-grado, aéreo o subterráneo) para las opciones de Atlántic y Arizona no fueron determinados.*

Learn the Latest

Metro invites you to an upcoming community meeting to hear the latest developments on the Eastside Transit Corridor Phase 2 project. The project seeks to extend the Metro Gold Line from its current Eastside terminus at Pomona Blvd and Atlantic Blvd.

In November, 2014, the Metro Board of Directors directed staff to:

> Conduct more technical work to address comments received by partner agencies regarding SR-60 North Side Design Variation (NSDV) alternative

> Eliminate a proposed aerial alignment along a portion of Garfield Ave and identify a new route for the Washington Blvd alternative. New routes under consideration include 1) Garfield Ave (underground); 2) Atlantic Blvd and 3) Arizona Ave.

> Explore the potential for operating both alternatives (SR-60 NSDV to City of South El Monte and Washington Blvd to City of Whittier)

Entérese de lo último

Metro lo invita a la próxima reunión para la comunidad para enterarse de los últimos acontecimientos del Corredor de Transporte hacia el Este Fase 2. El proyecto busca ampliar la línea de Metro Gold Line desde su estación terminal en el lado este en Pomona Blvd y Atlantic Blvd.

En noviembre de 2014, la Junta de Directores de Metro dio órdenes al personal para:

> *Realizar más trabajo técnico para hacer frente a los comentarios recibidos de parte de las agencias colaboradoras con respecto de la alternativa de diseño en el lado norte (North Side Design Variation, NSDV) SR-60.*

> *Eliminar el alineamiento aéreo propuesto a lo largo de una sección de Garfield Ave e identificar una nueva ruta para la alternativa de Washington Blvd. Las nuevas rutas que se están considerando son 1) Garfield Ave (subterránea); 2) Atlantic Blvd y 3) Arizona Ave.*

> *Explorar las posibilidades de operar ambas alternativas (la NSDV SR-60 hacia la ciudad de South El Monte y de Washington Blvd hacia la ciudad de Whittier).*

MEETING TIMES:

Each meeting will include the same presentation summarizing progress to date, and will provide attendees an opportunity to share their thoughts. Please join us at any of the following meetings.

Durante cada reunión se hará la misma presentación en la que se dará un resumen del progreso que se tiene hasta la fecha y habrá oportunidad para compartir opiniones. Asista a cualquiera de las siguientes reuniones:

Monday, March 28, 2016, 6pm–8pm
28 de marzo de 2016, de 6pm a 8pm

Corredor de Transporte hacia el Este Fase 2 reunión comunitaria – 22 de junio de 2016

6–8pm

16-235OBC ©2016 LACMTA

Learn the Latest

Metro invites you to attend a community meeting to learn more about and share your thoughts on the Eastside Transit Corridor Phase 2 project, which seeks to extend the Metro Gold Line east from its current terminus at Atlantic Bl in East Los Angeles. There are two project alternatives currently under study:

> State Route (SR)-60 Alternative, which would extend east from Atlantic Bl along the SR 60 Freeway and terminate at Peck Rd in the City of South El Monte.

> Washington Bl Alternative, which would terminate at Lambert Rd in the City of Whittier. Potential north-south route concepts under study include:

1) Underground along Garfield Av in Montebello
2) Atlantic Bl in East Los Angeles from Atlantic/ Pomona south to Washington Bl*
3) Arizona Av in East Los Angeles from 3rd St to Washington Bl*

* Configuration has not been determined (aerial, street level, underground)

Entérese de lo último

Metro le invita a asistir a una reunión comunitaria para conocer y compartir sus ideas sobre el Proyecto Del Corredor de Transporte Este Fase 2, que pretende extender Metro Gold Line hacia el este desde su terminal actual en Atlantic Bl en el Este de Los Angeles. Hay dos alternativas de proyecto actualmente en estudio:

> *Alternativa de la Ruta Estatal 60, que se extiende desde Atlántic Bl a lo largo de la autopista 60 y termina en Peck Rd en la ciudad de South El Monte.*

> *Alternativa Washington Bl que termina en Lambert Rd en la ciudad de Whittier. Se están considerando las siguientes rutas que corren a lo largo de:*

1) *Garfield Av en un túnel subterráneo en la ciudad de Montebello*
2) *Atlántic Bl en el este de Los Angeles desde la estación Atlántic/Pomona hacia Washington Bl**
3) *Arizona Av en el Este de Los Angeles desde la calle 3ra hacia Washington Bl**

** La configuración no ha sido determinada (nivel elevado, sobre el nivel de la calle, subterráneo)*

MEETING INFORMATION:

The meeting will include a presentation summarizing progress to date, and will provide attendees an opportunity to share their thoughts. Please join us on:

Durante la reunión se le dará un resumen del progreso que se tiene hasta la fecha y habrá una oportunidad para compartir opiniones. Por favor asista la reunión:

Wednesday, June 22, 2016, 6pm–8pm
Miércoles, 22 de junio, 2016 , de 6pm a 8pm
Griffith Middle School
Cafeteria
4765 E 4th St
Los Angeles, CA 90022

Accessible via Metro Gold Line (Civic Center Station), Metro Local Line 258, Montebello Bus Line 40 and El Sol Shuttle lines. Parking entrance to Griffith Middle School on Arizona Av.

Accesible vía Metro Gold Line (estación Civic Center), Línea Local de Metro 258, Montebello Bus Línea 40 y rutas de El Sol Shuttle. La entrada del estacionamiento para la escuela, Griffith Middle School esta localizada en la calle Arizona.

Learn the Latest

Metro cordially invites you to attend a community meeting to learn about the latest updates and share your thoughts about the Eastside Transit Corridor Phase 2 Project, which is evaluating options to extend the Metro Gold Line east from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles.

At the meeting, we will present:

> Preliminary findings regarding the Washington Bl routing concepts (Garfield Av, Atlantic Bl and Arizona Av)
> Refinements to the SR 60 Alternative to address partner agency comments
> Measure M funding opportunities
> Next steps and anticipated project milestones

The material presented at each meeting will be the same, so join us at the meeting that is most convenient for you.

Conozca lo último

Metro cordialmente le invita a una de las reuniones comunitarias para conocer las últimas actualizaciones del Proyecto Fase 2 del Corredor de Transporte Hacia el Este del Condado de Los Angeles y compartir sus ideas. Este Proyecto está evaluando las opciones para extender el tren ligero Metro Gold Line desde su terminal actual en Pomona Bl y Atlantic Bl hacía el este.

En la reunión, presentaremos:

> *Conclusiones preliminares sobre los conceptos de ruta de la Alternativa Washington Bl (Garfield Av, Atlantic Bl, y Arizona Av)*
> *Refinamientos de la Alternative SR-60 para responder a los comentarios de las agencias asociadas*
> *Financiamiento disponible por medio de la Medida M*
> *Pasos y logros anticipados del proyecto*

El material presentado en cada reunión será el mismo, así que acompáñenos a la reunión que sea más conveniente para usted.

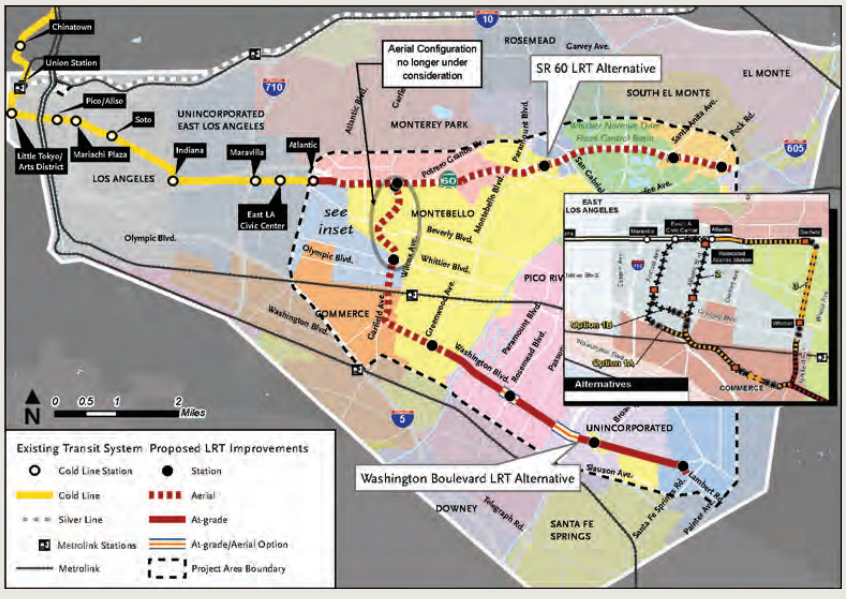
Eastside Transit Corridor Phase 2 Community Meeting: Join Us!

Metro invites you to attend a community meeting to hear about the latest development for the Eastside Transit Corridor Phase 2 project. The project seeks to extend the Metro Gold Line east from its current Eastside terminus at Pomona Blvd and Atlantic Blvd.



Each meeting will include the same presentation summarizing project development to date, and provide an opportunity to hear from you. Please attend the meeting that is most convenient for you.

March 28, 2016, 6PM-8PM
Whittier Senior Center
13225 Walnut Street
Whittier, CA 90602

March 29, 2016, 6PM-8PM
East Los Angeles Public Library
4837 E 3rd Street
Los Angeles, CA 90022

March 30, 2016, 6PM-8PM
Quiet Cannon
901 Via San Clemente
Montebello, CA 90640

March 31, 2016, 6PM-8PM
South El Monte Senior Center
1556 Central Ave
South El Monte, CA 91733

In November 2014, the Metro Board of Directors directed staff to:

- Conduct additional technical work to address comments received by partner agencies regarding **SR-60 North Side Design Variation (NSDV) alternative**
- Eliminate a proposed aerial alignment along a portion of Garfield Ave and identify a new route for the Washington Blvd alternative. New routes under consideration include: **1) Garfield Ave (underground)**; **2) Atlantic Blvd*** and **3) Arizona Ave***

  **Configuration has not been determined (aerial, street level, underground)*
- Explore the potential for operating both proposed alternatives (**SR-60 NSDV to City of South El Monte** and **Washington Blvd to City of Whittier**)

Metro

Fase 2 del Corredor de Tránsito Hacia el Este del Condado de Los Angeles

Metro le invita cordialmente a una de las reuniones comunitarias para conocer las últimas actualizaciones del proyecto y compartir sus ideas acerca de la Fase 2 del Corredor de Tránsito Hacia el Este ('Eastside 2'), que está evaluando las opciones para extender la Gold Line de Metro desde su terminal actual en Pomona Bl y Atlantic Bl en el Este de Los Angeles.

JUEVES
16 de febrero de 2017
6:00 - 8:00pm

AltaMed - PACE East Los Angeles
5425 E. Pomona Bl, Los Angeles, CA 90022

En la reunión, presentaremos:

- Conclusiones preliminares sobre los conceptos de ruta de Washington Bl (Garfield Av, Atlantic Bl y Arizona Av)
- Refinamientos de la Alternativa SR-60 para responder a los comentarios de las agencias asociadas
- Oportunidades de financiamiento de la Medida M
- Pasos a seguir y logros anticipados del proyecto.

Reuniones adicionales del proyecto se llevaran a cabo: **lunes, 6 de febrero** en el Whittier Uptown Senior Center; **martes, 7 de febrero** en el Quiet Cannon in Montebello; **miércoles, 8 de febrero** en el South El Monte Senior Center; y **miércoles, 15 de febrero** en el Commerce Senior Citizens Center. El material presentado en cada reunión será el mismo, así que acompáñenos a la reunión que sea más conveniente para usted. ¡Esperamos contar con su presencia para recibir sus opiniones!

Para obtener más información sobre las reuniones adicional, por favor llame a la línea de ayuda del proyecto al **213.922.3012** o visite **metro.net/eastsidephase2**.

Community Meetings - March 28, 29, 30, 31

Haga clic aquí para Español.

Learn the Latest

Metro invites you to an upcoming community meeting to hear the latest developments on the Eastside Transit Corridor Phase 2 project. The project seeks to extend the Metro Gold Line from its current Eastside terminus at Pomona Blvd and Atlantic Blvd.

In November, 2014, the Metro Board of Directors directed staff to:

- Conduct more technical work to address comments received by partner agencies regarding SR-60 North Side Design Variation (NSDV) alternative
- Eliminate a proposed aerial alignment along a portion of Garfield Ave and identify a new route for the Washington Blvd alternative. New routes under consideration include 1) Garfield Ave (underground); 2) Atlantic Blvd* and 3) Arizona Ave* **Configuration has not been determined at this stage (aerial, street level, underground)*
- Explore the potential for operating both alternatives (SR-60 NSDV to City of South El Monte and Washington Blvd to City of Whittier)

Click here to view the meeting flyer, which includes a project map.

MEETING TIMES

Each meeting will include the same presentation summarizing progress to date, and will provide attendees an opportunity to share their thoughts. Please join us at any of the following meetings.

Monday, March 28, 2016 **Tuesday, March 29, 2016**

6pm-8pm
Whittier Senior Center
13225 Walnut St
Whittier, CA 90602

Wednesday, March 30, 2016
6pm-8pm
Quiet Cannon
901 Via San Clemente
Montebello, CA 90640

6pm-8pm
East Los Angeles Public Library
4837 E 3rd St
Los Angeles, CA 90022

Thursday, March 31, 2016
6pm-8pm
South El Monte Senior Center
1556 Central Ave
South El Monte, CA 91733

REMINDER: Community Meeting - June 22

Haga clic aquí para Español.

Learn the Latest

Metro invites you to attend a community meeting to learn more about and share your thoughts on the Eastside Transit Corridor Phase 2 project, which seeks to extend the Metro Gold Line east from its current terminus at Atlantic Bl in East Los Angeles. There are two project alternatives currently under study:

- State Route (SR)-60 Alternative, which would extend east from Atlantic Bl along the SR 60 Freeway and terminate at Peck Rd in the City of South El Monte.
- Washington Bl Alternative, which would extend south from the Gold Line and terminate at Lambert Rd in the City of Whittier. The three Washington Bl route concepts being considered are:

    1. Underground along Garfield Av in Montebello
    2. Atlantic Bl in East Los Angeles from Atlantic/ Pomona south to Washington Bl*
    3. Arizona Av in East Los Angeles from 3rd south St to Washington Bl*

**Profile has not been determined (aerial, street level, underground)*

MEETING INFORMATION

The meeting will include a presentation summarizing progress to date, and will provide attendees an opportunity to share their thoughts. Please join us on:

Wednesday, June 22, 2016

6pm-8pm
Griffith Middle School Cafeteria
4765 E 4th St
Los Angeles, CA 90022

Please **click here** for more meeting details.

Accessible via Metro Gold Line (Civic Center Station), Metro Local Line 258, Montebello Bus Line 40 and El Sol Shuttle lines. Parking entrance to Griffith Middle School on Arizona Av.

Amaury Reducindo Your efforts to reach people via sociall media /internet are laughable.
You have 9 - 15 likes to any of your posts and there is no FB event page. Metro Los Angeles as always is doing the best to seem like they want to inform the community when in reality I have not seen a single pamphlet/flyer for the community to read and be aware this is happening.

EASTSIDE TRANSIT CORRIDOR PHASE 2

Metro invites you to attend a community meeting to learn more about and share your thoughts on the Eastside Transit Corridor Phase 2 project, which seeks to extend the Metro Gold Line east from its current terminus at Atlantic Bl in East Los Angeles. There are two project alternatives currently under study:

> State Route (SR)-60 Alternative, which would extend east from Atlantic Bl along the SR 60 Freeway and terminate at Peck Rd in the City of South El Monte.

> Washington Bl Alternative, which would terminate at Lambert Rd in the City of Whittier. Potential north-south route concepts under study include:

1) Underground along Garfield Av in Montebello
2) Atlantic Bl in East Los Angeles from Atlantic/Pomona south to Washington Bl*
3) Arizona Av in East Los Angeles from 3rd St to Washington Bl*

**Configuration has not been determined (aerial, street level, underground)*

The meeting will include a presentation summarizing progress to date, and will provide attendees an opportunity to share their thoughts. Please join us on:

Wednesday, June 22, 2016, 6pm–8pm
Griffith Middle School
Cafeteria
4765 E 4th St
Los Angeles, CA 90022

Accessible via Metro Gold Line (Civic Center Station), Metro Local Line 258, Montebello Bus Line 40 and El Sol Shuttle lines. Parking entrance to Griffith Middle School on Arizona Av.

All Metro meetings are held in ADA accessible facilities and are accessible by transit. ADA accommodations and translations are available by calling 213.922.3012 at least 72 hours in advance.

PHOTO BY NANCY MARTINEZ

As many as 750,000 people participated in the Women's March-Los Angeles Saturday.

MARCH

continued from page 1

rights," read many signs.

A 6-year-old being pushed in a stroller by her dad carried a poster board bedazzled with peace signs and glitter reading, "The power of a girl is to change the world."

Her father was one of many men joining the march, including at least one wearing a pink "pussy hat," and one of many marchers who brought their children and grandchildren to the rally.

The Washington, D.C., march that sparked local "sister" marches similar to the one in Los Angeles was deliberately planned for the day after President Trump's inauguration. And many of the individuals and groups taking part opposed Trump and the policies he laid out on the campaign trail and during his transition to office.

This includes possible mass deportations of undocumented immigrants, repealing the Affordable Care Act, a health insurance initiative also known as Obamacare, and repealing funding for Planned Parenthood, the National Endowment of the Arts and humanities programs.

"In a time when we are all wondering what we can do, we can do this ... let them hear our voice!" march organizer Deena Katz said in a statement.

Others were more outspoken about their distaste for the new president, with some briefly taking up a chant of "You're fired," echoing Trump's catchphrase from his days hosting "The Apprentice" reality show.

Some carried signs with messages such as, "Not my president" and "Can't build a wall. Hands too small."

About five dozen celebrities, including Barbra Streisand, Jane Fonda, Natalie Portman, Kerry Washington, Alfre Woodard, Ariana Grande, Demi Lovato, Jamie Lee Curtis and Laverne Cox signed up to attend the local event.

Trump briefly crossed paths with protestors in Washington, D.C., and posted his reaction on Twitter, in addition to a formal White House statement.

"Watched protests yesterday but was under the impression that we just had an election! Why didn't these people vote?" the president tweeted.

He also criticized the celebrity participants and the media coverage.

The White House statement singled out Madonna for telling the Washington, D.C. crowd that she thought about "blowing up the White House. But I know that this won't change anything."

"Comments like these are absolutely unacceptable," the statement said.

His defeated opponent, former Secretary of State Hillary Clinton, posted a tweet that said in part "Thanks for standing, speaking and marching for our values."

In Los Angeles, public officials were out in force, with many speaking before or after the approximately one-mile march from Pershing Square to City Hall, including Los Angeles Mayor Eric Garcetti, City Councilmen Paul Koretz and Mike Bonin and former Mayor Antonio Villaraigosa.

They served to underline the fact that this was far from a women-only event.

Residents of all ages joined in. One 74-year-old woman said she was marching for the first time in her life.

"This stirred me," Linda Fenneman said.

She was joined by Linda Lopez, who said she had protested on behalf of migrant farm workers in 1971 in Calexico and for the civil rights of Native Americans at Wounded Knee in 1973.

"I've been protesting for 45, almost 50 years," Lopez said.

State Sen. Holly Mitchell, D-Los Angeles, who was among the speakers on a stage across the street from City Hall, made a plea to protect access to health care.

"I know everything isn't perfect," Mitchell said of the Affordable Care Act. "I don't know about you, but I'm not going backwards ... We cannot allow the federal government to replace Obamacare with trumped up care."

Mitchell was among those who sought to engage the crowd to organize beyond the one-day march.

One woman from a contingent representing the League of Women Voters said they were downtown to educate residents and motivate them to vote for the policies they support.

"Democracy is not a spectator sport," she said.

Sen. Hannah-Beth Jackson told participants that "California is the state that invents the future" and then aimed her remarks directly at Trump, saying, "Two out of every three Californians didn't vote for you because we know that we stand for what is better and what is good and what is just and what is right in this country."

Metro officials added service and beefed up security to accommodate the anticipated crowd, though several station platforms were jam-packed with would-be riders as full trains stopped, unable to take on more people.

The diversity of concerns raised by those at the rally was highlighted by the fact that at least one group scheduled its own alternate ending to the day.

AF3IRM and the National Day Laborer Organizing Network left the main march at noon and lead a "Chant Down the Walls" action at the Metropolitan Detention Center.

Another sign of diversity? A plane circled over the downtown area towing a banner that read, "Congratulations President Trump."

ARREST

continued from page 1

practices and facilities to prevent similar incidents from happening in the future

A trauma specialist was also on-site to provide support for parents.

"How dare this individual do this to our community," City Administrator Jorge Rifa said about the swim coach's alleged criminal behavior.

"We are a lot better than this, we deserve a lot better than this," Rifa said.

Many of the parents, most with children involved in the city's aquatics program, were visibly distraught by the thought that a city employee they had entrusted their children to was able to molest a child while under the watchful eyes of their close-knit group.

"I want to know what I missed," pleaded longtime resident Ana Sanchez in disbelief, adding she has always kept a vigilant watch on her grandchildren and other children who swim at the center.

Since being built in 2001, programs offered at the Brenda Villa Aquatic Center – located on the 5600 block of Harbor Street – have helped make the industrial city of Commerce a recognizable name in the competitive world of water sports. The center is home to nationally ranked water polo teams and the state-recognized Commerce swim team, which has trained several top ranking swimmers. The indoor aquatic center, free to Commerce residents, has been the training grounds of past Olympians, including Gold Medalist Brenda Villa – who the center is named for.

Garcia, who grew up in Commerce and began working for the city in the summer of 2008, according to city staff. He's held various positions and worked with children and adults in various capacities, including as a swim instructor and lifeguard, and would at times assist in signing out children from the city's after-school kids club.

Garcia was arrested Jan. 13, the day after staff supervisors received information of an alleged inappropriate conduct with a child.

However, most residents did not find out about the arrest until nearly a week later when Garcia was arraigned, prompting parents to criticize the city's notification process and the lack of access to grief counselors for the children.

"Why did it take so long?" asked Georgina Escalera. "There is a counselor here tonight but [she] should have been brought in immediately."

Rifa responded by saying the city acted swiftly and released the information once Garcia was arraigned. It's unclear why officials chose to wait until after the arraignment rather than as soon as they learned of Garcia's arrest.

The delayed notification resulted in our children being left to talk among themselves, without proper counseling, complained some of the parents.

Councilwoman Tina Baca Del Rio said the city plans to make grief counselors available to all residents.

Parents used the meeting to complain about other concerns, including the current locker room situation, which is open to the public for patrons to shower and change while young children are at practice.

Christine Franco, the mother of two young boys in the swim program, told EGP she never lets her children out of her sight, but does not believe this incident will harm the city's reputation.

"I honestly trust the water polo staff, swim staff and recreation leaders 100 percent," Franco said after the meeting. "I have not lost faith in them. We are a tight-knit community and we will get through this together."

Mayor Ivan Altamirano, a father himself, said he was "deeply saddened" and "disturbed" by Garcia's actions and arrest.

"What happened does not define who we are," he emphasized.

Garcia is being held on a $955,000 bond at the Men's Central Jail. He faces 14 years in state prison if convicted as charged.

Anyone with information is encouraged to contact the Sheriff's Department's Special Victims Bureau at (877) 710-5273 or anonymously at (800) 222-TIPS.

CHARGES

continued from page 2

the entire picture of what happened the night Mr. Ford was shot," Lacey said.

The city Police Commission ruled in 2015 that one of the officers in the shooting was justified in opening fire, but the other violated department policy. The commission did not specify which officer acted improperly.

Ford's parents sued the city, but a tentative settlement was reached last year.

According to the lawsuit filed in March 2015, Wampler and Villegas — who were named defendants along with the city and LAPD — "intentionally and/or negligently fatally shot unarmed decedent Ezell Ford multiple times with their firearms" after he had complied with their order to lie on the ground.

The officers knew Ford was "mentally challenged" and that he was not committing a crime at the time, the lawsuit stated.

The Los Angeles Police Protective League, the union that represents LAPD officers, issued a statement in support of the District Attorney's Office decision against filing charges.

"No officer ever wants to be put in a dangerous situation where they must struggle to maintain control of their weapon, but officers must be allowed to protect themselves, their partners and the public," according to the union.

Mayor Eric Garcetti issued a statement saying he accepts the decision, but he will "rededicate my administration to the search for better ways to protect the safety of all Angelenos, and reiterate my support for the Police Commission's goal of reinforcing de-escalation in the training of our officers."

Los padres son los maestros más importantes dicen los expertos

Los primeros cinco años son los más importantes para el desarrollo del cerebro de su hijo o hija.

La investigación sobre el cerebro muestra que los padres pueden marcar una gran diferencia en el desarrollo de un bebé recién nacido o un bebé mayor hablándole, leyéndole y cantándole todos los días.

"Los niños nacen con una tremenda capacidad de aprendizaje - pero también influyen las interacciones que tienen", dice la Dra. Alma Guerrero de la Geffen School of Medicine de UCLA en Los Ángeles.

Leerle cuentos, hablarle de las actividades cotidianas como hacer la compra o cocinar, o cantarle canciones divertidas - todo ayuda a que su recién nacido o bebé mayor establezca las bases para un desarrollo sano. La ciencia nos dice que este aprendizaje temprano - desde el nacimiento hasta los cinco años - puede preparar el camino para el éxito de su hijo o hija en la escuela e incluso en su desarrollo profesional.

Esto también incluye leer y hablar en cualquier idioma en el que usted se sienta más cómodo - los investigadores han mostrado que hablar más de un idioma en casa le da una gran ventaja a su hijo o hija y le prepara para el éxito.

"La fantástica noticia es que no tiene que costar nada - las mejores cosas que puede hacer un padre o una madre son gratis", dice la Dra. Margaret Yonekura, Directora ejecutiva de L.A. Best Babies Network. "Hablar con su hijo o hija, enseñarle a apreciar los libros y la palabra escrita, jugar con ollas y sartenes en la cocina para hacer música - son actividades que se pueden incorporar en el día a día."

Los padres y las madres son los maestros más importantes - así que busque el apoyo que necesite para ser el mejor padre o madre posible.

Para encontrar programas gratis o de bajo costo como clases de técnicas de crianza, análisis de desarrollo, además de ayuda para encontrar cuidados de niños, escuelas infantiles y servicios sanitarios, todo en su idioma, llame al 211.

"El objetivo de 2-1-1 LA para cada persona que llama es el de centrarse en las necesidades individuales de cada niño para que crezca muy bien y para ayudar a equipar a los padres y cuidadores con las herramientas que necesiten para apoyar lo mejor posible a su hijo o hija", dice Patricia Herrera, la directora de programa de 211.

PHILIPPINES

President's drug crackdown faces a court challenge

MANILA, PHILIPPINES » A survivor of a Philippine police raid that killed four other drug suspects asked the Supreme Court on Thursday to stop such operations and help him obtain police records to prove his innocence in a test case against the president's bloody crackdown.

Lawyer Romel Bagares said his client Efren Morillo and other petitioners also asked the court to order police to stop threatening witnesses.

More than 7,000 drug suspects have been killed since President Rodrigo Duterte took office in June and ordered the crackdown, alarming human rights groups and Western governments.

Four policemen shot Morillo and four other men in impoverished Payatas village in metropolitan Manila in August. Morillo survived and denied police allegations that he and his friends were drug dealers or that they fought back, according to Bagares and the court petition.

BANGLADESH

THE ASSOCIATED PRESS

Smoke and protest amid plans for a coal plant: Smoke rises after Bangladeshi policemen fire tear gas shells to disperse protesters demanding cancellation of a plan for a massive coal-fired power plant near ecologically sensitive mangrove forests on the coast in Dhaka, Bangladesh, on Thursday. The government insists that the planned 1.3-gigawatt Rampal power station near the Sundarbans, a world heritage site, is key to reaching its target of 24 gigawatts of electrical capacity by 2021.

WASHINGTON

Labor secretary nominee's company outsourced jobs

The fast-food empire run by President Donald Trump's pick for Labor secretary outsourced its technology department to the Philippines, a move that runs counter to Trump's mantra to keep jobs in the United States.

A filing with the Department of Labor and Trump's criticism of outsourcing could be raised at Andrew Puzder's confirmation hearing, with Democrats questioning how well he can advocate for workers.

Puzder's company, CKE Restaurants Inc., notified the government in August of 2010 that it was outsourcing its restaurant information technology division to the Philippines. Doing so, the agency found, "contributed importantly" to the layoffs of both CKE employees and those of an outside staffing firm at an Anaheim facility. The agency's finding made workers eligible for federally funded benefits meant to dampen the impact of globalization on employees.

ASIA

China's new list bans items for export to North Korea

China has released a new list of items banned for export to North Korea, ranging from wind tunnels to plutonium, following a new round of United Nations sanctions and complaints from President Donald Trump that Beijing was not doing enough to pressure its communist neighbor.

The step was seen by one leading expert on North Korea as an attempt to show that China is fully meeting its commitments, and to pre-empt any moves by the U.S. to punish Chinese companies that deal with Pyongyang. However, the expert questioned whether the ban would have much effect in slowing a program that is already well advanced and gathering momentum.

A statement from the Chinese Commerce Ministry late Wednesday said the items included dual-use technologies that could aid the North's programs to develop nuclear, chemical and biological weapons as well as the missiles to deliver them.

— The Associated Press

TRANSFER OF POWER

Gambia's president returns to nation as new era begins

BANJUL, GAMBIA » Gambia's President Adama Barrow finally returned home Thursday, solidifying his position as this country's first new commander in chief in two decades after a political crisis that sent the previous ruler into exile.

Hundreds of people lined the road to the airport ahead of his arrival.

"I am a happy man today," Barrow told the AP amid the crush of his arrival. "I think the bad part is finished now." He promised to get his Cabinet in place and "then get the ball rolling."

Gambians had eagerly awaited Barrow, who has promised to reverse many of the authoritarian policies of former leader Yahya Jammeh, who was accused of imprisoning, torturing and killing his political opponents.

"Every Gambian must be free. We suffered for 22 years, but now enough is enough," said Seedia Badjie, 37.

Barrow defeated Jammeh in December elections, but the veteran leader did not want to cede power.

— The Associated Press

PHILADELPHIA

Amtrak engineer: Projectiles hit train before deadly crash

The Amtrak engineer involved in a deadly 2015 crash in Philadelphia has sued the railroad, saying it failed to address reports that people were throwing projectiles at trains.

Brandon Bostian, 33, said he was left disoriented or unconscious when something struck his train before the May 2015 crash, which left eight people dead and more than 200 injured.

Federal investigators came to a different conclusion: that Bostian's train wasn't hit.

They believe Bostian was instead distracted over reports that a nearby train was struck and lost track of where he was, accelerating to 106 mph as he approached a 50 mph curve. The National Transportation Safety Board called Amtrak's long failure to implement automatic speed control throughout the busy Northeast Corridor a contributing factor. Amtrak has taken responsibility for the crash and agreed to pay $265 million to settle related claims.

— The Associated Press

ARKANSAS

Common second-trimester abortion procedure banned

Arkansas' governor on Thursday approved a ban on a commonly used second-trimester abortion procedure — restrictions that are expected to face a legal challenge.

Republican Gov. Asa Hutchinson signed into law a measure banning the procedure known as dilation and evacuation, which abortion-rights supporters contend is the safest and most common procedure used in second-trimester abortions.

Hutchinson signed the bill hours after it was approved by the majority-GOP Senate on a 25-6 vote. It won't take effect until later this year.

Hutchinson had promised abortion opponents earlier this week he would sign the ban into law.

Arkansas Right to Life has called the prohibition its top legislative priority in Arkansas, and the group's president has called the procedure "barbaric."

"I think this is a humane bill," said Republican Sen. David Sanders, who co-sponsored the measure.

— The Associated Press

INDIA

Nonprofits closing doors as access to funds are cut

By Nirmala George
The Associated Press

NEW DELHI » A nonprofit running schools for children from India's lowest caste may run out of money to pay teachers in just months. A health institute in Bangalore is taking the government to court so it can continue its work, including anti-tobacco campaigns. A lawyers' group wanted to know why it lost its license to receive foreign donations, only to be told the government wasn't obliged to explain why.

The government has canceled such licenses for more than 200 nonprofits, accusing them of engaging in "anti-national" activities. But the nonprofits see the removal of their funding mainstay, as well intimidation and harassment by government agencies, as attempts to suppress dissenting voices.

"All our work in the social sector has come to an abrupt halt," said Martin Makwan, founder of Navsarjan, which has been fighting caste prejudice and inequality in the poorest parts of Gujarat state for nearly three decades.

Makwan opened the first of the three schools for Dalit children in 2005. The lowest caste in the hierarchy, Dalits face discrimination and violence.

In August, Navsarjan's license under the Foreign Contribution Regulation Act received its regular renewal. But four months later, the nonprofit received a letter from India's home ministry saying the license was being withdrawn for "activities detrimental to national interest."

Eighty staff members, mostly social workers and legal assistants, were laid off immediately. Appeals for local donations are falling short.

"We hope to keep the schools running till the end of March, but after that we won't be able to pay teachers' salaries," Makwan said by phone from Ahmadabad.

In the southern city of Bangalore, a health nonprofit has taken the federal home ministry to court after it received a one-line email saying its FCRA renewal had been denied.

The Institute of Public Health has worked closely with the federal and Karnataka state government on several health-related and anti-tobacco campaigns. It will have to halt its programs without donations from foreign groups like the World Health Organization, the International Committee of the Red Cross and Bloomberg Philanthropies.

The law regulating foreign donations passed in 2010, but activists say the pressure on nonprofits increased under Prime Minister Narendra Modi, who took office in 2014. An Intelligence Bureau report that year said economic growth was damaged when nonprofits rallied communities against polluting industries or infrastructure projects that would damage the environment.

Activists see a connection between the crackdown and the work done by such non-governmental organizations. Many infrastructure and industrial projects pushed by Modi's government are mired in problems over acquiring land from farmers, and many NGOs have stepped in to ensure the farmers are adequately compensated.

RE: Eastside Gold Line Extension Phase II
Outreach Collaboration

March 10, 2016

Metro is hosting Community Meetings in your area to update residents and businesses, and receive public input, on the latest developments of the Eastside Transit Corridor Phase 2 project. The project seeks to extend the Metro Gold Line from its current Eastside terminus at Pomona Blvd and Atlantic Blvd.

The meetings are as follows:
Monday, March 28: Whittier Senior Center, 13225 Walnut St
Tuesday, March 29: East Los Angeles Public Library; 4837 E 3rd St
Wednesday March 30: Montebello Quiet Cannon, 901 Via San Clemente
Thursday March 31: South El Monte Senior Center, 1556 Central Ave

Additional meeting details are included in the attached meeting notice.

All meetings are scheduled to start at 6 pm, and will include information on work being done to address comments along the proposed SR-60 North Side Design Variation (NSDV) Alternative, and three new route concepts for the Washington Alternative: 1) Arizona Ave. (grade to be determined); Atlantic Blvd. (grade to be determined), and; 3) Garfield Ave. (underground, since aerial and at-grade options have been eliminated). The Board also directed staff to evaluate the potential for operating both proposed alternatives (SR-60 NSDV to City of South El Monte and Washington Blvd to City of Whittier).

In an effort to engage and inform the communities near the proposed route concept locations, and other interested parties, Metro is using various outreach methods to publicize the meetings, including: notifications on the project website, distribution of flyers in the meeting locations, e-blast to our project database, mailing out over 8,500 mailers to homes near the project, coordination with project area cities, businesses and property owners.

As part of the ongoing efforts to coordinate with project stakeholders and provide information regarding the on-going alignment refinement process and project development, Metro would appreciate your assistance in informing key stakeholders, such as local elected officials, city staff, chamber members and neighborhood groups, about the upcoming public meetings.

Please consider using the following methods to publicize the upcoming meetings and maximize attendance:

1. Web link: please post the following link to your webpage http://www.metro.net/projects/eastside_phase2/upcoming-meetings/

2. Newsletter Announcement: if available, please post an announcement in your newsletter, either hard copy or electronic version. If requested, we can develop a blurb for you to use.

3. Facebook Posting: please post the community meetings on your page as an event (if available) or a link to the project website. Also, please remember to Like our FB page at facebook.com/metroeastsidephase2

4. Follow us on Twitter: @eastsidephase2

5. E-Mail notice: please forward the meeting notice that is attached in this e-mail to your contact list.

6. Meeting notices: please distribute meeting notice (take one or flyer) to your own mailing lists. Notices are available and can be provided for your distribution, just let us know how many you need.

7. Events/Meeting Posting: please promote the meeting dates at your meetings and/or at other special events.

We appreciate any support you are able to provide. Please provide us with a copy of any outreach efforts you are able to coordinate.

Thank you for your assistance in keeping the community informed regarding the Eastside Extension Phase 2 public meetings. If you have any questions or require further information, you may contact me directly or you may contact our outreach consultants, Yesenia Arias or Kathy Ortiz-Cobian at 909-627-2974 or via email at yarias@arellanoassociates.com and kortiz-cobian@arellanoassociates.com.

Help us get the word out about the Upcoming Community Meetings!

Metro will be hosting five public meetings in February 2017 to discuss the Metro Eastside Transit Corridor Phase 2 (Eastside 2) Project. Community members are cordially invited to attend the public meetings to learn about the latest updates and to share input on the project. Presently, the project team is evaluating options to extend the Metro Gold Line east from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles.

