19.98.010 PURPOSE AND APPLICATION

The purpose of this chapter is to promote the economic recovery of oil, gas, and other hydrocarbon substances in a manner compatible with surrounding land uses and protection of the public health and safety by establishing reasonable limitations, safeguards, and controls on exploration, drilling, and production of hydrocarbon resources. The procedures and standards contained in this chapter shall apply to all exploration drilling and production activities related to oil, gas, and other hydrocarbon substances carried out in unincorporated Kern County.

19.98.020 UNRESTRICTED DRILLING

No review or permit shall be required for the drilling of any steam injection well, steam drive well, service well, or any well intended for the exploration for or development or production of oil, gas, and other hydrocarbon substances, or for any related accessory equipment, structure, or facility in the Exclusive Agriculture (A), Limited Agriculture (A-1), Medium Industrial (M-2), Heavy Industrial (M-3), or Natural Resource (NR) Districts, provided that:

A. All drilling installations and operations comply with the requirements of State law and with applicable fire and safety ordinances and regulations of the County of Kern.

B. Drilling shall not be commenced within one hundred (100) feet of any existing residence without the written consent of the owner thereof.

C. Signs shall be limited to directional, warning, and identification signs in connection with oil, gas, or other hydrocarbon drilling and development operations.

D. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

19.98.030 DRILLING BY MINISTERIAL PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil or gas or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in the Light Industrial (M-1) or Recreation-Forestry (RF) District until an application for plot plan review has been submitted to and approved by the Planning Director as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. In approving an application for plot plan review, the Planning Director may waive any standards set out in Section 19.98.050 of this chapter if he/she determines that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

19.98.040 DRILLING BY CONDITIONAL USE PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in any zoning district described in this title in which such uses are permitted as conditional uses until an application for a conditional use permit has been submitted to and approved by the Planning Commission as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the standards and procedures set out in Sections 19.102.130 through 19.102.180 and Chapter 19.104 of this title. In approving a conditional use permit, the Planning Commission may waive any condition set out in Section 19.98.050 of this chapter if it determines that such waiver will not result in material detriment to the public welfare or the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

C. If a producing well or service well is not completed upon land subject to a conditional use permit issued pursuant to this chapter and Chapter 19.104 of this title within twelve (12) months from the date of issuance of the permit, or within any extended period thereof, the conditional use permit shall expire and the premises shall be restored as nearly as practicable to their original condition. No permit shall expire while the permittee is continuously conducting drilling, redrilling, completing or abandoning operations, or related operations, in a well on the lands covered by such permit, which operations were commenced while said permit was otherwise in effect. Continuous operations are operations suspended not more than thirty (30) consecutive days. If, at the expiration of the twelve- (12-) month period, the permittee has not completed his drilling program on the lands covered by such permit, the Planning Commission may, upon a written request of the permittee, extend the permit for the additional time requested by permittee for the completion of such drilling program.

19.98.050 DEVELOPMENT STANDARDS AND CONDITIONS

All wells drilled, pursuant to Section 19.48.020 of this title and Sections 19.98.030 and 19.98.040 of this chapter, for the exploration for or development or production of oil, gas, and other hydrocarbon substances and related facilities and activities shall comply with the following standards, unless otherwise provided in this chapter:

A. No oil or gas well shall be drilled within one hundred (100) feet of any public highway or building not necessary to the operation of the well, or within one hundred and fifty (150) feet of any dwelling, or within three hundred (300) feet of any building used as a place of public assembly, institution, or school, or within fifty (50) feet of any building utilized for commercial purposes constructed prior to the commencement of such drilling, without the written consent of the owner of such structure.

B. All drilling and production activities shall conform to all applicable fire and safety regulations, and firefighting apparatus and supplies required by the Kern County Fire Department shall be maintained on the site at all times during drilling and production operations.

C. No signs, other than directional and warning signs and those required for identification of the well, shall be constructed, erected, maintained, or placed on the premises or any part thereof, except those required by law or ordinance to be displayed in connection with the drilling or maintenance of the well.

D. Sanitary toilet and washing facilities, if required by the Kern County Health Department or other governmental agencies, shall be installed and maintained in a clean and sanitary condition during drilling operations, and at such other times as specified by these agencies.

E. Proven technological improvements generally accepted and used in drilling and production methods shall be employed as they may become available if they are capable of reducing nuisances or annoyances.

F. All derricks, boilers, and other drilling equipment employed pursuant to this section to drill any well hole or to repair, clean out, deepen, or redrill any completed or drilling well shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derricks, boilers, and drilling equipment are to be used within a reasonable time, as determined by the Planning Director, for the drilling of another well or wells on the premises.

G. Within ninety (90) days after any well has been placed in production, or after its abandonment, earthen sumps used in drilling or production or both (unless such sumps are to be used within a reasonable time as determined by the Planning Director for the drilling of another well or wells) shall be filled and the drilling site restored as nearly as practicable to a uniform grade. Temporary earthen sumps may be used for cleanout or remedial work on an existing well or other production facility. However, these sumps shall be filled and the site restored as nearly as practicable to uniform grade within ninety (90) days after the cleanout or other remedial work is completed. Such restoration work shall comply with all applicable regulations of the California Division of Oil and Gas.

H. Any derrick used for servicing operations shall be of the portable type, provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable type derrick will not properly service such well, the Planning Director may approve the use of a standard type of derrick.

I. Whenever oil or gas is produced into and shipped from tanks located on the premises, such tanks, whenever located within five hundred (500) feet of any dwelling or commercial building, shall be surrounded by shrubs or trees, planted and maintained so as to develop attractive landscaping or shall be fenced in such a manner as to, insofar as practicable, screen such tanks from public view. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

J. Whenever a well is located within five hundred (500) feet from an existing dwelling unit, except in case of an emergency, no materials, equipment, tools, or pipe used for either drilling or production operations shall be delivered to or removed from the drilling site, except between the hours of eight (8:00) a.m. and eight (8:00) p.m., unless otherwise required by the California Division of Oil and Gas.

K. Pumping wells shall be operated by electric motors or muffled internal combustion engines.

L. The height of all pumping units shall not exceed thirty-five (35) feet and shall be painted and kept in neat condition.

M. All vehicle parking and maneuvering areas shall be treated and maintained with oiled sand or a similar dust binding material.

N. After production begins and a pump is installed on the wellhead, a fence at least six (6) feet in height shall be installed around the pump site or drilling island for public safety. This fence shall be constructed of chain link with wood or metal slats or other screening fence as may be approved by the Planning Director. This fencing and screening requirement shall apply only to those pump sites located within five hundred (500) feet of any dwelling. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

O. All required federal, State, and County rules and regulations shall be complied with at all times, including, but not limited to, the rules and regulations of the following agencies:

1. California Division of Oil and Gas

2. Kern County Fire Department

3. Kern County Health Department

4. Regional Water Quality Control Board

5. Air Pollution Control District

6. Kern County Engineering and Survey Services Department

19.98.060 PLOT PLAN REVIEW — CONDITIONAL USE PERMIT — APPLICATION CONTENTS

An application for plot plan review pursuant to Section 19.98.030 of this chapter and an application for a conditional use permit pursuant to Section 19.98.040 of this chapter shall include the following:

A. Name and address of the applicant

B. Name(s) and address(es) of the property owner(s)

C. Assessor's parcel number(s)

D. Legal description of the property

E. A plot plan or site development plan (in the case of a conditional use permit) drawn at the scale specified by the Planning Director, which includes the following information:

1. Topography and proposed grading

2. Location of all proposed well holes and related accessory equipment, structures, and facilities to be installed and any abandoned wells if such are known to exist

3. Location of all existing dwellings and buildings used for other purposes, located within three hundred (300) feet of the proposed well holes, identification of the use of each structure, and distances between well holes and existing buildings

4. North arrow

F. Narrative description of the proposed development, including:

1. Acreage or square footage of the property

2. Nature of hydrocarbon development activity

3. Description of equipment to be used

4. Distance to all existing buildings

5. Phasing or development schedule

19.98.070 PERMIT REVOCATION AND MODIFICATION

Any permit issued pursuant to this chapter may be revoked or modified pursuant to Section 19.102.020 of this title.

ADDENDUM

Board of Supervisors
Kern County Administrative Center
1115 Truxtun Avenue
Bakersfield, CA 93301

Oil and Gas Exploration and Production Permitting
(Fiscal Impact: None) All S.D.'s

Since the preparation of the Board Letter staff report, the Committee to Protect Farmland and Clean Water provided a letter dated December 7, 2012 with responses and requests for your Board to immediately refer to staff to start the process to amend the zoning ordinance to provide that in the A (Exclusive Agriculture) Zone District a Conditional Use Permit (CUP) would be required for oil well drilling. The letter offers a compromise position that a CUP would only be required if the surface owner and mineral rights owner, if a separate estate, do not have an agreement on how to proceed. This action would provide for Kern County to be lead agency for CEQA for those specific permits and involve a CEQA document, Planning Commission hearing and if appealed a hearing before the Board of Supervisors. The Committee proposes that this amendment be completed with a Mitigated Negative Declaration within 120 days of your referral. The letter also contains other assertions and representations that require clarification by staff for your Board's complete information.

The Committee is incorrect that such a change would only affect land outside the established boundaries of the oil fields and that as asserted on Page 1 and 2 "Natural Resource areas like Taft Midway, Kern River, Belridge, Elk Hills, etc., are <u>not</u> part of our proposed CUP and would not be affected." The Committee appears to believe that only agricultural land designated as Prime is designated in the zoning ordinance as A (Exclusive Agriculture). That is incorrect. In fact these established oil fields would be affected as 70% of the oil fields are zoned A (Exclusive Agriculture) with the rest being zoned A-1 (Limited Agriculture) which is inconsistent with the General Plan and must be rezoned to A during the next General Plan update.

Conditional Use permits have been required in other zones such as Residential (R-1, R-2, R-3 E) and Commercial zones (CO, C-1, C-2) since the beginning of zoning. Since 1957 the county has issued three Conditional Use permits in the residential zones for drilling and five Conditional Use Permits for Class II injection wells that were not associated with an oil

field operation. Staff notes the contrast with the fact that DOGGR averages over 1900 permits a year for oil field wells and injection wells in Kern County. The scope of the request, to add a Conditional Use Permit process, needs to be carefully considered in light of the directive from your Board to streamline process whenever possible.

Finally, Staff notes that the Committee appears to believe that meetings have been conducted between DOGGR, Oil and Gas Production representatives and the Planning Director that they have been excluded from. There have been no such meetings. The Planning Director is in discussions with DOGGR, agency to agency, first due to the lawsuit filed by the Sierra Club and then at the direction of your Board to understand the specific issues.

The Committee has raised the issue of "home rule' as mandating local control. For background the Home Rule resolution adopted by the Kern County Board of Supervisors in 1994 is attached. The Planning and Community Development Department is designated the Home Rule Coordinator and monitors State and Federal regulations to ensure they are not adversely affecting the businesses, environment and property of Kern County residents. The Committee is correct that decisions by DOGGR have adversely impacted the property of Kern County owners and it is appropriate for your Board to consider methods to ensure those protections. This needs to be done in conjunction with ensuring that regulations and permitting are coordinated and provide for economic stability for our largest employers; Oil and Gas Companies and Agriculture which produced a combined $ 32.9 billion of property tax revenue last year.

Your Board has indicated you wanted to be involved in Oil/Gas permitting and be a Lead Agency for a CEQA review of that activity. Staff is working on the details of such a proposal that would involve amending Chapter 19.98 Oil and Gas Production to include more development standards for such operations and that can include solutions for surface and mineral rights disagreements such as those already included in the Land Division Ordinance. Such a solution could include an appeal right to your Board. The amendment of the zoning ordinance is a project under CEQA and does require environmental review. Such a review could provide CEQA streamlining for the oil/gas activities, extensive development standards and requirements to address surface owners' issues and environmental mitigation. Given the size and scope of the oil activities it should not be done in a piecemeal fashion but comprehensively considered.

Your board has consistently sent the message that our zoning regulations need to be streamlined when possible, that what other counties do is not the standard if it constrains business and that economic growth needs to be balanced with environmental protection. Last year, your board removed the CUP requirement for solar projects that provide on-site power. This was a request of the agricultural industry and has provided for new growth in that sector.

The CUP's cited for agriculture are very limited and very specific and many other very intensive industrial uses such as poultry farms in specific areas of the county, animal products processing, fruit, vegetable and plant products cold storage, packing, canning and

shipping are all allowed with minimal development standards and no CUP. The issues raised are important and need to be addressed through a streamlined process, formulated through a public process, reviewed under CEQA and one that serves to enhance economic development not step back into a "California solution", i.e. lengthy public process on each well.

Staff requests direction and a continuance so that the very productive conversations with DOGGR, the Committee, other agricultural interests, and the Oil and Gas companies can be completed and a pathway provided to your Board in January, 2013.

Therefore IT IS RECOMMENDED that your Board 1) receive and file this report 2) provide direction and 3) continue to January 22, 2013.

Sincerely,

LORELEI H OVIATT, AICP, Director
Kern County Planning and Community Development Department

BEFORE THE BOARD OF SUPERVISORS

COUNTY OF KERN, STATE OF CALIFORNIA

In the matter of:

Resolution No. 94-664

RESOLUTION TO PROTECT HOME RULE AND ECONOMIC STABILITY OF THE COUNTY OF KERN AND PRIVATE PROPERTY RIGHTS OF ITS CITIZENS FROM ADVERSE ACTIONS BY FEDERAL AND STATE AGENCIES

Reference No. 9412079 (8887)

I, SUE DAVIS, Clerk of the Board of Supervisors of the County of Kern, State of California, hereby certify that the following resolution, on motion of Supervisor Shell, **seconded by Supervisor** Peterson, **was duly and regularly adopted by the Board of Supervisors of the County of Kern at an official meeting thereof on the** 6th **day of** December, **1994, by the following vote and that a copy of the resolution has been delivered to the Chairman of the Board of Supervisors.**

AYES: ASHBURN, AUSTIN, LARWOOD, PETERSON, SHELL

NOES: NONE

ABSENT: NONE

SUE DAVIS
Clerk of the Board of Supervisors
County of Kern, State of California

Nancy E. Cody
Deputy Clerk

BOARD OF SUPERVISORS KERN COUNTY, CAL

RESOLUTION

Section 1. WHEREAS:

(a) The Board of Supervisors and citizens of the County of Kern are concerned in the extreme about the adverse impacts on the economy, private property rights, resources, and land use within the County arising from certain regulatory and administrative practices by federal and state agencies in recent years; and

(b) Federal and state agencies have a legal and enforceable duty to observe the limitations placed on such agencies by the U.S. and California constitutions, including but not limited to, the taking of private property and private property interests for public use without just compensation in violation of the Fifth and Fourteenth Amendments of the U.S. Constitution, and the violation of the rights, privileges, and protections guaranteed to the citizens of Kern County by the U.S. Constitution and the federal and state Civil Rights Acts; and

(c) Federal and state agencies before taking certain governmental actions are required by law to comply fully with federal and state regulations that are promulgated to protect the due process rights, private property rights, economy, resources, and land use decisions of the County and its citizens; and

(d) In order to protect the due process rights, private property rights, economy, resources and economic stability of the County of Kern and it citizens, it is critical that federal and state agencies recognize and address the effects of any actions proposed within the County or concerning the land, private or public, within the County; and

(e) Under and by current law, such coordination and consideration of the County's interests and those of its citizens and property owners is required by the Federal Endangered Species Act of 1973, the National Environmental Protection Act, the National Forest Management Act, the Intergovernmental Cooperation Act, the Federal Land Policy and Management Act, the Federal Administrative Procedures Act, the California Endangered Species Act, State of California Public Resources Code, the California Environmental Quality Act, and numerous other federal and state statutes and administrative procedures; and

(f) There is serious concern among the citizens of the County that, in the past, the legally required process of notification, referral, and coordination of activities described above was not consistently followed by state and federal agencies, and that this disregard for due process and local citizen interests has resulted in federal and state action within the County that has been detrimental to the economic stability, private property interests, business activity, resources, and environment of the County of Kern and its citizens.

Section 2. NOW, THEREFORE, IT IS HEREBY RESOLVED by the Board of Supervisors of the County of Kern, State of California, as follows:

1. Federal and state agencies are herewith notified that the County of Kern and its citizens expect and require that federal and state officers and employees observe the limitations of the U.S. and California constitutions on governmental actions and that federal and state officers and employees follow the laws and regulations governing their agencies that guarantee to the citizens and property owners of Kern County due process, economic stability, public health, safety, local land use, and conservation of natural resources and the environment of the County of Kern, including its agricultural industry, oil industry, livestock grazing, water resources, mining of gold and other mineral resources, and outdoor recreation in scenic natural settings.

2. Federal and state agencies shall inform the County of Kern, or its designee(s), of all pending, contemplated or proposed actions affecting local communities, citizens, or affecting County policy, and shall, if requested by the County, coordinate the planning and implementation of those actions with the County or its designee(s). Such

notification shall include a detailed description of the proposed action, plan, procedure, rule, guideline, or amendment sufficient to fully inform lay persons of its intent and effects on the resources, environment, private property interests, and economic stability of the County of Kern.

3. The Kern County Board of Supervisors shall be consulted in accordance with the laws and regulations of the State of California and the United States regarding any pending, contemplated or proposed actions affecting local communities and citizens of the County.

4. All federal and state agencies shall, to the fullest extent permissible by law, comply with all applicable policies and procedures issued by the County of Kern.

5. When required by law or when requested by the County of Kern, all federal and state agencies proposing actions that may impact citizens of the County of Kern shall prepare and submit in writing, and in a timely manner as soon as is reasonable, report(s) on the purposes, objectives and estimated impacts of such actions, including environmental, health, safety, private property, and economic impacts, to the County of Kern and its citizens. Those reports shall be provided to the County of Kern for review and coordination with sufficient lead time for the County to prepare a meaningful response for consideration by the federal or state agency.

6. Before federal and state agencies take or adversely affect private property interests or alter land use(s), environmental review of the proposed action shall be conducted by the lead agency, and mitigation measures adopted in accordance with policies, practices, and procedures applicable to the proposed action and in accordance with all applicable federal, state, and local laws. Impact studies shall, as needed, address the effects on community and economic resources, the environment, public health, safety and welfare, private property, grazing rights, mining rights, flood prone areas and access and any other relevant impacts.

7. For the purpose of this Resolution, each federal and state agency shall, unless specifically authorized otherwise, give the required notice(s) to the County of Kern and the Board of Supervisors via certified mail as follows:

Clerk of the Kern County Board of Supervisors
1115 Truxtun Avenue, 5th Floor
Bakersfield, California 93301

8. Not less than 5 (five) complete copies of the written documents supporting the proposed action shall be provided to the Clerk of the Board of Supervisors at the above-referenced address in order that members of the Board of Supervisors, County staff, and the public shall have an opportunity to review and consider the documents.

9. Copies of these documents shall also be provided by the proposing agency for public review at the following location:

Resource Management Agency
2700 "M" Street, Suite 350
Bakersfield, California 93301

10. Notification of the availability of related documents shall be available for the minimum time set forth by the federal and state statute for such review or, if none is established by law, for a period of not less than 45 days prior to the proposed date of action, adoption or approval. This time is necessary to ensure adequate local opportunity for consideration and response.

11. Upon receipt of such notification and documents, the Clerk of the Board shall list the notification and related materials on the next Board of Supervisors public agenda correspondence list. This list shall be available at the Clerk of the Board's office, 1115 Truxtun Avenue, 5th Floor, Bakersfield, California, 93301.

12. Any citizen or group claiming to be affected by any pending, contemplated, or proposed action of any federal or state agency where a decision or comment upon such action is within the subject matter jurisdiction of the Board of Supervisors is encouraged to present relevant information to the Board. The Board shall consider such information and, where appropriate, shall convey such information to the particular federal or state agency for consideration as an official statement(s) of the County of Kern.

13. The Board of Supervisors may designate one or more members of its staff, and one or more citizens, to receive, review, and comment upon any pending, contemplated, or proposed action of any federal or state agency, or any related information and may request that such designee(s) report back to the Board.

14. If any part of this Resolution shall be held void by a court of competent jurisdiction, such part shall be deemed severable, and the invalidity thereof shall not affect the remaining parts of this Resolution.

15. The Clerk of this Board shall cause a copy of this Resolution to be forwarded to the following:

U.S. Dept. of Fish and Wildlife
U.S. Dept. of Agriculture, Forest Service
U.S. Dept. of Interior, Bureau of Land Management
California Dept. of Fish and Game
County Counsel
County Administrative Office
Resource Management Agency

And be it further resolved that copies of this Resolution shall be distributed to all Members of the Legislature, the Congress, all California Counties, and Kern County Lobbyists.

Re: Oil & Gas Exploration and Production Permitting
County Staff Report Dated December 11, 2012

To Board of Supervisors,

Please accept this letter as our support of Staff's Recommendation to continue to January 22, 2013 the Oil & Gas Exploration and Production Permitting process.

We would also request that as staff receives additional information such as studies, data and letters that we be provided copies. We would like to be informed as information is received so that we can meaningfully participate with the County, Stakeholders, and the Committee to Protect Farmland and Clean Water.

We would also ask to be included in all future stakeholder meetings. We are committed to work with staff and all stakeholders to come up with a mutually agreed upon solution or process.

Thank you for allowing us to submit this letter of support and we look forward to working together for the betterment of our community.

Sincerely,

KERN COUNTY BOARD OF SUPERVISORS

Re: **Oil and Gas Exploration and Production Permitting**
County Planning Staff Report dated December 11, 2012

To Board of Supervisors:

This letter is submitted in support of Staff's Recommendation to continue the above-mentioned matter to the January 22, 2013 Board meeting.

As a concerned member of Kern County's agricultural community, we are striving to learn more about the issues and matters related to the coexistence of both the agriculture and oil & gas industries. We request that staff do everything they can to completely study the issues and receive input from all of the affected stakeholders. Bolthouse welcomes the opportunity to participate in this effort and is eager to join all those involved to obtain a better understanding of the issues before us.

Bolthouse is committed to working with all those involved to obtain the best possible solutions for both industries. We look forward to our continued involvement in this process and ask that we be included in all future correspondence and meetings. We appreciate this opportunity to offer comment.

Sincerely,

STEPHAN J. DeBRANCH
Vice-President of Development

Re: December 11, 2012, 9:00 am Meeting for Local Control

Dear Supervisor McQuiston,

As a member of the Committee to Protect Prime Farmland and Clean Water, my family and I personally would like to reach out and ask for your support this Tuesday at the Board of Supervisor's meeting for a positive vote to bring back local control over permitting of oil and gas drilling on our prime farmland. For generations, farm families have worked the ground they bought and paid for. We recognize the oil industry has certain rights to produce their mineral interest and we would like to work closely with them to allow both of our interests to co-exist and prosper. However, changes to the status are necessary in order to create a climate for a better relationship to take place on the surface.

I am passionate about this issue because as a third generation farmer in this County, we have worked long and hard and are very proud of the contributions Ag has made to provide food, fiber and jobs for this Community, State and Country. Please be assured this is not about one disgruntled land owner fighting against Big Oil. Our committee and its supporters today are made up of 59 farming entities and represent over 100,000 acres of prime farm ground within the County. These numbers are growing by the day, which is an indication that there are many concerned about this issue.

This issue has festered too long and is causing divisiveness among two of our most vital economic engines – Oil and Ag. It is time to update a policy made many years ago, and make that policy address the current day situation.

We believe the State Department of Oil and Gas (DOGGR) have let our County down by not providing proper oversight with respect to allowing permits for drilling in our County. This practice has left all of us in our community vulnerable to many unintended consequences beyond our control. It is not only putting our prime farmland at risk, but our groundwater supply as well.

I would like to thank you for your long and dedicated service to our community. As a member of the Kern County Board of Supervisors, you have been a trusted advocate of many issues that were important to me and other constituents in your District. As you prepare to leave office please consider as one of the last votes you make to allow us to control our own future and lay the ground work for our community to thrive and prosper.

Sincerely,

Keith Gardiner

Re: December 11, 2012, 9:00 a.m. Meeting to Make Kern County the Lead Agency in Exclusively Agricultural Zoned Districts

Members of the Board:

Several Supervisors have asked our Committee to put in writing exactly what we wish to accomplish at the December 11, 2012 meeting and to respond to any statements made by staff after the public presentation was closed at the November 13 meeting.

We believe the best way to accomplish the request of the Board is to first lay out exactly what needs to be done, how it needs to be done and why it needs to be done through a series of questions and answers, the questions being those presented by various staff and legislators to our proposal.

The proposal we are putting before the Board of Supervisors on December 11 is a compromise tailored only to protect the interests of our exclusive agricultural district. We have limited this request to bring back the lead agency to exclusively agricultural districts because it has the least impact on oil operations and serves the purposes of our committee.

We have received comments from some oil interests that if we are going to bring back the lead agency, it should be in all districts, not just exclusively agricultural districts. That is not our proposal but one the Board could take under consideration, if you choose, by amending the zoning code to require a conditional use permit on all oil and gas activities. Our Committee believes that would be an overkill and detrimental to the economic welfare of our community, and we are not, therefore, proposing such action. We are not asking for a CUP in any of the established oil fields outside of the exclusive agricultural district. Natural resource areas like

Taft Midway, Kern River, Belridge, Elk Hills, etc. are not part of our proposed CUP and would not be affected.

We insert and attach herewith a copy of Chapter 19.98 of the Kern County zoning ordinance concerning oil and gas production (Exhibit "A"). You will note that under section 19.98.020, Unrestricted Drilling, all that needs to be done to bring the lead agency back to Kern County in exclusive agricultural zoned districts is to strike the words "exclusive agriculture (a)" as we have done on the enclosed sample. With that minor modification to the zoning law and conforming it to the exclusive agricultural section, a conditional use permit would be required in order to drill and put in auxiliary operations in exclusive agricultural areas.

By making these very simple changes to the land use law of the County of Kern, local control, also known as "home rule," is brought back to Kern County simply and swiftly. We would recommend that the County provide a provision in the ordinance where a conditional use permit is not necessary in an exclusively agricultural district if the surface owner signs a waiver of the conditional use permit and the applicant or operator agrees to defend and indemnify the County of Kern should the County be sued based on another lead agency, i.e. DOGGR's, inadequate environmental studies.

This proposal can be turned into a draft ordinance to be presented to the Board of Supervisors at their December 18 meeting whereby the Board can instruct the staff to begin the process for adopting the ordinance with the changes recommended. What we need on December 11 is a vote to instruct the staff to start on the proposal we are submitting and accomplish it as quickly as is feasible.

It was quite clear at the November 13, 2012 Board of Supervisors meeting that the Board directed staff to come back with a proposal and method to bring back local agency status for environmental studies. We quote from the four supervisors who spoke to the matter as follows:

Supervisor Maggard:

> "I'd like to clarify, and have there be no question about, when we meet on the 11th, the issue of our being the lead agency, and can we – I believe we can – be the lead agency, and whatever process follows. Whether that be full blown CEQA, whether that be just a modification of some zoning ordinances, or whatever that is, we can perform the role of being lead agency. So I would like you to lay out for us, on the 11th, what our options and alternatives might be as we move forward as the lead agency, and whether or not that requires any action by us to step into that role."

Supervisor Watson:

> "Thank you Mr. Chairman. Mr. Martin and Supervisor Maggard both touched on a question I had, and that is, why do we need to wait for the oil industry to make a

> decision for us to become the lead agency? And what is required for us to take the simple act of declaring ourselves or making ourselves the lead agency, and how fast can that happen? I know there are a lot of other things that get involved in that process, but I think merely doing what the law intends us to do, and that is to make many of these decisions in Kern County. It seems to me that we have to be able to claim that status and then work from there rather than wait for anybody to make that decision for us and tell us how we are going to do that."
>
> Supervisor McQuiston:
>
> "I think we have to [bring back the lead agency], and I think it would really be great if we were prepared to make some decisions on the 11th in terms of how we might want to structure and implement it and so forth. But in terms of the decision, I think we must move toward local permitting with respect to oil and gas."
>
> Supervisor Goh:
>
> "Thank you Chairman. I just want to reiterate that I do believe it's important for our Board to make these land use decisions and take that responsibility locally."

From the above, we think it is quite clear that the intention of the Board of Supervisors was on December 11 to start the process to bring back lead agency authority to Kern County regarding oil and gas extraction. Our Committee has laid out the above proposal for bringing back lead agency authority over the oil industry in exclusive agricultural zones.

At a meeting held at the P Street County facility on November 26, 2012, facilitated by the Kern County planning director and assistant County counsel, we were asked questions about our proposal, listened to concerns from the oil industry, and at the end of the meeting, asked for any proposals anyone else had. There were none. Since November 26, 2012, we have met with various oil interests and trade groups in person, by phone and in correspondence. Other than wanting to maintain status quo, we have had no proposal from anyone to bring back local decision making through lead agency status regarding the oil industry.

Supervisor Maggard was quite clear at the November 13, 2012 meeting that he expected to see an application for a zone change from the oil industry by December 11 if they were serious about going forward with that application. We have been hearing that the oil industry was going to step up and re-do the zoning laws at their expense for many, many months, and we have seen no such attempt, nor do we expect to.

> Supervisor Maggard to the planning director:
>
> "So if we need to hand them a piece of paper and say, 'Specify what you're asking us to do and sign it and give it back to us,' then let's see if we can get that done by the 11th. Because there should be no confusion about that. Every bit of

> my understanding of what they are asking us when they were here last week was to do that very thing. So I think we should move forward under the full understanding that that's what they ask us. So we'll respond accordingly. So, I guess enough has been said for now, but I don't know how else to, is there any other conceivable purpose that they came to speak to us?"

So what the Board is faced with on December 11 is that our committee has given you a specific, quick, and inexpensive way to bring back lead agency status to Kern County in the least disruptive manner to the current practice as possible. Your Board was not asking at the November 13, 2012 meeting about how to further regulate the oil industry and make extensive zoning changes, but rather you were asking staff to find a pathway to bringing back lead agency status quickly. We have given you that pathway.

At this time, we would like to ask you to consider questions presented in individual meetings by various supervisors and our answers to those questions so that all the supervisors will know how we responded. If there are still further questions, we of course stand ready to answer those. Please call or email me at your convenience.

Question: Staff maintains that the County of Kern never gave up its land use authority over acting as lead agency for environmental studies.

Answer: Staff and we are saying the same thing, but the words used are different. When the County gave up its right to permit through its zoning laws, which are land use laws, it gave up its right to be the lead agency. That is unquestionable. We sincerely doubt that the Board of Supervisors intended the consequences of that land use decision since CEQA had not been enacted. The simple change that our Committee is requesting of the County's land use ordinance will make the County the lead agency for CEQA.

Question: County counsel on November 13 inferred that there was a restriction on the County's ability to study the environmental effects of down hole operations, even if the County had lead agency status. So isn't the County preempted by State law in studying many of the effects of the drilling operation? In other words, should not DOGGR actually be the lead agency for oil and gas operations?

Answer: County counsel is mistaken as to the pre-emption of environmental studies of down hole operations. We attach hereto the Attorney General's opinion that County counsel cited as legal authority for the proposition that down hole operations have been preempted (Exhibit "B"). Attorney General opinions are not law. They are just what they are called: opinions. And when cited by a Court as secondary authority, they become law, not the other way around. The attorney general's opinion cited by County counsel is a 1976 opinion given to various agencies, which has never been cited by any Court. It is not law, but a guideline to agencies. The opinion actually supports the Committee's position that environmental studies, regardless of whether they are above the ground or below the ground have not been pre-empted by the state of California, and a County is the general jurisdiction for studying those issues when it is the lead agency. What the County cannot do that is relegated to the sole authority of

DOGGR is make "field rules" and determine what operators must do to keep from encroaching on other operators' mineral rights and zones of production. The methodology of drilling a well is not something that the County of Kern needs to be concerned with, but the environmental impact of the drilling materials and the effects on the environment are something very much within the realm of study by the County of Kern.

Question: County counsel on November 13 stated that there are very specific protocols on who can be the lead agency under the CEQA guidelines, so are you sure we would be the lead agency even if we passed the ordinance that you request?

Answer: Actually, what I believe Counsel is referring to is Public Resources Code section 15051, which we attach hereto (Exhibit "C"). With the changes our Committee is requesting, the County has general jurisdiction as opposed to specific jurisdiction and would therefore be the lead agency rather than DOGGR.

Further, "field rules" are not CEQA vetted, and the public is not permitted to be involved, including the landowner, and therefore "field rules" do not take the place of the environmental studies done under CEQA.

Question: Isn't adding a conditional use permit another form of duplicative regulation on the oil industry?

Answer: Certainly not. The oil industry is required to have conditional use permits throughout the State of California and even in Kern County. The conditional use permit being added to exclusively agricultural zoning is a matter of bringing the lead agency back to Kern County where it belongs. Failure to require a conditional use permit as we have requested is giving up the County's jurisdiction over that part of its land use laws that enable it to be the lead agency for environmental studies. What seems to be missing is the complete understanding of the word "exclusive" in "exclusive agricultural zoned district." If the oil operators wish to drill in exclusive agricultural zoning areas, they should get a conditional use permit if they cannot get a waiver from the surface owner. They are in agriculture's district. This is not a question of agriculture trying to go into a mineral resources zoned area, but rather one where oil and gas wish to do extensive drilling operations in exclusively agricultural areas.

Question: Isn't the addition of a conditional use permit a way to allow the surface owners to extract money from the oil producers?

Answer: No. If the oil producer believes that the surface owner is asking for inappropriate remuneration, information or accommodation, the oil producer can file for the conditional use permit and the planning commission and/or this Board will decide what the conditions will be, not the two parties. This process goes on constantly with conditional use permits. This Board has recently heard conditional use issues involving many much more minor accommodations, including the recent Talladega Frights Halloween operation. Nothing we are asking is unheard of or uncommon in Kern County or any other county. The environmental studies triggered by a conditional use permit would have to be done even if there was not a

conditional use permit requirement. The difference is they would be done by DOGGR instead of our local planning department, and that is the only difference.

Question: Why not wait for the oil companies to come up with a plan to amend the zoning ordinance as the planning director has suggested?

Answer: We have no problem with the oil companies amending the zoning ordinance, but that does not bring back the lead agency status as quickly as a conditional use permit does. Amending the zoning ordinance without a discretionary permit does not accomplish what this Board told staff they wanted to accomplish. You can add the conditional use permit by ordinance, and the oil industry can work on its zone changes that it wishes the Board to consider. These two actions are separate. We are not going to wait for another 18 months or two years while oil producers "drill by right" on our land.

Question: Why such an urgency to amend the ordinance and bring back the lead agency in exclusively agricultural zoning?

Answer: There is a tremendous oil boom taking place in exclusive agricultural districts because of the Monterey shale find. Every month that goes by, more oil and gas infrastructure is replacing our precious farmland with little or no consideration for making that infrastructure compatible for generations of farming to come. Further, because of DOGGR's lack of expertise and, by its own admission, lack of resources, it has failed to perform its duty as the lead agency which has resulted in litigation costly to the County of Kern. The County of Kern has been sued on one lawsuit brought by the Sierra Club, and since we are not a party of that lawsuit, we do not know what the final outcome will be as far as whether the County of Kern will end up owing attorneys' fees which would be paid out of the general fund. We do know that DOGGR has written a letter admitting that they were improperly giving categorical exemptions and retroactively voided the permit they gave in that case. Attached hereto is the letter from DOGGR to the oil company in question (Exhibit "D"). As it stands, the County does not have a mechanism to be defended and indemnified when they get sued on these actions when DOGGR fails to follow the law. Obviously, when Kern County knows that DOGGR is not following that law and, as a responsible agency, does nothing about it, the County will continue to get sued much more frequently. Why should the County put its taxpayers hard earned money at risk because they cannot be defended and indemnified for actions done by a State agency? It is critical to quickly enact this ordinance, taking back the lead agency in exclusively agricultural zones and requiring a defense and indemnity by the oil producer whether a CUP is required or not.

Question: At the November 13 Board meeting, the planning director stated that it would cost $5 million and take 18 months to process an EIR necessary to change the zoning and permitting laws the way the oil companies want it changed. Why should the County spend $5 million and that time if the oil companies are willing to pick up the tab?

Answer: The planning director's comments to the Board on November 13 had nothing to do with our pathway to the County obtaining the lead agency. Our pathway is a

simple ordinance change to the land use laws and not a revamping of the permitting and zoning laws for oil and gas exploration. If the oil and gas industry wishes to put forth a proposal to add to the zoning laws and regulations that regulate them, then certainly they can do that, but that is not inconsistent with passing the ordinance that we are requesting.

Question: What would the cost and timeline be to do what your Committee is requesting, and who would pay for it?

Answer: We believe the cost would be less than $5,000 and that the ordinance could be drafted, approved and put into effect in less than 120 days. The ordinance can be done with a negative declaration under CEQA since there are no environmental impacts to adding a conditional use permit in the exclusive agricultural zones. The County would pay for the cost of preparing the ordinance, and it could be paid by the general plan surtax, which developers pay into the County fund. This is the same method used by the County to do County instigated specific plans. Our pathway is simple, fair, cost-effective and timely. It also adds an element of protection from lawsuit costs that the County simply does not have at this time.

Question: Shouldn't we wait and more thoroughly consider the unintended consequence of taking back lead agency status?

Answer: No. This has been studied, including the idea of a CUP for almost a year.

The only unintentional consequence argument that is mentioned is that the oil industry will punish agriculture through its friends in Sacramento if this CUP requirement is passed. That is not a reason to give up our rights in Kern County.

More importantly, we may not have thought of every unintended consequence of "home rule," but our clients know the direct consequences to their land and their rights by allowing oil producers to drill with no meaningful environmental safe guards or proper planning.

Question: The oil industry is important to jobs in Kern County. Won't bringing back lead agency status to Kern County threaten jobs and slow down projects?

Answer: "Home rule" does not threaten jobs at all. It is just a decision of who does the environmental review. We respectfully submit that now that the governor has squeezed the oil industry for money to pass Proposition 30 that the oil industry will soon be glad Kern County is the lead agency instead of DOGGR.

Our Committee is not asking to change or add any regulations on drilling in Kern County. All we are asking is to remove the "drill by right" in only exclusively agricultural districts if, and only if, the operator does not have a waiver of objection to the project by the surface owner (farmer) when the operator does not own the surface.

Please note that all we are considering is the exclusive agricultural district zoning. Why is it hard to understand what the words "exclusive agricultural district zoning" means? Exclusive means exclusive. Agriculture is not asking to go into natural resources areas, and we are not asking for a CUP in those established fields. Oil is asking to come into our exclusively zoned area, and we are asking that if they do not have a waiver from the farmer or surface owner that they get a conditional use permit to operate in our exclusive agricultural zones. The oil industry already, in many instances, gets a conditional use permit. This is not something new and it is not something that is going to destroy the industry, but failure to allow agriculture to be a voice in the conditions to put on drilling in exclusive agricultural areas could lead to the destruction of the finest farmland in the world.

If, and only if, the oil company felt the farmer was being unreasonable would they need to file a conditional use permit and bring the matter to the planning commission and this Board. This process leads to a serious meet and confer between the mineral rights owners and the land owners, which will bring about cooperation and communication before drilling. This leads to self-regulation and better planning for the benefit of both industries who have vested interest in one piece of land.

The overwhelming amount of oil production in Kern County is not in "exclusive agricultural districts" and would not be affected by the ordinance in anyway. And then even in an exclusive agricultural district, a CUP would only be required if a waiver could not be obtained from the surface owner. We have been very cognizant of the need to balance the equities without taking a bazooka to the oil industry by purposely limiting the discretionary permit only to exclusive agricultural areas.

Our Committee is not asking for any new zone changes. None. We are not asking for any new regulations. None. What we are asking is for the oil producers on our land to consider the environmental and planning issues in advance along with us and to satisfy the mutual interests of the mineral rights owner and the surface owner, or to go through the CUP process. Without this process, the best agricultural land in the world will disappear before our eyes. It does not have to be that way. If oil producers have to consider the interests of the farmer and work out a plan so that the oil producers can extract their oil with minimum damage to the farms, the process, for the most part, will become cooperative, informative and self-regulating. The County's assistance through the CUP process would only be necessary if and when the farmer and oil could not agree. We believe this would be relatively infrequent, if at all. We have been attempting to have this conversation with the oil industry, and we have met separately and with the planning director. We have asked what proposals they might have that would solve the obvious conflict between some members of agriculture and some members of oil. We have received no meaningful suggestions. The County has received no application to make changes as the oil industry has no intention of paying for any environmental work that would properly protect one of our greatest assets, our prime agricultural land. We have been delayed for almost a year in any progress while wastewater disposal wells, tank farms, exploratory wells, etc. have been placed on our land with no environmental studies. In those cases where environmental studies have been done, they have been inadequate and illegal.

If we do not get this ordinance passed quickly, then the County will be subjected to many more lawsuits because DOGGR does not properly apply the laws of the State of California regarding environmental studies. If our County government refuses to quickly take back lead agency status swiftly, our Committee will have to ask the County for the protection it deserves.

We would now like to respond to the request to continue by the County Planning Department. (See proposed motions, Exhibit "E").

Your planning director has stated that we cannot achieve lead agency by our proposed pathway because of legalities and that our pathway is inequitable. We have asked for the legal authority for why we cannot proceed as we propose.

We will tell you what is inequitable, and that is all of the conditional use permits required of the agriculture industry in an exclusive agricultural zone (see Exhibit "F") while multimillion dollar industrial and environmentally damaging infrastructure does not need any permits to drill away in our agricultural zones. Please take time to review Exhibit "F," CUP requirements for agriculture in its own exclusive zone. To name a few agricultural uses that need a CUP in exclusive agricultural zones – cattle or livestock feed lots, commercial poultry farms, hog farms and ranches, contract harvesting, creameries, dairies, fertilizer manufacture, and wineries.

Our planning director believes it inequitable to require a CUP in exclusive agricultural zones for industry that is industrial in nature, uses very toxic and damaging materials, high pressure pipelines, discharges wastewater, constructs tanks farms, and sends flares burning in agriculture's orchards.

The only proposal to bring back lead agency status was the one submitted by our Committee. Shockingly, the planning director asserts in her request for continuance that our proposal would call for a full EIR with much expense. We attach hereto as Exhibit "G" the CEQA Environmental checklist that is to be used in assessing whether or not a negative declaration is permissible when enacting a discretionary ordinance. The test is whether there is an environmental impact, and there is none. The Board can go through the checklist itself and answer the questions. It is very simple. Who would oppose a negative declaration on a simple amendment to add a CUP?

The planning director next states that "while the proposal [by the Committee to Protect Farmland and Clean Water] provides a focused solution to this one issue, bringing back lead agency authority to the County, it does not address all the issues that have been discussed with staff by DOGGR for permitting and CEQA and provides an unequal negotiating context for the surface and mineral owners."

The Board has never been informed, that we know of, what the discussions between DOGGR, the planning department and the oil industry pertain to. Our organization certainly is excluded. Whatever issues DOGGR and the oil industry have going forward with

permitting and CEQA, that should be entirely separate from the ordinance that our organization is proposing.

The planning director then states that our proposal would "provide unequal negotiation context for the surface and mineral owners." Let us be clear – our organization does not care whether there is a surface objection waiver or not. We put that proposal on the table to limit the amount of work for the County when there was no dispute. That is for the benefit of the oil industry and the County, not the surface owner. We only request a conditional use permit, but we are willing to compromise with the surface waiver language. Further, if the planning director has another type of discretionary permit that would bring back lead agency, please tell us.

The planning director also states:

> "It [the Committee to Protect Farmland and Clean Water] exposes the County to potential significant monetary taking claims if a conditional use permit was denied for the mineral owner and provides the opportunity for significant, costly litigation over the final decision and resulting lengthy delays in oil activities."

This is almost an outrage that it would even be raised and shows that the planning director and assistant County counsel, who raised the same issue at the one and only meeting between the oil industry and ourselves, is merely attempting to block bringing back "home rule." There is absolutely no chance that the conditional use permit would be a taking because it does not ban drilling, it merely puts conditions that this Board would feel necessary on the drilling activities. That is "home rule."

At this very moment, the oil industry is scheming with its money buddies in Sacramento to eliminate this County's "home rule" regarding environmental issues.

The oil industry knows that, your planning director knows that, and if you did not, now you know it.

The oil industry has aided and abetted in, at least, a civil conspiracy to intentionally violate the environmental laws of the State of California and the federal government.

The oil industry in the last session tried to eliminate CEQA for oil drilling, defeated a bill to simply require oil companies to notify DOGGR if they are fracking a well, defeated a bill to tell a homeowner if they were fracking near their home (horizontal fracks can extend up to 9000 feet), etc.

The oil industry has known, as has DOGGR, that they need to do Environmental Impact Reports on their fields and still have failed to do so. Now they want to have the County not take back lead agency status while they consider doing what Aspen Consulting told them was needed a decade ago (see Exhibit "H").

Your planning director is asking for a continuance until late January, 2013, to report back on progress on a pathway that by her own admission would stall taking back the lead agency status into 2015 or move to 2016.

It also gives your planning director and the oil industry a chance to deal with three new Board members in blocking the efforts to bring back lead agency status to Kern County.

What we need from the planning director is a way to bring back lead agency status quickly. That is what you asked for at the last meeting.

Very truly yours,

George F. Martin, on behalf of
The Committee to Protect Farmland
and Clean Water

EXHIBIT A

CHAPTER 19.98

OIL AND GAS PRODUCTION

SECTIONS:

19.98.010 PURPOSE AND APPLICATION
19.98.020 UNRESTRICTED DRILLING
19.98.030 DRILLING BY MINISTERIAL PERMIT
19.98.040 DRILLING BY CONDITIONAL USE PERMIT
19.98.050 DEVELOPMENT STANDARDS AND CONDITIONS
19.98.060 PLOT PLAN REVIEW — CONDITIONAL USE PERMIT — APPLICATION CONTENTS
19.98.070 PERMIT REVOCATION AND MODIFICATION

19.98.010 PURPOSE AND APPLICATION

The purpose of this chapter is to promote the economic recovery of oil, gas, and other hydrocarbon substances in a manner compatible with surrounding land uses and protection of the public health and safety by establishing reasonable limitations, safeguards, and controls on exploration, drilling, and production of hydrocarbon resources. The procedures and standards contained in this chapter shall apply to all exploration drilling and production activities related to oil, gas, and other hydrocarbon substances carried out in unincorporated Kern County.

19.98.020 UNRESTRICTED DRILLING

No review or permit shall be required for the drilling of any steam injection well, steam drive well, service well, or any well intended for the exploration for or development or production of oil, gas, and other hydrocarbon substances, or for any related accessory equipment, structure, or facility in the ~~Exclusive Agriculture (A~~), Limited Agriculture (A-1), Medium Industrial (M-2), Heavy Industrial (M-3), or Natural Resource (NR) Districts, provided that:

A. All drilling installations and operations comply with the requirements of State law and with applicable fire and safety ordinances and regulations of the County of Kern.

B. Drilling shall not be commenced within one hundred (100) feet of any existing residence without the written consent of the owner thereof.

C. Signs shall be limited to directional, warning, and identification signs in connection with oil, gas, or other hydrocarbon drilling and development operations.

D. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

19.98.030 DRILLING BY MINISTERIAL PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil or gas or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in the Light Industrial (M-1) or Recreation-Forestry (RF) District until an application for plot plan review has been submitted to and approved by the Planning Director as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. In approving an application for plot plan review, the Planning Director may waive any standards set out in Section 19.98.050 of this chapter if he/she determines that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

19.98.040 DRILLING BY CONDITIONAL USE PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in any zoning district described in this title in which such uses are permitted as conditional uses until an application for a conditional use permit has been submitted to and approved by the Planning Commission as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the standards and procedures set out in Sections 19.102.130 through 19.102.180 and Chapter 19.104 of this title. In approving a conditional use permit, the Planning Commission may waive any condition set out in Section 19.98.050 of this chapter if it determines that such waiver will not result in material detriment to the public welfare or the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

C. If a producing well or service well is not completed upon land subject to a conditional use permit issued pursuant to this chapter and Chapter 19.104 of this title within twelve (12) months from the date of issuance of the permit, or within any extended period thereof, the conditional use permit shall expire and the premises shall be restored as nearly as practicable to their original condition. No permit shall expire while the permittee is continuously conducting drilling, redrilling, completing or abandoning operations, or related operations, in a well on the lands covered by such permit, which operations were commenced while said permit was otherwise in effect. Continuous operations are operations suspended not more than thirty (30) consecutive days. If, at the expiration of the twelve- (12-) month period, the permittee has not completed his drilling program on the lands covered by such permit, the Planning Commission may, upon a written request of the permittee, extend the permit for the additional time requested by permittee for the completion of such drilling program.

19.98.050 DEVELOPMENT STANDARDS AND CONDITIONS

All wells drilled, pursuant to Section 19.48.020 of this title and Sections 19.98.030 and 19.98.040 of this chapter, for the exploration for or development or production of oil, gas, and other hydrocarbon substances and related facilities and activities shall comply with the following standards, unless otherwise provided in this chapter:

A. No oil or gas well shall be drilled within one hundred (100) feet of any public highway or building not necessary to the operation of the well, or within one hundred and fifty (150) feet of any dwelling, or within three hundred (300) feet of any building used as a place of public assembly, institution, or school, or within fifty (50) feet of any building utilized for commercial purposes constructed prior to the commencement of such drilling, without the written consent of the owner of such structure.

B. All drilling and production activities shall conform to all applicable fire and safety regulations, and firefighting apparatus and supplies required by the Kern County Fire Department shall be maintained on the site at all times during drilling and production operations.

C. No signs, other than directional and warning signs and those required for identification of the well, shall be constructed, erected, maintained, or placed on the premises or any part thereof, except those required by law or ordinance to be displayed in connection with the drilling or maintenance of the well.

D. Sanitary toilet and washing facilities, if required by the Kern County Health Department or other governmental agencies, shall be installed and maintained in a clean and sanitary condition during drilling operations, and at such other times as specified by these agencies.

E. Proven technological improvements generally accepted and used in drilling and production methods shall be employed as they may become available if they are capable of reducing nuisances or annoyances.

F. All derricks, boilers, and other drilling equipment employed pursuant to this section to drill any well hole or to repair, clean out, deepen, or redrill any completed or drilling well shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derricks, boilers, and drilling equipment are to be used within a reasonable time, as determined by the Planning Director, for the drilling of another well or wells on the premises.

G. Within ninety (90) days after any well has been placed in production, or after its abandonment, earthen sumps used in drilling or production or both (unless such sumps are to be used within a reasonable time as determined by the Planning Director for the drilling of another well or wells) shall be filled and the drilling site restored as nearly as practicable to a uniform grade. Temporary earthen sumps may be used for cleanout or remedial work on an existing well or other production facility. However, these sumps shall be filled and the site restored as nearly as practicable to uniform grade within ninety (90) days after the cleanout or other remedial work is completed. Such restoration work shall comply with all applicable regulations of the California Division of Oil and Gas.

H. Any derrick used for servicing operations shall be of the portable type, provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable type derrick will not properly service such well, the Planning Director may approve the use of a standard type of derrick.

I. Whenever oil or gas is produced into and shipped from tanks located on the premises, such tanks, whenever located within five hundred (500) feet of any dwelling or commercial building, shall be surrounded by shrubs or trees, planted and maintained so as to develop attractive landscaping or shall be fenced in such a manner as to, insofar as practicable, screen such tanks from public view. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

J. Whenever a well is located within five hundred (500) feet from an existing dwelling unit, except in case of an emergency, no materials, equipment, tools, or pipe used for either drilling or production operations shall be delivered to or removed from the drilling site, except between the hours of eight (8:00) a.m. and eight (8:00) p.m., unless otherwise required by the California Division of Oil and Gas.

K. Pumping wells shall be operated by electric motors or muffled internal combustion engines.

L. The height of all pumping units shall not exceed thirty-five (35) feet and shall be painted and kept in neat condition.

M. All vehicle parking and maneuvering areas shall be treated and maintained with oiled sand or a similar dust binding material.

N. After production begins and a pump is installed on the wellhead, a fence at least six (6) feet in height shall be installed around the pump site or drilling island for public safety. This fence shall be constructed of chain link with wood or metal slats or other screening fence as may be approved by the Planning Director. This fencing and screening requirement shall apply only to those pump sites located within five hundred (500) feet of any dwelling. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

O. All required federal, State, and County rules and regulations shall be complied with at all times, including, but not limited to, the rules and regulations of the following agencies:

1. California Division of Oil and Gas

2. Kern County Fire Department

3. Kern County Health Department

4. Regional Water Quality Control Board

5. Air Pollution Control District

6. Kern County Engineering and Survey Services Department

19.98.060 PLOT PLAN REVIEW — CONDITIONAL USE PERMIT — APPLICATION CONTENTS

An application for plot plan review pursuant to Section 19.98.030 of this chapter and an application for a conditional use permit pursuant to Section 19.98.040 of this chapter shall include the following:

A. Name and address of the applicant

B. Name(s) and address(es) of the property owner(s)

C. Assessor's parcel number(s)

D. Legal description of the property

E. A plot plan or site development plan (in the case of a conditional use permit) drawn at the scale specified by the Planning Director, which includes the following information:

1. Topography and proposed grading

2. Location of all proposed well holes and related accessory equipment, structures, and facilities to be installed and any abandoned wells if such are known to exist

3. Location of all existing dwellings and buildings used for other purposes, located within three hundred (300) feet of the proposed well holes, identification of the use of each structure, and distances between well holes and existing buildings

4. North arrow

F. Narrative description of the proposed development, including:

1. Acreage or square footage of the property

2. Nature of hydrocarbon development activity

3. Description of equipment to be used

4. Distance to all existing buildings

5. Phasing or development schedule

19.98.070 PERMIT REVOCATION AND MODIFICATION

Any permit issued pursuant to this chapter may be revoked or modified pursuant to Section 19.102.020 of this title.

ORDINANCE NO. G-299

AN ORDINANCE OF THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN, STATE OF CALIFORNIA, CONCERNING THE ADOPTION OF AN OFFICIAL LAND USE ZONING ORDINANCE FOR THE COUNTY OF KERN.

The following ordinance, consisting of three (3) sections, was duly and regularly passed and adopted by the Board of Supervisors of the County of Kern, State of California, at a regular meeting of the Board of Supervisors held on the 18th day of June, 1957, by the following vote, to-wit:

FILED

JUN 18 1957

ATTEST:

Vera K. Gibson

County Clerk and ex-Officio Clerk of the Board of Supervisors.

FILED

JUN 18 1957

VERA K. GIBSON Secretary Board Of Sanitation District

By W. R. Tebeau Assistant

THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN DOES ORDAIN AS FOLLOWS:

Section 1. This ordinance shall take effect and be in full force on and after the 18th day of July, 1957, and prior to the expiration of fifteen (15) days from the passage hereof shall be published once in The Bakersfield Californian, a newspaper of general circulation, published and printed in the County of Kern, State of California, together with the names of the members of the Board of Supervisors voting for and against the same.

Section 2. Chapters 1 and 2 of Division 1, Part 7 of the Ordinance Code of the County of Kern, consisting of Sections 7000 to 7117, both inclusive, are hereby repealed.

Section 3. Chapter 1 is hereby added to Division 1, Part 7 of the Ordinance Code of the County of Kern, commencing with Article 1, Section 7000, to read:

CHAPTER 1

OFFICIAL LAND USE ZONING ORDINANCE FOR THE COUNTY OF KERN

ARTICLE 1

PURPOSE OF CHAPTER

Section 7000. General Purpose. An Official Land Use Zoning Ordinance for the County of Kern is hereby adopted and established to serve the public health, safety, comfort, convenience and general welfare and to provide the economic and social advantages resulting from an orderly planned use of land resources, and to encourage, guide and provide a definite plan for the future growth and development of the County of Kern.

ARTICLE 2

DEFINITIONS

Section 7001. Definitions. This Chapter shall be known as the "Land Use Zoning Ordinance of the County of Kern".

For the purpose of this Chapter certain terms and words are defined as provided in the succeeding sections of this Article.

When not inconsistent with the context, words used in the present tense include the future, words in the singular number include the plural number and words in the plural number include the singular number and the masculine includes the feminine. The word "shall" is always mandatory and not merely directory.

Section 7002. Accessory Use. A use naturally and normally incidental to, subordinate to and devoted exclusively to the main use of the premises.

Section 7003. Accessory Building. A detached subordinate building, the use of which is customarily incidental to that of the main

building or to the main use of the land and which is located on the same lot with the main building or use.

Section 7004. Alley. A public way permanently reserved as a secondary means of access to abutting property.

Section 7005. Apartment Hotel. A building or portion hereof designed for or containing both individual guest rooms or suites of rooms and dwelling units.

Section 7006. Apartment House. A building, or portion thereof, designed for or occupied by three (3) or more families living independently of each other.

Section 7007. Automobile Service Station. A service station which supplies gasoline and Diesel fuel to motor vehicles, and including grease racks or elevators, wash racks or pits, tire repairs, battery servicing and repairing, ignition service, sales of motor vehicle accessories and other customary services for automobiles, but excluding painting, body work and steam cleaning.

Section 7008. Boarding and Rooming House. A building or portion thereof which is used to accommodate, for compensation, five or more boarders or roomers, not including members of the occupant's immediate family who might be occupying such building. The word "compensation" shall include compensation in money, services or other things of value.

Section 7009. Building. Any structure having a roof supported by columns or walls for the housing or enclosure of persons, animals, chattels or property of any kind.

Section 7009.1. Building Height. The vertical distance from the "Grade" to the highest point of the structure.

Section 7009.2. Building Site. The ground area of a building or group of buildings together with all open spaces as required by this Chapter.

Section 7009.3. Bungalow Court. A group of three or more detached one-story, one-family or two-family dwellings located upon a single lot, together with all open spaces as required by this Chapter, but not including motels.

Section 7009.4. Carport. A permanent, roofed structure with not more than two enclosed sides and which is used or intended to be used for automobile shelters and storage.

Section 7009.5. Church. A building, together with its accessory buildings and uses, where persons regularly assemble for worship, and which building, together with its accessory buildings and uses, is maintained and controlled by a religious body organized to sustain public worship.

Section 7009.6. Club. An association of persons, whether incorporated or unincorporated, for some common purpose but not including groups organized primarily to render a service carried on as a business.

Section 7009.7. Dwelling. A building or portion thereof designed for or occupied for residential purposes, including one-family, two-family and multiple dwellings, but not including hotels, motels, boarding and lodging houses and trailers.

Section 7009.8. Dwelling, One Family. A detached building designed for or occupied exclusively by one (1) family.

Section 7009.9. Dwelling, Two-Family. A detached building designed for or occupied exclusively by two (2) families living independently of each other.

Section 7009.10. Dwelling, Group. A combination or arrangement of dwellings on one (1) building site.

Section 7009.11. Dwelling, Multiple Family. A building, or portion thereof, designed for or occupied by three (3) or more families living independently of each other.

Section 7009.12. Dwelling Unit. One (1) or more rooms in a dwelling, apartment house or apartment hotel designed for or occupied by one (1) family for living or sleeping purposes and having not more than one (1) kitchen.

Section 7009.13. Educational Institution. A college or university giving general academic instruction equivalent to the standards prescribed by the State Board of Education.

Section 7009.14. Family. An individual, or two (2) or more persons related by blood or marriage or legal adoption, or a group of not to exceed five (5) persons (excluding servants) living together as a single house-keeping unit in a dwelling unit.

Section 7009.15. Garage, Private. A building or portion of a building in which motor vehicles used by the occupants or tenants of the main building or buildings of the premises are stored or kept.

Section 7009.16. Garage, Public. A building other than a private garage, used for the care, repair, or equipment of automobiles, or where such vehicles are parked or stored for remuneration, hire or sale.

Section 7009.17. Grade. Grade (ground level) is the average of the finished ground level at the center of all walls of a building. In case walls are parallel to and within five (5) feet of a sidewalk, said ground level shall be measured at the sidewalk.

Section 7009.18. Hog Ranch. Any premise used for the commercial raising of hogs that are fed garbage secured from off the premises.

Section 7009.19. Home Occupation. An occupation carried on by the resident of a dwelling as a secondary use in connection with which there is no person employed, no sounds audible beyond the premises, no display and no advertising, except that one sign, not to exceed two (2) square feet in area, may be attached flat against the wall of a building.

Section 7009.20. Quasi-Home Occupation. An occupation carried on by the occupant of a dwelling as a secondary use in connection with which there is no display or signs; no stock in trade nor commodity sold upon the premises; no person employed; and no mechanical equipment used except such as is necessary for housekeeping purposes.

Section 7009.21. Hospital. Any building or portion thereof used for the accommodations and medical care of sick, injured or infirm persons and including sanitariums.

Section 7009.22. Hotel. A building designed for, or occupied as the more or less temporary abiding place of individuals who are lodged with or without meals in which there are six (6) or more guest rooms, and in which no provision is made for cooking in any individual room or suite.

Section 7009.23. Lot. A parcel of real property with a separate and distinct number of letter as shown on a plat recorded or filed with the Recorder of Kern County, State of California, or a parcel of real property abutting upon at least one (1) public street or private easement and held under separate ownership prior to the effective date of this Chapter.

Section 7009.24. Lot Area. The total horizontal area within the lot lines of a lot.

Section 7009.25. Lot, Corner. A lot situated at the intersection of two (2) or more streets having an angle of intersection of not more than one hundred thirty-five (135) degrees.

Section 7009.26. Lot, Interior. A lot other than a corner lot.

Section 7009.27. Lot, Key. The first lot to the rear of a reversed corner lot whether or not separated by an alley.

Section 7009.28. Lot, Reversed Corner. A corner lot whose side street line is substantially a continuation of the front lot line of the first lot to its rear.

Section 7009.29. Lot, Through. A lot having frontage on two (2) parallel or approximately parallel streets.

Section 7009.30. Lot Line, Front. The property line dividing a lot from a street. On a corner lot only one (1) street line shall be considered as a front line and the shorter street frontage shall be considered the front lot line.

Section 7009.31. Lot Line, Rear. The line opposite the front lot line.

Section 7009.32. Lot Line, Side. Any lot lines other than front lot lines or rear lot lines.

Section 7009.33. Motel. A group of attached or detached buildings containing individual sleeping or living units, designed for or used temporarily by automobile tourists or transients, with garage or parking space conveniently located to each unit, including tourist courts, auto courts, or motor lodges.

Section 7009.34. Non-Conforming Building. A building or structure or portion thereof existing in conflict with the provisions of this Chapter applicable to the zone in which it is situated.

Section 7009.35. Non-Conforming Use. The use of a structure or premises for a purpose which is in conflict with the provisions of this Chapter.

Section 7009.36. Occupied. The word "occupied" includes arranged, designed, built, altered, converted, rented or leased, or intended to be occupied.

Section 7009.37. Person. Any individual, firm, co-partnership, joint adventure, association, club, fraternal organization, corporation, estate, trust, receiver, organization, syndicate, city, county, municipality, district or other political subdivision, or any other group or combination acting as a unit.

Section 7009.38. School, Elementary or High. An institution of learning which offers instruction in the several branches of learning and study required to be taught in the public schools by the Education Code of the State of California. (High Schools include Junior and Senior).

Section 7009.39. Self-Service Laundry. Any establishment for laundering where there is no pick-up or delivery service and no steam or hand laundry of any type.

Section 7009.40. Stable, Private. A detached accessory building for the keeping of one or more horses owned by the occupants of the premises, and not kept for remuneration, hire or sale.

Section 7009.41. Stable, Public. A stable other than a private stable.

Section 7009.42. Stock Yard. An enclosed area where animals

are fed concentrated food prior to shipping to market or slaughtering or where animals are held for resale only.

Section 7009.43. Story. That portion of a building included between the surface of any floor and the surface of the floor next above it, or if there be no floor above it, then the space between such floor and the ceiling next above it.

Section 7009.44. Story, Half. A story with at least two (2) of its opposite sides situated in a sloping roof, the floor area of which does not exceed two-thirds (2/3) of the floor area immediately below it.

Section 7009.45. Street. A public thoroughfare which affords the principal means of access to abutting property.

Section 7009.46. Structure. Anything constructed or erected, which requires location on the ground or attached to something having a location on the ground, but not including fences or walls used as fences less than six (6) feet in height.

Section 7009.47. Trailer, House or Coach. A vehicle without motor power, designed to be drawn by a motor vehicle and to be used for human habitation or for carrying persons and property.

Section 7009.48. Use. The purpose for which land or building is designed, arranged or intended, or for which either is or may be occupied or maintained.

Section 7009.49. Yard. An open space other than a court, on a lot, unoccupied and unobstructed from the ground upward, except as otherwise provided in this Chapter.

Section 7009.50. Yard, Front. A yard extending across the full width of the lot between the front lot line and the nearest line or point of the main building.

Section 7009.51. Yard, Rear. A yard extending across the full width of the lot between the rear lot line and the nearest line or point of the main building.

Section 7009.52. Yard, Side. A yard extending from the front yard to the rear yard between the side lot line and the nearest line

or point of the main building or of accessory buildings attached thereto.

ARTICLE 3

ZONES

Section 7010. Establishment of Zones. In order to classify, regulate, restrict and segregate the uses of land and buildings; to regulate and restrict the height, bulk and construction of buildings; to regulate the area of yards and other open spaces about buildings; and to regulate the density of population, twenty-two (22) classes of land use zones are hereby established to be known as follows:

R-1 One-Family Dwelling Zone

R-2 Two-Family Dwelling Zone

R-3 Limited Multiple-Family Dwelling Zone

R-4 Multiple-Family Dwelling Zone

R-S Suburban Residential Zone

E-1 Estate Zone

E-2 Estate Zone

E-3 Estate Zone

C-O Professional Office Zone

C-1 Neighborhood Commercial Zone

C-2 Commercial Zone

M-1 Limited Manufacturing Zone

M-2 Light Manufacturing Zone

M-3 General Manufacturing Zone

A-1 Light Agricultural Zone

A-2 General Agricultural Zone

R-F Recreational-Forestry Zone

U Unclassified Zone

P Automobile Parking Zone

D Architectural Design Zone

H Airport Approach Height Zone

B Buffer Zone

or point of the main building or of accessory buildings attached thereto.

ARTICLE 3

ZONES

Section 7010. Establishment of Zones. In order to classify, regulate, restrict and segregate the uses of land and buildings; to regulate and restrict the height, bulk and construction of buildings; to regulate the area of yards and other open spaces about buildings; and to regulate the density of population, twenty-two (22) classes of land use zones are hereby established to be known as follows:

R-1 One-Family Dwelling Zone

R-2 Two-Family Dwelling Zone

R-3 Limited Multiple-Family Dwelling Zone

R-4 Multiple-Family Dwelling Zone

B Buffer Zone

Section 7011. Zoning Map. The boundaries of the aforesaid zones are not included in this Chapter but will be shown upon maps hereafter attached and then made a part of this Chapter, said maps being designated as the "Zoning Map", and said maps and all of the notations, references and other information shown thereon shall be as much a part of this Chapter as if the matters and information set forth by said maps were all fully described herein.

Said "Zoning Map",for convenience and identification, may be divided into separate maps. The classification and boundaries of said zones shall be determined, delineated and described by the adoption of said maps. Before the adoption of a map, however, hearings will be held for each area covered by said map as provided in the State Planning Law, Title 7 of the Government Code. Upon such adoption, regulations governing said zones shall become effective. Provided, however, that until such time as maps are prepared, adopted and become effective as herein provided, the following provisions of this Ordinance Code shall continue to apply, to-wit:

Chapter 4 of Division 1 of Part 7, commencing with Section 7350, which Chapter establishes a Highway Zoning Plan;

Chapters 1, 2, 3 and 4 of Division 2, Part 7, commencing with Section 7500, concerning specific zoning regulations;

Chapter 1 of Division 3, Part 7, commencing with Section 7700, establishing Interim Zone Districts;

Chapter 2 of Division 3, Part 7, commencing with Section 7750, concerning zoning plan for territory adjacent to Golden State Highway.

Section 7012. Boundaries of Zones. Where uncertainty exists as to the boundaries of any zone shown on said map, the following rules shall apply:

A. Where such boundaries are indicated as approximately following street and alley lines or lot lines, such lines shall be construed to be such boundaries;

B. In unsubdivided property or where a zone boundary

divides a lot, the location of such boundary, unless the same is indicated by dimensions, shall be determined by use of the scale appearing on the map;

C. In case any uncertainty exists, the Planning Commission shall determine the location of boundaries;

D. Where any public street or alley is officially vacated or abandoned, the regulations applicable to abutting property shall apply to such vacated or abandoned street or alley.

E. Where any private right of way or easement of any railroad, railway, canal, transportation or public utility company is vacated or abandoned, the regulations applicable to abutting property shall apply to such vacated or abandoned property.

Section 7013. Uses Permitted in Zones. Except as hereinafter provided:

A. No building shall be erected, and no existing building shall be moved, altered, added to or enlarged, nor shall any land, building or premises be used, designed or intended to be used for any purpose or in any manner other than a use listed in this Chapter or amendments thereto as permitted in the zones in which such land, building or premises is located.

B. No building shall be erected nor any existing building be moved, reconstructed or structurally altered to exceed in height the limit established by this Chapter or amendments thereto for the zone in which such building is located.

C. No building shall be erected nor shall any existing building be moved, altered, enlarged or rebuilt, nor shall any open spaces surrounding any building be encroached upon or reduced in any manner except in conformity with the building site requirements and the area and yard regulations established by this Chapter or amendments thereto for the zone in which such building is located.

D. No yard or other open space provided about any building for the purpose of complying with the regulations of this Chapter, or amendments thereof, shall be considered as providing a yard or open space for any other building or structure.

ARTICLE 4

R-1 ZONE

Section 7020. R-1 One-Family Dwelling Zone. The regulations set forth in this Article shall apply in the R-1 one-family dwelling zone unless otherwise provided in this Chapter.

Section 7021. Uses Permitted.

A. A one-family dwelling.

B. The accessory buildings and structures necessary to such use located on the same lot or parcel of land, including a private garage, the capacity of which shall not exceed three (3) automobiles. Detached Servants' Living Quarters shall be allowed only on lots having an area of more than seventy-five hundred (7,500) square feet on which there is a dwelling containing not less than two thousand (2,000) square feet.

C. Quasi-home occupations upon the granting of a special permit by the Planning Commission, which permit shall not be granted unless the Commission finds that the proposed quasi-home occupation complies with the definition of this Chapter.

D. Maintaining mail address for commercial, professional and business license purposes only, provided no stock in trade, supplies, professional equipment, apparatus or business equipment are kept on the premises, and provided that no employees or assistants are engaged for said services on the premises, and, except as otherwise provided in this Section, no signs are displayed.

E. One (1) unlighted sign of not to exceed one-half (1/2) square foot in area attached to and parallel with the front wall of the building, and containing only the name and title or occupation of the occupant.

F. One (1) sign of not to exceed four (4) square feet in area advertising the premises for sale, lease or rent, located not nearer than ten (10) feet to adjoining premises, nor nearer than five (5) feet to a street line.

G. One temporary sign of not to exceed six (6) square feet

in area giving the name of the contractors, engineers and architects during construction period.

H. Agricultural and horticultural uses for domestic purposes, including nurseries, greenhouses, orchards or the raising of field crops, tree crops, berry or bush crops, or vegetable or flower gardening.

I. Poultry, rabbits, or similar small fowl and animals raised for food, scientific or fur bearing purposes, provided not more than twelve (12) of any one or combination of such animals may be maintained on one lot. The keeping of such fowl and animals shall conform to all other provisions of law governing same, and no fowl or animals, nor any pen or coop, shall be kept or maintained within thirty (30) feet of any window or door of any residence, dwelling or other building used for human habitation, or within one hundred (100) feet of the front lot line of the lot upon which it is located, or within twenty-five (25) feet of the street side of a corner lot, or within one hundred (100) feet of any public park, school, hospital or similar institution.

J. Where a dwelling exists, prior to the passage of this Chapter, on the rear half of the lot and at least seventy-five (75) feet back of the front lot line, an additional dwelling may be constructed and maintained on the front half of said lot, provided there shall be a minimum distance of twenty (20) feet between said dwellings.

K. A trailer may be used or occupied as a temporary dwelling for a period not to exceed sixty (60) days in any one year period.

L. Oil and gas drilling and production shall be permitted by the Planning Commission if a conditional use permit has been secured from the Planning Commission for such purposes, as provided in Section 7243. Provided, however, that nothing herein shall be construed to require the Planning Commission to issue such permit, except as provided in said Section 7243.

M. Additional uses may be permitted by the Planning Commission according to the provisions of Section 7281 of this Chapter.

Section 7022. Building Height. Two and one-half (2-1/2) stories and not to exceed thirty-five (35) feet.

Section 7023. Front Yard. There shall be a front yard of not less than twenty-five (25) feet, except, where lots comprising forty (40) percent or more of the frontage on one side of a street between intersecting streets are developed with buildings having an average front yard with a variation of not more than ten (10) feet, no building hereafter erected or structurally altered shall project beyond the average front yard line so established. In determining such front yard depth, buildings located more than thirty-five (35) feet from the front property line or buildings facing a side street on a corner lot shall not be counted.

The front yard shall be measured from the front property line except that where there is an official plan line or a future street line the front yard shall be measured from said official plan line or future street line. Provided, however, that along any secondary highway, as designated by the County's Highway Plan, a minimum setback of forty-five (45) feet from the center line of the highway shall be required, and along any major highway, as designated by the County's Highway Plan, a minimum setback of fifty-five (55) feet from the center line of the highway shall be required.

Section 7024. Side Yard. There shall be a side yard on each side of a main building of not less than five (5) feet, except that on the street side of corner lots there shall be a side yard of not less than ten (10) feet.

Section 7025. Rear Yard. There shall be a rear yard behind every main building of not less than five (5) feet.

Section 7026. Area Requirements. The minimum lot area shall be six thousand (6,000) square feet per dwelling unit, provided, however, that when a lot has less area than herein required and was recorded at the time of the passage of this Chapter, said lot may be occupied by

not more than one (1) dwelling unit. In no case shall more than forty-five (45) percent of any lot be covered by buildings or structures.

Section 7027. Distance Between Buildings On The Same Lot. There shall be a minimum distance of six (6) feet between a building used for dwelling purposes and an accessory building.

There shall be a minimum distance of six (6) feet between accessory buildings.

ARTICLE 5

R-2 ZONE

Section 7030. R-2 Two-Family Dwelling Zone. The regulations set forth in this Article shall apply in the R-2 two-family dwelling zone unless otherwise provided in this Chapter.

Section 7031. Uses Permitted.

A. Any use permitted in the R-1 zone.

B. A two-family dwelling or two one-family dwellings.

C. The accessory buildings and structures necessary to such use, located on the same lot or parcel of land.

D. Home occupations.

Section 7032. Building Height. Two and one-half (2-1/2) stories and not to exceed thirty-five (35) feet.

Section 7033. Front Yard. There shall be a front yard of not less than twenty-five (25) feet, except, where lots comprising forty (40) per cent or more of the frontage on one (1) side of a street between intersecting streets are developed with buildings having an average front yard with a variation of not more than ten (10) feet, no buildings hereafter erected or structurally altered shall project beyond the average front yard line so established. In determining such front yard depth, buildings located more than thirty-five (35) feet from the front property line or buildings facing a side street on a corner lot shall not be counted.

The front yard shall be measured from the front property line except that where there is an official plan line or a future street line the front yard shall be measured from said official plan

line or future street line. Provided, however, that along any secondary highway, as designated by the County's Highway Plan, a minimum setback of forty-five (45) feet from the center line of the highway shall be required, and along any major highway, as designated by the County's Highway Plan, a minimum setback of fifty-five (55) feet from the center line of the highway shall be required.

Section 7034. Side Yard. There shall be a side yard on each side of a main building of not less than five (5) feet, except that on the street side of corner lots there shall be a side yard of not less than ten (10) feet.

Section 7035. Rear Yard. There shall be a rear yard behind every main building of not less than five (5) feet.

Section 7036. Area Requirements. The minimum lot area shall be six thousand (6,000) square feet. The minimum lot area per dwelling unit shall be three thousand (3,000) square feet. Provided, however, that when a lot has less area than herein required and was recorded at the time of the passage of this Chapter, said lot may be occupied by not more than one (1) dwelling unit. In no case shall more than fifty (50) percent of any lot be covered by buildings or structures.

Section 7037. Distance Between Buildings On The Same Lot. There shall be a minimum distance of ten (10) feet between buildings used for dwelling purposes.

There shall be a minimum distance of six (6) feet between a building used for dwelling purposes and an accessory building.

There shall be a minimum distance of six (6) feet between accessory buildings.

ARTICLE 6

R-3 ZONE

Section 7040. R-3 Limited Multiple-Family Dwelling Zone. The regulations set forth in this Article shall apply in the R-3 limited multiple-family dwelling zone unless otherwise provided in this Chapter.

Section 7041. Uses Permitted.

A. Any use permitted in the R-1 and R-2 zones.

B. Three-family dwellings, four-family dwellings, and bungalow courts.

C. The accessory buildings and structures necessary to such use located on the same lot or parcel of land.

Section 7042. Building Height. Two and one-half (2-1/2) stories and not to exceed thirty-five (35) feet.

Section 7043. Front Yard. There shall be a front yard of not less than fifteen (15) feet, except where lots comprising forty (40) percent or more of the frontage on one (1) side of a street between intersecting streets are developed with buildings having an average front yard with a variation of not more than ten (10) feet, no building hereafter erected or structurally altered shall project beyond the average front yard line so established. In determining such front yard depth, buildings located more than thirty-five (35) feet from the front property line or buildings facing a side street on a corner lot shall not be counted.

The front yard shall be measured from the front property line except where there is an official plan line or a future street line the front yard shall be measured from said official plan line or future street line. Provided, however, that along any secondary highway, as designated by the County's Highway Plan, a minimum setback of forty-five (45) feet from the center line of the highway shall be required, and along any major highway, as designated by the County's Highway Plan, a minimum setback of fifty-five (55) feet from the center line of the highway shall be required.

Section 7044. Side Yard. There shall be a side yard on each side of a main building of not less than five (5) feet, except that on the street side of corner lots there shall be a side yard of not less than ten (10) feet.

Section 7045. Rear Yard. There shall be a rear yard behind every main building of not less than fifteen (15) feet, provided however, the rear yard may be reduced to five (5) feet if not more than fifty-five (55) percent of the lot is covered by buildings or structures.

Section 7046. Area Requirements. The minimum lot area shall be six thousand (6,000) square feet. The minimum lot area per dwelling unit shall be fifteen hundred (1500) square feet. Provided, however, that when a lot has less area than herein required and was recorded at the time of the passage of this Chapter, said lot may be occupied by not more than one (1) dwelling unit for each fifteen hundred (1500) square feet.

Section 7047. Distance Between Buildings On The Same Lot. There shall be a minimum distance of ten (10) feet between buildings used for dwelling purposes.

There shall be a minimum distance of six (6) feet between a building used for dwelling purposes and an accessory building.

There shall be a minimum distance of six (6) feet between accessory buildings.

ARTICLE 7

R-4 ZONE

Section 7050. R-4 Multiple-Family Dwelling Zone. The regulations set forth in this Article shall apply in the R-4 multiple-family dwelling zone unless otherwise provided in this Chapter.

Section 7051. Uses Permitted.

A. Any use permitted in the R-1, R-2, or R-3 zones.

B. Group dwellings, multiple-family dwellings, apartment houses, churches; schools, elementary or high; day nurseries; nursery schools; boarding and rooming houses; institutions of educational, philanthropic, or eleemosynary nature; lodge halls; and private clubs, except clubs the chief activity of which is a service customarily carried on as a business.

C. The accessory buildings and structures necessary to such use located on the same lot or parcel of land.

Section 7052. Building Height. Four (4) stories and not to exceed forty-five (45) feet.

Section 7053. Front Yard. There shall be a front yard of not less than ten (10) feet, except, where lots comprising forty (40) per

cent or more of the frontage on one (1) side of a street between intersecting streets are developed with buildings having an average front yard with a variation of not more than ten (10) feet, no building hereafter erected or structurally altered shall project beyond the average front yard line so established. In determining such front yard depth, buildings located more than twenty-five (25) feet from the front property line or buildings facing a side street on a corner lot shall not be counted.

The front yard shall be measured from the front property line except that where there is an official plan line or a future street line the front yard shall be measured from said official plan line or future street line. Provided, however, that along any secondary highway, as designated by the County's Highway Plan, a minimum setback of forty-five (45) feet from the centerline of the highway shall be required, and along any major highway, as designated by the County's Highway Plan, a minimum setback of fifty-five (55) feet from the centerline of the highway shall be required.

Section 7054. Side Yard. There shall be a side yard on each side of a main building of not less than five (5) feet, except that on the street side of corner lots there shall be a side yard of not less than ten (10) feet.

Section 7055. Rear Yard. There shall be a rear yard behind every main building of not less than fifteen (15) feet, provided however, the rear yard may be reduced to five (5) feet if not more than sixty (60) percent of the lot is covered by buildings or structures.

Section 7056. Area Requirements. The minimum lot area shall be six thousand (6,000) square feet. The minimum lot area per dwelling unit shall be one thousand (1000) square feet. Provided, however, that when a lot has less area than herein required and was recorded at the time of the enactment of this Chapter, said lot may be occupied by not more than one (1) dwelling unit for each one thousand (1,000) square feet.

Section 7057. Distance Between Buildings On The Same Lot. There

shall be a minimum distance of ten (10) feet between buildings used for dwelling purposes.

There shall be a minimum distance of six (6) feet between a building used for dwelling purposes and an accessory building.

There shall be a minimum distance of six (6) feet between accessory buildings.

ARTICLE 8

R-S ZONE

Section 7060. R-S Suburban Residential Zone. All permitted uses and regulations in the R-S zone shall be the same as the R-1 zone, except that the following additional uses are permitted:

A. Breeding, hatching, raising and fattening of poultry, fowl, birds, rabbits, chinchillas, fish, frogs and bees for domestic use.

B. Keeping of horses on lots having an area of one-half (1/2) acre or more, provided that the number of horses on any one lot shall be limited to one horse for every one-quarter (1/4) acre.

The keeping of such fowl and animals shall conform to all other provisions of law governing same, and no fowl or animals, nor any pen, coop, stable, barn or corral shall be kept or maintained within fifty (50) feet of any dwelling or other building used for human habitation, or within one hundred (100) feet of the front lot line of the lot upon which it is located, or within twenty-five (25) feet of the street side of a corner lot, or within one hundred (100) feet of any public park, school, hospital or similar institution. There shall be no killing or dressing of any of such animals or poultry for commercial purposes.

ARTICLE 9

E-1 ZONE

Section 7070. E-1 Estate Zone. All regulations in the E-1 zone shall be the same as in the R-1 zone, except as follows:

Each single family dwelling with its accessory buildings hereafter erected shall be located upon a lot having an area of not less than twelve thousand (12,000) square feet.

ARTICLE 10

E-2 ZONE

Section 7080. E-2 Estate Zone. All regulations in the E-2 zone shall be the same as in the R-1 zone, except as follows:

Each single family dwelling with its accessory buildings hereafter erected shall be located upon a lot having an area of not less than eighteen thousand (18,000) square feet.

ARTICLE 11

E-3 ZONE

Section 7090. E-3 Estate Zone. All regulations in the E-3 zone shall be the same as in the R-1 zone, except as follows:

Each single family dwelling with its accessory buildings hereafter erected shall be located upon a lot having an area of not less than twenty-four thousand (24,000) square feet.

ARTICLE 12

C-O ZONE

Section 7100. C-O Professional Office Zone. The regulations set forth in this Article shall apply in the C-O Professional Office Zone unless otherwise provided in this Chapter.

Section 7101. Uses Permitted.

A. Any use permitted in the R-4 multiple-family zone.

B. Professional, executive and administrative offices, including, but not limited to: accountants, architects, attorneys-at-law, chiropractors, chiropodists, dentists, registered engineers and licensed surveyors, insurance agents, opticians, optometrists, osteopaths, physicians, real estate brokers and surgeons.

C. The accessory buildings and structures necessary to such use located on the same lot or parcel of land.

D. Automobile parking areas when developed as required in Section 7201 if adjacent to a residential zone.

Any exterior sign displayed shall pertain only to a use conducted within the building; shall be attached flat against a wall of the building and parallel with its horizontal dimension and shall

front the principal street, a parking area in the rear or, in the case of a corner building, on that portion of the side street wall within fifty (50) feet of the principal street. In no case shall a sign project above the roof line.

Section 7102. Building Height. Four (4) stories and not to exceed forty-five (45) feet.

Section 7103. Front Yard. There shall be a front yard of not less than ten (10) feet. The front yard shall be measured from the front property line except that where there is an official plan line or a future street line the front yard shall be measured from said official plan line or future street line. Provided, however, that along any secondary highway, as designated by the County's Highway Plan, a minimum setback of forty-five (45) feet from the centerline of the highway shall be required, and along any major highway, as designated by the County's Highway Plan, a minimum setback of fifty-five (55) feet from the centerline of the highway shall be required.

Section 7104. Side Yard. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7105. Rear Yard. There shall be behind every building a rear yard having a minimum depth of twenty (20) feet.

Section 7106. Area Requirements. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7107. Distance Between Buildings On The Same Lot. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7108. Parking Requirements. For all professional offices, not less than the same area of parking space shall be provided on the same site as there is floor space in the office building.

ARTICLE 13

C-1 ZONE

Section 7110. C-1 Neighborhood Commercial Zone. The regulations set forth in this Article shall apply in the C-1 neighborhood commercial zone unless otherwise provided in this Chapter.

Section 7111. Uses Permitted.

A. Any use permitted in the R-1, R-2, R-3, R-4 and C-O zones.

B. Any of the following uses:

1. Apartment hotels
2. Automobile parking areas when developed as required in Section 7201 if adjacent to a residential zone
3. Automobile service stations, provided the station does not have more than two service bays and is located on a site not greater than 15,000 square feet in area
4. Banks
5. Barber shops
6. Beauty shops
7. Book stores
8. Confectionery stores
9. Dress or millinery shops
10. Drug stores
11. Dry cleaning, pressing and laundry agencies
12. Dry goods or notions stores
13. Electric appliance stores and repairs
14. Florist shops
15. Grocery, fruit and vegetable stores
16. Hardware stores
17. Ice storage houses of not more than five (5) ton capacity
18. Jewelry stores
19. Meat markets or delicatessen stores
20. Offices, business, professional or public utility
21. Pet food stores

22. Photographic shops

23. Restaurants, tea rooms or cafes where all customers are served at a table or counter (excluding dancing, entertainment and sale of intoxicating liquors)

24. Self-service laundries

25. Shoe stores or shoe repair shops

26. Stationery stores

27. Tailor, clothing or wearing apparel shops

The above specified stores, shops, or businesses shall be retail establishments selling new merchandise exclusively and shall be permitted only under the following conditions:

a. Such stores, shops or businesses except automobile service stations shall be conducted entirely within an enclosed building.

b. Products made incidental to a permitted use shall be sold at retail on the premises.

c. All public entrances to such stores, shops or businesses shall be from the principal street upon which the property abuts or within fifty (50) feet thereof, except that a rear or side entrance from the building to a parking area may be provided.

d. Except as hereinafter provided, any exterior sign displayed shall pertain only to a use conducted on the premises, shall not exceed a height of twenty-four (24) feet above the ground level, shall not project into a street or alley more than twelve (12) inches beyond any property line, and any sign projecting beyond a property line shall have a clearance of not less than ten (10) feet between the bottom of the sign and the ground level.

C. The accessory buildings and structures necessary to such use located on the same lot or parcel of land, including a storage garage for the exclusive use of the patrons and employees of the above stores or businesses.

Section 7112. Building Height. Four (4) stories and not to exceed fifty (50) feet.

Section 7113. Front Yard. All buildings shall be located not nearer than forty (40) feet from the centerline of a street. Provided, however, that along any secondary highway, as designated by the County's Highway Plan, a minimum setback of forty-five (45) feet from the centerline of the highway shall be required, and along any major highway, as designated by the County's Highway Plan, a minimum setback of fifty-five (55) feet from the centerline of the highway shall be required.

All buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7114. Side Yard. All buildings used exclusively for dwelling purposes shall comply with the R-4 zone.

Section 7115. Rear Yard. There shall be behind every building a rear yard having a minimum depth of twenty (20) feet.

Section 7116. Area Requirements. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7117. Distance Between Buildings On The Same Lot. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

ARTICLE 14

C-2 ZONE

Section 7120. C-2 Commercial Zone. The regulations set forth in this Article shall apply in the C-2 commercial zone unless otherwise provided in this Chapter.

Section 7121. Uses Permitted.

A. Any use permitted in the R-1, R-2, R-3, R-4, C-O and C-1 zones.

B. Any of the following uses:

1. Retail or wholesale stores or businesses not involving any kind of manufacture, processing or treatment of products other than that which is

clearly incidental to the retail business conducted on the premises and provided that no more than five (5) persons are employed, and not more than fifty (50) percent of the floor area of the building is used, in the manufacture, processing or treatment of products, and that such operations or products are not objectionable due to noise, odor, dust, smoke, vibration, or other similar causes.

2. Advertising sign boards or structures
3. Automobile parking areas
4. Automobile service stations
5. Bakeries, employing not more than ten (10) persons on premises
6. Baths, Turkish and the like
7. Billiard or pool halls or bowling alleys
8. Blueprinting and photostating shops
9. Bird stores or pet shops
10. Churches, temporary revivals
11. Cleaning and pressing establishments using non-inflammable and non-explosive cleaning fluid
12. Conservatories of music
13. Department stores
14. Electric distributing substations and gas distribution regulating and metering stations
15. Furniture stores
16. Furniture warehouses for storing personal household goods
17. Garages, public
18. Hospitals or sanitariums (except animal hospitals, clinics, hospitals or sanitariums for contagious, mental or drug or liquor addict cases)
19. Hotels
20. Interior decorating shops
21. Liquor stores

22. Medical laboratories

23. Mortuaries or funeral parlors

24. Motels, auto courts and tourist courts

25. Music and vocal instructions

26. Music stores

27. Nurseries, flowers or plants

28. Plumbing and sheet metal shops

29. Printing, lithographing or publishing establishments

30. Public parking areas

31. Radio and television stores

32. Refrigerated lockers

33. Restaurants, tea rooms or cafes

34. Skating rinks

35. Studios

36. Taxidermists

37. Telephone exchanges

38. Theatres or auditoriums (except drive-in theatres)

39. Trade schools, not objectionable due to noise, odor, dust, smoke, vibration, or similar causes

40. Upholstery shops

41. Used car sales areas, provided (a) that no repair or reconditioning of automobiles shall be permitted, except when enclosed in a building and (b) that such area is located and developed as required in Section 7201 of this Chapter

42. Wedding Chapels

C. The accessory buildings and structures necessary to such uses located on the same lot or parcel of land.

Section 7122. Building Height. Six (6) stories and not to exceed seventy-five (75) feet unless the building sets back from each street, alley and lot line at least one (1) foot for each three (3) feet of height above six (6) stories or seventy-five (75) feet. No building shall exceed one hundred and thirty-five (135) feet or ten (10) stories.

Section 7123. Front Yard. All buildings shall be located not nearer than forty (40) feet from the centerline of a street. Provided, however, that along any secondary highway, as designated by the County's Highway Plan, a minimum setback of forty-five (45) feet from the centerline of the highway shall be required, and along any major highway, as designated by the County's Highway Plan, minimum setback of fifty-five (55) feet from the centerline of the highway shall be required.

All buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7124. Side Yard. All buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7125. Rear Yard. There shall be behind every building a rear yard having a minimum depth of twenty (20) feet.

Section 7126. Area Requirements. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7127. Distance Between Buildings On The Same Lot. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

ARTICLE 15

M-1 ZONE

Section 7130. M-1 Limited Manufacturing Zone. The regulations set forth in this Article shall apply in the M-1 Limited Manufacturing Zone unless otherwise provided in this Chapter.

Section 7131. Uses Permitted.

A. Any use permitted in the C-2 zone, provided, however, that no building shall be used as a dwelling except accessory buildings which are incidental to the use of the land.

B. Any of the following uses:

1. Any kind of manufacture, compounding, assembling, processing or treatment of products other than any which produces, causes or emits any fumes, odor,

dust, smoke, gas, noise or vibrations which are or may be detrimental to properties in the neighborhood or to the welfare of the occupants thereof and which are conducted wholly within a building

2. Assaying
3. Animal hospitals, kennels and veterinaries
4. Frozen food lockers
5. Wholesale businesses, storage buildings and warehouses
6. The following uses, if wholly enclosed within a solid masonry wall or fence as approved by the Planning Commission, not less than six (6) feet in height, and providing that such uses are conducted so that no material or equipment is visible to a person walking or riding on adjoining streets or property:
   a. Building material storage yards
   b. Contractors' plants or storage yards
   c. Draying, freighting, or trucking yards or terminals
   d. Feed and fuel yards
   e. Lumber yards
   f. Petroleum products storage
   g. Stone monument works
   h. Truck parking or storage

C. The accessory buildings and structures necessary to such use located on the same lot or parcel of land.

D. Oil and gas drilling and production shall be permitted by the Planning Commission according to the provisions of Section 7244 of this Chapter.

E. Additional uses may be permitted by the Planning Commission according to the provisions of Section 7281 and Section 7282 of this Chapter.

Section 7132. Building Height. Two (2) stories and not to exceed thirty-five (35) feet.

Section 7133. Front Yard. All buildings shall be located not nearer than forty (40) feet from the centerline of a street. Provided, however, that along any secondary highway, as designated by the County's Highway Plan, a minimum setback of forty-five (45) feet from the centerline of the highway shall be required, and along any major highway, as designated by the County's Highway Plan, a minimum setback of fifty-five (55) feet from the centerline of the highway shall be required.

All buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7134. Side Yard. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7135. Rear Yard. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7136. Area Requirements. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7137. Distance Between Buildings On The Same Lot. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7138. Parking Requirements. For all buildings, not less than the same area of parking space shall be provided on the same site as there is floor space in the building.

ARTICLE 16

M-2 ZONE

Section 7140. M-2 Light Manufacturing Zone. The regulations set forth in this Article shall apply in the M-2 Light Manufacturing Zone unless otherwise provided in this Chapter.

Section 7141. Uses Permitted.

A. Any use permitted in the M-1 zone, provided, however, that no building shall be used as a dwelling except accessory buildings

which are incidental to the use of the land.

B. Any of the following uses:

1. Any kind of manufacture, compounding, assembling, processing or treatment of products other than any which produces, causes or emits any fumes, odor, dust, smoke, gas, noise or vibrations which are or may be detrimental to properties in the neighborhood or to the welfare of the occupants thereof.
2. Agricultural industries, including packing, canning and processing plants.
3. Aircraft and automobile factories (no foundries)
4. Automobile assembling, body and fender works, painting, upholstering, dismantling and used parts storage when operated or maintained wholly within a building.
5. Automobile and truck parking and storage
6. Auto wash
7. Bakeries
8. Blacksmith shops
9. Boat building
10. Bottling plants
11. Breweries
12. Building material storage yards
13. Cabinet or carpenter shops
14. Carpet, awning, blinds, mattress or upholstery shops, including cleaning and repair
15. Contractor's plants or storage yards
16. Creameries, dairies and livestock feeding yards
17. Distributing plants
18. Draying, freighting or trucking yards or terminals
19. Electric welding and electroplating
20. Equestrian establishments, including stables or riding academies, schools or amusements

21. Feed and fuel yards
22. Flour mills
23. Fruit, vegetable and meat canning, freezing, packing and preserving plants
24. Ice and cold storage plants
25. Laboratories, experimental and the like
26. Laundries, cleaning and dyeing plants
27. Lumber yards
28. Machine shops (except punch presses of over twenty tons rated capacity, drop hammers, and automatic screw machines)
29. Motion picture studios
30. Paint mixing plants (not employing a boiling process)
31. Petroleum products storage, provided that no storage structure shall exceed fifty (50) feet in height
32. Planing mills
33. Poultry and rabbit raising, slaughter or storage
34. Public utilities service yards, electric transmission substations and gas transmission and compressor stations
35. Rubber fabrication or products made from finished rubber
36. Sheet metal shops
37. Storage spaces for transit and transportation equipment
38. Tire rebuilding, recapping and retreading plants
39. Truck repairing and overhauling shops
40. Manufacture of:
    a. batteries
    b. billboards and advertising structures, electric or neon signs
    c. ceramic products
    d. clothing or garments

e. cosmetics, perfumes and toiletries, drugs and pharmaceuticals

f. electronic instruments and devices, radios, televisions and phonographs

g. food products (except the rendering or refining of fats or oils)

h. furniture

i. musical instruments and toys

j. prefabricated buildings

k. shoes

l. soap (cold mix only)

m. textiles

Manufacture, compounding, assembling or treatment of articles or merchandise from the following previously prepared materials: bone, cellophane, canvas, cloth, cork, feathers, felt, fibre, fur, glass, hair, horn, leather, paper, plastics, precious or semi-precious metals or stones, shell, textiles, tobacco, wood, yarns, and paint not employing a boiling process.

C. The accessory buildings and structures necessary to such use located on the same lot or parcel of land.

D. Oil and gas drilling and production shall be permitted by the Planning Commission according to the provisions of Section 7244 of this Chapter.

E. Additional uses may be permitted by the Planning Commission according to the provisions of Section 7281 and Section 7282 of this Chapter.

Section 7142. Building Height. Six (6) stories and not to exceed seventy-five (75) feet.

Section 7143. Front Yard. All buildings shall be located not nearer than forty (40) feet from the centerline of a street, Provided, however, that along any secondary highway, as designated by the County's Highway Plan, a minimum setback of forty-five (45) feet from the centerline of the highway shall be required, and along any major highway, as designated by the County's Highway Plan, a minimum setback

of fifty-five (55) feet from the centerline of the highway shall be required.

All buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7144. Side Yard. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7145. Rear Yard. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7146. Area Requirements. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7147. Distance Between Buildings On The Same Lot. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

ARTICLE 17

M-3 ZONE

Section 7150. M-3 General Manufacturing Zone. The regulations set forth in this Article shall apply in the M-3 general manufacturing zone unless otherwise provided in this Chapter.

Section 7151. Uses Permitted.

A. Any use permitted in the M-2 zone, provided, however, that no building shall be used as a dwelling except accessory buildings which are incidental to the use of the land.

B. Any of the following uses:

1. Acetylene gas manufacture or storage
2. Alcohol and alcholic beverages manufacture
3. Ammonia, chlorine and bleaching powder manufacture
4. Bag cleaning
5. Blast furnaces
6. Boiler or tank works
7. Brick, tile or terra cotta products manufacture
8. Building materials manufacture

9. Candle factories
10. Celluloid or pyroxylin manufacture
11. Cement and lime manufacturing when the manufacturing plant is equipped with dust collecting equipment capable of collecting at least ninety-seven (97) percent of all particulate matter from kiln gases
12. Chewing tobacco manufacture
13. Coke ovens
14. Cotton gins or oil mills
15. Crematories
16. Creosote treatment or manufacture
17. Disinfectant manufacture
18. Distillation of coal, wood or tar
19. Dye-stuffs manufacture
20. Exterminator or insect poison manufacture
21. Feed mills
22. Forge plants
23. Freight classification yards
24. Iron, steel, brass or cooper foundries or fabrication plants and heavy weight casting
25. Lamp black manufacture
26. Linoleum or oiled products manufacture
27. Ore reduction
28. Paint, oil shellac, turpentine or varnish manufacture
29. Paper or pulp manufacture
30. Petroleum products storage
31. Petroleum refining and reclaiming plants, if located more than 1320 feet from any property classified other than as M-3 zone or U zone.
32. Pickle manufacture
33. Plastic manufacture
34. Potash works

conducted closer than fifty (50) feet to any public street or highway

36. Railroad roundhouses and repair shops
37. Rock, sand and gravel excavating, crushing and distribution, provided such operations are not conducted closer than fifty (50) feet to any public street or highway
38. Rolling mills
39. Rubber or gutta-percha manufacture
40. Sauerkraut manufacture
41. Saw mills
42. Soap manufacture
43. Sodium compounds manufacture
44. Starch manufacture
45. Stove or shoe polish manufacture
46. Tar roofing or waterproofing or other tar products manufacture
47. Wool pulling or scouring

C. Any of the following uses provided that practical technological improvements, subject to the approval of the Planning Commission, are employed for the control of fumes, odors, dust, smoke, gas, noise, vibration or other conditions which are or may be detrimental to the public health, safety, convenience or general welfare of the community:

1. Acid manufacture
2. Ammunition manufacture
3. Except as provided in Subparagraph B-11 hereof, cement, lime, gypsum or plaster of Paris manufacture
4. Chemical manufacture
5. Curing, tanning and storage of raw hides or skins
6. Distillation of bones
7. Drop forge industries manufacturing forgins with power hammers

8. Explosives, manufacture or storage

9. Fat rendering

10. Fertilizer manufacture

11. Garbage, offal or dead animal reduction or dumping

12. Gas manufacture

13. Gelatin or size manufacture

14. Glass manufacture

15. Glucose or dextrine manufacture

16. Glue manufacture

17. Non-mineral oil extraction plants

18. Petroleum refining and reclaiming plants, if located within 1320 feet from any property classified other than as the M-3 zone or U zone

19. Smelting of tin, copper, zinc or iron ores

D. The accessory buildings and structures necessary to such use located on the same lot or parcel of land.

E. Oil and gas drilling and production shall be permitted according to the provisions of Section 7242 of this Ordinance.

F. Additional uses may be permitted by the Planning Commission according to the provisions of Section 7281 and Section 7282 of this Chapter.

Section 7152. Building Height. Thirteen (13) stories and not to exceed one hundred and fifty (150) feet.

Section 7153. Front Yard. All buildings shall be located not nearer than forty (40) feet from the centerline of a street. Provided, however, that along any secondary highway, as designated by the County's Highway Plan, a minimum setback of forty-five (45) feet from the centerline of the highway shall be required, and along any major highway, as designated by the County's Highway Plan, a minimum setback of fifty-five (55) feet from the centerline of the highway shall be required.

All buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7154. Side Yard. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7155. Area Requirements. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7157. Distance Between Buildings On The Same Lot. None, except all buildings used exclusively for dwelling purposes shall comply with the provisions of the R-4 zone.

ARTICLE 18

A-1 ZONE

Section 7160. A-1 Light Agricultural Zone. The regulations set forth in this Article shall apply in the A-1 light agricultural zone unless otherwise provided in this Chapter.

Section 7161. Uses Permitted.

A. Any use permitted in the R-1 zone

B. Any of the following uses:

1. All agricultural uses, including the keeping of poultry and rabbits or similar livestock, provided, however, that not to exceed one horse, hog, mule, cow, goat, sheep or other similar animals shall be permitted for each one-quarter (1/4) acre of area of the parcel of land upon which the same are kept.
2. Accessory agricultural buildings, structures and uses, including farm buildings, housing for agricultural workers, garages and implement shelters, provided no livestock or any building or enclosure used in connection with livestock shall be located nearer than one hundred (100) feet to the front lot line, nor nearer than fifty (50) feet to any existing dwelling on any contiguous property, or to any public park or school.
3. Excavation and quarrying of natural materials, pro-

vided such operations are not conducted closer than one hundred and fifty (150) feet to any public street or highway or to any existing dwelling

4. House or coach trailers
5. Animal hospitals, kennels and veterinaries
6. Equestrian establishments, including stables or riding academies, schools or amusements
7. Churches, libraries, museums, elementary or high schools, golf courses, country clubs, hospitals, sanitariums, public parks, playgrounds, community centers and Grange halls
8. Storage of petroleum products for use on the premises, but not for resale
9. Home occupations
10. Public utility or public service buildings, structures and uses
11. Two (2) signs of not to exceed twelve (12) square feet in area each, advertising the products produced or sold on the premises or identifying the premises or occupants
12. Temporary stands for the sale of agricultural, horticultural or farming products grown or produced on the premises, subject to the following conditions:
    a. That the floor area of such stands does not exceed four hundred (400) square feet
    b. That the stand be located not closer than fifty-five (55) feet from the centerline of any public road, street or highway right-of-way
    c. That the stand is exclusively of wood frame construction and erected in such a manner that said stand can be readily removed by means of skids or some other device
    d. That the owner remove such stand at his own

expense when said stand is not in use for a period of thirty (30) days

13. Accessory buildings, structures and uses, customary and incidental to the above uses.

C. Oil and gas drilling and production shall be permitted according to the provisions of Section 7242 of this Chapter.

D. Additional uses may be permitted by the Planning Commission according to the provisions of Section 7281 and Section 7282 of this Chapter.

Section 7162. Building Height, Front, Side and Rear Yards, Area Requirements and Distance Between Buildings On The Same Lot. None, except that on parcels or lots of less than ten thousand (10,000) square feet in area, said regulations shall be the same as required in the R-3 zone; and provided that all buildings shall be located not nearer than sixty (60) feet from the center line of any public street or highway.

ARTICLE 19

A-2 ZONE

Section 7170. A-2 General Agricultural Zone. The regulations set forth in this Article shall apply in the A-2 general agricultural zone unless otherwise provided in this Chapter.

Section 7171. Uses Permitted.

A. Any use permitted in the A-1 zone.

B. All agricultural and grazing uses, including cattle feed yards, dairies and animal sales yards.

C. Oil and gas drilling and production shall be permitted according to the provisions of Section 7242 of this Chapter.

D. Additional uses may be permitted by the Planning Commission according to the provisions of Section 7281 and Section 7282 of this Chapter.

Section 7172. Building Height, Front, Side and Rear Yard, Area Requirements and Distance Between Buildings On The Same Lot. None, except that on parcels or lots of less than ten thousand (10,000) square

feet in area, said regulations shall be the same as required in the R-3 zone; and provided that all buildings shall be located not nearer than sixty (60) feet from the centerline of any public street or highway.

ARTICLE 20

R-F ZONE

Section 7180. R-F Recreational-Forestry Zone. The regulations set forth in this Article shall apply in the R-F recreational-forestry zone unless otherwise provided in this Chapter.

Section 7181. Uses Permitted.

A. Any use permitted in the R-1 zone.

B. Any of the following uses:

1. Forest industries and production of forest products
2. Grazing and other agricultural uses except feed lots, provided that no clearing operation or spoilation of forested areas is involved in connection with such uses.
3. Hunting and fishing cabins
4. Harvesting of any wild crop such as berries, fruits, seeds, ferns, moss and hay.
5. Nurseries and greenhouses but not including any salesrooms or other buildings used for the sale of the products produced
6. Public utility or public service buildings, structures and uses
7. Public and private parks, playgrounds, campgrounds, clubs, golf courses, museums, libraries, churches, schools, forest stations and community centers
8. Recreational camps and resorts
9. Riding stables and boat liveries
10. Development of natural resources including mines, quarries and gravel pits but excluding the drilling for or producing of oil, gas or other hydrocarbon substances

11. Directional signs of not to exceed six (6) square feet in area, but not including commercial advertising

C. Oil and gas drilling and production shall be permitted by the Planning Commission according to the provisions of Section 7244 of this Chapter.

D. Additional uses may be permitted by the Planning Commission according to the provisions of Section 7281 and Section 7282 of this Chapter.

Section 7182. Building Height, Front, Side and Rear Yards, Area Requirements and Distance Between Building On the Same Lot. None, except that all buildings shall be located not nearer than sixty (60) feet from the centerline of any public street or highway; and parcels containing less than ten thousand (10,000) square feet in area shall be subject to the requirements of the R-1 zone.

ARTICLE 21

U ZONE

Section 7190. U Unclassified Zone. The regulations set forth in this Article shall apply in the U Unclassified Zone. All provisions of this Chapter inconsistent with this Article 21 shall be inapplicable to the U Unclassified Zone.

Section 7191. Uses Permitted. Notwithstanding any other provision in this Chapter to the contrary, all uses not otherwise prohibited by law are permitted in the U zone.

Section 7192. Building Height, Front, Side and Rear Yards, Area Requirements and Distance Between Buildings On The Same Lot. None.

ARTICLE 22

P ZONE

Section 7200. P Automobile Parking Zone. Land classified in a P zone may also be classified in either an A, E or R Zone and the regulations set forth in this Article shall apply in the P automobile parking zone unless otherwise provided in this Chapter.

Section 7201. Uses Permitted.

A. Any use permitted in the A, E, or R Zone in which the land is classified and when so used subject to all of the provisions contained in the sections defining said zone.

B. Open air, temporary parking of transient automobiles, except trucks of over fifteen hundred (1500) pounds capacity. All such parking areas shall be surfaced with a bituminous surface treatment or other surfacing of a higher type, and adequate drainage shall be provided. Where such parking area abuts property classified for R or E uses, it shall be separated therefrom by a solid masonry wall six (6) feet in height, provided said wall, from the front property line to a depth equal to the required front yard on the abutting R or E classified property, shall be four (4) feet in height. Where such parking area abuts a street, it shall be separated therefrom by an ornamental fence, wall or compact eugenia or other evergreen hedge having a height of not less than two (2) feet and maintained at a height of not more than four (4) feet. Such fence, wall or hedge shall be maintained in good condition.

Each entrance and exit to a parking lot shall be constructed and maintained so that any vehicle entering or leaving the parking lot shall be clearly visible at a distance of not less than ten (10) feet to a person approaching such entrance or exit on any pedestrian walk or foot path. Exits from parking lots shall be clearly posted with "Stop" signs and it shall be unlawful for a motorist to fail to stop at such sign before leaving the parking lot. Appropriate bumper guards, entrance and exit signs, and directional signs shall be maintained where needed. Any lights used to illuminate such parking area shall be so arranged as to reflect the light away from adjoining premises and streets.

ARTICLE 23

D ZONE

Section 7210. D Architectural Design Zone. Land classified in a D zone shall also be classified in another zone and the regulations set forth in this Article shall also apply in the D architectural design

zone unless otherwise provided in this Chapter.

Section 7211. Architectural Standards. In order that buildings, structures, signs and landscaping will be in harmony with other structures and improvements in the area, and not of obnoxious, undesirable or unsightly appearance, the following items may be considered in approving plans of proposed improvements in the architectural design zone.

1. The height, bulk and area of buildings
2. The setback distances from all property lines
3. The colors and materials on the exterior
4. The type and pitch of roofs
5. The size and spacing of windows, doors and other openings
6. The size, type and location of signs
7. Towers, chimneys, roof structures, flagpoles, radio and television masts
8. Plot plan, landscaping and automobile parking areas
9. The relation to the existing buildings and structures in the general vicinity and area
10. Lighting of buildings, signs and grounds.

Section 7212. Procedure. Plans of the exterior architectural design and appearance of all buildings and structures, plot plans, landscape plans, advertising sign plans, parking area plans and building setback plans shall be subject to the approval of the Planning Commission or its designated representative in order that the proposed buildings, structures, signs and landscaping will be in harmony with other structures and improvements in the area, and not of obnoxious, undesirable or unsightly appearance.

In the event it is determined that such proposed structures are inharmonious or unsightly in appearance, the Planning Commission, or its designated representative, shall confer with the applicant in an endeavor to have the plans changed so that the structures will be harmonious and attractive in appearance. In case the applicant is not satisfied with the action of the Planning Commission or its designated

representative, he may, within thirty (30) days after such action, appeal in writing to the Board of Supervisors. Said Board of Supervisors shall hold a public hearing on said appeal and shall render its decision thereon within thirty (30) days after the filing thereof. Upon approval by the Board of Supervisors, the building permit shall be issued provided all other requirements of law have been complied with.

Section 7213. Application. The provisions of the D Architectural Design Zone shall be applicable only in the vicinity of civic centers, public parks, and public buildings and grounds as provided in Section 65800(d) of the Government Code (Conservation and Planning Law), provided, however, that it may be applied elsewhere if requested by the owner or owners of property involved.

ARTICLE 24

H ZONE

Section 7220. H Airport Approach Height Zone. Land classified in an H zone shall also be classified in another zone and the additional regulations set forth in this Article shall apply in the H airport approach height zone unless otherwise provided in this Chapter.

Section 7221. Airport Zoning Commission. The Planning Commission is hereby appointed as the Airport Zoning Commission of the County of Kern with all the powers and duties specified by the Airport Approaches Zoning Law of the State of California, Chapter 1741, Statutes of 1953, now included in Sections 50485 to 50485.14, inclusive, of the Government Code, or any amendments thereto.

Section 7222. Procedure. No building or structure, including all super-structures and appurtenances, shall be erected, moved, altered or reconstructed, nor shall any plant or tree be allowed to grow in such a manner, so that the height thereof will constitute a hazard to the safe landing or take-off of aircraft using the airport in the district subject to these regulations. The height limit thus imposed shall be determined in each case by the Planning Commission and shall be governed by and not more restrictive than those imposed by Civil

Aeronautics Administration Technical Standard Order N18, "Criteria for Determining Obstructions to Air Navigation," dated April 26, 1950, as amended. A copy of said Technical Standard Order N18, with amendments, shall be on file in the office of the Planning Commission. In no event shall the provisions of this Section prevent the erection or maintenance of a building, structure or tree, no part of which exceeds thirty-five (35) feet in height. Permits issued for buildings and structures in areas subject to Airport Approach zones shall specify the height limitations of such buildings or structures as set forth in this Section.

The proceedings for classifying any land in the H Airport Approach Height Zone shall comply with the provisions of said Airport Approaches Zoning Law.

ARTICLE 25

B ZONE

Section 7230. B Buffer Zone. Land classified in a B Zone may also be classified in another zone, except in the C and M zones, and the regulations set forth in this Article shall apply in the B buffer zone unless otherwise provided in this Chapter.

Section 7231. Uses Permitted.

A. Any use permitted in the other respective zone in which the land is classified and with which the B zone is combined, provided, however, as follows:

1. No outdoor advertising sign or outdoor advertising structure shall be placed and/or maintained in any B zone, provided, however, that there may be displayed on the premises occupied by any permitted business use which is located in any B zone outdoor advertising signs and outdoor advertising structures for the advertising only of such business; and the total area for all outdoor advertising signs and outdoor advertising structures in the aggregate displayed by or for any one place of business shall not exceed

the equivalent of one (1) square foot for each one (1) foot of frontage actually occupied by such business, including the widths of driveways directly appurtenant thereto.

2. No junk, salvage or auto wrecking yard shall be established in any B zone unless the same is completely enclosed within a building or within a fence approved by the Planning Commission.

B. The following additional uses, if not permitted in the other zone, may be permitted in a B zone upon the granting of a conditional use permit:

1. Automobile parking areas
2. Automobile service stations
3. Directional or informational signs of a public or quasi-public nature
4. Drug stores
5. Garages, public, including repairing and servicing
6. Grocery, fruit and vegetable stores
7. Hotels, apartment houses and multiple residences
8. Motels, auto courts and tourist courts
9. Meat markets or delicatessen stores
10. Professional offices
11. Restaurants, tea rooms and cafes

Section 7232. Building Height, Front, Side and Rear Yards, Area Requirements and Distance Between Buildings On The Same Lot. None, except that on parcels or lots of less than ten thousand (10,000) square feet in area, said regulations shall be the same as required in the R-3 zone; and provided that all buildings, except temporary stands, shall be located not nearer than ninety (90) feet from the centerline of any public street or highway.

ARTICLE 26

OIL AND GAS PRODUCTION

Section 7240. Oil and Gas Production. It hereby is declared to be the purpose and objective of Article 26 of the Land Use Zoning Ordinance of the County of Kern to establish reasonable limitations, safeguards and controls with respect to the future drilling for, development and production of oil, gas and other hydrocarbon substances within the unincorporated territory of the County of Kern.

Such limitations, safeguards and controls are deemed necessary in the public interest to insure practices which will permit the economic recovery of the maximum amount of oil, gas and other hydrocarbon substances but which will also take into consideration the surface uses of land as such uses are indicated by the value and character of the existing improvements in or near localities where oil and gas operations are conducted, the desirability of the area for residential or other uses, and other factors relating to the public health, comfort, safety and general welfare.

It is recognized that in regulating the surface uses of land for the development of such natural resources it is in the public interest that such regulations be of a character designed to impose the minimum burdens consistent with the maximum enjoyment of each use.

Section 7241. Oil Drilling Permitted In Specific Zones. Notwithstanding the provisions of any other part of this Chapter, oil wells or well holes for the exploration for, development and production of oil, gas and other hydrocarbon substances may be drilled, operated and maintained, together with the installation and use of such equipment, structures and facilities as are necessary or convenient for such purposes, including but not limited to the initial separation of oil, gas and water, and for the storage, handling, recycling and transportation of such oil, gas and water to and from the premises in the unincorporated territory of the County of Kern, and the owner or operator thereof shall not be required to obtain any permit or variance as a condition precedent therefor, except as in this Article hereinafter

provided. However, variance may be granted to the provisions of this Article 26 according to the provisions of Article 29 of this Chapter.

Section 7242. Unrestricted Drilling. In the U Unclassified Zone, M-3 General Manufacturing Zone, A-2 General Agricultural Zone and A-1 Light Agricultural Zone the following conditions shall apply.

No review or permit shall be required for the drilling of any well hole for the exploration for, development and production of oil, gas and other hydrocarbon substances, or the installation of equipment, structures and facilities incidental thereto provided that all drilling installations and operations shall conform to State law and to fire and safety ordinances or regulations of the County of Kern in force and effect and applicable, provided, further, that drilling shall not be commenced within one hundred (100) feet of any residence then in existence without the written consent of the owner thereof.

Section 7243. Drilling By Conditional Use Permit. In the R-1 One Family Dwelling Zone, R-2 Two Family Dwelling Zone, R-3 Limited Multiple Family Dwelling Zone, R-4 Multiple Family Dwelling Zone, R-S Suburban Residential Zone, E-1 Estate Zone, E-2 Estate Zone, E-3 Estate Zone, C-O Professional Office Zone, C-1 Limited Commercial Zone and C-2 Commercial Zone the following conditions shall apply.

No person, firm or corporation shall conduct the drilling of any well hole or holes for the exploration for, development and production of oil, gas and other hydrocarbon substances, or install any equipment, structures and facilities incidental thereto, in or upon lands within the zones above specified in Section 7243, without first having applied for and obtained, by payment of the fee hereinafter provided, a conditional use permit from the Planning Commission so to do. No plant for the refining of petroleum products from such operation shall be permitted hereunder. The procedure for filing of applications, investigation, notices, public hearings, findings and appeal shall be the same as herein provided for variances, in Sections 7274, 7276, 7277, 7278 and 7279 of this Chapter, except that the

Planning Commission may waive public hearing if all the owners of surface rights within three hundred (300) feet of the proposed site consent in writing. Such permit shall provide that all drilling and producing operations shall conform to conditions No. 1 to No. 10, inclusive, as hereinafter set forth, and one or more of conditions No. 11 to No. 15, inclusive, if applicable and determined as hereinafter set forth, except that upon request of the applicant, at or subsequent to the time the permit is issued, the Planning Commission, by specific action in each instance, may waive any one or more of such conditions if it finds that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity thereof:

1. That no oil or gas well shall be drilled within one hundred (100) feet of any public highway or within one hundred and fifty (150) feet of any residence constructed prior to the commencement of such drilling, without the written consent of the owner thereof.

2. That all drilling and producing operations shall conform to all applicable fire and safety regulations.

3. That no signs, other than directional and warning signs and those required for identification of the well shall be constructed, erected, maintained or placed on the premises or any part thereof except those required by law or ordinance to be displayed in connection with the drilling or maintenance of the well.

4. That suitable and adequate sanitary toilet and washing facilities, approved by the Kern County Health Department, shall be installed and maintained in a clean and sanitary condition at all times.

5. That proven technological improvements generally accepted and used in drilling and production methods shall be adopted as they may become from time to time available if capable of reducing factors of nuisance and annoyance.

6. That the derrick, all boilers and all other drilling equipment used pursuant to this section to drill any well hole or to repair, clean out, deepen or redrill any completed or drilling well,

shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derrick, boilers and drilling equipment are to be used, within a reasonable time limit determined by the Planning Commission, for the drilling of another well or wells on the premises.

7. That after any well has been placed on production no earthen sumps shall be used for the storage of petroleum.

8. That within ninety (90) days after any well has been placed on production or after its abandonment earthen sumps used in drilling or production or both, unless such sumps are to be used, within a reasonable time limit determined by the Planning Commission, for the drilling of another well or wells, shall be filled and the drilling site restored as nearly as practicable to a uniform grade.

9. That any derrick used for servicing operations shall be of the portable type, provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable type derrick will not properly service such well, the Planning Commission may approve the use of a standard type of derrick.

10. That prior to the drilling, redrilling or deepening of any well, the permittee shall file with the Board of Supervisors a satisfactory corporate surety bond in favor of the County of Kern in the sum of Five Hundred Dollars ($500) per well or Twenty-five Hundred Dollars ($2500) for five or more wells, executed by such permittee as principal and by an authorized surety company as surety, conditioned that the principal named in the bond shall faithfully comply with all the provisions of this section in drilling, redrilling, or deepening any well or wells covered by the bond, and shall secure the County of Kern against all losses, charges and expenses incurred by it to obtain such compliance by the principal named in the bond.

The following additional conditions No. 11 to No. 15, inclusive, may be added by the Planning Commission if deemed necessary or desirable to protect the public health, safety, comfort, convenience

and general welfare.

11. That all oil or gas produced shall be carried away by pipelines or, if produced into and shipped from tanks located on the premises, such tanks shall be surrounded by shrubs or trees, planted and maintained so as to develop attractive landscaping and, insofar as practicable, screen such tanks from public view.

12. That, except in case of emergency, no materials, equipment, tools or pipe used for either drilling or production operations shall be delivered to or removed from the drilling site, except between the hours of 8:00 A.M. and 8:00 P.M. of any day.

13. That adequate fire fighting apparatus and supplies, approved by the County Fire Department, shall be maintained on the drilling site at all times during drilling and production operations.

14. That pumping wells shall be operated by electric motors or muffled internal combustion engines, and the height of all pumping units shall be not more than twenty (20) feet. All permanent equipment shall be painted and kept in neat condition. All producing operations shall be as free from noise as possible with modern oil operations.

15. That the drilling site shall be fenced or landscaped as prescribed by the Planning Commission.

If a producing well is not secured upon land subject to said permit within twelve (12) months from the date of issuance of said permit, or within any extended period thereof, the permit shall expire and the premises shall be restored to their original condition as nearly as practicable so to do. No permit shall expire, however, while the permittee is continuously conducting drilling, redrilling, completing or abandoning operations, or related operations, in a well on the lands covered by such permit, which operations were commenced while said permit was otherwise in effect. For the purposes hereof, continuous operations are operations suspended not more than thirty (30) consecutive days. If at the expiration of said twelve (12) months period the permittee has not completed his drilling program on the lands covered by such permit, the Planning Commission may, upon a written

request of permittee, extend the permit for the additional time requested by permittee for the completion of such drilling program.

Section 7244. Drilling By Counter Permit. In the M-1 Limited Manufacturing Zone, M-2 Light Manufacturing Zone and the R-F Recreational-Forestry Zone the following conditions shall apply.

No person, firm or corporation shall drill any well hole for the exploration for, development and production of oil, gas and other hydrocarbon substances, or install any equipment, structures and facilities incidental thereto without first having applied for and obtained, by payment of the fee hereinafter provided, an oil well counter permit from an authorized employee of the Planning Commission. Said permit shall provide that all drilling and producing operations shall conform to conditions No. 1 to No. 10, inclusive, as specified in Section 7243 except that upon request of the applicant, at or subsequent to the time the permit is issued, the Planning Commission, by specific action in each instance, may waive any one or more of such conditions if it finds that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity thereof. No plant for the refining of petroleum products from such operation shall be permitted hereunder.

Section 7245. Filing Fee For Oil Well Drilling. No fee shall be collected for unrestricted drilling under the provisions of Section 7242.

The County shall charge and collect the following fees for the purpose of defraying the expenditures incidental to the proceedings described in this Article 26.

A. A fee of Thirty-five Dollars ($35.00) shall be collected for each Conditional Use Permit granted under the provisions of Section 7243. An additional fee of Thirty-five Dollars ($35.00) shall be paid by the permittee for each well (after the first well) drilled upon lands covered by a Conditional Use Permit.

B. A fee of Five Dollars ($5.00) shall be collected for each Counter Permit issued under the provisions of Section 7244. An additional fee of Five Dollars ($5.00) shall be paid by the permittee

for each additional well (after the first well) drilled upon lands covered by a Counter Permit.

ARTICLE 27

GENERAL PROVISIONS

Section 7250. General Provisions. The regulations specified in this Chapter shall be subject to the following interpretations and exceptions.

Section 7251. Less Restrictive Uses Prohibited. The express enumeration and authorization in this Chapter of a particular class of building, structure, premises or use in a designated zone shall be deemed a prohibition of such building, structure, premises or use in all zones of more restrictive classification, except as otherwise specified.

Section 7252. Additional Permitted Uses. Uses other than those specifically mentioned in this Chapter as uses permitted in each of the zones may be permitted therein, provided such uses are similar to those mentioned and are in the opinion of the Board of Supervisors, as evidenced by a resolution in writing, after a report and recommendation by the Planning Commission, not more obnoxious or detrimental to the welfare of the community than the permitted uses specifically mentioned in the respective zones.

Section 7253. Additional Excluded Uses. Uses other than those specifically mentioned in this Chapter as uses excluded from any zone may be excluded therefrom provided such uses are in the opinion of the Board of Supervisors, as evidenced by a resolution in writing, after a report and recommendation by the Planning Commission, not less obnoxious or detrimental to the welfare of the community than the excluded uses specifically mentioned in any zone.

Section 7254. Non-Conforming Buildings and Uses. The following regulations shall apply to all non-conforming buildings and structures or parts thereof and uses existing at the effective date of this Chapter, provided however, that these regulations shall not apply in the U-Zone.

A. Any such non-conforming building or structure may be continued and maintained provided there is no physical change other than necessary maintenance and repair in such building or structure except as permitted in other sections of this Chapter.

B. Any such non-conforming use may be maintained and continued provided there is no increase or enlargement of the area, space or volume occupied or devoted to such non-conforming use, except as otherwise provided in this Chapter.

C. Any part of a building, structure or land occupied by such a non-conforming use which is changed to or replaced by a use conforming to the provisions of this Chapter shall not thereafter be used or occupied by a non-conforming use.

D. Any part of a building, structure or land occupied by such a non-conforming use, which use is abandoned, shall not again be used or occupied for a non-conforming use. Any part of a building, structure or land occupied by such a non-conforming use, which use shall have ceased for a period of one (1) year or more, shall not again be used or occupied for a non-conforming use.

E. If no structural alterations are made, a non-conforming use of a building may be changed to another non-conforming use of a more restrictive classification.

F. Every non-conforming use of land (where no main building is involved) existing at the time this Chapter becomes effective shall be discontinued within three (3) years from the effective date of this Chapter, except that this provision shall not apply to public utility structures of companies under the jurisdiction of the Public Utilities Commission of the State of California.

G. Any sign, billboard, commercial advertising structure or statuary which is lawfully existing and maintained at the time this Chapter becomes effective may be continued, although such use does not conform with the provisions hereof; provided, however, that no structural alterations are made thereto, and provided further that all such non-conforming signs, billboards, commercial advertising

structures or statuary and their supporting members, shall be completely removed from the premises not later than three (3) years from the effective date of this Chapter.

H. Anything in this Chapter to the contrary notwithstanding, land which is being used, or heretofore has been used, for the drilling for, production of or handling of oil, gas and other hydrocarbons, may continue in such use regardless of the land use zone in which it is located, and such use shall not be considered a non-conforming use in said zone, provided that this exception to the non-conforming use provisions of this Chapter shall not apply to oil wells, oil well structures, appurtenances or equipment which have been abandoned and the use thereof discontinued for a period of twelve (12) successive months.

Section 7255. Subsequent Non-Conformance. The foregoing provisions of Section 7254 shall also apply to buildings, structures, land or uses which hereafter become non-conforming due to any reclassifications of zones under this Chapter or any subsequent change in the regulations of this Chapter, provided, however, that where a period of years is specified in said Section for the removal of non-conforming buildings, structures or uses, said period shall be computed from the date of such reclassification or change.

Section 7256. Building Under Construction. Any building or structure for which a building permit has been issued prior to the effective date of this Chapter may be completed and used in accordance with the plans, specifications and permits on which said building permit was granted, if construction is commenced within sixty (60) days after the issuance of said permit and diligently prosecuted to completion.

Section 7257. Reconstruction of Damaged Non-Conforming Building. Nothing in this Chapter shall prevent the reconstruction, repairing or rebuilding and continued use of any non-conforming building or structure partially damaged by fire, collapse, explosion or acts of God, subsequent to the effective date of this Chapter, wherein the

expense of such reconstruction does not exceed one hundred and fifty (150) percent of the assessed value of the building or structure at the time such damage occurred. All such reconstruction shall be performed under one building permit, started within a period of one (1) year from date of damage and diligently prosecuted to completion.

Section 7258. Non-Conforming Uses Resulting from Amendments. The provisions of this Chapter shall apply to uses which become non-conforming by reason of any amendments to this Chapter, as of the effective date of such amendment.

Section 7259. Modernization. Nothing in Article 27 or otherwise in this Chapter shall be construed or applied so as to prevent the expansion, modernization, replacement, reconstruction, repair, or rebuilding and continued use of public utility buildings, structures, equipment and facilities where there is no change of use or increase in area of the land so used.

Section 7259.1. Location of Dwelling. Except where otherwise provided for in this Chapter, every dwelling shall face or have frontage upon a street or permanent means of access to a street by way of a public or private easement or passageway other than an alley.

Section 7259.2. Height of Buildings. No penthouse or roof structures for the housing of elevators, stairways, tanks, ventilating fans or similar equipment, towers, steeples, roof signs or other structures shall exceed the height limit provided in this Chapter. Radio and television masts, flagpoles, chimneys and smokestacks may extend not more than forty-five (45) feet above the height limit provided in this Chapter, provided that the same may be safely erected and maintained at such height in view of the surrounding conditions and circumstances.

Section 7259.3. Dwelling and Other Occupancies. Where a dwelling is located, placed or erected above another type of use in zones other than R-1, R-2, R-3, R-4, R-S, E-1, E-2 or E-3 zones, the rear and side yards for the floors occupied for dwelling purposes shall comply with the provisions of the R-4 zone.

Section 7259.4. Accessory Buildings. The following regulations shall apply to the location of accessory buildings unless otherwise provided in this Chapter:

A. No detached accessory buildings in the R-1, R-2, R-3, R-4, R-S, E-1, E-2 or E-3 zones may exceed two (2) stories, or thirty-five (35) feet in height.

B. No detached accessory buildings in the R-1, R-2, R-3, R-4, R-S, E-1, E-2 or E-3 zones shall be located at a distance less than sixty (60) percent of the depth of the lot from the front property line, or ninety (90) feet, whichever is less.

C. On a corner lot no detached accessory buildings in the R-1, R-2, R-3, R-4, R-S, E-1, E-2 or E-3 zones shall be located at a distance less than ten (10) feet from the side street line.

D. No accessory buildings in the R-1, R-2, R-3, R-4, R-S, E-1, E-2 or E-3 zones, if two (2) stories in height, shall be located nearer than five (5) feet to any interior property line.

E. No accessory buildings on the rear twenty-five (25) feet of a reversed corner lot in the R-1, R-2, R-3, R-4, R-S, E-1, E-2 or E-3 zones shall be located nearer to the side lot line on the street side of such reversed corner lot than the front yard depth required on the key lot in the rear.

F. A private garage of not to exceed six hundred (600) square feet may be a part of the main building if the garage and the main building have a common wall of not less than five (5) feet in length, or if not more than four (4) feet from the main building and connected thereto by a roof of not less than five (5) feet in width.