We hope to receive quality input from interested stakeholders at the upcoming meetings. To ensure the project team is able to confidently address the community's concerns in the revised project plans, it is important we are able to invite a diverse set of stakeholders.

We are reaching out to you because you may be able to help us reach out to your constituents. Please consider helping us spread the word about these very important community meetings.

We respectfully ask that you share our copy-ready text on your preferred digital communication platforms, including your website, social media sites, newsletters, and email blasts. In conjunction with copy-ready text, the attached image and project map can also be copied and dropped into various social media platforms. **Simply pick and choose content that best resonates with your stakeholders and copy and paste it into your transmittal.** We sincerely appreciate your partnership!

COMMUNITY MEETING TOOLKIT NOTIFICATION OPTIONS:

1. **Print Notices**
   Community Meeting notices will be dropped off for placement on selected public counters. If you wish to receive notices, please contact Yvette Ximenez at (909) 696-2788 or send an email to yximenez@arellanoassociates.com and indicate the number of notices you would like to have available for distribution at your constituents.

2. **Website Post**

Header: Come learn the latest on the Metro Eastside Transit Corridor Phase 2 (Eastside 2) Project at one of the 5 upcoming community meetings

Metro continues their studies of the potential extension of the Gold Line. The project team is evaluating route options to extend the Gold Line east from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles. Metro invites you to attend a community meeting next month to learn about the progress of the project and also to hear your thoughts on the alternatives.

At the meeting, you will also have the opportunity to learn about the preliminary findings regarding the Washington Bl routing concepts (Garfield Av, Atlantic Bl and Arizona Av), progress on refinements to the SR-60 Alternative, Measure M Funding, and the next steps and anticipated project milestones.

Five meetings are taking place to provide plenty of opportunities for public participation. Please see below for full meeting details. We hope to see you there!

ATTACHMENT B – PUBLIC PARTICIPATION PLAN AND WORK PLANS

Eastside Transit Corridor Phase 2

Community Update Meeting for East LA – May 13, 2019
Outreach Work Plan

I. Introduction

In 2014, a Draft Environmental Impact Statement/Environmental Impact Report (Draft EIS/EIR) was completed for the Eastside Transit Corridor Phase 2 Project (Project) that analyzed two alignment options for the extension of the Gold Line further east via two alternatives: State Route 60 to City of South El Monte or Washington Bl to City of Whittier. However, the Metro Board of Directors directed staff to complete additional studies and identify other route options for the Washington Bl. Based on the findings from the Technical Study, the Board approved (May 2017) the updated Project Definition to include three (3) Build Alternatives:

1. SR-60 Light Rail Transit (LRT) Alternative
2. Washington Bl
3. Combined Alternative

Given these significant changes, the Project will be reinitiating the Draft EIS/EIR. This new phase will further analyze and require the update in community profiles, data such as ridership travel time, environmental impacts, analyze grade crossings, maintenance and storage facilities and operable segments, further study station areas and impacts for all alternatives.

II. Approach & Strategy

In advance of the Public Scoping Meetings planned in Summer 2019, a Community Update Meeting will be offered to the East Los Angeles community to receive project updates (since 2017) and provide feedback. The public meeting will encourage project awareness, dialogue, and comment submittal from community participants. The tables below provide an overview of the major notification activities related to the meeting which is anticipated to take place on **Monday, May 13, 2019 at 5:30pm at the East Los Angeles Library**.

Table 1. Meeting Details

Community Update Meetings	Date/Time	Calendar Conflicts
EAST LA East Los Angeles Library 4837 E 3rd St, Los Angeles, CA 90022	Mon., May 13, 2019 5:30 – 7:30pm	> None

Table 2. Notification & Meeting Materials

No.	Task	Due Date	Responsible/ Status
I. NOTIFICATION			
A. Communication Materials			
1	**Fact Sheet updates**	Mon., March 25 – Thurs., April 25, 2019	AA/Metro
2	**Website edits**	Mon., March 25 – Thurs., April 25, 2019	AA/Metro
B. Database/parcel data			
3	**Obtain parcel data for East LA zip codes (500 ft. buffer + ½ mile radius):** • 90022 • 90023 • 90063	Mon., April 1 – Thurs., April 4, 2019	AA
4	**Finalize database with any event sign-ups, inquiry/helpline contacts and prepare for mailing for zip codes in East LA**	Wed., April 17, 2019	AA
C. Meeting Postcard & Eblast			
5	**Marketing to provide the following:** > Meeting postcard template > Fact sheet template (TBD)	Fri., April 5, 2019	Metro
6	**Draft meeting notice content**	Mon., March 25 – Tues., April 2, 2019	AA

37	'Thank You' eblast distribution (see line 15 for others)	Tues., June 24, 2019	AA

Eastside Transit Corridor Phase 2

Community Meetings – February 3, 6, 8, 2020

Key Notification Dates

Table 1. MEETING DETAILS AND VENUES

Community Meetings			
Date/Time	**Location**	**Special Event Features**	**Calendar Conflicts**
Community Meeting #1 Monday, February 3, 2020 6-8pm	Fourth Street Primary Center 469 Amalia Av Los Angeles, CA 90022	> Spanish interpreter	> No conflicts
Community Meeting #2 Thursday, February 6, 2020 6-8pm	Don Bosco Technical Institute 1151 San Gabriel Bl Rosemead, CA 91770	> Spanish interpreter	> No conflicts
Community Meeting #3 Saturday, February 8, 2020 10am-12pm	The Ark Montebello 931 S Maple Av Montebello, CA 90640	> Spanish interpreter	> No conflicts

Table 2. PRESENTATION MATERIALS

Deliverables	1st Review	2nd Review	Due Date
PRESENTATION MATERIALS • Main Presentation • Information stations • Display Boards	Mon., Jan. 6, 2020	Wed., Jan. 15, 2020	Tues., Jan. 28, 2020

Table 3. REMAINING NOTIFICATION

A. Communication Materials			
1.	Follow-up with LAUS on permit for Fourth Street Primary Center	Fri., Jan. 3, 2020	AA /*IN PROGRESS*
2.	Coordinate SI services	Fri., Jan. 3, 2020	AA /*IN PROGRESS*
D. EBLAST NOTICE			

	Distribute eblast notices 1. Eblast Reminder #2 2. Eblast Reminder #3 3. Eblast Reminder #4 4. Eblast – 'Thank You'	1. Mon., Jan. 27, 2020 2. Mon., Feb. 3, 2020 3. Wed., Feb. 5, 2020 4. Thu., Feb. 6, 2020 5. Thu., Feb. 13, 2020	AA
II.	MEETING MATERIALS		
1	Display boards and storyboard	Tues., Jan. 28, 2020	AA/Metro
2	Approve PPT and send for translation	Tues., Jan. 28, 2020	AA
3	Approve display boards and send for printing	Tues., Jan. 28, 2020	AA/Metro
III.	POST MEETING COMMUNICATION		
1	Eblast Announcing Metro Board Meetings and "Thank you eblast"	Mon., Feb. 10 – Tue., Feb. 11, 2020	AA/Metro
2	Website updates (boards, PPT, meeting handouts) and prepare link for eblast	Thu., Feb. 13, 2020	AA/Metro
3	Eblast Reminder 1 - Announcing Metro Board Meetings (link to The Source article and Board Reports)	Thu., Feb. 13, 2020	AA/Metro
4	Eblast announcing Board Actions	Thu., Feb. 27, 2020	

COMPLETED NOTIFICATION EFFORTS

Table II. Key Deliverables - OUTSTANDING

Deliverables	1st Review	2nd Review	Due Date
PRINTING • Meeting notice development • Metro Marketing cleared for printing by Fri., Dec. 20 • AA picks up notices by *Fri., Jan. 3, 2020* • Notices drop by Tue., Jan. 21, 2020	Thurs., Dec. 12, 2019	Tues., Dec. 17, 2019	Fri., Dec. 20, 2019
NOTIFICATION MATERIALS • Parcel Data • Eblast development • Posters *(11" x 17")* • Extended Outreach Letter/Tool • Comment sheet • Website updates	Fri., Dec. 20, 2019	Fri., Jan. 3, 2020	Fri., Jan. 10, 2020

Table III. Notification & Meeting Materials

No.	Task	Due Date	Responsible/ Status
I. NOTIFICATION			
A. Communication Materials			
1	**Prepare website suggested edits and submit for review/approval**	Fri., Jan. 3, 2020	AA / *COMPLETED*
2	**Coordinate distribution with vendors (The Walking Man and ADM)**	Fri., Jan. 3, 2020	AA / *COMPLETED*
3	**Follow-up with LAUS on permit for Fourth Street Primary Center**	Fri., Jan. 3, 2020	AA /*IN PROGRESS*
4	**Coordinate SI services**	Fri., Jan. 3, 2020	AA /*IN PROGRESS*
5	**Website updates –** Publish Community Meeting details	Tue., Jan. 21, 2020	AA/Metro
6	**Project Helpline –** Update w/ Community Meeting details	Tue., Jan. 21, 2020	AA
B. Database/parcel data/distribution			
1	**Update parcel data for owner non-occupied:** • Properties within 500 ft. buffer • Properties within ½ mile radius from proposed stations • East LA (entire zip code 90022)	Fri., Jan. 3, 2020	AA /*COMPLETED*
2	**Mailing list –** Finalize updates to database and export/merge with parcel mailing addresses	Fri., Jan. 3, 2020	AA / *COMPLETED*

No.	Task	Due Date	Responsible/ Status
3	Send final list (parcel and database) to mailhouse for preparation	Fri., Jan. 3 – Mon., Jan. 6, 2020	AA / *COMPLETED*
C.	Tri-fold Notice/distribution		
1	Draft meeting notice content	Thurs., Dec. 12, 2019	AA / *COMPLETED*
2	Edits from Metro for 1st draft	Tues., Dec. 17, 2019	AA / Metro *COMPLETED*
3	Notice to be approved for printing	Fri., Dec. 20, 2019	AA / Metro *COMPLETED*
4	Coordinate/submit printing of meeting notices with Metro **Accounts for holiday schedule*	Fri., Dec. 20, 2019	AA / Metro/ *COMPLETED*
5	AA to pick-up meeting notices at Metro	Fri., Jan. 3, 2020	AA / *COMPLETED*
6	AA to drop-off notices to vendor for distribution and extended outreach **3-day production for mail*	Mon., Jan. 6, 2020	AA / *COMPLETED*
7	Notices to reach mailboxes **2-week notification*	Tue., Jan. 21, 2020	AA / *COMPLETED*
8	The Walking Man to do door-to-door distribution	Tue., Jan. 21, 2020	AA / *COMPLETED*
D.	Eblast Notice		
1	Prepare draft eblast notice	Thu., Dec. 19, 2019	AA / *COMPLETED*
2	Submit to Metro for review/edits/approval	Fri., Dec. 20, 2019	AA / *COMPLETED*
3	Finalize/approve eblast and export email contact list	Thurs., Jan. 9	AA / *COMPLETED*
4	Distribute eblast notices 1. Eblast Distribution 2. Reminder 1	1. Fri., Jan. 17, 2020 2. Tue., Jan. 21, 2020	AA
E.	Display Posters		
1	Prepare draft poster	Thu., Dec. 19, 2019	AA/ *COMPLETED*
2	Submit to Metro for review/approval	Fri., Dec. 20, 2019	AA / *COMPLETED*
3	Offer posters to cities – response required by Mon., Jan. 13, 2020	Fri., Dec. 20, 2019 – Mon., Jan. 6, 2020	AA/ *COMPLETED*

1.	Draft Key messaging to prepare for meetings	Thu., Oct. 14 –
2.	Presentation	Thu., Oct. 21 –

Eastside Transit Corridor Phase 2
Community Update Meeting Series
Work Plan: January – March 2022

Table I. Meeting Schedule

Meetings				
Date/Time	**Calendar Conflicts**	**Format**	**Objective**	**Distribution approach**
Business Focused Meeting with East LA - COMPLETED **Date:** Jan. 27, 2022 **Time:** 5:30pm – 7pm	None	Virtual	**Objective:** Meeting focused on businesses to recap the ELA meeting held in November **Format:** Presentation, Open discussion	> ELACC to forward to Whittier Merchants Association/other businesses > AA's role: Facilitator and documentation support
CBO Roundtable #3 **Date:** Thu., March 3, 2022 **Time:** 12 – 2pm	None	Virtual	**Objective:** Preview of presentation for Community Update Meetings **Format:** 1-hour meeting	> Save the Date > Invite > Follow-ups
Public Meetings (Community Update; 4 total) - March 9 - 17 1. ELA 2. Commerce/Montebello 3. Pico Rivera/Santa Fe Springs 4. Whittier	See notes below by option dates	All virtual meetings with Tech Booth option	> Project Update > Present IOS options	> Recommend using Walking Man (more cost effective) and mailing to owner, non-occupied > Use same boundaries as Nov. 2021 meetings: • East LA – All zip code of 90022 • Rest of corridor along Washington Bl – From Slauson to Whittier Bl. See map here > Walking Man: ~42,000 properties > Mailing to owner non-occupied: ~11,000 properties

Table II. Public Meeting Schedule (Recommended)

	Community Meeting #1 (ELA)	Community Meeting #2 (Commerce/Montebello)	Community Meeting #3 (Pico Rivera/Santa Fe Springs)	Community Meeting #4 (Whittier)
Dates & conflicts	**Wed., March 9**	**Thu., March 10**	**Wed., March 16** > *Planning & Programming (10:30am)*	**Thu., March 17** > *San Gabriel Valley COG (4pm)*
Outdoor Sites	**Facility**	**Facility**	**Facility**	**Facility**
Option 1	Atlantic Park > *Public Works approved site for March; need to confirm date*	Commerce Senior Center (Recommended)	Pico Rivera Senior Center	Whittier Community Center
Option 2		~~The Ark at Montebello~~	Los Nietos Senior Center	Uptown Senior Center
Option 3		Montebello Senior Center		
Option 4		~~Armenian Center~~		

Table III. Notification Strategies

Notification Strategies	CBO Recomm.	CBO Task for March Mtg's	Notes
Traditional			
1. Meeting Notice. Distribution via door-to-door			For consideration: > Residential > Businesses > Other tailored messages to stakeholder interests
> ADA friendly features (bigger font size, color)	X	X	
> Multilingual (including closed caption)	X	X	
2. Eblast (same as printed notice)			Distribution to all database emails
3. Extended Outreach via Toolkit		X	Distribution to all cities, recreation centers, schools, key stakeholders. Toolkit content includes the following methods: 1. Social media (FB, Instagram, Twitter, NextDoor) 2. Newsletter/email (work with Tito/Jose/Project Team)

			3. Posting info in calendars 4. Adding graphic or info in landing page of website 5. Cable slide for local TV channels (cities) CBO task; can support by sharing with their membership/contact list); organic reposts/sharing (define thresholds; Metro to maintain control over messaging/media) AA to monitor posts to confirm content/compliance with agreed approach
4. Website updates			
5. Helpline Update			
Electronic			
6. Facebook ads (Metro leads)			
7. Metro The Source and El Pasajero articles			
8. NextDoor			
9. Social Media via: > FB Live in Spanish > Messenger > TikTok	X		We haven't done this in the past for other projects but to support CBO recommendations, we can include these methods in toolkit
10. WhatsApp Flyers	X		
Grassroots			
11. Street banners/lawn signs			
> Cities			
> CBOs	X	X	CBO task; can post signage at their location or recommended location through their own popular groups within community
12. Posters (11" x 17")			
> Key stakeholder locations			
> Pop-up locations at community events	X	X	
> Laundromats, grocery stores, Locations where people meet such as sporting events, health centers	X	X	

13. School Outreach to 34 schools along entire corridor			Map of targeted schools along corridor
> Various schools throughout corridor			> Montebello USD and some LAUSD schools shared electronic flyers in websites > Some LAUSD schools accepted printed flyers
> Open House events & other events			
> Coffee with principals, PTA groups	X		
Targeted Outreach			
14. Chambers of Commerce			**Montebello** > Chamber Newsletter **Santa Fe Springs** > Chamber Newspaper **City of Whittier** > Business-Focus Magazine > Whittier Chamber of Commerce e-Newsletter
> Work with current memberships to feature project info			
15. Business Outreach			
> Door-to-door			
16. Feature project info in newsletters (cities and elected offices)			Need to get more details about due dates. Cities that feature newsletter: > Montebello (Montebello View > Pico Rivera (Profile and Pico Rivera Magazine) > Santa Fe Springs > City of Whittier
17. Feature project info in CBO media (newsletters or social media posts)		X	CBO task; can share with their membership
18. Pop-up events	X		CBO task; CBO staff can support AA with an event(s)
19. Presentations			
> Announcements during city council meetings			City Council meetings from Feb. - March > Commerce (March 1, 15) > Montebello (Feb. 23, March 9, 23) > Pico Rivera (Feb. 22, March 8, 22)

			> Santa Fe Springs (March 1, 15) > Whittier (Feb. 22, March 8, 22)
> Non-profits that serve community	X		
> Veteran groups that use transit, ADA groups	X		
> Hire ADA staff to review documents and provide input with that unique perspective	X		
20. Reach out to service providers to reach disabled communities (in-home support)	X	X	CBO Task; promote meeting flyer with membership/contact list
21. Podcasts (TBD); need to confirm costs	X		CBO Task (Cabe Whittier)
22. Phone/text banking (TBD); need to confirm costs	X		CBO Task (for qualified CBOs; need to vet); consider audiences that they're able to reach

Table IV. Community Update Meetings Key Deliverable Dates

Tasks	1st Draft	Due Date	Notes
1. Facility research/availability and confirm meeting dates and details	Tue., Jan. 4, 2022	Mon., Jan. 17, 2022	
2. **Draft meeting notice content** shared in Word for Metro's review/approval	Mon., Jan. 10, 2022	Mon., Jan. 17, 2022	
3. Share **first design draft meeting notice with Marketing**	Thu., Jan. 20, 2022	Thu., Jan. 27, 2022	Consider CBO comments re: ADA > Font sizes bigger > Hard of hearing/sight
4. Address Marketing edits and share **2nd design meeting notice with Marketing. Share additional notices:** > Posters > Street banners > Flyers	Mon., Jan. 31, 2022	Mon., Feb. 1, 2022	
5. **Meeting notice final review/approval** from Metro Marketing	Thu., Feb. 3, 2022	Mon., Feb. 7, 2022	
6. Notices go into print production		Mon., Feb. 7 – Tue., Feb. 8, 2022	
7. AA's Third-Party Vendor picks up prints + begins to add labels/Postage for mailing of owner non-occupied		Fri., Feb. 11, 2022	
8. AA's Third-Party Vendor takes notices to USPS for owner non-occupied (~11,000 notices)		Tue., Feb. 15	
Notification campaigns			
9. **Notices start "dropping"** via Walking Man (3 weeks in advance)		Wed., Feb. 16, 2022	
10. Website update		Wed., Feb. 16, 2022	
11. **Eblast Announcement** & Reminders. Schedule: > Announcement: Wed., Feb. 16 > Reminder #1: Wed., Feb. 23 > Reminder #2 – Wed., March 2 > Reminder #3 – Tue., March 9 > Thank you eblast – Tue., March 22		Wed., Feb. 16 – Tue., March 9	
12. First Public Meeting		Wed., March 9

DRAFT

I. Overview

In 2009, Metro began studying forty-seven (47) alternatives to extend the Metro Gold Line further east from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles. The goal of the Eastside Transit Corridor Phase 2 Project (Project) is to improve transit access and mobility by connecting the eastside of Los Angeles County to Metro's regional transit system. Once the Draft Environmental Impact Statement/Environmental Impact Report (Draft EIS/EIR) was completed in 2014, two alignment options were identified for the extension of the Gold Line further east: State Route 60 (SR 60) to City of South El Monte or Washington Bl to City of Whittier. However, the Metro Board of Directors (Board) directed staff to complete additional studies and identify other route options for the Washington Bl Alternative. Based on the findings from the Technical Study, completed by Metro staff in May 2017, the Board approved the updated Project Definition to include three (3) alternatives:

1. SR 60 Alternative
2. Washington Bl Alternative
3. Combined Alternative

As a result, the Project is reinitiating the Draft EIS/EIR which requires further study of the alternatives including the refinement and update of data from the 2014 Draft EIS/EIR to address community changes and comments, update analysis with more recent data including ridership and project cost information. A Community Update Meeting was offered to the unincorporated East Los Angeles community to receive updates from February 2017. The Community Update Meeting provided an overview of the alternatives, information on Tunnel Boring Machine (TBM) as well as an opportunity for the community to provide input on possible TBM sites, information on the junction and answer questions from the community.

Table 1. East Los Angeles Community Update Meeting – May 2019

Date	Location	Targeted Communities	Event Format
Monday, May 13, 2019 5:30pm–7:30pm	East Los Angeles Library – Gloria Molina Community Room 4837 E 3rd St, Los Angeles, CA 90022	East Los Angeles	• Breakout session with three groups

II. Meeting Format

The Community Update Meeting

included a short open house that allowed meeting participants the opportunity to walk around and ask questions, a formal presentation followed by a short question and answer session and a breakout session at the end. During the breakout sessions, participants were provided information on each of the topics, provided comments and/or ask questions.

Meeting participants received a packet that included an Agenda, Project Overview fact sheet and question cardMaterials were offered in English and Spanish. A Spanish interpreter was also present to help with Spanish translation, if needed.

A. Program and Agenda

The Community Update Meeting Agenda below provides the schedule detailing the meeting set-up, start/end-times, and breakdown.

Table 2. Workshop Agenda

5:30 p.m. – 5:45 p.m.	**Welcome/Registration**	AA staff welcomes participants and provide meeting handout packet.
5:45 p.m. – 6:05 p.m.	**Formal Presentation**	Presentation on overview of the project and all updates.
6:05 p.m. – 6:10 p.m.	**Questions & Answer Session**	Metro staff read aloud the questions from the question cards provided by meeting participants and provided answers.
6:10 p.m. – 6:55 p.m.	**Breakout Sessions/Discussions**	Metro staff was available at each table to help answer questions and one-on-one discussions.
6:55 p.m. – 7:30 p.m.	**Next Steps**	Metro staff provided participants with project next steps.
7:30 p.m.	**Meeting Adjourns**	Update Meeting ended.

B. Public Comments

Participants were encouraged to submit their comments in a variety of methods, including:

1. Written comments at the meeting
2. Comment submittal via project e-mail and website comment form

C. Information Stations

The Community Update Meeting featured three breakout sessions with display boards placed around the room by topic. Breakout groups focused on:

> Stations
> Tunnel Boring Machine Activities
> Junction

Questions received during the open house werehandled individually and informally and attendees were encouraged to submit all comments and questions in writing via speaker cards or sending via mail, email, or through the project website.

III. Public Notification for Community Update Meeting

Arellano Associates (AA) staff took the lead in reserving a venue for the Community Update meeting. AA communicated with Metro staff throughout the entire meeting timeline to coordinate on notification efforts. Notification for the Community Update Meeting was focused on the East Los Angeles community and was implemented in the following ways:

- Printed notices

- Street banners
- Electronic notices

A. Printed notices

Metro and Arellano Associates (AA) worked collectively to prepare a 6" x 11"" meeting postcard **(Appendix A)** . The notice included all meeting details including purpose of the meeting, location and meeting timeThe notice was distributed to East LA stakeholders residing in the 90022 zip code and stakeholders in the community along Via Campo with street boundaries from Via Campo to Gerhart Ave to Dewar Ave to Findlay Ave. This resulted in about 22,000 notices distributed through a walking service.

Additionally, the meeting notices were distributed as part of AA's extended outreach strategy that included drop offs at public counters for display at high foot traffic areas for easy accessibility of the meeting information. Public counters included community-based organizations, local businesses, chambers of commerce and Supervisor Hilda Solis' office, all within the East LA community.

B. Street Banners

Metro and AA prepared a 5' x 8' street banner that included the meeting details. Four (4) areas were identified with high traffic and visibility and were used to install the banners and included:

- East LA Library – Civic Center (Pomona Bl and La Verne Av)
- Chalio's Restaurant (Atlantic Bl and Whittier Bl)
- Intersection of Atlantic Bl and Beverly Bl
- Civic Center Way and Mednik Av

C. Electronic Notifications

AA prepared an electronic version of the meeting notice **(Appendix A)** that also included the meeting purpose, datelocation and time. The eblast included identification of contacts in the database whose zip code included 90022, 90023 and 90063. The eblast was approved by Metro and distributed on April 27, 2019 via Constant Contact to unduplicated emails. Additionally, three reminders were sent on May 1, 2019 – two weeks before the meeting – May 9, 2019 – one week before the meeting – May 13, 2019 – day of the meeting.

IV. Summary of Public Participation

The Community Update Meeting brought together approximately 120 community members, including staff from local elected officials, community-based organization staff and members of the public. The tables below provides a detailed summary of the Community Update Meeting participation. For a full list of participants that signed-in at the registration table, see **Appendix B.**

Table 3 Community Workshop Summary

East Los Angeles Community Update Meeting Monday, May 13, 2019	
Stakeholder Groups	**Participants**
Elected Offices	- Office of Los Angeles County Supervisor Hilda Solis, District 1 – Joseph Martinez

	- Office of Los Angeles County Supervisor Hilda Solis, District 1 – Elizabeth Andalon

V. Summary of Community Comments

The sections below provide a summary of the major comment themes that were captured through the (19) submitted comment sheets **(Appendix C),** handwritten mark-ups on the breakout table materials and questions cards **(Appendix C).** The source of the comment is referenced at the end of each comment bulleted below.

- *Meeting*
    - Disapprove of the meeting venue and layout
    - Make meeting details readily available online
    - Bring engineering staff to all meetings

- Stations/Station Parking
    - Create a station design similar to Mariachi Plaza for the Shops at Montebello Station.
    - Take parking into consideration when planning as there is a parking shortage in the community.
    - For the Atlantic and Whittier Station, build the station at the site of the gas station or Sketchers store. Please provide community space in the area.
    - Host a community meeting in Montebello to address the Greenwood Station.
    - Provide shuttle services to stations.

- *Alignment*
    - Opposes development of the SR 60 Alternative.
    - Supports an underground alignment from Atlantic to Garfield.
    - Supports the Washington Alternative.
    - Supports the SR60 Alternative.
    - Washington Alternative needs to be built first.
    - Supports the City of Whittier route.
    - Combined Alternative with underground alignment.

- *Safety*
    - Concerned about transients coming from the Telford and Woods area.
    - Concerned about safety around the stations with a possible influx of homelessness.

- *Traffic/Circulation Impacts*
    - Help reduce car usage.

- *Property Impacts / Right-of-Way*
    - Concerned about property values along the SR 60.
    - Concerned that the project will create a denser community.

DRAFT

- If SB50 passes and more transit is built, will all areas adjacent to the project be subject to high rise development.

- *Active Transportation*
  - Promote pedestrian friendly streets and welcoming sidewalks.

- *Other comments*
  - Support statements presented by the Justice and Equality for Eastside Coalition.
  - Support economic growth in El Monte with the Paseo of the Gateway being built in the near future.
  - Just do what we want.
  - Start tunnel from south to north.

Additionally, the questions that were submitted via the Question Cards **(Appendix C)** are referenced below:

- *Alignment*
  - Please define at-grade, aerial and below grade.
  - When will the final alignment be decided?

- *Stations/ Station Parking*
  - Affordable parking and parking availability need to be a top priority.
  - How much does station parking cost?

- *Property Impacts / Right-of-Way*
  - Concerned about property values along SR60.
  - What types of property impacts will there be?

- *Safety*
  - Will the budget address homelessness around Metro stations?
  - How will Metro address transients?

- *Other*
  - What impact will public opposition have on Metro's decision?
  - Why does the meeting format have to be difficult?
  - Why can't we sync all the community meetings?

VI. Next Steps

As part of the Draft EIS/EIR, Metro anticipates engaging the community to get valuable feedback through a variety of activities including participation at community events, activities, stakeholder meetings and briefings. In the coming weeks, Metro will be conducting a series of six (6) public scoping meetings to get community input on the alternatives.

1.0 INTRODUCTION

1.1 Project Overview

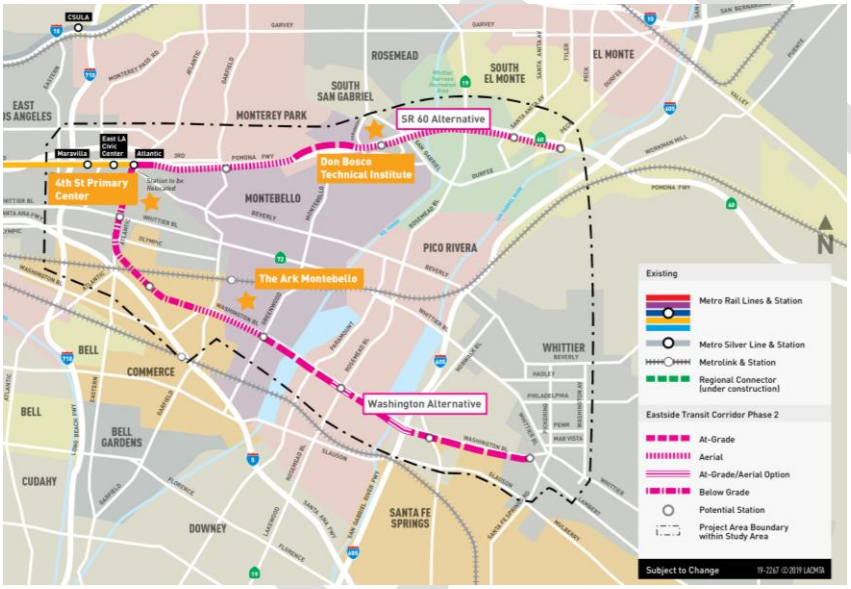
The Los Angeles County Metropolitan Transportation Authority (Metro) is currently preparing a Supplemental Draft Environmental Impact Statement (EIS)/Recirculated Draft Environmental Impact Report (EIR) on the Eastside Transit Corridor Phase 2 Project (Project) that proposes to extend the Metro L Line (Gold) further east from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles. The purpose of the proposed Eastside Transit Corridor Phase 2 Project (Project) is to improve transit access and mobility by connecting communities of eastern Los Angeles County, including Commerce, East Los Angeles, Montebello, Monterey Park, Pico Rivera, Rosemead, Santa Fe Springs, South El Monte and Whittier, to Metro's regional transit system. A full description of this Project can be found in Appendix C (Notification). In 2014, a Draft Environmental Impact Statement/Environmental Impact Report (EIS/EIR) analyzed two alignment (route) options extending the L Line (Gold) further east into South El Monte – via State Route 60 (SR 60) or Whittier (via Washington Bl). Based on the technical analysis and comments received by agencies and the public, the Metro Board of Directors opted to complete additional studies to address the comments received. In May 2017, Metro staff completed a Post Draft EIS/EIR Technical Study Report (technical study) for the project that resulted in the three (3) alternatives moving into the reinitiated environmental process:

- SR 60 Alternative (SR 60)
- Washington Bl Alternative
- Combined Alternative (builds both SR 60 and Washington)

The Supplemental Draft EIS /Recirculated EIR was reinitiated in June 2019 and will provide an updated environmental analysis, continual coordination with regulatory agencies, engineering design and refinement to the alternatives. Throughout this process, Metro will continue public engagement and outreach with interested stakeholders and project area communities.

Metro provided a Project update in February 2020 through a series of community meetings in advance of the next Metro Planning & Programming Committee and Board of Directors meetings taking place later in February 2020. Arellano Associates (AA), in coordination with Metro, prepared and executed a notification plan to notice project area residents, businesses and the general public about these meetings and project updates. This report summarizes the meeting process and materials as well as the outreach and notification efforts leading up to the February 2020 meetings.

1.2 Meeting Series Overview



AA, in coordination with Metro, prepared for and planned three (3) community meetings that took place on February 3 in East Los Angeles, February 6 in Rosemead and February 8 in Montebello. The meetings provided a comprehensive project update in advance of the next Metro Planning & Programming Committee – February 19 at 11am, and Board of Directors meeting – February 27 at 10am. The information and recommendations to move forward with the Washington Alternative based on staff findings and recommendations will be reviewed and considered by the Metro Board of Directors, where they may take action. The community meetings were focused on providing informational updates and

answering questions related to those updates. Additionally, Metro system-wide fact sheets were available as resources.

Meeting	Date	Location/Address
Community Meeting #1 – East Los Angeles	02/3/2020	Fourth Street Primary Center 469 Amalia Av Los Angeles, CA 90022
Community Meeting #2 – Rosemead	02/6/6/2020	Don Bosco Technical Institute 1151 San Gabriel Bl Rosemead, CA 91770
Community Meeting #3 – Montebello	02/08/2020	The Ark Montebello 931 S Maple Av Montebello, CA 90640

The meetings generated 234 participants, 76 questions/comments, and 5 letters. A full summary of comments and major comment themes are available in Chapter 5 of this report, copies of question cards submitted at each meeting are available in Appendix A.

Figure 1 - Meeting Locations

2.0 OUTREACH ACTIVITIES LEADING UP TO MEETING SERIES

Following the Public Scoping Comment Period in July 2019, and leading up to the February community meetings, Metro conducted twenty-nine (29) multiple agency and stakeholder group briefings and presentations. In addition, the outreach team conducted two (2) pop-up events at community events throughout the corridor. Table 2.1 below lists each of these briefings, presentations, and community events.

Table 2.1 Outreach Activities Leading up to Meeting Series

No.	Agency/Stakeholder group	Date
1	Gateway Cities Quarterly Transit Operator Meeting	01/30/20
2	Joint Coalitions & Elected Offices Meeting (SR 60 & Washington Coalitions)	01/29/20
3	Office of Congresswoman Lucille Roybal-Allard (CA-34)	01/24/20
4	Office of Assemblymember Ed Chau (49th District)	01/21/20
5	Office of Senator Susan Rubio (22nd District)	01/17/20

24	Offices of Sup. Hahn & Senior Leadership Team	09/07/19
25	Commerce City Manager Briefing	08/15/19
26	Los Angeles County Department of Public Works	08/14/19
27	Southern California Edison	07/29/19
28	City of San Gabriel Council	07/18/19
29	Los Angeles County Department of Public Works	07/17/19

	Event	Community	Date
1	City of Montebello's Snow Event	Montebello	12/21/19
2	Tzu Chi "Steps for the Earth" (Sup. Solis' hosted event)	South El Monte	08/17/19

3.0 NOTIFICATION OF COMMUNITY UPDATE MEETINGS

To promote public awareness, AA, in coordination with Metro, implemented a variety of noticing methods for the community meetings. These included a combination of printed notices distributed via mail and door-to-door deliveries through The Walking Man, eblasts, posters and extended outreach. The notification efforts resulted in published articles and other Earned Media. Communication materials were also updated to reflect the community meetings details like the website and helpline.

3.1 Printed Notices

AA designed the meeting notice for public distribution along the project corridors. Metro lead with the printing of 70,000 notices to distribute to stakeholders, residents, agencies and stakeholder groups in the corridor area. The bilingual (English and Spanish) notices included meeting information, project description and project contact information. A copy of the postcard is available to view in Appendix B. The table below outlines the different sources used to distribute the notices beginning on Thursday, January 16, 2020. Please refer to section 3.4 for a summary on the public counter and school's distribution.

Table 3.1 Distribution of Printed Notices

No	Distribution Type	No. of Notices
1	Mailed notices via mailhouse	11,801
2	Door-to-door via The Walking Man	~49,000
3	Public Counter	3,150
4	Schools	2,036
5	Metro **to be available at different briefings conducted by Metro*	*850
Total		66,837

3.2 Eblasts

An electronic version of the meeting notice was distributed via e-blast to contacts in the project database that contain an email address. The original eblast was sent to 2,026 contacts on January 17th followed by three (3) reminders and thank you eblast, as seen in the table below. The database was updated prior to the notification period for this meeting series and the updated database included emails for about 2,000 stakeholders. A PDF copy of the initial eblast and thank you eblast are available in Appendix B.

Table 3.2 Eblast Distribution

No	Date	Eblast	Sent	Opens
1	January 17, 2020	Eblast Notice #1	2,026	562 (30%)
2	January 21, 2020	Reminder #1	2,049	445 (24%)
3	January 31, 2020	Reminder #2	1,900	450 (24%)
4	February 6, 2020	Reminder #3	1,924	456 (24%)
5	February 14, 2020	Thank you eblast	2,008	555 (28.6%)

3.3 Posters

In addition to meeting notices, AA designed an 11"x17" poster with the same information as the meeting notice. The posters were offered to several key stakeholders along both corridors to place in their news section or other high-foot trafficked area, including city halls. The posters were distributed to forty-one (41) public counters organizations that included community organizations, community centers, libraries, parks, schools and other public counters. A total of 151 posters were distributed. The posters can be viewed in Appendix B.

3.4 Extended Outreach

An extended outreach list was created using existing key stakeholder lists and recommendations from Metro. The extended outreach list included public agencies, community groups, schools, libraries, community centers, faith-based organizations and chambers of commerce. AA delivered 3,150 meeting notices to sixty-four (64) organizations. Additionally, AA delivered 2,036 meeting notices to three schools so that students can take home which include:

- Fourth Street Primary Center
- Rosewood Park School
- Greenwood Elementary School

An electronic communications toolkit was prepared that included copy-and-paste ready text for the use of different communication platforms for stakeholders including eblasts, newsletters, social media posts, websites and school automated systems. The toolkit was distributed to 85 organizations and resulted in some organizations sharing the information in their different communication platforms, as seen in Appendix B for Earned Media.

3.5 Website and Helpline

AA prepared the website edits with Metro taking the lead in promoting the community meetings information on the Project's webpage under the Upcoming Meetings tab. At the conclusion of the meetings, the materials presented were posted to the Past Meetings section of the website so that stakeholders had the opportunity to view the materials.

AA also updated the message in English and Spanish on the project helpline to announce the meetings details. AA monitored the helpline and responded to any incoming inquiries. Once the meeting series concluded, AA re-recorded the message to reflect a general message and directed callers to visit the website to access project materials.

Both the website and helpline were updated to announce the meetings on Thursday, January 16, 2020.

4.0 COMMUNITY UPDATE MEETINGS

The three community meetings were selected strategically to allow for maximum community participation in both corridors. Each meeting included a presentation and question and answer session and storyboard reference maps were displayed on the periphery of the rooms. Each meeting also included a display with relevant project materials, including Metro's systemwide fact sheets that relate to different aspects of the project. Every participant received an Agenda, project fact sheet, and question card. All meeting materials are available in Appendix C. The three communities generated a total of 234 participants and a total of 76 speaker cards and 4 letters, as seen in the table below.

Table 4.1 Community Update Meetings Schedule

No	Date/Time	Location	Participation	Question Cards Submitted
1	**Community Meeting #1**	Fourth Street Primary Center	75	17 speaker cards*

	Monday, February 3, 2020 6-8pm	469 Amalia Av Los Angeles, CA 90022		2 letters
2	**Community Meeting #2** Thursday, February 6, 2020 6-8pm	Don Bosco Technical Institute 1151 San Gabriel Bl Rosemead, CA 91770	81	31 speaker cards* 1 letter
3	**Community Meeting #3** Saturday, February 8, 2020 10am-12pm	The Ark Montebello 931 S Maple Av Montebello, CA 90640	78	28 speaker cards* No letters
		Total	234	76 speaker cards* 4 letters
**Multiple questions were recorded on single question cards by the same stakeholder – includes comments submitted.*				

5.0 SUMMARY OF PUBLIC QUESTIONS

During the community meeting series, participants were encouraged to submit questions using the question card. The question cards were collected and used during the question and answer session at each meeting. The table below provides a summary of the frequently asked questions during the meeting series as well as how many questions were asked per environmental category. Some stakeholders also submitted letters to Metro at the meetings. The transcribed questions submitted at each meeting, the full question cards submitted and letters are available to view in Appendix A.

Table 5.1 Summary of Comments by Category

Comment Category	# of questions
Alternatives & Stations	33
Operations	10
Traffic & Parking	8
General	8
Funding	4
Safety & Security	4
Right-of-Way / Property Impacts	3
Gentrification & Displacement	2
Land Use	1

5.1 Comment Themes

A large portion of comments were regarding how the SR 60 corridor would be served by transit if the Metro Board removes the alternative from consideration. Several questions were also related to the ability to speed up construction and delivery of the project. Several participants inquired operations of the future line, including hours, speeds and where the alignment will be at-grade, aerial or undergrounded. Several questions were also related to how the Washington Alternative would impact traffic in East LA and the rest of the corridor cities along the alignment.

WHITTIER HAS BEEN IGNORED FOR YEARS BY MTA AS A RESULT WE ARE IN DIRE NEED OF Addition transportation options (EL MONTE already has a TRAIN). THE 605 & 5 ARE BARELY DRIVEABLE THEY ARE SO IMPACTED.

Residents of whittier and PICO RIVERA HAVE paid TAXES FOR YEARS AND GOT NO BENEFITS. WHEN WILL WE GET SOMETHING? WHITTIER IS ON THE FAR EAST OF LA COUNTY WHICH WOULD ALLOW FOR FUTURE CONNECTION WITH ORANGE CO TO CREATE REGIONAL SYSTEM

The second half of the line on Washington Blvd are shown at grade. It seems that having this portion be lifted above grade would be advantageous while costing slightly more, it would allow the train to travel faster, have less impact on street traffic, and eliminate the issue of pedestrians crossing tracks, which has been an issue in East LA. What constraints have kept Metro from pursuing above grade options at this section & how can we address them?

Appendix A.2

Letters Submitted

VERY BAD THINGS MAY BE COMING TO OUR NEIGHBORHOODS!

Dear Bluff Road Neighbor:
The Los Angeles County Transportation Authority(Metro) has proposed to build the Metro Gold Line further east from where it now ends at 3rd Street, and Atlantic Boulevard. There were supposed to be two possible routes. One route would basically follow the 60 Freeway east to South El Monte. The other route would go south, down Atlantic Boulevard to Telegraph Road, then east to Washington Boulevard, and from there, east on Washington Boulevard all the way out to the intersection at Lambert Road and Washington Boulevard in Whittier. According to the Metro's Environmental Impact Report the proposed cost of the Washington Boulevard route is $1.7 billion. The Montebello City Council has endorsed the Washington Blvd. Light Rail project.

If this Washington Boulevard light rail system is approved and ultimately built, it will cut South Montebello in half, and basically destroy our neighborhoods. This will also happen in south Pico Rivera. But particularly, the residents of Bluff Road will be more negatively affected than anywhere else along Washington Boulevard in South Montebello.

I have attached a copy of a page from the Metro's own Environmental Impact Report(EIR) in which I circled with highlighter what they say will happen to Bluff Road. There is an initialed term of LOS which means Level Of Service of roadways connecting to, or near Washington Boulevard. Level Of Service for roadways are graded A through F which pertains to traffic flow, congestion, and chronic traffic jams. A through D is acceptable, and E and F are unacceptable. It states that the Bluff Road/Washington Boulevard intersection will be negatively affected by this project to E and F LOS levels. **This means that we will have traffic jams on Bluff Road <u>every</u> night, with bumper-to-bumper traffic backing up northward from Washington Boulevard perhaps all the way to Mines Avenue,** or beyond. **This nightmare will last <u>forever</u> if Metro builds the light rail on Washington Blvd.** It won't be a whole lot better on weekends. How far south of Washington Blvd. that Bluff Road will be affected is hard to say.(Incidentally, CEQA means California Envirental Quality Act, and NEPA means National Environmental Policy Act).

If you wish to examine a copy of the Metro Environmental Impact Report, there is one at the Montebello Regional Library at 1550 W. Beverly Blvd., and there is one at the Pico Rivera Library at 9001 Mines Avenue, on the corner of Mines Avenue, and Rosemead Boulevard. Both books are available at the libraries' reference desks. Just ask for it.

If you do examine the EIR, there are four extremely important subjects that you will see. They are called the **project alternatives.**

1. "**THE NO BUILD ALTERNATIVE**" basically states that there would be nothing, or very little, done along the proposed route. No new construction, and everything will be pretty much left as is.
2. "**THE TSM ALTERNATIVE**", which stands for Transportation Systems Management" would be a project which would improve the bus system, increasing bus service, and improving the bus stops. It would require very little construction, and would not alter the street.
3. "**THE SR 60 LRT ALTERNATIVE**" would be a Light Rail Train which would be constructed eastward along the 60 Freeway to El Monte, or beyond.
4. "**THE WASHINGTON BOULEVARD LRT ALTERNATIVE**" is the proposed construction of the Washington Boulevard Light Rail Train. I have already detailed the route, at a proposed cost to taxpayers of $1.7 billion. This the project that the Metro people are ruthlessly, and fraudulently pushing.

If the Washington Boulevard Alternative is built it will tear South Montebello apart. It will make life near Washington Blvd. much more dangerous, and unliveable, and not just for residents of Bluff Road. According to the Metro EIR, there will be much more traffic, and congestion in our neighborhoods, and it will be much more difficult for us to get around. Though, Metro has projected a cost of $1.7 billion, my feeling is that it will go over $2 billion. **However, there is a much better way to improve our transportation needs at a fraction of the cost.**

Last Spring, Metro conducted six community scoping meetings at various locations. I was able to attend four of them. But, at those four meetings I noticed that project manager Jenny Cristales-Cevallos was completely leaving out any discussion of the "No Build Alternative," and "The TSM Alternative," even though they are in Metro's own EIR. At the very first meeting in Whittier, I pointed that out to Ms Cevallos. Yet, every meeting after that, she refused to discuss those two alternatives. It was the TSM Alternative that I wanted her to talk about. The TSM Alternative was very important to me, but she refused to talk about it.

What the Metro people were doing was <u>rigging</u> those meetings, and in doing that, they were committing fraud. The Metro people were committing fraud because they were not letting people know that there was at least one other solution to our transportation needs. The only thing she wanted to discuss was building the light rail. I believe the light rail system is the Metro's true goal, and they don't care what the public might want. As I see it, there is a much better alternative, and that would be **<u>the TSM Alternative</u>.**

According to the Metro EIR, the **TSM Alternative** would improve bus stops, and "...add enhanced bus service to the project area along major streets." Using Metro's own TSM Alternative, the following is my solution.

Instead of trains, we use a fleet of **electric buses** that will come every ten minutes, or even every fifteen minutes, 24 hours-a-day, 7 days-a-week, to each bus stop along the route. Improve the bus stops with more comfortable benches, bigger, wider roofs, with broad panels on the sides, and the backs for better shelter from the elements. And finally, good lighting at each bus stop during the night, and all bus stops must be constantly maintained. To me, this is a much better alternative than the rail system, because the buses will pick-up passengers closer to where they're coming from, and drop them off closer to where they're going, and it can be done at a small fraction of the cost of the light rail system.

As stated before, the estimated cost of the Washington Blvd. Light Rail system would be $1.7 billion, and it will take 7 years to build. I believe that the bus system I propose can be started with $17 million, and it can be up and running in 6 months. $17 million is **one one-hundreth** of $1.7 billion. But, maybe $17 million won't be enough. So, even if we double that amount to $34 million, that would be **one-fifthieth** of $1.7 billion. As I stated, the electric bus system would cost a small fraction of what the light rail system would cost as proposed by the Metro, and the bus system would be much better, and there would be no harm to our neighborhoods.

In Metro's own EIR there are more negatives about the light rail system than there are positives. They acknowledge that our neighborhoods will be greatly disrupted if the light rail system is constructed, and it will be forever.

On the reverse side of the page of the Metro EIR is a copy of a card from the Metro announcing 3 new community meetings concerning the proposed project. This is a very important. So if you can, try to make one of the meetings.

Sincerely yours, Edmund Veloz

My name is John Corcoran and I am an organizer and spokesperson for the Justice and Equality for the Eastside Coalition. Our coalition consists of over 400 homeowners and residents of the Via Campo neighborhood covering both East Los Angeles and Western Montebello, and I am presenting this statement on their behalf.

The Justice and Equality for the Eastside Coalition supports Metro Staff's positions set forth in the presentation just completed. Metro's positions, as it relates to the SR-60 Gold Line Extension, now align with the Coalition's positions and objectives previously presented to Metro as follows:

4 STORY 60 Foot High 78 UNIT BUILDING at Third & Dangler with only 46 Parking Spaces for 200 Residents

The residents who live adjacent to this proposed project are opposed. We are not opposed to affordable housing, but this is ***too big, too tall and doesn't have enough parking****. The neighborhood is* ***surrounded*** *by the SR 60 (Pomona Freeway) on the North, the I-710/SR 60 Interchange on the West and the 3 story TELECU building and Mednik Businesses on the East and the Gold Line on the South. Additionally, there is an automotive body shop on 3rd Street. This 4 story building will* ***tower*** *over the single-family residences and block the only view of the horizon. We will be* ***boxed in*** *on all sides.* ***Our only exit from our neighborhood is through Third Street.***

TRAFFIC: *This project will cause too much additional traffic especially on* ***3rd*** *Street.. On mornings residents have difficulty leaving the neighborhood. If there is an accident on 3rd, or any of the major streets some nights residents become stranded. If a bus stops to pick up passengers, traffic backs up.*

PARKING: *We already have trouble finding parking, this project will make parking impossible. 46 parking spots is not enough parking for 200 residents and their visitors. Already visitors to the Telecu building use up street parking.*

POLLUTION: *We already face pollution from being adjacent to the SR 60 and I-710 freeway and a body shop. This project with more vehicles will back up traffic causing more cars to idle as they back up on 3rd*

This project violates the 3rd Street Plan. *If they get this project in, your neighborhood could be next. A Metro Gold Line project is planned for Atlantic Blvd. Atlantic Blvd will be allowed to build Transit Oriented Development. If they can build 4 story buildings on 3rd, they will build 4 story buildings on Atlantic with insufficient parking. Where will it stop? As more properties on 3rd Street are sold, more 4 story buildings will be built. They claim that all the additional people will use the Gold Line. Help us stop this now.*

YOU CAN HELP: SIGN OUR PETITION, CALL & WRITE SUPERVISOR HILDA SOLIS (323)881-4601. Tell her NO to the NATIONAL CORE PROJECT ON 3RD & DANGLER

EASTSIDE TRANSIT CORRIDOR PHASE 2

Notification

Eastside Transit Corridor Phase 2

COMMUNITY MEETINGS – FEBRUARY 2020
COMMUNICATIONS TOOLKIT

Dear Stakeholder,

Metro reinitiated a Supplemental/Recirculated Draft Environmental Impact Statement/Environmental Impact Report (EIS/EIR) for the Eastside Transit Corridor Phase 2 Project (Project). The Project is proposing to extend the Metro Gold Line further east, from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles, to the City of South El Monte via the 60 freeway and/or to the City of Whittier via Washington Bl. Metro is conducting a round of community meetings in February 2020 to share the latest project information.

As a representative and entrusted leader of the community, we are reaching out to you to offer ***optional methods*** for sharing the Community Meeting details with your community. These efforts are intended to complement all the other public notification methods that Metro is already conducting to promote the meeting series. Below are some ***suggested options*** for sharing the meeting details:

1. **Distribute electronically via email:** Share the meeting notice with your e-mail contacts. You can download a copy of the meeting notice at this LINK.
2. **Post to your website:** You can use the image provided in the email to post to your organization's homepage. The image would then need to be linked to the following PAGE.
3. **Feature the meeting dates and details on your events calendar:** Share the community meeting dates on your online events calendar (if applicable), make announcements at your meetings, or other special events.
4. **Social media posting/sharing:**
   OPTION 1: Download our Eastside Phase 2 image at LINK and post it on your social media profiles (Facebook, Twitter, Instagram) and share the following LINK on your post.
   OPTION 2: Post meeting information to *NextDoor.com*.
5. **Newsletter Announcement:** Provide information regarding the community meetings via your organization's newsletter.
6. **Posters –** 11" X 17" posters are available to place on your organization's public counter or news section, upon request.
7. **School Outbound Text –** Program an automated school message to notify parents of the upcoming meetings a week in advance of the meeting.

Please see the following pages for copy-and-paste-ready text and downloadable image you may use to share information with your community. If you have any questions on how to share this information with your community, please contact outreach consultant Edna Jimenez at EJimenez@arellanoassociates.com or at 909-247-1236. We look forward to working with you!

Metro

ADDITIONAL INSTRUCTIONS

1. Distribute electronically via email:
   A. You can use the image provided in the email to share meeting information with your contacts/membership. Link the image to the following LINK.

   B. Or copy and paste the following text into the body of an email:

   Metro is conducting a round of community meetings to share the latest project information on the Eastside Transit Corridor Phase 2 Project. The project proposes to extend the Metro Gold Line further east, from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles, to the City of South El Monte via the 60 freeway and/or to the City of Whittier via Washington Bl.

   Please join us at a meeting that is most convenient for you. The information presented at each meeting will be the same. Refreshments, children's activities and Spanish interpretation will be available at each meeting. Meeting details are below:

   - *EAST LOS ANGELES – Monday, February 3, 2020, 6-8pm*
     Fourth Street Primary Center, 469 Amalia Av, Los Angeles, CA 90022
   - *ROSEMEAD – Thursday, February 6, 2020, 6-8pm*
     Don Bosco Technical Institute, 1151 San Gabriel Bl, Rosemead, CA 91770
   - *MONTEBELLO – Saturday, February 8, 2020, 10am-12pm*
     The Ark Montebello, 931 S Maple Av, Montebello, CA 90640

   For more information on this project please visit metro.net/eastsidephase2.

2. Post to your website: You can use the image provided in the email to post to your homepage. Link the image to the following LINK.

3. Feature the meeting on your events calendar: Promote the community meeting series on your online events calendar (if applicable) and make announcements at your meetings or other special events. The dates to include are the following:

   - *EAST LOS ANGELES – Monday, February 3, 2020, 6-8pm*
     Fourth Street Primary Center, 469 Amalia Av, Los Angeles, CA 90022
   - *ROSEMEAD – Thursday, February 6, 2020, 6-8pm*
     Don Bosco Technical Institute, 1151 San Gabriel Bl, Rosemead, CA 91770
   - *MONTEBELLO – Saturday, February 8, 2020, 10am-12pm*
     The Ark Montebello, 931 S Maple Av, Montebello, CA 90640

4. Social media posting/sharing: Post this LINK onto your social media page(s) or copy and paste the following text and image into your social media accounts:

   Option 1

   A. Facebook:

   Join @losangelesmetro and the Eastside Transit Corridor Phase 2 team at one of three community meetings in Feb. to learn the latest project information on the extension of the Gold Line to @CityOfSouthElMonteGovernment or @WhittierCityGov. For more information on the meetings, visit metro.net/eastsidephase2.

B. Twitter:
Join @metrolosangeles and the Eastside Transit Corridor Phase 2 team at one of three community meetings in Feb. to learn the latest project information on the extension of the Gold Line to @CitySEM or @WhittierCityGov. For more information on the meetings, visit metro.net/eastsidephase2.

C. Instagram:
Join @metrolosangeles and the Eastside Transit Corridor Phase 2 at one of three community meetings in Feb. to learn the latest project information on the extension of the Gold Line to City of South El Monte or @WhittierCityGov. Visit metro.net/eastsidephase2 for more details.

Option 2
Nextdoor.com (Two options)

A. Post the following text as a "message" on your Nextdoor profile:

Join Metro at a community meeting on February 3rd in East Los Angeles, February 6th in Rosemead or February 8th in Montebello, to learn the latest project information on the Eastside Transit Corridor Phase 2 Project. The project proposes to extend the Metro Gold Line further east from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles to the City of South El Monte via SR60 and/or the City of Whittier via Washington Bl. See full meeting details in the meeting notice available HERE.

For full project information please visit metro.net/eastsidephase2.

B. Post as an event on your Nextdoor profile.

a. Click on the "Post a message, event, poll or urgent alert" field on your profile.
b. Select the "Event" tab
c. Under the "Choose neighbors" option, select the second option to share with your community + nearby.
d. For category, select "meetings"
e. Text for event title: Metro is planning to extend the Gold Line to City of South El Monte or City of Whittier – Community Meetings will be held in February 2020.

Text for event description: *See text included for Option 1 above.*

5. Newsletter Announcement: Provide information regarding the project and the Community Meetings via your organization's newsletter.

Metro is conducting a round of community meetings to share the latest project information on the Eastside Transit Corridor Phase 2 Project. The project proposes to extend the Metro Gold Line further east, from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles, to the City of South El Monte via the 60 freeway and/or to the City of Whittier via Washington Bl.

Please join us at a meeting that is most convenient for you. The information presented at each meeting will be the same. Refreshments, children's activities and Spanish interpretation will be available at each meeting. Meeting details below:

- *EAST LOS ANGELES – Monday, February 3, 2020, 6-8pm*
  Fourth Street Primary Center, 469 Amalia Av, Los Angeles, CA 90022
- *ROSEMEAD – Thursday, February 6, 2020, 6-8pm*
  Don Bosco Technical Institute, 1151 San Gabriel Bl, Rosemead, CA 91770

- *MONTEBELLO – Saturday, February 8, 2020, 10am-12pm*
  The Ark Montebello, 931 S Maple Av, Montebello, CA 90640

For more information on this project please visit metro.net/eastsidephase2.

6. Posters – 11" X 17" in size. Please contact Edna Jimenez via email at EJimenez@arellanoassociates.com or 909-247-1236 to request posters. Posters can be placed in your organization's public counter, news section or other high-foot traffic areas.

7. School Outbound Text – Program the automated school message to notify parents of the upcoming Community Meetings a week in advance of the meetings. Message to be recorded:

– English Script

Metro is conducting a round of community meetings to share the latest project information on the Eastside Transit Corridor Phase 2 Project on February 3rd in East Los Angeles, February 6th in Rosemead or February 8th in Montebello. The project proposes to extend the Metro Gold Line further east, from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles, to the City of South El Monte via the 60 freeway and/or to the City of Whittier via Washington Bl. Please visit metro.net/eastsidephase2 for full details.

– Spanish Script:

Metro está conduciendo una serie de reuniones comunitarias para compartir las últimas actualizaciones del Proyecto del Corredor de Transporte Hacia el Este Fase 2 el 3 de febrero en el este de Los Angeles, 6 de febrero en Rosemead y 8 de febrero en Montebello. El proyecto propone extender el tren ligero de Metro Gold Line más hacia el este desde su terminal actual en Pomona Bl/Atlantic Bl en el este de Los Angeles hacia la ciudad de South El Monte a lo largo de la autopista 60 y/o a la ciudad de Whittier a través de Washington Bl. Por favor visite metro.net/eastsidephase2 para detalles completos.

EASTSIDE TRANSIT CORRIDOR PHASE 2

TRANSMITTAL

DATE:	February 18, 2020
FROM:	Edna Jimenez
SUBJECT:	Public Meeting Notices
TRANSMITTED VIA:	In-person delivery

Dear Community Stakeholder,

On behalf of the Los Angeles County Metropolitan Transportation Authority (Metro), thank you for sharing meeting notices with your community for the Eastside Transit Corridor Phase 2 Project. Enclosed are 50 notices that can be placed at your public counter or high foot-traffic area. Metro will host three community meetings in February. The dates and locations of each of these meetings are listed below.

EAST LOS ANGELES – Monday, February 3, 2020, 6-8pm
Fourth Street Primary Center, 469 Amalia Av, Los Angeles, CA 90022

ROSEMEAD – Thursday, February 6, 2020, 6-8pm
Don Bosco Technical Institute, 1151 San Gabriel Bl, Rosemead, CA 91770

MONTEBELLO – Saturday, February 8, 2020, 10am-12pm
The Ark Montebello, 931 S Maple Av, Montebello, CA 90640

If you have any questions or would like additional notices, please contact me at the number or email below.

Regards,

Edna Jimenez

EASTSIDE TRANSIT CORRIDOR PHASE 2 PROJECT

Thank you for participating at a Community Meeting in February!

Haga clic aquí para español

Thank you for your participation in the community meetings last week held in East Los Angeles, Rosemead, and Montebello. The meetings provided a comprehensive project update in advance of the next Metro Planning & Programming Committee and Board of Directors meetings. The information and recommendations presented to the communities on the Eastside Transit Corridor Phase 2 Project (Project) will be reviewed and considered by the Metro Board of Directors, where they may take action. Board action could update the currently proposed alternatives (The Source article). Please review the following materials to learn more and see below for more information on the upcoming Metro Board and Committee meetings.

Materials from the meeting can be downloaded here:

- Project Fact Sheet - February 2020 (English)
- Presentation (English)
- Project Map

Metro Board and Committee Meetings

The Metro Board of Directors will review and consider the information presented at the community meetings and project recommendations at the following meetings: Metro Planning & Programming Committee meeting on February 19, 2020 and at the Board of Directors meeting on February 27, 2020 (see details below). Both meetings are open to the public and will be held at Metro Headquarters. Links to watch the Board meeting in English and Spanish via a live stream can be found here: boardagendas.metro.net/

CORREDOR DE TRANSPORTE HACIA EL ESTE FASE 2

¡Gracias por participar en las reuniones comunitarias en febrero!

Gracias por su participación en las reuniones comunitarias de la semana pasada en las comunidades de East Los Angeles, Rosemead y Montebello. Las reuniones proporcionaron una actualización completa del Proyecto antes de las próximas reuniones del Comité de Planificación y Programación de Metro y la Junta Directiva de Metro. La información y las recomendaciones presentadas a las comunidades sobre el Proyecto del Corredor de Transporte Hacia el Este Fase 2 (Proyecto) serán revisadas y consideradas por la Junta Directiva de Metro, donde pueden tomar medidas. La acción de la Junta podría actualizar las alternativas actualmente propuestas (artículo El Pasajero). Por favor revise los siguientes materiales para aprender más y vea más abajo para más información sobre las próximas reuniones de la Junta Directiva y del Comité de Metro.

Puede acceder los materiales de las reuniones en los enlaces de abajo:

- Hoja informativa del proyecto - febrero de 2020
- Presentación
- Mapa del Proyecto

Reuniones de la Junta y el Comité de Metro

La Junta Directiva de Metro revisará y considerará la información presentada en las reuniones comunitarias y recomendaciones del proyecto en las siguientes reuniones: Reunión del Comité de Planificación y Programación el 19 de febrero de 2020 y en la reunión de la Junta Directiva el 27 de febrero de 2020 (ver detalles a continuación). Ambas reuniones son abiertas al público y se llevaran a cabo en Metro. EASTSIDE TRANSIT CORRIDOR PHASE 2

Please join us at a community meeting in February 2020.

Acompáñenos en una reunión comunitaria en febrero de 2020.

Metro is conducting a round of community meetings to share the latest project information on the Eastside Transit Corridor Phase 2 Project.

The project proposes to extend the Gold Line further east, from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles, to the City of South El Monte via the 60 freeway and/or Washington Bl to the City of Whittier.

Metro está conduciendo una ronda de reuniones comunitarias para compartir las últimas actualizaciones del Proyecto del Corredor de Transporte Hacia el Este Fase 2.

El proyecto propone extender el tren ligero de Metro Gold Line más hacia el este desde su terminal actual en Pomona Bl/Atlantic Bl en el este de Los Angeles hacia la ciudad de South El Monte vía la autopista 60 y/o Washington Bl a la ciudad de Whittier.

Meeting Schedule / *Detalles de las reuniones*

EAST LOS ANGELES
Monday, February 3, 2020
Lunes, 3 de febrero de 2020

Fourth Street Primary Center
469 Amalia Av
Los Angeles, CA 90022

ROSEMEAD
Thursday, February 6, 2020
Jueves, 6 de febrero de 2020

Don Bosco Technical Institute
1151 San Gabriel Bl
Rosemead, CA 91770

MONTEBELLO
Saturday, February 8, 2020
Sábado, 8 de febrero de 2020

The Ark Montebello
931 S Maple Av
Montebello, CA 90640

A Spanish interpreter will be available at every meeting. The information presented at each meeting will be the same.

Intérprete en español estará disponible en todas las reuniones. La misma información será presentada en cada reunión.

All Metro meetings are held in ADA accessible facilities. ADA accommodations and translations are available by calling the project hotline at least 72 hours in advance.

Todas las reuniones de Metro se llevan a cabo en instalaciones accesibles para las personas con discapacidades. Para solicitar otras adaptaciones para las personas con discapacidades e intérpretes, llame a la línea directa del proyecto al menos 72 horas antes de la reunión programada.

CORREDOR DE TRANSPORTE HACIA EL ESTE FASE 2

Hoja informativa

Metro®

FEBRERO 2020

Información General

Metro está estudiando tres (3) alternativas para el proyecto que extenderá el servicio de transporte de tren ligero Metro L Line (Gold) más hacia el este desde su actual terminal en Pomona Bl y Atlantic Bl en East Los Angeles. El objetivo del Proyecto Corredor de Transporte Hacia el Este Fase 2 es mejorar el acceso y la movilidad del transporte público para conectar las comunidades del este del Condado de Los Angeles al sistema de tránsito regional de Metro, incluyendo Commerce, East Los Angeles, Montebello, Monterey Park, Pico Rivera, Rosemead, Santa Fe Springs, South El Monte y Whittier.

En 2014, un Borrador de la Declaración/Informe de Impacto Ambiental (EIS/EIR, en inglés) analizó dos (2) opciones de alineamientos (rutas) para extender Metro L Line (Gold) hacia el este a South El Monte – vía la Ruta Estatal 60 (en inglés, SR 60) – o hacia Whittier (vía Washington Bl). Basado en el análisis técnico y comentarios recibidos por parte de agencias y del público, la Junta Directiva de Metro opto por completar estudios adicionales para responder a los comentarios recibidos. En mayo de 2017, el personal de Metro completó el estudio técnico para el proyecto que resultó en actualizar las tres (3) alternativas que avanzarán en el proceso ambiental reiniciado:

1. Alternativa SR 60
2. Alternativa Washington
3. Alternativa Combinada
   (construye alternativas SR 60 y Washington)

Alternativa SR 60

La Alternativa SR 60 generalmente sigue el extremo sur de la autopista 60 desde la terminal actual de Metro L Line (Gold) en Pomona Bl y Atlantic Bl y continua hasta llegar a Peck Rd en South El Monte. La alineación se desplaza hacia el lado norte de la autopista por 1.5 millas para evitar usos sensibles de la tierra, entre Greenwood Av y Paramount Bl. Estaciones propuestas* a lo largo de la ruta que se están considerando incluyen:

> Estación Garfield en Montebello
> Estación The Shops at Montebello en Montebello
> Estación Santa Anita en South El Monte
> Estación Peck en South El Monte

Alternativa Washington

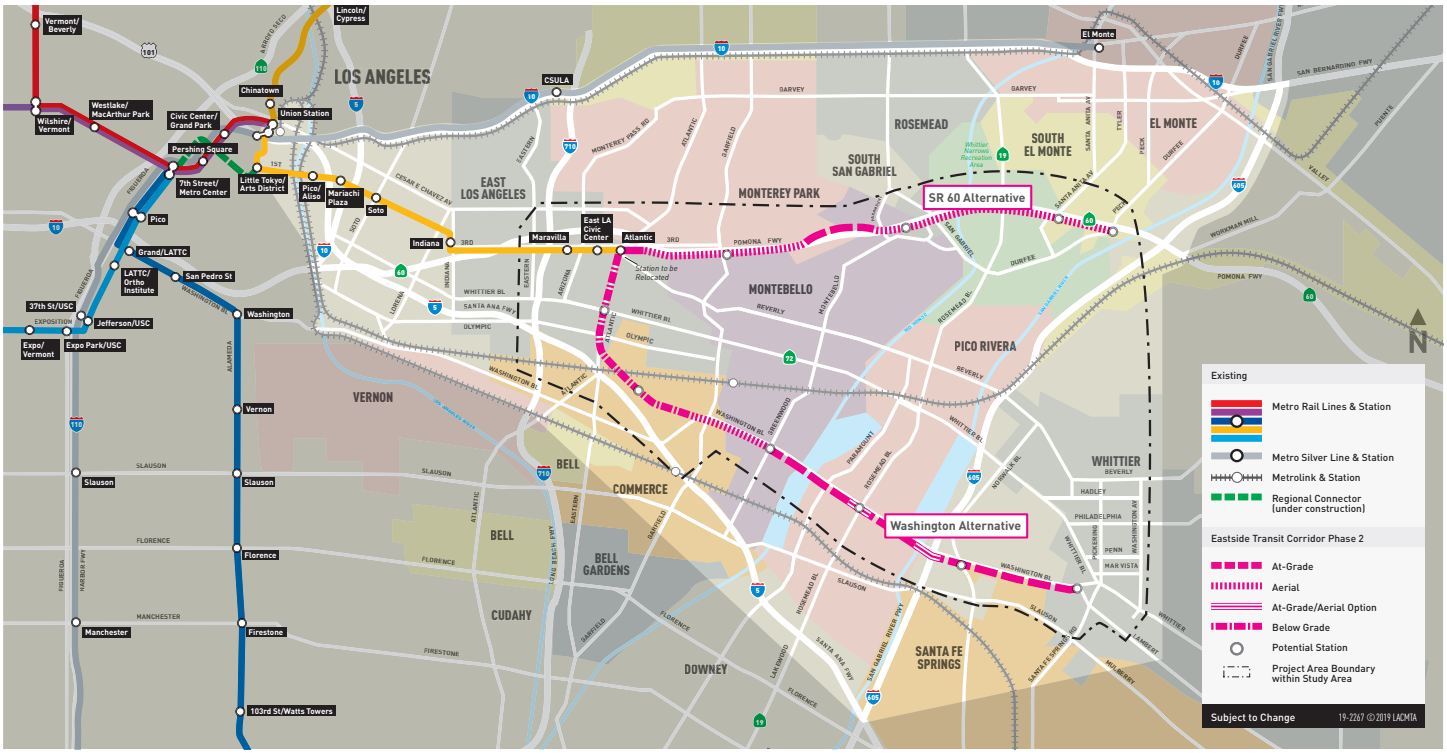
La Alternativa Washington podría viajar hacia el sur sobre Atlantic Bl en un segmento subterráneo entre la actual terminal de Metro L Line (Gold) en Pomona Bl/Atlantic Bl y Citadel Outlets en Commerce. Después, la ruta continuaría hacia el este sobre Washington Bl vía configuraciones aéreas y en-grado (a nivel de la calle) hasta terminar en Lambert Rd en Whittier. Estaciones propuestas* a lo largo de la ruta que se están considerando incluyen:

> Estación Pomona Bl/Atlantic Bl rediseñada en East Los Angeles
> Estación Atlantic Bl/Whittier Bl en East Los Angeles
> Estación Citadel en Commerce
> Estación Greenwood Av en Montebello
> Estación Rosemead Bl en Pico Rivera
> Estación Norwalk Bl sirviendo la comunidad de Los Nietos y las ciudades de Whittier y Santa Fe Springs
> Estación Lambert Rd en Whittier

Alternativa Combinada

La Alternativa Combinada es definida como la construcción completa de ambas alternativas – SR 60 y Washington Bl. Esta alternativa también permitiría viajes directos entre South El Monte y Whittier.

Segmentos Operativos Iniciales



Se anticipa que las alternativas del proyecto no puedan ser construidas completamente en un solo ciclo de financiamiento, así pues, Segmentos Operativos Iniciales, (en inglés, IOS) serán evaluados para poder construir el proyecto en fases. Cualquier segmento deberá operar como un sistema integro e incluirá instalaciones de mantenimiento y almacenaje. Este enfoque es similar a la construcción de otros proyectos ferroviarios de Metro que fueron completados en fases, incluyendo:

> Metro B Line (Red) (construido en tres fases)
> Metro D Line (Purple) Extension (bajo construcción en tres fases)
> Metro E Line (Expo) (construido en dos fases)
> Metro L Line (Gold) Foothill Extension (bajo construcción en cuatro fases)

* *Las ubicaciones de las estaciones se evaluarán exhaustivamente para garantizar que cada estacion propuesta tenga demanda de pasajeros, oportunidades de desarrollo económico, conexiones de primera/última milla, entre otros factores.*

Corredor de Transporte Hacia el Este Fase 2

Alternativas del proyecto

Proceso Ambiental Reiniciado

El proceso ambiental reiniciado para el proyecto actualizará el Borrador EIS/EIR originalmente publicado en el 2014. El Borrador reiniciado, Borrador EIS/EIR Suplemental/Recirculado considerará los cambios que han ocurrido en las comunidades a lo largo de los alineamientos desde el 2014 y va a:

> Actualizar el propósito y la necesidad del proyecto y objectivos del proyecto

> Evaluar varios refinamientos de diseño sobre las alternativas para responder a comentarios recibidos en el Borrador EIS/EIR del 2014

> Actualizar pronósticos de abordaje y tiempo de viaje

> Estudiar impactos al medioambiente

> Analizar cruces a nivel de la calle

> Identificar sitios para ubicar instalaciones de mantenimiento y almacenaje de trenes

> Desarrollar IOS

El Borrador EIS/EIR Suplemental/Recirculado será preparado y estará disponible para revisión del público en el 2021. Durante la fase de revisión ambiental, el personal de Metro continuará proporcionando actualizaciones del proyecto, recursos y herramientas para mantener a las comunidades informadas. Oportunidades para recibir comentarios también serán programadas durante hitos claves del proceso de planificación.

Financiamiento del Proyecto

Gracias al apoyo de los votantes del Plan de Mejoramiento de Tráfico del Condado de Los Angeles – presentado en la boleta de votantes como la Medida M en noviembre 2016 – Metro asigno $6 mil millones en financiamiento para este proyecto, programado en dos ciclos (de acuerdo con la implementación del plan):

> Ciclo 1 asigna $3 mil millones en el 2029 (una alineación)

> Ciclo 2 asigna $3 mil millones en el 2053 (segunda alineación)

El proyecto también es identificado como uno de los cuatro proyectos pilares y es una alta prioridad para la aceleración potencial. Si financiamiento puede ser asegurado antes del ciclo de financiación de 2029, una de las alternativas (aún por determinar) podría construirse a tiempo para los Juegos Olímpicos y Paralimpicos en verano de 2028.

Cronología del Proyecto

El diagrama de abajo resalta los hitos futuros del proyecto.

Proceso de Desarrollo del Proyecto*

2018-2021
Proceso de estudios ambientales reiniciados y ingeniería conceptual avanzada

2022-2023
Estudios ambientales e ingeniería conceptual

2023-2028
Diseño final

2029
Construcción de la primera alternativa

2035
Apertura de servicio de la primera alternativa

PARTICIPACIÓN PÚBLICA CONTINUA

*La línea de tiempo está sujeta a cambios de diversos factores, incluyendo las oportunidades de financiamiento (vea la sección Financiamiento del Proyecto).

Participación Público

Metro está comprometido con un programa de difusión integral que proporciona a las partes interesadas en el proyecto las herramientas y recursos necesarios para ser educados e informados y proporcionar un aporte valioso en hitos claves del proyecto.