G. One detached accessory building for use as a private garage may be permitted to occupy the required front yard of an interior lot in the R-1, R-2, R-3, R-4, R-S, E-1, E-2 and E-3 zones, when the slope of the front half of such lot is greater than one (1) foot rise or fall in a horizontal distance of four (4) feet from the established street elevation at the front property line, provided, however, that no portion of any such building shall be less than five (5) feet from

the side or front line of the lot and further provided that no such building shall exceed ten (10) feet in height.

Section 7259.5. Additional Dwelling Units. Notwithstanding any other provisions of this Chapter, where a lot in the R-1 zone has an area of twelve thousand (12,000) square feet or more and with adequate provisions for ingress and egress, a conditional use permit may be granted by the Planning Commission for the construction of additional one-family dwellings and allowable accessory buildings; however, the minimum site area shall be six thousand (6,000) square feet of lot area per each one-family dwelling. Notwithstanding any other provisions of this Chapter, where a lot in the R-2 zone has an area of nine thousand (9,000) square feet or more and with adequate provisions for ingress and egress, a conditional use permit may be granted for the construction of additional family dwelling units and allowable accessory buildings, however, the minimum site area shall be three thousand (3,000) square feet of lot area per each family dwelling unit.

The procedure for filing of applications, filing fees, investigation, notices, public hearings and findings shall be the same as herein provided for variances.

Section 7259.6. Through Lots. On through lots, either line separating such lot from a public thoroughfare may be designated by the owner as the front lot line. In such cases, the minimum rear yard shall be the average of the yards on lots next adjoining. If such lots next adjoining are undeveloped, the minimum rear yard shall conform to the front yard setback for the zone in which the property is located.

Section 7259.7. Yard Encroachments. Where yards are required in this Chapter, they shall be not less in depth or width than the minimum dimension specified for any part, and they shall be at every point open and unobstructed from the ground upward, except as follows:

A. Cornices, canopies, eaves, or other similar architectural features not providing additional floor space within the building may extend into a required front, side or rear yard not to exceed three (3) feet.

B. Open, unenclosed, uncovered porches, platforms or landing places which do not extend above the level of the first floor of the building, may extend into any front, side, or rear yard not more than six (6) feet; provided, however, that an open work railing, not more than thirty (30) inches in height, may be installed or constructed on any such porch, platform or landing place.

C. Detached accessory buildings may occupy front, side and rear yards except as provided in Section 7259.4 of this Chapter.

Section 7259.8. Fences, Walls and Hedges.

A. In the R-1, R-2, R-3, R-4, R-S, E-1, E-2 and E-3 zones no fence, wall or hedge located in the rear or side yards shall exceed a height of six (6) feet.

B. In the R-1, R-2, R-3, R-4, R-S, E-1, E-2 and E-3 zones no fence, wall or hedge located in the required front yard shall exceed a height of four (4) feet.

C. In the R-1, R-2, R-3, R-4, R-S, E-1, E-2 and E-3 zones no fence, wall or hedge located within twenty-five (25) feet of the rear line of a reversed corner lot between the street and the established setback line on the key lot, to the rear, shall exceed a height of four (4) feet.

D. In the R-1, R-2, R-3, R-4, R-S, E-1, E-2 and E-3 zones no barbed wire shall be used or maintained in or about the construction of a fence, wall or hedge along the front, side or rear lines of any lot, or within three (3) feet of said lines, and no sharp wire or points shall project at the top of any fence or wall less than six (6) feet in height.

Section 7259.9. Storage in Yards. No portion of any required front yard, or side yard on the street side of a corner lot, shall be used for the permanent storage of motor vehicles, trailers, airplanes, boats, parts of any of the foregoing, or building materials (except building materials for use on the premises stored thereon during the time a valid permit is in effect for construction on the premises). Permanent storage, as used in this section, means the presence for a

period of forty-eight (48) or more consecutive hours in the required front or side yard.

Section 7259.10. Public Utility Uses. The provisions of this Chapter shall not be construed to apply to the construction, installation, operation and maintenance of public utility distribution and transmission lines, towers and poles and underground facilities for providing gas, water, electricity or telephone and telegraph services by public utility companies under the jurisdiction of the Public Utilities Commission of the State of California; provided, however, before any right-of-way for transmission lines is acquired, the proposed route shall be submitted to the Planning Director for review and recommendation.

ARTICLE 28

AUTOMOBILE PARKING REQUIREMENTS

Section 7260. Automobile Parking Requirements. For each dwelling, multiple dwelling, business or industrial establishment or other structure hereafter erected, there shall be provided and maintained off-street parking facilities to accommodate the motor vehicles used by the occupants, customers, clientele and employees of such dwelling, multiple dwelling, business or industrial establishment or structure. Each required parking space shall be not less than eight (8) feet wide and twenty (20) feet long, and in addition there shall be adequate space for ingress and egress. The number of parking spaces for each type of use shall be not less than that stated in the following.

Section 7261. One-Family, Two-Family and Multiple Dwellings. For every dwelling, multiple dwelling or other structure erected or intended to be used as a dwelling, there shall be provided on the same lot or parcel of land one (1) parking space for each dwelling unit.

Section 7262. Rooming Houses, Lodging Houses, Clubs, Fraternity Houses, and Dormitories. For each two (2) guest rooms there shall be provided one (1) parking space. Each such parking space shall be on the same lot or parcel of land or contiguous thereto.

Section 7263. Auto Courts, Tourist Courts, Hotels and Motels. One (1) parking space shall be provided for each living or sleeping

unit on the same lot or parcel of land or contiguous thereto, except that parking space for hotels shall be on the same lot or within five hundred (500) feet of the building.

Section 7264. Hospitals, Sanitariums, Convalescent Homes and Homes For the Aged. One (1) parking space shall be provided for each one thousand (1,000) square feet of floor space or fraction thereof on the same lot or parcel of land or contiguous thereto.

Section 7265. Auditoriums. For church, high school, college or university auditoriums and for theatres, general auditoriums and other similar places of assembly one (1) parking space shall be provided for every five (5) seats provided in such building. A seat shall mean eighteen (18) lineal inches of seating space when seats are arranged in rows of pews. For auditoriums with no permanent seats, a seat shall mean seven (7) square feet of floor area. Each such parking space shall be on the same lot or within five hundred (500) feet of the building.

Section 7266. Amusements. For stadiums, arenas and fairs one (1) parking space shall be provided for each four (4) seats of eighteen (18) lineal inches each.

For dance halls one (1) parking space shall be provided for each one hundred (100) square feet of floor area or fraction thereof.

For bowling alleys four (4) parking spaces shall be provided for each alley.

Each such parking space shall be on the same lot or within five hundred (500) feet of the building or amusement area.

Section 7267. Commercial and Industrial Buildings. For all office, commercial and industrial buildings one (1) parking space shall be provided for each five hundred (500) square feet of floor space or fraction thereof.

Each such parking space shall be on the same lot or within five hundred (500) feet of the building.

Section 7268. Loading Space. On the same premises with every building, structure or part thereof erected or occupied for manufac-

turing, storage, warehouse, goods display, department store, wholesale or retail market, hotel, restaurant, hospital, laundry, dry cleaning plant, or other uses similarly involving the receipt or distribution of vehicles carrying materials or merchandise, there shall be provided and maintained on the lot adequate space for standing, loading and unloading services in order to avoid undue interference with the public use of the streets or alleys. Required loading space may be included within the required parking space adjacent to a building.

Section 7269. Miscellaneous Provisions. Nothing in this Chapter shall prohibit the collective use of space for off-street parking, provided such collectively used space is equal to the sum of the requirements of each individual establishment participating in such collective use.

When the required off-street parking space is provided on a separate lot from the main building, there shall be recorded in the office of the County Recorder of Kern County, California, a covenant by the owner or owners of said lot for the benefit of the County of Kern to the effect that such owner or owners will continue to maintain such parking space so long as said building is maintained.

Neither a required side yard abutting a street, nor a front yard, shall be used for off-street parking, which provision shall not apply in the P Zone.

All off-street automobile parking areas including automobile sales lots, service stations and other drive-in establishments shall be surfaced with a bituminous surface treatment or other surfacing of a higher type.

The conditions for fences, walls, hedge, planting, driveways, bumper guards, lighting, setback and drainage shall be as provided for in Section 7201.

ARTICLE 29

VARIANCES, MODIFICATIONS AND ZONE CHANGES

Section 7270. Variance, Modifications and Zone Changes. The following regulations shall apply to the granting of variances, modifications and zone changes.

Section 7271. Variances. The Planning Commission, upon its own motion may, or upon the verified application of any interested person shall, in specific cases, initiate proceedings for the granting or denial, as the case may be, of a variance from the provisions of this Chapter. The Planning Commission may grant said variance only when the following circumstances are found to apply:

A. That the variance granted shall be subject to such conditions as will assure that the adjustment thereby authorized shall not constitute a grant of special privilege inconsistent with the limitations upon other properties in the vicinity and zone in which the subject property is situated.

B. That special circumstances exist which are applicable to the subject property, including size, shape, topography, location or surroundings, wherein the strict application of the zoning ordinance in question is found to deprive the subject property of privileges enjoyed by other properties in the vicinity and under identical zone classification.

All acts of the Planning Commission and Board of Supervisors under the provisions of this section shall be construed as administrative acts performed for the purpose of assuring that the intent and purpose of this Chapter shall apply in special cases, as provided in this section, and shall not be construed as amendments to the provisions of this Chapter or map.

Section 7272. Information Required. Applications for variances shall be accompanied by:

A. A plot plan and description of the property involved, showing the location of all existing and proposed buildings. Additional plans and descriptions of the proposed use of the property with ground

plans and elevations for all proposed buildings may be required at the discretion of the Planning Commission.

B. A reference to the provisions of the Chapter from which said property is sought to be excepted.

Section 7273. Amendments and Changes of Zone Boundaries. Whenever the public necessity, convenience, general welfare of good zoning practices justify such action, the Planning Commission upon its own motion, or upon the verified application of any interested person, may initiate proceedings to amend, supplement or change the zones, regulations or districts established by this Chapter.

With the exception of amendments changing property from one zone to another, or changing the boundaries of any zone, amendments may be made or new zoning maps adopted in the same manner as this Chapter was adopted.

Section 7274. Filing of Applications. Applications for variances, modifications and changes of zone shall be made in writing to the Planning Commission in such form as is approved by the Planning Commission. The Planning Commission may provide forms for such purposes and may prescribe the type of information to be provided thereon. No petition shall be received unless it complies with such requirements.

Applications filed pursuant to this Chapter shall be numbered consecutively in the order of their filing and shall become a part of the permanent official records of the Planning Commission, and there shall be attached thereto copies of all notices and actions pertaining thereto.

Section 7275. Filing Fees. Before accepting any application for filing, the County shall charge and collect the following fees for the purpose of defraying the expenditures incidental to the proceedings prescribed herein:

A. Change of Zone. For each application for a change of zone a fee of Thirty-five Dollars ($35.00) for the first lot or portion thereof, plus One Dollar ($1.00) for each additional lot or

portion thereof.

B. Variance. For each application for a variance a fee of Twenty-five Dollars ($25.00) for the first lot or portion thereof, plus One Dollar ($1.00) for each additional lot or portion thereof.

C. Modification. For each application for a modification, where no public hearing is required, a fee of Two Dollars ($2.00) for the first lot or portion thereof, plus One Dollar ($1.00) for each additional lot or portion thereof, except as hereinafter provided. Where a public hearing is required, the fees shall be the same as for a variance.

D. Appeal. For each appeal to the Planning Commission or Board of Supervisors from any order, requirement, decision or determination of the Planning Commission or Modification Committee in the administration or enforcement of the provisions of this Chapter, a fee of Two Dollars ($2.00) for the first lot or portion thereof, plus One Dollar ($1.00) for each additional lot or portion thereof.

Section 7276. Investigation. The Planning Commission shall cause to be made by its own members, or members of its staff, such investigation of facts bearing upon such application as will serve to provide all necessary information to assure that the action on each such application is consistent with the intent and purposes of this Chapter and with previous amendments or variances.

Section 7277. Notices. Following the receipt in proper form of any application filed under the provisions of this Article with the exception of an application filed pursuant to the provisions of Section 7273, the Secretary of the Planning Commission shall fix a time and place of public hearing thereon. Upon receipt in proper form of any application filed pursuant to the provisions of Section 7273, the Secretary of the Planning Commission, when directed to do so by the Planning Commission, shall fix a time and place of public hearing thereon.

Not less than ten (10) days before the date of any public hearing fixed by the Secretary of the Planning Commission as herein provided, the date of such public hearing, notice of the date, time,

place of hearing and location of the property and the nature of the request shall be given by any two of the following methods, the publishing and mailing methods to be used unless otherwise directed by the Planning Commission:

A. By publishing once in a newspaper of general circulation in the County.

B. By mailing a notice, postage prepaid, to the applicant, to each member of the Planning Commission, and to the owners of all property within three hundred feet of the exterior boundaries of the property involved, using for this purpose the last known name and address of such owners as shown upon the last assessment roll of the County.

C. By posting notices not more than three hundred (300) feet apart along each and every street upon which the property involved abuts, for a distance of not less than three hundred (300) feet in each direction from the exterior limits of such property.

Section 7278. Public Hearing. Public hearings as provided for in this Chapter and by State law shall be held before the Planning Commission at the time and place for which public notice has been given as hereinbefore required. The Planning Commission may establish its own rules for the conduct of such hearings. A summary of all pertinent testimony offered at a public hearing, together with the names and addresses of all persons testifying, shall be recorded and made a part of the permanent files of the case. Any such hearing may be continued provided that, prior to the adjournment or recess thereof, the Presiding Officer at such hearing shall announce the time and place to which such hearing will be continued.

Section 7279. Findings. Within thirty-five (35) days after the conclusion of a public hearing, the Planning Commission shall render its decision on the matter so heard. The failure of the Planning Commission to render such decision within thirty-five (35) days after the conclusion of the hearing may be deemed to constitute a denial, but in no case shall be deemed to constitute an approval.

The Planning Commission shall announce and record its actions by formal resolution, and such resolution shall recite the findings of the Planning Commission upon which it bases its decision.

A. Variance, Modifications and Conditional Use Permits.

Within five (5) days after final decision by the Planning Commission on an application for a variance, modification or conditional use permit, notices of the decision in the matter shall be mailed to the applicant at the address shown upon the application, the County Clerk, the members of the Board of Supervisors, the owners of the adjoining property and persons requesting said notice.

The granting, either with or without conditions, or the denial of such application by the Planning Commission shall be final unless within fifteen (15) days after the decision by the Planning Commission, or ten (10) days after the mailing of the required notices, whichever date is later, the applicant, or any other person aggrieved, shall appeal therefrom in writing to the Board of Supervisors by presenting such appeal to the County Clerk. At its next regular meeting after the filing of such appeal with the County Clerk, the Board of Supervisors shall set a date for a hearing thereon. The manner of setting the hearing, giving of notice and conducting the hearing shall be the same as hereinbefore prescribed for hearing by the Planning Commission. The decision appealed from shall be affirmed unless reversed by a vote of not less than a majority of all members of the Board of Supervisors.

No permit or license shall be issued for any use involved in an application for a variance, modification or conditional use permit, until same shall have become final by reason of the failure of any person to appeal or by reason of the action of the Board of Supervisors.

If the use authorized by any variance, modification or conditional use permit is, or has been, unused, abandoned, discontinued or has ceased for a period of six (6) months, or the conditions have not been complied with, said variance, modification or conditional use

permit shall become null and void and of no effect unless an extension therefore has been granted by the Planning Commission, upon written petition of the applicant for such extension before the expiration of the above period.

B. Amendments and Changes of Zone Boundaries.

Within ten (10) days after final action by the Planning Commission on an application for amendments or changes of zone boundaries, its recommendations together with the complete records of the case shall be delivered to the Board of Supervisors.

The Board of Supervisors, after receipt of the report and recommendation from the Planning Commission, shall hold a final hearing thereon. The manner of setting the hearing, giving of notice and conducting the hearing shall be the same as hereinbefore prescribed for hearings by the Planning Commission. The recommendation of the Planning Commission shall be approved unless reversed by a vote of not less than a majority of all members of the Board of Supervisors.

No permit or license shall be issued for any use involved in an application for an amendment or change of zone until same shall have become final by the adoption of an ordinance.

C. Notwithstanding any provision in Subsections A and B hereof to the contrary, at the request of the applicant, or any other interested person, the vote of the Board of Supervisors on any application for a variance, modification, conditional use permit or an amendment or change of zone boundaries, shall be deferred by the Board of Supervisors until such time as all members of the said Board of Supervisors are present and have had the opportunity to vote thereon.

Section 7279.1. Modification Committee. There is hereby created a Modification Committee composed of three (3) persons. Said committee shall consist of the Chairman of the Planning Commission, or such regular member of the Planning Commission as the Chairman may from time to time designate; the Building Official of the County of Kern or during his absence, disability or disqualification, his deputy so

designated by him; and the County Counsel or, during his absence, disability or disqualification, his deputy so designated by him.

The Secretary of the Planning Commission shall serve as Secretary of the Modification Committee, and the records of said committee shall at all times be available and subject to review by the Planning Commission. The Chairman of the Modification Committee shall be the Planning Commission member thereof. Said Modification Committee shall meet at the call of the Chairman to consider applications as provided herein and all such meetings shall be open to the public.

Section 7279.2. Authority of Modification Committee. The Modification Committee shall have authority to grant, subject to appeal to the Planning Commission and the Board of Supervisors, under the provisions of this Chapter, the following:

A. Permit the modification of the setback, yard and lot area regulations that may be necessary to secure an appropriate improvement on a lot, to prevent unreasonable hardship, or to promote uniformity of improvement; provided, however, such modification shall not grant a reduction in excess of twenty-five (25) percent of the applicable setback, yard or lot area requirements.

B. Permit the modification of fence, wall and hedge regulations that may be necessary to secure an appropriate improvement on a lot.

The Modification Committee may, at its discretion, refer to the Planning Commission any application for modification for decision by the Planning Commission without further fee to the applicant.

Section 7279.3. Procedure for Modification Committee. The procedure for acting upon applications for modifications by the Modification Committee shall be the same as the procedure for acting upon applications for variances by the Planning Commission, except that no notice of public hearing will be required if the application for such modification is accompanied by the written consent of the owners of all property abutting and of all property directly across

a street from subject property. Appeals from decisions of the Modification Committee shall be made to the Planning Commission. After action on an appeal by the Planning Commission an appeal may be made to the Board of Supervisors in the same manner as an appeal for a variance.

ARTICLE 30

CONDITIONAL USE PERMIT

Section 7280. Conditional Use Permits. The following regulations shall apply to the granting of conditional use permits.

Certain uses may be permitted by the Planning Commission and the Board of Supervisors in zones in which they are not permitted by this Chapter where such uses are deemed essential or desirable to the public convenience or welfare, and are in harmony with the various elements or objectives of the comprehensive general plan. The procedure for filing of applications, filing fees, investigations, notices, public hearings, findings and appeal shall be the same as herein provided for variances, except that the Planning Commission may waive public hearings on an application for conditional use permits for public utility or public service uses or public buildings, when found to be necessary for the public health, safety, convenience or welfare.

Section 7281. Uses Permitted In Any Zone. The following uses may be permitted in any zone upon the granting of a conditional use permit.

1. Airports or aircraft landing fields
2. Cemeteries, columbariums, crematories and mausoleums
3. Churches or other places used exclusively for religious worship
4. City, County, State and Federal enterprises, including buildings, facilities and uses of departments or institutions thereof which are necessary or advantageous to the general welfare of the community
5. Day nurseries and nursery schools
6. Educational institutions including schools, elementary or high

7. Establishments or enterprises involving large assemblages of people or automobiles, including: amusement parks, circuses, carnivals, expositions, fair grounds, open-air theatres, race tracks, recreational and sport centers
8. Hospitals, sanitariums and rest homes
9. Institutions of a philanthropic or eleemosynary nature
10. Large scale neighborhood housing projects having a minimum gross area of twenty (20) acres
11. Libraries, museums and private clubs
12. Natural resources development together with the necessary buildings, apparatus or appurtenances incident thereto, except drilling for or removal of oil, gas or other hydrocarbon substances
13. Parks, playgrounds and community buildings
14. Public utility or public service buildings, structures and uses
15. Radio and television transmitters
16. Real estate tract offices and signs
17. Golf courses and country clubs

Section 7282. Uses Permitted In Specific Zones. The following uses may be permitted in the zones herein indicated upon the granting of a conditional use permit:

1. Advertising sign boards or structures in the C-1 zone
2. Agricultural industries and the processing of agricultural products in the A-2 zone
3. Animal hospitals, kennels and veterinaries in the C-2 zone
4. Apartment hotels in the R-4 zone
5. Automobile trailer courts or camps, house or coach trailers, and public camp grounds in the C-2, M-1, M-2 and B zones

6. Commercial stockyards and animal slaughter in the A-2 and M-3 zones
7. Dairies and livestock feed yards in the A-1 zone
8. Dumps and refuse disposal areas in the A-2 and M-3 zones
9. Dwellings in the M-1, M-2 and M-3 zones
10. Equestrian establishments, including stables, riding academies, schools or amusements, in the C-2 zone
11. Fruit, vegetable and meat packing plants in the A-1 and A-2 zones
12. Hog ranches in the A-2 zone
13. Hotels, inns, motels, house or coach trailers and automobile trailer courts or camps in the R-F zone
14. Junk, salvage or auto wrecking yards in the M-2, M-3 and A-2 zones
15. Mortuaries or funeral parlors in the C-1 and A zones
16. Sewer farms or sewage disposal plants in the A-2 and M-3 zones

ARTICLE 31

ENFORCEMENT AND PENALTY

Section 7290. Enforcement. All departments, officials and public employees of the County of Kern, vested with the duty or authority to issue permits or licenses, shall conform to the provisions of this Chapter and shall issue no permit or license for uses, buildings, or purposes in conflict with the provisions of this Chapter; and any such permit or license issued in conflict with the provisions of this Chapter shall be null and void.

The provisions of this Chapter shall be administered by the Planning Commission, whose inspectors or authorized representatives shall have the right to reasonably enter upon any premises affected by this Chapter for purposes of inspection.

Any building or structure erected or maintained, or any use of property, contrary to the provisions of this Chapter shall be and the same is hereby declared to be unlawful and a public nuisance, and

the District attorney shall immediately commence actions and proceedings for the abatement, removal and enjoinment thereof, in the manner provided by law; and shall take such other steps, and shall apply to any court as may have jurisdiction to grant such relief as will abate or remove such building, structure or use and restrain and enjoin any person, firm or corporation from erecting or maintaining such building or structure, or using any property contrary to the provisions of this Chapter.

This Chapter may also be enforced by injunction issued out of the Superior Court upon the suit of the County or the owner or occupant of any real property affected by such violation or prospective violation. This method of enforcement shall be cumulative and in no way affect the penal provisions hereof.

Nothing in this Section shall be construed to authorize or permit the inspectors or representatives of the Planning Commission or any other County officer or employee to enter any building without the consent of the owner or the person in lawful possession thereof without first securing a search warrant as provided by law.

Section 7291. Penalty. Any person, firm or corporation, whether as principal, agent, employee or otherwise, violating any provision of this Chapter shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punishable by a fine of not more than Five Hundred Dollars ($500.00), or by imprisonment in the County Jail for a period of not more than six (6) months, or by both such fine and imprisonment. Each day that violation of this Chapter continues shall be considered a separate offense.

ARTICLE 32

VALIDITY AND REPEALS

Section 7300. Validity. If any section, subsection, paragraph, sentence, clause or phrase of this Chapter is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions of this Chapter. The Board of Supervisors

hereby declares that it would have passed this Chapter, and each section, subsection, sentence, clause and phrase thereof, irrespective of the fact that any one or more sections, subsections, sentences, clauses or phrases be declared invalid or unconstitutional.

Section 7301. Repeals. Subject to the provisions of Section 7300, all ordinances of the County of Kern inconsistent herewith to the extent of such inconsistency, and no further, are hereby repealed; provided that the foregoing repeal as in this Section provided shall not affect repeal of any provisions of other ordinances which impose greater restrictions or limitations.

The repeal of any of the above mentioned ordinances does not revive any other ordinance or portion thereof repealed by said ordinance.

Such repeals shall not affect or prevent the prosecution or punishment of any person for the violation of any ordinance repealed hereby for an offense committed prior to the repeal.

Ord. 6-4157

KERN COUNTY ZONING ORDINANCE

PART 7, DIVISION 1, CHAPTER 1
OF THE KERN COUNTY ORDINANCE CODE

ORDINANCE NO. G-4157

PLANNING & DEVELOPMENT SERVICES DEPARTMENT
RECEIVED
86 FEB 13 A10:21

AN ORDINANCE OF THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN, STATE OF CALIFORNIA, REPEALING AND ADDING TO PART 7 OF THE KERN COUNTY LAND USE ZONING ORDINANCE RELATING TO CHANGES IN VARIOUS ZONE CLASSIFICATIONS

The following ordinance, consisting of four (4) sections, was duly and regularly passed and adopted by the Board of Supervisors of the County of Kern, State of California, at a regular meeting of the Board of Supervisors held on the 10th day of February, 1986, by the following vote, to wit:

AYES: Ashburn, Austin, Larwood, Harvey, Shell

NOES: None

ABSENT: None

Trice Harvey
Chairman of the Board of Supervisors of the County of Kern, State of California

(SEAL)

ATTEST: SHARON DAWQUIST
Clerk of the Board of Supervisors

THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN ORDAINS AS FOLLOWS:

Section 1. This ordinance shall take effect and be in full force on and after the 11th day of March, 1986, and shall be published once in all adjudicated newspapers in Kern County, a newspaper of general circulation, published and printed in the County of Kern, State of California, together with the names of the members of the Board of Supervisors voting for and against the same.

Book No. 869067
Ord. No. G-4157

Section 2. Part 7 of the Kern County Zoning Ordinance is hereby repealed except for Article 20.2 which is being amended and renumbered by this ordinance.

Section 3. A new Part 7 of the Kern County Zoning Ordinance is hereby adopted to read as follows:

(See attached text)

Section 4. The following zone designations and classifications in the column below Tabled "Existing Zone" shall hereafter become the corresponding zone designations and classifications reflected in the column below Tabled "New Zone District":

EXISTING ZONE	NEW ZONE DISTRICT
R-1 (One-family Dwelling)	Redesignate R-1 (Low-density Residential)
R-2 (Two-family Dwelling)	Redesignate R-2 (Medium-density Residential)
R-3 (Limited Multiple-family Dwelling)	Redesignate R-3 (High-density Residential)
R-4 (Multiple-family Dwelling)	Rezone to R-3 (High-density Residential)
R-S (Suburban Residential) Freestanding R-S	Rezone to E(1/2) RS (Estate - 1/2 acre, Residential Suburban)
Combining R-S	Redesignate RS (Residential Suburban Combining)
E (10,000-square-foot Estate)	Rezone to E(1/4) (Estate - 1/4 acre)
E-1 (12,000-square-foot Estate)	Rezone to E(1/4) (Estate - 1/4 acre)
E-2 (18,000-square-foot Estate)	Rezone to E(1/2) (Estate - 1/2 acre)
E-3 (24,000-square-foot Estate)	Rezone to E(1/2) (Estate - 1/2 acre)
E-4 (One-acre Estate)	Rezone to E(1) (Estate - 1 acre)
E-5 (2 1/2-acre Estate)	Rezone to E(2 1/2) (Estate - 2 1/2 acres)
E-6 (5-acre Estate)	Rezone to E(5) (Estate - 5 acres)
E-7 (10-acre Estate)	Rezone to E(10) (Estate - 10 acres)
E-8 (20-acre Estate)	Rezone to E(20) (Estate - 20 acres)
C-O (Professional Office)	Redesignate CO (Commercial Office)
C-1 (Neighborhood Commercial)	C-1 (Neighborhood Commercial)
C-2 (Commercial)	Redesignate C-2 (General Commercial)
M-1 (Limited Manufacturing)	Redesignate M-1 (Light Industrial)
M-2 (Light Manufacturing)	Redesignate M-2 (Medium Industrial)
M-3 (General Manufacturing)	Redesignate M-3 (Heavy Industrial)
M-S (Mobilehome Subdivision)	Redesignate MS (Mobilehome Subdivision - 6,000 square feet)
M-S-1 (10,000 square feet)	Rezone to MS(1/4) (Mobilehome Subdivision - 1/4 acre)
M-S-2 (18,000 square feet)	Rezone to MS(1/2) (Mobilehome Subdivision - 1/2 acre)
M-S-3 (24,000 square feet)	Rezone to MS(1/2) (Mobilehome Subdivision - 1/2 acre)
M-S-4 (1 acre)	Rezone to MS(1) (Mobilehome Subdivision - 1 acre)
M-S-5 (2 1/2 acres)	Rezone to MS(2 1/2) (Mobilehome Subdivision - 2 1/2 acres)
M-S-6 (5 acres)	Rezone to MS(5) (Mobilehome Subdivision - 5 acres)
M-S-7 (10 acres)	Rezone to MS(10) (Mobilehome Subdivision - 10 acres)
M-S-8 (20 acres)	Rezone to MS(20) (Mobilehome Subdivision - 20 acres)

A (Exclusive Agricultural)	Redesignate A (Exclusive Agriculture)
M-P (Mobilehome Park)	Redesignate MP (Mobilehome Park)
A-1 (Light Agricultural)	Redesignate A-1 (Limited Agriculture)
A-2 (General Agricultural)	Rezone to A-1 (Limited Agriculture)
R-F (Recreational - Forestry)	Redesignate RF (Recreation-Forestry)
OS (Open Space)	OS (Open Space)
W-E (Wind Energy Overlay)	Redesignate WE (Wind Energy Combining)
NR (Natural Resource)	Rezone to NR(5) (Natural Resource - 5 acres)
NR-5 (5 acres)	Rezone to NR(5) (Natural Resource - 5 acres)
NR-10 (10 acres)	Rezone to NR(10) (Natural Resource - 10 acres)
NR-20 (20 acres)	Rezone to NR(20) (Natural Resource - 20 acres)
NR-40 (40 acres)	Rezone to NR(20) (Natural Resource - 20 acres)
P-E (Petroleum Extraction Overlay)	Redesignate PE (Petroleum Extraction Combining)
D-I (Drilling Island)	Redesignate DI (Drilling Island)
FP-P (Floodplain - Primary)	Redesignate FPP (Floodplain-Primary)
FP-S (Floodplain - Secondary)	Redesignate FPS (Floodplain-Secondary Combining)
MUD (Mudslide)	Eliminate entirely
P (Automobile Parking)	Rezone to P (Interim)
D (Architectural Design)	Redesignate D (Architectural Design Combining)
H (Airport Approach Height)	Redesignate H (Airport Approach Height Combining)
B (Buffer)	Rezone to CH (Highway Commercial)
P-D (Precise Development)	Redesignate PD (Precise Development)
T (Mobilehome)	
Freestanding	Rezone to R-1 (MH)
Combining	Rezone to MH (Mobilehome Combining)
M-H (Mobilehome on Foundation)	Redesignate MH (Mobilehome Combining)

Miscellaneous Combinations

E R-S T	Rezone to E(1/4) (MH)
E-8 R-S FP-P	Rezone to FPP
E-8 R-F	Rezone to E(20)
R-2 T	Rezone to R-2
R-4 T	Rezone to R-3
C-1 T	Rezone to C-1
C-2 T	Rezone to C-2
R-F E-8	Rezone to E(20)

KERN COUNTY ZONING ORDINANCE REVISION

DISPOSITION CHART

In addition to changes to the text of the Zoning Ordinance and to development standards in various zones, the comprehensive Zoning Ordinance revision program involves two other types of changes. The first type involves changes in zoning district designations or zoning district titles. For example (R-1 (One-family Dwelling) is changed to R-1 (Low-density Residential), R-F (Recreational Forestry) is changed to RF (Recreation-Forestry), and W-E (Wind Energy Overlay) is changed to WE (Wind Energy Combining). These are nonsubstantive changes and as the existing zoning maps are revised, the new designations will be substituted for the old.

The second type of changes can only be accomplished through rezonings. For example, R-4 is deleted in the new ordinance and all lands presently zoned R-4 are to be rezoned to R-3, and all E, M-S, and NR zones with lot sizes larger than the minimum are to be rezoned in combination with the Lot Size Combining District (e.g., E-8 becomes E(20)).

The following chart summarizes both types of proposed changes:

EXISTING ZONE	NEW DISTRICT
R-1 (One-family Dwelling)	Redesignate R-1 (Low-density Residential)
R-2 (Two-family Dwelling)	Redesignate R-2 (Medium-density Residential)
R-3 (Limited Multiple-family Dwelling)	Redesignate R-3 (High-density Residential)
R-4 (Multiple-family Dwelling)	Rezone to R-3 (High-density Residential)
R-S (Suburban Residential	
Freestanding R-S	Rezone to E (Estate 1/2 acre) (RS)
Combining R-S	Redesignate RS (Residential Suburban Combining)
E (10,000-square-foot Estate)	E (1/4) (Estate - 1/4 acre)
E-1 (12,000-square-foot Estate)	Rezone to E (1/4) (Estate - 1/4 acre)
E-2 (18,000-square-foot Estate)	Rezone to E (1/2) (Estate - 1/2 acre)
E-3 (24,000-square-foot Estate)	Rezone to E (1/2) (Estate - 1/2 acre)
E-4 (One-acre Estate)	Rezone to E (1) (Estate - 1 acre)
E-5 (2-1/2-acre Estate)	Rezone to E (2 1/2) (Estate - 2 1/2 acres)
E-6 (5-acre Estate)	Rezone to E (5) (Estate - 5 acres)
E-7 (10-acre Estate)	Rezone to E (10) (Estate - 10 acres)
E-8 (20-acre Estate)	Rezone to E (20) (Estate - 20 acres)
C-0 (Professional Office)	Redesignate CO (Commercial Office)
C-1 (Neighborhood Commercial)	C-1 (Neighborhood Commercial)
C-2 (Commercial)	Redesignate C-2 (General Commercial)
M-1 (Limited Manufacturing)	Redesignate M-1 (Light Industrial)
M-2 (Light Manufacturing)	Redesignate M-2 (Medium Industrial)
M-3 (General Manufacturing)	Redesignate M-3 (Heavy Industrial)
M-S (Mobilehome Subdivision)	Redesignate MS (Mobilehome Subdivision - 6,000 square feet)

M-S-1 (10,000 square feet)	Rezone to MS (1/4) (Mobilehome Subdivision - 1/4 acre)
M-S-2 (18,000 square feet)	Rezone to MS (1/2) (Mobilehome Subdivision - 1/2 acre)
M-S-3 (24,000 square feet)	Rezone to MS (1/2) (Mobilehome Subdivision - 1/2 acre)
M-S-4 (One acre)	Rezone to MS (1) (Mobilehome Subdivision - 1 acre)
M-S-5 (2 1/2 acres)	Rezone to MS (2 1/2) (Mobilehome Subdivision - 2 1/2 acres)
M-S-6 (5 acres)	Rezone to MS (5) (Mobilehome Subdivision - 5 acres)
M-S-7 (10 acres)	Rezone to MS (10) (Mobilehome Subdivision - 10 acres)
M-S-8 (20 acres)	Rezone to MS (20) (Mobilehome Subdivision - 20 acres)
A (Exclusive Agricultural)	Redesignate A (Exclusive Agriculture)
M-P (Mobilehome Park)	Redesignate MP (Mobilehome Park)
A-1 (Light Agricultural)	Redesignate A-1 (Limited Agriculture)
A-2 (General Agricultural)	Rezone to A-1 (Limited Agriculture)
R-F (Recreational Forestry)	Redesignate RF (Recreation-Forestry)
OS (Open Space)	OS (Open Space)
W-E (Wind Energy Overlay)	Redesignate WE (Wind Energy Combining)
NR (Natural Resource)	NR (Natural Resource - 5 acres)
NR-5 (5 acres)	Rezone to NR (Natural Resource - 5 acres)
NR-10 (10 acres)	Rezone to NR (Natural Resource - 10 acres)
NR-20 (20 acres)	Rezone to NR (Natural Resource - 20 acres)
NR-40 (40 acres)	Rezone to NR (Natural Resource 20)
P-E (Petroleum Extraction Overlay)	Redesignate PE (Petroleum Extraction Combining)
D-I (Drilling Island)	Redesignate DI (Drilling Island)
FP-P (Floodplain-Primary)	Redesignate FPP (Floodplain-Primary)
FP-S (Floodplain-Secondary)	Redesignate FPS (Floodplain-Secondary Combining)
MUD (Mudslide)	Eliminated entirely
P (Automobile Parking)	Rezone to P (Interim)
D (Architectural Design)	Redesignate D (Architectural Design Combining)

AUTHORITY, PURPOSES, AND EFFECT OF THE ZONING ORDINANCE

SECTIONS:

7000.01 CITATION
7000.02 PURPOSES OF THE ZONING ORDINANCE
7000.03 APPLICABILITY
7000.04 COMPLIANCE WITH THE ORDINANCE
7000.05 VIOLATIONS OF THE ORDINANCE
7000.06 RELATIONSHIP TO OTHER REGULATIONS AND REQUIREMENTS
7000.07 BUILDINGS UNDER CONSTRUCTION
7000.08 VALIDITY

SECTION 7000.01 CITATION

This chapter shall be known as, and may be cited and referred to as, the "Zoning Ordinance of Kern County."

SECTION 7000.02 PURPOSES OF THE ZONING ORDINANCE

The Zoning Ordinance of Kern County is adopted to promote and protect the public health, safety, and welfare through the orderly regulation of land uses throughout the unincorporated area of the County. Further, the purposes of this ordinance are to:

A. Provide the economic and social advantages resulting from an orderly planned use of land resources.

B. Encourage and guide development consistent with the Kern County General Plan.

C. Divide Kern County into zoning districts of a number, size, and location deemed necessary to carry out the purposes of the Kern County General Plan and this chapter.

D. Regulate the size and use of lots, yards, and other open spaces.

E. Regulate the use, location, height, bulk, and size of buildings and structures.

F. Regulate the intensity of land use.

G. Regulate the density of population in residential areas.

H. Establish requirements for off-street parking.

I. Regulate signs and billboards.

J. Provide for the enforcement of the regulations of this chapter.

SECTION 7000.03 APPLICABILITY

This chapter shall apply, to the extent permitted by law, to all property in unincorporated Kern County whether owned by private persons, firms, corporations or organizations; by the United States or any of its agencies; by the State of California or any of its agencies or political subdivisions; by any county or city, including the County of Kern; or by any authority or public entity organized under the laws of the State of California. Any governmental agency shall be exempt from the provisions of this chapter only to the extent that such property may not be lawfully regulated by the County of Kern.

SECTION 7000.04 COMPLIANCE WITH THE ORDINANCE

A. It shall be unlawful for any building or structure to be moved, erected, used, altered, enlarged, or rebuilt or for any use to be established or changed that does not strictly conform to the provisions of this chapter.

B. It shall be unlawful for any yard, open space, or land to be used for any purpose not specifically permitted by this chapter.

C. Any use not specifically permitted by the provisions of this chapter is prohibited. All prohibited uses specified at any place within this chapter are examples only and are not to be construed as a complete listing of all prohibited uses.

D. No department, official, or employee of the County of Kern vested with the duty or authority to issue permits or licenses for buildings, structures, or uses subject to the requirements of this chapter shall issue a permit or license in conflict with the provisions of this chapter; any permit or license issued in conflict with any provision of this chapter shall be null and void. Further, no permit or license shall be issued by any department, official, or employee of the County of Kern for any building, structure, or use subject to the requirements of this chapter on a parcel of land where the department, official, or employee is aware that a violation of this chapter exists.

SECTION 7000.05 VIOLATIONS OF THE ORDINANCE

Any person, firm, or corporation using any building, structure, or parcel of land in violation of any provision of this chapter is guilty of a misdemeanor and shall be prosecuted to the fullest extent of the law under Article 7298 of this chapter.

SECTION 7000.06 RELATIONSHIP TO OTHER REGULATIONS AND REQUIREMENTS

The regulations of this chapter and requirements or conditions imposed pursuant to this chapter shall not supercede any other regulations or requirements adopted or imposed by the Kern County Board of Supervisors, the Kern County Fire Department, the Kern County Health Department, the Regional Water Quality Control Board, the Air Pollution Control District, the Kern County Public Works Department, the Kern County Water Agency, or any other local, state, or federal agency that has jurisdiction by law over uses and development authorized by this chapter. All uses and development authorized by this chapter shall comply with all other such regulations and requirements. Where two (2) or more ordinances regulate the same use or activity, the more restrictive ordinance shall apply.

SECTION 7000.07 BUILDINGS UNDER CONSTRUCTION

Any building or structure for which a building permit has been issued prior to the effective date of this chapter may be completed and used in accordance with the plans, specifications, and permits on which said building permit was granted, if construction is commenced within one (1) year after the issuance of said permit and diligently pursued to completion. No extensions of time shall be granted for commencement of construction.

SECTION 7000.08 VALIDITY

If any section, subsection, paragraph, sentence, clause, or phrase of this chapter is for any reason held to be invalid or unconstitutional by the decision of any court of competent jurisdiction, such decision shall not affect the validity of the remaining portions of this chapter. The Board of Supervisors hereby declares that it would have passed this chapter, and each section, subsection, sentence, clause, and phrase thereof, irrespective of the fact that any or one or more sections, subsections, sentences, clauses, or phrases be declared invalid or unconstitutional.

ARTICLE 7010

ESTABLISHMENT OF ZONING DISTRICTS

SECTIONS:

7010.01 ESTABLISHMENT OF BASE ZONING DISTRICTS
7010.02 ESTABLISHMENT OF COMBINING ZONING DISTRICTS
7010.03 INTERIM ZONING DISTRICTS
7010.04 ZONING MAPS
7010.05 SPECIAL PLANNING DISTRICTS

SECTION 7010.01 ESTABLISHMENT OF BASE ZONING DISTRICTS

In order to classify, regulate, restrict, and segregate the uses of lands and buildings, to regulate and restrict the height, bulk, and construction of buildings, to regulate the area of yards and other open spaces around buildings, and to regulate intensity of land use and the density of population, the following base zoning districts are hereby established:

Agricultural Districts

A Exclusive Agriculture District
A-1 Limited Agriculture District

Residential Districts

E Estate District
R-1 Low-density Residential District
R-2 Medium-density Residential District
R-3 High-density Residential District
MS Mobilehome Subdivision District
MP Mobilehome Park District

Commercial Districts

CO Commercial Office District
C-1 Neighborhood Commercial District
C-2 General Commercial District
CH Highway Commercial District

Industrial Districts

M-1 Light Industrial District
M-2 Medium Industrial District
M-3 Heavy Industrial District

Special Purpose Districts

RF Recreation-Forestry District
OS Open Space District
NR Natural Resource District
DI Drilling Island District
FPP Floodplain Primary District
SP Special Planning District

Every lot or parcel of land, or portion thereof, in unincorporated Kern County shall be classified in only one of the base zoning districts established by this section.

SECTION 7010.02 ESTABLISHMENT OF COMBINING ZONING DISTRICTS

In order to classify, regulate, restrict, and segregate the uses of lands and buildings, to regulate and restrict the height, bulk and construction of buildings, to regulate the area of yards and other open spaces around buildings, and to regulate intensity of land use and the density of population, the following combining zoning districts are hereby established:

Lot Size Combining District
(PD) Precise Development Combining District
(CL) Cluster Combining District
(RS) Residential Suburban Combining District
(MH) Mobilehome Combining District
(WE) Wind Energy Combining District
(PE) Petroleum Extraction Combining District
(GH) Geologic Hazard Combining District
(FP) Floodplain Combining District
(FPS) Floodplain Secondary Combining District
(D) Architectural Design Combining District
(H) Airport Approach Height Combining District

In addition to being classified in a base zoning district, a lot or parcel of land, or portion thereof, may be classified in one or more combining zoning districts established by this section. When used on official zone maps, combining districts shall be shown in parenthesis.

SECTION 7010.03 INTERIM ZONING DISTRICTS

The Automobile Parking (P) zone classification in effect on the date of adoption of this chapter has been determined by the Board of Supervisors to be no longer necessary to effect the purposes of the Kern County Zoning Ordinance. The P District shall be an interim zone district, and no additional areas shall be so zoned. All development within the P District shall comply with the requirements and standards set out in Article 7220 of this chapter.

SECTION 7010.04 ZONING MAPS

The boundaries of the zoning districts established by this chapter are not included in this chapter but are shown on the Official Zoning Maps maintained by the Kern County Department of Planning and Development Services. The Official Zoning Maps and all notations, references, and other information shown thereon shall be as much a part of this chapter as if the matters and information set forth on such maps were all fully described herein.

SECTION 7010.05 SPECIAL PLANNING DISTRICTS

Special planning districts adopted in accordance with the provisions of Article 7115 of this chapter shall be incorporated as a part of this chapter at Article 7299. Any adopted special planning district shall define the zoning district boundaries and the terms and conditions of development within those boundaries.

SECTION 7015.01 PURPOSE AND APPLICATION

The purpose of the Exclusive Agriculture (A) District is to designate areas suitable for agricultural uses and to prevent the encroachment of incompatible uses onto agricultural lands and the premature conversion of such lands to nonagricultural uses. Uses in the A District are limited primarily to agricultural uses and other activities compatible with agricultural uses.

SECTION 7015.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. AGRICULTURAL USES

Growing and Harvesting Crops

1. Berry crops
2. Bush crops
3. Christmas trees
4. Field crops, dryland
5. Field crops, irrigated
6. Flowers and horticultural specialties, wholesale only
7. Greenhouse, wholesale only

8. Nursery, plant, wholesale only

9. Nut and fruit trees

10. Timber

11. Vegetables

12. Vine crops

Breeding and Raising Animals

13. Bee keeping

14. Beef cattle or livestock grazing

15. Birds, including show or racing pigeons and other small fowl

16. Dairy stock grazing

17. Fish and frogs

18. Hogs, excluding a hog farm or ranch

19. Horses, donkeys, or mules

20. Poultry, including hatching, breeding, butchering, processing or shipping of chickens, turkeys, or other fowl or poultry, including eggs

21. Rabbits or fur-bearing animals

22. Sheep or goats

Agricultural Industries

23. Agricultural services, when incidental and secondary to the primary use of the premises for agriculture

24. Animal products processing, including meat packing, canning, and shipping, when the livestock is produced or grown by the owner of the processing facility on the premises or on land leased, rented, or owned by the owner of the processing facility and within a reasonable distance of the facility

25. Contract harvesting, when incidental and secondary to the primary use of the premises for agriculture

26. Fruit, vegetable, and plant products processing, including cold storage, packing, preserving, canning, and shipping, when the agricultural products are produced or grown by the owner of the processing facility on the premises or on land leased, rented, or

owned by the owner of the processing facility and within a reasonable distance of the facility

27. Honey extraction

B. RESIDENTIAL USES

1. Farm labor housing for on-site employees

2. Mobilehome, occupied by the owner or full-time on-site employee

3. Residential accessory structures

4. Single-family dwelling, occupied by the owner or full-time on-site employee

C. COMMERCIAL USES

General Retail Sales

1. Fruit stand, temporary, pursuant to Section 7015.13.B

D. UTILITY AND COMMUNICATIONS FACILITIES

1. Transmission lines, towers, poles, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

2. Utility substation

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Cogeneration facility, primarily intended for steam production used for production of oil or gas

2. Explosives storage, temporary

3. Mineral exploration

4. Oil or gas exploration and production pursuant to Article 7260

5. Solar energy electrical generators with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

6. Wind-driven electrical generators for on-site consumption of the electricity

F. MISCELLANEOUS USES

1. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map
2. Flood control facilities
3. Garage or yard sales pursuant to Section 7015.13.D
4. Hunting or fishing club, not involving structures
5. Water storage or groundwater recharge facilities
6. Water system, small
7. Wildlife or nature preserve

SECTION 7015.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to those uses pursuant to Section 7282.03 are permitted subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. AGRICULTURAL USES

Breeding and Raising of Animals

1. Beef cattle or livestock feed lot or stock auction or sales yard
2. Hogs, including hog farms and ranches

Agricultural Industries

3. Alcohol distillery
4. Agricultural chemical storage and repackaging
5. Agricultural trucking facilities
6. Brewery
7. Biomass energy conversion
8. Cold storage facility for agricultural products
9. Contract harvesting
10. Cotton gin
11. Creamery

12. Dairy

13. Fertilizer manufacture and storage for agricultural use only

14. Flour mill

15. Fruit, vegetable, and plant products processing, including freezing, packing, preserving, and shipping

16. Glucose processing

17. Grain elevator or storage

18. Oil extraction, nonmineral

19. Tasting room, when accessory to an existing winery or brewery

20. Winery

21. Wool pulling and scouring

B. RESIDENTIAL USES

1. Farm labor housing for contract labor

C. COMMERCIAL USES

General Retail Sales

1. Fruit stands, permanent

D. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Equestrian establishment

2. Guest ranch, when accessory to a commercial ranching operation

3. Park or playground

4. Race track, automobile, bicycle, horse, or motorcycle

5. Shooting range or gun club, outdoor only

E. TRANSPORTATION FACILITIES

1. Airport, private

2. Airport, public use

3. Heliport

F. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator

G. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Concrete or asphalt batch plant, temporary
2. Dam, small hydro
3. Dam, large hydro
4. Electrical power generating plant
5. Explosives storage, permanent
6. Mining and mineral extraction pursuant to Article 7265
7. Rock, gravel, sand, or soils crushing, processing, or distribution, when accessory to an approved mining operation

H. WASTE FACILITIES

1. Hazardous waste disposal facility
2. Nonhazardous oily waste disposal facility
3. Sanitary landfill
4. Septage disposal site
5. Sewage treatment plant
6. Transfer station, large volume
7. Transfer station, small volume
8. Waste-to-energy facility

I. INSTITUTIONAL USES

1. Cemetery, mausoleum, columbarium, or mortuary
2. Charitable or public service organization
3. Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary
4. Fire or police station
5. Government office or building

6. Water treatment plant

7. Wild animal keeping

8. Zoo

J. EDUCATIONAL INSTITUTIONS AND SCHOOLS

General

1. Preschool

2. Elementary school

3. Junior high school

4. Senior high school

5. College or university

K. MISCELLANEOUS USES

1. Drainage sump

2. Hunting or fishing club

3. Water system, large

4. Wild animal keeping

SECTION 7015.04 PROHIBITED USES

All other uses not permitted by Sections 7015.02 and 7015.03 are prohibited, including final map subdivisions.

SECTION 7015.05 MINIMUM LOT SIZE

No portion of any lot within the A District shall contain less than twenty (20) gross acres, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites. In the event the lot is under Williamson Act Contract and designated 8.3 by the General Plan, the minimum area shall be eighty (80) acres, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites. There shall be no minimum lot size for agricultural industry uses approved in conjunction with a conditional use permit.

SECTION 7015.06 MINIMUM LOT AREA PER DWELLING UNIT

There shall be no more than one principal single-family dwelling per legal lot, except pursuant to Section 7015.02.

SECTION 7015.07 YARDS AND SETBACKS

A. **Front Yard.** The front-yard minimum setback for all buildings shall be as follows:

Fifty-five (55) feet from the legal centerline of any existing or proposed public or private local street or access easements.

Seventy (70) feet from the legal centerline of any existing or proposed secondary highway.

Eighty (80) feet from the legal centerline of any existing or proposed major highway.

In no case shall the front-yard minimum setback be less than twenty-five (25) feet from the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** There shall be a side yard on each side of a building of not less than five (5) feet, except that on the street side of corner lots, buildings shall be set back a minimum of ten (10) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line.

C. **Rear Yard.** There shall be a rear yard of not less than five (5) feet except that in the case of through lots, the designated rear yard shall be in accordance with the front-yard setback requirements.

SECTION 7015.08 HEIGHT LIMITS

A. Residential buildings shall not exceed three (3) stories or thirty-five (35) feet in height.

B. There is no height limit on nonresidential structures.

SECTION 7015.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. There shall be at least ten (10) feet between any residential buildings.

B. There shall be at least six (6) feet between a residential building and any nonresidential structure, except that pens, coops, stables, barns, corrals, other structures for housing livestock and buildings for processing, packing, or storing agricultural produce shall be at least one hundred (100) feet away from any residential building.

SECTION 7015.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7015.11 SIGNS

The following types of signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or for rent, not to exceed eight (8) square feet each, excluding the area of any vertical and/or horizontal support members

B. Temporary construction signs

C. Temporary political, religious, or civic campaign signs

D. Agricultural signs

E. Agricultural industry signs, when approved in conjunction with a conditional use permit

F. Institutional identification signs, when approved in conjunction with a conditional use permit

G. Off-site directional signs for agricultural product direct marketing facilities pursuant to Section 7015.13.C

SECTION 7015.12 LANDSCAPING

None required.

SECTION 7015.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. Development in the A District shall comply with the interpretations and provisions of Article 7282 of this chapter.

B. Temporary fruit stands for the sale of agricultural, horticultural, or farming products permitted pursuant to Section 7015.02 shall comply with the following standards:

1. The floor area of the fruit stand shall not exceed four hundred (400) square feet.

2. The fruit stand shall not be located closer than fifty-five (55) feet from the centerline of any public road, street, or highway right-of-way.

3. The stand shall be erected in such a manner that it can be readily removed by means of skids or other device.

4. The owner shall remove the stand at his/her own expense when the stand is not in use for a period of thirty (30) days.

5. Customer parking areas shall be treated with a dust binder in a manner to continuously prevent fugitive dust.

C. Off-site directional signs for agricultural product direct marketing facilities subject to the following standards:

1. The direct marketing facility shall be established and operated in accordance with the provisions of this chapter and shall be primarily limited to the sale of unprocessed agricultural commodities grown on the same ranch or farm that provides such sale.

2. The maximum sign area for each sign shall not exceed one hundred and fifty (150) square feet.

3. The number of signs shall be limited to a maximum of nine (9).

4. The minimum spacing between signs shall be six hundred and sixty (660) feet.

5. The signs are for directional purposes only, and the text shall be limited to the producer's name or his brand name, the products available, and directions to the location of the point of sale.

6. Signs may be illuminated only during the actual hours that the facility is open for public sale of products.

7. Sign height shall not exceed twelve (12) feet.

8. Signs are permitted for a temporary, cumulative period of seven (7) months within any calendar year.

9. Any sign permitted in accordance with this section shall not be located more than five (5) miles from the direct marketing facility for which the sign provides directions, unless the facility is located more than five (5) miles from a designated County major highway or State or federal highway. In such cases, a single sign may be located at the nearest designated County major highway or State or federal highway, regardless of the distance from the facility.

10. All signs shall comply with the provisions and regulations of the California Department of Transportation, Outdoor Advertising Branch, when located adjacent to a State or federal highway.

11. Prior to installation of any sign, a plan showing the location and the spacing of each sign shall be submitted to the Director of Planning and Development Services for approval. A copy of said plan shall be retained by the Department of Planning and Development Services for file purposes.

D. Garage or yard sales are permitted without special permit provided they meet the following standards:

1. Sales last no longer than three (3) days.

2. Sales are held no more than twice yearly.

3. Sales are conducted on the owner's or tenant's property. Multiple family sales are permitted if they are held on the property of one of the participants.

4. No goods purchased for resale may be offered for sale.

5. No consignment goods may be offered for sale.

6. Directional signs may be placed on the street right-of-way.

7. All directional and advertising signs shall be freestanding and removed after completion of the sale.

8. All directional and advertising signs placed on private property shall have the owner's permission.

9. No directional or advertising signs may be larger than two (2) feet by three (3) feet.

E. Development in the A District shall also comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7020

LIMITED AGRICULTURE (A-1) DISTRICT

SECTIONS:

7020.01 PURPOSE AND APPLICATION
7020.02 PERMITTED USES
7020.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7020.04 PROHIBITED USES
7020.05 MINIMUM LOT SIZE

7020.12 LANDSCAPING
7020.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7020.01 PURPOSE AND APPLICATION

The purpose of the Limited Agriculture (A-1) District is to designate areas suitable for a combination of estate-type residential development, agricultural uses and other compatible uses. Final map residential subdivisions are not allowed in the A-1 District.

SECTION 7020.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. AGRICULTURAL USES

Growing and Harvesting Crops

1. Berry crops
2. Bush crops
3. Christmas trees
4. Field crops, dryland
5. Field crops, irrigated
6. Flowers and horticultural specialties, wholesale only
7. Greenhouse, wholesale only

8. Nursery, plant, wholesale only

9. Nut and fruit trees

10. Timber

11. Vegetables

12. Vine crops

Breeding and Raising Animals

13. Bee keeping

14. Beef cattle or livestock grazing pursuant to Section 7020.13

15. Dairy stock pursuant to Section 7020.13

16. Fish and frogs

17. Hogs pursuant to Section 7020.13

18. Horses, donkeys, and mules pursuant to Section 7020.13

19. Poultry, for the domestic use of the resident/occupant only (not including poultry ranches)

20. Rabbits and fur-bearing animals

21. Sheep and goats pursuant to Section 7020.13

B. RESIDENTIAL USES

1. Mobilehome or recreational vehicle, temporary, during construction of a single-family home pursuant to Section 7020.13

2. Residential accessory structures

3. Single-family dwelling

C. COMMERCIAL USES

General Retail Sales

1. Fruit stand, temporary, pursuant to Section 7020.13

D. UTILITY AND COMMUNICATION FACILITIES

1. Transmission lines, towers, poles, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Cogeneration facility, primarily intended for steam production, used for production of oil and gas

2. Mineral exploration

3. Oil or gas exploration and production pursuant to Article 7260

4. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

5. Wind-driven electrical generator for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

F. MISCELLANEOUS USES

1. Day-care home, large family, pursuant to Article 7255

2. Day-care home, small family

3. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

4. Garage or yards sales pursuant to Section 7020.13.F

5. Home occupation pursuant to Article 7250

6. Water system, small

7. Wildlife or nature preserve

SECTION 7020.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RESIDENTIAL USES

1. Farm labor housing for on-site farm employees

2. Mobilehome

3. Secondary residential unit pursuant to Article 7240

B. AGRICULTURAL USES

1. Poultry, including hatching, breeding, butchering, processing or shipping of chickens, turkeys, or other fowl or poultry, including eggs.

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Circus or carnival, temporary
2. Country club
3. Equestrian establishment
4. Fishing or fly casting pond
5. Golf course
6. Golf driving range
7. Park or playground.
8. Race track, automobile, bicycle, horse, or motorcycle

D. COMMERCIAL USES

General Retail Sales

1. Fruit stand, permanent

E. TRANSPORTATION FACILITIES

1. Airport, private
2. Airport, public
3. Heliport

F. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator

G. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Concrete or asphalt batch plant, temporary
2. Electrical power generating plant, excluding nuclear or coal powered
3. Mining and mineral extraction pursuant to Section 7265

4. Solar energy electrical generators, commercial

5. Wind-driven electrical generators, commercial

H. WASTE FACILITIES

1. Community septic disposal system

2. Septage disposal site

3. Sewage treatment plant

4. Transfer station, small volume

5. Waste-to-energy facility

I. INSTITUTIONAL USES

1. Auditorium, public

2. Cemetery, mausoleum, columbarium, or mortuary

3. Charitable or public service organization

4. Church

5. Club or lodge

6. Community or senior citizens center

7. Crematory in conjunction with a cemetery, mausoleum, columbarium, or mortuary

8. Hospital

9. Museum

10. Public agency or public utility buildings and facilities

11. Sanitarium

12. Water treatment plant

13. Zoo

J. EDUCATIONAL INSTITUTIONS AND SCHOOLS

General

1. Preschool

2. Elementary school

3. Junior high school

4. Senior high school

5. College or university

K. MISCELLANEOUS USES

1. Day-care center

2. Drainage sump

3. Flood control facilities

4. Kennel

5. Revival, temporary

6. Water storage or groundwater recharge facilities

7. Water system, large

8. Wild animal keeping

SECTION 7020.04 PROHIBITED USES

All other uses not expressly permitted by Sections 7020.02 and 7020.03 are prohibited, including final tract map residential subdivisions.

SECTION 7020.05 MINIMUM LOT SIZE

No portion of any lot within the A-1 District shall contain less than two and one-half (2 1/2) gross acres, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7020.06 MINIMUM LOT AREA PER DWELLING UNIT

There shall be no more than one principal single-family dwelling per legal lot.

SECTION 7020.07 YARDS AND SETBACKS

A. **Front Yard.** The front yard minimum setback for all buildings shall be as follows:

Fifty-five (55) feet from the legal centerline of any existing or proposed public or private local street or access easements.

Seventy (70) feet from the legal centerline of any existing or proposed secondary highway.

Eighty (80) feet from the legal centerline of any existing or proposed major highway.

In no case shall the front-yard minimum setback be less than twenty-five (25) feet from the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** There shall be a side yard on each side of any building of not less than five (5) feet, except that on the street side of corner lots, buildings shall be set back a minimum of ten (10) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line. However, within the rear twenty-five (25) feet of all reverse corner lots, there shall be a minimum side yard of twenty-five (25) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line.

C. **Rear Yard.** There shall be a rear yard of not less than five (5) feet, except that in the case of through lots, the designated rear yard shall be in accordance with the front-yard setback requirements.

SECTION 7020.08 HEIGHT LIMITS

A. Residential buildings shall not exceed three (3) stories or thirty-five (35) feet in height.

B. Radio and television antennae, chimneys, and other similar structures shall not exceed eighty (80) feet in height.

SECTION 7020.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. There shall be at least ten (10) feet between residential buildings.

B. There shall be at least six (6) feet between a residential building and a nonresidential structure, except that pens, coops, stables, barns, corrals, and other structures for housing livestock and buildings for processing, packing, or storage of agricultural produce shall be at least one hundred (100) feet away from any residential building.

SECTION 7020.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7020.11 SIGNS

The following types of signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed eight (8) square feet each, excluding the area of any vertical and/or horizontal support members

B. Temporary construction signs

C. Temporary political, religious, or civic campaign signs

D. Agricultural signs

E. Institutional identification signs, when approved in conjunction with a conditional use permit

F. Off-site directional signs for agricultural product direct marketing facilities pursuant to Section 7013.E

SECTION 7020.12 LANDSCAPING

None required.

SECTION 7020.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. The breeding and raising of livestock permitted pursuant to Section 7020.02 shall be limited to one horse, donkey, mule, cow, dairy stock, goat, hog, sheep, or other similar animal per one-quarter (1/4) acre of lot area.

B. Temporary fruit stands for the sale of agricultural, horticultural, or farming products permitted pursuant to Section 7020.02 shall comply with the following standards:

1. The floor area of the fruit stand shall not exceed four hundred (400) square feet.

2. The fruit stand shall not be located closer than fifty-five (55) feet from the centerline of any public road, street, or highway right-of-way.

3. The stand shall be erected in such a manner that it can be readily removed by means of skids or other device.

4. The owner shall remove the stand at his/her own expense when the stand is not in use for a period of thirty (30) days.

5. Customer parking areas shall be treated with a dust binder in a manner to continuously prevent fugitive dust.

C. The breeding and raising of livestock, in greater numbers than allowed by Section 7020.13.A, by minors in conjunction with a student-oriented fair project sponsored by a bonafide agricultural organization shall be permitted upon application to and approval by the Director of Planning

and Development Services of a Temporary Animal Permit in accordance with the procedures set out in Section 7284.02 of this chapter.

1. Application Contents:

   An application for a Temporary Animal Permit shall include the following:

   a. The name and address of the applicant

   b. The name(s) and address(es) of the property owner(s)

   c. Assessor's parcel number(s)

   d. Legal description of the subject property

   e. Name of the organization sponsoring the applicant

   f. A plot plan showing the location of proposed pens, coops, or areas for the breeding and raising of animals in relation to existing residence(s) and other buildings and structures within one hundred (100) feet of pens, coops, or areas housing livestock

   g. The signature of each owner of the real property abutting the subject lot consenting to the granting of the Temporary Animal Permit

2. Development Standards and Conditions:

   The breeding and raising of animals on a temporary basis shall comply with the following standards and conditions:

   a. Applicant shall be sponsored by a bonafide organization, such as, but not limited to, Future Farmers of America, 4-H Club, Cow-Belles, or Junior Farmers.

   b. The increase in animal density shall not exceed the density allowed by Section 7013.A by more that fifty (50) percent. In any case, however, at least two (2), but no more than six (6), additional animals shall be allowed.

   c. The Temporary Animal Permit shall be effective for a maximum period of six (6) months from the effective date of the permit. No more than one (1) such permit shall be approved for any lot within a one- (1-) year period.

   d. The written consent of each abutting property owner consenting to the granting of the Temporary Animal Permit must be obtained.

e. The applicant shall allow inspection of animal maintenance facilities by the Kern County Department of Planning and Development Services (Building Inspection Division), and the Kern County Health Department.

f. The Director of Planning and Development Services may revoke the Temporary Animal Permit at any time for noncompliance with Section 7020.13.C.2 or upon receipt of a recommendation for revocation from the Kern County Health Department.

g. Each additional animal authorized by the Temporary Animal Permit over the allowable animal density specified by Section 7020.13.A shall be removed upon expiration of the permit.

D. A mobilehome or recreational vehicle permitted as a temporary dwelling pursuant to Section 7020.02 shall comply with the following standards:

1. Building permits for construction of the conventional single-family residence shall be obtained prior to or concurrently with the installation permit for the mobilehome.

2. The mobilehome shall be removed from the premises or the recreational vehicle shall be removed from the premises or placed in dead storage if:

a. Six (6) months have passed since the mobilehome or recreational vehicle was installed.

b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.

c. The building permit has lapsed due to lack of activity.

3. One (1) extension of time for a period not to exceed six (6) months may be granted by the Director of Planning and Development Services upon written request of the property owner. The extension of time may only be approved subject to the following conditions:

a. An active building permit is on file with the Kern County Department of Planning and Development Services (Building Inspection Division).

b. The construction of the conventional dwelling unit on the site has progressed to a stage of inspection and approval of the framing, rough electrical, rough mechanical, and rough and top-out of plumbing of the dwelling.

4. Any mobilehome or recreational vehicle permitted as a temporary dwelling in excess of a six (6) month period of time pursuant to Section 7020.13.D.3 shall be removed or placed in dead storage if:

a. The extension of time has expired.

b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.

c. The building permit has lapsed due to lack of activity.

E. Off-site directional signs for agricultural product direct marketing facilities subject to the following standards:

1. The direct marketing facility shall be established and operated in accordance with the provisions of this chapter and shall be primarily limited to the sale of unprocessed agricultural commodities grown on the same ranch or farm that provides such sale.

2. The maximum sign area for each sign shall not exceed one hundred and fifty (150) square feet.

3. The number of signs shall be limited to a maximum of nine (9).

4. The minimum spacing between signs shall be six hundred and sixty (660) feet.

5. The signs are for directional purposes only, and the text shall be limited to the producer's name or his brand name, the products available, and directions to the location of the point of sale.

6. Signs may be illuminated only during the actual hours that the facility is open for public sale of products.

7. Sign height shall not exceed twelve (12) feet.

8. Signs are permitted for a temporary, cumulative period of seven (7) months within any calendar year.

9. Any sign permitted in accordance with this section shall not be located more than five (5) miles from the direct marketing facility for which the sign provides directions, unless the facility is located more than five (5) miles from a designated County major highway or State or federal highway. In such cases, a single sign may be located at the nearest designated County major highway or State or federal highway, regardless of the distance from the facility.

10. All signs shall comply with the provisions and regulations of the California Department of Transportation, Outdoor Advertising Branch, when located adjacent to a State or federal highway.

11. Prior to installation of any sign, a plan showing the location and the spacing of each sign shall be submitted to the Director of Planning and Development Services for approval. A copy of said plan shall be retained by the Department of Planning and Development Services for file purposes.

F. Garage or yard sales are permitted without special permit provided they meet the following standards:

1. Sales last no longer than three (3) days.

2. Sales are held no more than twice yearly.

3. Sales are conducted on the owner's or tenant's property. Multiple family sales are permitted if they are held on the property of one of the participants.

4. No goods purchased for resale may be offered for sale.

5. No consignment goods may be offered for sale.

6. Directional signs may be placed on the street right-of-way.

7. All directional and advertising signs shall be freestanding and removed after completion of the sale.

8. All directional and advertising signs placed on private property shall have the owner's permission.

9. No directional or advertising signs may be larger than two (2) feet by three (3) feet.

G. Development in the A-1 District shall also comply with the interpretations and provisions of Article 7282 of this chapter.

7025.07 YARDS AND SETBACKS
7025.08 HEIGHT LIMITS
7025.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7025.10 PARKING
7025.11 SIGNS
7025.12 LANDSCAPING
7025.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7025.01 PURPOSE AND APPLICATION

The purpose of the Estate (E) District is to designate areas suitable for larger lot residential living environments. Uses are limited to those typical of and compatible with quiet residential neighborhoods. The minimum lot size shall be one-quarter (1/4) acre (10,890 square feet) unless the E District is combined with the Lot Size Combining District (7120) where a larger minimum lot size is specified. The minimum lot size may be reduced when any E District is combined with the Cluster (CL) Combining District (7130).

SECTION 7025.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. AGRICULTURAL USES

1. Breeding and raising animals pursuant to Section 7025.13

2. Growing of agricultural crops for domestic use of the resident/occupant

B. RESIDENTIAL USES

1. Mobilehome or recreational vehicle, temporary, during construction of a single-family dwelling pursuant to Section 7025.13

2. Residential accessory structures

3. Single-family dwelling

C. UTILITY AND COMMUNICATION FACILITIES

1. Transmission lines, towers, poles, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

D. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

2. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

E. MISCELLANEOUS USES

1. Day-care home, large family, pursuant to Article 7255

2. Day-care home, small family

3. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

4. Garage or yard sales pursuant to Section 7025.13.C

5. Home occupation pursuant to Article 7250

6. Water system, small

SECTION 7025.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. AGRICULTURAL USES

1. Birds, including show or racing pigeons and other small fowl in excess of twelve (12), raised for noncommercial purposes

B. RESIDENTIAL USES

1. Additional single-family dwellings, subject to the density limit set by Section 7025.06

2. Community care facility

3. Mobilehome

4. Retirement or rest home

5. Secondary residential unit pursuant to Article 7240

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Community recreational facilities

2. Country club

3. Golf course

4. Golf driving range

5. Park or playground

6. Race track, automobile, bicycle, horse, or motorcycle

7. Recreational vehicle park

8. Sports arena, indoor

9. Sports arena, outdoor, excluding flea market or swap meet

10. Swimming pool, public

11. Tennis or swim club

D. COMMERCIAL USES

Offices

1. Temporary on-site real estate tract sales

E. SERVICES

1. Ambulance

F. TRANSPORTATION FACILITIES

1. Airport, private

2. Airport, public use

3. Heliport

G. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator

2. Utility substation not specifically exempted by State Law

H. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Mineral exploration
2. Mining and mineral extraction pursuant to Article 7265
3. Oil or gas exploration and production pursuant to Article 7260
4. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity
5. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

I. WASTE FACILITIES

1. Sewage treatment plant

J. INSTITUTIONAL USES

1. Cemetery, mausoleum, columbarium, or mortuary
2. Charitable or public service organization
3. Church
4. Club or lodge
5. Community or senior citizens center
6. Crematory in conjunction with a cemetery, mausoleum, columbarium, or mortuary
7. Library
8. Museum
9. Sanitarium
10. Water treatment plant

K. EDUCATIONAL INSTITUTIONS AND SCHOOLS

General

1. Preschool
2. Elementary School
3. Junior high school

4. Senior high school

5. College or university

L. MISCELLANEOUS USES

1. Day-care center

2. Community septic disposal system

3. Drainage sump

4. Flood control facilities

5. Water storage or groundwater recharge facilities

6. Water system, large

SECTION 7025.04 PROHIBITED USES

All other uses not permitted by Sections 7025.02 and 7025.03 are prohibited.

SECTION 7025.05 MINIMUM LOT SIZE

Except as otherwise provided in Article 7130, no portion of any lot within the E District shall contain less than one-quarter (1/4) acre (10,890 net square feet) or as specified by the Lot Size Combining District, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7025.06 MINIMUM LOT AREA PER DWELLING UNIT

Except as otherwise provided in Article 7130, there shall be no more than one dwelling unit per minimum lot size specified by the Lot Size Combining District with which the E District is combined.

SECTION 7025.07 YARDS AND SETBACKS

A. **Front Yard.** Except as otherwise provided in Section 7282.07, the front-yard minimum setback for all buildings shall be as follows:

Fifty-five (55) feet from the legal centerline of any existing or proposed public or private local street or access easements.

Seventy (70) feet from the legal centerline of any existing or proposed secondary highway.

Eighty (80) feet from the legal centerline of any existing or proposed major highway.

In no case shall the front-yard minimum setback be less than twenty-five (25) feet from the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** There shall be a side yard on each side of any building of not less than five (5) feet, except that on the street side of corner lots, buildings shall be set back a minimum of ten (10) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line. However, within the rear twenty-five (25) feet of all reverse corner lots, there shall be a minimum side yard of twenty-five (25) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line.

C. **Rear Yard.** There shall be a rear yard of not less than five (5) feet, except that in the case of through lots, the designated rear yard shall be in accordance with the front-yard setback requirements.

SECTION 7025.08 HEIGHT LIMITS

A. Residential buildings shall not exceed three (3) stories or thirty-five (35) feet.

B. Detached accessory structures shall not exceed two (2) stories or thirty-five (35) feet.

C. Radio and television antennae, chimneys, and other similar structures shall not exceed eighty (80) feet.

SECTION 7025.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. There shall be a minimum distance of ten (10) feet between residential buildings.

B. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings, except that pens, coops, or other structures for housing animals shall be at least thirty (30) feet away from any residential building or other building used for human habitation, at least one hundred (100) feet from the front lot line, at least twenty-five (25) feet from the street side lot line on a corner lot, and at least one hundred (100) feet away from any public park, school, hospital, or similar institution.

SECTION 7025.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7025.11 SIGNS

The following types of signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed six (6) square feet each, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Permanent subdivision signs

D. Temporary construction signs

E. Temporary political, religious, and civic campaign signs

F. Institutional identification signs, when approved in conjunction with a conditional use permit

SECTION 7025.12 LANDSCAPING

None required.

SECTION 7025.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. The breeding and raising of animals permitted pursuant to Section 7025.02 shall be limited to poultry, rabbits and birds for domestic or hobby purposes, or similar small fowl and animals raised for food, scientific, or fur-bearing purposes, provided not more than twelve (12) of any one or combination of such animals may be maintained on a single lot.

B. A mobilehome or recreational vehicle permitted as a temporary dwelling pursuant to Section 7025.02 shall comply with the following standards:

1. Building permits for construction of the conventional single-family residence shall be obtained prior to or concurrently with the installation permit for the mobilehome.

2. The mobilehome shall be removed from the premises or the recreational vehicle shall be removed from the premises or placed in dead storage if:

   a. Six (6) months has passed since the mobilehome or recreational vehicle was installed.

   b. Seven (7) days has passed since the conventional dwelling unit was approved for occupancy.

   c. The building permit has lapsed due to lack of activity.

3. One (1) extension of time for a period not to exceed six (6) months may be granted by the Director of Planning and Development Services upon written request of the property owner. The extension of time may only be approved subject to the following conditions:

   a. An active building permit is on file with the Kern County Department of Planning and Development Services (Building Inspection Division).

   b. The construction of the conventional dwelling unit on the site has progressed to a stage of inspection and approval of the framing, rough electrical, rough mechanical, and rough and top-out of plumbing of the dwelling.

4. Any mobilehome or recreational vehicle permitted as a temporary dwelling in excess of a six (6) month period of time pursuant to Section 7025.13.B.3 shall be removed or placed in dead storage if:

   a. The extension of time has expired.

   b. Seven (7) days has passed since the conventional dwelling unit was approved for occupancy.

   c. The building permit has lapsed due to lack of activity.

C. Garage or yard sales are permitted without special permit provided they meet the following standards:

1. Sales last no longer than three (3) days.

2. Sales are held no more than twice yearly.

3. Sales are conducted on the owner's or tenant's property. Multiple family sales are permitted if they are held on the property of one of the participants.

4. No goods purchased for resale may be offered for sale.

5. No consignment goods may be offered for sale.

6. Directional signs may be placed on the street right-of-way.

7. All directional and advertising signs shall be freestanding and removed after completion of the sale.

8. All directional and advertising signs placed on private property shall have the owner's permission.

9. No directional or advertising signs may be larger than two (2) feet by three (3) feet.

D. Development in the E District shall also comply with the interpretations and provisions of Article 7282 of this chapter.

SECTION 7030.01 PURPOSE AND APPLICATION

The purpose of the Low-density Residential (R-1) District is to designate areas which will be suitable for traditional smaller lot, single-family homes and compatible uses. Maximum density is limited to ten (10) dwelling units per net acre. Typically, the R-1 District will be characterized by the typical single-family subdivision. However, innovative low-intensity projects are allowed in combination with the Cluster (CL) Combining District.

SECTION 7030.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. AGRICULTURAL USES

1. Breeding and raising animals pursuant to Section 7030.13

2. Growing of agricultural crops for domestic use of resident/occupant

B. RESIDENTIAL USES

1. Condominium pursuant to Section 7130

2. Mobilehome or recreational vehicle, temporary, during construction of a single-family dwelling pursuant to Section 7030.13

3. Residential accessory structures

4. Single-family dwelling, one per legal lot only

C. RECREATIONAL, ENTERTAINMENT, AND TOURIST FACILITIES

1. Community recreational facilities

D. UTILITY AND COMMUNICATION FACILITIES

1. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

2. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

F. MISCELLANEOUS USES

1. Day-care home, large family, pursuant to Article 7255

2. Day-care home, small family

3. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

4. Garage or yard sales pursuant to Section 7030.13.C

5. Home occupation pursuant to Article 7250

6. Water system, small

SECTION 7030.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RESIDENTIAL USES

1. Additional single-family dwellings, not to exceed a density of one (1) dwelling unit per four thousand three hundred fifty-six (4,356) square feet
2. Community care facility
3. Mobilehome
4. Retirement or rest home
5. Secondary residential unit pursuant to Article 7240

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Country club
2. Golf course
3. Golf driving range
4. Park or playground
5. Swimming pool, public
6. Tennis or swim club

C. COMMERCIAL USES

Offices

1. Temporary on-site real estate tract sales

Services

2. Ambulance

D. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator
2. Utility substation

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Mineral exploration
2. Mining and mineral extraction pursuant to Article 7265
3. Oil or gas exploration and production pursuant to Article 7260

4. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity

5. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

F. WASTE FACILITIES

1. Sewage treatment plant

G. INSTITUTIONAL USES

1. Cemetery, mausoleum, columbarium, or mortuary

2. Charitable or public service organization

3. Church

4. Club or lodge

5. Community or senior citizens center

6. Crematory in conjunction with a cemetery, mausoleum, columbarium, or mortuary

7. Library

8. Museum

9. Public agency or public utility buildings and facilities

10. Sanitarium

11. Water treatment plant

H. EDUCATIONAL INSTITUTIONS AND SCHOOLS

General

I. **MISCELLANEOUS USES**

1. Day-care center
2. Community septic disposal system
3. Drainage sump
4. Flood control facilities
5. Water storage or groundwater recharge facilities
6. Water system, large

SECTION 7030.04 PROHIBITED USES

All other uses not permitted by Sections 7030.02 and 7030.03 are prohibited.

SECTION 7030.05 MINIMUM LOT SIZE

Except as otherwise provided in Article 7130, no portion of any lot within the R-1 District shall contain less than six thousand (6,000) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7030.06 MINIMUM LOT AREA PER DWELLING UNIT

Except as otherwise provided in Section 7030.03 and Article 7130, there shall be no more than one (1) dwelling unit per legal lot.

SECTION 7030.07 YARDS AND SETBACKS

A. **Front Yard.** Except as otherwise provided in Section 7282.07, the front-yard minimum setback for all buildings shall be as follows:

Fifty-five (55) feet from the legal centerline of any existing or proposed public or private local street or access easements.

Seventy (70) feet from the legal centerline of any existing or proposed secondary highway.

Eighty (80) feet from the legal centerline of any existing or proposed major highway.

In no case shall the front-yard minimum setback be less than twenty-five (25) feet from the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** There shall be a side yard on each side of any building of not less than five (5) feet, except that on the street side of corner lots, buildings shall be set back a minimum of ten (10) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line. However, within the rear twenty-five (25) feet of all reverse corner lots, there shall be a minimum side yard of twenty-five (25) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line.

C. **Rear Yard.** There shall be a rear yard of not less than five (5) feet, except that in the case of through lots, the designated rear yard shall be in accordance with the front-yard setback requirements.

SECTION 7030.08 HEIGHT LIMITS

A. Residential buildings shall not exceed three (3) stories or thirty-five (35) feet.

B. Detached accessory structures shall not exceed two (2) stories or thirty-five (35) feet.

C. Radio and television antennae, chimneys, and other similar structures shall not exceed eighty (80) feet.

SECTION 7030.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. There shall be a minimum distance of ten (10) feet between residential buildings.

B. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings, except that pens, coops, or other structures for housing animals shall be at least thirty (30) feet away from any residential building or other building used for human habitation, at least one hundred (100) feet from the front lot line, at least twenty-five (25) feet from the street side lot line on a corner lot, and at least one hundred (100) feet away from any public park, school, hospital, or similar institution.

SECTION 7030.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7030.11 SIGNS

The following types of signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed six (6) square feet each, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Permanent subdivision signs

D. Temporary construction signs

E. Temporary political, religious, and civic campaign signs

F. Institutional identification signs, approved in conjunction with a conditional use permit

SECTION 7030.12 LANDSCAPING

None required.

SECTION 7030.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. The breeding and raising of animals permitted pursuant to Section 7030.02 shall be limited to poultry, rabbits and birds for domestic or hobby purposes, or similar small fowl and animals raised for food, scientific, or fur-bearing purposes, provided not more than twelve (12) of any one or combination of such animals may be maintained on a single lot.

B. A mobilehome or recreational vehicle permitted as a temporary dwelling pursuant to Section 7030.02 shall comply with the following standards:

1. Building permits for construction of the conventional single-family residence shall be obtained prior to or concurrently with the installation permit for the mobilehome.

2. The mobilehome shall be removed from the premises or the recreational vehicle shall be removed from the premises or placed in dead storage if:

   a. Six (6) months have passed since the mobilehome or recreational vehicle was installed.

   b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.

   c. The building permit has lapsed due to lack of activity.

3. One (1) extension of time for a period not to exceed six (6) months may be granted by the Director of Planning and Development Services upon written request of the property owner. The extension of time may only be approved subject to the following conditions:

a. An active building permit is on file with the Kern County Department of Planning and Development Services (Building Inspection Division).

b. The construction of the conventional dwelling unit on the site has progressed to a stage of inspection and approval of the framing, rough electrical, rough mechanical, and rough and top-out of plumbing of the dwelling.

4. Any mobilehome or recreational vehicle permitted as a temporary dwelling in excess of a six (6) month period of time pursuant to Section 7030.13.B.3 shall be removed or placed in dead storage if:

a. The extension of time has expired.

b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.

c. The building permit has lapsed due to lack of activity.

C. Garage or yard sales are permitted without special permit provided they meet the following standards:

1. Sales last no longer than three (3) days.

2. Sales are held no more than twice yearly.

3. Sales are conducted on the owner's or tenant's property. Multiple family sales are permitted if they are held on the property of one of the participants.

4. No goods purchased for resale may be offered for sale.

5. No consignment goods may be offered for sale.

6. Directional signs may be placed on the street right-of-way.

7. All directional and advertising signs shall be freestanding and removed after completion of the sale.

8. All directional and advertising signs placed on private property shall have the owner's permission.

9. No directional or advertising signs may be larger than two (2) feet by three (3) feet.

D. Development in the R-1 District shall also comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7035

MEDIUM-DENSITY RESIDENTIAL (R-2) DISTRICT

SECTIONS:

7035.01 PURPOSE AND APPLICATION
7035.02 PERMITTED USES
7035.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7035.04 PROHIBITED USES
7035.05 MINIMUM LOT SIZE

7035.12 LANDSCAPING
7035.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7035.01 PURPOSE AND APPLICATION

The purpose of the Medium-density Residential (R-2) District is to designate areas for single-family, duplex, and other medium-density, multi-family residential uses. The maximum density allowed is sixteen (16) dwelling units per net acre. While single-family houses and duplexes typify this district, other innovative housing techniques, including clustering and zero lot line developments, are permitted in combination with the Cluster (CL) Combining District.

SECTION 7035.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards and procedures set out in Article 7215 of this chapter:

A. RESIDENTIAL USES

1. Apartment
2. Condominium
3. Duplex
4. Quadruplex
5. Residential accessory structures
6. Single-family dwelling
7. Triplex

B. RECREATIONAL, ENTERTAINMENT, AND TOURIST FACILITIES

1. Community recreational facilities

C. UTILITY AND COMMUNICATION FACILITIES

1. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission, pursuant to Section 7282.04

D. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

2. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

E. MISCELLANEOUS USES

1. Construction trailer, temporary, during construction activity only

2. Day-care center for on-site care of children

3. Day-care home, large family, pursuant to Article 7255

4. Day-care home, small family, when located within a detached single-family dwelling

5. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

6. Garage or yard sales pursuant to Section 7035.13.B

7. Home occupation pursuant to Article 7250

8. Water system, small

SECTION 7035.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards set out in Article 7215 and subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RESIDENTIAL USES

1. Community care facility
2. Mobilehome
3. Retirement or rest home

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Country club
2. Golf course
3. Golf driving range
4. Park or playground
5. Swimming pool, public
6. Tennis or swim club

C. COMMERCIAL USES

Offices

1. Temporary on-site real estate tract sales

Services

2. Ambulance

D. TRANSPORTATION FACILITIES

1. Auto parking garage or lot, when located within five hundred (500) feet of the business or businesses it is intended to serve

E. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator
2. Utility substation

F. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Mineral exploration
2. Mining and mineral extraction pursuant to Article 7265
3. Oil or gas exploration and production pursuant to Article 7260

4. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity

5. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

SECTION 7035.04 PROHIBITED USES

All other uses not permitted by Sections 7035.02 and 7035.03 are prohibited.

SECTION 7035.05 MINIMUM LOT SIZE

Except as otherwise provided in Article 7130, no portion of any lot within the R-2 District shall contain less than six thousand (6,000) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7035.06 MINIMUM LOT AREA PER DWELLING UNIT

Except as otherwise provided in Article 7130, there shall be a minimum of two thousand seven hundred twenty-two (2,722) net square feet of lot area per dwelling unit.

SECTION 7035.07 YARDS AND SETBACKS

A. **Front Yard.** Except as otherwise provided in Section 7282.07, the front-yard minimum setback for all buildings shall be as follows:

Fifty-five (55) feet from the legal centerline of any existing or proposed public or private local street or access easement.

Seventy (70) feet from the legal centerline of any existing or proposed secondary highway.

Eighty (80) feet from the legal centerline of any existing or proposed major highway.

In no case shall the front-yard minimum setback be less than twenty-five (25) feet from the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** There shall be a side yard on each side of any building of not less than five (5) feet, except that on the street side of corner lots, buildings shall be set back a minimum of ten (10) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line. However, within the rear twenty-five (25) feet of all reverse corner lots, there shall be a minimum side yard of twenty-five (25) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line.

C. **Rear Yard.** There shall be a rear yard of not less than five (5) feet, except that in the case of through lots, the designated rear yard shall be in accordance with the front-yard setback requirements.

SECTION 7035.08 HEIGHT LIMITS

A. Residential buildings shall not exceed three (3) stories or thirty-five (35) feet.

B. Detached accessory structures shall not exceed two (2) stories or thirty-five (35) feet.

C. Radio and television antennae, chimneys, and other similar structures shall not exceed eighty (80) feet.

SECTION 7035.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. There shall be a minimum of ten (10) feet between residential buildings.

B. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings.

SECTION 7035.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7035.11 SIGNS

The following types of signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed six (6) square feet each, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Permanent subdivision identification signs

D. Temporary construction signs

E. Temporary political, religious, and civic campaign signs

F. Institutional identification signs, approved in conjunction with a conditional use permit

SECTION 7035.12 LANDSCAPING

Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

SECTION 7035.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All development in the R-2 District shall comply with the minimum standards set out in Article 7215 of this chapter except for one (1) single-family dwelling.

B. Garage or yard sales are permitted without special permit provided they meet the following standards:

1. Sales last no longer than three (3) days.

2. Sales are held no more than twice yearly.

3. Sales are conducted on the owner's or tenant's property. Multiple family sales are permitted if they are held on the property of one of the participants.

4. No goods purchased for resale may be offered for sale.

5. No consignment goods may be offered for sale.

6. Directional signs may be placed on the street right-of-way.

7. All directional and advertising signs shall be freestanding and removed after completion of the sale.

8. All directional and advertising signs placed on private property shall have the owner's permission.

9. No directional or advertising signs may be larger than two (2) feet by three (3) feet.

C. Development in the R-2 District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7040

HIGH-DENSITY RESIDENTIAL (R-3) DISTRICT

SECTIONS:

7040.01 PURPOSE AND APPLICATION
7040.02 PERMITTED USES
7040.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

7040.12 LANDSCAPING
7040.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7040.01 PURPOSE AND APPLICATION

The purpose of the High-density Residential (R-3) District is to designate areas appropriate for a variety of medium- to high-density residential living environments, including apartments, townhouses, and condominiums. The maximum allowable density is twenty-nine (29) dwelling units per net acre. The R-3 District may only be applied to those urban areas of the County which have adequate utility, street, and public facility capacity.

SECTION 7040.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards and procedures set out in Article 7215 of this chapter:

A. RESIDENTIAL USES

1. Apartment
2. Condominium
3. Duplex
4. Quadruplex
5. Residential accessory structures
6. Single-family dwelling

7. Townhouse

8. Triplex

B. RECREATIONAL, ENTERTAINMENT, AND TOURIST FACILITIES

1. Community recreation facilities

C. UTILITY AND COMMUNICATIONS FACILITIES

1. Transmission lines, towers, poles, pipelines and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission, pursuant to Section 7282.04

D. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

2. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

E. MISCELLANEOUS USES

1. Construction trailer, temporary, during construction activity only

2. Day-care center for on-site care of children

3. Day-care home, large family, pursuant to Article 7255

4. Day-care home, small family, when located within a detached single-family dwelling

5. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

6. Garage or yard sales pursuant to Section 7040.13.B

7. Home occupation pursuant to Article 7250

8. Water system, small

SECTION 7040.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all those determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards

set out in Article 7215 and subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RESIDENTIAL USES

1. Boarding or rooming house
2. Community care facility
3. Fraternity or sorority house
4. Mobilehome
5. Retirement or rest home
6. Residential hotel

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Country club
2. Golf course
3. Golf driving range
4. Park or playground
5. Swimming pool, public
6. Tennis or swim club

C. COMMERCIAL USES

Offices

1. Temporary on-site real estate tract sales

Services

2. Ambulance

D. TRANSPORTATION FACILITIES

1. Auto parking garage or lot, when located within five hundred (500) feet of the business or businesses it is intended to serve

E. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator
2. Utility substation

F. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Mineral exploration
2. Mining and mineral extraction pursuant to Article 7265
3. Oil or gas exploration and production pursuant to Article 7260
4. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity
5. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

G. WASTE FACILITIES

1. Community septic disposal system
2. Sewage treatment plant

H. INSTITUTIONAL USES

1. Cemetery, mausoleum, columbarium, or mortuary
2. Charitable or public service organization
3. Church
4. Club or lodge
5. Community center or senior citizens center
6. Crematory in conjunction with a cemetery, mausoleum, columbarium, or mortuary
7. Library
8. Museum
9. Public agency or public utility buildings and facilities
10. Sanitarium
11. Water treatment plant

I. EDUCATIONAL INSTITUTIONS AND SCHOOLS

General

1. Preschool
2. Elementary school

3. Junior high school

4. Senior high school

5. College or university

J. **MISCELLANEOUS USES**

1. Day-care center

2. Drainage sump

3. Flood control facilities

4. Water storage or groundwater recharge facilities

5. Water system, large

SECTION 7040.04 PROHIBITED USES

All other uses not permitted by Sections 7040.02 and 7040.03 are prohibited.

SECTION 7040.05 MINIMUM LOT SIZE

Except as otherwise provided in Article 7130, no portion of any lot within the R-3 District shall contain less than six thousand (6,000) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7040.06 MINIMUM LOT AREA PER DWELLING UNIT

Except as otherwise provided in Article 7130, there shall be a minimum of one thousand five hundred (1,500) net square feet of lot area per dwelling unit.

SECTION 7040.07 YARDS AND SETBACKS

A. **Front Yard.** Except as otherwise provided in Section 7282.07, the front-yard minimum setback for all buildings shall be as follows:

Forty-five (45) feet from the legal centerline of any existing or proposed public or private local street or access easement.

Sixty (60) feet from the legal centerline of any existing or proposed secondary highway.

Seventy (70) feet from the legal centerline of any existing or proposed major highway.

In no case shall the front-yard minimum setback be less than fifteen (15) feet from the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** There shall be a side yard on each side of any building of not less than five (5) feet, except that on the street side of corner lots, buildings shall be set back a minimum of ten (10) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line. However, within the rear twenty-five (25) feet of all reverse corner lots, there shall be a minimum side yard of fifteen (15) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line.

C. **Rear Yard.** There shall be a rear yard of not less than five (5) feet, except that in the case of through lots, the designated rear yard shall be in accordance with the front-yard setback requirements.

SECTION 7040.08 HEIGHT LIMITS

Buildings and structures shall not exceed four (4) stories or forty-five (45) feet.

SECTION 7040.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. There shall be a minimum distance of ten (10) feet between residential buildings.

B. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings.

SECTION 7040.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Section 7220 of this chapter.

SECTION 7040.11 SIGNS

The following types of signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed eight (8) square feet, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Permanent subdivision signs

D. Temporary construction signs

E. Temporary political, religious, and civic campaign signs

F. Institutional identification signs, approved in conjunction with a conditional use permit

SECTION 7040.12 LANDSCAPING

Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

SECTION 7040.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All development, except for one (1) single family dwelling, in the R-3 District shall comply with the minimum standards set out in Article 7215 of this chapter.

B. Garage or yard sales are permitted without special permit provided they meet the following standards:

1. Sales last no longer than three (3) days.

2. Sales are held no more than twice yearly.

3. Sales are conducted on the owner's or tenant's property. Multiple family sales are permitted if they are held on the property of one of the participants.

4. No goods purchased for resale may be offered for sale.

5. No consignment goods may be offered for sale.

6. Directional signs may be placed on the street right-of-way.

7. All directional and advertising signs shall be freestanding and removed after completion of the sale.

8. All directional and advertising signs placed on private property shall have the owner's permission.

9. No directional or advertising signs may be larger than two (2) feet by three (3) feet.

C. Development in the R-3 District shall also comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7045

MOBILEHOME SUBDIVISION (MS) DISTRICT

SECTIONS:

7045.01 PURPOSE AND APPLICATION
7045.02 PERMITTED USES
7045.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7045.04 PROHIBITED USES
7045.05 MINIMUM LOT SIZE

7045.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7045.10 PARKING
7045.11 SIGNS
7045.12 LANDSCAPING
7045.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7045.01 PURPOSE AND APPLICATION

The purpose of the Mobilehome Subdivision (MS) District is to designate areas suitable for mobilehome residential living environments and to restrict development within these areas to final map subdivisions in accordance with the Kern County Subdivision Ordinance. Uses are limited to those typical of and compatible with residential neighborhoods. The minimum lot size shall be six thousand (6,000) square feet unless the MS District is combined with the Lot Size Combining District (Article 7120) where a larger minimum lot size is specified. The minimum lot size may be reduced when any MS District is combined with the Cluster (CL) Combining District (Article 7130). All mobilehomes shall have permanent foundation systems or shall be recessed in the ground so that no portion of the undercarriage is visible. Recessing is not permitted when the mobilehome is connected to liquified petroleum gas (LPG).

SECTION 7045.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. AGRICULTURAL USES

1. Growing of agricultural crops for domestic use of the resident/occupant

2. Breeding and raising of animals pursuant to Section 7045.13.C

B. RESIDENTIAL USES

1. Mobilehome

2. Residential accessory structures, upon installation of mobilehome

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Community recreational facilities

D. UTILITY AND COMMUNICATIONS FACILITIES

1. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT

1. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

2. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

F. MISCELLANEOUS USES

1. Day-care home, large family, pursuant to Article 7255

2. Day-care home, small family

3. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

4. Garage or yard sales pursuant to Section 7045.13.D

5. Home occupation pursuant to Article 7250

6. Water system, small

SECTION 7045.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RESIDENTIAL USES

1. Community care facility

B. COMMERCIAL USES

Offices

1. Temporary on-site real estate tract sales

C. UTILITY AND COMMUNICATIONS FACILITIES

1. Utility substation

D. INSTITUTIONAL USES

1. Public agency or utility buildings or facilities

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Oil or gas exploration and production pursuant to Article 7260

2. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

F. MISCELLANEOUS USES

1. Drainage sump

2. Flood control facilities

3. Water storage or groundwater recharge facilities

4. Water system, large

G. WASTE FACILITIES

1. Community septic disposal system

2. Sewage treatment plant

3. Water treatment plant

SECTION 7045.04 PROHIBITED USES

All other uses not permitted by Sections 7045.02 and 7045.03 are prohibited, including dwellings other than mobilehomes.

SECTION 7045.05 MINIMUM LOT SIZE

Except as otherwise provided in Article 7130, no portion of any lot within the MS District shall contain less than six thousand (6,000) net square feet

or as otherwise specified by the Lot Size Combining District, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7045.06 MINIMUM LOT AREA PER DWELLING UNIT

There shall be no more than one dwelling unit per legal lot.

SECTION 7045.07 YARDS AND SETBACKS

A. **Front Yard.** The front-yard minimum setback for all buildings shall be as follows:

Fifty-five (55) feet from the legal centerline of any existing or proposed public or private local street or access easement.

Seventy (70) feet from the legal centerline of any existing or proposed secondary highway.

Eighty (80) feet from the legal centerline of any existing or proposed major highway.

In no case shall the front-yard minimum setback be less than twenty-five (25) feet from the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** There shall be a side yard on each side of a main building of not less than five (5) feet on one side and not less than ten (10) feet on the other side, except that on the street side of corner lots, buildings shall be set back a minimum of ten (10) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line. However, within the rear twenty-five (25) feet of all reverse corner lots, there shall be a minimum side yard of twenty-five (25) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line.

C. **Rear Yard.** There shall be a rear yard of not less than five (5) feet, except that in the case of through lots, the designated rear yard shall be in accordance with the front-yard setback requirements.

SECTION 7045.08 HEIGHT LIMITS

A. Buildings and structures shall not exceed two (2) stories or twenty-five (25) feet.

B. Radio and television antennae, chimneys, and other similar structures shall not exceed eighty (80) feet.

SECTION 7045.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. There shall be a minimum of ten (10) feet between residential buildings.

B. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings, except that pens, coops, or other structures for housing animals shall be at least thirty (30) feet away from any residential building or other building used for human habitation, at least one hundred (100) feet from the front lot line, at least twenty-five (25) feet from the street side lot line on a corner lot, and at least one hundred (100) feet away from any public park, school, hospital, or similar institution.

SECTION 7045.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7045.11 SIGNS

The following types of signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed six (6) square feet, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Permanent subdivision identification signs

D. Temporary construction signs

E. Temporary political, religious, and civic campaigns

F. Institutional identification signs, approved in conjunction with a conditional use permit

SECTION 7045.12 LANDSCAPING

None required.

SECTION 7045.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. No development shall be permitted within the MS District prior to recordation of a final map subdivision in accordance with the Kern County Subdivision Ordinance.

B. Each mobilehome shall have a permanent foundation system or be recessed in the ground so that no portion of the undercarriage is visible. A mobilehome shall not be recessed if connected to liquified petroleum gas (LPG). If the foundation system used results in exposed areas between the foundation and the mobilehome, then aluminum skirting shall be installed and maintained in place around the base of the mobilehome at all times. Skirting of equal material durability and design may be approved by the Director of Planning and Development Services.

C. The breeding and raising of animals permitted pursuant to Section 7045.02 shall be limited to poultry, rabbits and birds for domestic or hobby purposes, or similar small fowl and animals raised for food, scientific, or fur-bearing purposes, provided not more than twelve (12) of any one or combination of such animals may be maintained on a single lot.

D. Garage or yard sales are permitted without special permit provided they meet the following standards:

1. Sales last no longer than three (3) days.

2. Sales are held no more than twice yearly.

3. Sales are conducted on the owner's or tenant's property. Multiple family sales are permitted if they are held on the property of one of the participants.

4. No goods purchased for resale may be offered for sale.

5. No consignment goods may be offered for sale.

6. Directional signs may be placed on the street right-of-way.

7. All directional and advertising signs shall be freestanding and removed after completion of the sale.

8. All directional and advertising signs placed on private property shall have the owner's permission.

9. No directional or advertising signs may be larger than two (2) feet by three (3) feet.

E. Development in the MS District shall also comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7050

MOBILEHOME PARK (MP) DISTRICT

SECTIONS:

7050.01 PURPOSE AND APPLICATION
7050.02 PERMITTED USES
7050.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7050.04 PROHIBITED USES
7050.05 MINIMUM LOT SIZE
7050.06 MINIMUM LOT AREA PER DWELLING UNIT
7050.07 YARDS AND SETBACKS
7050.08 HEIGHT LIMITS
7050.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7050.10 PARKING
7050.11 SIGNS
7050.12 LANDSCAPING
7050.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7050.01 PURPOSE AND APPLICATION

The purpose of the Mobilehome Park (MP) District is to designate areas for medium-density mobilehome living areas. Uses are limited to mobilehome parks with spaces, mobilehomes available for rent, accessory uses, and recreational vehicle parks. Maximum density is regulated by the applicable General Plan land use category. Foundations for mobilehomes in mobilehome parks are permitted but not required.

SECTION 7050.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. RESIDENTIAL USES

1. Manager, caretaker, or proprietor quarters

2. Mobilehome

3. Mobilehome park, including accessory laundry and storage facilities

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Community recreational facilities

2. Recreational vehicle park, as an accessory use provided that the mobilehome park abuts and gains entrance from a major highway as designated on the Kern County Circulation Plan, and further provided that the area of such recreational vehicle park does not exceed twenty-five (25) percent of the combined area of the mobilehome park and recreational vehicle park

C. **MISCELLANEOUS USES**

1. Day-care center for on-site care of children

2. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

3. Water system, small

SECTION 7050.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

A. **MISCELLANEOUS USES**

1. Drainage sump

2. Garage or yards sales pursuant to Section 7050.13.E

3. Water system, large

4. Water treatment plant

SECTION 7050.04 PROHIBITED USES

All other uses not expressly permitted by Sections 7050.02 and 7050.03 are prohibited, including home occupations and commercial uses.

SECTION 7050.05 MINIMUM LOT SIZE

None.

SECTION 7050.06 MINIMUM LOT AREA PER DWELLING UNIT

None, except that overall project density shall comply with the density and intensity standards of the applicable General Plan land use category.

SECTION 7050.07 YARDS AND SETBACKS

A. **Front Yard.** The front-yard minimum setback for mobilehome parks measured from the exterior boundary of the park shall be as follows:

Fifty-five (55) feet from the legal centerline of any existing or proposed public or private local street.

Seventy (70) feet from the legal centerline of any existing or proposed secondary highway.

Eighty (80) feet from the legal centerline of any existing or proposed major highway.

In no case shall the front-yard minimum setback be less than twenty-five (25) feet from the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** There shall be a side yard on each side of a mobilehome park, measured from the exterior boundary of the park, of not less than five (5) feet, except that on the street side of a corner lot, the mobilehome park shall be set back in accordance with the front-yard setback requirements.

C. **Rear Yard.** There shall be a rear yard measured from the exterior boundary of the park of not less than five (5) feet for a mobilehome park, except that in the case of through lots, the designated rear yard shall be in accordance with the front-yard setback requirements.

SECTION 7050.08 HEIGHT LIMITS

A. Mobilehomes and accessory structures thereto shall not exceed two (2) stories or twenty-five (25) feet.

B. Community recreational facilities shall not exceed two (2) stories or thirty-five (35) feet.

C. Radio and television antennae, chimneys, and other similar structures shall not exceed eighty (80) feet.

SECTION 7050.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. The minimum distance between mobilehomes within a mobilehome park shall be as follows:

1. Ten (10) feet from side to side

2. Eight (8) feet from side to rear

3. Six (6) feet from rear to rear

B. There shall be a minimum distance of ten (10) feet between each building other than a mobilehome or mobilehome accessory structures.

C. There shall be a minimum distance of ten (10) feet between a mobilehome and a building, excepting mobilehome accessory structures.

SECTION 7050.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7050.11 SIGNS

The following types of signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the mobilehome for sale or rent, not to exceed six (6) square feet each, excluding the area of any vertical and/or horizontal support members

B. Permanent subdivision identification signs

C. Temporary construction signs

D. Temporary political, religious, or civic campaign signs.

SECTION 7050.12 LANDSCAPING

Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

SECTION 7050.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

No use shall be established, no development shall occur, and no building or grading permit shall be issued for any use or development in the MP District until an application for site development plan review has been submitted to and approved by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.02 of this chapter.

A. Application Contents:

An application for site development plan review shall include the following:

1. Name and address of applicant

2. Name(s) and address(es) of property owner(s)

3. Assessor's parcel number(s)

4. Legal description of the property

5. A site development plan, drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

a. Topography and proposed grading

b. Proposed private access drives and parking areas

c. Location of all mobilehome pads

d. Location of all permanent buildings and structures

e. Park, open space, and recreation areas

f. Proposed landscaping

g. North arrow

6. Elevations of all permanent common buildings

7. Phasing or development schedule

8. A detailed description of facility improvements, including:

a. Curb, gutter, sidewalks, and street widths

b. Water supply system

c. Sewage collection and disposal system

d. Public utilities

e. Fencing

9. Any reports, approvals, or requirements specified as mitigation measures by any environmental document for implementation of this district for specific parcels and a plan for compliance with the recommendations contained in such reports.

B. Development Standards and Conditions:

Development within the MP District shall comply with the following minimum standards:

1. Consistency with the General Plan

All development shall be consistent with the goals and policies of the General Plan and with the uses and density/intensity standards of the applicable General Plan land use category.

2. Access, Access Drives, and Parking

a. All access drives within a mobilehome park shall be not less than twenty-five (25) feet in width.

b. Guest parking shall be distributed throughout the mobilehome park as required by Article 7220.

c. All vehicular parking areas and drives shall be surfaced and graded in accordance with the requirements for local streets as contained in the Kern County Subdivision Ordinance.

d. All mobilehome spaces shall have frontage on internal private drives. No mobilehome space shall have direct access to a public street or public alley.

e. All mobilehome park sites shall have access from an abutting improved and dedicated County street or highway.

3. Public Street and Highway Dedications and Improvements

a. Street and highway dedications adjacent to mobilehome parks may be required by the Director of Planning and Development Services in accordance with the following standards:

(1) If the park is adjacent to a major highway, as shown on the Kern County Circulation Plan, the owner shall dedicate or make an irrevocable offer of dedication of all property lying within fifty-five (55) feet of the centerline of such highway for public highway purposes, at no cost to the County.

(2) If the park is adjacent to a secondary highway, as shown on the Kern County Circulation Plan, the owner shall dedicate or make an irrevocable offer of dedication of all property lying within forty-five (45) feet of the centerline of such highway for public highway purposes, at no cost to the County.

(3) If the park lies adjacent to the projected alignment of a planned local street which is necessary for circulation within the general area or neighborhood, the owner shall dedicate or make an irrevocable offer of dedication of all that property lying within thirty (30) feet of the centerline of such street for public street purposes, at no cost to the County.

(4) If the park is adjacent to an adopted Specific Plan or Official Plan Line, the owner shall dedicate or make an irrevocable offer of dedication of all property lying within the specified right-of-way line for public highway purposes, at no cost to the County.

b. Improvements may be required by the Director of Planning and Development Services, at no cost to the County, in accordance with the following standards:

(1) **Bakersfield Designated Urban Area.** In conformity with Type A Subdivision Standards, including installation of curb, gutter, sidewalk, and concrete driveway approach.

(2) **All Other Designated Urban Areas.** In conformity with Type B Subdivision Standards.

c. Required street and highway improvements shall include any necessary tie to existing pavement and shall be under permit of the County or the State Division of Highways, as appropriate.

4. Recreational Areas and Facilities

a. If a mobilehome park contains ten (10) or more mobilehome spaces, or if a mobilehome park combined with a recreational vehicle park as a secondary use contains a combination of ten (10) or more mobilehome spaces and recreational vehicle spaces, an open area of land devoted to and landscaped for recreational use shall be provided within the park.

b. Such recreational area shall be no less than five thousand (5,000) square feet, plus an additional one hundred (100) square feet for each space in excess of twenty-five (25) spaces.

c. Required recreational areas may be divided into more than one location, provided no single location contains less than one thousand (1,000) square feet.

d. No building or mobilehome shall occupy a required recreational area, excepting buildings and structures necessary or used and devoted to recreational uses, such as recreation buildings, swimming pools, swimming pool accessory buildings, saunas, playgrounds with or without equipment, picnic areas, or other improved open space areas.

e. No required front yard, side yard, or rear yard of the park, or any mobilehome space, recreational vehicle space, or storage area may be counted toward the requirement for recreational space.

f. The required recreational space shall be accessible to all occupants of the park and shall not be used for any other purpose than recreational use of the occupants of the park, except that such space may be used for any subsurface sewage effluent absorption facilities where approved by the Kern County Health Department.

5. Enclosures

   a. Each mobilehome park shall be completely enclosed within a fence, hedge, or combination thereof, subject to the approval of the Director of Planning and Development Services as to design and materials.

   b. Such enclosure may have driveway or pedestrian way openings, subject to approval by the Director of Planning and Development Services.

   c. Within any required front yard, a required enclosure shall be four (4) feet in height.

   d. Within any other portion of the park, a required enclosure shall be six (6) feet in height.

   e. When deemed necessary by the Director of Planning and Development Services, in order to maintain standards compatible with existing development of adjacent properties, specific types of fences may be required to be constructed.

6. Utility Installation

   a. All public utility transmission lines located within the park shall be placed underground.

   b. Utility connections to each mobilehome space shall be placed underground.

7. Drainage

   a. A drainage system shall be installed prior to occupancy of the park and shall be continuously maintained in accordance with a plan approved by the Director of Planning and Development Services.

   b. The plan shall include, but is not limited to, the following provisions:

      (1) All drainage originating on the park site shall be contained on the same site, unless a plan for acceptance of such drainage to off-site sumps has been approved by the Kern County Department of Planning and Development Services.

      (2) The method for transporting off-site drainage through a mobilehome park shall be in accordance with the criteria for the 100-year flood.

(3) In the event that any drainage sump area located within the park has a water holding capacity of more than eighteen (18) inches in depth, the area shall be completely enclosed within a chain link fence, six (6) feet in height with vertical redwood slats.

8. Water Distribution and Sewage Disposal Systems

a. A water distribution system shall be installed prior to occupancy of the park and shall be continuously maintained, in accordance with a plan approved by the Kern County Health Department and the Kern County Fire Department.

b. A sewage disposal system shall be installed prior to occupancy of the park and shall be continuously maintained, in accordance with a plan approved by the Kern County Health Department and the Regional Water Quality Control Board.

C. School Facilities Fee Requirement:

Thirty (30) days from the effective date hereof, the approval of any mobilehome park under this article is conditioned upon the payment of any fees or the dedication of any land required by standards established under the Kern County School Facilities Ordinance (commencing with Section 5890 of the Kern County Ordinance Code) which may be in effect with respect to the school district or any attendance area thereof in which such mobilehome park is located at the time final approval under this article is issued. Payment of any fees or the dedication of any land so required shall be completed by the owner of any such mobilehome park prior to issuance of a permit to construct, reconstruct, expand, or operate such mobilehome park as specified in the approval.

D. State Permit Requirements:

The mobilehome park operator shall secure necessary building permits and an operating license from the State of California.

E. Garage or yard sales are permitted without special permit provided they meet the following standards:

1. Sales last no longer than three (3) days.

2. Sales are held no more than twice yearly.

3. Sales are conducted on the owner's or tenant's property. Multiple family sales are permitted if they are held on the property of one of the participants.

4. No goods purchased for resale may be offered for sale.

5. No consignment goods may be offered for sale.

6. Directional signs may be placed on the street right-of-way.

7. All directional and advertising signs shall be freestanding and removed after completion of the sale.

8. All directional and advertising signs placed on private property shall have the owner's permission.

9. No directional or advertising signs may be larger than two (2) feet by three (3) feet.

F. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

SECTION 7055.01 PURPOSE AND APPLICATION

The purpose of the Commercial Office (CO) District is to designate areas suitable for business and professional offices. The CO District may serve as a buffer between retail commercial and residential areas. The CO District may also be combined with the Cluster (CL) Combining District to achieve innovative, creative office or commercial development. Uses in the CO District are limited to low-intensity commercial activities and generally higher-density residential developments.

SECTION 7055.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards and procedures set out in Article 7215 of this chapter:

A. RESIDENTIAL USES

1. Manager, caretaker, or proprietor quarters

B. COMMERCIAL USES

Offices

1. Business or professional
2. Real estate
3. Research and development

General Retail Sales

4. Art gallery

Services

5. Artist studio

6. Interior decorator, provided there is no on-site sale of merchandise

7. Laboratory, medical, dental, optical, or biological

8. Photography studio

9. Telegraph

10. Ticket agency

11. Travel agency

C. UTILITY AND COMMUNICATIONS FACILITIES

1. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

D. INSTITUTIONAL USES

1. Church

2. Community or senior citizens center

3. Government office or building for administrative purposes

4. Library

5. Museum, indoor only

E. EDUCATIONAL INSTITUTIONS AND SCHOOLS

General

1. Preschool

2. Elementary school

3. Junior high school

4. Senior high school

Specialized Schools

5. Art, craft, or music school

6. Business or trade school, provided that all instruction is conducted within a building and that there is no outside storage of materials or supplies associated with the school

7. Dance school

8. Driving school

9. Martial arts school

10. Swim school

F. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

2. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

G. MISCELLANEOUS USES

1. Construction trailer, temporary, during construction activity only

2. Day-care center

3. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

4. Studio, radio, television, or broadcasting

5. Water system, small

SECTION 7055.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards set out in Article 7215 and subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RESIDENTIAL USES

1. Apartment
2. Boarding or rooming house
3. Community care facility
4. Condominium
5. Duplex
6. Fraternity or sorority house
7. Quadruplex
8. Retirement or rest home
9. Residential hotel
10. Residential accessory structures
11. Single-family dwelling
12. Townhouse
13. Triplex

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Circus or carnival, temporary
2. Health club, indoor only
3. Park or playground
4. Swimming pool, public, indoor only
5. Tennis club, indoor only

C. COMMERCIAL USES

Services

1. Ambulance
2. Financial institution, including bank, savings and loan, or credit union

D. **TRANSPORTATION FACILITIES**

1. Auto parking garage or lot
2. Heliport

E. **UTILITY AND COMMUNICATIONS FACILITIES**

1. Radio, television, or commercial communications transmitter, receiver, or translator
2. Utility substation

F. **INSTITUTIONAL USES**

1. Cemetery, mausoleum, columbarium, or mortuary
2. Charitable or public service organization
3. Club or lodge
4. Convalescent hospital
5. Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary
6. Fire or police station
7. Hospital
8. Labor union hall
9. Post office
10. Public agency or utility buildings and facilities
11. Sanitarium

G. **WASTE FACILITIES**

1. Community septic disposal system
2. Sewage treatment plant

H. **RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES**

1. Oil and gas exploration and production pursuant to Article 7260
2. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity

3. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

I. **MISCELLANEOUS USES**

1. Commercial coach, when incidental to a permitted use
2. Drainage sump
3. Flood control facilities
4. Off-site advertising sign
5. Water storage or groundwater recharge facility
6. Water system, large
7. Water treatment plant

SECTION 7055.04 PROHIBITED USES

All other uses not permitted by Sections 7055.02 and 7055.03 are prohibited.

SECTION 7055.05 MINIMUM LOT SIZE

Except where otherwise provided in Article 7130, no portion of any lot within the CO District shall contain less than seven thousand five hundred (7,500) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7055.06 MINIMUM LOT AREA PER DWELLING UNIT

There shall be a minimum of one thousand five hundred (1,500) square feet of lot area per dwelling unit when dwellings are permitted with a conditional use permit.

SECTION 7055.07 YARDS AND SETBACKS

A. **Front Yard.** The front-yard minimum setback for all buildings shall be as follows:

Forty (40) feet from the legal centerline of any existing or proposed public or private local street and access easement.

Forty-five (45) feet from the legal centerline of any existing or proposed secondary highway.

Fifty-five (55) feet from the legal centerline of any existing or proposed major highway.

In no case shall the buildings be located in the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** None required.

C. **Rear Yard.** There shall be a rear yard of not less than twenty (20) feet, except that no rear yard shall be required where a public alley exists adjacent to the rear property line. The Director of Planning and Development Services may reduce rear yard requirements in accordance with the Kern County Fire Code if written approval is obtained from the Kern County Fire Chief.

D. **Yards and Setbacks for Residential Development.** Yards and setbacks for residential developments shall be the same as those specified in Section 7040.07.

SECTION 7055.08 HEIGHT LIMITS

Buildings and structures shall not exceed four (4) stories or forty-five (45) feet.

SECTION 7055.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. None required for nonresidential buildings.

B. There shall be a minimum distance of ten (10) feet between residential buildings.

C. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings.

SECTION 7055.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7055.11 SIGNS

The following types of signs are permitted in accordance with Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed eight (8) square feet, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Permanent subdivision identification signs, when approved in conjunction with a conditional use permit

D. Temporary construction signs

E. Temporary political, religious, or civic campaign signs

F. Institutional identification signs

G. Signs attached to buildings (on site only)

H. Monument signs, not to exceed twenty-four (24) square feet in area each (on site only)

The maximum permitted area for all signs shall not exceed two (2) square feet for each lineal foot of street frontage.

SECTION 7055.12 LANDSCAPING

Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

SECTION 7055.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All development in the CO District shall comply with the minimum requirements set out in Article 7215 of this chapter.

B. Development in the CO District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7060

NEIGHBORHOOD COMMERCIAL (C-1) DISTRICT

SECTIONS:

7060.01 PURPOSE AND APPLICATION
7060.02 PERMITTED USES
7060.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7060.04 PROHIBITED USES
7060.05 MINIMUM LOT SIZE

SECTION 7060.01 PURPOSE AND APPLICATION

The purpose of the Neighborhood Commercial (C-1) District is to designate areas for low-intensity commercial activities oriented to serving nearby residential areas. The C-1 District may also be combined with the Cluster (CL) Combining District to achieve innovative, creative office or commercial developments. Uses in the C-1 District typically include small retail, service-oriented commercial activities, including small shopping centers. The C-1 District generally will be located on major or secondary highways.

SECTION 7060.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with standards and procedures set out in Article 7215 of this chapter:

A. RESIDENTIAL USES

1. Manager, caretaker, or proprietor quarters

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Health club
2. Tennis or swim club, indoor only

C. COMMERCIAL USES

Offices

1. Business or professional
2. Financial institution, including bank, savings and loan, or credit union
3. Real estate
4. Research and development

General Retail Sales

5. Appliances, including service and repair, provided there is no outside storage
6. Art gallery
7. Auto parts and accessories
8. Bicycle, including rental and service
9. Bookstore, general
10. Christmas tree, temporary
11. Clothing and apparel
12. Drugs and pharmaceuticals
13. Fireworks stand, temporary
14. Florist
15. Gift and card
16. Hardware, general, excluding lumber sales, and outside storage of materials
17. Ice vending machine
18. Lawnmower, including repair, when located entirely within a building
19. Locksmith or key and lock shop
20. Newspaper or magazine stand
21. Shoes

22. Stationary and office supply

23. Tobacco

24. Variety

Food and Beverage Retail Sales

25. Bakery, small

26. Convenience market

27. Drive-in food market or dairy

28. Foodstore

29. Specialized, including meat, vegetables, health foods, or candy

Eating and Drinking Establishments

30. Bar, tavern, or cocktail lounge

31. Ice cream parlor

32. Restaurant, cafe, or coffee shop

33. Restaurant, fast-food

Services

34. Artist studio

35. Auto service station, small

36. Bath house, including sauna, spa, turkish, steam, or tanning

37. Barber or beauty shop

38. Clinic, medical or physical therapy, out-patient only

39. Interior decorator

40. Laboratory, medical, dental, optical, or biological

41. Laundromat, self-service

42. Laundry, drop off and pick up only

43. Photography studio

44. Shoe shine stand

45. Shoe repair

46. Tailor or dressmaker

47. Taxidermist

48. Telegraph

49. Ticket agency

50. Travel agency

51. Veterinary, household pets only, provided there are no outside kennels

D. UTILITY AND COMMUNICATIONS FACILITIES

1. Transmission lines, towers, poles pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

2. Utility substation

E. INSTITUTIONAL USES

1. Charitable or public service organization

2. Church

3. Community or senior citizens center

4. Government office or building

5. Library

7. Dance school

8. Driving school

9. Martial arts school

10. Swim school

G. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

2. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

H. MISCELLANEOUS USES

1. Day-care center

2. Construction trailer, temporary, during construction activities only

3. Studio, radio, television, broadcasting

4. Water system, small

SECTION 7060.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with standards set out in Article 7215 and subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RESIDENTIAL USES

1. Apartment

2. Boarding or rooming house

3. Community care facility

4. Condominium

5. Duplex

6. Fraternity or sorority house

7. Quadruplex

8. Retirement or rest home

9. Residential hotel

10. Residential accessory structures

11. Single-family dwelling

12. Townhouse

13. Triplex

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Circus or carnival, temporary

2. Miniature golf course

3. Movie theater, drive-in

4. Movie theater, walk-in

5. Park or playground

6. Pool or billiard parlor

7. Swimming pool, public (outdoor only)

8. Tennis club, outdoor only

9. Theater, live

10. Video games arcade

C. COMMERCIAL USES

General Retail Sales

1. Antiques, with no outside storage

2. Nursery, plant

Services

3. Ambulance
4. Auto wash, self-service
5. Printing, lithography or blue-printing
6. Veterinary, including veterinary hospital

D. TRANSPORTATION FACILITIES

1. Auto parking garage or lot
2. Heliport

E. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator

F. INSTITUTIONAL USES

1. Cemetery, mausoleum, columbarium, or mortuary
2. Charitable or public service organization
3. Club or lodge
4. Convalescent hospital
5. Crematory, in conjunction with a cemetery, mausoleum, columbarium, or mortuary
6. Fire or police station
7. Hospital
8. Labor union hall
9. Post office
10. Public agency or public utility buildings or facilities
11. Sanitarium

G. WASTE FACILITIES

1. Community septic disposal system
2. Sewage treatment plant

H. **RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES**

1. Oil or gas exploration and production pursuant to Article 7260

2. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity

3. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

I. **MISCELLANEOUS USES**

1. Commercial coach, when incidental to a permitted use

2. Drainage sump

3. Flood control facilities

4. Off-site advertising sign

5. Water storage or groundwater recharge facilities

6. Water system, large

7. Water treatment plant

SECTION 7060.04 PROHIBITED USES

All other uses not permitted by Sections 7060.02 and 7060.03 are prohibited.

SECTION 7060.05 MINIMUM LOT SIZE

Except as otherwise provided in Article 7130, no portion of any lot within the C-1 District shall contain less than seven thousand five hundred (7,500) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7060.06 MINIMUM LOT AREA PER DWELLING UNIT

There shall be a minimum of one thousand five hundred (1,500) square feet of lot area per dwelling unit when dwellings are permitted with a conditional use permit.

SECTION 7060.07 YARDS AND SETBACKS

A. **Front Yard.** The front-yard minimum setback for all buildings shall be as follows:

Forty (40) feet from the legal centerline of any existing or proposed public or private local street and access easements.

Forty-five (45) feet from the legal centerline of any existing or proposed secondary highway.

Fifty-five (55) feet from the legal centerline of any existing or proposed major highway.

In no case shall buildings be located in the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** None required.

C. **Rear Yard.** There shall be a rear yard of not less than twenty (20) feet, except that no rear yard shall be required in the event that a public alley exists. The Director of Planning and Development Services may reduce rear yard requirements in accordance with the Kern County Fire Code if written approval is obtained from the Kern County Fire Chief.

D. **Yards and Setbacks for Residential Developments.** Yards and setbacks for residential developments shall be the same as those specified in Section 7040.07 of this chapter.

SECTION 7060.08 HEIGHT LIMITS

Buildings and structures shall not exceed four (4) stories or forty-five (45) feet.

SECTION 7060.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. None required for nonresidential buildings.

B. There shall be a minimum distance of ten (10) feet between residential buildings.

C. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings.

SECTION 7060.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7060.11 SIGNS

The following signs are permitted in accordance with Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed eight (8) square feet, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Permanent subdivision identification signs, when approved in conjunction with a conditional use permit

D. Temporary construction signs

E. Temporary political, religious, or civic campaign signs

F. Institutional signs

G. Signs attached to buildings (on-site identification only)

H. Monument signs, not to exceed forty-eight (48) square feet each (on-site identification only)

I. Pole signs, not to exceed two hundred (200) square feet in area each (on-site identification only)

J. Off-site advertising signs, when approved by conditional use permit

The maximum permitted area of all signs shall not exceed three (3) square feet for each lineal foot of street frontage.

SECTION 7060.12 LANDSCAPING

Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

SECTION 7060.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All development in the C-1 District shall comply with the minimum standards set out in Article 7215 of this chapter.

B. Development in the C-1 District shall comply with the interpretations and provisions of Article 7282 of this chapter.

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Bingo parlor
2. Bowling alley
3. Card room
4. Circus or carnival, temporary, not to exceed four (4) days

5. Dance hall, ballroom, or discotheque

6. Golf driving range

7. Health club

8. Hotel or motel

9. Miniature golf course

10. Movie theater, walk-in

11. Pool or billiard parlor

12. Skating rink, roller or ice

13. Tennis or swim club

14. Theater, live

15. Video games arcade

C. COMMERCIAL USES

Offices

1. Business or professional

2. Financial, including bank, savings and loan, or credit union

3. Real estate

4. Research and development

General Retail Sales

5. Antiques, provided there is no outside display

6. Appliances, including service and repair, provided there is no outside storage

7. Art gallery

8. Auto leasing

9. Auto, new

10. Auto, used

11. Auto parts and accessories

12. Auto tire, including service

13. Bicycle, including rental and service

14. Boat, including service and parts when incidental to sales

15. Bookstore, general

16. Christmas tree, temporary

17. Clothing and apparel

18. Computer, including service and repair

19. Department store

20. Drugs and pharmaceuticals

21. Electric appliances, including service and repair

22. Electric equipment, including service and repair

23. Feed, provided there is no outside storage

24. Fireworks stand, temporary

25. Floor covering, drapery, or upholstery

26. Florist

27. Furniture

28. Gardening and landscaping supply, provided there is no outside storage

29. Gift and card

30. Gun, including repair

31. Hardware, general, including lumber sales, provided there is no outside storage of materials

32. Hobby supplies

33. Home or office furnishings

34. Jewelry and watches

35. Ice vending machine

36. Lapidary

37. Lawnmower, including repair, when located entirely within a building

38. Leather goods and luggage

39. Locksmith or key and lock shop

40. Military surplus, provided there is no outside storage

41. Mobilehome, including rental and service

42. Motorcycles, including service and repair

43. Musical instruments (including repair)

44. Newspaper or magazine stand

45. Nursery, plant

46. Office machines and equipment

47. Paint and wallpaper

48. Pawn shop

49. Pet store

50. Photographic supply or camera

51. Plumbing supply, provided there is no outside storage

52. Pottery

53. Recreational vehicles, including service

54. Shoes

55. Sporting goods and athletic equipment

56. Stationary and office supply

57. Tobacco

58. Toys

59. Truck, including rental

60. Used clothing and household goods, provided there is no outside storage

61. Variety

Food and Beverage Retail Sales

62. Bakery

63. Catering

64. Convenience market

65. Drive-in food market or dairy

66. Farmers' market

67. Food store

68. Liquor store

69. Specialized, including meat, vegetables, health foods, or candy

Eating and Drinking Establishments

70. Bar, tavern, or cocktail lounge

71. Ice cream parlor

72. Restaurant, cafe, or coffee shop

73. Restaurant, fast-food

Services

74. Ambulance

75. Appliance repair

76. Artist studio

77. Auto service or repair

78. Auto service station

79. Auto wash

80. Auto wash, self-service

81. Bath house, including sauna, spa, turkish, steam, or tanning

82. Barber or beauty shop

83. Carpet cleaning

84. Clinic, medical or physical therapy, out-patient only

85. Equipment, small, rental

86. Furniture cleaning, refinishing or upholstery

87. Interior decorator

88. Janitorial service

89. Laboratory, medical, dental, optical, or biological

90. Laboratory, testing, classifying, or experimental, not involving the use of explosives or hazardous materials

91. Laundromat, self-service

92. Laundry, drop off and pick up only

93. Mini-warehouse, for storage of personal household goods, provided there is no outside storage

94. Mortuary or funeral parlor

95. Pest control, administrative offices only

96. Pet grooming

97. Photography studio

98. Picture framing

99. Printing, lithography, or blue-printing

100. Shoe shine stand

101. Shoe repair

102. Tailor or dressmaker

103. Taxidermist

104. Telegraph

105. Ticket agency

106. Travel agency

107. Truck fueling station, without repair facilities

108. Veterinary, household pets only, provided there are no outside kennels

109. Wedding chapel

D. UTILITY AND COMMUNICATIONS FACILITIES

1. Transmission lines, towers, poles, pipelines and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

2. Utility substation

E. INSTITUTIONAL USES

1. Auditorium, public

2. Charitable or public service organization

3. Church

4. Club or lodge

5. Convalescent hospital

6. Government office or building

7. Hospital

8. Labor union hall

9. Library

10. Museum, indoor only

11. Public agency or utility buildings and facilities

12. Sanitarium

F. EDUCATIONAL INSTITUTIONS AND SCHOOLS

General

1. Preschool

2. Elementary school

3. Junior high school

4. Senior high school

Specialized Schools

5. Art, craft, or music school

6. Business or trade school, provided that all instruction is conducted within a building and that there is no outside storage of materials or supplies associated with the school

7. Dance school

8. Driving school

9. Martial arts school

10. Swim school

G. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

2. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

H. MISCELLANEOUS USES

1. Construction trailer, temporary, during construction activity only

2. Day-care center

3. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

4. Off-site advertising sign

5. Revival, temporary, not to exceed fourteen (14) days

6. Studio, radio, television, recording, or movie

7. Water system, small

SECTION 7065.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards set out in Article 7215 and subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. **RESIDENTIAL USES**

1. Boarding or rooming house
2. Community care facility
3. Fraternity or sorority house
4. Residential accessory structures
5. Residential hotel

B. **RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES**

1. Amusement park
2. Circus or carnival
3. Equestrian establishment
4. Movie theater, adult
5. Movie theater, drive-in
6. Park or playground
7. Race track, automobile, motorcycle, or horse
8. Recreational vehicle park
9. Shooting range or gun club
10. Sports arena, indoor
11. Sports arena, outdoor
12. Swimming pool, public

C. **COMMERCIAL USES**

General Retail Sales

1. Bookstore, adult
2. Fruit stand, temporary

Services

3. Auto body repair and painting
4. Veterinary, including veterinary hospital

D. INDUSTRIAL USES

1. Contractor's storage yard, when accessory and incidental to a contractor's business office and wholly enclosed within a solid screening fence as approved by the Director of Planning and Development Services

2. Photographic processing plant or wholesale supply

E. TRANSPORTATION FACILITIES

1. Airport, private

2. Airport, public use

3. Auto parking garage or lot

4. Bus depot

5. Heliport

6. Taxi depot, including service and storage

F. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator

G. WASTE FACILITIES

1. Community septic disposal system

2. Sewage treatment plant

H. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Oil or gas exploration and production pursuant to Article 7260

2. Solar energy electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

3. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

I. INSTITUTIONAL USES

1. Cemetery, mausoleum, columbarium, or mortuary

2. Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary

3. Zoo

J. **EDUCATIONAL INSTITUTIONS AND SCHOOLS**

1. College or university

K. **MISCELLANEOUS USES**

1. Commercial coach, temporary, when incidental to a permitted use
2. Drainage sump
3. Flea market or swap meet
4. Flood control facilities
5. Massage parlor
6. Water storage or groundwater recharge facilities
7. Water system, large
8. Water treatment plant

SECTION 7065.04 PROHIBITED USES

All other uses not permitted by Sections 7065.02 and 7065.03 are prohibited.

SECTION 7065.05 MINIMUM LOT SIZE

Except as otherwise provided in Article 7130, no portion of any lot within the C-2 District shall contain less than seven thousand five hundred (7,500) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7065.06 MINIMUM LOT AREA PER DWELLING UNIT

There shall be a minimum of one thousand five hundred (1,500) square feet of lot area per dwelling unit when dwellings are permitted with a conditional use permit.

SECTION 7065.07 YARDS AND SETBACKS

A. **Front Yard.** The front-yard minimum setback for all buildings shall be as follows:

Forty (40) feet from the legal centerline of any existing or proposed public or private local street and access easements.

Forty-five (45) feet from the legal centerline of any existing or proposed secondary highway.

Fifty-five (55) feet from the legal centerline of any existing or proposed major highway.

In no case shall buildings be located in the right-of-way established by any Official of Specific Plan Line.

B. **Side Yard.** None required.

C. **Rear Yard** There shall be a rear yard of not less than twenty (20) feet, except that no rear yard shall be required in the event that a public alley exists. Rear yard requirements may be reduced in accordance with the Kern County Fire Code if written approval is obtained from the Kern County Fire Chief and Director of Planning and Development Services.

D. **Yards and Setbacks for Residential Developments.** Yards and setbacks for residential developments shall be the same as those specified in Section 7040.07 of this chapter.

SECTION 7065.08 HEIGHT LIMITS

Buildings and structures shall not exceed six (6) stories or seventy-five (75) feet, unless the building is set back from each street, alley, and lot line at least one (1) foot for each three (3) feet of height above six (6) stories or seventy-five (75) feet. No building shall exceed ten (10) stories or one hundred and thirty-five (135) feet.

SECTION 7065.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. None required for nonresidential buildings.

B. There shall be a minimum distance of ten (10) feet between residential buildings.

C. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings.

SECTION 7065.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7065.11 SIGNS

The following signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed twelve (12) square feet, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Permanent subdivision identification signs, when approved in conjunction with a conditional use permit

D. Temporary construction signs

E. Temporary political, religious, or civic campaign signs

F. Institutional signs

G. Signs attached to buildings

H. Monument signs, not to exceed forty-eight (48) square feet in area each

I. Pole signs, not to exceed two hundred (200) square feet in area each

J. Off-site advertising signs

The maximum permitted area of all signs shall not exceed three (3) square feet for each lineal foot of street frontage.

SECTION 7065.12 LANDSCAPING

Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

SECTION 7065.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All development in the C-2 District shall comply with the minimum standards set out in Article 7215 of this chapter.

B. Development in the C-2 District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7070

HIGHWAY COMMERCIAL (CH) DISTRICT

SECTIONS:

7070.01 PURPOSE AND APPLICATION
7070.02 PERMITTED USES
7070.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7070.04 PROHIBITED USES
7070.05 MINIMUM LOT SIZE
7070.06 MINIMUM LOT AREA PER DWELLING UNIT
7070.07 YARDS AND SETBACKS
7070.08 HEIGHT LIMITS
7070.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7070.10 PARKING
7070.11 SIGNS
7070.12 LANDSCAPING
7070.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7070.01 PURPOSE AND APPLICATION

The purpose of the Highway Commercial (CH) District is to designate areas for uses and services normally associated with the traveling public. The CH District shall be located adjacent to or in close proximity to major highways. The CH District may be combined with the Cluster (CL) Combining District to achieve innovative, creative commercial development. The CH District is intended to promote a unified grouping of travel-oriented uses such as gas stations, restaurants, and motels. It is also intended to permit limited urban type uses in rural areas adjacent to highways with a minimum of encroachment on surrounding agricultural activities.

SECTION 7070.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards and procedures set out in Article 7215 of this chapter:

A. RESIDENTIAL USES

1. Manager, caretaker, or proprietor quarters

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Health club
2. Hotel or motel
3. Movie theater, walk-in
4. Tennis and swim club

C. COMMERCIAL USES

Offices

1. Real estate

General Retail Sales

2. Auto, new
3. Auto tire, including service
4. Auto, used, when accessory to new auto sales
5. Drugs and pharmaceuticals
6. Gift and card
7. Ice vending machine
8. Variety

Food and Beverage Retail Sales

9. Convenience market
10. Drive-in food market or dairy
11. Food store
12. Liquor store
13. Specialized, including meat, vegetables, health food, or candy

Eating and Drinking Establishments

14. Bar, tavern, or cocktail lounge
15. Restaurant, cafe, or coffee shop
16. Restaurant, fast-food

Services

17. Ambulance
18. Auto rental
19. Auto service or repair
20. Auto service station, small

21. Auto service station, large

22. Auto towing

23. Auto wash

24. Auto wash, self-service

25. Telegraph

26. Travel agency

27. Truck fueling station, without repair facilities

D. TRANSPORTATION FACILITIES

1. Auto parking garage or lot

E. INSTITUTIONAL USES

1. Church

2. Fire or police station

3. Public agency or utility buildings and facilities

F. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

2. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

G. UTILITY AND COMMUNICATION FACILITY

1. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

H. MISCELLANEOUS USES

1. Construction trailer, temporary, during construction activity only

2. Day-care center

3. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

4. Off-site advertising sign

5. Water system, small

SECTION 7070.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards set out in Article 7215 and subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Amusement park

2. Campground

3. Circus or carnival

4. Golf course

5. Miniature golf course

6. Movie theater, drive-in

7. Race track, automobile, motorcycle, or horse

8. Recreational vehicle park

9. Sports arena, indoor

10. Sports arena, outdoor

B. COMMERCIAL USES

General Retail Sales

1. Bicycle, including rental, service, and repair

2. Locksmith or key and lock shop

3. Mobilehomes, including rental and service

4. Motorcycles, including service and repair

5. Photographic supply or camera

6. Recreational vehicles, including service

7. Ticket agency

Food and Beverage Retail Sales

8. Fruit stand, temporary

Services

9. Barber or beauty shop

10. Equipment, heavy, and truck or trailer rental

11. Shoe shine stand

12. Truck fueling station, with minor repair, but excluding engine or transmission repair

C. TRANSPORTATION FACILITIES

1. Airport

2. Bus depot

3. Heliport

4. Railroad station

5. Taxi depot, including service and storage

D. UTILITY AND COMMUNICATIONS FACILITIES

1. Communications equipment building

2. Radio, television, or commercial communications transmitter, receiver, or translator

3. Utility substation

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Oil or gas exploration and production

2. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity

3. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

F. **WASTE FACILITIES**

1. Community septic disposal system
2. Sewage treatment plant
3. Transfer station, small

G. **INSTITUTIONAL USES**

1. Auditorium, public

H. **EDUCATIONAL INSTITUTIONS AND SCHOOLS**

General

1. College or university

I. **MISCELLANEOUS**

1. Commercial coach, temporary, when incidental to a permitted use
2. Drainage sump
3. Water system, large
4. Water treatment plant

SECTION 7070.04 PROHIBITED USES

All other uses not permitted by Sections 7070.02 and 7070.03 are prohibited.

SECTION 7070.05 MINIMUM LOT SIZE

Except as otherwise provided in Article 7130, no portion of any lot within the CH District shall contain less than seven thousand five hundred (7,500) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7070.06 MINIMUM LOT AREA PER DWELLING UNIT

None. Dwelling units are not permitted, except as accessory to a permitted use.

SECTION 7070.07 YARDS AND SETBACKS

A. **Front Yard.** The front-yard minimum setback for all buildings shall be as follows:

Forty (40) feet from the legal centerline of any existing or proposed public or private local street.

Forty-five (45) feet from the legal centerline of any existing or proposed secondary highway.

Fifty-five (55) feet from the legal centerline of any existing or proposed major highway.

In no case shall buildings be located in the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** None required.

C. **Rear Yard.** There shall be a rear yard of not less than twenty (20) feet, except that no rear yard shall be required in the event that a public alley exists. Rear yard requirements may be reduced in accordance with the Kern County Fire Code if written approval is obtained from the Kern County Fire Chief and Director of Planning and Development Services.

SECTION 7070.08 HEIGHT LIMITS

Buildings and structures shall not exceed three (3) stories or thirty-five (35) feet.

SECTION 7070.09 MINIMUM DISTANCE BETWEEN STRUCTURES

None required.

SECTION 7070.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7070.11 SIGNS

The following signs are permitted in accordance with Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed twelve (12) square feet, excluding the area of any vertical and/or horizontal support members

B. Temporary construction signs

C. Temporary political, religious, or civic campaign signs

D. Institutional identification signs

E. Wall signs attached to buildings

F. Monument signs, not to exceed forty-eight (48) square feet each

G. Pole signs, not to exceed two hundred (200) square feet in area each

H. Off-site advertising signs

The maximum permitted area of all signs shall not exceed three (3) square feet for each lineal foot of street frontage.

SECTION 7070.12 LANDSCAPING

Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

SECTION 7070.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All development in the CH District shall comply with the minimum standards set out in Article 7215 of this chapter.

B. Development in the CH District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7075

LIGHT INDUSTRIAL (M-1) DISTRICT

SECTIONS:

7075.01 PURPOSE AND APPLICATION
7075.02 PERMITTED USES
7075.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7075.04 PROHIBITED USES
7075.05 MINIMUM LOT SIZE
7075.06 MINIMUM LOT AREA PER DWELLING UNIT
7075.07 YARDS AND SETBACKS
7075.08 HEIGHT LIMITS
7075.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7075.10 PARKING
7075.11 SIGNS
7075.12 LANDSCAPING
7075.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7075.01 PURPOSE AND APPLICATION

The purpose of the Light Industrial (M-1) District is to designate areas for wholesale commercial, storage, trucking, assembly-type manufacturing, and other similar industrial uses. Processing or fabrication will be limited to activities conducted within a building that does not emit fumes, odor, dust, smoke, or gas beyond the confines of the building within which the activities occur or produce significant levels of noise or vibration.

SECTION 7075.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with standards and procedures set out in Article 7215 of this chapter:

A. RESIDENTIAL USES

1. Manager, caretaker, or proprietor quarters, including a mobilehome

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Bingo parlor
2. Bowling alley
3. Card room
4. Circus or carnival, temporary, not to exceed four (4) days
5. Dance hall, ballroom, or discotheque

6. Golf driving range
7. Health club
8. Hotel or motel
9. Miniature golf
10. Movie theater, walk-in
11. Pool or billiard parlor
12. Skating rink, roller or ice
13. Tennis, swim or athletic club
14. Theater, live
15. Video games arcade

C. COMMERCIAL USES

Offices

1. Business or professional
2. Financial institution, including bank, savings and loan, or credit union
3. Real estate
4. Research and development

General Retail Sales

5. Antiques
6. Appliances, including service and repair
7. Art gallery
8. Auto leasing
9. Auto, new
10. Auto, used
11. Auto parts and accessories
12. Auto tire, including service
13. Bicycle, including rental and service

14. Boat, including service and parts
15. Bookstore, adult
16. Bookstore, general
17. Christmas tree, temporary
18. Clothing and apparel
19. Computer, including service and repair
20. Department store
21. Drugs and pharmaceuticals
22. Electric appliances, including service and repair
23. Electric equipment, including service and repair
24. Feed
25. Fireworks stand, temporary
26. Floor covering, drapery, or upholstery
27. Florist
28. Furniture
29. Gardening and landscaping supply
30. Gift and card
31. Gun, including repair
32. Hardware, general, including lumber sales
33. Hobby supplies
34. Home or office furnishings
35. Jewelry and watches
36. Ice vending machine
37. Lapidary
38. Lawnmower, including repair
39. Leather goods and luggage

40. Locksmith or key and lock shop
41. Military surplus
42. Mobilehomes, including rental and service
43. Motorcycles, including rental and repair
44. Musical instruments, including repair
45. Newspaper or magazine stand
46. Nursery, plant
47. Office machines and equipment
48. Paint and wallpaper
49. Pawn shop
50. Pet store
51. Photographic supply or camera
52. Plumbing supply
53. Pottery
54. Recreational vehicles, including service
55. Shoes
56. Sporting goods and athletic equipment
57. Stationary and office supply

104. Picture framing

105. Printing, lithography, or blue-printing

106. Shoe shine stand

107. Shoe repair

108. Tailor or dressmaker

109. Taxidermist

110. Telegraph

111. Ticket agency

112. Travel agency

113. Truck fueling station, with minor repair, but excluding engine or transmission repair

114. Veterinary, including veterinary hospital

115. Wedding chapel

D. INDUSTRIAL USES

Industrial Manufacturing or Assembly

1. Electronic equipment, assembly only
2. Plastics, assembly only

Industrial Storage

3. Automobile
4. Bottled gas
5. Cargo containers
6. Chemical storage when accessory to a permitted use
7. Cold storage
8. Contractor's storage yard
9. Draying or freight
10. Equipment and building material
11. Feed and fuel, including wood yards
12. Lumber
13. Moving and storage, yards or warehouse
14. Petroleum
15. Recreational vehicle
16. Truck and heavy equipment
17. Warehouse

Other Industrial Uses

18. Assaying
19. Billboard sign fabrication and storage
20. Photographic processing plant and/or wholesale supply

21. Sheet metal shop

22. Tire retreading

23. Welding or blacksmith, when conducted within an enclosed building

24. Wholesale distribution

E. TRANSPORTATION FACILITIES

1. Auto parking garage or lot

2. Bus depot, including service and storage

3. Taxi depot, including service and storage

F. UTILITY AND COMMUNICATIONS FACILITIES

1. Microwave relay station

2. Public utility buildings and service yards

3. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

4. Utility substation

G. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Mineral exploration

2. Oil or gas exploration and production pursuant to Section 7260.03

3. Production water injection wells for the purpose of disposing of production wastewater produced within the same oilfield in which the injection well is located pursuant to Section 7260.03

4. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

5. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

H. INSTITUTIONAL USES

1. Auditorium, public
2. Charitable or public service organization
3. Church
4. Club or lodge
5. Fire or police station
6. Government office or building
7. Labor union hall
8. Library
9. Museum, indoor only
10. Post office

I. EDUCATIONAL INSTITUTIONS AND SCHOOLS

General

1. Preschool
2. Elementary school
3. Junior high school
4. Senior high school

Specialized Schools

5. Art, craft, or music school
6. Business or trade school
7. Dance school
8. Driving school
9. Martial arts school
10. Swim school

J. MISCELLANEOUS USES

1. Commercial coach, when incidental to a permitted use
2. Construction trailer, temporary, during construction activities only
3. Day-care center
4. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map
5. Kennel
6. Off-site advertising sign
7. Revival, temporary (not to exceed 14 days)
8. Studio, radio, television, recording, or movie
9. Water system, small

SECTION 7075.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are all permitted in accordance with the requirements of Article 7215 of this chapter subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Amusement park
2. Circus or carnival
3. Equestrian establishment
4. Movie theater, adult
5. Movie theater, drive-in
6. Park or playground
7. Race track, automobile, bicycle, horse, or motorcycle
8. Recreational vehicle park
9. Shooting range or gun club
10. Sports arena, indoor

11. Sports arena, outdoor

12. Swimming pool, public

B. INDUSTRIAL USES

Industrial Manufacturing or Assembly

1. Prefabricated buildings and structures

2. Mobilehomes

Other Industrial Uses

3. Asphaltic concrete batch plant

4. Bakery, large

5. Concrete batch plant

6. Newspaper, magazine, or book printing

7. Well drilling service

8. Welding or blacksmith

C. INDUSTRIAL STORAGE

1. Chemical storage as main use

D. TRANSPORTATION FACILITIES

1. Airport, private

2. Airport, public use

3. Heliport

4. Railroad station

E. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator

F. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Electric power generating plant

2. Mining and mineral extraction pursuant to Article 7265

4. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity

5. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

G. **WASTE FACILITIES**

1. Community septic disposal system

2. Septage disposal site

3. Sewage treatment plant

4. Transfer station, large or small

5. Waste-to-energy facility

H. **INSTITUTIONAL USES**

1. Cemetery, mausoleum, columbarium, or mortuary

2. Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary

3. Zoo

I. **MISCELLANEOUS USES**

1. Drainage sump

2. Flea market or swap meet

3. Flood control facilities

4. Massage parlor

5. Water storage or groundwater recharge facilities

6. Water system, large

7. Water treatment plant

SECTION 7075.04 PROHIBITED USES

All other uses not permitted by Sections 7075.02 and 7075.03 are prohibited.

SECTION 7075.05 MINIMUM LOT SIZE

None.

SECTION 7075.06 MINIMUM LOT AREA PER DWELLING UNIT

None. Dwelling units are not permitted, except as accessory to a permitted use.

SECTION 7075.07 YARDS AND SETBACKS

A. **Front Yard,** The front-yard minimum setback for all buildings shall be as follows:

Forty (40) feet from the legal centerline of any existing or proposed public or private local street or access easements.

Forty-five (45) feet from the legal centerline of any existing or proposed secondary highway.

Fifty-five (55) feet from the legal centerline of any existing or proposed major highway.

In no case shall buildings be located in the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** None required.

C. **Rear Yard.** None required.

SECTION 7075.08 HEIGHT LIMITS

Buildings and structures shall not exceed six (6) stories or seventy-five (75) feet.

SECTION 7075.09 MINIMUM DISTANCE BETWEEN STRUCTURES

None required.

SECTION 7075.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7075.11 SIGNS

The following signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed twelve (12) square feet, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Temporary construction signs

D. Temporary political, religious, or civic campaign signs

E. Institutional identification signs

F. Signs attached to buildings

G. Monument signs, not to exceed one hundred (100) square feet each

H. Pole signs, not to exceed two hundred (200) square feet each

I. Off-site advertising signs

The maximum permitted area of all signs shall not exceed three (3) square feet for each lineal foot of street frontage.

SECTION 7075.12 LANDSCAPING

Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

SECTION 7075.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. Outdoor industrial storage yards shall be completely enclosed by a solid screening fence not less than six (6) feet in height. The design and materials proposed shall be approved by the Director of Planning and Development Services.

B. All development in the M-1 District shall comply with the minimum standards set out in Article 7215 of this chapter.

C. Development in the M-1 District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7080

MEDIUM INDUSTRIAL (M-2) DISTRICT

SECTIONS:

7080.01 PURPOSE AND APPLICATION
7080.02 PERMITTED USES
7080.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7080.04 PROHIBITED USES
7080.05 MINIMUM LOT SIZE
7080.06 MINIMUM LOT AREA PER DWELLING UNIT
7080.07 YARDS AND SETBACKS
7080.08 HEIGHT LIMITS
7080.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7080.10 PARKING
7080.11 SIGNS
7080.12 LANDSCAPING
7080.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7080.01 PURPOSE AND APPLICATION

The purpose of the Medium Industrial (M-2) District is to designate areas for general manufacturing, processing, and assembly activities. Uses may not produce fumes, odor, dust, smoke, gas, or vibrations extending beyond zoning district boundaries.

SECTION 7080.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards and procedures of Article 7215 of this chapter:

A. RESIDENTIAL USES

1. Manager, caretaker, or proprietor quarters, including a mobilehome

B. AGRICULTURAL USES

Agricultural Industries

1. Animal products processing, limited to the slaughter, processing, or shipping of poultry and rabbits
2. Brewery
3. Cannery
4. Cotton compress

5. Cotton gin

6. Creamery

7. Flour mill

8. Fruit, vegetable, and plant products processing, including packing, canning, preserving, and shipping

9. Glucose processing

10. Grain elevator or storage

11. Honey extraction

12. Lumber drying kiln

13. Oil extraction, nonmineral

14. Saw or planing mill

15. Winery

C. **RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES**

1. Bingo parlor

2. Bowling alley

3. Card room

4. Circus or carnival, temporary, not to exceed four (4) days

5. Dance hall, ballroom, or discotheque

6. Golf driving range

7. Health club

8. Hotel or motel

9. Miniature golf

10. Movie theater, walk-in

11. Pool or billiard parlor

12. Skating rink, roller or ice

13. Tennis, swim, or athletic club

14. Theater, live

15. Video games arcade

D. COMMERCIAL USES

Offices

1. Business or professional
2. Financial institutions, including bank, savings and loan, or credit union
3. Real estate
4. Research and development

General Retail Sales

5. Antiques
6. Appliances, including service and repair
7. Art gallery
8. Auto leasing
9. Auto, new
10. Auto, used
11. Auto parts and accessories
12. Auto tire, including service
13. Bicycle, including rental and service
14. Boat, including service and parts
15. Bookstore, adult
16. Bookstore, general
17. Christmas tree, temporary
18. Clothing and apparel
19. Computer, including service and repair
20. Department store
21. Drugs and pharmaceuticals
22. Electric appliances, including service and repair

23. Electric equipment, including service and repair
24. Feed
25. Fireworks stand, temporary
26. Floor covering, drapery, or upholstery
27. Florist
28. Furniture
29. Gardening and landscaping supply
30. Gift and card
31. Gun, including repair
32. Hardware, general, including lumber sales
33. Hobby supplies
34. Home or office furnishings
35. Jewelry and watches
36. Ice vending machine
37. Lapidary
38. Lawnmower, including repair
39. Leather goods and luggage
40. Locksmith or key and lock shop
41. Military surplus
42. Mobilehome, including rental and service
43. Motorcycles, including rental and repair
44. Musical instruments, including repair
45. Newspaper or magazine stand
46. Nursery, plant
47. Office machines and equipment
48. Paint and wallpaper

49. Pawn shop

50. Pet store

51. Photographic supply or camera

52. Plumbing supply

53. Pottery

54. Recreational vehicles, including service

55. Shoes

56. Sporting goods and athletic equipment

57. Stationary and office supply

58. Tobacco

59. Toys

60. Truck, including rental

61. Used clothing and household goods

62. Variety

Food and Beverage Retail Sales

63. Bakery

64. Catering

65. Convenience market

66. Drive-in food market or dairy

67. Farmers' market

68. Food store

69. Liquor store

70. Specialized, including meat, vegetables, health food, or candy

Eating and Drinking Establishments

71. Bar, tavern, or cocktail lounge

72. Ice cream parlor

73. Restaurant, cafe, or coffee shop

74. Restaurant, fast-food

Services

75. Ambulance

76. Artist studio

77. Auto rental

78. Auto service or repair, including body and paint shop

79. Auto service station

80. Auto tire repair

81. Auto towing

82. Auto wash

83. Auto wash, self-service

84. Bath house, including sauna, spa, turkish, steam, or tanning

85. Barber or beauty shop

86. Carpet cleaning

87. Clinic, medical or physical therapy, out-patient only

88. Equipment, small, rental

89. Equipment, heavy, or truck or trailer rental

90. Furniture cleaning, refinishing, or upholstery

91. Interior decorator

92. Janitorial service

93. Laboratory, medical, dental, optical, or biological

94. Laboratory, testing, classifying, or experimental, not involving the use of explosives or hazardous materials

95. Laundromat, self-service

96. Laundry, dry cleaning and dying plants

97. Mini-warehouse

98. Mortuary or funeral parlor

99. Pest control

100. Pet grooming

101. Photography studio

102. Picture framing

103. Printing, lithography, or blue-printing

104. Shoe shine stand

105. Shoe repair

106. Tailor or dressmaker

107. Taxidermist

108. Telegraph

109. Ticket agency

110. Travel agency

111. Truck fueling station

112. Truck service and repair

113. Veterinary, including veterinary hospital

114. Wedding chapel

E. INDUSTRIAL USES

Industrial Manufacturing or Assembly

1. Aircraft, assembly, when conducted wholly within a building

2. Auto/truck, assembly, when conducted wholly within a building

3. Batteries

4. Building material

5. Cabinet shop

6. Carpet and mattress

7. Ceramics

8. Chemical blending, not including manufacture
9. Clothing, garments, or shoes
10. Concrete blocks
11. Cosmetics, perfumes, or toiletries
12. Drugs and pharmaceuticals
13. Electronic equipment
14. Furniture
15. Ice
16. Mobilehome, modular home, or recreational vehicle
17. Musical instruments
18. Neon signs
19. Paint mixing, not employing a boiling process
20. Paper or pulp
21. Plastics, assembly only
22. Prefabricated buildings and structures
23. Soap, cold mix only
24. Textiles
25. Toy manufacturing and assembly
26. Trusses

Industrial Storage

27. Automobile
28. Bottled gas
29. Cargo containers
30. Chemical storage, when accessory to a permitted use
31. Cold storage
32. Contractor's storage yard

33. Draying or freight

34. Equipment and building materials

35. Feed and fuel, including wood yards

36. Lumber

37. Moving and storage

38. Petroleum

39. Recreational vehicle

40. Truck and heavy equipment

41. Warehouse

Other Industrial Uses

42. Assaying

43. Bakery

44. Beverage bottling works

45. Billboard sign fabrication and storage

46. Boat building and major repair

47. Concrete batch plant

48. Electroplating, when conducted wholly within an enclosed building

49. Machine shop

50. Metal extrusion

51. Newspaper, magazine, or book printing

52. Oil field service yard

53. Photographic processing plant or wholesale supply

54. Sandblasting, if incidental to another permitted use and conducted wholly within an enclosed building

55. Sheet metal shop

56. Tire retreading

57. Well drilling service

58. Welding or blacksmith

59. Wholesale distribution

F. TRANSPORTATION FACILITIES

1. Auto parking garage or lot

2. Bus depot, including service and storage

3. Railroad station

4. Railroad freight classification or switching yard

5. Taxi depot, including service and storage

G. UTILITY AND COMMUNICATIONS FACILITIES

1. Microwave relay station

2. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

3. Utility substation

H. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Cogeneration facility

2. Mineral exploration

3. Oil or gas exploration and production pursuant to Article 7260

4. Electrical power generating plant, excluding nuclear or coal

5. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

6. Wind-driven electrical generator for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

I. INSTITUTIONAL USES

1. Auditorium, public

2. Charitable or public service organization

3. Church

4. Fire or police station

5. Government office or building

6. Library

7. Museum, indoor only

8. Public agency or public utility buildings and facilities

J. MISCELLANEOUS USES

1. Commercial coach, when incidental to a permitted use

2. Construction trailer, temporary, during construction activity only

3. Day-care center

4. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

5. Kennel

6. Revival, temporary, not to exceed fourteen (14) days

7. Studio, radio, television, recording, or movie

8. Water system, small

SECTION 7080.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are all permitted in accordance with the requirements of Article 7215 of this chapter and subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. AGRICULTURAL USES

Breeding and Raising Animals

1. Beef cattle or livestock feed lot, stockyard, auction, or sales yard

Agricultural Industries

2. Alcohol distillery

3. Animal products processing, including slaughter, meat packing, canning, processing, and shipping

4. Tanning, curing, or storing animal hides

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Circus or carnival

2. Race track, automobile, bicycle, horse, or motorcycle

C. INDUSTRIAL USES

Industrial Manufacturing or Assembly

1. Oil refining

Industrial Storage

2. Chemical storage as a main use

3. Explosives, permanent

4. Log storage

5. Minerals and ore storage and loading

6. Salvage or junk yard

Other Industrial Uses

7. Metal, glass, or paper recycling facility

D. TRANSPORTATION FACILITIES

1. Airport, private

2. Airport, public use

3. Heliport

E. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator

F. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Asphalt batch plant

2. Mining and mineral extraction pursuant to Article 7265

3. Ore reduction

4. Potash manufacture

5. Wind generators, commercial

G. WASTE FACILITIES

1. Community septic disposal system

2. Sanitary landfill

3. Septage disposal site

4. Sewage treatment plant

5. Transfer station, large or small

6. Waste-to-energy facility

H. INSTITUTIONAL USES

1. Cemetery, mausoleum, or columbarium

2. Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary

3. Public agency or public utility buildings and facilities

I. MISCELLANEOUS

1. Drainage sump

2. Flea market or swap meet

3. Flood control facilities

4. Water storage and groundwater recharge facilities

5. Water system, large

6. Water treatment plant

SECTION 7080.04 PROHIBITED USES

All other uses not permitted by Sections 7080.02 and 7080.03 are prohibited.

SECTION 7080.05 MINIMUM LOT SIZE

None.

SECTION 7080.06 MINIMUM LOT AREA PER DWELLING UNIT

None. Dwellings are not permitted, except as accessory to a permitted use.

SECTION 7080.07 YARDS AND SETBACKS

A. **Front Yard.** The front-yard minimum setback for all buildings shall be as follows:

Forty (40) feet from the legal centerline of any existing or proposed public or private local street or access easements.

Forty-five (45) feet from the legal centerline of any existing or proposed secondary highway.

Fifty-five (55) feet from the legal centerline of any existing or proposed major highway.

In no case shall buildings be located in the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** None required.

C. **Rear Yard.** None required.

SECTION 7080.08 HEIGHT LIMITS

Buildings and structures shall not exceed six (6) stories or seventy-five (75) feet.

SECTION 7080.09 MINIMUM DISTANCE BETWEEN STRUCTURES

None required.

SECTION 7080.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7080.11 SIGNS

The following signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed twelve (12) square feet each, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Temporary construction signs

D. Temporary political, religious, or civic campaign signs

E. Institutional identification signs

F. Signs attached to buildings

G. Monument signs, not to exceed one hundred (100) square feet each

H. Pole signs, not to exceed two hundred (200) square feet in area each

I. Off-site advertising signs

The maximum permitted area of all signs shall not exceed three (3) square feet for each lineal foot of street frontage.

SECTION 7080.12 LANDSCAPING

Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

SECTION 7080.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All development in the M-2 District shall comply with the minimum standards set out in Article 7215 of this chapter.

B. Development in the M-2 District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7085

HEAVY INDUSTRIAL (M-3) DISTRICT

SECTIONS:

7085.01 PURPOSE AND APPLICATION
7085.02 PERMITTED USES
7085.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7085.04 PROHIBITED USES
7085.05 MINIMUM LOT SIZE
7085.06 MINIMUM LOT AREA PER DWELLING UNIT
7085.07 YARDS AND SETBACKS
7085.08 HEIGHT LIMITS
7085.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7085.10 PARKING
7085.11 SIGNS
7085.12 LANDSCAPING
7085.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7085.01 PURPOSE AND APPLICATION

The purpose of the Heavy Industrial (M-3) District is to designate areas suitable for heavy manufacturing and industrial uses which have the greatest potential for producing undesirable or adverse by-products, including traffic, noise, odors, dust, and vibrations. The M-3 District should be located in places substantially removed from residential areas.

SECTION 7085.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted in accordance with the standards and procedures set out in Article 7215 of this chapter:

A. RESIDENTIAL USES

1. Manager, caretaker, or proprietor quarters, including a mobilehome

B. AGRICULTURAL USES

Agricultural Industries

1. Alcohol distillery
2. Animal products processing, including slaughter
3. Brewery
4. Cannery

5. Cotton compress

6. Cotton gin

7. Creamery

8. Dead animal and fat rendering

9. Flour mill

10. Fruit, vegetable, and plant products processing, including packing, canning, preserving, and shipping

11. Garbage or offal reduction

12. Glucose processing

13. Grain elevator or storage

14. Honey extraction

15. Lumber drying kiln

16. Oil extraction, nonmineral

17. Saw or planing mill

18. Tanning, curing, or storing animal hides

19. Tobacco processing

20. Winery

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Bingo parlor

2. Bowling alley

3. Card room

4. Circus or carnival, temporary, not to exceed four (4) days

5. Dance hall, ballroom, or discotheque

6. Golf driving range

7. Health club

8. Hotel or motel

9. Miniature golf

10. Movie theater, walk-in
11. Pool or billiard parlor
12. Skating rink, roller or ice
13. Tennis, swim, or athletic club
14. Theater, live
15. Video games arcade

D. COMMERCIAL USES

Offices

1. Business or professional
2. Financial institution, including bank, savings and loan, or credit union
3. Real estate
4. Research and development

9. Blast furnace or smelting
10. Boiler works
11. Brick, tile, or terra cotta products
12. Building materials
13. Cabinet shop
14. Candle
15. Carbon
16. Carpet and mattress
17. Celluloid or pyroxylin
18. Cement
19. Ceramics
20. Chemical blending, manufacturing, or recycling
21. Clothing, garments, or shoes
22. Coal, wood, or tar distillation
23. Coke ovens
24. Concrete blocks

25. Cosmetics, perfumes, or toiletries
26. Creosote
27. Detergent
28. Disinfectant
29. Drugs and pharmaceuticals
30. Electronic appliance
31. Electronic equipment
32. Explosives or ammunition, including storage
33. Fertilizer
34. Furniture
35. Glass
36. Glue
37. Ice
38. Iron, steel, or other metals
39. Linoleum or oiled products
40. Machinery
41. Mobilehome, modular home, or recreational vehicle
42. Musical instruments
43. Neon signs
44. Oil refining
45. Ore reduction
46. Paint, shellac, turpentine, or similar products
47. Paint mixing
48. Paper or pulp
49. Plastic
50. Potash

51. Prefabricated buildings and structures

52. Rolling mill

53. Rubber

54. Saw mills

55. Smelting

56. Soap

57. Sodium compounds

58. Starch

59. Stove or shoe polish

60. Tar products

61. Textiles

62. Tobacco processing

63. Toy manufacturing and assembly

64. Trusses

Industrial Storage

65. Automobile

66. Bottled gas

67. Cargo containers

68. Chemical storage

69. Cold storage

70. Contractor's storage yard

71. Draying or freight

72. Equipment and building materials

73. Feed and fuel, including wood yards

74. Lumber

75. Moving and storage

76. Petroleum

77. Recreational vehicle

78. Truck and heavy equipment

79. Warehouse

Other Industrial Uses

80. Asphaltic concrete batch plant

81. Assaying

82. Bakery

83. Beverage bottling works

84. Billboard sign fabrication and storage

86. Boat building and major repair

86. Concrete batch plant

87. Electroplating

88. Machine shop

89. Metal extrusion

90. Newspaper, magazine, or book printing

91. Oil field service yard

92. Photographic processing plant or wholesale supply

93. Sandblasting, if incidental to another permitted use and conducted wholly within an enclosed building

94. Sheet metal shop

95. Tire retreading

96. Well drilling service

97. Welding or blacksmith

98. Wholesale distribution

F. TRANSPORTATION FACILITIES

1. Auto parking garage or lot
2. Bus depot, including service and storage
3. Railroad station
4. Railroad freight classification or switching yard
5. Taxi depot, including service and storage

G. UTILITY AND COMMUNICATIONS FACILITIES

1. Microwave relay station
2. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04
3. Utility substation

H. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Cogeneration facility
2. Electrical distribution stations
3. Electrical power generating plants, excluding nuclear and coal
4. Mineral exploration
5. Oil or gas exploration and production pursuant to Article 7260
6. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity
7. Wind-driven electrical generators for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

I. INSTITUTIONAL USES

1. Auditorium, public
2. Charitable or public service organization
3. Church

4. Fire or police station

5. Government office or building

6. Library

7. Museum

8. Public agency or utility buildings and facilities

J. MISCELLANEOUS USES

1. Commercial coach, when incidental to a permitted use

2. Construction trailer, temporary, during construction activity only

3. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

4. Kennel

5. Massage parlor

6. Revival, temporary, not to exceed fourteen (14) days

7. Studio, radio, television, recording, or movie

8. Water system, small

SECTION 7085.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are all permitted in accordance with the standards set out in Article 7215 and subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. AGRICULTURAL USES

Breeding and Raising Animals

1. Beef cattle or livestock feed lot, stockyard, auction, or sales yard

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Circus or carnival

2. Race track, automobile, bicycle, horse, or motorcycle

C. **INDUSTRIAL USES**

Industrial Storage

1. Log storage
2. Salvage or junk yard
3. Mineral and ore storage and loading

Other Industrial Uses

4. Metal, glass, or paper recycling facility

D. **TRANSPORTATION FACILITIES**

1. Airport, private
2. Airport, public use
3. Heliport

E. **UTILITY AND COMMUNICATIONS FACILITIES**

1. Radio, television, or commercial communications transmitter, receiver, or translator

F. **RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES**

1. Electrical power generating plant, nuclear or coal powered
2. Mining and mineral extraction pursuant to Article 7265
3. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity
4. Wind-driven electrical generators, commercial

G. **WASTE FACILITIES**

1. Community septic disposal system
2. Hazardous waste disposal facility
3. Nonhazardous oily waste disposal facility
4. Sanitary landfill
5. Septage disposal site
6. Sewage treatment plant

7. Transfer station, large volume

8. Transfer station, small volume

9. Waste-to-energy facility

H. **INSTITUTIONAL USES**

1. Cemetery, mausoleum, or columbarium

2. Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary

I. **MISCELLANEOUS USES**

1. Drainage sump

2. Flea market and swap meet

3. Water system, large

4. Water treatment plant

SECTION 7085.04 PROHIBITED USES

All other uses not permitted by Sections 7085.02 and 7085.03 are prohibited.

SECTION 7085.05 MINIMUM LOT SIZE

None.

SECTION 7085.06 MINIMUM LOT AREA PER DWELLING UNIT

None. Dwellings are not permitted, except as accessory to a permitted use.

SECTION 7085.07 YARDS AND SETBACKS

A. **Front Yard.** The front-yard minimum setback for all buildings shall be as follows:

Forty (40) feet from the legal centerline of any existing or proposed public or private local street.

Forty-five (45) feet from the legal centerline of any existing or proposed secondary highway.

Fifty-five (55) feet from the legal centerline of any existing or proposed major highway.

In no case shall buildings be located in the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** None required.

C. **Rear Yard.** None required.

SECTION 7085.08 HEIGHT LIMITS

Buildings and structures shall not exceed thirteen (13) stories or one hundred and fifty (150) feet.

SECTION 7085.09 MINIMUM DISTANCE BETWEEN STRUCTURES

None required.

SECTION 7085.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7085.11 SIGNS

The following signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed twelve (12) square feet each, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Temporary construction signs

D. Temporary political, religious, or civic campaign signs

E. Institutional identification signs

F. Signs attached to buildings

G. Monument signs, not to exceed one hundred (100) square feet in area each

H. Pole signs, not to exceed two hundred (200) square feet in area each

I. Off-site advertising signs

The maximum permitted area of all signs shall not exceed three (3) square feet for each lineal foot of street frontage.

SECTION 7085.12 LANDSCAPING

Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

SECTION 7085.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All development in the M-3 District shall comply with the minimum requirements of Article 7215 of this chapter.

B. Development in the M-3 District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7090

RECREATION FORESTRY (RF) DISTRICT

SECTIONS:

7090.01 PURPOSE AND APPLICATION
7090.02 PERMITTED USES
7090.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7090.04 PROHIBITED USES
7090.05 MINIMUM LOT SIZE
7090.06 MINIMUM LOT AREA PER DWELLING UNIT
7090.07 YARDS AND SETBACKS
7090.08 HEIGHT LIMITS
7090.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7090.10 PARKING
7090.11 SIGNS
7090.12 LANDSCAPING
7090.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7090.01 PURPOSE AND APPLICATION

The purpose of the Recreation Forestry (RF) District is to designate lands for the conservation and use of natural resources and for compatible recreational uses. Nonresource related uses are limited to uses that will not adversely affect the primary resource use or uses to which the land is devoted.

SECTION 7090.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. RESIDENTIAL USE

1. Residential accessory structures
2. Single-family dwelling

B. AGRICULTURAL USES

Growing and Harvesting Crops

1. Christmas trees
2. Growing of agricultural crops for domestic use of the resident/occupant
3. Timber

Breeding and Raising Animals

4. Bee keeping

5. Poultry and rabbits pursuant to Section 7090.13

6. Horses, donkeys, mules, hogs, sheep, goats, dairy stock, and beef cattle pursuant to Section 7090.13

7. Birds, including show or racing pigeons, and other small fowl pursuant to Section 7090.13

8. Fish and frogs

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Fishing or fly casting pond

2. Park or playground

D. UTILITY AND COMMUNICATIONS FACILITIES

1. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

2. Utility substation

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Mineral exploration

2. Oil or gas exploration and production pursuant to Section 7260.03

3. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

4. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

F. INSTITUTIONAL USES

1. Charitable or public service organization

2. Museum, when associated with a wildlife or nature preserve

G. MISCELLANEOUS USES

1. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

2. Flood control facilities

3. Garage or yard sales pursuant to Section 7090.13.C

4. Home occupation pursuant to Article 7250

5. Hunting or fishing club, not involving buildings or structures

6. Water storage or groundwater recharge facilities

7. Water system, small

8. Wildlife or nature preserve

SECTION 7090.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are all permitted subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RESIDENTIAL USES

1. Logging camp

2. Mobilehome

B. AGRICULTURAL USES

Agricultural Industries

1. Saw or planing mill

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Boat dock, private

2. Camp, for religious or charitable organization

3. Campground

4. Community recreation facilities

5. Equestrian establishments

6. Golf course

7. Golf driving range

8. Marina, public

9. Race track, automobile, bicycle, horse, or motorcycle

10. Recreational vehicle park

11. Shooting range or gun club

D. TRANSPORTATION FACILITIES

1. Airport, private

2. Airport, public use

3. Heliport

E. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator

F. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Dam, hydro

2. Mining and mineral extraction pursuant to Article 7265

3. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity

4. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

G. WASTE FACILITIES

1. Septage disposal site

2. Transfer station, small volume

3. Waste-to-energy facility

H. INSTITUTIONAL USES

1. Cemetery

2. Church

3. Museum

4. Public agency or public utility buildings and facilities

5. Zoo

I. **EDUCATIONAL INSTITUTIONS AND SCHOOLS**

General

1. Preschool

2. Elementary school

3. Junior high school

4. Senior high school

5. College or university

J. **MISCELLANEOUS USES**

1. Drainage sump

2. Hunting or fishing club

3. Water system, large

4. Wild animal keeping

SECTION 7090.04 PROHIBITED USES

All other uses not permitted by Sections 7090.02 and 7090.03 are prohibited.

SECTION 7090.05 MINIMUM LOT SIZE

No portion of any lot within the RF District shall contain less than five (5) gross acres, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7090.06 MINIMUM LOT AREA PER DWELLING UNIT

There shall be no more than one single-family dwelling per legal lot.

SECTION 7090.07 YARDS AND SETBACKS

A. **Front** Yard. The front-yard minimum setback for all buildings shall be as follows:

Eighty (80) feet from the legal centerline of any existing or proposed local street or access easement.

Ninety-five (95) feet from the legal centerline of any existing or proposed secondary highway.

One hundred and five (105) feet from the legal centerline of any existing or proposed major highway.

In no case shall the front-yard minimum setback be less than fifty (50) feet from the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** There shall be a side yard on each side of any building of not less than twenty-five (25) feet.

C. **Rear Yard.** There shall be a rear yard of not less than fifteen (15) feet.

SECTION 7090.08 HEIGHT LIMITS

A. Residential buildings shall not exceed three (3) stories or thirty-five (35) feet.

B. Detached accessory structures shall not exceed two (2) stories or thirty-five (35) feet.

C. Radio and television antennae, chimneys, or other similar structures shall not exceed eighty (80) feet.

SECTION 7090.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. There shall be a minimum of ten (10) feet between residential buildings.

B. There shall be a minimum of six (6) feet between a residential building and an accessory building or between accessory buildings.

SECTION 7090.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7090.11 SIGNS

The following signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising property for sale or rent, not to exceed eight (8) square feet, excluding the area of any vertical and/or horizontal support members

B. Temporary construction signs

C. Agricultural signs

D. Institutional identification signs, when approved in conjunction with a conditional use permit

SECTION 7090.12 LANDSCAPING

None required.

SECTION 7090.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. The breeding and raising of birds, including show or racing pigeons, poultry, and rabbits shall be limited to domestic or hobby purposes only and shall not be raised for commercial purposes.

B. The breeding and raising of animals pursuant to Section 7090.02 shall be limited to one horse, donkey, mule, cow, dairy stock, sheep, goat, hog, or other similar animal per one-quarter (1/4) acre of lot area.

C. Garage or yard sales are permitted without special permit provided they meet the following standards:

1. Sales last no longer than three (3) days.

2. Sales are held no more than twice yearly.

3. Sales are conducted on the owner's or tenant's property. Multiple family sales are permitted if they are held on the property of one of the participants.

4. No goods purchased for resale may be offered for sale.

5. No consignment goods may be offered for sale.

6. Directional signs may be placed on the street right-of-way.

7. All directional and advertising signs shall be freestanding and removed after completion of the sale.

8. All directional and advertising signs placed on private property shall have the owner's permission.

9. No directional or advertising signs may be larger than two (2) feet by three (3) feet.

D. Development in the RF District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7095

OPEN SPACE (OS) DISTRICT

SECTIONS:

7095.01 PURPOSE AND APPLICATION
7095.02 PERMITTED USES
7095.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7095.04 PROHIBITED USES
7095.05 MINIMUM LOT SIZE
7095.06 MINIMUM LOT AREA PER DWELLING UNIT
7095.07 YARDS AND SETBACKS
7095.08 HEIGHT LIMITS
7095.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7095.10 PARKING
7095.11 SIGNS
7095.12 LANDSCAPING
7095.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7095.01 PURPOSE AND APPLICATION

The purpose of the Open Space (OS) District is to designate lands in public or private ownership that are essentially unimproved and should remain in open space use for the preservation of identified scenic values, habitat for endangered plants or animals, unique geologic features, natural resources, passive recreational values, or for the protection of public health and safety.

SECTION 7095.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. AGRICULTURAL USES

Breeding and Raising Animals

1. Beef cattle or animal grazing

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Hiking or equestrian trails

C. UTILITY AND COMMUNICATIONS FACILITIES

1. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

D. MISCELLANEOUS USES

1. Hunting or fishing club, not including buildings or structures

2. Wildlife or nature preserve, not involving structures

SECTION 7095.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are all permitted subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Roads or trails for motor driven vehicles, excluding race courses

B. MISCELLANEOUS USES

1. Scientific study sites for the systematic exploration and classification of archaeological, anthropological, or historic artifacts or remains

2. Restrooms and shelters

SECTION 7095.04 PROHIBITED USES

All other uses not permitted by Sections 7095.02 and 7095.03 are prohibited.

SECTION 7095.05 MINIMUM LOT SIZE

None required, provided, however, that no lot zoned Open Space (OS) may be divided or separated in any manner, except in the case of a conveyance or dedication of land to a government agency, public entity, or public utility for public purposes or public utility purposes.

SECTION 7095.06 MINIMUM LOT AREA PER DWELLING UNIT

None. Dwellings are not permitted.

SECTION 7095.07 YARDS AND SETBACKS

None required.

SECTION 7095.08 HEIGHT LIMITS

None required.

SECTION 7095.09 MINIMUM DISTANCE BETWEEN STRUCTURES

None required.

SECTION 7095.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7095.11 SIGNS

The following signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Institutional identification signs identifying a permitted use on the property. Such signs shall be limited to monument signs not to exceed one hundred (100) square feet in area and not to exceed fifteen (15) feet in height.

B. Temporary real estate signs advertising the property for sale or rent, not to exceed eight (8) square feet each, excluding the area of any vertical and/or horizontal support members

SECTION 7095.12 LANDSCAPING

None required.

SECTION 7095.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

Development in the OS District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7100

NATURAL RESOURCE (NR) DISTRICT

SECTIONS:

7100.01 PURPOSE AND APPLICATION
7100.02 PERMITTED USES
7100.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7100.04 PROHIBITED USES
7100.05 MINIMUM LOT SIZE
7100.06 MINIMUM LOT AREA PER DWELLING UNIT
7100.07 YARDS AND SETBACKS
7100.08 HEIGHT LIMITS
7100.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7100.10 PARKING
7100.11 SIGNS
7100.12 LANDSCAPING
7100.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7100.01 PURPOSE AND APPLICATION

The purpose of the Natural Resource (NR) District is to designate lands that contain productive or potentially productive petroleum, mineral, or timber resources and to prevent the encroachment of incompatible uses onto such lands. Uses in the NR District are limited to resource exploration, production and transportation, and to compatible activities. The minimum lot size shall be five (5) gross acres unless the NR District is combined with the Lot Size Combining District where a larger minimum lot size is specified. No final tract map subdivisions are permitted in the NR District.

SECTION 7100.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. RESIDENTIAL USES

1. Residential accessory structures

2. Single-family dwelling, if accessory or incidental to a permitted use

3. Mobilehome, if accessory or incidental to a permitted use

B. AGRICULTURAL USES

Growing and Harvesting Crops

1. Berry crops
2. Bush crops
3. Christmas trees
4. Field crops, dryland
5. Field crops, irrigated
6. Flowers and horticultural specialties, wholesale only
7. Nursery, plant, wholesale only
8. Nut and fruit trees
9. Timber
10. Vegetables
11. Vine crops

Breeding and Raising Animals

12. Bee keeping
13. Beef cattle or livestock grazing
14. Fish and frogs
15. Poultry, including the hatching, breeding, raising, butchering, processing, or shipping of chickens, turkeys, other fowl, or poultry, including eggs
16. Rabbits and fur-bearing animals
17. Horses, donkeys, mules, hogs, sheep, goats, or dairy stock

C. INDUSTRIAL USES

Industrial Storage

1. Bottled gas, when accessory to on-site production
2. Petroleum, when accessory to on-site production

D. UTILITY AND COMMUNICATIONS FACILITIES

1. Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission pursuant to Section 7282.04

2. Utility substation

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Accessory structures and equipment storage for natural resource extraction or processing uses

2. Cogeneration facility, primarily intended for steam production for another permitted use

3. Explosives storage, temporary, subject to approval by the Kern County Fire Department

4. Mineral exploration

5. Oil or gas exploration and production pursuant to Article 7260

6. Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

7. Wind-driven electrical generator with a rated capacity of no greater than fifteen (15) kilowatts for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

F. MISCELLANEOUS USES

1. Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map

2. Garage or yard sales pursuant to Section 7100.13.A

3. Hunting or fishing club, not involving buildings or structures

4. Water storage or groundwater recharge facilities

5. Water system, small

6. Wildlife or nature preserve

SECTION 7100.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. RESIDENTIAL USES

1. Farm labor housing for on-site employees
2. Mobilehome
3. Logging camp
4. Single-family dwelling

B. AGRICULTURAL USES

1. Saw or planing mill

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Boat dock, private
2. Equestrian establishment
3. Park or playground
4. Race track, automobile, bicycle, horse, or motorcycle
5. Recreational vehicle park

D. INDUSTRIAL USES

Industrial Manufacturing or Assembly

1. Oil refining

Industrial Storage

2. Contractor's storage yard, if accessory or incidental to the exploration for and production of oil, gas, or mineral deposits
3. Truck and heavy equipment parking and storage, if accessory or incidental to a natural resource extraction or processing activity

E. TRANSPORTATION FACILITIES

1. Airport, private

2. Airport, public use

3. Heliport

F. UTILITY AND COMMUNICATIONS FACILITIES

1. Radio, television, or commercial communications transmitter, receiver, or translator

G. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Concrete or asphalt batch plant

2. Electric power generating plant

3. Explosives storage

4. Mining and mineral extraction pursuant to Article 7265

5. Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity

6. Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

H. WASTE FACILITIES

1. Hazardous waste disposal facility

2. Nonhazardous oily waste disposal facility

3. Sanitary landfill

4. Sewage treatment plant

5. Transfer station, large

6. Transfer station, small

I. INSTITUTIONAL USES

1. Cemetery

2. Charitable or public service organization

3. Community or senior citizens center

4. Museum

5. Public agency or public utility buildings or facilities

J. **EDUCATIONAL INSTITUTIONS AND SCHOOLS**

1. Preschool
2. Elementary school
3. Junior high school
4. Senior high school
5. College or university

K. **MISCELLANEOUS USES**

1. Drainage sump
2. Hunting or fishing club
3. Water system, large
4. Wild animal keeping

SECTION 7100.04 PROHIBITED USES

All other uses not permitted by Sections 7100.02 and 7100.03 are prohibited, including final map subdivisions.

SECTION 7100.05 MINIMUM LOT SIZE

No portion of any lot within the NR District shall contain less than five (5) gross acres or as otherwise specified by the Lot Size Combining District, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7100.06 MINIMUM LOT AREA PER DWELLING UNIT

Except for employee housing and dwellings accessory or incidental to a permitted use on the property, there shall be no more than one single-family dwelling per legal lot when such dwelling is permitted with a conditional use permit.

SECTION 7100.07 YARDS AND SETBACKS

A. **Front Yard.** The front-yard minimum setback for all buildings shall be as follows:

Fifty-five (55) feet from the legal centerline of any existing or proposed public or private local street or access easements.

Seventy (70) feet from the legal centerline of any existing or proposed secondary highway.

Eighty (80) feet from the legal centerline of any existing or proposed major highway.

In no case shall the minimum front-yard setback be less than twenty-five (25) feet from the right-of-way established by any Official or Specific Plan Line.

B. **Side Yard.** There shall be a side yard on each side of any building of not less than five (5) feet, except that on the street side of corner lots, buildings shall have a side yard of not less than ten (10) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line.

C. **Rear Yard.** There shall be a rear yard of not less than five (5) feet, except that in the case of through lots, the designated rear yard shall be in accordance with the front-yard setback requirements.

SECTION 7100.08 HEIGHT LIMITS

No building or permanent structure shall exceed six (6) stories or seventy-five (75) feet in height.

SECTION 7100.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. There shall be a minimum of ten (10) feet between residential buildings.

B. There shall be a minimum of six (6) feet between a residential building and an accessory building or between accessory buildings.

SECTION 7100.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7100.11 SIGNS

The following signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Temporary real estate signs advertising the property for sale or rent, not to exceed eight (8) square feet, excluding the area of any vertical and/or horizontal support members

B. Temporary construction signs

C. Temporary political, religious, and civic campaign signs

D. Agricultural signs

SECTION 7100.12 LANDSCAPING

None required.

SECTION 7100.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. Garage or yard sales are permitted without special permit provided they meet the following standards:

1. Sales last no longer than three (3) days.

2. Sales are held no more than twice yearly.

3. Sales are conducted on the owner's or tenant's property. Multiple family sales are permitted if they are held on the property of one of the participants.

4. No goods purchased for resale may be offered for sale.

5. No consignment goods may be offered for sale.

6. Directional signs may be placed on the street right-of-way.

7. All directional and advertising signs shall be freestanding and removed after completion of the sale.

8. All directional and advertising signs placed on private property shall have the owner's permission.

9. No directional or advertising signs may be larger than two (2) feet by three (3) feet.

B. Development in the NR District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7105

DRILLING ISLAND (DI) DISTRICT

SECTIONS:

7105.01 PURPOSE AND APPLICATION
7105.02 PERMITTED USES
7105.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7105.04 PROHIBITED USES
7105.05 MINIMUM LOT SIZE
7105.06 MINIMUM LOT AREA PER DWELLING UNIT
7105.07 YARDS AND SETBACKS
7105.08 HEIGHT LIMITS
7105.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7105.10 PARKING
7105.11 SIGNS
7105.12 LANDSCAPING
7105.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7105.01 PURPOSE AND APPLICATION

The purpose of the Drilling Island (DI) District is to designate single lots and relatively small areas within the boundaries of final map subdivisions and mobilehome parks that contain productive or potentially productive petroleum resources to promote the development of such resources in a manner compatible with surrounding development. Uses in the DI District are limited to petroleum and gas exploration, production and transportation, and to compatible open space and recreational uses.

SECTION 7105.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Oil or gas exploration and production pursuant to Section 7260.05

SECTION 7105.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

A. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

1. Park or playground

B. MISCELLANEOUS USES

1. Subdivision drainage sump, provided that mineral rights owners have given written consent

SECTION 7105.04 PROHIBITED USES

All other uses not permitted by Sections 7105.02 and 7105.03 are prohibited.

SECTION 7105.05 MINIMUM LOT SIZE

No portion of any lot within the DI District shall contain less than two and one-half (2 1/2) gross acres.

SECTION 7105.06 MINIMUM LOT AREA PER DWELLING UNIT

None. Dwellings are not permitted.

SECTION 7105.07 YARDS AND SETBACKS

Pursuant to Section 7260.05.A of this chapter, no oil or gas well shall be drilled within one hundred (100) feet of the right-of-way of any public highway, proposed public highway, Official Plan Line, or Specific Plan Line.

SECTION 7105.08 HEIGHT LIMITS

A. None on derricks and other equipment used during the exploration and drilling phase of development.

B. Pumping units shall not exceed thirty-five (35) feet in height.

SECTION 7105.09 MINIMUM DISTANCE BETWEEN STRUCTURES

Per the requirements of Section 7260.05 of this chapter.

SECTION 7105.10 PARKING

No minimum requirement, provided, however, that all vehicle parking and maneuvering areas shall be treated and maintained with oiled sand or a similar dust binding material.

SECTION 7105.11 SIGNS

The following signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Directional, warning signs, and identification signs, not to exceed two (2) square feet each

B. Temporary real estate signs advertising the property for sale or rent, not to exceed six (6) square feet each, excluding the area of any vertical and/or horizontal support members

SECTION 7105.12 LANDSCAPING

As approved by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.02 of this chapter.

SECTION 7105.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All drilling and other hydrocarbon development activity shall be carried out in accordance with the standards and procedures set out in Section 7260.05.

B. Development in the DI District shall comply with the interpretations and provisions of Article 7282 of this chapter.

ARTICLE 7110

FLOODPLAIN PRIMARY (FPP) DISTRICT

SECTIONS:

7110.01 PURPOSE AND APPLICATION
7110.02 PERMITTED USES
7110.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7110.04 PROHIBITED USES
7110.05 MINIMUM LOT SIZE
7110.06 MINIMUM LOT AREA PER DWELLING UNIT
7110.07 YARDS AND SETBACKS
7110.08 HEIGHT LIMITS
7110.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7110.10 PARKING
7110.11 SIGNS
7110.12 LANDSCAPING
7110.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7110.01 PURPOSE AND APPLICATION

The purpose of the Floodplain Primary (FPP) District is to protect the public health and safety and minimize property damage by designating areas that are subject to flooding with high velocities or depths and by establishing reasonable restrictions on land use in such areas. The FPP District shall be applied to those areas lying within the "Floodway" as shown on the Flood Boundary Floodway Map (FBFM) or within the "Designated Floodway" on the State of California's Board of Reclamation's Kern River Designated Floodway Studies, or other maps where engineering studies have been made and adopted by the Kern County Board of Supervisors. Uses in the FPP District are limited to those low intensity uses not involving buildings, structures, and other activities that might adversely affect or be adversely affected by flow of water in the floodway.

The degree of flood protection required by this article is considered reasonable for regulatory purposes and is based on engineering and scientific methods of study. Larger floods may occur on rare occasions or flood heights may be increased by man-made or natural causes, such as bridge openings restricted by debris. This article does not imply that areas outside the floodplain districts or land uses permitted within such districts will be free from flooding or flood damages. This article shall not create liability on the part of the County of Kern or any officer or employee thereof for any flood damage that may result from reliance on this article or any administrative decisions lawfully made hereunder.

SECTION 7110.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. AGRICULTURAL USES

Growing and Harvesting Crops

1. Berry crops
2. Bush crops
3. Field crops, dryland
4. Field crops, irrigated
5. Flowers and horticulture specialties
6. Vegetables
7. Vine crops

Breeding and Raising Animals

8. Beef cattle or livestock grazing, excluding fencing and other related facilities which may obstruct flood flows

B. UTILITY AND COMMUNICATION FACILITIES

1. Transmission lines for gas, electricity, telephone, or telegraph service owned and operated by a public utility company, not including building, structure, or development which may obstruct flood flows

C. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

1. Oil or gas exploration and production pursuant to Section 7110.13.C

D. MISCELLANEOUS USES

1. Flood control facilities
2. Hunting or fishing club, not involving buildings or structures
3. Water storage or groundwater recharge facilities
4. Wildlife or nature preserve, not involving buildings or structures

SECTION 7110.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. **RECREATIONAL, ENTERTAINMENT, AND TOURIST FACILITIES**

1. Fishing or fly casting pond, not involving buildings or structures
2. Golf course, not involving buildings or structures
3. Golf driving range, not involving buildings or structures
4. Hiking or equestrian trail
5. Park or playground, not involving buildings or structures
6. Roads or trails for motor driven vehicles

B. **TRANSPORTATION FACILITIES**

1. Auto parking lot, not involving buildings or structures

SECTION 7110.04 PROHIBITED USES

All other uses not permitted by Sections 7110.02 and 7110.03 are prohibited, including:

A. Buildings, structures, mobilehomes, other improvements or accessory uses, or development that would encroach into the channel and obstruct the natural flow of waters within a designated floodway or which will in any manner endanger life and property.

B. All public and private sewage disposal systems or any part thereof.

C. Any use which may endanger temporary safeguards which have been erected until such time as flood protection or control works have been constructed.

D. Land fill, sumps, or excavation of a similar nature that would obstruct the natural flow of floodwater within a designated floodway.

E. All uses that are likely to increase the flood hazard or in any way affect the water-carrying capacity of the designated floodway.

F. Dumping, stockpiling, or storage of floatable substances or other materials, which in the opinion of the Kern County Department of Planning and Development Services will add to the debris loads of the stream or watercourse.

G. Commercial cattle or livestock feed yards, auction yards, dairies, junk or salvage yards, billboards, and other advertising structures of any kind or type which may have residential, commercial, or industrial connotations.

H. Storage tanks, sumps, processing equipment, or other similar facilities related to oil and gas production not expressly permitted pursuant to Sections 7110.02 and 7110.13.C.

I. Sources of water supply (e.g., wells, springs, etc.) unless protected by flood control devices approved by the Kern County Department of Planning and Development Services and constructed in accordance with the requirements of the Kern County Health Department or Kern County Department of Planning and Development Services, whichever has jurisdiction, so as to minimize infiltration of floodwaters.

J. Tree farming, unless it can be shown to the Kern County Department of Planning and Development Services that the spacing of the trees will not cause a rise in the base flood elevation or that the trees will not add to the debris load of the stream.

SECTION 7110.05 MINIMUM LOT SIZE

None.

SECTION 7110.06 MINIMUM LOT AREA PER DWELLING UNIT

None. Dwellings are not permitted.

SECTION 7110.07 YARDS AND SETBACKS

None. Buildings and structures are not permitted.

SECTION 7110.08 HEIGHT LIMITS

None. Buildings and structures are not permitted.

SECTION 7110.09 MINIMUM DISTANCE BETWEEN STRUCTURES

None. Buildings and structures are not permitted.

SECTION 7110.10 PARKING

Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

SECTION 7110.11 SIGNS

A. Temporary real estate signs advertising the property for sale or rent, not to exceed eight (8) square feet each, excluding the area of any vertical and/or horizontal support members

B. As provided by Section 7110.13.

SECTION 7110.12 LANDSCAPING

None required.

SECTION 7110.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All development within the FPP District is subject to the requirements of Flood Damage Prevention Ordinance, Article 11, Division 2 of Part 4 of the Ordinance Code of Kern County.

B. Development in the FPP District shall comply with the interpretations and provisions of Article 7282 of this chapter.

C. Oil or gas exploration and production shall comply with the following standards:

1. Feasible remedial work, improvements and floodproofing will be carried out which will permit exercise of the use within the FPP District with a minimum obstruction to flood flow, will not cause peripheral flooding of other properties, will not cause the surface of the intermediate regional flood to rise by no more than one (1) foot, will not materially impair the ability of the primary floodplain to discharge the waters resulting from an intermediate regional flood, and will either be resistant to flotation or immune to extensive damage by flooding and will not endanger life or property.

2. No oil or gas well shall be drilled within ten (10) feet of the toe of the bank of a river or stream located within the FPP District.

3. All oil or gas wells in the FPP District, including pumps and all other associated equipment, shall be designed such that they are resistant to damage by flooding.

4. All pipelines in the FPP District shall be floodproofed by burial to sufficient depth to prevent rupture during flood conditions or by suspension at least two (2) feet above the surface of the intermediate flood. Supports for elevated pipelines shall also carry a catwalk to facilitate removal of debris caught by supports during floods.

5. The location of all buried pipelines shall be recorded on appropriate maps by the company that owns said pipelines, and the maps shall be made available to any public agency that shall request a copy.

6. All drilling, redrilling, and producing, including remedial work, well pulling, workovers, and deepening, shall conform to all applicable fire, safety, spacing, and environmental State law and regulations.

7. Proven technological improvements generally accepted and used in drilling and production methods shall be adopted as they may become, from time to time available, if capable of reducing factors of nuisance and annoyance.

8. Prior to the commencement of any drilling, a copy of a Spill Prevention Control and Counter-measure Plan, as required by the United States Environmental Protection Agency, shall be filed with the Kern County Department of Planning and Development Services.

9. All pumps expected to be inaccessible during times of flood shall be equipped with an accessible remote switch to shut off the pumps during emergencies.

10. The derrick, all boilers, and all other drilling equipment used pursuant to this article to drill any well hole or to repair, clean out, deepen, or redrill any completed or drilling well shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derrick, boilers, and drilling equipment are to be used within a reasonable time limit, determined by the Director of Planning and Development Services, for the drilling of another well or wells on the premises.

11. After any well has been placed in production, no earthen sumps shall be used for the storage of petroleum or gas.

12. Within ninety (90) days after any well has been placed in production or after its abandonment, earthen sumps used in drilling or production or both shall be emptied by vacuum truck or other approved means, then filled, and the drilling site restored as nearly as practicable to a uniform grade, unless such sumps are to be used within a reasonable time limit, as determined by the Director of Planning and Development Services.

13. Any derrick used for servicing operations shall be of the portable type; provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable-type derrick will not properly service such well, the Director of Planning and Development Services may approve the use of a standard type of derrick.

14. Directional and warning signs and those required for identification of the well, shall be constructed, erected, placed, or maintained on the premises, except those required by law to be displayed in connection with the drilling or maintenance of the well.

15. If a producing or service well is not secured twelve (12) months from the date of commencement of drilling operations or any extended period granted by the Director of Planning and Development Services, the premises shall be restored to the original condition as nearly as practicable to do so. If at the expiration

of the twelve- (12-) month period, the drilling program has not been completed, the Director of Planning and Development Services may, upon a written request, grant an additional period of time as requested for the completion of such drilling program.

SPECIAL PLANNING (SP) DISTRICT

SECTIONS:

7115.01 PURPOSE AND APPLICATION
7115 02 PERMITTED USES
7115.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7115.04 PROHIBITED USES
7115.05 MINIMUM LOT SIZE
7115.06 MINIMUM LOT AREA PER DWELLING UNIT
7115.07 YARDS AND SETBACKS
7115.08 HEIGHT LIMITS
7115.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7115.10 PARKING
7115.11 SIGNS
7115.12 LANDSCAPING
7115.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7115.01 PURPOSE AND APPLICATION

The purpose of the Special Planning (SP) District is to encourage and facilitate the creative and innovative use of land which may otherwise be limited or prohibited by the standard provisions of other parts of this chapter. The SP District is designed to allow diversity in the relationship between buildings and open spaces so as to create unique, interesting physical environments that maximize usable open space, while at the same time to preserve the public health, safety, and welfare. All development in the SP District shall be consistent with the General Plan. Development within the SP District shall conform to the standards specified elsewhere in this chapter for similar uses except to the extent that benefits will accrue to the public by deviation from such standards. The application of the SP District to land may only be initiated by application of the landowner or his/her representative.

SECTION 7115.02 PERMITTED USES

Any uses consistent with the General Plan land use category applicable to the subject property and which will not be in conflict with the public health, safety, and welfare are permitted in accordance with the standards and procedures set out in Section 7115.13.

SECTION 7115.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

None. All uses are subject to approval in accordance with the standards and procedures set out in Section 7115.13.

SECTION 7115.04 PROHIBITED USES

Uses inconsistent with the General Plan land use category applicable to the area and uses that would be in conflict with the public health, safety, and welfare are prohibited.

SECTION 7115.05 MINIMUM LOT SIZE

As established in accordance with the standards and procedures set out in Section 7115.13.

SECTION 7115.06 MINIMUM LOT AREA PER DWELLING UNIT

As established in accordance with the standards and procedures set out in Section 7115.13.

SECTION 7115.07 YARDS AND SETBACKS

As established in accordance with the standards and procedures set out in Section 7115.13.

SECTION 7115.08 HEIGHT LIMITS

As established in accordance with the standards and procedures set out in Section 7115.13.

SECTION 7115.09 MINIMUM DISTANCE BETWEEN STRUCTURES

As established in accordance with the standards and procedures set out in Section 7115.13.

SECTION 7115.10 PARKING

As established in accordance with the standards and procedures set out in Section 7115.13.

SECTION 7115.11 SIGNS

A. Temporary real estate signs advertising the property for sale or rent, not to exceed six (6) square feet each, excluding the area of any vertical and/or horizontal support members

B. Temporary subdivision signs

C. Permanent subdivision identification signs

D. Temporary construction signs

E. As established in accordance with the standards and procedures set out in Section 7115.13.

SECTION 7115.12 LANDSCAPING

As established in accordance with the standards and procedures set out in Section 7115.13.

SECTION 7115.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

The SP District may only be initiated by the property owner or his/her authorized representative. An SP District shall be established in accordance with the procedures set out in Article 7292 and in conjunction with review and approval of a site development plan in accordance with the procedures set out in Section 7284.05 of this chapter.

A. Application Contents:

An application for a site development plan review shall include the following:

1. Name and address of applicant
2. Name(s) and address(es) of property owner(s)
3. Assessor's parcel number(s)
4. Legal description of the property
5. A site development plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:
   a. Topography of the lot(s)
   b. Proposed street system and parking areas
   c. Lot design
   d. Location of buildings
   e. Location of other proposed uses
   f. Proposed setbacks
   g. Areas to be reserved for parks, schools, or public or quasi-public buildings
   h. Proposed landscaping
   i. Water supply and distribution
   j. Sewage disposal system

k. Drainage system

l. North arrow

6. Acres of each proposed land use

7. Number of dwelling units per acre, if applicable

8. A narrative description of the proposed development, including:

   a. An explanation of the proposed deviations from the standards that would otherwise apply to the proposed uses and why the deviations are necessary or desirable

   b. Phasing or development schedule

B. Development Standards and Conditions:

Development within the SP District shall comply with the following standards:

1. All development shall be consistent with the goals and policies of the General Plan and with the uses and density or intensity standards of the General Plan land use category applicable to the area in which the property is located.

2. Development within the SP District shall be demonstratively superior to the development that could occur under any other zoning district or combination of zoning districts authorized by this chapter that are consistent with the General Plan land use category applicable to the subject property. In making this determination, the following factors shall be considered:

   a. Appropriateness of the use at the proposed location

   b. The mix of housing styles and costs

   c. Provision of units affordable to persons and families of low and moderate income or to lower income households

   d. Provision of infrastructure improvements, including community water distribution and sewage collection and treatment systems

   e. Provision of open space

   f. Compatibility of uses within the development area

   g. Use of innovative technology and materials

   h. Overall contribution to the enhancement of the environment of Kern County

   i. Creativity in design and use of land

3. The SP District may only be applied to areas containing five (5) acres or more.

C. Adoption by Ordinance:

Each SP District shall be adopted by ordinance and shall include all standards and conditions approved in connection with the review of the site development plan application. Each SP District shall be referenced by ordinance number on the Official Zoning Maps.

D. Time Limit on Approval:

1. If development approved pursuant to this article has not commenced within three (3) years of the approval, the Board of Supervisors shall initiate a reclassification of the property in accordance with the procedures set out in Article 7292 of this chapter, unless:

   a. Building permits for approved development have been issued;

   b. A tentative subdivision or parcel map for proposed development has been approved; or

   c. A written request for an extension has been filed with and approved by the Director of Planning and Development Services before the expiration of the three- (3-) year period. Such extension shall not exceed three (3) years from the expiration of the initial three- (3-) year period.

   In any event, development approved in accordance with this article shall be commenced or necessary final subdivision maps recorded within six (6) years of the original approval.

2. If the time limits specified in Section 7115.13.D.1 are not met, the Board of Supervisors shall initiate reclassification of the property to a zoning district or districts consistent with the Kern County General Plan in accordance with procedures set out in Article 7292 of this chapter.

E. Minor Plan Modifications:

The Director of Planning and Development Services may approve minor plan modifications to an approved SP site development plan in accordance with the procedures set out in Section 7284.02, if the Director of Planning and Development Services determines that the modification(s) does not constitute a substantial change in the approved project.

ARTICLE 7120

LOT SIZE COMBINING DISTRICT

SECTIONS:

7120.01 PURPOSE AND APPLICATION
7120.02 PERMITTED USES
7120.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7120.04 PROHIBITED USES
7120.05 MINIMUM LOT SIZE
7120.06 MINIMUM LOT AREA PER DWELLING UNIT
7120.07 YARDS AND SETBACKS
7120.08 HEIGHT LIMITS
7120.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7120.10 PARKING

7120.12 LANDSCAPING
7120.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7120.01 PURPOSE AND APPLICATION

The purpose of the Lot Size Combining District is to provide for various lot sizes in the Estate (E), Mobilehome Subdivision (MS), and Natural Resource (NR) Districts. The minimum lot size specified for E, MS, and NR Districts will vary by combination with the Lot Size Combining District. The numerical designation following an E, MS, or NR designation in parenthesis (e.g., E (1/2 acre)) will specify the minimum lot size in that district. The basis for the minimum lot size applied to an area shall include neighborhood character, compatibility with surrounding uses, and consistency with the General Plan. In no case shall the Lot Size Combining District establish a lot size less than the minimum specified by the base district with which the Lot Size Combining District is combined.

SECTION 7120.02 PERMITTED USES

Uses permitted by the base district with which the Lot Size Combining District is combined.

SECTION 7120.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

Conditional uses permitted by the base district with which the Lot Size Combining District is combined.

SECTION 7120.04 PROHIBITED USES

Uses prohibited by the base district with which the Lot Size Combining District is combined.

SECTION 7120.05 MINIMUM LOT SIZE

The following minimum lot size designations may be applied to the E, MS, and NR Districts based on neighborhood character, compatibility with surrounding lot sizes in the area, and consistency with the General Plan:

A. 6,000 : Six thousand (6,000) net square feet minimum lot area

B. 1/4 acre : One-quarter (1/4) acre or ten thousand eight hundred and ninety (10,890) net square feet minimum lot area

C. 1/2 acre : One-half (1/2) acre or twenty-one thousand seven hundred and eighty (21,780) net square feet minimum lot area

D. 1 acre : One (1) net acre minimum lot area

E. 2 1/2 acres : Two and one-half (2-1/2) gross acres minimum lot area or a quarter of a quarter of a quarter of a quarter section of land, containing not less than two (2) gross acres

F. 5 acres : Five (5) gross acres minimum lot area or one-half of a quarter of a quarter of a quarter section of land, containing not less than four (4) acres

G. 10 acres : Ten (10) gross acres minimum lot area or a quarter of a quarter of a quarter section of land, containing not less than eight (8) gross acres

H. 20 acres : Twenty (20) gross acres minimum lot area or a half of a quarter of a quarter section of land, containing not less than sixteen (16) gross acres

In no event shall the minimum lot size exceed the density limit specified by the applicable General Plan land use category.

SECTION 7120.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the Lot Size Combining District is combined.

SECTION 7120.07 YARDS AND SETBACKS

Per the requirements of the base district with which the Lot Size Combining District is combined.

SECTION 7120.08 HEIGHT LIMITS

Per the requirements of the base district with which the Lot Size Combining District is combined.

SECTION 7120.09 MINIMUM DISTANCE BETWEEN STRUCTURES

Per the requirements of the base district with which the Lot Size Combining District is combined.

SECTION 7120.10 PARKING

Per the requirements of the base district with which the Lot Size Combining District is combined.

SECTION 7120.11 SIGNS

Per the requirements of the base district with which the Lot Size Combining District is combined.

SECTION 7120.12 LANDSCAPING

Per the requirements of the base district with which the Lot Size Combining District is combined.

SECTION 7120.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

Per the requirements of the base district with which the Lot Size Combining District is combined.

7125.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7125.01 PURPOSE AND APPLICATION

The purpose of the Precise Development (PD) Combining District is to designate areas with unique site characteristics or environmental conditions or areas surrounded by sensitive land uses to ensure that development in such areas is compatible with such constraints. All development in the PD Combining District shall be subject to site development plan review. The application of the PD District may be initiated by either the property owner or the County. The PD District may be combined with any base district. The regulations established by the PD District shall be in addition to the regulations of the base district with which the PD District is combined.

SECTION 7125.02 PERMITTED USES

Uses permitted by the base district with which the PD District is combined.

SECTION 7125.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

Conditional uses permitted by the base district with which the PD District is combined.

SECTION 7125.04 PROHIBITED USES

Uses prohibited by the base district with which the PD District is combined.

SECTION 7125.05 MINIMUM LOT SIZE

Per the requirements of the base district with which the PD District is combined.

SECTION 7125.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the PD District is combined.

SECTION 7125.07 YARDS AND SETBACKS

Per the requirements of the base district with which the PD District is combined.

SECTION 7125.08 HEIGHT LIMITS

Per the requirements of the base district with which the PD District is combined.

SECTION 7125.09 MINIMUM DISTANCE BETWEEN STRUCTURES

Per the requirements of the base district with which the PD District is combined.

SECTION 7125.10 PARKING

Per the requirements of Article 7220, Off-street Parking.

SECTION 7125.11 SIGNS

Per the requirements of the base district with which the PD District is combined.

SECTION 7125.12 LANDSCAPING

Per the requirements of Article 7230, Landscaping.

SECTION 7125.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

No use shall be established, no development shall occur and no building or grading permit shall be issued for any use or development in the PD Combining District until an application for site development plan review has been submitted to and approved by the Director of Planning and Development Services or the Board of Supervisors in accordance with the procedures set out in Article 7284 of this chapter.

A. Application Contents:

An application for site development plan review shall include the following:

1. Name and address of applicant
2. Name(s) and address(es) of the property owner(s)
3. Assessor's parcel number(s)

4. Legal description of the property

5. A site development plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

   a. Topography and proposed grading

   b. Proposed development in relationship to all previously approved and projected PD site development plans

   c. The width, location, and names of surrounding streets

   d. The location, dimensions, and uses on adjacent property of all existing buildings and structures within fifty (50) feet of the boundary line of the subject property

   e. The location, dimensions, ground floor area, and uses of all existing and proposed buildings and structures on the subject property

   f. Proposed landscaping

   g. Streets and parking areas

   h. Signs, including location, size, and height

   i. Proposed dedications and improvements in accordance with applicable subdivision improvement standards for the area

   j. Location, height, and material of walls and fences

   k. Other specified uses of the property

   l. North arrow

6. A narrative description of the proposed development including the following:

   a. Acreage or square footage of the property

   b. Height, ground floor area, and total floor area of each building

   c. Number of dwelling units in each building

   d. Building coverage expressed as a percent of the total area of the property

   e. Area of land devoted to landscaping and/or open space usable for recreation purposes and its percentage of the total land area

f. Method of sewage disposal

g. Water supply, both domestic and fire

h. Proposed on-site drainage facilities

i. Methods of flood control, where appropriate

B. Development Standards:

Development in the PD District shall comply with the following standards:

1. All development shall be consistent with the goals and policies of the General Plan and with the uses and density and intensity standards of the General Plan land use category applicable to the area in which the property is located.

2. All development shall comply with any additional conditions deemed necessary or appropriate by the Director of Planning and Development Services or the Board of Supervisors to promote the public health, safety, and welfare.

C. Plan Certification

No use shall be established or changed and no building or grading permit shall be issued for any use or development until a precise plan is certified. This certification shall consist of the following:

1. A certificate affixed to the precise development plan, signed by the property owner, which shall state that the owner is aware of the proposals shown on the plan and agrees and understands that all conditions of approval shall be complied with prior to use or occupancy of the premises.

2. A certificate affixed to the precise development plan, signed by the Director of Planning and Development Services or the Board of Supervisors, which shall state that the plan was approved, subject to the conditions shown hereon, and is in full compliance with the Ordinance Code of the County of Kern.

D. Time Limit on Approval:

If development approved in accordance with this article has not commenced within two (2) years of the approval, the approval shall become null and void and of no effect, unless an extension has been granted by the Director of Planning and Development Services upon written request for an extension before the expiration of the two- (2-) year period. This provision shall not apply to applications approved in conjunction with a tentative parcel map or a tentative tract map. In such cases, the expiration period shall coincide with that of the approved tentative parcel map or approved tentative tract map, as applicable.

E. Temporary Uses:

Notwithstanding Subsections A, B, and C of this section, when a PD District has been established and is in effect, the Director of Planning and Development Services is authorized to approve a temporary use of the property consistent with the uses authorized by the base district within which the PD District is combined, but involving no permanent buildings or structures, if the Director of Planning and Development Services determines that such temporary use would not be detrimental to the public health, safety, and welfare, subject to the following conditions:

1. The applicant shall submit an application for a PD site development plan review, but the Director of Planning and Development Services shall have authority to defer the filing of a formal linen or cronar.

2. Authorization for a temporary use shall be evidenced by a temporary use permit approved by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.02.

3. Such temporary use permit may be revoked by the Director of Planning and Development Services at any time if in the exercise of his/her reasonable discretion, he/she determines that continued temporary use of such property without the safeguards provided by an approved PD site development plan would be detrimental to the public health, safety, and welfare.

4. No temporary use permit shall ever ripen into the status of a permanent right or legal nonconforming use.

5. Prior to approval of a formal PD site development plan for permanent improvements, and in any case, in the event a PD site development plan is disapproved, the temporary use permit shall become null and void and the premises shall be completely vacated and restored to its original condition.

F. Minor Plan Modifications:

The Director of Planning and Development Services may approve minor plan modifications to an approved PD site development plan in accordance with the procedures set out in Section 7284.02 if the Director of Planning and Development Services determines that the modification(s) does not constitute a substantial change in the approved project.

G. Permit Revocation and Modifications:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

ARTICLE 7130

CLUSTER (CL) COMBINING DISTRICT

SECTIONS:

7130.01 PURPOSE AND APPLICATION
7130.02 PERMITTED USES
7130.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

7130.12 LANDSCAPING
7130.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7130.01 PURPOSE AND APPLICATION

The purpose of the Cluster (CL) Combining District is to promote development of imaginative, well-designed residential and commercial developments which preserve open space, promote affordable housing, and maximize the use of shared public and private recreation facilities. The CL District may be combined with the Estate (E), Low-density Residential (R-1), Medium-density Residential (R-2), High-density Residential (R-3), Mobilehome Subdivision (MS), Commercial Office (CO), Neighborhood Commercial (C-1), General Commercial (C-2), or Highway Commercial (CH) Districts. The regulations established by the CL District shall be in addition to the regulations of the base district with which the CL District is combined.

SECTION 7130.02 PERMITTED USES

Uses permitted by the base district with which the CL District is combined.

SECTION 7130.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

Conditional uses permitted by the base district with which the CL District is combined.

SECTION 7130.04 PROHIBITED USES

Uses prohibited by the base district with which the CL District is combined.

SECTION 7130.05 MINIMUM LOT SIZE

There is no minimum lot size where a base district is combined with the CL District.

SECTION 7130.06 MINIMUM LOT AREA PER DWELLING UNIT

None, except that overall project density shall not exceed the overall density established by the General Plan land use category applicable to the area in which the property is located.

SECTION 7130.07 YARDS AND SETBACKS

As established in accordance with the standards and procedures set out in Section 7130.13.

SECTION 7130.08 HEIGHT LIMITS

Per the requirements of the base district with which the CL District is combined.

SECTION 7130.09 MINIMUM DISTANCE BETWEEN STRUCTURES

Per the requirements of the base district with which the CL District is combined.

SECTION 7130.10 PARKING

Per the requirements of the base district with which the CL District is combined.

SECTION 7130.11 SIGNS

Per the requirements of the base district with which the CL District is combined.

SECTION 7130.12 LANDSCAPING

Per the requirements of the base district with which the CL District is combined.

SECTION 7130.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

No use shall be established, no development shall occur, and no building or grading permit shall be issued for any use or development in the CL District until an application for site development plan review has been submitted to and approved by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.03, or submitted to and approved by the Board of Supervisors in accordance with the procedures set out in Section 7284.05 when submitted in conjunction with an application for a change of zone classification or with a tentative subdivision map.

A. Application Contents:

An application for site development plan review shall include the following:

1. Name and address of applicant

2. Name(s) and address(es) of property owner(s)

3. Assessor's parcel number(s)

4. A site development plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following:

   a. Topography of the lot(s)

   b. Proposed street system and parking area

   c. Lot design

   d. Location of buildings

   e. Location of other proposed uses

   f. Proposed setbacks

   g. Areas to be reserved for parks, schools, or other public or quasi-public facilities

   h. Proposed landscaping

   i. Water supply and distribution

   j. Sewage disposal system

   k. Drainage system

   l. North arrow

5. Number of dwelling units per acre

6. Proposed method of ownership and maintenance of commonly held open space, if any

7. A narrative description of the development, including an explanation of the proposed deviations from the regulations otherwise applicable to the property

8. Phasing or development schedule

B. Development Standards and Conditions:

Development in the CL District shall comply with the following standards:

1. All development shall be consistent with the goals and policies of the General Plan and with the General Plan land use category applicable to the area in which the property is located.

2. Development within the CL District shall be demonstratively superior to the development that could occur under the base district regulations applicable to the property. In making this determination, the following factors shall be considered:

   a. Provision of open space

   b. Overall enhancement of the community environment

   c. Compatibility with uses in the area

C. Time Limit on Approval:

If development approved in accordance with this article has not commenced within two (2) years of the approval, the approval shall become null and void and of no effect, unless an extension has been granted by the Director of Planning and Development Services, upon written request for an extension before the expiration of the two- (2-) year period. This provision shall not apply to applications approved in conjunction with a tentative parcel map or a tentative tract map. In such cases, the expiration period shall coincide with that of the approved tentative parcel map or approved tentative tract map, as applicable.

D. Minor Plan Modifications:

The Director of Planning and Development Services may approve minor plan modifications to an approved CL site development plan in accordance with the procedures set out in Section 7284.02 if the Director of Planning and Development Services determines that the modification(s) does not constitute a substantial change in the approved project.

E. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

ARTICLE 7135

RESIDENTIAL SUBURBAN (RS) COMBINING DISTRICT

SECTIONS:

7135.01 PURPOSE AND APPLICATION
7135.02 PERMITTED USES
7135.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7135.04 PROHIBITED USES
7135.05 MINIMUM LOT SIZE
7135.06 MINIMUM LOT AREA PER DWELLING UNIT
7135.07 YARDS AND SETBACKS
7135.08 HEIGHT LIMITS
7135.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7135.10 PARKING
7135.11 SIGNS
7135.12 LANDSCAPING
7135.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7135.01 PURPOSE AND APPLICATION

The purpose of the Residential Suburban (RS) Combining District is to expand the number and type of permitted domestic agricultural uses within rural residential areas. The RS Combining District may be combined with the Estate (E) or Mobilehome Subdivision (MS) where the minimum lot size is one-half (1/2) net acre (21,780 square feet) or larger. The uses allowed and regulations established by the RS District shall be in addition to regulations of the base district with which the RS District is combined.

SECTION 7135.02 PERMITTED USES

The following uses and others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. Breeding, raising, and keeping of poultry, birds, rabbits, chinchillas, fish, frogs, or bees for the domestic use of the resident/occupant of the lot, provided, however, there shall be no killing or dressing of such animals for commercial purposes.

B. Keeping of cattle, sheep, goats, horses, or hogs owned by the resident/occupant of the lot, provided any combination of such animals on any one lot shall be limited to one animal for every one-quarter (1/4) acre, provided, however, there shall be no killing or dressing of such animals for commercial purposes.

C. Uses permitted by the base district with which the RS District is combined.

SECTION 7135.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

Conditional uses permitted by the base district with which the RS District is combined.

SECTION 7135.04 PROHIBITED USES

Uses prohibited by the base district with which the RS District is combined.

SECTION 7135.05 MINIMUM LOT SIZE

Per the requirements of the base district with which the RS District is combined, provided, however, in no case shall a portion of any lot within the RS District contain less than one-half (1/2) net acre (21,780) square feet).

SECTION 7135.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the RS District is combined.

SECTION 7135.07 YARDS AND SETBACKS

A. Pens, coops, stables, corrals, and other structures and enclosures housing livestock or poultry shall be at least:

1. One hundred (100) feet from the front property line

2. Twenty-five (25) feet from the street side of a corner lot

B. All other uses shall comply with the requirements of the base district with which the RS District is combined.

SECTION 7135.08 HEIGHT LIMITS

Per the requirements of the base district with which the RS District is combined.

SECTION 7135.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. Pens, coops, stables, corrals, and other structures and enclosures housing livestock or poultry shall be at least fifty (50) feet from any residential building and one hundred (100) feet from any public park, school, hospital, or similar institution.

B. All other uses shall comply with the requirements of the base district with which the RS District is combined.

SECTION 7135.10 PARKING

Per the requirements of the base district with which the RS District is combined.

SECTION 7135.11 SIGNS

Per the requirements of the base district with which the RS District is combined.

SECTION 7135.12 LANDSCAPING

Per the requirements of the base district with which the RS District is combined.

SECTION 7135.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

The breeding and raising of livestock, in greater numbers than allowed by Section 7135.02.B, by minors in conjunction with a student-oriented fair project sponsored by a bonafide agricultural organization shall be permitted upon submission of an application for a Temporary Animal Permit to and approval by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.02 of this chapter.

A. Application Contents:

An application for a Temporary Animal Permit shall include the following:

1. The name and address of the applicant
2. The name(s) and address(es) of the property owner(s)
3. Assessor's parcel number(s)
4. Legal description of the subject property
5. Name of the organization sponsoring the applicant
6. A plot plan showing the location of proposed pens, coops, or areas for the breeding and raising of animals in relation to existing residence(s) and other buildings and structures within one hundred (100) feet of pens, coops, or areas housing livestock
7. The signature of each owner of real property abutting the subject lot consenting to the granting of the Temporary Animal Permit

B. Development Standards and Conditions:

The breeding and raising of animals on a temporary basis shall comply with the following standards and conditions:

1. Applicant shall be sponsored by a bonafide organization, such as, but not limited to, Future Farmers of America, 4-H Club, Cow-Belles, or Junior Farmer.

2. The increase in animal density shall not exceed the density allowed by Section 7135.02 by more than fifty (50) percent. In any event, at least two (2), but no more than six (6), additional animals shall be allowed.

3. The Temporary Animal Permit shall be effective for a maximum period of six (6) months from the effective date of the permit. No more than one (1) such permit shall be approved for any lot within a one-year period.

4. The written consent of each abutting property owner consenting to the granting of the Temporary Animal Permit must be obtained.

5. The applicant shall allow inspection of animal maintenance facilities by the Kern County Department of Planning and Development Services (Building Inspection Division) and the Kern County Health Department.

6. Each additional animal authorized by the Temporary Animal Permit over the allowable animal density specified by Section 7135.02, shall be removed upon expiration of the permit.

C. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter upon receipt of a recommendation for revocation or modification from the Kern County Department of Planning and Development Services (Building Inspection Division) or the Kern County Health Department.

ARTICLE 7140

MOBILEHOME (MH) COMBINING DISTRICT

SECTIONS:

7140.01 PURPOSE AND APPLICATION
7140.02 PERMITTED USES
7140.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7140.04 PROHIBITED USES
7140.05 MINIMUM LOT SIZE
7140.06 MINIMUM LOT AREA PER DWELLING UNIT
7140.07 YARDS AND SETBACKS
7140.08 HEIGHT LIMITS
7140.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7140.10 PARKING
7140.11 SIGNS
7140.12 LANDSCAPING
7140.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7140.01 PURPOSE AND APPLICATION

The purpose of the Mobilehome (MH) Combining District is to provide for the installation of mobilehomes with or without foundations in agricultural, resource related, and residential zoned areas. The MH District may be combined with Limited Agriculture (A-1), Low-density Residential (R-1), Estate (E), or the Recreation Forestry (RF) Districts. The uses allowed and regulations established by the MH District shall be in addition to the regulations of the base district with which the MH District is combined. Foundations or recessed mobilehomes are required in the Bakersfield Designated Urban Area. In all other areas, mobilehomes without foundations are allowed.

SECTION 7140.02 PERMITTED USES

The following uses and others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. Mobilehome.

B. Uses permitted by the base district with which the MH District is combined.

SECTION 7140.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

Conditional uses permitted by the base district with which the MH District is combined.

SECTION 7140.04 PROHIBITED USES

Uses prohibited by the base district with which the MH District is combined.

SECTION 7140.05 MINIMUM LOT SIZE

Per the requirements of the base district with which the MH District is combined.

SECTION 7140.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the MH District is combined.

SECTION 7140.07 YARDS AND SETBACKS

Per the requirements of the base district with which the MH District is combined.

SECTION 7140.08 HEIGHT LIMITS

Per the requirements of the base district with which the MH District is combined.

SECTION 7140.09 MINIMUM DISTANCE BETWEEN STRUCTURES

Per the requirements of the base district with which the MH District is combined.

SECTION 7140.10 PARKING

Per the requirements of the base district with which the MH District is combined.

SECTION 7140.11 SIGNS

Per the requirements of the base district with which the MH District is combined.

SECTION 7140.12 LANDSCAPING

Per the requirements of the base district with which the MH District is combined.

SECTION 7140.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

In the Bakersfield Designated Urban Area, each mobilehome shall be placed on a permanent perimeter foundation system or recessed into the ground so that no part of the undercarriage is visible. A mobilehome shall not be recessed if connected to liquified petroleum gas (LPG). If the foundation system used results in exposed areas between the foundation and the mobilehome, then aluminum skirting shall be installed and maintained in place around the

base of the mobilehome at all times. Skirting of equal material durability and design may be approved by the Director of Planning and Development Services.

Regardless of where the mobilehome is located, if the method of installation results in the exposure of the undercarriage, a continuous perimeter skirting compatible with the mobilehome siding shall be installed.

ARTICLE 7145

WIND ENERGY (WE) COMBINING DISTRICT

SECTIONS:

7145.01 PURPOSE AND APPLICATION
7145.02 PERMITTED USES
7145.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7145.04 PROHIBITED USES
7145.05 MINIMUM LOT SIZE
7145.06 MINIMUM LOT AREA PER DWELLING UNIT
7145.07 YARDS AND SETBACKS
7145.08 HEIGHT LIMITS
7145.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7145.10 PARKING
7145.11 SIGNS
7145.12 LANDSCAPING
7145.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7145.01 PURPOSE AND APPLICATION

It is the intent of the Board of Supervisors, in adopting this article, to promote the use of proven wind-driven generators for energy recovery, and to promote safeguards ensuring the maintenance of the health, safety, and welfare of the citizens of Kern County. In addition, in adopting this article, it is the intent of the Board of Supervisors to promote the use of an alternative to fossil fuel generated electical power in areas of Kern County which are identified to have suitable wind resources for production of commercial quantities of wind-generated electrical power. Furthermore, it is the intent of the Board of Supervisors that site-specific application of this ordinance shall occur only in a manner that provides a harmonious balance between the suitability of a project site with existing area land use and physical surroundings.

The WE District is a combining district and shall only be applied to the following district classifications: Exclusive Agriculture (A), Natural Resource (NR) with a minimum lot size of twenty (20) acres, or Estate (E) with a minimum lot size of twenty (20) acres. The uses allowed and the regulations required in the WE District shall be in addition to the regulations of the base district with which the WE District is combined. The W-E District may not be adopted as a single land use designation.

SECTION 7145.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. Wind-driven electrical generators, prototype, as defined in Section 7280.02.

B. Wind-driven electrical generators, production, as defined in Section 7280.02.

C. Accessory administrative and maintenance structures and facilities, electrical substations, transmission lines, and other facilities and electrical structures accessory and incidental to the main use.

D. Uses permitted by the base district with which the WE District is combined.

SECTION 7145.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted subject to securing a conditional use permit in accordance with the standards and procedures set out in Article 7286 of this chapter:

A. Wind-driven electrical generators, experimental, as defined in Section 7280.02, on a temporary basis.

B. Conditional uses permitted by the base district with which the WE District is combined.

SECTION 7145.04 PROHIBITED USES

A. Wind-driven electrical generators, experimental, as defined in Section 7280.02, on a permanent basis.

B. All other uses not permitted by Sections 7145.02 and 7145.03 are prohibited.

SECTION 7145.05 MINIMUM LOT SIZE

Per the requirements of the base district with which the WE District is combined. However, in no event shall a portion of any lot within the WE District contain less than twenty (20) gross acres, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7145.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the WE District is combined.

SECTION 7145.07 YARDS AND SETBACKS

A. Wind-driven electrical generators shall comply with the setback requirements specified in Section 7145.13.

B. All other structures shall comply with the requirements of the base district with which the WE District is combined.

SECTION 7145.08 HEIGHT LIMITS

A. Wind-driven electrical generators shall comply with the height limits specified in Section 7145.13.

B. All other uses shall comply with the requirements of the base district with which the WE District is combined.

SECTION 7145.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. Wind-driven electrical generators shall comply with the requirements specified in Section 7145.13.

B. All other uses shall comply with the requirements of the base district with which the WE District is combined.

SECTION 7145.10 PARKING

Per the requirements of the base district with which the WE District is combined.

SECTION 7145.11 SIGNS

A. Signs in connection with wind-driven electrical generators shall comply with the requirements specified in Section 7145.13.

B. All other signs shall comply with the requirements of the base district with which the WE District is combined.

SECTION 7145.12 LANDSCAPING

A. None required in connection with wind-driven electrical generators.

B. All other uses shall comply with the requirements of the base district with which the WE District is combined.

SECTION 7145.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. Prior to issuance of construction permits, the developer shall submit a detailed plot plan for review and approval by the Director of Planning and Development Services. The plan boundaries shall coincide with those of the project parcel. The following information shall be included in said plan:

1. Existing topography and drainage channels.

2. Direction of prevailing winds across the project site.

3. Location, height, and dimensions of all existing structures.

4. Distance to all residences located within one (1) mile of exterior project boundary.

5. Manufacturer or machine trade name, including, but not limited to, rated KW capacity, tower or support structure location and height, total blade diameter, rated maximum shaft RPM, location of proposed structures and buildings, and manufacturer's production record, and/or sufficient manufacturer's data in order to classify machines as experimental, prototype, or production in accordance with the definitions contained in this article.

6. Location, grades, and dimensions of all roads and parking areas, both existing and proposed.

7. Location and extent of known archaeological remains.

8. Location and type of project security fencing.

9. A plan of proposed project phasing.

10. Any and all reports, approvals, or requirements, which may be required by mitigation measures incorporated into an environmental document adopted for implementation of this district for specific parcels; including a plan for implementation of recommendations contained in such reports.

11. A certificate signed by a registered civil engineer or licensed land surveyor stating that area encompassed by the project has been surveyed under his supervision or that a previous survey was performed by a registered civil engineer or licensed land surveyor and that sufficient monuments have been placed to accurately establish the exterior project boundaries.

B. Development Standards and Conditions:

Development in the WE Combining District shall comply with the following standards:

1. All necessary building and grading permits shall be obtained from the Kern County Department of Planning and Development Services. For construction and permit purposes, all wind generator towers shall conform to the regulations of the applicable seismic zone of the Uniform Building Code and the applicable groundshaking zone.

2. Towers and blades shall be painted a nonreflective, unobtrusive color or have a nonreflective surface.

3. Wind project facilities shall be enclosed with a minimum four- (4-) foot-high security fence constructed of four (4) strand barbed wire or materials of a higher quality. Fencing shall be erected for each wind machine or on the perimeter of the total project. Fencing erected on the perimeter of the total project shall include minimum eighteen- (18-) inch by eighteen- (18-) signs warning of wind turbine dangers. Said signs shall be located a maximum of three hundred (300) feet apart and at all points of site ingress and egress.

4. All on-site electrical wires associated with wind machines shall be installed underground, excepting therefrom "tie-ins" to a public utility company and public utility company transmission poles, towers, and lines. An additional exemption may be granted by the Director of Planning and Development Services if project terrain is found to be unsuitable to accomplish the intent and purpose of this provision.

5. Prior to issuance of construction permits, the developer shall provide the Kern County Department of Planning and Development Services with proof of approved access to the site.

6. Wind generator setback shall be as follows:

   a. Setback where adjacent parcels contain less than forty (40) acres: A minimum wind generator setback of four (4) times overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blades) or five hundred (500) feet, whichever is greater, shall be maintained from exterior project boundaries where the project site is adjacent to existing parcels of record which contain less than forty (40) acres and are not zoned WE Combining District.

      The Director of Planning and Development Services may allow a reduction in this setback, not to exceed a minimum setback of one and one-half (1 1/2) times the overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blades) if a letter of consent from the owner(s) of record of adjacent parcels is filed with the Kern County Department of Planning and Development Services.

   b. Setback where adjacent parcels contain forty (40) acres or more: A minimum wind generator setback of one and one-half (1 1/2) times the overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blades) shall be maintained from all exterior project boundaries.

      The Director of Planning and Development Services may allow a reduction of this setback requirement in accordance with all of the following provisions:

      (1) The project exterior boundary is a common property line between two (2) or more approved wind energy projects.

      (2) The property owner of each property has filed a letter of consent to the proposed setback reduction with the Director of Planning and Development Services.

(3) All setbacks shall comply with the setback requirements of the base district with which the WE District is combined.

(4) The project site and the adjacent property exist as the same parcel of record and are held under common ownership, and the property owner has filed a letter of consent to the proposed setback reduction with the Director of Planning and Development Services.

c. Setback from off-site residence(s) on adjacent parcels: In all cases, regardless of parcel area, a minimum wind generator setback of four (4) times the overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blades) or one thousand (1,000) feet, whichever is greater, shall be maintained from any off-site residence.

The Director of Planning and Development Services may allow a reduction in this setback, not to exceed a minimum setback of one and one-half (1 1/2) times the overall machine height, if a letter of consent from the owner(s) of record of the adjacent parcel is filed with the Director of Planning and Development Services.

d. Project interior wind generator spacing: Wind generator spacing within the project boundary shall be in accordance with accepted industry standards pertaining to the subject machine.

e. Setback from on-site residences and accessory structures designed for human occupancy: A minimum wind generator setback of one and one-half (1 1/2) times the overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blade) shall be maintained from any on-site residence or accessory structure designed for human occupancy.

f. Setback from public highways and streets, public access easements, public trails, and railroads: A minimum wind generator setback of one and one-half (1 1/2) times the overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blade) shall be maintained from any public highway or street, public access easement, public trail, or railroad.

7. Wind generator machine height shall not exceed the maximum height permitted for antennae and towers by the District with which the WE District is combined. For the purposes of this provision, machine height shall be measured as follows:

a. Machine height of horizontal axis machines shall be measured from grade to the center of the blade hub.

b. Machine height of vertical axis or other machine designs shall be measured from grade to the highest point of the structure.

Approval of heights in excess of these limitations shall be in accordance with Sections 7288 and 7290 of this chapter.

8. All wind generators and towers shall comply with all applicable County, State, and federal laws, ordinances, or regulations.

9. One (1) project identification sign, located at each point of project ingress and egress, not to exceed thirty-two (32) square feet in area, may be erected on the project site. No other signs shall be installed other than the required warning signs. The developer shall submit a sign elevation drawing to the Director of Planning and Development Services for review and approval prior to installation.

10. Where a residence, school, church, public library, or other sensitive or highly sensitive land use, as identified in the Noise Element of the General Plan, is located within one (1) mile in a prevailing downwind direction or within one-half (1/2) mile in any other direction of a project's exterior boundary, an acoustical analysis shall be prepared by a qualified acoustical consultant prior to the issuance of any building permit. The consultant and the resulting report shall be subject to review and approval by the Kern County Health Department. The report shall address any potential impacts on sensitive or highly sensitive land uses.

In addition, the acoustical report shall demonstrate that the proposed development shall comply with the following criteria:

a. Audible noise due to wind turbine operations shall not be created which causes the exterior noise level to exceed forty-five (45) dBA for more than five (5) minutes out of any one- (1-) hour time period (L8.3) or to exceed fifty (50) dBA for any period of time when measured within fifty (50) feet of any existing residence, school, hospital, church, or public library.

b. Low frequency noise or infrasound from wind turbine operations shall not be created which causes the exterior noise level to exceed the following limits when measured within fifty (50) feet of any existing residence, school, hospital, church, or public library.

One-third Octave Bank Center Frequency (Hz)	Sound Pressure Level (dB)
2 to 16	70 (each band)
20	68
25	67
31.5	65
40	62
50	60
63	57
80	55
100	52
125	50

c. In the event audible noise due to wind turbine operations contains a steady pure tone, such as a whine, screech, or hum, the standards for audible noise set forth in Subsection "a" shall be reduced by five (5) dBA. A pure tone is defined to exist if the one-third (1/3) octave band sound pressure level in the band, including the tone, exceeds the arithmetic average of the sound pressure levels of the two (2) contiguous one-third (1/3) octave bands by five (5) dBA for center frequencies of five hundred (500) Hz and above, by eight (8) dBA for center frequencies between one hundred and sixty (160) Hz and four hundred (400) Hz, or by fifteen (15) dBA for center frequencies less than or equal to one hundred and twenty-five (125) Hz.

d. In the event the audible noise due to wind turbine operations contains repetitive impulsive sounds, the standards for audible noise set forth in Subsection "a" shall be reduced by five (5) dBA.

e. In the event the audible noise due to wind turbine operations contains both a pure tone and repetitive impulsive sounds, the standards for audible noise set forth in Subsection "a" shall be reduced by a total of five (5) dBA.

f. In the event the ambient noise level (exclusive of the development in question) exceeds one (1) of the standards given above, the applicable standard shall be adjusted so as to equal the ambient noise level. For audible noise, the ambient noise level shall be expressed in terms of the highest whole number sound pressure level in dBA which is exceeded for no more than five (5) minutes per hour (L8.3). For low frequency noise or infrasound, the ambient noise level shall be expressed in terms of the equivalent level (Leq) for the one-third (1/3) octave band in question, rounded to the nearest whole decibel. Ambient noise levels shall be measured within fifty (50) feet of potentially affected existing residences, schools, hospitals, churches, or public libraries.

Ambient noise level measurement techniques shall employ all practical means of reducing the effects of wind-generated noise at the microphone. Ambient noise level measurements may be performed when wind velocities at the proposed project site are sufficient to allow wind turbine operation, provided that the wind velocity does not exceed thirty (30) mph at the ambient noise measurement location.

g. Any noise level falling between two (2) whole decibels shall be the lower of the two.

h. In the event that noise levels, resulting from a proposed development, exceed the criteria listed above, a waiver to said levels may be granted by the Director of Planning and Development Services provided that the following has been accomplished:

(1) Written consent from the affected property owners has been obtained stating that he/she is aware of the proposed development and the noise limitations imposed by the Ordinance Code, and that consent is granted to allow noise levels to exceed the maximum limits allowed.

(2) A permanent noise impact easement has been recorded in the County Hall of Records which describes the benefitted and burdened properties and which advises all subsequent owners of the burdened property that noise levels in excess of those permitted by the Ordinance Code may exist on or at the burdened property.

11. Prior to the issuance of any building permit, a plan for the mitigation of potential soil erosion and sedimentation shall be prepared. The plan shall include provisions for site revegetation and shall include sediment collection facilities as may be required by the Kern County Department of Planning and Development Services and/or the appropriate resource conservation district. The plan shall include a timetable for full implementation and a surety bond or other security as approved by the Kern County Counsel's Office, in an amount determined by the Kern County Department of Planning and Development Services and the appropriate resource conservation district and shall be provided to the Kern County Department of Planning and Development Services (Building Inspection Division) to guarantee plan implementation. The plan shall also be approved by the Kern County Director of Planning and Development Services and the appropriate resource conservation district, prior to issuance of a building permit. In the event that the appropriate resource conservation district cannot participate in plan approval, the Kern County Department of Planning and Development Services shall have final responsibility in said plan approval.

12. A minimum of on-site roadways shall be constructed. Temporary access roads utilized for initial machine installation shall be revegetated to a natural condition after completion of machine installation. The applicant shall submit a plan of all proposed roads, temporary and permanent, for approval by the Director of Planning and Development Services prior to the issuance of any building permits.

13. Construction of any slopes steeper than four to one (4:1) shall be prohibited unless specifically authorized by the Kern County Department of Planning and Development Services and mitigation is provided.

14. Wind project facilities shall be encircled with a ten- (10-) foot-wide fuel break. Subject fuel breaks may be installed for each wind machines or the perimeter of the total project, but in no event shall encompass more than forty (40) acres per block. Permanent access roads may also be considered fuel breaks. This requirement may be modified at the discretion of the Kern County Fire Chief.

15. No building permits will be issued until the grading has been completed in accordance with the approved plans and "As Graded Certification" has been made by the engineer.

C. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

ARTICLE 7150

PETROLEUM EXTRACTION (PE) COMBINING DISTRICT

SECTIONS:

7150.01 PURPOSE AND APPLICATION
7150.02 PERMITTED USES
7150.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7150.04 PROHIBITED USES
7150.05 MINIMUM LOT SIZE
7150.06 MINIMUM LOT AREA PER DWELLING UNIT
7150.07 YARDS AND SETBACKS
7150.08 HEIGHT LIMITS
7150.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7150.10 PARKING
7150.11 SIGNS
7150.12 LANDSCAPING
7150.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7150.01 PURPOSE AND APPLICATION

The purpose of the Petroleum Extraction (PE) Combining District is to designate lands containing productive or potentially productive petroleum resources to promote the development of such resources in a manner compatible with surrounding development. The PE Combining District may be applied only to those areas that are zoned Estate (E), Professional Office (CO), Neighborhood Commercial (C-1), General Commercial (C-2), or Highway Commercial (CH). The uses allowed and the regulations established by the PE District shall be in addition to the regulations of the base district with which the PE District is combined.

SECTION 7150.02 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted:

A. Wells for the exploration for and development and production of oil or gas or other hydrocarbon substances if the well or wells are located more than three hundred (300) feet away from any existing dwelling or existing building utilized for commercial purposes, excluding those premises utilized solely for storage of equipment, material, household goods, or similar material.

B. Deepening or redrilling, within the existing well bore, of any well used for the production or development of oil or gas or other hydrocarbon substances, or the replacement of any production facility which did not require a conditional use permit on the date drilling began or the date the facility was installed.

C. Drilling of a replacement well when the original well did not require a conditional use permit, and where the original well has been abandoned in accordance with California Division of Oil and Gas regulations and drilling of a replacement well commences within one (1) year of the conclusion of abandonment procedures, and the replacement well is located within twenty (20) feet of the original well or is farther from any existing dwelling or commercial building than the original well.

D. Uses permitted by the base district with which the PE District is combined.

SECTION 7150.03 USES PERMITTED BY A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Section 7282.03 are permitted subject to securing a conditional use permit in accordance with the procedures set out in Article 7286 of this chapter:

A. Wells for the exploration for and development and production of oil or gas or other hydrocarbon substances if the well or wells are located within three hundred (300) feet of any existing dwelling or existing building utilized for commercial purposes, excluding those premises utilized solely for storage of equipment, material, household goods, or similar material.

B. Conditional uses permitted by the base district with which the PE District is combined.

SECTION 7150.04 PROHIBITED USES

All other uses not permitted by Sections 7150.02 and 7150.03 are prohibited.

SECTION 7150.05 MINIMUM LOT SIZE

Per the requirements of the base district with which the PE District is combined.

SECTION 7150.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the PE District is combined.

SECTION 7150.07 YARDS AND SETBACKS

A. No oil or gas well shall be drilled within one hundred (100) feet of the right-of-way of any existing or proposed public highway or street.

B. All other uses permitted by the base district shall conform to the yard and setback requirements of the base district with which the PE District is combined.

SECTION 7150.08 HEIGHT LIMITS

A. No height limit on derricks and other equipment used during the exploration and drilling phase of development.

B. Pumping units shall not exceed thirty-five (35) feet in height.

C. All other uses permitted by the base district shall conform to the height limits of the base district with which the PE District is combined.

SECTION 7150.09 MINIMUM DISTANCE BETWEEN STRUCTURES

A. Per the requirements of Article 7260.

B. All other uses shall comply with the base district with which the PE District is combined.

SECTION 7150.10 PARKING

A. No minimum requirement for drilling and production activities, provided, however, all vehicle parking and maneuvering areas shall be treated and maintained with oiled sand or a similar dust binding material.

B. All other uses permitted by the base district shall conform to the requirements of the base district with which the PE District is combined.

SECTION 7150.11 SIGNS

The following signs are permitted in accordance with the requirements of Article 7225 of this chapter:

A. Directional, warning signs, identification signs in connection with oil, gas or other hydrocarbon drilling and development operations.

B. Signs permitted by the base district with which the PE District is combined.

SECTION 7150.12 LANDSCAPING

Per the requirements of the base district with which the PE District is combined.

SECTION 7150.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

All drilling and hydrocarbon development activities shall be carried out in accordance with the standards and procedures set out in Section 7260.05 of this chapter.

ARTICLE 7155

GEOLOGIC HAZARD (GH) COMBINING DISTRICT

SECTIONS:

7155.01 PURPOSE AND APPLICATION
7155.02 PERMITTED USES
7155.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7155.04 PROHIBITED USES
7155.05 MINIMUM LOT SIZE
7155.06 MINIMUM LOT AREA PER DWELLING UNIT
7155.07 YARDS AND SETBACKS
7155.08 HEIGHT LIMITS
7155.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7155.10 PARKING
7155.11 SIGNS
7155.12 LANDSCAPING
7155.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7155.01 PURPOSE AND APPLICATION

The purpose of the Geologic Hazard (GH) Combining District is to protect the public's health and safety and minimize property damage by designating areas that are subject to or potentially subject to surface faulting, ground-shaking, ground failure, landslides, mudslides, or other geologic hazards by establishing reasonable restrictions on land use in such areas. The GH District shall be applied to lands designated Map Code 2.1, 2.2, or 2.3 by the General Plan and to any other area where there is a reasonable presumption based on documented evidence that a hazardous or potentially hazardous condition exists. The regulations established by the GH District shall be in addition to the regulations of the base district with which the GH District is combined.

SECTION 7155.02 PERMITTED USES

Uses permitted by the base district with which the GH District is combined, except as modified in accordance with the standards and procedures set out in Section 7155.13.

SECTION 7155.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

Conditional uses permitted by the base district with which the GH District is combined, except as modified in accordance with the standards and procedures set out in Section 7155.13.

SECTION 7155.04 PROHIBITED USES

Uses prohibited by the base district with which the GH District is combined.

SECTION 7155.05 MINIMUM LOT SIZE

Per the requirements of the base district with which the GH District is combined.

SECTION 7155.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the GH District is combined.

SECTION 7155.07 YARDS AND SETBACKS

Per the requirements of the base district with which the GH District is combined, except as modified in accordance with the standards and procedures set out in Section 7155.13.

SECTION 7155.08 HEIGHT LIMITS

Per the requirements of the base district with which the GH District is combined, except as modified in accordance with the standards and procedures set out in Section 7155.13.

SECTION 7155.09 MINIMUM DISTANCE BETWEEN STRUCTURES

Per the requirements of the base district with which the GH District is combined, except as modified in accordance with the standards and by procedures set out in Section 7155.13.

SECTION 7155.10 PARKING

Per the requirements of the base district with which the GH District is combined.

SECTION 7155.11 SIGNS

Per the requirements of the base district with which the GH District is combined.

SECTION 7155.12 LANDSCAPING

Per the requirements of the base district with which the GH District is combined.

SECTION 7155.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

No use shall be established, no development shall occur, and no building permit or grading permit shall be issued for any use or development in the GH Combining District until an application for plot plan review has been submitted to and approved by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.02 of this chapter.

A. Application Contents:

An application for plot plan review shall include the following:

1. Name and address of applicant

2. Name(s) and address(es) of the property owner(s)

3. Assessor's parcel number(s)

4. Legal description of the property

5. A plot plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

   a. Topography and proposed grading

   b. Location and extent of all geologic hazards, including areas subject to surface faulting, groundshaking, ground failure, landslides, mudslides, and other geologic hazards

   c. Location of all proposed buildings and structures

   d. Location of proposed streets, roads, and parking areas

   e. Proposed drainage improvements

   f. North arrow

6. A geological report prepared by a qualified engineering geologist, certified by the State of California, that includes the following information:

   a. The original signature and certification number of the responsible geologist

   b. An index map showing the regional setting of the study area

   c. A description of the study methods used; the methods may include, but are not limited to, field traverses and inspections, test pits or trenches, drill holes, geophysical investigation, aerial photo analysis, laboratory texts, and review of previously published or unpublished maps and reports

   d. On an appropriate topographic base, an original geological map of the site and as much of the surrounding area as practicable. The scale shall be one (1) inch to one thousand (1,000) feet or larger for the main geologic map, and one (1) inch to one hundred (100) feet for complementary geologic maps emphasizing special features or hazards

e. One or more geologic structure sections showing actual or probable subsurface relations and clearly labeled as to which relations are conjectural

f. A statement of conclusions and recommendations regarding suitability of proposed uses, including, but not limited to, buildings, structures, roads, and septic systems in relation to the existing or potential geologic hazards and recommended mitigation measures with respect to the following:

(1) Location of buildings, structures, roads, and septic systems in relation to identified geologic hazard or hazards

(2) Method of construction

(3) Grading

(4) Removal of native vegetation and replanting of cut slopes

(5) Any other aspect of building construction or site development that has a clear relationship to the identified geologic hazard or hazards

g. A list of references of geologic literature used in evaluation of the site

B. Development Standards and Conditions:

Development in the GH Combining District shall comply with the mitigation measures recommended in the geological report required by Section 7155.13A as approved by the Kern County Department of Planning and Development Services. In any event, structures for human occupancy shall be set back at least fifty (50) feet from any active fault trace or one hundred (100) feet from any fault trace that cannot be precisely located or is depicted as "inferred" on the Kern County Seismic Hazard Atlas.

ARTICLE 7160

FLOODPLAIN (FP) COMBINING DISTRICT

SECTIONS:

7160.01 PURPOSE AND APPLICATION
7160.02 PERMITTED USES
7160.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7160.04 PROHIBITED USES
7160.05 MINIMUM LOT SIZE
7160.06 MINIMUM LOT AREA PER DWELLING UNIT
7160.07 YARDS AND SETBACKS
7160.08 HEIGHT LIMITS
7160.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7160.10 PARKING
7160.11 SIGNS
7160.12 LANDSCAPING
7160.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7160.01 PURPOSE AND APPLICATION

The purpose of the Floodplain (FP) Combining District is to protect the public health and safety and minimize property damage by designating areas that are potentially subject to flooding and by establishing reasonable restrictions on land use in such areas. The FP District shall be applied to those areas lying within Zone A on the Flood Insurance Rate Maps (FIRM) or those areas potentially subject to flooding as designated by the Kern County Department of Planning and Development Services pending reclassification of such areas into the Floodplain Primary (FPP) District or the Floodplain Secondary (FPS) Combining District. The regulations established by the FP District shall be in addition to the regulations of the base district with which the FP District is combined.

The special flood hazard area designated as Zone A is based on historical flood flows where no quantitative determination of the frequency of flooding has been made. Detailed engineering studies are performed and/or approved by the Kern County Department of Planning and Development Services prior to the reclassification of the FP Combining District into the FPP District and/or FPS Combining District.

The degree of flood protection required by this article is considered reasonable for regulatory purposes and is based on engineering and scientific methods of study. Larger floods may occur on rare occasions or flood heights may be increased by man-made or natural causes, such as bridge openings restricted by debris. This article does not imply that areas outside the FP District or land uses permitted within the FP District will be free from flooding or flood damages. This article shall not create liability on the part of the County of Kern or any officer or employee thereof for any flood damage that may result from reliance on this article or any administrative decision lawfully made hereunder.

SECTION 7160.02 PERMITTED USES

Uses permitted by the base district with which the FP District is combined, except as prohibited by Section 7160.04 or as modified in accordance with the standards set out in Section 7160.13.

SECTION 7160.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

Conditional uses permitted by the base district with which the FP District is combined, except as prohibited by Section 7160.04 or as modified in accordance with the standards set out in Section 7160.13.

SECTION 7160.04 PROHIBITED USES

All other uses not permitted by Sections 7160.02 and 7160.03 are prohibited, including:

A. All uses prohibited by the base district with which the FP District is combined.

B. All uses that will likely increase the flood hazard or affect the water-carrying capacity of the floodplain beyond the limits resulting from encroachment as specified in Section 7160.13 of this article.

C. Dumping, stockpiling, or storage of floatable substances or other materials which, in the opinion of the Kern County Department of Planning and Development Services, will add to the debris loads of the stream or watercourse, unless protected by flood control devices approved by the Director of Planning and Development Services and constructed in accordance with Section 7160.13.

D. Livestock feed yards, dairies, storage of junk, or salvage operations.

E. Oil storage tanks or processing equipment, unless floodproofed or sufficiently elevated above the Base Flood Elevation, as determined by the Kern County Department of Planning and Development Services.

F. Individual sewage disposal systems (e.g., septic tank systems), unless protected by flood control devices approved by the Kern County Department of Planning and Development Services and constructed in accordance with the requirements of the Kern County Health Department so as to minimize infiltration of floodwaters into the systems and discharges from the systems into the floodwaters.

G. Sources of water supply (e.g., wells, springs, etc.) unless protected by flood control devices approved by the Kern County Department of Planning and Development Services and constructed in accordance with the requirements of the Kern County Health Department so as to minimize infiltration of floodwaters.

H. Any use which endangers the temporary safeguards erected for flood protection.

SECTION 7160.05 MINIMUM LOT SIZE

Per the requirements of the base district with which the FP District is combined, provided, however, that in no event shall the minimum lot size of any lot created after the effective date of this section be less than twenty (20) acres, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

SECTION 7160.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the FP District is combined, provided, however, there shall be no more than one (1) habitable structure per twenty (20) acres or per legal lot of record containing less than twenty (20) acres.

SECTION 7160.07 YARDS AND SETBACKS

Per the requirements of the base district with which the FP District is combined, except that all development shall be set back a minimum of ten (10) feet from the banks of any watercourse and sewage disposal systems shall be set back a minimum of one hundred (100) feet from the banks of any watercourse.

SECTION 7160.08 HEIGHT LIMITS

Per the requirements of the base district with which the FP District is combined.

SECTION 7160.09 MINIMUM DISTANCE BETWEEN STRUCTURES

Per the requirements of the base district with which the FP District is combined.

SECTION 7160.10 PARKING

Per the requirements of the base district with which the FP District is combined.

SECTION 7160.11 SIGNS

Per the requirements of the base district with which the FP District is combined, provided that construction of the sign(s) shall comply with the minimum standards set out in Section 7160.13.

SECTION 7160.12 LANDSCAPING

Per the requirements of the base district with which the FP District is combined.

SECTION 7160.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

All development within the FP District shall comply with the requirements of the Flood Damage Prevention Ordinance (Article 11 of Division 2 of Part 4 of the Ordinance Code of Kern County) and the following standards:

A. Generally, development within the floodplain may not cumulatively increase the Base Flood Elevation at any point more than one (1) foot.

1. Computations of increased flood heights, caused by development in the floodplain, shall be based upon the reasonable assumption that there shall be an equal loss of conveyance on opposite sides of the stream.

2. Cases for supercritical flow, or where velocity conditions are such that normal encroachment analyses are not possible or inappropriate, the allowable increase of one (1) foot shall be applied to the energy grade line instead of the Base Flood Elevation.

3. Cases for overbank velocities exceeding seven (7) feet per second, the floodway boundary shall coincide with the 100-year floodplain boundaries.

4. All such computations shall be made or approved by the Kern County Department of Planning and Development Services.

B. There shall be no more than one (1) habitable structure per twenty (20) acres.

ARTICLE 7165

FLOODPLAIN SECONDARY (FPS) COMBINING DISTRICT

SECTIONS:

7165.01 PURPOSE AND APPLICATION
7165.02 PERMITTED USES
7165.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7165.04 PROHIBITED USES
7165.05 MINIMUM LOT SIZE
7165.06 MINIMUM LOT AREA PER DWELLING UNIT
7165.07 YARDS AND SETBACKS
7165.08 HEIGHT LIMITS
7165.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7165.10 PARKING
7165.11 SIGNS
7165.12 LANDSCAPING
7165.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7165.01 PURPOSE AND APPLICATION

The purpose of the Floodplain Secondary (FPS) Combining District is to protect the public health and safety and minimize property damage by designating areas that are subject to flooding with relatively low velocities or depths and by establishing reasonable restrictions on land use in such areas. The FPS District shall be applied to those areas lying within special flood hazard areas designated as Zones AO and AH, and Zone A1-A30 on the Flood Insurance Rate Maps (FIRM), but excluding the floodway on the Flood Boundary Floodway Maps (FBFM), the Designated Floodway on the State of California's Board of Reclamation's Kern River Designated Floodway Studies, or other maps where engineering studies have been made and adopted by the Kern County Board of Supervisors. The regulations established by the FPS District shall be in addition to the regulations of the base district with which the FPS District is combined.

The degree of flood protection required by this article is considered reasonable for regulatory purposes and is based on engineering and scientific methods of study. Larger floods may occur on rare occasions or flood heights may be increased by man-made or natural causes, such as bridge openings restricted by debris. This article does not imply that areas outside the FPS District or land uses permitted within this district will be free from flooding or flood damages. This article shall not create liability on the part of the County of Kern or any officer or employee thereof for any flood damage that may result from reliance on this article or any administrative decision lawfully made hereunder.

SECTION 7165.02 PERMITTED USES

Uses permitted by the base district with which the FPS District is combined, except as prohibited by Section 7165.04 or as modified in accordance with the standards set out in Section 7165.13.

SECTION 7165.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

Conditional uses permitted by the base district with which the FPS District is combined, except as prohibited by Section 7165.04 or as modified in accordance with the standards set out in Section 7165.13.

SECTION 7165.04 PROHIBITED USES

All other uses not permitted by Sections 7165.02 or 7165.03 are prohibited, including the following:

A. All uses prohibited by the base district with which the FPS District is combined.

B. All uses that will likely increase the flood hazard or affect the water-carrying capacity of the floodplain beyond the limits resulting from encroachment as specified in Section 7165.13 of this chapter.

C. Dumping, stockpiling, or storage of floatable substances or other materials which, in the opinion of the Kern County Department of Planning and Development Services, will add to the debris loads of the stream or watercourse.

D. Commercial cattle feed yards, dairies, storage of junk, or salvage operations.

E. Oil storage tanks or processing equipment, unless floodproofed or sufficiently elevated above the Base Flood Elevation, as determined by the Kern County Department of Planning and Development Services.

F. Individual sewage disposal systems (e.g., septic tank systems), unless protected by flood control devices approved by the Kern County Department of Planning and Development Services and constructed in accordance with the requirements of the Kern County Health Department so as to minimize infiltration of floodwaters into the systems and discharges from the systems into the floodwaters.

G. Sources of water supply (e.g., wells, springs, etc.), unless protected by flood control devices approved by the Kern County Department of Planning and Development Services and constructed in accordance with the requirements of the Kern County Health Department so as to minimize infiltration of floodwaters.

H. Any use which endangers the temporary safeguards erected for flood protection.

I. Tree farming, unless it can be shown to the Kern County Department of Planning and Development Services that the spacing of trees will not affect the water-carrying capacity of the stream beyond limits resulting from encroachment as specified in Section 7165.13.

SECTION 7165.05 MINIMUM LOT SIZE

Per the requirements of the base district with which the FPS District is combined.

SECTION 7165.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the FPS District is combined.

SECTION 7165.07 YARDS AND SETBACKS

Per the requirements of the base district with which the FPS District is combined, except that all development shall be set back a minimum of ten (10) feet from the banks of any watercourse, and sewage disposal systems shall be set back a minimum of one hundred (100) feet from the banks of the watercourse.

SECTION 7165.08 HEIGHT LIMITS

Per the requirements of the base district with which the FPS District is combined.

SECTION 7165.09 MINIMUM DISTANCE BETWEEN STRUCTURES

Per the requirements of the base district with which the FPS District is combined.

SECTION 7165.10 PARKING

Per the requirements of the base district with which the FPS District is combined.

SECTION 7165.11 SIGNS

Per the requirements of the base district with which the FPS District is combined, provided that construction of the sign(s) shall comply with the minimum standards set out in Section 7165.13.

SECTION 7165.12 LANDSCAPING

Per the requirements of the base district with which the FPS District is combined.

SECTION 7165.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

All development within the FPS District shall comply with the requirements of the Flood Damage Prevention Ordinance (Article 11 of Division 2 of Part 4 of the Ordinance Code of Kern County) and the following standards:

A. Generally, development within the floodplain may not cumulatively increase the Base Flood Elevation at any point more than one (1) foot.

1. Computations of increased flood heights, caused by development in the floodplain, shall be based upon the reasonable assumption that there shall be an equal loss of conveyance on opposite sides of the stream.

2. Cases for supercritical flow, or where velocity conditions are such that normal encroachment analyses are not possible or inappropriate, the allowable increase of one (1) foot shall be applied to the energy grade line instead of the Base Flood Elevation.

3. Cases for overbank velocities exceeding seven (7) feet per second, the floodway boundary shall coincide with the 100-year floodplain boundaries.

4. All such computations shall be made or approved by the Kern County Department of Planning and Development Services.

B. In areas where a determination is made by the Kern County Department of Planning and Development Services that the 100-year Flood has a critical stage duration greater than six (6) hours, access to habitable structures that are above the water surface elevation of the fifty (50) year flood, considering the effects of development in the floodplain, shall be provided.

ARTICLE 7170

ARCHITECTURAL DESIGN (D) COMBINING DISTRICT

SECTIONS:

7170.01 PURPOSE AND APPLICATION
7170.02 PERMITTED USES
7170.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7170.04 PROHIBITED USES
7170.05 MINIMUM LOT SIZE
7170.06 MINIMUM LOT AREA PER DWELLING UNIT
7170.07 YARDS AND SETBACKS
7170.08 HEIGHT LIMITS
7170.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7170.10 PARKING
7170.11 SIGNS
7170.12 LANDSCAPING
7170.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7170.01 PURPOSE AND APPLICATION

The purpose of the Architectural Design (D) Combining District is to designate areas with unique architectural or historical themes to ensure that proposed buildings, structures, signs, and landscaping and modifications to buildings, structures, signs, and landscaping within these areas are in harmony with the surrounding area and to promote economic development in such areas. The D District may be applied to the areas containing public buildings and grounds or privately owned buildings and land where unique architectural or historical themes have been established. In conjunction with establishing a D District in any area, the Board of Supervisors shall adopt an architectural theme and development guidelines for the D District. The regulations established by the D District shall be in addition to the regulations of the base district with which the D District is combined.