CONTÁCTENOS

Metro lo invita a mantenerse involucrado y compartir sus comentarios.

EASTSIDE TRANSIT CORRIDOR PHASE 2

Fact Sheet

Metro

FEBRUARY 2020

Overview

Metro is studying three (3) project alternatives to extend the Metro L Line (Gold) further east from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles. The goal of the proposed Eastside Transit Corridor Phase 2 Project is to improve transit access and mobility by connecting eastside communities in LA County to Metro's regional transit system, including Commerce, East Los Angeles, Montebello, Monterey Park, Pico Rivera, Rosemead, Santa Fe Springs, South El Monte and Whittier.

In 2014, a Draft Environmental Impact Statement/ Environmental Impact Report (EIS/EIR) analyzed two (2) alignment (route) options for extending the Metro L Line (Gold) further east into South El Monte – via State Route 60 (SR 60) or Whittier (via Washington Bl). Based on the technical analysis and comments received by agencies and the public, the Metro Board of Directors opted to complete additional studies to address the comments received. In May 2017, Metro staff completed a technical study for the project that resulted in the following three (3) alternatives moving into the reinitiated environmental process:

1. SR 60 Alternative
2. Washington Alternative
3. Combined Alternative
   (builds both SR 60 and Washington alternatives)

SR 60 Alternative

The SR 60 Alternative generally follows the southern edge of the SR 60 freeway from the current Metro L Line (Gold) terminus at Pomona Bl and Atlantic Bl ending at Peck Rd in South El Monte. The alignment shifts to the north side of the freeway for about 1.5 miles to avoid sensitive land uses between Greenwood Av and Paramount Bl. Proposed stations* along this route being considered include:

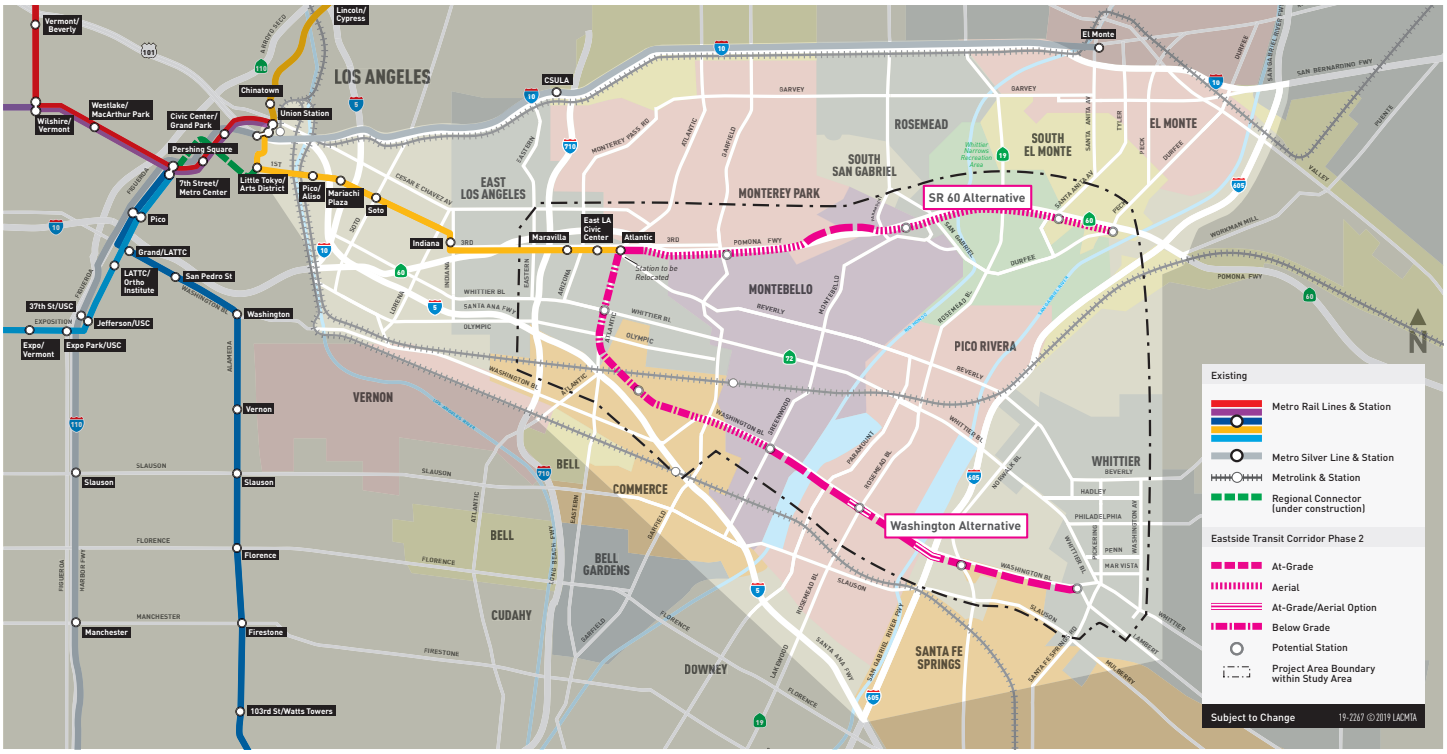
> Garfield Station in Montebello
> The Shops at Montebello Station in Montebello
> Santa Anita Station in South El Monte
> Peck Station in South El Monte

Washington Alternative

The Washington Alternative would travel south along Atlantic Bl in an underground segment between the current Metro L Line (Gold) terminus at Pomona Bl/ Atlantic Bl and the Citadel Outlets in Commerce. The route then proceeds east along Washington Bl via aerial and at-grade (street level) configurations ending at Lambert Rd in Whittier. Proposed stations* along this route being considered include:

> Redesigned Atlantic Bl Station in East Los Angeles
> Atlantic Bl/Whittier Bl Station in East Los Angeles
> The Citadel Station in Commerce
> Greenwood Av Station in Montebello
> Rosemead Bl Station in Pico Rivera
> Norwalk Bl Station serving unincorporated Los Nietos, Whittier and Santa Fe Springs
> Lambert Rd Station in Whittier

Combined Alternative



The Combined Alternative is defined as the complete build-out of both the SR 60 and Washington alternatives. This alternative could also provide a connection between South El Monte and Whittier.

Initial Operating Segments

The project alternatives are not anticipated to be fully constructed in one funding cycle, therefore, Initial Operating Segments (IOS) will be evaluated to build the project in phases. Any IOS must be able to operate as a stand-alone system and include a maintenance and storage facility. This approach is similar to the phased construction of other Metro Rail projects, including:

> Metro B Line (Red) (built in three segments)
> Metro D Line (Purple) Extension
  (under construction in three segments)
> Metro E Line (Expo) (built in two segments)
> Metro L Line (Gold) Foothill Extension
  (under construction in four segments)

** Station locations will be evaluated thoroughly to ensure each proposed station has ridership demand, economic development opportunities, first/last mile connections, among other factors.*

Reinitiated Environmental Process

A reinitiated environmental process for the project will update the original Draft EIS/EIR that was released in 2014. The reinitiated draft, Supplemental/Recirculated Draft EIS/EIR, will consider the changes that have occurred in communities along the alignments since 2014 and will:

> Update the project's purpose and need, and the project's objectives

> Evaluate various design refinements on alternatives to address comments received on the 2014 Draft EIS/EIR

> Update ridership and travel time projections

> Study potential environmental impacts

> Analyze grade crossings

> Identify locations for maintenance and storage facilities

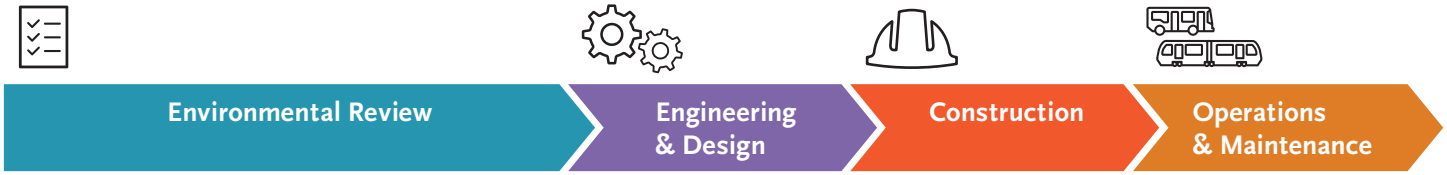
> Develop IOS

The Supplemental/Recirculated Draft EIS/EIR will be prepared and is anticipated to be available for public review in 2021. Throughout the environmental review phase, Metro staff will continue to provide project updates to stakeholders and provide the necessary tools and resources to keep communities informed. Opportunities to provide feedback will also be scheduled at key milestones in the planning process.

Project Funding

Thanks to voter support of the Los Angeles County Traffic Improvement Plan – presented to voters as Measure M in November 2016 – Metro allocated $6 billion in funding for this project that has been programmed in two cycles (per the plan's funding schedule):

> Cycle 1 allocates $3 billion in 2029 (one alignment)



> Cycle 2 allocates $3 billion in 2053 (second alignment)

The project is also identified as one of the four pillar projects and is a high priority for potential acceleration. If funding can be secured prior to the anticipated 2029 funding cycle, one of the alternatives (yet to be determined) could be built in time for the 2028 Summer Olympic and Paralympic Games.

Project Timeline

The flow chart below highlights the project's future milestones.

Project Development Process*

2018-2021
Reinitiated Environmental Process & Advanced Conceptual Engineering

2022-2023
Environmental Studies & Conceptual Engineering

2023-2028
Final Design

2029
Construction of First Alternative

2035
First Alternative Open for Service

ONGOING PUBLIC PARTICIPATION

*This timeline is subject to change based on various factors, including funding opportunities (see Project Funding section).

Public Involvement

Metro is committed to a comprehensive outreach program that provides project stakeholders with the necessary tools and resources to be informed about the project to provide valuable input at key milestones.

> Path Forward for the Environmental Process

> Upcoming Meetings

Metro

History of the Eastside Transit Corridor Phase 2

2009

Alternatives Analysis

Over 47 alternatives analyzed, including different:
- Routes
- Modes
- Stations
- Configurations

2014

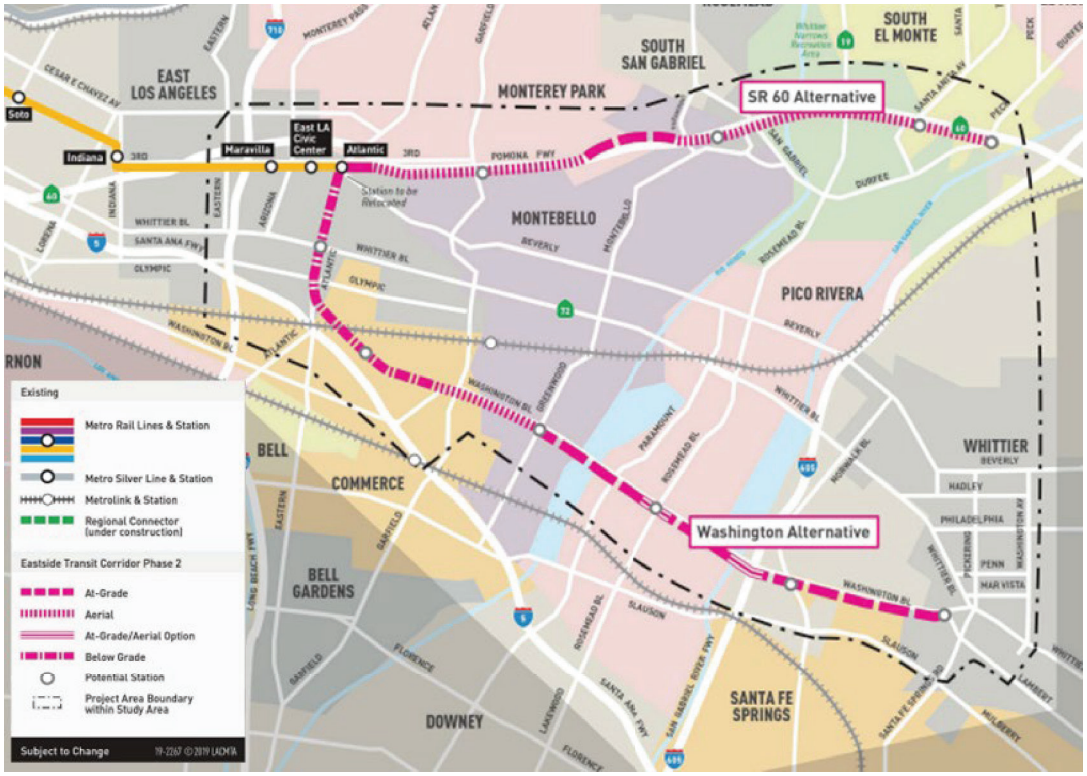
Draft EIS/EIR

- Evaluated two light rail alternatives
- LPA not selected

2017

Post Draft EIS/EIR Technical Study

-Responded to comments
-Identified a new connection to Washington



2019

Metro Reinitiated Environmental Process

Three build alternatives are being evaluated

Metro

Project Overview

> One of the four pillar projects identified to be in operations by 2028

> Identifying funding strategies for acceleration

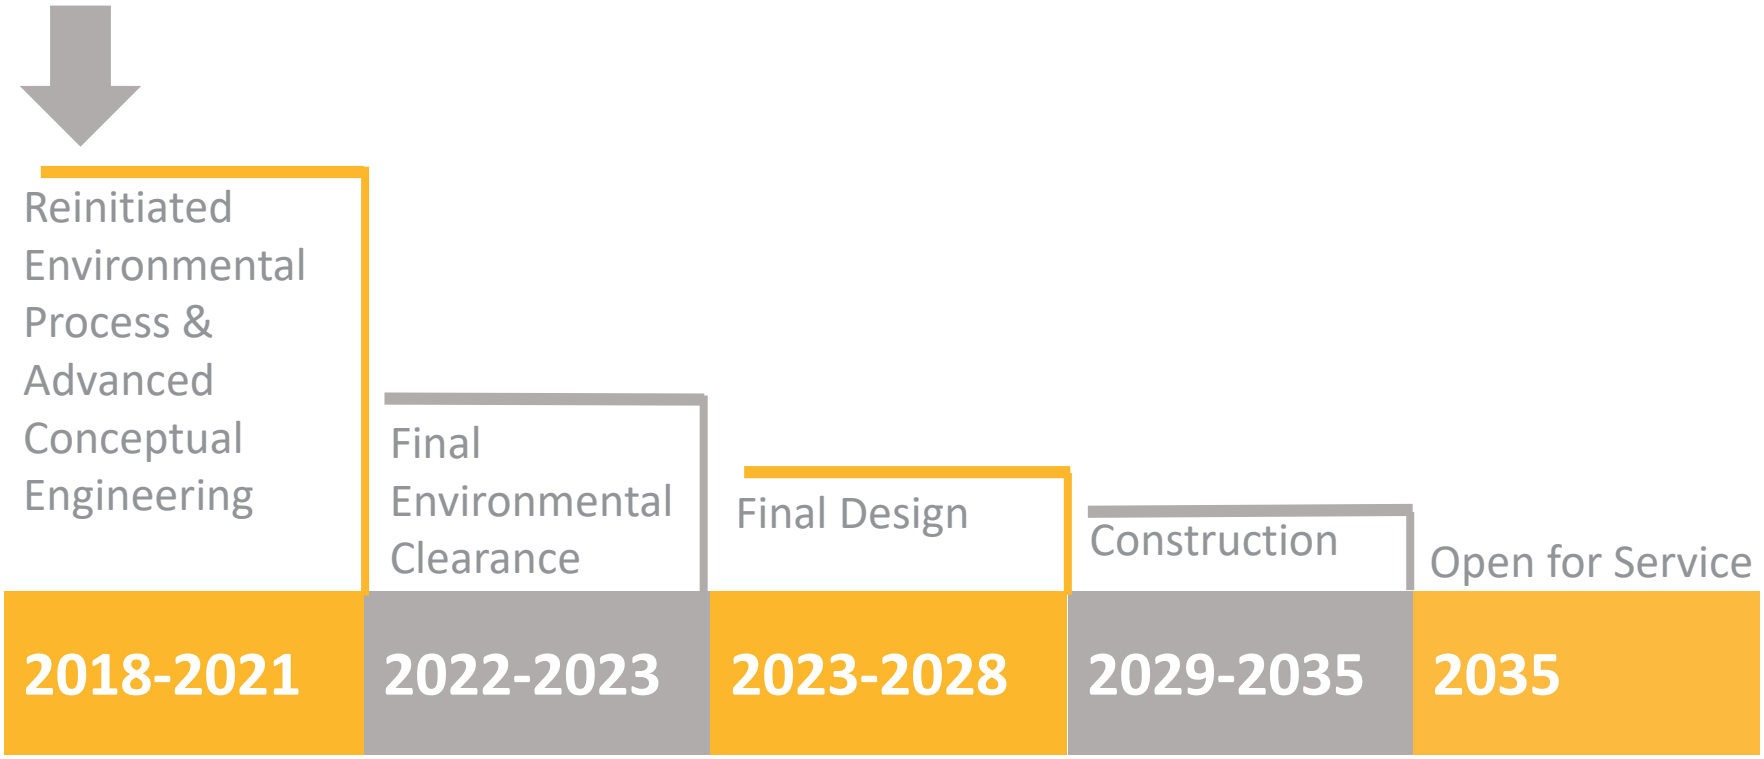
> Cycle 1 in Measure M Expenditure Plan identifies funding for <u>one alignment</u>

Metro

Project Funding Timeline

Cycle 1
State, Local, Federal and Other Funding
Measure M
Total: $3B

Groundbreaking 2029
Expected Opening Date 2035
(One Alignment)



Cycle 2
State, Local, Federal and Other Funding
Measure M
Total: $3B

Groundbreaking 2053
Expected Opening Date 2057
(Second Alignment)

Metro

Measure M Project Timeline

We are here

Scoping Comment Themes

> Major themes:

- General support for all three build alternatives
- Opposition to the at-grade segment of the SR 60 alignment from S Atlantic Bl to Findlay Av
- General support for the Washington Alternative from communities, business groups and employers along the alignment
- Concerns raised over environmental justice and equal consideration for undergrounding in lower-income areas of the county

Focused Technical Studies

- SR 60 Bridge Crossing
- SR 60 Peck Road Relocation
- SR 60 Station Concept Refinement Market Place
- SR 60 At-Grade Design
- Washington Tunnel Portal Location
- Washington Design Variation
- Combined Alternative Junction Design and Rail Operations

Washington Alternative

- Design Variations – Rosemead and I-605
- Bridge Crossings would require permitting
- Underground Tunnel
  - Mixmaster
  - Utility corridor
  - Freight tracks
- Tunnel Boring Machine (TBM) launch and extraction sites

SR 60 Alternative

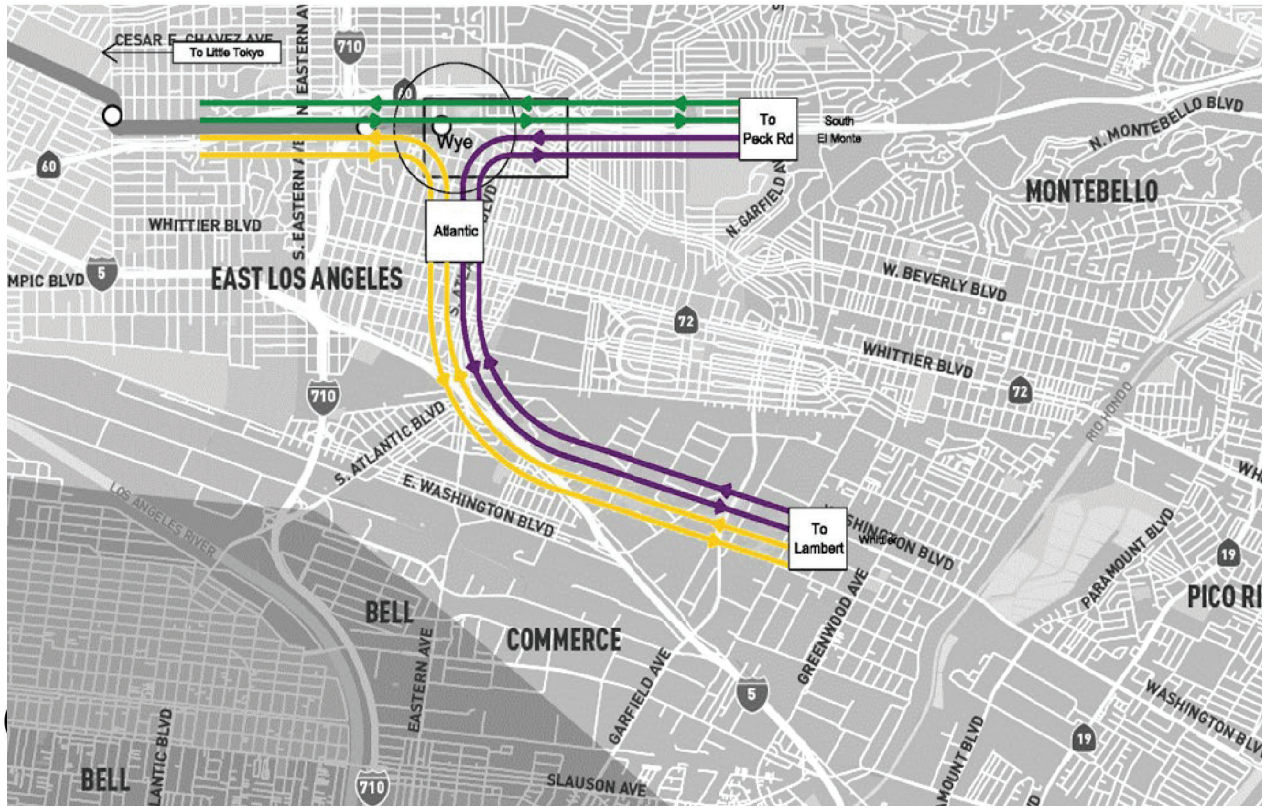
- Longstanding issues
  - Caltrans
    - Lateral encroachment permit
    - Not to preclude future improvements
    - No columns in the median
  - US Environmental Protection Agency
    - Operating Industries, Inc Superfund Site
  - Southern California Edison
    - Utility corridors transmission line conflicts
  - US Army Corps of Engineers
    - Whittier Narrows flood plain

SR 60 Alternative - Technical Findings

- SR 60 Freeway future widening
  - Potential property acquisitions or impacts to sensitive land uses
    - Residential
    - Environmentally sensitive areas
- SR60/I-605 improvements require relocation of Peck Road station and guideway
- Bridge spans across the freeway would reduce operating speeds
- SCE utility corridors conflicts
  - Paramount Blvd interchange
  - Connection to SR 60 Maintenance Storage Facility

Metro

Constrained SR 60 Maintenance Storage Facility



- Non-revenue lead tracks would extend the proposed terminus by approximately a half mile
- Lead tracks would cross over the San Gabriel River and the San Gabriel River Trail/Bike Path
- Vertical clearance of overhead transmission lines

	Regional Needs	SR 60 MSF
Size	20 Acres	15.5 Acres
Storage Capacity Light Rail Vehicles	100-120	70

Combined Alternative

- Introduces the inclusion of wye junction
- Additional property acquisitions
- Adds approximately $1.3-1.7 billion to the capital costs
  - Not commensurate with the forecasted ridership

Metro Policy Compatibility

> Transit Oriented Communities (2018) and First Last Mile Policies (2016)

- SR 60
  - Lacks connections to residential communities
  - Suburban street network, large block sizes, numerous freeway on/off ramps, and freeway underpasses
  - Serving fewer minority, low-income and transit-dependent populations
  - Demonstrated less TOC and FLM compatibility
- Washington
  - Stations are planned in areas with a connected street network making it easier to walk, bike, and ride transit
  - Serves more economically disadvantaged communities consistent with Metro's Equity Platform
  - Demonstrated greater TOC and FLM compatibility

Washington Alternative

- Washington Alternative is a viable option with fewer constraints in contrast to the SR 60 Alternative
- Avoids conflicts with Caltrans ROW, federally protected resources, and major utilities
- Cooperating Agencies had fewer concerns
- Adequate options for Maintenance Storage Facility sites
- Station areas either have existing transit-supportive land use patterns or have the potential for future planning efforts

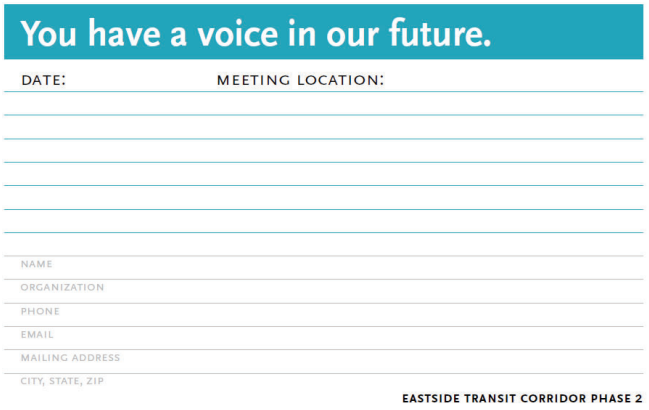
Metro

CEQA Only Environmental Clearance

- Streamline the environmental analysis and advance acceleration efforts
- Primarily funded by Measures M and R and other state and local sources
- Could reinitiate NEPA analysis if needed

Metro

Next Steps



- Recommend the Washington Alternative for the Cycle 1 funding
- Continue to work towards solving the mobility challenges along the SR 60 Freeway corridor and within the San Gabriel Valley
- Identify short and long term solutions well in advance of the second cycle of Measure M
- Prepare a feasibility study to evaluate options to improve mobility in and around the SR 60 Freeway

Metro

Questions & Answers

- Submit any inquiries using the **question card**
- Questions will **not** be answered if they're not submitted using the question card
- Questions will be categorized and may be paraphrased or skipped if they've already been answered
- Participants may submit multiple question cards, as needed
- We're here to answer questions during the Q&A (30 minutes) and following the presentation (one-on-one)
- Please be respectful of all speakers and meeting participants

Reuniones Comunitarias

Febrero 2020

Metro

Objectivo de la Reunión

> Actualizaciones del Proyecto

> Resultados técnicos

> Avance para el proceso ambiental

> Próximas reuniones

Metro

Historia del Corredor de Transporte Hacia el Este Fase 2

2009

Análisis de Alternativas

Más de 47 alternativas analizadas que incluyen las siguientes:
- Rutas
- Modalidades
- Estaciones
- Configuraciones

2014

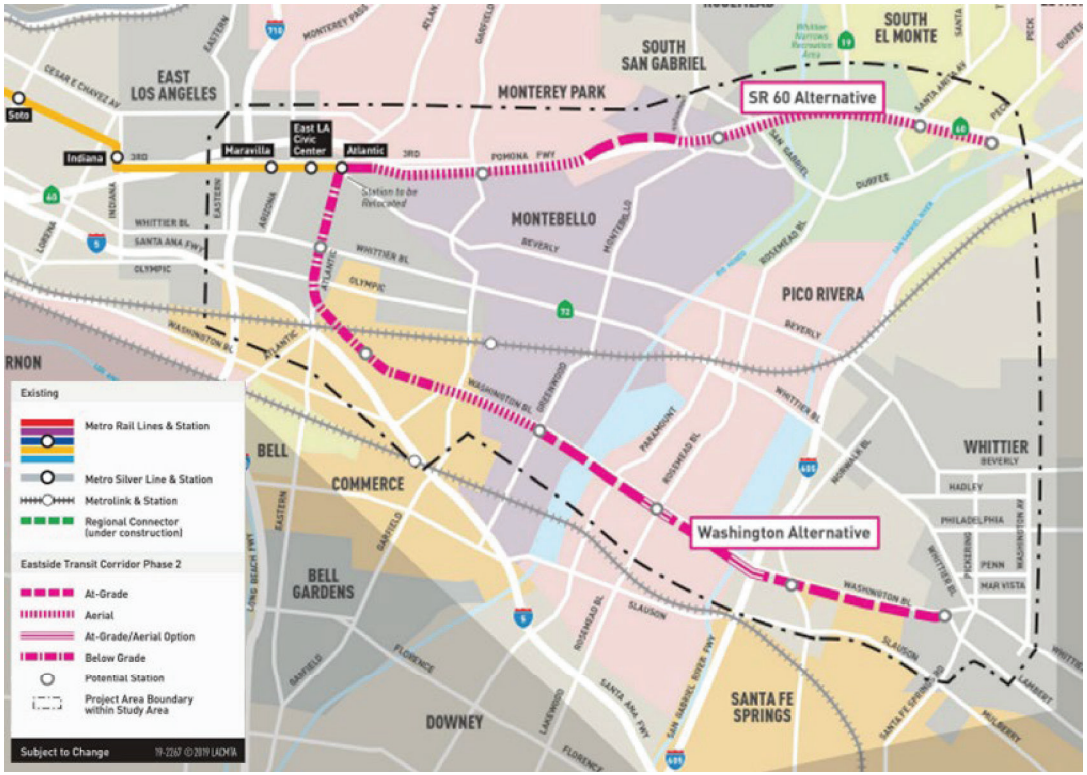
Borrador EIS/EIR

- Evaluaron dos alternativas de tren ligero
- No se eligió una alternativa de preferencia a nivel local (LPA, en inglés)

2017

Estudio técnico posterior al Borrador EIS/EIR

- Responder a los comentarios
- Identificar una nueva conexión a Washington



2019

Metro reinicia el proceso ambiental

- Tres alternativas se están evaluando

Metro

Resumen del Proyecto

> Identificado como uno de los cuatro proyectos pilares para operación en 2028

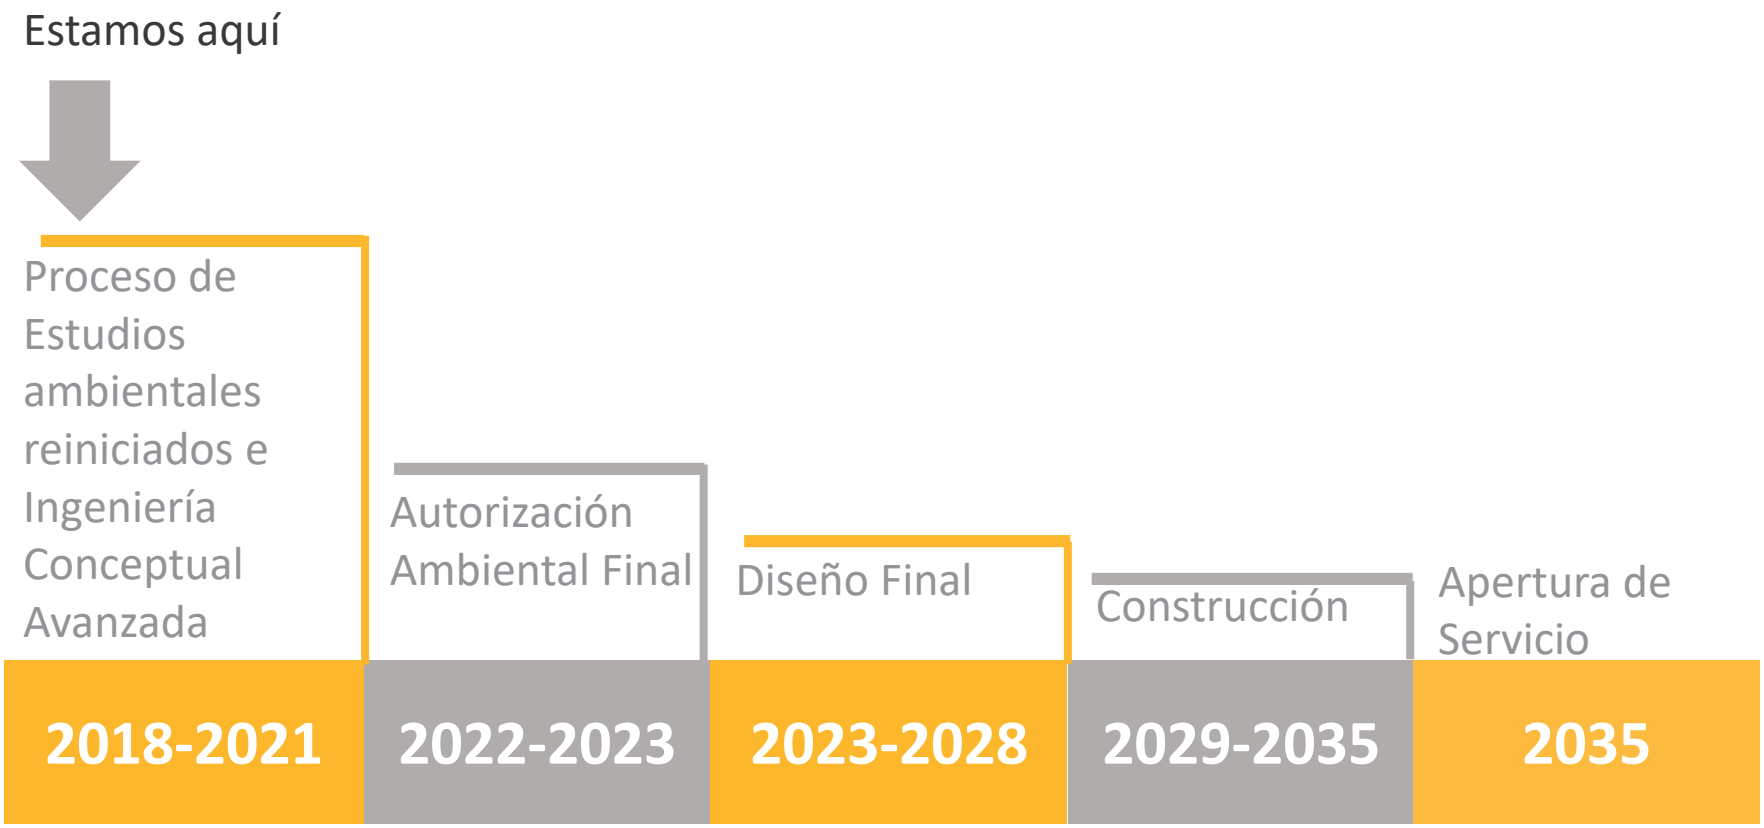
> Identificar estrategias de financiamiento para aceleración

> Identificar financiamiento para una alineación bajo el Ciclo 1 del Plan de Gastos de la Medida M

Metro

Cronología del Financiamiento del Proyecto

Ciclo 1
Estado, Local, Federal y otro financiamiento
Medida M
Total: $3,000 millones



Inauguración de construcción 2029
Fecha de apertura prevista 2035
(una alineación)

Ciclo 2
Estado, Local, Federal y otro financiamiento
Medida M
Total: $3,000 millones

Inauguración de construcción 2053
Fecha de apertura prevista 2057
(segunda alineación)

Metro

Cronología de la Medida M del Proyecto

Temas de los Comentarios de Alcance

> Temas Principales:

- En general, hay apoyo para las tres alternativas
- Oposición al segmento en-grado (a nivel de la calle) de la alineación SR 60 de S Atlantic Bl a Findlay Av
- Apoyo general para la Alternativa Washington por parte de comunidades, grupos de comerciantes y negocios a lo largo de la alineación
- Preocupaciones por la justicia ambiental y equidad comunitaria al añadir alineaciones subterráneas en áreas de bajos ingresos del condado

Estudios Técnicos Enfocados

- Cruce del puente SR 60
- Reubicación de SR 60 Peck Road
- Refinamiento del Concepto de Estación SR 60 Market Place
- Diseño en-grado de SR 60
- Ubicación del portal de túnel de Washington
- Variación de diseño de Washington
- Diseño de cruce de Alternativa Combinada y operaciones ferroviarias

Metro

Alternativa Washington

- Variación de diseños – Rosemead y I-605
- Cruces de puentes requerirían permiso
- Túnel subterráneo
  - Mixmaster
  - Corredor de servicios servicios públicos
  - Vías de carga
- Sitios de lanzamiento y extracción de la Máquina Perforadora de Túneles (TBM, en inglés)

Alternativa SR 60

> Asuntos de largo plazo

- Caltrans
  - Permiso de invasión lateral
  - No impedir las mejoras futuras
  - No columnas en medio de la autopista
- US Environmental Protection Agency
  - Operating Industries, Inc Superfund Site
- Southern California Edison
  - Conflictos en las líneas de transmisión de corredores de servicios públicos
- US Army Corps of Engineers
  - Llanura de Whittier Narrows

Alternativa SR 60 – Resultados Técnicos

> Ampliación futura de la autopista SR 60

- Posibles adquisiciones de propiedad o impactos sensible de usos de la tierra
  - Residencial
  - Áreas ambientalmente sensibles

> Mejoras de SR 60/I-605 requieren reubicación de la estación Peck Road y carril de tren ligero

> Tramo de puente a lo largo de la autopista podría reducir las velocidades de funcionamiento