SECTION 7170.02 PERMITTED USES

Uses permitted by the base district with which the D District is combined.

SECTION 7170.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

Conditional uses permitted by the base district with which the D District is combined.

SECTION 7170.04 PROHIBITED USES

Uses prohibited by the base district with which the D District is combined.

SECTION 7170.05 MINIMUM LOT SIZE

Per the requirements of the base district with which the D District is combined.

SECTION 7170.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the D District is combined.

SECTION 7170.07 YARDS AND SETBACKS

Per the requirements of the base district with which the D District is combined, except as modified pursuant to Section 7170.13.

SECTION 7170.08 HEIGHT LIMITS

Per the requirements of the base district with which the D District is combined, except as modified pursuant to Section 7170.13.

SECTION 7170.09 MINIMUM DISTANCE BETWEEN STRUCTURES

Per the requirements of the base district with which the D District is combined, except as modified pursuant to Section 7170.13.

SECTION 7170.10 PARKING

Per the requirements of the base district with which the D District is combined, except as modified pursuant to Section 7170.13.

SECTION 7170.11 SIGNS

Per the requirements of the base district with which the D District is combined, except as modified pursuant to Section 7170.13.

SECTION 7170.12 LANDSCAPING

Per the requirements of the base district with which the D District is combined, except as modified pursuant to Section 7170.13.

SECTION 7170.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

Except as provided in this section, no use shall be established, no development shall occur, and no building or grading permit shall be issued for any use or development in the D District until an application for plot plan review has been submitted to and approved by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.02 of this chapter.

A. Application Contents:

An application for site development plan review shall include the following:

1. Name and address of applicant

2. Name(s) and address(es) of the property owner(s)

3. Assessor's parcel number(s)

4. Legal description of the property

5. A plot plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

   a. Topography and proposed grading

   b. Location of all existing buildings and structures in the immediate vicinity

   c. Location of all proposed buildings and structures

   d. Yards and setbacks

   e. Proposed parking areas

   f. Proposed landscaping

   g. Location of signs

   h. Location of lighting

   i. North arrow

6. Elevations of the proposed buildings and structures showing:

   a. Dimensions of the buildings or structures

   b. Proposed architectural treatment, building materials, and colors

   c. Roof design and materials

   d. Size and spacing of windows, doors, and other openings

   e. Signs

   f. Lighting

7. Photographs of surrounding area

8. Narrative description of the proposed development, including how the proposed development has been designed to carry out the architectural theme established by the Board of Supervisors pursuant to Section 7170.13.C and to harmonize with surrounding development.

B. Development Standards and Conditions:

Development in the D District shall conform to the architectural theme and development guidelines established by the Board of Supervisors pursuant to Section 7170.13.C. In reviewing and approving the application for plot plan review, the Director of Planning and Development Services shall determine whether the application complies with the architectural theme and guidelines established by the Board of Supervisors pursuant to Section 7170.13.C with respect to the following:

1. Height, bulk, and area of buildings
2. Yards and setbacks
3. Color and materials of the exterior of any buildings
4. Type and pitch of roofs
5. Size and spacing of windows, doors, and other openings
6. Size, type, and location of signs
7. Landscaping
8. Parking area
9. Lighting
10. Any other aspects of building construction or site development that may relate to maintaining an overall theme within the area in which the proposed development is located.

C. Architectural Theme and Guidelines:

In conjunction with establishing a D District in any area, the Board of Supervisors shall adopt an architectural theme and guidelines for development in the D District.

D. Absence of Architectural Theme and Guidelines:

Where the Board of Supervisors has not yet adopted an architectural theme and guidelines pursuant to Section 7170.13.C for an area located in the D District, development within such area is exempt from the requirements of this article.

ARTICLE 7175

AIRPORT APPROACH HEIGHT (H) COMBINING DISTRICT

SECTIONS:

7175.01 PURPOSE AND APPLICATION
7175.02 PERMITTED USES
7175.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT
7175.04 PROHIBITED USES
7175.05 MINIMUM LOT SIZE
7175.06 MINIMUM LOT AREA PER DWELLING UNIT
7175.07 YARDS AND SETBACKS
7175.08 HEIGHT LIMITS
7175.09 MINIMUM DISTANCE BETWEEN STRUCTURES
7175.10 PARKING
7175.11 SIGNS
7175.12 LANDSCAPING
7175.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

SECTION 7175.01 PURPOSE AND APPLICATION

The purpose of the Airport Approach Height (H) Combining District is to minimize aviation hazards by limiting the height of buildings, structures, trees, and plants in approach zones around airports. The H District may be applied to areas within the vicinity of any public or general use airport. The standards established by the H District shall be in addition to the regulations of the base district with which the H District is combined.

SECTION 7175.02 PERMITTED USES

Uses permitted by the base district with which the H District is combined.

SECTION 7175.03 USES PERMITTED WITH A CONDITIONAL USE PERMIT

Conditional uses permitted by the base district with which the H District is combined.

SECTION 7175.04 PROHIBITED USES

Uses prohibited by the base district with which the H District is combined.

SECTION 7175.05 MINIMUM LOT SIZE

Per the requirements of the base district with which the H District is combined.

SECTION 7175.06 MINIMUM LOT AREA PER DWELLING UNIT

Per the requirements of the base district with which the H District is combined.

SECTION 7175.07 YARDS AND SETBACKS

Per the requirements of the base district with which the H District is combined.

SECTION 7175.08 HEIGHT LIMITS

No building, structure, plant, or tree shall exceed thirty-five (35) feet in height, except as may be approved pursuant to Section 7175.13. However, in no case shall the height exceed the height allowed by the base zone with which the H Combining District combined.

SECTION 7175.09 MINIMUM DISTANCE BETWEEN STRUCTURES

Per the requirements of the base district with which the H District is combined.

SECTION 7175.10 PARKING

Per the requirements of the base district with which the H District is combined.

SECTION 7175.11 SIGNS

Per the requirements of the base district with which the H District is combined.

SECTION 7175.12 LANDSCAPING

Per the requirements of the base district with which the H District is combined.

SECTION 7175.13 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

No building, structure, plant, or tree shall exceed thirty-five (35) feet in height until an application for site development plan review has been submitted to and approved by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.02 of this chapter. In no case shall height limitations be less restrictive than the requirement of Part 77 of the Federal Aviation Regulations of the Federal Aviation Administration, Department of Transportation, or any corresponding rules or regulations of the Federal Aviation Administration, as amended.

A. Application Contents:

An application for site development plan review shall include the following:

1. Name and address of applicant

2. Name(s) and address(es) of the property owner(s)

3. Assessor's parcel number(s)

4. Legal description of the property

5. A letter from the Federal Aviation Administration which shall state that the proposed development does not constitute a hazard to air traffic and does not violate any federal regulations. The letter shall also include any special conditions imposed by the Federal Aviation Administration.

6. A plot plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

   a. Topography and proposed grading

   b. Proposed private access drives and parking areas

   c. Location of all permanent buildings and structures

   d. Park, open space, and recreation areas

   e. Proposed landscaping

   f. North arrow

7. Elevations of all permanent common buildings

ARTICLE 7190

INTERIM DISTRICTS

SECTIONS:

7190.01 PURPOSE AND APPLICATION
7190.02 AUTOMOBILE PARKING (P) DISTRICT

SECTION 7190.01 PURPOSE AND APPLICATION

Interim Districts are those zoning districts that have been determined by the Board of Supervisors to be no longer necessary to effect the purposes of the Kern County Zoning Ordinance. The Interim Districts are to be replaced by new permanent zoning districts in accordance with the procedures set out in Article 7292 of this chapter. Until all land in the County designated in any Interim District is rezoned to another district, provisions for permitted uses, height, bulk, and space standards are regulated by the new standards established in this chapter. This article identifies the regulations under which use and development of land may occur in any Interim District.

SECTION 7190.02 AUTOMOBILE PARKING (P) DISTRICT

All development in the P District shall comply with the requirements and standards set out in Article 7220 of this chapter.

ARTICLE 7215

SPECIAL DEVELOPMENT STANDARDS

SECTIONS:

7215.01 PURPOSE AND APPLICATION
7215.02 DEVELOPMENT STANDARDS
7215.03 PLOT PLAN REVIEW AND APPROVAL

SECTION 7215.01 PURPOSE AND APPLICATION

The purpose of this article is to establish reasonable and necessary development standards for multi-family, commercial, industrial, institutional, and other similar uses to ensure that development subject to this Article includes appropriate public improvements and is compatible with surrounding uses. The development standards specified in this article shall apply to all multi-family development in the Medium-density Residential (R-2), High-density Residential (R-3), Commercial Office (CO), Neighborhood Commercial (C-1), General Commercial (C-2), Highway Commercial (CH), Light Industrial (M-1), Medium Industrial (M-2), and Heavy Industrial (M-3) Districts, except as provided in this article.

SECTION 7215.02 DEVELOPMENT STANDARDS

A. Multi-family Residential Districts

All multi-family residential development in the R-2 and R-3 Districts shall comply with the following standards:

1. Street and road dedications shall be made to the County, in a manner prescribed by the Kern County Public Works Department, for all existing or proposed local, secondary, and major highways. The required dedication shall be thirty (30) feet from the centerline of a local street, forty-five (45) feet from the centerline of a secondary highway, and fifty-five (55) feet from the centerline of a major highway, or as required by any adopted Official or Specific Plan Line.

2. All developments within the Bakersfield Designated Urban Area shall provide road or street improvements to Type A Subdivision Standards. Developments in all other areas shall provide road or street improvements to Type B Subdivision Standards. Street improvements shall include base and pavement tie to existing pavement.

3. Obstructions within street rights-of-way shall be removed as specified by the Kern County Subdivision Ordinance.

4. Curb, gutter, and sidewalk shall be constructed as required by the Kern County Subdivision Ordinance when required as part of street improvements.

5. All access drives, parking areas, and vehicle maneuvering areas shall be surfaced with a minimum of two (2) inches of asphaltic concrete paving or material of higher quality.

6. All new on-site utility services shall be placed underground.

7. Prior to the issuance of any building permits, a plan for the disposal of drainage waters originating on-site and from adjacent road rights-of-way shall be approved by the Kern County Department of Planning and Development Services, if required. Easements or grant deeds shall be given to the County of Kern for drainage purposes or access thereto, as necessary.

8. The method of water supply and sewage disposal shall be as required and approved by the Kern County Health Department.

9. Fire flows, fire protection facilities, and access ways shall be as required and approved by the Kern County Fire Department.

10. When adjacent to property zoned for single-family residential purposes, a six- (6-) foot-high solid masonry wall shall be constructed between the proposed development and the adjacent property. The wall height shall be reduced to four (4) feet within the required front-yard setback area. The design and materials proposed shall be approved by the Director of Planning and Development Services prior to construction of said wall.

11. When construction in excess of one (1) story is proposed adjacent to property zoned for single-family residential use, all windows above the first story and adjacent to the property zoned for single-family residential use shall contain glass that is opaque or translucent or shall be screened in a manner as approved by the Director of Planning and Development Services.

12. All exterior lighting shall be directed away from adjacent properties.

13. All trash receptacles shall be screened so that they are not visually obtrusive from any off-site location. The location and method of screening for all trash receptacles shall be approved by the Director of Planning and Development Services.

14. Architectural design of all proposed buildings shall be compatible with the surrounding neighborhood.

15. For developments with ten (10) or more dwelling units, a minimum of five (5) percent of the net lot area shall be designated and developed as common usable open space, provided, however, no less

than four hundred (400) square feet of common usable open space shall be provided. The required common usable open space area may be divided into more than one location, provided that no single location shall contain less than four hundred (400) square feet. No buildings or structures shall occupy areas designated for common usable open space except buildings or structures designed exclusively for recreational purposes. Parking and manuevering areas shall not be utilized for the required common usable open space.

16. The Director of Planning and Development Services may waive any of the above-listed requirements where a documented hardship, not involving economics, exists or where there are unusual circumstances that prevent compliance with any of the required development standards. Additionally, street improvements and construction of curb, gutter, and sidewalks will not be required for individual or cumulative additions constituting less than twenty-five (25) percent expansion of development existing on the effective date of this article.

17. Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

18. Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

19. Signs may be provided as specified by the applicable zoning district regulation and Article 7225 of this chapter.

20. During all on-site grading and construction activities, adequate measures shall be implemented to control fugitive dust.

B. Commercial and Industrial Districts

All development in the CO, C-1, C-2, CH, M-1, M-2, and M-3 Districts shall comply with the following standards:

1. Street and road dedications shall be made to the County, in a manner prescribed by the Kern County Public Works Department, for all existing or proposed local, secondary, and major highways. The required dedication shall be thirty (30) feet from the centerline of a local street, forty-five (45) feet from the centerline of a secondary highway, and fifty-five (55) feet from the centerline of a major highway, or as required by any adopted Official or Specific Plan Line.

2. All developments within the Bakersfield Designated Urban Area shall provide road or street improvements to Type A Subdivision Standards. Developments in all other areas shall provide road or street improvements to Type B Subdivision Standards. Street improvements shall include base and pavement tie to existing pavement.

3. Obstructions within street rights-of-way shall be removed as specified by the Kern County Subdivision Ordinance.

4. Curb, gutter, and sidewalk shall be constructed as required by the Kern County Subdivision Ordinance when required as part of street improvements.

5. All access drives, parking areas, and vehicle manuevering areas shall be surfaced with a minimum of two (2) inches of asphaltic concrete paving or material of higher quality.

6. All new on-site utility services shall be placed underground.

7. Prior to the issuance of any building permits, a plan for the disposal of drainage waters originating on-site and from adjacent road rights-of-way shall be approved by the Kern County Department of Planning and Development Services, if required. Easements or grant deeds shall be given to the County of Kern for drainage purposes or access thereto, as necessary.

8. The method of water supply and sewage disposal shall be as required and approved by the Kern County Health Department.

9. Fire flows, fire protection facilities, access ways, and safety setbacks shall be as required and approved by the Kern County Fire Department.

10. When adjacent to property zoned for single-family residential purposes, a six- (6-) foot-high solid masonry wall shall be constructed between the proposed development and the adjacent property. The wall height shall be reduced to four (4) feet within the required front-yard setback area. The design and materials proposed shall be approved by the Director of Planning and Development Services prior to construction of said wall.

11. All exterior lighting shall be directed away from adjacent properties.

12. All trash receptacles shall be screened in such a manner so that they are not visually obtrusive from any off-site location. The location and method of screening for all trash receptacles shall be approved by the Director of Planning and Development Services.

13. Architectural design of all proposed buildings shall be compatible with the surrounding neighborhood.

14. For industrial developments utilizing outside storage, the areas devoted to outside storage shall be treated with a dust binder or other dust control measure, as approved by the Director of Planning and Development Services. Screening, if required by the base district regulations, shall also be provided.

15. The Director of Planning and Development Services may waive any of the above-listed requirements where a documented hardship, not involving economics, exists or where there are unusual circumstances that prevent compliance with any of the required development standards. Additionally, street improvements and construction of curb, gutter, and sidewalks will not be required for individual or cumulative additions constituting less than twenty-five (25) percent expansion of development existing on the effective date of this article.

16. Off-street parking shall be provided in accordance with the requirements of Article 7220 of this chapter.

17. Landscaping shall be provided in accordance with the requirements of Article 7230 of this chapter.

18. Signs may be provided as specified by the applicable zoning district regulations and Article 7225 of this chapter.

19. During all on-site grading and construction activities, adequate measures shall be implemented to control fugitive dust.

SECTION 7215.03 PLOT PLAN REVIEW AND APPROVAL

Except as provided in this section, no permitted use shall be established, no permitted development shall occur, and no building permit or grading permit shall be issued for any permitted use or development subject to this article until an application for plot plan review has been submitted to and approved by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.02 of this chapter.

A. Application Contents:

An application for plot plan review shall include the following:

1. Name and address of applicant

2. Name(s) and address(es) of property owner(s)

3. Assessor's parcel number(s)

4. Legal description of the property

5. A plot plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

   a. Topography and proposed grading

   b. Location of all existing buildings and structures

   c. Location of all proposed buildings and structures

d. Proposed vehicular circulation and parking areas

e. Kern County Fire Department approval for all access ways and safety setbacks

f. Proposed landscaping

g. North arrow

6. Elevations of proposed buildings and structures

7. Phasing or development schedule

8. A detailed description of facility improvements, including:

a. Curb, gutter, sidewalks, and street improvements

b. Water supply system

c. Sewage collection and disposal system

d. Public utilities

e. Fencing

f. Trash enclosures and method of screening

B. Review and Approval:

The plot plan application required by this article shall be reviewed and approved in accordance with procedures set out in Section 7284.02 of this chapter. No application for plot plan review shall be required where a use is allowed subject to securing a conditional use permit or precise development plan.

C. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

ARTICLE 7220

OFF-STREET PARKING

SECTIONS:

7220.01 PURPOSE AND APPLICATION
7220.02 REQUIRED PARKING SPACES
7220.03 PARKING SPACE DIMENSIONS
7220.04 COMPACT CAR PARKING
7220.05 HANDICAPPED PARKING
7220.06 OFF-STREET LOADING SPACES
7220.07 LOCATION OF PARKING
7220.08 JOINT USE OF PARKING AREAS
7220.09 PARKING AREA DESIGN AND DEVELOPMENT STANDARDS
7220.10 OFF-STREET PARKING PLOT PLAN REVIEW AND APPROVAL

SECTION 7220.01 PURPOSE AND APPLICATION

The purpose of this article is to reduce street congestion and promote the safety and convenience of the residents of Kern County by requiring the provision of adequate and well-designed parking in connection with the land uses authorized by this chapter. Parking required by this article shall be provided at the time any main building or structure is erected or enlarged, or use is established, changed, or expanded. Development involving individual or cumulative expansion constituting fifty (50) percent or more of the development existing on the effective date of this article shall comply with the off-street parking requirements of this article for both the existing and new development, except that existing parking facilities shall be exempt from the landscaping requirements. The standards in this article are minimum standards.

SECTION 7220.02 REQUIRED PARKING SPACES

Uses permitted by this chapter shall provide off-street parking spaces according to the following schedule:

A. Residential Uses:

1. Single-family dwelling, duplex, triplex, quadruplex, multi-family dwelling, condominium, mobilehome (not in a mobilehome park), or secondary residential unit: Two (2) per dwelling unit

2. Boarding house, rooming house, residential hotel, fraternity or sorority house, or dormitory: One (1) per bedroom

3. Mobilehome park: Two (2) per mobilehome located on the mobilehome space plus one (1) guest space per four (4) mobilehome spaces in the park

4. Retirement or rest home: One (1) per four (4) resident beds

B. Recreation, Entertainment, and Tourist Facilities:

1. Bowling alley: Four (4) per lane

2. Dance hall, ballroom, or discotheque: One (1) per thirty (30) square feet of gross building area

3. Country club: Combination of the required spaces for the various uses included in the country club

4. Equestrian establishment: One (1) per three (3) horses or stalls, whichever results in the greater number of parking spaces

5. Hotel or Motel: One (1) per room plus two (2) for the manager's quarters and one (1) per full-time staff member

6. Golf course: Three (3) per hole

7. Golf driving range: One (1) per tee

8. Miniature golf course: Two (2) per hole

9. Movie theater: One (1) per three (3) seats

10. Pool and billiard parlor: Two (2) per pool or billiard table

11. Shooting range or gun club: One (1) per shooter station

12. Swimming pool: One (1) per one hundred (100) square feet of pool and deck area plus bicycle parking racks containing a minimum of ten (10) spaces

13. Sports arena: One (1) per three and one-half (3 1/2) seats

14. Tennis club, health club: One (1) per one hundred (100) square feet of open indoor recreational area plus two (2) per tennis or racquetball court

15. Video games arcade: One (1) per one hundred (100) square feet of gross building area plus bicycle parking racks containing a minimum of ten (10) spaces

C. Offices:

1. Business or professional office: One (1) per two hundred and fifty (250) square feet of gross building area

2. Financial institution, including bank, savings and loan, or credit union: One (1) per two hundred (200) square feet of gross building area

3. Medical or dental office, veterinary office, clinic: One (1) per two hundred (200) square feet of gross building area

D. General Retail Sales:

1. General retail: One (1) per two hundred and fifty (250) square feet of gross building area

2. Furniture store: One (1) per five hundred (500) square feet of gross building area

3. Nursery, retail: One (1) per two hundred and fifty (250) square feet of indoor display area plus one (1) per two thousand (2,000) square feet of outdoor sales area

4. Auto sales: One (1) per one thousand (1,000) square feet of sales area plus one (1) per two hundred and fifty (250) square feet of office area

5. Heavy equipment or truck sales: One (1) per two thousand (2,000) square feet of sales area plus one (1) per two hundred and fifty (250) square feet of office area

6. Restaurant, cafe, or coffee shop: One (1) per one hundred (100) square feet of gross building area

7. Restaurant, fast food: One (1) per seventy-five (75) square feet of gross building area

8. Bar, tavern, or cocktail lounge: One (1) per seventy-five (75) square feet of gross building area

E. Services:

1. Auto repair, tire sales and service: One (1) per three hundred (300) square feet of gross building area

2. Auto service station: One (1) per three hundred (300) square feet of gross building area

3. Barber or beauty shop: One (1) per one hundred (100) square feet of gross building area

4. Equipment rental: One (1) per one thousand (1,000) square feet of display area or storage area plus one (1) per two hundred and fifty (250) square feet of office area

5. Laundromat, self-service: One (1) per three (3) washing machines

6. Mortuary or funeral parlor: One (1) per three and one-half (3 1/2) seats

F. Industrial Uses:

1. Manufacturing or assembly: One (1) per five hundred (500) square feet of floor area plus one (1) per two hundred and fifty (250) square feet of office area

2. Contractor storage yard: One (1) per three thousand (3,000) square feet of lot area

3. Warehouse or wholesale distribution: One (1) per one thousand (1,000) square feet of storage area plus one (1) per two hundred and fifty (250) square feet of office area

G. Institutional Uses:

1. Cemetery: One (1) per three and one-half (3 1/2) seats in the chapel plus one (1) per two hundred and fifty (250) square feet of office space

2. Church: One (1) per three and one-half (3 1/2) seats

3. Auditorium: One (1) per three and one-half (3 1/2) seats

4. Convalescent hospital or sanitarium: One (1) per four (4) patient beds

5. Hospital: One (1) per two (2) patient beds

H. Educational Institutions and Schools:

1. Preschool: One (1) per six (6) students for which the facility is licensed plus one (1) per employee

2. Elementary and junior high school: One (1) per employee plus one (1) per twenty (20) students at full enrollment

3. High school: One (1) per employee plus one (1) per eight (8) students at full enrollment

4. College, business school, trade school: One (1) per employee plus one (1) per two (2) students at full enrollment

I. Miscellaneous Uses

1. Child care center: One (1) per six (6) children for which the facility is licensed plus one (1) per employee

J. Where the calculation of parking needs results in the requirement for a fraction of a parking space, the additional parking space shall be provided.

K. Floor area shall mean gross floor area unless otherwise specified.

L. Where a proposed use is not listed in this section, the Director of Planning and Development Services shall determine parking needs based on the listed use which most nearly resembles the proposed use.

M. Where parking requirements are based on the number of seats, eighteen (18) inches of pew or bench seating shall be equivalent to one (1) seat.

N. Where no fixed seating is provided, seven (7) square feet of floor space shall be equivalent to one (1) seat.

SECTION 7220.03 PARKING SPACE DIMENSIONS

All parking spaces shall be at least nine (9) feet by twenty (20) feet, except that:

A. Compact automobile parking spaces shall be at least eight (8) feet by eighteen (18) feet.

B. Handicapped automobile parking spaces shall comply with the requirements of Chapter 2-71 of Title 24 of the California Administrative Code.

SECTION 7220.04 COMPACT CAR PARKING

Up to twenty (20) percent of the spaces in a parking facility with ten (10) or more spaces may be designed and designated for compact cars.

SECTION 7220.05 HANDICAPPED PARKING

A. Parking spaces for the handicapped shall be provided and designed in accordance with the requirements of Chapter 2-71 of Title 24 of the California Administrative Code.

When less than five (5) total parking spaces are provided, one (1) of these spaces shall be fourteen (14) feet wide and lined to provide a nine- (9-) foot parking area and a five- (5-) foot loading and unloading area. However, there is no requirement that the space be reserved exclusively for handicapped use.

B. All handicapped parking spaces and access between the handicapped parking spaces and the primary entrances of associated buildings or facilities shall be surfaced in a manner to facilitate wheelchair use.

SECTION 7220.06 OFF-STREET LOADING SPACES

For every building or facility occupied by manufacturing, storage, warehouse, wholesale or retail store, market, passenger terminal, theater, hotel, motel, restaurant, hospital, laundry, dry cleaning plant, or other similar use requiring the receipt or distribution of vehicles or merchandise, adequate space for standing, loading, and unloading shall be provided and maintained on the same lot in addition to the automobile parking required by Section 7220.02.

SECTION 7220.07 LOCATION OF PARKING

Required residential off-street parking facilities shall be located on the premises they are intended to serve. Off-street parking for other than residential uses shall be located on the premises they are intended to serve or within five hundred (500) feet thereof. Where required parking is provided on a site other than that of the principal use, the property owner shall file with the Kern County Recorder's Office a covenant, on a form provided by the Kern County Department of Planning and Development Services and approved by the Director of Planning and Development Services, that provides for the maintenance of the parking facility as long as the associated principal use is maintained.

SECTION 7220.08 JOINT USE OF PARKING AREAS

If more than one use required to provide parking spaces in accordance with this article occupies the same building or premises, off-street parking shall be provided in an amount equal to the total number of spaces required for the separate uses, provided, however, that upon written request the Director of Planning and Development Services can reduce the number of spaces required in such cases by up to twenty (20) percent if he/she determines that it is unlikely the combination of uses in the same building or premises will at periods of peak use not necessitate provision of the number of parking spaces that would be required if the uses were developed independently.

SECTION 7220.09 PARKING AREA DESIGN AND DEVELOPMENT STANDARDS

Off-street parking areas required to be provided by this article shall be designed and developed in accordance with the following standards:

A. All off-street parking areas and ingress and egress to parking areas shall be surfaced with the following materials:

   1. For all residential, recreation, entertainment and tourist facilities, commercial, industrial, institutional, and other high intensity uses in the Bakersfield Designated Urban Area, parking areas shall be surfaced with one of the following materials on a prepared base:

a. Two (2) inches of asphaltic concrete

b. Three and one-half (3 1/2) inches of Portland Cement concrete

2. For all other uses in the Bakersfield Designated Urban Area and, except as specified by Article 7215, for all uses in any other area, the required parking areas shall be surfaced with one of the following materials:

a. Three (3) inches of bituminous road mix

b. Two (2) inches of asphaltic concrete

c. Three and one-half (3 1/2) inches of Portland Cement concrete

d. Three (3) inches of decomposed granite

e. Three (3) inches of compacted rock dust

f. Three (3) inches of gravel

3. Driveways serving single-family residential dwellings are exempt from the paving requirements specified in Sections 7220.09.A.1 and 7220.09.A.2 if greater than 100 feet in length. The required parking area is still subject to the aforementioned paving provisions.

4. In the case of uses subject to discretionary approval, the required parking areas shall be surfaced with the materials specified in accordance with the conditions of approval.

B. Parking aisles shall comply with the following minimum standards (see Figures 220A, 220B, 220C, and 220D):

Arrangement	Minimum Aisle Width
30 degree, single row	11 feet
45 degree, single or multiple row	14 feet
60 degree, single or multiple row	18 feet
90 degree, single or multiple row	25 feet, except where parking is perpendicular to and abuts an alley

C. All parking spaces shall be clearly marked.

D. Off-street parking facilities shall be designed so that each space can function independently of any other parking space.

E. Driveways for residential developments shall be a minimum of fourteen (14) feet (includes three- (3-) foot taper on each side) in width with fifteen (15) feet of unobstructed vertical clearance. Driveways for commercial and industrial developments shall be a minimum of eighteen

(18) feet (includes three- (3-) foot taper on each side) in width with fifteen (15) feet of unobstructed vertical clearance. These requirements may be reduced by the Director of Planning and Development Services upon recommendation of the Kern County Fire Chief.

F. Parking spaces requiring backing into a street or road right-of-way are prohibited, except in the case of driveways for lots containing only one (1) single-family dwelling.

G. In no case shall any parking be located within an existing right-of-way, proposed secondary or major highway, or within an adopted Official or Specific Plan Line and, except in the case of lots containing only one (1) single-family dwelling or mobilehome and lots zoned for commercial and industrial purposes, off-street parking may not be located in a required front-yard or required side-yard setback abutting a street.

H. Where a parking facility containing five (5) or more spaces abuts property zoned E, R-1, R-2, or R-3, the parking facility shall be separated from the abutting property by a solid masonry wall six (6) feet in height, except that from the front property line to a depth equal to the required front yard on the abutting residentially zoned property, the wall shall be four (4) feet in height.

I. For all parking lots containing ten (10) or more spaces, at least five (5) percent of the total interior area devoted to parking shall be landscaped. Trees shall be planted and maintained throughout the parking area at a minimum ratio of one (1) tree per ten (10) parking spaces. Minimum tree size shall be fifteen (15) gallon container. Landscaping materials and trees shall be selected from a list of approved plants maintained by the Department of Planning and Development Services. An irrigation system adequate for the maintenance of the landscaping shall be installed.

J. Where a parking facility containing five (5) or more spaces includes diagonal or perpendicular parking spaces that abut a public street or road, an ornamental fence, wall, or evergreen hedge of not more than four (4) feet in height shall be erected between the parking facility and the street or road to eliminate headlight glare. (See Figure 220E)

K. Lights used to illuminate parking area shall be directed away from any adjacent properties and streets.

SECTION 7220.10 OFF-STREET PARKING PLOT PLAN REVIEW AND APPROVAL

No use shall be established or changed, no development shall occur or be expanded, and no building or grading permit or business license for any use or development shall be issued until an application for plot plan review has been submitted to and approved by the Director of Planning and Development Services.

A. Application Contents:

1. Name and address of the applicant

2. Name(s) and address(es) of the property owner(s)

3. Assessor's parcel number(s)

4. Legal description of the property

5. A plot plan drawn at the scale specified by the Director of Planning and Development Services, including the following:

   a. Topography and proposed grading

   b. Location of existing buildings and structures where such buildings and structures are to remain

   c. Location of proposed buildings and structures

   d. Proposed uses of all buildings or structures

   e. Dimensions of the existing and proposed buildings or structures or other information (e.g., seating capacity) of the proposed buildings allowing the Director of Planning and Development Services to determine parking needs in accordance with the requirements set out in Section 7220.02 .

   f. Layout of proposed parking lot, including location of parking spaces, internal circulation pattern, and ingress and egress points

   g. Dimensions of parking stalls and aisles

   h. Location of landscaping and irrigation system, including identification of plant materials to be used

   i. Location of lighting

   j. North arrow

B. Review and Approval:

1. Where a discretionary or ministerial approval is required for the use or uses for which the parking is being provided, the off-street parking plot plan application shall be reviewed and approved in conjunction with that discretionary or ministerial approval process.

2. Where no discretionary or other ministerial approval is required for the use or uses for which parking is being provided, the off-street parking plot plan application shall be reviewed and approved in accordance with the standards and procedures set out in Section 7284.02 of this chapter.

C. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

SIGNS

SECTIONS:

7225.01 PURPOSE AND APPLICATION
7225.02 SIGN DESIGN AND DEVELOPMENT STANDARDS
7225.03 EXEMPT SIGNS
7225.04 PROHIBITED SIGNS
7225.05 COMPUTATION OF AREA
7225.06 SPECIAL SIGN PROVISIONS
7225.07 NONCONFORMING SIGNS

SECTION 7225.01 PURPOSE AND APPLICATION

The purpose of this article is to promote the orderly and attractive construction, placement, and display of signs throughout the County. It is the policy of the County that the primary purpose of signs are identification and public information. Signs that cause distraction and represent potential safety hazards as well as aesthetic problems are either discouraged or prohibited. These general provisions serve as specific development standards to be applied in addition to the basic sign provisions within each zoning district.

SECTION 7225.02 SIGN DESIGN AND DEVELOPMENT STANDARDS

A. Monument Signs:

Freestanding monument signs shall comply with the following standards:

1. No monument sign shall be located within any existing or designated future road right-of-way line.

2. The maximum height of the monument sign shall be six (6) feet.

3. Monument signs shall be a minimum of ten (10) feet from any common property line and shall be a minimum of twenty (20) feet apart.

4. Lighting of monument signs shall be arranged so as not to produce a glare on other properties in the vicinity.

B. Pole Signs:

Freestanding pole signs shall comply with the following standards:

1. The maximum area of a pole sign shall not exceed two hundred (200) square feet per side.

2. Pole signs shall be located so that no part of the sign extends into any existing or proposed street right-of-way line.

3. The maximum height of a pole sign shall be twenty-four (24) feet.

4. Pole signs shall be a minimum of ten (10) feet from common property lines and shall be a minimum of twenty (20) feet apart.

5. Lighting of pole signs shall be arranged so as not to produce a glare on other properties in the vicinity.

C. Signs Attached to Buildings:

Signs attached to a building or wall shall comply with the following standards:

1. All signs attached to a building shall be attached flat against the building and parallel thereto and shall not extend more than eighteen (18) inches from the wall of the building. For the purpose of this subsection, a wall is a surface not less than sixty (60) degrees from the horizontal. Exceptions to this provision are as follows:

   a. Signs may be attached to a building providing that the sign does not exceed four (4) feet in height and that the sign does not project above the peak of the roof of the building.

   b. Signs may be mounted below the soffit of a canopy, overhang, or porch and may be perpendicular to the building providing that they do not exceed twelve (12) inches below the soffit or beam and maintain a minimum of seven (7) feet vertical clearance along corridors or exit courts below.

2. Lighting of signs attached to buildings shall be arranged so as not to produce a glare on other properties in the vicinity, and the source of light shall not be visible from adjacent property or a public street.

3. Sign copy which is applied on the building in such a manner that no background is distinguishable from the overall architectural motif of the building shall be counted at seventy-five (75) percent of the area within straight lines enclosing the copy. All other signs shall be computed at one hundred (100) percent. (See Figure 225A)

D. Off-site Advertising Signs:

Off-site advertising signs shall comply with the following standards:

1. The total area of any side of any off-site advertising sign shall not exceed seven hundred (700) square feet nor shall the sign exceed the length of fifty (50) feet. In no case shall the square footage exceed the amount specified by the sign regulation of the zoning district in which the sign is to be located.

2. Each off-site advertising sign shall be located not less than five hundred and (500) feet from any other off-site advertising sign located on the same side of the street or highway. No off-site advertising sign shall be located within one thousand three hundred and twenty (1,320) feet of the business or activity which it advertises. No off-site advertising may be located closer than twenty-five (25) feet from any other type of sign.

3. No part of an off-site advertising sign shall be located within an existing or proposed street right-of-way.

4. The maximum height for off-site advertising signs shall be twenty-four (24) feet.

5. Lighting of off-site advertising signs shall be arranged so as not to produce a glare on other properties in the vicinity, and the source of light shall not be visible from adjacent property or a public street.

E. Temporary Real Estate Signs:

Temporary real estate signs advertising the particular property on which the sign is located shall comply with the following standards:

1. Not more than one (1) temporary real estate sign shall be placed on the lot, provided, however, that an auxiliary rider sign shall be allowed if attached to the same sign support, and further provided that where the lot is bounded by more than one (1) street, one (1) sign with an auxiliary rider sign shall be allowed along each adjacent street frontage.

2. Temporary real estate signs shall not be illuminated.

3. Temporary real estate signs shall be a minimum of ten (10) feet from any street right-of-way and property line.

4. If attached to a building, the temporary real estate sign shall not extend above the roof line or parapet wall of the building. If freestanding, the sign shall not exceed eight (8) feet in height.

5. This subsection shall not restrict the number or size of temporary real estate signs erected out-of-doors within courtyard or mall spaces below the height of the enclosed buildings within the buildable area of the lot, provided that the signs are not visible from a public street or adjoining property.

6. Notwithstanding the prohibition in Section 7225.02.D, portable, temporary off-site directional real estate signs may be used in conjunction with open house real estate sales activity provided that each portable directional sign does not exceed an overall size of nine (9) square feet, including support, does not exceed a height of two and one-half (2 1/2) feet, and is not located within a road or street right-of-way. Signs shall be on display only when property is open for inspection.

7. Real estate signs shall be removed within ten (10) days after sale of the property or immediately upon being leased.

F. Temporary Subdivision Signs:

1. Temporary directional subdivision signs shall comply with the following standards:

   a. The signs shall be located at primary streets providing directions to the subdivision.

   b. Each sign shall not exceed four (4) feet in height and not exceed twenty-four (24) square feet in area.

2. On-site subdivision signs shall comply with the following standards:

   a. The signs shall be located at the primary entrance to the subdivision or at the model homes.

   b. Each sign shall not exceed six (6) feet in height and shall not exceed thirty-two (32) square feet in area.

G. Permanent Subdivision Area Identification Signs:

Permanent identification signs, including signs identifying a subdivision, mobilehome park, apartments, townhouses, condominiums, or any other residential project, shall comply with the following standards:

1. Permanent subdivision identification signs may be either attached to an entrance fence or structure or be a monument sign. The sign shall not exceed four (4) feet in height or thirty (30) square feet in size and shall be located in a maintained landscaped area on a parcel within the subdivision at a primary entrance.

2. The sign shall not be illuminated except for low silhouette spotlighting that does not create glare on other properties in the vicinity.

3. The design and materials of the sign shall be approved by the Director of Planning and Development Services.

H. Temporary Construction Signs:

Where a building is under construction, temporary signs may be erected to identify the project owner, architect, landscape architect, contractor, builder, proposed business, or lender, provided they comply with the following standards:

1. There shall be no more than one (1) such temporary construction sign per project.

2. The sign shall not exceed thirty-two (32) square feet in area.

3. The sign shall not be illuminated.

4. If attached to the building, the sign shall not extend above the roof line or parapet wall of the building. If freestanding, the maximum height is six (6) feet.

5. The sign shall be stationary.

6. The sign shall be removed at the time of final inspection of the job.

I. Temporary Political, Religious, and Civic Campaign Signs:

Temporary political, religious, and civic campaign signs may be erected for a period not to exceed ninety (90) days and shall comply with the following standards:

1. The signs shall be removed within fifteen (15) days following the conclusion of the campaign.

2. In residential districts, each sign shall not exceed six (6) square feet in area or a height of four (4) feet.

J. Agricultural Signs:

Agricultural signs advertising agricultural products raised or produced on the subject property may be erected in all agricultural zoning districts, provided they comply with the following standards:

1. There shall be no more than one (1) agricultural sign per legal lot.

2. The sign shall not exceed sixteen (16) square feet in area for parcels less than five (5) acres nor exceed twenty-four (24) square feet for parcels exceeding five (5) acres. The sign shall not exceed six (6) feet in height.

3. The sign shall be a minimum of ten (10) feet from any street right-of-way.

4. The sign shall not be illuminated.

5. The sign shall be stationary.

6. The sign shall not be an off-site sign.

K. Agricultural Industry Signs:

Signs identifying agricultural industries located on the subject property may be erected in all agricultural zoning districts, provided they comply with the following standards:

1. There shall be no more than two (2) agricultural industrial signs per legal lot.

2. Each sign shall not exceed forty-eight (48) square feet in area nor fifteen (15) feet in height.

3. The sign shall be a minimum of ten (10) feet from the street or road right-of-way.

4. The sign shall not be illuminated.

5. The sign shall be stationary.

6. The sign shall not be an off-site sign.

L. Institutional Identification Signs:

Signs identifying churches, public and private schools, colleges, hospitals, universities, or fraternal, benevolent, and social service organizations located on the same property shall comply with the following standards, except that when such institutions are located in a commercial zoning district, the sign regulations applicable to signs in the commercial district shall govern:

1. There shall be no more than two (2) institutional identification signs per each street frontage, not to exceed a total of six (6) such signs on a lot.

2. Each sign shall not exceed forty-eight (48) square feet in area.

3. Lighting of institutional identification signs shall be indirect and nonflashing and shall not produce glare on other properties in the vicinity.

4. The signs shall not extend into any existing or proposed road or street right-of-way.

5. Freestanding signs shall not exceed six (6) feet in height. Signs attached to buildings shall not extend above the roof line or parapet wall of the building.

6. All signs shall be stationary.

7. Generally recognized and acceptable religious symbols that are freestanding or are attached to or part of a church (or attached to or part of a freestanding sign) may be exempted by the Director of Planning and Development Services from the provisions herein regarding height, area, and number of signs.

SECTION 7225.03 EXEMPT SIGNS

The following signs, except as provided elsewhere in this chapter, are exempt from the provisions of this chapter:

A. Approved highway directional signs

B. Railroad signal signs

C. Signs prohibiting trespassing and hunting, provided that they do not exceed two (2) square feet in area

D. Warning signs required by law or erected by public agencies

E. Utility company signs identifying cables, conduits, or hazards

F. Public notices and announcements authorized by courts and public officials

G. Advertising signs on buses and taxis

H. Signs attached to bus stops and shelters

I. Signs on automobiles and trucks that are painted on or attached flat against the vehicle to identify or advertise the associated business, provided that the vehicle is primarily used for the business and is parked on private property as a normal function

J. Window display signs limited to painted signs on glazing, poster paper signs, and placards attached to the inside of glazing of store fronts, provided that the store front glazing is not covered in excess of fifty (50) percent

K. Signs that are painted on or attached to the windshield of a vehicle or boat, properly located for display

L. Public telephone identification

M. Signs of an instructive nature or which include information required by County, State or federal enforcement agencies including: telephone booth, gas pump use instructions, instructions for recreational vehicle dump station, brake and smog certification, restroom identification, no smoking, propane tank identification, gas pump identification, air and

water, drive to forward pump, cashier, hours of operation, required gallon to liter conversion, full- and self-service signs at each island not exceeding four (4) square feet in area, and traffic directional signs as approved by enforcement agencies for necessary traffic control and direction provided that they do not exceed four (4) square feet in area each and do not exceed thirty (30) inches in height in front or side street yard and no symbol, name, or other message is on said signs

N. Signs erected inside enclosed malls

O. Signs erected out-of-doors within courtyards and mall spaces (below the height of enclosed buildings) within the buildable portion of the lot where signs are not visible from a public street or adjacent parcel.

P. Directional, warning, or identification signs for petroleum drilling and extraction activities not exceeding two (2) square feet in area

Q. Residential name and address signs not exceeding two (2) square feet in area

SECTION 7225.04 PROHIBITED SIGNS

The following signs are prohibited in all zoning districts:

A. Moving or rotating signs

B. Signs with flashing, moving, or animated illumination except as specified in Section 7225.06.A

C. Any sign displaying any obscene, indecent, or immoral matter

D. Advertising signs that include the words, "Stop, Look, Listen" or any other word, phrase, symbol, lights, motion, sound, fumes, mist, or other effluent that may interfere with, mislead, or confuse the driving public

E. Portable signs, except for temporary real estate signs as provided in Section 7225.02.E

F. Signs on inflatable advertising devices when the device is attached or secured to the ground

G. Signs extending above roofs and roof signs, except where specifically provided for under the provisions of this chapter for signs attached to buildings

H. Signs projecting from buildings, except where specifically provided for

I. Wind activated signs

J. Any other advertising device attached to a building, fence, pole, or vehicle on display not specifically authorized by this chapter

SECTION 7225.05 COMPUTATION OF AREA

The following methods will be used to compute the area of sign copy:

A. The area of a monument or pole sign is to be computed by multiplying the total height by the total length of the sign or signs for one-sided signs, excluding framework of separate single wood post or masonry column and single wood or masonry beam. The base of a monument sign shall not be considered part of the sign when constructed of wood or masonry. (See Figures 225B and 225C)

B. Where a two-sided monument or pole sign contains identical copy on each side, the area of the sign shall be computed by multiplying the total height by the total length of only one side. (See Figures 225B and 225C)

C. The area of a freestanding sign which has three or more faces shall be computed by adding the areas of each face of the sign.

D. The area of a freestanding sign that is an object or statuary shall be computed by the appropriate mathematical equation for determining total surface of an object.

SECTION 7225.06 SPECIAL SIGN PROVISIONS

A. Electronic time and temperature signs as part of an on-site advertising sign are permitted as regulated by development standards.

B. Exit, entrance, or other on-site traffic directional signs are permitted, provided that the signs do not exceed six (6) feet in height and contain no advertising or message other than for traffic directions.

C. Illuminated signs in store front window glazing visible from a public street shall be considered signs and shall comply with the requirements of this article.

D. Special signing required for drive-in windows for drive-in restaurants, banks, or similar businesses are permitted provided the sign copy is necessary for information, instruction, or directions and specifically related to the special use subject to review and approval of the Director of Planning and Development Services who shall use discretion in approval of subject signs related to number, location, height, size, and design.

SECTION 7225.07 NONCONFORMING SIGNS

Nonconforming signs shall be subject to the requirements of Section 7296.07 of this chapter.

ARTICLE 7230

LANDSCAPING

SECTIONS:

7230.01 PURPOSE AND APPLICATION
7230.02 LANDSCAPING STANDARDS
7230.03 LANDSCAPE PLOT PLAN REVIEW AND APPROVAL

SECTION 7230.01 PURPOSE AND APPLICATION

The purpose of this article is to ensure that development is aesthetically pleasing and compatible with surrounding development by requiring the provision of adequate landscaping in connection with new development and the expansion of existing developments and changes in uses.

SECTION 7230.02 LANDSCAPING STANDARDS

Landscaping shall be provided in accordance with the following minimum standards, except as may be modified in connection with the approval of a discretionary development permit:

A. Multi-family Developments:

1. A minimum of ten (10) percent of the total developed lot area shall be landscaped.

2. Front-yard and street-side side-yard setback areas, excluding approved driveway entrances, maneuvering areas, and public sidewalks, shall be landscaped. Within this area, trees shall be planted no farther than fifty (50) feet apart and no closer than five (5) feet from the back of the sidewalks. No plant material that will grow to a height of more than eighteen (18) inches shall be planted in the street right-of-way.

3. All interior open space areas shall be landscaped with live landscaping.

4. Additional planters and landscaped areas shall be provided in off-street parking areas in accordance with the requirements of Section 7220.09.I of this chapter.

5. Within each planter or landscaped area, an irrigation system and live landscaping shall be provided and maintained.

6. Required planter or landscaped areas may be combined with pedestrian walks and similar hard surface areas, provided that such hard surface areas do not cover more than ten (10) percent of any

required planter or landscaped area. Ornamental or landscaping rock and gravel areas, artificial turf, or other areas covered with other artificial materials shall be considered hard surface areas for the purposes of this provision.

7. Landscaping materials and trees installed in planters or landscaped areas shall be selected from a list of approved plants maintained by the Department of Planning and Development Services.

B. Mobilehome Parks:

1. A minimum of five (5) percent of the total developed lot area shall be landscaped.

2. Setback areas between streets and the perimeter fence of the mobilehome park, excluding approved driveway entrances and public sidewalks, shall be landscaped. Within this area, trees shall be planted no farther than fifty (50) feet apart and no closer than five (5) feet from the back of the sidewalks. No plant material that will grow to a height of more than eighteen (18) inches shall be planted in the street right-of-way.

3. Within the interior of the mobilehome park, at least one (1) tree per mobilehome space shall be planted.

4. Within each planter or landscaped area, an irrigation system and live landscaping shall be provided and maintained.

5. Required planter or landscaped areas may be combined with pedestrian walks and similar hard surface areas provided that such hard surface areas do not cover more than ten (10) percent of any required planter or landscaped area. Ornamental or landscaping rock and gravel areas, artificial turf, or other areas covered with other artificial materials shall be considered hard surface areas for the purposes of this provision.

6. Landscaped materials and trees installed in planters or landscaped areas shall be selected from a list of approved plants maintained by the Department of Planning and Development Services.

C. Commercial Developments; Recreation, Entertainment, and Tourist Facilities; and Institutional Uses:

1. A minimum of five (5) percent of the total developed lot area shall be landscaped.

2. Along any interior property line abutting residentially zoned lots, trees shall be planted at least every thirty (30) feet in individual planters. The planters shall be sufficiently large and protected so that a parked car does not extend into the minimum four- (4-) foot by four- (4-) foot tree planting area which shall be landscaped with ground cover, shrubs, or climbing plants.

3. Planters or landscaped areas shall be provided in off-street parking areas in accordance with the requirements of Section 7220.09.I of this chapter.

4. Within each planter or landscaped area, an irrigation system and live landscaping shall be provided and maintained.

5. Required planter or landscaped areas may be combined with pedestrian walks and similar hard surface areas provided that such hard surface area does not cover more than ten (10) percent of any required planter or landscaped area. Ornamental or landscaping rock and gravel areas, artificial turf, or other areas covered with other artificial materials shall be considered hard surface areas for the purposes of this provision.

6. Landscaping materials and trees installed in planters or landscaped areas shall be selected from a list of approved plants maintained by the Department of Planning and Development Services.

D. Industrial Uses:

1. A minimum of five (5) percent of the developed area shall be landscaped.

2. Along any interior property line abutting residentially zoned lots, trees shall be planted at least every thirty (30) feet in individual planters. The planters shall be sufficiently large and protected so that a parked car does not extend into the minimum four- (4-) foot by four- (4-) foot tree planting area which shall be landscaped with ground cover, shrubs, and climbing plants.

3. Planters or landscaped areas shall be provided in off-street parking areas in accordance with the requirements of Section 7220.09.I of this chapter.

4. Within each planter or landscaped area, an irrigation system and live landscaping shall be provided and maintained.

5. Required planter or landscaped areas may be combined with pedestrian walks and similar hard surface areas, provided that such hard surface area does not cover more than ten (10) percent of any required planter or landscaped area. Ornamental or landscaping rock and gravel areas, artificial turf, or other areas covered with other artificial materials shall be considered hard surface areas for the purposes of this provision.

6. Landscaping materials and trees installed in planters or landscaped areas shall be selected from a list of approved plants maintained by the Department of Planning and Development Services.

SECTION 7230.03 LANDSCAPE PLOT PLAN REVIEW AND APPROVAL

No landscaping or irrigation system required to be provided by this article shall be installed until a landscape plot plan has been submitted to and approved by the Director of Planning and Development Services.

A. Application Contents:

An application for plot plan review shall include the following:

1. Name and address of the applicant

2. Name(s) and address(es) of the property owner(s)

3. Case number, if discretionary permit is required

4. A plot plan drawn at the scale specified by the Director of Planning and Development Services, including the following:

   a. Location of existing and proposed streets

   b. Location of existing buildings, structures, and parking areas where such structures are to remain

   c. Location of proposed buildings, structures, and parking areas

   d. Proposed uses of buildings and structures

   e. Proposed landscaping including:

      (1) Symbolic representation of each tree, shrub, and ground cover with name or initial shown on the plan for each plant

      (2) List of proposed plants with common and botanic name of each plant, the total number of each plant, and the size of container for each plant

   f. Proposed irrigation system including:

      (1) Location of each sprinkler head (including lawn and shrub head and bubblers, hose bibs, manual valves, and electric clocks)

      (2) Location of main and available pressure

      (3) Location of pipes

   g. North arrow

5. Name and address of person who prepared the landscaping plot plan

B. Review and Approval:

1. Where a discretionary or ministerial approval is required by this chapter for the use or uses for which the landscaping is being provided, a conceptual landscape plan showing the general location and type of proposed landscaping materials and hard surfaced areas shall be submitted in conjunction with the application for the discretionary or ministerial permit. Following approval of the discretionary or ministerial permit but prior to the issuance of any building or grading permit for the principal use or uses, the applicant shall submit a landscaping plot plan application containing the information specified in Subsection A to the Director of Planning and Development Services for review and approval. The landscape plot plan application shall be reviewed and approved in accordance with the procedures set out in Section 7284.02 of this chapter.

2. Where no discretionary or ministerial approval is required for the use or uses for which landscaping is being provided, the landscaping plot plan application shall contain the information specified in Subsection A and shall be reviewed and approved in accordance with the procedures set out in Section 7284.02.

C. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

ARTICLE 7235

HILLSIDE DEVELOPMENT

SECTIONS:

7235.01 PURPOSE AND APPLICATION
7235.02 AVERAGE NATURAL SLOPE CALCULATION
7235.03 HILLSIDE DEVELOPMENT STANDARDS
7235.04 HILLSIDE PLOT PLAN REVIEW AND APPROVAL

SECTION 7235.01 PURPOSE AND APPLICATION

The purpose of this article is to provide for the reasonable use of hillsides and mountainous areas while protecting the public health, safety, and welfare by ensuring that development will not induce soil erosion, result in excessive grading, create sewage disposal problems, increase wildfire danger and slope instability, or lead to a loss of aesthetic value. This article implements the goals and policies of the Kern County General Plan and various specific plans and sets specific standards and regulations for all grading and development of slopes exceeding thirty (30) percent average natural slope. This article is not a base zoning district or combining district, but is applicable to all development in any zoning district on parcels designated Steep Slope (Map Code 2.4) by the General Plan. It is not the intent of this article to apply to oil and gas operations.

SECTION 7235.02 AVERAGE NATURAL SLOPE CALCULATION

For the purposes of this article, slope is defined as the relationship between the change in elevation (rise) of land and the horizontal distance (run) over which the elevation occurs. The percent slope of any given slope is determined by dividing the rise by the run on the natural slope of land, multiplied by one hundred (100).

Average slope shall be calculated by using the following formula:

$$S = \frac{IL\ (0.00229)}{A}$$

Where S = average natural slope of the total parcel (in percent)
I = contour interval (in feet)
L = total length of all contour lines within the parcel boundaries (in feet)
A = gross area of the parcel in acres
0.00229 = a constant used to convert square feet into acres by 100 percent

The calculated average natural slope shall be rounded to the nearest whole number. (See Figure 235A)

SECTION 7235.03 HILLSIDE DEVELOPMENT STANDARDS

All development in areas designated Steep Slope (Map Code 2.4) by the Kern County General Plan shall comply with the following standards:

A. Residential Density:

Residential development shall not exceed the maximum density permitted by the General Plan land use category applicable to the area in which the property is located, except that:

1. No lot shall be created after the effective date of this article on which the average natural slope exceeds sixty (60) percent, except if the lot contains a contiguous area of ten thousand (10,000) square feet within which there is no slope greater than ten (10) percent and on which development is proposed.

2. One (1) single-family dwelling may be built on any lot that was legally created prior to the effective date of this article, regardless of slope, provided that all other requirements of this article are met.

B. Grading:

Grading shall respect the natural contour of the existing terrain wherever possible. The following grading standards shall apply to all land subject to this article in addition to the grading requirements of Chapter 70 of the latest edition of the Uniform Building Code as adopted and modified, or as may be adopted or modified from time to time, by the Board of Supervisors:

1. Grading shall be limited to building pads and access drives thereto, and extensive grading shall be discouraged.

2. No cuts in excess of sixteen (16) feet in height from top to toe shall be allowed.

3. Where grading is necessary, the principles of contour grading should be employed:

   a. Cut slopes shall not exceed two (2) horizontal to (1) vertical (2:1). Shallower slopes may be required if indicated by soils and geologic investigations to be necessary.

   b. Graded slopes should be rounded and shaped to simulate the natural terrain.

   c. Grading should follow the natural contours as much as possible.

   d. Graded slopes should blend with naturally occurring slopes at a radius compatible with the existing natural terrain.

4. Graded slopes should be screened from view under or behind buildings or by landscaping or natural topographic features wherever possible.

5. Graded slopes shall be revegetated with a mixture of grass seed or shrubs as recommended by the Director of Planning and Development Services. Planting may be waived by the Director of Planning and Development Services for slopes that, due to the rock character of the material, will not support plant growth.

C. Drainage:

All proposed drainage facilities shall respect the natural terrain, preserve major drainage channels in their natural state, and be designed in such a manner as to minimize soil erosion and to otherwise preserve the public health, safety, and welfare. The following standards shall apply to all lands subject to this article in addition to the requirements of the Kern County Subdivision and Parcel Map Ordinances:

1. To the maximum extent possible, all natural drainage courses serving major drainage areas, and containing significant perennial vegetation which may constitute a significant wildlife habitat, should remain in their natural state.

2. In the event that off-site drainage facilities will be required to handle increased runoff, interim drainage facilities which provide for no increase in peak runoff from a ten- (10-) year storm shall be constructed and maintained until such time as the permanent facilities are completed.

3. The overall drainage system shall be completed and made operational at the earliest possible time during construction or shall be otherwise provided for in a manner acceptable to the County of Kern.

D. Driveways and Access Roads:

All proposed driveways and access roads shall be designed to provide convenient and safe access while minimizing the extent of grading. The following standards shall apply to all lands subject to this article in addition to the requirements of the Kern County Subdivision and Parcel Map Ordinances:

1. Driveways and access roads shall enter the fronting public road or street as nearly at right angle (or radial line, if on a curve) as physical features permit.

2. Driveways shall be designed and constructed in such a manner that stormwater runoff originating on the roadway will not drain down the drive, and stormwater runoff originating on the private property will not drain down the roadway, except in the ditch or gutter line.

3. Adequate and safe sight distance shall be provided for a design speed of fifteen (15) miles per hour.

4. Wherever feasible, driveways and access roads shall be installed parallel to elevation contours and shall not cut perpendicularly across contours. The maximum grade for driveways and access roads shall be (15) percent.

5. Driveways entering a public road or street shall have a minimum paved width of twelve (12) feet and a maximum width of twenty (20) feet and shall be improved with two (2) inches of asphaltic concrete, three (3) inches of rock dust on an aggregate base, three (3) inches of road mix, or three (3) inches of concrete.

6. Driveways and access roads serving residential projects of three (3) or more units shall be improved with a minimum of three (3) inches of road mix and shall tie to a paved road (under encroachment permit from the Kern County Public Works Department, where applicable). The paving requirement may be waived by the Planning Director when site access is not obtained from a paved road and when the project is not part of a precise development (PD) plan or cluster (CL) development.

7. Driveways and access roads shall comply with the requirements of the Kern County Fire Department.

SECTION 7235.04 HILLSIDE PLOT PLAN REVIEW AND APPROVAL

No development shall occur, no use shall be established, and no building or grading permit shall be issued for any development in areas designated Steep Slope (Map Code 2.4) by the Kern County General Plan until an application for plot plan review has been submitted to and approved by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.02 of this chapter.

A. Application Contents:

An application for plot plan review shall include the following:

1. Name and address of the applicant

2. Name(s) and address(es) of the property owner(s)

3. Assessor's parcel number(s)

4. Legal description of the property

5. A plot plan drawn at one (1) inch to two hundred (200) feet or other scale specified by the Director of Planning and Development Services, including the following:

a. Topography of the property prepared by a registered civil engineer or land surveyor

b. Proposed grading

c. Location of proposed buildings and structures

d. Location of proposed driveways and access roads

e. Kern County Fire Department approval for all driveways and access roads

f. Proposed drainage facilities

g. North arrow

6. A description of the proposed development, including description of how the proposed development complies with the requirements of Section 7235.03

7. Name and address of person who prepared the topographic map

B. Review and Approval:

Where a discretionary approval is required by this chapter for the use or uses proposed, the hillside plot plan application shall be reviewed and approved as part of the discretionary review and approval process. Where no discretionary approval is required by this chapter for the use or uses proposed, the hillside plot plan shall be reviewed and approved in accordance with the procedures set out in Section 7284.02 of this chapter.

C. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

FIGURE 235 A

ARTICLE 7240

SECONDARY RESIDENTIAL UNITS

SECTIONS:

7240.01 PURPOSE AND APPLICATION
7240.02 ESTABLISHMENT OF A SECONDARY RESIDENTIAL UNIT
7240.03 DEVELOPMENT STANDARDS
7240.04 SECONDARY RESIDENTIAL UNIT PLOT PLAN REVIEW AND APPROVAL

SECTION 7240.01 PURPOSE AND APPLICATION

The purpose of this article is to provide for the establishment of new secondary residential units on existing lots in the Low-density Residential (R-1), Estate (E), or Limited Agriculture (A-1) Districts that already contain a legally established principal dwelling unit. The secondary residential unit may be occupied by family members, guests, servants, or employees of the property owner or used as a rental unit. Pursuant to Government Code Section 65852.2(b), secondary residential units are deemed to be in conformance with the density limitations established by the General Plan land use category applicable to the area within which the unit is located.

SECTION 7240.02 ESTABLISHMENT OF A SECONDARY RESIDENTIAL UNIT

A secondary residential unit may be established by any one of the following methods:

A. Alteration of interior space of an existing dwelling

B. Conversion of an attic, basement, garage, or other previously uninhabited portion of a dwelling or accessory structure

C. Addition of a separate unit onto an existing dwelling

D. Construction of a separate structure on a lot in addition to an existing principal dwelling

SECTION 7240.03 DEVELOPMENT STANDARDS

No secondary residential unit may be established unless it complies to the following standards:

A. The lot upon which the secondary residential unit is to be established shall be a minimum of seven thousand five hundred (7,500) net square feet in area and shall not be subdivided unless it meets the minimum requirements for subdivision.

B. The existing principal dwelling on the lot shall contain a minimum gross area of one thousand one hundred (1,100) square feet.

C. Only one (1) secondary residential unit may be created per legal lot.

D. The total floor area of the secondary residential unit may not exceed nine hundred (900) square feet or fifty (50) percent of the total floor area of the existing principal dwelling, whichever is greater.

E. The secondary residential unit shall contain separate kitchen and bathroom facilities and have a separate entrance.

F. The existing principal dwelling on the lot shall be occupied by the property owner.

G. The secondary residential unit shall comply with the development standards for the zoning district in which it is located, including front-, rear-, and side-yard setbacks, minimum distance between structures, height limits, but excluding minimum lot area per dwelling unit standards.

H. Off-street parking for the secondary residential unit shall be provided in accordance with Article 7220 of this chapter.

I. The secondary residential unit shall be constructed in accordance with the provisions of the latest adopted edition of the Uniform Building Code.

J. The secondary residential unit shall be constructed in such a manner as to be compatible with the existing principal dwelling unit and neighborhood in terms of design, height, material, and landscaping.

K. The principal entrance to the secondary residential unit shall not be visible from the street.

L. The secondary residential unit shall comply with applicable health standards and shall be approved by the Kern County Director of Health.

SECTION 7240.04 SECONDARY RESIDENTIAL UNIT PLOT PLAN REVIEW AND APPROVAL

No secondary residential unit may be established until an application for a conditional use permit has been submitted to and approved by the Board of Zoning Adjustment.

A. Application Contents:

An application for a conditional use permit for a secondary residential unit shall include the following:

1. Name and address of the applicant

2. Name and address of the property owner

3. Address of the existing principal dwelling on the lot on which the secondary residential unit is to be established

4. Assessor's parcel number

5. Legal description of the property

6. Floor area of the existing principal dwelling and of the proposed secondary residential unit

7. Plot plan drawn at the scale specified by the Director of Planning and Development Services, including the following:

   a. Property lines and lot dimensions

   b. Location of all existing buildings and structures

   c. Location of the proposed secondary residential unit

   d. Location of all easements

   e. Location of existing and proposed parking areas

   f. North arrow

8. Elevations showing the height of the proposed secondary residential unit in relation to existing buildings on the subject property

9. Photographs accurately showing property on which the secondary residential unit is to be constructed and properties adjacent to side property lines

B. Review and Approval:

The conditional use permit application shall be reviewed and approved in accordance with the procedures set out in Section 7284.04 and Article 7286 of this chapter.

C. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

ARTICLE 7245

DENSITY BONUSES

SECTIONS:

7245.01 PURPOSE AND APPLICATION
7245.02 DENSITY BONUSES FOR RESIDENTIAL PROJECTS
7245.03 DENSITY BONUS PERMIT REVIEW AND APPROVAL

SECTION 7245.01 PURPOSE AND APPLICATION

The purpose of this article is to implement General Plan policies and State law requirements for density bonuses in specified residential projects. Under policies of the General Plan, a density bonus of up to twenty (20) percent shall be allowed for specified residential projects that provide complete infrastructure improvements, including community water distribution and sewage collection and treatment systems. Under the requirements of State law, a density bonus of twenty-five (25) percent shall be granted for specified residential projects of five (5) or more units in which at least twenty-five (25) percent of the units are affordable to persons and families of low or moderate income or in which ten (10) percent of the units are affordable to lower income households. Additionally, a twenty (20) percent bonus shall be granted for those residential developments within certain zone districts when on-site day-care facilities are provided. The density bonus shall be in addition to the maximum allowable density specified by the General Plan land use category for the area in which the project is located. Only one (1) of the above density bonuses may apply to a qualifying project.

SECTION 7245.02 DENSITY BONUSES FOR RESIDENTIAL PROJECTS

A. A density bonus of up to twenty (20) percent over the maximum density specified by the applicable General Plan land use category shall be allowed for any residential project of fifty (50) or more units located in the Medium-density Residential (R-2), High-density Residential (R-3), or Mobilehome Park (MP) Districts if the residential project provides adequate on-site day-care facilities for the care of children.

B. A density bonus of up to twenty (20) percent over the maximum density specified by the applicable General Plan land use category shall be allowed for any residential project of five (5) or more units located in the Low-density Residential (R-1), Medium-density Residential (R-2), High-density Residential (R-3), Mobilehome Subdivision (MS), or Mobilehome Park (MP) Districts if the residential project provides complete public infrastructure improvements, including streets and roads, curb, gutter, and sidewalk, drainage facilities and community water distribution, and sewage collection and treatment systems.

1. The extent of necessary infrastructure improvements and the amount of the density bonus up to twenty (20) percent shall be determined by the decisionmaking authority reviewing and approving the project in accordance with the procedures set out in Article 7284 of this chapter.

2. If the density bonus provided for by this subsection is used for a qualifying project, no other density bonus may be applied to the project.

3. The residential project qualifying for this density bonus shall comply with all regulations of the zoning district or districts applicable to the area in which it is located, all other requirements of this chapter, and all other requirements and regulations of the County of Kern and the State of California.

C. A density bonus of twenty-five (25) percent over the maximum density specified by the applicable General Plan land use category shall be allowed for any new residential project or condominium conversion project containing five (5) or more units located in the Low-density Residential (R-1), Medium-density Residential (R-2), High-density Residential (R-3), Mobilehome Subdivision (MS), or Mobilehome Park (MP) Districts if at least twenty-five (25) percent of the total number of units in the residential development will be affordable to persons and families of low or moderate income, as defined in California Health and Safety Code; or if at least ten (10) percent of the total number of units in the residential development will be affordable to lower income households, as defined in California Health and Safety Code.

1. The units allowed as part of the density bonus shall not be included when determining the number of dwelling units which is equal to ten (10) or twenty-five (25) percent of the total. If the density bonus provided for by this subsection is used for a qualifying project, no other density bonus may be applied to the project.

2. The residential project qualifying for this density bonus shall comply with all regulations of the zoning district or districts applicable to the area in which it is located, all other requirements of this chapter, and all other requirements and regulations of the County of Kern and the State of California.

SECTION 7245.03 DENSITY BONUS PERMIT REVIEW AND APPROVAL

No development may occur pursuant to this article until an application for a density bonus permit has been submitted and approved as provided in this section.

A. Application Contents:

An application for a density bonus permit review shall include the following:

1. Name and address of applicant

2. Name(s) and address(es) of property owner(s)

3. Assessor's parcel number(s)

4. Legal description

5. A site development plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

    a. Topography of the lot(s)

    b. Proposed street system and parking area

    c. Lot design

    d. Location of buildings

    e. Location of other proposed uses

    f. Proposed setbacks

    g. Areas to be reserved for parks, schools, or other public or quasi-public facilities

    h. Proposed landscaping

    i. Water supply and distribution

    j. Sewage disposal system

    k. Drainage system

    l. North arrow

6. A narrative description of the proposed development, including the following:

    a. Total number of dwelling units and number of dwelling units per acre

    b. Number of dwelling units to be made available to persons of low and moderate income or to lower income households, if applicable

    c. Method of maintaining the affordability of the units described in Subparagraph b above, if applicable

    d. Building coverage expressed as a percent of the total area of the property

e. Area of land devoted to landscaping or open space usable for recreation purposes and its percentage of the total land area

f. Method of sewage disposal

g. Water supply, both domestic and fire

h. Proposed on-site drainage facilities

i. Methods of flood control, where appropriate

j. Phasing or development schedule

B. Review and Approval:

Where a discretionary permit or rezoning is otherwise required for the residential project, the density bonus permit application shall be reviewed and approved in conjunction with that discretionary permit or rezoning approval project. Where no other discretionary permit or rezoning is required for the residential project, the density bonus permit application shall be reviewed and approved in accordance with the procedures set out in Section 7284.02.

C. Preliminary Review:

Prior to submitting a formal application for a density bonus permit pursuant to this article or prior to submitting a formal application for a tentative map for conversion of apartments to a condominium project, an applicant shall submit to the Director of Planning and Development Services a preliminary proposal in writing for the residential project or condominium project. The Director of Planning and Development Services shall, within ninety (90) days of receipt of a written proposal, notify the applicant in writing of the procedures the applicant must follow to secure a density bonus provided for in this article.

ARTICLE 7250

HOME OCCUPATIONS

SECTIONS:

7250.01 PURPOSE AND APPLICATION
7250.02 PERMITTED HOME OCCUPATIONS
7250.03 HOME OCCUPATIONS NOT PERMITTED
7250.04 HOME OCCUPATION STANDARDS
7250.05 HOME OCCUPATION PERMIT REVIEW AND APPROVAL

SECTION 7250.01 PURPOSE AND APPLICATION

The purpose of this article is to establish standards for home occupations. In general, a home occupation is a residential accessory use so located and conducted that the average neighbor, under normal circumstances, would not be aware of its existence. The standards for home occupations in this article are intended to ensure compatibility with other permitted uses and with the residential character of the neighborhood.

SECTION 7250.02 PERMITTED HOME OCCUPATIONS

Home occupations may include, but are not necessarily limited to, the following:

A. Artist, sculptor, or photography studio, taxidermist, or firearm repair

B. Author or composer

C. Dressmaker, seamstress, or tailor

D. Home crafts, such as model making, rug weaving, or lapidary work

E. Office of a minister, rabbi, or priest

F. Office of a salesman, sales representative, or manufacturers' representative, provided that no retail or wholesale transactions are made on the premises, except as permitted by Section 7250.04.I

G. Office of an architect, artist, broker, consultant, engineer, instructor in arts and crafts, insurance agent, land surveyor, musician, bookkeeper, accountant, typist, notary public, or private investigator

H. School of special education whose class size does not exceed four (4) pupils at any given time

I. Telephone answering service

J. Saw sharpening

K. Key and locksmith

SECTION 7250.03 HOME OCCUPATIONS NOT PERMITTED

Permitted home occupations shall not in any event be deemed to include such uses as:

A. Antique shop

B. Barber shop or beauty parlor

C. Funeral chapel or funeral home

D. Gift shop

E. Medical or dental clinic or hospital

F. Renting of trailers, autos, trucks, and motorcycles

G. Restaurant

H. Stable or kennel

I. Veterinary clinic or hospital

J. Car repair or small engine repair

K. Cabinet making

L. Appliance repair

SECTION 7250.04 HOME OCCUPATION STANDARDS

A home occupation shall comply with the following minimum standards:

A. The home occupation shall be conducted solely by the occupants of the residence.

B. Not more than twenty-five (25) percent of the gross area of one (1) floor of a residence shall be used for such purpose.

C. Detached accessory buildings may not be used for any home occupation activity.

D. No use shall require external alterations or involve construction features or the use of electrical or mechanical equipment that would change the fire rating of the structure or the fire district in which the structure is located.

E. There shall be no outside storage of any kind related to the home occupation.

F. The home occupation shall be conducted by appointment only.

G. The home occupation shall not require the services of commercial carrier freight deliveries at the site in a frequency greater than normally found in a residential area.

H. No home occupation shall create noise, dust, vibration, smell, smoke, glare, electrical interference, fire hazard, or any other hazard or nuisance to any greater or more frequent extent than that usually experienced in an average residential occupancy in the district in question under normal circumstances wherein no home occupation exists.

I. There shall be no sales of products or merchandise other than those produced on the premises and shall be limited to those which are incidental to the permitted home occupation.

J. No sign shall be permitted, other than the clearly posted address of the home.

SECTION 7250.05 HOME OCCUPATION PERMIT REVIEW AND APPROVAL

No home occupation shall be established until an application for a home occupation permit has been submitted to and approved by the Director of Planning and Development Services as consistent with the requirements of this article in accordance with the procedures set out in Section 7284.02 of this chapter.

A. Application Contents:

An application for a home occupation permit shall include the following:

1. Name and address of applicant

2. Name(s) and address(es) of property owner(s)

3. Assessor's parcel number(s)

4. Description of the home occupation including:

   a. Trade name or business title

   b. Resale number, if any

   c. Detailed description of the proposed occupation

   d. Tools, machinery, or equipment required or used in the practice of the occupation

B. Review and Approval:

The home occupation permit application shall be reviewed and approved in accordance with the procedures set out in Section 7284.02 of this chapter.

C. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

ARTICLE 7255

LARGE FAMILY DAY-CARE HOMES

SECTIONS:

7255.01 PURPOSE AND APPLICATION
7255.02 DEVELOPMENT STANDARDS
7255.03 LARGE FAMILY DAY-CARE HOME PERMIT REVIEW AND APPROVAL

SECTION 7255.01 PURPOSE AND APPLICATION

The purpose of this article is to authorize the establishment of large family day-care homes in residential neighborhoods where such uses will not have an adverse effect on surrounding area.

SECTION 7255.02 DEVELOPMENT STANDARDS

Large family day-care homes shall comply with the following standards:

A. An operating license, if required, shall be obtained through the Kern County Welfare Department, Division of Social Services, prior to or concurrently with obtaining a permit pursuant to this article. Applicant shall comply with all State and County regulations administered by the Welfare Department or any other agency designated by the State Department of Social Services including, but not limited to, the following:

1. Large family day-care homes shall be located within a detached single-family dwelling.

2. The maximum number of children, including the licensee's own children under age twelve (12), for whom care shall be provided when there is no assistant provider in the home shall be either:

   a. Four (4) infants

   b. Six (6) children, no more than three (3) of whom may be infants

3. The maximum number of children, including the licensee's and assistant provider's own children under age twelve (12), for whom care shall be provided when there is an assistant provider in the home shall be twelve (12) children, no more than four (4) of whom may be infants.

4. A large family day-care home shall have a maximum capacity of twelve (12) provided that staffing ratios are maintained.

5. The capacity specified on the license shall be the maximum number of children for whom care can be provided.

B. Sufficient off-street loading space shall be provided in addition to the required off-street parking to serve the dwelling. The required loading space may be located within the required front yard but shall not impede access to the off-street parking required to serve the dwelling.

C. Outside play areas shall be screened from adjacent properties with either a solid wood fence or masonry wall six (6) feet in height. The fence or wall height shall be reduced to four (4) feet within the required front yard.

D. No signs other than those permitted by the applicable zoning district regulations shall be permitted.

SECTION 7255.03 LARGE FAMILY DAY-CARE HOME PERMIT REVIEW AND APPROVAL

No large family day-care home shall be established until an application for a large family day-care home permit has been submitted to and approved by the Director of Planning and Development Services in accordance with the procedures set out in Section 7284.03 of this chapter.

A. Application Contents:

An application for a large family day-care home permit shall include the following:

1. Name and address of the applicant

2. Name(s) and address(es) of the property owner(s)

3. Assessor's parcel number(s)

4. Legal description of the property

5. Plot plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

   a. Existing and proposed buildings and structures

   b. Distance of all existing and proposed buildings and structures from property lines

   c. Outside play areas, including screening

   d. Off-street loading space

   e. North arrow

6. Days and hours of operation

7. Number of children for whom care is to be provided

8. Copy of license or license application

B. Review and Approval:

A large family day-care home permit application shall be reviewed and approved according to the procedures set out in Section 7284.03, except that:

1. At least ten (10) days before the date on which the decision will be made on the application, notice of the application shall be given by mail or delivery to all owners shown on the last equalized assessment role as owning real property within a one-hundred-(100-) foot radius of the exterior boundary of the proposed large family day-care home.

2. No hearing on the application shall be held before a decision is made unless a hearing is requested by the applicant or other affected person.

3. The applicant or other affected person may appeal the decision of the Director of Planning and Development Services according to the procedures set out in Section 7284.03.D.

C. Permit Revocation and Modification:

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

ARTICLE 7260

OIL AND GAS PRODUCTION

SECTIONS:

7260.01 PURPOSE AND APPLICATION
7260.02 UNRESTRICTED DRILLING
7260.03 DRILLING BY MINISTERIAL PERMIT
7260.04 DRILLING BY CONDITIONAL USE PERMIT
7260.05 DEVELOPMENT STANDARDS AND CONDITIONS
7260.06 APPLICATION CONTENTS
7260.07 PERMIT REVOCATION AND MODIFICATION

SECTION 7260.01 PURPOSE AND APPLICATION

The purpose of this article is to promote the economic recovery of oil, gas, and other hydrocarbon substances in a manner compatible with surrounding land uses and protection of the public health and safety by establishing reasonable limitations, safeguards, and controls on exploration, drilling, and production of hydrocarbon resources. The procedures and standards contained in this article shall apply to all exploration drilling and production activities related to oil, gas, and other hydrocarbon substances carried out in unincorporated Kern County.

SECTION 7260.02 UNRESTRICTED DRILLING

No review or permit shall be required for the drilling of any steam injection well, steam drive well, service well, or any well intended for the exploration for or development or production of oil, gas, and other hydrocarbon substances, or for any related accessory equipment, structure, or facility in the Exclusive Agriculture (A), Limited Agriculture (A-1), Medium Industrial (M-2), Heavy Industrial (M-3), or Natural Resource (NR) Districts, provided that:

A. All drilling installations and operations comply with the requirements of State law and with applicable fire and safety ordinances and regulations of the County of Kern.

B. Drilling shall not be commenced within one hundred (100) feet of any existing residence without the written consent of the owner thereof.

C. Signs shall be limited to directional, warning signs, and identification signs in connection with oil, gas, or other hydrocarbon drilling and development operations.

D. Disposal of nonhazardous oil field liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oil field liquid waste or production water is produced and disposed of within the same designated oil field, or

2. The nonhazardous oil field liquid waste or production water disposed of outside the designated oil field of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

SECTION 7260.03 DRILLING BY MINISTERIAL PERMIT

No well for use as an injection well and no well for the exploration for or development or production of oil or gas or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in the Light Industrial (M-1) or Recreation Forestry (RF) Districts until an application for plot plan review has been submitted to and approved by the Director of Planning and Development Services as consistent with the standards set out in Section 7260.05 and in accordance with the procedures set out in Section 7284.02 of this chapter. In approving an application for plot plan review, the Director of Planning and Development Services may waive any standards set out in Section 7260.05 if he/she determines that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity.

Disposal of nonhazardous oil field liquid waste and production water is considered an accessory facility only if the facility complies with the following:

A. The nonhazardous oil field liquid waste or production water is produced and disposed of within the same designated oil field, or

B. The nonhazardous oil field liquid waste or production water disposed of outside the designated oil field of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

SECTION 7260.04 DRILLING BY CONDITIONAL USE PERMIT

No well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in any zoning district described in this chapter in which such uses are permitted as conditional uses until an application for a conditional use permit has been submitted to and approved by the Board of Zoning Adjustment as consistent with the standards set out in Section 7260.05 and in accordance with the standards and procedures set out in Section 7284.04 and Article 7286 of this chapter. In approving a conditional use permit, the Board of Zoning Adjustment may waive any condition set out in Section 7260.05 if it determines that such waiver will not result in material detriment to the public welfare or the property of other persons located in the vicinity.

Disposal of nonhazardous oil field liquid waste and production water is considered an accessory facility only if the facility complies with the following:

A. The nonhazardous oil field liquid waste or production water is produced and disposed of within the same designated oil field, or

B. The nonhazardous oil field liquid waste or production water disposed of outside the designated oil field of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

If a producing well or service well is not completed upon land subject to a conditional use permit issued pursuant to this article and Article 7286 within twelve (12) months from the date of issuance of the permit, or within any extended period thereof, the conditional use permit shall expire and the premises shall be restored as nearly as practicable to their original condition. No permit shall expire while the permittee is continuously conducting drilling, redrilling, completing or abandoning operations, or related operations, in a well on the lands covered by such permit, which operations were commenced while said permit was otherwise in effect. Continuous operations are operations suspended not more than thirty (30) consecutive days. If, at the expiration of the twelve (12) months period, the permittee has not completed his drilling program on the lands covered by such permit, the Board of Zoning Adjustment may, upon a written request of the permittee, extend the permit for the additional time requested by permittee for the completion of such drilling program.

SECTION 7260.05 DEVELOPMENT STANDARDS AND CONDITIONS

All wells drilled, pursuant to Sections 7105.02, 7260.03, and 7260.04, for the exploration for or development or production of oil, gas, and other hydrocarbon substances and related facilities and activities shall comply with the following standards, unless otherwise provided in this article:

A. No oil or gas well shall be drilled within one hundred (100) feet of any public highway or building not necessary to the operation of the well, or within one hundred and fifty (150) feet of any dwelling, or within three hundred (300) feet of any building used as a place of public assembly, institution, or school, or within fifty (50) feet of any building utilized for commercial purposes constructed prior to the commencement of such drilling, without the written consent of the owner of such structure.

B. All drilling and production activities shall conform to all applicable fire and safety regulations, and fire fighting apparatus and supplies required by the Kern County Fire Department shall be maintained on the site at all times during drilling and production operations.

C. No signs, other than directional and warning signs and those required for identification of the well, shall be constructed, erected, maintained, or placed on the premises or any part thereof, except those

required by law or ordinance to be displayed in connection with the drilling or maintenance of the well.

D. Sanitary toilet and washing facilities, if required by the Kern County Health Department or other governmental agencies, shall be installed and maintained in a clean and sanitary condition during drilling operations, and at such other times as specified by these agencies.

E. Proven technological improvements generally accepted and used in drilling and production methods shall be employed as they may become available if they are capable of reducing nuisances or annoyances.

F. All derricks, boilers, and other drilling equipment employed pursuant to this section, to drill any well hole or to repair, clean out, deepen, or redrill any completed or drilling well, shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derricks, boilers, and drilling equipment are to be used within a reasonable time, as determined by the Director of Planning and Development Services, for the drilling of another well or wells on the premises.

G. Within ninety (90) days after any well has been placed in production, or after its abandonment, earthen sumps used in drilling or production or both (unless such sumps are to be used within a reasonable time as determined by the Director of Planning and Development Services for the drilling of another well or wells) shall be filled and the drilling site restored as nearly as practicable to a uniform grade. Temporary earthen sumps may be used for cleanout or remedial work on an existing well or other production facility. However, these sumps shall be filled and the site restored as nearly as practicable to uniform grade within ninety (90) days after the cleanout or other remedial work is completed. Such restoration work shall comply with all applicable regulations of the California Division of Oil and Gas.

H. Any derrick used for servicing operations shall be of the portable type, provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable type derrick will not properly service such well, the Director of Planning and Development Services may approve the use of a standard type of derrick.

I. Whenever oil or gas is produced into and shipped from tanks located on the premises, such tanks, whenever located within five hundred (500) feet of any dwelling or commercial building, shall be surrounded by shrubs or trees, planted and maintained so as to develop attractive landscaping or shall be fenced in such a manner as to, insofar as practicable, screen such tanks from public view. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

J. Whenever a well is located within five hundred (500) feet from an existing dwelling unit, except in case of an emergency, no materials, equipment, tools, or pipe used for either drilling or production operations shall be delivered to or removed from the drilling site, except between the hours of 8:00 a.m. and 8:00 p.m., unless otherwise required by the California Division of Oil and Gas.

K. Pumping wells shall be operated by electric motors or muffled internal combustion engines.

L. The height of all pumping units shall not exceed thirty-five (35) feet and shall be painted and kept in neat condition.

M. All vehicle parking and maneuvering areas shall be treated and maintained with oiled sand or a similar dust binding material.

N. After production begins and a pump is installed on the wellhead, a fence at least six (6) feet in height shall be installed around the pump site or drilling island for public safety. This fence shall be constructed of chain link with wood or metal slats or other screening fence as may be approved by the Director of Planning and Development Services. This fencing and screening requirement shall apply only to those pump sites located within five hundred (500) feet of any dwelling. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

O. All required federal, State, and County rules and regulations shall be complied with at all times, including, but not limited to, the rules and regulations of the following agencies:

1. California Division of Oil and Gas
2. Kern County Fire Department
3. Kern County Health Department
4. Regional Water Quality Control Board
5. Air Pollution Control District
6. Kern County Public Works Department

SECTION 7260.06 APPLICATION CONTENTS

An application for plot plan review pursuant to Section 7260.03 and an application for a conditional use permit pursuant to Section 7260.04 shall include the following:

1. Name and address of the applicant
2. Name(s) and address(es) of the property owner(s)

3. Assessor's parcel number(s)

4. Legal description of the property

5. A plot plan or site development plan (in the case of a conditional use permit) drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

   a. Topography and proposed grading

   b. Location of all proposed well holes and related accessory equipment, structures, and facilities to be installed and any abondoned wells if such are known to exist

   c. Location of all existing dwellings and buildings used for other purposes, located within three hundred (300) feet of the proposed well holes, identification of the use of each structure, and distances between well holes and existing buildings

   d. North arrow

6. Narrative description of the proposed development, including:

   a. Acreage or square footage of the property

   b. Nature of hydrocarbon development activity

   c. Description of equipment to be used

   d. Distance to all existing buildings

   e. Phasing or development schedule

SECTION 7260.07 PERMIT REVOCATION AND MODIFICATION

Any permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

ARTICLE 7265

SURFACE MINING OPERATIONS

SECTIONS:

7265.01 PURPOSE AND APPLICATION
7265.02 SURFACE MINING PERMIT APPLICATION AND APPROVAL
7265.03 MINOR PLAN MODIFICATIONS
7265.04 INSPECTION OF OPERATIONS
7265.05 VIOLATIONS
7265.06 ADDITIONAL TIME WITHIN WHICH TO CORRECT A VIOLATION
7265.07 SECURITY TO GUARANTEE RECLAMATION IN ACCORDANCE WITH PLAN
7265.08 CONDUCT OF RECLAMATION WORK OR PERFORMANCE OF CONDITIONS BY COUNTY ON DEFAULT BY PERMITTEE
7265.09 SUCCESSORS IN INTEREST
7265.10 REMEDIES NOT EXCLUSIVE

SECTION 7265.01 PURPOSE AND APPLICATION

The purpose of this article is to regulate surface mining operations consistent with the requirements of the California Mining and Reclamation Act (Public Resources Code Sections 2710 et seq.) and the State Policy for Surface Mining and Reclamation Practice (Title 14 of the California Administrative Code, Sections 3500 et seq.). The requirements of this article are applicable to any surface mining operation undertaken in unincorporated Kern County, except for those operations specifically exempted by Sections 2714 or 2776 of the California Public Resources Code.

SECTION 7265.02 SURFACE MINING PERMIT APPLICATION AND APPROVAL

Subject to the exceptions specified in Section 7265.01, no surface mining operations may be undertaken anywhere in unincorporated Kern County unless a surface mining permit and a reclamation plan has been submitted to and approved by the Board of Zoning Adjustment in accordance with the procedures set out in Section 7284.04 of this chapter.

A. Application Contents:

An application for surface mining and reclamation permit shall include the following:

1. Name and address of the applicant

2. Name(s) and address(es) of the property owner(s) or owners of surface rights

3. Name(s) and address(es) of owner(s) of mineral rights

4. Name and address of lessee

5. Name and address of operator

6. Name and address of person designated by operator as his agent for the service of process

7. Assessor's parcel number(s)

8. Legal description of the subject property

9. Site development plan drawn at a scale specified by the Director of Planning and Development Services, which includes the following information:

   a. Property boundary lines and dimensions

   b. Areas proposed for development

   c. Location of proposed buildings and structures

   d. Parking and vehicle maneuvering areas

   e. Method of vehicular access

   f. Location of any existing or proposed roads, water lines or other pipelines, easements proposed or existing, and any existing buildings, structures, or major areas of use for the property being considered

   g. Height, type, and location of fencing

   h. Such additional information as may be deemed necessary to permit adequate consideration of the proposal

10. A vicinity map showing all proposed access routes and a statement as to the method proposed for transporting mined materials from the site

11. A sufficient number of cross sections of the area to show existing grades and proposed finished grades after all surface mining has been completed shall be provided; such cross sections shall be drawn to an engineer's scale that is practical and workable

12. Reclamation plan including the following information:

   a. The anticipated quantity and type of minerals for which the surface mining operation is to be conducted

   b. The proposed dates for the initiation and termination of such operation

   c. The maximum anticipated depth of the surface mining operation

d. The size and legal description of the lands that will be affected by such operation, a map that includes the boundaries and topographic details of such lands, a description of the general geology of the area, a detailed description of the geology of the area in which surface mining is to be conducted, the location of all streams, roads, railroads, and utility facilities within, or adjacent to, such lands, the location of all proposed access roads to be constructed in conducting such operation, and the names and addresses of the owners of all surface and mineral interests of such lands

e. A description of and plan for the type of surface mining to be employed and a time schedule that will provide for the completion of surface mining on each segment of the mined lands so that reclamation can be initiated at the earliest possible time on those portions of the mined lands that will not be subject to further disturbance by the surface mining operation

f. A description of the proposed use or potential uses of the land after reclamation and evidence that all owners of a possessory interest in the land have been notified of the proposed use or potential uses

g. A description of the manner in which reclamation adequate for the proposed use or potential uses will be accomplished, including:

(1) A description of the manner in which contaminants will be controlled and mining waste will be disposed

(2) A description of the manner in which rehabilitation of affected stream bed channels and stream banks to a condition minimizing erosion and sedimentation will occur

h. An assessment of the effect of implementation of the reclamation plan on future mining in the area

i. A statement that the person submitting the plan accepts the responsibility for reclaiming the mined lands in accordance with the reclamation plan

j. Any other information determined by the Director of Planning and Development Services to be necessary for consideration of the reclamation plan.

B. Development Standards and Conditions:

Surface mining operations shall comply with the following standards:

1. Surface mining operations shall be consistent with the goals and policies of the General Plan.

2. Surface mining operations shall comply with the requirements of the California Surface Mining and Reclamation Act, the State Policy for Surface Mining and Reclamation Practice, and any standards or procedures adopted by the Board of Supervisors to implement the act, State policy, or this article.

3. Surface mining operations shall comply with any conditions deemed necessary or convenient by the Board of Zoning Adjustment to effect the purposes of this article, including conditions with respect to the following:

   a. The environmental objectives set forth in California Public Resources Code Section 21000

   b. Protection of the health, safety, and welfare of persons residing near the site of the mining operation and the general public

   c. Reasonable preservation of the values and uses and opportunity for potential uses of the adjacent and nearby areas insofar as this is not inconsistent with the provisions of the act, State policy, this article, or any implementing standards or procedures adopted by the Board of Supervisors

SECTION 7265.03 MINOR PLAN MODIFICATIONS

The Director of Planning and Development Services may review and approve minor plan modifications to approved reclamation plans in accordance with the procedures set out in Section 7284.02 of this chapter. Where the Director of Planning and Development Services determines that a proposed amendment constitutes a substantial deviation from the original plan, the proposed amendment shall be considered by the Board of Zoning Adjustment.

SECTION 7265.04 INSPECTION OF OPERATIONS

A. The Building Official shall make, or cause to be made, periodic inspections of all surface mining operations and the areas affected thereby to ascertain if the operation is being conducted in conformity with the approved conditions of the permit and reclamation plan and all applicable statutes, regulations, and ordinances.

B. The person conducting or in charge of all surface mining operations shall make the surface mining operation open and available for such inspection during regular County business hours or at such other times as may be mutually agreed upon by him/her and the Building Official. The provisions of this subsection shall be deemed to be a condition of each permit.

C. The Building Official shall make a report, not less often than quarterly, of the results of his inspections. The report shall be filed with the Board of Supervisors, and copies shall be furnished to the Director

of Planning and Development Services. Copies of the report shall also be furnished to any officer of the County or State, or any interested person who has filed a written request.

SECTION 7265.05 VIOLATIONS

A. Where it appears to the Building Official that a surface mining operation is in violation of any condition of an approved permit or reclamation plan or applicable statute, regulation, or ordinance, he/she shall serve formal notice to the permittee that he/she must correct the violation within a reasonable time as specified by the Building Official. Where a violation comes to the attention of the Board of Zoning Adjustment, the Board may order the Building Official or its Secretary to cause such notice to be given, and in so doing, the Board shall fix the time period within which the violation is to be corrected.

The time within which the permittee must commence correction of the violation shall not be sooner than sixty (60) days after such notice is given, unless it is determined that earlier action is required for the protection of public safety.

B. If the permittee fails to commence to correct the violation or completely correct the violation within the time prescribed in notice or within such other time as the Board of Zoning Adjustment may order after hearing any appeal by the permittee from the determination by the Building Official, the Building Official shall report such fact to the Board of Zoning Adjustment.

C. Where the Building Official has reported a failure to comply with a notice pursuant to Subsection B, the Board of Zoning Adjustment shall initiate proceeding for review of the surface mining permit in accordance with the procedures set out in Section 7284.06 of this chapter.

D. After such matter has been heard and considered, the Board of Zoning Adjustment may take one of the following actions:

1. Revoke the permit

2. Require the reclamation program to begin immediately or within a prescribed time following the effective date of revocation of the permit

3. Allow additional time within which to cure the violation, if requested by the permittee

4. Impose new or additional conditions on the permit or on the reclamation plan

5. Increase the amount of the original security to guarantee reclamation in accordance with the plan, not to exceed the limits provided in Section 7265.07

6. Recommend to the Board of Supervisors proceedings to recover on any security

7. Recommend to the Board of Supervisors that the County conduct work to accomplish the reclamation plan, to perform any conditions in default, or otherwise cure any default

8. Such other order or orders as may be appropriate to correct the violation or default

SECTION 7265.06 ADDITIONAL TIME WITHIN WHICH TO CORRECT A VIOLATION

A. The permittee may file a petition for, or upon a hearing on proceedings for revocation of a permit may request, an order allowing additional time within which to correct the violation.

B. If the period of violation will exceed six (6) months from the date of the original notice, the Board of Zoning Adjustment may only allow the additional time in accordance with the procedures set out in Section 7284.04 of this chapter.

C. No order allowing additional time shall be made except on a showing of good cause by the permittee.

D. In issuing an order allowing additional time, the Board of Zoning Adjustment may impose conditions, including, but not limited to, an increase in the amount of the original security to guarantee reclamation in accordance with the plan or the furnishing of additional security to guarantee the correction of the violation within such additional time as may be allowed for such purpose.

SECTION 7265.07 SECURITY TO GUARANTEE RECLAMATION IN ACCORDANCE WITH PLAN

A. The security to guarantee reclamation in accordance with the approved or amended reclamation plan and the conditions thereof shall be a bond or bonds issued by a corporate surety duly authorized to conduct surety business in the State of California, in favor of the County of Kern as principal. As a part of the obligation secured thereby and in addition to the face amount thereof, the bond or bonds shall secure payment to the County of Kern its costs and reasonable expenses and fees, including reasonable attorneys' fees, as the County may incur in successfully enforcing such obligations. The form of such bond shall be subject to approval of the County Counsel who may require such additional provisions he/she may deem necessary to promote the security of such obligation and recovery thereon.

B. The security to guarantee reclamation in accordance with the approved or amended reclamation plan may be in such other form or on such other terms and conditions as may be provided in the implementing standards and procedures adopted by the Board of Supervisors.

C. The Board of Zoning Adjustment shall determine if the posting of security is necessary to guarantee reclamation in accordance with any approved reclamation plan or amended reclamation plan, and, if so, shall fix the amount thereof, subject to the limitations provided in this Section. In making any such determination, the Board of Zoning Adjustment shall consider the recommendations of the Public Works Director and the Director of Planning and Development Services.

D. The amount of such security shall not exceed five hundred dollars ($500) per acre of surface mining area involved and, in any case, shall not exceed an aggregate amount of fifty thousand dollars ($50,000).

E. The security shall be posted with the Public Works Director or with such other officer of the County as the Board of Supervisors may order.

F. The permittee may apply to the Board of Zoning Adjustment for an order approving reduction in amount or release of the security obligation, as in the case of a proposal for amendment of a condition of a reclamation plan.

G. Before the Board of Zoning Adjustment considers an application for reduction or release of security, an inspection of the site shall be made by the Building Official and he/she shall file his/her report and recommendation with the Board of Zoning Adjustment.

H. If the Board of Zoning Adjustment finds that the amount of security is excessive, it shall order the amount reduced to an amount which it deems reasonable. If the Board finds that all reclamation work is completed, finds that no reclamation work needs to be done, or finds that no security is reasonably required to secure the completion of any reclamation work remaining to be done, it shall order the security released and exonerated.

I. The County Counsel shall undertake proceedings to recover on such security, when directed to do so by an order of the Board of Supervisors.

SECTION 7265.08 CONDUCT OF RECLAMATION WORK OR PERFORMANCE OF CONDITIONS BY COUNTY ON DEFAULT BY PERMITTEE

A. If the permittee fails to perform or conform to any requirement imposed by any order made under Section 7265.05 within the time fixed in such order, or if no time is fixed in such order, then within a reasonable time, the Board of Supervisors shall have authority to order and otherwise undertake the planning and conduct of all or any part of the work necessary to accomplish the reclamation plan, to perform any conditions in default, or to otherwise cure any default.

B. The officers, employees, and agents of the County, and any contractor hired by the County and his employees, subcontractors and agents, and any engineers, surveyors, and other experts retained by the County, may go on the site of the mine and any adjacent property of the permittee for the purposes of planning or doing all or any part of the work mentioned in Subsection A above, bringing and using thereon any and all equipment, machines necessary for doing such work, and using any equipment, supplies, earth, or other materials found thereon. One of the conditions of each permit shall be authorization for such entry, work, and use by or on behalf of the County.

C. Insofar as it is practical to do so, the County shall follow the previously approved reclamation plan or conditions in the conduct of such work.

D. The Board of Supervisors is authorized to order retention and deposit into the County general fund a portion of the proceeds from the security for its costs and reasonable expenses and fees, including reasonable attorneys' fees, incurred in successfully enforcing the obligation of the security, and for its reasonable expenses incurred in any inspections, giving notices, conducting hearings pursuant to Section 7265.05, and for any expenses incurred in the planning, surveying, testing, and administration in preparation for the letting of any contracts, administration and enforcement of contracts, and otherwise doing any of the work mentioned in this section.

E. The Board of Supervisors may enter into an agreement with the permittee, or any successor in interest of the permittee, under which he/she would agree to do the work needed to accomplish the reclamation plan or a specified portion thereof, or to perform any or all of the conditions in default or such other work needed to cure any default, in consideration of payment from the remaining proceeds of the security of an amount commensurate with the work completed.

F. The Board of Supervisors may enter into an agreement with any public agency or public entity under which it would agree to do the work needed to accomplish the reclamation plan or a specified portion thereof, or to perform all or any of the conditions in default or such other work needed to cure any default, in consideration of transfer or payment to such agency or entity of all or any part of the remaining proceeds from the security.

G. If the Board of Supervisors determines that the work has been completed for the accomplishment of the reclamation plan, or for the performance of conditions in default or as otherwise needed to cure any default, or if the Board determines that there is no reasonable prospect that such work can be accomplished by any means mentioned in this section, or if the Board determines that by reason of changed circumstances no public purpose would be served by completion of such work, the Board shall order any portion of the proceeds from such security not retained by the County under Subsection D above or not expended under the provisions of this section, to be refunded to the permittee or his surety, as their interests may appear.

SECTION 7265.09 SUCCESSORS IN INTEREST

Any reference in this article to the permittee or applicant shall also be deemed to include any successor in interest or assign of the permittee or applicant.

SECTION 7265.10 REMEDIES NOT EXCLUSIVE

The provisions in this article of any remedy to the County, or to any board or officer of the County, for noncompliance with or default in the performance of any reclamation plan, or of any condition of any permit or reclamation plan, shall not be deemed as a limitation on any other remedy at law or in equity which the County, or any board or officer of the County, or any other public officer or agency, nor any member of the public, may otherwise have.

ARTICLE 7280

DEFINITIONS

SECTIONS:

7280.01 CONSTRUCTION
7280.02 DEFINITIONS

SECTION 7280.01 CONSTRUCTION

For the purpose of carrying out the intent of this chapter, words, phrases, and terms shall be deemed to have the meaning ascribed to them in Section 7280.02. In construing the provisions of this chapter, specific provisions shall supersede general provisions relating to the same subject, and text shall supersede diagrams relating to the same subject. Words, phrases, and terms not defined in this section shall have the meaning commonly or logically associated therewith.

SECTION 7280.02 DEFINITIONS

Abut

To physically touch, border upon, or to share a common corner or property line. For the purposes of this chapter, abutting properties shall include those properties separated by any road, street, or highway, except a major highway. (See Figure 280A)

Access Drive

A way or means of approach to provide entrance to a property.

Accessory Building or Structure

A building or structure detached from a principal building on the same lot and customarily incidental and subordinate to the principal building or use. An accessory building or structure may be erected only after the principal building or structure is established.

Accessory Use

A use of land or of a building that is customarily incidental and subordinate to the principal use of the land or building located on the same lot. An accessory use may be established only after the principal use is established.

Accessory Facility

Any improvement constructed, installed, or established to perform some particular function that is incidental to or facilitates the primary use. (Also see Disposal of Nonhazardous Oil Field Liquid Waste and Production Water)

Acre

A measure of land containing forty-three thousand five hundred and sixty (43,560) net square feet.

Adult Bookstore

A retail establishment selling publications and other material of a sexually explicit nature.

Actual Cash Value

Current market value as determined by a certified real property appraiser or actual sales price.

Airport, Private

A private airport or airstrip intended for the sole use of the airport owner and his or her invitees.

Airport, Public Use

A publicly or privately owned airport that offers the use of its facilities to the public without prior notice or special invitation or clearance, and that has been issued a California Airport Permit by the Division of Aeronautics of the California Department of Transportation.

Aliquot

The division or measurement of land in one-half (1/2) or one-quarter (1/4) portions.

Alley

A service way providing a secondary means of public access to abutting property and not intended for general traffic circulation.

Ambient Noise Level

The composite of noise from all sources excluding the alleged offensive noise. In this context, it represents the normal or existing level of environmental noise at a given location for a specified time of the day or night.

Amusement Park

An outdoor facility, which may include structures and buildings, where there are various facilities for entertainment, including rides, booths for the conduct of games or sales of items, and buildings for shows and entertainment.

Apartment

A building, or portion thereof, designed for or occupied by three (3) or more families living independently of each other.

Approved Access

Approved access shall be as defined in Part 4, Division 2, Chapter 4 (Code of Building Regulations) of the Kern County Ordinance Code.

Audible Noise

Sound pressure levels having a frequency greater than 125 Hz.

Auto Service Station, Large

A retail establishment selling gas and similar motor fuels to the public and may also include retail sales of motor oils, lubricants, travel aids, minor auto accessories, and minor automobile servicing, repairs, and maintenance.

Auto Service Station, Small

An auto service station where the retail sales of gasoline and similar motor fuels is a secondary use to another commercial establishment, such as, but not limited to, car washes and grocery stores. A small service station shall be limited to one gas pump island and a maximum of four fuel pumps.

Bakery, Large

A commercial enterprise engaged in large scale production and wholesale marketing of bakery goods, and which may include incidental retail sales.

Bakery, Small

A retail commercial enterprise engaged in the production of bakery goods intended for retail sale on site and not including any wholesale activities.

Bar

A structure, or part of a structure, used primarily for the sale or dispensing of liquor by the drink.

Base District

A zoning district which includes use, height, bulk, space, and development standards for the regulation of development in a particular area (e.g., R-1, C-1, RF).

Base Flood

The flood having a one (1) percent chance of being equaled or exceeded in any given year; also referred to as the one hundred- (100-) year flood, regulatory flood, Intermediate Regional Flood, or original zoning flood.

Bituminous Road Mix

A hard surface road paving material complying with the specifications of Section 38 of the January 1981 California Department of Transportation standards and specifications.

Board of Zoning Adjustment

Hearing and review body established pursuant to Part 1, Division 1, Chapter 3.1 of the Ordinance Code of Kern County.

Board of Supervisors

The Board of Supervisors of the County of Kern.

Boarding House

A dwelling or part thereof in which lodging is provided by the owner to more than three boarders.

Building

Any permanent structure built for the support, shelter, or enclosure of persons, animals, chattel, or property of any kind.

Building Height

The vertical distance of a building measured from the average elevation of the finished grade within twenty (20) feet of the structure to the highest point of the roof.

Building Official

The Kern County Director of Planning and Development Services or his/her designee.

Campground

A plot of ground upon which two (2) or more campsites are located, established, or maintained for occupancy by camping units of the general public as temporary living quarters for recreation, education, or vacation purposes.

Camping Unit

Any tent, trailer, cabin, lean-to, or similar structure established or maintained and operated in a campground as temporary living quarters for recreation, education, or vacation uses.

Camping Trailer

See Travel Trailer.

Cargo Container

A large metal box typically used for the shipment of containerized goods.

Cemetery

An area for burial or entombment of the deceased.

Center Frequencies

The geometric mean between the band limits of an octave or one-third (1/3) octave. (An octave is a frequency interval between two (2) sounds whose frequency ratio is two (2), e.g. from seven hundred and seven (707) to one thousand four hundred and fourteen (1,414) Hz. A one-third (1/3) octave is the frequency interval between two (2) sounds whose frequency ratio is one and one-quarter (1.25), e.g., from one hundred and forty-two (142) to one hundred and seventy-eight (178) Hz.)

Centerline, Legal

A line designated by official survey to be the center of a future or existing fully developed easement, street, road, or highway, which may or may not coincide with the construction centerline.

Church

A building, together with its accessory buildings and uses, where persons regularly assemble for worship, and which building, together with its accessory buildings and uses, is maintained and controlled by a religious body organized to sustain public worship.

Club

An association of persons, whether incorporated or unincorporated, for some common purpose but not including groups organized primarily to render a service carried on as a business.

Columbarium

A structure of vaults lined with recesses for cinerary urns for the ashes of cremated bodies.

Combining District

A zoning district that modifies use, height, bulk, space, or other development standards of the base district with which it is combined (e.g., CL, RS).

Commercial Coach

A vehicle, without motive power, designed and equipped for human occupancy for industrial, professional, or commercial purposes.

Commercial Purposes

The raising, growing of any plant or plant crop; the raising, breeding, or training of any animal, bird, or fowl; or the providing of a service having profit as the primary aim.

Common Area

Land within or related to a development, not individually owned or dedicated for public use, which is designed and intended for the common use or enjoyment of the residents of the development and which may include such complementary structures and improvements as are necessary and appropriate.

Common Property Line

A lot line shared by two or more properties.

Community Care Facility

A State-authorized, certified, or licensed family care home, foster home, or group home serving six (6) or fewer mentally disordered or otherwise handicapped persons or dependent and neglected children. (Welfare and Institutions Code 5116)

Community Center

A building used for recreational, social, educational, or cultural activities, usually owned and operated by a public or nonprofit group or agency.

Community Recreation Facility

A recreational facility, such as a park or swimming pool, including accessory structures, maintained and operated for the benefit of residents of a particular residential development, including an apartment, condominium, townhouse, subdivision, or mobilehome park.

Community Septic Disposal System

A septic disposal system, whether public or privately owned, serving two (2) or more dwelling units, lots, businesses, or other separate sources of domestic wastewater.

Conditional Use

A use permitted in a particular zoning district only upon showing that such use in a specified district will comply with all the conditions and standards for the location or operation of such use as specified in this chapter and authorized by the Board of Zoning Adjustment through the issuance of a conditional use permit.

Conditional Use Permit

A permit issued by the Board of Zoning Adjustment or other decision making authority stating that the conditional use meets all conditions set forth in this chapter and all others established by the Board of Zoning Adjustment or other decisionmaking authority.

Condominium

An estate in real property consisting of an undivided interest in common in a portion of a parcel of real property together with a separate interest in a space in a residential, industrial, or commercial building on such real property. (Civil Code Section 783)

Convalescent Hospital

An institution primarily engaged in the care of individuals recovering from illness.

Country Club

A land area and buildings containing recreational facilities, clubhouse, and usual accessory uses, open only to members and their guests for a membership fee.

County

The County of Kern.

County Official

Any employee of the County of Kern.

Cul-de-sac

See Street, Cul-de-sac.

Crematory

A building or structure operated in conjunction with a columbarium, mausoleum, cemetery, or mortuary containing one or more furnaces for the reduction of bodies of deceased persons to cremated remains.

Day-care Center

A public or private enterprise which provides full day-care services to thirteen (13) or more children.

Day-care Home, Large Family

A home which provides family day-care to seven (7) to twelve (12) children located within a detached single-family dwelling.

Day-care Home, Small Family

A home which provides family day care to six (6) or fewer children located within a detached single-family dwelling.

Dead Storage

The storage of the owners or occupants recreational vehicle on the site in such a manner that it is not connected to utilities and is not occupied as living quarters.

Decibel, dB

A unit for describing the amplitude of sound, equal to twenty (20) times the logarithm to the base ten (10) of the ratio of the pressure of the sound measured to the reference pressure, which is twenty (20) micropascals (twenty (20) micronewtons per square meter).

Decisionmaking Authority

The Director of Planning and Development Services, Board of Zoning Adjustment, or Board of Supervisors, depending on which has been assigned the responsibility and authority for reviewing and approving a particular permit pursuant to Article 7284.

Dedication

A conveyance of land to some public use, especially streets, made by the owner and accepted for such use by or on behalf of the public.

Density

The number of dwelling units per unit of land.

Density Bonus

A density increase over the otherwise maximum residential density allowable by the applicable General Plan land use category.

Designated Urban Area

Any area within the unincorporated County designated pursuant to Article 15 of Chapter 1 of Division 3 of the Kern County Ordinance Code.

Development

The division of a parcel of land into two or more parcels; the construction, reconstruction, conversion, structural alteration, relocation, or enlargement of any structure; any mining, excavation, landfill or land disturbance; and any use or extension of the use of land.

Discretionary Decision

A decision requiring the exercise of judgment or deliberation when the public official or body decided to approve or disapprove a particular activity.

Disposal of Nonhazardous Oil Field Liquid Waste and Production Water

Considered an accessory facility only if the facility complies with the following: (a) the nonhazardous oil field liquid waste or production water is produced and disposed of within the same designated oil field, or (b) the nonhazardous oil field liquid waste or production water disposed of outside the designated oil field of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

District Attorney

The District Attorney of the County of Kern or his/her designee.

Domestic Agriculture

Agricultural activities carried on for noncommercial purposes.

Double Frontage Lot

See Lot, Through

Duplex

A detached building designed for or occupied exclusively by two (2) families living independently of each other.

Dwelling

See Dwelling Unit.

Dwelling, Multi-family

A building or portion thereof designed for or occupied by two (2) or more families living independently of each other, including duplexes, triplexes, quadruplexes, apartments, condominiums, and townhouses.

Dwelling, Single-family

A building or buildings designed for or occupied exclusively by one (1) family, excluding a mobilehome.

Dwelling Unit

One (1) or more habitable rooms which are designed to be occupied by one (1) family with facilities for living, sleeping, cooking, eating, and sanitation.

Easement

A grant of one (1) or more of the property rights by the owner to or for the use by the public, a corporation, or another person or entity.

Eighty Acres

An aliquot division of a section of land consisting of one-half (1/2) of one-quarter (1/4) of a section, not to be less than seventy (70) gross acres.

Exterior Noise Level

The noise level as measured near the exterior of a structure usually within fifty (50) feet of the structure.

Family

An individual, or two (2) or more persons related by blood or marriage or legal adoption, or a group of not to exceed six (6) persons (excluding servants) living together as a single housekeeping unit in a dwelling unit.

Five Acres

An aliquot division of a section of land consisting of one-half (1/2) of one-quarter (1/4) of one-quarter (1/4) of one-quarter (1/4) section of land not to be less than four (4) gross acres.

Farm Labor Housing, On-site Employee

Living quarters, either single family or group housing, provided for full-time farm laborers employed on the site or on lands owned or leased by the owner of the living quarters.

Farm Labor Housing, Contract Labor

Living quarters, either single family or group housing, provided by a labor contractor for farm laborers which are not full-time farm employees on lands owned or leased by the owner of the living quarters.

Farmers' Market

A retail market where agricultural produce is offered for sale to the general public, either within an enclosed building or outdoors.

Fast-food Restaurant

An establishment whose principal business is the sale of pre-prepared or rapidly prepared food directly to the customer in a ready-to-consume state for consumption either within the restaurant building or off the premises.

Fence

An artificially constructed barrier of any material or combination of materials erected to enclose or screen areas of land.

Flood or Flooding

Any general and temporary condition of partial or complete inundation of normally dry land from the overflow of inland or tidal waters or from the unusual and rapid accumulation of runoff of surface waters from any source.

Flood Boundary Floodway Map (FBFM)

An official map on which the Federal Insurance Administration, using their own information or information supplied by the Kern County Water Agency, the Kern County Department of Planning and Development Services, the State Reclamation Board, or other Federal Agencies, has delineated both the areas of flood hazard and the floodway.

Flood Control Structure

A structure to convey floodwater generated within an upstream watershed. Typical structures would include, but not be limited to, dams, channels, and levees.

Flood Insurance Rate Map (FIRM)

The official map on which the Federal Insurance Administration has delineated both the areas of special and historical flood hazards and the risk premium zones applicable to Kern County.

Flood, Original Zoning

The flood having a one (1) percent chance of being equaled or exceeded in any given year; also referred to as the one hundred (100-) year flood, regulatory flood, Intermediate Regional Flood, or base flood.

Floodplain

A land area adjoining a river, stream, watercourse, or lake which is likely to be flooded, including alluvial cones, wherein streams may change their course.

Floodway or Designated Floodway

The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one (1) foot or increasing the velocity to greater than seven (7) feet per second, whichever results in the widest floodway. The floodway is delineated on the Flood Boundary Floodway Map and the State Reclamation Board Designated Floodway Map. Floodways are also delineated on the official zoning maps as Floodplain Primary (FPP) District.

Forty Acres

An aliquot division of a section of land consisting of one-quarter (1/4) of one-quarter (1/4) section of land not to be less than thirty-five (35) gross acres.

Fruit Stand

A permanent or temporary structure utilized for the sale of agricultural, horticultural, or farming products grown or produced by the owner or lessee of the property on which the structure is located.

A. A permanent fruit stand is one that is used throughout the year and no thirty- (30-) day time period elapses where the stand is not utilized.

B. A temporary fruit stand is one that is used seasonally and normally periods of time in excess of thirty (30) days pass where the stand is not utilized. A temporary fruit stand shall not be used in excess of one hundred and twenty (120) cumulative days within a calendar year.

Funeral Home

An establishment with facilities for the preparation of the deceased for burial or cremation, for the viewing of the body, and for funerals.

Garage

A deck, building, or structure, or part thereof, used or intended to be used for the parking and storage of vehicles.

General Plan

The General Plan of the County of Kern adopted by the Board of Supervisors pursuant to California Government Code.

Glucose Processing

The production of monosaccharide carbohydrates through the hydrolysis of starch and other carbohydrates.

Grade

The average of the finished ground level at the center of all walls of a building. In case walls are parallel to and within five (5) feet of a sidewalk, said ground level shall be measured at the sidewalk.

Groundwater Recharge Facilities

Those works, structures, and equipment, including but not limited to, spreading basins, wells, pumps, canals, weirs, pipelines, and streams, which permit water to reach the saturated zone of an aquifer.

Group Care Facility

A facility or detached dwelling unit providing twenty-four (24) hour nonmedical care of persons in need of personal services, supervision, or assistance essential for sustaining the activities of daily living or for the protection of the individual.

Guest Ranch

A building or buildings and open space for use of transients only, providing housing and meals and having recreational activities of one (1) or more types, for compensation.

Habitable Structure

Any structure used for living purposes, including working, sleeping, cooking, eating, or recreation (for the purpose of Articles 7160 and 7165 of this chapter only).

Hazardous Waste

A waste, or combination of wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may either:

A. Cause or significantly contribute to an increase in mortality or an increase in serious irreversible or incapacitating reversible, illness.

B. Pose a substantial present or potential hazard to human health or environment when improperly treated, stored, transported, or disposed of or otherwise managed

Hedge

A fence or barrier formed of bushes set close together.

Height

The vertical distance from the base to the top of any structure, measured from lowest point of the structure.

Herbicide

A substance used to destroy plants, especially weeds.

Hog Ranch or Farm

Any premises used for the commercial breeding or raising of hogs which are kept confined as a stockyard and fed concentrated food for the purposes of developing or fattening the animals for retail or wholesale sale. (Hogs raised as an FFA, 4-H, or Junior Farmer project are not to be classified as a hog ranch or farm unless the express purpose is for the commercial wholesale or retail sales market.)

Home Occupation

Any activity carried out for gain by a resident conducted as an accessory use in the resident's dwelling unit.

Horticultural

The cultivation of an orchard, garden, or garden on a small or large scale.

Hospital

Any building or portion thereof used for the accommodation and medical care of sick, injured, or infirm persons and including sanitariums.

Hotel

A facility offering transient lodging accommodations on a daily rate to the general public and providing additional services, such as restaurants, meeting rooms, and recreation facilities.

Hunting Club

A designated area where wild game birds or animals may be hunted. Normally membership or entry fee is required as a prerequisite to hunting.

Impulsive Noise

A noise having a high peak level and short duration, usually less than one (1) second, with an abrupt onset and rapid decay.

Infrasound

Sound pressure levels below twenty (20) Hz.

Kennel

A structure or structures consisting of fenced pens, runs, or buildings for the keeping, raising, breeding, and housing of dogs or similar animals for commercial purposes.

Kitchen

Any room or area primarily intended or designated to be used or maintained for the cooking, storing, preparation, or consumption of food.

Land Use

A description of how land is utilized.

Laundromat

An establishment providing washing, drying, or dry cleaning machines on the premises for rental use to the general public for family laundering or dry cleaning purposes.

Livestock

Any cattle, sheep, swine, goat, horse, mule, or other equine animals.

Livestock Feedlot

An enclosed area where animals are confined and fed concentrated food to raise or fatten them for slaughter or commercial sale.

Living Area

The interior inhabitable area of a dwelling unit, including the basement and attic, but excluding the garage or any accessory structure.

Lot

A designated parcel, tract, or area of land established by plat, subdivision, or as otherwise permitted by law, to be used, developed, or built upon as a unit.

Lot Area

The total area within the lot lines of a lot, excluding any street rights-of-way and including only that area which is usable for its intended purpose.

Lot Area, Minimum

The smallest lot area established by this chapter on which a use or structure may be located in a particular zoning district.

Lot, Corner

A lot or parcel of land abutting upon two (2) or more streets at their intersection or a lot abutting one (1) street that forms an interior angle of less than one hundred and thirty-five (135) degrees. The frontage of a lot abutting one (1) street that forms an interior angle of one hundred and thirty-five (135) degrees or more shall be considered the front yard of an interior lot. (See Figure 280B)

Lot Coverage

That portion of the lot that is covered by buildings and structures.

Lot Depth

The distance measured from the front lot line to the rear lot line. (See Figure 280C)

Lot, Flag

A lot with access provided to the bulk of the lot by means of a narrow corridor. (See Figure 280B)

Lot Frontage

The length of the front lot line measured at the street right-of-way (see Figure 280C), excluding lot lines adjacent to street right-of-way where no access rights exist.

Lot, Interior

A lot abutting one (1) street that forms an interior angle of one hundred and thirty-six (136) degrees or more. (See Figure 280B)

Lot, Key

A lot whose side lot line is coincident with the rear lot line of an adjacent lot. (See Figure 280B)

Lot Line

A line of record that divides one lot from another lot or from a public or private street or any other public space.

Lot Line, Front

The property line dividing a lot from a street. On a corner lot, only one (1) street line shall be considered as a front line and the shorter street frontage shall be considered the front lot line.

Lot Line, Rear

The lot line opposite and most distant from the front lot line; or in the case of triangular or otherwise irregularly shaped lots, an imaginary line ten (10) feet in length entirely within the lot, parallel to and at a maximum distance from the front lot line. (See Figure 280D)

Lot Line, Side

Any lot line other than front lot line or rear lot line.

Lot, Reversed Corner

A corner lot whose side street line is substantially a continuation of the front lot lines of the first lot to its rear. (See Figure 280B)

Lot, Through

A lot having frontage on two (2) parallel or nearly parallel streets and having the right of access to both streets (also known as a double frontage lot). (See Figure 280B)

Lot Width

The distance measured parallel to the street between the side lot lines; in the event of a corner lot, the lesser dimension.

Low Frequency Noise

Sound pressure levels between twenty (20) and one hundred and twenty-five (125) Hz.

Lower Income Households

Households with incomes eighty (80) percent or less of the County median income.

Main Building

The building in which the principal use of a lot is located.

Major Highway

A highway which is used, designed to be used, or is necessary to carry heavy volumes of traffic, and designated as a "Major Highway" in the Circulation Element of the General Plan and described in the Kern County Subdivision Standards.

Mausoleum

A tomb for one (1) or more deceased persons.

Mineral Exploration

Exploration by scientific means, in a manner similar to the exploration for petroleum products, for the purpose of determining the existence and extent of commercial mineral deposits.

Minimum Distance Between Buildings

The distance between the walls of buildings, measured at the nearest point to an adjacent building.

Ministerial Decision

A decision requiring the application of the statutes, ordinances, or regulations to the facts as prescribed and involving little or no personal judgment by the public official or decisionmaking body as to the wisdom or manner of carrying out a project.

Mini-warehouse

A structure containing separate storage spaces of varying sizes leased or rented on an individual basis.

Minor Plan Modification

A minor change or modification of an approved development plan which is not in conflict with the intent, policy, or expectations of original project approvals.

Mobilehome

A structure transportable in one (1) or more sections, designed and equipped to contain not more than two (2) dwelling units to be used with or without a foundation system. Mobilehome does not include a recreational vehicle, commercial coach, or factory built housing.

Mobilehome Park

An area or tract of land where two (2) or more lots are rented or leased or held out for rent or lease to accommodate mobilehomes for human occupancy.

Mobilehome Accessory Structure

Any awning, cabana, ramada, storage cabinet, storage building, private garage, carport, fence, windbreak, or porch or any residential building or structure established for the use of the occupant of a mobilehome on a lot.

Modular Home

A prefabricated dwelling unit constructed to Uniform Building Code; not a mobilehome.

Mortuary

A place in which the deceased are kept until burial.

Motel

A group of attached or detached buildings containing individual sleeping or living units, providing transient accommodations with garage or parking space conveniently located to each unit, including tourist courts, auto courts, or motor lodges.

Mudslide

A general and temporary movement down a slope of a mass of sand, gravel, rock or soil, artificial fill, or a combination of these materials, caused or precipitated by the accumulation of water on or under the ground.

Mudslide Area or Mudslide-prone Area

An area characterized by unstable slopes and land surfaces whose history, geology, soil and bedrock structure, and climate indicate a potential for mudslides.

Nature or Wildlife Preserve

An area set aside for the preservation of natural vegetation or wildlife where the general public may view the vegetation or wildlife, with or without charge.

Neighborhood

An area of a community with characteristics that distinguish it from other community areas and which may include distinct ethnic or economic characteristics or boundaries defined by physical barriers, such as major highways and railroads or natural features, such as rivers.

Nonconforming Building

A structure or building the size, dimensions, or location of which was lawful prior to the adoption, revision, or amendment to this Zoning Ordinance but which fails by reason of such adoption, revision, or amendment, to conform to the present requirements of the zoning or districts.

Nonconforming Lot

A lot, the area, dimensions, or location of which was lawful prior to the adoption, revision, or amendment of this Zoning Ordinance, but which fails by reason of such adoption, revision, or amendment to conform to the present requirements of the applicable zoning district or districts.

Nonconforming Use

A use which was lawful prior to the adoption, revision, or amendment of this Zoning Ordinance but which fails by reason of such adoption, revision, or amendment to conform to the present requirements of the applicable zoning district or districts.

Nuisance

An interference with the enjoyment and use of property.

Occupancy or Occupied

The residing of an individual or individuals overnight in a dwelling unit, or the installation, storage, or use of equipment, merchandise, or machinery in any public, commercial, or industrial building.

Off-site

Located outside the lot in question.

Off-street Parking

An area for the temporary storage of motor vehicles that is directly accessible to but not located on a dedicated street right-of-way.

Official Plan Line

The future right-of-way of any road or highway as adopted by resolution of the Board of Supervisors.

Oil or Gas Exploration by Scientific Means

Exploration by scientific means includes, but is not limited to, the following: seismic surveys, magneto-telluric, magnetometer or gravity meter surveys; surface mapping and holes less than five hundred (500) feet deep drilled for the purpose of taking core samples, velocity readings, temperature measurements, or water samples.

Oilfield

That area shown within the field boundary on the official oilfield maps prepared and maintained by the State of California, Department of Conservation, Division of Oil and Gas.

On-site Day-care Center

A day-care facility within the project boundary providing care for children.

One Ownership

Ownership of real property by a person, persons, firm, corporation, or partnership, or any combination thereof, individually, jointly, or in common whereby such property is under a single or unified control.

One-third Octave

The frequency interval between two (2) sounds whose frequency ratio is one and one-quarter (1.25), e.g., from one hundred and forty-two (142) to one hundred and seventy-eight (178) Hz.

Open Space

Any parcel or area of land or water which is essentially unimproved and devoted to one or more of the following uses: preservation of natural resources; outdoor recreation; or public health and safety.

Parcel

See Lot.

Park

Public or private land used for active or passive recreation.

Parking Area

Any public or private land area designed and used for parking motor vehicles, including parking lots, garages, private driveways, and legally designated areas of public streets.

Permanent Storage

The storage of motor vehicles, trailers, airplanes, boats, parts thereof, or building materials for a period of forty-eight (48) or more consecutive hours.

Permit

Written governmental permission issued by an authorized official empowering the holder thereof to do some act not forbidden by law but not allowed without such authorization.

Permitted Use

Any use allowed by right in a zoning district and subject to the restrictions applicable to that zoning district.

Person

Any individual, firm, co-partnership, joint venture, association, club, fraternal organization, corporation, estate, trust, receiver, organization, syndicate, city, county, municipality, district or other political subdivision, or any other group or combination acting as a unit.

Persons and Families of Low or Moderate Income

Persons with incomes one hundred and twenty (120) percent or less of the County median income.

Pesticides

An agent (as a chemical) used to destroy a pest.

Planning and Development Services Director

The Director of Planning and Development Services of the County of Kern or his/her designee.

Plot

A single unit parcel of land; or a parcel of land that can be identified and referenced to a recorded plat or map.

Plot Plan

A plan graphically describing proposed and existing buildings, structures, lot lines, and other required information submitted in conjunction with an application for discretionary or ministerial review and approval.

Poultry Ranch

The raising, breeding, hatching of poultry for commercial purposes.

Preschool

A licensed public or private institution which provides structured educational services to children between the ages of two (2) and five (5).

Principal Dwelling

The dwelling in which is conducted the principal residential use of the lot on which it is located.

Principal Use

The primary or predominant use of any lot.

Prohibited Use

A use that is not permitted in a zoning district.

Property Line

See Lot Line.

Public Hearing

A meeting announced and advertised in advance and open to the public with the public given an opportunity to talk and participate.

Public Works Department

The Public Works Department of the County of Kern, including the County Surveyor's Office and the Roads Division.

Public Works Director

The Public Works Director of the County of Kern or his/her designee.

Pure Tone

Any sound which can be judged as audible as a single pitch or a set of single pitches. A pure tone shall be assumed to exist if the one-third (1/3) octave band sound pressure level in the band, including the tone, exceeds the arithmetic average of the sound pressure levels of two (2) contiguous one-third (1/3) octave bands by five (5) dB for center frequencies of five hundred (500) Hz and above and by eight (8) dB for center frequencies between one hundred and sixty (160) and four hundred (400) Hz and by fifteen (15) dB for center frequencies less than or equal to one hundred and twenty-five (125) Hz.

Quadruplex

Four (4) attached dwellings in one (1) structure in which each unit has two (2) open space exposures and shares one (1) or two (2) walls with the adjoining unit or units.

Recharge Facilities

Those works, structures, and equipment, including, but not limited to, spreading basins, wells, pumps, canals, weirs, pipelines, or streams, which permit water to reach the saturated zone of an aquifer.

Recreational Vehicle

A motorhome, slide-in camper, travel trailer, truck camper, or camping trailer, with or without motive power, designed for human habitation for recreational or emergency use.

Recreational Vehicle Park

An area or tract of land where one (1) or more spaces are rented or held out for rent to owners or users of recreational vehicles or tents and which is occupied for sixty (60) consecutive days or less.

Rehabilitation

The upgrading of a building previously in a dilapidated or substandard condition for human habitation or use.

Residence

A home, abode, or place where an individual family is actually living at a specified point in time.

Residential Accessory Structures

Buildings and structures normally associated with dwellings, such as detached garages, carports, greenhouses; storage buildings, and swimming pools, but excluding cargo containers.

Residential Hotel

A hotel offering accommodations on a weekly or monthly basis.

Retail Services

Establishments engaged in selling goods or merchandise to the general public for personal or household consumption.

Rest Home

An institution primarily engaged in the provision of permanent living space for the elderly or mentally infirm.

Rezone

To change the zoning classification of particular lots or parcels pursuant to provisions of this chapter.

Right-of-Way

A strip of land acquired by reservation, dedication, prescription, or condemnation and intended to be occupied or occupied by a road, crosswalk, railroad, electric transmission lines, oil or gas pipeline, water line, sanitary storm sewer, or other similar uses

Road

See Street.

Roof

The outside top covering of a building.

Rooming House

See Boarding House.

School, Elementary or High

An institution of learning which offers instruction in the several branches of learning and study required to be taught in the public schools by the Education Code of the State of California. (High schools include Junior and Senior.)

Sanitary Landfill

A disposal site employing an engineered method of disposing of solid wastes in a manner that minimizes environmental hazards by spreading, compacting to the smallest practical volume, and applying cover material over all exposed wastes at the end of each operating day.

Secondary Highway

A street or highway designed to carry moderate volumes of traffic and designated as a "Secondary Highway" in the Circulation Element of the General Plan and described in the Kern County Subdivision standards.

Secondary Residential Unit or Second Unit

A detached or attached dwelling unit which provides complete independent living facilities for one (1) or more persons.

Septage Disposal Site

A site designated for the disposal of material pumped from septic tanks, cesspools, seepage pits, holding tanks, and privies.

Services, Commercial

Establishments providing services or entertainment, as opposed to products, to the general public.

Setback

The required minimum distance between the street centerline or any property line and and wall or support of any structure.

Sewage Collection and Disposal System

Any system for the collection and disposal of sewage or industrial wastes of a liquid nature, including various devices for the treatment of such sewage or industrial wastes.

Sewage Disposal System

Any system for the disposal of sewage of industrial wastes of a liquid nature, including various devices for the treatment of such sewage or industrial wastes.

Sewage Treatment Plant

A facility for treatment and disposal of sewage.

Sidewalk

A paved, surfaced, or leveled area, paralleling and usually separated from the street, used as a pedestrian walkway.

Sign

Any object, device, display, or structure, or part thereof, situated outdoors or indoors, which is used to advertise, identify, display, or direct attention to an object, person, institution, organization, business, product, service, event, or location by any means, including words, letters, figures, design, symbols, fixtures, colors, illumination, or projected images.

Sign, Agricultural

An on-site sign identifying a farm, ranch, or agricultural activities or products.

Sign, Agricultural Industry

A sign identifying industrial activities related to the manufacture or processing of agricultural products.

Sign, Animated or Moving

Any sign or part of a sign which changes physical position by any movement or rotation or which gives the visual impression of such movement or rotation.

Sign Area

The entire face of a sign, including the advertising surface, and any framing, trim, or molding, but not including the supporting structure.

Sign, Billboard

See Sign, Off-site.

Sign, Directional

Signs limited to directional messages, principally for pedestrian or vehicular traffic, such as "one-way," "entrance," and "exit."

Sign, Face

The area or display surface used for the message.

Sign, Flashing

Any directly or indirectly illuminated sign which exhibits changing natural or artificial light or color effects by any means whatsoever.

Sign, Freestanding

Any nonmovable pole or monument sign not affixed to a building.

Sign, Governmental

A sign erected and maintained pursuant to and in discharge of any governmental functions, or required by law, ordinance, or other governmental regulation.

Sign, Identification

A sign giving the nature, logo, trademark, or other identifying symbol, address, or any combination of the name, symbol and address of a building, business, development, or establishment on the premises where it is located.

Sign, Illuminated

A sign lighted by or exposed to artificial lighting either by lights on or in the sign or directed towards the sign.

Sign, Monument

A sign constructed upon a solid base or pedestal, the total width of which is at least fifty (50) percent of the overall width of the sign.

Sign, Nameplate

A sign, located on the premises, giving the name or address, or both, of the owner or occupant of a building or premises.

Sign, Off-site

A sign which directs attention to a business, commodity, service, or entertainment conducted, sold, or offered at a location other than the premises on which the sign is located.

Sign, On-site Informational

A sign commonly associated with, and not limited to, information and directions necessary or convenient for visitors coming on the property, including signs marking entrances and exits, parking areas, circulation direction, rest rooms, and pick-up and delivery areas.

Sign, Pole

A sign that is mounted on a freestanding pole or other support so that the bottom edge of the sign face is six (6) feet or more above grade.

Sign, Political, Religious, or Civic Campaign

A temporary sign announcing or supporting candidates or issues in connection with any national, state, or local election or civic or religious campaign.

Sign, Portable

A sign that is not permanent, affixed to a building, structure, or the ground.

Sign, Real Estate

A sign pertaining to the sale or lease of the premises, or a portion of the premises, on which the sign is located.

Sign, Temporary

A sign or advertising display constructed of cloth, canvas, fabric, plywood, or other light material and designed or intended to be displayed for a short period of time.

Sign, Temporary Construction

A temporary sign erected on the premises on which construction is taking place, during the period of such construction, indicating the names of the architects, engineers, landscape architects, contractors or similar artisans, and the owners, financial supporters, sponsors, and similar individuals or firms having a role or interest in the structure or project.

Sign, Temporary Subdivision

A temporary sign pertaining exclusively to the development or sale of residential land subdivisions and located within the same subdivision.

Sign, Wall

A sign fastened to or painted on the wall of a building or structure in such a manner that the wall becomes the supporting structure for, or forms the background surface of, the sign and which does not project more than twelve (12) inches from such building or structure.

Sign, Warning

Signs limited to messages of warning, danger, or caution.

Sign, Wind

A sign or objects, some or all of which is moved by wind as a method of attracting attention.

Sign, Window

A sign that is applied or attached to the exterior or interior of a window or located in such manner within a building that it can be seen from the exterior of the structure through a window.

Site

Any lot or parcel of land or combination of contiguous parcels of land.

Site Development Plan

A plan graphically describing proposed buildings, structures, and other required information submitted in conjunction with an application for discretionary review and approval.

Small Fowl

Birds raised or grown for hobby purposes, show, or racing, normally no larger than a small chicken (e.g., pigeon, parrot, or cockatiel).

Soffit

The horizontal underside of an eave.

Solid Waste

All putrescible and nonputrescible solid, semisolid, and liquid wastes, including garbage, trash, refuse, paper, rubbish, ashes, industrial wastes, demolition and construction wastes, abandoned vehicles and parts thereof, discarded home and industrial appliances, manure, vegetable or animal solid and semisolid wastes, and other discarded solid and semisolid wastes

Specific Plan Line

The designated centerline of any road or highway as adopted by resolution of the Board of Supervisors from which the ultimate right-of-way is determined in accordance with the Circulation Element of the General Plan.

Start of Construction

The first placement of permanent construction on a site, such as the pouring of slabs or footings, or any site preparation work, including, but not limited to, leveling and grading.

Stockyard

An enclosed area where livestock are temporarily confined and fed concentrated food while waiting for shipping to market, slaughter, or resale.

Story

That portion of a building included between the surface of any floor and the surface of the floor next above it, or if there be no floor above it, then the space between such floor and the ceiling next above it.

Story, Half

A story with at least two (2) of its opposite sides situated in a sloping roof, the floor area of which does not exceed two-thirds (2/3) of the floor area immediately below it.

Stream

A watercourse having a source and terminus, banks, and channel through which waters flow at least periodically.

Street, Cul-de-sac

A street with a single common ingress and egress and with a turnaround at the end.

Street, Local

A street designed to provide vehicular access to abutting property.

Street, Public

A street built to standards required and maintained by the County of Kern.

Street, Private

A street owned and maintained by a person or persons and intended for access to a limited number of private lots.

Structure

An edifice or building of any kind, or any piece of work artificially built up or composed of parts joined together in some definite manner.

Structural Floor

The floor sheathing, structural beams, floor joists, or concrete slab of a building.

Subdivision

The division of any unit or units of improved or unimproved land, or any portion thereof, shown on the latest equalized County assessment roll as a unit or as contiguous units for the purpose of sale, lease, or financing, whether immediate or future, except for leases of agriculture land for agricultural purposes.

Substantial Improvement

Any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds fifty (50) percent of the actual cash value of the structure, either (a) before the improvement is started, or (b) if the structure has been damaged and is being restored before the damage occurred. Substantial improvement is started when the first alteration of any structural part of the building commences.

Temporary Structure

A structure without any foundation or footings and which is removed when the designated time period, activity, or use for which the temporary structure was erected has ceased.

Temporary Use

A use established for a fixed period of time with the intent to discontinue such use upon expiration of the time period.

Ten Acres

An aliquot division of a section of land consisting of one-quarter (1/4) of one-quarter (1/4) of one-quarter (1/4) section of land not to be less than eight (8) gross acres.

Townhouse

A building with three (3) or more attached dwelling units, each with its own roof, oriented in a common wall relationship as one building.

Trailer

A structure mounted on wheels, towed or hauled by another vehicle, and used for short-term human occupancy, carrying materials, goods, or objects or as a temporary office.

Trailer Court

See Mobilehome Park.

Transfer/Processing Station

Includes those facilities utilized to receive solid wastes, temporarily store, separate, convert, or otherwise process the materials in the solid wastes, or to transfer the solid wastes directly from smaller to larger vehicles for transport. Transfer station does not include any facility the principal function of which is to receive, store, separate, convert, or otherwise process, in accordance with State minimum standards, manure; nor does it include any facility, the principal function of which is to receive, store, convert, or otherwise process wastes which have already been separated for reuse and are not intended for disposal.

Transfer Station, Large Volume

A transfer station which receives more than one hundred (100) cubic yards of waste per operating day.

Transfer Station, Small Volume

A transfer station which receives less than one hundred (100) cubic yards of waste per operating day.

Travel Trailer

A portable unit mounted on wheels and of such a size and weight as not to require special highway movement permits when drawn by a motor vehicle, and for human habitation for recreational or temporary occupancy.

Travel Trailer Park

See Recreational Vehicle Park.

Triplex

See Dwelling, Triplex.

Truck Repair

A commercial activity engaged in the service and repair of trucks, including truck tire repair.

Twenty Acres

An aliquot division of a section of land consisting of one half of one-quarter (1/4) of one-quarter (1/4) section of land not to be less than sixteen (16) gross acres.

Two and One-half Acres

An aliquot division of a section of land consisting of one-quarter (1/4) of one-quarter (1/4) of one-quarter (1/4) of one-quarter (1/4) section of land not to be less than two (2) gross acres.

Two-family Dwelling or Duplex

See Dwelling, Two-family.

Use

The purpose or activity for which land or buildings are designed, arranged, or intended, or for which either is or may be occupied or maintained.

Variance

Permission to depart from the literal requirements of the Zoning Ordinance.

Washroom

A room equipped with washing and, usually, toilet facilities.

Water Injection Well

A well used for the purpose of disposing of production wastewater produced within the same oilfield in which the injection well is located.

Water System, Large

A domestic water well and ancillary equipment providing water to more than ten (10) dwelling units or regularly serving twenty-five (25) or more people daily for at least sixty (60) days, such as a water system serving a business, factory, or other permitted use.

Water System, Small

A domestic water well and ancillary equipment providing water to ten (10) dwelling units or less.

Water Treatment Plant

A plant or facility for treatment or purification of water to make it usable.

Watercourse

A natural or man-made, intermittent or perennial drainage channel which includes, but is not limited to, the terms river, tributary, stream, or creek.

Wild Animal Keeping

Keeping or maintaining any dangerous, wild, carnivorous, or exotic animal that is wild by nature and not customarily domesticated by man so as to live and breed in a tame condition.

Wind-driven Electrical Generators, Experimental

Wind systems that are the first of their kind and their use constitutes a testing of a new concept or design.

Wind-driven Electrical Generators, Production

Electrical generators that have progressed beyond the prototype stage and the construction of a significant number on a continuing basis has occurred.

Wind-driven Electrical Generators, Prototype

Electrical generators that have progressed beyond the experimental stage and construction of a limited number to test operations in field conditions has occurred.

Yard

An open space that lies between the principal or accessory building or buildings and the nearest lot line. Such yard is unoccupied and unobstructed from the ground upward, except as may be specifically provided in the Zoning Ordinance.

Yard, Front

A space extending across the full width of the lot between the front lot line and the nearest line or point of the main building or of any accessory building or structure. (See Figure 280C)

Yard, Impound

The outside storage of autos, trucks, or other vehicles for commercial purposes.

Yard, Junk

The storage and dismantling of autos, trucks, or other machinery for commercial purposes. Includes salvage yards and dismantling yards.

Yard, Rear

A yard extending across the full width of the lot between the rear lot line and the nearest line or point of the main building or of any accessory building or structure. (See Figure 280C)

Yard, Side

A yard extending from the front yard to the rear yard between the side lot line and the nearest line or point of the main building or of any accessory building or structure. (See Figure 280C)

Zone Modification

Permission for minor departures from the literal requirements of the Zoning Ordinance.

Zoning

Dividing of the County into districts and the establishment of regulations governing the use, placement, spacing, and size of land and buildings.

Zoning District

A specifically delineated area or district in the County within which regulations and requirements uniformly govern the use, placement, spacing, and size of land and buildings.

SECTION 7282.01 PURPOSE AND APPLICATION

The purpose of this article is to establish guidelines for the interpretation of this chapter and to enumerate miscellaneous requirements applicable generally to the matters included in this chapter.

SECTION 7282.02 BOUNDARIES OF ZONING DISTRICTS

Where uncertainty exists as to the boundaries of any zoning district shown on the Official Zoning Maps, the following rules shall apply:

A. Where district boundaries are indicated as approximately following street, highway, railroads, and alley lines or lot lines, such lines shall be construed as extending to the centerline of such street, highway, railroad, or alley.

B. In unsubdivided property or where a zoning district boundary divides a lot, the location of district boundary, unless specified by dimensions, shall be determined by use of the scale appearing on the map.

C. In case any uncertainty exists, the Director of Planning and Development Services shall determine the location of district boundaries.

D. Where any public street or alley is officially vacated or abandoned, the regulations applicable to abutting property shall apply to the vacated or abandoned street or alley.

E. Where any private right-of-way or easement of any railroad, railway, canal, transportation, or public utility company is vacated or abandoned, the regulations applicable to abutting property shall apply to the centerline of such vacated or abandoned property, unless said right-of-way or easement has been previously zoned.

SECTION 7282.03 DETERMINATION OF SIMILAR USE

When a property owner, applicant, or potential applicant proposes or contemplates a use of property not expressly authorized as a permitted use or as a conditional use by the regulations of the applicable zoning district or districts, he/she may apply for a determination of similar use in accordance with the procedures set out in this section.

A. Application Contents:

An application for similar use shall be in writing on forms provided by the Director of Planning and Development Services and shall include the following:

1. Name of the applicant

2. Description of the proposed or contemplated use

3. Identification of the zoning district or districts in which the use is proposed or contemplated

4. Identification of the use or uses listed as permitted uses or conditional uses that most nearly resemble the proposed or contemplated use

5. Explanation of why the property owner, applicant, or potential applicant feels the proposed or contemplated use meets the criteria in Section 7282.03.E for determination of similar use

B. Time of Application:

An application for similar use may be submitted in conjunction with an application for a ministerial or discretionary permit described in this chapter or at any other time as may be convenient to the applicant.

C. Determination of Similar Use by the Director of Planning and Development Services:

Where an application for similar use is submitted in conjunction with an application for a ministerial permit or if a proposed or contemplated use is asserted to be similar to a permitted use in the applicable zoning district or districts where no permit application is submitted, the Director of Planning and Development Services shall make the determination of similar use. Such determination shall be made in accordance with the following procedures:

1. The determination shall be made in conjunction with the ministerial or discretionary decision on the application submitted in accordance with the procedures set out in Sections 7284.02 or 7284.03 or, where no ministerial or discretionary permit is involved, within forty-five (45) calendar days of submission of the application.

2. Written notice of such determination shall be given by mail within a timely manner after the date of the determination to the applicant and any person filing a written request for notice of the determination.

3. The decision of the Director of Planning and Development Services shall be final on the expiration of seven (7) calendar days from and including the date of mailing of notice of the decision, as required by paragraph 2, unless a notice of appeal is filed with the Director of Planning and Development Services within such time.

D. Appeal:

The determination of similar use by the Director of Planning and Development Services shall be subject to appeal to the Board of Supervisors:

1. The applicant for the determination may appeal from the decision of the Director of Planning and Development Services on the application for determination of similar use by filing a written notice of appeal with the Director of Planning and Development Services prior to the time the decision becomes final.

2. The Board of Supervisors may affirm or modify the determination of similar use by the Director of Planning and Development Services.

E. Basis for Determination of Similar Use:

The determination of similar use shall constitute a ministerial action. In making a determination of similar use, the Director of Planning and Development Services, or Board of Supervisors, acting on an appeal shall determine that a proposed or contemplated use is similar to a use

or uses expressly authorized in the applicable zoning district or districts if the proposed or contemplated use meets the following criteria:

1. The use resembles or is of the same basic nature as a use or uses expressly authorized in the applicable zoning district or districts in terms of the following:

   a. The activities involved in or equipment or materials employed in the use

   b. The effects of the use on the surrounding area, such as traffic impacts, noise, dust, odors, vibrations, and appearance

2. The use is consistent with the stated purpose of the applicable district or districts.

SECTION 7282.04 COUNTY REVIEW OF PUBLIC UTILITY USES

The provisions of this chapter shall not be construed to apply to the construction, installation, operation, and maintenance of public utility distribution and transmission lines, towers, and poles and underground facilities for providing gas, water, electricity, or telephone and telegraph services by public utility companies under the jurisdiction of the California Public Utilities Commission; provided, however, before any right-of-way for transmission lines is acquired for regional or interstate facilities, the proposed route shall be submitted for Director of Planning and Development Services review and recommendation.

SECTION 7282.05 INTERPRETATION OF MINIMUM LOT SIZES

For the purpose of complying with the minimum lot size and minimum lot area per dwelling unit requirements and other provisions of this chapter, the lot sizes or lot areas shall have the following meanings:

A. 1/4 acre : One-quarter (1/4) acre or ten thousand eight hundred and ninety (10,890) net square feet

B. 1/2 acre : One-half (1/2) acre or twenty-one thousand seven hundred and eighty (21,780) net square feet

C. 1 acre : One (1) net acre

D. 2 1/2 acres : Two and one-half (2-1/2) gross acres or a quarter of a quarter of a quarter of a quarter section of land containing not less than two (2) gross acres

E. 5 acres : Five (5) gross acres or a half of a quarter of a quarter of a quarter section of land containing not less than four (4) gross acres

F. 10 acres : Ten (10) gross acres or a quarter of a quarter of a quarter section of land containing not less than eight (8) gross acres

G. 20 acres : Twenty (20) gross acres or a half of a quarter of a quarter section of land containing not less than sixteen (16) gross acres

H. 40 acres : Forty (40) gross acres or a quarter of a quarter section of land containing not less than thirty-five (35) acres

I. 80 acres : Eighty (80) gross acres or a half of a quarter section of land containing not less than seventy (70) gross acres

SECTION 7282.06 DETERMINATION OF ACCESSORY USES AND STRUCTURES

If any question arises as whether any particular uses or structure is accessory to the primary use or structure in question, it shall be resolved based on the definitions of accessory building or structure or accessory use found in Section 7280.02 of this chapter and the following criteria:

A. Nature and size of the primary use or structure

B. Nature and size of the accessory use or structure

C. Relationship of the accessory use or structure to the primary use or structure

SECTION 7282.07 FRONT-YARD SETBACK EXCEPTION

Notwithstanding any of the minimum front-yard setbacks required in all of the E, R-1, R-2, and R-3 Districts, the front-yard minimum setback specified in these districts may be reduced where lots comprising forty (40) percent or more of the frontage on one (1) side of a street between intersecting streets are developed with buildings having an average front yard with a variation of not more than ten (10) feet. In such cases, no building newly erected or structurally altered may project beyond the average front yard line established by the existing buildings. In making this determination, buildings located more than thirty-five (35) feet from the front property line or buildings facing a side street on a corner lot shall not be counted. In no case shall any building or structure be located within any planned future right-of-way.

SECTION 7282.08 LESS RESTRICTIVE USES PROHIBITED

The express enumeration and authorization in this chapter of a particular class of building, structure, premises, or use in a designated zoning district shall be deemed a prohibition of such building, structure, premises, or use in all zoning districts of more restrictive classification, except as otherwise specified.

SECTION 7282.09 LOCATION OF DWELLINGS

Except where otherwise provided for in this chapter, every dwelling shall face or have frontage upon a street or permanent means of access to a street by way of a public or private easement or passageway other than the alley.

SECTION 7282.10 HEIGHT OF BUILDINGS

No penthouse or roof structures for the housing of elevators, stairways, tanks, ventilating fans or similar equipment, towers, steeples, roof signs, or other structures shall exceed the height limit provided in this chapter.

SECTION 7282.11 HEIGHT OF STRUCTURES

Radio and television masts, flagpoles, chimneys, and smokestacks may extend not more than forty-five (45) feet above the height limit specified in this chapter, provided that the same may be safely erected and maintained at such height in view of the surrounding conditions and circumstances. A tower constructed for the purpose of supporting a wind-driven power generator may extend not more than forty-five (45) feet above the height limit specified in this chapter, provided that the same may be safely erected and maintained at such height in view of the surrounding conditions and circumstances.

SECTION 7282.12 DWELLINGS AND OTHER OCCUPANCIES

Where a dwelling is located, placed, or erected above another type of use in zoning districts other than the E, E (1/2), E (1), E (2 1/2), E (5), E (10), E (20), R-1, R-2, or R-3 Districts, the rear and side yards for the floors occupied for dwelling purposes shall comply with the regulations of the R-3 District.

SECTION 7282.13 ACCESSORY BUILDINGS

The following regulations shall apply to the location of accessory buildings unless otherwise provided in this chapter:

A. No accessory buildings on the rear of a reverse corner lot in the E, E (1/2), E (1), E (2 1/2), E (5), E (10), E (20), R-1, R-2, or R-3 Districts shall be located nearer to the side lot line on the street side of such reversed corner lot than the front yard depth required on the key lot in the rear.

B. No accessory buildings or structures shall be located within a required front, side, or rear yard.

C. Accessory buildings may be considered a part of the main building if connected by a common wall of not less than five (5) feet in length, or if not more than twenty (20) feet from the main building and connected thereto by a roof of not less than five (5) feet in width.

D. One detached accessory building for use as a private garage may be permitted to occupy the required front yard of an interior lot in the E, E (1/2), E (1), E (2 1/2), E (5), E (10), E (20), R-1, R-2, or R-3 Districts when the slope of the front half of such lot is greater than one (1) foot rise or fall in the horizontal distance of four (4) feet from the established street elevation at the front property line; provided, however, that no portion of any such building shall be less than five (5) feet from the side or front property line of the lot and further provided that no such building shall exceed thirty-five (35) feet in height.

SECTION 7282.14 THROUGH LOTS

On through lots, either line separating the lot from a public thoroughfare may be designated by the owner as the front yard; however, the rear-yard setback shall be the same as the front-yard setback required on adjacent lots. (See Figure 282A)

SECTION 7282.15 YARD ENCROACHMENTS

Where yards are required by this chapter, those yards shall not be less in depth or width than the minimum dimension specified for any part, and they shall be at every point open and unobstructed from the ground upward, except as follows:

A. Cornices, canopies, eaves, or other similar architectural features not providing additional floor space within the building may extend into a required front, side, or rear yard no more than three (3) feet.

B. Open, unenclosed, uncovered porches, platforms, or landing places which do not extend above the level of the first floor of the building may extend into any front yard not more than six (6) feet, provided, however, that an open work railing, not more than thirty (30) inches in height, may be installed or constructed on any such porch, platform, or landing place.

C. Stairwells and connected platforms or landings extending above the level of the first floor of a building may protrude into a required front yard no more than six (6) feet.

SECTION 7282.16 FENCES, WALLS, AND HEDGES

A. In the E, E (1/2), E (1), E (2 1/2), E (5), E (10), R-1, R-2, and R-3 Districts, no fence, wall, or hedge located in the rear or side yards shall exceed a height of six (6) feet.

B. In the E, E (1/2), E (1), E (2 1/2), E (5), E (10), R-1, R-2, and R-3 Districts, no fence, wall, or hedge located in the required front yard shall exceed a height of four (4) feet.

C. Maximum fence, wall, or hedge height shall be measured from the finished interior grade. That portion of a wall or fence functioning as a retaining wall shall not be counted in determining overall fence or wall height. (See Figure 282B)

D. In the E, E (1/2), E (1), E (2 1/2), E (5), E (10), R-1, R-2, and R-3 Districts, no barbed wire shall be used or maintained as part or on any fence, wall, or hedge located along the front, side, or rear lines of any lot, or within three (3) feet of said lines, and no sharp wire or points shall project at the top of any fence or wall less than six (6) feet in height.

E. In the E, E (1/2), E (1), E (2 1/2), E (5), E (10), R-1, R-2, and R-3 Districts, no fence, wall, or hedge located in the rear twenty-five (25) feet of a through lot shall exceed four (4) feet in height.

SECTION 7282.17 STORAGE IN YARDS

Except as otherwise provided in Section 7220.09.G, no portion of any required front yard or side yard on the street side of a corner lot shall be used for the permanent storage of motor vehicles, trailers, airplanes, boats, parts of any of the foregoing, or building materials, except building materials for use on the premises stored thereon during the time a valid permit is in effect for construction on the premises.

SECTION 7282.18 COUNTY REVIEW OF PRIVATE OIL PIPELINES AND RELATED CONSTRUCTION FACILITIES

The provisions of this chapter shall not be construed to apply to the construction, installation, operation, and maintenance of pipelines for the transmission of crude oil operated by private enterprises; provided, however, before any right-of-way for transmission lines is acquired for regional or interstate facilities, the proposed route shall be submitted for Director of Planning and Development Services review and recommendation.

SECTION 7282.19 BUILDING ACROSS PROPERTY LINES

Provided legal parcels of record are owned by the same property owner(s), a building or buildings that establish the main use may be developed across property lines to merge the properties into one (1) parcel for the determination of property development standards.

SECTION 7282.20 RESIDENTIAL GARAGE CAPACITY

The capacity of single-family residential garages, whether attached or detached to the main dwelling unit, shall not exceed four (4) automobiles.

SECTION 7282.21 OIL AND GAS EXPLORATION BY SCIENTIFIC MEANS

The provisions of this chapter shall not be construed to apply to the exploration for oil and gas by scientific means.

PERMIT PROCEDURES

SECTIONS:

7284.01 PURPOSE AND APPLICATION
7284.02 MINISTERIAL PERMITS ISSUED BY THE DIRECTOR OF PLANNING AND DEVELOPMENT SERVICES
7284.03 DISCRETIONARY PERMIT DECISIONS BY THE DIRECTOR OF PLANNING AND DEVELOPMENT SERVICES
7284.04 DISCRETIONARY PERMIT DECISIONS BY THE BOARD OF ZONING ADJUSTMENT
7284.05 DISCRETIONARY PERMIT DECISIONS BY THE BOARD OF SUPERVISORS
7284.06 PERMIT REVOCATION AND MODIFICATION
7284.07 TIME LIMITATIONS ON CHALLENGES

SECTION 7284.01 PURPOSE AND APPLICATION

The purpose of this article is to establish review and approval procedures for ministerial and discretionary permits provided for by this chapter. Application contents and development standards and conditions for the approval of permits are contained in the appropriate articles of this chapter.

SECTION 7284.02 MINISTERIAL PERMITS ISSUED BY THE DIRECTOR OF PLANNING AND DEVELOPMENT SERVICES

The ministerial permits specified in this chapter for review pursuant to this section shall be issued by the Director of Planning and Development Services upon submission of an application containing the information specified in applicable sections of this chapter and a determination by the Director of Planning and Development Services that the proposed use or development meets the development standards and conditions specified in the applicable section or sections of this chapter. These permits include:

1. Temporary animal permits plot plan review (Sections 7020.13 and 7135.13)

2. Extensions for temporary mobilehomes and recreational vehicles (Sections 7025.13 and 7030.13)

3. Mobilehome park plot plan review (Section 7050.13)

4. Minor plan modifications (Sections 7115.13, 7125.13, 7130.13, and 7265.03)

5. Temporary use permits (Section 7125.13)

6. Wind generator plot plan review (Section 7145.13)

7. Geologic hazard plot plan review (Section 7155.13)

8. Architectural design plot plan review (Section 7170.13)

9. Airport approach height approval (Section 7175.13)

10. Special development standards plot plan review (Section 7215.03)

11. Off-street parking plot plan review not in conjunction with a ministerial permit (Section 7220.10)

12. Landscaping plot plan review not in conjunction with a ministerial permit (Section 7230.03)

13. Hillside development plot plan review (Section 7235.04)

14. Density bonus permit (Section 7245.03)

15. Home occupation permit (Section 7250.05)

16. Production water injection wells for the purpose of disposing of production wastewater produced in the same oilfield in which the injection well is located (Section 7260.03)

17. Oil and gas plot plan review (Section 7260.03)

A. Application and Approval:

1. An applicant for a ministerial permit pursuant to this section shall submit an application to the Director of Planning and Development Services in the format and number of copies specified by the Director of Planning and Development Services. The application shall contain all the information specified for the application by the applicable section of this chapter, unless the Director of Planning and Development Services waives any of the information requirements. The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 7294.03.

2. The Director of Planning and Development Services shall inform the applicant either verbally or in writing within seven (7) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

3. Within seven (7) calendar days of determining the application is complete, the Director of Planning and Development Services shall issue the permit if he/she determines that the proposed use or development standards meets the development standards and conditions specified in the applicable section or sections of this chapter or deny the permit if he/she determines that the proposed use or development does not meet the standards and conditions specified in the applicable section or sections of this chapter.

B. Appeal:

If the Director of Planning and Development Services denies a permit pursuant to this section, the applicant may appeal such action to the Board of Zoning Adjustment.

1. The applicant may file with the Director of Planning and Development Services a notice of appeal to the action of the Director of Planning and Development Services indicating the basis of appeal within seven (7) calendar days of such action. The appeal shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 7294.03.

2. The Board of Zoning Adjustment shall consider the appeal within thirty (30) days of the filing of such appeal. No public hearing or notice shall be required.

3. The Board of Zoning Adjustment may reverse or affirm the action of the Director of Planning and Development Services. The action of the Board shall constitute a ministerial action and shall be based solely on whether or not the proposed use or development meets the development standards and conditions specified in or established pursuant to the applicable section or sections of this chapter.

4. The decision of the Board of Zoning Adjustment pursuant to Section 7284.02.B.3 may be appealed to the Board of Supervisors pursuant to Section 7284.04.D.1.

SECTION 7284.03 DISCRETIONARY PERMIT DECISIONS BY THE DIRECTOR OF PLANNING AND DEVELOPMENT SERVICES

The discretionary permits specified in this chapter for review pursuant to this section may be issued by the Director of Planning and Development Services following submission of an application containing the information specified in the applicable section of this chapter and a properly noticed public hearing. These permits include:

1. Precise development plan review (Section 7125.13)

2. Cluster combining site development plan review (Section 7130.13)

3. Large family day-care home permit (Section 7255.03)

4. Conditional use permits and variances when filed in conjunction with an application for a discretionary permit to be heard by the Director of Planning and Development Services (Articles 7286 and 7288)

5. Zone modifications (Article 7290)

6. Extensions of time

A. Application:

1. An applicant for a discretionary permit pursuant to this section shall submit an application to the Director of Planning and Development Services in the format and number of copies specified by the Director of Planning and Development Services. The application shall contain all the information specified for the application by the applicable section of this chapter, unless the Director of Planning and Development Services waives any of the information requirements. The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 7294.03.

2. The Director of Planning and Development Services shall inform the applicant in writing within thirty (30) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

3. Upon acceptance of the application as complete and completion of an environmental document, if required, a public hearing shall be set in accordance with this article.

B. Notice and Hearing:

1. When an application has been accepted as complete in accordance with this article, the Director of Planning and Development Services shall set the application for a public hearing.

2. At least ten (10) calendar days before the date of any public hearing, the date, time, place of the hearing, identity of the hearing body, and the nature and location of the application shall be given by the following methods:

   a. Publishing such notice once in a newspaper of general circulation.

   b. Mailing or delivering notice, postage prepaid, to the property owner, the applicant, to each member of the Board of Supervisors, to the owners of all property within three hundred (300) feet of the exterior boundaries of the property which is subject of the application, and to any person who has filed a written request for such notice. For the purposes of this notice, property owners shall be the last known name and address of the property owner names on the last assessment roll of the County. If the number of owners to whom notice would be mailed or delivered pursuant to this paragraph is greater than one thousand (1,000), a display advertisement of at least one-eighth (1/8) page in at least one (1) newspaper of general circulation may be published at least ten (10) days prior to the hearing in lieu of mailed or delivered notice.

c. In lieu of the requirements set forth in Section 7284.03.B.2.a, notice may be given by posting notices not more than three hundred (300) feet apart along each street upon which the subject property abuts for a distance of not less than three hundred (300) feet in each direction from the exterior limits of the subject property.

3. Public Hearing:

A public hearing shall be held before the Director of Planning and Development Services at a time and place in accordance with the public notice. The Director of Planning and Development Services may establish his/her own rules for the conduct of such hearings. Evidence shall be offered or presented, and the name and address of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess, the Director of Planning and Development Services or his/her designee shall announce the time and place to which the hearing will be continued.

C. Decision:

1. The Director of Planning and Development Services may approve, conditionally approve, or deny any application following the close of the public hearing on the matter. Such decision shall include findings in accordance with the provisions of this chapter. The decision shall be final, subject to appeal in accordance with Section 7284.03.D.

2. Written notice of such decision shall be given by mail within seven (7) calendar days after the date of the decision to the applicant and any person filing a written request for notice of the decision.

3. The decision of the Director of Planning and Development Services shall be final on expiration of fourteen (14) calendar days from and including the date of decision, unless a notice of appeal is filed with the Director of Planning and Development Services within such time.

4. All conditions of approval shall be final, and a request to delete or to modify a condition to make it less restrictive shall only be considered at a properly noticed public hearing, unless said conditions are appealed pursuant to Section 7284.03.D.

D. Appeal:

1. Any decision of the Director of Planning and Development Services made pursuant to this section shall be subject to appeal to the Board of Supervisors.

2. The applicant or any other person aggrieved may appeal from such decision by filing a written notice of appeal with the Director of Planning and Development Services prior to the time the decision becomes final. The Director of Planning and Development Services shall furnish forms of notice of appeal. The appeal shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 7294.03.

3. Notice of the hearing on the appeal shall be given in the manner and time provided in Section 7284.05.B.

4. The Board of Supervisors may reverse, affirm wholly or partly, modify, or attach other or additional conditions to the decision appealed from.

5. The decision of the Board of Supervisors on any such appeal shall be final on adoption of an order or resolution containing its determination, and no notice thereof need be given.

E. Permit Issued:

No permit shall be issued prior to the expiration of any appeal period.

SECTION 7284.04 DISCRETIONARY PERMIT DECISIONS BY THE BOARD OF ZONING ADJUSTMENT

The permits specified in this section may be issued by the Board of Zoning Adjustment following submission of an application containing the information specified in the applicable section of this chapter and a properly noticed public hearing. These permits include:

1. Conditional use permits (Article 7286)

2. Variances (Article 7288)

3. Zone modifications when filed in conjunction with an application for a permit to be heard by the Board of Zoning Adjustment (Article 7290)

4. Surface mining permits and reclamation plans (Article 7265)

5. Extensions of time (Articles 7286, 7288, and 7290)

6. Secondary residential unit (Articles 7240 and 7286)

7. Density bonus permit, when filed in conjunction with an application for a permit to be heard by the Board of Zoning Adjustment (Section 7245.03)

A. Application:

1. An applicant for a discretionary permit pursuant to this section shall submit an application to the Director of Planning and Development Services in the format and number of copies specified by the Director of Planning and Development Services. The application shall contain all the information specified for the application by the applicable section of this chapter, unless the Director of Planning and Development Services waives any of the information requirements. The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 7294.03.

2. The Director of Planning and Development Services shall inform the applicant in writing within thirty (30) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

3. Upon acceptance of the application as complete and completion of an environmental document, if required, a public hearing shall be set in accordance with this article.

B. Notice and Hearing:

1. When an application has been submitted in accordance with this article, the Director of Planning and Development Services shall set the application for a public hearing.

2. At least ten (10) days before the date of any public hearing, the date, time, place of the hearing, identity of the hearing body, and the nature and location of the application shall be given by the following methods:

   a. Publishing such notice once in a newspaper of general circulation.

   b. Mailing or delivering notice, postage prepaid, to the property owner, the applicant, to each member of the Board of Supervisors, to each member of the Board of Zoning Adjustment, to the owners of all property within three hundred (300) feet of the exterior boundaries of the property which is subject of the application, and to any person who has filed a written request for such notice. For the purposes of this notice, property owners shall be the last known name and address of the property owner names on the last assessment roll of the County. If the number of owners to whom notice would be mailed or delivered pursuant to this paragraph is greater than one thousand (1,000), a display advertisement of at least one-eighth (1/8) page in at least one (1) newspaper of general circulation may be published at least ten (10) days prior to the hearing in lieu of mailed or delivered notice.

c. In lieu of the requirements set forth in Section 7284.04.B.2.a, notice may also be given by posting notices not more than three hundred (300) feet apart along each street upon which the subject property abuts for a distance of not less than three hundred (300) feet in each direction from the exterior limits of the subject property.

3. Public Hearing

A public hearing shall be held before the Board of Zoning Adjustment at a time and place in accordance with the public notice. The Board of Zoning Adjustment may establish its own rules for the conduct of such hearings. Evidence shall be offered or presented, and the name and address of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess the presiding officer shall announce the time and place to which the hearing will be continued.

C. Decision:

1. The Board of Zoning Adjustment may approve, conditionally approve, or deny any application following the close of the public hearing on the matter or within thirty-five (35) days thereafter by resolution. Such resolution shall include findings in accordance with the provisions of this chapter. The decision shall be final, subject to appeal in accordance with this article. In the event that the Board of Zoning Adjustment is unable to reach a majority decision, as evidenced by a tie vote, the applicant shall have the option of continuing the public hearing until such time as a majority vote can be obtained.

2. Written notice of such decision shall be given by mail within seven (7) calendar days after the date of the decision to the applicant and any person filing a written request for notice of the decision.

3. The decision of the Board of Zoning Adjustment shall be final on expiration of fourteen (14) calendar days from and including the date of the decision, as required by Section 7284.04.C.1, unless a notice of appeal is filed with the Director of Planning and Development Services within such time.

4. All conditions of approval shall be final, and a request to delete or to modify a condition to make it less restrictive shall only be considered at a properly noticed public hearing, unless said conditions are appealed pursuant to Section 7284.04.D.

D. Appeal:

1. Any decision of the Board of Zoning Adjustment made pursuant to this section shall be subject to appeal to the Board of Supervisors.

2. The applicant or any other person aggrieved may appeal from such decision by filing a written notice of appeal with the Director of Planning and Development Services prior to the time the decision becomes final. The Director of Planning and Development Services shall furnish forms of notice of appeal. The appeal shall be accompanied with the fee established by the Board of Supervisors pursuant to Section 7294.03.

3. Notice of the hearing on appeal shall be given in the manner and time provided in Section 7284.05.B. Notice of the hearing on appeal shall also be given not less than ten (10) days before such hearing to each person entitled to notice of the preceding decision.

4. The Board of Supervisors may reverse, affirm wholly or partly, modify, or attach other or additional conditions to the decision appealed from.

5. A decision of the Board of Supervisors on any such appeal shall be final on adoption of an order or resolution containing its determination, and no notice thereof need be given.

E. Permit Issued:

No permit shall be issued prior to the expiration of any appeal period.

SECTION 7284.05 DISCRETIONARY PERMIT DECISIONS BY THE BOARD OF SUPERVISORS

The discretionary permits specified in this chapter for review pursuant to this section may be issued by the Board of Supervisors following submission of an application containing the information specified in the applicable section of this chapter and a properly noticed public hearing. These permits include:

1. SP site development plan review (Section 7115.13)

2. Precise development plan review, with associated variances, zone modifications, or conditional use permits, when filed in conjunction with an application for a change of zone classification or tentative tract map (Section 7125.13 and Articles 7286, 7288, and 7290)

3. CL site development plan review (Section 7130.13) when filed in conjunction with an application for change of zone classification or with a tentative subdivision map

4. Density bonus permit when filed in conjunction with an application for a change of zone classification or an application for a permit to be heard by the Board of Supervisors (Section 7245.03)

5. Appeals of discretionary decisions by the Director of Planning and Development Services (Section 7284.03.D.1)

6. Appeals of Board of Zoning Adjustment decisions (Section 7284.04.D)

7. Conditional use permits, variances, and zone modifications when filed in conjunction with an application for a change in zone classification or for a tentative subdivision map (Articles 7286, 7288, and 7290)

8. Amendments to this chapter (Article 7292)

9. Application for change of zone classification (Article 7292)

10. Agricultural preserve inclusion or exclusion requests, agricultural preserve contracts, contract cancellation, and contract amendments

A. Application:

1. An applicant for a discretionary permit pursuant to this section shall submit an application to the Director of Planning and Development Services in the format and number of copies specified by the Director of Planning and Development Services. The application shall contain all the information specified for the application by the applicable section of this chapter, unless the Director of Planning and Development Services waives any of the information requirements. The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 7294.03.

2. The Director of Planning and Development Services shall inform the applicant in writing within thirty (30) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

3. Upon acceptance of the application as complete and completion of an environmental document, if required, a public hearing shall be set in accordance with Section 7284.05.B.

B. Notice and Hearing:

1. When an application has been submitted in accordance with Section 7284.05.A, the Director of Planning and Development Services shall set the application for a public hearing.

2. At least ten (10) days before the date of any public hearing, the date, time, place of the hearing, identity of the hearing body, and the nature and location of the application shall be given by the following methods:

   a. Publishing such notice once in a newspaper of general circulation.

   b. Mailing or delivering notice, postage prepaid, to the property owner, the applicant, to each member of the Board of Supervisors, to the owners of all property within three hundred (300) feet of the exterior boundaries of the property which is subject of the application, and to any person who has filed a written request for such notice. For the purposes of this notice, property owners shall be the last known name and address of the property owner names on the last assessment roll of the County. If the number of owners to whom notice would be mailed or delivered pursuant to this paragraph is greater than one thousand (1,000), a display advertisement of at least one-eighth (1/8) page in at least one (1) newspaper of general circulation may be published at least ten (10) days prior to the hearing in lieu of mailed or delivered notice.

   c. In lieu of the requirements set forth in Section 7284.05.B.2.a, notice may also be given by posting notices not more than three hundred (300) feet apart along each street upon which the subject property abuts for a distance of not less than three hundred (300) feet in each direction from the exterior limits of the subject property.

3. Public Hearing:

   A public hearing shall be held before the Board of Supervisors at a time and place in accordance with the public notice. The Board of Supervisors may establish rules for the conduct of such hearings. Evidence shall be offered or presented, and the name and address of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess, the presiding officer shall announce the time and place to which the hearing will be continued.

C. Decision:

1. The Board of Supervisors may approve, conditionally approve, or deny any application following the close of the public hearing on the matter or within thirty-five (35) days thereafter by resolution. Such decision may include findings in accordance with the provisions of this ordinance. The decision shall be final. An applicant, before a final vote is taken, may request a continuance until such time that all Board members are present to vote on the matter.

2. Written notice of such decision shall be given by mail within seven (7) calendar days after the date of the decision to the applicant and any person filing a written request for notice of the decision.

3. The decision of the Board of Supervisors shall be final on adoption of an order or resolution containing its determination.

D. Appeal:

There shall be no appeal from a decision by the Board of Supervisors under this chapter.

SECTION 7284.06 PERMIT REVOCATION AND MODIFICATION

Any permit, conditional use permit, variance, or zone modification issued pursuant to this article may be modified or revoked by the official or decisionmaking body that originally approved the permit by the same procedure under which the permit was issued for any of the following causes:

A. That any term or condition of the permit, conditional use permit, variance, or zone modification has not been complied with.

B. That the property or portion thereof subject to the permit, conditional use permit, variance, or zone modification is used or maintained in violation of any statute, ordinance, law, or regulation.

C. That the use for which the permit, conditional use permit, variance, or zone modification was granted has been so exercised as to be detrimental to the public health or safety or as to constitute a nuisance.

D. That changes in technology or in the type or amount of development in the vicinity of the use or other good cause warrants modification of the conditions of operation or imposition of additional conditions of operation to assure that the use remains compatible with existing and potential uses of other property within the general area in which the use is located.

SECTION 7284.07 TIME LIMITATIONS ON CHALLENGES

Any action or proceeding to attack, review, set aside, void, or annul any decision made pursuant to this article, or concerning any of the proceedings, acts, or determinations taken, done, or made prior to such decision, or to determine the reasonableness, legality, or validity of any condition attached thereto, shall not be maintained by any person unless the action or proceeding is commenced within thirty (30) days after the date of the decision and the legislative body is served within sixty (60) days after the date of the decision. Thereafter, all persons are barred from any such action or proceeding or any defense of invalidity or unreasonableness of that decision or of these proceedings, acts, or determinations.

CONDITIONAL USE PERMITS

SECTIONS:

7286.01 PURPOSE AND APPLICATION
7286.02 APPLICATION CONTENTS
7286.03 REVIEW AND APPROVAL PROCEDURES
7286.04 BASIS FOR APPROVAL
7286.05 TERMS AND CONDITIONS
7286.06 PERMIT REVOCATION AND MODIFICATION

SECTION 7286.01 PURPOSE AND APPLICATION

The purpose of this article is to establish procedures and general standards for the review and approval of conditional use permits authorized by various sections of this chapter. Whenever a use is listed in any section of this chapter as a use permitted subject to securing a conditional use permit, it shall be approved only if it is consistent with the General Plan and meets all requirements of this chapter and subject to any conditions deemed appropriate by the decisionmaking authority.

SECTION 7286.02 APPLICATION CONTENTS

An application for a conditional use permit shall include the following:

A. Name and address of applicant

B. Name(s) and address(es) of the property owner(s)

C. Assessor's parcel number(s)

D. Legal description of the property

E. A site development plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

1. Location of all existing buildings, structures, and improvements on the property

2. Location of all proposed buildings, structures, and improvements on the property

3. Existing and proposed streets and highways bordering and within the boundaries of the property

4. Location of existing and proposed parking areas

5. Proposed landscaping

6. North arrow

F. Elevations of proposed buildings or structures related to the conditional use permit

G. A narrative description of the proposed use or development including:

1. Description of the nature of the proposed use or development

2. Identification of the applicable zoning district or districts and the section of this chapter under which the conditional use permit is requested

3. Reasons applicant feels justify the granting of the conditional use permit

SECTION 7286.03 REVIEW AND APPROVAL PROCEDURES

The application for a conditional use permit shall be reviewed and approved, conditionally approved, or denied by the decisionmaking authority in accordance with the procedures set out in Article 7284 of this chapter.

SECTION 7286.04 BASIS FOR APPROVAL

The decisionmaking authority may approve or conditionally approve an application for a conditional use permit if it finds all of the following:

A. The proposed use is consistent with the goals and policies of the General Plan.

B. The proposed use is consistent with the purpose of the applicable district or districts.

C. The proposed use is listed as a use subject to a conditional use permit in the applicable zoning district or districts or a use determined to be similar to a listed conditional use in accordance with the procedures set out in Section 7282.03.

D. The proposed use meets the minimum requirements of this chapter applicable to the use and complies with all other applicable laws, ordinances, and regulations of the County of Kern and the State of California.

E. The proposed use will not be materially detrimental to the health, safety, and welfare of the public or to property and residents in the vicinity.

SECTION 7286.05 TERMS AND CONDITIONS

A. Any conditional use permit may include such terms and conditions deemed appropriate or necessary by the decisionmaking authority to make the findings specified in Section 7286.04. If no terms or conditions are specified, the use permit shall be considered unconditional and valid for an indefinite period.

B. If the development for which a conditional use permit has been approved pursuant to this article has not commenced, or permits for such development have not been issued, within one (1) year of the granting of the use permit, the use permit shall become null and void and of no effect, unless an extension has been granted by the Board of Zoning Adjustment, upon written request for an extension before the expiration of the one-(1-) year period. This provision shall not apply to applications approved in conjunction with another discretionary permit. In such cases, the expiration period shall coincide with that of the associated permit.

C. All conditions of approval shall be final, and a request to delete or to modify a condition to make it less restrictive shall only be considered at a property noticed public hearing, unless said conditions are appealed pursuant to Section 7284.04.D.

SECTION 7286.06 PERMIT REVOCATION AND MODIFICATION

Any conditional use permit issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

VARIANCES

SECTIONS:

7288.01 PURPOSE AND APPLICATION
7288.02 APPLICATION CONTENTS
7288.03 REVIEW AND APPROVAL PROCEDURE
7288.04 BASIS FOR APPROVAL
7288.05 TERMS AND CONDITIONS
7288.06 VARIANCE REVOCATION AND MODIFICATION

SECTION 7288.01 PURPOSE AND APPLICATION

Where special physical circumstances exist limiting the development of a particular property in accordance with development standards of a zoning district, relief from the development standards may be secured by the granting of a variance from those standards. The granting or denial of a variance will be based on whether the particular circumstances conform to the standards of this article. Under no circumstances will a variance from permitted or conditionally permitted uses be considered or granted.

SECTION 7288.02 APPLICATION CONTENTS

An application for a variance shall include the following:

A. Name and address of applicant

B. Name(s) and address(es) of the property owner(s)

C. Assessor's parcel number(s)

D. Legal description of the property

E. Site development plan drawn at a scale specified by the Director of Planning and Development Services, which includes:

   1. Location of all existing buildings, structures, and improvements on the property

   2. Location of all proposed buildings, structures, and improvements on the property

   3. North arrow

F. Elevations of all buildings or structures related to the variance sought

G. A narrative description of the proposed use or development, including:

1. Description of the nature of the proposed use or development

2. Identification of the applicable zoning district or districts and section(s) of this chapter containing the standards from which variance is sought

3. Explanation of the variance sought

4. Reasons applicant feels justify the granting of the variance

SECTION 7288.03 REVIEW AND APPROVAL PROCEDURE

The application for a variance shall be reviewed and approved, conditionally approved, or denied by the decisionmaking authority in accordance with the procedures set out in Article 7284 of this chapter.

SECTION 7288.04 BASIS FOR APPROVAL

The decisionmaking authority may approve or conditionally approve an application for a variance if it finds all of the following:

A. Special circumstances exist applicable to the subject property, including size, shape, topography, location, or surroundings, such that the strict application of the Zoning Ordinance deprives such property of privileges enjoyed by other property in the vicinity and in the same zoning district or districts.

B. The granting of the variance does not constitute a grant of special privileges inconsistent with the limitations upon other properties in the vicinity and zoning district in which such property is located.

C. The granting of the variance will not be materially detrimental to the public health, safety, or welfare or to property or residents in the vicinity.

SECTION 7288.05 TERMS AND CONDITIONS

A. Any variance granted may include such terms and conditions as deemed necessary or appropriate by the decision making authority to effect the purpose of this chapter. If no additional terms or conditions are specified, the variance shall be considered unconditional and valid for an indefinite period.

B. If the development for which a variance has been approved pursuant to this article has not commenced, or permits for each development have not been issued, within one (1) year of the granting of the variance, the variance shall become null and void and of no effect, unless an extension has been granted by the decision making authority, upon the written request for an extension before the expiration of the one- (1-)

year period. This provision shall not apply to applications approved in conjunction with another discretionary permit. In such cases, the expiration period shall coincide with that of the associated permit.

C. All conditions of approval shall be final, and a request to delete or to modify a condition to make it less restrictive shall only be considered at a properly noticed public hearing, unless said conditions are appealed pursuant to Section 7284.04.D.

SECTION 7288.06 VARIANCE REVOCATION AND MODIFICATION

Any variance issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

ARTICLE 7290

ZONE MODIFICATIONS

SECTIONS:

7290.01 PURPOSE AND APPLICATION
7290.02 APPLICATION CONTENTS
7290.03 REVIEW AND APPROVAL PROCEDURE
7290.04 DEVELOPMENT STANDARDS SUBJECT TO MODIFICATION
7290.05 BASIS FOR APPROVAL
7290.06 TERMS AND CONDITIONS
7290.07 ZONE MODIFICATION REVOCATION AND MODIFICATION

SECTION 7290.01 PURPOSE AND APPLICATION

The purpose of this article is to provide limited relief from the strict application of development requirements specified in this chapter where the granting of the modification would promote uniform development or relieve an unreasonable hardship, but would not be detrimental to the public health, safety, or welfare or to property or residents in the area. A zone modification shall not be granted where the relief sought should more appropriately be sought through the variance procedure.

SECTION 7290.02 APPLICATION CONTENTS

An application for a modification shall include the following:

A. Name and address of the applicant

B. Name(s) and address(es) of the property owner(s)

C. Assessor's parcel number(s)

D. Legal description of the property

E. Site development plan drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

1. Location of all existing buildings, structures, and improvements

2. Location of all proposed buildings, structures, and improvements

3. North arrow

F. Elevations of all buildings or structures related to the modification sought

G. A narrative description of the proposed use or development, including:

1. Description of the nature of the proposed use or development

2. Identification of the applicable zoning district or districts and Section(s) of this Chapter containing the standards for which the zone modification is sought

3. Explanation of the zone modification sought

4. Reasons applicant feels justify the granting of the zone modification

SECTION 7290.03 REVIEW AND APPROVAL PROCEDURE

An application for a modification shall be reviewed and approved, conditionally approved, or denied by the decisionmaking authority in accordance with the procedures set out in Article 7284 of this chapter.

SECTION 7290.04 DEVELOPMENT STANDARDS SUBJECT TO MODIFICATION

The decisionmaking authority may approve a zone modification to any of the following standards:

A. Minimum lot size requirements, not to exceed fifteen (15) percent reduction in such requirements.

B. Yard and setback requirements, not to exceed twenty-five (25) percent reduction in such requirements.

C. Height limits, excluding signs, not to exceed twenty-five (25) percent in such requirements.

D. Height, location, or construction requirements for fences, walls, and hedges.

SECTION 7290.05 BASIS FOR APPROVAL

The decisionmaking authority may approve, conditionally approve, or deny an application for a modification if it finds all of the following:

A. The modification does not exceed the limits specified in Section 7290.04.

B. The granting of the modification will not be materially detrimental to the public health, safety, or welfare or to property or residents in the vicinity.

C. Either of the following:

1. The modification would promote uniformity in development on the lot or in the area.

2. The modification would alleviate an unreasonable hardship on the property owner or applicant imposed by the strict application of the requirements of this chapter.

SECTION 7290.06 TERMS AND CONDITIONS

A. Any zone modification granted may include such terms and conditions as deemed necessary or appropriate by the decision making authority to effect the purpose of this chapter. If no additional terms or conditions are specified, the zone modification shall be considered unconditional and valid for an indefinite period.

B. If the development for which a zone modification has been approved pursuant to this article has not commenced, or permits for such development have not been issued, within one (1) year of the granting of the zone modification, the zone modification shall become null and void and of no effect, unless an extension has been granted by the decision making authority upon the written request for an extension before the expiration of the one- (1-) year period. This provision shall not apply to applications approved in conjunction with another discretionary permit. In such cases, the expiration period shall coincide with that of the associated permit.

C. All conditions of approval shall be final, and a request to delete or to modify a condition to make it less restrictive shall only be considered at a properly noticed public hearing, unless said conditions are appealed pursuant to Section 7284.04.D.

SECTION 7290.07 ZONE MODIFICATION REVOCATION AND MODIFICATION

Any zone modification issued pursuant to this article may be revoked or modified pursuant to Section 7284.06 of this chapter.

7292.03 INITIATION OF AMENDMENTS BY AN INTERESTED PERSON
7292.04 NOTICE OF PUBLIC HEARING
7292.05 PUBLIC HEARING
7292.06 DECISION
7292.07 TIME LIMITATIONS ON CHALLENGES

SECTION 7292.01 PURPOSE AND APPLICATION

The purpose of this article is to establish procedures for the amendment of this Zoning Ordinance and Official Zoning Maps. Amendments to this chapter may be initiated by the Board of Supervisors on its own motion or by the application of any interested person.

SECTION 7292.02 INITIATION OF AMENDMENTS BY THE BOARD OF SUPERVISORS

The Board of Supervisors may at any time and in any form deemed appropriate by the Board initiate an amendment to any portion of this chapter. An amendment may be any of the following types:

A. An amendment to the text of this chapter not changing regulations or standards affecting the use of any property.

B. An amendment to the text of this chapter changing regulations or standards affecting the use of property.

C. Amendment to the Official Zoning Maps reclassifying property from one district to another, including applying a combining district to, or removing a combining district from, property.

SECTION 7292.03 INITIATION OF AMENDMENTS BY AN INTERESTED PERSON

A property owner, his/her authorized representative, or any other interested person may initiate an amendment to the Official Zoning Maps to reclassify property from one district to another by submitting an application to the Director of Planning and Development Services.

A. An application for a reclassification of property shall include:

1. The name and address of the applicant

2. The name(s) and address(es) of the property owner(s)

3. Assessor's parcel number(s)

4. Legal description of the property

5. A map of the property

6. Identification of the zoning district reclassification being sought

7. Signatures or letter of consent from all property owners of record

The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 7296.02.

B. The Director of Planning and Development Services shall inform the applicant in writing within thirty (30) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

SECTION 7292.04 NOTICE OF PUBLIC HEARING

A. At least ten (10) days before the date of any public hearing on a proposed amendment to the text of this chapter changing regulations or standards affecting the use of any property or on an amendment to the Official Zoning Maps reclassifying property from one district to another, notice of the hearing, identity of the hearing body, and the nature of the amendment, identification of affected properties, shall be given by the following methods:

1. Publishing such notice once in at least one (1) newspaper of general circulation.

2. Mailing or delivering notice, postage prepaid, to the property owner, the applicant, to each member of the Board of Supervisors, to each member of the Board of Zoning Adjustment, to the owners of all property within three hundred (300) feet of the exterior boundaries of the property which is subject of the application and to any person who has filed a written request for such notice. For the purposes of this notice, property owners shall be the last known name and address of the property owner names on the last assessment role of the County. If the number of owners to whom notice would be mailed or delivered pursuant to this paragraph is greater than one thousand (1,000), a display advertisement of at least one-eighth (1/8) page in at least one (1) newspaper of general circulation may be published at least ten (10) days prior to the hearing in lieu of mailed or delivered notice.

3. In lieu of the requirements set forth in Section 7292.04.A.1, notice may also be given by posting notices not more than three hundred (300) feet apart along each street upon which the subject property abuts for a distance of not less than three hundred (300) feet in each direction from the exterior limits of the subject property.

B. At least ten (10) days before the date of any public hearing on a proposed amendment to the text of this chapter not changing regulations or standards affecting the use of any property, notice of the hearing, including the date, time, place of the hearing, identity of the hearing body, and the nature of the amendment, shall be given by publishing such notice once in at least one (1) newspaper of general circulation.

SECTION 7292.05 PUBLIC HEARING

A public hearing shall be held before the Board of Supervisors at a time and place in accordance with the public notice. The Board of Supervisors may establish rules for the conduct of such hearings. The name and address of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess, the Board of Supervisors shall announce the time and place to which the hearing will be continued.

SECTION 7292.06 DECISION

A. The Board of Supervisors shall approve by ordinance or deny by order the proposed amendment within thirty-five (35) days following the close of the public hearing. The decision shall be final.

B. Where the amendment was initiated by an interested person pursuant to Section 7292.03, written notice of the decision shall be given by mail within seven (7) days after the date of the decision to the applicant and any person filing a written request for notice of the decision.

SECTION 7292.07 TIME LIMITATIONS ON CHALLENGES

Any action or proceeding to attack, review, set aside, void, or annul any decision made pursuant to this article, or concerning any of the proceedings, acts, or determinations taken, done, or made prior to such decision, or to determine the reasonableness, legality, or validity of any condition attached thereto, shall not be maintained by any person unless the action or proceeding is commenced within thirty (30) days after the date of decision, and the legislative body is served within sixty (60) days after the date of the decision. Thereafter, all persons are barred from any such action or proceeding or any defense of invalidity or unreasonableness of that decision or of these proceedings, acts, or determinations.

ARTICLE 7294

ADMINISTRATION

SECTIONS:

7294.01 PURPOSE AND APPLICATION
7294.02 DIRECTOR OF PLANNING AND DEVELOPMENT SERVICES DELEGATION
7294.03 FEES

SECTION 7294.01 PURPOSE AND APPLICATION

The purpose of this article is to establish general rules for the administration of this chapter.

SECTION 7294.02 DIRECTOR OF PLANNING AND DEVELOPMENT SERVICES DELEGATION

The Director of Planning and Development Services may delegate any responsibility or authority charged to him/her by any section of this chapter to any employee of the Kern County Department of Planning and Development Services, any employee of any department of the County of Kern, or a committee of employees of the County of Kern. Any employee or employees so designated may act on behalf of the Director of Planning and Development Services in a matter or proceeding specified in this chapter.

SECTION 7294.03 FEES

The Board of Supervisors may establish a reasonable fee for processing any application specified in this chapter, provided the fee does not exceed the estimated actual cost of processing such application. The Board of Supervisors shall adopt and may periodically revise a schedule of fees for processing such applications.

ARTICLE 7296

NONCONFORMING STRUCTURES, USES, LOTS, AND SIGNS

SECTIONS:

7296.01 PURPOSE AND APPLICATION
7296.02 NONCONFORMING STRUCTURES
7296.03 NONCONFORMING USES OF STRUCTURES
7296.04 NONCONFORMING USES OF LAND
7296.05 NONCONFORMING LOTS
7296.06 NONCONFORMING SETBACKS
7296.07 NONCONFORMING SIGNS
7296.08 DETERMINATION OF NONCONFORMING STATUS

SECTION 7296.01 PURPOSE AND APPLICATION

Within the zoning districts established by this chapter, or as subsequently amended, there exist structures, uses, lots, and signs which were lawful before this chapter was passed or amended but which would be prohibited or restricted under the conditions of this chapter or future amendments. The Board of Supervisors of Kern County declares that nonconforming structures, uses, lots, and signs are incompatible with permitted uses in the zoning districts involved and such nonconforming uses, lots, and signs shall not be enlarged, expanded, or extended. Such nonconforming structures, uses, and signs shall not be used as grounds for adding other structures or uses prohibited by this chapter.

SECTION 7296.02 NONCONFORMING STRUCTURES

A. Any nonconforming structure may be continued and maintained provided there is no physical change other than necessary maintenance and repair in such a structure, except as otherwise provided by this article.

B. A nonconforming structure shall not be enlarged in area, space, or volume.

C. Any nonconforming structure which is vacant for a period of one (1) year or more shall not again be used or occupied for a nonconforming use.

D. Any nonconforming structure may be reconstructed, repaired, or rebuilt when damaged by fire, earthquake, explosion, or act of God if the reconstruction and repair expense does not exceed one hundred and fifty (150) percent of the actual cash value of the building at the time such damage occurred and provided there is no expansion of the total area of the building as it existed prior to the damage. All such reconstruction shall be commenced within one (1) year from the date of damage.

SECTION 7296.03 NONCONFORMING USES OF STRUCTURES

A. Any nonconforming use may be maintained and continued provided there is no increase or enlargement of the area, space, or volume occupied or devoted to such nonconforming use, except as otherwise provided in this chapter.

B. Any part of a building, structure, facility, or land occupied by a nonconforming use that is changed to or replaced by a use conforming to the provisions of this chapter shall not thereafter be used or occupied by a nonconforming use.

C. Any part of a building, structure, facility, or land occupied by a nonconforming use that has been abandoned for a period of one (1) year or more shall not again be used or occupied for a nonconforming use.

D. If no structural alterations are made, a nonconforming use of a building may be changed to a similar or less intense nonconforming use.

SECTION 7296.04 NONCONFORMING USES OF LAND

A. A nonconforming use of land shall not be expanded or extended in any way.

B. A nonconforming use of land shall not be changed to or replaced by any other use except a use that complies with the regulations of the zoning district in which the subject property lies.

C. Any nonconforming use of land that has been abandoned for a period of one (1) year or more shall not be reestablished.

D. Nonconforming uses of land where no main building or facility has been established shall be discontinued within three (3) years of the effective date of this section.

E. The exploration for or development or production of oil, gas, or other hydrocarbon substances shall not be considered nonconforming uses of land.

SECTION 7296.05 NONCONFORMING LOTS

Any lot which was legally recorded prior to the effective date of this chapter may be used in conformance with the uses permitted by the zoning district in which it is located, provided that all yard and setback requirements are met.

SECTION 7296.06 NONCONFORMING SETBACKS

Any use permitted under the provisions of this chapter that currently exists with nonconforming setbacks may be replaced in the same location if damaged or destroyed by fire, earthquake, explosion, or act of God regardless of the cost of such reconstruction.

SECTION 7296.07 NONCONFORMING SIGNS

A. The provisions of this section shall apply to all signs in the unincorporated County not otherwise regulated by State or federal law. Except as otherwise provided in this article, any sign lawfully in use on the effective date of this chapter but made nonconforming thereby may continue to be used for a period of five (5) years. Any sign which becomes nonconforming because of an amendment to this chapter may continue to be used for a period of five (5) years from the effective date of such amendment.

B. Nonconforming signs in existence beyond five (5) years, as provided for in Section 7296.06.A, are hereby declared illegal signs and a public nuisance and shall be abated as provided for in Article 7298 of this chapter.

C. Nonconforming signs shall be kept in good repair during the five- (5-) year period the sign may be used. Alterations or modifications to any nonconforming sign are prohibited, except for structural repair resulting in the same size or shape.

D. A requirement for a nonconforming sign to be removed or altered so as to comply with the requirements of this chapter may be imposed as a condition on the approval of a subdivision, conditional use permit, variance, or other discretionary development approval.

SECTION 7296.08 DETERMINATION OF NONCONFORMING STATUS

Where there is doubt regarding the legal nonconforming status of structures, uses of structures, uses of land, parcel size, or signs, documentation shall be submitted to the Director of Planning and Development Services to establish legal nonconforming status.

ARTICLE 7298

ENFORCEMENT AND PENALTIES

SECTIONS:

7298.01 PURPOSE AND APPLICATION
7298.02 COMPLAINTS REGARDING VIOLATION
7298.03 INSPECTION
7298.04 MISDEMEANOR
7298.05 INJUNCTIVE RELIEF
7298.06 ABATEMENT PROCEEDING
7298.07 NONCOMPLIANCE WITH PERMIT CONDITIONS
7298.08 VALIDITY AND ISSUANCE OF PERMITS

SECTION 7298.01 PURPOSE AND APPLICATION

The purpose of this article is to establish provisions for enforcement of this chapter. The steps in the process are outlined as well as the penalties involved. This section puts all persons on notice as to the proceedings and penalties involved if any provision of this chapter is violated. The procedures contained in this article do not limit or modify the authority of the County of Kern to pursue enforcement under the provisions of Article 7265 of this chapter.

SECTION 7298.02 COMPLAINTS REGARDING VIOLATION

Whenever a violation of this chapter occurs or is alleged to have occurred, any person may file a complaint with the Building Official stating fully the causes and basis thereof. The complaint shall be investigated, and such action thereon as provided by this chapter taken as deemed appropriate.

SECTION 7298.03 INSPECTION

The Building Official may upon the presentation of proper credentials to the occupant or owner enter any premises, building, or structure at any reasonable time for the purpose of investigating and inspecting said premises, building, or structure to determine if the same are being used in compliance with the provisions of this chapter. If admission or entry is refused, the Building Official may apply to the District Attorney to obtain an inspection warrant.

SECTION 7298.04 MISDEMEANOR

Any person, firm, corporation, owner of the land, or possessor who violates or who causes permits or allows a violation of any provision of the Zoning Ordinance of Kern County shall be guilty of a misdemeanor and upon conviction thereof, by fine of not more than five hundred dollars ($500) or by imprisonment in the County Jail for not exceeding six (6) months, or by both

such fine and imprisonment. Each day the violation of this chapter continues shall be considered a separate offense.

SECTION 7298.05 INJUNCTIVE RELIEF

The County may seek injunctive relief in Superior Court to abate any violation of this chapter. Injunctive relief may be sought at any time, including prior to the issuance or compliance with the Notice of Violation if, in the opinion of the Building Official, an alleged violation of this chapter may be injurious to the public health or safety.

SECTION 7298.06 ABATEMENT PROCEEDING

Any building or structure, set up, erected, constructed, altered, enlarged, converted, moved or maintained contrary to the provisions of this chapter or any use of land, building, or premises conducted, operated, or maintained contrary to the provisions of this chapter or contrary to a permit or variance or the terms and conditions imposed therein shall be, and the same is hereby declared to be, unlawful and a public nuisance, and the District Attorney shall commence action or proceedings for the abatement and removal and enjoinment thereof in the manner provided by law and shall take such other steps and shall apply to such court or courts as may have jurisdiction to grant relief as will abate and remove such building or structure and restrain and enjoin any person, firm, or corporation from setting up, erecting, building, maintaining, or using any such building, structure, or vehicle or using any property contrary to the provisions of this chapter.

SECTION 7298.07 NONCOMPLIANCE WITH PERMIT CONDITIONS

Whenever a complaint has been received or any County official believes that the conditions of a permit, variance, or other entitlement granted under the provisions of this chapter have been violated, the Building Official shall investigate such allegations. If such a violation, in the opinion of the Building Official, has occurred, an Official Notice to Comply and/or compliance letter may be given. If correction of the violation(s) does not occur within the specified period, the Building Official may initiate revocation proceedings in accordance with the provisions of Section 7284.06 of this chapter.

SECTION 7298.08 VALIDITY AND ISSUANCE OF PERMITS

No department, official, or employee of the County of Kern vested with the duty or authority to issue permits or licenses for buildings, structures, or uses subject to the requirements of this chapter shall issue a permit or license in conflict with the provisions of this chapter; any permit or license issued in conflict with any provision of this chapter shall be null and void. Further, no permit or license shall be issued by any department, official, or employee of the County of Kern for any building, structure, or use subject to the requirements of this chapter on a parcel of land where the department, official, or employee is aware that a violation of this chapter exists.

Warehouse

Other Industrial Uses

Assaying
Bag cleaning
Bakery, large
Beverage bottling works
Billboard sign fabrication and storage
Boat building and major repair
Cabinet or carpenter shop
Concrete batch plant
Electroplating
Machine shop
Metal, glass, or paper recycling facility
Metal extrusion
Neon sign manufacturing
Newspaper, magazine, or book printing
Photographic processing plant or wholesale supply
Rock, gravel, sand, or soil crushing, processing, or distribution
Sandblasting
Sheet metal shop
Tire retreading
Well drilling service
Welding or blacksmith
Wholesale distribution

TRANSPORTATION FACILITIES

Airport, private
Airport, public use
Auto parking lot
Auto parking garage or lot
Bus depot
Heliport
Railroad freight classification or switching yard
Railroad station
Taxi depot

UTILITY AND COMMUNICATION FACILITIES

Communications equipment building
Microwave relay station
Radio, television, or commercial communications transmitter, receiver, or translator
Transmission lines, towers, poles, pipelines, and underground facilities for gas, water, electricity, telephone or telegraph service owned and operated by a public utility company under the jurisdiction of the California Public Utilities Commission
Utility substation

RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

Administrative offices, accessory structures and attendant equipment storage for natural resource extraction or processing uses
Assessory structures and storage for natural resource extraction or processing uses
Cogeneration facility
Concrete or asphalt batch plant
Dam, small hydro
Dam, large hydro
Disposal of nonhazardous oil field liquid waste and production water
Electrical distribution stations
Electrical power generating plant
Explosives storage
Mineral exploration
Mining and mineral extraction
Oil or gas exploration and production
Production water injection
Rock, gravel, sand, or soils crushing, processing, or distribution
Solar energy electrical generators
Wind-driven electrical generators

WASTE FACILITIES

Hazardous waste disposal facility
Nonhazardous oily waste disposal facility
Sanitary landfill
Septage disposal site
Sewage treatment plant
Transfer station, large volume
Transfer station, small volume
Waste-to-energy facility

Amendments to Kern County Zoning Ordinance - 1990; Kern County Department of Planning and Development Services; Countywide; a revision to the Kern County Zoning Ordinance text which includes various minor changes throughout the ordinance. No changes in zoning district classification are proposed. Zoning Ordinance text amendments include, but are not limited to, the addition of use categories to various zone district classifications, addition and modification of pertinent definitions, minor changes in sign regulations, and other changes as recommended by the Kern County Department of Planning and Development Services; DP&DS recommendation: Approve Zoning Ordinance text revisions as recommended; General Rule (SD All Districts) (All adjudicated newspapers) - (Tape 922) HEARING OPENED; NO ONE HEARD; HEARING CLOSED; ADOPTED RESOLUTION 90-699 AND ENACTED ORDINANCE G-5346 APPROVING KERN COUNTY ZONING ORDINANCE TEXT REVISIONS AS RECOMMENDED

FILE COPY

ORDINANCE NO. G-5346

AN ORDINANCE OF THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN, STATE OF CALIFORNIA, CONCERNING VARIOUS REVISIONS OF THE ZONING ORDINANCE TEXT, INCLUDING BUT NOT LIMITED TO ADDITIONAL WE CATEGORIES IN VARIOUS ZONE DISTRICT CLASSIFICATIONS. ADDITION AND MODIFICATION OF VARIOUS DEFINITIONS, MINOR CHANGES IN SIGN AND FENCE REGULATIONS, AND OTHER CHANGES

The following ordinance, consisting of one hundred seven (107) sections, was duly and regularly passed and adopted by the Board of Supervisors of the County of Kern, State of California, at a regular meeting of the Board of Supervisors held on the 13th day of August, 1990, by the following vote, to wit:

AYES: Ashburn, Austin, Larwood, Hettinger

NOES: None

ABSENT: Shell

Pauline Larwood

Chairman of the Board of Supervisors of the County of Kern, State of California

(SEAL)

ATTEST:

SUE LASITER
Clerk of the Board of Supervisors

By Kaaren Shatswell, Deputy Clerk

THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN ORDAINS AS FOLLOWS:

Section 1. This ordinance shall take effect and be in full force on and after the 12th day of September, 1990, and shall be published once in the Bakersfield Californian, a newspaper of general circulation, published in the County of Kern, State of California, together with the names of the members of the Board of Supervisors voting for and against the same.

COPIES FURNISHED:
Co Counsel, Planning
Tax Collector

Section 2. Section 19.04.264 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.264 FARM LABOR HOUSING, ON-SITE EMPLOYEE

"Farm labor housing, on-site employee" means living quarters, either single-family or group housing related to commercial agricultural uses, provided for full-time, year-round farm laborers employed on the site or on lands owned or leased by the owner of the living quarters, and who derive their primary source of yearly income from this employment.

Section 3. Section 19.04.331 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.331 HEAVY EQUIPMENT

"Heavy equipment" means equipment normally utilized in heavy construction projects and includes, but is not limited to, earthmoving equipment, road work and paving equipment, cranes, dump trucks, large tractors, water trucks, cement trucks, back hoes, excavators, compactors, zoom booms, concrete saws, forklifts, vibrators, platform lifts, and any other piece of equipment determined by the Director of the Department of Planning and Development Services as belonging to the heavy equipment category.

Section 4. Section 19.04.624 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.624 RESIDENTIAL ACCESSORY STRUCTURES

"Residential accessory structures" means buildings and structures normally associated with dwellings, such as detached garages, carports, greenhouses, storage buildings, and swimming pools, but excluding cargo containers, barns, or other structures intended exclusively for agriculture-related uses. Residential accessory structures shall be clearly subordinate to the residential use of the property and in no case shall the gross floor area of a residential accessory structure exceed the gross floor area of the primary residence.

Section 5. Section 19.04.684 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.684 SIGN

"Sign" means any object, device, display, or structure, or part thereof, situated outdoors or indoors, which is used to advertise, identify, display, or direct attention to an object, person, institution, organization, business, product, service, event, or location by any means, including words, letters, logos, figures, design, symbols, fixtures, colors, illumination, or projected images.

Section 6. Subsection 19.08.200(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.200 YARD ENCROACHMENTS

A. Cornices, canopies, eaves, fireplaces, or other similar architectural features not containing vertical supports and not providing additional floor space within the building may extend into a required front, side, or rear yard no more than three (3) feet.

Section 7. Subsections 19.08.200(B), (C), and (D) remain unchanged.

Section 8. Section 19.08.210 is hereby amended to read as follows:

19.08.210 FENCES, WALLS, AND HEDGES

A. In the MS, E (1/4), E (1/2), E (1), E (2 1/2), E (5), E (10), R-1, R-2, and R-3 Districts, no fence, wall, or hedge located in the rear or side yards shall exceed a height of six (6) feet, except when a higher fence, wall, or hedge is required as a condition of approval of a discretionary permit except when approved by the Director in the manner contained in Subparagraph (F) below.

B. In the MS, E (1/4), E (1/2), E (1), E (2 1/2), E (5), E (10), R-1, R-2, and R-3 Districts, no fence, wall, or hedge located in the required front yard shall exceed a height of four (4) feet except when a higher fence, wall, or hedge is required as a condition of approval of a discretionary permit or except when approved by the Director in the manner contained in Subparagraph (F) below.

C. Maximum fence, wall, or hedge height shall be measured from the finished interior grade. That portion of a wall or fence functioning as a retaining wall shall not be counted in determining overall fence or wall height. (See Figure 19.08.210)

D. In the MS, E (1/4), E (1/2), E (1), E (2 1/2), E (5), E (10), R-1, R-2, and R-3 Districts, no barbed wire shall be used or maintained as part or on any fence, wall, or hedge located along the front, side, or rear lines of any lot, or within three (3) feet of said lines, and no sharp wire or points shall project at the top of any fence or wall less than six (6) feet in height. No electrified fences shall be permitted, regardless of location.

E. In the MS, E (1/4), E (1/2), E (1), E (2 1/2), E (5), E (10), R-1, R-2, and R-3 Districts, no fence, wall, or hedge located in the rear twenty-five (25) feet of a through lot or a reversed corner lot shall exceed four (4) feet in height, except when a higher fence, wall, or hedge is required as a condition of approval of a discretionary permit, or except when approved by the Director in the manner contained in Subparagraph (F) below.

F. A public hearing is conducted using the procedure in Chapter 19.110, except that Section 19.110.050 shall not apply to such hearing. Heights exceeding the maximum heights otherwise permitted by this Section may be allowed if the Director makes the following findings:

1. The increased height will permit appropriate development on the property;

2. The increased fence height is compatible with development in the vicinity; and

3. The increased fence height will not create traffic hazards in the project vicinity.

Section 9. Section 19.08.220 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.220 STORAGE IN YARDS

Except as otherwise provided in Subsection (G) of Section 19.82.090 of this title, no portion of any required front yard or side yard on the street side of a corner lot shall be used for the permanent storage, defined as any forty-eight (48) hour period, of motor vehicles, trailers, airplanes, boats, parts of any of the foregoing, except that one (1) recreational vehicle designed for human occupancy or one (1) boat may be so stored, provided that the recreational vehicle or boat is fully operational and is currently licensed and/or registered. Additionally, no such areas shall be utilized for the storage of scrap metals or other scrap materials, machinery, appliances, furniture, or equipment or parts thereof, except for building materials and equipment for use on the premises stored thereon during the time a valid permit is in effect for construction on the premises.

Section 10. Section 19.08.225 of the Ordinance Code of the County of Kern is hereby added to read as follows:

19.08.225 STRUCTURES AND STORAGE IN PUBLIC ROADS

No structures shall be constructed, erected, or maintained within a County road right-of-way or public access easement, except where otherwise expressly authorized by law. Storage of any equipment or material shall be prohibited within a County road right-of-way or public access easement, except where otherwise expressly authorized by law.

Section 11. Section 19.08.252 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.252 TRUCK PARKING AS A RESIDENTIAL ACCESSORY USE

Truck parking, when accessory and incidental to an established residential use, shall be permitted provided that there is no more than one (1) truck which does not exceed a gross weight of two (2) tons and which is driven to and from the resident's place of employment on a regular basis or which is utilized in conjunction with an approved home occupation pursuant to Chapter 19.94 of this title. No commercial vehicle having a manufacturer's gross vehicle weight rating of ten thousand (10,000) pounds or more shall be parked or stored on any public or private street within a residential district.

Section 12. Section 19.08.290 of the Ordinance Code of the County of Kern is hereby added to read as follows:

19.08.290 TEMPORARY BATCH PLANTS

Temporary portable batch plants related to a specific construction project and for a one-time period of thirty (30) days or less may be authorized by the Director of the Department of Planning and Development Services in the A (Exclusive Agriculture), NR (Natural Resource), M-2 (Medium Industrial), and M-3 (Heavy Industrial) Districts after review and approval of a written request, which shall include an operations statement describing the equipment and processes to be utilized, the purpose of the temporary batch plant, and a plot plan.

Section 13. Section 19.08.300 of the Ordinance Code of the County of Kern is hereby added to read as follows:

19.08.300 PUBLIC ACCESS EASEMENTS

All setback requirements contained in this title shall apply to all public access easements, in addition to publicly-maintained streets or roads. All public access easements shall be kept free and clear of all obstructions.

Section 14. Subparagraph (2) of Subsection 19.12.020(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.12.020 PERMITTED USES

A. AGRICULTURAL USES

2. Breeding and Raising Animals

— Bee keeping

— Beef cattle or livestock grazing

— Birds, including show or racing pigeons and other small fowl

— Dairy stock grazing

— Fish and frogs

— Hogs, excluding a hog farm or ranch

— Horses, donkeys, llamas, or mules

— Poultry, including hatching, breeding, butchering, processing, or shipping of chickens, ostriches, turkeys, or other fowl or poultry, including eggs

— Rabbits or fur-bearing animals

— Sheep or goats

Section 15. Subsections 19.12.020(A)(1), (A)(3), (B), (C), (D), (E), and (F) remain unchanged.

Section 16. Subparagraph (2) of Subsection 19.12.030(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.12.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

A. AGRICULTURAL USES

2. Agricultural Industries

— Alcohol distillery

— Agricultural chemical storage and repackaging

— Agricultural trucking facilities

— Brewery

— Biomass energy conversion

— Cold storage facility for agricultural products

— Contract harvesting

— Cotton gin

— Creamery

— Dairy

— Farm machinery and equipment repair

— Fertilizer manufacture and storage for agricultural use only

— Flour mill

— Fruit, vegetable, and plant products processing, including freezing, packing, preserving, and shipping

— Glucose processing

— Grain elevator or storage

— Oil extraction, nonmineral

— Saw or planing mill

— Tasting room, when accessory to an existing winery or brewery

— Winery

— Wool pulling and scouring

Section 17. Subsection 19.12.030(D) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.12.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

D. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

— Equestrian establishment

— Golf course

— Guest ranch, when accessory to a commercial ranching operation

— Lakes, private, for recreational skiing or boating

— Park or playground

— Racetrack or test track, automobile, bicycle, horse, or motorcycle

— Recreational vehicle park

— Shooting range or gun club, simulated war games, or similar activities, outdoor only

— Trade fairs and exhibitions, temporary (fourteen- (14-) day maximum), excluding flea markets and swap meets

Section 18. Subsection 19.12.030(H) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.12.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

H. WASTE FACILITIES

— Hazardous waste disposal facility

— Nonhazardous oil production and/or oily waste disposal facility

— Sanitary landfill

— Septage disposal site

— Sewage sludge composting

— Sewage treatment plant

— Transfer station, large volume

— Transfer station, small volume

— Waste-to-energy facility

Section 19. Subsections 19.12.030(A)(1), (B)) (C), (E), (F), (G), (I), (J), and (K) remain unchanged.

Section 20. Subsection 19.12.090(B) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.12.090 MINIMUM DISTANCE BETWEEN STRUCTURES

B. There shall be at least six (6) feet between a residential building and any nonresidential structure, except that animals, pens, coops, stables, barns, corrals, other structures for housing livestock and buildings for processing, packing, or storing agricultural produce shall be at least one hundred (100) feet away from any residential building. There shall be a minimum setback of twenty (20) feet between an on-site residential building and an aviary.

Section 21. Subsection 19.12.090(A) remains unchanged.

Section 22. Subparagraph (2) of Subsection 19.14.020(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.14.020 PERMITTED USES

A. AGRICULTURAL USES

2. Breeding and Raising Animals

— Bee keeping

— Beef cattle or livestock grazing pursuant to Section 19.14.130 of this chapter

— Birds, including show or racing pigeons and other small fowl

— Dairy stock pursuant to Section 19.14.130 of this chapter

— Fish and frogs

— Hogs pursuant to Section 19.14.130 of this chapter

— Horses, donkeys, llamas, and mules pursuant to Section 19.14.130 of this chapter

— Poultry, for the domestic use of the resident/occupant only (not including poultry ranches)

— Rabbits and fur-bearing animals

— Sheep and goats pursuant to Section 19.14.130 of this chapter

Section 23. Subsection 19.14.020(E) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.14.020 PERMITTED USES

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

— Cogeneration facility or steam generators, primarily intended for steam production, used for production of oil and gas, excluding coal fired

— Mineral exploration

— Oil or gas exploration and production pursuant to Chapter 19.198 of this title, including the temporary installation of commercial coaches as accessory to this activity, not to exceed a two- (2-) year period

— Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity

— Wind-driven electrical generator for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

Section 24. Subsections 19.14.020(A)(1), (B), (C), (D), and (F) remain unchanged.

Section 25. Subparagraph (1) of Subsection 19.14.030(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.14.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

A. AGRICULTURAL USES

1. Breeding and Raising of Animals

— Poultry, including hatching, breeding, butchering, processing, or shipping of chickens, ostriches, turkeys, or other fowl or poultry, including eggs

Section 26. Subsection 19.14.030(K) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.14.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

K. MISCELLANEOUS USES

— Commercial coach, when incidental and accessory to a permitted use

— Day-care center, with or without extended overnight services

— Drainage sump

— Flood control facilities

— Kennel

— Railroad caboose and similar accessory structures

— Revival, temporary

— Skateboard ramps, noncommercial

— Water storage or groundwater recharge facilities

— Water system, large

— Wild animal keeping

Section 27. Subsections 19.14.030(A)(2), (B), (C), (D), (E), (F), (G), (H), (I), and (J) remain unchanged.

Section 28. Subsection 19.14.090(B) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.14.090 MINIMUM DISTANCE BETWEEN STRUCTURES

B. There shall be at least six (6) feet between a residential building and a nonresidential structure, except that pens, coops, stables, barns, corrals, and other structures for housing livestock and buildings for processing, packing, or storage of agricultural produce shall be at least one hundred (100) feet away from any residential building. There shall be a minimum setback of twenty (20) feet between an on-site residential building and an aviary.

Section 29. Subsection 19.14.090(A) remains unchanged.

Section 30. Subparagraph (1) of Subsection 19.16.030(D) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.16.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

D. COMMERCIAL USES

1. Offices

— Temporary on-site real estate sales/construction, including commercial coaches

Section 31. Subsection 19.16.030(L) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.16.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

L. MISCELLANEOUS USES

— Community septic disposal system

— Day-care center, with or without extended overnight services

— Drainage sump

— Flood control facilities

— Railroad caboose and similar accessory structures

— Skateboard ramps, noncommercial

— Veterinary

— Water storage or groundwater recharge facilities

— Water system, large

Section 32. Subsections 19.16.030(A), (B), (C), (E), (F), (G), (H), (J), and (K) remain unchanged.

Section 33. DELETED

Section 34. Subsection 19.16.090(B) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.16.090 MINIMUM DISTANCE BETWEEN STRUCTURES

B. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings, except that pens, coops, or other structures for housing animals shall be at least thirty (30) feet away from any residential building or other building used for human habitation, at least one hundred (100) feet from the front lot line, at least twenty-five (25) feet from the street side lot line on a corner lot, and at least one hundred (100) feet away from any public park, school, hospital, or similar institution. There shall be a minimum setback of twenty (20) feet between an on-site residential building and an aviary.

Section 35. Subsection 19.16.090(A) remains unchanged.

Section 36. Subparagraph (1) of Subsection 19.18.030(C) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.18.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

C. COMMERCIAL USES

1. Offices

— Temporary on-site real estate sales/construction, including commercial coaches

Section 37. Subsection 19.18.030(I) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.18.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

I. MISCELLANEOUS USES

— Community septic disposal system

— Day-care center, with or without extended overnight services

— Drainage sump

— Flood control facilities

— Railroad caboose and similar accessory structures

— Skateboard ramps, noncommercial

— Water storage or groundwater recharge facilities

— Water system, large

Section 38. Subsections 19.18.030(A), (B), (C)(2), (D), (E), (F), (G), and (H) remain unchanged.

Section 39. Subparagraph (1) of Subsection 19.20.030(C) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.20.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

C. COMMERCIAL USES

1. Offices

— Temporary on-site real estate sales/construction, including commercial coaches

Section 40. Subsections 19.20.030(A), (B), (D), (E), and (F) remain unchanged.

Section 41. Subparagraph (1) of Subsection 19.22.030(C) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.22.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

C. COMMERCIAL USES

1. Offices

— Temporary on-site real estate sales/construction, including commercial coaches

Section 42. Subsections 19.22.030(A), (B), (C)(2), (D), (E), (F), (G), (H), (I), and (J) remain unchanged.

Section 43. Subsection 19.24.130(B) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.24.130 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

B. Each mobilehome shall have a permanent foundation system or be recessed in the ground so that no portion of the undercarriage is visible. If the foundation system used results in exposed areas between the foundation and the mobilehome, then aluminum skirting shall be installed and maintained in place around the base of the mobilehome at all times. Skirting of equal material durability and design may be approved by the Director of Planning and Development Services. A mobilehome shall not be recessed if the site is located in an FPS or FP District.

Section 44. Subsections 19.24.130(A), (C), (D), (E), and (F) remain unchanged.

Section 45. Section 19.26.110 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.26.110 SIGNS

The following types of signs are permitted in the MP District in accordance with the requirements of Chapter 19.84 of this title:

A. Temporary real estate signs advertising the mobilehome for sale or rent, not to exceed six (6) square feet each, excluding the area of any vertical and/or horizontal support members

B. Permanent subdivision identification signs

C. Temporary construction signs

D. Temporary political, religious, or civic campaign signs

E. One (1) pole sign pursuant to Section 19.84.030

Section 46. Subparagraph (2)(a) of Subsection 19.26.150(C) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.26.150 DEVELOPMENT STANDARDS AND CONDITIONS

C. Public Street and Highway Dedications and Improvements

2. Improvements may be required by the Director of Planning and Development Services, at no cost to the County, in accordance with the following standards:

a. All developments within Type A Improvement Areas (see Appendix) shall provide road or street improvements to Type A Subdivision Standards. Developments in all other areas shall provide road or street improvements to Type B Subdivision Standards, unless Type A Subdivision Standards are required by any adopted Specific Plan in which the development is proposed, in

which case Type A improvements shall be required. If the project site abuts a state highway, road improvements shall be provided as required by the California Department of Transportation.

Section 47. Subsections 19.26.150(A), (B), (C)(1), (C)(3), (D), (E), (F), (G) and (H) remain unchanged.

Section 48. Subsection 19.32.020(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.32.020 PERMITTED USES

A. RESIDENTIAL USES

— Bed and breakfast inn

— Manager, caretaker, or proprietor quarters

— Retirement or rest home

Section 49. Subsection 19.32.020(H) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.32.020 PERMITTED USES

H. MISCELLANEOUS USES

— Adult day-care

— Construction trailer, temporary, during construction activities only

— Day-care center, without extended overnight services

— Studio, radio, television, broadcasting

— Water system, small

Section 50. Subsections 19.32.020(B), (C), (D), (E), (F), and (G) remain unchanged.

Section 51. Subsection 19.32.030(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.32.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

A. RESIDENTIAL USES

— Apartment

— Boarding or rooming house

— Community care facility

— Fraternity or sorority house
— Mobilehome

— Residential accessory structures

— Residential hotel

— Single-family dwelling

Section 52. Subsection 19.32.030(D) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.32.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

D. INDUSTRIAL USES

— Contractor's storage yard, when accessory and incidental to a contractor's business office and wholly enclosed within a solid screening fence as approved by the Director of Planning and Development Services

— Feed and fuel, excluding wood yards

— Photographic processing plant or wholesale supply

Section 53. Subsection 19.32.030(I) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.32.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

I. INSTITUTIONAL USES

— Cemetery, mausoleum, or columbarium

— Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary

— Zoo

Section 54. Subsections 19.32.030(B), (C), (E), (F), (G), (H), (J), and (K) remain unchanged.

Section 55. Section 19.32.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.32.130 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. All development in the C-2 District shall comply with the minimum standards set out in Chapter 19.80 of this title.

B. Development in the C-2 District shall comply with the interpretations and provisions of Chapter 19.08 of this title.

C. Residential development shall be subject to the High-density Residential (R-3) District requirements as specified in Chapter 19.22 of this title.

D. No outside storage shall be permitted except for company vehicles and items for retail sales, lease, or rental and which are clearly associated with an on-site business. This requirement shall not apply to those uses requiring a conditional use permit (Section 19.32.030), provided that outside storage was addressed as part of the permit application.

Section 56. Subparagraph (2) of Subsection 19.36.020(D) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.36.020 PERMITTED USES

D. INDUSTRIAL USES

2. Industrial Storage

— Automobile

— Bottled gas

— Cargo containers

— Chemical storage when accessory to a permitted use

— Cold storage

— Contractor's storage yard

— Draying or freight

— Equipment and building material

— Feed and fuel, including wood yards

— Lumber

— Moving and storage, yards or warehouse

— Petroleum

— Recreational vehicle

— Recyclable materials, collection and storage, provided there is no more than three thousand (3,000) square feet of outside storage and all compression and bailing operations are conducted wholly within an enclosed structure

— Truck and heavy equipment

— Warehouse

Section 57. Subsections 19.36.020(A), (B), (C), (D)(1), (D)(3), (E), (F), (G), (H), (I), and (J) remain unchanged.

Section 58. Subsection 19.36.030(C) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.36.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

C. INDUSTRIAL STORAGE

— Chemical storage as main use

— Recyclable materials, collection and storage

Section 59. Subsection 19.36.030(H) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.36.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

H. INSTITUTIONAL USES

— Cemetery, mausoleum, or columbarium

— Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary

— Zoo

Section 60. Subsections 19.36.030(A), (B), (D), (E), (F), (G), and (I) remain unchanged.

Section 61. Subparagraph (2) of Subsection 19.38.020(E) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.38.020 PERMITTED USES

E. INDUSTRIAL USES

2. Industrial Storage

— Automobile

— Bottled gas

— Cargo containers

— Chemical storage, when accessory to a permitted use

— Cold storage

— Contractor's storage yard

— Draying or freight

— Equipment and building materials

— Feed and fuel, including wood yards

— Lumber

— Moving and storage

— Petroleum

— Recreational vehicle

— Recyclable materials, collection and storage, provided there is no more than three thousand (3,000) square feet of outside storage and all compression and bailing operations are conducted wholly within an enclosed structure

— Truck and heavy equipment

— Warehouse

Section 62. Subsections 19.38.070(A), (B), (C), (D), (E)(1), (E)(3), (F), (G), (H), (I), and (J) remain unchanged.

Section 63. Subparagraph (2) of Subsection 19.38.030(C) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.38.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

C. INDUSTRIAL USES

2. Industrial Storage

— Chemical storage as a main use

— Explosives, permanent

— Log storage

— Minerals and ore storage and loading

— Recyclable materials, collection and storage

— Salvage or junk yard

— Vehicle wrecking yard

Section 64. Subsection 19.38.030(G) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.38.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

G. WASTE FACILITIES

— Community septic disposal system

— Nonhazardous oil production water disposal facility

— Nonhazardous oilfield waste treatment or recycling

— Sanitary landfill

— Septage disposal site

— Sewage treatment plant

— Transfer station, large or small

— Waste-to-energy facility

Section 65. Subsections 19.38.030(A), (B), (C)(1), (C)(3), (D), (E), (F), (H), and (I) remain unchanged.

Section 66. Subparagraph (2) of Subsection 19.40.020(E) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.40.020 PERMITTED USES

E. INDUSTRIAL USES

2. Industrial Storage

— Automobile

— Bottled gas

— Cargo containers

— Chemical storage

— Cold storage

— Contractor's storage yard

— Draying or freight

— Equipment and building materials

— Feed and fuel, including wood yards

— Lumber

— Moving and storage

— Petroleum

— Recreational vehicle

— Recyclable materials, collection and storage

— Truck and heavy equipment

— Warehouse

Section 67. Subsections 19.40.020(A), (B), (C), (D), (E)(1), (E)(3), (F), (G), (H), (I), and (J) remain unchanged.

Section 68. Subection 19.42.030(C) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.42.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

— Boat dock, private

— Camp, private

— Campground

— Community recreational facilities

— Equestrian establishments

— Golf course

— Golf driving range

— Lakes, private, for recreational skiing or boating

— Marina, public

— Racetrack or test track, automobile, bicycle, horse, or motorcycle

— Recreational vehicle park

— Shooting range, gun club, simulated war games, or similar activities

— Trade fairs and exhibitions, temporary (fourteen- (14-) day maximum), excluding flea markets and swap meets

— Whitewater rafting launch or landing site

Section 69. Subsection 19.42.030(J) of the Ordinance Code of the County of Kern is hereby added to read as follows:

19.42.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

J. MISCELLANEOUS USES

— Drainage sump

— Hunting or fishing club

— Railroad caboose and similar accessory structures

— Water system, large

— Wild animal keeping

Section 70. Subsections 19.42.030(A), (B), (D), (E), (F), and (G) remain unchanged.

Section 71. Section 19.44.010 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.44.010 PURPOSE AND APPLICATION

The purpose of the Open Space (OS) District is to designate lands in public or private ownership that are essentially unimproved and should remain in open space use for the preservation of identified scenic values, habitat for endangered plants or animals, unique geologic features, natural resources, passive recreational values, or for the protection of public health and safety. The OS District may also be utilized as an Interim District in conjunction with County-initiated changes in zoning district classification for those properties designated as "Commercial" or "Industrial" by the Kern County General Plan or adopted Specific Plan, where the current zoning district classification for those properties is inconsistent with said "Commercial" or "Industrial" designations.

Section 72. Subsection 19.44.030(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.44.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

A. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES

— Park

— Roads or trails for motor driven vehicles, excluding race courses

Section 73. Subsection 19.44.030(B) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.44.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

B. INSTITUTIONAL USES

— Public service uses

Section 74. Subsection 19.44.030(C) remains unchanged.

Section 75. Subsection 19.46.030(H) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.46.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

H. WASTE FACILITIES

— Hazardous waste disposal facility

— Nonhazardous oil production and/or oily waste disposal facility

— Nonhazardous oilfield waste treatment or recycling

— Sanitary landfill

— Sewage treatment plant

— Transfer station, large

— Transfer station, small

Section 76. Subsections 19.46.030(A), (B), (C), (D), (E), (F), (G), (I), (J), and (K) remain unchanged.

Section 77. Section 19.56.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.56.130 SITE DEVELOPMENT PLAN REVIEW — REQUIRED

No use shall be established, changed, or altered, no development shall occur and no building or grading permit shall be issued for any use or development in the PD Combining District, except for one (1) single-family residential dwelling on a single lot, until an application for site development plan review has been submitted to and approved by the Director of Planning and Development Services or the Board of Supervisors in accordance with the procedures set out in Chapter 19.102 of this title.

Section 78. Subsection 19.60.090(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.60.090 MINIMUM DISTANCE BETWEEN STRUCTURES

Requirements for minimum distance between structures in an RS District are as follows:

A. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings, except that pens, coops, other structures for housing animals, and the animals themselves shall be at least thirty (30) feet away from any residential building or other building used for human habitation, at least one hundred (100) feet from the front lot line, at least twenty-five (25) feet from the street side lot line on a corner lot, and at least one hundred (100) feet away from any public park, school, hospital, or similar institution. There shall be a minimum setback of twenty (20) feet between an on-site residential building and an aviary.

Section 79. Subsection 19.60.090(B) remains unchanged.

Section 80. Section 19.62.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.62.130 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. In the Bakersfield Type A Improvement Area, each mobilehome shall be placed on a permanent foundation system or recessed into the ground so that no part of the undercarriage is visible. If the foundation system used results in exposed areas between the foundation and the mobilehome, then skirting which is compatible with the exterior siding of the mobilehome shall be installed and maintained in place around the base of the mobilehome at all times.

B. Regardless of where the mobilehome is located, if the method of installation results in the exposure of the undercarriage, a continuous perimeter skirting compatible with the mobilehome siding shall be installed.

C. No special architectural or size requirements shall apply to mobilehome installations in the MH District, except as may be specifically required by Sections 19.62.020 or 19.62.030.

Section 81. Subsection 19.72.040(D) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.72.040 PROHIBITED USES

D. Storage of junk, or salvage operations.

Section 82. Subsections 19.72.040(A), (B), (C), (E), (F), (G), (H), and (I) remain unchanged.

Section 83. Subsection 19.80.020(B) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.80.020 DEVELOPMENT STANDARDS — MULTIFAMILY RESIDENTIAL DISTRICTS

B. All developments within Type A Improvement Areas (see Appendix) shall provide road or street improvements to Type A Subdivision Standards. Developments in all other areas shall provide road or street improvements to Type B Subdivision Standards, unless Type A Subdivision Standards are required by any adopted Specific Plan in which the development is proposed, in which case Type A improvements shall be required. Street improvements shall include base and pavement tie to existing pavement. Existing pavement shall be saw cut at match point. If the project site abuts a state highway, road improvements shall be provided as required by the California Department of Transportation.

Section 84. Subsections 19.80.020(A), (C), (D), (E), (F), (G), (H), (I), (J), (K), (L), (M), (N), (O), (P), (Q), (R), (S), and (T) remain unchanged.

Section 85. Subection 19.80.030(B) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.80.030 DEVELOPMENT STANDARDS — COMMERCIAL AND INDUSTRIAL DISTRICTS

B. All developments within Type A Improvement Areas (see Appendix) shall provide road or street improvements to Type A Subdivision Standards. Developments in all other areas shall provide road or street improvements to Type B Subdivision Standards, unless Type A Subdivision Standards are required by any adopted Specific Plan in which the development is proposed, in which case Type A improvements shall be required. Street improvements shall include base and pavement tie to existing pavement. Existing pavement shall be saw cut at match point. If the project site abuts a state highway, road improvements shall be provided as required by the California Department of Transportation.

Section 86. Subsections 19.80.030(A), (C), (D), (E), (F), (G), (H), (I), (J), (K), (L), (M), (N), (O), (P), (Q), (R), and (S) remain unchanged.

Section 87. Subparagraph (6) of Subsection 19.82.020(G) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.82.020 REQUIRED PARKING SPACES

G. Institutional Uses:

1. Cemetery: One (1) per three and one-half (3 1/2) seats in the chapel plus one (1) per two hundred and fifty (250) square feet of office space

2. Church: One (1) per three and one-half (3 1/2) seats

3. Auditorium: One (1) per three and one-half (3 1/2) seats

4. Convalescent hospital or sanitarium: One (1) per four (4) patient beds

5. Hospital: One (1) per two (2) patient beds

6. Library or museum: One (1) per two hundred (200) square feet of office space

Section 88. Subsections 19.82.020(A), (B), (C), (D), (E), (F), (H), (I), (J), (K), (L), (M), and (N) remain unchanged.

Section 89. Subsection 19.82.050(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.82.050 HANDICAPPED PARKING

A. Parking spaces for the handicapped shall be provided and designed in accordance with the requirements of Chapter 2-71 of Title 24 of the California Administrative Code.

The following table establishes the number of handicapped parking spaces required:

Total Number of Parking Spaces	Number of Handicapped Parking Spaces Required
1-40	1
41-80	2
81-120	3
121-160	4
161-300	5
301-400	6
401-500	7
over 500	1 for each 200 additional spaces provided

When less than five (5) total parking spaces are provided, one (1) of these spaces shall be fourteen (14) feet wide and lined to provide a nine- (9-) foot parking area and a five- (5-) foot loading and unloading area. However, there is no requirement that the space be reserved exclusively for handicapped use.

Section 90. Subsection 19.82.050(B) remains unchanged.

Section 91. Subsection 19.82.090(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.82.090 PARKING AREA DESIGN AND DEVELOPMENT STANDARDS

Off-street parking areas required to be provided by this chapter shall be designed and developed in accordance with the following standards:

A. All off-street parking areas and ingress and egress to parking areas shall be surfaced with the following materials:

1. For all residential, recreation, entertainment and tourist facilities, commercial, industrial, institutional, and other high intensity uses in any Type A Improvement Area (see Appendix), parking areas shall be surfaced with one (1) of the following materials on a prepared base:

a. Two (2) inches of asphaltic concrete

b. Three and one-half (3 1/2) inches of Portland Cement concrete

2. Except as specified by Chapter 19.80 of this title, for all uses in any other area, the required parking areas shall be surfaced with one of the following materials:

a. Three (3) inches of bituminous road mix

b. Two (2) inches of asphaltic concrete

c. Three and one-half (3 1/2) inches of Portland Cement concrete

d. Three (3) inches of decomposed granite

e. Three (3) inches of compacted rock dust

f. Three (3) inches of gravel

Section 92. Subsections 19.82.090(B), (C), (D), (E), (F), (G), (H), (I), (J), and (K) remain unchanged.

Section 93. Subsection 19.84.020(C) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.84.020 DESIGN AND DEVELOPMENT STANDARDS — MONUMENT SIGNS

C. Monument signs shall be a minimum of twenty (20) feet apart, including from existing monument signs on adjacent lots.

Section 94. Subsections 19.84.020(A), (B), and (D) remain unchanged.

Section 95. Subsection 19.84.030(D) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.84.030 DESIGN AND DEVELOPMENT STANDARDS — POLE SIGNS

D. Pole signs be a minimum of (20) feet apart, including from existing pole signs on adjacent lots.

Section 96. Subsections 19.84.030(A), (B), (C), and (E) remain unchanged.

Section 97. Subsection 19.90.020(E) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.90.020 ESTABLISHMENT

A secondary residential unit may be established by any one (1) of the following methods:

A. Alteration of interior space of an existing dwelling

B. Conversion of an attic, basement, garage, or other previously uninhabited portion of a dwelling or accessory structure

C. Addition of a separate unit onto an existing dwelling

D. Construction of a separate structure on a lot in addition to an existing principal dwelling

E. Conversion of an existing dwelling to a secondary residential unit in conjunction with the construction of a new principal dwelling

Section 98. Section 19.90.030 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.90.030 DEVELOPMENT STANDARDS

No secondary residential unit may be established unless it complies to the following standards:

A. The lot upon which the secondary residential unit is to be established shall be a minimum of seven thousand five hundred (7,500) net square feet in area and shall not be subdivided unless it meets the minimum requirements for subdivision.

B. The principal dwelling on the lot shall contain a minimum gross area of one thousand one hundred (1,100) square feet.

C. Only one (1) secondary residential unit may be created per legal lot.

D. The total floor area of the secondary residential unit may not exceed nine hundred (900) square feet or fifty percent (50%) of the total floor area of the principal dwelling, whichever is greater.

E. The secondary residential unit shall contain separate kitchen and bathroom facilities and have a separate entrance.

F. The principal dwelling on the lot shall be occupied by the property owner.

G. The secondary residential unit shall comply with the development standards for the zoning district in which it is located, including front-yard, rear-yard, and side-yard setbacks, minimum distance between structures, and height limits, but excluding minimum lot area per dwelling unit standards.

H. Off-street parking for the secondary residential unit shall be provided in accordance with Chapter 19.82 of this title.

I. The secondary residential unit shall be constructed in accordance with the provisions of the latest adopted edition of the Uniform Building Code.

J. The secondary residential unit shall be constructed in such a manner as to be compatible with the principal dwelling unit and neighborhood in terms of design, height, material, and landscaping.

K. The principal entrance to the secondary residential unit shall not be visible from the street.

L. The secondary residential unit shall comply with applicable health standards and shall be approved by the Kern County Director of Health.

M. Mobilehomes shall not be utilized as secondary residential units nor shall secondary residential units be permitted for lots where the existing principal dwelling is a mobilehome.

Section 99. Section 19.90.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.90.050 CONDITIONAL USE PERMIT — APPLICATION — CONTENTS

An application for a conditional use permit for a secondary residential unit shall include the following:

A. Name and address of the applicant

B. Name and address of the property owner

C. Address of the principal dwelling on the lot on which the secondary residential unit is to be established

D. Assessor's parcel number

E. Legal description of the property

F. Floor area of the principal dwelling and of the proposed secondary residential unit

G. Plot plan drawn at the scale specified by the Director of Planning and Development Services, including the following:

1. Property lines and lot dimensions

2. Location of all existing buildings and structures

3. Location of the proposed secondary residential unit

4. Location of all easements

5. Location of existing and proposed parking areas

6. North arrow

H. Elevations showing the height of the proposed secondary residential unit in relation to existing buildings on the subject property

I. Photographs accurately showing property on which the secondary residential unit is to be constructed and properties adjacent to side property lines

Section 100. Subsection 19.98.040(A) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.98.040 DRILLING BY CONDITIONAL USE PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in any zoning district described in this title in which such uses are permitted as conditional uses until an application for a conditional use permit has been submitted to and approved by the Board of Zoning Adjustment as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the standards and procedures set out in Sections 19.102.130 through 19.102.180 and Chapter 19.104 of this title. In approving a conditional use permit, the Board of Zoning Adjustment may waive any condition set out in Section 19.98.050 of this chapter if it determines that such waiver will not result in material detriment to the public welfare or the property of other persons located in the vicinity.

Section 101. Subsections 19.98.040(B) and (C) remain unchanged.

Section 102. Section 19.102.015 of the Ordinance Code of the County of Kern is hereby added to read as follows:

19.102.015 COMPLIANCE WITH CONDITIONS OR DEVELOPMENT STANDARDS

Development standards and conditions required in conjunction with the approval of a ministerial or discretionary permit shall be satisfied or bonded for prior to the final inspection of any related structure for which a building permit is required, except as otherwise specified by the applicable development standards and conditions. Where no building permits are required in conjunction with a use authorized by a ministerial or discretionary permit, all development standards and conditions shall be satisfied or bonded for prior to the commencement of said use, except as otherwise specified by the applicable development standards and conditions.

Section 103. Subsection 19.102.040(S) of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.040 GENERAL REQUIREMENTS — PERMIT TYPES

S. Temporary batch plant (thirty (30) days or less) plot plan review (Section 19.08.290)

Section 104. Subsections 19.102.040(A), (B), (C), (D) (E), (F), (G), (H), (I), (J), (K), (L), (M), (N), (O), (P), (Q), and (R) remain unchanged.

Section 105. Section 19.108.080 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.108.080 DETERMINATION OF NONCONFORMING STATUS

Where there is doubt regarding the legal nonconforming status of structures, uses of structures, uses of land, parcel size, or signs, documentation shall be submitted to the Director of Planning and Development Services to establish legal nonconforming status. The burden of proof in submitting adequate documentation for determination of legal nonconforming status shall rest entirely on the party making said request. The Director of the Department of Planning and Development Services shall grant legal nonconforming status only when the preponderance of information submitted clearly establishes the legality of the applicable use, structure, or parcel size.

Section 106. Section 19.114.065 of the Ordinance Code of the County of Kern is hereby added to read as follows:

19.114.065 NOTICE OF ZONING VIOLATION

Whenever the Director of the Department of Planning and Development Services or his designee has knowledge of a violation of Title 19 of this code, he may cause a notice of intent to record a notice of violation to be mailed by certified mail to the then current owner of record of the property. The notice shall state that within thirty (30) days of the date of the notice, the owner may request a meeting with the Director of the Department of Planning and Development Services or his designee to present evidence that a violation does not exist. The notice shall further describe the property and violation in detail.

Following the sending of the notice of intent to record a notice of violation and prior to recording the notice, if it is determined that no violation exists, the Director of the Department of Planning and Development Services or his designee shall mail a clearance letter by certified mail to the then owner(s) of record.

In the event that a meeting is not requested and the violation has not been corrected, or in the event that after consideration of evidence, it is determined by the Director of the Department of Planning and Development Services, or the Board of Supervisors upon appeal pursuant to the procedure specified by Section 19.102.110, that a Zoning Ordinance violation in fact exists, the Director of the Department of Planning and Development Services may record, without fee, a notice of violation in the Office of the County Recorder.
Upon request, the Director of the Department of Planning and Development Services or his designee shall issue the affected property owner a notice of expungement of violation upon correction of all violation(s) noticed hereunder.

Section 107. Subsection 19.110.040(D) is hereby deleted. Subsections 19.110.040(A), (B), and (C) remain unchanged.

BD:drb/wl

ORDINANCE NO. G-5885

AN ORDINANCE OF THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN, STATE OF CALIFORNIA, AMENDING VARIOUS SECTIONS OF CHAPTERS 2.16, 2.23, 2.24, 2.36, 2.56, 2.82, 8.28, 9.08, 10.04, 10.08, 10.12, 10.16, 10.20, 10.32, 12.12, 12.16, 12.20, 12.24, 14.32, 15.04, 15.08, 15.24, 17.44, 17.60, 18.05, 18.10, 18.15, 18.25, 18.45, 18.55, 18.65, 18.70, 19.04, 19.80, 19.88, 19.98 AND 19.100 AND ADDING A NEW CHAPTER 2.86 TO THE ORDINANCE CODE OF THE COUNTY OF KERN RELATING TO THE CREATION OF THE ENGINEERING AND SURVEY SERVICES DEPARTMENT, THE SOLID WASTE MANAGEMENT DEPARTMENT, THE TRANSPORTATION MANAGEMENT DEPARTMENT AND THE TRANSFER OF FUNCTIONS AND DUTIES FORMERLY PERFORMED BY THE PUBLIC WORKS DEPARTMENT AND AIRPORTS DEPARTMENT

The following ordinance, consisting of one hundred thirty nine (139) sections, was duly and regularly passed and adopted by the Board of Supervisors of the County of Kern, State of California, at a regular meeting of the Board of Supervisors held on the 5th day of January , 1992, by the following vote, to wit:

AYES: Ashburn, Austin, Larwood, Peterson, Shell

NOES: None

ABSENT: None

Chairman of the Board of Supervisors of the County of Kern, State of California

(SEAL)

ATTEST:

SUE LASITER-PICKETT
Clerk of the Board of Supervisors

By Sylvia Johnson, Deputy Clerk

THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN ORDAINS AS FOLLOWS:

Section 1. This ordinance shall take effect and be in full force on and after the 4th day of February , 1993, and shall be published in the Bakersfield Californian , a newspaper of general circulation, published and printed in the County of Kern, State of California, together with the names of the members of the Board of Supervisors voting for and against the same.

Book No. 9210566

Ord. No. G-5885

Section 2. Chapter 2.16 of Title 2 of the Kern County Code is hereby repealed and a new Chapter 2.16 is hereby adopted to read as follows:

Chapter 2.16

Engineering and Survey Services Department

2.16.010 Engineering and survey services department - Created

The engineering and survey services department is hereby established and shall be a component of the resource management agency of the county. The department shall provide the drainage design, subdivision review and county surveyor functions of the formerly existing public works department. All existing directives and instructions which are applicable to the functions previously performed by the public works department shall be applicable to and binding upon the director and/or the engineering and survey services department.

2.16.020 Engineering and survey services department - Director

The position of director of engineering and survey services is hereby created. The director shall be appointed by and serve under the direction and authority of the resource management agency director. The director shall, subject to the civil service system of the county, employ such assistants and/or employees as are from time to time provided for the department by the ordinances of the county.

2.16.030 County surveyor

Pursuant to the provisions of section 27550 of the Government Code, the county surveyor shall be appointed by the board of supervisors, to serve at its will.

2.16.040 Engineering functions related to subdivisions

A. All engineering functions related to subdivisions which are assigned to the county surveyor by any provision of this code, including but not limited to review and approval of subdivision plans and profiles, water and sewer plans, subdivision improvement agreements and bonds, and subdivision drainage plans and facilities, are assigned to and shall be performed by, the director of engineering and survey services.

B. No provision of this section shall be construed as affecting any statutory functions of the county surveyor relating to subdivisions.

Section 3. Section 2.23.010 of Chapter 2.23 of Title 2 of the Kern County Code is hereby amended to read as follows:

2.23.010 Resource management agency - Created as comprehensive county agency - Component departments

The resource management agency of the County of Kern is created as a comprehensive local agency for the coordination of county policies and regulations concerning air quality, land use planning and regulation, transportation management, solid and liquid waste disposal, and administration of county service areas. The resource management agency acts to provide administration and coordination with respect to the efforts, powers and duties of the planning and development services department, the engineering and survey services department, the building inspection department, the air pollution control district, the transportation management department, and the waste management department. The powers and duties of these departments are as enumerated in state law and in Chapters 2.16, 2.34, 2.36, 2.82 and 2.86 of Title 2 of the Kern County Code herein.

Section 4. Section 2.24.010 of Chapter 2.24 of Title 2 of the Kern County Code is hereby amended to read as follows:

2.24.010 Environmental health services department - Created - Transfer of powers and duties.

The environmental health services department is created as a comprehensive environmental agency as defined in the California Code of Regulations, Title 17, section 1351 and has transferred to it, pursuant to this ordinance, with the concurrence of and appropriate delegation of authority from the county health officer and upon the concurrence of the director of health services of the California State Department of Health Services, as authorized by Health and Safety Code Section 1155.5, the function of providing environmental health and sanitation services. The functions so transferred shall be maintained at levels of quality and efficiency equal to or higher than formerly provided by the environmental health services division of the county health department. All personnel of the department charged with enforcement of orders, quarantines, rules, regulations and laws related to public health shall be qualified under and meet the minimum standards required by state law.

Section 5. Section 2.24.030 of Chapter 2.24 of Title 2 of the Kern County Code is hereby amended to read as follows:

2.24.030 Environmental health services director - Qualifications

The environmental health services director shall be appointed by and serve under the direction of the board of supervisors. The director shall possess the minimum qualifications required by state law. The director shall have additional staff and managerial responsibilities as directed and authorized by the board of supervisors to assist in the performance of the duties of the department.

Section 6. Section 2.36.010 of Chapter 2.36 of Title 2 of the Kern County Code is hereby amended to read as follows:

2.36.010 Established - Organization - Functions

A. A building inspection department is established which shall be a division of the engineering and survey services department, a component of the resource management agency of the county. The director of the resource management agency shall exercise the authority and perform the duties provided by law for the director of building inspection of the county and may delegate such authority to employees of the engineering and survey services department to administer and implement the functions of his office.

B. The building inspection department shall administer and enforce all of the provisions of Title 17 of this code, chapter 2, part 3, division 13 of the California Health and Safety Code, and all other ordinances, codes and statutes heretofore or hereafter delegated to it for such purposes.

C. Pursuant to the provisions of California Penal Code Section 836.5, any of the following officers and employees of the building inspection department may arrest a person without a warrant whenever he has reasonable cause to believe that the person to be arrested has committed an infraction or misdemeanor in his presence which is a violation of an ordinance, code or statute which he has the duty to enforce:

1. Director of the resource management agency;
2. Assistant director of the resource management agency;
3. Director of engineering and survey services department;
4. Chief building inspector;
5. Building inspector V;
6. Building inspector IV;

7. All building inspectors and/or engineers assigned to the investigation section of the engineering and survey services department.

An officer or employee making an arrest under the authority of this section shall follow the citation-release procedures prescribed in Chapter 5C, Title 3, Part 2 of the California Penal Code or such procedures hereafter enacted by the State of California.

Section 7. Section 2.56.030 of Chapter 2.56 of Title 2 of the Kern County Code is amended to read as follows:

2.56.030 Membership

The committee shall be composed of twenty-three (23) members, including two (2) members of the board of supervisors and the resource management agency director (who shall also provide the committee with secretarial services from his office staff) or his designee. Members shall be appointed by majority vote of the board of supervisors. Each supervisor shall nominate four (4) persons to membership on the committee (not including the two (2) supervisor members and the resource management agency director).

Section 8. Section 2.56.040 of Chapter 2.56 of Title 2 of the Kern County Code is amended to read as follows:

2.56.040 Terms of members.

The terms of ten (10) members (except the supervisors and resource management agency director serving thereon) shall expire December 31, 1993 and the terms of the remaining ten (10) members shall expire on December 31, 1994. The terms of members thereafter appointed shall be for two (2) years from and after the expiration of the term of their predecessors, but in no event shall continue beyond the expiration of the term of the nominating member of the board of supervisors or such time as he or she ceases to hold office, whichever first occurs. Appointees filling vacancies shall serve the unexpired portion of the term of their predecessors. Members of the committee may be removed from office at any time upon majority vote of the board of supervisors. The resource management agency director and the supervisors who are members of the committee shall serve at the pleasure of the majority of the board.

Section 9. Chapter 2.82 of Title 2 of the Kern County Code is hereby repealed and a new Chapter 2.82 of Title 2 of the Kern County Code is hereby added to read as follows:

Chapter 2.82

Transportation Management Department

Section 2.82.010 Established.

A department of transportation management is hereby established and which shall be a component of the resource management agency of the county. The department replaces and supercedes the heretofore existing department of airports, the roads division of the public works department, and those functions of the public works department relating to transportation. All existing directives and instructions which are applicable to the functions previously performed by the public works department and department of airports shall be applicable to and binding upon the director and/or department of transportation management.

Section 2.82.020 Director.

The position of director of the department of transportation management is hereby created. The county road commissioner, appointed by the board of supervisors pursuant to Streets and Highways Code Section 2006, shall serve as the director of the

department. The director of transportation management shall, subject to the civil service system of the county, employ such assistants and/or employees as are from time to time provided for the department by the ordinances of the county.

Section 10. Chapter 2.86 is hereby added to Title 2 of the Kern County Code to read as follows:

Waste Management Department

2.86.010 Waste Management Department - Created

The waste management department is hereby established and shall be a component of the resource management agency of the county. The department shall undertake to perform the solid waste management, liquid waste management, sanitation district and county service area administration functions heretofore performed by the public works department. All existing directives and instructions which are applicable to the functions previously performed by the public works department shall be applicable to and binding upon the director and/or department of waste management.

2.86.020 Director of waste management department

The director of the waste management department shall be appointed by and serve under the direction and authority of the resource management agency director. The director of the waste management department shall, subject to the civil service system of the county appoint such assistants and/or employees as are from time to time provided for the department by the ordinances of the county.

Section 11. Subsections (C) and (E) of Section 8.28.150 of Chapter 8.28 of Title 8 of the Kern County Code are hereby amended to read as follows:

C. A copy of any regulations so adopted by the board shall be kept posted at each refuse transfer station, and shall also be kept on file in the offices of the clerk of the board, the waste management department and the health department, where the same may be examined by any interested person at any time during regular business hours.

E. The waste management director is authorized to revoke the privilege of any person, firm or corporation to use any refuse transfer station established by the county, for a period of not more than six (6) months, and the board of supervisors is authorized to revoke such privilege for a period of not more than one (1) year, if it is determined such person, firm or corporation has violated such regulations or engaged in any conduct prohibited therein, after a hearing conducted by the waste management director or the board of supervisors, as the case may be, after not less than fifteen (15) days written notice to such person, firm or corporation. Notice of such hearing shall be given by certified mail, or by personal delivery to such person, firm or corporation or his or its agents, or by leaving a copy thereof at his usual place of residence or place of business, at the option of the waste management director or the board of supervisors, as the case may be.

Section 12. Subsections (A), (B) and (D) of Section 8.28.150 shall remain the same.

Section 13. Subsection (G) of Section 9.08.010 of Chapter 9.08 of Title 9 of the Kern County Code is hereby amended to read as follows:

G. "Director of transportation" means the director of the county transportation management department.

Section 14. Subsections (A), (B), (C), (D), (E), (F), (H) and (I) of Section 9.08.010 shall remain the same.

Section 15. Subsection (O) of Section 9.08.050 of Chapter 9.08 of Title 9 of the Kern County Code is hereby amended to read as follows:

> O. A consent to the entry at any time in the course of his duties of any peace officer, and any employee of the planning director, director of transportation, sheriff, health officer and any other county officer in the performance of his duties, including but not limited to inspection;

Section 16. Subsections (A), (B), (C), (D), (E), (F), (G), (H), (I), (J), (K), (L), (M), (N), and (P) of Section 9.08.050 shall remain the same.

Section 17. Section 9.08.340 of Chapter 9.08 of Title 9 of the Kern County Code is hereby amended to read as follows:

> **9.08.340 Accessways.**
> The licensee shall provide all exterior and interior accessways which the sheriff, fire chief and director of transportation find necessary for the use of spectators, customers and participants at the outdoor festival. All exterior and interior accessways shall be clearly delineated by means of curbs or buffers on the ground. A person shall not occupy any such accessway except for the purpose of access or to cross the same. A permit from the director of transportation shall be required for any encroachment onto a county road. The approval of such access plans by the sheriff, fire chief and the director of transportation is a prerequisite to the issuance of any license for an outdoor festival.

Section 18. Section 10.04.010 of Chapter 10.04 of Title 10 of the Kern County Code is hereby amended to read as follows:

> **10.04.010 Authority to post signs.**
> The enactment of any section of this chapter wherein the local speed limit is increased or decreased is, and shall be, the authority of the director of transportation of the county to erect, place and maintain appropriate signs giving notice of the prima facie speed limit declared in such section upon the street or highway or portion therein designated.

Section 19. Subsections (C) and (D) of Section 10.08.040 of Chapter 10.08 of Title 10 of the Kern County Code are hereby amended to read as follows:

> C. The director of transportation of the county is authorized and directed to cause signs, indicating the maximum gross weight capacity so established, to be erected at each end of that portion of any alley upon which the permissible gross weight is established, as hereinafter provided.
> D. In the event that any person, firm or corporation finds it necessary to move or transport over any alley, upon which a weight limitation has been fixed, any vehicle or vehicle and load, the weight of which is in excess of the fixed weight limitations, and it is impossible to divide such load or reduce the weight thereof, application may be made to the board of supervisors and hearing conducted by the board of supervisors for a special permit to move such load over or upon such alley, in substantially the same manner and mode as prescribed by Sections 10.08.060 and 10.08.080 of this chapter. In lieu of an application presented to the board of

supervisors, the application may be made to the director of transportation of the county, in substantially the same manner and mode as prescribed by Section 10.08.070 of this chapter.

Section 20. Subsections (A), (B), (E), (F) and (G) of Section 10.08.040 shall remain the same.

Section 21. Section 10.08.070 of Chapter 10.08 of Title 10 of the Kern County Code is hereby amended to read as follows:

10.08.070 Permit to move indivisible loads - Transportation director authority.

The application mentioned in Section 10.08.060 for a special permit to move indivisible loads or to move loads without reducing the weight thereof, may be made to the county director of transportation in lieu of to the board of supervisors, and the director of transportation shall then have the power to give approval to said application and grant the permit to move if he finds that the load is indivisible and that it is necessary to move it as stated in the application and if, considering the structural strength of the road involved, the weight of the vehicle and load, and the precautions to be used to prevent damage to the road and any bridge therealong he believes that no damage to such road or bridge is likely to occur; or he may grant approval on such conditions as he sees fit to impose for the protection of such road or bridge. All such findings and permits shall be reported to the board and the application and permit filed with the board.

Section 22. Subsection (A) of Section 10.08.090 of Chapter 10.08 of Title 10 of the Kern County Code is hereby amended to read as follows:

A. The county director of transportation shall, upon application in writing and if good cause appears, issue a special permit in writing authorizing the applicant to operate or move over county roads a vehicle or combination of vehicles or special mobile equipment whose load exceeds the stated legal maximums for the purpose of moving perishable and semiperishable raw agricultural products from the fields to processing plants when the applicant has a valid extralegal weight permit issued by the State Department of Transportation, Division of Highways for hauling such overweight agricultural loads on state roads or would otherwise be eligible for such a permit.

Section 23. Subsections (B) and (C) of Section 10.08.090 shall remain the same.

Section 24. Subsection (B) of Section 10.12.020 of Chapter 10.12 of Title 10 is hereby amended to read as follows:

B. "Transportation management department" means that person or persons of the county of Kern, transportation management department.

Section 25. Subsections (A), (C) and (D) of Section 10.12.020 shall remain the same.

Section 26. Subsections (A) and (B) of Section 10.12.030 are hereby amended to read as follows:

A. Any interested person requiring terminal access for interstate trucks from the federally designated highway system shall

submit an application, on a form to be provided by the transportation management department, together with such information as may be required by the department along with the required fees to the county.

B. Upon receipt of the application, the transportation management department shall cause an investigation to be made to ascertain whether or not the proposed terminal facility meets the requirements for an interstate truck terminal. Upon the approval of that designation, they will then determine the capability of the route requested and alternate routes, whether requested or not. Determination of route capability will include, without limitation, a review of adequate turning radii and lane widths of ramps, intersections and highways and general traffic conditions such a sight distance, speed and traffic volumes and congestion. No access off the federally designated highway system shall be approved without the approval of Caltrans.

Section 27. Subsection (C) of Section 10.12.030 shall remain the same.

Section 28. Subsection (B) of Section 10.12.040 of Chapter 10.12 of Title 10 of the Kern County Code is hereby amended to read as follows:

B. Upon the approval of the terminal designation and route by the county and by Caltrans, the applicant shall deposit with the county sufficient funds as estimated by the transportation management department to pay for the purchase and installation of terminal trailblazer signs. Trailblazer signs shall be required at every decision point in the county en route to the terminal. Upon completion of the installation of the signs, the actual cost shall be computed and any difference between the actual and the estimated cost shall be billed or refunded to the applicant, whichever the case may be. No terminal or route may be used until such signs as may be required are in place. Costs for trailblazer signs may be proportioned in accordance with the procedures in Section 10.12.050 of this chapter.

Section 29. Subsection (A) of Section 10.12.040 shall remain the same.

Section 30. Section 10.12.050 of Chapter 10.12 of Title 10 is hereby amended to read as follows:

10.12.050 Retrofitting.

A. If all feasible routes to a requested terminal are found unsatisfactory by the transportation management department, the applicant may request retrofitting to mitigate or eliminate the deficiencies. All costs of engineering, construction and inspection shall be the responsibility of applicant. Except when such retrofitting is within the jurisdiction of Caltrans, the actual construction will be done by the county or by a contractor, and pursuant to plans and specifications acceptable to it.

B. When the work is to be done by the county, the applicant shall deposit with the transportation management department the estimated costs of retrofitting. Adjustments between the estimated and actual cost shall be made after completion of the work and any difference between the actual and the estimated cost shall be billed or refunded to the applicant, as the case may be. When the work is done by the applicant, the applicant shall file with the transportation management department, on a form satisfactory to the department, a statement detailing the actual costs of the retrofitting.

C. If at any time within five (5) years from the date of completion of the retrofitting by or paid for by the applicant, should any applicant seek terminal approval which would use the route upon which such retrofitting was accomplished, any such

applicant's fee may include that applicant's proportionate share of the retrofitting, as determined by the transportation management department, which fee shall be disbursed by the county to the applicant who paid for the retrofitting as well as to any applicant who contributed to the cost of retrofitting under this subsection. Nothing herein shall require the payment of a proportionate fee if the applicant doing the work failed to file the report with the transportation management department required by subsection (B) of this section.

Section 31. Section 10.12.060 of Chapter 10.12 of Title 10 of the Kern County Code is hereby amended to read as follows:

10.12.060 Revocation of route.

The transportation management department may revoke any approved terminal or route if the terminal or route becomes a traffic hazard for vehicular or pedestrian traffic. A traffic hazard includes the inability of interstate trucks to negotiate the route or such vehicles causing unsafe operating conditions for other vehicular or pedestrian traffic.

Section 32. Section 10.12.070 of Chapter 10.12 of Title 10 of the Kern County Code is hereby amended to read as follows:

10.12.070 Denial or revocation - Appeal process.

A. If the transportation management department denies terminal designation or route feasibility or revokes a previously approved terminal or route, the applicant/terminal owner, within ten (10) days following the date of receipt of the decision of the transportation management department, may appeal such decision to the county board of supervisors in writing. An appeal shall be made on a form prescribed by the transportation management department and shall be filed with the clerk of the board of supervisors. The appeal shall state specifically wherein there was an error or abuse of discretion by the transportation management department or wherein its decision is not supported by available evidence. Within five (5) days of the filing of an appeal, the department shall transmit to the clerk of the board of supervisors the terminal application and/or the sketches of the revoked route and all other data filed therewith, the report of the department and its decision on the application/revocation.

B. The clerk of the board of supervisors shall make copies of the data provided by the transportation management department available to the applicant and to the appellant (if the applicant is not the appellant) for inspection and may give notice to any other interested party who requested notice of the time when the appeal will be considered by the county board of supervisors.

C. If Caltrans and not the transportation management department denies or revokes terminal access from federally designated highways, no appeal may be made to the county board of supervisors, but must be made to Caltrans as may be permitted by Caltrans.

Section 33. Section 10.16.020 of Chapter 10.16 of Title 10 of the Kern County Code is hereby amended to read as follows:

10.16.020 Regulation of crosswalk and safety zones.

The director of transportation of the county, after taking into consideration sound, basic and standard engineering and safety practices, is authorized and empowered to fix, regulate and determine the location of crosswalks and safety zones, and to place and maintain, or cause to be placed and maintained, signs or lettering at or near said zones or crosswalks prohibiting or regulating the driving across or in said crosswalks or zones by

vehicles on a roadway. All signs placed or maintained by the director of transportation pursuant to this section shall conform with any applicable provision of the Vehicle Code of the State of California.

Section 34. Section 10.16.030 of Chapter 10.16 of Title 10 of the Kern County Code is hereby amended to read as follows:

10.16.030 Markings.

The director of transportation of the county is empowered and it shall be his duty and responsibility to place, or cause to be placed, proper and appropriate markings as prescribed by Section 21458 of the Vehicle Code and other applicable provisions of the Vehicle Code for all of the no-parking, limited parking, bus, freight, passenger, taxi and angle parking zones created and established under this chapter.