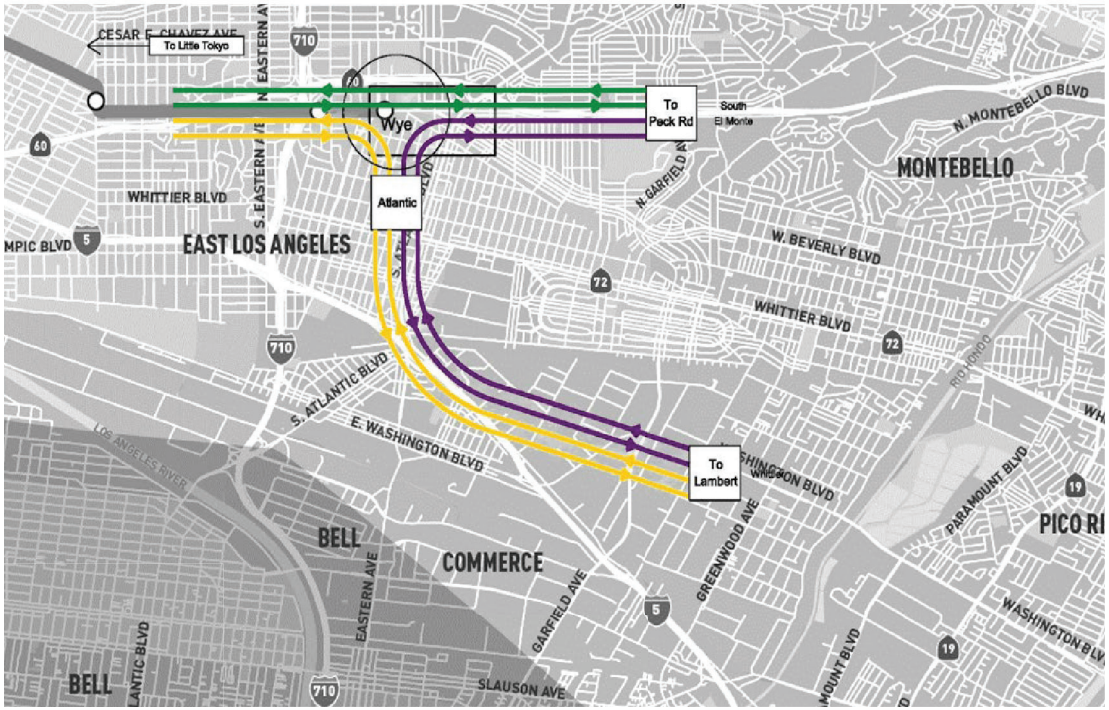
> Conflictos con los corredores de servicios públicos de SCE

- Intercambio de Paramount Blvd
- Conexión de Instalaciones de Almacenimiento y Mantenimiento (MSF, en inglés)

SR 60 Restringido – Instalaciones de Almacenimiento y Mantenimiento

- Las vías de tren principales que no generan ingresos extenderían (el punto propuesto de la terminal) por aproximadamente media milla
- Vías principals cruzarián al Río de San Gabriel/sendero de bicicletas
- Separación vertical de las líneas aéreas de transmisión

	Necesidades Regionales	MSF de SR 60
Tamaño	20 Acres	15.5 Acres
Capacidad de almacenimiento de vehículos de tren ligero	100-120	70



Alternativa Combinada

> Introduce la inclusión del cruce “wye”

> Adquisiciones de propiedades adicionales

> Agrega aproximadamente $1.3-1.7 mil millones a los costos de capital

- No es proporcional con el pronóstico de pasajeros

Compatibilidad de Políticas de Metro

> Comunidades Orientadas al Tránsito (TOC, en inglés) (2018) y Póliza de Primera/Última Milla (FLM, en inglés) (2016)

- SR 60
  - Falta de conexiones en comunidades residenciales
  - Red de calles suburbanas, tamaños de bloque grande, numerosas entradas y salidas de rampas y pasos subterráneos de autopistas
  - Sirve a menos minoridades, poblaciones de bajos ingresos y dependientes de transporte público
  - Ha demostrado menos compatibilidad de TOC y FLM
- Washington
  - Las estaciones están planificadas en áreas con una red de calles conectadas, lo que facilita el caminar, andar en bicicleta y viajar en transporte público
  - Sirve a comunidades más desfavorecidas económicamente y son consistentes con la Plataforma de Equidad de Metro
  - Demostraron más compatibilidad de TOC y FLM

Alternativa Washington

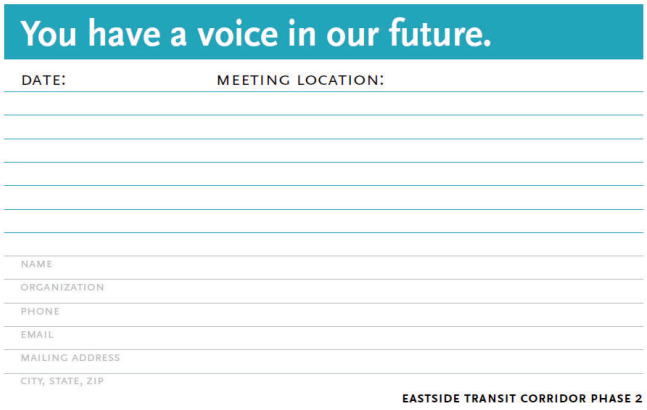
- Alternativa Washington es una opción viable con menos restricciones en contraste con la Alternativa SR 60
- Evita conflictos con el derecho de paso de Caltrans, recursos protegidos por el gobierno federal y servicios públicos principales
- Agencias cooperativas tuvieron menos preocupaciones
- Opciones adecuadas para los sitios de Instalaciones de Almacenimiento y Mantenimiento
- Áreas de las estaciones tienen uso de la tierra existentes que apoyan tránsito o tienen la potencial de esfuerzos de planificación futuros

Metro

Autorización Ambiental de CEQA Solamente

- Optimizar el análisis ambiental y avanzar en los esfuerzos de aceleración
- Financiado principalmente por las Medidas M y R y otras fuentes estatales y locales
- Puede reiniciar el análisis NEPA si es necesario

Próximos pasos



- Recomendar la Alternativa Washington para la financiación del Ciclo 1
- Continuar trabajando para resolver los desafíos de movilidad a lo largo del corredor de SR 60 y dentro del Valle de San Gabriel
- Identificar soluciones a corto y largo plazo antes del segundo ciclo de la Medida M
- Preparar un estudio de viabilidad para evaluar las opciones para mejorar la movilidad dentro y alrededor de SR 60

Metro

Preguntas y respuestas

- Someter sus preguntas usando la **tarjeta de preguntas**
- Las preguntas **no serán** respondidas si no se somete una tarjeta de preguntas
- Las preguntas pueden ser parafraseadas o omitidas si ya han sido respondidas
- Los participantes pueden presentar varias tarjetas de preguntas, según sea necesario
- Estamos aquí para escuchar todas las preguntas durante los 30 minutos de sesión de Preguntas Y Respuestas y después de la presentación (uno a uno)
- Por favor, sea respetuoso con todos los oradores y participantes de la reunión

Metro Systemwide Factsheets

metro.net/railmodes

Next stop: more rail.

RAIL TRANSIT MODES

Fact Sheet

Metro®

A train isn't just a train – there are many types.

Metro continues to expand its rail network with new projects being planned or under construction. Part of this planning involves evaluating different types of rail that each have different features and operating characteristics. The types of rail are referred to as "modes" of transit.

Overview of Rail Transit Modes

During the planning and environmental evaluation process for a new rail line, many factors will be considered to determine the mode.

Some of these factors include cost, available funding, carrying capacity, speed, travel demand, urban fit, if the project being studied is an extension of an existing line, or availability of a rail maintenance and storage facility. Information below is based on current performance of modes currently operating and will be updated as performance improves and new modes become available. *Please see our other fact sheets for more information on environmental evaluation, and other topics.*

Modes of Transit Currently Operating in LA County

Light Rail

Metro currently operates light rail transit on the Blue, Green, Gold and Expo Lines. There are currently five rail maintenance and storage facilities to serve these lines. Two projects under construction, Crenshaw/LAX and Regional Connector, will add to this network. Metro is also building the new Southwest Rail Maintenance yard to serve the Crenshaw/LAX Line and support expanded Green Line service.

Characteristics of light rail include:

> Powered by overhead catenary wires
> Typical station spacing: one mile
> Operates above, below or at street level
> Passenger capacity: 135/car
> At peak times, Metro trains:
  • Can be up to three cars long
  • Carry up to 405 passengers/train
  • Operate every five to six minutes
> Top speed 55-65 mph
> Average speed 24-35 mph

Light Rail – Metro Gold Line

Heavy Rail

Metro currently operates heavy rail transit on the Red and Purple Lines. A nine-mile extension of the Purple Line is currently under construction. A rail maintenance and storage facility currently serves these lines. It will be expanded to support the Purple Line Extension.

Characteristics of heavy rail include:

> Powered by third rail
> Typical station spacing: one to two miles
> Only operates above or below ground
> Passenger capacity: 135/car
> At peak times, Metro trains:
  • Can be up to six cars long
  • Carry up to 810 passengers/train
  • Operate every five minutes
> Top speed 70 mph
> Average speed 32 mph

Heavy Rail – Metro Red Line

Commuter (or Passenger) Rail

Metrolink operates commuter rail connecting from Los Angeles Union Station to the San Fernando Valley, North County, San Gabriel Valley, Southeast LA County and adjacent Ventura, Orange, San Bernardino and Riverside Counties. Amtrak operates intercity passenger rail service across the United States. In Southern California, their Pacific Surfliner connects between San Luis Obispo and San Diego, with many stations shared with Metrolink.

Characteristics of commuter rail include:

> Locomotive-powered
> Typical station spacing: five miles
> Generally operates at ground level
> May share track with freight rail
> May operate above or below ground at selected crossings and via tunnels through mountains
> Fares based on distance traveled
> Specifically scheduled timetables, which can include:
  • At peak times, 15- to 30-minute frequencies
  • Less frequent service outside of peak times
> Metrolink:
  • Passenger seating capacity: 140/car
  • Can be up to four to six cars long
  • Top speed 79 mph
  • Average speed 36 mph
> Amtrak Pacific Surfliner:
  • Passenger seating capacity: 70/car
  • Can be up to six cars long
  • Top speed 79 mph
  • Average speed 43 mph
> On-board amenities can include:
  • Restrooms
  • Water fountains
  • Tables for eating, reading or getting work completed
  • Power outlets for electronic devices
  • Storage space for luggage, bicycles and belongings
  • Wi-fi and café car (Amtrak only)

Commuter Rail – Metrolink

Other Modes Operating Elsewhere

High Speed Rail

(there are two types of high speed rail train systems)

Conventional-wheeled:

> Powered by electric, electric-fuel or fueled systems
> Track is built or specially upgraded for high-speed travel
> Typical station spacing: varies but tends to connect city centers along the route
> Can operate above, below or at street level in its own dedicated right-of-way
> Can be up to 12 cars long; average is seven to nine cars long
> Passenger seating capacity: varies; 65-75/car
> Specifically scheduled timetables
> Top speed 350 mph; average speed 150-200 mph
> Selected examples currently in operation: Asia, Europe

MagLev:

> Powered by magnetic levitation, vehicles travel along a guideway provided with magnets to control in-flight stability, and create propulsion and lift, eliminating mechanical constraints of dry friction
> Track is built specifically for MagLev
> Typical station spacing: varies but tends to connect city centers along the route
> Can operate above or below ground
> Passenger seating capacity: 65-70/car
> Specifically scheduled timetables
> Top speed 375 mph; average speed varies
> Selected examples currently in operation: Japan

For more information about Rail Transit Modes, visit *metro.net/railmodes*.

Other Modes Operating Elsewhere (continued)

Monorail

> Powered by third rail or wires
> Typically elevated
> Typical station spacing: one-half mile to one mile
> Passenger capacity: about 60 passengers/car
> Trains up to six cars long
> Top speed 40-50 mph
> Average speed 18-30 mph
> Selected examples currently in operation: Disneyland, Las Vegas, Air Train JFK, Seattle, Detroit People Mover, Japan, Germany

Trams/Streetcars/Trolley

(terms are used interchangeably)

> Powered by overhead catenary wires
> Generally run at street level with other vehicle traffic but can operate in dedicated guideways
> Passenger capacity: varies
> Average speed 32 mph
> Typical station spacing: every quarter-mile
> Selected examples currently in operation: San Francisco; Portland (OR); Dallas; Washington, D.C.

Personal Rapid Transit (RPT)

> Powered by electricity
> Stations: typically close together but located on side track to allow other cars to pass
> Depending on size, cars/pods carry one to 20 people
> Typically operates in smaller, closed systems
> Selected examples currently in operation: Morgantown (WV), Masdar City (United Arab Emirates), Suncheon (South Korea)

metro.net/railmodes

Próxima parada: más trenes.

TIPOS DE TRANSPORTE FERROVIARIO

Hoja informativa

Metro®

Un tren no es sólo un tren, hay muchos tipos.

Metro continúa expandiendo su red ferroviaria con nuevos proyectos que están en la fase de planificación o construcción. Parte de esta planificación incluye la evaluación de tipos diferentes de trenes que tienen características diferentes de operación y funcionamiento. Los tipos de trenes se conocen como "modos" de transporte.

Descripción general de los modos de transporte ferroviario

Durante el proceso de planificación y evaluación ambiental de una nueva línea ferroviaria, se toman en cuenta muchos factores para determinar el modo.

Algunos de los factores que se toman en cuenta incluyen el costo, el financiamiento disponible, la capacidad de pasajeros, la velocidad, la demanda de viaje, el ambiente urbano, si el proyecto que se estudia es una extensión de una línea existente, o la disponibilidad de una instalación de mantenimiento y almacenamiento ferroviario. La siguiente información se basa en el rendimiento actual de los medios que están en funcionamiento, y se actualizará a medida que el rendimiento mejore y haya nuevos medios disponibles. *Consulte nuestras otras hojas informativas para obtener más información sobre la evaluación ambiental y otros temas.*

Modos de transporte actualmente en funcionamiento en el Condado de Los Angeles

Tren ligero

Actualmente, Metro opera un servicio ferroviario de tren ligero en Metro Blue, Green, Gold y Expo. Actualmente hay cinco instalaciones de mantenimiento y almacenamiento ferroviario para servir estas líneas. Dos proyectos en construcción, Crenshaw/LAX y el Regional Connector, se agregarán a esta red. Metro también está construyendo la nueva instalación de mantenimiento ferroviario del suroeste para servir a la línea Crenshaw/LAX y brindar apoyo al servicio ampliado de Metro Green Line.

Las características de los trenes ligeros incluyen:

> Funcionan con cables catenarios aéreos
> Espaciado típico entre estaciones: una milla
> Opera por encima, por debajo o al nivel de la calle
> Capacidad de pasajeros: 135/pasajeros por vagón
> Durante las horas pico, los trenes de Metro:
  - Puede tener hasta tres vagones de longitud
  - Pueden tener una capacidad de hasta 405 pasajeros en todo el tren
  - Operan cada cinco a seis minutos
> Velocidad máxima de 55 a 65 mph
> Velocidad promedio de 24 a 35 mph

Tren subterráneo

Actualmente, Metro opera un servicio ferroviario subterráneo en Metro Purple y Red Lines. Una extensión de nueve millas de Metro Purple Line se encuentra actualmente en construcción. Una instalación de mantenimiento y almacenamiento ferroviario brinda servicio a estas líneas actualmente. La instalación se ampliará para brindar servicio a la Extensión de Metro Purple Line.

Las características del tren subterráneo incluyen:

> Funciona con un tercer riel
> Espaciado típico entre estaciones: una a dos millas
> Sólo opera por encima o por debajo de la superficie
> Capacidad de pasajeros: 135/pasajeros por vagón
> Durante las horas pico, los trenes de Metro:
  - Puede tener hasta seis vagones de longitud
  - Pueden tener una capacidad de hasta 810 pasajeros en todo el tren
  - Operan cada cinco minutos
> Velocidad máxima de 70 mph
> Velocidad promedio de 32 mph

Tren ligero – Metro Gold Line

Tren subterráneo – Metro Red Line

Tren suburbano

Metrolink opera un servicio de tren suburbano que conecta a Union Station en Los Angeles con el Valle de San Fernando, el Norte del Condado de Los Angeles, el Valle de San Gabriel, el Sureste del Condado de Los Angeles y los condados adyacentes de Ventura, Orange, San Bernardino y Riverside. Amtrak opera un servicio ferroviario de pasajeros interurbano en todos los Estados Unidos. En el sur de California, el Pacific Surfliner conecta San Luis Obispo y San Diego con muchas estaciones compartidas con Metrolink.

Las características de los trenes suburbanos incluyen:

> Funciona con una locomotora
> Espaciado típico entre estaciones: cinco millas
> Generalmente opera al nivel de la superficie
> Pueden compartir las vías con los trenes de carga
> Pueden operar por encima o por debajo de la superficie en cruces selectos y por túneles a través de montañas
> Las tarifas se basan en la distancia recorrida
> Horarios específicamente programados, que pueden incluir:
  • Frecuencias de entre 15 a 30 minutos durante las horas pico
  • Servicio menos frecuente durante las horas no pico
> Metrolink:
  • Capacidad de asientos de pasajeros: 140/vagón
  • Puede tener de cuatro a seis vagones de longitud
  • Velocidad máxima de 79 mph
  • Velocidad promedio de 36 mph
> Amtrak Pacific Surfliner:
  • Capacidad de asientos de pasajeros: 70/vagón
  • Puede tener hasta seis vagones de longitud
  • Velocidad máxima de 79 mph
  • Velocidad promedio de 43 mph
> Los servicios a bordo pueden incluir:
  • Baños
  • Fuentes de agua
  • Mesas para comer, leer o trabajar
  • Enchufes para dispositivos eléctricos
  • Espacio de almacenamiento para equipaje, bicicletas y pertenencias
  • Wi-fi y vagón con cafetería (sólo Amtrak)

Tren suburbano – Metrolink

Otros tipos de trenes que operan en otros lugares

Tren de alta velocidad

(hay dos tipos de sistemas ferroviarios de alta velocidad)

Ruedas convencionales:

> Funcionan con sistemas eléctricos o de combustible
> La vía es especialmente construida o actualizada para viajar a alta velocidad
> Espaciado típico entre estaciones: varía, pero tiende a conectar los centros de las ciudades a lo largo de la ruta
> Puede operar por encima, por debajo o al nivel de la calle en su propio derecho de vía exclusivo
> Puede tener hasta 12 vagones de longitud; la longitud promedio es de siete a nueve vagones.
> Capacidad de asientos de pasajeros: varía; 67-75 pasajeros/vagón
> Horarios específicamente programados
> Velocidad máxima de 350 mph; velocidad promedio de 150-200 mph
> Ejemplos seleccionados actualmente en operación: Asía, Europa

MagLev:

> Con tecnología de levitación magnética, los vehículos viajan por una vía con imanes para controlar la estabilidad y crear propulsión y elevación, eliminando las limitaciones mecánicas de la fricción seca
> La vía es construida específicamente para el MagLev
> Espaciado típico entre estaciones: varía, pero tiende a conectar los centros de las ciudades a lo largo de la ruta
> Puede operar por encima o por debajo de la superficie
> Capacidad de asientos de pasajeros: 65-70/pasajeros por vagón
> Horarios específicamente programados
> Velocidad máxima de 375 mph; la velocidad promedio varía
> Ejemplos seleccionados actualmente en operación: Japón

Para obtener más información acerca de los modos de transporte ferroviario, visite *metro.net/railmodes.*

Otros tipos de trenes que operan en otros lugares (continuación)

Monorriel

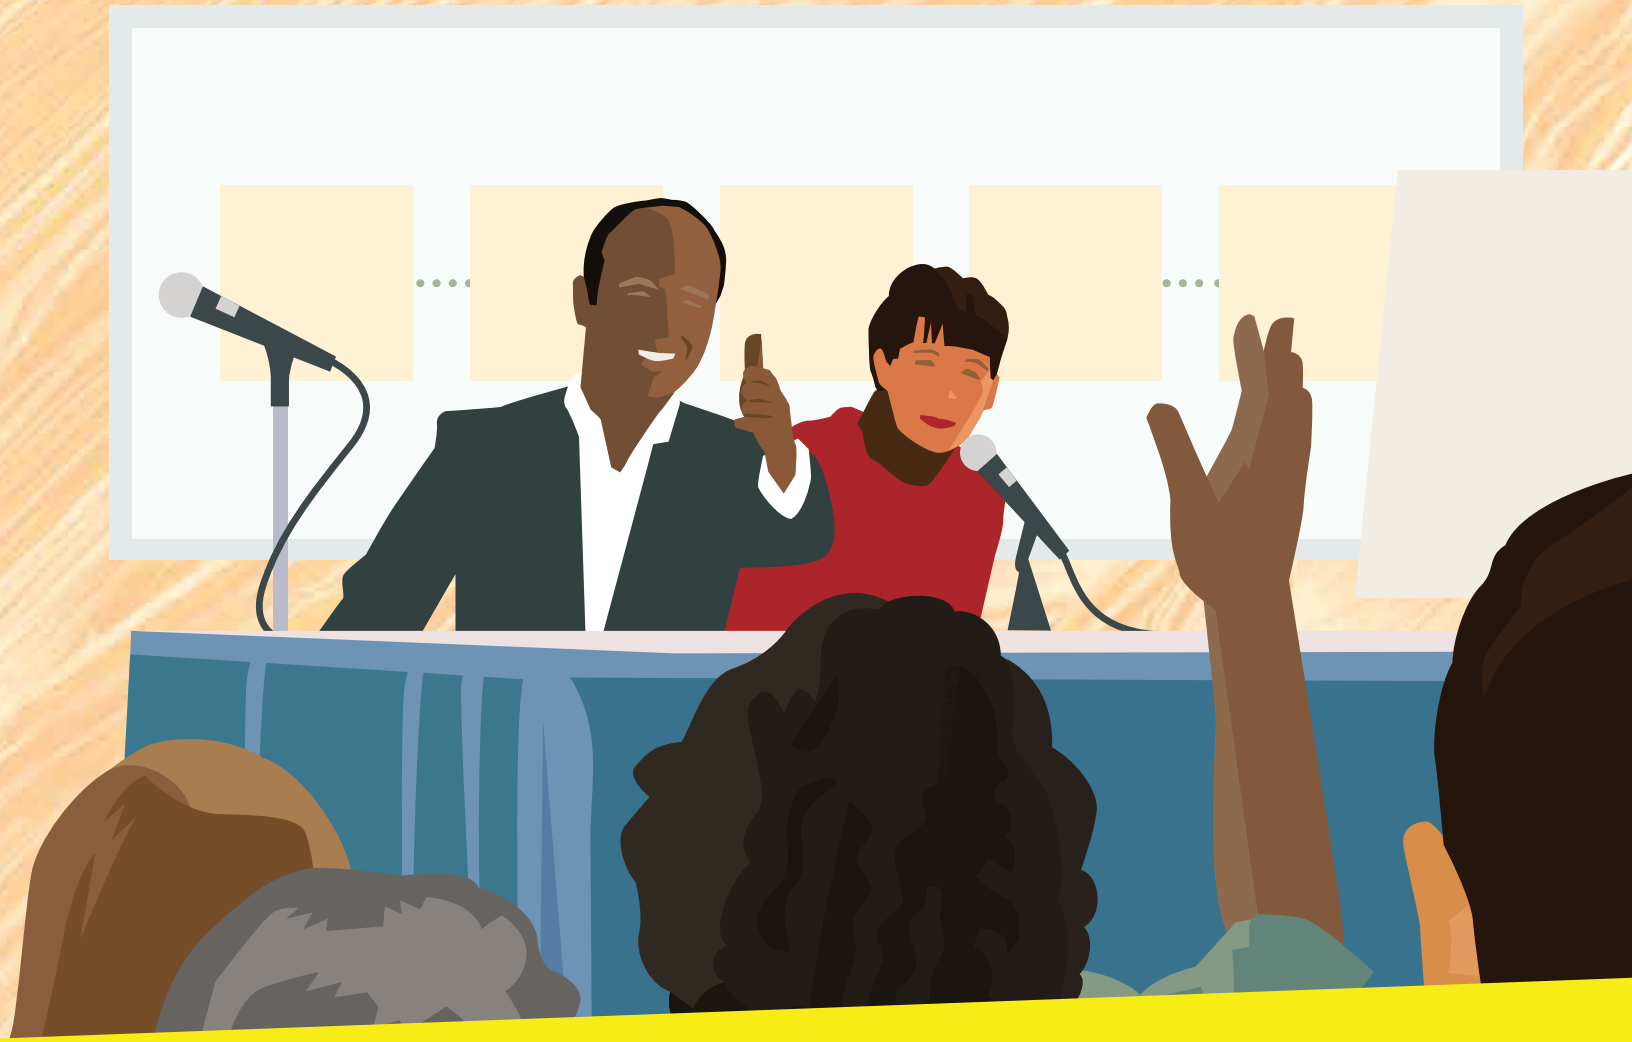
> Funciona con un tercer riel o cables
> Típicamente elevado
> Espaciado típico entre estaciones: media milla a una milla
> Capacidad de pasajeros: alrededor de 60 pasajeros/vagón
> Los trenes pueden tener hasta seis vagones de longitud
> Velocidad máxima de 40-50 mph
> Velocidad promedio de 18-30 mph
> Ejemplos seleccionados actualmente en operación: Disneyland, Las Vegas, Air Train JFK, Seattle, Detroit People Mover, Japón, Alemania

Tranvías/Trolebús

(los términos se usan indistintamente)

> Funcionan con cables catenarios aéreos
> Generalmente operan al nivel de la calle con el tráfico vehicular, pero pueden operar en vías exclusivas
> Capacidad de pasajeros: varía
> Velocidad promedio de 32 mph
> Espaciado típico entre estaciones: cada cuarto de milla
> Ejemplos seleccionados actualmente en operación: San Francisco, Portland (WA), Dallas, Washington, D.C.

Tránsito Rápido Personal (PRT)



> Funciona con electricidad
> Estaciones: generalmente muy cercanas, pero ubicadas en un carril lateral para permitir que otros vehículos pasen
> Dependiendo del tamaño, los coches/cápsulas pueden transportar de una a 20 personas
> Generalmente opera en sistemas cerrados y pequeños
> Ejemplos seleccionados actualmente en operación: Morgantown (WV), Masdar (Emiratos Árabes Unidos), Suncheón (Corea del Sur)

metro.net/enviroreview

Next stop: planning projects together.

ENVIRONMENTAL REVIEW
Fact Sheet

Metro

From Concept to Reality: How a Transportation Project is Planned Before It's Built

Planning and building new transportation projects is complex. The time involved may seem long and frustrating – but the process is important. This fact sheet will provide an overview of the planning process and how the public can help shape the project at each step of the way.

Overview of Key Milestones in the Process

STEP 1:
SCOPING

Developing an EIR/EIS always begins by issuing a Notice of Preparation (for CEQA) and Notice of Intent (for NEPA) that officially kicks off a minimum 30-day "scoping period," during which project planners identify existing issues a new project will address and alternatives that will be considered. These alternatives include the possibility of not building the project at all (No Build), completing low-cost and less intensive improvements that do not build the proposed project, as well as constructing a new project and evaluating other project variables, such as different routes, technologies and/or how the project might operate (e.g. sharing the road with other cars, on a dedicated lane that could be elevated, in a subway/tunnel, etc.). **At this early step, criteria are identified that will be used to evaluate the project alternatives.**

Metro will host one or more "scoping meetings" where the public will have an opportunity to help shape the project. Metro will also provide other ways for the public to share comments, ask questions and get information, such as via email, online tools and social media.

The public has the broadest impact during this step in the environmental review process. During scoping, Metro will seek feedback from the public about:

> What it thinks of the alternatives being considered

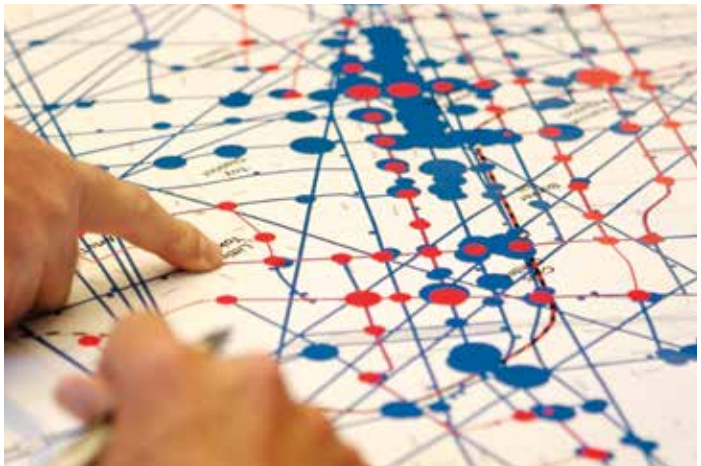
> How the alternatives might be enhanced or modified

> Other alternatives that should be evaluated

> Issues and concerns with the project plans

> Questions that should be answered as part of the study

At the conclusion of the scoping period, planners will produce a report detailing the comments received and the issues raised during this step in the process. This report shapes the environmental analysis and outlines the various studies to be completed, as well as next steps in the process.



STEP 2:
PREPARING THE VARIOUS STUDIES

While the various studies that are part of the environmental process are being completed, Metro planners will not work alone. **Planners will collaborate with cities where the project is located and other public agencies to get data and input to fully study each project alternative.** These agencies could include the County of Los Angeles, Caltrans, Southern California Association of Governments, Air Quality Management District, public utility companies (including gas, water, sewer, electric and communications), Water Quality Control Board, federal agencies, school districts, etc. Planners will also consult with other key stakeholders relevant to the project, such as major institutions, businesses or business associations, or residents near the project.

Metro will keep the public informed as the environmental document is drafted. Planners will provide updates about study developments at key study milestones or when there is new information to share. Information could include comparing the performance of the alternatives being studied, such as ridership, cost, travel time, construction methods being explored, etc.

Information may be shared in a variety of ways, including meetings, emails, newsletters, presentations to city councils and community groups, etc. During this information sharing, the public is always encouraged to ask questions and provide comments about the information presented.

STEP 3:
DRAFT ENVIRONMENTAL DOCUMENT REVIEW AND PUBLIC HEARINGS

When all needed studies are completed and a draft environmental document is ready for public review, Metro will issue a Notice of Availability (for CEQA) and Notice of Completion (for NEPA) that officially kicks off a minimum 45-day public review period. The Draft EIR (EIS) fully describes the project and summarizes the findings of all environmental impacts/benefits and other technical studies, including:

> Results of the analysis for the project alternatives

> How each alternative performs against the criteria identified during scoping

> How well each alternative responds to the purpose and need of the project

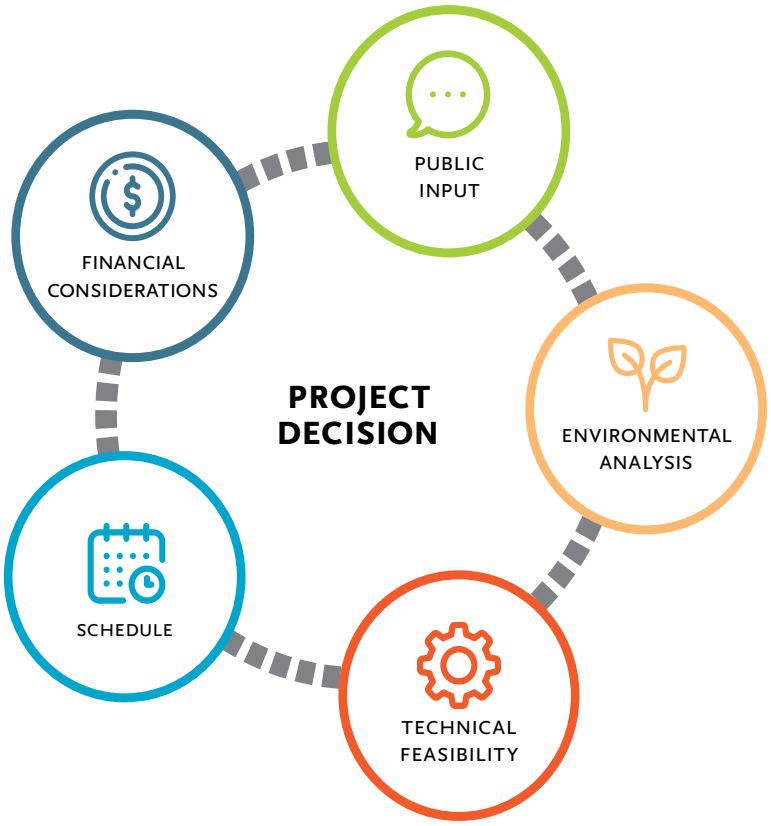
> Analysis of costs and benefits of all project alternatives

> Financial feasibility of each alternative

> Impacts of each alternative and, if needed, strategies to avoid or mitigate the impacts

As with scoping, this step in the process allows another formal "review period" where the public is invited to comment on the draft environmental document. During this step, Metro will host one or more public hearings where the public will be able to provide comments and ask clarification questions regarding the content of the findings and overall project plans.

The environmental document can be large, highly technical and typically contains many appendices. However, an Executive Summary is always prepared that highlights the key findings of the studies.



Metro planners will also provide an overview of the document at the public hearing(s) and through other project information channels, such as a project website, printed materials and social media.

Public feedback is encouraged during the review period verbally at the public hearing(s) or in writing. Information about where to send comments is provided when the document is released for public review. It is important to note that responses to comments and questions received during this formal review period will not be provided during this step in the process. Comments and questions will be responded to at a later step in the process (*see Step 5*).

STEP 4:
SELECTING THE PROJECT ALTERNATIVE

Metro planners will identify the project to be recommended for final environmental review. This recommendation is based on a number of factors, including the project's purpose and need, the criteria established during scoping, the analyses and comments received. If Metro is the lead agency, the recommendation is presented to the Metro Board of Directors at a public meeting where the public is welcome to attend and to share views and comments about the project. **Once the project is selected, either by Metro or the final decision-making agency, for further review, it is known as the Locally Preferred Alternative (LPA).**

Factors Driving Project Recommendations

STEP 5:
FINAL ENVIRONMENTAL DOCUMENT REVIEW

Once the LPA has been identified, the EIR/EIS is further refined with studies focused on addressing outstanding issues with the selected alternative. This is also when written responses are developed to comments received during the Draft EIR/EIS public review period. **When these studies and responses are completed, they will be incorporated into a Final EIR/EIS issued for one final 30-day public review.** This document will include a **"Mitigation Monitoring and Reporting Plan" (MMRP)**. The MMRP documents measures the lead agency is committed to implement to address project impacts identified in the environmental document.

The Metro Board of Directors will be asked to certify the Final EIR, at which point a Notice of Completion will be issued to inform the public that the EIR has been completed and certified. For projects that are also seeking federal funds through a completed Final EIS, the designated federal agency will sign the document and issue a **Record of Decision (ROD)** signifying the successful completion of the federal environmental review process.

Now that the project is approved – what's next?

Even after extensive and detailed studies, many items still need to be finalized before construction can begin on a planned project, including:

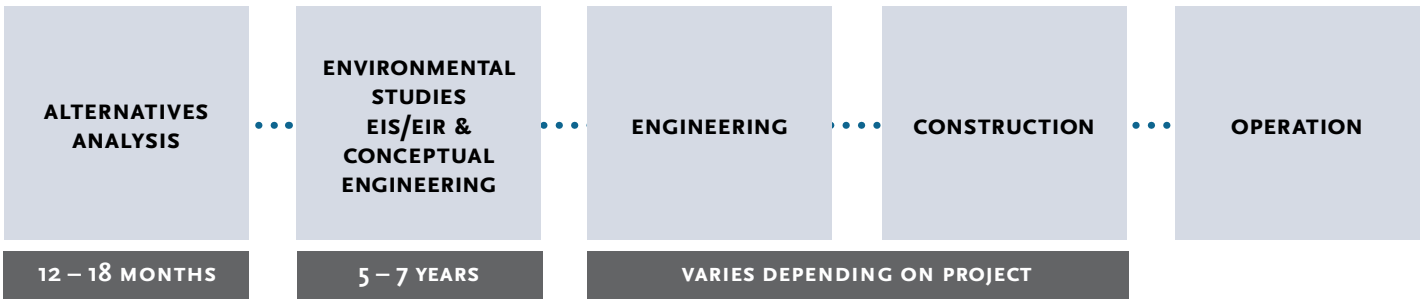
> Securing state and/or federal funds for the project, if needed

> Completing final design for the project

> Reviewing bids and selecting the contractor to build the project

> Acquiring needed private property and easements that can either be permanent or temporary

> Relocating utilities (water, power, sewer, communications, etc.) so that services will not be interrupted for customers during construction and operation of the project



> Developing agreements for how construction will proceed with the cities involved

> Securing permits from other regulatory agencies, including from the California Public Utilities Commission (CPUC), if the project includes grade crossings

> Educating the public about next steps and how to be safe during construction and operation of the project

Taking cues from the best, most innovative agencies around the world, Metro is looking for new ways to deliver projects better, faster and more affordably. Public-Private Partnerships (P3) are a possible strategy for some projects. P3s are collaborations between a public agency and a private partner to deliver a public service, project or facility that can maximize performance, minimize cost, mitigate risks and speed timelines. The public and the private partner each play a critical role where the skills and assets of each sector are optimized, and potential pitfalls and rewards are shared. In some cases, a P3 partner could be included during the environmental review for the project.

Project Development Process

What We Have to Do Before a Project is Built

Before a new transportation project is built, policy makers, civic leaders and/or the media often discuss what it could be. However, before a project moves forward, certain studies need to be completed.

These studies are intended to meet state and federal requirements, as well as ensure all relevant issues are explored in shaping the project and allow community members to provide input.

For local and state funded projects, the planning process is governed by the **California Environmental Quality Act (CEQA)**. Projects that seek federal funds also need to comply with the **National Environmental Policy Act (NEPA)**. Both laws (CEQA and NEPA) determine the type and scope of study that is required, including the public participation, to help shape the proposed project.

Smaller projects, such as a modification to an existing highway or rail line, may need only one study. Other projects, such as a new highway or rail line, will require a series of studies that are compiled in what is called an "environmental document." Studies for these more complex projects analyze various options, or "alternatives," for the projects, as well as the potential benefits and impacts.

Issues to be analyzed include how the project might affect traffic, air and water quality, noise, vibration, historical structures, adjacent properties, or other items related to the natural and built environment. Other analyses may evaluate engineering issues, capital and operating costs, station design, etc.

For projects following CEQA guidelines, Metro will usually serve as the "lead agency" and conduct the environmental analysis for bus and rail projects that the agency will own and operate. In some cases, Metro will also conduct the environmental analysis for projects where other agencies are the owner/operator. This could happen for highway projects where the California Department of Transportation (Caltrans) is the owner operator, or for railroad projects on behalf of Amtrak, Metrolink and the freight railroads.

When Metro is leading the effort and a full environmental document is needed, Metro is tasked to complete an Environmental Impact Report (EIR) in accordance with CEQA. If the project seeks federal funding, an Environmental Impact Statement (EIS) is completed by the appropriate federal agency, in accordance with NEPA.

The federal agency is determined by the scope of the proposed project:

> Federal Transit Administration (FTA) for bus and rail projects

> Federal Highway Administration (FHWA) for highway projects

> Federal Railroad Administration (FRA) for railroad projects (Amtrak, Metrolink, freight trains)

There are many steps required with a full environmental review process. During the initial stages, many options, known as "project alternatives," are presented for public review and feedback. At each subsequent step in the process, the range of alternatives is narrowed based on technical analysis and public feedback. As the evaluation progresses, more detailed studies are completed for the remaining alternatives. The public has opportunities to provide input throughout the effort.

For more information about Environmental Review, visit *metro.net/enviroreview*.

Stay Informed and Involved

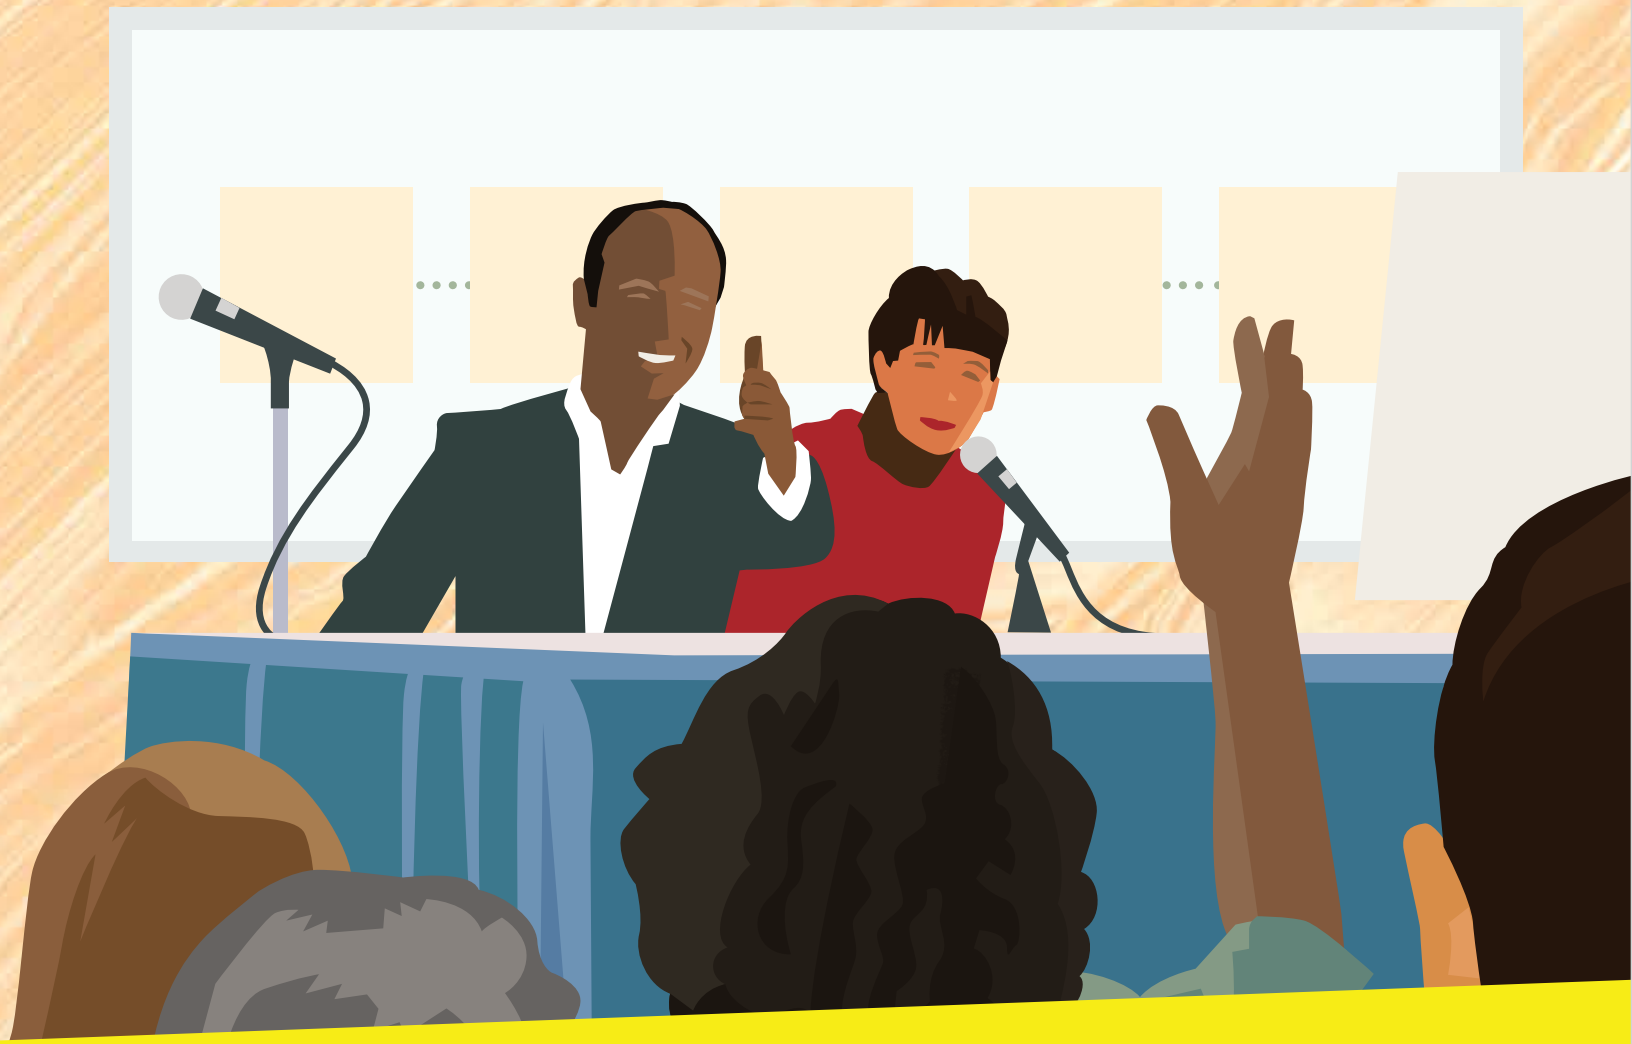
Throughout the entire project development process and during construction, there will be many ways to learn the latest, get involved and provide feedback. These include:

> Getting on the project mailing list to receive updates and news

> Monitoring information on the project website

> Following the project's social media (Facebook, Twitter, Instagram, etc.)

> Attending project-related meetings



> Contacting Metro staff working on the project via phone, mail and/or email

19-3027PS ©2019 LACMTA

Próxima parada: juntos planeando proyectos.

REVISIÓN AMBIENTAL
Hoja Informativa

Metro®

De concepto a realidad: como se planifica un proyecto de transporte antes de su construcción.

Planear y desarrollar nuevos proyectos de transporte es un proceso complejo. El tiempo que tarda puede ser demasiado largo y frustrante, pero el proceso es importante. Esta hoja informativa ofrece un resumen general del proceso e informa como el público puede moldear el proyecto en cada uno de los pasos de su planificación.

Descripción de los pasos claves del proceso de planificación

PASO 1:
EXAMINACIÓN

La realización de un EIR o EIS siempre comienza por publicar un Aviso de Preparación (para la CEQA) y un Aviso de Intención (para la NEPA), los cuales inician oficialmente un "periodo de examinación", de al menos 30 días, en el que los planificadores del proyecto identifican las dificultades existentes que el nuevo proyecto enfrentará y las alternativas que se considerarán. Estas alternativas incluyen la posibilidad de simplemente no desarrollar el proyecto (No desarrollar); realizar mejoras de menor costo y menos intensivas en lugar de construir el proyecto propuesto; o construir un nuevo proyecto y evaluar otras variables del proyecto, como diferentes rutas, tecnologías o la forma en que el proyecto operaría (por ejemplo, compartir la vía con otros vehículos, en un carril particular que podría ser elevado, en un túnel o vías subterránea, etc.). **En este primer paso, se definen los criterios que se utilizarán para evaluar las alternativas del proyecto.**

Metro organizará una o más "reuniones de examinación" en las que tendrá la oportunidad de participar en la definición del proyecto. Además, Metro implementará otros mecanismos, como el correo electrónico, herramientas en línea y redes sociales, para que la comunidad comparta sus comentarios, haga preguntas y obtenga información.

En este paso, el público tiene el mayor impacto en el proceso de revisión ambiental. En la etapa de examinación, Metro pedirá al público comentarios sobre:

> Qué opina de las alternativas consideradas

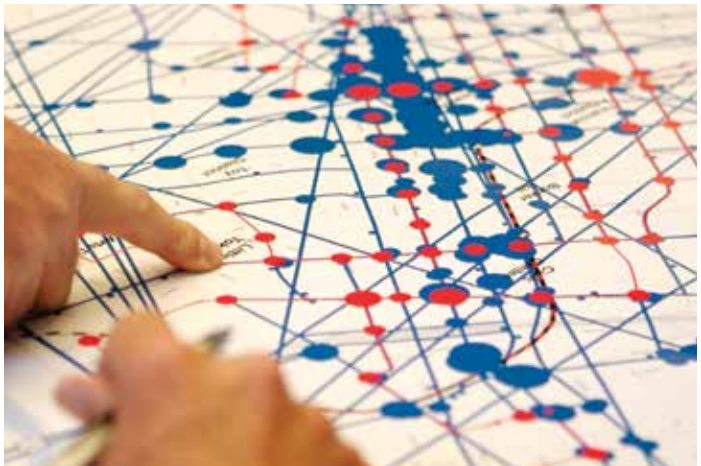
> Cómo se pueden mejorar o modificar las alternativas

> Otras alternativas que deberían evaluarse

> Problemas e inquietudes con los planes del proyecto

> Asuntos que el estudio debería responder

Al final del periodo de examinación, los planificadores realizarán un informe en el que especifiquen los comentarios que recibieron y las inquietudes que surgieron en esta etapa del proceso. Este informe moldea el análisis ambiental y ayuda a definir los diversos estudios que se realizarán y define los siguientes pasos del proyecto.



PASO 2:
PREPARACIÓN DE LOS VARIOS ESTUDIOS

Los planificadores de Metro no trabajarán de manera aislada para llevar a cabo los diversos estudios que son parte del proceso ambiental. **Los planificadores colaborarán con las ciudades donde se ubica el proyecto y con otros organismos públicos para obtener datos e información para poder analizar a profundidad cada alternativa del proyecto.** Entre estos organismos pueden estar el Condado de Los Angeles, Caltrans, la Asociación de Gobiernos del Sur de California, el Distrito para el Control de la Calidad del Aire, compañías de servicios públicos (incluidos gas, agua, drenaje, electricidad y comunicaciones), la Junta de Control de la Calidad del Agua, organismos federales, distritos escolares, etc. Los planificadores también estarán en comunicación con otras partes interesadas claves para el proyecto, como grandes instituciones, negocios, asociaciones de negocios o residentes cercanos al proyecto.

Metro mantendrá informada a la comunidad conforme se vaya elaborando el documento ambiental. Los planificadores publicarán actualizaciones sobre el desarrollo de los estudios cuando haya nueva información que compartir o cuando se logren hitos claves. La información podrá incluir comparaciones del desempeño de las alternativas que se estudian, como el número de pasajeros, costos, tiempo de traslado, los métodos de construcción analizados, etc.

La información podrá compartirse de múltiples formas, entre ellas reuniones, correos electrónicos, boletines, presentaciones a concilios municipales o grupos comunitarios, etc. En esta etapa del proceso, se promueve que la comunidad realice preguntas y ofrezca comentarios sobre la información que se recibió.

PASO 3:
REVISIÓN DE LA PROPUESTA DEL DOCUMENTO AMBIENTAL Y AUDIENCIAS PÚBLICAS

Cuando todos los estudios hayan sido completados y un documento ambiental haya sido preparado para la revisión pública, Metro emitirá un Aviso de Disponibilidad (para la CEQA) y un Aviso de Terminación (para la NEPA) que dan inicio oficialmente al periodo de revisión pública que dura un mínimo de 45 días. La propuesta de EIR (EIS) describe el proyecto a fondo y resume los hallazgos de todos los estudios de impactos y beneficios ambientales y de otros estudios técnicos. Esto incluye:

> Resultados del análisis de las alternativas del proyecto

> Cuál es el desempeño de cada alternativa en función de los criterios definidos en la etapa de examinación

> Cómo funciona cada alternativa ante el propósito y la necesidad del proyecto

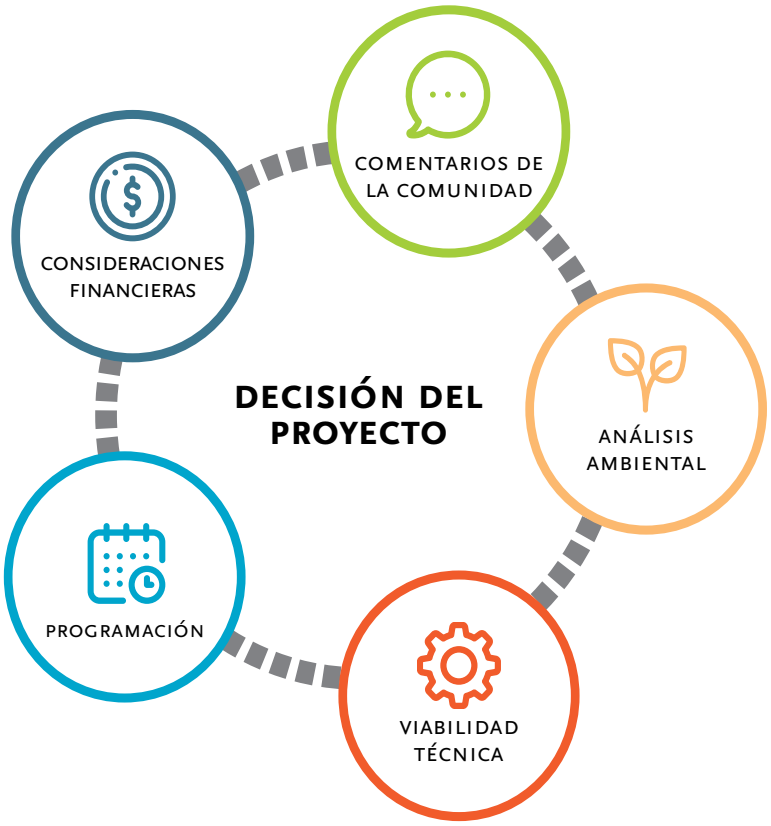
> Análisis de costos y beneficios de todas las alternativas del proyecto

> Viabilidad financiera de cada alternativa

> Impacto de cada alternativa y, de ser necesario, estrategias para evitar o mitigar los impactos

Al igual que en el paso de examinación, este paso facilita otro "periodo de revisión" formal en el que se invita a la comunidad a hacer comentarios sobre la propuesta del documento ambiental. En esta etapa, Metro organizará una o más audiencias públicas en las que la comunidad podrá hacer comentarios y preguntas que aclaren los hallazgos y los planes del proyecto en general.

Es posible que el documento ambiental sea largo, altamente técnico y, por lo general, incluya varios apéndices. Sin embargo, siempre se prepara un resumen ejecutivo que resalta los hallazgos principales de los estudios.



Igualmente, los planificadores de Metro ofrecerán un resumen general del documento en las audiencias públicas y a través de otras vías de comunicación del proyecto, como el sitio web, las redes sociales y los materiales impresos.

Durante el periodo de revisión se anima que la comunidad ofrezca sus observaciones, ya sea por escrito u oralmente en las audiencias públicas. Cuando el documento sea publicado para su revisión, se proporcionará información para saber a dónde enviar comentarios. Es importante aclarar que en este paso del proceso, no se ofrecerán respuestas a las preguntas ni a los comentarios que se reciban. Las preguntas y comentarios se responderán en otro paso posterior del proceso *(veá el paso 5)*.

PASO 4:
CÓMO ELEGIR LA ALTERNATIVA DE PROYECTO

Los planificadores de Metro seleccionarán el proyecto que se va a recomendar para una revisión ambiental final. La recomendación se basa en diversos factores, entre ellos el propósito y la necesidad a la que responde el proyecto, los criterios definidos en la etapa de examinación, y los análisis y comentarios que se recibieron. Si Metro es el organización principal, la recomendación se presenta en una reunión pública a la Junta Directiva de Metro, en la que se invita a la comunidad a asistir y compartir ideas y comentarios sobre el proyecto. **Una vez que Metro, o el organismo que toma la decisión final, selecciona una alternativa para el proyecto para una revisión posterior, se le conoce como la alternativa preferida localmente (Locally Preferred Alternative, LPA).**

Factores que influyen en las recomendaciones del proyecto

PASO 5:
REVISIÓN FINAL DEL DOCUMENTO AMBIENTAL

Una vez que se ha identificado la LPA, se continuará afinando el EIR/EIS mediante estudios enfocados en abordar los temas pendientes de la alternativa elegida. También es en este momento cuando se redactan respuestas escritas a los comentarios que se recibieron en el periodo de revisión pública de la Propuesta del EIR/EIS. **Cuando se concluyen estos estudios y se ofrecen respuestas, se incorporan en una versión final del EIR/EIS que se publicará para una última revisión pública de 30 días.** Este documento incorporará un **Plan de Información y Monitoreo para la Mitigación (Mitigation Monitoring and Reporting Plan, MMRP)**. Los documentos del MMRP determinan que el organismo principal está comprometido a actuar para afrontar el impacto del proyecto identificado en el documento ambiental.

Al final de este paso, se le pidirá a la Junta Directiva de Metro que certifique el EIR final. Posterior a la certificación, se emitirá un Aviso de terminación para informar a la comunidad que el EIR está concluido y certificado. En el caso de los proyectos que buscan financiamiento federal a través de un EIS final concluido, el organismo federal designado firmará el documento y emitirá una **Constancia de Decisión (Record of Decision, ROD)** que expresa que se ha concluido con éxito el proceso de revisión ambiental federal.

Una vez que el proyecto está aprobado, ¿qué sigue?

Incluso después de los exhaustivos y detallados estudios, todavía hay varios asuntos que deberán concluirse antes de comenzar la construcción de un proyecto planeado. Esto incluye:

> Asegurar el financiamiento estatal o federal para el proyecto, en caso de ser necesario

> Concluir el diseño final del proyecto

> Revisar las ofertas y elegir al contratista que desarrollará el proyecto

> Adquirir propiedad privada necesaria y derecho de acceso a propiedad ajena, ya sea permanente o temporal

> Reubicar los servicios públicos (agua, energía, alcantarillado, comunicaciones, etc.) para evitar que los servicios a los consumidores se interrumpan durante la construcción y la operación del proyecto

> Llegar a acuerdos con las ciudades involucradas sobre cómo se va a llevar a cabo la construcción

> Obtener permisos de otros organismos regulatorios, incluida la Comisión de Utilidades Publicas de California (California Public Utilities Commission, CPUC), en caso de que el proyecto involucre cruces a nivel de calle

> Informar a la comunidad sobre los siguientes pasos y sobre normas de seguridad durante la construcción y la operación del proyecto

Al tomar iniciativas de las mejores y más innovadoras agencias de todo el mundo, Metro busca nuevas formas de realizar proyectos de una manera mejor, más rápida y más económica. Las asociaciones público privadas (Public-Private Partnerships, P3) son una estrategia posible para algunos proyectos. Las P3 son colaboraciones entre un organismo público y un socio privado para prestar servicios públicos, llevar a cabo proyectos o construir instalaciones que puedan maximizar el rendimiento, minimizar el costo, disminuir los riesgos y acelerar los plazos. El organismo público y el socio privado desempeñan un papel fundamental donde se optimizan las habilidades y los activos de cada sector, y se comparten los riesgos y las recompensas potenciales. En algunos casos, se podría incluir un socio de la P3 durante la revisión ambiental del proyecto.

Proceso de desarrollo del proyecto

Qué se debe hacer antes de desarrollar un proyecto

Antes de desarrollar un nuevo proyecto de transporte, algunos representantes políticos, líderes cívicos y, en ocasiones, los medios de comunicación analizan las posibilidades. Pero antes de que un proyecto continúe, es necesario realizar ciertos estudios.

El propósito de estos estudios es cumplir con los requisitos federales y estatales, asegurarse de que todos los aspectos relevantes sean cubiertos en el diseño del proyecto y permitir que los miembros de la comunidad aporten sus ideas.

En el caso de los proyectos financiados localmente y por el estado, el proceso de planificación está regido por la **Ley de Calidad Ambiental de California (California Environmental Quality Act, CEQA)**. Por su parte, los proyectos que buscan conseguir fondos federales también requieren atenerse a la **Ley Nacional de Política Ambiental (National Environmental Policy Act, NEPA)**. Con el fin de contribuir en el diseño del proyecto propuesto, ambas leyes (CEQA y NEPA) establecen el tipo y el enfoque del estudio requerido, así como el formato de la participación publica.

Los proyectos más pequeños, como la modificación de una autopista o una línea de tren, pueden requerir solamente un estudio. Otros proyectos, como la construcción de una nueva autopista o línea de tren, requieren una serie de estudios que se recaban en lo que se conoce como un "documento ambiental". En este tipo de proyectos más complejos, los estudios analizan otras opciones o "alternativas" para los proyectos, así como los posibles impactos y beneficios.

Los temas que se analizarán incluyen como el proyecto podría afectar el tráfico, la calidad del aire y del agua, el ruido, la vibración, las estructuras históricas, las propiedades adyacentes, u otros temas relacionados con el entorno natural y las construcciones. Otros análisis podrán evaluar cuestiones de ingeniería, temas de capital y costos operativos, diseño de estaciones, etc.

En los proyectos que siguen las directrices de la CEQA, Metro normalmente funciona como el "organismo principal" que coordina los análisis ambientales de proyectos de autobuses o trenes que él mismo va a operar. En algunos casos, Metro también realizará los estudios ambientales de proyectos que serán propiedad de otros organismos y que ellos mismos operarán. Esto podría pasar en proyectos de autopistas que sean propiedad y sean operados por el California Department of Transportation (Caltrans) o en proyectos ferroviarios propiedad de Amtrak, Metrolink y del servicio de trenes de carga.

Cuando Metro es el coordinador del estudio y un documento ambiental completo es necesario, Metro tiene la obligación de llenar un Informe de Impacto Ambiental (Environmental Impact Report, EIR), de conformidad con la CEQA. Si el proyecto busca financiamiento federal, la agencia federal correspondiente debe hacer una Declaración de Impacto Ambiental (Environmental Impact Statement, EIS), de conformidad con la NEPA.

La agencia federal correspondiente se determina en función del enfoque del proyecto propuesto:

> Administración Federal de Tránsito (Federal Transit Administration, FTA) para proyectos de autobuses y trenes

> Administración Federal de Autopistas (Federal Highway Administration, FHWA) para proyectos de autopistas

> Administración Federal Ferroviaria (Federal Railroad Administration, FRA) para proyectos ferroviarios (Amtrak, Metrolink, trenes de carga)

Hay varios pasos que incluyen un proceso completo de revisión ambiental. En los pasos iniciales se presentan varias opciones conocidas como "alternativas de proyecto", para que el público las revise y comente. En los pasos posteriores del proceso, el número de alternativas se va reduciendo con base en el análisis técnico y la respuesta del público. Tal como se avanza la evaluación se realizan estudios más detallados sobre las alternativas que siguen en pie. El público tiene la posibilidad de aportar sus opiniones durante todo el proceso.

Para obtener más información sobre la revisión ambiental, visite *metro.net/enviroreview*.

Manténgase informado e involucrado

Durante todo el proceso de desarrollo y de construcción del proyecto, habrá muchas formas de enterarse de la últimas noticias, involucrarse y aportar comentarios. Entre ellas están:

> Ser parte de la lista de correos del proyecto para recibir noticias y actualizaciones

> Revisar la información del sitio web del proyecto

> Seguir las redes sociales del proyecto (Facebook, Twitter, Instagram, etc.)

> Asistir a reuniones relacionadas con el proyecto

> Ponerse en contacto con personal de Metro que trabaja en el proyecto vía telefónica, correo postal o electrónico

Next stop: LA, transformed.

PROPERTY ACQUISITION

Fact Sheet

Metro

Who is Metro?

Metro (Los Angeles County Metropolitan Transportation Authority) is the transportation planner, coordinator, designer, builder and regional transit operator for LA County. Metro works in partnership with the County of Los Angeles, local cities, the California Department of Transportation (Caltrans) and others when planning new transportation projects.

What is property acquisition?

New projects need to acquire property for their construction or operations. The property acquisition process is governed by state and federal law, and is basically the same regardless of whether acquisition efforts are led by Metro or another public agency. This fact sheet explains the Metro acquisition process in more detail.

Why do new transportation projects need to acquire real property?

New transportation projects often need to acquire property. This can be for a variety of purposes.

Permanent Property Needs

Highway, rail, bus and other projects often require the acquisition of property to expand capacity and increase service to the public. This could be for new or wider travel lanes, rail or bus right-of-ways, interchanges, ramps, bridges, stations or maintenance yards. The property acquired becomes a permanent part of the project and the region's transportation infrastructure.

Temporary Construction Staging

In order to build a project, property is sometimes necessary for a period of time for construction staging. Staging space includes areas for active construction, equipment and material storage, field offices, parking and other construction-related activities. Staging locations are ideally located off-street and immediately adjacent to where the project is to be constructed.

Below Ground Easements

Some projects need property below ground for tunnels, stations or other facilities. In the majority of these cases, there will be little or no impact to the property on the surface.

How is the need for property acquisition determined?

Whether or not property is needed for a project is determined through the environmental planning process. This occurs in accordance with the California Environmental Quality Act (CEQA) and often results in the preparation of an Environmental Impact Report (EIR). Some projects also need federal review under the National Environmental Policy Act (NEPA), which can result in the preparation of an Environmental Impact Statement (EIS). During this process, various project alternatives are evaluated and property is identified that might possibly be needed for the project. The final list of properties is not determined until the very end of the process when the study being conducted is adopted. Public involvement is always an important part of these studies.

For additional information, please see our Environmental Review fact sheet.

Will Metro buy the property, lease it or something else?

This depends. The most straightforward method is for Metro to purchase a "fee interest" and become the owner of the property. Sometimes, other arrangements are developed, such as leases, right of entries, temporary construction easements or permanent easements.

If the project needs property below ground, Metro will purchase a subsurface easement from the property owner. This is accomplished through a one-time payment and an easement deed is recorded. This is identical to underground easements that a utility or cable company obtains for fiber optic cables, water lines, gas lines, etc.

Staging for the Hollywood/Highland Station during construction of the Metro Red Line.

Hollywood & Vine: Metro Red Line station in Hollywood

How will I know if my property is needed for a project? When will I be contacted?

In some cases, property owners may be notified that their properties are under consideration for a project while the studies are ongoing. However, the exact list of properties is not deemed to be final until the studies are adopted. Once those are done and funding is available to begin construction, property owners will be contacted by a representative of the agency building the project (i.e., Metro, Caltrans, etc.).

How will I be compensated?

Metro is required to provide just compensation to property owners for the purchase or use of their property. The first step in this process is for Metro to obtain an appraisal of the property. The appraisal will consider a variety of factors, including location, size, the highest and best use of the property, and the recent sale of similar properties in the area.

Once the value is established and approved, an offer will be made to the property owner. Time will be allowed for the owner to obtain their own appraisal if desired, and to have a full discussion with Metro regarding their opinion of the value of the property. Metro will seek to reach a negotiated agreement with a property owner whenever possible. If a negotiated agreement cannot be accomplished, Metro may exercise its power of eminent domain to acquire the property. Initiating eminent domain procedures requires specific approval by the Metro Board of Directors.

Disposition of Property after Construction

Following the completion of project construction, Metro will return leased properties to the property owner, who may then develop the property in accordance with local zoning regulations. In cases where Metro has obtained fee title, any portions of the property owned by Metro that are no longer needed for public purposes after construction may be sold or made available for joint development subject to local land use regulations and approval processes. If a joint development project is feasible, Metro will typically issue a Request for Proposals (RFP) seeking development proposals for the particular property.

Atlantic Station: Metro Gold Line station in East LA

For more information, visit *metro.net/pa*.

Will I receive relocation benefits if I am required to move from the property?

If you are an owner-occupant or tenant occupying a property that is acquired for a public project, you may be entitled to relocation benefits. Federal and state regulations provide for payments to assist in the relocation of your business or residence. Your relocation benefits will be explained in detail by Metro staff or a consultant hired by Metro. No one will be required to relocate from their property until they have been given at least a 90-day written notice to move.

How to Stay Involved and Give Input

Metro invites you to stay involved during the planning and construction of projects. You can keep up with developments on *metro.net*, where you can find information about ongoing studies, projects under construction, leave comments and provide your contact information so we can keep you informed of upcoming meetings and other milestones.

Próxima parada: la transformación de Los Angeles.

ADQUISICIÓN DE PROPIEDAD

Hoja informativa

¿Quién es Metro?

La Autoridad de Transportación Metropolitana del Condado de Los Angeles (Metro) es el planificador de transporte, el coordinador, el diseñador, el constructor y el operador regional de tránsito para el Condado de Los Angeles. Metro trabaja en asociación con el Condado de Los Angeles, ciudades locales, el Departamento de Transporte de California (Caltrans), y otros en la planificación de nuevos proyectos de transporte.

Metro®

¿Qué es adquisición de propiedades?

Los nuevos proyectos necesitan adquirir propiedades para su construcción u operaciones. El proceso de adquisición de propiedad se rige por las leyes estatales y federales, y es básicamente el mismo independientemente si los esfuerzos de adquisición son liderados por Metro u otra agencia pública. Esta hoja informativa explica el proceso de adquisición de Metro con más detalle.

¿Por qué los nuevos proyectos de transporte requieren la adquisición de propiedades privadas?

Frecuentemente, nuevos proyectos de transporte necesitan la adquisición de propiedades privadas. Hay varias razones por lo cual la adquisición de propiedades privadas es necesaria.

Necesidades permanentes de propiedades

Proyectos de carretera, autopistas, ferrocarriles, autobús y otros, con frecuencia, requieren la adquisición de propiedades privadas para ampliar la capacidad y/o aumentar el servicio al público. Esto puede ser para instalar carriles nuevos o ampliarlos, construir vías públicas de tren o autobús, mejorar intersecciones, rampas, puentes, estaciones, o instalaciones de mantenimiento. La propiedad adquirida se convierte como un elemento permanente del proyecto y la infraestructura de transporte de la región.

Necesidades temporales de propiedades para obras de construcción

Para construir un proyecto, a veces la adquisición de propiedades privadas es necesaria para la edificación de obras de construcción. Propiedades deben adquirirse para áreas de construcción activas, almacenamiento y otras actividades relacionadas con la edificación de proyectos. Propiedades ideales se encuentran ubicados fuera de la calle e inmediatamente juntos al lugar donde se construirá el proyecto.

Necesidades subterráneas

Algunos proyectos necesitan solamente el subterráneo de propiedades para túneles, estaciones, y otras instalaciones subterráneas. En la mayoría de estos casos, habrá poco o ningún impacto en la superficie de la propiedad.

¿Cómo se determina la necesidad de adquisición de propiedades?

El proceso para determinar si se necesita una propiedad para un proyecto es a través del proceso de planificación ambiental. Esto ocurre de acuerdo con el Acta de Calidad Ambiental de California (CEQA en inglés) y con frecuencia resulta en la preparación de un Reporte de Impacto Ambiental (EIR en inglés). Algunos proyectos también necesitan una revisión federal bajo el Acta Federal de Politica Ambiental Nacional (NEPA en inglés) en que puede resultar en la preparación de una Declaración de Impacto Ambiental (EIS en ingles). Durante este proceso, se evalúan varias alternativas del proyecto y se identifican propiedades que posiblemente podrían ser adquiridas para el proyecto. La lista final de propiedades no se determina hasta el fin del proceso cuando se adopta el proyecto. La participación pública siempre es una parte importante de estos estudios.

Para información adicional, por favor vea nuestra hoja informativa de impacto ambiental.

¿Metro comprará la propiedad, la arrendará, o algo más?

Esto depende. El método más directo es que Metro compre la propiedad convirtiéndose en el dueño de la propiedad. A veces se desarrollan otros arreglos tales como arrendamientos, derecho de entrada, servidumbres temporales de construcción o servidumbres permanentes.

Si el proyecto necesita propiedades debajo del suelo, Metro comprará vía de acceso subterráneo del dueño de la propiedad. Esto se logra mediante un pago singular y se graba una escritura de derecho de paso subterráneo. Esto es idéntico a las servidumbres subterráneas que una compañía de servicios públicos o de cable obtiene para cables de fibra óptica, líneas de agua, líneas de gas, etc.

El área puesta en escena de la estación de Metro en Hollywood/Highland durante la construcción de Metro Red Line.

Hollywood & Vine: Estación de Metro Red Line en Hollywood con desarrollo conjunto.

¿Cómo sé si mi propiedad se necesita para un proyecto? ¿Cuándo me contactarán?

En algunos casos, los propietarios pueden ser notificados que sus propiedades están bajo consideración para un proyecto mientras los estudios están en curso. Sin embargo, la lista exacta de las propiedades no se considera final hasta que el proyecto sea adoptado. Una vez que los estudios se hayan hecho y los fondos están disponibles para comenzar la construcción, los propietarios serán contactados por medio de un representante de Metro.

¿Cómo me van a compensar?

Metro está obligado a proporcionar una compensación justa al propietario por la compra o el uso temporal de su propiedad. El primer paso en este proceso es que Metro obtenga un avalúo de la propiedad. El avalúo considera una variedad de factores, incluyendo la ubicación, el tamaño, el uso más alto y mejor de la propiedad, y la reciente venta de propiedades similares en la zona.

Una vez que el valor esté establecido y aprobado, una oferta será hecha al dueño de la propiedad. Se permitiría un tiempo para que el propietario obtenga su propio avalúo, si lo desea, y para tener una discusión completa con Metro sobre su opinión acerca del valor de la propiedad. Metro tratará de llegar a un acuerdo negociado con un propietario cuando sea posible. Si no se puede lograr un acuerdo negociado, Metro puede ejercer su poder de dominio eminente para adquirir la propiedad. La iniciación de procedimientos de un dominio eminente requiere la aprobación específica de la Junta Directiva de Metro.

Disposición de la propiedad después de la construcción

Después de la terminación de la construcción del proyecto, Metro devolverá las propiedades arrendadas al dueño de la propiedad, que luego podrá desarrollar la propiedad de acuerdo con las regulaciones locales de zonificación. En los casos en que Metro haya obtenido el título de honorario, cualquier parte de la propiedad de Metro que ya no sea necesaria para fines públicos, después de la construcción, podrá ser vendida o puesta a la disposición para el desarrollo conjunto, sujeto a las regulaciones locales de uso de la tierra y de los procesos de aprobación. Si un proyecto de desarrollo colectivo es posible, Metro normalmente emitirá una Petición para una Oferta (RFP en inglés) buscando propuestas de urbanización para la propiedad en particular.

Estación Atlantic: Estación de Metro Gold Line en el este de Los Angeles.

Para más información, visite *metro.net/pa*.

¿Recibiré beneficios de reubicación si necesito mudarme de la propiedad?

Si usted es propietario/ocupante o inquilino que ocupa una propiedad que se adquiere para un proyecto público, puede tener derecho a beneficios de reubicación. Las regulaciones federales y estatales proveen pagos para ayudar en la reubicación de su negocio o residencia. Sus beneficios de reubicación serán explicados en detalle por el personal de Metro o un consultor contratado por Metro. Nadie será obligado a reubicarse de su propiedad hasta que se les haya dado al menos un aviso por escrito de 90 días para mudarse.

Cómo mantenerse involucrado y recomendaciones

Metro le invita a participar en la planificación y construcción de proyectos. Usted puede mantenerse informado de los desarrollos en metro.net, donde puede encontrar información sobre estudios en curso, proyectos bajo construcción, dejar comentarios, y proporcionar su información de contacto para que podamos mantenerle informado de las próximas reuniones y otras metas.

Next stop: digging the future.

TUNNELING
Fact Sheet

Metro®

Shedding Light on Tunnels

New public transportation projects, whether rail or highway, may include construction of tunnels. This fact sheet will provide an overview of some of the factors that help determine when tunnels are appropriate for a project, as well as information on tunnel technology and engineering.