Section 35. Section 10.16.155 is hereby added to Chapter 10.16 of Title 10 of the Kern County Code to read as follows:

10.16.155 Placement and maintenance of signs and markings.

As used in this Article, "road commissioner" shall also mean the director of transportation for the county, who shall be responsible for the placement and maintenance of the appropriate signs and for causing the curbs to be painted appropriately so as to give notice of the loading zones designated herein.

Section 36. Subsection (B) of Section 10.20.010 of Chapter 10.20 of Title 10 of the Kern County Code is hereby amended to read as follows:

B. "Director" means the director of transportation for the county.

Section 37. Subsections (A), (C) and (D) of Section 10.20.010 shall remain the same.

Section 38. Section 10.20.050 of Chapter 10.20 of Title 10 of the Kern County Code is hereby amended to read as follows:

10.20.050 Signs and markings.

It is the duty and responsibility of the director to place and maintain, or cause to be placed and maintained, signs of lettering declaring and indicating the foregoing regulations prescribed in this article. It is also the duty of the director to cause the passenger loading zones herein created to be painted as provided by Section 21458 of the Vehicle Code.

Section 39. Subsection (A) of Section 10.20.060 of Chapter 10.20 of Title 10 of the Kern County Code is hereby amended to read as follows:

A. "Director" means the director of transportation of the county of Kern.

Section 40. Subsections (B) and (C) of Section 10.20.060 shall remain the same.

Section 41. Section 10.20.090 of Chapter 10.20 of Title 10 of the Kern County Code is hereby amended to read as follows:

10.20.090 Signs and Markings.

It is the duty and responsibility of the director to cause the bus loading zones established by this article to be appropriately

posted and maintained in accordance with Section 21458 of the Vehicle Code of the State of California.

Section 42. Section 10.32.060 of Chapter 10.32 of Title 10 of the Kern County Code is hereby amended to read as follows:

10.32.060 Posting of signs.

Enactment of any section of this chapter describing a designated road or adopting a new or different rule or regulation shall be the authority of the director of transportation for the county to erect, place and maintain appropriate signs giving notice of such rules and regulations upon the designated roads while such rules and regulations are in effect.

Section 43. Subsection (D) of Section 12.12.010 of Chapter 12.12 of Title 12 of the Kern County Code is hereby amended to read as follows:

D. "Director" means the director of transportation for the county of Kern.

Section 44. Subsections (A), (B), (C) and (E) of Section 12.12.010 shall remain the same.

Section 45. Subsections (A), (D), and (E) of Section 12.12.030 of Chapter 12.12 of Title 12 are hereby amended to read as follows:

A. An application for a permit pursuant to the provisions of this chapter shall be made in writing and filed with the director with the following information:

1. Name, address and telephone number of applicant;
2. Time, place and duration of the event, including the portion of the highway affected;
3. Estimated number of persons and/or vehicles which will participate;
4. The purpose and description of the event;
5. Any services of county employees desired or required on location during any event.

D. Unless waived by the board of supervisors, prior to the event the applicant shall pay to the director such amount as the director shall then estimate to be sufficient to reimburse the county for all cost of processing the application, and should the county elect to provide any event-related service or materials, the applicant shall also pay the county's estimated cost of providing such materials or services. The applicant shall, within thirty (30) days after the event, pay the director any additional amounts necessary to fully reimburse the county for actual event-related costs. Any overpayment by the applicant shall be promptly repaid.

E. To ensure cleanup and restoration of the site of the proposed event, an applicant will be required to post a refundable faithful performance bond or cash deposit in amount determined by the director to be sufficient for such purpose prior to the event. Upon completion of the event and inspection by the county, the bond may be returned to the applicant.

Section 46. Subsections (B) and (C) of Section 12.12.030 shall remain the same.

Section 47. Subsections (A), (C) and (D) of Section 12.12.040 of Chapter 12.12 of Title 12 of the Kern County Code are hereby amended to read as follows:

A. Applications shall be filed at least forty-five (45) days prior to the event for those events for which the board of

supervisors is the issuing authority. Applications to the director as the issuing authority shall be made at least thirty (30) days prior to the event or at such time as the director in his discretion deems adequate to process the application.

C. The director may issue permits, as provided in this chapter, whenever the event consists of commercial, motion picture, television, videotape or still photography production. In all other cases the board of supervisors is the issuing authority.

D. Any condition or requirement imposed on any permit issued by the director may be appealed to the board of supervisors, whose decision shall be final.

Section 48. Subsection (B) of Section 12.12.040 shall remain the same.

Section 49. Subsection (B) of Section 12.16.020 of Chapter 12.16 of Title 12 of the Kern County Code is hereby amended to read as follows:

B. Exceptions for repairs as to unimproved roads.

1. Notwithstanding the foregoing, as to any unimproved highway as defined herein, any person, firm or corporation maintaining gas pipes or water mains under franchise or lawful authority may excavate in the highway for purpose of repair of said pipes, without first obtaining a permit, but as soon as possible there must be filed a written statement with the director of transportation for the county containing the same information as is required in an application for permit under this chapter.

2. After any of the work mentioned in paragraph (1) of this subsection is begun, the doing thereof and the repairing and restoring of the highway shall be prosecuted with reasonable diligence and in a manner that will not obstruct the highway or travel thereon more than is absolutely necessary.

Section 50. Subsection (A) of Section 12.16.020 shall remain the same.

Section 51. Section 12.16.040 of Chapter 12.16 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.16.040 Cattle guards - Encroachment permit required - Conditions.

Pursuant to the provisions of Section 985 of the Streets and Highways Code of the State of California, it is made unlawful for any person, firm or corporation to construct, install and/or maintain a cattle guard on any county highway or county right-of-way, except if an encroachment permit therefor has first been obtained from the director of transportation for the county pursuant to this chapter. No such permit shall be issued unless and until the board of supervisors has approved the specifications for the construction of such cattle guard, and the applicant has furnished such bond, if any, as may be required by the board of supervisors.

Section 52. Section 12.16.050 of Chapter 12.16 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.16.050 Permit issuance - Limitations.

Notwithstanding any provision in this chapter to the contrary, the director of transportation for the county shall not issue an encroachment permit pursuant to the provisions of this chapter to any person, firm or corporation for any use of any public highway in the county for which a franchise may be issuable under Article 1 of Chapter 1 of Division 3 (commencing with section 6001) of the Public Utilities Code, unless such person, firm or corporation has been granted a franchise by the county pursuant to the Public Utilities Code; provided, still further, that no encroachment permit shall be issued under this chapter if such permit shall unduly

interfere with the rights and privileges of any person, firm or corporation which has been issued a franchise pursuant to the Public Utilities Code; and the grantee of any such franchise shall have the prior right to make full use of the county streets and county highways, as provided in the franchise, as against all persons applying for an encroachment permit under this chapter who have not been issued such a franchise.

Section 53. Section 12.16.060 of Chapter 12.16 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.16.060 Permit - Application.

Any person, firm or corporation desiring to obtain a permit as mentioned in subsection (A) of Section 12.16.020 of this chapter for any work that penetrates the surface of the highway, shall file with the director of transportation for the county a written application therefor, describing specifically the location, nature and extent of the proposed work and the purpose thereof, and the nature of the right, if any, of the applicant to do such work. Any applicant for permission to lay any gas or water pipes, electrical conduits, or any other pipes or conduits of any kind or nature whatsoever shall file with the application a diagram showing the route, terminals and location in the highway of such gas or water pipes, electrical conduits or pipes or conduits of any kind or nature.

Section 54. Section 12.16.070 of Chapter 12.16 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.16.070 Permit - Issuance.

If it appears that the applicant is lawfully entitled under any franchise, or as the owner of the abutting land, or otherwise has a legal right to do said work in the highway at the place and in the manner proposed, the director of transportation shall, upon being also satisfied that such work is necessary and will be properly done, grant a written permit for the work or such part thereof as he may find proper, except that where the work falls within the class mentioned in Section 12.16.030 of this chapter, he shall first follow the provisions thereof. The permit shall require that the permittee install and maintain a permanent mark at the point of installation identifying such installation. The director of transportation shall thereupon file all such applications and diagrams, together with a memorandum of his action thereon, with the clerk of the board of supervisors.

Section 55. Section 12.16.080 of Chapter 12.16 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.16.080 Permit application - Surface obstruction only.

Any person desiring to obtain a permit for work mentioned in subsection (A) of Section 12.16.020 of this chapter which does not penetrate the surface of the highway, but only constitutes the placing of an obstruction or the piling of material upon the surface thereof, shall make an application in writing to the director of transportation, stating the exact location in the highway where it is desired to place such obstruction or pile such material, the length of time it will remain, and the amount of highway space it will cover. If it appears to the director of transportation that the placing of the obstruction or the piling of the material therein as specified in the application filed under the preceding section will not unduly interfere with traffic in the road or endanger the safety of persons using it, and that it is necessary, he may grant it for a reasonable period of time.

Section 56. Section 12.16.090 of Chapter 12.16 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.16.090 Curbs, gutters, sidewalks and driveway approaches - Permits - Construction standards.

Whenever an application for an encroachment permit under subsection (A) of Section 12.16.020 of this chapter is made for the purpose of construction of curbs, gutters, sidewalks or driveway approaches, the director of transportation shall specify the type that is to be permitted, and the installation thereof shall conform to line and grade as established by the county surveyor. The standards and specifications for such curbs, gutters, sidewalks and driveway approaches shall be according to the standards and specifications adopted by the board of supervisors under the Subdivision of Land Ordinance of the county, Title 18 of this code.

Section 57. Section 12.16.100 of Chapter 12.16 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.16.100 Encroachment permits in new subdivisions.

No permit is required in roads in new subdivisions for the purpose of making the improvements designated by the board of supervisors under the Subdivision of Land Ordinance of the county, Title 18 of this code, and which improvements are a part of the improvement contract between the county and the subdivider; but for any improvement of or encroachment on any road for purposes not designated in the improvement contract, a permit must first be secured from the director of transportation under this chapter. Failure to secure an encroachment permit prior to beginning the work for which one is required, or construction in violation of the terms of such permit, constitutes a violation of this chapter.

Section 58. Section 12.16.130 of Chapter 12.16 of Title 12 is hereby amended to read as follows:

12.16.130 Refilling of excavations.

It shall be the duty of any person, firm or corporation, digging, excavating, plowing up, tearing up, filling, disturbing or changing any portion of the traveled part of the public highway, or the surface thereof, to repair the highway wherever disturbed or affected by the doing of said work, and to restore the highway and the surface thereof to as good condition as the same was in before such work as begun, all of which shall be done to the satisfaction of the director of transportation. The refilling of all such excavations shall be made in the following manner: the dirt shall be replaced and carefully tamped in layers, not exceeding two (2) feet in thickness, and each layer shall be well flooded with water before the next layer is put on, and the top layer shall be well flooded with water and tamped, although the same may be less than two (2) feet in thickness. The surface of such refilling shall, when completed, be smooth and even, and flush with the surrounding surface of the highway, without bumps or depressions. If any person, firm or corporation doing any work hereinbefore mentioned, on any highway, fails to repair such highway and restore the same to its former condition, as herein directed, within a reasonable time, the director of transportation shall report the matter to the board of supervisors and may, upon their order, do or complete the work or repair and restoration; and the person, firm or corporation by whom such digging, excavating, plowing, tearing up, filling, disturbing or changing was done shall be liable to the county for the cost of such work.

Section 59. Section 12.20.080 of Chapter 12.20 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.20.080 Relocation - Demand by director of transportation.

The director of transportation for the county shall specify in a written demand to the person placing or maintaining such pole, poleline, pipe, pipeline, railroad track or other such structure or fixture a reasonable time within which the work of relocation must

be commenced, and such person must commence such relocation within the time specified in the demand and thereafter diligently prosecute the same to completion.

Section 60. Section 12.20.100 of Chapter 12.20 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.20.100 Violation - Penalty.

The director of transportation of the county shall maintain an action in any court of competent jurisdiction in the name of the county to abate the encroachment as a nuisance. If a judgment is recovered in favor of the county, he may, in addition to having the nuisance abated, recover a penalty of ten dollars ($10.00) for each day such nuisance remains after service of notice to remove, and also the costs in the action.

Section 61. Section 12.20.110 of Chapter 12.20 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.20.110 Deposit of recovered penalties.

The director of transportation of the county shall pay all penalties recovered into the county road fund.

Section 62. Section 12.24.030 of Chapter 12.24 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.24.030 Stop intersections - Designation - Marking.

A. Pursuant to the provisions of Section 21354 of the Vehicle Code, the board of supervisors may from time to time by ordinance designate any intersection under its exclusive jurisdiction as a stop intersection, and it may order the director of transportation of the county to erect stop signs at one (1) or more entrances thereto.

B. Notwithstanding any other provision in this section to the contrary, the director of transportation of the county, after taking into consideration sound, basic and standard engineering and traffic safety practices, may erect stop signs at one (1) or more entrances of any intersection under the exclusive jurisdiction of the county if he determines such stop signs are necessary in order to protect the traveling public.

C. As to any intersection of two (2) or more boulevards, the director of transportation, after taking into consideration sound, basic and standard engineering and traffic safety practices, shall determine whether or not any stop signs are necessary, and if he determines that stop signs are necessary, he shall erect such stop signs at one (1) or more entrances thereto as he determines proper to protect the traveling public.

Section 63. Section 12.24.040 of Chapter 12.24 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.24.040 Stop intersections - Locations.

Pursuant to the provisions of Section 21354 of the Vehicle Code, and pursuant to Section 12.24.030 of this chapter, the following intersections are declared to be stop intersections, and the director of transportation of the county shall erect stop signs at one (1) or more entrances thereto, as hereinafter more particularly set forth for each such intersection:

1. Washington Avenue. On Washington Avenue at the intersection of Washington Avenue and Potomac Street, stopping northbound and southbound traffic.

Section 64. Section 12.24.050 of Chapter 12.24 of Title 12 of the Kern County Code is hereby amended to read as follows:

12.24.050 Stop signs.

The director of transportation of the county is authorized to place and maintain, or cause to be placed or maintained, appropriate stop signs upon each and every street or road intersecting a boulevard, at or near the property line of said boulevard. All stop signs erected under the provisions of this section, with the exception of stop signs which were erected prior to January 1, 1957, shall conform with the provisions Section 21400 of the Vehicle Code. All stop signs erected prior to January 1, 1957 shall conform either to the requirements of said Section 21400 or to the statutory requirements in effect at the time that the signs were erected.

Section 65. Subsection (B) of Section 14.32.020 of Chapter 14.32 of Title 14 of the Kern County Code is hereby amended to read as follows:

B. Prior to holding such hearing, the director of waste management shall consult with all affected utilities and shall prepare a report for submission at such hearing containing, among other information, the extent of such utilities' participation and estimates of the total costs to the county and affected property owners. Such report shall also contain an estimate of the time required to complete such underground installation and removal of overhead facilities.

Section 66. Subsection (A) of Section 14.32.020 shall remain the same.

Section 67. Subsection (A) of Section 14.32.060 of Chapter 14.32 of Title 14 of the Kern County Code is hereby amended to read as follows:

A. Any county facilities or equipment installed under the supervision and to the satisfaction of the director of waste management;

Section 68. Subsections (B), (C), (D), (E), (F), (G) and (H) of Section 14.32.060 shall remain the same.

Section 69. Subsection (B) of Section 14.32.090 of Chapter 14.32 of Title 14 of the Kern County Code is hereby amended to read as follows:

B. In the event any person owning, operating, leasing, occupying or renting such property does not comply with the provisions of subsection (A) of this section within the time provided for in the resolution enacted pursuant to this chapter, the director of waste management shall give notice in writing to the person in possession of such premises, and a notice in writing to the owner thereof as shown on the last equalized assessment roll, to provide the required underground facilities and thirty (30) days thereafter shall have the authority to order the disconnection and removal of any and all overhead service wires and associated facilities supplying utility service to such property.

Section 70. Subsection (A) of Section 14.32.090 shall remain the same.

Section 71. Section 15.04.110 of Chapter 15.04 of Title 15 of the Kern County Code is hereby amended to read as follows:

15.04.110 Director

"Director" means the director of transportation management for the county or his authorized representative.

Section 72. Section 15.08.050 of Chapter 15.08 of Title 15 of the Kern County Code is hereby amended to read as follows:

15.08.050 Airport use - Compliance with regulations required.

Any permission granted by the county or director, either directly or indirectly, expressly or by implication to any person to enter upon or use an airport is conditioned upon compliance with the rules and regulations governing airports. Entry upon an airport by any person constitutes an agreement by the person to comply with all applicable rules and regulations of the United States, the state of California, the county of Kern, and the orders and regulations of any officer thereof.

Section 73. Section 15.08.240 of Chapter 15.08 of Title 15 of the Kern County Code is hereby amended to read as follows:

15.08.240 Additional or revised regulations.

The board of supervisors may adopt additional or revised rules and regulations for the safe and orderly conduct of the airport. In the event of an urgent need for additional or revised rules or regulations, the director shall proceed immediately to adopt such rule or regulation and report his action to the board of supervisors at its next regular meeting for the board's ratification, revision or repeal. Such emergency rules or revisions shall be effective and in force for thirty (30) days or until such earlier time as presented to and acted on by the board of supervisors. It is the responsibility of all airport users to acquaint themselves with all rules and regulations governing county-operated airports.

Section 74. Section 15.24.020 of Chapter 15.24 of Title 15 of the Kern County Code is hereby amended to read as follows:

15.24.020 Restricted areas.

The director shall develop security plans for the protection of health and safety of persons and the safety of property at Kern County airports which may include regulations restricting access to certain designated areas to persons having lawful business within such restricted areas, and for the issuance, revocation and suspension of permits allowing authorized persons and vehicles to enter such restricted areas. The airport security regulations may be amended, revised or repealed at any time by the board of supervisors or the director. Such security regulations shall become effective when filed with the clerk of the board of supervisors and upon posting the designated restricted areas with signs which read "Restricted Area - Authorized Personnel Only" or similar language.

Section 75. Subsection (A) of Section 15.24.030 of Chapter 15.24 of Title 15 of the Kern County Code is hereby amended to read as follows:

A. No person, corporation or organization of any kind shall bring or cause a motor vehicle to be brought into an area restricted pursuant to Section 15.24.020 of this chapter unless such vehicle has a permit issued under the security regulations of the director. Violation of this section is a misdemeanor and punishable in the manner prescribed in Section 1.12.030 of this code.

Section 76. Subsection (B) of Section 15.24.030 shall remain the same.

Section 77. Subsection (A) of Section 15.24.040 of Chapter 15.24 of Title 15 of the Kern County Code is hereby amended to read as follows:

A. No person shall enter or remain in an area designated as a restricted areas pursuant to Section 15.24.020 of this chapter

without permission of the director given in the manner prescribed in the security regulations of the director. Violation of this section is a misdemeanor punishable in the manner prescribed in Section 1.12.030 of this code.

Section 78. Subsection (B) of Section 15.24.040 shall remain the same.

Section 79. Section 15.24.050 of Chapter 15.24 of Title 15 of the Kern County Code is hereby amended to read as follows:

15.24.050 Permit denial, suspension or revocation - Grounds - Appeal.

A. The director may revoke, suspend or refuse to issue a permit for a person or vehicle to enter a restricted area for the following reasons:

1. Because the permittee or applicant does not have lawful business in such area or cannot otherwise justify the necessity for having such permit;

2. For violation of airport rules or regulations;

3. For commission of acts threatening airport safety or security; or

4. Adverse information on the past conduct or prior record of the applicant or permittee.

B. An aggrieved party may appeal the director's revocation, suspension, or denial of a permit to the board of supervisors, whose decision shall be final. The director's ruling shall not be stayed during any appeal to the board of supervisors except on the order of the board of supervisors.

Section 80. Section 17.44.020 of Chapter 17.24 of Title 17 of the Kern County Code is hereby amended to read as follows:

17.44.020 Administration and enforcement.

The building inspection department shall administer and enforce the provisions of this chapter, as well as the regulations contained in Chapter 2 of Part 1 of Title 25 of the California Code of Regulations, relating to mobile homes located outside a mobile home park, travel-trailer park, recreational trailer park or temporary trailer park, as now in effect or as amended from time to time.

Section 81. Subsection (A) of Section 17.60.030 of Chapter 17.60 of Title 17 of the Kern County Code is hereby amended to read as follows:

A. "Administrator" means the director of transportation or his designee.

Section 82. Subsections (B), (C), (D), (E), (F) (G), (H) and (I) of Section 17.60.030 shall remain the same.

Section 83. Section 18.05.070 of Chapter 18.05 of Title 18 of the Kern County Code is hereby amended to read as follows:

18.05.070 Relationship to other regulations and requirements.

The regulations of this title and requirements or conditions imposed pursuant to this title shall not supersede any other regulations or requirements adopted or imposed by the Kern County board of supervisors, the Kern County fire department, the Kern County environmental health services department, the Regional Water Quality Control Board, the Air Pollution Control District, the Kern County engineering and survey services department, the Kern County water agency, or any other local, state, or federal agency that has jurisdiction by law over uses and development authorized by this title. All uses and development authorized by this title shall

comply with all other such regulations and requirements. Where two (2) or more ordinances regulate the same use or activity, the more restrictive ordinance shall apply unless a variance has been specifically granted.

Section 84. Subsection (A) of Section 18.10.030 of Chapter 18.10 of Title 18 of the Kern County Code is hereby amended to read as follows:

A. Membership.

The subdivision review committee shall be composed of the director of planning and development services, the environmental health services director, the fire chief, the director of engineering and survey services, the director of transportation management, and the sheriff, or their designated representatives. The board of supervisors may also appoint the head of any other county department or agency to membership on the committee. The director of planning and development services or his/her designated representative shall act as chair of the committee. In the absence of both, the committee shall elect a temporary chairperson. By acting as chairperson, a member shall not be disqualified to vote.

Section 85. Subsection (B) of Section 18.10.030 shall remain the same.

Section 86. Section 18.10.060 of Chapter 18.10 of Title 18 of the Kern County Code is hereby amended to read as follows:

18.10.060 Engineering and survey services department.

A. It shall be the responsibility of the engineering and survey services department to recommend to the subdivision review committee approval, conditional approval, or disapproval of any tentative tract map in relation to improvement facilities. The department's recommendations shall address, among other matters, the following:

1. Adequacy of all tentative map survey, if submitted;
2. Adequacy of any lot use feasibility study;
3. Adequacy of solid waste disposal services and facilities;
4. Review of flood protection facilities intended for public maintenance.

B. It shall be the responsibility of the engineering and survey services department to recommend to the director of planning and development services approval, conditional approval, or disapproval of any tentative parcel map. The department's recommendation shall address, as appropriate, the matters listed in subsection (A) of this section.

C. It shall be the responsibility of the engineering and survey services department to review all final maps for compliance with conditions of approval, compliance with the requirements of the California Subdivision Map Act and this title, to approve all improvement plans and/or improvement agreements, and to carry out other responsibilities imposed upon it by this title.

Section 87. Section 18.10.065 is hereby added to Chapter 18.10 of Title 18 of the Kern County Code to read as follows:

18.10.065 Department of transportation management.

It shall be the responsibility of the Kern County department of transportation management to recommend to the department of planning and development services approval, conditional approval, or disapproval of any tentative tract in relation to the engineering feasibility of street alignments and widths and traffic safety concerns, with particular regard to sight distances, turning maneuvers, and intersection traffic controls.

Section 88. Subsection (J) of Section 18.15.030 of Chapter 18.15 of Title 18 of the Kern County Code is hereby amended to read as follows:

J. Additional Reports and Data. Except where waived by the appropriate department or agency noted, every tentative tract map submittal shall be accompanied by the documents noted in the subsequent subsections. Further, it shall be the responsibility of the subdivider or his/her authorized agent to determine the necessity of such documents prior to submittal of the proposed tract map to the department of planning and development services, and the responsibility of the applicable department or agency to furnish such waiver to the department of planning and development services in writing prior to submittal of the proposed tract to the Subdivision Review Committee. A copy of such waiver shall also be furnished the subdivider or his/her agent.

1. A lot use feasibility study which demonstrates to the environmental health services department, engineering and survey services department, and department of planning and development services that the proposed subdivision and its design and access roads are suitable to serve the intended use of the property and will not have any adverse effect upon the probable future use, development, or subdivision of other property in the surrounding area. The lot use feasibility study shall be considered only as an informational document or guide, and shall not be deemed to regulate any future use, development, or subdivision of other property.

2. A flood hazard study/drainage plan shall be required for a tentative tract map and parcel map. This study shall be prepared by a registered civil engineer and shall address the following items:

a. Provisions of the National Flood Insurance Regulations,

b. Evaluation and mitigation of potential flood hazards as a result of occurrence of the base flood, as required by the flood damage protection ordinance,

c. Suitability of the site for the intended use where a special flood hazard condition exists. This includes the ability to receive off-site floodwaters and discharge them as nearly as possible in the manner and location which existed prior to development,

d. Effect of the proposed improvements on the carrying capacity of existing natural drainage channels and flood control facilities or other appurtenances,

e. Provisions for erosion control, including the prevention of sedimentation or other damage to property or improvements within or without the subdivision,

f. A drainage plan which proposes mitigation measures for any increase of the flow of runoff resulting from the proposed development shall be submitted when required by Kern County departments.

3. A geologic hazards report prepared and signed by a registered geologist or engineering geologist which demonstrates conditions of the site, including description of the geology of the site. This report shall include conclusions and recommendations for mitigation measures with regard to the effect of the geologic conditions on the proposed development. It shall include, but not be limited to, the consideration of:

a. Maximum credible earthquake and maximum expected bedrock acceleration,

b. Faulting,

c. Landslides/rock falls,

d. Land subsidence,

e. Liquefication, as required.

Such report shall be reviewed and approved by the director of planning and development services. No final tract map shall be approved, certified, or recorded if any geologic report required as a condition of approval of the tentative tract map has not been furnished or has been determined to be inadequate by the director of planning and development services. Where a geologic report has been required and furnished in conformity with this subsection, a

notice shall be placed on the tract map as recorded in substantially the following form:

> NOTICE IS HEREBY GIVEN that all or part of the area within the subdivision shown on this map lies within a Special Studies Zone (hazardous fault zone) delineated by the State Geologist, pursuant to the Alquist-Priolo Special Studies Zones Act (commencing with Section 2621 of the California Public Resources Code), the boundaries of which are delineated on this map. In accordance with said Act, a geologic report has been prepared by a registered geologist (showing his name and address) defining and delineating a hazard of surface fault rupture and directed to the problem of potential surface fault displacement, if any, within the boundaries of the subdivision. A copy of such report is on file with the department of planning and development services. Under the Building Code of Kern County, no building permit or installation permit may be issued for any dwelling, mobile home, or other structure for human occupancy located in any hazardous areas as shown in such geologic report.

4. Additional details regarding the proposed water supply, including proposed fire flows as required by the environmental health services department and fire department. Typically, a valid "will serve letter" from the provider of such service will satisfy this submittal requirement,

5. Additional details regarding the proposed sewage disposal systems as required by the environmental health services department. Typically, a valid "will serve letter" from the provider of such service will satisfy this submittal requirement,

6. A soils report, based on adequate test borings, prepared and signed by an engineer with the authority to use the title "soils engineer," shall address the suitability of the site as required by the environmental health service department and the department of planning and development services,

7. Sufficient number of "blue line" prints of the proposed map, as determined by the department of planning and development services, folded to eight and one-half (8 1/2) inches by eleven (11) inches; one (1) legible reduction of the proposed map to eight and one-half (8 1/2) inches by eleven (11) inches; and one (1) sepia (or reproducible) print of the map, unless waived by planning and development services,

8. Hazardous waste verification statement, as required by Section 65962.5 of the California Government Code;

Section 89. Subsections (A), (B), (C), (D), (E), (F), (G), (H), (I) and (K) of Section 18.15.030 shall remain the same.

Section 90. Subsection (J) of Section 18.25.030 of Chapter 18.25 of Title 18 of the Kern County Code is hereby amended to read as follows:

J. Additional Reports and Data. Except where waived by the appropriate department or agency noted, every tentative parcel map submittal shall be accompanied by the documents noted in the subsequent subsections. Further, it shall be the responsibility of the subdivider or his authorized agent to determine the necessity of such documents prior to submittal of the proposed tentative parcel map to the department of planning and development services, and the responsibility of the applicable department or agency to furnish such waiver to the director of planning and development services in writing prior to submittal of the proposed parcel map to the director of planning and development services. A copy of such waiver shall also be furnished to the subdivider or his/her agent.

1. A lot use feasibility study which demonstrates to the environmental health services department, engineering and survey

services department, and department of planning and development services that the proposed subdivision and its design and access roads will not have any adverse effect upon the probable future use, development, or subdivision of other property in the surrounding area. The lot use feasibility study shall be considered only as an informational document or guide, and shall not be deemed to regulate any future use, development, or subdivision of other property,

2. A geologic hazards study shall be required where any part of the land shown on a tentative parcel map is located within a special studies zone (hazardous fault zone), as delineated by the State Geologist pursuant to the Alquist-Priolo Special Studies Zones Act (commencing with Section 2621 of the Public Resources Code). In such cases, the subdivider shall file with the director of planning and development services, prior to approval, certification, or recordation of a subdivision map, a geologic report prepared by a geologist registered in the state of California, defining and delineating any hazard of surface fault rupture and directed to the problem of potential surface fault displacement within the boundaries of the subdivision. The report shall be in conformity with the Policies and Criteria of the State Mining and Geology Board (Title 14, Division 6, Chapter 8, Subchapter 1, California Code of Regulations) and the Guidelines for Evaluating the Hazard of Surface Fault Rupture, promulgated by the California Division of Mines and Geology (Appendix C, Special Publication 42, Revised January 1977), and as the same may be amended or revised from time to time. Such report shall be reviewed and approved by the director of planning and development services.

No final parcel map shall be approved, certified, or recorded if any geologic report required as a condition of approval of the tentative parcel map has not been furnished or has been determined to be inadequate by the director of planning and development services.

Where a geologic report has been required and furnished in conformity with this subsection, a notice shall be placed on the parcel map as recorded in substantially the following form:

> NOTICE IS HEREBY GIVEN that all or part of the area within the subdivision shown on this map lies within a Special Studies Zone (hazardous fault zone) delineated by the State Geologist, pursuant to the Alquist-Priolo Special Studies Zones Act (commencing with Section 2621 of the California Public Resources Code), the boundaries of which are delineated on this map. In accordance with said Act, a geologic report has been prepared by a registered geologist (showing his name and address) defining and delineating a hazard of surface fault rupture and directed to the problem of potential surface fault displacement, if any, within the boundaries of the subdivision. A copy of such report is on file with the Department of Planning and Development Services. Under the Building Code of Kern County, no building permit or installation permit may be issued for any dwelling, mobile home, or other structure for human occupancy located in any hazardous area as shown in such geologic report.

The foregoing requirements for a geologic report shall not apply in any of the following cases:

a. Where the director of planning and development services has determined, in the exercise of his/her reasonable discretion, that the tentative parcel map is not for a development which contemplates eventual construction of structures for human occupancy,

b. Where the director of planning and development services has determined, on the basis of evidence or recommendations provided by a registered geologist, that no undue hazard of surface fault rupture exists, and has waived the requirements for a geologic report, with approval of the

State Geologist, in accordance with Section 2623 of the California Public Resources Code,

c. In case of a parcel map designed and zoned solely for four (4) or fewer single-family dwellings or mobile homes, provided that the director of planning and development services shall require as a condition of the approval of the tentative parcel map that no building permit or installation permit will be issued for any dwelling, mobile home, or other structure for human occupancy on any parcel within such special studies zone, until the subdivider furnishes a geologic report made by a geologist registered in the state of California, and evaluated and approved by the director of planning and development services, defining and delineating a hazard of surface fault rupture and directed to the problem of potential surface fault displacement within such lot, if any, in conformity with the Policies and Criteria of the State Mining and Geology Board (Title 14, Division 6, Chapter 8, Subchapter 1 of the California Code of Regulations) and the Guidelines for Evaluating the Hazard of Surface Fault Rupture, promulgated by the California Division of Mines and Geology (Appendix C, Special Publication 42, Revised January 1977) and as the same may be revised from time to time,

3. Additional details regarding the proposed water supply, including proposed fire flows as required by the environmental health services department and the fire department,

4. Additional details regarding the proposed sewage disposal systems as required by the environmental health services department,

5. A soils report, based on adequate test borings, prepared and signed by an engineer with the authority to use the title "Soils Engineer," shall address the suitability of the site as required by the environmental health services department and the department of planning and development services,

6. Sufficient number of "blue line" prints of the proposed map, as determined by the department of planning and development services, folded to eight and one-half (8 1/2) inches by eleven (11) inches; and one (1) legible reduction of the proposed map to eight and one-half (8 1/2) inches by eleven (11) inches,

7. Hazardous waste verification statement, as required by Section 65962.5 of the California Government Code.

Section 91. Subsections (A) (B) (C) (D) (E) (F) (G) (H) and (I) of Section 18.25.030 shall remain the same.

Section 92. Subsections (A), (C) and (D) of Section 18.45.020 of Chapter 18.45 of Title 18 of the Kern County Code are hereby amended to read as follows:

A. Form. The final tract map shall be in the form and shall contain the data and information prescribed by the California Subdivision Map Act and this chapter.

1. Statements, certificates, and acknowledgments must be legibly stamped or printed upon the map with opaque ink. If polyester base film is used, such film shall have a minimum thickness of four-thousandths (0.004) of an inch. The map shall be prepared in a manner suitable for reproduction by direct print or other reproducing process. The director of engineering and survey services shall not accept any map that is not completely legible.

2. The exterior boundary of the land included within the subdivision shall be delineated by a distinctive border on the final map. Said border shall not obliterate or obscure any figure or other data appearing upon the final tract map.

3. The scale of the final tract map shall adequately depict the subdivision; however, the scale of the map shall not be

less than one (1) inch equals one hundred (100) feet, unless an alternate scale is authorized the director of engineering and survey services.

4. Sheet number and total number of sheets shall appear on the lower right hand corner of each sheet.

5. The tract map number, scale, and north arrow shall be shown on each sheet.

6. In final tract maps containing more than one (1) block, the blocks may be lettered in alphabetical order, commencing with the letter "A," with no omissions or duplications. Lot numbers shall begin with the numeral "1" in each block and shall continue consecutively (in sequence) with no omissions or duplications. If multiple map sheets are required, consecutive numbering shall be required from one (1) map sheet to the next. As an alternative to the foregoing, block letters may be omitted, in which case lot numbers shall begin with the numeral "1" and shall continue consecutively (in sequence) throughout the subdivision with no omissions or duplications. If maps are filed in phases, the lots within each phase shall begin with the numeral "1" or letter "A." All letters or figures shall be conspicuous and solid. They shall not obliterate any other information contained on the map. Circles shall not be drawn around letters or numbers.

7. All lots within a block shall be shown on a single sheet. This requirement may be waived where, in the opinion of the director of engineering and survey services, compliance is not practicable.

8. The title sheet or first map sheet may show the basis of bearings. If coordinates on the "California Coordinate System" are shown for points on the maps and used for basis of bearings, a detail map showing the control scheme through which the coordinates were determined from points of known coordinates shall be shown on a separate map sheet.

9. If more than three (3) map sheets are used, a key diagram showing the area covered by each sheet shall appear on the title sheet or first map sheet.

C. Information on Final Tract Map. The final tract map shall show:

1. The tract number, date of survey, scale, and north arrow;

2. The locations and names of streets; the centerlines thereof; the lengths, tangents, radii and central angle and radial bearings of curves; the total width of each street and width on each side of the centerline; the width of the portion of the street being dedicated; and the width of the existing dedication, if any;

3. The locations and widths of pedestrian ways, if any;

4. The locations and dimensions of public areas and the net acreage, to the nearest one-hundredth (1/100) of an acre, contained therein. If areas are less than one (1) acre, actual square footage shall be stated;

5. The centerlines, widths, boundaries, and dimensions of all easements to which the lots are subject. If the easement is not definitely locatable by record, a statement as to the existence of the easement shall appear on the title sheet. Easements shall be clearly labeled and identified, and if already of record, precise reference to the records shall be made. Easements for storm drains, sewers, building lines, and other purposes shall be denoted by broken lines. Limited or restricted access rights to adjacent highways shall be indicated by hatched lines of the same width as the lines denoting street boundaries;

6. Easements being dedicated shall be indicated in the instrument of dedication;

7. Locations and dimensions of drainage easements;

8. Locations and widths of utility rights-of-way and railroad rights-of-way;

9. Locations and widths of any other easements (slope, equestrian, etc.);

10. Locations and widths of lots or locations of access rights to be dedicated or conveyed to the county;

11. Locations, widths, and names of streets, alleys, and pedestrian ways adjacent to the proposed tract;

12. Locations of city boundary lines;

13. Sufficient data shown to accurately determine the bearing and length of every lot line, block line, and boundary line. Dimensions of lots shall be given as the net dimensions to the boundaries of the rights-of-way of the adjoining streets. No ditto marks shall be used. Length, radius, tangent, and total delta of each curve and the bearing of radial lines to each lot corner on a curve at street intersections and at the beginning and end of nontangent curves shall be shown.

a. Lots containing two and one-half (2 1/2) acres or more shall show gross acreage to the nearest one hundredth (1/100). Lots containing less than two and one-half (2 1/2) acres shall show actual net area expressed as net acreage for lots containing one (1) acre or more and net square footage for lots containing less than one (1) acre. Area shall be shown for irregular shaped lots;

14. The centerline and direction of flow of all natural drainage channels which are not offered for dedication on the map shall be shown by dashed lines terminating in arrows on a separate map sheet;

15. Location and dimensions of all applicable flood-plain zoning shall be shown on a separate map sheet;

16. All dimensions shall be shown in feet and decimals, to the nearest one hundredth (1/100) of a foot. Where the sum of a series must equal a total number, each distance in the series numbers may be expressed to the third decimal place;

17. The following survey data:

a. The radius, semitangent, arc length, and central angle of curves,

b. Suitable primary survey control points, including section corners and monuments existing outside the proposed subdivision,

c. The location of all permanent monuments within the proposed subdivision,

d. Ties to any recorded names or numbers of adjacent subdivisions,

e. Ties to any city and county boundary lines involved;

18. Distances and bearings on the side lines of lots which are crossed by an easement shall clearly indicate the actual lengths of the lot lines. The width, length, bearings, and sufficient ties shall be shown to accurately locate the easement with respect to the tract. The easement must be clearly labeled, and, if already of record, its recorded reference given. If the easement is being dedicated by the map, said dedication shall be properly set out in the owner's statement of dedication. All notes or figures pertaining to the easement shall be smaller and lighter than those relating to the tract itself;

19. The character, description, and positions of all stakes, monuments, or other evidence used to determine the boundaries of the tract shall be clearly shown. If necessary, this information shall be shown by means of a key map or a separately recorded record of survey map;

20. The final tract map shall show adjoining recorded maps, or portions thereof, by lot, parcel, or block number, map name or number, and place of record. The relation of the tract to adjoining maps shall be shown by ties;

21. Whenever the director of engineering and survey services or a city engineer has established the centerline of a street or alley, the data shall be shown on the final map, indicating all monuments found and making reference to a field book or map. If the points were reset by ties, the fact shall be stated;

22. The final tract map shall show all city boundaries crossing or adjoining the tract clearly designated and tied in;

23. City boundaries, and lines between registered (Torrens Title) and unregistered land, and between a separate ownership of registered land, shall be lot lines; that is, such a line shall not cut a lot, but shall be made a line of a lot, except where permitted by the director of engineering and survey services;

24. Any other notes required as a condition of tentative tract map approval shall be shown on the final tract map, title sheet, or on a separate map sheet.

D. Statements, Certificates, and Acknowledgments on Final Tract Map. The following statements, certificates, acknowledgments, and others required by the California Subdivision Map Act shall appear on the title sheet, or on other sheets as may be required:

1. A statement, signed and acknowledged by all parties having any record title or interest in the land subdivided, except as otherwise provided in Sections 66436 through 66439 of the California Government Code, consenting to the preparation and recordation of the final tract map offering for dedication all parcels of land, streets, alleys, pedestrian ways, drainage channels, easements, and other rights-of-way intended for public use, and offering for dedication rights of access to and from prescribed streets, lots, and parcels of land.

2. A statement of the registered civil engineer or licensed surveyor, signed, sealed, and dated, who prepared the survey and the tract final map (statement of civil engineer or surveyor).

3. A statement or certificate for execution by the director of planning and development services (statement or certificate of director of planning and development services).

4. A statement or certificate for execution by the county surveyor (statement or certificate of county surveyor).

5. A statement or certificate for execution by the board of supervisors (statement or certificate of board of supervisors).

6. A statement or certificate for execution by the county recorder on all sheets (statement or certificate of county recorder).

7. A statement or certificate for execution by the public entity for which a dedication is made, where applicable (statement or certificate of district).

8. A statement or certificate for execution by the California Department of Transportation, where applicable.

Forms for statements, certificates, or acknowledgments required by the California Subdivision Map Act and by this title shall be provided by the engineering and survey services department.

Section 93. Subsection (B) of Section 18.45.020 shall remain the same.

Section 94. Subsection (C) of Section 18.45.040 of Chapter 18.45 of Title 18 of the Kern County Code is hereby amended to read as follows:

C. Monuments.

1. Prior to submittal of the final tract map to the board of supervisors for approval, all exterior boundary monuments shall be placed, and the developer's engineer or surveyor of record shall submit a written request to the engineering and survey services department to verify in the field survey data and the existence of monuments as noted on the map. Allowable closure error shall be in accordance with accepted survey practice. The setting of interior monuments may be deferred in accordance with Section 18.55.110.

2. In making the survey for a subdivision, the engineer or surveyor shall set sufficient permanent monuments so that the survey or any part thereof may be readily retraced.

a. Permanent monuments of the type indicated in the development standards shall be placed at all points of intersection of street centerlines, at all angle points of street centerlines, and at all points of beginning and ending of curvature of street centerlines.

b. Permanent monuments of the type indicated in the development standards shall be placed at all angle points, curve points, and points of intersection of the exterior boundary lines of the tract.

c. Nonpermanent monuments of the type indicated in the development standards shall be set at all lot corners. Setting may be deferred in accordance with Section 18.55.110.

3. Survey Monument Encasements.

a. All survey monuments which are known to the surveyor and which lie or will lie within the paved portion of any highway, street, alley, way, or sidewalk within the tract shall be encased as shown in the development standards.

b. This section is applicable to any such area paved with road mix asphalt surfacing, asphalt concrete, or portland cement concrete.

c. There is excepted from the provisions of this section any survey monument which was in existence at the time of the filing of the tentative tract map, and which is located within any paved area which will not be improved or reconstructed in connection with the improvements for such subdivision.

d. The improvements required by this section shall be completed to the satisfaction of the county director of transportation.

e. When the survey point on the monument falls outside of, or at the edge of, the road mix asphalt surfacing or asphalt concrete surfacing of any part-width facility, the monument encasement need not be placed until the adjoining part-width facilities are completed. Sole responsibility for installing this monument encasement rests with the developer who installs the final portion of the adjoining improvements.

4. Notation of Monument on the Final Tract Map. The character, type, and positions of all monuments and encasements shall be noted on the final tract map. If any shortage or excess of distance is found on the ground between existing monuments, compared with the original record, any division of the total must bear its proportion of such shortage or excess. If a monument is replaced, indicate type and condition of monument found and the date of replacement.

5. Restoring Monuments. If any monument is found in a perishable condition, it shall be replaced with a permanent monument and so noted on the final tract map. The instructions as set forth in the "Manual of Instructions for the Survey of Public Lands of the United States" published by the commissioner of the General Land Office, Department of Interior, Washington, D.C., shall be followed for the subdivision of public lands and privately owned lands, in the restoration of lost or obliterated corners and the retracement of section lines.

Section 95. Subsections (A), (B) and (D) of Section 18.45.040 shall remain the same.

Section 96. Subsections (B) and (E) of Section 18.45.050 of Chapter 18.45 of Title 18 of the Kern County Code are hereby amended to read as follows:

B. No improvement work shall occur and no permit shall be issued for any improvement work on any land in a subdivision or on any improvement for a subdivision prior to approval and recordation of the final tract map, unless all of the following conditions are met:

1. The subdivider has made written application to the department of planning and development services and has obtained approval from the director of the department of planning and development services for such work. In making this determination, the director of the department of planning and development services shall submit the request to the engineering and survey services department for review and recommendation prior to taking action;

2. The tentative tract map has been approved or conditionally approved;

3. Any rezoning to make the lots conform to the Kern County zoning ordinance has been approved;

4. All improvement plans and grading plans have been approved and appropriately signed pursuant to this title; and

5. The director of the department of planning and development services determined that the approved work is not likely to cause substantial environmental damage, is not likely to substantially and avoidably injure fish or wildlife or their habitat, is not likely to cause serious public health problems, and is not likely to injure any nearby property, whether the subdivision is completed or abandoned.

E. Such improvement work shall be subject to inspection and approval by the engineering and survey services department, provided that the board of supervisors may designate another county department or public entity to inspect and approve such work.

Section 97. Subsections (A), ((C), (D), (F), (G), (H), (I), (J), (K), (L), (M), (N), (O) and (P) of Section 18.45.050 shall remain the same.

Section 98. Subsections (A), (C) and (D) of Section 18.45.060 of Chapter 18.45 of Title 18 of the Kern County Code are hereby amended to read as follows:

A. Form. The final parcel map shall be in the form and shall contain the data and information prescribed by the California Subdivision Map Act and this chapter.

1. Statements, certificates, and acknowledgments must be legibly stamped or printed upon the map with opaque ink. If polyester base film is used, such film shall have a minimum thickness of four thousandths (0.004) of an inch. The map shall be prepared in a manner suitable for reproduction by direct print or other reproducing process. The director of engineering and survey services shall not accept any map that is not completely legible.

2. The exterior boundary of the land included within the subdivision shall be delineated by a distinctive border on the final map. Said border shall not obliterate or obscure any figure or other data appearing upon the final map.

3. The scale of the final map shall adequately depict the subdivision; however, the scale of the map shall not be less than one (1) inch equals one hundred (100) feet, unless an alternate scale is authorized by the director of engineering and survey services.

4. Sheet number and total number of sheets shall appear on the lower right hand corner of each sheet.

5. The parcel map number, scale, and north arrow shall be shown on each sheet, if necessary.

6. In final parcel maps containing more than one (1) block, the blocks may be lettered in alphabetical order, commencing with the letter "A," with no omissions or duplications. Parcel numbers shall begin with the numeral "1" in each block and shall continue consecutively (in sequence) with no omissions or duplications. If multiple map sheets are required, consecutive numbering shall be required from one (1) map sheet to the next. As an alternative to the foregoing, block letters may be omitted, in which case parcel numbers shall begin with the numeral "1" and shall continue consecutively (in sequence) throughout the subdivision with no omissions or duplications. If maps are filed in phases, the lots within each phase shall begin with the numeral "1" or letter "A." All letters or figures shall be conspicuous and solid. They shall not obliterate any other information contained on the map. Circles shall not be drawn around letters or numbers.

7. All parcels within a block shall be shown on a single sheet. This requirement may be waived where, in the opinion of the director of engineering and survey services, compliance is not practicable.

8. The title sheet or first map sheet may show the basis of bearings. If coordinates on the "California Coordinate System"

are shown for points on the maps and used for basis of bearings, a detail map showing the control scheme through which the coordinates were determined from points of known coordinates shall be shown on a separate map sheet.

9. If more than three (3) map sheets are used, a key diagram showing the area covered by each sheet shall appear on the first map sheet.

C. Information on Final Parcel Map. The final parcel map shall show:

1. The parcel map number, date of survey if any, scale, and north arrow;

2. The locations and names of streets; the centerlines thereof; the lengths, tangents, radii and central angle and radial bearings of curves (when such curve data is pertinent to the establishment of the exterior map boundary or for the calculation of net areas, when required); the total width of each street and the width on each side of the centerline; the width of the portion of the street being dedicated; and the width of the existing dedication, if any;

3. The locations and widths of pedestrian ways, if any;

4. The locations, dimensions, and area of each parcel. Gross area shall be shown for those parcels containing two and one-half (2 1/2) acres or larger. Net area shall be shown for those parcels containing less than two and one-half (2 1/2) acres. If parcel area is less than one (1) acre, then area shall be expressed as net square feet. Acreage shall be shown to the nearest one-hundredth (1/100) of an acre, and square footage shall shown to the nearest square foot;

5. The centerlines, widths, boundaries, and dimensions, where necessary, of all easements to which the parcels are subject. If the easement is not definitely locatable by record, a statement as to the existence of the easement shall appear on the title sheet. Easements shall be clearly labeled and identified, and if already of record, precise reference to the records shall be made. Easements for storm drains, sewers, building lines, and other purposes shall be denoted by broken lines. Limited or restricted access rights to adjacent highways shall be indicated by hatched lines of the same width as the lines denoting street boundaries;

6. New easements being dedicated on the final map shall be indicated in the owner's statement;

7. Locations and widths of parcels or location of access rights to be dedicated or conveyed to the county;

8. Locations, widths and names of streets, alleys and pedestrian ways adjacent to the proposed parcel map;

9. The centerline and direction flow of all natural drainage channels which are not offered for dedication on the map shall be shown by dashed lines terminating in arrows;

10. Sufficient data shown to accurately determine the bearing and length of every parcel line, block line and boundary line. Survey data shall also include: the radius, semitangent, arc length, and central angle of curves (when such curve data is pertinent to the establishment of the exterior map boundary or for calculation of net areas when required); suitable primary survey control points, including section corners and monuments existing outside the proposed subdivision; the location of all permanent monuments within the proposed subdivision; and ties to any recorded names or number of adjacent subdivisions. All dimensions shall be shown in feet and decimals, to the nearest one hundredth (1/100) of a foot. The sum of a series must equal a total number;

11. The character, description and positions of all stakes, monuments, or other evidence used to determine the boundaries of the parcel map shall be clearly shown. If necessary, this information shall be shown by means of a key map;

12. Whenever the director of engineering and survey services or a city engineer has established the centerline of a street or alley, the data shall be shown on the final map, indicating all monuments found, if by field survey, and making reference to a field book or official map. If the points were reset by ties, the fact shall be stated;

13. The map shall show all city boundaries crossing or adjoining the parcel map clearly designated and tied in;

14. Any other notes or additional information required as a condition of tentative parcel map approval describing conditions regarding the parcel map as to the date of filing which do not affect record title interest shall be shown on an additional map sheet of the final parcel map.

D. Statements, Certificates, and Acknowledgements on Final Parcel Map. The following statements, certificates, and acknowledgements required by the California Subdivision Map Act shall appear on the title sheet, or on other sheets as may be required:

1. A statement, signed and acknowledged by all parties having any record title or interest in the land subdivided, except as otherwise provided in Sections 66346 through 66439 of the California Government Code, and excepting holders of mineral rights, consenting to the preparation and recordation of the final parcel map; and may include offering for dedication all parcels of land, streets, alleys, pedestrian ways, drainage channels, easements and other rights-of-way intended for public use, offering for dedication rights of access to and from prescribed streets, lots and parcels of land (Owner's Statement). The subdivider may furnish the owner's statement in a separate document in form approved by the advisory agency.

2. A statement of the registered civil engineer or licensed surveyor, signed, sealed, and dated, who prepared the survey and the final parcel map (Statement of Civil Engineer or Surveyor);

3. A statement and/or certificate for execution by the director of planning and development services (Statement and/or Certificate of director of planning and development services);

4. A statement for execution by the county surveyor (Statement of County Surveyor);

5. A statement and/or certificate for execution by the county recorder on all sheets (Statement and/or Certificate of County Recorder);

6. A statement for execution by the public entity for which a dedication is made, where applicable (Statement of District);

7. A statement for execution by the California Department of Transportation, where applicable.

Forms for statements, certificates, and acknowledgements required by the California Subdivision Map Act and by this title shall be provided by the engineering and survey services department.

Section 99. Subsection (B) of Section 18.45.060 shall remain the same.

Section 100. Subsection (E) of Section 18.45.090 of Chapter 18.45 of Title 18 of the Kern County Code is hereby amended to read as follows:

E. Such improvement work within existing and proposed rights-of-way shall be subject to inspection and approval by the engineering and survey services department or other public entity, as appropriate.

Section 101. Subsections (A), (B), (C), (D), (F), (G), (H), (I), (J), (K), (L), (M), (N), (O) and (P) of Section 18.45.090 shall remain the same.

Section 102. Subsection (B) of Section 18.55.020 of Chapter 18.55 of Title 18 of the Kern County Code is hereby amended to read as follows:

B. No final tract map shall be presented to the board or final parcel map to the director of planning and development services for

approval until the subdivider either completes the required improvements, with the agreement for guarantee of improvements constructed or furnished prior to recordation of the final tract or parcel map, or enters into an agreement with the county agreeing to do such work. In the case where the improvement work is completed and accepted prior to recordation and the work is of a minor nature, as determined by the director of engineering and survey services, the requirement for entering into an agreement for guarantee of improvements constructed or furnished prior to recordation may be waived by the director of engineering and survey services.

Section 103. Subsections (A) (C) (D) (E) and (F) of Section 18.55.020 shall remain the same.

Section 104. Subsection (A), (B), (C), (D), and (G) of Section 18.55.030 of Chapter 18.55 of Title 18 of the Kern County Code are hereby amended to read as follows:

A. Street and Highway Improvements.

1. The subdivider shall improve all streets, highways, alleys, public ways, and easements as follows:

a. All street improvements shall be made in accordance with the Kern County development standards.

b. The location, type, character, and dimensions of all structures and grades of work shall be subject to approval by the engineering and survey services department.

c. All required road improvements shall be subject to inspection and approval by the director of engineering and survey services or appropriate public entity.

d. Except as otherwise expressly provided, the alignment criteria for all roads shall be in accordance with the Kern County development standards.

e. In those cases where approved plans and profiles are required, the same shall be filed with and approved by the engineering and survey services department.

f. All required road improvements shall be located within road easements which conform to the requirements of this chapter.

g. For Type C subdivisions, the director of engineering and survey services and fire chief are authorized to allow maximum grades in excess of that specified for short distances, by limited exception.

h. Street and highway improvements shall conform to the following standards (if a conflict arises in determining the "type" of subdivision, the higher "type" improvements shall be applicable):

(1) Type A Subdivisions.

(a) Type A subdivisions will be required in the following circumstances:

(i) Divisions of land located entirely or partially within the boundaries of any map contained in Appendix A, where any parcel to be created is less than twenty (20) gross acres in size;

(ii) All multifamily residential, commercial, or industrial development;

(iii) All other divisions of land which do not qualify as Type B or Type C subdivisions;

(iv) Any division of land which would otherwise qualify as Type B or Type C subdivisions, but which the subdivider, at his/her option, elects to use Type A improvements;

(v) Any division of land located within the boundaries of an adopted specific plan requiring Type A improvements;

(b) Street improvement standards for Type A subdivisions shall be in accordance with the Kern County development standards.

(2) Type B subdivisions.

(a) Type B subdivisions will be required in the following circumstances:

(i) Divisions of land involving five (5) or more parcels and located entirely outside of the boundaries of the maps contained in Appendix A, where any parcel to be created is less than twenty (20) gross acres in size;

(ii) Divisions of land located entirely outside of the boundaries of the maps contained in Appendix A, where any parcel to be created is one-half (1/2) net acre (twenty-one thousand seven hundred and eighty (21,780) square feet) or less in size;

(iii) Any division of land located within the boundaries of an adopted specific plan requiring Type B improvements.

(b) Street improvement standards for Type B subdivisions shall be in accordance with the Kern County development standards.

(3) Type C Subdivisions.

(a) Type C subdivisions will be required in the following circumstances:

(i) Divisions of land where each parcel created is twenty (20) gross acres or larger, except where:

- the site, or any portion thereof, is located within the boundaries of the maps contained in Appendix A, and
- the land use zoning of the site allows a minimum lot size less than twenty (20) acres, and
- the land use designation shown on the general plan or applicable specific plan allows a zone classification where the minimum lot size is less than twenty (20) acres,
- then the subdivider shall be in accordance with Type A improvements for parcel sizes less than twenty (20) acres as shown in Appendix B;

(ii) Divisions of land located entirely outside of the boundaries of the maps contained in Appendix A, where any parcel to be created is greater than one-half (1/2) net acre (twenty-one thousand seven hundred and eighty (21,780) square feet) or more in size.

(b) Street improvement standards for Type C subdivisions are as follows:

(i) Roads shall be graded to a minimum width of twenty (20) feet;

(ii) Maximum grade of roads shall be fifteen percent (15%);

(iii) Roads shall be traversable by standard passenger car;

(iv) Road surfacing is not required;

(v) Plans and profiles are not required.

(c) As an alternative to Section 18.55.030(A)(1)(h)(3)(b), roads may be designed utilizing the requirements of the Uniform Fire Code upon approval of a limited exception by the fire chief.

(d) The subdivider shall make all road improvements necessary to meet the standards in Section 18.55.030(A)(1)(h).

2. Dead End Streets.

a. Wherever a dead-end street more than two hundred (200) feet long, as measured from the centerline of the nearest intersection, is permitted, a "turnaround" shall be constructed in accordance with the Kern County development standards. If the "turnaround" is outside the tract boundary, an easement therefor

shall be offered for dedication to the county, and if Type A improvements are required and drainage is not affected, construction of curbs, gutters, and sidewalks shall not be required.

b. When an existing dead-end street with an existing "turnaround" is extended, the developer constructing the new street shall perform all work necessary to eliminate the existing "turnaround."

3. Street Adjacent Railroad. Where the subdivision is adjacent to a railroad right-of-way and topography permits, highways in the same direction as the railroad shall be adjacent to and as nearly parallel to such railroad right-of-way as practicable.

4. Street Railroad Crossing. If a street crosses railroad tracks, the subdivider shall pay all costs of construction and costs of protection devices as may be required by the county and/or the California Public Utilities Commission, except for any portion required by the California Public Utilities Commission to be paid by the railroad company.

5. Access Roads.

a. Each parcel created by any subdivision subject to this chapter shall be connected by means of an approved access road or roads to a public highway which is maintained by the county or other public entity or government agency.

b. The director of planning and development services may approve or require such additional access roads as may be needed for emergency purposes and for safe and adequate circulation within the subdivision.

c. Access roads shall be topographically feasible for travel by standard passenger cars and shall be made and kept open, clear, and free from obstructions, buildings or structures of any kind, as determined by the director of planning and development services. The minimum travel way width shall be twenty (20) feet if it serves more than one (1) parcel or twelve (12) feet if it serves no more than one (1) parcel.

d. Turnouts shall be required on all access roads in hazardous fire areas of Kern County where deemed necessary by the fire chief.

e. Access roads shall be improved in accordance with the Kern County development standards.

f. Required access shall be over public roads, provided that the director of planning and development services or the board of supervisors, as appropriate, may grant a variance authorizing access over a private road or over a road dedicated to a semipublic use by way of a dedication made for the exclusive use and benefit of all properties located within the subdivision or within a public district.

g. Except where access can be provided over an existing public road, access roads shall be dedicated or offered for dedication.

h. On-site access roads shall have a minimum easement width of sixty (60) feet, except that in case the road is along the boundary, it shall be a minimum width of forty (40) feet for local streets, forty-five (45) feet for secondary (collector) highways, and fifty-five (55) feet for major (arterial) highways.

i. For parcel maps, off-site access roads shall have a minimum easement width of forty (40) feet, except where a previously approved access road exists at a lesser width or along a major or secondary highway alignment where appropriate half-street easements shall be provided. If off-site improvements are required for a residential parcel map, said improvements shall consist of a part-width local street constructed from the project to the nearest county-maintained streets or highways and with a width not less forty (40) feet.

j. For tract maps, off-site access shall have a minimum width of sixty (60) feet, except where located along a major or secondary highway alignment where the appropriate minimum half-width easement shall be required.

k. Frontage roads shall be connected to local streets, major highways, and secondary highways in accordance with the Kern County development standards.

l. One (1) foot nonaccess strips shall be provided when a half-width or part-width street dedication where stub streets in excess of two hundred (200) feet are provided in a Type A or Type B subdivision abuts undeveloped land. However, this requirement may be waived by the director of the engineering and survey services department and the director of the department of planning and development services upon a determination that the zoning requirements of said abutting undeveloped land will ensure completion of the road once the property is developed

m. Cul-de-sac and bulb dedication and design shall be in accordance with the Kern County development standards.

n. Intersection design shall be in accordance with the Kern County development standards.

6. Removal of Obstructions.

a. All obstructions shall be removed from the streets, roadways, or right-of-way dedicated in the final map of a subdivision or which are deeded to the county in connection therewith which, in the determination of the engineering and survey services department, interfere with the use thereof or constitute a dangerous or hazardous condition to the traveling public.

b. All obstructions shall be removed which are located within existing county, state, or city streets or roadways lying immediately adjacent to streets, roadways, or rights-of-way which are dedicated in the final map or which are dedicated or deeded by the subdivider to the county in connection therewith and which obstructions, in the determination of the engineering and survey services department, interfere with the use of said existing county, state, or city streets or roadways, or constitute a dangerous or hazardous condition to the traveling public.

c. Said obstructions shall be relocated without expense to the county to such locations as specified by the engineering and survey services department or in the improvement plans for the subdivision. As used in this section, obstructions shall include, but shall not be limited to, structures, power poles, telephone or other communication poles, and appurtenances, pipelines, conduits, canals, and/or their rights-of-way and easements.

d. It shall be the responsibility of the subdivider to contact the utility companies or other owners of said obstructions to advise them of proposed improvement, and make direct arrangements for the relocation of and compensation for the cost of relocating any conflicting obstructions. Evidence of such completed arrangements shall be presented by the subdivider to the engineering and survey services department prior to the final approval of the improvement plans by the county.

e. Removal of obstructions shall include, but is not limited to, the quitclaim or subordination of rights to the county by all interest and easement holders having the right to place facilities or otherwise obstruct the free use of the road right-of-way. Where major facilities exist, a common use agreement may be allowed when determined necessary by the director of engineering and survey services.

f. All easements which affect the intended and/or permitted use of a lot or parcel shall be quitclaimed, abandoned, or relocated prior to recordation of any final map.

B. Water Supply.

1. The subdivider shall install a water system for the land division, where a final map is required, together with such equipment, pipelines, and facilities as may be necessary to ensure the land division with a minimum supply of water for domestic and fire protection purposes. However, in instances where the parcels being created will be served by individual on-site water wells, it is not necessary that said wells be constructed prior to recordation of the final map; except as otherwise required by the environmental health services department.

2. The water distribution system shall be designed in accordance with standards for the design and construction of water systems adopted by the board of supervisors.

3. The minimum supply of water which shall be required for the land division under Section 18.55.030(B)(1) shall be in accordance with the standards adopted by the board of supervisors.

4. If any part of the land division is located within or partially within a Type A improvement area, and if any parcel created by the subdivision is less than two and one-half (2 1/2) acres gross area, a domestic water supply and distribution system shall be furnished and constructed, subject to the Kern County development standards, to serve all lots in the subdivision.

5. Construction plans for such water supply and distribution system shall be supplied by the subdivider and shall be approved by the engineering and survey services department, the environmental health services department, and the fire department, consistent with the Kern County development standards.

C. Sanitary Sewers.

1. Where a proposed subdivision creates parcels of less than two and one-half (2 1/2) acres and is located within three hundred (300) feet of a sanitary sewer system or where required by an adopted general or specific plan, all of the lots within the subdivision shall be connected to the sanitary sewer system upon the following conditions:

a. The existing or proposed wastewater treatment plant for the system has or will provide the capacity to serve the subdivision.

b. The legal entity in charge of the sanitary sewer system has agreed to furnish its sewerage facilities to the subdivision, and annexation to the corporate limits of a city is not a condition of providing such service.

c. Connection to the sanitary sewer system is technically and economically feasible, as determined by the waste management department.

In any case, the subdivider shall provide sanitary sewer facilities for the subdivision under such circumstances as they are necessary in the opinion of the Kern County environmental health services department. The sewage collection and treatment system shall be designed by the subdivider's civil engineer, and shall be approved by the waste management department and the civil engineer for the entity responsible for the operation and maintenance of the system.

2. Dry sewer collection systems shall be installed when required by an adopted general or specific plan.

3. Septic monitoring shall be by means of the formation or annexation to a public entity when required by the waste management director and the environmental health services director.

D. Grading, Drainage, Flood Protection, and Erosion Control.

1. The subdivider shall be required to make those improvements deemed necessary by the director of planning and development services for proper grading of the land within the subdivision, drainage, flood protection, and erosion control, including the prevention of sedimentation or other damage to property or improvements within or outside the subdivision.

2. The subdivider shall be required to obtain or provide land dedication or easements on land within or outside the subdivision as deemed necessary by the director of planning and development services for improvements, access, and flowage ways. Dedications and/or easements on land outside the subdivision shall be obtained in accordance with the provisions of the Subdivision Map Act.

3. Grading shall be subject to the Kern County grading ordinance and shall be subject to the inspection and approval of the department of planning and development services.

4. All drainage improvements shall be subject to inspection and approval by the engineering and survey services department.

G. Solid Waste. For those subdivisions not located within the vicinity of an adequate existing solid waste disposal site, the subdivider shall provide a means satisfactory to the waste management department and environmental health services department for the disposal of solid waste from the subdivision.

Section 105. Subsections (E) and (F) of Section 18.55.030 shall remain the same.

Section 106. Subsections (B), (C), (D), (E), and (I) of Section 18.55.050 of Chapter 18.55 of Title 18 of the Kern County Code are hereby amended to read as follows:

B. Streets and Highways.

1. The following standards, together with the provisions of the Kern County standards for streets, are minimum requirements of this title. All roads shall be designed to allow for safe traffic movement, and higher standards may be required where reasonably necessary for such purpose.

a. Major highway rights-of-way shall not be less than one hundred ten (110) feet in width.

b. Secondary (collector) highway rights-of-way shall not be less than ninety (90) feet in width.

c. Local street rights-of-way shall not be less than sixty (60) feet in width.

d. Specific or official plan lines shall be the minimum width as specified by the applicable plan.

e. State highways shall be the minimum width as specified by the California Department of Transportation and/or the circulation element of the general plan.

f. Where a street is on the boundary of a subdivision or a development a part-width street of fifty-five (55) feet for a major highway, forty-five (45) feet for a secondary (collector) highway, or forty (40) feet for a local road is permitted. For Type C subdivisions, where a local street is on the boundary, the width may be reduced to thirty (30) feet. A dedication of access rights shall be made by the subdivider along such boundary when located in a Type A or Type B subdivision.

g. The maximum length of a cul-de-sac for Type A and B subdivisions shall be six hundred (600) feet.

h. Frontage road right-of-way widths shall be a minimum of forty-four (44) feet.

i. Streets (other than major highways) proposed for predominately industrial areas which will be used for heavy truck traffic or truck parking may be constructed according to Type A secondary highway width and standards with approval of the engineering and survey services director and the director of planning and development services. Cul-de-sacs shall have a minimum property line radius of seventy-five (75) feet. In other instances, subdivisions zoned for commercial or industrial purposes shall be improved to local street commercial standards.

j. If roadway turnouts are required within State Response Areas, said turnouts shall be a minimum of ten (10) feet in width and thirty (30) feet in length, with a minimum twenty-five foot taper on each end; or as approved by the Kern County fire department.

k. Dead-end roads within State Response Areas shall comply with the following criteria, unless otherwise approved by the Kern County fire department:

(1) The maximum length of a dead-end road, including all dead-end roads accessed from that dead-end road, shall not exceed the following cumulative lengths, regardless of the number of parcels served:

Parcels zoned for less than one acre	800 feet
Parcels zoned for 1 acre to 4.99 acres	1,320 feet
Parcels zoned for 5 acres to 19.99 acres	2,640 feet
Parcels zoned for 20 acres or larger	5,280 feet

All lengths shall be measured from the edge of the roadway surface at the intersection that begins the road to the end of the road surface at its farthest point. Where a dead-end road

crosses areas of differing zoned parcel sizes, requiring different length limits, the shortest allowable length shall apply.

(2) Where parcels are zoned five (5) acres or larger, turnarounds shall be provided at a maximum of one thousand three hundred and twenty (1,320) foot intervals.

(3) Each dead-end road shall have a turnaround constructed at its terminus.

C. Street Access.

1. Access to Lots.

a. Each lot shall have frontage on a public street or public access easement, except as provided in Section 18.55.050(C)(1)(h).

b. The primary means of vehicular access to each lot shall be by means of direct physical connection to the street which fronts upon the lot. The feasibility of such primary means of access must be demonstrated as provided in this section.

c. If access to the street which fronts upon the lot is prevented by a legal limitation imposed or approved by the county or state, such primary means of access may be a connection to any street adjacent to the lot, notwithstanding the provisions of Section 18.55.050(C)(1)(b).

d. If required due to topographic or other constraints, in conjunction with the design and approval of any tentative subdivision map, the subdivider shall demonstrate, by means of a lot use feasibility study, that prospective building sites and driveway locations are both feasible and probable and in conformity with the requirements of this title and other applicable ordinances and regulations of the county, including, but not limited to, the Uniform Fire Code.

e. Driveway improvements located on a lot, and not within a public right-of-way, shall be subject to the requirement of the Uniform Fire Code, the Uniform Building Code, and the zoning ordinance.

f. Driveway improvements located within a public right-of-way shall be subject to the Kern County development standards, standards for streets, and the reasonable requirements of the engineering and survey services department.

g. This section shall not be construed as requiring that a driveway constructed subsequent to the improvement work of the subdivision must be located in the manner demonstrated by the subdivider under Section 18.55.050(C)(1)(d), provided, however, that it shall be subject to the Uniform Fire Code, the Uniform Building Code, and the zoning ordinance provisions relating to driveways.

h. Upon approval of a variance, lots within a subdivision may have frontage on a private street which is an integral part of the overall design and use of the improvements, which shall be designed and improved according to the standards in this title, unless otherwise allowed by variance.

i. Type A or Type B subdivisions shall not be designed with single-family residential lots or parcels fronting on a major or secondary (collector) highway except as follows:

(1) All lots or parcels fronting on a secondary (collector) highway contain a minimum width of one hundred (100) feet; or

(2) The subdivision is designed so that all lots or parcels will obtain access from a local street, access rights to the major or secondary (collector) highway are relinquished, and a vehicular access control wall or fence, as approved by the director of planning and development services, is constructed; or

(3) A frontage road is provided.

2. Alleys.

a. An alley at least thirty (30) feet wide or access as approved by the fire department shall be provided for any lot proposed to be used for multifamily residential, commercial, or industrial purposes, and a plan of development shall be filed with the tentative map showing the method of circulation for service vehicles in such cases.

b. Where two alleys intersect, twenty-(20-) foot corner cutoffs along property lines or a twenty- (20-) foot radius shall be provided.

c. Where topography or other circumstances make the use of an alley impracticable, approval may be granted relative to any of the foregoing requirements of this section by the joint action of the director of planning and development services, the fire chief, and the director of engineering and survey services.

d. Alleys shall not be included in any single-family residential land division unless required to conform to existing adjacent uses.

e. Alleys are not permitted in Type B or Type C areas. Approval may be granted to allow alleys contrary to this paragraph by the joint action of the director of planning and development services, the fire chief, and the director of engineering and survey services.

D. Blocks. The following standards apply to Type A and Type B subdivision types:

1. Block lengths shall not exceed one thousand three hundred and twenty (1,320) feet, provided that approval may be granted by the director of planning and development services and the director of engineering and survey services where such lengths are precluded by existing adjacent development, canals, drainage channels, railroad rights-of-way, topographic feature, or other similar obstructions.

2. The width of each block shall be sufficient to allow for two (2) tiers of lots except where through or double-frontage lots are permitted.

3. Pedestrian easements shall be provided when required by the board of supervisors or the director of planning and development services, as appropriate, where such easements are necessary to provide access to schools, parks, playgrounds, shopping centers, transportation facilities, or other public use facilities. The board of supervisors or the director of planning and development services, as appropriate, may require such easements to be appropriately landscaped and lighted, and the design of each pedestrian easement shall be approved by the director of planning and development services and the director of engineering and survey services.

E. Block Corner Treatment. All property line corner radii at intersections for divisions of land shall be a minimum of twenty (20) feet, unless an alternate treatment is approved by the director of engineering and survey services.

I. Subdivision Design.

1. Where the keeping of equine animals is proposed as a use within a development, the subdivider shall provide adequate equestrian trails as an integral part of the development, and prior to approval of the final map, a means shall be provided for maintenance of any such ways and trails, as approved by the director of planning and development services; provided that a limited exception may be granted by the director of planning and development services for the establishment of equestrian trails where such trails are precluded by location and design of the proposed subdivision.

2. Within a development of urban density, as defined by the general plan, the subdivider is encouraged to provide pedestrian ways when appropriate, and shall provide bikeways as required by the bikeways element of the general plan as an integral part of the development, and in such cases, prior to approval of the final map, a means shall be provided for the maintenance of any such ways, as approved by the director of planning and development services and the director of engineering and survey services. Design of bikeways and pedestrian ways shall be in accordance with the California Department of Transportation standards.

3. The subdivider shall provide public utility easements as may be required for the various concerned utility companies or districts, as determined by the board of supervisors or the director of planning and development services, as appropriate.

4. All new utility services shall be placed underground for all Type A subdivisions creating five (5) or more lots or as

required by a specific plan and/or mitigation measure. Underground utility construction shall be in accordance with the provisions of Public Utility Commission General Order 95. Any above-ground cabinets or facilities shall be screened in a manner approved by the director of the Kern County department of planning and development services. Any above-ground cabinets or facilities located within the road right-of-way shall be permitted only upon approval by the director of the Kern County engineering and survey services department. Compliance with this requirement may result in the need to create public utility easements outside of the right-of-way.

5. The director of planning and development services, the director of engineering and survey services, or the board of supervisors may require dedication of nonaccess strips and/or waiver of vehicular access rights, wherever necessary, to regulate access and control future development.

6. Six (6-) foot-high solid masonry walls shall be constructed in accordance with the Kern County development standards for tracts as follows:

a. On all major (arterial) highway frontages for tracts with lot or parcel sizes of less than two and one-half (2 1/2) acres and located within a Type A subdivision.

b. On all secondary (collector) highway frontages for tracts with lot sizes of less than two and one-half (2 1/2) acres, located within a Type A subdivision, and where relinquishment of access rights are required.

c. On all rear and side property lines of tracts zoned for single-family residential purposes that are contiguous to property zoned for multifamily, commercial, or industrial purposes.

d. As recommended by the subdivision review committee and approved by the board of supervisors or the director of planning and development services, as appropriate.

7. Fences or walls for parcel maps shall be as required by the zoning ordinance and/or the director of planning and development services.

8. Fences and walls constructed in accordance with the Kern County development standards may be located one (1) foot within the road right-of-way. Fences and walls which do not conform to the Kern County development standards shall be permitted if located outside the road right-of-way and if a maintenance entity is established for the continual maintenance of the fence or wall.

9. Street lighting will be installed and a means shall be provided for contracting for public utility services as a condition of approval of all Type A final tract map subdivisions, commercial and industrial subdivisions, and other type subdivisions as required by the director of planning and development services. The lighting must meet the minimum maintained levels as recommended by the respective public utility servicing the area being developed. The lighting design must be based upon the illumination levels as required by the utility providing service. Maintenance of street lighting shall be by an existing entity or by formation of an entity, as approved by the director of engineering and survey services.

Section 107. Subsections (A), (F), (G), (H) and (J) of Section 18.55.050 shall remain the same.

Section 108. Subsections (A), (B), (C), (D), (F), (G), (H) and (I) of Section 18.55.060 of Chapter 18.55 of Title 18 of the Kern County Code are hereby amended to read as follows:

A. General. Improvement plans shall be prepared under the direction of and shall be signed, sealed, and dated by a registered civil engineer licensed by the state of California. Improvement plans shall include, but not be limited to, storm drains, streets, drainage plans, water systems, sewer systems, and related facilities. The engineering and survey services department will, along with other departments, review and approve all improvement

plans with the final approval provided by the director of engineering and survey services.

B. Form. The following specifications are intended to serve as a guideline for improvement plans. Regardless of the form, all improvement plans shall be legibly drawn.

1. Plans, profiles, and details shall be legibly drawn, printed, or reproduced on twenty-four (24) by thirty-six (36) inch sheets. A border shall be made on each sheet providing one-half (1/2) inch at top, bottom, and right side and one and one-half (1 1/2) inches on the left side.

2. A suitable title block shall be placed in the lower right corner or along the right edge and provide adequate space for approval by the director of engineering and survey services and for approval of plan revisions.

3. Plan and profiles shall be drawn to the scale of one (1) inch equals forty (40) feet (1"=40') or larger unless approved by the director of engineering and survey services. Details shall be drawn to a scale that clearly shows the facility being constructed. The scales for various portions of the plans shall be shown on each sheet.

4. A vicinity map shall be shown on the first sheet of all sets of plans.

5. A north arrow shall be shown on each sheet when applicable.

6. Plans shall be laid out to orient north to the top or right edge of the sheet unless approved otherwise by the director of engineering and survey services.

7. All lettering shall be one-eighth (1/8) inch minimum.

8. If the plans include three (3) or more sheets, a key map showing the streets, lots, easements, storm drains, index, and vicinity map shall be included.

9. In instances where uncertainty exists, the final form of all plans shall be approved by the director of engineering and survey services.

C. Contents. The improvement plans shall show complete plans, profiles, and details for all required improvements to be constructed, both public and private, including common areas, and shall be submitted with the appropriate fees. Improvement plans shall not be reviewed until the engineering and survey services department has determined that the submittal is complete.

D. Supplementary Plans and Calculations. Hydrology, hydraulic plans and calculations, paving design, feasibility studies, water system calculations, bond estimates, and any structural calculations, as may be required, shall be submitted with the improvement plans to the director of engineering and survey services. All calculations shall be legible, systematic, and signed, sealed, and dated by a registered civil engineer licensed by the state of California and in a form approved by the director of engineering and survey services or the director of planning and development services, as applicable.

F. Review by the Engineering and Survey Services Director. The subdivider shall submit the improvement plans, all computations, and appropriate improvement plan checking fees to the director of engineering and survey services for review. Upon completion of the review, one (1) set of the preliminary plans with the required revisions indicated will be returned to the subdivider's engineer.

G. Approval by the Engineering and Survey Services Director.

1. After completing all required revisions, the subdivider's engineer shall transmit the originals of the improvement plans to the director of engineering and survey services for signature.

2. Upon finding that all required revisions have been made and that the plans conform to all applicable county ordinances, standards, and conditions of approval of the tentative map, the director of engineering and survey services shall sign and date the plans.

3. Approval of the improvement plans shall not be construed as approval of the grading, street lighting, telephone, cable television, gas, electric service, or other utility plans.

4. Approval by the director of engineering and survey services shall in no way relieve the subdivider or the subdivider's engineer from responsibility for the design of the improvements and for any deficiencies resulting from the design or from any required conditions of approval of the tentative map.

H. Revisions to Approved Plans.

1. By Subdivider. Requests by the subdivider or the engineer for revisions to the approved plans appearing necessary or desirable during construction shall be submitted in writing to the director of engineering and survey services or authorized representative, shall be accompanied by revised cronars of the original drawings showing the proposed revision, and shall be signed, sealed, and dated by the subdivider's engineer. If the revision is acceptable, the revised cronars shall be submitted, with appropriate fees, to the director of engineering and survey services for approval. Construction related to revised improvement plans will not be permitted to commence until such plans have been approved by the director of engineering and survey services.

2. By the Engineering and Survey Services Director.

a. When revisions are deemed necessary by the director of engineering and survey services to protect public health and safety, or as field conditions may require, a request in writing shall be made to the subdivider and engineer. The subdivider's engineer shall revise the plans and transmit the originals signed, sealed, and dated, with appropriate fees, to the director of engineering and survey services for approval within the time specified by the director of engineering and survey services.

b. If revisions are deemed necessary by the director of engineering and survey services, construction of all or any portion of the improvements may be stopped until revised drawings have been submitted.

c. The subdivider may appeal revisions required by the director to the board of supervisors by filing an appeal with the clerk of the board following receipt of the request to revise the plans.

I. Plan Checking and Inspection Costs for Revisions. Fees for the checking of plans or calculations or inspection as a result of revisions to the approved plans shall be established by resolution of the board of supervisors. The fees shall be submitted, with revised tracings, prior to the approval of the revision by the director of engineering and survey services. Where minor changes are proposed by the subdivider, the director of engineering and survey services may approve the requested minor change, in a form approved by the director, and allow the change to be shown on the "record" drawings when the project is completed in conformance with Section 18.55.100(D)(1).

Section 109. Subsection (E) of Section 18.55.060 shall remain the same.

Section 110. Subsections (A), (C), (D), (E), (F), (G) and (I) of Section 18.55.070 of Chapter 18.55 of Title 18 of the Kern County Code are hereby amended to read as follows:

A. Completion Agreement Required.

1. The subdivider shall enter into an agreement for completion of improvement work, to be effective concurrently with approval of the final map by the board of supervisors or the director of engineering and survey services, as appropriate, which shall require faithful, proper, and full completion of all improvement work, required to be done under the provisions of this title, within one (1) year from the date of such approval of the final map, or within such extension of time as may be authorized under Sections 18.25.090 and 18.15.100 of this title. The subdivider shall furnish improvement securities and insurance certificates. The final map shall not be approved until such documents have been filed with the board of supervisors or the

director of engineering and survey services, as appropriate, and are in proper form and fully executed.

2. The board of supervisors or the director of engineering and survey services, as appropriate, shall have discretion to require each completion agreement to contain provisions, in addition to those mentioned in this title, as it may deem to be in the public interest, for the proper protection of the county, its governing board, officers, employees and agents, and necessary for the prompt and faithful completion of such improvement work.

3. The form of completion agreements, securities, and related documents shall be subject to approval by the county counsel.

4. The provisions contained in completion agreements shall conform substantially to the applicable provisions of this title.

5. The subdivider's surety shall endorse its consent on the completion agreement; provided, however, that failure of the surety to do so shall not affect the validity of such agreement nor the validity of the security.

6. No limitation upon the liability of a corporate surety shall be construed as a limitation on the liability of the subdivider.

7. The liability of the subdivider shall not be deemed limited to the amount of the improvement security in any case.

C. Contents of the Completion Agreement.

1. Specifications. All detailed specifications, plans, profiles, and general conditions as may be required by this title and the Kern County development standards, and as may otherwise be necessary for the improvement work to be completed shall be attached to and made a part of the completion agreement and shall be prepared at the expense of the subdivider.

2. Maintenance of Improvements Pending Acceptance or Approval. The subdivider shall maintain all of the improvement work and shall repair or replace any improvement work which may deteriorate or be damaged or destroyed from any cause, subject to release from such obligation by acceptance of such work. The subdivider shall so covenant in the completion agreement.

3. Repair of Damage by Subdivider to Accepted Work. The subdivider shall repair or replace any damage to any of the work which has been accepted or approved by the board of supervisors as may be caused by any other work undertaken by the subdivider or his surety. The subdivider shall so covenant in the completion agreement.

4. Guarantee Against Defects. With respect to improvement work which has been accepted or approved by the board of supervisors or the director of engineering and survey services, as appropriate, the subdivider shall guarantee and maintain the same against any defective work or labor done, or defective materials furnished, in the performance of the completion agreement within one (1) year after the operative date of acceptance or approval of such work by the board of supervisors or the director of engineering and survey services, as appropriate. The subdivider shall, within fourteen (14) days of receiving a notice of defect, correct, repair, or replace any and all such defects on demand. The subdivider shall so covenant in the completion agreement.

5. Provisions Not Limitation on Liability. None of the provisions of Sections 18.55.070(C)(2) through 18.55.070(C)(4) inclusive, nor any related covenant in the completion agreement, shall be construed as limiting the scope or extent or any liability of the subdivider under the law for any willful or negligent act or omission of the subdivider, his contractors, agents, or employees.

6. Covenant for Drainage Facility Completion. With respect to drainage facilities, the board of supervisors is empowered to require the subdivider to covenant in the completion agreement to carry out any changes or alteration in the design of construction thereof as may appear necessary to the board to protect life or property at any time prior to acceptance of approval thereof.

7. Limited Changes may be Required. With respect to improvement work, including drainage facilities, that may not have been subject to an express agreement, the subdivider shall agree to carry out changes or alterations in the design or construction thereof as may appear necessary to the board of supervisors for the accomplishment of the purposes of this title and the Kern County development standards. The net aggregate cost of such changes or alterations shall not exceed ten percent (10%) of the original estimated overall cost of the improvements described in the improvement agreement. Changes in cost shall take into account the aggregate of additive and deductive changes, and exclude such changes or alterations as may be required under any express agreement.

D. Changes Requested by Subdivider.

1. The subdivider shall not change or alter the design, specifications, or mode of accomplishment of the improvement work as provided in said agreement, except as authorized by order of the board of supervisors or the director of engineering and survey services, as appropriate.

2. If any such change or alteration requested by the subdivider shall cause the estimated cost of all work to be done to exceed the liability of his/her surety or security, such security shall be commensurately increased.

E. Increase in Liability on Security Relative to Changes or Alterations.

1. With respect to such changes or alterations as may be approved by a corporate surety, the amount of its liability on the bond to secure faithful performance shall be deemed increased by the amount of the cost thereof, and the bond shall so provide.

2. With respect to such changes or alterations as to which the consent of a corporate surety is not obtained, the amount of its liability on the bond to secure faithful performance shall be deemed increased by the amount of the cost thereof, subject to the limitations in Section 18.55.070(F), and the bond shall so provide.

3. The liability of a corporate surety shall be deemed increased in an amount which is that proportion of the respective amount of increase due to changes or alterations as the original security for payments bears to the original amount of the security for faithful performance, subject to the limitations described in Section 18.55.070(F), and the bond shall so provide.

4. If the improvement security is in a form other than a corporate surety bond, the subdivider shall increase the amount of such security in accordance with Sections 18.55.070(E)(2) and 18.55.070(E)(3) as a condition to authorization of any such change or alteration.

5. If a corporate surety bond lacks any or all of the provisions described in this section, the board of supervisors or the director of engineering and survey services, as appropriate, shall require the bond to be amended to so provide, or the amount of the bond to be increased, or additional security to be furnished by the subdivider in conformity with this section, as a condition of authorization of any such change or alteration.

F. Limitations on Liability of Corporate Surety Relative to Changes or Alterations not Approved by Surety. With respect to such changes or alterations as to which the consent of a corporate surety is not obtained, the amount of increase in its liability under its improvement security for faithful performance and for security for payment to contractors shall not exceed in the aggregate ten percent (10%) of the original amount of such security as fixed by the board of supervisors or the director of engineering and survey services, as appropriate, in any case taking into account both additive and deductive changes and excluding such changes or alterations as may be requested by the subdivider and expressly approved by the surety.

G. Failure to Timely Complete Work or Covenants.

1. If the subdivider or his/her surety shall fail to complete the improvement work or perform his/her covenants faithfully, properly, and in full accordance with the completion agreement, all within one (1) year from the date of approval of the final map by the board of supervisors or the director of engineering

and survey services, as appropriate, or within any extension of time as may be authorized, the county shall be entitled to exercise its right of recovery upon any corporate surety bond given to secure faithful performance. If the improvement security is in a form other than a corporate surety bond, the county shall be entitled to draw against such security. In either case, action by the county shall be without any prior notice and without prejudice to any other remedy the county may have in the premises at law or in equity, including, but not limited to, the option to cause the work to be completed or to cause any covenant to be performed under any other applicable provisions of this title.

2. If the board of supervisors determines that any one of the following circumstances exists, the board shall be entitled to give the subdivider or his/her surety fourteen (14) days written notice to begin the work or perform such covenant and/or to diligently and continuously perform such work or covenant:

a. That the subdivider has failed or neglected to begin the work or any feature of the work within a time which will reasonably allow its completion within the time (or any valid extension of time) provided in the agreement;

b. That the subdivider has abandoned any of the work;

c. That the subdivider has failed to keep the work under the direct control of a superintendent, manager, engineer, or other competent agent;

d. That the subdivider (if he/she is a natural person) has been declared incompetent, placed under the care of a guardian or conservator, has disappeared, or is deceased;

e. That the subdivider has filed a petition in bankruptcy or has been declared bankrupt;

f. That the subdivider has failed or neglected to timely perform any of his/her covenants in the agreement;

g. That there are any other circumstances showing that the county is not reasonably secure in the proper and timely performance of such agreement or any covenant therein.

3. If the subdivider or his/her surety shall fail to perform within such fourteen (14) day period, the county shall be entitled to exercise its right of recovery upon any corporate surety bond given to secure faithful performance. If the improvement security for faithful performance is in a form other than corporate surety bond, the county shall be entitled to draw against such security. In either case, action by the county shall be without any additional notice and without any prejudice to any other remedy the county may have in the premises, either at law or in equity, including, but not confined to, the option to cause the work to be completed as provided in Section 18.55.070(H) or to cause any covenant to be performed under any other applicable provisions of this title.

I. Insurance.

1. The subdivider shall agree to secure, maintain, and timely pay all premiums on, and cause its contractors and subcontractors to secure, maintain, and timely pay all premiums on, Workers' Compensation Insurance as required by the California Labor Code and amendments thereto, at all times until their respective work is completed, and furnish to county satisfactory evidence thereof on request.

2. The subdivider shall agree to secure, maintain, and timely pay all premiums on a policy or policies of broad form comprehensive liability insurance in the amounts, and with the coverage and endorsements set forth below, in form and with insurance companies satisfactory to the director of engineering and survey services and county counsel, by the terms of which the named insured and additional insureds are indemnified against liability for any bodily injury or death of any person, or any damage to or loss of any property sustained by any person, firm or corporation, and for which the subdivider is legally liable.

3. Said policy or policies shall contain provisions or endorsements as follows:

a. Showing the county, its governing board, officers, employees, and agents as additional insureds.

b. Providing blanket contractual liability coverage for the subdivider's indemnity obligations for personal injury or death of any person, or for any damage to or loss of property, and for which the subdivider is legally liable.

c. Providing broad form property damage liability coverage, including, but not confined to, damage caused by blasting, collapse, structural injuries, and to underground utilities. Such policy or endorsement shall not contain the so-called "x," "c," or "u" exclusions.

d. Providing coverage of the subdivider's products and completed operations.

e. Providing "cross liability" or "severability of interest" coverage for all said additional insureds.

f. Providing that any other insurance maintained by the county, its governing board, officers, employees, or agents is excess and not contributing insurance with respect to the insurance carried by the subdivider.

g. Providing that the coverage afforded said additional insureds shall not be prejudiced by any failure of the subdivider or any other person to comply with any notice requirements of such policy.

h. Providing that such policy may not be canceled nor may the coverage thereof be reduced, nor may any provision or endorsement thereof be amended or revised in any manner detrimental to the interests of said additional insureds, until expiration of thirty (30) days after written notice thereof has been delivered to the director of engineering and survey services.

4. The subdivider shall maintain the insurance coverage required in this section and pay all premiums promptly when due, at all times until expiration of one (1) year after all improvement work mentioned in the agreement has been accepted or approved.

5. Prior to presentation of the final map to the board of supervisors or the director of engineering and survey services, as appropriate, for approval, the subdivider shall file with the county surveyor a certificate of insurance showing the insurance coverage required under this section.

6. Within thirty (30) days after approval of the final map, the subdivider shall file the following with the county surveyor:

a. A true copy, certified by the insurance carrier of said policy (or policies) and all endorsement thereon, showing the insurance coverage required under this section; and

b. A true copy of a receipt showing payment of all premiums on such policy or policies.

7. At all times during which the subdivider is required to maintain insurance coverage under this section, there shall be filed with the county surveyor promptly after issuance, a true copy, certified by the insurance carrier, of:

a. Any endorsement of certificate showing renewal of any policy or policies required under this section; or

b. Any policy which renews or replaces any such policy with all endorsements thereon. The filing of any such policy, endorsement, or certificate shall not be deemed to excuse the carrier from furnishing any notices required in Section 18.55.070(I)(3)(h). The subdivider shall also promptly file with the county surveyor a true copy of the receipt showing payment of all premiums due on account of any such renewal or replacement.

8. If at any time during which the subdivider is required to maintain insurance coverage under this section, the subdivider or his/her surety shall fail to maintain the insurance coverage so required, or to promptly pay all premiums thereon when due, or if any policy or policies so required is canceled or if the coverage therein is reduced or any provision or endorsement therein is amended or revised in any manner detrimental to the interest of said additional insureds, the county shall be entitled to make written demand upon the subdivider for payment of such delinquent premium or replacement of such policy or coverage, provision, or endorsement, as the case may be, and if such default is not cured within seven (7) days from the date of such demand, the county shall be authorized, at its option exercised by and in the discretion of

the board of supervisors, to pay all or part of such delinquent premium or to obtain a replacement policy, coverage, provision, or endorsement, as the case may be, similar to that required by this section, provided that by so doing it shall have no obligation to obtain coverage for the subdivider or his/her surety, except at its option; and upon demand the subdivider and his/her surety, jointly and severally, shall be obligated to and shall reimburse the county for any premiums incurred by the county in any such respect.

9. The aggregate limits of said liability policy shall be set by resolution of the board of supervisors.

10. The board of supervisors or the director of engineering and survey services, as appropriate, is authorized to provide in any completion agreement for other or additional coverage or endorsements as it may determine to be in the public interest, or for the proper protection of the county, its governing board, officers, employees, or agents, provided that such coverage or endorsement is generally available to persons doing similar improvement work from insurance companies admitted under the laws of California.

11. The board of supervisors or the director of engineering and survey services, as appropriate, is authorized to provide in any completion agreement, or to amend any completion agreement, to provide for modification or deletion of coverage or endorsements in connection with required insurance coverage, if the board of supervisors or the director of engineering and survey services, as appropriate, determines that such coverage or endorsement is not generally available to persons doing similar improvement work from insurance companies admitted under the laws of California. Insurance coverage shall not be required in those instances where all of the required improvement work has been completed and accepted by the county and a maintenance agreement provided.

Section 111. Subsections (B), (H) and (J) of Section 18.55.070 shall remain the same.

Section 112. Subsections (A), (B), (C) and (D) of Section 18.55.090 of Chapter 18.55 of Title 18 are hereby amended to read as follows:

A. Determination of Amount. The basis for the determination of the amount of security shall be by an estimate of the total cost of improvements prepared by the subdivider's engineer and approved by the director of engineering and survey services. The security shall be of such an amount that includes, but is not limited to, costs for improvements required to satisfy the conditions of approval, details of the improvement plans, insurance, contingencies, inflation, contract administration, superintendence, additional engineering, plan revisions, other agencies' inspections and bonds, utility relocation and abandonment, and construction staking.

B. Time for Filing. The completion agreement described in Section 18.55.070 shall be secured by a good and sufficient improvement security in accordance with Sections 66499 et seq. of the California Subdivision Map Act, which shall be filed with the clerk of the board of supervisors or the director of engineering and survey services prior to approval of the final parcel map.

C. Security for Faithful Performance.

1. Improvement security shall be provided to secure faithful performance of the completion agreement and the covenants thereof, including, but not confined to, maintenance of improvements pending acceptance or approval, repair of damage to accepted work, and guarantee against defects.

2. If provided by corporate surety bond, improvement security shall be in the amount of one hundred percent (100%) of the total estimated cost of the improvement work as determined by the board of supervisors or the director of engineering and survey

services, as appropriate. All other forms of improvements security shall be in the amount of one hundred and ten percent (110%) of the total estimated cost of improvement work as determined by the board of supervisors or the director of engineering and survey services, as appropriate. When the subdivider has completed a portion of the improvements, which have not been finally accepted or approved by the board of supervisors, the amount of security for faithful performance may be reduced to allow credit for the completed, but not accepted or approved, work. When a corporate surety bond is used, the faithful performance security shall be of an amount not less than one hundred percent (100%) of the estimated cost of the incomplete work plus ten percent (10%) of the estimated cost of the completed work. When other than a corporate surety bond is used, the faithful performance security shall be of an amount not less than one hundred ten percent (110%) of the estimated cost of the incomplete work plus eleven percent (11%) of the estimated cost of the completed work.

D. Security for Payments of Claims (Laborers and Materialmen)

1. Security shall be provided for payment of all claims and sums mentioned in Section 66499.2 of the California Government Code, including costs, reasonable expenses, and fees (including reasonable attorney's fees) incurred in successfully enforcing such obligation.

2. If such security is a corporate surety bond, it shall be in the amount of fifty percent (50%) of the total estimated cost of the work, as determined by the board of supervisors or the director of engineering and survey services, as appropriate, and the obligation to pay such costs, expenses, and fees shall be in addition to the face amount of such bond. If such security is other than a corporate surety bond, it shall be in the amount of sixty percent (60%) of the total estimated cost of the improvement work, as determined by the board of supervisors. The board of supervisors has determined that such increased amount is necessary and reasonable to secure payment of such costs, expenses, and fees. When the subdivider has completed a portion of the improvements which have not been finally accepted or approved by the board of supervisors, the labor and materialmen security may be reduced to allow credit for the completed, but not finally accepted or approved, work. When a corporate surety bond is used, the labor and materialmen security shall not be less than fifty percent (50%) of the incomplete work, and not less than sixty percent (60%) of the incomplete work when other than a corporate surety bond is used.

Section 113. Subsections (E), (F), (G) and (H) of Section 18.55.090 shall remain the same.

Section 114. Subsections (A), (D), (E) and (G) of Section 18.55.100 of Chapter 18.55 of Title 18 are hereby amended to read as follows:

A. Improvement work which is subject to a completion agreement shall be subject to inspection and approval by the engineering and survey services department. Fee for the inspection shall be submitted before any of the improvement plans are signed by the director of engineering and survey services; said fee shall be established by resolution of the board of supervisors.

D. Certificate of Inspection.

1. When all of the required improvement work or a separate unit of the work has been properly and fully completed in accordance with the completion agreement, in the case where the final tract or parcel map has been recorded, and the improvement plans and conditions or approval in the case where the work has been fully completed prior to recordation, the subdivider may apply in writing for inspection thereof. With his/her application, the subdivider shall furnish as requested the following documentation:

a. Acceptance letters from the water purveyor and sanitary sewer operator for whom the subdivider has furnished, constructed, and/or installed improvements.

b. Copies of finaled, accepted, approved, or completed building permits, grading permits, and/or encroachment permits for work, facilities, and improvements the subdivider has furnished or constructed.

c. In the case of final tract maps, a letter from the subdivider's engineer stating he/she has installed the temporary and permanent survey monuments and has been paid for his/her work.

d. Signed, sealed, and dated record ("as-built") drawings of the improvement plans prepared by a civil engineer. The record drawings shall include all minor changes approved by the director of engineering and survey services during the course of construction. Fees for processing the record changes shall be established by resolution of the board of supervisors and shall be submitted with the record drawings. Once the minor changes have been placed on the tracings by the civil engineer, the civil engineer responsible for the record drawings signs, seals, and dates the drawings.

2. The responsible county official shall cause such inspection to be made within a reasonable time, and if he/she finds such work or unit thereof to have been properly and fully completed in accordance with said agreement and the rules relating to inspection, he/she shall certify such fact in writing.

3. Such certificates shall be delivered to the county surveyor, and when he/she has received all certificates pertaining to work or such separate unit of work, he/she shall within a reasonable time deliver the same to the clerk of the board of supervisors or the director of engineering and survey services, as appropriate.

E. If the board of supervisors finds that such work or unit thereof has been faithfully, properly, and fully completed in accordance with said agreement and the rules relating to inspection, the board of supervisors or the director of engineering and survey services, as appropriate, shall make an order accepting or approving the work of improvement or completed unit thereof. Such order shall be deemed operative from the time the certificate of inspection was delivered to the clerk of the board.

G. In special circumstances, the director of engineering and survey services may require the subdivider to provide additional inspection of the required improvements or a portion thereof and certification of the completion of the improvements by a registered engineer.

Section 115. Subsections (B), (C) and (F) of Section 18.55.100 shall remain the same.

Section 116. Subsections (E) and (G) of Section 18.55.130 of Chapter 18.55 of Title 18 of the Kern County Code are hereby amended to read as follows:

E. Release of Security Retained for Guarantee Against Defects.

1. Upon expiration of one (1) year following the completion and acceptance of the work, the security retained for the guarantee against defects shall be released, provided that no defective work or labor done, or defective materials furnished in the performance of the work has been reported in writing and delivered to the clerk of the board of supervisors at any time within one (1) year after the operative date of acceptance or approval of such work by the board of supervisors or the director of engineering and survey services, as appropriate.

2. In case such security is retained on account of such defect, it shall be released when all such defects have been corrected, repaired, or replaced by the subdivider or his/her surety.

G. The board of supervisors may by order, from time to time, authorize the director of engineering and survey services to release or reduce any such improvement security in accordance with the provisions of this chapter and to certify such release or reduction.

Section 117. Subsections (A), (B), (C), (D) and (F) of Section 18.55.130 shall remain the same.

Section 118. Subsections (F) and (G) of Section 18.65.020 of Chapter 18.65 of Title 18 are hereby amended to read as follows:

F. To correct any other type of map error or omission as approved by the director of engineering and survey services, which does not affect any property rights. Errors and omissions may include, but not be limited to, lots and numbers, acreage, street names, and identification of adjacent record maps. Error does not include changes in courses or distances from which an error is not ascertainable from the data shown on the final tract or parcel map;

G. To make modifications when there are changes which make any or all of the conditions of the map no longer appropriate or necessary and that the modifications do not impose any additional burden on the present fee owner of the property, and if the modifications do not alter any right, title, or interest in the real property reflected on the recorded map. The modification shall be set for public hearing by the director of engineering and survey services. The director of engineering and survey services or the board of supervisors shall confine the hearing to consideration of, and action on, the proposed modification.

Section 119. Section 18.65.040 of Chapter 18.65 of Title 18 of the Kern County Code is hereby amended to read as follows:

18.65.040 Submittal and approval by the director of engineering and survey services.

The amending map or certificate of correction, complete as to final form, shall be submitted to the director of engineering and survey services for review and approval. The director of engineering and survey services shall examine the amending map or certificate of correction and if the only changes made are those mentioned in Section 18.65.020 above, this fact shall be certified on the amending map or certificate of correction.

Section 120. Section 18.65.050 of Chapter 18.65 of Title 18 of the Kern County Code is hereby amended to read as follows:

18.65.050 Filing with county recorder.

The amending map or certificate of correction certified by the director of engineering and survey services shall be filed in the office of the county recorder in which the original map was filed. Upon such filing, the county recorder shall index the names of the fee owners and the appropriate subdivision designation shown on the amending map or certificate of correction in the general index and map index respectively. The original map shall be deemed to have been conclusively so corrected and shall impart constructive notice of all the corrections in the same manner as though upon the original map.

Section 121. Section 18.70.096 of Chapter 18.70 of Title 18 of the Kern County Code is hereby amended to read as follows:

18.70.096 County director of transportation management.

"County director of transportation management" means the person appointed pursuant to Section 2.82.020 of this code.

Section 122. Section 18.70.139 is hereby added to Chapter 18.70 of Title 18 of the Kern County Code to read as follows:

18.70.139 Engineering and survey services department.
"Engineering and survey services department" means the engineering and survey services department of the county of Kern, including the county surveyor's office.

Section 123. Section 18.70.140 is hereby added to Chapter 18.70 of Title 18 of the Kern County Code to read as follows:

18.70.140 Engineering and survey services, Director of.
"Director of engineering and survey services" means the director of engineering and survey services of the county of Kern or his/her designated representative.

Section 124. Section 18.70.312 of Chapter 18.70 of Title 18 of the Kern County Code is hereby repealed.

Section 125. Section 18.70.315 of Chapter 18.70 of Title 18 of the Kern County Code is hereby repealed.

Section 126. Section 18.70.398 is hereby added to Chapter 18.70 of Title 18 of the Kern County Code to read as follows:

18.70.398 Transportation management department.
"Transportation management department" means the transportation management department of the County of Kern, including the road commissioner.

Section 127. Section 19.04.597 of Chapter 19.04 of Title 19 of the Kern County Code is hereby amended to read as follows:

19.04.597 Engineering and survey services department.
"Engineering and survey services department" means the engineering and survey services department of the county of Kern, including the county surveyor's office.

Section 128. Section 19.04.600 of Chapter 19.04 of Title 19 of the Kern County Code is hereby amended to read as follows:

19.04.600 Engineering and survey services director.
"Engineering and survey services director" means the engineering and survey services director of the county of Kern or his/her designee.

Section 129. Section 19.04.096 of Chapter 19.04 of Title 19 of the Kern County Code is hereby amended to read as follows:

19.04.096 Building Official.
"Building official" means the Kern County resource management agency director or his/her designee.

Section 130. Subsection (A) of Section 19.80.020 of Chapter 19.80 of Title 19 of the Kern County Code is hereby amended to read as follows:

A. Street and road dedications shall be made to the county, in a manner prescribed by the engineering and survey services department, for all existing or proposed local, secondary and major highways. The required dedication shall be thirty (30) feet from the centerline of a local street, forty-five (45) feet from the

centerline of a secondary highway, and fifty-five (55) feet from the centerline of a major highway, or as required by any adopted official or specific plan line. In cases where a street is on the boundary of a development, a minimum dedication of forty (40) feet shall be made.

Section 131. Subsections (B), (C), (D), (E), (F), (G), (H), (I), (J), (K), (L), (M), (N), (O), (P), (Q), (R), (S) and (T) of Section 19.80.020 shall remain the same.

Section 132. Subsection (A) of Section 19.80.030 of Chapter 19.80 of Title 19 of the Kern County Code is hereby amended to read as follows:

A. Street and road dedications shall be made to the county, in a manner prescribed by the engineering and survey services department, for all existing or proposed local, secondary and major highways. The required dedication shall be thirty (30) feet from the centerline of a local street, forty-five (45) feet from the centerline of a secondary highway, and fifty-five (55) feet from the centerline of a major highway, or as required by any adopted official or specific plan line. In cases where a street is on the boundary of a development, a minimum dedication of forty (40) feet shall be made.

Section 133. Subsections (B), (C), (D), (E), (F), (G), (H), (I), (J), (K), (L), (M), (N), (O), (P), (Q), (R) and (S) of Section 19.80.030 shall remain the same.

Section 134. Subsection (F) of Section 19.88.070 of Chapter 19.88 of Title 19 of the Kern County Code is hereby amended to read as follows:

F. Driveways and access roads serving residential projects of three (3) or more units shall be improved with a minimum of three (3) inches of road mix and shall tie to a paved road (under encroachment permit from the transportation management department, where applicable). The paving requirement may be waived by the planning director when site access is not obtained from a paved road and when the project is not part of a precise development (PD) plan or cluster (CL) development.

Section 135. Subsections (A), (B), (C), (D), (E) and (G) of Section 19.88.070 shall remain the same.

Section 136. Subsection (O) of Section 19.98.050 of Chapter 19.98 of Title 19 of the Kern County Code is hereby amended to read as follows:

O. All required federal, state and county rules and regulations shall be complied with at all times, including, but not limited to, the rules and regulations of the following agencies:

1. California Division of Oil and Gas;
2. Kern County fire department;
3. Kern County health department;
4. Regional Water Quality Control Board;
5. Air Pollution Control District;
6. Kern County engineering and survey services department.

Section 137. Subsections (A), (B), (C), (D), (E), (F), (G), (H), (I), (J), (K), (L), (M) and (N) of Section 19.98.050 shall remain the same.

Section 138. Subsection (C) and (E) of Section 19.100.110 of Chapter 19.100 of Title 19 of the Kern County Code is hereby amended to read as follows:

> C. The board of zoning adjustment shall determine whether the posting of security is necessary to guarantee reclamation in accordance with any approved reclamation plan or amended reclamation plan, and, if so, shall fix the amount thereof, subject to the limitations provided in this section. In making any such determination, the board of zoning adjustment shall consider the recommendations of the director of engineering and survey services and the director of planning and development services.
>
> E. The security shall be posted with the director of engineering and survey services or with such other officer of the county as the board of supervisors may order.

Section 139. Subsections (A), (B), (D), (F), (G), (H) and (I) of Section 19.100.110 shall remain the same.

ORDINANCE NO. G-6077

AN ORDINANCE OF THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN, STATE OF CALIFORNIA, AMENDING AND ADDING VARIOUS SECTIONS THROUGHOUT THE ZONING ORDINANCE CODE, TITLE 19, OF THE KERN COUNTY ORDINANCE CODE

The following ordinance, consisting of three-hundred sixty-eight (368) sections, was duly and regularly passed and adopted by the Board of Supervisors of the County of Kern, State of California, at a regular meeting of the Board of Supervisors held on the 11th day of April, 1994, by the following vote, to wit:

AYES: Ashburn, Austin, Larwood, Peterson

NOES: None

ABSENT: Shell

Ben Austin
Chairman of the Board of Supervisors of the County of Kern, State of California

(SEAL)

ATTEST:

SUE DAVIS
Clerk of the Board of Supervisors

By Kaaren Shatswell, Deputy Clerk

THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN ORDAINS AS FOLLOWS:

Section 1. This ordinance shall take effect and be in full force on and after the 11th day of May, 1994, and shall be published once in the Bakersfield Californian, a newspaper of general circulation, published in the County of Kern, State of California, together with the names of the members of the Board of Supervisors voting for and against the same.

Book No. 949067

Ord. No. G-6077

Section 2. Section 19.04.198 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.198 DECISION-MAKING AUTHORITY

"Decision-making authority" means the Planning Director, Board of Zoning Adjustment, or Board of Supervisors, depending on which has been assigned the responsibility and authority for reviewing and approving a particular permit pursuant to Chapter 19.102 of this title.

Section 3. Section 19.04.271 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.271 FESTIVAL

"Festival" means a program of cultural events consisting of performances, processions, and dances, and similar activities as determined by the Planning Director of Kern County. Circus or carnival events are not included within this definition.

Section 4. Section 19.04.279 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.279 FLOOD BOUNDARY FLOODWAY MAP (FBFM)

"Flood Boundary Floodway Map (FBFM)" means an official map on which the Federal Insurance Administration, using their own information or information supplied by the Kern County Water Agency, the Kern County Planning Department, the State Reclamation Board, or other federal agencies, has delineated both the areas of flood hazard and the floodway.

Section 5. Section 19.04.323 is hereby added to the Ordinance Code of the County of Kern to read as follows:

19.04.323 GUEST QUARTERS

"Guest Quarters" means an attached or detached living area which is physically separated from the primary dwelling and is not intended to be utilized as a separate dwelling. Guest quarters shall not exceed 75 percent of the net square footage of the habitable area of the primary dwelling and, except for a sink, shall contain no kitchen facilities. Except for air conditioning and heating, including water heaters, no gas lines or 220 electrical outlets shall be provided. Full size refrigerators and gas or electric cooking ranges, and spaces designed for this purpose, shall be prohibited.

Section 6. Section 19.04.331 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.331 HEAVY EQUIPMENT

"Heavy equipment" means equipment normally utilized in heavy construction projects and includes, but is not limited to, earthmoving equipment, road work and paving equipment, cranes, dump trucks, large tractors, water trucks, cement trucks, back hoes, excavators, compactors, zoom booms, concrete saws, forklifts, vibrators, platform lifts, and any other piece of equipment determined by the Planning Director as belonging to the heavy equipment category.

Section 7. Section 19.04.497 is hereby added to the Ordinance Code of the County of Kern to read as follows:

19.04.497 NONCOMMERCIAL LIVESTOCK FEED STORAGE

Noncommercial livestock feed storage shall mean the storage of livestock feed for future consumption by livestock owned by the property owner or tenants of same. Additionally, this use shall include livestock feed storage and distribution for co-operative bulk feed purchases where said purchases are not made for commercial or resale purposes and are to be consumed exclusively by livestock owned by members of the co-operative. The Director may request a list of members of such a co-operative at any time for the purposes of ensuring compliance with these provisions. Livestock feed shall not be available

for retail or wholesale purchase by the general public and storage shall be limited to what is pre-ordered. Except for on-site directional signs, no signage shall be permitted.

Section 8. Section 19.04.567 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.567 PLANNING DIRECTOR

"Planning Director" means the Director of the Planning Department of the County of Kern or his/her designee.

Section 9. Section 19.04.576 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.576 POULTRY RANCH

"Poultry ranch" means the raising, breeding, or hatching of poultry for commercial purposes, excluding ostriches and emus.

Section 10. Section 19.04.896 is hereby added to the Ordinance Code of the County of Kern to read as follows:

19.04.896 WHOLESALE NURSERY

"Wholesale nursery" is a plant nursery where the majority of plants are grown on site and sold in bulk form for the purposes of retail re-sale or for bulk purchase by landscape contractors and commercial landscaping installers, and which is not engaged in selling goods or merchandise to the general public for personal or household consumption.

Section 11. Chapter 19.06 is hereby amended to read as follows:

19.06.010 PURPOSE

The purpose of this chapter is to establish general rules for the administration of this title.

19.06.020 AUTHORITY TO ADMINISTER

The Planning Director shall be vested with the authority to administer this title. In the course of these duties, the Planning Director shall have the authority to interpret the provisions of this title. Where there is a question as to the meaning or the intent of any requirement of this title, including interpretations of conditions of approval required in conjunction with the approval of any ministerial or discretionary permit authorized therein, the Planning Director shall provide any necessary interpretation, and the decision of the Planning Director shall be final.

19.06.030 DELEGATION OF AUTHORITY AND RESPONSIBILITY

The Planning Director may delegate any responsibility or authority charged to him/her by any section of this title to any employee of the Kern County Planning Department, any employee of any department of the County of Kern, or a committee of employees of the County of Kern. Any employee or employees so designated may act on behalf of the Planning Director in a matter or proceeding specified in this title.

19.06.040 FEES

The Board of Supervisors may establish a reasonable fee for processing any application specified in this title, provided the fee does not exceed the estimated actual cost of processing such application. The Board of Supervisors shall adopt and may periodically revise a schedule of fees for processing such applications.

Section 12. Subsection 19.08.020.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. In case any uncertainty exists, the Planning Director shall determine the location of district boundaries.

Section 13. Subsections A, B, D, and E of Section 19.08.020 remain unchanged.

Section 14. Section 19.08.030 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.030 DETERMINATION OF SIMILAR USE — GENERALLY

When a property owner, applicant, or potential applicant proposes or contemplates a use of property not expressly authorized as a permitted use or as a conditional use in any district by the regulations of the applicable zoning district or districts, he/she may apply for a determination of similar use in accordance with the procedures set out in Sections 19.08.040 through 19.08.080 of this chapter. A determination of similar use may also be initiated by the Planning Director.

Section 15. Section 19.08.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.040 DETERMINATION OF SIMILAR USE — APPLICATION — CONTENTS

An application for similar use shall be in writing on forms provided by the Director of the Planning Department and shall include the following:

A. Name of the applicant
B. Description of the proposed or contemplated use
C. Identification of the zoning district or districts in which the use is proposed or contemplated
D. Identification of the use or uses listed as permitted uses or conditional uses that most nearly resemble the proposed or contemplated use
E. Explanation of why the property owner, applicant, or potential applicant feels the proposed or contemplated use meets the criteria in Section 19.08.080 of this chapter for determination of similar use

Section 16. Section 19.08.060 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.060 DETERMINATION OF SIMILAR USE — PROCEDURE

Where an application for similar use is submitted in conjunction with an application for a ministerial permit or if a proposed or contemplated use is asserted to be similar to a permitted use in the applicable zoning district or districts where no permit application is submitted, the Planning Director shall make the determination of similar use. Such determination shall be made in accordance with the following procedures:

A. The determination shall be made in conjunction with the ministerial or discretionary decision on the application submitted in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 or 19.102.070 through 19.102.120 of this title or, where no ministerial or discretionary permit is involved, within forty-five (45) calendar days of submission of the application.
B. Written notice of such determination shall be given by mail within a timely manner after the date of the determination to the applicant and any person filing a written request for notice of the determination.
C. The decision of the Planning Director shall be final on the expiration of seven (7) calendar days from and including the date of mailing of notice of the decision, as required by Subsection B of this section, unless a notice of appeal is filed with the Planning Director within such time.

Section 17. Section 19.08.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.070 DETERMINATION OF SIMILAR USE — APPEAL

The determination of similar use by the Planning Director shall be subject to appeal to the Board of Supervisors:

A. The applicant for the determination may appeal from the decision of the Planning Director on the application for determination of similar use by filing a written notice of appeal with the Planning Director prior to the time the decision becomes final.

B. The Board of Supervisors may affirm or modify the determination of similar use by the Planning Director.

Section 18. Section 19.08.080 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.080 DETERMINATION OF SIMILAR USE — CRITERIA

The determination of similar use shall constitute a ministerial action. In making a determination of similar use, the Planning Director or Board of Supervisors, acting on an appeal shall determine that a proposed or contemplated use is similar to a use or uses expressly authorized in the applicable zoning district or districts if the proposed or contemplated use meets the following criteria:

Section 19. Subsections A and B of Section 19.08.080 remain unchanged.

Section 20. Section 19.08.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.090 PUBLIC UTILITY USES — COUNTY REVIEW

The provisions of this title shall not be construed to apply to the construction, installation, operation, and maintenance of public utility distribution and transmission lines or supporting towers, and poles and underground facilities for providing gas, water, electricity, or telephone and telegraph services by public utility companies or other company under the jurisdiction of the California Public Utilities Commission; provided, however, before any right-of-way for transmission lines is acquired for regional or interstate facilities, the proposed route shall be submitted for the Planning Director review and recommendation. The provisions of this title shall also not apply to private water companies providing more than one hundred and fifty (150) connections and regulated by the Commission, provided that the siting of all water-related facilities is expressly regulated by the Commission. Additionally, the provisions of this title shall not apply to privately constructed, operated, or maintained electrical transmission lines and towers, provided that said lines are constructed, maintained, and operated in accordance with, and subject to, the requirements of the California Public Utilities Commission and further provided that said transmission lines are tied into a public utility grid system, and except as otherwise provided for in Chapter 19.64.

Section 21. Section 19.08.230 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.230 PRIVATE OIL PIPELINES AND RELATED FACILITIES — COUNTY REVIEW

The provisions of this title shall not be construed to apply to the construction, installation, operation, and maintenance of pipelines for the transmission of crude oil operated by private enterprises; provided, however, before any right-of-way for transmission lines is acquired for regional or interstate facilities, the proposed route shall be submitted for the Planning Director review and recommendation.

Section 22. Section 19.08.252 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.252 TRUCK PARKING AS A RESIDENTIAL ACCESSORY USE

Truck parking, when accessory and incidental to an established residential use, shall be permitted provided that there is no more than one (1) truck which does not exceed a gross weight of five (5) tons and which is driven to and from the resident's place of employment on a regular basis or which is utilized in conjunction with an approved home occupation pursuant to Chapter 19.94 of this title. No commercial vehicle having a manufacturer's gross vehicle weight rating of ten thousand (10,000) pounds or more shall be parked or stored on any public or private street within a residential district.

The parking of one (1) truck which exceeds a gross weight of five (5) tons may be authorized by the Director subject to the provisions contained in Sections 19.102.040 through 19.102.060 (Ministerial Permits). Such authorization shall be limited to legally created lots with a net lot size of 1/2 acre or larger, developed with a single-family dwelling, and where the written consent of the property owner and each abutting property owner accompanies a written request for such authorization. Any such authorization shall be for a maximum period of one (1) year, limited to one vehicle and shall not include trailers; except that one (1) trailer may also be authorized on qualifying lots with a minimum gross lot size of 2 1/2 acres, if included as part of the original request. In the event that not all abutting property owners' signatures can be obtained, the applicant may elect to file a request for approval by the hearing body following the procedures of Chapter 19.104 (Conditional Use Permits). Under no circumstances shall more than one (1) truck or truck/trailer combination be authorized under this Section. The Director or other applicable hearing body may impose reasonable conditions deemed necessary for the protection of the public health, safety, and welfare.

Section 23. Section 19.08.270 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.270 COUNTY REVIEW OF PROJECTS RELATED TO NATIONAL SECURITY

The provisions of this title shall not be construed to apply to the construction, installation, operation, and maintenance of facilities on private land which are required in the interest of national security or the national defense, as determined by the Planning Director.

Section 24. Section 19.08.280 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.280 EMERGENCY OCCUPANCY OF MOBILEHOMES OR TRAVEL TRAILERS

In the event a dwelling is destroyed or rendered uninhabitable by fire, earthquake, or similar calamity, the Planning Director may authorize the temporary placement of a mobilehome or travel trailer for residential use on the property, regardless of the zoning district classification of the property, for a period not to exceed one hundred and eighty (180) days. A request for such authorization shall be submitted in writing within thirty (30) days from the time the dwelling is destroyed or rendered uninhabitable. The Director shall provide such authorization in writing and may stipulate any necessary conditions as determined by the Director, for the protection of the public health and safety or for the protection of the personal health and safety of the proposed occupants.

Section 25. Section 19.08.290 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.290 TEMPORARY BATCH PLANTS

Temporary portable batch plants related to a specific construction project and for a one-time period of one hundred and sixty (160) days or less may be authorized by the Planning Director in the A (Exclusive Agriculture), NR (Natural Resource), M-2 (Medium Industrial), and M-3 (Heavy Industrial) Districts after review and approval of a written request, which shall include an operations statement describing the equipment and processes to be utilized, the purpose of the temporary batch plant, and a plot plan.

Section 26. Section 19.08.320 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.320 FIREWORKS STANDS

In addition to the specific zone districts which allow temporary fireworks stands, the Planning Director may also authorize fireworks stands on publicly owned property,

including property owned by school districts, and on property developed with church facilities in any zone district.

Section 27. Section 19.08.340 is hereby added to the Ordinance Code of the County of Kern to read as follows:

19.08.340 TEMPORARY EVENTS

Temporary carnivals, circuses, or similar events not exceeding four (4) days may be permitted in any zone district with the prior written approval of the Planning Director. In conjunction with such an approval, the Director may impose reasonable conditions to safeguard public health and safety.

Section 28. Subsection 19.10.010.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. In order to classify, regulate, restrict, and segregate the uses of lands and buildings, to regulate and restrict the height, bulk, and construction of buildings, to regulate the area of yards and other open spaces around buildings, and to regulate intensity of land use and the density of population, the following base zoning districts are established:

1. Agricultural Districts
   - A Exclusive Agriculture District
   - A-1 Limited Agriculture District
2. Residential Districts
   - E Estate District
   - R-1 Low-density Residential District
   - R-2 Medium-density Residential District
   - R-3 High-density Residential District
   - MP Mobilehome Park District
3. Commercial Districts
   - CO Commercial Office District
   - C-1 Neighborhood Commercial District
   - C-2 General Commercial District
   - CH Highway Commercial District
4. Industrial Districts
   - M-1 Light Industrial District
   - M-2 Medium Industrial District
   - M-3 Heavy Industrial District
5. Special Purpose Districts
   - RF Recreation-Forestry District
   - OS Open Space District
   - NR Natural Resource District
   - DI Drilling Island District
   - FPP Floodplain Primary District
   - SP Special Planning District
   - PL Platted Lands District

Section 29. Subsection B of Section 19.10.010 remains unchanged.

Section 30. Subsection 19.10.020.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. In order to classify, regulate, restrict, and segregate the uses of lands and buildings, to regulate and restrict the height, bulk, and construction of buildings, to regulate the area of yards and other open spaces around buildings, and to regulate intensity of land use and the density of population, the following combining zoning districts are established:

1. Lot Size Combining District
2. PD Precise Development Combining District
3. CL Cluster Combining District
4. RS Residential Suburban Combining District
5. Rural Living Combining District
6. MH Mobilehome Combining District
7. WE Wind Energy Combining District
8. PE Petroleum Extraction Combining District
9. GH Geologic Hazard Combining District
10. FP Floodplain Combining District

11. FPS Floodplain Secondary Combining District
12. H Airport Approach Height Combining District

Section 31. Subsection B of Section 19.10.020 remains unchanged.

Section 32. Section 19.10.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.10.040 ZONING MAPS

The boundaries of the zoning districts established by this title are not included in this title but are shown on the Official Zoning Maps maintained by the Kern County Planning Department. The Official Zoning Maps and all notations, references, and other information shown thereon shall be as much a part of this title as if the matters and information set forth on such maps were all fully described herein.

Section 33. Section 19.12.020 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.12.020 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Sections 19.08.030 through 19.08.080 of this title are permitted in the A District:

A. AGRICULTURAL USES

1. Growing and Harvesting Crops
   - — Berry crops
   - — Bush crops
   - — Christmas trees
   - — Field crops, dryland
   - — Field crops, irrigated
   - — Flowers and horticultural specialties, wholesale only
   - — Greenhouse, wholesale only
   - — Nursery, plant, wholesale only
   - — Nut and fruit trees
   - — Timber
   - — Vegetables
   - — Vine crops
2. Breeding and Raising Animals
   - — Bee keeping
   - — Beef cattle or livestock grazing
   - — Birds, including show or racing pigeons and other small fowl
   - — Commercial poultry farms, in which poultry are kept in confined quarters for the purpose of hatching, breeding, processing, butchering, and egg or other poultry by-product production for retail or wholesale purposes, pursuant to Section 19.12.130.E (see also Section 19.12.030.A)*
   - — Dairy pursuant to Section 19.12.130.E*
   - — Dairy stock grazing
   - — Fish and frogs
   - — Hogs, excluding a hog farm or ranch
   - — Horses, donkeys, llamas, or mules
   - — Poultry, including chickens, ostriches, turkeys, or other fowl, excluding commercial poultry farms or ranches in which poultry are kept in confined facilities, as determined by the Planning Director
   - — Rabbits or fur-bearing animals
   - — Sheep or goats
3. Agricultural Industries
   - — Agricultural services, when incidental and secondary to the primary use of the premises for agriculture
   - — Agricultural services laboratory, with a maximum of five (5) employees and one thousand (1,000) square feet of building area
   - — Animal products processing, including meat packing, canning, and shipping, when the

livestock is produced or grown by the owner of the processing facility on the premises or on land leased, rented, or owned by the owner of the processing facility and within a reasonable distance of the facility

— Contract harvesting*
— Cotton gin*
— Fruit, vegetable, and plant products processing, including cold storage, packing, preserving, canning, and shipping*
— Grain elevator or storage
— Honey extraction
— Noncommercial livestock feed storage, wholly enclosed

* These uses shall be subject to development standards and a plot plan review pursuant to Sections 19.80.030 and 19.80.040 of this title.

B. RESIDENTIAL USES

— Farm labor housing for on-site employees, including the installation and/or use of recreational vehicles for a period not exceeding one hundred and twenty (120) days in any calendar year
— Farm labor housing, contract labor, twelve (12) or fewer employees
— Mobilehome, occupied by the owner or full-time on-site employee
— Residential accessory structures
— Residential facility, serving six (6) or fewer persons
— Single-family dwelling, occupied by the owner or full-time on-site employee

C. COMMERCIAL USES

1. General Retail Sales
— Christmas trees, temporary
— Fruit stand, temporary, pursuant to Subsection A of Section 19.12.130 of this chapter

D. UTILITY AND COMMUNICATIONS FACILITIES

— Transmission lines and supporting towers, poles, microwave towers, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company or other company under the jurisdiction of the California Public Utilities Commission pursuant to Section 19.08.090 of this title
— Utility substation

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

— Cogeneration facility or steam generators, primarily intended for steam production used for production of oil or gas, excluding coal fired
— Explosives storage, temporary
— Mineral exploration
— Oil or gas exploration and production pursuant to Chapter 19.98 of this title
— Solar energy electrical generators with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity
— Wind-driven electrical generators for on-site consumption of the electricity

F. MISCELLANEOUS USES

— Accessory buildings, including cargo containers, if incidental and accessory to a permitted use
— Commercial coach, when incidental and accessory to a permitted use
— Day-care home, large family, pursuant to Chapter 19.96
— Day-care home, small family
— Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map, or if accessory to a permitted use
— Flood control facilities
— Garage or yard sales pursuant to Subsection C of Section 19.12.130
— Home occupation pursuant to Chapter 19.94

— Hunting or fishing club, not involving structures
— Kennel or dog training facilities
— Liquid fuel storage tanks, above ground, for dispensing purposes
— Water storage or groundwater recharge facilities
— Water system, small or large
— Wildlife or nature preserve

Section 34. Subsection 19.12.030.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. AGRICULTURAL USES
1. Breeding and Raising of Animals
— Beef cattle or livestock feed lot or stock auction or sales yard
— Commercial poultry farms, in which poultry are kept in confined quarters for the purpose of hatching, breeding, processing, butchering, and egg or other poultry by-product production for retail or wholesale purposes, except as permitted by Section 19.12.020.A
— Hogs, including hog farms and ranches
2. Agricultural Industries
— Alcohol distillery
— Agricultural chemical storage and repackaging
— Agricultural services laboratory
— Agricultural trucking facilities
— Brewery
— Biomass energy conversion
— Commercial livestock feed storage
— Creamery
— Dairy, except as permitted by Section 19.12.020.A
— Dead animal and fat rendering
— Farm machinery and equipment repair
— Fertilizer manufacture and storage for agricultural use only
— Flour mill
— Glucose processing
— Oil extraction, nonmineral
— Saw or planing mill
— Winery
— Wool pulling and scouring

Section 35. Subsection 19.12.030.G of the Ordinance Code of the County of Kern is hereby amended to read as follows:

G. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES
— Backfilling of surface mines with inert, nonorganic fill material, where a Solid Waste Facility Permit is not required
— Coal-fired cogeneration facility or steam generators, primarily intended for production of oil or gas
— Concrete or asphalt batch plant
— Dam, small hydro
— Dam, large hydro
— Electrical power generating plant
— Explosives storage, permanent
— Mining and mineral extraction pursuant to Chapter 19.100 of this title
— Rock, gravel, sand, concrete, aggregate, or soils crushing, processing, or distribution
— Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity

Section 36. Subsection 19.12.030.J of the Ordinance Code of the County of Kern is hereby amended to read as follows:

J. EDUCATIONAL INSTITUTIONS AND SCHOOLS
1. General
— Preschool
— Elementary school

— Junior high school
— Senior high school
— College or university

2. Specialized
— Police/security training facility

Section 37. Subsection 19.12.030.K of the Ordinance Code of the County of Kern is hereby amended to read as follows:

K. MISCELLANEOUS USES
— Construction staging and equipment storage, temporary, related to a specific construction project.
— Corporate or administrative offices in conjunction with, and accessory to, a use permitted or conditionally permitted in this chapter
— Drainage sump
— Hunting or fishing club
— Wild animal keeping

Section 38. Subsections B, C, D, E, F, H, and I of Section 19.12.030 remain unchanged.

Section 39. Section 19.12.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.12.050 MINIMUM LOT SIZE

No lot created within the A District shall contain less than twenty (20) gross acres, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites. In the event the lot is under Williamson Act Contract and designated 8.2, 8.3, or 8.5 by the County General Plan, the minimum area shall be eighty (80) acres, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites. There shall be no minimum lot size for agricultural industry uses approved in conjunction with a conditional use permit.