Overview

To Build or Not to Build (a Tunnel)

Tunneling is just one option when planning a new transportation project. The costs, benefits and impacts of a tunnel must be evaluated in comparison to alternatives that would build a project at or above ground level. Some factors that are used to determine whether to build tunnels include:

> **Federal funding criteria/cost-benefit analysis:** Metro often seeks federal matching funds for major projects. We will therefore look to identify a project that ranks well for these highly competitive funds following set federal guidelines for cost-benefit analysis.

> **Local, state and federal regulations:** Metro follows all applicable regulations, including relevant construction, health and safety regulations. These regulations often have a bearing on project planning, the choice of the type of infrastructure and the construction methodology.

> **Community input and feedback:** During the project study phases, the community is encouraged to participate in the overall review process. Public input helps inform a project's development.

> **Demand, ridership and speed:** Travelling below ground can be faster than ground-level alternatives that need to slow down or stop to accommodate traffic. Tunnels may be considered for projects where there is a need to move large numbers of people swiftly to meet forecasted demand.

> **Dense environment:** The existing setting may not provide enough space above ground to accommodate the new transportation project. This could be due to the width of the right-of-way or street where the project is planned, or existing buildings or other structures in the area. It may also be due to existing traffic levels as ground-level options may reduce automobile travel lanes to accommodate the project. Elevated options may also reduce lanes to accommodate support structures for the project.

> **Physical environment:** Tunnels may be a better solution when a transportation project needs to cross physical or topographical barriers, such as mountains or waterways.

> **Real estate acquisition:** All projects typically require Metro to purchase real estate. The need could be temporary for land that is needed only during project construction. Real estate could also be needed permanently for stations, right-of-way, other project features, or underground easements. Projects built at or above ground level will typically need to purchase more ground-level property than below ground projects. *Please see our Property Acquisition fact sheet for more information.*

Various studies, that are part of a project's environmental review process, are completed to determine whether a proposed project warrants construction of a tunnel. *Please see our Environmental Review fact sheet for more information.*

Current Tunnel Projects in Los Angeles

As Los Angeles continues to build out a rail transportation network, tunnels have been incorporated for the following projects:

> Metro Blue Line: Includes a short tunnel segment between Metro/7th St and Pico Stations. *Opened 1990.*

> Metro Red/Purple Line: Fully underground from Union Station to North Hollywood and Wilshire/Western Stations. *Opened in phases 1993-2000.*

> Metro Gold Line: Includes trench sections in Highland Park and Pasadena, and a tunnel between Pico/Aliso and Soto Stations. *Opened in phases 2003-2016.*

> Metro Expo Line: Includes a trench section near USC. *Opened in phases 2012-2016.*

In addition, Metro currently has three projects under construction that incorporate tunnels:

> Metro Crenshaw/LAX Line: Includes a tunnel section between Expo/Crenshaw and Leimert Park Stations. *Scheduled to open in 2019.*

> Metro Regional Connector: Fully underground connection between Metro/7th St and Little Tokyo Stations. *Scheduled to open in 2021.*

> Metro Purple Line: Fully underground nine-mile extension between current Wilshire/Western and Westwood/VA Hospital Stations. *Scheduled to open in phases 2023-2026.*

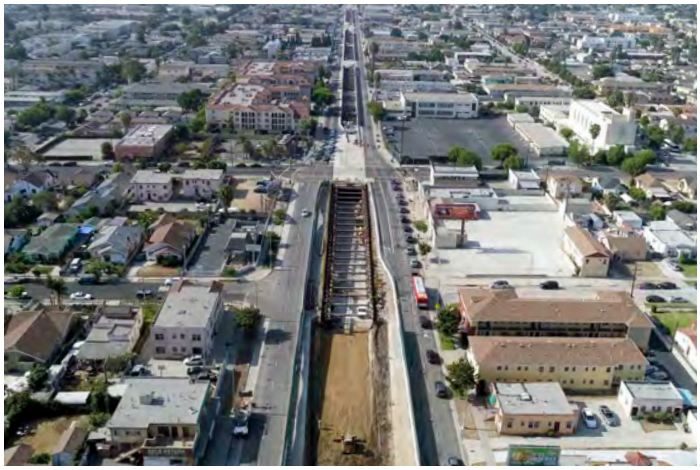
Tunnel Construction Methods

There are two primary methods for building tunnels depending on the conditions where the tunnel is being built.

Tunnel Boring Machine

A Tunnel Boring Machine (TBM) is a giant drill. The TBM slowly drills through the earth, digging tunnels needed for an underground project. Once the TBM is below ground doing its work, it is unlikely that people on the surface will see, hear or feel its operation. Metro continually monitors the progress of the TBM underground to ensure it is operating safely at all times.

The latest technology uses pressurized, closed-face TBMs that maintain pressure in the ground surrounding the tunnel, protect workers inside the TBM, and immediately install concrete tunnel liners that support the tunnel as they proceed in the newly drilled portions of the tunnel. The front section of the TBM is called the shield with a cutter head at the very front. Each cutter head is engineered for the specific ground conditions where the TBM will be operating. A TBM is about the length of a football field at full size and, depending on ground conditions, tunnels at the rate of about 60 feet per day. Several acres of property are needed to launch the TBM to drill the tunnels. That location is often used to remove the dirt from the tunnels. A smaller property is typically needed to remove the TBM at the tunnel's endpoint. Between these starting and ending points, TBMs are generally sufficiently deep to avoid any impact to underground utilities. Exact locations for launching and extracting the TBM, as well as how much space will be needed to do so, is determined as part of the environmental process.



Cut-and-Cover

Cut and cover tunnel construction generally begins by opening the ground surface to an adequate depth to support or relocate existing utility lines, and to install soldier piles or other earth-retaining structures. The surface opening is then covered with a temporary street decking so traffic and pedestrian movement can continue overhead while excavation proceeds beneath the decking. The temporary excavation will be retained by an approved excavation support system, known as a shoring system. Adjacent building foundations will also be supported as necessary. Once the tunnel is built, the remaining excavated space is backfilled and the street is restored.

This methodology is typically employed when tunnels are quite shallow or other conditions preclude the use of TBMs. Underground stations are also typically built using cut-and-cover, even when the tunnels are built using TBMs. Because construction is not fully below ground, it is likely that people at the surface level will see, hear and feel construction activities.

Tunnel Boring Machine at Leimert Park Station

Cut-and-Cover at Hyde Park Station

For more information about Tunneling,
visit *metro.net/tunneling*

Tunnel Safety

Safety is Metro's top priority. Along with evaluating whether a tunnel is appropriate for a project, numerous factors are considered to ensure that a tunnel will be safe for those building, using and living near the project. Underground construction processes continue to improve, as evidenced by recent transportation tunnel and underground sewers projects, and new construction of buildings with deep basements and underground parking structures here in Southern California and worldwide. Metro continually seeks to take advantage of new developments in tunnel engineering and technology. In some cases, our projects have also set new standards for the industry. All Metro tunnels are evaluated, planned and designed with input from leading experts, including an independent Tunnel Advisory Panel that is comprised of globally recognized geotechnical earthquake engineering and tunnel experts.

1.0 INTRODUCTION/OVERVIEW

1.1. Project Overview

The Los Angeles County Metropolitan Transportation Authority (Metro) is currently preparing a Recirculated Draft Environmental Impact Report (EIR) on the Eastside Transit Corridor Phase 2 Project (Project) that proposes to extend the Metro L Line (Gold) further east from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles. The purpose of the proposed Project is to improve transit access and mobility by connecting communities of eastern Los Angeles County, including Commerce, Montebello, Pico Rivera, Santa Fe Springs, and Whittier, and the unincorporated communities of East Los Angeles and West Whittier-Los Nietos to Metro's regional transit system.

In 2014, a Draft Environmental Impact Statement/Environmental Impact Report (EIS/EIR) analyzed two alignment (route) options extending the L Line (Gold) further east into South El Monte – via State Route 60 (SR 60) or Whittier (via Washington Bl). In 2017, a new connection to Washington Bl was identified in Metro staff's Post Draft EIS/EIR Technical Study Report. In 2019, three (3) alternatives were included as part of the reinitiated environmental process, with the new third option being a Combined Alternative that would build both the SR 60 and Washington Bl Alternatives. However, in 2020, the Metro Board withdrew both the SR 60 and Combined Alternatives and directed staff to evaluate the Washington

Alternative. At this point, the National Environmental Policy Act (NEPA) was discontinued; the project continues to move forward through the California Environmental Quality Act (CEQA).

As part of the Recirculated EIR reinitiated in June 2019, Metro will provide an updated environmental analysis, continue coordination with regulatory agencies, and refine engineering design to the alternative. Throughout this process, Metro will continue public engagement and outreach with interested stakeholders and project area communities.

After nearly two years since the February 2020 meeting series, Metro hosted another round of update meetings in November 2021 to provide a project update, share information on the ongoing station design efforts, and provided an opportunity to ask questions. Arellano Associates (AA), in coordination with Metro, prepared and executed a notification plan to notice project area residents, businesses and the general public about these meetings and project updates. This report summarizes the meeting process and materials as well as the outreach and notification efforts leading up to the November 2021 meetings.

Due to the challenging environment related to COVID-19, the meetings were virtual with limited in-person engagement and followed social distancing requirements.

1.2. Meeting Series Overview

AA, in coordination with Metro, prepared for and planned four (4) community meetings that took place virtually, with three (3) presentations tailored to specific communities. The first and second meeting held in East LA offered two (2) options for participation with the first meeting time targeted during business hours and second meeting in the evening. These meetings provided updates on the East LA station options. The third meeting in Montebello featured updates on the Montebello station and alignment. The fourth meeting presented information on the entire corridor in general. All meetings provided the opportunity to ask questions. To support communities with technical limitations, an outdoor set-up was implemented via a “Tech Booth” for all meetings. Due to the challenging environment related to COVID-19, the set-up featured space between stations, chairs and implemented safety regulations including the use of masks. The "Tech Booth" offered the live streaming of the meeting and provided technical support or WiFi internet to participants.

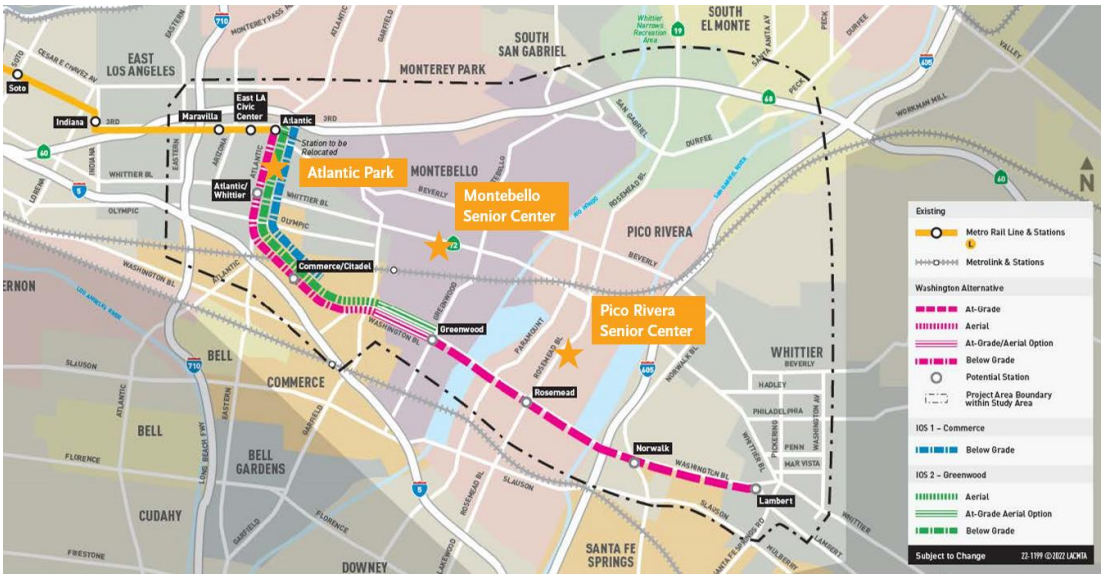

Table 1.1 Community Meeting Details

Meeting	Date/Time	In-Person “Tech Booth” Location/Address
Community Meeting #1 – Focus on East Los Angeles	Mon., Nov. 15, 2021 Time: 12-1:30pm	Atlantic Avenue Park 570 S Atlantic Bl Los Angeles, CA 90022
Community Meeting #2 – Focus on East Los Angeles	Mon., Nov. 15, 2021 Time: 6-7:30pm	
Community Meeting #3 – Focus on Montebello	Tue., Nov. 16, 2021 Time: 6-7:30pm	Montebello Senior Center 115 S Taylor Av Montebello, CA 90640

Community Meeting #4 – Corridor-wide	Wed., Nov. 17, 2021 Time: 6-7:30pm	Pico Rivera Senior Center 9200 Mines Av Pico Rivera, CA 90660

The meetings generated a total of 276 participants (including 18 in-person) and 145 questions/comments. A full summary of comments and major comment themes are available in Chapter 5 of this report. A record of the questions and comments submitted at each meeting are available in Appendix A.

Figure 1 - Meeting Locations

1.3. Partnering with Community-Based Organizations (CBOs)

Following the guidance of the Equity Platform and the CBO Partnering Strategy, Metro, in coordination with AA, developed a CBO Roundtable Strategy (Strategy) for the project. This Strategy provides an approach to collaborating, utilizing the knowledge and reach of local organizations to implement effective outreach methods, engagement and tools that lead to meaningful project input from the community. The project team reached out to over thirty (30) CBOs from around the study area with the opportunity to give feedback and participate in outreach. The CBO partnership includes a total of eight (8) CBOs that responded with interest and followed through with all steps of the onboarding process. These CBOs work in areas across the corridor and are listed below:

Table 1.2 CBO Partners

CBO Name	Service Area	Services Provided
Strength Based Community Change (SBCC)	East Los Angeles	Roundtable participation
Self Help Graphics & Art	City of Los Angeles; Greater Los Angeles Area	Roundtable participation and digital outreach
Women in Non-Traditional Employment Role (WINTER)	East Los Angeles; Commerce; Montebello; Pico Rivera; Santa Fe Springs; Whittier; West Whittier-Los Nietos; Greater Los Angeles Area	Roundtable participation and digital outreach
Mundo Maya Foundation	East Los Angeles; Commerce; Montebello; Pico Rivera; Whittier; West Whittier-Los Nietos	Roundtable participation, digital outreach, and in-person event outreach
Public Matters	East Los Angeles	Roundtable participation
Los Angeles County Bicycle Coalition	Pico Rivera; Whittier; Montebello; East Los Angeles; West Whittier-Los Nietos	Roundtable participation and digital outreach
Disability Rights California	Greater Los Angeles Area	Roundtable participation
Alma Family Services	Commerce; East Los Angeles; Huntington Park; Pico Rivera; San Gabriel Valley	Roundtable participation

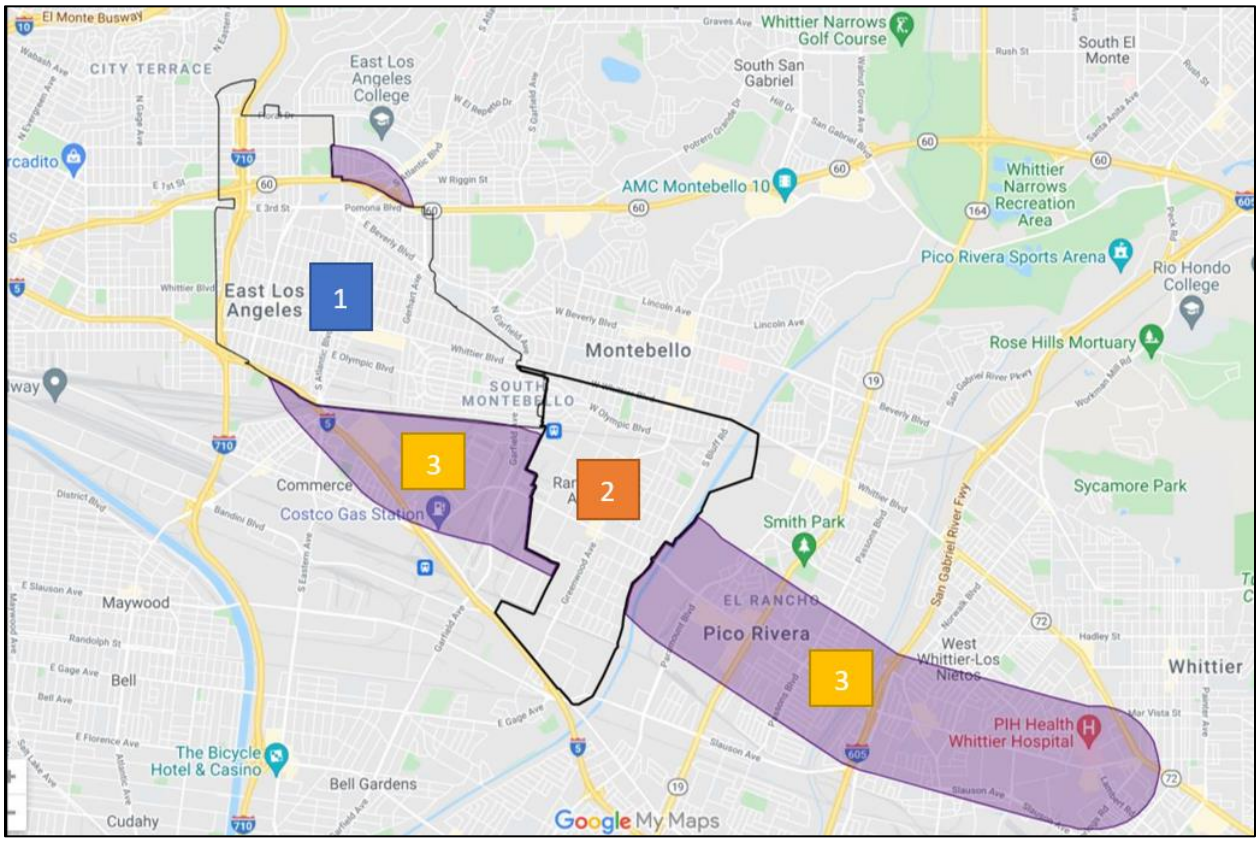
As part of the CBO Partnership, the project team met with the CBOs in a meet-and-greet on September 22, 2021 to review the roles, responsibilities and the process, answer questions and comments. A series of roundtable meetings followed with the first roundtable meeting held on October 18, 2021. This roundtable meeting focused on gathering input on effective outreach strategies and tactics, innovative means of digital notification and reaching historically underrepresented communities. The input provided was reviewed and implemented, where applicable, in meetings and materials that followed. The second roundtable, held on November 3, 2021, was conducted in advance of the November 2021 Community Meetings (see Table 1.1) and was focused on reviewing the meeting format, run of show, and PowerPoint presentation for input on equity, accessibility and facilitation of understanding the content. While the CBOs did not promote the November 2021 community meetings, they were offered optional outreach activities leading up to the March 2022 meetings that could be completed.

2.0 OUTREACH ACTIVITIES LEADING UP TO MEETING SERIES

Targeted outreach had not been conducted for the project since the community meeting series in early 2020. Since then, outreach has been limited due to the COVID-19 pandemic and in-person gathering restrictions. However, leading up to the meeting series, the outreach team was able to participate in six (6) in-person community events and engaged with community members along the corridor to provide brief project updates and invitation to the upcoming community meetings. Table 2.1 below lists each of these community events.

Table 2.1 Community Events List

Event Name	Event Date	Event Location	Approximate No. of Engagements
East Los Angeles Certified Farmers' Market	Sat., Aug. 28, 2021	Kern Ave./Whittier Bl Los Angeles, CA 90022	60
East Los Angeles Certified Farmers' Market	Sat., Sept. 18, 2021	Kern Ave./Whittier Bl Los Angeles, CA 90022	75
Pico Rivera Halloween Spooktacular	Sat., Oct. 23, 2021	Smith Park 6016 Rosemead Bl. Pico Rivera, CA 90660	150
Commerce Movies in the Park	Fri., Oct. 29, 2021	Rosewood Park 5600 Harbor St Commerce, CA 90040	15
Whittier Spooktacular 5K	Sat., Oct. 30, 2021	Whittier Community Center 7630 Washington Av, Whittier, CA 90602	75
East LA Veterans Day Ceremony and Resource Fair	Thu., Nov. 11, 2021	Los Cinco Puntos 3300 East Cesar E. Chavez Av., Los Angeles, CA 90063	60
St. Alphonsus School Holiday Pop-up	Sun., Nov. 14, 2021	St. Alphonsus School 552 Amalia Av Los Angeles, CA 90022	15
Mariachi Plaza Festival – Shared fact sheets via Metro booth	Sun., Nov. 21, 2021	1831 E Festival St Los Angeles, CA 90033	Approx. 50
		Grand Total	440



3.0 NOTIFICATION OF COMMUNITY UPDATE MEETINGS

AA coordinated with Metro to promote public awareness and executed a variety of notification methods for the series of community meetings. Notification included both traditional and digital methods including mailings, door-to-door deliveries, eblasts, banners, posters and flyer distribution. The notification efforts resulted in published articles and other Earned Media. Communication materials were also updated to reflect the community meetings details (i.e., project website and helpline).

3.1. Printed notices

AA designed meeting notices for distribution along the project corridor. Three versions were prepared to provide community-specific meeting information for East Los Angeles and Montebello, and the third notice was distributed to the entire corridor alignment (see map provided in Figure 2). The notices were bilingual (English and Spanish) and included meeting information, project description and project contact information. Copies of the postcards are available to view in Appendix B.

Figure 2: Distribution area

Dual notification was conducted via mail and door-to-door distribution to ensure residents, stakeholders, businesses, agencies and stakeholder groups in the corridor area were informed of the community meetings. For this round of meetings, the typical notification area of 500ft buffer was extended to nearly ½ mile along Washington Bl and ½ mile to Slauson Av and a ½-mile around each proposed station. The mailing distribution included all property owners for the extended boundaries

and database contacts with a mailing address. The door-to-door distribution targeted the entire East Los Angeles area and extended boundaries mentioned earlier and distributed beginning on Friday, November 5, 2021.

Table 3.1 Distribution of Printed Notices

Map Reference	Focus Area	Mailing	Door-to-door
1	**East LA**	23,000	20,000
2	**Montebello**	9,500	8,000
3	**Corridor-wide**	15,000	13,000
	Master Database > All database contacts, which includes East LA business property owners	4,000	0
	TOTAL	**51,500**	**41,000**

3.2. Eblasts

An electronic version of the meeting notice was distributed via e-blast to contacts in the project database that contain an email address. The database was updated prior to the notification period for this meeting series and included emails over 2,400 stakeholders (Appendix D). A table of the distributed eblasts is provided below and PDF copies are available in Appendix B.

Table 3.2 Eblast Distribution

No.	Date	Eblast	Sent	Opens
1	November 1, 2021	Eblast Notice (East LA)	217	43 (25.7%)
2	November 1, 2021	Eblast Notice (Montebello)	291	62 (32.8%)
3	November 1, 2021	Eblast Notice (Corridor-wide)	2,172	414 (27%)
4	November 10, 2021	Reminder #1 Eblast (Montebello)	292	38 (20%)
5	November 10, 2021	Reminder #1 Eblast (Corridor-wide)	2,169	316 (20.6%)
6	November 12, 2021	Reminder #1 Eblast (East LA)	219	47 (28%)
7	November 15, 2021	Reminder #2 Eblast (East LA)	230	55 (30.9%)
8	November 15, 2021	Reminder #2 Eblast (Montebello)	298	66 (33.7%)
9	November 15, 2021	Reminder #2 Eblast	2,191	368 (23.9%)

		(Corridor-wide)		
10	November 17, 2021	Reminder #3 Eblast (Corridor-wide)	2,186	366 (23.8%)
11	November 23, 2021	"Thank you" Eblast	2,679	538 (28.7%)

3.3. Banners, Posters and Flyers

In addition to meeting notices, AA designed 8-foot by 5-foot site-specific and general banners, site-specific and general posters size 11"x17", and flyers size 8.5"x11" to provide information on the community meetings. Banners were offered to corridor cities and East LA. A total of 16 banners were provided to cities and East LA and placed around the community. Additionally, posters were offered to agencies and community groups along the corridor to place in their news section or other high-foot trafficked area, including city halls. The posters were accepted by the cities of Montebello and Commerce. The table below provides counts of the banners and posters provided. Over 2,200 flyers were offered to community organizations, schools, and the corridor cities. A complete list of the 24 organizations that accepted flyers can be found in Appendix B, along with copies of the banners and posters.

Table 3.3 Banner and Poster Distribution

No.	City	# of Banners	# of Posters
1	East LA	5	0
2	Montebello	3	10
3	Pico Rivera	2	0
4	Santa Fe Springs	2	0
5	Whittier	1	0
6	Commerce	3	2
	TOTAL	**16**	**12**

3.4. Extended Outreach

The existing extended outreach list was updated to reflect key stakeholders, including cities, community groups, schools, libraries, community centers, faith-based organizations and chambers of commerce. This list was used to conduct supplemental outreach via targeted distribution for printed and electronic flyers.

Additionally, an electronic communications toolkit was prepared that included copy-and-paste ready text for the use of different communication platforms for stakeholders including eblasts, newsletters, social media posts, websites and school automated systems. The toolkit was distributed to 70 organizations and resulted in some organizations sharing the information in their different communication platforms, as seen in Appendix B.

3.5. Website and Helpline

AA prepared the website edits with Metro taking the lead in updating the community meetings information on the project's webpage under the Latest Updates section. At the conclusion of the meetings, the materials presented were posted within the Documents section of the website.

AA also updated the project helpline greeting message in English and Spanish to announce the meeting details. AA monitored the helpline and responded to any incoming inquiries. Once the meeting series concluded, AA re-recorded the message to reflect a general message and directed callers to visit the website to access project materials.

Both the website and helpline were updated to announce the meetings on November 1, 2021.

3.6. Facebook Events

AA launched four event ads via Facebook to promote each of the four community meetings. The ads were set-up to appear within strategic ZIP codes to ensure coverage throughout the project corridor.

Table 3.6 Ad Campaign Distribution Table

Ad Campaign	Targeted ZIP Codes
East LA Focused Community Meeting #1	90022, 90023, 90063
East LA Focused Community Meeting #2	90022, 90023, 90063
Montebello Focused Community Meeting	90640
Corridor-wide Community Meeting	90040, 90660, 90606, 90670, 90602

3.7. Metro *The Source* and *El Pasajero* articles

Metro's *The Source* released an article on November 10, 2021 highlighting the community meeting series. The article included the project map and community meeting details with attendance options. Similarly, Metro's *El Pasajero* released an article on November 10, 2021 highlighting the community meeting series and included the same content in Spanish.

4.0 COMMUNITY UPDATE MEETINGS

Four (4) community meetings were held to provide general project updates since the last round of community meetings in early 2020 and engage in city-specific discussions based on meeting focus. Two (2) meetings were held specifically for East Los Angeles, one meeting was held to focus on Montebello, and one meeting was held to discuss the overall corridor. As mentioned earlier in the report, each meeting was held virtually on Zoom due to the ongoing COVID-19 pandemic and county safety measures. The Zoom video conferencing platform allows individuals with internet access on a desktop, laptop, phone, or tablet to join on-screen. Simultaneous Spanish interpretation was provided as well as toll-free numbers for accessing the meetings via telephone.

In addition, a safe, in-person, alternative was made available for every session. The Metro team hosted outdoor Tech Booths in East Los Angeles, Montebello, and Pico Rivera. The Tech Booths featured on-site staff, a physically distanced seating area, and large monitors with microphones and speakers for attendees to engage during the Zoom sessions.

The meeting included a presentation and question and answer session. The East LA meetings included breakout rooms to discuss each of the stations with the community – Atlantic/Pomona and Atlantic/Whittier. The four meetings generated a total of 276 participants and a total of 145 comments, as seen in the table below. During the meetings, fact sheets and other relevant information were provided in the chat. Video recordings of the presentations were uploaded on the project website and on the Metro YouTube account and were emailed to all participants who provided their emails. These items, along with the presentation, are also available in Appendix C. Tech booth sign-in sheets and Zoom attendees are provided in Appendix A.

Table 4.1 Community Update Meeting Participation Summary

No.	Meeting	Date	In-Person "Tech Booth" Location	Participation	# of Questions/ Comments
1	**Community Meeting #1 – Focus on East Los Angeles**	Monday, Nov. 15, 2021 12-1:30pm (business hours)	Atlantic Avenue Park 570 S Atlantic Bl Los Angeles, CA 90022	44 (Including 3 at Tech Booth)	36
2	**Community Meeting #2 – Focus on East Los Angeles**	Monday, Nov. 15, 2021 6-7:30pm		37 (Including 5 at Tech Booth)	32
3	**Community Meeting #3 – Focus on Montebello**	Tuesday, Nov. 16, 2021 6-7:30pm	Montebello Senior Center 115 S Taylor Av Montebello, CA 90640	78 (Including 5 at Tech Booth)	29
4	**Community Meeting #4 – Corridor-wide**	Wednesday, Nov. 17, 2021 6-7:30pm	Pico Rivera Senior Center 9200 Mines Av Pico Rivera, CA 90660	117 (Including 5 at Tech Booth)	48
			Total	276 (Including 18 at Tech Booth)	145

5.0 SUMMARY OF PUBLIC COMMENTS

After the presentation, participants were encouraged to submit questions orally or using the Zoom Q&A function at each of the meetings. The project team and outreach staff provided responses to all questions.

5.1 Topics Mentioned During Q&A

Most questions shared were relating to the following 8 categories:

- Property Acquisitions and Other Impacts
- Future Stations Location & Design
- Traffic Impacts
- Safety
- Project Funding & Timeline
- General Comments
- Impact to Residential Areas
- Notification Efforts

The following 10 themes were discussed at all 4 meetings. To view all comments and questions made during the Q&A, please see Appendix A.

1. Concerns over traffic impacts and congestion on city streets during the construction of the project.
2. Interest over the type of amenities, location, and design of future stations.
3. Participants expressed support for mural design that represents local artwork.
4. Concerns over project impact on property values and local businesses. Participants expressed concerns over any property acquisitions.
5. Concerns over safety of local residents.
6. Interest in notification efforts throughout the corridor. Participants expressed support for expanding outreach tactics, and increased notification of project timeline and future public events.
7. Varying preferences on overall project alignment
8. Participants expressed concerns over the potential removal of travel lanes along Washington Bl.
9. Concerns over what impact of the at-grade alternative will have on city streets. Participants expressed opposition to the at-grade alternative on Washington Bl.
10. Support for renewable energy such as solar panels and electric vehicle charging stations at new stations.

6.0 NEXT STEPS

Following the meeting series, Metro will consider feedback and input from the community and stakeholders during the development of the Draft EIR. Community meetings will be held in advance of the release of the DEIR and public hearings will be scheduled during the formal public comment period. Release is anticipated in Spring/Summer 2022.

Community Update Meeting – East Los Angeles
Comment Summary – Virtual Meeting via Zoom and Tech Booth
November 15, 2021

I. MEETING DETAILS

Corridor-wide Project Update Community Meeting Monday, November 15, 2021, 12-1:30pm	
Participants	44 total participants *(plus 50+ who stopped by for information)* • 41 non-staff online • 3 non-staff at tech booth • *Note: fact sheets were passed out to about 50 passers-by throughout the day*
Agencies	• Federal Transit Administration ○ Matthew Gleason, Transportation Program Specialist
Jamboard Notes	• Link

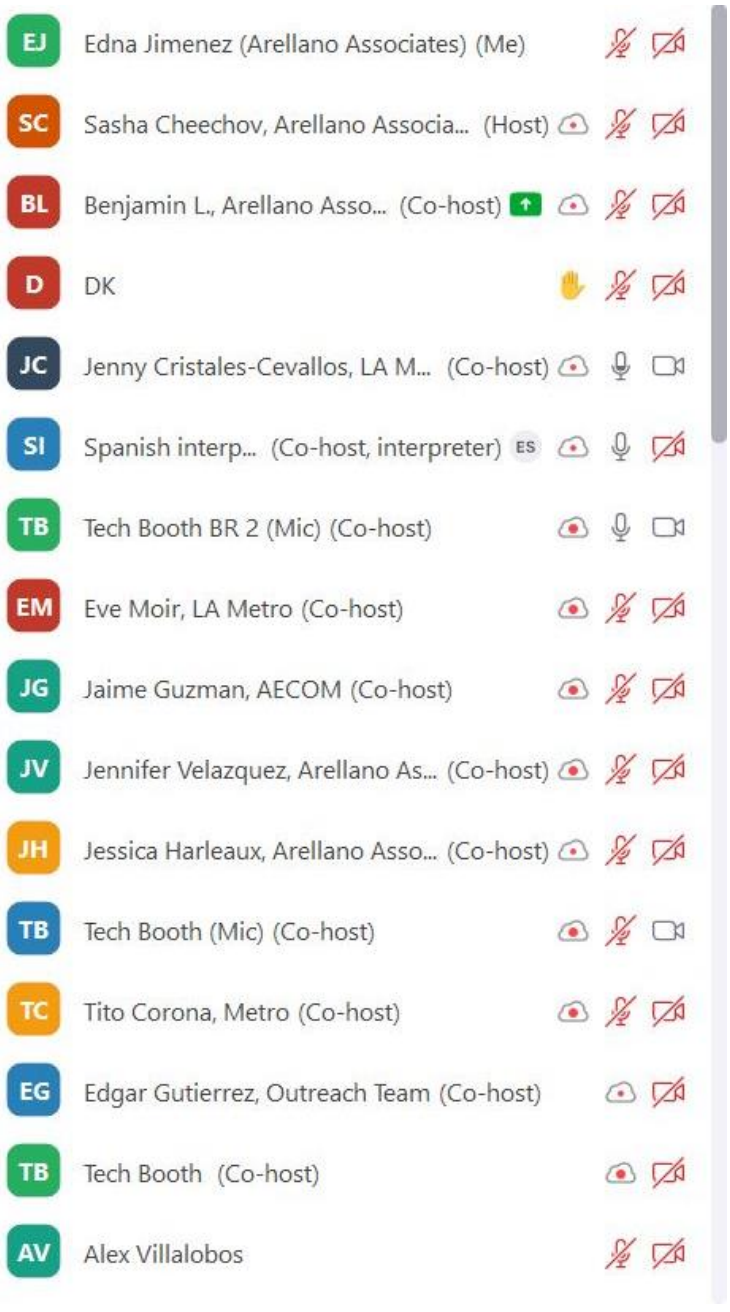
II. DISCUSSION

Participants were given the opportunity to provide comments and engage in discussion following the presentations by using the raise hand feature on Zoom and providing a verbal comment or question, or by typing a comment in the Q&A function of Zoom.

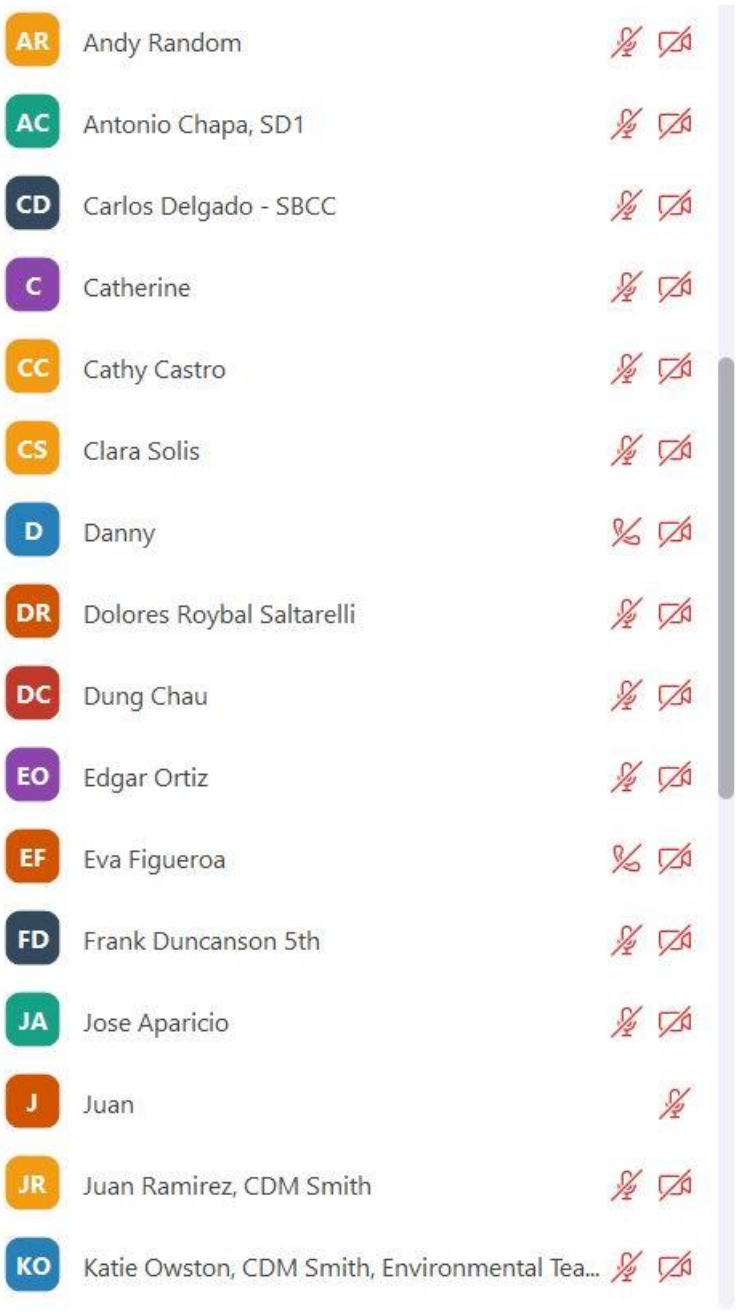
A. Comment Themes

- Concerns over traffic impacts and congestion on city streets during the construction of the project.
- Interest over the type of amenities, location, and design of future stations.
  - Participants also expressed support for mural design that represents local artwork.
- Concerns over project impact on property values and local businesses. Participants expressed concerns over any property acquisitions.
- Interest in notification efforts throughout the corridor. Participants expressed support for expanding outreach tactics, and increased notification of project timeline and future public events.
- Varying preferences on overall project alignment

B. Comment Summary



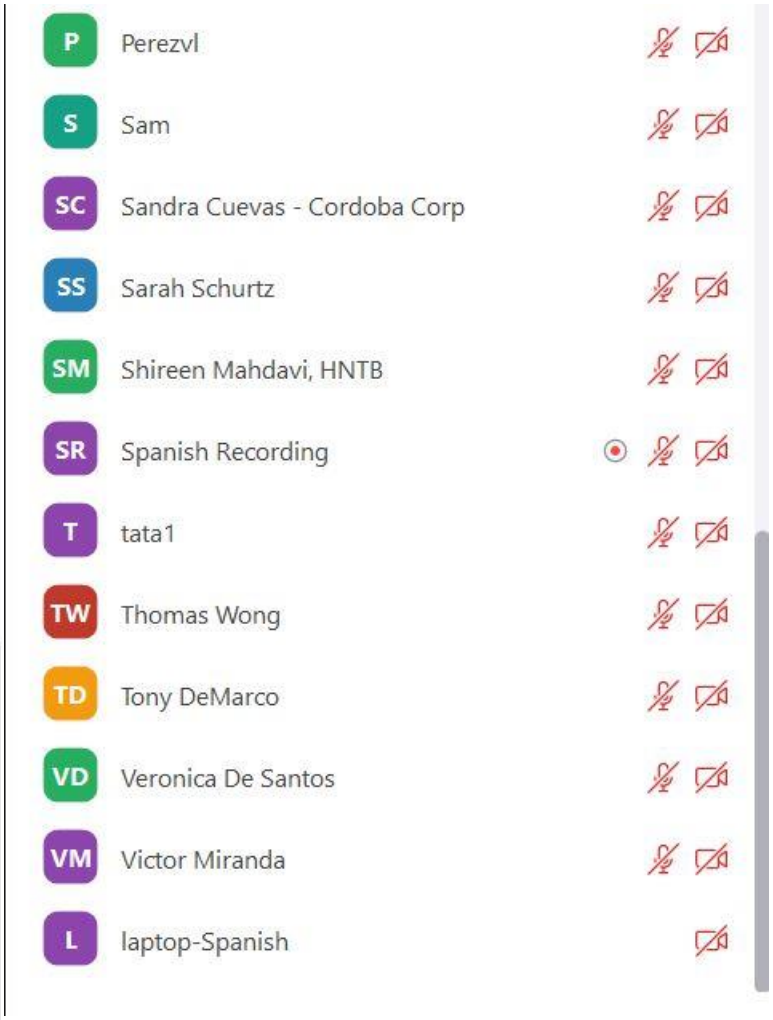
1. **Traffic:**
   - Supports the project for because it will ease congestion in Pico Rivera.
   - Below grade station impacts will be minimal to traffic because it will take place below decking.
   - Local streets may be used for parking. I'm worried that traffic will be increased during construction, how can we mitigate that? (Frank Fifth)



2. **Impacts on Local Businesses**
    - The current concept for the station on Atlantic/Pomona would take over local businesses.
    - I know many businesses have experienced eminent domain in the past, that's probably what would happen. I want an alternative that would have the least impact. Focus on the least number of buildings. (R. Yanez)
3. **Safety**
    - What does the environmental review include? Safety and security will be a problem on Lambert and Washington. (DK)
    - Concern about homeless individuals.
4. **Future Stations Location & Design**
    - Which option will have a pedestrian plaza? It brings visibility and serves communities. The open-air concept may be affected by weather, it can discourage use. (RJ)
    - I think the open-air concept at Pomona station should be removed. The underground version of the Whittier Station would have been good. (R. Yanez)
    - Yes, to the open option at Atlantic and Pomona, it's worth further study to learn more about parking options and safety.
    - The open-air concept at Atlantic and Pomona would alleviate traffic.
    - The underground option looks good but its further from the parking structure, as it is only available from southbound lanes. (Frank Fifth)
    - Is there a consideration for how the coverings will be designed? (RJ)
    - Could you review open/underground, is that a better option?
    - The station should be below ground.
5. **Construction Impacts**
    - There is currently a multi-use complex being proposed at Washington and Rosemead and I am worried about the construction impacts on the local community in Pico Rivera. (M. Lopez)
    - Will there be impacts to local businesses at Atlantic/Pomona? Will transit oriented development impacts on communities be studied, especially given the high density? For Whittier/Atlantic, what will the impacts and mitigations be for businesses during construction? Will there be testing for lead contamination? (Clara)
    - For the Atlantic underground station, would creating the tunnel affect residents east and west of Atlantic? There are homeowner fears regarding the taking of properties.
6. **Notification Efforts**
    - Can you email the meeting schedule? (Arturo Gonzales)
    - The notices for the hearings have not been circulated adequately, outreach has problems. There needs to be special consideration for minority communities. (DK)
    - What year will the Draft EIR come out? Can you make EIR available at local libraries?
7. **Project Funding & Timeline**
    - Would any of the two station options expedite the project timeline? (RJ)

- Where does the Washington Alternative fall within the plan? Would it be completed by 2035?

8. **Whittier Boulevard Alignment Preference**
    - There are many LA county agency offices on Whittier Blvd that community members benefit from. There are also major shopping centers (Christine Mariano)
    - Why was the Washington alignment selected, as opposed to Whittier Blvd?
        - The current route would make it hard for pedestrians to utilize services, as most of it is in industrial areas.
    - I strongly encourage the Whittier alignment to be discuss again (R. Yanez)
        - Public ridership and reducing traffic should be priorities, which makes Whittier Blvd. the best option.
9. **General Comments**
    - It seems counterproductive to have underground segment running through the most sparsely populated part of the alignment. Was placing the rail along the train right of way considered? (Arturo Gonzales)
    - What will happen to the existing Gold Line station off 3rd, Pomona, and Atlantic?
    - Request to show stations side by side to compare concepts.
    - Would the Atlantic/Pomona alignment be underground?
    - What kind of pedestrian improvements have been considered for Atlantic and Washington?



Eastside Transit Corridor Phase 2

November 16, 2021

I. MEETING DETAILS

Eastside Community Meeting – Corridor Wide Evening Meeting	
Platform	Zoom Meeting
Date/Time	Monday, November 16, 2021 6:00-7:30pm

II. DISCUSSION

Participants were given the opportunity to provide comments and engage in discussion following the presentations by using the raise hand feature on Zoom and providing a verbal comment or question, or by typing a comment in the Q&A function of Zoom.

A. Comment Themes

- Concerns over traffic impacts and congestion on city streets during the construction of the project.
- Interest over the type of amenities, location, and design of future stations.
    - Participants also expressed support for mural design that represents local artwork.
- Concerns over project impact on property values and local businesses. Participants expressed concerns over any property acquisitions.
- Concerns over safety of local residents.
- Interest in notification efforts throughout the corridor. Participants expressed support for expanding outreach tactics, and increased notification of project timeline and future public events.

B. Comments Summary

1. Future Stations Location & Design

- What is the cost to business and community members if the station is open concept? (Tony DeMarco)
- I think an underground station would be best to have the least amount of impact. (Martha Castro)
- How will you uplift and beautify our community? (Anonymous)
- Metro Police needs to present at the station and in the trains. I would like to see an option that is safer; I feel like the closed option would be best. (Eddie Torres)
- There needs to be ventilation in the Metro tunnels, as there are dangerous byproducts produced when the wheels come to a stop on the track when braking. (Eddie Torres)
- Will the community be able to contribute to the design of the project? (Daniel Coronado)

2. Impacts on Local Businesses

- We want compensation for businesses that will lose clients. (Eddie Torres)
- We want beautification projects and invest in new and existing businesses. (Eddie Torres)

- What kind of monetary compensation will be given to local businesses? (Kathy Castro)
- Business owners are apprehensive and worried about the project due to the potential negative impacts. (Tony DeMarco)

3. **Safety**
    - I am concerned about the impacts the project will have on the area and potentially increasing the number of local homeless individuals in the area. We want more security and cameras. I do not feel safe. (Anonymous)
    - There are a lot of seniors and children in the area. How will you implement safety and the traffic flow during construction? (Kathy Castro)
    - I am concerned about safety, especially for children and Elders. What will you provide for us? (Anonymous)
    - How will street corners be updated to accommodate safety? (Jose Aparicio)
4. **Construction Impacts**
    - How will the local grocers be affected during construction; will we be able to access them? (Anonymous)
    - What will other local construction impacts be? (Patsy Ma)
    - Do you know where the laydown yard will be? Where will the dirt stockpile be? (Martha Castro)
    - Sheriff response time has been slow given local roundabout and will impacted by Metro construction. (Martha Castro)
    - What planning is being done with schools to have safe routes during construction? (Daniel Coronado)
5. **Notification Efforts**
    - We need more meetings, especially in-person. (Tony DeMarco)
    - There has been very little communication getting out to members of the community regarding the project. I learned about the project through the Whittier Daily. A poll was done on Nextdoor, many individuals were upset because they did not know about the project. There has been an increase in violence on Metro. (DK)
    - I am the property manager of shopping center on Pomona/Atlantic. I was not informed about this call. I have signed up in the past but did not receive information about this meeting. (Patsy Ma)
    - We need about three times the investment amount in outreach of Whittier in East Los Angeles, as it is unincorporated. East LA does not have the same government decision-making bodies and structure as regular cities. (Tony DeMarco)
6. **Project Funding & Timeline**
    - My concern is about the timeline being so long. How can we speed up the timeline? (Jose Aparicio)
7. **General Comments**
    - We need more than 2 minutes of talking time. Business owners have a lot to say. (Tony DeMarco)
    - Will the county or Metro buy the Sketchers building? (Tony DeMarco)
    - I am a member of the Whittier Blvd. Merchant Association, members are fearful. (Tony DeMarco)

- Many businesses are vacant, East LA is devastated by the pandemic. We want good jobs for the community. (Eddie Torres)
- We need more trees in East LA, there are a lot of health conditions. (Anonymous)
- In the long term, the Metro expansion will benefit the community. (Kathy Castro)
- Many of the students in the area have special needs. Many Elders use the shuttle because they are not driving. (Anonymous)
- Is there a partnership with cities to allow optimal speeds for metro trains by modifying the traffic light systems? (Daniel Coronado)

II. COMMENT THEMES

Participants were given the opportunity to provide comments and engage in discussion following the presentations by using the raise hand feature on Zoom and providing a verbal comment or question, or by typing a comment in the Q&A function of Zoom. The following provides an overview of the comments

received, organized into general themes resulting from the Montebello focused meeting on November 16, 2021.

A. Property Acquisitions and Other Impacts

1. Do you anticipate acquisitions in Montebello? (Anonymous)
2. Where will the acquisition happen? (Anonymous)
3. Will Atlantic be expanded, or will properties be bought? (Lorrain)
4. Buildings will be damaged by street vibrations. (Anonymous)
5. Businesses and residents will leave when the project is completed in East LA. (Jesse Garcia)
6. It will be a nightmare and property values will drop. (Jesse Garcia)
7. *What is being done about the petition being signed to stop the project. Also, residents are planning to put it up for vote by the community? (Jesse Garcia; submitted via chat, not addressed during meeting)*
8. *Will the study look at the impact for residents access to Greenwood being the main street to get to the 5 Freeway? (Anonymous; submitted via chat, not addressed during meeting)*
9. *Can you please clarify on the proposed acquisitions: TCE, fee, easements, etc.? Thank you. (Maggie; submitted via chat, not addressed during meeting)*
10. *Do you anticipate acquisitions on the proposed route in Montebello?*
11. *When you're groundbreaking, what are you going to do with the vibrations. It will affect our homes. (Anonymous; submitted via chat, not addressed during meeting)*

B. Future Stations Location & Design

1. What led the proposal of the project to consider going underground on Atlantic? (Anonymous)
2. What will be done to prioritize the rail line given the at-grade station? Will there be a parking structure? (RJ)
3. How was the arial configuration determined for the Greenwood Station? (William Moreno)
4. What are the pros and cons of having an aerial vs. at-grade station? (Anonymous)
5. Have you considered a design-build methodology? (Sami Wassef)
6. *If at grade configuration, will there be a shared island platform or separate side platforms? (RJ; submitted via chat, not addressed during meeting)*
7. *Was the aerial configuration from the cities of Commerce to Montebello to not impact existing railroad tracks? (Maggie; submitted via chat, not addressed during meeting)*
8. *Do you have any other alternatives? (Anonymous; submitted via chat, not addressed during meeting)*
9. *Property values go down! (Anonymous; submitted via chat, not addressed during meeting)*
10. *How will the project affect the existing bus lines/bus stops on Washington Blvd in Montebello? (Maggie; submitted via chat, not addressed during meeting)*
11. *Maggie: Why were the previous alternatives rejected by the board on SR 60? What concerns were expressed by the affected cities, for example city of Monterey park that can be shared today? (Maggie; submitted via chat, not addressed during meeting)*

C. Traffic Impacts

DRAFT

1. Are impacts to Greenwood Elementary being considered? Including traffic? (Anonymous)
2. Atlantic/Beverly already has major traffic problems. (Sami Wassef)
3. What areas will the traffic study include? Will lanes be reduced?
4. Will the proposed project result in only having one lane each way along Washington Blvd.? (Anonymous)
5. You will lose two lanes on streets in East LA. (Anonymous)
6. How will the Washington/Garfield intersection be impacted once the line goes above ground? (Anonymous)
7. I'm a resident of South Montebello and we already have a train line cutting through the area. Are there alternatives to the project? (Anonymous)
8. *Traffic will be congested with less lanes. (Anonymous; submitted via chat, not addressed during meeting)*

D. Safety

1. There will be suicides on the tracks and increased crime on the train. (Anonymous)
2. There will be an increase in accidents. (Jesse Garcia)
3. *Children will be affected! (Anonymous; submitted via chat, not addressed during meeting)*
4. *For proposed park and ride sites, will security services be provided to deter excessive RV parking and homeless? Will measure m provide funding for maintenance and upkeep of stations or should property owners anticipate increase in property taxes? (Maggie; submitted via chat, not addressed during meeting)*

E. Project Funding & Timeline

1. When will the project be built, will the additional money expedite the process? (Anonymous)
2. When will the project be completed? (Darlene Daniel Acala)
3. The timeline will be delayed. (Anonymous)

F. General Comments

1. What other transportation options have been considered for the region? (Reyna Sandoval)
2. The public is not being appropriately informed about the project, sue the project. (Nicki)
3. Please do not use jargon. (William Moreno)
4. What are the project alternatives? (Anonymous)
5. We will bring the project up to a vote within the community. (Jesse Garcia)
6. How will the project affect the existing bus lines? (Anonymous)
7. *Is this an actual plan? is it set in stone? we don't want it going down Washington. (Verlene; submitted via chat, not addressed during meeting)*
8. *Whatever can go wrong, will go wrong (Anonymous; submitted via chat, not addressed during meeting)*
9. *Sounds to me this project is for Whittier residents not us in between, also no one on the train will get off to shop in our community. (Robert Tapia; submitted via chat, not addressed during meeting)*

DRAFT

10. *Have Electric buses been considered? Darlene Daniel*
11. *I vote for more busses! (Anonymous; submitted via chat, not addressed during meeting)*
12. *Thank you for your presentation. My name is Adriana Dugan at the Montebello Chamber of Commerce. (Adriana Dugan; submitted via chat, not addressed during meeting)*
13. *Biden State of the Union address: U.S. putting out only 15% of world's Co2, so anything we do won't matter. (Kniki; submitted via chat, not addressed during meeting)*
14. *The project will also be reviewed by the City of Montebello Engineering staff. (Anonymous; submitted via chat, not addressed during meeting)*
15. *Businesses closed on Third and First Street. (Anonymous; submitted via chat, not addressed during meeting)*
16. *Having lived in Sf and NYC - I do want to iterate that I support pubic transit of this type. (William Moreno; submitted via chat, not addressed during meeting)*
17. *The public was not informed! It will ruin lives! (Anonymous; submitted via chat, not addressed during meeting)*
18. *What has the businesses response been? (Anonymous; submitted via chat, not addressed during meeting)*

II. DISCUSSION

Participants were given the opportunity to provide comments and engage in discussion following the presentations by using the raise hand feature on Zoom and providing a verbal comment or question, or by typing a comment in the Q&A function of Zoom.

i. Comment Themes

- Concerns over traffic impacts and congestion on city streets during the construction of the project.
    - Participants also expressed concerns over the potential removal of travel lanes along Washington Bl.
- Concerns over what impact of the at-grade alternative will have on city streets. Participants expressed opposition to the at-grade alternative on Washington Bl.
- Interest over the type of amenities, location, and design of future stations. Support for renewable energy such as solar panels and electric vehicle charging stations at new stations.
    - Participants also expressed support for mural design that represents local artwork.
- Concerns over project impact on property values and local businesses. Participants expressed concerns over any property acquisitions.
- Interest in notification efforts throughout the corridor. Participants expressed support for increased notification of project timeline and future public events.

ii. Comment Summary

1. Traffic:

- Supports the project for because it will ease congestion in Pico Rivera.
    - Support for an accelerated timeline for the project. (Cathy)
- Concerned about Washington Bl alternative and traffic. Are you going to widen the bl? Is not sure how the project is going to impact traffic.
    - Concerned about existing construction in Pico Rivera and how the project will affect this construction. (Jose)
- Resident in Whittier, concerned about traffic along Washington Bl. What is going to be done about traffic? Concerned about how the project will impact traffic. (Rudy)
- Concerned about traffic impact on Washington Bl., the Washington alternative will remove lanes and make traffic worse. (Virginia)
- Expressed concern about traffic on Washington Bl traffic. Concerned about commercial traffic along Washington Bl. Concerned about the impact the project will have on home values. (Olivia)
- Does not support the project at-grade. Concern about safety and traffic. Concerned about loss of parking along Lambert. (Denise)
- Why is no presentation concerning Pico Rivera and Whittier? Washington Bl has traffic congestion. Why at street level? Why not elevated all the way to Whittier? (Paul Nese)
- How will all the 18-wheeler trucks be accommodated that use Washington Blvd. to transport goods? (Anonymous)
- Has there been a study on the affect on Mar Vista coming from Colima in the city of Whittier? (Maria)
- How will this project impact traffic on Washington Bl which is always congested as it is? (Sammy)
- Traffic will worsen should metro be built at grade/street level just like it's through Indiana to Atlantic, we feel it would be best to stick to underground (Rudy)

- I have asked this question before and it has not been addressed: (Milton Lum)
    - The Washington alignment started as aerial and changed to ground due to cost considerations. Washington Bl is the primary east/west access to PIH, the regional hospital. During heavy automotive traffic, emergency vehicles typically cross back and forth into on-coming traffic to get around traffic blockages at the intersections crossing Washington. With the train at grade, emergency vehicles cannot cross over the median to go around traffic.
    - What is the impact to emergency response times and transport times to PIH after the light rail goes in.
    - The transport time and emergency response times west of PIH can only be negatively impacted. Where is this addressed in the impact reports?
- Concerns of traffic at Atlantic/Pomona intersection due to FWY off ramp and would like to know if currently a metro platform is being built at north/east corner of Atlantic /Beverly.
    - Also, would like to know if the train ends there and would be a walk to end of current Gold Line station? Not sure if it is a continuous rail. I don't live near Washington Bl but am concerned with truck driving on Washington Bl due to the fact that I travel to Santa Fe Springs and Pico Rivera. (Margaret)
- Will anything be done about the traffic on Mar Vista Ave coming from Colima? (Maria)

2. Future Stations Location & Design

- Expressed support for the project. Is there a possibility for a bridge to be built over the 5 FWY to be able to access the new line? (Orlando)
- Expressed support the project and the at-grade alternative. (Oswald)
- Can you speak on protective areas for people to sit under? And disability friendly area? (Martha Camacho Rodriguez)
- Also, can you install solar panels (parking lot) to promote green energy? (Martha Camacho Rodriguez)
- Electric car chargers. (Martha)
- Will the parking lots include free Electric Vehicle charging dedicated spaces? (Daniel and Darlene Alcala)
- Interested in funding for infrastructure in the area. Support for the project and would like to see the timeline accelerated.
    - Support for incorporating murals and artwork at the station that represents Pico Rivera and its residents.
    - Interested in job opportunities and internships.
    - Would there be a parking lot at the station in Pico Rivera, would there be a fee to park there. Concerned about street light maintenance in the city. (Edgar)
- Is there information regarding the Citadel underground station design? (Xavier Arambula)
- What would be a possible next station location after Lambert? (Jeff Korpa)
- In regard to the proposed park/ride stations, will measure M provide funding for maintenance and upkeep, including security/safety features to deter graffiti, homelessness, excessive RV parking? Or should property owners anticipate an increase in property taxes? (Maggie)

- When we Metro release design specifics for the Lambert terminus station? (Anonymous)
- With the extension of light rails, are there any plans of increasing hours of operation (ex. running up to 2am)? (Richard)

3. Impact to Residential Areas

- Would like to know if there will be homes knocked out in Pico Rivera, by Washington Bl and the 605 FWY. (Maria)
- What type of acquisitions are being proposed for the project: full/partial acquisitions, easements, fee, etc? (Maggie)
- I will oppose the removal of residential or businesses being removed for the project. (Anonymous)
- With a Metro train very close to home, property value will go down because of noise homelessness traffic. (Rudy)
- Opposes the project in Montebello. Concerned about losing businesses along Greenwood Ave and the impact of the project in schools?
    - Expressed concern about home values.
    - Concern about location and destinations. (Jesse)

4. Notification Efforts

- Will there be another flyer in regard to the future meetings in 2022 for the Greenwood station? (Karina Hernandez)
- What are the County representatives doing about spreading the word about these meetings? We have asked in the past about sufficient heads up through mailers, emails, posted public signs. I only found out about this meeting today when the mailer arrived from metro. (Oswald Ruiz)
- Expressed concern about the line in Whittier and notification efforts.
    - Concern about homelessness and safety in the new station.
    - Concerned about traffic and safety around construction sites. (DMK)

5. Project Funding & Timeline

- Expressed support for the project because it will provide more transit options for residents.
    - Why did we not pursue federal funding? Would Metro reconsider federal funding in the future and how will this affect the project timeline. (Agustin)
- It would not qualify for federal funds per cost effectiveness. (Dana Gabbard)
- Can you show the map at the intersection of Washington Bl and Rosemead Ave? Can you provide the expected time frame for the construction and completion of the project? (Luis Escobedo)

6. General Comments

- Hello Jaime Guzman!! I am excited about this project coming to my city! (Annette Cortez)

- What is Metro doing in on noise control? There seem to be a big problem in the area given the CVS in Monterey park has a hearing clinic (Edgar Gonzalez)
- Voice concerns for the project. It doesn't serve a purpose to Montebello. Agrees with the Citadel stop. There will be no benefit for Montebello. Most of the people don't want it. Support an alternative on Slauson, Paramount, or Rosemead. Concerned about pedestrian bridges during construction. (Jesus Garcia)
- Why is an aerial configuration proposed for the city of Montebello only? (Maggie)
- Why was the previous alternative on SR 60 rejected by the board? What concerns were expressed by the affected cities for example Monterey Park that can be shared today? (Maggie)
- Will the line get signal prioritization for the at-grade sections? (Xavier Arambula)
- At a meeting on adding to the 710 freeway they talk about at a point passing more buses in Atlantic and make changes to the sidewalks to help with the traffic. Given Pasadena did not what to pass the freeway. Are this places still active given this project by Metro to pass the metro underground? (Edgar Gonzalez)
- What is the plan for the route over the 605? (Mike)

Eastside Transit Corridor Phase 2 Project

Anuncio en español

Join Us!

Metro will be offering two (2) virtual community update meetings on November 15 to focus on the East Los Angeles stations and one (1) virtual meeting on November 17 to learn the latest on the Eastside Transit Corridor Phase 2 Project.

The meetings will provide:

- Updates on East LA stations options
- An overall project update
- Opportunity to ask questions

The meetings will be virtual via Zoom. To support the virtual meetings, outdoor 'Tech Booths' will be available at the locations noted below and will be broadcasting the live meeting on site, offer free Wi-Fi internet and provide technical support. All health safety protocols will be implemented during the 'Tech Booth' events.

Meeting Schedule

East Los Angeles Focused Meetings: Monday, November 15, 2021

Zoom Meeting #1: 12-1:30pm

Call In Number: 213.338.8477
Meeting ID: 819 3119 9686

Tech Booth: 6-7:30pm
Pico Rivera Senior Center
9200 Mines Av
Pico Rivera, CA 90660

**Meetings will offer a presentation followed by Question & Answer session. The same information will be provided at each meeting. Video recordings will be available on the project website.*

Project Overview

Metro is evaluating an approximately nine-mile extension of the Metro L Line (Gold) further east from its current terminus at Pomona Bl and Atlantic Bl. This extension would serve the cities of Commerce, Montebello, Pico Rivera, Santa Fe Springs and Whittier, and the unincorporated communities of East Los Angeles and West Whittier-Los Nietos.

In February 2020, the Metro Board of Directors approved the following actions:

- Withdrew the SR 60 Alternative and Combined Alternative from consideration
- Proceed with California Environmental Quality Act (CEQA) for the environmental review process
- Directed that a separate feasibility study be completed in the San Gabriel Valley, to identify potential mobility solutions led by the San Gabriel Valley Council of Governments

Corridor-Wide Meeting: Wednesday, November 17, 2021

Zoom Meeting: 6-7:30pm
Link: *tinyurl.com/ptyhj3u7*
Call In Number: 213.338.8477
Meeting ID: 819 3119 9686

Tech Booth: 6-7:30pm
Pico Rivera Senior Center
9200 Mines Av
Pico Rivera, CA 90660

**Meetings will offer a presentation followed by Question & Answer session. The same information will be provided at each meeting. Video recordings will be available on the project website.*

In-person Information Booths

Metro will continue to engage stakeholders throughout the study process. The outreach team will be participating in ongoing in-person information booths to share project information. All safety protocols will be implemented during these events.

Note: Events are subject to change and/or cancellation based on changing COVID-19 safety regulations.

Event/Date/Time:
St. Alphonsos Holiday Pop-Up
Sunday, November 14, 2021
8am – 3pm

Location:
St Alphonsos School
552 S Amelia St
Los Angeles, CA 90022

Project Overview

Metro is evaluating an approximately nine-mile extension of the Metro L Line (Gold) further east from its current terminus at Pomona Bl and Atlantic Bl. This extension would serve the cities of Commerce, Montebello, Pico Rivera, Santa Fe Springs and Whittier, and the unincorporated communities of East Los Angeles and West Whittier-Los Nietos.

In February 2020, the Metro Board of Directors approved the following actions:

- Withdrew the SR 60 Alternative and Combined Alternative from consideration
- Proceed with California Environmental Quality Act (CEQA) for the environmental review process
- Directed that a separate feasibility study be completed in the San Gabriel Valley, to identify potential mobility solutions led by the San Gabriel Valley Council of Governments

Eastside Transit Corridor Phase 2 Project

Anuncio en español

Remember to Join Us!

Metro will be offering one (1) virtual community update meeting on November 16 to focus on the Montebello station and one (1) virtual meeting on November 17 to provide an update on the Eastside Transit Corridor Phase 2 Project.

The meetings will provide:

- Updates on Montebello station and alignment
- An overall project update
- Opportunity to ask questions

The meetings will be virtual via Zoom. To support the virtual meetings, outdoor 'Tech Booths' will be available at the locations noted below and will be broadcasting the live meeting on site, offer free Wi-Fi internet and provide technical support. All health safety protocols will be implemented during the 'Tech Booth' events.

Meeting Schedule

Montebello Focused Meeting: Tuesday, November 16, 2021

Eastside Transit Corridor Phase 2 Project

Anuncio en español

Thank You for Participating!

Thank you to everyone who attended the virtual community meetings for the Eastside Transit Corridor Phase 2 project. Metro hosted four virtual meetings to introduce design options in the East Los Angeles and Montebello communities. To summarize the information covered at the previous meetings, a Corridor-wide meeting was held. General project updates were also provided at all meetings. Participants were offered an opportunity to ask questions to the project team.

To facilitate participation of these virtual community meetings, Metro also hosted in-person, outdoor, 'Tech Booths' along the corridor to broadcast and participate in the zoom meetings and offer public access to electronic devices, Wi-Fi internet, and technical support. We are very appreciative of the 275+ stakeholders that participated virtually and via the tech booths. For those who were not able to attend, video recordings and presentations are available by accessing the links below.

We look forward to your continued participation, including opportunities to learn more early next year in advance of the planned release of the Draft Environmental Impact Report (EIR) in spring/summer 2022.

Eastside Transit Corridor Phase 2

Communications Toolkit: November 2021 Community Meetings

Metro is proposing to extend the Metro L Line (Gold) further east from its current terminus at Pomona Bl and Atlantic Bl in East Los Angeles. This extension would serve the cities of Commerce, Montebello, Pico Rivera, Santa Fe Springs and Whittier, and the unincorporated communities of East Los Angeles and West Whittier-Los Nietos.

Virtual Community meetings will be offered in November. Focused meetings for discussions on the East LA stations will take place on November 15 and Montebello stations on November 16. A corridor-wide update meeting will take place on November 17. To support the virtual meetings, outdoor 'Tech Booths' will be available for all meetings and will be broadcasting the live Zoom meeting on site, offer free Wi-Fi internet and provide technical support. All health safety protocols will be implemented during the 'Tech Booth' events

As a community leader in the project area, we want to help you engage with your community to share meeting details and are providing this digital toolkit that lists methods on how you can share the community meetings information with your membership or lists. Simply copy and paste the information onto any of your preferred communication platforms. These efforts are intended to complement all the other public notification methods that Metro is already using to promote the meetings. Below are some ***suggested methods*** to share project details. See each section enclosed for details.

1. **View and share project resources**
2. **Post on Social Media:**
   OPTION 1: Download our Eastside Phase 2 image at LINK and post it on your social media profiles (Facebook, Twitter, Instagram) and share the following LINK on your post.
   OPTION 2: Post meeting information to *NextDoor.com*
3. **Distribute electronically via email or newsletter:** Share the meeting notices with your e-mail contacts. You can download a copy of the meeting notice (East LA English, *East LA Spanish* / Montebello English, *Montebello Spanish* / Corridor-Wide Meeting English, *Corridor-Wide Spanish*)
4. **Post to your website:** You can use the image provided in the email to post to your organization's homepage. The image would then need to be linked to Metro's website.
5. **Feature the meeting dates and details on your events calendar:** Share the community meeting dates on your online events calendar (if applicable), make announcements at your meetings, or other special events
6. **Posters –** 11" X 17" posters are available to place on your organization's public counter or news section, upon request

Please see the following pages for copy-and-paste-ready text and downloadable image you may use to share information with your membership. If you have any questions on how to share this information with your community, please contact outreach consultant Edna Jimenez at EJimenez@ArellanoAssociates.com or 909.627-2974. We look forward to continuing to work with you!

Metro

B. Nextdoor.com (Two options)

1. Post the following text as a "message" on your Nextdoor profile:
   Metro is offering community meetings on November 15, 16 and 17 to provide an update and answer questions on the Eastside Transit Corridor Phase 2 project, an approximately nine-mile proposed extension of the Metro L Line (Gold) further east from its current terminus at Pomona Bl and Atlantic Bl. Focused meetings will provide discussions on the East LA stations on November 15 and Montebello station on November 16. A corridor-wide update meeting will be offered on November 17. All meetings will be virtual via Zoom. To support the virtual meetings, outdoor 'Tech Booths' will be available and will be broadcasting the live meeting on site, offer free Wi-Fi internet and provide technical support. All safety protocols will be implemented during the 'Tech Booth' events. For full project information please visit metro.net/eastsidephase2.

2. Post as an event on your Nextdoor profile.
   a. Click on the "Post a message, event, poll or urgent alert" field on your profile.
   b. Select the "Event" tab
   c. Under the "Choose neighbors" option, select the second option to share with your community + nearby.
   d. For category, select "meetings"
   e. Text for event title: Metro is planning to extend the Gold Line to City of Whittier – Community Meetings will be held in November 2021.

   Text for event description: *See text included for Option 1 above.*

3. Distribute electronically via email or newsletter:

A. You can use the project image (LINK) to share meeting information with your contacts / membership. Link the image to the following LINK.

B. Or copy and paste the following text into the body of an email:

> *Metro is offering community meetings on November 15, 16 and 17 to provide an update and answer questions on the Eastside Transit Corridor Phase 2 project, an approximately nine-mile proposed extension of the Metro L Line (Gold) further east from its current terminus at Pomona Bl and Atlantic Bl. 6. **Posters –** 11" X 17" in size. Please contact Edna Jimenez via email at EJimenez@arellanoassociates.com or 909.627.2974 to request posters. Posters can be placed in your organization's public counter, news section or other high-foot traffic areas.

EASTSIDE TRANSIT CORRIDOR PHASE 2

Please Join us for community meetings on November 15 and 17, 2021.

Metro has a plan to extend the Metro L Line (Gold) further east from its current terminus at Pomona Bl and Atlantic Bl.

We will be hosting two virtual community meetings in November where we will provide:

> Updates on East LA stations options
> Overall project update
> Opportunity to ask questions

To support the virtual meetings, an outdoor tech booth will be available at the locations noted to the right and will be broadcasting the live meetings on-site, offer free Wi-Fi internet and provide technical support. All health safety protocols will be implemented during the tech booth events.

All Metro meetings are held in ADA accessible facilities. Other ADA accommodations and translations are available by calling 323.466.3876 or California Relay Service at 711 at least 72 hours in advance.

CORREDOR DE TRANSPORTE HACIA EL ESTE FASE 2

Acompáñenos a las reuniones comunitarias el 15 y 17 de noviembre de 2021.

Metro tiene un plan para extender Metro L Line (Gold) mas hacia el este de su terminal actual en Pomona Bl y Atlantic Bl.

Seremos anfitriones de dos reuniones de la comunidad virtual en noviembre donde brindaremos:

> Actualizaciones de las estaciones de East LA
> Actualización general del proyecto
> Oportunidad de hacer preguntas

Para proporcionar asistencia a la reunión virtual, habrá cabinas técnicas al aire libre en las ubicaciones que se indica a la derecha, que transmitirá las reuniones en vivo, ofrecerá acceso a internet Wi-Fi y proporcionará asistencia técnica. Todas las medidas de seguridad sanitaria se implementarán durante los eventos de las cabinas técnicas.

Todas las reuniones de Metro se llevan a cabo en instalaciones accesibles conforme la Ley Estadounidense para Personas con Discapacidades (American Disabilities Act, ADA) y por medio de transporte público. Adaptaciones necesarias conforme a la ADA y/o traducciones pueden solicitarse llamando al 323.466.3876 o al Servicio de Retransmisión de California al 711, por lo menos 72 horas de anticipación.

EASTSIDE TRANSIT CORRIDOR PHASE 2

Join us for a community meeting via Zoom on November 17, 2021.

Metro has a plan to extend the Metro L Line (Gold) further east from its current terminus at Pomona Bl and Atlantic Bl.

We're hosting a virtual community meeting on November 17 to share the latest project information and answer questions on the Eastside Transit Corridor Phase 2 Project. To support the virtual meeting, an outdoor tech booth will be available at the location listed to the right and will be broadcasting the live meeting on-site, offer free Wi-Fi internet and provide technical support. All health safety protocols will be implemented during the tech booth event.

All Metro meetings are held in ADA accessible facilities. Other ADA accommodations and translations are available by calling 323.466.3876 or California Relay Service at 711 at least 72 hours in advance.

CORREDOR DE TRANSPORTE HACIA EL ESTE FASE 2

Únase a nosotros para reuniones comunitarias a través de Zooml el 17 de noviembre de 2021.

Metro tiene un plan para extender Metro L Line (Gold) mas hacia el este de su terminal actual en Pomona Bl y Atlantic Bl.

Se llevará a cabo una reunión de la comunidad virtual el 17 de noviembre para conocer las ultimas actualizaciones y hacer preguntas sobre el Proyecto del Corredor de Transporte hacia el Este Fase 2. Para proporcionar asistencia a la reunión virtual, habrá una cabina técnica al aire libre en la ubicación que se indica a la derecha, que transmitirá la reunión en vivo, ofrecerá acceso a internet Wi-Fi y proporcionará asistencia técnica. Todas las medidas de seguridad sanitaria se implementarán durante los eventos de las cabinas técnicas.

Todas las reuniones de Metro se llevan a cabo en instalaciones accesibles conforme la Ley Estadounidense para Personas con Discapacidades (American Disabilities Act, ADA) y por medio de transporte público. Adaptaciones necesarias conforme a la ADA y/o traducciones pueden solicitarse llamando al 323.466.3876 o al Servicio de Retransmisión de California al 711, por lo menos 72 horas de anticipación.