Section 40. Subsection 19.12.130.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. Off-site directional signs for agricultural product direct marketing facilities subject to the following standards:
1. The direct marketing facility shall be established and operated in accordance with the provisions of this title and shall be primarily limited to the sale of unprocessed agricultural commodities grown on the same ranch or farm that provides such sale.
2. The maximum sign area for each sign shall not exceed one hundred and fifty (150) square feet.
3. The number of signs shall be limited to a maximum of nine (9).
4. The minimum spacing between signs shall be six hundred and sixty (660) feet.
5. The signs are for directional purposes only, and the text shall be limited to the producer's name or his brand name, the products available, and directions to the location of the point of sale.
6. Signs may be illuminated only during the actual hours that the facility is open for public sale of products.
7. Sign height shall not exceed twelve (12) feet.
8. Signs are permitted for a temporary, cumulative period of seven (7) months within any calendar year.
9. Any sign permitted in accordance with this section shall not be located more than five (5) miles from the direct marketing facility for which the sign provides directions, unless the facility is located

more than five (5) miles from a designated County major highway or state or federal highway. In such cases, a single sign may be located at the nearest designated County major highway or state or federal highway, regardless of the distance from the facility.

10. All signs shall comply with the provisions and regulations of the California Department of Transportation, Outdoor Advertising Branch, when located adjacent to a state or federal highway.
11. Prior to installation of any sign, a plan showing the location and the spacing of each sign shall be submitted to the Planning Director for approval. A copy of such plan shall be retained by the Planning Department for file purposes.

Section 41. Subsection 19.12.130.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Commercial poultry farms and dairies are permitted if all of the following criteria are satisfied:
   1. No portion of the proposed site lies within five (5) miles of the sphere of influence of the City of Bakersfield or within one (1) mile of the sphere of influence of any other incorporated city as adopted by the Kern County Local Agency Formation Commission.
   2. The General Plan designation for the entire site is 8.1 or 8.3.
   3. There is no property zoned or designated by the General Plan or applicable Specific Plan for residential development (E or R-1, R-2, and R-3) within three (3) miles from the exterior boundary of the site.
   4. The density of existing dwellings does not exceed one (1) dwelling unit per eighty (80) acres for a two (2) mile radius from the exterior project boundary.
   5. There are no concentrations of dwellings greater than three (3) dwellings for any twenty- (20-) acre area within one (1) mile of the exterior project boundary.
   6. There are no retail commercial uses, including hotels and motels, within a one (1) mile radius from the exterior project boundary.
   7. There are no residential facilities, community care facilities, hospitals, recreational vehicle parks, or public or private schools within a two (2) mile radius from the exterior project boundary.
   8. The facility operator obtains all local, State, and federal approvals, licenses, and permits prior to the commencement of operations.

Section 42. Subsections A, C, D, and F of Section 19.12.130 remain unchanged.

Section 43. Section 19.14.020 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.14.020 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Sections 19.08.030 through 19.08.080 of this title are permitted in the A-1 District:

A. AGRICULTURAL USES
   1. Growing and Harvesting Crops
      — Berry crops
      — Bush crops
      — Christmas trees
      — Field crops, dryland
      — Field crops, irrigated
      — Flowers and horticultural specialties, wholesale only
      — Greenhouse, wholesale only

— Nursery, plant, wholesale only
— Nut and fruit trees
— Timber
— Vegetables
— Vine crops

2. Breeding and Raising Animals
— Bee keeping
— Beef cattle or livestock grazing pursuant to Section 19.14.130 of this chapter
— Birds, including show or racing pigeons and other small fowl
— Dairy stock pursuant to Section 19.14.130 of this chapter
— Hogs pursuant to Section 19.14.130 of this chapter
— Horses, donkeys, llamas, and mules pursuant to Section 19.14.130 of this chapter
— Poultry, for the domestic use of the resident/occupant only (not including poultry ranches)
— Rabbits and fur-bearing animals
— Sheep and goats pursuant to Section 19.14.130 of this chapter

B. RESIDENTIAL USES

1. Manufactured home, mobilehome, or recreational vehicle, temporary, during construction of a single-family home pursuant to Section 19.14.130 of this chapter
2. Manufactured home, pursuant to Section 19.14.130.G of this chapter
3. Residential accessory structures
4. Residential facility, serving six (6) or fewer persons
5. Single-family dwelling, with a width greater than sixteen (16) feet

C. COMMERCIAL USES

1. General Retail Sales
— Christmas trees, temporary
— Fruit stand, temporary, pursuant to Section 19.14.130 of this chapter

D. UTILITY AND COMMUNICATION FACILITIES

— Transmission lines and supporting towers, poles, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company or other company under the jurisdiction of the California Public Utilities Commission pursuant to Section 19.08.090 of this title
— Utility substations

E. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES

— Cogeneration facility or steam generators, primarily intended for steam production, used for production of oil and gas, excluding coal fired
— Mineral exploration
— Oil or gas exploration and production pursuant to Chapter 19.98 of this title, including the temporary installation of commercial coaches as accessory to this activity, not to exceed a two- (2-) year period
— Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity
— Wind-driven electrical generator for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

F. INSTITUTIONAL USES

— Public agency or public utility buildings and facilities

G. MISCELLANEOUS USES

— Commercial coach, when incidental and accessory to a permitted use, not exceeding six (6) months

— Day-care home, large family, pursuant to Chapter 19.96 of this title
— Day-care home, small family
— Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map, or if accessory to a permitted use
— Flood control facilities
— Garage or yard sales pursuant to Subsection F of Section 19.14.130 of this chapter
— Home occupation pursuant to Chapter 19.94 of this title
— Liquid fuel storage tanks, above ground, for dispensing purposes
— Water storage or groundwater recharge facilities
— Water system, small or large
— Wildlife or nature preserve

Section 44. Subsection 19.14.030.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. AGRICULTURAL USES
1. Breeding and Raising of Animals
— Fish and frogs
— Poultry, including hatching, breeding, butchering, processing, or shipping of chickens, ostriches, turkeys, or other fowl or poultry, including eggs
2. Agricultural Industries
— Agricultural trucking facilities
— Cold storage facility for agricultural products
— Contract harvesting
— Fruit, vegetable, and plant product processing

Section 45. Subsection 19.14.030.I of the Ordinance Code of the County of Kern is hereby amended to read as follows:

I. INSTITUTIONAL USES
— Auditorium, public
— Cemetery, mausoleum, columbarium, or mortuary
— Charitable or public service organization
— Church
— Club or lodge
— Community or senior citizens center
— Convalescent hospital
— Crematory in conjunction with a cemetery, mausoleum, columbarium, or mortuary
— Hospital
— Museum
— Rehabilitation facilities
— Sanitarium
— Water treatment plant
— Zoo

Section 46. Subsection 19.14.030.K of the Ordinance Code of the County of Kern is hereby amended to read as follows:

K. MISCELLANEOUS USES
— Commercial coach, when incidental and accessory to a permitted use
— Day-care center, with or without extended overnight services
— Drainage sump
— Kennel or dog training facilities
— Railroad caboose and similar accessory structures
— Revival, temporary
— Skateboard ramps, noncommercial
— Wild animal keeping

Section 47. Subsections B, C, D, E, F, G, H, and J of Section 19.14.030 remain unchanged.

Section 48. Section 19.14.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.14.050 MINIMUM LOT SIZE

No lot created within the A-1 District shall contain less than two and one-half (2 1/2) gross acres, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

Section 49. Section 19.14.120 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.14.120 LANDSCAPING

No landscaping is required in the A-1 District, except where required in conjunction with the approval of a discretionary permit pursuant to Chapter 19.104.

Section 50. Subsection 19.14.130.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. The breeding and raising of livestock, in greater numbers than allowed by Subsection A of Section 19.14.130 of this chapter, by minors in conjunction with a student-oriented fair project sponsored by a bona fide agricultural organization shall be permitted upon application to and approval by the Planning Director of a Temporary Animal Permit in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title.

1. Application Contents. An application for a Temporary Animal Permit shall include the following:
   a. The name and address of the applicant
   b. The name(s) and address(es) of the property owner(s)
   c. Assessor's parcel number(s)
   d. Legal description of the subject property
   e. Name of the organization sponsoring the applicant
   f. A plot plan showing the location of proposed pens, coops, or areas for the breeding and raising of animals in relation to existing residence(s) and other buildings and structures within one hundred (100) feet of pens, coops, or areas housing livestock
   g. The signature of each owner of the real property abutting the subject lot consenting to the granting of the Temporary Animal Permit
2. Development Standards and Conditions. The breeding and raising of animals on a temporary basis shall comply with the following standards and conditions:
   a. Applicant shall be sponsored by a bona fide organization, such as, but not limited to, Future Farmers of America, 4-H Club, Cow-Belles, or Junior Farmers.
   b. The increase in animal density shall not exceed the density allowed by Subsection A of Section 19.14.130 of this chapter by more than fifty percent (50%). In any case, however, at least two (2), but no more than six (6), additional animals shall be allowed.
   c. The Temporary Animal Permit shall be effective for a maximum period of six (6) months from the effective date of the permit. No more than one (1) such permit shall be approved for any lot within a one- (1-) year period.
   d. The written consent of each abutting property owner consenting to the granting of the Temporary Animal Permit must be obtained.
   e. The applicant shall allow inspection of animal maintenance facilities by the Kern County Engineering and Survey Services Department (Building Inspection Division) and the Kern County Health Department.
   f. The Planning Director may revoke the Temporary Animal Permit at any time for noncompliance

with Subsection C.2 of Section 19.14.130 of this chapter or upon receipt of a recommendation for revocation from the Kern County Health Department.

g. Each additional animal authorized by the Temporary Animal Permit over the allowable animal density specified by Subsection A of Section 19.14.130 of this chapter shall be removed upon expiration of the permit.

Section 51. Subsection 19.14.130.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. A mobilehome or recreational vehicle permitted as a temporary dwelling pursuant to Section 19.14.020 of this chapter shall comply with the following standards:

1. Building permits for construction of the conventional single-family residence shall be obtained prior to or concurrently with the installation permit for the mobilehome.
2. The mobilehome shall be removed from the premises or the recreational vehicle shall be removed from the premises or placed in dead storage if:
   a. Six (6) months have passed since the mobilehome or recreational vehicle was installed.
   b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.
   c. The building permit has lapsed due to lack of activity.
3. One (1) extension of time for a period not to exceed six (6) months may be granted by the Planning Director upon written request of the property owner. The extension of time may only be approved subject to the following conditions:
   a. An active building permit is on file with the Kern County Engineering and Survey Services Department (Building Inspection Division).
   b. The construction of the conventional dwelling unit on the site has progressed to a stage of inspection and approval of the framing, rough electrical, rough mechanical, and rough and top-out of plumbing of the dwelling.
4. Any mobilehome or recreational vehicle permitted as a temporary dwelling in excess of a six- (6-) month period of time pursuant to Subsection D.3 of Section 19.14.130 of this chapter shall be removed or placed in dead storage if:
   a. The extension of time has expired.
   b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.
   c. The building permit has lapsed due to lack of activity.

Section 52. Subsection 19.14.130.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Off-site directional signs for agricultural product direct marketing facilities subject to the following standards:

1. The direct marketing facility shall be established and operated in accordance with the provisions of this chapter and shall be primarily limited to the sale of unprocessed agricultural commodities grown on the same ranch or farm that provides such sale.
2. The maximum sign area for each sign shall not exceed one hundred and fifty (150) square feet.
3. The number of signs shall be limited to a maximum of nine (9).
4. The minimum spacing between signs shall be six hundred and sixty (660) feet.

5. The signs are for directional purposes only, and the text shall be limited to the producer's name or his brand name, the products available, and directions to the location of the point of sale.
6. Signs may be illuminated only during the actual hours that the facility is open for public sale of products.
7. Sign height shall not exceed twelve (12) feet.
8. Signs are permitted for a temporary, cumulative period of seven (7) months within any calendar year.
9. Any sign permitted in accordance with this section shall not be located more than five (5) miles from the direct marketing facility for which the sign provides directions, unless the facility is located more than five (5) miles from a designated County major highway or state or federal highway. In such cases, a single sign may be located at the nearest designated County major highway or state or federal highway, regardless of the distance from the facility.
10. All signs shall comply with the provisions and regulations of the California Department of Transportation, Outdoor Advertising Branch, when located adjacent to a state or federal highway.
11. Prior to installation of any sign, a plan showing the location and the spacing of each sign shall be submitted to the Planning Director for approval. A copy of such plan shall be retained by the Planning Department for file purposes.

Section 53. Subsections A, B, F, G, and H of Section 19.14.130 remain unchanged.

Section 54. Subsection 19.16.020.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. COMMERCIAL USES
1. Offices
— Temporary on-site real estate tract sales, including commercial coaches, pursuant to Subsection 19.16.130.D of this title

Section 55. Subsection 19.16.020.F of the Ordinance Code of the County of Kern is hereby amended to read as follows:

F. MISCELLANEOUS USES
— Day-care home, large family, pursuant to Chapter 19.96 of this title
— Day-care home, small family
— Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map
— Flood control facilities
— Garage or yard sales pursuant to Subsection C of Section 19.16.130 of this chapter
— Home occupation pursuant to Chapter 19.94 of this title
— Water storage or groundwater recharge facilities
— Water system, small or large

Section 56. Subsections A, B, D, and E of Section 19.16.020 remain unchanged.

Section 57. Subsection 19.16.030.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. COMMERCIAL USES
1. Offices
— Temporary on-site real estate sales/construction

Section 58. Subsection 19.16.030.L of the Ordinance Code of the County of Kern is hereby amended to read as follows:

L. MISCELLANEOUS USES
- Community septic disposal system
- Day-care center, with or without extended overnight services
- Drainage sump
- Railroad caboose and similar accessory structures
- Skateboard ramps, noncommercial
- Veterinary
- Whitewater rafting launch or landing site
- Wild animal keeping

Section 59. Subsections A, B, C, E, F, G, H, I, J, and K of Section 19.16.030 remain unchanged.

Section 60. Section 19.16.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.16.050 MINIMUM LOT SIZE

Except as otherwise provided in Chapter 19.58 of this title, no lot created within the E District shall contain less than one-quarter (1/4) acre (10,890 net square feet) or as specified by the Lot Size Combining District, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

Section 61. Section 19.16.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.16.090 MINIMUM DISTANCE BETWEEN STRUCTURES

The following requirements apply to the minimum distance between structures in the E District:

A. There shall be a minimum distance of ten (10) feet between residential buildings.

B. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings, except that pens, coops, or other structures for housing animals shall be at least thirty (30) feet away from any off-site residential building or other building used for human habitation, at least one hundred (100) feet from the front lot line, at least twenty-five (25) feet from the street side lot line on a corner lot, and at least one hundred (100) feet away from any public park, school, hospital, or similar institution.

Section 62. Subsection 19.16.130.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. A mobilehome or recreational vehicle permitted as a temporary dwelling pursuant to Section 19.16.020 of this chapter shall comply with the following standards:

1. Building permits for construction of the conventional single-family residence shall be obtained prior to or concurrently with the installation permit for the mobilehome.
2. The mobilehome shall be removed from the premises or the recreational vehicle shall be removed from the premises or placed in dead storage if:
   a. Six (6) months have passed since the mobilehome or recreational vehicle was installed.
   b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.
   c. The building permit has lapsed due to lack of activity.
3. One (1) extension of time for a period not to exceed six (6) months may be granted by the Planning Director upon written request of the property owner. The extension of time may only be approved subject to the following conditions:

a. An active building permit is on file with the Kern County Engineering and Survey Services Department (Building Inspection Division).
b. The construction of the conventional dwelling unit on the site has progressed to a stage of inspection and approval of the framing, rough electrical, rough mechanical, and rough and top-out of plumbing of the dwelling.

4. Any mobilehome or recreational vehicle permitted as a temporary dwelling in excess of a six- (6-) month period of time pursuant to Subsection B.3 of Section 19.16.130 of this chapter shall be removed or placed in dead storage if:
a. The extension of time has expired.
b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.
c. The building permit has lapsed due to lack of activity.

Section 63. Subsection 19.16.130.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. Temporary on-site real estate tract sales offices are permitted without special permit provided they meet the following standards:
1. The office shall be permitted for recorded subdivision tracts only.
2. No more than one (1) office shall be permitted within any subdivision tract.
3. Only lots within the subject subdivision tract shall be marketed through the office.
4. Two (2) on-site parking spaces shall be provided and surfaced in accordance with the requirements of Section 19.82.090.
5. All signs shall conform with the requirements of Section 19.84.070.
6. No construction equipment or materials storage shall be permitted.
7. The office shall be used for a maximum two- (2-) year period only. An extension of time may be requested of and approved by the Planning Director if submitted in writing prior to the two- (2-) year date of expiration.
8. Upon sale of all lots within the residential tract, the site shall be converted to residential use.

Section 64. Subsections A, C, E, and F of Section 19.16.130 remain unchanged.

Section 65. Subsection 19.18.020.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. COMMERCIAL USES
1. Offices
— Temporary on-site real estate tract sales, including commercial coaches, pursuant to Subsection 19.18.130.D of this title

Section 66. Subsection 19.18.020.G of the Ordinance Code of the County of Kern is hereby amended to read as follows:

G. MISCELLANEOUS USES
— Day-care home, large family, pursuant to Chapter 19.96 of this title
— Day-care home, small family
— Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map
— Garage or yard sales pursuant to Subsection C of Section 19.18.130 of this chapter
— Home occupation pursuant to Chapter 19.94 of this title
— Water storage or groundwater recharge facilities

— Water system, small or large

Section 67. Subsections A, B, C, E, and F of Section 19.18.020 remain unchanged.

Section 68. Subsection 19.18.030.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. COMMERCIAL USES
1. Offices
— Temporary on-site real estate sales/construction
2. Services
— Ambulance

Section 69. Subsection 19.18.030.I of the Ordinance Code of the County of Kern is hereby amended to read as follows:

I. MISCELLANEOUS USES
— Community septic disposal system
— Day-care center, with or without extended overnight services
— Drainage sump
— Flood control facilities
— Railroad caboose and similar accessory structures
— Skateboard ramps, noncommercial

Section 70. Subsections A, B, D, E, F, G, and H of Section 19.18.030 remain unchanged.

Section 71. Section 19.18.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.18.050 MINIMUM LOT SIZE

Except as otherwise provided in Chapter 19.58 of this title, no lot created within the R-1 District shall contain less than six thousand (6,000) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company, or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

Section 72. Section 19.18.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.18.090 MINIMUM DISTANCE BETWEEN STRUCTURES

The following requirements apply to the minimum distance between structures in the R-1 District:

A. There shall be a minimum distance of ten (10) feet between residential buildings.

B. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings, except that pens, coops, other structures for housing animals, and the animals themselves shall be at least thirty (30) feet away from any off-site residential building or other building used for human habitation, at least one hundred (100) feet from the front lot line, at least twenty-five (25) feet from the street side lot line on a corner lot, and at least one hundred (100) feet away from any public park, school, hospital, or similar institution.

Section 73. Subsection 19.18.130.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. A mobilehome or recreational vehicle permitted as a temporary dwelling pursuant to Section 19.18.020 of this chapter shall comply with the following standards:
1. Building permits for construction of the conventional single-family residence shall be obtained prior to or concurrently with the installation permit for the mobilehome.

2. The mobilehome shall be removed from the premises or the recreational vehicle shall be removed from the premises or placed in dead storage if:
   a. Six (6) months have passed since the mobilehome or recreational vehicle was installed.
   b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.
   c. The building permit has lapsed due to lack of activity.
3. One (1) extension of time for a period not to exceed six (6) months may be granted by the Planning Director upon written request of the property owner. The extension of time may only be approved subject to the following conditions:
   a. An active building permit is on file with the Kern County Engineering and Survey Services Department (Building Inspection Division).
   b. The construction of the conventional dwelling unit on the site has progressed to a stage of inspection and approval of the framing, rough electrical, rough mechanical, and rough and top-out of plumbing of the dwelling.
4. Any mobilehome or recreational vehicle permitted as a temporary dwelling in excess of a six- (6-) month period of time pursuant to Section 19.18.130 of this chapter shall be removed or placed in dead storage if:
   a. The extension of time has expired.
   b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.
   c. The building permit has lapsed due to lack of activity.

Section 74. Subsection 19.18.130.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. Temporary on-site real estate tract sales offices are permitted without special permit provided they meet the following standards:
   1. The office shall be permitted for recorded subdivision tracts only.
   2. No more than one (1) office shall be permitted within any subdivision tract.
   3. Only lots within the subject subdivision tract shall be marketed through the office.
   4. Two (2) on-site parking spaces shall be provided and surfaced in accordance with the requirements of Section 19.82.090.
   5. All signs shall conform with the requirements of Section 19.84.070.
   6. No construction equipment or materials storage shall be permitted.
   7. The office shall be used for a maximum two- (2-) year period only. An extension of time may be requested of and approved by the Planning Director if submitted in writing prior to the two- (2-) year date of expiration.
   8. Upon sale of all lots within the residential tract, the site shall be converted to residential use.

Section 75. Subsections A, C, E, and F of Section 19.18.130 remain unchanged.

Section 76. Subsection 19.20.020.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. COMMERCIAL USES
   1. Offices

— Temporary on-site real estate tract sales, including commercial coaches, pursuant to Subsection 19.20.130.C of this title

Section 77. Subsection 19.20.020.F of the Ordinance Code of the County of Kern is hereby amended to read as follows:

F. MISCELLANEOUS USES
- — Construction trailer, temporary, during construction activity only
- — Day-care center, not to exceed a capacity of one (1) child for every three (3) dwelling units located on the property, where the lot contains a minimum of three (3) dwelling units
- — Day-care home, large family, pursuant to Chapter 19.96 of this title
- — Day-care home, small family, when located within a detached single-family dwelling
- — Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map, or if accessory to a permitted use
- — Garage or yard sales pursuant to Subsection B of Section 19.20.130 of this chapter
- — Home occupation pursuant to Chapter 19.94 of this title
- — Water storage or groundwater recharge facilities
- — Water system, small or large

Section 78. Subsections A, B, D, and E of Section 19.20.020 remain unchanged.

Section 79. Subsection 19.20.030.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. RESIDENTIAL USES
- — Boarding or rooming house
- — Community care facility
- — Manufactured home or mobilehome, maximum of two (2) per lot, pursuant to Section 19.20.130.D.6 of this chapter (see Section 19.20.020.A)
- — Rest home
- — Retirement home

Section 80. Subsection 19.20.030.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. COMMERCIAL USES
1. Offices
   - — Temporary on-site real estate sales/construction
2. Services
   - — Ambulance

Section 81. Subsection 19.20.030.J of the Ordinance Code of the County of Kern is hereby amended to read as follows:

J. MISCELLANEOUS USES
- — Community septic disposal system
- — Day-care center, with or without extended overnight services
- — Drainage sump
- — Flood control facilities

Section 82. Subsections B, D, E, F, G, H, and I of Section 19.20.030 remain unchanged.

Section 83. Section 19.20.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.20.050 MINIMUM LOT SIZE

Except as otherwise provided in Chapter 19.58 of this title, no lot created within the R-2 District shall contain less than six thousand (6,000) net square feet, excepting in the case of

the conveyance to or from a governmental agency, public entity, public utility, community water company, or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

Section 84. Subsection 19.20.130.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Temporary on-site real estate tract sales offices are permitted without special permit provided they meet the following standards:
1. The office shall be permitted for recorded subdivision tracts only.
2. No more than one (1) office shall be permitted within any subdivision tract.
3. Only lots within the subject subdivision tract shall be marketed through the office.
4. Two (2) on-site parking spaces shall be provided and surfaced in accordance with the requirements of Section 19.82.090.
5. All signs shall conform with the requirements of Section 19.84.070.
6. No construction equipment or materials storage shall be permitted.
7. The office shall be used for a maximum two- (2-) year period only. An extension of time may be requested of and approved by the Planning Director if submitted in writing prior to the two- (2-) year date of expiration.
8. Upon sale of all lots within the residential tract, the site shall be converted to residential use.

Section 85. Subsections A, B, D, and E of Section 19.20.130 remain unchanged.

Section 86. Subsection 19.22.020.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. RESIDENTIAL USES
— Apartment
— Bed and breakfast inn
— Boarding or rooming house
— Condominium
— Duplex
— Manufactured home, one (1) per lot, pursuant to Section 19.22.130.D of this chapter
— Quadruplex
— Residential accessory structures
— Residential facility, serving ten (10) or fewer persons
— Single-family dwelling
— Townhouse
— Triplex

Section 87. Subsection 19.22.020.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. COMMERCIAL USES
1. Offices
— Temporary on-site real estate tract sales, including commercial coaches, pursuant to Subsection 19.22.130.C of this title

Section 88. Subsection 19.22.020.F of the Ordinance Code of the County of Kern is hereby amended to read as follows:

F. MISCELLANEOUS USES
— Construction trailer, temporary, during construction activity only
— Day-care center not to exceed a capacity of one (1) child for every three (3) dwelling units located on the property, where the lot contains a minimum of three (3) dwelling units

— Day-care home, large family, pursuant to Chapter 19.96 of this title
— Day-care home, small family, when located within a detached single-family dwelling
— Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map, or if accessory to a permitted use
— Garage or yard sales pursuant to Subsection B of Section 19.22.130 of this chapter
— Home occupation pursuant to Chapter 19.94 of this title
— Water storage or groundwater recharge facilities
— Water system, small or large

Section 89. Subsections B, D, and E of Section 19.22.020 remain unchanged.

Section 90. Subsection 19.22.030.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. RESIDENTIAL USES
— Boarding or rooming house, serving more than six (6) persons
— Community care facility
— Fraternity or sorority house
— Manufactured home or mobilehome, maximum of two (2) per lot, pursuant to Section 19.22.130.D.6 of this chapter (see Section 19.22.020.A)
— Retirement or rest home
— Residential hotel

Section 91. Subsection 19.22.030.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. COMMERCIAL USES
1. Offices
— Temporary on-site real estate sales/construction
2. Services
— Ambulance

Section 92. Subsection 19.22.030.J of the Ordinance Code of the County of Kern is hereby amended to read as follows:

J. MISCELLANEOUS USES
— Day-care center, with or without extended overnight services
— Drainage sump
— Flood control facilities

Section 93. Subsections B, D, E, F, G, H, and I of Section 19.22.030 remain unchanged.

Section 94. Section 19.22.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.22.050 MINIMUM LOT SIZE

Except as otherwise provided in Chapter 19.58 of this title, no lot created within the R-3 District shall contain less than six thousand (6,000) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company, or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

Section 95. Subsection 19.22.110.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. Apartment or bed and breakfast identification signs, not exceeding thirty-six (36) square feet

Section 96. Subsections B, C, D, E, F, and G of Section 19.22.110 remain unchanged.

Section 97. Subsection 19.22.130.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Temporary on-site real estate tract sales offices are permitted without special permit provided they meet the following standards:
   1. The office shall be permitted for recorded subdivision tracts only.
   2. No more than one (1) office shall be permitted within any subdivision tract.
   3. Only lots within the subject subdivision tract shall be marketed through the office.
   4. Two (2) on-site parking spaces shall be provided and surfaced in accordance with the requirements of Section 19.82.090.
   5. All signs shall conform with the requirements of Section 19.84.070.
   6. No construction equipment or materials storage shall be permitted.
   7. The office shall be used for a maximum two- (2-) year period only. An extension of time may be requested of and approved by the Planning Director if submitted in writing prior to the two- (2-) year date of expiration.
   8. Upon sale of all lots within the residential tract, the site shall be converted to residential use.

Section 98. Subsections A, B, D, and E of Section 19.22.130 remain unchanged.

Section 99. Chapter 19.24 (Mobilehome Subdivision (MS) District), Title 19, of the Kern County Ordinance Code is hereby rescinded.

Section 100. Section 19.26.020 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.26.020 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Sections 19.08.030 through 19.08.080 of this chapter are permitted in the MP District:

A. RESIDENTIAL USES
   — Manager, caretaker, or proprietor quarters
   — Mobilehome
   — Mobilehome park, including accessory laundry and storage facilities

B. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES
   — Community recreational facilities
   — Recreational vehicle park, as an accessory use provided that the mobilehome park abuts and gains entrance from a major or secondary (collector) highway as designated on the Kern County Circulation Plan, and further provided that the area of such recreational vehicle park does not exceed twenty-five percent (25%) of the combined area of the mobilehome park and recreational vehicle park

C. MISCELLANEOUS USES
   — Day-care center for on-site care of children
   — Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map
   — Garage or yard sales pursuant to Section 19.26.180 of this chapter
   — Home occupation pursuant to Chapter 19.94
   — Water system, small

Section 101. Section 19.26.030 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.26.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses are permitted in the MP District with a conditional use permit:

A. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES
— Recreational vehicle park, as an accessory use where the mobilehome park does not have direct access from a major or secondary (collector) highway as designated on the Kern County Circulation Plan, and provided that the area of such recreational vehicle park does not exceed twenty-five percent (25%) of the combined area of the mobilehome park and recreational vehicle park.

B. MISCELLANEOUS USES
— Drainage sump
— Water system, large
— Water treatment plant

Section 102. Section 19.26.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.26.130 SITE DEVELOPMENT PLAN REVIEW — REQUIRED

No use shall be established, no development shall occur, and no building or grading permit shall be issued for any use or development in the MP District until an application for site development plan review has been submitted to and approved by the Planning Director in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title.

Section 103. Subsection 19.26.140.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. A site development plan, drawn at the scale specified by the Planning Director, which includes the following information:
1. Topography and proposed grading
2. Proposed private access drives and parking areas
3. Location of all mobilehome pads
4. Location of all permanent buildings and structures
5. Park, open space, and recreation areas
6. Proposed landscaping
7. North arrow

Section 104. Subsections A, B, C, D, F, G, H, and I of Section 19.26.140 remain unchanged.

Section 105. Subsection 19.26.150.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Public Street and Highway Dedications and Improvements
1. Street and highway dedications adjacent to mobilehome parks may be required by the Planning Director in accordance with the following standards:
   a. If the park is adjacent to a major highway, as shown on the Kern County Circulation Plan, the owner shall dedicate or make an irrevocable offer of dedication of all property lying within fifty-five (55) feet of the centerline of such highway for public highway purposes, at no cost to the County.
   b. If the park is adjacent to a secondary highway, as shown on the Kern County Circulation Plan, the owner shall dedicate or make an irrevocable offer of dedication of all property lying within forty-five (45) feet of the centerline of such highway for public highway purposes, at no cost to the County.
   c. If the park lies adjacent to the projected alignment of a planned local street which is necessary for circulation within the general area or neighborhood, the owner shall dedicate or make an irrevocable offer of dedication of all that property lying within thirty (30) feet of the centerline of such street for public street purposes, at no cost to the County.

d. If the park is adjacent to an adopted Specific Plan or Official Plan Line, the owner shall dedicate or make an irrevocable offer of dedication of all property lying within the specified right-of-way line for public highway purposes, at no cost to the County.

2. Improvements may be required by the Planning Director, at no cost to the County, in accordance with the following standards:
   a. All developments within Type A Improvement Areas (see Appendix) shall provide road or street improvements to Type A Subdivision Standards. Developments in all other areas shall provide road or street improvements to Type B Subdivision Standards, unless Type A Subdivision Standards are required by any adopted Specific Plan in which the development is proposed, in which case Type A improvements shall be required. If the project site abuts a State highway, road improvements shall be provided as required by the California Department of Transportation.
3. Required street and highway improvements shall include any necessary tie to existing pavement and shall be under permit of the County or the State Division of Highways, as appropriate. Existing pavement shall be saw cut at match point.

Section 106. Subsection 19.26.150.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Enclosures
1. Each mobilehome park shall be completely enclosed within a fence, hedge, or combination thereof, subject to the approval of the Planning Director as to design and materials.
2. Such enclosure may have driveway or pedestrian way openings, subject to approval by the Planning Director .
3. Within any required front yard, a required enclosure shall be four (4) feet in height, and shall be located a minimum of five (5) feet from the edge of the adjacent road right-of-way.
4. Within any other portion of the park, a required enclosure shall be six (6) feet in height, and shall be located a minimum of five (5) feet from the edge of the adjacent road right-of-way except that, where adjacent to a street-side side yard, the required enclosure shall be located a minimum of ten (10) feet from the edge of the adjacent road right-of-way.
5. When deemed necessary by the Planning Director, in order to maintain standards compatible with existing development of adjacent properties, specific types of fences may be required to be constructed.

Section 107. Subsection 19.26.150.G of the Ordinance Code of the County of Kern is hereby amended to read as follows:

G. Drainage
1. A drainage system which meets the requirements of the Kern County Development Standards shall be installed prior to occupancy of the park and shall be continuously maintained in accordance with a plan approved by the Planning Director.
2. The plan shall include, but is not limited to, the following provisions:
   a. All drainage originating on the park site shall be contained on the same site, unless a plan for acceptance of such drainage to off-site sumps has been approved by the Kern County Planning Department.

b. The method for transporting off-site drainage through a mobilehome park shall meet the criteria of the Kern County Flood Damage Prevention Ordinance.

c. In the event that any drainage sump area located within the park has a water holding capacity of more than eighteen (18) inches in depth, the area shall be completely enclosed within a chain link fence, six (6) feet in height with vertical redwood slats.

Section 108. Subsections A, B, D, F, and H of Section 19.26.150 remain unchanged.

Section 109. Section 19.26.160 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.26.160 SCHOOL FACILITIES FEE REQUIREMENT

Thirty (30) days from the effective date of the ordinance from which this chapter derives, the approval of any mobilehome park under this chapter is conditioned upon the payment of any fees or the dedication of any land required by standards established under the Kern County School Facilities Ordinance (Chapter 17.52 of this code) which may be in effect with respect to the school district or any attendance area thereof in which such mobilehome park is located at the time final approval under this chapter is issued. Payment of any fees or the dedication of any land so required shall be completed by the owner of any such mobilehome park prior to issuance of a permit to construct, reconstruct, expand, or operate such mobilehome park as specified in the approval, except as otherwise authorized by the applicable school district(s).

Section 110. Subsection 19.28.020.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. COMMERCIAL USES

1. Offices
   - — Business or professional
   - — Financial institution, including bank, savings and loan, or credit union
   - — Real estate
   - — Research and development
2. General Retail Sales
   - — Art gallery
3. Services
   - — Artist studio
   - — Clinic, medical or physical therapy, outpatient only
   - — Interior decorator, provided there is no on-site sale of merchandise
   - — Laboratory, medical, dental, optical, or biological
   - — Photography studio
   - — Telegraph
   - — Ticket agency
   - — Travel agency

Section 111. Subsection 19.28.020.G of the Ordinance Code of the County of Kern is hereby amended to read as follows:

G. MISCELLANEOUS USES

- — Commercial coach, temporary, not exceeding six (6) months
- — Construction trailer, temporary, during construction activity only
- — Day-care center, without extended overnight services
- — Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map, or if accessory to a permitted use
- — Studio, radio, television, or broadcasting
- — Water storage or groundwater recharge facility
- — Water system, small or large

Section 112. Subsections A, C, D, E, and F of Section 19.28.020 remain unchanged.

Section 113. Subsection 19.28.030.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. COMMERCIAL USES
1. Eating and Drinking Establishments
— Restaurant, cafe, or coffee shop
2. Services
— Ambulance

Section 114. Subsection 19.28.030.I of the Ordinance Code of the County of Kern is hereby amended to read as follows:

I. MISCELLANEOUS USES
— Commercial coach, exceeding six (6) months
— Day-care center, with extended overnight services
— Drainage sump
— Flood control facilities
— Water treatment plant

Section 115. Subsections A, B, D, E, F, G, and H of Section 19.28.030 remain unchanged.

Section 116. Section 19.28.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.28.050 MINIMUM LOT SIZE

Except where otherwise provided in Chapter 19.58 of this title, no lot created within the CO District shall contain less than seven thousand five hundred (7,500) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company, or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

Section 117. Subsection 19.28.070.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. **Rear Yard.** There shall be a rear yard of not less than twenty (20) feet, except that no rear yard shall be required where a public alley exists adjacent to the rear property line. The Planning Director may reduce rear yard requirements in accordance with the Kern County Fire Code if written approval is obtained from the Kern County Fire Chief.

Section 118. Subsections A, B, and D of Section 19.28.070 remain unchanged.

Section 119. Subsection 19.28.110.B, Title 19, of the Ordinance Code of the County of Kern is hereby rescinded.

Section 120. Subsection A of Section 19.28.110 remains unchanged.

Section 144. Subsections B, E, F, G, H, I, and J of Section 19.32.030 remain unchanged.

Section 145. Section 19.32.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.32.050 MINIMUM LOT SIZE

Except as otherwise provided in Chapter 19.58 of this title, no lot created within the C-2 District shall contain less than seven thousand five hundred (7,500) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company, or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

Section 146. Subsection 19.32.070.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. **Rear Yard.** There shall be a rear yard of not less than twenty (20) feet, except that no rear yard shall be required in the event that a public alley exists. Rear yard requirements may be reduced in accordance with the Kern County Fire Code if written approval is obtained from the Kern County Fire Chief and Planning Director.

Section 147. Subsections A, B, and D of Section 19.32.070 remain unchanged.

Section 148. Section 19.32.110 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.32.110 SIGNS

A. The following signs are permitted in the C-2 District in accordance with the requirements of Chapter 19.84 of this title:

1. Temporary real estate signs advertising the property for sale or rent, not to exceed sixteen (16) square feet, excluding the area of any vertical and/or horizontal support members
2. Temporary subdivision signs
3. Permanent subdivision identification signs, when approved in conjunction with a conditional use permit
4. Temporary construction signs
5. Temporary political, religious, or civic campaign signs
6. Institutional signs
7. Signs attached to buildings
8. Monument signs, not to exceed forty-eight (48) square feet in area each
9. Pole signs, not to exceed two hundred and forty (240) square feet in area each and not exceeding a height of thirty-five (35) feet
10. Off-site advertising signs, not exceeding a height of thirty-five (35) feet

Section 149. Subsection 19.32.130.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. No outside storage shall be permitted except for company vehicles and items for retail sales, lease, or rental and which are clearly associated with an on-site business. This requirement shall not apply to those uses requiring a conditional use permit (Section 19.32.030), provided that outside storage was addressed as part of the permit application. Areas devoted to outside storage of tires shall be screened with a solid screening fence; fence design and materials shall be approved by the Director of the Kern County Planning Department. Mounds or piles of tires shall not exceed the height of the screening fence.

Section 150. Subsections A, B, and C of Section 19.32.130 remain unchanged.

Section 151. Subsection 19.34.020.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. COMMERCIAL USES

1. Offices
   - — Business and professional
   - — Real estate

— Truck fueling station, without repair facilities

Section 152. Subsection 19.34.020.H of the Ordinance Code of the County of Kern is hereby amended to read as follows:

H. MISCELLANEOUS USES
— Commercial coach, temporary, not exceeding six (6) months
— Construction trailer, temporary, during construction activity only
— Day-care center, without extended overnight services
— Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map, or if accessory to a permitted use
— Water system, small or large

Section 153. Subsections A, B, D, E, F, and G of Section 19.34.020 remain unchanged.

Section 154. Subsection 19.34.030.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. COMMERCIAL USES
1. Food and Beverage Retail Sales
— Fruit stand, temporary
2. Services
— Equipment, heavy, and truck or trailer rental
— Truck fueling station, with repairs

Section 155. Subsections A, B, D, E, F, G, H, I, and J of Section 19.34.030 remain unchanged.

Section 156. Section 19.34.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.34.050 MINIMUM LOT SIZE

Except as otherwise provided in Chapter 19.58 of this title, no lot created within the CH District shall contain less than

seven thousand five hundred (7,500) net square feet, excepting in the case of the conveyance to or from a governmental agency, public entity, public utility, community water company, or mutual water company for public purposes, public utility purposes, or for rights-of-way or well sites.

Section 157. Section 19.34.060 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.34.060 MINIMUM LOT AREA PER DWELLING UNIT

There is no requirement regarding minimum lot area per dwelling unit in the CH District. Dwelling units are not permitted, except as accessory to a permitted use or with approval of a conditional use permit pursuant to Section 19.34.030.A.

Section 158. Subsection 19.34.070.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. **Rear Yard.** There shall be a rear yard of not less than twenty (20) feet, except that no rear yard shall be required in the event that a public alley exists. Rear yard requirements may be reduced in accordance with the Kern County Fire Code if written approval is obtained from the Kern County Fire Chief and Planning Director.

Section 159. Subsections A, B, and D of Section 19.34.070 remain unchanged.

Section 160. Section 19.34.110 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.34.110 SIGNS

A. The following signs are permitted in the CH District in accordance with Chapter 19.84 of this title:
   1. Temporary real estate signs advertising the property for sale or rent, not to exceed sixteen (16) square feet, excluding the area of any vertical and/or horizontal support members
   2. Temporary construction signs
   3. Temporary political, religious, or civic campaign signs
   4. Institutional identification signs
   5. Wall signs attached to buildings
   6. Monument signs, not to exceed forty-eight (48) square feet each
   7. Pole signs, not to exceed two hundred and forty (240) square feet in area each and not exceeding a height of thirty-five (35) feet
   8. Off-site advertising signs, not exceeding a height of thirty-five (35) feet

Section 161. Subsection 19.36.020.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

— Radio, television, or commercial communications transmitter, receiver, or translator, except as specified in Subsection F of Section 19.36.020 of this chapter

G. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES
— Electric power generating plant
— Mining and mineral extraction pursuant to Chapter 19.100 of this title
— Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity
— Wind-driven electrical generators, commercial or domestic, exceeding fifteen (15) kilowatts capacity

H. WASTE FACILITIES
— Community septic disposal system
— Septage disposal site
— Sewage treatment plant
— Transfer station, small volume
— Waste-to-energy facility

I. INSTITUTIONAL USES
— Cemetery, mausoleum, or columbarium
— Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary
— Zoo

J. EDUCATIONAL INSTITUTIONS AND SCHOOLS
1. Specialized Schools
— Police/security training facility

K. MISCELLANEOUS USES
— Day-care center, with extended overnight services
— Flea market or swap meet
— Flood control facilities
— Massage parlor
— Water treatment plant

Section 166. Section 19.36.110 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.36.110 SIGNS

A. The following signs are permitted in the M-1 District in accordance with the requirements of Chapter 19.84 of this title:
1. Temporary real estate signs advertising the property for sale or rent, not to exceed sixteen (16) square feet, excluding the area of any vertical and/or horizontal support members
2. Temporary subdivision signs
3. Temporary construction signs
4. Temporary political, religious, or civic campaign signs
5. Institutional identification signs
6. Signs attached to buildings
7. Monument signs, not to exceed one hundred (100) square feet each
8. Pole signs, not to exceed two hundred and forty (240) square feet each and not exceeding a height of thirty-five (35) feet
9. Off-site advertising signs, not exceeding a height of thirty-five (35) feet

Section 167. Subsection 19.36.130.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. Outdoor industrial storage yards in the M-1 District shall be completely enclosed by a solid screening fence not less than six (6) feet in height. The design and materials proposed shall be approved by the Planning Director.

Section 168. Subsections B and C of Section 19.36.130 remain unchanged.

Section 169. Subsection 19.38.020.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. COMMERCIAL USES

1. Offices
   - Business or professional
   - Financial institutions, including bank, savings and loan, or credit union
   - Real estate
   - Research and development

2. General Retail Sales
   - Antiques
   - Appliances, including service and repair
   - Art gallery
   - Auto leasing
   - Auto, new
   - Auto parts and accessories
   - Auto tire, including service
   - Auto, used
   - Bicycle, including rental and service
   - Boat, including service and parts
   - Bookstore, adult
   - Bookstore, general
   - Christmas tree, temporary
   - Clothing and apparel
   - Computer, including service and repair
   - Department store
   - Drugs and pharmaceuticals
   - Electric appliances, including service and repair
   - Electric equipment, including service and repair
   - Feed
   - Fireworks stand, temporary
   - Floor covering, drapery, or upholstery
   - Florist
   - Furniture
   - Gardening and landscaping supply
   - Gift and card
   - Gun, including repair
   - Hardware, general, including lumber sales
   - Hobby supplies
   - Home or office furnishings
   - Ice vending machine
   - Jewelry and watches
   - Lapidary
   - Lawnmower, including repair
   - Leather goods and luggage
   - Locksmith or key and lock shop
   - Military surplus
   - Mobilehome, including rental and service
   - Motorcycles, including rental and repair
   - Musical instruments, including repair
   - Newspaper or magazine stand
   - Nursery, plant
   - Office machines and equipment
   - Paint and wallpaper
   - Pawn shop
   - Pet store
   - Photographic supply or camera
   - Plumbing supply

— Pottery
— Recreational vehicles, including service
— Shoes
— Sporting goods and athletic equipment
— Stationery and office supply
— Tobacco
— Toys
— Truck, including rental
— Used clothing and household goods
— Variety

3. Food and Beverage Retail Sales
— Bakery
— Catering
— Convenience market
— Drive-in food market or dairy
— Farmers' market
— Food store
— Liquor store
— Specialized, including meat, vegetables, health food, or candy

4. Eating and Drinking Establishments
— Bar, tavern, or cocktail lounge
— Ice cream parlor
— Restaurant, cafe, or coffee shop
— Restaurant, fast-food

5. Services
— Ambulance
— Artist studio
— Auto rental
— Auto service or repair, including body and paint shop
— Auto service station
— Auto tire repair
— Auto towing
— Auto wash
— Auto wash, self-service
— Barber or beauty shop
— Bath house, including sauna, spa, turkish, steam, or tanning
— Carpet cleaning
— Clinic, medical or physical therapy, out-patient only
— Equipment, heavy, or truck or trailer rental
— Equipment, small, rental
— Furniture cleaning, refinishing, or upholstery
— Interior decorator
— Janitorial service
— Laboratory, medical, dental, optical, or biological
— Laboratory, testing, classifying, or experimental, not involving the use of explosives
— Laundromat, self-service
— Laundry, dry cleaning and dyeing plants
— Mini-warehouse
— Mortuary or funeral parlor
— Pest control
— Pet grooming
— Photography studio
— Picture framing
— Printing, lithography, or blueprinting
— Shoe repair
— Shoe-shine stand
— Tailor or dressmaker
— Taxidermist
— Telegraph
— Ticket agency
— Travel agency
— Truck fueling station
— Truck service and repair
— Veterinary, including veterinary hospital
— Wedding chapel

Section 170. Subsection 19.38.020.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. INDUSTRIAL USES

1. Industrial Manufacturing or Assembly
   - — Aircraft, assembly, when conducted wholly within a building
   - — Auto/truck, assembly, when conducted wholly within a building
   - — Batteries
   - — Building material
   - — Cabinet shop
   - — Carpet and mattress
   - — Ceramics
   - — Chemical blending, not including manufacture
   - — Clothing, garments, or shoes
   - — Concrete blocks
   - — Cosmetics, perfumes, or toiletries
   - — Drugs and pharmaceuticals
   - — Electronic equipment
   - — Furniture
   - — Ice
   - — Mobilehome, modular home, or recreational vehicle
   - — Musical instruments
   - — Neon signs
   - — Paint mixing, not employing a boiling process
   - — Paper or pulp
   - — Plastics, assembly and extrusion
   - — Prefabricated buildings and structures
   - — Soap, cold mix only
   - — Textiles
   - — Toy manufacturing and assembly
   - — Trusses

2. Industrial Storage
   - — Automobile
   - — Bottled gas
   - — Cargo containers
   - — Chemical storage, when accessory to a permitted use
   - — Cold storage
   - — Contractor's storage yard
   - — Draying or freight
   - — Equipment and building materials
   - — Feed and fuel, including wood yards
   - — Liquified petroleum gas, bulk storage or distribution in excess of two thousand (2,000) gallons capacity, when located at least one-half (1/2) mile from property zoned or designated for residential use and at least one-half (1/2) mile from existing residential development with a density greater than one (1) dwelling unit per acre and at least one-half (1/2) mile from any motel or hotel
   - — Lumber
   - — Mineral and ore storage and loading, with product storage and loading facilities wholly enclosed
   - — Moving and storage
   - — Petroleum
   - — Recreational vehicle
   - — Recyclable materials, collection and storage, provided there is no more than three thousand (3,000) square feet of outside storage and all compression and bailing operations are conducted wholly within an enclosed structure
   - — Truck and heavy equipment
   - — Warehouse

3. Other Industrial Uses
   - — Asphalt batch plant
   - — Assaying
   - — Bakery
   - — Beverage bottling works

— Billboard sign fabrication and storage
— Boat building and major repair
— Concrete batch plant
— Electroplating, when conducted wholly within an enclosed building
— Machine shop
— Metal extrusion
— Newspaper, magazine, or book printing
— Oilfield service yard
— Photographic processing plant or wholesale supply
— Sandblasting, if incidental to another permitted use and conducted wholly within an enclosed building
— Sheet metal shop
— Tire retreading
— Welding or blacksmith
— Well drilling service
— Wholesale distribution

Section 171. Subsection 19.38.020.K of the Ordinance Code of the County of Kern is hereby amended to read as follows:

K. MISCELLANEOUS USES
— Commercial coach, when incidental to a permitted use
— Construction trailer, temporary, during construction activity only
— Day-care center, without extended overnight services
— Drainage sump
— Kennel
— Liquid fuel tanks, above ground, for dispensing purposes
— Revival, temporary, not to exceed fourteen (14) days
— Studio, radio, television, recording, or movie
— Water storage or groundwater recharge facilities
— Water system, small or large

Section 172. Subsections A, B, C, F, G, H, I, and J of Section 19.38.020 remain unchanged.

Section 173. Section 19.38.030 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.38.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Sections 19.08.030 through 19.08.080 of this title are all permitted in the M-2 District in accordance with the requirements of Chapter 19.80 of this title and subject to securing a conditional use permit in accordance with the standards and procedures set out in Chapter 19.104 of this title:

A. AGRICULTURAL USES
1. Breeding and Raising Animals
— Beef cattle or livestock feed lot, stockyard, auction, or sales yard
2. Agricultural Industries
— Alcohol distillery
— Animal products processing, including slaughter, meat packing, canning, processing, and shipping
— Tanning, curing, or storing animal hides

B. RESIDENTIAL USES
— Single-family dwelling, one (1) per lot, not accessory to an industrial use

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES
— Circus or carnival
— Golf course
— Racetrack or test track, automobile, bicycle, horse, or motorcycle
— Trade fairs and exhibitions, temporary (fourteen-(14-) day maximum), excluding flea markets and swap meets

D. INDUSTRIAL USES

1. Industrial Manufacturing or Assembly
   — Oil refining
2. Industrial Storage
   — Chemical storage as a main use
   — Explosives, permanent
   — Liquified petroleum gas, bulk storage or distribution in excess of two thousand (2,000) gallons capacity
   — Log storage
   — Minerals and ore storage and loading, unenclosed
   — Recyclable materials, collection and storage
   — Salvage or junk yard
   — Tire storage as a main use
   — Vehicle wrecking yard
3. Other Industrial Uses
   — Construction or demolition material recycling
   — Metal, glass, or paper recycling facility
   — Tire recycling

E. TRANSPORTATION FACILITIES
   — Airport, private
   — Airport, public use
   — Heliport

F. UTILITY AND COMMUNICATIONS FACILITIES
   — Radio, television, or commercial communications transmitter, receiver, or translator, except as provided in Subsection G of Section 19.38.020 of this chapter

G. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES
   — Coal-fired cogeneration facility or steam generators
   — Mining and mineral extraction pursuant to Chapter 19.100 of this title
   — Ore reduction
   — Potash manufacture
   — Rock, gravel, sand, concrete, aggregate, or soils crushing, processing, or distribution
   — Wind generators, commercial

H. WASTE FACILITIES
   — Community septic disposal system
   — Nonhazardous oil production water disposal facility
   — Nonhazardous oilfield waste treatment or recycling
   — Sanitary landfill
   — Septage disposal site
   — Sewage treatment plant
   — Soil reclamation or remediation for soils contaminated with nonhazardous materials
   — Transfer station, large or small
   — Waste-to-energy facility

I. INSTITUTIONAL USES
   — Cemetery, mausoleum, or columbarium
   — Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary
   — Public agency or public utility buildings and facilities

J. EDUCATIONAL INSTITUTIONS AND SCHOOLS
1. Specialized Schools
   — Police/security training facility

K. MISCELLANEOUS
   — Day-care center, with extended overnight services
   — Flea market or swap meet
   — Flood control facilities
   — Water treatment plant

Section 174. Section 19.38.110 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.38.110 SIGNS

A. The following signs are permitted in the M-2 District in accordance with the requirements of Chapter 19.84 of this title:
1. Temporary real estate signs advertising the property for sale or rent, not to exceed sixteen (16)

square feet each, excluding the area of any vertical and/or horizontal support members
2. Temporary subdivision signs
3. Temporary construction signs
4. Temporary political, religious, or civic campaign signs
5. Institutional identification signs
6. Signs attached to buildings
7. Monument signs, not to exceed one hundred (100) square feet each
8. Pole signs, not to exceed three hundred (300) square feet in area each and not exceeding a height of fifty (50) feet
9. Off-site advertising signs, not exceeding a height of thirty-five (35) feet
10. Oilfield identification signs

Section 175. Section 19.40.020 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.40.020 PERMITTED USES

The following uses and all others determined to be similar to these uses pursuant to Sections 19.08.030 through 19.08.080 of this title are permitted in the M-3 District in accordance with the standards and procedures set out in Chapter 19.80 of this title:

A. RESIDENTIAL USES
- Manager, caretaker, or proprietor quarters, including a mobilehome

B. AGRICULTURAL USES
1. Agricultural Industries
- Alcohol distillery
- Animal products processing, including slaughter
- Brewery
- Cannery
- Cotton compress
- Cotton gin
- Creamery
- Dead animal and fat rendering
- Flour mill
- Fruit, vegetable, and plant products processing, including packing, canning, preserving, and shipping
- Garbage or offal reduction
- Glucose processing
- Grain elevator or storage
- Honey extraction
- Lumber drying kiln
- Oil extraction, nonmineral
- Saw or planing mill
- Tanning, curing, or storing animal hides
- Tobacco processing
- Winery

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES
- Bingo parlor
- Bowling alley
- Card room
- Circus or carnival, temporary, not to exceed four (4) days
- Dance hall, ballroom, or discotheque
- Golf driving range
- Health club
- Hotel or motel
- Miniature golf
- Movie theater, walk-in
- Pool or billiard parlor
- Skating rink, roller or ice
- Tennis, swim, or athletic club
- Theater, live
- Video games arcade

D. COMMERCIAL USES
1. Offices
- Business or professional

— Financial institution, including bank, savings and loan, or credit union
— Real estate
— Research and development

2. General Retail Sales
— Antiques
— Appliances, including service and repair
— Art gallery
— Auto leasing
— Auto, new
— Auto parts and accessories
— Auto tire, including service
— Auto, used
— Bicycle, including rental and service
— Boat, including service and parts
— Bookstore, adult
— Bookstore, general
— Christmas tree, temporary
— Clothing and apparel
— Computer, including service and repair
— Department store
— Drugs and pharmaceuticals
— Electric appliances, including service and repair
— Electric equipment, including service and repair
— Feed
— Fireworks stand, temporary
— Floor covering, drapery, or upholstery
— Florist
— Furniture
— Gardening and landscaping supply
— Gift and card
— Gun, including repair
— Hardware, general
— Hobby supplies
— Home or office furnishings
— Ice vending machine
— Jewelry and watches
— Lapidary
— Lawnmower, including repair
— Leather goods and luggage
— Locksmith or key and lock shop
— Military surplus
— Mobilehomes, including rental and service
— Motorcycles, including rental and repair
— Musical instruments, including repair
— Newspaper or magazine stand
— Nursery, plant
— Office machines and equipment
— Paint and wallpaper
— Pawn shop
— Pet store
— Photographic supply or camera
— Plumbing supply
— Pottery
— Recreational vehicles, including service
— Shoes
— Sporting goods and athletic equipment
— Stationery and office supply
— Tobacco
— Toys
— Truck, includes rental
— Used clothing and household goods
— Variety

3. Food and Beverage Retail Sales
— Bakery
— Convenience market
— Drive-in food market or dairy
— Farmers' market
— Food store
— Liquor store

— Specialized, including meat, vegetables, health foods, or candy

4. Eating and Drinking Establishments
   - — Bars, taverns, or cocktail lounges
   - — Ice cream parlor
   - — Restaurant, cafe, or coffee shop
   - — Restaurant, fast-food

5. Services
   - — Ambulance
   - — Artist studio
   - — Auto body repair and painting
   - — Auto rental
   - — Auto service/repair
   - — Auto service station
   - — Auto tire repair
   - — Auto towing
   - — Auto wash
   - — Auto wash, self-service
   - — Barber or beauty shop
   - — Bath house, including sauna, spa, turkish, steam, or tanning
   - — Carpet cleaning
   - — Catering
   - — Clinic, medical or physical therapy, out-patient only
   - — Equipment, heavy, or truck or trailer rental
   - — Equipment, small, rental
   - — Furniture cleaning, refinishing, or upholstery
   - — Gardening and landscaping
   - — Interior decorator
   - — Janitorial service
   - — Laboratory, medical, dental, optical, or biological
   - — Laboratory, testing, classifying, or experimental, not involving the use of explosives
   - — Laundromat, self-service
   - — Laundry, dry cleaning, pressing, and dyeing
   - — Mini-warehouse
   - — Mortuary or funeral parlor
   - — Pest control, administrative offices only
   - — Pet grooming
   - — Photography studio
   - — Picture framing
   - — Printing, lithography, or blueprinting
   - — Shoe repair
   - — Shoe-shine stand
   - — Tailor or dressmaker
   - — Taxidermist
   - — Telegraph
   - — Ticket agency
   - — Travel agency
   - — Truck fueling station
   - — Truck service and repair
   - — Veterinary, including veterinary hospital
   - — Wedding chapel

E. INDUSTRIAL USES

1. Industrial Manufacturing or Assembly
   - — Acetylene or other gas
   - — Acids
   - — Aircraft, assembly
   - — Ammonia or chlorine
   - — Asphalt
   - — Automobile or truck assembly
   - — Bag cleaning
   - — Batteries
   - — Blast furnace or smelting
   - — Boiler works
   - — Brick, tile, or terra cotta products
   - — Building materials
   - — Cabinet shop
   - — Candle
   - — Carbon
   - — Carpet and mattress

— Celluloid or pyroxylin
— Cement
— Ceramics
— Chemical blending or manufacturing
— Clothing, garments, or shoes
— Coal, wood, or tar distillation
— Coke ovens
— Concrete blocks
— Cosmetics, perfumes, or toiletries
— Creosote
— Detergent
— Disinfectant
— Drugs and pharmaceuticals
— Electronic appliance
— Electronic equipment
— Fertilizer
— Furniture
— Glass
— Glue
— Ice
— Iron, steel, or other metals
— Linoleum or oiled products
— Machinery
— Metal, glass, or paper recycling facility
— Mobilehome, modular home, or recreational vehicle
— Musical instruments
— Neon signs
— Oil refining
— Ore reduction
— Paint, shellac, turpentine, or similar products
— Paint mixing
— Paper or pulp
— Plastic
— Potash
— Prefabricated buildings and structures
— Rolling mill
— Rubber
— Saw mills
— Smelting
— Soap
— Sodium compounds
— Starch
— Stove or shoe polish
— Tar products
— Textiles
— Tobacco processing
— Toy manufacturing and assembly
— Trusses

2. Industrial Storage
— Automobile
— Bottled gas
— Cargo containers
— Chemical storage
— Cold storage
— Contractor's storage yard
— Draying or freight
— Equipment and building materials
— Feed and fuel, including wood yards
— Liquified petroleum gas, bulk storage or distribution in excess of two thousand (2,000) gallons capacity, when located at least one-half (1/2) mile from property zoned or designated for residential use and at least one-half (1/2) mile from existing residential development with a density greater than one (1) dwelling unit per acre and at least one-half (1/2) mile from any motel or hotel
— Log storage
— Lumber
— Mineral and ore storage and loading, with product storage and loading facilities wholly enclosed

— Moving and storage
— Petroleum
— Recreational vehicle
— Recyclable materials, collection and storage
— Tire storage
— Truck and heavy equipment
— Warehouse

3. Other Industrial Uses
— Asphaltic batch plant
— Assaying
— Bakery
— Beverage bottling works
— Billboard sign fabrication and storage
— Boat building and major repair
— Concrete batch plant
— Electroplating
— Machine shop
— Metal extrusion
— Newspaper, magazine, or book printing
— Oilfield service yard
— Photographic processing plant or wholesale supply
— Sandblasting, if incidental to another permitted use and conducted wholly within an enclosed building
— Sheet metal shop
— Tire retreading or recycling
— Welding or blacksmith
— Well drilling service
— Wholesale distribution

F. TRANSPORTATION FACILITIES
— Auto parking garage or lot
— Bus depot, including service and storage
— Railroad freight classification or switching yard
— Railroad station
— Taxi depot, including service and storage

G. UTILITY AND COMMUNICATIONS FACILITIES
— Microwave relay station
— Transmission lines and supporting towers, poles, microwave towers, and underground facilities for gas, water, electricity, telephone, or telegraph service owned and operated by a public utility company or other company under the jurisdiction of the California Public Utilities Commission pursuant to Section 19.08.090 of this title
— Utility substation

H. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES
— Cogeneration facility or steam generators, excluding coal fired
— Electrical distribution stations
— Electrical power generating plants, excluding nuclear and coal
— Mineral exploration
— Oil or gas exploration and production pursuant to Chapter 19.98 of this title
— Rock, gravel, sand, concrete, aggregate, or soils crushing, processing, or distribution
— Solar energy electrical generator with a rated capacity of no greater than five (5) kilowatts for on-site consumption of the electricity
— Wind-driven electrical generators for on-site consumption of the electricity, provided the system can be safely erected and maintained in view of surrounding circumstances and conditions

I. WASTE FACILITIES
— Transfer station, small volume

J. INSTITUTIONAL USES
— Auditorium, public
— Charitable or public service organization
— Church
— Fire or police station
— Government office or building
— Library

— Museum
— Public agency or utility buildings and facilities

K. EDUCATIONAL INSTITUTIONS AND SCHOOLS
1. Specialized Schools
— Business or trade schools

L. MISCELLANEOUS USES
— Commercial coach, when incidental to a permitted use
— Construction trailer, temporary, during construction activity only
— Drainage sump
— Kennel
— Liquid fuel tanks, above ground, for dispensing purposes
— Massage parlor
— Revival, temporary, not to exceed fourteen (14) days
— Studio, radio, television, recording, or movie
— Water system, small or large

Section 176. Section 19.40.030 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.40.030 USES PERMITTED WITH A CONDITIONAL USE PERMIT

The following uses and all others determined to be similar to these uses pursuant to Sections 19.08.030 through 19.08.080 of this title are all permitted in accordance with the standards set out in Chapter 19.80 of this title and subject to securing a conditional use permit in accordance with the standards and procedures set out in Chapter 19.104 of this title:

A. AGRICULTURAL USES
1. Breeding and Raising Animals
— Beef cattle or livestock feed lot, stockyard, auction, or sales yard

B. RESIDENTIAL USES
— Single-family dwelling, one (1) per lot, not accessory to an industrial use

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES
— Circus or carnival
— Golf course
— Racetrack or test track, automobile, bicycle, horse, or motorcycle
— Trade fairs and exhibitions, temporary (fourteen-(14-) day maximum), excluding flea markets and swap meets

D. INDUSTRIAL USES
1. Industrial Manufacturing or Assembly
— Explosives or ammunition, including storage
2. Industrial Storage
— Explosives or ammunition
— Liquified petroleum gas, bulk storage or distribution in excess of two thousand (2,000) gallons capacity
— Mineral and ore storage and loading, unenclosed
— Salvage or junk yard
— Vehicle wrecking yard
3. Other Industrial Uses
— Chemical recycling
— Construction or demolition material recycling
— Sandblasting, unenclosed

E. TRANSPORTATION FACILITIES
— Airport, private
— Airport, public use
— Heliport

F. UTILITY AND COMMUNICATIONS FACILITIES
— Radio, television, or commercial communications transmitter, receiver, or translator, except as specified in Subsection G of Section 19.40.020 of this chapter

G. RESOURCE EXTRACTION AND ENERGY DEVELOPMENT USES
— Coal-fired cogeneration facility or steam generators
— Electrical power generating plant, nuclear or coal powered

— Mining and mineral extraction pursuant to Chapter 19.100 of this title
— Solar energy electrical generators, commercial or domestic, exceeding five (5) kilowatts capacity
— Wind-driven electrical generators, commercial

H. WASTE FACILITIES
— Burning of waste-derived fuels when in conjunction with a permitted or conditionally permitted industrial use.
— Community septic disposal system
— Hazardous waste disposal facility
— Nonhazardous oil production and/or oily waste disposal facility
— Nonhazardous oilfield waste treatment or recycling
— Research, development, or testing of alternative fuel burning processes, temporary
— Sanitary landfill
— Septage disposal site
— Sewage treatment plant
— Soil reclamation or remediation for soils contaminated with nonhazardous materials
— Transfer station, large volume
— Waste-to-energy facility

I. INSTITUTIONAL USES
— Cemetery, mausoleum, or columbarium
— Crematory, when in conjunction with a cemetery, mausoleum, columbarium, or mortuary

J. EDUCATIONAL INSTITUTIONS AND SCHOOLS
1. Specialized Schools
— Police/security training facility

K. MISCELLANEOUS USES
— Drainage sump
— Flea market and swap meet
— Water treatment plant

Section 177. Section 19.40.110 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.40.110 SIGNS

A. The following signs are permitted in the M-3 District in accordance with the requirements of Chapter 19.84 of this title:
1. Temporary real estate signs advertising the property for sale or rent, not to exceed sixteen (16) square feet each, excluding the area of any vertical and/or horizontal support members
2. Temporary subdivision signs
3. Temporary construction signs
4. Temporary political, religious, or civic campaign signs
5. Institutional identification signs
6. Signs attached to buildings
7. Monument signs, not to exceed one hundred (100) square feet in area each
8. Pole signs, not to exceed three hundred (300) square feet in area each and not exceeding a height of fifty (50) feet
9. Off-site advertising signs, not exceeding a height of thirty-five (35) feet
10. Oilfield identification signs

Section 178. Subsection 19.42.020.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. AGRICULTURAL USES
1. Growing and Harvesting Crops
— Christmas trees
— Growing of agricultural crops for domestic use of the resident/occupant
— Timber
2. Breeding and Raising Animals
— Bee keeping

— Poultry and rabbits pursuant to Section 19.42.130 of this title
— Horses, donkeys, mules, hogs, sheep, goats, dairy stock, and beef cattle pursuant to Section 19.42.130 of this title
— Ostrich and emus pursuant to Section 19.42.130
— Birds, including show or racing pigeons, and other small fowl pursuant to Section 19.42.130 of this title
— Fish and frogs

Section 179. Subsection 19.42.020.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES
— Boat dock, private
— Fishing or fly casting pond
— Park or playground

Section 180. Subsection 19.42.020.G of the Ordinance Code of the County of Kern is hereby amended to read as follows:

G. MISCELLANEOUS USES
— Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map, or if accessory to a permitted use
— Flood control facilities
— Garage or yard sales pursuant to Subsection C of Section 19.42.130 of this chapter
— Home occupation pursuant to Chapter 19.94 of this title
— Hunting or fishing club, not involving buildings or structures
— Water storage or groundwater recharge facilities
— Water system, small or large
— Wildlife or nature preserve

Section 181. Subsections A, D, E, and F of Section 19.42.020 remain unchanged.

Section 182. Subsection 19.42.030.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. RECREATION, ENTERTAINMENT, AND TOURIST FACILITIES
— Bed and breakfast inn
— Camp, private
— Campground
— Community recreational facilities
— Equestrian establishments
— Golf course
— Golf driving range
— Lakes, private, for recreational skiing or boating
— Marina, public
— Racetrack or test track, automobile, bicycle, horse, or motorcycle
— Recreational vehicle park
— Retreat, church or nonprofit organization owned and operated
— Shooting range, gun club, simulated war games, or similar activities
— Trade fairs and exhibitions, temporary (fourteen-(14-) day maximum), excluding flea markets and swap meets
— Whitewater rafting launch or landing site

Section 183. Subsection 19.42.030.J of the Ordinance Code of the County of Kern is hereby amended to read as follows:

J. MISCELLANEOUS USES
— Drainage sump
— Hunting or fishing club
— Kennel or dog training facilities
— Railroad caboose and similar accessory structures

— Wild animal keeping

Section 184. Subsections A, B, D, E, F, G, H, and I of Section 19.42.030 remain unchanged.

Section 185. Subsection 19.42.130.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. The breeding and raising of animals pursuant to Section 19.42.020 of this chapter shall be limited to one (1) horse, donkey, mule, cow, dairy stock, sheep, goat, hog, ostrich, emu, or other similar animal per one-quarter (1/4) acre of lot area.

Section 186. Subsections A, C, D, and E of Section 19.42.130 remain unchanged.

Section 187. Subsection 19.46.020.F of the Ordinance Code of the County of Kern is hereby amended to read as follows:

F. MISCELLANEOUS USES
- Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map, or if accessory to a permitted use
- Garage or yard sales pursuant to Subsection A of Section 19.46.130 of this chapter
- Hunting or fishing club, not involving buildings or structures
- Liquid fuel tanks, above ground, for dispensing purposes
- Water storage or groundwater recharge facilities
- Water system, small or large
- Wildlife or nature preserve

Section 188. Subsections A, B, C, D, and E of Section 19.46.020 remain unchanged.

Section 189. Subsection 19.46.030.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. INDUSTRIAL USES
1. Industrial Manufacturing or Assembly
   - Brick manufacturing
   - Concrete block manufacturing
   - Oil refining
2. Industrial Storage
   - Truck and heavy equipment parking and storage

Section 190. Subsection 19.46.030.K of the Ordinance Code of the County of Kern is hereby amended to read as follows:

K. MISCELLANEOUS USES
- Corporate or administrative offices in conjunction with, and accessory to, a use permitted or conditionally permitted in this chapter
- Drainage sump
- Hunting or fishing club
- Kennel or dog training facilities
- Wild animal keeping

Section 191. Subsections A, B, C, E, F, G, H, I, and J of Section 19.46.030 remain unchanged.

Section 192. Subsection 19.48.030.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. MISCELLANEOUS USES
- Auto parking lot
- Subdivision drainage sump, provided that mineral rights owners have given written consent

Section 193. Subsection A of Section 19.48.030 remains unchanged.

Section 194. Section 19.48.120 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.48.120 LANDSCAPING

Landscaping in the DI District shall be as approved by the Planning Director in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title.

Section 195. Subsection 19.50.030.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. RECREATIONAL, ENTERTAINMENT, AND TOURIST FACILITIES

- Campground, private, not involving buildings or structures
- Fishing or fly casting pond, not involving buildings or structures
- Golf course, not involving buildings or structures
- Golf driving range, not involving buildings or structures
- Hiking or equestrian trail
- Park or playground, not involving buildings or structures
- Roads or trails for motor driven vehicles
- Whitewater rafting launch or landing site, not involving buildings or structures

Section 196. Subsections B, C, and D of Section 19.50.030 remain unchanged.

Section 197. Section 19.50.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.50.040 PROHIBITED USES

All other uses not permitted by Sections 19.50.020 and 19.50.030 of this chapter are prohibited in the FPP District, including:

A. Buildings, structures, mobilehomes, other improvements or accessory uses, or development that would encroach into the channel and obstruct the natural flow of waters within a designated floodway or which will in any manner endanger life and property.

B. All public and private sewage disposal systems or any part thereof.

C. Any use which may endanger temporary safeguards which have been erected until such time as flood protection or control works have been constructed.

D. Landfill, sumps, or excavation of a similar nature that would obstruct the natural flow of floodwater within a designated floodway.

E. All uses that are likely to increase the flood hazard or in any way affect the water-carrying capacity of the designated floodway.

F. Dumping, stockpiling, or storage of floatable substances or other materials which, in the opinion of the Kern County Planning Department, will add to the debris load of the stream or watercourse.

G. Commercial cattle or livestock feed yards, auction yards, dairies, junk or salvage yards, billboards, and other advertising structures of any kind or type which may have residential, commercial, or industrial connotations.

H. Storage tanks, sumps, processing equipment, or other similar facilities related to oil and gas production not expressly permitted pursuant to Section 19.50.020 and Subsection C of Section 19.50.130 of this chapter.

I. Sources of water supply (e.g., wells, springs, etc.) unless protected by flood control devices approved by the Kern County Planning Department and constructed in accordance with the requirements of the Kern County Health Department or Kern County Planning Department, whichever has jurisdiction, so as to minimize infiltration of floodwaters.

J. Tree farming, unless it can be shown to the Kern County Planning Department that the spacing of the trees will

not cause a rise in the base flood elevation or that the trees will not add to the debris load of the stream.

Section 198. Subsection 19.50.130.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Oil or gas exploration and production shall comply with Section 19.98.050 and the following standards:

1. The following uses are permitted within the FPP District if they will not obstruct flows, will not cause peripheral flooding of other properties, will not cause any increase in flood levels during the occurrence of the base flood discharge, will be resistant to floatation and immune to extensive damage by flooding, and will not endanger life or property:
   (a) All oil or gas wells, including pumps and all other associated equipment.
   (b) Feasible remedial work, improvements, and floodproofing of facilities.
2. No oil or gas well shall be drilled on the slope or within ten (10) feet of the top or toe of the bank of a river or stream located within the FPP District. The required setback on the top of bank shall be measured from an imaginary plane on a slope two (2) horizontal to one (1) vertical projected upward from the toe of the existing bank.
3. All oil or gas wells in the FPP District, including pumps and all other associated equipment, shall be designed such that they are resistant to damage by flooding.
4. All pipelines in the FPP District shall be floodproofed by burial to sufficient depth to prevent rupture during flood conditions or by suspension at least two (2) feet above the surface of the base flood. Supports for elevated pipelines shall also carry a catwalk to facilitate removal of debris caught by supports during floods.
5. The location of all buried pipelines shall be recorded on appropriate maps by the company that owns said pipelines, and the maps shall be made available to any public agency that shall request a copy.
6. All drilling, redrilling, and producing, including remedial work, well pulling, workovers, and deepening, shall conform to all applicable fire, safety, spacing, and environmental State law and regulations.
7. Proven technological improvements generally accepted and used in drilling and production methods shall be adopted as they may from time to time become available, if capable of reducing factors of nuisance and annoyance.
8. Prior to the commencement of any drilling, a copy of a Spill Prevention Control and Countermeasure Plan, as required by the United States Environmental Protection Agency, shall be filed with the Kern County Planning Department.
9. All pumps expected to be inaccessible during times of flood shall be equipped with an accessible remote switch to shut off the pumps during emergencies.
10. The derrick, all boilers, and all other drilling equipment used pursuant to this chapter to drill any well hole or to repair, clean out, deepen, or redrill any completed or drilling well shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derrick, boilers, and drilling equipment are to be used within a reasonable time limit, determined by the Planning Director, for the drilling of another well or wells on the premises.

11. After any well has been placed in production, no earthen sumps shall be used for the storage of petroleum or gas.
12. Within ninety (90) days after any well has been placed in production or after its abandonment, earthen sumps used in drilling or production or both shall be emptied by vacuum truck or other approved means, then filled, and the drilling site restored as nearly as practicable to a uniform grade, unless such sumps are to be used within a reasonable time limit, as determined by the Planning Director.
13. Any derrick used for servicing operations shall be of the portable type; provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable-type derrick will not properly service such well, the Planning Director may approve the use of a standard type of derrick.
14. Directional and warning signs, and those required for identification of the well, shall be constructed, erected, placed, or maintained on the premises, except those required by law to be displayed in connection with the drilling or maintenance of the well.
15. If a producing or service well is not secured twelve (12) months from the date of commencement of drilling operations or any extended period granted by the Planning Director, the premises shall be restored to the original condition as nearly as practicable to do so. If at the expiration of the twelve- (12-) month period, the drilling program has not been completed, the Planning Director may, upon a written request, grant an additional period of time as requested for the completion of such drilling program.

Section 199. Subsections A and B of Section 19.50.130 remain unchanged.

Section 200. Subsection 19.52.140.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. A site development plan drawn at the scale specified by the Planning Director, which includes the following information:
1. Topography of the lot(s)
2. Proposed street system and parking areas
3. Lot design
4. Location of buildings
5. Location of other proposed uses
6. Proposed setbacks
7. Areas to be reserved for parks, schools, or public or quasi-public buildings
8. Proposed landscaping
9. Water supply and distribution
10. Sewage disposal system
11. Drainage system
12. North arrow

Section 201. Subsections A, B, C, D, F, G, and H of Section 19.52.140 remain unchanged.

Section 202. Subsection 19.52.170.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. If development approved pursuant to this chapter has not commenced within three (3) years of the approval, the Board of Supervisors shall initiate a reclassification of the property in accordance with the procedures set out in Chapter 19.112 of this title, unless:
1. Building permits for approved development have been issued;

2. A tentative subdivision or parcel map for proposed development has been approved; or
3. A written request for an extension has been filed with and approved by the Planning Director before the expiration of the three- (3-) year period. Such extension shall not exceed three (3) years from the expiration of the initial three- (3-) year period.

In any event, development approved in accordance with this chapter shall be commenced or necessary final subdivision maps recorded within six (6) years of the original approval.

Section 203. Subsection B of Section 19.52.170 remains unchanged.

Section 204. Section 19.52.180 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.52.180 MINOR PLAN MODIFICATIONS

The Planning Director may approve minor plan modifications to an approved SP site development plan in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title, if the Planning Director determines that the modification(s) does not constitute a substantial change in the approved project.

Section 205. Subsection 19.53.130.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. A mobilehome or recreational vehicle permitted as a temporary dwelling pursuant to Subsection B of Section 19.53.020 of this chapter shall comply with the following standards:
   1. Building permits for construction of the conventional single-family residence shall be obtained prior to or concurrently with the installation permit for the mobilehome.
   2. The mobilehome shall be removed from the premises or the recreational vehicle shall be removed from the premises or placed in dead storage if:
      a. Six (6) months have passed since the mobilehome or recreational vehicle was installed.
      b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.
      c. The building permit has lapsed due to lack of activity.
   3. One (1) extension of time for a period not to exceed six (6) months may be granted by the Planning Director upon written request of the property owner. The extension of time may only be approved subject to the following conditions:
      a. An active building permit is on file with the Kern County Engineering and Survey Services Department (Building Inspection Division).
      b. The construction of the conventional dwelling unit on the site has progressed to a stage of inspection and approval of the framing, rough electrical, rough mechanical, and rough and top-out of plumbing of the dwelling.
   4. Any mobilehome or recreational vehicle permitted as a temporary dwelling in excess of a six (6) month period of time pursuant to Subsection B.3 of Section 19.53.130 shall be removed or placed in dead storage if:
      a. The extension of time has expired.
      b. Seven (7) days have passed since the conventional dwelling unit was approved for occupancy.
      c. The building permit has lapsed due to lack of activity.

Section 206. Subsections A, C, D, and E of Section 19.53.130 remain unchanged.

Section 207. Section 19.56.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.56.130 SITE DEVELOPMENT PLAN REVIEW — REQUIRED

No use shall be established, changed, or altered, no development shall occur and no building or grading permit shall be issued for any use or development in the PD Combining District, except for one (1) single-family residential dwelling on a single lot, until an application for site development plan review has been submitted to and approved by the Planning Director or the Board of Supervisors in accordance with the procedures set out in Chapter 19.102 of this title. The Planning Director may waive this requirement in cases where the proposed development is the subdivision of property, and no other development is proposed. Additionally, this requirement shall be waived in those instances where the proposed development requires approval of a conditional use permit pursuant to Chapter 19.104.

Section 208. Subsection 19.56.140.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. A site development plan drawn at the scale specified by the Planning Director, which includes the following information:
   1. Topography and proposed grading
   2. Proposed development in relationship to all previously approved and projected PD site development plans
   3. The width, location, and names of surrounding streets
   4. The location, dimensions, ground floor area, and uses of all existing and proposed buildings and structures on the subject property
   5. Proposed landscaping
   6. Streets and parking areas
   7. Signs, including location, size, and height
   8. Proposed dedications and improvements in accordance with applicable subdivision improvement standards for the area
   9. Location, height, and material of walls and fences
   10. Other specified uses of the property
   11. North arrow and scale

Section 209. Subsections A, B, C, D, and F of Section 19.56.140 remain unchanged.

Section 210. Subsection 19.56.150.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. All development shall comply with any additional conditions deemed necessary or appropriate by the Planning Director or the Board of Supervisors to promote the public health, safety, and welfare.

Section 211. Subsection A of Section 19.56.150 remains unchanged.

Section 212. Section 19.56.160, Title 19, of the Ordinance Code of the County of Kern is hereby rescinded.

Section 213. Section 19.56.170 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.56.170 TIME LIMIT ON DEVELOPMENT APPROVAL

If development approved in accordance with this chapter has not commenced within two (2) years of the approval, the approval shall become null and void and of no effect, unless an extension has been granted by the Planning Director upon written request for an extension before the expiration of the

two- (2-) year period. This provision shall not apply to applications approved in conjunction with a tentative parcel map or a tentative tract map. In such cases, the expiration period shall coincide with that of the approved tentative parcel map or approved tentative tract map, as applicable.

Section 214. Section 19.56.180 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.56.180 TEMPORARY USES

Notwithstanding Sections 19.56.140 through 19.56.160 of this chapter, when a PD District has been established and is in effect, the Planning Director is authorized to approve a temporary use of the property consistent with the uses authorized by the base district within which the PD District is combined, but involving no permanent buildings or structures, if the Planning Director determines that such temporary use would not be detrimental to the public health, safety, and welfare, subject to the following conditions:

A. The applicant shall submit an application for a PD site development plan review, but the Planning Director shall have authority to defer the filing of a formal linen or cronar.

B. Authorization for a temporary use shall be evidenced by a temporary use permit approved by the Planning Director in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title.

C. Such temporary use permit may be revoked by the Planning Director at any time, if, in the exercise of his/her reasonable discretion, he/she determines that continued temporary use of such property without the safeguards provided by an approved PD site development plan would be detrimental to the public health, safety, and welfare.

D. No temporary use permit shall ever ripen into the status of a permanent right or legal nonconforming use.

E. Prior to approval of a formal PD site development plan for permanent improvements, and in any case, in the event a PD site development plan is disapproved, the temporary use permit shall become null and void and the premises shall be completely vacated and restored to its original condition.

Section 215. Section 19.56.190 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.56.190 MINOR PLAN MODIFICATIONS

The Planning Director may approve minor plan modifications to an approved PD site development plan in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title if the Planning Director determines that the modification(s) does not constitute a substantial change in the approved project.

Section 216. Section 19.58.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.58.130 SITE DEVELOPMENT PLAN REVIEW — REQUIRED

No use shall be established, no development shall occur, and no building or grading permit shall be issued for any use or development in the CL District until an application for site development plan review has been submitted to and approved by the Planning Director in accordance with the procedures set out in Sections 19.102.070 through 19.102.120 of this title, or submitted to and approved by the Board of Supervisors in accordance with the procedures set out in Sections 19.102.190 through 19.102.230 of this title when submitted in conjunction with an application for a change of zone classification or with a tentative subdivision map.

Section 217. Subsection 19.58.140.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. A site development plan drawn at the scale specified by the Planning Director, which includes the following:
   1. Topography of the lot(s)
   2. Proposed street system and parking area
   3. Lot design
   4. Location of buildings
   5. Location of other proposed uses
   6. Proposed setbacks
   7. Areas to be reserved for parks, schools, or other public or quasi-public facilities
   8. Proposed landscaping
   9. Water supply and distribution
   10. Sewage disposal system
   11. Drainage system
   12. North arrow

Section 218. Subsections A, B, C, E, F, G, and H of Section 19.58.140 remain unchanged.

Section 219. Subsection 19.58.150.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. All development shall comply with any additional conditions deemed necessary or appropriate by the Planning Director or the Board of Supervisors to promote the public health, safety, and welfare.

Section 220. Subsections A and B of Section 19.58.150 remain unchanged.

Section 221. Section 19.58.160 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.58.160 TIME LIMIT ON DEVELOPMENT APPROVAL

If development approved in accordance with this chapter has not commenced within two (2) years of the approval, the approval shall become null and void and of no effect, unless an extension has been granted by the Planning Director, upon written request for an extension before the expiration of the two- (2-) year period. This provision shall not apply to applications approved in conjunction with a tentative parcel map or a tentative tract map. In such cases, the expiration period shall coincide with that of the approved tentative parcel map or approved tentative tract map, as applicable.

Section 222. Section 19.58.170 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.58.170 MINOR PLAN MODIFICATIONS

The Planning Director may approve minor plan modifications to an approved CL site development plan in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title if the Planning Director determines that the modification(s) does not constitute a substantial change in the approved project.

Section 223. Section 19.60.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.60.090 MINIMUM DISTANCE BETWEEN STRUCTURES

Requirements for minimum distance between structures in an RS District are as follows:

A. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings, except that pens, coops, other structures for housing animals, and the animals themselves shall be at least thirty (30) feet away from any off-site residential building or other building used for human habitation, at least one hundred (100) feet from the front lot line, at least twenty-five (25) feet from the street side lot line on a corner lot, and at least one hundred (100) feet away from any public park, school, hospital, or similar institution.

B. All other uses shall comply with the requirements of the base district with which the RS District is combined.

Section 224. Section 19.60.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.60.130 TEMPORARY ANIMAL PERMIT — REQUIRED WHEN

The breeding and raising of livestock, in greater numbers than allowed by Subsection B of Section 19.60.020 of this chapter, by minors in conjunction with a student-oriented fair project sponsored by a bona fide agricultural organization shall be permitted upon submission of an application for a Temporary Animal Permit to and approval by the Planning Director in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title.

Section 225. Subsection 19.60.150.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. The applicant shall allow inspection of animal maintenance facilities by the Kern County Engineering and Survey Services Department (Building Inspection Division) and the Kern County Health Department.

Section 226. Subsections A, B, C, D, and F of Section 19.60.150 remain unchanged.

Section 227. Section 19.60.160 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.60.160 PERMIT REVOCATION AND MODIFICATION

Any permit issued pursuant to this chapter may be revoked or modified pursuant to Section 19.102.020 of this title upon receipt of a recommendation for revocation or modification from the Kern County Engineering and Survey Services Department (Building Inspection Division) or the Kern County Health Department.

Section 228. Section 19.61.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.61.090 MINIMUM DISTANCE BETWEEN STRUCTURES

The minimum distance between structures in an RL District shall be as required in the base district or as follows, whichever is least restrictive:

A. There shall be a minimum distance of six (6) feet between a residential building and an accessory building or between accessory buildings, except that pens, coops, other structures for housing animals, and the animals themselves shall be at least thirty (30) feet away from any off-site residential building or other building used for human habitation, at least one hundred (100) feet from the front lot line, at least twenty-five (25) feet from the street side lot line on a corner lot, and at least one hundred (100) feet away from any public park, school, hospital, or similar institution.

Section 229. Section 19.61.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.61.130 DEVELOPMENT STANDARDS AND CONDITIONS

The Director of the Kern County Planning Department may authorize, upon written request from the property owner, equestrian events to be held for a maximum of five (5) days during any given calendar year involving no more than one hundred (100) people on site, including participants and spectators. Any such request shall be accompanied by a written statement describing the proposed event and by the signatures of the owners of all abutting properties which contain a residence indicating "no objection" to the request. No public address or loudspeaker systems shall be utilized, except that portable, hand-held megaphones or similar sound amplification devices, as determined by the Planning Director,

may be utilized. The Planning Director may impose conditions deemed necessary to protect the public health, safety, and welfare.

Section 230. ****DELETED****

Section 231. ****DELETED****

Original
Replacement page for zoning ord. adopted on Mon.

Section 232. Section 19.62.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.62.130 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

A. If the method of installation results in the exposure of the undercarriage, a continuous perimeter skirting compatible with the mobilehome siding shall be installed.

B. No special architectural or size requirements shall apply to mobilehome installations in the MH District, except as may be specifically required by Sections 19.62.020 or 19.62.030.

Section 233. Section 19.64.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.64.130 DETAILED PLOT PLAN REQUIRED — CONTENTS

Prior to issuance of construction permits, the developer shall submit a detailed plot plan for review and approval by the Planning Director. The plan boundaries shall coincide with those of the project parcel. The following information shall be included in said plan:

A. Existing topography and drainage channels.

B. Direction of prevailing winds across the project site.

C. Location, height, and dimensions of all existing structures.

D. Distance to all residences located within one (1) mile of exterior project boundary.

E. Manufacturer or machine trade name, including, but not limited to, rated KW capacity, tower or support structure location and height, total blade diameter, rated maximum shaft RPM, location of proposed structures and buildings, and manufacturer's production record, and/or sufficient manufacturer's data in order to classify machines as experimental, prototype, or production in accordance with the definitions contained in this chapter.

F. Location, grades, and dimensions of all roads and parking areas, both existing and proposed.

G. Location and extent of known archaeological remains.

H. Location and type of project security fencing.

I. A plan of proposed project phasing.

J. Any and all reports, approvals, or requirements which may be required by mitigation measures incorporated into an environmental document adopted for implementation of this district for specific parcels; including a plan for implementation of recommendations contained in such reports.

K. A certificate signed by a registered civil engineer or licensed land surveyor stating that area encompassed by the project has been surveyed under his supervision or that a previous survey was performed by a registered civil engineer or licensed land surveyor and that sufficient monuments have been placed to accurately establish the exterior project boundaries.

L. A certificate signed by a registered civil engineer or licensed land surveyor stating that the proposed development is in full compliance with the requirements of this chapter. The Director of the Kern County Planning Department may require the submittal of additional documentation of compliance when deemed necessary.

Section 234. Section 19.64.140 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.64.140 DEVELOPMENT STANDARDS AND CONDITIONS

Development in the WE Combining District shall comply with the following standards:

A. All necessary building and grading permits shall be obtained from the Kern County Planning Department. For construction and permit purposes, all wind generator towers shall conform to the regulations of the applicable seismic zone of the Uniform Building Code and the applicable groundshaking zone.

B. Towers and blades shall be painted a nonreflective, unobtrusive color or have a nonreflective surface.

C. Wind project facilities shall be enclosed with a minimum four- (4-) foot-high security fence constructed of four (4) strand barbed wire or materials of a higher quality. Fencing shall be erected for each wind machine or on the perimeter of the total project. Fencing erected on the perimeter of the total project shall include minimum eighteen- (18-) inch by eighteen- (18-) inch signs warning of wind turbine dangers. Such signs shall be located a maximum of three hundred (300) feet apart and at all points of site ingress and egress.

D. All on-site electrical wires associated with wind machines shall be installed underground, excepting therefrom "tie-ins" to a public utility company and public utility company transmission poles, towers, and lines. An additional exemption may be granted by the Planning Director if project terrain is found to be unsuitable to accomplish the intent and purpose of this provision.

E. Prior to issuance of construction permits, the developer shall provide the Kern County Planning Department with proof of approved access to the site.

F. Wind generator setback shall be as follows:

1. Setback Where Adjacent Parcels Contain Less Than Forty (40) Acres. A minimum wind generator setback of four (4) times the overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blades) or five hundred (500) feet, whichever is greater, shall be maintained from exterior project boundaries where the project site is adjacent to existing parcels of record which contain less than forty (40) acres and are not zoned WE Combining District.

   The Planning Director may allow a reduction in this setback, not to exceed a minimum setback of one and one-half (1 1/2) times the overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blades) if a letter of consent from the owner(s) of record of adjacent parcels is filed with the Kern County Planning Department.

2. Setback Where Adjacent Parcels Contain Forty (40) Acres or More. A minimum wind generator setback of one and one-half (1 1/2) times the overall machine

height (measured from grade to the top of the structure, including the uppermost extension of any blades) shall be maintained from all exterior project boundaries.

The Planning Director may allow a reduction of this setback requirement in accordance with all of the following provisions:

a. The project exterior boundary is a common property line between two (2) or more approved wind energy projects.
b. The property owner of each property has filed a letter of consent to the proposed setback reduction with the Planning Director.
c. All setbacks shall comply with the setback requirements of the base district with which the WE District is combined.
d. The project site and the adjacent property exist as the same parcel of record and are held under common ownership, and the property owner has filed a letter of consent to the proposed setback reduction with the Planning Director.

3. Setback From Off-site Residence(s) on Adjacent Parcels. In all cases, regardless of parcel area, a minimum wind generator setback of four (4) times the overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blades) or one thousand (1,000) feet, whichever is greater, shall be maintained from any off-site residence.

The Planning Director may allow a reduction in this setback, not to exceed a minimum setback of one and one-half (1 1/2) times the overall machine height, if a letter of consent from the owner(s) of record of the adjacent parcel is filed with the Planning Director.

4. Project Interior Wind Generator Spacing. Wind generator spacing within the project boundary shall be in accordance with accepted industry standards pertaining to the subject machine.
5. Setback From On-site Residences and Accessory Structures Designed for Human Occupancy. A minimum wind generator setback of one and one-half (1 1/2) times the overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blade) shall be maintained from any on-site residence or accessory structure designed for human occupancy.
6. Setback From Public Highways and Streets, Public Access Easements, Public Trails, and Railroads. A minimum wind generator setback of one and one-half (1 1/2) times the overall machine height (measured from grade to the top of the structure, including the uppermost extension of any blade) shall be maintained from any public highway or street, public access easement, public trail, or railroad.

G. Wind generator machine height shall not exceed the maximum height permitted for antennae and towers by the district with which the WE District is combined. For the purposes of this provision, machine height shall be measured as follows:

1. Machine height of horizontal axis machines shall be measured from grade to the center of the blade hub.
2. Machine height of vertical axis or other machine designs shall be measured from grade to the highest point of the structure.

Approval of heights in excess of these limitations shall be in accordance with Chapters 19.106 and 19.110 of this title.

H. All wind generators and towers shall comply with all applicable County, State, and federal laws, ordinances, or regulations.

I. One (1) project identification sign, located at each point of project ingress and egress, not to exceed thirty-two (32) square feet in area, may be erected on the project site. No other signs shall be installed other than the required warning signs. The developer shall submit a sign elevation drawing to the Planning Director for review and approval prior to installation.

J. Where a residence, school, church, public library, or other sensitive or highly sensitive land use, as identified in the Noise Element of the County General Plan, is located within one (1) mile in a prevailing downwind direction or within one-half (1/2) mile in any other direction of a project's exterior boundary, an acoustical analysis shall be prepared by a qualified acoustical consultant prior to the issuance of any building permit. The consultant and the resulting report shall be subject to review and approval by the Kern County Health Department. The report shall address any potential impacts on sensitive or highly sensitive land uses.

In addition, the acoustical report shall demonstrate that the proposed development shall comply with the following criteria:

1. Audible noise due to wind turbine operations shall not be created which causes the exterior noise level to exceed forty-five (45) dBA for more than five (5) minutes out of any one- (1-) hour time period (L8.3) or to exceed fifty (50) dBA for any period of time when measured within fifty (50) feet of any existing residence, school, hospital, church, or public library.

2. Low frequency noise or infrasound from wind turbine operations shall not be created which causes the exterior noise level to exceed the following limits when measured within fifty (50) feet of any existing residence, school, hospital, church, or public library.

One-third Octave Band Center Frequency (Hz)	Sound Pressure Level (dB)
2 to 1	70 (each band)
20	68
25	67
31.5	65
40	62
50	60
63	57
80	55
100	52
125	50

3. In the event audible noise due to wind turbine operations contains a steady pure tone, such as a whine, screech, or hum, the standards for audible noise set forth in Subparagraph (1) of this subsection shall be reduced by five (5) dBA. A pure tone is defined to exist if the one-third (1/3) octave band sound pressure level in the band, including the tone, exceeds the arithmetic average of the sound pressure levels of the two (2) contiguous one-third (1/3) octave bands by five (5) dBA for center frequencies of five hundred (500) Hz and above, by eight (8) dBA for center frequencies between one hundred and sixty (160) Hz and four

hundred (400) Hz, or by fifteen (15) dBA for center frequencies less than or equal to one hundred and twenty-five (125) Hz.

4. In the event the audible noise due to wind turbine operations contains repetitive impulsive sounds, the standards for audible noise set forth in Subparagraph (1) of this subsection shall be reduced by five (5) dBA.
5. In the event the audible noise due to wind turbine operations contains both a pure tone and repetitive impulsive sounds, the standards for audible noise set forth in Subparagraph (1) of this subsection shall be reduced by a total of five (5) dBA.
6. In the event the ambient noise level (exclusive of the development in question) exceeds one (1) of the standards given above, the applicable standard shall be adjusted so as to equal the ambient noise level. For audible noise, the ambient noise level shall be expressed in terms of the highest whole number sound pressure level in dBA which is exceeded for no more than five (5) minutes per hour (L8.3). For low frequency noise or infrasound, the ambient noise level shall be expressed in terms of the equivalent level (Leq) for the one-third (1/3) octave band in question, rounded to the nearest whole decibel. Ambient noise levels shall be measured within fifty (50) feet of potentially affected existing residences, schools, hospitals, churches, or public libraries. Ambient noise level measurement techniques shall employ all practical means of reducing the effects of wind-generated noise at the microphone. Ambient noise level measurements may be performed when wind velocities at the proposed project site are sufficient to allow wind turbine operation, provided that the wind velocity does not exceed thirty (30) mph at the ambient noise measurement location.
7. Any noise level falling between two (2) whole decibels shall be the lower of the two (2).
8. In the event that noise levels, resulting from a proposed development, exceed the criteria listed above, a waiver to said levels may be granted by the Planning Director provided that the following has been accomplished:
   a. Written consent from the affected property owners has been obtained stating that they are aware of the proposed development and the noise limitations imposed by this code, and that consent is granted to allow noise levels to exceed the maximum limits allowed.
   b. A permanent noise impact easement has been recorded in the County Hall of Records which describes the benefited and burdened properties and which advises all subsequent owners of the burdened property that noise levels in excess of those permitted by this code may exist on or at the burdened property.

K. Prior to the issuance of any building permit, a plan for the mitigation of potential soil erosion and sedimentation shall be prepared. The plan shall include provisions for site revegetation and shall include sediment collection facilities as may be required by the Kern County Planning Department and/or the appropriate resource conservation district. The plan shall include a timetable for full implementation and a surety bond or other security as approved by the County Counsel's Office, in an amount determined by the Kern County Planning Department and the appropriate resource conservation district and shall be provided to the Kern County Engineering and Survey Services Department (Building Inspection Division) to guarantee plan implementation.

The plan shall also be approved by the Planning Director and the appropriate resource conservation district, prior to issuance of a building permit. In the event that the appropriate resource conservation district cannot participate in plan approval, the Kern County Planning Department shall have final responsibility in such plan approval.

L. A minimum of on-site roadways shall be constructed. Temporary access roads utilized for initial machine installation shall be revegetated to a natural condition after completion of machine installation. The applicant shall submit a plan of all proposed roads, temporary and permanent, for approval by the Planning Director prior to the issuance of any building permits.

M. Construction of any slopes steeper than four to one (4:1) shall be prohibited unless specifically authorized by the Kern County Planning Department and mitigation is provided.

N. Wind project facilities shall be encircled with a ten-(10-) foot-wide fuel break. Subject fuel breaks may be installed for each wind machine or the perimeter of the total project, but in no event shall encompass more than forty (40) acres per block. Permanent access roads may also be considered fuel breaks. This requirement may be modified at the discretion of the Kern County Fire Chief.

O. No building permits will be issued until the grading has been completed in accordance with the approved plans and "As Graded Certification" has been made by the engineer.

Section 235. Section 19.68.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.68.130 PLOT PLAN REVIEW — REQUIRED

No use shall be established, no development shall occur, and no building permit or grading permit shall be issued for any use or development in the GH Combining District until an application for plot plan review has been submitted to and approved by the Planning Director in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title.

Section 236. Subsection 19.68.140.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. A plot plan drawn at the scale specified by the Planning Director, which includes the following information:
   1. Topography and proposed grading
   2. Location and extent of all geologic hazards, including areas subject to surface faulting, groundshaking, ground failure, landslides, mudslides, and other geologic hazards
   3. Location of all proposed buildings and structures
   4. Location of proposed streets, roads, and parking areas
   5. Proposed drainage improvements
   6. North arrow

Section 237. Subsections A, B, C, D, F, and G of Section 19.68.140 remain unchanged.

Section 238. Section 19.68.150 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.68.150 DEVELOPMENT STANDARDS AND CONDITIONS

Development in the GH Combining District shall comply with the mitigation measures recommended in the geological report required by Section 19.68.140 of this chapter as approved by the Kern County Planning Department. In any event, structures for human occupancy shall be set back at least fifty (50) feet from any active fault trace or one hundred (100) feet from any

fault trace that cannot be precisely located or is depicted as "inferred" on the Kern County Seismic Hazard Atlas.

Section 239. Section 19.70.010 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.70.010 PURPOSE AND APPLICATION

A. The purpose of the Floodplain (FP) Combining District is to protect the public health and safety and minimize property damage by designating areas that are potentially subject to flooding and by establishing reasonable restrictions on land use in such areas. The FP District shall be applied to those areas lying within Zone A on the Flood Insurance Rate Maps (FIRM) or those areas potentially subject to flooding as designated by the Kern County Planning Department pending reclassification of such areas into the Floodplain Primary (FPP) District or the Floodplain Secondary (FPS) Combining District. The regulations established by the FP District shall be in addition to the regulations of the base district with which the FP District is combined.

B. The special flood hazard area designated as Zone A is based on historical flood flows where no quantitative determination of the frequency of flooding has been made. Detailed engineering studies are performed and/or approved by the Kern County Planning Department prior to the reclassification of the FP Combining District into the FPP District and/or FPS Combining District.

C. The degree of flood protection required by this chapter is considered reasonable for regulatory purposes and is based on engineering and scientific methods of study. Larger floods may occur on rare occasions or flood heights may be increased by manmade or natural causes, such as bridge openings restricted by debris. This chapter does not imply that areas outside the FP District or land uses permitted within the FP District will be free from flooding or flood damages. This chapter shall not create liability on the part of the County of Kern or any officer or employee thereof for any flood damage that may result from reliance on this chapter or any administrative decision lawfully made hereunder.

Section 240. Section 19.70.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.70.040 PROHIBITED USES

All other uses not permitted by Sections 19.70.020 and 19.70.030 of this chapter are prohibited in an FP District, including:

A. All uses prohibited by the base district with which the FP District is combined.

B. All uses that will likely increase the flood hazard or affect the water-carrying capacity of the floodplain beyond the limits resulting from encroachment as specified in Section 19.70.130 of this chapter.

C. Dumping, stockpiling, or storage of floatable substances or other materials which, in the opinion of the Kern County Planning Department, will add to the debris loads of the stream or watercourse, unless protected by flood control devices approved by the Planning Director and constructed in accordance with Section 19.70.130 of this chapter.

D. Livestock feed yards, dairies, storage of junk, or salvage operations.

E. Oil storage tanks or processing equipment, unless floodproofed or sufficiently elevated above the Base Flood Elevation, as determined by the Kern County Planning Department.

F. Individual sewage disposal systems (e.g., septic tank systems), unless protected by flood control devices approved by the Kern County Planning Department and

constructed in accordance with the requirements of the Kern County Health Department so as to minimize infiltration of floodwaters into the systems and discharges from the systems into the floodwaters.

G. Sources of water supply (e.g., wells, springs, etc.) unless protected by flood control devices approved by the Kern County Planning Department and constructed in accordance with the requirements of the Kern County Health Department so as to minimize infiltration of floodwaters.

H. Any use which endangers the temporary safeguards erected for flood protection.

Section 241. Section 19.70.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.70.090 MINIMUM DISTANCE BETWEEN STRUCTURES

Requirements for minimum distance between structures in an FP District are per the requirements of the base district with which the FP District is combined; however, the Floodplain Management Section of the Engineering and Survey Services Department may require a greater minimum distance between structures in order to provide sufficient water-carrying capacity of the floodplain to meet the requirements of Section 19.70.130.

Section 242. Section 19.70.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.70.130 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

All development within the FP District shall comply with the requirements of the Flood Damage Prevention Ordinance (Chapter 17.48 of this code) and the following standards:

A. Generally, development within the floodplain may not cumulatively increase the Base Flood Elevation at any point more than one (1) foot.

1. Computations of increased flood heights caused by development in the floodplain shall be based upon the reasonable assumption that there shall be an equal loss of conveyance on opposite sides of the stream.
2. Cases for supercritical flow, or where velocity conditions are such that normal encroachment analyses are not possible or inappropriate, the allowable increase of one (1) foot shall be applied to the energy grade line instead of the Base Flood Elevation.
3. Cases for overbank velocities exceeding seven (7) feet per second, the floodway boundary shall coincide with the one hundred (100) year floodplain boundaries.
4. All such computations shall be made or approved by the Kern County Planning Department.

Section 243. Section 19.72.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.72.040 PROHIBITED USES

All other uses not permitted by Sections 19.72.020 or 19.72.030 of this chapter are prohibited in the FPS District, including the following:

A. All uses prohibited by the base district with which the FPS District is combined.

B. All uses that will likely increase the flood hazard or affect the water-carrying capacity of the floodplain beyond the limits resulting from encroachment as specified in Section 19.72.130 of this chapter.

C. Dumping, stockpiling, or storage of floatable substances or other materials which, in the opinion of the Kern County Planning Department, will add to the debris loads of the stream or watercourse.

D. Storage of junk, or salvage operations.

E. Oil storage tanks or processing equipment, unless floodproofed or sufficiently elevated above the Base Flood Elevation, as determined by the Kern County Planning Department.

F. Individual sewage disposal systems (e.g., septic tank systems), unless protected by flood control devices approved by the Kern County Planning Department and constructed in accordance with the requirements of the Kern County Health Department so as to minimize infiltration of floodwaters into the systems and discharges from the systems into the floodwaters.

G. Sources of water supply (e.g., wells, springs, etc.), unless protected by flood control devices approved by the Kern County Planning Department and constructed in accordance with the requirements of the Kern County Health Department so as to minimize infiltration of floodwaters.

H. Any use which endangers the temporary safeguards erected for flood protection.

I. Tree farming, unless it can be shown to the Kern County Planning Department that the spacing of trees will not affect the water-carrying capacity of the stream beyond limits resulting from encroachment as specified in Section 19.72.130 of this chapter.

Section 244. Section 19.72.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.72.070 YARDS AND SETBACKS

Yard and setback requirements in an FPS District are per the requirements of the base district with which the FPS District is combined, except that all development shall be set back a minimum of ten (10) feet from an imaginary plane on a slope of two (2) horizontal to one (1) vertical projected upward from the toe of the existing bank of any watercourse, and sewage disposal systems shall be set back a minimum of one hundred (100) feet from the top of the existing banks of the watercourse. These setback requirements may be reduced if recommended through the preparation of a soils engineering report by a registered civil engineer experienced and knowledgeable in the practice of soils engineering. Said report shall be subject to review and approval by the Planning Department.

Section 245. Section 19.72.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.72.090 MINIMUM DISTANCE BETWEEN STRUCTURES

Requirements for minimum distance between structures in an FPS District are per the requirements of the base district with which the FPS District is combined; however, the Floodplain Management Section of the Engineering and Survey Services Department may require a greater minimum distance between structures in order to provide sufficient water-carrying capacity of the floodplain to meet the requirements of Section 19.72.130.

Section 246. Section 19.72.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.72.130 SPECIAL REVIEW PROCEDURES AND DEVELOPMENT STANDARDS

All development within the FPS District shall comply with the requirements of the Flood Damage Prevention Ordinance (Chapter 17.48 of this code) and the following standards:

A. Generally, development within the floodplain may not cumulatively increase the Base Flood Elevation at any point more than one (1) foot.

1. Computations of increased flood heights, caused by development in the floodplain, shall be based upon the reasonable assumption that there shall be an

equal loss of conveyance on opposite sides of the stream.

2. Cases for supercritical flow, or where velocity conditions are such that normal encroachment analyses are not possible or inappropriate, the allowable increase of one (1) foot shall be applied to the energy grade line instead of the Base Flood Elevation.
3. Cases for overbank velocities exceeding seven (7) feet per second, the floodway boundary shall coincide with the one hundred (100) year floodplain boundaries.
4. All such computations shall be made or approved by the Kern County Planning Department.

Section 247. Chapter 19.74, (Architectural Design (D) Combining District), Title 19, of the Ordinance Code of the County of Kern is hereby rescinded.

Section 248. Section 19.76.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.76.130 SITE DEVELOPMENT PLAN REVIEW — REQUIRED

No building, structure, plant, or tree shall exceed thirty-five (35) feet in height until an application for site development plan review has been submitted to and approved by the Planning Director in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 Of this chapter. In no case shall height limitations be less restrictive than the requirement of Part 77 of the Federal Aviation Regulations of the Federal Aviation Administration, Department of Transportation, or any corresponding rules or regulations of the Federal Aviation Administration, as amended.

Section 249. Section 19.76.140 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.76.140 SITE DEVELOPMENT PLAN REVIEW — APPLICATION — CONTENTS

An application for site development plan review shall include the following:

A. Name and address of applicant
B. Name(s) and address(es) of the property owner(s)
C. Assessor's parcel number(s)
D. Legal description of the property
E. A letter from the Federal Aviation Administration which shall state that the proposed development does not constitute a hazard to air traffic and does not violate any federal regulations. The letter shall also include any special conditions imposed by the Federal Aviation Administration.
F. A plot plan drawn at the scale specified by the Planning Director, which includes the following information:
    1. Topography and proposed grading
    2. Proposed private access drives and parking areas
    3. Location of all permanent buildings and structures
    4. Park, open space, and recreation areas
    5. Proposed landscaping
    6. North arrow
G. Elevations of all permanent common buildings

Section 250. Section 19.78.020 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.78.020 AUTOMOBILE PARKING (P) DISTRICT

All development in the P District shall comply with the requirements and standards set out in Chapter 19.82 of this title. Permitted uses in the P District shall be limited to the parking of motor vehicles, except that temporary displays of retail equipment or products may be authorized by the Planning Director if related to an on-site retail business. In conjunction with such approval, the Planning Director may

impose conditions deemed necessary to promote public health, safety, and welfare. Except for parking lot related improvements, no structures or buildings shall be permitted in the P District. Use of the P District for storage uses shall be prohibited.

Section 251. Section 19.78.025 is hereby added to the Ordinance Code of the County of Kern to read as follows:

19.78.025 MOBILEHOME SUBDIVISION (MS) DISTRICT

All development in the MS District shall comply with the requirements and standards set out in Chapter 19.18 (R-1 District), except where property is zoned for lot sizes of one-quarter (1/4) acre or greater, in which case the requirements and standards set out in Chapter 19.16 (E District) shall apply.

Section 252. Section 19.80.010 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.80.010 PURPOSE AND APPLICATION

The purpose of this chapter is to establish reasonable and necessary development standards for multifamily, commercial, industrial, institutional, and other similar uses to ensure that development subject to this chapter includes appropriate public improvements and is compatible with surrounding uses. The development standards specified in this chapter shall apply to all multifamily development in the Medium-density Residential (R-2), High-density Residential (R-3), and all development in the Commercial Office (CO), Neighborhood Commercial (C-1) General Commercial (C-2), Highway Commercial (CH), Light Industrial (M-1), Medium Industrial (M-2), and Heavy Industrial (M-3) Districts, except as provided in this chapter, and shall apply to those uses in the Exclusive Agriculture (A) and Natural Resource (NR) Districts as required by those chapters.

Section 253. Subsection 19.80.020.J of the Ordinance Code of the County of Kern is hereby amended to read as follows:

J. When construction in excess of one (1) story is proposed adjacent to property zoned for single-family residential use, all windows above the first story and adjacent to the property zoned for single-family residential use shall contain glass that is opaque or translucent or shall be screened in a manner as approved by the Planning Director.

Section 254. Subsection 19.80.020.N of the Ordinance Code of the County of Kern is hereby amended to read as follows:

N. The Planning Director may waive any of the above-listed requirements where a documented hardship, not involving economics, exists or where there are unusual circumstances that prevent compliance with any of the required development standards. Additionally, street improvements and construction of curb, gutter, and sidewalks will not be required for individual or cumulative additions constituting less than fifty percent (50%) expansion of development existing on the effective date of this chapter.

Section 255. Subsections A, B, C, D, E, F, G, H, I, K, L, M, O, P, and Q of Section 19.80.020 remain unchanged.

Section 256. Section 19.80.030 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.80.030 DEVELOPMENT STANDARDS — COMMERCIAL AND INDUSTRIAL DISTRICTS

All development in the CO, C-1, C-2, CH, M-1, M-2, and M-3 Districts, and, where specified, the A and NR Districts, shall comply with the following standards:

Section 257. Subsection 19.80.030.L of the Ordinance Code of the County of Kern is hereby amended to read as follows:

L. For industrial developments utilizing outside storage, the areas devoted to outside storage shall be treated with a dust binder or other dust control measure, as approved by the Planning Director. Screening, if required by the base district regulations, shall also be provided.

Section 258. Subsection 19.80.030.N of the Ordinance Code of the County of Kern is hereby amended to read as follows:

N. The Planning Director may waive any of the above-listed requirements where a documented hardship, not involving economics, exists or where there are unusual circumstances that prevent compliance with any of the required development standards. Additionally, street improvements and construction of curb, gutter, and sidewalks will not be required for individual or cumulative additions constituting less than fifty percent (50%) expansion of development existing on the effective date of this chapter.

Section 259. Subsections A, B, C, D, E, F, G, H, I, J, K, M, O, P, and Q of Section 19.80.030 remain unchanged.

Section 260. Section 19.80.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.80.040 PLOT PLAN REVIEW AND APPROVAL — REQUIRED

Except as provided in this section, no permitted use shall be established, no permitted development shall occur, and no building permit or grading permit shall be issued for any permitted use or development subject to this chapter until a plot plan review has been submitted to and approved by the Planning Director in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. A plot plan review shall not be required for building additions which do not exceed a fifty percent (50%) increase of the gross square footage of building area located on the affected parcel unless the expansion will result in the creation of additional dwelling units. Additionally, a plot plan review shall not be required for changing one permitted use to another permitted use where no building permits are required.

Section 261. Section 19.82.020 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.82.020 Required parking spaces.

Uses permitted by this chapter shall provide off-street parking spaces according to the following schedule:

A. Residential Uses:
   1. Boarding house, rooming house, residential hotel, fraternity or sorority house, or dormitory: One (1) per bedroom,
   2. Retirement or rest home: One (1) per four (4) resident beds,
   3. Single-family dwelling, duplex, triplex, quadruplex, multifamily dwelling, condominium, mobilehome, or secondary residential unit: Two (2) per dwelling unit;

B. Recreation, Entertainment, and Tourist Facilities:
   1. Bowling alley: Four (4) per lane,
   2. Dance hall, ballroom, or discotheque: One (1) per thirty (30) square feet of gross building area,
   3. Golf course: Three (3) per hole,

4. Golf driving range: One (1) per tee,
5. Hotel or motel: One (1) per room plus two (2) for the manager's quarters and one (1) per full-time staff member,
6. Miniature golf course: Two (2) per hole,
7. Movie theater: One (1) per three (3) seats,
8. Pool and billiard parlor: Two (2) per pool or billiard table,
9. Shooting range or gun club: One (1) per shooter station,
10. Sports arena: One (1) per three and one-half (3 1/2) seats,
11. Swimming pool: One (1) per one hundred (100) square feet of pool and deck area plus bicycle parking racks containing a minimum of ten (10) spaces,
12. Tennis club, health club: One (1) per one hundred (100) square feet of open indoor recreational area plus two (2) per tennis or racquetball court,
13. Video games arcade: One (1) per one hundred (100) square feet of gross building area plus bicycle parking racks containing a minimum of ten (10) spaces;

C. Offices:
1. Business or professional office: One (1) per two hundred and fifty (250) square feet of gross building area,
2. Financial institution, including bank, savings and loan, or credit union: One (1) per two hundred (200) square feet of gross building area,
3. Medical or dental office, veterinary office, clinic: One (1) per two hundred (200) square feet of gross building area,

D. General Retail Sales:
1. Auto sales: One (1) per two thousand (2,000) square feet of sales area plus one (1) per two hundred and fifty (250) square feet of office area,
2. Bar, tavern, or cocktail lounge: One (1) per seventy-five (75) square feet of gross building area,
3. Furniture store: One (1) per five hundred (500) square feet of gross building area,
4. General retail: One (1) per two hundred and fifty (250) square feet of gross building area,
5. Nursery, retail: One (1) per two hundred and fifty (250) square feet of indoor display area plus one (1) per two thousand (2,000) square feet of outdoor sales area,
6. Heavy equipment, recreational vehicles, or truck sales: One (1) per two thousand (2,000) square feet of sales area plus one (1) per two hundred and fifty (250) square feet of office area,
7. Restaurant, cafe, or coffee shop: One (1) per one hundred (100) square feet of gross building area,
8. Restaurant, delivery only, where no seating area is provided: One (1) per two hundred and fifty (250) square feet of gross building area,
9. Restaurant, fast food: One (1) per seventy-five (75) square feet of gross building area,
10. Shopping center: One (1) per two hundred (200) square feet of gross floor area, or the sum of individual tenant parking space requirements, whichever is less;

E. Services:
1. Auto repair, tire sales and service: One (1) per three hundred (300) square feet of gross building area,
2. Barber or beauty shop: One (1) per one hundred (100) square feet of gross building area or one (1) per chair, whichever is less,

3. Equipment rental: One (1) per two thousand (2,000) square feet of outside display area or storage area plus one (1) per two hundred and fifty (250) square feet of office area plus one (1) per five hundred (500) square feet of inside display area,
4. Laundromat, self-service: One (1) per three (3) washing machines,
5. Mortuary or funeral parlor: One (1) per three and one-half (3 1/2) seats or one (1) per forty (40) square feet of assembly area, whichever is less;

F. Industrial Uses:
1. Contractor storage yard: One (1) per five thousand (5,000) square feet of lot area,
2. Manufacturing or assembly: One (1) per five hundred (500) square feet of floor area plus one (1) per two hundred and fifty (250) square feet of office area,
3. Warehouse or wholesale distribution: One (1) per one thousand (1,000) square feet of storage area for the first ten thousand (10,000) square feet, one (1) per three thousand (3,000) square feet thereafter plus one (1) per two hundred and fifty (250) square feet of office area;

G. Institutional Uses:
1. Auditorium: One (1) per three and one-half (3 1/2) seats,
2. Cemetery: One (1) per three and one-half (3 1/2) seats in the chapel plus one (1) per two hundred and fifty (250) square feet of office space,
3. Church or auditorium: One (1) per three and one-half (3 1/2) seats,
4. Convalescent hospital or sanitarium: One (1) per four (4) patient beds,
5. Hospital: One (1) per two (2) patient beds,
6. Library or museum: One (1) per five hundred (500) square feet of public use area,
7. Meeting halls and other places of public assembly where no fixed seating is provided: One (1) per forty (40) square feet of gross floor area;

H. Educational Institutions and Schools:
1. College, business school, trade school: One (1) per employee plus one (1) per two (2) students at full enrollment,
2. Elementary and junior high school: One (1) per employee plus one (1) per twenty (20) students at full enrollment,
3. High school: One (1) per employee plus one (1) per eight (8) students at full enrollment,
4. Preschool: One (1) per six (6) students for which the facility is licensed plus one (1) per employee;

I. Miscellaneous Uses:
1. Child care center: One (1) per eight (8) children for which the facility is licensed plus one (1) per employee;

J. Where the calculation of parking needs results in the requirement for a fraction of a parking space, the additional parking space shall be provided;

K. Floor area shall mean gross floor area unless otherwise specified;

L. Where a proposed use is not listed in this section, the Planning Director shall determine parking needs based on the listed use which most nearly resembles the proposed use;

M. Where parking requirements are based on the number of seats, eighteen (18) inches of pew or bench seating shall be equivalent to one (1) seat;

N. Where no fixed seating is provided, seven (7) square feet of floor space shall be equivalent to one (1) seat.

Section 262. Section 19.82.030 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.82.030 PARKING SPACE DIMENSIONS

All parking spaces shall be at least nine (9) feet by twenty (20) feet, except that:

A. Compact automobile parking spaces shall be at least eight (8) feet by sixteen (16) feet.

B. Handicapped automobile parking spaces shall comply with the requirements of Chapter 2-71 of Title 24 of the California Administrative Code.

C. Where a raised curb or wheel blocks are provided, parking spaces may be permitted a two- (2-) foot overhang, except where such an overhang would interfere with the use of a pedestrian walkway or landscape planter, as determined by the Planning Director.

Section 263. Section 19.82.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.82.070 LOCATION OF PARKING

Required residential off-street parking facilities shall be located on the premises they are intended to serve. Off-street parking for other than residential uses shall be located on the premises they are intended to serve or within five hundred (500) feet thereof. Where required parking is provided on a site other than that of the principal use, the property owner shall file with the Kern County Recorder's Office a covenant, on a form provided by the Kern County Planning Department and approved by the Planning Director, that provides for the maintenance of the parking facility as long as the associated principal use is maintained. Approval of the covenant shall be subject to the applicant's submittal of a detailed plot plan of the site upon which the additional parking will be provided. The plan shall illustrate that any required parking at that site will not be reduced. All required off-street parking spaces shall be designed, located, constructed, and maintained so as to be fully and independently usable and accessible at all times, except as provided for in Section 19.82.090.D.

Section 264. Section 19.82.080 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.82.080 JOINT USE OF PARKING AREAS

If more than one (1) use required to provide parking spaces in accordance with this chapter occupies the same building or premises, off-street parking shall be provided in an amount equal to the total number of spaces required for the separate uses, provided, however, that upon written request the Planning Director can reduce the number of spaces required in such cases by up to twenty percent (20%) if he/she determines that it is unlikely the combination of uses in the same building or premises will at periods of peak use necessitate provision of the number of parking spaces that would be required if the uses were developed independently. The parking space requirement for the primary use shall be calculated as specified in Section 19.82.020. No reduction shall be permitted for the number of parking spaces required for the primary use, as determined by the Planning Director.

Section 265. Subsection 19.82.090.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. All off-street parking areas and ingress and egress to parking areas shall be surfaced with the following materials:

1. For all residential, recreation, entertainment and tourist facilities, commercial, industrial, institutional, and other high intensity uses in any Type A Improvement Area (see Appendix), parking areas shall be surfaced with one (1) of the following materials on a prepared base:

a. Two (2) inches of asphaltic concrete

b. Three and one-half (3 1/2) inches of Portland Cement concrete

2. Except as specified by Chapter 19.80 of this title, for all uses in any other area, the required parking areas shall be surfaced with one of the following materials:
   a. Three (3) inches of bituminous road mix
   b. Two (2) inches of asphaltic concrete
   c. Three and one-half (3 1/2) inches of Portland Cement concrete
   d. Three (3) inches of decomposed granite
   e. Three (3) inches of compacted rock dust
   f. Three (3) inches of gravel
3. All required surfacing shall be continuously maintained in good condition, as determined by the Planning Director.
4. Driveways serving single-family residential dwellings are exempt from the paving requirements specified in Subsections 1 and 2 of this section if greater than one hundred (100) feet in length. The required parking area is still subject to the aforementioned paving provisions.
5. In the case of uses subject to discretionary approval, the required parking areas shall be surfaced with the materials specified in accordance with the conditions of approval.

Section 266. Subsection 19.82.090.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. All parking spaces shall be clearly marked. Where paved parking is required, all parking spaces shall be designated by white painted stripes, except for parking spaces serving a single-family residence; and concrete wheel blocks or a six- (6-) inch raised A.C. curb shall be installed at each parking space that abuts a structure or property line, except for parking spaces that serve a single-family residence, or as otherwise required by the Planning Director.

Section 267. Subsection 19.82.090.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Driveways for residential developments shall be a minimum of fourteen (14) feet (includes three- (3-) foot taper on each side) in width with fifteen (15) feet of unobstructed vertical clearance. Driveways for commercial and industrial developments shall be a minimum of eighteen (18) feet (includes three- (3-) foot taper on each side) in width with fifteen (15) feet of unobstructed vertical clearance. These requirements may be reduced by the Planning Director upon recommendation of the Kern County Fire Chief.

Section 268. Subsection 19.82.090.I of the Ordinance Code of the County of Kern is hereby amended to read as follows:

I. For all parking lots containing ten (10) or more spaces, at least five percent (5%) of the total interior area devoted to parking shall be landscaped. Trees shall be planted and maintained throughout the parking area at a minimum ratio of one (1) tree per ten (10) parking spaces. Minimum tree size shall be fifteen (15) gallon container. An irrigation system adequate for the maintenance of the landscaping shall be installed.

Section 269. Subsections B, D, F, G, H, J, and K of Section 19.82.090 remain unchanged.

Section 270. Section 19.82.100 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.82.100 OFF-STREET PARKING PLOT PLAN REVIEW — REQUIRED

No use shall be established or changed, no development shall occur or be expanded, and no building or grading permit or business license for any use or development shall be issued until an application for plot plan review has been submitted to and approved by the Planning Director.

Section 271. Section 19.82.110 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.82.110 PLOT PLAN REVIEW — APPLICATION — CONTENTS

The application for a plot plan review shall contain the following:

A. Name and address of the applicant
B. Name(s) and address(es) of the property owner(s)
C. Assessor's parcel number(s)
D. Legal description of the property
E. A plot plan drawn at the scale specified by the Planning Director, including the following:
    1. Topography and proposed grading
    2. Location of existing buildings and structures where such buildings and structures are to remain
    3. Location of proposed buildings and structures
    4. Proposed uses of all buildings or structures
    5. Dimensions of the existing and proposed buildings or structures or other information (e.g., seating capacity) of the proposed buildings allowing the Planning Director to determine parking needs in accordance with the requirements set out in Section 19.82.020 of this chapter
    6. Layout of proposed parking lot, including location of parking spaces, internal circulation pattern, and ingress and egress points
    7. Dimensions of parking stalls and aisles
    8. Location of landscaping and irrigation system, including identification of plant materials to be used
    9. Location of lighting
    10. North arrow

Section 272. Subsection 19.84.020.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. The maximum height of the monument sign shall be eight (8) feet as measured from grade level.

Section 273. Subsections A, C, and D of Section 19.84.020 remain unchanged.

Section 274. Subsection 19.84.050.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. The maximum height for off-site advertising signs shall be twenty-four (24) feet, except as otherwise specified in the applicable base district.

Section 275. Subsections A, B, C, and E of Section 19.84.050 remain unchanged.

Section 276. Subsection 19.84.060.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Temporary real estate signs shall be a minimum of ten (10) feet from any adjacent street and property line.

Section 277. Subsections A, B, D, E, F, and G of Section 19.84.060 remain unchanged.

Section 278. Section 19.84.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.84.070 DESIGN AND DEVELOPMENT STANDARDS — TEMPORARY SUBDIVISION SIGNS

A. Temporary directional subdivision signs shall comply with the following standards:

1. Each sign shall not exceed ten (10) feet in height and shall not exceed one hundred (100) square feet in area.
2. Up to six (6) signs may be permitted for each subdivision on any one (1) road alignment.
3. No sign shall be installed until such time as any of the following occurs: a final subdivision map has been recorded, grading permits for the subdivision have been issued, or a public report for the subdivision has been issued and a copy filed with the Director of the Kern County Planning Department.
4. Each sign shall be located completely outside of any private or public road right-of-way.
5. Each sign shall be located a minimum distance of six hundred (600) feet apart and shall be located no closer than twenty (20) feet from any other sign or structure.
6. Contents of each sign shall be limited to the name of the subdivision, name of contractors, logos, pricing information, telephone number, directional information, and directional arrow.
7. Each sign shall be a pole sign, and no streamers, banners, flags, or electronic display boards shall be permitted.
8. Each sign shall be removed within eighteen (18) months from the date of installation or within fourteen (14) days from the date the subdivision is sold out, whichever occurs first. A maximum of two (2) eighteen (18) month extensions may be authorized by the Director of the Kern County Planning Department.

B. On-site subdivision signs shall comply with the following standards:

1. The signs shall be located at the primary entrance to the subdivision or at the model homes.
2. Each sign shall not exceed ten (10) feet in height and shall not exceed thirty-two (32) square feet in area.

Section 279. Subsection 19.84.080.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. Permanent subdivision identification signs may be either attached to an entrance fence or structure or be a monument sign. The sign shall not exceed eight (8) feet in height or forty-eight (48) square feet in size and shall be located in a maintained landscaped area on a parcel within the subdivision at a primary entrance.

Section 280. Subsection 19.84.080.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. The design and materials of the sign shall be approved by the Planning Director.

Section 281. Subsection B of Section 19.84.080 remains unchanged.

Section 282. Subsection 19.84.130.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. Each sign shall not exceed one hundred (100) square feet in area.

Section 283. Subsection 19.84.130.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Freestanding signs shall not exceed eight (8) feet in height. Signs attached to buildings shall not extend above the roof line or parapet wall of the building.

Section 284. Subsection 19.84.130.G of the Ordinance Code of the County of Kern is hereby amended to read as follows:

G. Generally recognized and acceptable religious symbols that are freestanding or are attached to or part of a church (or attached to or part of a freestanding sign) may be exempted by the Planning Director from the provisions herein regarding height, area, and number of signs.

Section 285. Subsections A, C, D, and F of Section 19.84.130 remain unchanged.

Section 286. Subsection 19.84.170.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. Special signing required for drive-in windows for drive-in restaurants, banks, or similar businesses is permitted, provided the sign copy is necessary for information, instruction, or directions and specifically related to the special use subject to review and approval of the Planning Director who shall use discretion in approval of subject signs related to number, location, height, size, and design.

Section 287. Subsections A, B, C, and E of Section 19.84.170 remain unchanged.

Section 288. Section 19.86.020 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.86.020 LANDSCAPING STANDARDS — GENERALLY

Landscaping shall be provided in accordance with the minimum standards set out in Sections 19.86.030 through 19.86.060 of this chapter, except as may be modified in connection with the approval of a discretionary development permit. This chapter shall not apply to parcels with a net lot size of less than one-half (1/2) acre (twenty-one thousand, seven hundred and eighty (21,780) square feet), except where otherwise required through approval of a discretionary permit, except as otherwise authorized by the Planning Director, minimum plant and tree sizes are as follows:

Trees	15 gallon
Shrubs	5 gallon
Small shrubs and groundcovers	1 gallon

Section 289. Subsection 19.86.030.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. A minimum of ten percent (10%) of the total developed lot area shall be landscaped. A maximum of one-half (1/2) of the ten percent (10%) may be turf, excluding common useable open space areas pursuant to Subsection 19.80.020.O, or as otherwise authorized by the Director of the Kern County Planning Department.

Section 290. Subsections B, C, D, and E of Section 19.86.030 remain unchanged.

Section 291. Section 19.86.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.86.070 PLOT PLAN — REQUIRED

Where landscaping is required pursuant to this chapter, the plot plan submitted in conjunction with any building permit application shall show the areas to be landscaped, the type of landscaping proposed and amount, and shall state the proposed

method of irrigation. Where no building permits are required to establish a new use on any parcel for which landscaping is required, a plot plan showing this information shall be submitted to the Planning Director prior to commencement of said use.

Section 292. Section 19.86.080 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.86.080 PLOT PLAN — REVIEW AND APPROVAL

A. Where a discretionary or ministerial approval is required by this title for the use or uses for which the landscaping is being provided, a conceptual landscape plan showing the general location and type of proposed landscaping materials and hard surface areas shall be submitted in conjunction with the application for the discretionary or ministerial permit.

B. The Planning Director may "approve as submitted," "approve as conditioned," or "disapprove" the landscape plan. "Disapproved" plans will have to be resubmitted after the necessary corrections have been made. "Approved" plans will be distributed to the applicant, Building Inspection Division, and the file. The applicant shall landscape and install irrigation equipment in accordance with the approved plan. Any deviations from the approved plan shall require the approval of the Planning Director.

Section 293. Section 19.86.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.86.090 LANDSCAPING INSTALLATION - TIMING

Where landscaping is required by this chapter, no use shall commence nor occupancy permit issued (building finaled) until:

A. The landscaping and irrigation system has been completely installed; or

B. The property owner has posted an acceptable financial assurance (performance bond, certificate of deposit, or letter of credit) in an amount equal to one hundred and fifty percent (150%) of the estimated cost of installation of the required landscaping and irrigation system, in which case, the property owner shall have up to one (1) year from the date of occupancy or commencement of use to install the required landscaping and irrigation system. The estimated cost of installing the required landscaping and irrigation system shall be submitted in writing for approval by the Director of the Kern County Planning Department prior to the property owner obtaining the required financial assurance.

Section 294. Subsection 19.88.050.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Graded slopes shall be revegetated with a mixture of grass seed or shrubs as recommended by the Planning Director. Planting may be waived by the Planning Director for slopes that, due to the rock character of the material, will not support plant growth.

Section 295. Subsections A, B, C, and D of Section 19.88.050 remain unchanged.

Section 296. Subsection 19.88.070.F of the Ordinance Code of the County of Kern is hereby amended to read as follows:

F. Driveways and access roads serving residential projects of three (3) or more units shall be improved with a minimum of three (3) inches of road mix and shall tie to a paved road (under encroachment permit from the Kern County Transportation Management Department, where applicable). The paving requirement may be waived by the

Planning Director when site access is not obtained from a paved road and when the project is not part of a precise development (PD) plan or cluster (CL) development.

Section 297. Subsections A, B, C, D, E, and G of Section 19.88.070 remain unchanged.

Section 298. Subsection 19.90.050.G of the Ordinance Code of the County of Kern is hereby amended to read as follows:

G. Plot plan drawn at the scale specified by the Planning Director, including the following:
1. Property lines and lot dimensions
2. Location of all existing buildings and structures
3. Location of the proposed secondary residential unit
4. Location of all easements
5. Location of existing and proposed parking areas
6. North arrow

Section 299. Subsections A, B, C, D, E, F, H, and I of Section 19.90.050 remain unchanged.

Section 300. Subsection 19.92.040.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. A site development plan drawn at the scale specified by the Planning Director, which includes the following information:
1. Topography of the lot(s)
2. Proposed street system and parking area
3. Lot design
4. Location of buildings
5. Location of other proposed uses
6. Proposed setbacks
7. Areas to be reserved for parks, schools, or other public or quasi-public facilities
8. Proposed landscaping
9. Water supply and distribution
10. Sewage disposal system
11. Drainage system
12. North arrow

Section 301. Subsections A, B, C, D, and F of Section 19.92.040 remain unchanged.

Section 302. Section 19.92.060 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.92.060 PRELIMINARY REVIEW

Prior to submitting a formal application for a density bonus permit pursuant to this chapter or prior to submitting a formal application for a tentative map for conversion of apartments to a condominium project, an applicant shall submit to the Planning Director a preliminary proposal in writing for the residential project or condominium project. The Planning Director shall, within ninety (90) days of receipt of a written proposal, notify the applicant in writing of the procedures the applicant must follow to secure a density bonus provided for in this chapter.

Section 303. Subsection 19.94.040.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. Not more than twenty-five percent (25%) of the gross area of one (1) floor of a residence, or equivalent area in an enclosed detached accessory building, shall be used for such purpose.

Section 304. Subsections A, C, D, E, F, G, H, I, and J of Section 19.94.040 remain unchanged.

Section 305. Section 19.94.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.94.050 HOME OCCUPATION PERMIT — REQUIRED

No home occupation shall be established until an application for a home occupation permit has been submitted to and approved by the Planning Director as consistent with the requirements of this chapter in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title.

Section 306. Section 19.96.030 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.96.030 PERMIT REQUIRED

No large family day-care home shall be established until an application for a large family day-care home permit has been submitted to and approved by the Planning Director in accordance with the procedures set out in Section 19.96.050.

Section 307. Subsection 19.96.040.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Plot plan drawn at the scale specified by the Planning Director, which includes the following information:
   1. Existing and proposed buildings and structures
   2. Distance of all existing and proposed buildings and structures from property lines
   3. Outside play areas, including screening
   4. Off-street loading space
   5. North arrow

Section 308. Subsections A, B, C, D, F, G, and H of Section 19.96.040 remain unchanged.

Section 309. Section 19.96.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.96.050 PERMIT APPLICATION — REVIEW AND APPROVAL

A large family day-care home permit application shall be approved according to the procedures set out in Sections 19.102.040 through 19.102.060 of this title.

A. The applicant or other affected person may appeal the decision of the Planning Director according to the procedures set out in Section 19.102.060 of this title.

Section 310. Subsection 19.98.030.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. No well for use as an injection well and no well for the exploration for or development or production of oil or gas or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in the Light Industrial (M-1) or Recreation-Forestry (RF) Districts until an application for plot plan review has been submitted to and approved by the Planning Director as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. In approving an application for plot plan review, the Planning Director may waive any standards set out in Section 19.98.050 of this chapter if he/she determines that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity.

Section 311. Subsection B of Section 19.98.030 remains unchanged.

Section 312. Subsection 19.98.050.F of the Ordinance Code of the County of Kern is hereby amended to read as follows:

F. All derricks, boilers, and other drilling equipment employed pursuant to this section to drill any well hole or to repair, clean out, deepen, or redrill any completed or drilling well shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derricks, boilers, and drilling equipment are to be used within a reasonable time, as determined by the Planning Director, for the drilling of another well or wells on the premises.

Section 313. Subsection 19.98.050.G of the Ordinance Code of the County of Kern is hereby amended to read as follows:

G. Within ninety (90) days after any well has been placed in production, or after its abandonment, earthen sumps used in drilling or production or both (unless such sumps are to be used within a reasonable time as determined by the Planning Director for the drilling of another well or wells) shall be filled and the drilling site restored as nearly as practicable to a uniform grade. Temporary earthen sumps may be used for cleanout or remedial work on an existing well or other production facility. However, these sumps shall be filled and the site restored as nearly as practicable to uniform grade within ninety (90) days after the cleanout or other remedial work is completed. Such restoration work shall comply with all applicable regulations of the California Division of Oil and Gas.

Section 314. Subsection 19.98.050.H of the Ordinance Code of the County of Kern is hereby amended to read as follows:

H. Any derrick used for servicing operations shall be of the portable type, provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable type derrick will not properly service such well, the Planning Director may approve the use of a standard type of derrick.

Section 315. Subsection 19.98.050.N of the Ordinance Code of the County of Kern is hereby amended to read as follows:

N. After production begins and a pump is installed on the wellhead, a fence at least six (6) feet in height shall be installed around the pump site or drilling island for public safety. This fence shall be constructed of chain link with wood or metal slats or other screening fence as may be approved by the Planning Director. This fencing and screening requirement shall apply only to those pump sites located within five hundred (500) feet of any dwelling. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

Section 316. Subsections A, B, C, D, E, I, J, K, L, M, and O of Section 19.98.050 remain unchanged.

Section 317. Subsection 19.98.060.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. A plot plan or site development plan (in the case of a conditional use permit) drawn at the scale specified by the Planning Director, which includes the following information:
   1. Topography and proposed grading
   2. Location of all proposed well holes and related accessory equipment, structures, and facilities to

be installed and any abandoned wells if such are known to exist

3. Location of all existing dwellings and buildings used for other purposes, located within three hundred (300) feet of the proposed well holes, identification of the use of each structure, and distances between well holes and existing buildings
4. North arrow

Section 318. Subsections A, B, C, D, and F of Section 19.98.060.E remain unchanged.

Section 319. Subsection 19.100.030.I of the Ordinance Code of the County of Kern is hereby amended to read as follows:

I. Site development plan drawn at a scale specified by the Planning Director, which includes the following information:
   1. Property boundary lines and dimensions
   2. Areas proposed for development
   3. Location of proposed buildings and structures
   4. Parking and vehicle maneuvering areas
   5. Method of vehicular access
   6. Location of any existing or proposed roads, water lines or other pipelines, easements proposed or existing, and any existing buildings, structures, or major areas of use for the property being considered
   7. Height, type, and location of fencing
   8. Such additional information as may be deemed necessary to permit adequate consideration of the proposal

Section 320. Subsection 19.100.030.L of the Ordinance Code of the County of Kern is hereby amended to read as follows:

L. Reclamation plan including the following information:
   1. The anticipated quantity and type of minerals for which the surface mining operation is to be conducted
   2. The proposed dates for the initiation and termination of such operation
   3. The maximum anticipated depth of the surface mining operation
   4. The size and legal description of the lands that will be affected by such operation, a map that includes the boundaries and topographic details of such lands, a description of the general geology of the area, a detailed description of the geology of the area in which surface mining is to be conducted, the location of all streams, roads, railroads, and utility facilities within, or adjacent to, such lands, the location of all proposed access roads to be constructed in conducting such operation, and the names and addresses of the owners of all surface and mineral interests of such lands
   5. A description of and plan for the type of surface mining to be employed and a time schedule that will provide for the completion of surface mining on each segment of the mined lands so that reclamation can be initiated at the earliest possible time on those portions of the mined lands that will not be subject to further disturbance by the surface mining operation
   6. A description of the proposed use or potential uses of the land after reclamation and evidence that all owners of a possessory interest in the land have been notified of the proposed use or potential uses
   7. A description of the environmental setting of the site and the effect that possible alternate re-

claimed site conditions may have upon the existing and future uses of surrounding lands.

8. A description of how site reclamation may impact the public health and safety, giving consideration to the degree and type of present and probable future exposure of the public to the site.
9. A description of any areas to be mined to produce additional materials for backfilling and grading, as well as settlement of filled areas.
10. A description of the manner in which reclamation adequate for the proposed use or potential uses will be accomplished, including:
    a. A description of the manner in which contaminants will be controlled and mining waste will be disposed
    b. A description of the manner in which rehabilitation of affected stream bed channels and stream banks to a condition minimizing erosion and sedimentation will occur
    c. A description of existing wildlife habitat and a plan to ensure that habitat conditions which exist are maintained or improved in the course of reclamation, unless the proposed end use precludes its use as wildlife habitat
    d. A description of the manner in which backfilling, regrading, slope stabilization, scarification, ripping, and recontouring will occur
    e. A description of the manner in which topsoil will be salvaged and the manner in which the site will be revegetated
    f. A description of any existing topographical features that will be significantly altered as a result of mining activity
    g. A description of the manner in which existing site drainage patterns will be disturbed through mining activity and a description of drainage patterns that are expected after site reclamation
    h. A description of the manner in which all buildings, structures, and equipment will be removed, including any previously abandoned structures or equipment
    i. A description of the necessity for and the manner in which post reclamation monitoring will occur
11. A detailed line item cost breakdown estimating all reclamation costs, including, but not limited to:
    a. Costs of backfilling, regrading, slope stabilization, and recontouring
    b. Costs of revegetation and wildlife habitat replacement
    c. Costs of final engineering design
    d. Costs of labor, including supervision
    e. Costs of mobilization
    f. Costs of equipment
    g. Costs of removal of buildings, structures, and equipment
    h. Costs associated with reduction of specific hazards, such as: heap leaching facilities, chemical processing ponds, soil decontamination, in-water slopes, highwalls, landslides, subsidence, or other mass ground failure
    i. Costs of drainage and erosion control measures
    j. Costs of soil tests
    k. Costs of haul road ripping and reseeding
    l. Costs of fencing
    m. Costs of liability insurance
    n. Costs of long-term stabilization, control, containment of waste solids and liquids

12. A letter from the Kern County Public Works Department stating that the estimated costs of reclamation have been reviewed and found to be sufficient by that department
13. An assessment of the effect of implementation of the reclamation plan on future mining in the area
14. A statement that the person submitting the plan accepts the responsibility for reclaiming the mined lands in accordance with the reclamation plan
15. Any other information determined by the Planning Director or the State Mining and Geology Board to be necessary for consideration of the reclamation plan

Section 321. Subsections A, B, C, D, E, F, G, H, J, and K of Section 19.100.030 remain unchanged.

Section 322. Subsection 19.100.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. Surface mining operations shall comply with the requirements of the California Surface Mining and Reclamation Act, the State Policy for Surface Mining and Reclamation Practice, and any standards or procedures adopted by the Board of Supervisors to implement the act, state policy, or this chapter. In all cases, the following minimum development standards shall be observed:
1. The designed steepness and proposed treatment of the mined lands' final slope shall take into consideration the physical properties of the slope material, its probable maximum water content, landscaping requirements, and other factors. In all cases, the reclamation plan shall specify the critical gradient needed to maintain slope stability and shall specify slope angles flatter than the critical gradient for the type of material involved. Whenever final slopes approach the critical gradient for the type of material involved, an engineering analysis of the slope stability shall be performed and submitted as part of the reclamation plan.
2. Where ultimate site uses include roads, building sites, or other improvements sensitive to settlement, the reclamation plan shall provide for the compaction of fill materials in conformance with good engineering practice.
3. The removal of vegetation and overburden, if any, in advance of surface mining shall be kept to the minimum.
4. Stockpiles of overburden and minerals shall be managed to minimize water and wind erosion.
5. Settling ponds or basins shall be constructed to prevent potential sedimentation of streams at operations where they will provide a significant benefit to water quality.
6. Operations shall be conducted to substantially prevent siltation of groundwater recharge areas.
7. All reasonable measures shall be taken to protect the habitat of fish and wildlife.
8. Permanent piles or dumps of mine waste rock and overburden shall be stable and shall not restrict the natural drainage without suitable provisions for diversion.
9. Grading and revegetation shall be designed to minimize erosion and to convey surface runoff to natural drainage courses or interior basins designed for water storage. Basins that will store water during periods of surface runoff shall be designed to prevent erosion of spillways when these basins have outlet to lower ground.

10. When the reclamation plan calls for resoiling, course hard mine waste shall be leveled and covered with a layer of finer material or weathered waste. A soil layer shall then be placed on this prepared surface. Surface mines that did not salvage soil during their initial operations shall attempt, where feasible, to upgrade remaining materials. The use of soil conditioners, mulches, or imported topsoil shall be considered where revegetation is part of the reclamation plan or where such measures appear necessary as determined by the Planning Director or the Soil Conservation Service. It shall not be permissible to denude adjacent areas of their soil to achieve this purpose.
11. Revegetation methods and the selection of species shall be suitable for the topographical, resoiling characteristics, and climate of the mined areas and shall be reviewed and approved by the Soil Conservation Service.

Section 323. Subsections A and C of Section 19.100.040 remain unchanged.

Section 324. Section 19.100.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.100.050 MINOR PLAN MODIFICATIONS

The Planning Director may review and approve minor plan modifications to approved reclamation plans in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. Where the Planning Director determines that a proposed amendment constitutes a substantial deviation from the original plan, the proposed amendment shall be considered by the Board of Zoning Adjustment.

Section 325. Subsection 19.100.060.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. The Building Official shall make a report, not less often than quarterly, of the results of his inspections. The report shall be filed with the Board of Supervisors, and copies shall be furnished to the Planning Director. Copies of the report shall also be furnished to any officer of the County or State, or any interested person who has filed a written request.

Section 326. Subsections A and B of Section 19.100.060 remain unchanged.

Section 327. Section 19.100.065 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.100.065 IDLE MINES - INTERIM MANAGEMENT PLANS

A. Within ninety (90) days of a surface mining operation becoming idle, as defined in Section 2727.1 of the Surface Mining and Reclamation Act, the operator shall submit an interim management plan for review and approval by the Planning Director. The interim management plan shall be developed in accordance with all requirements of the Surface Mining and Reclamation Act and the State Mining and Geology Board.

Section 328. Subsection 19.100.110.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. The Board of Zoning Adjustment shall determine whether the posting of security is necessary to guarantee reclamation in accordance with any approved reclamation plan or amended reclamation plan, and, if so, shall fix the amount thereof, subject to the limitations provided in this section. In making any such determination, the

Board of Zoning Adjustment shall consider the recommendations of the Director of Engineering and Survey Services and the Planning Director.

Section 329. Subsections A, B, D, E, F, G, H, and I of Section 19.100.110 remain unchanged.

Section 330. Section 19.102.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.040 GENERAL REQUIREMENTS — PERMIT TYPES

The ministerial permits specified in this title for review pursuant to this article shall be issued by the Planning Director upon submission of an application containing the information specified in applicable sections of this title and a determination by the Planning Director that the proposed use or development meets the development standards and conditions specified in the applicable section or sections of this title. These permits include:

A. Temporary animal permits plot plan review (Sections 19.14.130 and 19.60.130 through 19.60.160)
B. Extensions for temporary mobilehomes and recreational vehicles (Sections 19.16.130 and 19.18.130)
C. Mobilehome park plot plan review (Sections 19.26.130 through 19.26.190)
D. Minor plan modifications (Sections 19.52.130 through 19.52.180, 19.56.130 through 19.56.200, 19.58.130 through 19.58.180, and 19.100.050)
E. Temporary use permits (Sections 19.56.130 through 19.56.200)
F. Wind generator plot plan review (Sections 19.64.130 through 19.64.150)
G. Geologic hazard plot plan review (Sections 19.68.130 through 19.68.150)
H. Architectural design plot plan review (Sections 19.74.130 through 19.74.160)
I. Airport approach height approval (Sections 19.76.130 and 19.76.140)
J. Special development standards plot plan review (Sections 19.80.040 through 19.80.070)
K. Off-street parking plot plan review not in conjunction with a ministerial permit (Sections 19.82.100 through 19.82.130)
L. Landscaping plot plan review not in conjunction with a ministerial permit (Sections 19.86.070 through 19.86.100)
M. Hillside development plot plan review (Sections 19.88.080 through 19.88.110)
N. Density bonus permit (Sections 19.92.030 through 19.92.060)
O. Home occupation permit (Sections 19.94.050 through 19.94.080)
P. Production water injection wells for the purpose of disposing of production wastewater produced in the same oilfield in which the injection well is located (Section 19.98.030)
Q. Oil and gas plot plan review (Section 19.98.030)
R. Large family day-care permit (Sections 19.96.030 through 19.96.060)
S. Temporary batch plant (thirty (30) days or less) plot plan review (Section 19.08.290)

Section 331. Section 19.102.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.050 APPLICATION — APPROVAL OR DENIAL

A. An applicant for a ministerial permit pursuant to this article shall submit an application to the Planning Director in the format and number of copies specified by the Planning Director. The application shall contain all the information specified for the application by the applicable section of this title, unless the Planning

Director waives any of the information requirements. The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title.

B. The Planning Director shall inform the applicant either verbally or in writing within seven (7) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

C. Within seven (7) calendar days of determining the application is complete, the Planning Director shall issue the permit if he/she determines that the proposed use or development standards meets the development standards and conditions specified in the applicable section or sections of this title or deny the permit if he/she determines that the proposed use or development does not meet the standards and conditions specified in the applicable section or sections of this title.

Section 332. Section 19.102.060 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.060 PERMIT DENIAL — APPEAL

If the Planning Director denies a permit pursuant to this article, the applicant may appeal such action to the Board of Zoning Adjustment.

A. The applicant may file with the Planning Director a notice of appeal to the action of the Planning Director indicating the basis of appeal within seven (7) calendar days of such action. The appeal shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title.

B. The Board of Zoning Adjustment shall consider the appeal within thirty (30) days of the filing of such appeal. No public hearing or notice shall be required.

C. The Board of Zoning Adjustment may reverse or affirm the action of the Planning Director. The action of the Board shall constitute a ministerial action and shall be based solely on whether or not the proposed use or development meets the development standards and conditions specified in or established pursuant to the applicable section or sections of this title.

D. The decision of the Board of Zoning Adjustment pursuant to Subsection C of this section may be appealed to the Board of Supervisors pursuant to Subsection A of Section 19.102.170 of this chapter.

Section 333. Section 19.102.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.070 GENERAL REQUIREMENTS — PERMIT TYPES

The discretionary permits specified in this title for review pursuant to this article may be issued by the Planning Director following submission of an application containing the information specified in the applicable section of this title and a properly noticed public hearing. These permits include:

A. Precise development plan review (Sections 19.56.130 through 19.56.200)

B. Cluster combining site development plan review (Sections 19.58.130 through 19.58.180)

C. Conditional use permits and variances when filed in conjunction with an application for a discretionary permit to be heard by the Planning Director (Chapters 19.106 and 19.108)

D. Zone modifications (Chapter 19.110)

E. Extensions of time

F. Variances (Chapter 19.106)

Section 334. Section 19.102.080 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.080 APPLICATION

A. An applicant for a discretionary permit pursuant to this article shall submit an application to the Planning Director in the format and number of copies specified by the Planning Director. The application shall contain all the information specified for the application by the applicable section of this title, unless the Planning Director waives any of the information requirements. The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title.

B. The Planning Director shall inform the applicant in writing within thirty (30) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

C. Upon acceptance of the application as complete and completion of an environmental document, if required, a public hearing shall be set in accordance with this chapter.

Section 335. Subsection 19.102.090.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. When an application has been accepted as complete in accordance with this chapter, the Planning Director shall set the application for a public hearing.

Section 336. Subsection 19.102.090.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Public Hearing. A public hearing shall be held before the Planning Director at a time and place in accordance with the public notice. The Planning Director may establish his/her own rules for the conduct of such hearings. Evidence shall be offered or presented, and the name and address of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess, the Planning Director or his/her designee shall announce the time and place to which the hearing will be continued. If it is determined to be in the public interest, the Planning Director may schedule a public hearing for any permit type specified in Section 19.102.070 directly before the Board of Supervisors, in which case a decision shall be rendered in accordance with Section 19.102.220.

Section 337. Subsection B of Section 19.102.090 remains unchanged.

Section 338. Section 19.102.100 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.100 DECISION

A. The Planning Director may approve, conditionally approve, or deny any application following the close of the public hearing on the matter. Such decision shall include findings in accordance with the provisions of this title. The decision shall be final, subject to appeal in accordance with Section 19.102.110 of this chapter.

B. Written notice of such decision shall be given by mail within seven (7) calendar days after the date of the decision to the applicant and any person filing a written request for notice of the decision.

C. The decision of the Planning Director shall be final on expiration of fourteen (14) calendar days from and including the date of decision, unless a notice of appeal is filed with the Planning Director within such time.

D. All conditions of approval shall be final, and a request to delete or to modify a condition to make it less restrictive shall only be considered at a properly

noticed public hearing, unless such conditions are appealed pursuant to Section 19.102.110 of this chapter.

Section 339. Section 19.102.110 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.110 APPEAL

A. Any decision of the Planning Director made pursuant to this article shall be subject to appeal to the Board of Supervisors.

B. The applicant or any other person aggrieved may appeal from such decision by filing a written notice of appeal with the Planning Director prior to the time the decision becomes final. The Planning Director shall furnish forms of notice of appeal. The appeal shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title.

C. Notice of the hearing on the appeal shall be given in the manner and time provided in Section 19.102.210 of this chapter.

D. The Board of Supervisors may reverse, affirm wholly or partly, modify, or attach other or additional conditions to the decision appealed from.

E. The decision of the Board of Supervisors on any such appeal shall be final on adoption of an order or resolution containing its determination, and no notice thereof need be given.

Section 340. Section 19.102.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.130 GENERAL REQUIREMENTS — PERMIT TYPES

The permits specified in this article may be issued by the Board of Zoning Adjustment following submission of an application containing the information specified in the applicable section of this title and a properly noticed public hearing. These permits include:

A. Conditional use permits (Chapter 19.104)

B. Zone modifications when filed in conjunction with an application for a permit to be heard by the Board of Zoning Adjustment (Chapter 19.110)

C. Surface mining permits and reclamation plans (Chapter 19.100)

D. Secondary residential unit (Chapters 19.90 and 19.104)

E. Density bonus permit, when filed in conjunction with an application for a permit to be heard by the Board of Zoning Adjustment (Sections 19.92.030 through 19.92.060)

Section 341. Section 19.102.140 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.140 APPLICATION

A. An applicant for a discretionary permit pursuant to this article shall submit an application to the Planning Director in the format and number of copies specified by the Planning Director. The application shall contain all the information specified for the application by the applicable section of this title, unless the Planning Director waives any of the information requirements. The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title.

B. The Planning Director shall inform the applicant in writing within thirty (30) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

C. Upon acceptance of the application as complete and completion of an environmental document, if required, a public hearing shall be set in accordance with this chapter.

D. The Board of Zoning Adjustment may waive public hearings on an application for conditional use permits and associated zone variances for public utility or public service uses or public buildings and facilities, when found to be necessary for reasons that affect the public health, safety, or welfare.

Section 342. Subsection 19.102.150.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. When an application has been submitted in accordance with this chapter, the Planning Director shall set the application for a public hearing.

Section 343. Subsection 19.102.150.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Public Hearing. A public hearing shall be held before the Board of Zoning Adjustment at a time and place in accordance with the public notice. The Board of Zoning Adjustment may establish its own rules for the conduct of such hearings. Evidence shall be offered or presented, and the name and address of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess, the presiding officer shall announce the time and place to which the hearing will be continued. If it is determined to be in the public interest, the Planning Director may schedule a public hearing for any permit type specified in Section 19.102.130 directly before the Board of Supervisors, in which case a decision shall be rendered in accordance with Section 19.102.220.

Section 344. Subsection B of Section 19.102.150 remains unchanged.

Section 345. Subsection 19.102.160.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. The decision of the Board of Zoning Adjustment shall be final on expiration of fourteen (14) calendar days from and including the date of the decision, as required by Subsection (C) of this section, unless a notice of appeal is filed with the Planning Director within such time.

Section 346. Subsections A, B, and D of Section 19.102.160 remain unchanged.

Section 347. Subsection 19.102.170.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. The applicant or any other person aggrieved may appeal from such decision by filing a written notice of appeal with the Planning Director prior to the time the decision becomes final. The Planning Director shall furnish forms of notice of appeal. The appeal shall be accompanied with the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title.

Section 348. Subsections A, C, D, and E of Section 19.102.170 remain unchanged.

Section 349. Subsection 19.102.190.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Appeals of discretionary decisions by the Planning Director (Subsection (A) of Section 19.102.110)

Section 350. Subsections A, B, C, D, F, G, H, I and J of Section 19.102.190 remain unchanged.

Section 351. Section 19.102.200 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.200 APPLICATION

A. An applicant for a discretionary permit pursuant to this article shall submit an application to the Planning Director in the format and number of copies specified by the Planning Director. The application shall contain all the information specified for the application by the applicable section of this title, unless the Planning Director waives any of the information requirements. The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title.

B. The Planning Director shall inform the applicant in writing within thirty (30) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

C. Upon acceptance of the application as complete and completion of an environmental document, if required, a public hearing shall be set in accordance with Section 19.102.210 of this chapter.

Section 352. Section 19.102.210 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.210 NOTICE AND HEARING

A. When an application has been submitted in accordance with Section 19.102.200 of this chapter, the Planning Director shall set the application for a public hearing.

B. At least ten (10) days before the date of any public hearing, the date, time, place of the hearing, identity of the hearing body, and the nature and location of the application shall be given by the following methods:

1. Publishing such notice once in a newspaper of general circulation.

2. Mailing or delivering notice, postage prepaid, to the property owner, the applicant, to each member of the Board of Supervisors, to the owners of all property within three hundred (300) feet of the exterior boundaries of the property which is subject of the application, and to any person who has filed a written request for such notice. For the purposes of this notice, property owners shall be the last known name and address of the property owner names on the last assessment roll of the County. If the number of owners to whom notice would be mailed or delivered pursuant to this paragraph is greater than one thousand (1,000), a display advertisement of at least one-eighth (1/8) page in at least one (1) newspaper of general circulation may be published at least ten (10) days prior to the hearing in lieu of mailed or delivered notice.

3. In lieu of the requirements set forth in Subparagraph (1) of this subsection, notice may also be given by posting notices not more than three hundred (300) feet apart along each street upon which the subject property abuts for a distance of not less than three hundred (300) feet in each direction from the exterior limits of the subject property.

4. The notification for appeals of discretionary decisions by the Planning Director shall be the same as required for that particular permit application as specified in Section 19.102.090

5. Notification requirements for items listed in Section 19.102.190 (J) shall be as required by the California Land Conservation Act of 1965.

C. Public Hearing. A public hearing shall be held before the Board of Supervisors at a time and place in accor-

dance with the public notice. The Board of Supervisors may establish rules for the conduct of such hearings. Evidence shall be offered or presented, and the name and address of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess, the presiding officer shall announce the time and place to which the hearing will be continued.

Section 353. Section 19.103.020 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.103.020 MINIMUM DEVELOPMENT SIZE

A development agreement may be authorized for any development containing a minimum of five (5) gross acres. The Planning Director may grant a waiver to the project size eligible for a development agreement if the Director determines that the consideration of the development agreement, in the particular case, is in the best interest of the County.

Section 354. Subsection 19.103.030.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. The Planning Director shall prescribe the form for each application, notice, and document provided for or required by these regulations for the preparation and implementation of development agreements.

Section 355. Subsections B, C, D, E, F, G, H, I, J, K, and L of Section 19.103.030 remain unchanged.

Section 356. Section 19.103.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.103.040 APPLICANT QUALIFICATIONS

Only a qualified applicant or his authorized agent may file an application pursuant to this chapter. A qualified applicant is a person who (which) has a legal or an equitable interest in the real property which is the subject of the development agreement. Such interest must be such that the applicant has or will have control of the use of the property during the proposed term of the agreement. The Planning Director may require an applicant to submit proof of his (its) interest in the real property and of the authority of the agent, if any, designated to act for the applicant. The Director may require an applicant or agent to submit a title report from a reputable title insurance company or other evidence to verify the legal or equitable interest of the applicant in the property. In the case of multiple ownerships, all owners with a legal or equitable interest in the real property shall be a party to the development agreement. In addition to the County and the applicant, any federal, State, or local governmental agency, or any nonprofit agency, may be included as a party to any development agreement.

Section 357. Section 19.103.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.103.050 REVIEW OF APPLICATION

A. The Planning Director shall review each application to determine whether it is complete and accurate. If the application is found to be incomplete or inaccurate, the Director shall reject the application and inform the applicant of the items necessary to properly complete the application. The Director shall reject any application where the development agreement would be inconsistent with the General Plan, any applicable Specific Plan, zoning, or any other land use regulations applicable to the subject property. If the application for a development agreement is submitted in conjunction with an application for other land use approvals, the proposed

development agreement shall be reviewed for consistency with the existing and, separately, the proposed land use approvals.

B. If the Planning Director determines that the application is complete and accurate, copies of the application shall be forwarded to each appropriate County department, applicable outside agency, and any agency or individual who requests, in writing, a copy of the application. The Director shall specify a time period for department, agency, and individual responses to the application to be submitted to the Director. Following review of said responses and after consultation where appropriate, the Director shall prepare a staff report and recommendation to the Board of Supervisors.

Section 358. Section 19.103.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.103.090 ANNUAL REVIEW

A. The Planning Director shall review the development agreement annually to ascertain the good faith compliance by the property owner with its terms.

B. The developer shall initiate the required annual review by submitting a written request at least sixty (60) days prior to the review date specified in the agreement. The property owner shall also provide evidence as determined necessary by the Planning Director to demonstrate good faith compliance with the provisions of the development agreement. The burden of proof by substantial evidence of compliance is upon the property owner.

C. If the Planning Director finds and determines on the basis of substantial evidence that the property owner has complied in good faith with the terms and conditions of the agreement during the period under review, the review for that period is concluded.

D. If the Planning Director finds and determines on the basis of substantial evidence that the property owner has not complied in good faith with the terms and conditions of the agreement during the period under review, the Director may recommend that the Board of Supervisors modify or terminate the agreement. The written decision of the Director recommending modification or termination of the agreement shall be delivered to the property owner not later than ten (10) days after the final action of the Director. The Director shall then set the matter for public hearing before the Board of Supervisors in the manner set forth in Section 19.103.060.

E. If as a result of an annual review it finds and determines, on the basis of substantial evidence, that the owner or successor in interest has not complied in good faith with the terms and conditions of the agreement, the Board of Supervisors may terminate or modify the agreement. The decision of the Board of Supervisors is final.

Section 359. Subsection 19.104.020.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. A site development plan drawn at the scale specified by the Planning Director, which includes the following information:
   1. Location of all existing buildings, structures, and improvements on the property
   2. Location of all proposed buildings, structures, and improvements on the property
   3. Existing and proposed streets and highways bordering and within the boundaries of the property
   4. Location of existing and proposed parking areas
   5. Proposed landscaping
   6. North arrow

Section 360. Subsections A, B, C, D, F, G, and H of Section 19.104.020 remain unchanged.

Section 361. Subsection 19.106.020.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Site development plan drawn at a scale specified by the Planning Director, which includes:
   1. Location of all existing buildings, structures, and improvements on the property
   2. Location of all proposed buildings, structures, and improvements on the property
   3. North arrow

Section 362. Subsections A, B, C, D, F, G, and H of Section 19.106.020 remain unchanged.

Section 363. Section 19.108.080 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.108.080 DETERMINATION OF NONCONFORMING STATUS

Where there is doubt regarding the legal nonconforming status of structures, uses of structures, uses of land, parcel size, or signs, documentation shall be submitted to the Planning Director to establish legal nonconforming status. The burden of proof in submitting adequate documentation for determination of legal nonconforming status shall rest entirely on the party making said request. The Planning Director shall grant legal nonconforming status only when the preponderance of information submitted clearly establishes the legality of the applicable use, structure, or parcel size. The determination of the Planning Director shall be final and no administrative appeal is provided for under this title.

Section 364. Subsection 19.110.020.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Site development plan drawn at the scale specified by the Planning Director, which includes the following information:
   1. Location of all existing buildings, structures, and improvements
   2. Location of all proposed buildings, structures, and improvements
   3. North arrow

Section 365. Subsections A, B, C, D, F, G, and H of Section 19.110.020 remain unchanged.

Section 366. Section 19.112.030 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.112.030 INITIATION BY AN INTERESTED PERSON

A property owner, his/her authorized representative, or any other interested person may initiate an amendment to the Official Zoning Maps to reclassify property from one (1) district to another by submitting an application to the Planning Director.

A. An application for a reclassification of property shall include:
   1. The name and address of the applicant
   2. The name(s) and address(es) of the property owner(s)
   3. Assessor's parcel number(s)
   4. Legal description of the property
   5. A map of the property
   6. Identification of the zoning district reclassification being sought
   7. Signatures or letter of consent from all property owners of record
   8. If the property is designated as a flood hazard area according to the Flood Insurance Rate Maps

(FIRM), the application shall include a request for the applicable flood hazard zoning, including legal descriptions for same, as required by the Planning Director.

B. The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 19.108.020 of this title.

C. The Planning Director shall inform the applicant in writing within thirty (30) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

Section 367. Section 19.114.065 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.114.065 NOTICE OF ZONING VIOLATION

Whenever the Director of the Engineering and Survey Services Department or his designee has knowledge of a violation of Title 19 of this code, he may cause a notice of intent to record a notice of violation to be mailed by certified mail to the then current owner of record of the property. The notice shall state that within thirty (30) days of the date of the notice, the owner may request a meeting with the Planning Director or his designee to present evidence that a violation does not exist. The notice shall further describe the property and violation in detail.

Following the sending of the notice of intent to record a notice of violation and prior to recording the notice, if it is determined that no violation exists, the Director of the Engineering and Survey Services Department or his designee shall mail a clearance letter by certified mail to the then owner(s) of record.

In the event that a meeting is not requested and the violation has not been corrected, or in the event that after consideration of evidence, it is determined by the Planning Director, or the Board of Supervisors upon appeal pursuant to the procedure specified by Section 19.102.110, that a Zoning Ordinance violation in fact exists, the Director of the Engineering and Survey Services Department may record, without fee, a notice of violation in the Office of the County Recorder.

Upon request, the Director of the Engineering and Survey Services Department or his designee shall issue the affected property owner a notice of expungement of violation upon correction of all violation(s) noticed hereunder.

Section 368. Section 19.114.100 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.114.100 RECOVERY OF COSTS

This section establishes procedures for the recovery of administrative costs incurred by the County in the enforcement process, for the abatement of conditions defined as a violation by Section 19.04.879 in cases where no permit is required pursuant to the provisions of this title to abate such violation. These procedures are used where a violation is abated in advance of initiation of the procedures specified by this chapter.

A. **Definition of Costs.** For the purpose of this chapter, costs shall mean administrative costs, including staff time expended and reasonably related to violation abatement cases where no permit is required, for items including, but not limited to, investigation, site inspection and monitoring, reports, telephone contacts, correspondence, photography labs, consultants, and meetings with affected parties.

B. **Cost Accounting and Recovery Required.** The enforcement personnel shall maintain records of all administrative costs incurred by responsible County departments associated with the enforcement process pursuant to this chapter and shall recover the costs from the property owner as provided by this section. Staff time shall be calculated at an hourly rate as established and revised from time to time by the Planning Director.

C. **Notice of Cost Recovery Requirements.** The enforcement personnel shall include in the notice of violation a statement of the intent of the County to charge the property owner for all administrative costs associated with enforcement, and of the owner's right to a hearing if he or she objects to such charges. The notice shall state that the property owner will receive, at the conclusion of the enforcement case, a summary of administrative costs associated with the processing of the enforcement case at the hourly rate in effect at the time the case is initiated. The notice shall state that the property owner will have the right to object to the charges by filing a request for hearing with the Planning Director within fourteen (14) days of service of the summary of charges, pursuant to Subsection D of this section.

D. **Summary of Costs.** At the conclusion of the enforcement case, the enforcement personnel shall send a summary of costs associated with enforcement to the property owner by certified mail. The summary shall include a notice which states that if the owner objects to the charges, a request for hearing must be filed as provided by Subsection E of this section, and that if no such hearing is requested, the owner's right to object will be waived, and he or she will be fully liable for the charges, to be recovered in a civil action in the name of the County, in any court of competent jurisdiction within the County.

E. **Hearing on Objection to Charges.** Any property owner who receives a summary of costs pursuant to Subsection D of this section shall have the right to a hearing before the Planning Director on his or her objections to the proposed costs, as follows:

1. **Request for Hearing.** A request for hearing shall be filed with the Planning Department within fourteen (14) days of the service by mail of the summary of costs, in the form of a letter setting forth the nature of the property owner's objections to the costs.
2. **Scheduling of Hearing.** Within thirty (30) days of the filing of the request for hearing, and on fourteen (14) days written notice to the owner, the Planning Director shall hold a hearing on the owner's objections and determine the validity thereof.
3. **Decision by the Planning Director.** In determining the validity of the costs, the Planning Director shall consider whether total costs are reasonable in the circumstances of the case. Factors to be considered include, but are not limited to, whether the present owner created the violation; whether there is a present ability to correct the violation; whether the owner moved promptly to correct the violation; the degree of cooperation provided by the owner; whether reasonable minds can differ as to whether a violation exists.
4. **Appeal.** The decision of the Planning Director may be appealed to the Board of Supervisors.

F. **Collection of Charges.** In the event that no request for hearing is filed pursuant to Subsection E of this section or after a hearing, the Planning Director affirms the validity of the costs, the property owner shall be liable to the County in the amount stated in the summary or any lesser amount as determined by the Director of the

Engineering and Survey Services Department. The County shall be reimbursed for all of said costs within thirty (30) days from the date of decision pursuant to Subsection E or, if no appeal is filed, within thirty (30) days from the mailing of the summary of costs pursuant to Subsection D. Payment may be received at the Planning Director. Delinquent fees shall be subject to a penalty of twenty-five percent (25%) of the total summary of costs. If payment is not received, such costs shall be recoverable in a civil action in the name of the County in any court of competent jurisdiction within the country.

SUMMARY OF ENACTED ORDINANCE G-6077

AMENDED ZONING ORDINANCE TEXT

NOTICE IS HEREBY GIVEN:

On the 11th day of April, 1994, at the hour of 2:00 p.m., in the Chambers of the Board of Supervisors, Kern County Administrative Center, 1115 Truxtun Avenue, Bakersfield, California, the Board of Supervisors of the County of Kern conducted a public hearing and adopted an ordinance revising the Kern County Zoning Ordinance text, including various minor changes throughout the ordinance. Zoning Ordinance text amendments include, but are not limited to, the addition of use categories to various zone district classifications, the addition and modification of pertinent definitions, changing the name of the department to the Kern County Planning Department, simplification of various procedures and other changes recommended by the Kern County Department of Planning and Development Services.

Pursuant to section 15061(b)(3) and section 15305 of the State CEQA Guidelines, the granting of the subject zone district changes is exempt from the requirements of the California Environmental Quality Act because it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, and the activity is categorically exempt.

The effective date of the ordinance adopted is:

Ayes: Ashburn, Austin, Larwood, Peterson

Noes: None

Absent: Shell

Dated: April 11 , 1994.

BOARD OF SUPERVISORS KERN COUNTY, CAL.

SUE DAVIS
Clerk of the Board of Supervisors

CORRECTED

ORDINANCE NO. G-6551

AN ORDINANCE OF THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN, STATE OF CALIFORNIA REPEALING CHAPTER 2.30 AND ADDING A NEW CHAPTER 2.30 AND REPEALING, ADDING, AND AMENDING VARIOUS SECTIONS OF TITLE 19 OF THE KERN COUNTY CODE (THE KERN COUNTY ZONING ORDINANCE)

The following ordinance, consisting of one hundred thirty-one (131) sections, was duly and regularly passed and adopted by the Board of Supervisors of the County of Kern, State of California, at a regular meeting of the Board of Supervisors held on the 23rd day of November, 1998, by the following vote, to wit:

AYES: McQuiston, Perez, Patrick, Peterson, Parra

NOES: None

ABSENT: None

Chairman of the Board of Supervisors of the County of Kern, State of California

(SEAL)

ATTEST:

DENISE PENNELL
Clerk of the Board of Supervisors

By _____, Deputy Clerk

THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN ORDAINS AS FOLLOWS:

Section 1. This ordinance shall take effect and be in full force on and after the 1st day of January, 1999, ~~1998,~~ and shall be published once in Bakersfield Californian, a newspaper of general circulation, published in the County of Kern, State of California, together with the names of the members of the Board of Supervisors voting for and against the same.

Book No. _____

CORRECTED Ord. No. G-6551

Section 2. Chapter 2.30 of the Kern County Code is hereby repealed, and a new Chapter 2.30 is hereby adopted, to read as follows:

Chapter 2.30
Planning Commission

Sections:

2.30.010 Members
2.30.020 Organization
2.30.030 Personnel
2.30.040 Compensation
2.30.050 Reimbursement of Travel Expenses

2.30.010 Members.

There is a Planning commission in the county. The Planning Commission shall consist of five (5) members, who shall be appointed by the Board of Supervisors and serve for a two year term, except that the first appointment nominated by the supervisors from the Second and the Third Supervisorial Districts shall each serve for a one year term, and thereafter nominees from those Districts shall serve for two year terms.

2.30.020 Organization.

Immediately upon the appointment of the members of the Planning Commission, or within a reasonable time thereafter, the members shall hold an organizational meeting in order to elect a chairman. The members of the Planning Commission shall also adopt such rules and regulations at they deem necessary and proper to conduct the business of the Planning Commission.

2.30.030 Personnel.

The director of the Planning Department shall furnish the Planning Commission with such clerical, administrative and other personnel deemed necessary in order to perform the duties of the Planning Commission. The Planning Director or his designated representative shall attend the meeting of the Planning Commission in the capacity of administrative advisor and executive secretary of the Commission.

2.30.040 Compensation.

Each member of the Planning Commission and the county counsel, or his designated deputy, shall receive compensation in the amount of sixty-five dollars ($65.00) for each meeting attended.

2.30.050 Reimbursement of Travel Expenses.

Members of the Planning Commission shall be reimbursed for expenses actually and necessarily incurred in travel to and from the place of meeting of the Commission and while traveling on the business of the Commission. Such travel expenses shall include the cost of transportation, meals, lodging, and other incidental items, and transportation by private

automobile pursuant to the rates and per diem expenses allowed county offices and employees on similar business.

Section 3. Sections 2.34.060, 2.34.070, 2.34.080, 2.34.090, 2.34.100, and 2.34.110 of the Kern County Code are hereby repealed.

Section 4. Section 19.04.084 of the Ordinance Code of the County of Kern is hereby repealed.

Section 5. Section 19.04.156 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.156 Conditional use.

"Conditional use" means a use permitted in a particular zoning district only upon showing that such use in a specified district will comply with all the conditions and standards for the location or operation of such use as specified in this title and authorized by the Planning Commission through the issuance of a conditional use permit.

Section 6. Section 19.04.159 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.159 Conditional use permit.

"Conditional use permit" means a permit issued by the Planning Commission or other decision-making authority stating that the conditional use meets all conditions set forth in this title and all others established by the Planning Commission or other decision-making authority.

Section 7. Section 19.04.198 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.198 Decision-making authority.

"Decision-making authority" means the Planning Director, Planning Commission, or Board of Supervisors, depending on which has been assigned the responsibility and authority for reviewing and approving a particular permit pursuant to Chapter 19.102 of this title.

Section 8. Section 19.04.394 is hereby added to the Ordinance Code of the County of Kern to read as follows:

19.04.394 Lot area, net.

"Net lot area" means the total area within the lot lines of a lot, excluding existing and future public roads, private and public access easements, utility easements with a width greater than five (5) feet, slope easements, drainage easements, floodways, public trails and similar easements, and conveyances resulting in areas on which development is prohibited or unsuitable, as determined by the Planning Director.

Section 9. Section 19.04.824 is hereby added to the Ordinance Code of the County of Kern to read as follows:

19.04.824 Temporary event.

"Temporary event" means a nonpublicly sponsored, organized event held on privately owned property involving more than one hundred (100) participants and spectators where such a use is not otherwise permitted by the applicable zoning district or when the event would not normally be considered an accessory use, as determined by the Planning Director.

Section 10. Section 19.04.566 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.04.565 Pigeons.

"Pigeon" means a bird which is classified as a member of the family Columbidae, and is limited to "racing pigeons," "fancy pigeons," and "sporting pigeons" as defined in this section.

"Racing Pigeon" means a pigeon which, through selective past breeding, has developed the distinctive physical and mental characteristics as to enable it to return to its home after having been released a considerable distance therefrom, and which is accepted as such by the American Racing Pigeon Union, Inc. or the International Federation of Racing Pigeon Fanciers. Also, commonly known as Racing Homer, Homing Pigeon, or Carrier Pigeon.

"Fancy Pigeon" means a pigeon which, through past breeding, has developed certain distinctive physical and performing characteristics as to be clearly identified and accepted as such by the National Pigeon Association, the American Pigeon Club, or the Rare Breeds Pigeon Club. Examples: Fantails, Pouters, Trumpeters.

"Sporting Pigeon" means a pigeon which, through selective past breeding, has developed the ability to fly in a distinctive manner, such as aerial acrobatics or endurance flying. Examples: Rollers, Tipplers.

Section 11. Section 19.04.566 is hereby added to the Ordinance Code of the County of Kern to read as follows:

19.04.566 Planning commission.

"Planning Commission" means the hearing and review body established pursuant to Chapter 2.30 of this code.

Section 12. Subsection 19.08.210.A and B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.210 Fences, walls, and hedges.

A. In the E (1/4), E (1/2), E (1), E (2 1/2), R-1, R-2, and R-3 Districts, no fence, wall, or hedge located in the rear or side yards shall exceed a height of six (6) feet, except when a higher fence, wall, or hedge is required as a condition of approval of a discretionary permit except when

approved by the Director in the manner contained in Subsection G of this section.

B. In the E (1/4), E (1/2), E (1), E (2 1/2), R-1, R-2, and R-3 Districts, no fence, wall, or hedge located in the required front yard shall exceed a height of four (4) feet, except when a higher fence, wall, or hedge is required as a condition of approval of a discretionary permit or except when approved by the Director in the manner contained in Subsection paragraph G of this section.

Section 13. Subsections C, D, E, F, and G of Section 19.08.210 remain unchanged.

Section 14. Section 19.08.230 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.230 Private oil pipelines and related facilities -- County Review.

The provisions of this title shall not be construed to apply to the construction, installation, operation, and maintenance of pipelines for the transmission of crude oil or natural gas operated by private enterprises; provided, however, before any right-of-way for transmission lines is acquired for regional or interstate facilities, the proposed route shall be submitted for the Planning Director review and recommendation.

Section 15. Section 19.08.340 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.08.340 Temporary events.

Temporary carnivals, circuses, or similar events not exceeding four (4) days during any calendar year may be permitted in any zone district with the prior written approval of the Planning Director. In conjunction with such an approval, the Director may impose reasonable conditions to safeguard public health and safety. If the Director determines that the nature or scope of the proposed event could have a significant adverse impact on surrounding properties, the Director may deny the issuance of a temporary event permit or require the processing of a conditional use permit following the procedures set forth in Chapter 19.104 (Conditional Use Permits). No permit issued for a temporary event shall ever ripen into the status of a permanent entitlement or legal, nonconforming use.

Section 16. Subsection 19.12.020.F of the Ordinance Code of the County of Kern is hereby amended to read as follows:

F. Miscellaneous uses:
- -- Accessory buildings, including cargo containers, if incidental and accessory to a permitted use
- -- Commercial coach, when incidental and accessory to a permitted use
- -- Day-care home, large family, pursuant to Chapter 19.96
- -- Day-care home, small family

-- Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map, or if accessory to a permitted use
-- Flood control facilities
-- Garage or yard sales pursuant to Subsection C of Section 19.12.130
-- Home occupation pursuant to Chapter 19.94
-- Hunting or fishing club, not involving structures
-- Liquid fuel storage tanks, above ground, for dispensing purposes
-- Water storage or groundwater recharge facilities
-- Water system, small or large
-- Wildlife or nature preserve;

Section 17. Subsections A, B, C, D, and E of Section 19.12.020 remain unchanged.

Section 18. Subsection 19.12.030.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. Residential uses:
-- Additional single-family dwellings, not to exceed a density of one (1) dwelling unit per twenty (20) acres, except for properties subject to a Williamson Act Land Use Contract requiring a minimum lot size of eighty (80) acres where the maximum permitted density shall be one (1) dwelling unit per eighty (80) acres
-- Community care facility
-- Farm labor housing for contract labor
-- Secondary residential unit, pursuant to Chapter 19.90 of this title;

Section 19. Subsection 19.12.030.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. Recreation, entertainment, and tourist facilities:
-- Bed and breakfast inn, pursuant to Section 19.12.130.D of this chapter
-- Equestrian establishment
-- Golf course and golf driving ranges
-- Guest ranch, when accessory to a commercial ranching operation
-- Lakes, private, for recreational skiing or boating
-- Park or playground
-- Racetrack or test track, automobile, bicycle, horse, or motorcycle
-- Recreational vehicle park
-- Retreat, church or nonprofit organization owned and operated

-- Shooting range or gun club, simulated war games, or similar activities, outdoor only
-- Thermal pools and hot springs
-- Trade fairs, exhibitions, and festivals, excluding flea markets and swap meets
-- Whitewater rafting launch or landing site;

Section 20. Subsection 19.12.030.K of the Ordinance Code of the County of Kern is hereby amended to read as follows:

K. Miscellaneous uses:
-- Construction staging and equipment storage, temporary, related to a specific construction project.
-- Corporate or administrative offices in conjunction with, and accessory to, a use permitted or conditionally permitted in this chapter
-- Drainage sump
-- Hunting or fishing club
-- Kennel or dog training facilities
-- Liquefied petroleum gas, bulk storage or distribution, in excess of two thousand (2,000) gallons capacity
-- Railroad caboose and similar accessory structures
-- Wild animal keeping;

Section 21. Subsections A, C, E, F, G, H, I, and J of Section 19.12.030 remain unchanged.

Section 22. Subsection 19.12.130.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Commercial poultry farms and dairies are permitted if all of the following criteria are satisfied:

1. No portion of the proposed site lies within two (2) miles of the City of Bakersfield or within one (1) mile of any other incorporated city.

2. The General Plan designation for the entire site is 8.1 or 8.3 and no portion of the site is designated 2.3 (Shallow Groundwater) or is located in a floodway.

3. There is no property zoned or designated by the General Plan or applicable Specific Plan for residential development (E or R-1, R-2, and R-3) within three (3) miles from the exterior boundary of the site.

4. There is no property designated 4.2 (Rural Community) within one (1) mile from the exterior boundary of the site and no property designated 4.3 (Specific Plan Required) within three (3) miles from the exterior boundary of the site.

5. There are no areas zoned or designated by the General Plan or applicable Specific Plan for commercial uses and no retail

commercial uses, including hotels and motels, within a one (1) mile radius from the exterior project boundary.

6. There are no residential facilities, community care facilities, hospitals, recreational vehicle parks, or public or private schools within a two (2) mile radius from the exterior project boundary.

7. The facility operator obtains all local, State, and federal approvals, licenses, and permits prior to the commencement of operations.

Section 23. Subsections A, B, C, D, F, and G of Section 19.12.130 remain unchanged.

Section 24. Subsection 19.14.030.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. Residential uses:

-- Additional single-family dwellings, not to exceed a density of one (1) dwelling unit per two and one-half (2 1/2) acres (net) and not to exceed the maximum density permitted by the applicable General or Specific Plan. A maximum of two (2) mobilehomes may be permitted on any one (1) lot, and one (1) of the mobilehomes shall be owner occupied
-- Community care facility
-- Farm labor housing for on-site farm employees
-- Manufactured home or mobilehome, pursuant to Section 19.14.130.G.6 of this chapter
-- Secondary residential unit pursuant to Chapter 19.90 of this title
-- Single-family dwelling, with a width of sixteen (16) feet or less;

Section 25. Subsection 19.14.030.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Recreation, entertainment, and tourist facilities:

-- Camps and campgrounds
-- Circus or carnival, temporary
-- Country club
-- Equestrian establishment
-- Fishing or fly casting pond
-- Golf course
-- Golf driving range
-- Lakes, private, for recreational skiing or boating
-- Park or playground
-- Racetrack or test track, automobile, bicycle, horse, or motorcycle
-- Recreational vehicle park
-- Trade fairs and exhibitions, temporary (fourteen- (14-) day maximum), excluding flea markets and swap meet;

Section 26. Subsections A, D, E, F, G, H, I, J, and K of Section 19.14.030 remain unchanged.

Section 27. Subsection 19.16.030.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. Agricultural uses:
- -- Birds, including doves, pigeons, and other small fowl in excess of twenty-five (25), raised for noncommercial purposes.
- -- Greenhouses for growing flowers and horticultural specialties for mail order of off-site sales;

Section 28. Subsection 19.16.030.B of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. Residential uses:
- -- Additional single-family dwellings, subject to the density limit set by Section 19.16.060 of this chapter, and not to exceed the maximum density permitted by the applicable General or Specific Plan
- -- Community care facility
- -- Manufactured home or mobilehome, pursuant to Section 19.16.130.E.6 of this chapter
- -- Rest home
- -- Retirement home
- -- Secondary residential unit pursuant to Chapter 19.90 of this title
- -- Single-family dwelling, with a width of sixteen (16) feet or less;

Section 29. Subsections C, D, E, F, G, H, I, J, K, and L of Section 19.16.030 remain unchanged.

Section 30. Subsection 19.18.030.A of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. Residential uses:
- -- Additional single-family dwellings, not to exceed a density of one (1) dwelling unit per four thousand three hundred and fifty-six (4,356) square feet (net) and not to exceed the maximum density permitted by the applicable General or Specific Plan. -- Veterinary, including veterinary hospital
-- Wedding chapel

Section 66. Subsection 19.38.020.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Industrial uses.

1. Industrial Manufacturing or Assembly:

-- Aircraft, assembly, when conducted wholly within a building
-- Auto/truck, assembly, when conducted wholly within a building
-- Batteries
-- Building material
-- Cabinet shop
-- Carpet and mattress
-- Ceramics
-- Clothing, garments, or shoes
-- Concrete blocks
-- Cosmetics, perfumes, or toiletries
-- Drugs and pharmaceuticals
-- Electronic equipment
-- Fiberglass or silicone products
-- Furniture
-- Ice
-- Mobilehome, modular home, or recreational vehicle
-- Musical instruments
-- Neon signs
-- Paint mixing, not employing a boiling process
-- Pallets, including repair
-- Paper or pulp
-- Plastics, assembly and extrusion
-- Prefabricated buildings and structures
-- Soap, cold mix only
-- Soil amendments, not involving liquid chemical blending or organic materials
-- Steel fabrication, excluding smelting
-- Textiles

-- Toy manufacturing and assembly
-- Trusses
-- Wind-driven electrical generators, manufacture or assembly

2. Industrial Storage:
   -- Automobile
   -- Bottled gas
   -- Cargo containers
   -- Chemical storage, when accessory to a permitted use
   -- Cold storage
   -- Contractor's storage yard
   -- Draying or freight
   -- Equipment and building materials
   -- Feed and wood yards
   -- Liquefied petroleum gas, bulk storage or distribution in excess of two thousand (2,000) gallons capacity, when located at least one-half (1/2) mile from property zoned or designated for residential use and at least one-half (1/2) mile from existing residential development with a density greater than one (1) dwelling unit per acre and at least one-half (1/2) mile from any motel or hotel
   -- Lumber
   -- Mineral and ore storage and loading, with product storage and loading facilities wholly enclosed
   -- Moving and storage
   -- Petroleum
   -- Recreational vehicle
   -- Recyclable materials, collection and storage, provided there is no more than three thousand (3,000) square feet of outside storage and all compression and bailing operations are conducted wholly within an enclosed structure
   Truck and heavy equipment
   -- Warehouse

3. Other Industrial Uses:
   -- Asphalt batch plant
   -- Assaying
   -- Bakery
   -- Beverage bottling works
   -- Billboard sign fabrication and storage
   -- Boat building and major repair
   -- Concrete batch plant
   -- Electroplating, when conducted wholly within an enclosed building
   -- Machine shop

-- Metal extrusion
-- Newspaper, magazine, or book printing
-- Oilfield service yard
-- Photographic processing plant or wholesale supply
-- Powder coating and spray painting, enclosed
-- Sandblasting, if incidental to another permitted use and conducted wholly within an enclosed building
-- Sheet metal shop
-- Tire retreading
-- Welding or blacksmith
-- Well drilling service
-- Wholesale distribution

Section 67. Subsection 19.38.020.I of the Ordinance Code of the County of Kern is hereby amended to read as follows:

I. Institutional uses:
-- Auditorium, public
-- Charitable or public service organization
-- Church
-- Fire or police station
-- Government office or building
-- Library
-- Museum
-- Public agency or public utility buildings and facilities

Section 68. Subsections A, B, C, F, G, H, J, and K of Section 19.38.020 remain unchanged.

M-2 (CUP) Section 69. Subsection 19.38.030.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Recreation, entertainment, and tourist facilities:
-- Card Room
-- Circus or carnival
-- Golf course
-- Racetrack or test track, automobile, bicycle, horse, or motorcycle
-- Shooting range or gun club
-- Trade fairs and exhibitions, temporary (fourteen- (14-) day maximum), excluding flea markets and swap meets

Section 70. Subsections A, B, D, E, F, G, H, I, J, and K of Section 19.38.030 remain unchanged.

Section 71. Section 19.38.060 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.38.060 Minimum lot area per dwelling unit.

There is no requirement for minimum lot area per dwelling unit in the M-2 District.

Section 72. Section 19.38.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.38.070 Yards and setbacks.

The following yard and setback requirements apply in the M-2 District:

A. Front Yard. The front-yard minimum setback for all buildings shall be as follows:

1. Forty (40) feet from the legal centerline of any existing or proposed public or private local street or access easements.

2. Forty-five (45) feet from the legal centerline of any existing or proposed secondary highway.

3. Fifty-five (55) feet from the legal centerline of any existing or proposed major highway.

B. Side Yard. None required.

C. Rear Yard. None required.

D. In no case shall the buildings be located in any existing or future right-of-way established by any Official or Specific Plan Line, street, access easement, or adopted Circulation Element of the applicable General or Specific Plan.

Section 73. Subsection 19.40.020.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. Commercial uses.

1. Offices:
   - -- Business or professional
   - -- Financial institution, including bank, savings and loan, or credit union
   - -- Real estate
   - -- Research and development

2. General Retail Sales:
   - -- Antiques
   - -- Appliances, including service and repair
   - -- Art gallery
   - -- Auto leasing
   - -- Auto, new
   - -- Auto parts and accessories
   - -- Auto tire, including service
   - -- Auto, used
   - -- Bicycle, including rental and service
   - -- Boat, including service and parts
   - -- Bookstore, general

-- Christmas tree, temporary
-- Clothing and apparel
-- Computer, including service and repair
-- Department store
-- Drugs and pharmaceuticals
-- Electric appliances, including service and repair
-- Electric equipment, including service and repair
-- Feed
-- Fireworks stand, temporary
-- Floor covering, drapery, or upholstery
-- Florist
-- Furniture
-- Gardening and landscaping supply
-- Gift and card
-- Gun, including repair
-- Hardware, general
-- Hobby supplies
-- Home or office furnishings
-- Ice vending machine
-- Jewelry and watches
-- Lapidary
-- Lawnmower, including repair
-- Leather goods and luggage
-- Locksmith or key and lock shop
-- Military surplus
-- Mobilehomes, including rental and service
-- Motorcycles, including rental and repair
-- Musical instruments, including repair
-- Newspaper or magazine stand
-- Nursery, plant
-- Office machines and equipment
-- Paint and wallpaper
-- Pawn shop
-- Pet store
-- Photographic supply or camera
-- Plumbing supply
-- Pottery
-- Recreational vehicles, including service
-- Shoes
-- Sporting goods and athletic equipment
-- Stationery and office supply
-- Tobacco
-- Toys
-- Truck, includes rental
-- Used clothing and household goods
-- Variety
-- Video and audio tape sales and rentals

3. Food and Beverage Retail Sales:

-- Bakery
-- Convenience market
-- Drive-in food market or dairy
-- Farmers' market
-- Food store
-- Liquor store
-- Specialized, including meat, vegetables, health foods, or candy

4. Eating and Drinking Establishments:
   -- Bars, taverns, or cocktail lounges
   -- Ice cream parlor
   -- Restaurant, cafe, or coffee shop
   -- Restaurant, fast-food

5. Services:
   -- Ambulance
   -- Artist studio
   -- Auto body repair and painting
   -- Auto rental
   -- Auto service/repair
   -- Auto service station
   -- Auto tire repair
   -- Auto towing
   -- Auto wash
   -- Auto wash, self-service
   -- Barber or beauty shop
   -- Bath house, including sauna, spa, turkish, steam, or tanning
   -- Carpet cleaning
   -- Catering
   -- Clinic, medical or physical therapy, out-patient only
   -- Equipment, heavy, or truck or trailer rental
   -- Equipment, small, rental
   -- Furniture cleaning, refinishing, or upholstery
   -- Gardening and landscaping
   -- Interior decorator
   -- Janitorial service
   -- Laboratory, medical, dental, optical, or biological
   -- Laboratory, testing, classifying, or experimental, not involving the use of explosives
   -- Laundromat, self-service
   -- Laundry, dry cleaning, pressing, and dyeing
   -- Mini-warehouse
   -- Mortuary or funeral parlor
   -- Packaging and mailing services
   -- Pest control, administrative offices only
   -- Pet grooming
   -- Photography studio

-- Picture framing
-- Printing, lithography, or blueprinting
-- Shoe repair
-- Shoe-shine stand
-- Tailor or dressmaker
-- Tanning salon
-- Taxidermist
-- Telegraph
-- Ticket agency
-- Travel agency
-- Truck fueling station
-- Truck service and repair
-- Veterinary, including veterinary hospital
-- Wedding chapel

Section 74. Subsection 19.40.020.E of the Ordinance Code of the County of Kern is hereby amended to read as follows:

E. Industrial uses.

1. Industrial Manufacturing or Assembly

-- Acetylene or other gas
-- Acids
-- Aircraft, assembly
-- Ammonia or chlorine
-- Asphalt
-- Automobile or truck assembly
-- Bag cleaning
-- Batteries
-- Blast furnace or smelting
-- Boiler works
-- Brick, tile, or terra cotta products
-- Building materials
-- Cabinet shop
-- Candle
-- Carbon
-- Carpet and mattress
-- Celluloid or pyroxylin
-- Cement
-- Ceramics
-- Chemical blending or manufacturing
-- Clothing, garments, or shoes
-- Coal, wood, or tar distillation
-- Coke ovens
-- Concrete blocks
-- Cosmetics, perfumes, or toiletries
-- Creosote
-- Detergent
-- Disinfectant

-- Drugs and pharmaceuticals
-- Electronic appliance
-- Electronic equipment
-- Fertilizer
-- Fiberglass or silicone products
-- Furniture
-- Glass
-- Glue
-- Ice
-- Iron, steel, or other metals
-- Linoleum or oiled products
-- Machinery
-- Metal, glass, or paper recycling facility
-- Mobilehome, modular home, or recreational vehicle
-- Musical instruments
-- Neon signs
-- Oil refining
-- Ore reduction
-- Paint, shellac, turpentine, or similar products
-- Paint mixing
-- Pallets, including repair
-- Paper or pulp
-- Plastic
-- Potash
-- Prefabricated buildings and structures
-- Rolling mill
-- Rubber
-- Saw mills
-- Smelting
-- Soap
-- Sodium compounds
-- Soil amendments, not involving organic materials
-- Starch
-- Steel fabrication
-- Stove or shoe polish
-- Tar products
-- Textiles
-- Tobacco processing
-- Toy manufacturing and assembly
-- Trusses
-- Wind-driven electrical generators, manufacture or assembly

2. Industrial Storage:
   -- Automobile
   -- Bottled gas
   -- Cargo containers
   -- Chemical storage

- -- Cold storage
- -- Contractor's storage yard
- -- Draying or freight
- -- Equipment and building materials
- -- Feed and wood yards
- -- Liquefied petroleum gas, bulk storage or distribution in excess of two thousand (2,000) gallons capacity, when located at least one-half (1/2) mile from property zoned or designated for residential use and at least one-half (1/2) mile from existing residential development with a density greater than one (1) dwelling unit per acre and at least one-half (1/2) mile from any motel or hotel
- -- Log storage
- -- Lumber
- -- Mineral and ore storage and loading, with product storage and loading facilities wholly enclosed
- -- Moving and storage
- -- Petroleum
- -- Recreational vehicle
- -- Recyclable materials, collection and storage
- -- Truck and heavy equipment
- -- Warehouse

3. Other Industrial Uses:
   - -- Asphaltic batch plant
   - -- Assaying
   - -- Bakery
   - -- Beverage bottling works
   - -- Billboard sign fabrication and storage
   - -- Boat building and major repair
   - -- Concrete batch plant
   - -- Electroplating
   - -- Machine shop
   - -- Metal extrusion
   - -- Newspaper, magazine, or book printing
   - -- Oilfield service yard
   - -- Photographic processing plant or wholesale supply
   - -- Powder coating and spray painting, enclosed
   - -- Sandblasting, if incidental to another permitted use and conducted wholly within an enclosed building
   - -- Sheet metal shop
   - -- Tire retreading or recycling
   - -- Welding or blacksmith
   - -- Well drilling service

-- Wholesale distribution

Section 75. Subsections A, B, C, F, G, H, I, J, K, and L of Section 19.40.020 remain unchanged.

Section 76. Subsection 19.40.030.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Recreation, entertainment, and tourist facilities:
-- Card Room
-- Circus or carnival
-- Golf course
-- Racetrack or test track, automobile, bicycle, horse, or motorcycle
-- Shooting range or gun club
-- Trade fairs and exhibitions, temporary (fourteen- (14-) day maximum), excluding flea markets and swap meets

Section 77. Subsections A, B, D, E, F, G, H, I, J, and K of Section 19.40.030 remain unchanged.

Section 78. Section 19.40.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.40.070 Yards and setbacks.

The following yard and setback requirements apply in the M-3 District:

A. Front Yard. The front-yard minimum setback for all buildings shall be as follows:

1. Forty (40) feet from the legal centerline of any existing or proposed public or private local street.

2. Forty-five (45) feet from the legal centerline of any existing or proposed secondary highway.

3. Fifty-five (55) feet from the legal centerline of any existing or proposed major highway.

B. Side Yard. None required.

C. Rear Yard. None required.

D. In no case shall the buildings be located in any existing or future right-of-way established by any Official or Specific Plan Line, street, access easement, or adopted Circulation Element of the applicable General or Specific Plan.

Section 79. Subsection 19.42.030.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Recreation, entertainment, and tourist facilities:
-- Bed and breakfast inn
-- Camp, private
-- Campground

-- Community recreational facilities
-- Equestrian establishments
-- Golf course
-- Golf driving range
-- Lakes, private, for recreational skiing or boating
-- Lodge
-- Marina, public
-- Racetrack or test track, automobile, bicycle, horse, or motorcycle
-- Recreational vehicle park
-- Recreational vehicle, travel trailer, and boat storage
-- Retreat, church or nonprofit organization owned and operated
-- Shooting range, gun club, simulated war games, or similar activities
-- Thermal pools and hot springs
-- Trade fairs and exhibitions, temporary (fourteen- (14-) day maximum), excluding flea markets and swap meets
-- Whitewater rafting launch or landing site

Section 80. Subsections A, B, D, E, F, G, H, I, J, and K of Section 19.42.030 remain unchanged.

Section 81. Section 19.42.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.42.070 Yards and setbacks.

Yard and setback requirements in the RF District are as follows:

A. Front Yard. The front-yard minimum setback for all buildings shall be as follows:

1. Fifty-five (55) feet from the legal centerline of any existing or proposed local street or access easement.

2. Seventy (70) feet from the legal centerline of any existing or proposed secondary highway.

3. Eighty (80) feet from the legal centerline of any existing or proposed major highway.

In no case shall the front-yard minimum setback be less than twenty-five (25) feet from the right-of-way established by any Official or Specific Plan Line, street or access easement.

B. Side Yard. There shall be a side yard on each side of any building of not less than ten (10) feet.

C. Rear Yard. There shall be a rear yard of not less than five (5) feet.

D. In no case shall the buildings be located in any existing or future right-of-way established by any Official or Specific Plan Line, street, access easement, or adopted Circulation Element of the applicable General or Specific Plan.

Section 82. Subsection 19.46.020.F of the Ordinance Code of the County of Kern is hereby amended to read as follows:

F. Miscellaneous uses:
- -- Commercial coach, when incidental to a permitted use
- -- Drainage sump, if proposed and approved as part of a tentative subdivision map or tentative parcel map, or if accessory to a permitted use
- -- Garage or yard sales pursuant to Subsection A of Section 19.46.130 of this chapter
- -- Hunting or fishing club, not involving buildings or structures
- -- Water storage or groundwater recharge facilities
- -- Water system, small or large
- -- Wildlife or nature preserve

Section 83. Subsections A, B, C, D, and E of Section 19.46.020 remain unchanged.

Section 84. Subsection 19.46.030.D of the Ordinance Code of the County of Kern is hereby amended to read as follows:

D. Industrial uses:
1. Industrial Manufacturing or Assembly
   - -- Brick manufacturing
   - -- Cement
   - -- Concrete block manufacturing
   - -- Oil refining
   - -- Mining products milling
   - -- Powder coating, spray painting, and sandblasting
2. Industrial Storage:
   - -- Liquefied petroleum gas, bulk storage or distribution, in excess of two thousand (2,000) gallons capacity
   - -- Truck and heavy equipment parking and storage

Section 85. Subsections A, B, C, E, F, G, H, I, J, and K of Section 19.46.030 remain unchanged.

Section 86. Section 19.46.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.46.070 Yards and setbacks.

The following yard and setback requirements apply in the NR District:

A. Front Yard. The front-yard minimum setback for all buildings shall be as follows:

1. Fifty-five (55) feet from the legal centerline of any existing or proposed public or private local street or access easements.

2. Seventy (70) feet from the legal centerline of any existing or proposed secondary highway.

3. Eighty (80) feet from the legal centerline of any existing or proposed major highway.

In no case shall the minimum front-yard setback be less than twenty-five (25) feet from the right-of-way established by any Official or Specific Plan Line, street, or access easement.

B. Side Yard. There shall be a side yard on each side of any building of not less than five (5) feet, except that on the street side of corner lots, buildings shall have a side yard of not less than ten (10) feet from the right-of-way of any local street, existing or proposed secondary or major highway, or the right-of-way established by any Official or Specific Plan Line.

C. Rear Yard. There shall be a rear yard of not less than five (5) feet, except that in the case of through lots, the designated rear yard shall be in accordance with the front-yard setback requirements.

D. In no case shall the buildings be located in any existing or future right-of-way established by any Official or Specific Plan Line, street, access easement, or adopted Circulation Element of the applicable General or Specific Plan.

Section 87. Section 19.56.180 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.56.180 Temporary uses.

Notwithstanding Sections 19.56.140 through 19.56.150 of this chapter, when a PD District has been established and is in effect, the Planning Director is authorized to approve a temporary use of the property consistent with the uses authorized by the base district within which the PD District is combined, but involving no permanent buildings or structures, if the Planning Director determines that such temporary use would not be detrimental to the public health, safety, and welfare, subject to the following conditions:

A. The applicant shall submit an application for a PD site development plan review.

B. Authorization for a temporary use shall be evidenced by a temporary precise development plan approved by the Planning Director in accordance with the procedures set out in Sections 19.102.080 through 19.102.110 of this title.

C. The Planning Director may impose reasonable conditions to ensure that the temporary use will not be detrimental to the public health, safety, and welfare.

D. Such temporary precise development plan may be revoked by the Planning Director at any time, if, in the exercise of his/her reasonable discretion, he/she determines that continued temporary use of such property without the safeguards provided by an approved PD site development plan would be detrimental to the public health, safety, and welfare.

E. No temporary use authorized by a temporary precise development plan shall ever ripen into the status of a permanent right or legal nonconforming use.

F. Upon approval of a precise development plan authorizing the permanent use of the property or upon expiration of the temporary precise development plan, the temporary precise development plan shall become null and void and the premises shall be completely vacated and restored to its original condition, except as otherwise authorized by a precise development plan approved for the permanent use of the property.

Section 88. Section 19.58.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.58.130 Site development plan review -- Required.

No use shall be established, no development shall occur, and no building or grading permit shall be issued for any use or development in the CL District until an application for site development plan review has been submitted to and approved by the Planning Director in accordance with the procedures set out in Sections 19.102.070 through 19.102.120 of this title, the Planning Commission in accordance with the procedures set out in Sections 19.102.130 through 19.102.170 or this, or submitted to and approved by the Board of Supervisors in accordance with the procedures set out in Sections 19.102.190 through 19.102.230 of this title when submitted in conjunction with an application for a change of zone classification.

Section 89. Subsection 19.82.020 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

G. Institutional Uses:

1. Auditorium: One (1) per three and one-half (3 1/2) seats,

2. Cemetery: One (1) per three and one-half (3 1/2) seats in the chapel plus one (1) per two hundred and fifty (250) square feet of office space,

3. Church or auditorium: One (1) per three and one-half (3 1/2) seats,

4. Community care facilities and rehabilitation facilities: One (1) per three (3) beds, plus one (1) for each full-time employee on the shift with the largest number of employees,

5. Convalescent hospital or sanitarium: One (1) per four (4) patient beds,

6. Hospital: One (1) per two (2) patient beds,

7. Library or museum: One (1) per five hundred (500) square feet of public use area,

8. Meeting halls and other places of public assembly where no fixed seating is provided: One (1) per forty (40) square feet of gross floor area.

Section 90. Subsections A, B, C, D, E, F, H, I, J, K, L, M, and N of Section 19.82.020 remain unchanged.

Section 91. Subsection 19.84.070.C is hereby added to the Ordinance Code of the County of Kern to read as follows:

C. In addition to the above-stated entitlements to temporary subdivision signs, the following additional provisions for all that unincorporated area included within the boundaries of the Metropolitan Bakersfield 2010 General Plan shall apply pertaining to the establishment of kiosks to provide off-site directional information pertaining to residential subdivision identification:

1. Requirements for directional kiosks.

a. Kiosks shall be permitted in all zone districts except in the FPP (Floodplain Primary) District and except on a lot developed with a single-family residence. They may be permitted on private land or public right-of-way that is maintained by the property owner provided the property owner's permission has been granted in writing. Signs may also be permitted within the public right-of-way or parkway that is maintained by the County or the County's contractee, subject to approval and issuance of an encroachment permit by the Kern County Roads Department. Any such sign installed within a public road right-of-way shall be installed a minimum of ten (10) feet from the existing edge of pavement (or flowline) except as otherwise authorized by the Kern County Roads Department Director. If the Kern County Roads Department Director subsequently determines that the sign constitutes a safety hazard or must be removed to accommodate road widening, the permittee shall remove the sign within thirty (30) days of a written request to do so at no cost to the County;

b. Kiosks shall be constructed of wood or similar product with individual panels provided for placement of subdivision or project names and direction;

c. Kiosk locations shall be approved by the Planning Director or appointed designee. A kiosk shall not be placed closer than one thousand (1,000) feet from an existing kiosk or approved site where a kiosk is to be constructed. The Planning Director or appointed designee may reduce the distance between kiosks where:

i. Kiosks are located at different corners of an intersection and face different directions,

ii. The street intersection where the kiosk is proposed is less than one thousand (1,000) feet away from a street intersection that contains a kiosk and it is necessary to provide direction to subdivisions or projects to which that street provides the most direct or only access,

iii. Kiosks (two (2) maximum) are necessary to be placed adjacent to one another because the number of subdivisions or projects that are being identified exceeds the number of panels allowed on one kiosk;

d. Architectural design, color, letter style, and any other design elements of the kiosk shall be consistent with the standards shown in Figure 19.84.070.C;

e. Kiosks shall not exceed a height of twelve (12) feet and a width of six (6) feet. An individual panel shall be limited to a maximum width of six (6) feet and a height of ten (10) inches. No more than eight (8) individual name panels shall be permitted on a kiosk;

f. Kiosks may have more than one (1) face. Multiple faces are encouraged where the kiosk can be sited to serve traffic traveling in opposite directions, or where it would reduce the amount of kiosks needed to provide adequate direction to residential subdivisions. Multiple-faced kiosks shall be approved by the Planning Director or appointed designee;

g. A name panel shall be limited to a single line of text that may contain only the subdivision, project, builder or developer's name, or combination thereof. All panels shall include a direction arrow pointing in the direction of the identified project. Mileage to the specific subdivision or project may be also provided under the direction arrow. Name panels shall conform to all design elements as approved pursuant to Subsection C.1.d.;

h. Tag signs, streamers, banners, balloons, devices, display boards, or other appurtenances shall not be added, placed upon, or erected adjacent to or within a radius of one hundred (100) feet of any existing kiosk;

i. Kiosks shall not be illuminated nor shall they emit any kind of radio or microwave signal;

j. Kiosks shall not obstruct the use of sidewalks, walkways, bicycle, or hiking trails and shall not obstruct the free and clear vision of motor vehicle operators, cyclists, pedestrians, or the visibility of traffic control signs and lights as determined by the Kern County Roads Department Director;

k. Kiosks shall be set back a minimum of twenty-five (25) feet from side and rear property lines. No setback shall be required from street frontages or those kiosks located within public rights-of-way, except as otherwise specified pursuant to Subsection C.1.a.;

2. Permits:

a. Any sign company or developer of a new recorded residential subdivision which contains approved lots or homes which have never been sold, may apply for a permit to install a kiosk to provide direction to their subdivision. The individual named as the permittee shall be held legally responsible for compliance with the terms of this section (19.84.070.C);

b. Applications for kiosk shall be made on forms provided by the Planning Director or appointed designee, be signed under penalty or perjury by the applicant, and shall require a minimum, the following information:

i. The name, mailing address, title, and telephone number of the property owner, subdivider, and developer/builder of the specific development,

ii. The name, mailing address, title, and telephone number of the permittee,

iii. The name and location of the specific development,

iv. A plot plan showing the exact location of the proposed sign structure,

v. A statement that the development contains approved lots or new homes which have not yet been sold,

vi. If the permit is for the construction of a sign structure within a public road right-of-way, an encroachment permit issued by the Kern County Roads Department;

c. The Planning Director or appointed designee may issue a permit if:

i. The application is complete and truthful,

ii. The applicant is the person or entity selling new lots or new homes,

iii. The development is located entirely within the Metropolitan Bakersfield 2010 General Plan area,

iv. The kiosk and panels meet all of the design criteria within this section,

v. The location criteria of this section has been satisfied,

vi. Appropriate fees have been paid;

d. The installation of panels shall be administered by the permittee. If a dispute arises over the installation of a sign panel, the Planning Director shall make the decision concerning the installation of that panel. The decision of the Planning Director shall be final;

3. Program administration:

a. Sign structures permitted under this section (19.84.070.C) shall be continuously maintained in good condition by the permittee. Upon approval by the County, sign maintenance may be assumed by a responsible party other than the permittee;

b. Kiosks shall be sited based on demand and where they will provide the best direction to residential subdivisions where homes/lots are being sold;

c. Sign panels shall be available to all developments selling new homes on a first-come-first-serve basis, beginning with the highest panel on the kiosk and progressing downward on the kiosk with each subsequent name. Waiting lists shall be established for each kiosk (existing or proposed) for new name panels on a first-come-first-serve basis of applications that have met the requirements of Subsection C.2.c.;

d. When a panel name is changed or a panel is removed from a kiosk, all lower panels shall be moved upwards so that any new panel is placed on the bottom of the kiosk;

e. All panel changes shall be the responsibility of the permittee;

f. A specific subdivision is limited to one (1) panel for each kiosk. Multiple panels shall not be combined to identify or provide information regarding the same specific subdivision. There shall be no limit on the number of kiosks a specific project may be identified on provided the

kiosk is within a five mile radius of the exterior boundaries of the subdivision to be identified;

g. Within ten (10) days after selling the last lot or home or within two (2) years after recordation of the final map for the subdivision of which the project is located, whichever occurs first, panel signs that identify said project shall be removed from all kiosks. Two (2) extensions of time may be granted by the Planning Director not to exceed one (1) year for each request if the extension is needed to complete any sales in that project;

h. Any kiosk sign structure shall be completely removed by the permittee whenever any of the following occur:

i. A period of five (5) years has elapsed since original permit approval,

ii. There have been no new residential subdivisions recorded in the last three (3) years within a two- (2-) mile radius of the sign structure,

iii. The permittee has been notified by the Kern County Roads Department Director to remove the sign on the basis of public safety or necessity,

i. For any kiosk sign structure erected within a County road right-of-way, a performance bond in an amount sufficient to remove the structure shall be approved by and posted with the Kern County Roads Department;

4. Violations and abatement:

a. Any permit issued pursuant to this section shall be immediately revoked by the Planning Director if it has been found that the permit holder has erected and maintained any sign in violation of this section. Any affected kiosk sign structure or panel shall be completely removed within thirty (30) days upon written notification by the Planning Director or the Roads Department Director to do so;

b. Any order of the Planning Director or Roads Department Director shall be made in writing, addressed to the permit holder, and shall set forth the findings for revoking any permits and the method to appeal the decision. If no appeal is filed, the decision of the Planning Director or the Roads Department Director shall be final and conclusive;

5. Appeal:

a. Any decision of the Planning Director or Roads Department Director to deny or revoke a permit pursuant to this section (19.84.040.C) shall be subject to appeal by the permittee to the Kern County Planning Commission;

b. The applicant may file with the Planning Director a notice of appeal to the action of the Planning Director indicating the basis of appeal within seven (7) calendar days of such action. The appeal shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title;

c. The Planning Commission shall consider the appeal within thirty (30) days of the filing of such appeal. No public hearing or notice shall be required;

d. The Planning Commission may reverse or affirm the action of the Planning Director. The action of the Planning Commission shall constitute a ministerial action and shall be based solely on whether or not the proposed use or development meets the development standards and conditions specified in or established pursuant to the applicable section or sections of this title;

e. The decision of the Planning Commission pursuant to this section may be appealed to the Board of Supervisors pursuant to Subsection A of Section 19.102.170 of this chapter.

Section 92. Subsections A and B of Section 19.84.070 remain unchanged.

Section 93. Section 19.86.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.86.050 Landscaping standards -- Commercial, recreation, and Institutional uses

The following standards apply to landscaping plans for commercial developments; recreation, entertainment, and tourist facilities; and institutional uses:

A. A minimum of five percent (5%) of the total developed lot area shall be landscaped. A maximum of one-half (1/2) of the five percent (5%) may be turf.

B. Along any interior property line abutting residentially zoned lots, trees shall be planted. The planters shall be sufficiently large and protected so that a parked car does not extend into the minimum four- (4-) foot by four- (4-) foot tree planting area which shall be landscaped with ground cover, shrubs, or climbing plants.

C. Planters or landscaped areas shall be provided in off-street parking areas in accordance with the requirements of Subsection I of Section 19.82.090 of this title. No plant material that will grow to a height of more than eighteen (18) inches shall be planted in the street right-of-way, except where authorized by the Roads Department.

D. Within each planter or landscaped area, a water-efficient irrigation system with automatic timer and live landscaping shall be provided and maintained, except that an irrigation system is not required to serve planters or landscaped areas devoted exclusively to native indigenous plants. The use of drip irrigation systems shall be strongly encouraged.

E. Landscaping materials and trees installed in planters or landscaped areas shall be selected based upon their adaptability to the climatic, geologic, and topographical conditions of the site. Use and protection of native plants and natural areas is highly encouraged.

Section 94. Section 19.86.060 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.86.060 Landscaping standards -- Industrial uses.

The following standards apply to landscaping plans for industrial uses:

A. A minimum of five percent (5%) of the developed area shall be landscaped. A maximum of one-half (1/2) of the five percent (5%) may be turf.

B. Along any interior property line abutting residentially zoned lots, trees shall be planted. The planters shall be sufficiently large and protected so that a parked car does not extend into the minimum four- (4-) foot by four- (4-) foot tree planting area which shall be landscaped with ground cover, shrubs, and climbing plants.

C. Planters or landscaped areas shall be provided in off-street parking areas in accordance with the requirements of Subsection I of Section 19.82.090 of this title. No plant material that will grow to a height of more than eighteen (18) inches shall be planted in the street right-of-way, except where authorized by the Roads Department.

D. Within each planter or landscaped area, an irrigation system and live landscaping shall be provided and maintained, except that an irrigation system is not required to serve planters or landscaped areas devoted exclusively to native indigenous plants. Automatic timers shall be utilized and the use of drip irrigation systems shall be strongly encouraged.

E. Landscaping materials and trees installed in planters or landscaped areas shall be selected based upon their adaptability to the climatic, geologic, and topographical conditions of the site. Use and protection of native plants and natural areas is highly encouraged.

Section 95. Subsection 19.90.030.F of the Ordinance Code of the County of Kern is hereby amended to read as follows:

F. Either the principal dwelling or the secondary residential unit on the lot shall be occupied by the property owner.

Section 96. Subsections A, B, C, D, E, G, H, I, J, K, and L of Section 19.90.030 remain unchanged.

Section 97. Section 19.90.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.90.040 Conditional use permit -- Required.

No secondary residential unit may be established until an application for a conditional use permit has been submitted to and approved by the Planning Commission.

Section 98. Section 19.98.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.98.040 Drilling by conditional use permit.

A. No well for use as an injection well and no well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in any zoning district described in this title in which such uses are permitted as conditional uses until an application for a conditional use permit has been submitted to and approved by the Planning Commission as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the standards and procedures set out in Sections 19.102.130 through 19.102.180 and Chapter 19.104 of this title. In approving a conditional use permit, the Planning Commission may waive any condition set out in Section 19.98.050 of this chapter if it determines that such waiver will not result in material detriment to the public welfare or the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity;

C. If a producing well or service well is not completed upon land subject to a conditional use permit issued pursuant to this chapter and Chapter 19.104 of this title within twelve (12) months from the date of issuance of the permit, or within any extended period thereof, the conditional use permit shall expire and the premises shall be restored as nearly as practicable to their original condition. No permit shall expire while the permittee is continuously conducting drilling, redrilling, completing or abandoning operations, or related operations, in a well on the lands covered by such permit, which operations were commenced while said permit was otherwise in effect. Continuous operations are operations suspended not more than thirty (30) consecutive days. If, at the expiration of the twelve-(12-) month period, the permittee has not completed his drilling program on the lands covered by such permit, the Planning Commission may, upon a written request of the permittee, extend the permit for the additional time requested by permittee for the completion of such drilling program.

Section 99. Section 19.100.020 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.100.020 Permit -- Reclamation plan -- Required.

Subject to the exceptions specified in Section 19.100.010 of this chapter, no surface mining operations may be undertaken anywhere in unincorporated Kern County unless a surface mining permit and a reclamation plan has been submitted to and approved by the Planning Commission in accordance with the procedures set out in Sections 19.102.130 through 19.102.180 of this title. All surface mining permits and

reclamation plans, including amendments of same, are subject to a thirty-(30-) day review period by the State Department of Conservation. For projects requiring the preparation of an environmental document pursuant to the California Environmental Quality Act, the review period shall commence with the Department of Conservation's receipt of the draft environmental document.

Section 100. Subsection 19.100.030.L of the Ordinance Code of the County of Kern is hereby amended to read as follows:

L. Reclamation plan including the following information:

1. The anticipated quantity and type of minerals for which the surface mining operation is to be conducted

2. The proposed dates for the initiation and termination of such operation

3. The maximum anticipated depth of the surface mining operation

4. The size and legal description of the lands that will be affected by such operation, a map that includes the boundaries and topographic details of such lands, a description of the general geology of the area, a detailed description of the geology of the area in which surface mining is to be conducted, the location of all streams, roads, railroads, and utility facilities within, or adjacent to, such lands, the location of all proposed access roads to be constructed in conducting such operation, and the names and addresses of the owners of all surface and mineral interests of such lands

5. A description of and plan for the type of surface mining to be employed and a time schedule that will provide for the completion of surface mining on each segment of the mined lands so that reclamation can be initiated at the earliest possible time on those portions of the mined lands that will not be subject to further disturbance by the surface mining operation

6. A description of the proposed use or potential uses of the land after reclamation and evidence that all owners of a possessory interest in the land have been notified of the proposed use or potential uses

7. A description of the environmental setting of the site and the effect that possible alternate reclaimed site conditions may have upon the existing and future uses of surrounding lands.

8. A description of how site reclamation may impact the public health and safety, giving consideration to the degree and type of present and probable future exposure of the public to the site.

9. A description of any areas to be mined to produce additional materials for backfilling and grading, as well as settlement of filled areas.

10. A description of the manner in which reclamation adequate for the proposed use or potential uses will be accomplished, including:

a. A description of the manner in which contaminants will be controlled and mining waste will be disposed,

b. A description of the manner in which rehabilitation of affected stream bed channels and stream banks to a condition minimizing erosion and sedimentation will occur,

c. A description of existing wildlife habitat and a plan to ensure that habitat conditions which exist are maintained or improved in the course of reclamation, unless the proposed end use precludes its use as wildlife habitat,

d. A description of the manner in which backfilling, regrading, slope stabilization, scarification, ripping, and recontouring will occur,

e. A description of the manner in which topsoil will be salvaged and the manner in which the site will be revegetated,

f. A description of any existing topographical features that will be significantly altered as a result of mining activity,

g. A description of the manner in which existing site drainage patterns will be disturbed through mining activity and a description of drainage patterns that are expected after site reclamation,

h. A description of the manner in which all buildings, structures, and equipment will be removed, including any previously abandoned structures or equipment,

i. A description of the necessity for and the manner in which post reclamation monitoring will occur;

11. A detailed line item cost breakdown estimating all reclamation costs, including, but not limited to:

a. Costs of backfilling, regrading, slope stabilization, and recontouring,

b. Costs of revegetation and wildlife habitat replacement,

c. Costs of final engineering design,

d. Costs of labor, including supervision,

e. Costs of mobilization,

f. Costs of equipment,

g. Costs of removal of buildings, structures, and equipment,

h. Costs associated with reduction of specific hazards, such as: heap leaching facilities, chemical processing ponds, soil decontamination, in-water slopes, highwalls, landslides, subsidence, or other mass ground failure,

i. Costs of drainage and erosion control measures,

j. Costs of soil tests,

k. Costs of haul road ripping and reseeding,

l. Costs of fencing,

m. Costs of liability insurance,

n. Costs of long-term stabilization, control, containment of waste solids and liquids;

12. A letter from the Kern County Engineering and Survey Services Department stating that the estimated costs of reclamation have been reviewed and found to be sufficient by that department;

13. An assessment of the effect of implementation of the reclamation plan on future mining in the area;

14. A statement that the person submitting the plan accepts the responsibility for reclaiming the mined lands in accordance with the reclamation plan;

15. Any other information determined by the Planning Director or the State Mining and Geology Board to be necessary for consideration of the reclamation plan;

Section 101. Subsections A, B, C, D, E, F, G, H, I, J, and K of Section 19.100.030 remain unchanged.

Section 102. Subsection 19.100.040.C of the Ordinance Code of the County of Kern is hereby amended to read as follows:

C. Surface mining operations shall comply with any conditions deemed necessary or convenient by the Planning Commission to effect the purposes of this chapter, including conditions with respect to the following:

1. The environmental objectives set forth in California Public Resources Code Section 21000,

2. Protection of the health, safety, and welfare of persons residing near the site of the mining operation and the general public,

3. Reasonable preservation of the values and uses and opportunity for potential uses of the adjacent and nearby areas insofar as this is not inconsistent with the provisions of the act, State policy, this chapter, or any implementing standards or procedures adopted by the Board of Supervisors.

Section 103. Subsections A and B of Section 19.100.040 remain unchanged.

Section 104. Section 19.100.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.100.050 Minor plan modifications.

The Planning Director may review and approve minor plan modifications to approved reclamation plans in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. Where the Planning Director determines that a proposed amendment constitutes a substantial deviation from the original plan, the proposed amendment shall be considered by the Planning Commission. Any change to adopted conditions of approval or increases in the amount of surface area to be disturbed shall be treated as a substantial deviation from the approved plan and shall be considered by the Planning Commission at a regularly scheduled public hearing.

Section 105. Section 19.100.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.100.070 Violation -- Notice to correct.

A. Either the Building Official or the Planning Director may initiate enforcement action pursuant to this section. If, after conducting the annual inspection or otherwise confirmed by an inspection of the mining operation, the Building Official finds that the surface mining operation is not in compliance with the approved mining plan, the approved reclamation plan, any permit conditions imposed by the County, the provisions of this ordinance, or the Surface Mining and Reclamation Act, the Building Official may notify the operator and the owner of the subject property of that violation by personal service or certified mail. If the violation continues beyond thirty (30) days after the date of issuance of the Building Official's notice of violation, the Building Official shall notify the Planning Director of that fact. Thereupon, the Planning Director may issue an order by personal service or certified mail requiring compliance or, if the operator does not have an approved reclamation plan, to cease all further mining activities. Said order shall specify which aspects of the surface mine's activities or operations are inconsistent with the approved mining plan, approved reclamation plan, permit conditions, the provisions of this ordinance, or the Surface Mining and Reclamation Act; shall specify a time for compliance which the Planning Director determines is reasonable, given the seriousness of the violation and any good faith efforts to comply with applicable requirements; shall set a date for a public hearing before the Planning Commission no sooner than thirty (30) days after the date of issuance of the order; and shall not take effect until the operator has been provided a public hearing concerning the violation pursuant to the provisions contained in Section 19.102.020. In instances where a violation of this chapter exists with respect to a mining operation which has not secured approval of a surface mining permit and/or reclamation plan, the requirement to hold a public hearing pursuant to this section and Section 19.100.080 may be waived by the Planning Director. The property owner(s) shall ultimately be held responsible for any default by any lessee or operator related to permit noncompliance or site abandonment.

B. The time within which the permittee must commence correction of the violation shall not be sooner than sixty (60) days after such notice is given, unless it is determined that earlier action is required for the protection of public safety. Any surface mining operation determined not to be in compliance with this chapter and which presents an imminent and substantial endangerment to the public health or the environment, as determined by the Planning Director or the State Department of Conservation, may be enjoined from further operations by order from a court of competent jurisdiction.

Section 106. Section 19.100.080 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.100.080 Failure to comply with notice -- Permit review.

A. Where the Building Official has reported a failure to comply with a notice pursuant to Section 19.100.070, the Planning Director shall set

a date for a public hearing before the Planning Commission for review of the surface mining permit and/or reclamation plan pursuant to Section 19.102.020 and Sections 19.102.150 through 19.102.170 of this title.

B. At the hearing, the Planning Commission shall determine whether or not the operator is complying with the approved mining plan, the approved reclamation plan, the permit conditions, or the provisions of this ordinance and may affirm, modify, or set aside the order issued by the Planning Director. The decision of the Planning Commission may be appealed to the Board of Supervisors, pursuant to the provisions specified in Section 19.102.170.

Section 107. Section 19.100.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.100.090 Permit review -- Actions by board.

After such matter has been heard and considered, the Planning Commission may take any of the following actions:

A. Revoke the permit;

B. Require the reclamation program to begin immediately or within a prescribed time following the effective date of revocation of the permit;

C. Allow additional time within which to cure the violation, if requested by the permittee, not to exceed a maximum of six (6) months from the date of the Board's decision;

D. Impose new or additional conditions on the permit or on the reclamation plan;

E. Increase the amount of the original security to guarantee reclamation in accordance with the plan;

F. Recommend to the Board of Supervisors proceedings to recover on any security;

G. Recommend to the Board of Supervisors that the County conduct work to accomplish the reclamation plan, to perform any conditions in default, or otherwise cure any default;

H. Recommend to the Planning Director the imposition of an administrative penalty of not more than five thousand dollars ($5,000) per day, assessed from the original date of noncompliance with this chapter or with the conditions of any approved surface mining permit or reclamation plan, as authorized by Section 2774.1 of the Surface Mining and Reclamation Act;

I. Such other order or orders as may be appropriate to correct the violation or default.

Section 108. Section 19.100.100 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.100.100 Administrative penalties.

A. Any operator who fails to comply with an order issued by the Planning Director or Planning Commission after the order's effective date or who fails to submit a report to the Director of the Department of Conservation

or County as required by Section 2207 of the Public Resources Code, shall be subject to an order by the Planning Director imposing an administrative penalty of not more than five thousand dollars ($5,000) per day, assessed from the original date of the Building Official's notice of violation or noncompliance pursuant to Section 19.100.070. In determining the amount of the administrative penalty, the Planning Director shall take into consideration the nature, circumstances, extent and gravity of the violation or violations, any prior history of violations, the degree of culpability, economic savings, if any, resulting from the violation, and any other matters justice may require. An order imposing an administrative penalty shall become effective upon issuance, and payment shall be made to the Planning Department within thirty (30) days, unless the operator petitions the Board of Supervisors for review of the order. Said order shall be served by personal service of by certified mail upon the operator.

B. If the operator petitions the Board of Supervisors for review of the order imposing an administrative penalty, the operator shall be notified by personal service or certified mail as to when the matter has been set for public hearing. The Board of Supervisors may affirm, modify, or set aside, in whole or in part, by its own order, any order of the Planning Director imposing an administrative penalty. Any order of the Board of Supervisors shall become effective upon issuance thereof and shall be served by personal service or certified mail upon the operator. Payment of any administrative penalty specified in the Board of Supervisor's order shall be made to the Planning Department within thirty (30) days of the service of the order.

Section 109. Section 19.102.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.040 General requirements -- Permit types.

The ministerial permits specified in this title for review pursuant to this article shall be issued by the Planning Director upon submission of an application containing the information specified in applicable sections of this title and a determination by the Planning Director that the proposed use or development meets the development standards and conditions specified in the applicable section or sections of this title. These permits include:

A. Temporary animal permits plot plan review (Sections 19.14.130 and 19.60.130 through 19.60.160);

B. Extensions for temporary mobilehomes and recreational vehicles (Sections 19.16.130 and 19.18.130);

C. Mobilehome park plot plan review (Sections 19.26.130 through 19.26.190);

D. Minor plan modifications (Sections 19.52.130 through 19.52.180, 19.56.130 through 19.56.200, 19.58.130 through 19.58.180, and 19.100.050);

E. Wind generator plot plan review (Sections 19.64.130 through 19.64.150);

F. Geologic hazard plot plan review (Sections 19.68.130 through 19.68.150);

G. Airport approach height approval (Sections 19.76.130 and 19.76.140);

H. Special development standards plot plan review (Sections 19.80.040 through 19.80.070);

I. Off-street parking plot plan review not in conjunction with a ministerial permit (Sections 19.82.100 through 19.82.130);

J. Landscaping plot plan review not in conjunction with a ministerial permit (Sections 19.86.070 through 19.86.90);

K. Density bonus permit (Sections 19.92.030 through 19.92.060);

L. Home occupation permit (Sections 19.94.050 through 19.94.080);

M. Production water injection wells for the purpose of disposing of production wastewater produced in the same oilfield in which the injection well is located (Section 19.98.030);

N. Oil and gas plot plan review (Section 19.98.030);

O. Large family day-care permit (Sections 19.96.030 through 19.96.060);

P. Temporary batch plant (thirty (30) days or less) plot plan review (Section 19.08.290).

Section 110. Section 19.102.060 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.060 Permit denial -- Appeal.

If the Planning Director denies a permit pursuant to this article, the applicant may appeal such action to the Planning Commission.

A. The applicant may file with the Planning Director a notice of appeal to the action of the Planning Director indicating the basis of appeal within seven (7) calendar days of such action. The appeal shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title.

B. The Planning Commission shall consider the appeal within thirty (30) days of the filing of such appeal. No public hearing or notice shall be required.

C. The Planning Commission may reverse or affirm the action of the Planning Director. The action of the Board shall constitute a ministerial action and shall be based solely on whether or not the proposed use or development meets the development standards and conditions specified in or established pursuant to the applicable section or sections of this title.

D. The decision of the Planning Commission pursuant to Subsection C of this section may be appealed to the Board of Supervisors pursuant to Subsection A of Section 19.102.170 of this chapter.

Section 111. Section 19.102.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

Article III. Discretionary Permit Decisions by the Planning Director

19.102.070 General requirements -- Permit types.

The discretionary permits specified in this title for review pursuant to this article may be issued by the Planning Director following submission of an application containing the information specified in the applicable section of this title and a properly noticed public hearing. These permits include:

A. Precise development plan review (Sections 19.56.130 through 19.56.200);

B. Cluster combining site development plan review (Sections 19.58.130 through 19.58.180);

C. Conditional use permits and variances when filed in conjunction with an application for a discretionary permit to be heard by the Planning Director (Chapters 19.106 and 19.108);

D. Zone modifications (Chapter 19.110);

E. Extensions of time;

F. Temporary event permit (Section 19.08.340);

G. Temporary precise development plan (Section 19.56.180);

H. Variances (Chapter 19.106).

Section 112. Section 19.102.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.090 Notice and hearing.

A. When an application has been accepted as complete in accordance with this chapter, the Planning Director shall set the application for a public hearing.

B. At least ten (10) calendar days before the date of any public hearing, the date, time, place of the hearing, identity of the hearing body, and the nature and location of the application shall be given by the following methods:

1. Publishing such notice once in a newspaper of general circulation,

2. Mailing or delivering notice, postage prepaid, to the property owner, the applicant, to each member of the Board of Supervisors, to the owners of all property within three hundred (300) feet of the exterior boundaries of the property which is subject of the application, and to any person who has filed a written request for such notice. For the purposes of this notice, property owners shall be the last known name and address of the property owner names on the last assessment roll of the County. If the number of owners to whom notice would be mailed or delivered pursuant to this paragraph is greater than one thousand (1,000), a display advertisement of at least one-eighth (1/8) page in at least one (1) newspaper of general circulation may be published at least ten (10) days prior to the hearing in lieu of mailed or delivered notice,

3. In lieu of the requirements set forth in Subparagraph 1 of this subsection, notice may be given by posting notices not more than

three hundred (300) feet apart along each street upon which the subject property abuts for a distance of not less than three hundred (300) feet in each direction from the exterior limits of the subject property,

4. Notification for the consideration of precise development plans (Section 19.56.130) and zone modifications (Chapter 19.110) shall be as specified in Subsections 19.102.090.B.1 and 3. In addition, notification shall include the mailing or delivering notice, postage prepaid, to the property owner(s), owners of all abutting properties, the applicant(s), to each member of the Board of Supervisors, and to any person who has filed a written request for such notice,

5. Notification for the consideration of any discretionary permit to permit installation of communication towers on property located outside the boundaries of the Metropolitan Bakersfield 2010 General Plan shall be as specified in Subsection 19.102.090.B.1 in instances where the communication tower will exceed thirty-five (35) feet in height and the majority of parcels abutting the project site are one (1) acre or larger in size. In addition, notification shall include the mailing or delivering notice, postage prepaid, to the property owner(s), owners of all property within eight hundred (800) feet of the exterior boundaries of the property which is subject of the application, and to any person who has filed a written request for such notice,

6. For extension of time requests, temporary event permits, and temporary precise development plans, no formal notification pursuant to this section shall be required.

C. Public Hearing. A public hearing shall be held before the Planning Director at a time and place in accordance with the public notice. The Planning Director may establish his/her own rules for the conduct of such hearings. Evidence shall be offered or presented, and the name of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess, the Planning Director or his/her designee shall announce the time and place to which the hearing will be continued. If it is determined to be in the public interest, the Planning Director may schedule a public hearing for any permit type specified in Section 19.102.070 directly before the Board of Supervisors, in which case a decision shall be rendered in accordance with Section 19.102.220.

Section 113. Section 19.102.130 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

Article IV. Discretionary Permit Decisions by the Planning Commission

19.102.130 General requirements -- Permit types.

The permits specified in this article may be issued by the Planning Commission following submission of an application containing the information specified in the applicable section of this title and a properly noticed public hearing. These permits include:

A. Conditional use permits (Chapter 19.104);

B. Zone modifications when filed in conjunction with an application for a permit to be heard by the Planning Commission (Chapter 19.110);

C. Surface mining permits and reclamation plans (Chapter 19.100);

D. Secondary residential unit (Chapters 19.90 and 19.104);

E. Density bonus permit, when filed in conjunction with an application for a permit to be heard by the Planning Commission (Sections 19.92.030 through 19.92.060);

F. Variances, when filed in conjunction with an application for a permit to be heard by the Planning Commission (Chapter 19.106);

G. Cluster site development plan review (Sections 19.58.130 through 19.58.180) when filed in conjunction with an application for a tentative tract map;

H. Precise development plans, conditional use permits, variances, and zone modifications when filed in conjunction with an application for a tentative tract map (Chapters 19.104, 19.106, and 19.110);

I. Tentative tract maps (Chapters 18.10, 18.15, and 18.40 of the Land Division Ordinance).

Section 114. Section 19.102.135 is hereby added to the Ordinance Code of the County of Kern to read as follows:

19.102.135 General requirements — Advisory actions.

The following discretionary permits and actions shall be considered by the Planning Commission prior to consideration by the Board of Supervisors, following submission of an application containing the information specified in the applicable section of this title and a properly noticed public hearing. These permits and actions include the following:

A. Special planning site development plan review (Sections 19.52.130 through 19.52.180);

B. Precise development plan review, with associated variances, zone modifications, or conditional use permits, when filed in conjunction with an application for a change of zone classification (Sections 19.56.130 through 19.56.200 and Chapters 19.104, 19.106, and 19.110);

C. Cluster combining site development plan review (Sections 19.58.130 through 19.58.180) when filed in conjunction with an application for a change in zone classification;

D. Density bonus permit when filed in conjunction with an application for a change in zone classification or an application for a permit to be heard by the Board of Supervisors (Sections 19.92.030 through 19.92.060);

E. Conditional use permits, variances, and zone modifications when filed in conjunction with an application for a change in zone classification (Chapters 19.104, 19.106, and 19.110);

F. Amendments to this title (Chapter 19.112);

G. Application for change in zone classification (Chapter 19.112)

H. Agricultural preserve inclusion or exclusion requests;

I. Adoption of amendment of any General Plan or Specific Plan;

J. Williamson Act Land Use Contract cancellations, excluding cancellations of less than ten (10) acres for the purposes of creating an agricultural homesite, as determined by the Planning Director;

K. Referrals from the Board of Supervisors and the Planning Director.

Section 115. Section 19.102.140 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.140 Application.

A. An applicant for a discretionary permit or entitlement pursuant to this article shall submit an application to the Planning Director in the format and number of copies specified by the Planning Director. The application shall contain all the information specified for the application by the applicable section of this title, unless the Planning Director waives any of the information requirements. The application shall be accompanied by the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title.

B. The Planning Director shall inform the applicant in writing within thirty (30) calendar days of receipt that the application is complete or that additional information is needed to complete the application.

C. Upon acceptance of the application as complete and completion of an environmental document, if required, a public hearing shall be set in accordance with this chapter.

Section 116. Section 19.102.150 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.150 Notice and hearing.

A. When an application has been submitted in accordance with this chapter, the Planning Director shall set the application for a public hearing.

B. At least ten (10) days before the date of any public hearing, the date, time, place of the hearing, identity of the hearing body, and the nature and location of the application shall be given by the following methods:

1. Publishing such notice once in a newspaper of general circulation;

2. Mailing or delivering notice, postage prepaid, to the property owner, the applicant, to each member of the Board of Supervisors, to each member of the Planning Commission, to the owners of all property within three hundred (300) feet of the exterior boundaries of the property which is subject of the application, and to any person who has filed a written request for such notice. For the purposes of this notice, property owners shall be the last known name and address of the property owner names on the last assessment roll of the County. If the number of owners to whom notice would be mailed or delivered pursuant to this paragraph is greater than one thousand (1,000), a display advertisement of at least one-eighth

(1/8) page in at least one (1) newspaper of general circulation may be published at least ten (10) days prior to the hearing in lieu of mailed or delivered notice;

3. In lieu of the requirements set forth in Paragraph 1 of this subsection, notice may also be given by posting notices not more than three hundred (300) feet apart along each street upon which the subject property abuts for a distance of not less than three hundred (300) feet in each direction from the exterior limits of the subject property;

4. Notification for the consideration of any discretionary permit to permit installation of communication towers on property located outside the boundaries of the Metropolitan Bakersfield 2010 General Plan shall be as specified in Subsection 19.102.150.B.1 in instances where the communication tower will exceed thirty-five (35) feet in height, and the majority of parcels abutting the project site are one (1) acre or larger in size. In addition, notification shall include the mailing or delivering notice, postage prepaid, to the property owner(s), owners of all property within eight hundred (800) feet of the exterior boundaries of the property which is subject of the application, and to any person who has filed a written request for such notice.

C. Public Hearing. A public hearing shall be held before the Planning Commission at a time and place in accordance with the public notice. The Board of Supervisors shall establish rules for the conduct of such hearings. Evidence shall be offered or presented, and the name of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess, the presiding officer shall announce the time and place to which the hearing will be continued. If it is determined to be in the public interest, the Planning Director may schedule a public hearing for any permit type specified in Section 19.102.130 directly before the Board of Supervisors, in which case a decision shall be rendered in accordance with Section 19.102.220.

Section 117. Section 19.102.160 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.160 Decision.

A. The Planning Commission may approve, conditionally approve, or deny any application specified by Section 19.102.130 following the close of public testimony on the matter or within thirty-five (35) days thereafter by resolution except as provided in Title 18. Such resolution shall include findings in accordance with the provisions of this chapter. The decision shall be final, subject to appeal in accordance with this chapter. In the event that the Planning Commission is unable to reach a majority decision, as evidenced by a tie vote, the project is deemed denied.

B. Where an advisory action is required as specified by Section 19.102.135, the Planning Commission shall adopt a recommendation following the close of public testimony on the matter or within thirty-five (35) days thereafter by resolution. Such resolution shall include findings in support of the recommendation. In the event that the Planning Commission

is unable to reach a majority decision, as evidenced by a tie vote, the project is deemed denied. Within forty-five (45) days from the date a decision is rendered by the Planning Commission, a public hearing shall be scheduled before the Board of Supervisors to consider the Planning Commission's recommendation.

C. Written notice of such decision shall be given by mail within seven (7) calendar days after the date of the decision to the applicant and any person filing a written request for notice of the decision.

D. The decision of the Planning Commission on permits specified by Section 19.102.130 shall be final on expiration of fourteen (14) calendar days from and including the date of the decision, as required by Subsection (C) of this section, unless a notice of appeal is filed with the Planning Director within such time.

E. All conditions of approval shall be final, and a request to delete or to modify a condition shall only be considered at a properly noticed public hearing, unless said conditions are appealed pursuant to Section 19.102.170 of this chapter.

Section 118. Section 19.102.170 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.102.170 Appeal.

A. Any decision of the Planning Commission made pursuant to Section 19.102.130 shall be subject to appeal to the Board of Supervisors.

B. The applicant or any other person aggrieved may appeal from such decision by filing a written notice of appeal with the Planning Director prior to the time the decision becomes final. The Planning Director shall furnish forms of notice of appeal. The appeal shall be accompanied with the fee established by the Board of Supervisors pursuant to Section 19.06.030 of this title.

C. Notice of the hearing on appeal shall be given in the manner and time provided in Section 19.102.210 of this chapter. Notice of the hearing on appeal shall also be given not less than ten (10) days before such hearing to each person entitled to notice of the preceding decision.

D. The Board of Supervisors may reverse, affirm wholly or partly, modify, or attach other or additional conditions to the decision appealed from.

E. A decision of the Board of Supervisors on any such appeal shall be final on adoption of an order or resolution containing its determination, and no notice thereof need be given.

Section 119. Section 19.102.190 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

Article V. Discretionary Permit Decisions by the

19.102.190 General requirements -- Permit types.

The discretionary permits specified in this title for review pursuant to this article may be issued by the Board of Supervisors following submission of an application containing the information specified in the applicable section of this title and a properly noticed public hearing. These permits include:

A. SP site development plan review (Sections 19.52.130 through 19.52.180);

B. Precise development plan review, with associated variances, zone modifications, or conditional use permits, when filed in conjunction with an application for a change of zone classification or tentative tract map (Sections 19.56.130 through 19.56.200 and Chapters 19.104, 19.106, and 19.110);

C. CL site development plan review (Sections 19.58.130 through 19.58.180) when filed in conjunction with an application for change of zone classification or with a tentative tract map;

D. Density bonus permit when filed in conjunction with an application for a change of zone classification or an application for a permit to be heard by the Board of Supervisors (Sections 19.92.030 through 19.92.060);

E. Appeals of discretionary decisions by the Planning Director (Subsection (A) of Section 19.102.110)

F. Appeals of Planning Commission decisions (Section 19.102.170);

G. Conditional use permits, variances, and zone modifications when filed in conjunction with an application for a change in zone classification or for a tentative tract map (Chapters 19.104, 19.106, and 19.110);

H. Amendments to this title (Chapter 19.112);

I. Application for change of zone classification (Chapter 19.112);

J. Agricultural preserve inclusion or exclusion requests, agricultural preserve contracts, contract cancellation, and contract amendments;

K. Conditional use permit for native groundwater transport or transfer outside both Kern County and its watersheds (Chapter 19.118).

Section 120. Section 19.104.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.104.040 Basis for approval.

The decision-making authority may approve or conditionally approve an application for a conditional use permit if it finds all of the following:

A. The proposed use is consistent with the goals and policies of the applicable General or Specific Plan.

B. The proposed use is consistent with the purpose of the applicable district or districts.

C. The proposed use is listed as a use subject to a conditional use permit in the applicable zoning district or districts or a use determined to be similar to a listed conditional use in accordance with the procedures set out in Sections 19.08.030 through 19.08.080 of this title.

D. The proposed use meets the minimum requirements of this title applicable to the use and complies with all other applicable laws, ordinances, and regulations of the County of Kern and the State of California.

E. The proposed use will not be materially detrimental to the health, safety, and welfare of the public or to property and residents in the vicinity.

Section 121. Section 19.112.040 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.112.040 Notice of public hearing.

A. At least ten (10) days before the date of any public hearing on a proposed amendment to the text of this title changing regulations or standards affecting the use of any property or on an amendment to the Official Zoning Maps reclassifying property from one (1) district to another, notice of the hearing, identity of the hearing body, and the nature of the amendment, and identification of affected properties shall be given by the following methods:

1. Publishing such notice once in at least one (1) newspaper of general circulation,

2. Mailing or delivering notice, postage prepaid, to the property owner, the applicant, to each member of the Board of Supervisors, to each member of the Planning Commission, to the owners of all property within three hundred (300) feet of the exterior boundaries of the property which is subject of the application, and to any person who has filed a written request for such notice. For the purposes of this notice, property owners shall be the last known name and address of the property owner names on the last assessment role of the County. If the number of owners to whom notice would be mailed or delivered pursuant to this paragraph is greater than one thousand (1,000), a display advertisement of at least one-eighth (1/8) page in at least one (1) newspaper of general circulation may be published at least ten (10) days prior to the hearing in lieu of mailed or delivered notice,

3. In lieu of the requirements set forth in Paragraph (1) of this subsection, notice may also be given by posting notices not more than three hundred (300) feet apart along each street upon which the subject property abuts for a distance of not less than three hundred (300) feet in each direction from the exterior limits of the subject property.

B. At least ten (10) days before the date of any public hearing on a proposed amendment to the text of this title not changing regulations or standards affecting the use of any property, notice of the hearing, including the date, time, place of the hearing, identity of the hearing body, and the

nature of the amendment, shall be given by publishing such notice once in at least one (1) newspaper of general circulation.

Section 122. Section 19.112.050 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.112.050 Public hearing.

A. A public hearing shall first be held before the Planning Commission at a time and place in accordance with the public notice. The Board of Supervisors shall establish rules for the conduct of such hearings. The name of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess, the Planning Commission shall announce the time and place to which the hearing will be continued. Planning Commission shall adopt a recommendation for consideration by the Board of Supervisors as specified in Section 19.102.160.B.

B. Within forty-five (45) days from the date a decision is rendered by the Planning Commission, a public hearing shall be scheduled before the Board of Supervisors to consider the Planning Commission's recommendation. A public hearing shall be held before the Board of Supervisors at a time and place in accordance with the public notice. The Board of Supervisors may establish rules for the conduct of such hearings. The name of each witness shall be recorded and made a part of the permanent files. Any hearing may be continued provided that prior to adjournment or recess, the Board of Supervisors shall announce the time and place to which the hearing will be continued.

Section 123. Section 19.112.070 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.112.070 Time limitations on challenges.

Any action or proceeding to attack, review, set aside, void, or annul any decision made pursuant to Section 19.112.060, or concerning any of the proceedings, acts, or determinations taken, done, or made prior to such decision, or to determine the reasonableness, legality, or validity of any condition attached thereto, shall not be maintained by any person unless the action or proceeding is commenced within thirty (30) days after the date of decision, and the legislative body is served within sixty (60) days after the date of the decision. Thereafter, all persons are barred from any such action or proceeding or any defense of invalidity or unreasonableness of that decision or of these proceedings, acts, or determinations.

Section 124. Section 19.114.030 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.114.030 Inspection.

The Building Official or Planning Director may upon the presentation of proper credentials to the occupant or owner enter any premises, building,

or structure at any reasonable time for the purpose of investigating and inspecting said premises, building, or structure to determine whether the same are being used in compliance with the provisions of this title. If admission or entry is refused, the Building Official may apply to the District Attorney to obtain an inspection warrant.

Section 125. Section 19.114.060 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.114.060 Misdemeanor.

Any person, firm, corporation, owner of the land, or possessor who violates or who causes, permits, or allows a violation of any provision of this title is guilty of a misdemeanor and is subject to penalties and procedures as described in Chapter 8.54 of the Ordinance Code, and upon conviction thereof, shall be punished by a fine of not more than one thousand dollars ($1,000) or by imprisonment in the County Jail for not exceeding six (6) months, or by both such fine and imprisonment. Each day the violation of this title continues shall be considered a separate offense.

Section 126. Section 19.114.065 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.114.065 Notice of zoning violation.

Whenever the Building Official or his designee has knowledge of a violation of Title 19 of this code, he may cause a notice of intent to record a notice of violation to be mailed by certified mail to the then current owner of record of the property. The notice shall state that within thirty (30) days of the date of the notice, the owner may request a hearing with the Board of Supervisors to present evidence that a violation does not exist. The notice shall further describe the property and violation in detail.

Following the sending of the notice of intent to record a notice of violation and prior to recording the notice, if it is determined that no violation exists, the Building Official or his designee shall mail a clearance letter by certified mail to the then owner(s) of record.

In the event that a meeting is not requested and the violation has not been corrected, or in the event that after consideration of evidence, it is determined by the Board of Supervisors that a Zoning Ordinance violation in fact exists, the Building Official may record, without fee, a notice of violation in the Office of the County Recorder.

Upon request, the Building Official or his designee shall issue the affected property owner a notice of expungement of violation upon correction of all violation(s) noticed hereunder.

Section 127. Section 19.114.080 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.114.080 Injunctive relief.

The County may seek injunctive relief in Superior Court to abate any violation of this title or to prohibit any violation of this title. Injunctive relief may be sought at any time, including prior to the issuance or compliance with the Notice of Violation if, in the opinion of the Building Official, an alleged or anticipated violation of this title may be injurious to the public health or safety.

Section 128. Section 19.114.090 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.114.090 Abatement proceeding.

Any building or structure set up, erected, constructed, altered, enlarged, converted, moved, or maintained contrary to the provisions of this title, or any use of land, building, or premises conducted, operated, or maintained contrary to the provisions of this title or contrary to a permit or variance or the terms and conditions imposed therein is declared to be unlawful and a public nuisance, and the Building Official and/or the District Attorney shall commence action or proceedings for the abatement and removal and/or enjoinment thereof in the manner provided by this code or law and shall take such other steps and shall apply to such court or courts as may have jurisdiction to grant relief as will abate and remove such building or structure and restrain and enjoin any person, firm, or corporation from setting up, erecting, building, maintaining, or using any such building, structure, or vehicle or using any property contrary to the provisions of this title.

Section 129. Section 19.114.100 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

19.114.100 Recovery of costs.

This section establishes procedures for the recovery of administrative costs incurred by the County in the enforcement process, for the abatement of conditions defined as a violation by Section 19.04.879 in cases where no permit is required pursuant to the provisions of this title to abate such violation. These procedures are used where a violation is abated in advance of initiation of the procedures specified by this chapter.

A. Definition of Costs. For the purpose of this chapter, costs shall mean administrative costs, including staff time expended and reasonably related to violation abatement cases where no permit is required, for items including, but not limited to, investigation, site inspection and monitoring, reports, telephone contacts, correspondence, photography labs, consultants, and meetings with affected parties.

B. Cost Accounting and Recovery Required. The enforcement personnel shall maintain records of all administrative costs incurred by responsible County departments associated with the enforcement process pursuant to this chapter and shall recover the costs from the property owner as provided by this section. Staff time shall be calculated at an hourly rate as established and revised from time to time by the Planning Director.

C. Notice of Cost Recovery Requirements. The enforcement personnel shall include in the notice of violation a statement of the intent of the County to charge the property owner for all administrative costs associated with enforcement, and of the owner's right to a hearing if he or she objects to such charges. The notice shall state that the property owner will receive, at the conclusion of the enforcement case, a summary of administrative costs associated with the processing of the enforcement case at the hourly rate in effect at the time the case is initiated. The notice shall state that the property owner will have the right to object to the charges by filing a request for hearing with the Board of Supervisors within thirty (30) days of service of the summary of charges, pursuant to Subsection D of this section.

D. Summary of Costs. At the conclusion of the enforcement case, the enforcement personnel shall send a summary of costs associated with enforcement to the property owner by certified mail. The summary shall include a notice which states that if the owner objects to the charges, a request for hearing must be filed as provided by Subsection E of this section, and that if no such hearing is requested, the owner's right to object will be waived, and he or she will be fully liable for the charges, to be recovered in a civil action in the name of the County, in any court of competent jurisdiction within the County.

E. Hearing on Objection to Charges. Any property owner who receives a summary of costs pursuant to Subsection D of this section shall have the right to a hearing before the Board of Supervisors on his or her objections to the proposed costs, as follows:

1. Request for Hearing. A request for hearing shall be filed with the Planning Department within thirty (30) days of the service by mail of the summary of costs, in the form of a letter setting forth the nature of the property owner's objections to the costs;

2. Scheduling of Hearing. Not less than ten (10) days of the filing of the request for hearing, and on thirty (30) days written notice to the owner, the Board of Supervisors shall hold a hearing on the owner's objections and determine the validity thereof;

3. Decision by the Board of Supervisors. In determining the validity of the costs, the Board of Supervisors shall consider whether total costs are reasonable in the circumstances of the case. Factors to be considered include, but are not limited to, whether the present owner created the violation; whether there is a present ability to correct the violation; whether the owner moved promptly to correct the violation; the degree of cooperation provided by the owner; whether reasonable minds can differ as to whether a violation exists. The decision of the Board of Supervisors shall be final.

F. Collection of Charges. In the event that no request for hearing is filed pursuant to Subsection E of this section or after a hearing, the Board of Supervisors affirms the validity of the costs, the property owner shall be liable to the County in the amount stated in the summary or any lesser amount as determined by the Building Official. The County shall be reimbursed for all of said costs within forty-five (45) days from the date of

decision pursuant to Subsection E or, if no appeal is filed, within thirty (30) days from the mailing of the summary of costs pursuant to Subsection D. Payment may be received at the Planning Department. Delinquent fees shall be subject to a penalty of twenty-five percent (25%) of the total summary of costs. If payment is not received, such costs shall be recoverable in a civil action in the name of the County in any court of competent jurisdiction within the country.

Section 130. OPERATIVE DATE. This ordinance shall take effect and become operative on January 1, 1999.

(SEAL)
ATTEST:

KATHLEEN KRAUSE
Clerk of the Board of Supervisors

By _____, Deputy Clerk

THE BOARD OF SUPERVISORS OF THE COUNTY OF KERN ORDAINS AS FOLLOWS:

Section 1. This ordinance shall take effect and be in full force on and after the 20th day of May, 2010, and shall be published once in the Bakersfield Californian, a newspaper of general circulation, published in the County of Kern, State of California, together with the names of the members of the Board of Supervisors voting for and against the same.

Section 2. Section 2.16.010 of Chapter 2.16, Title 2 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

2.16.010 Created.

The Engineering, Surveying, and Permit Services Department is established and shall be a component of the Development Services Agency of the County. The Department shall provide the drainage design, floodplain management, code compliance, building inspection, subdivision review, liquid waste management, county service area administration, permit administration, and county surveyor functions of the formerly existing engineering and survey services department. All existing directives and instructions which are applicable to the functions previously performed by the Engineering and Survey Services Department and Public Works Departments shall be applicable to and binding upon the Director and/or the Engineering and Survey Services.

Throughout this code, the term "Engineering and Survey Services Department" refers to and means the Engineering, Surveying, and Permit Services Department.

Section 3. Section 2.16.020 of Chapter 2.16, Title 2 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

2.16.020 Director.

The position of Director of Engineering, Surveying, and Permit Services is created. The Director shall be appointed by and serve under the direction and authority of the Development Services Agency Director. The Director shall, subject to the civil service system of the county, employ such assistances and/or employees as are from time to time provided for the department by the ordinances of the County.

Throughout this code, the term "Director of the Engineering and Survey Services Department" shall refer to and mean the Director of the Engineering, Surveying, and Permit Services Department.

Section 4. Sections 2.23.030 and 2.23.040 of Chapter 2.23, Title 2 of the Ordinance Code of the County of Kern, are hereby amended to read as follows:

2.23.030 Environmental Health Division established.

The Environmental Health Division, of and within the administrative control of the Director of Public Health Services, is hereby established and shall consist of the Director of Environmental Health and such necessary assisting personnel as may be approved by the Board of Supervisors. All division personnel who engage in the enforcement of orders, quarantines, and other regulations, as well as rules prescribed by the State Department of Health Services and statutes relating to public health, shall be qualified as required by state law.

Throughout this code, the term "Environmental Health Services Department" shall refer to and mean the Environmental Health Division of the Department of Public Health Services.

2.23.040 Director of Environmental Health.

The position of Director of Environmental Health is established. The Director shall be appointed by and serve under the direction and authority of the Director of Public Health Services. The Director of Environmental Health shall, subject to the civil service system of the county, employ such assistants and/or employees as are, from time to time, provided for the Department by the ordinances of the County.

Throughout this code, the term "Director of the Environmental Health Services Department" shall refer to and mean the Director of Environmental Health.

Section 5. Chapter 2.25, Title 2 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

Chapter 2.25

DEVELOPMENT SERVICES AGENCY

Sections:

2.25.010 Development Services Agency – Established as Comprehensive County Agency – Component Departments.
2.25.020 Development Services Agency Director.

2.25.010 Development Services Agency--Established as Comprehensive County Agency--Component Departments.

The Development Services Agency of the County of Kern is established as a comprehensive local agency for coordination of county policies and regulations concerning county land use planning and regulation, transportation management, engineering, surveying, and permit services, administration of county service areas, and community development. The Development Services Agency acts to provide administration and coordination with respect to the efforts, power, and duties of the Planning and Community Development Department, the Roads Department, and the Engineering, Surveying, and Permit Services Department. The powers and duties of these departments are as enumerated in state law and in Chapters 2.16, 2.34, 2.36, and 2.82 of Title 2 of the Kern County Code herein.

2.25.020 Development Services Agency director.

The Development Services Agency of the County of Kern is established as a comprehensive local agency for coordination of county policies and regulations concerning county land use planning and regulation, transportation management, engineering, surveying, subdivisions and permit services, administration of county service areas, and community development. The Development Services Agency acts to provide administration and coordination with respect to the efforts, power, and duties of the Planning and Community Development Department, the Roads Department, and the Engineering, Surveying, and Permit Services Department. The powers and duties of these departments are as enumerated in state law and in Chapters 2.16, 2.34, 2.36, and 2.82 of Title 2 of the Kern County Code herein.

Section 6. Chapter 2.28, Title 2 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

Chapter 2.28

ROAD COMMISSIONER

Sections:

2.28.010 Commissioner to Direct County Road Employees.
2.28.010 Commissioner to Direct County Road Employees.

There is hereby established the position of Kern County Road Commissioner, who shall direct County road employees and perform all other duties prescribed by California Street and Highways Code Sections 2006 et seq.

Section 7. Chapter 2.32, Title 2 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

2.32.010 Established – Membership – Powers and Duties.

There is established the Kern County Board of Building Appeals composed five (5) voting members. The Director of the Development Services Agency or his designee shall act as secretary of the board. Four (4) of the members of the board shall be qualified by training and experience in building construction or the building trades. The fifth member shall be a member at large. All five (5) members shall be appointed by, and serve terms not to exceed four (4) years, at the pleasure of the Board of Supervisors. As soon as practical after the appointment of its membership and the board is constituted, the board shall meet and organize. Thereafter, the board shall have the powers granted, and shall assume the responsibilities and functions imposed, by the code of building regulations upon a board of appeals, except for appeals taken under the Kern County housing code.

Section 8. Chapter 2.34, Title 2, of the Ordinance Code of the County of Kern, is hereby repealed; and a new Chapter 2.34, Title 2 of the Ordinance Code of the County of Kern, is hereby added to read as follows:

Chapter 2.34

Planning and Community Development

Sections:

2.34.010 Department and Office of Director Established.
2.34.020 Director Given Powers of Zoning Administrator.
2.34.030 Planning Agency.
2.34.040 Related Functions of Board of Supervisors – Procedures and Notices.

2.34.010 Department and Office of Director Established.

There is in the County of Kern a Department of Planning and Community Development, and the office of Director of Planning and Community Development is established in accordance with Government Code Section 65100.

Throughout this code, the term "Planning Director" shall refer to the Director of Planning and Community Development and the term "Planning Department" shall refer to the Department of Planning and Community Development.

All duties and responsibilities of the former Department of Community Development are hereby vested in and assigned to the Community Development Division of the Department of Planning and Community Development and the director thereof.

2.34.020 Director Given Powers of Zoning Administrator.

The Director of Planning and Community Development of the County is vested with the powers of Zoning Administrator, pursuant to Government Code Sections 65900 et seq., and shall have all powers and duties of a Zoning Administrator as prescribed by Article 3 of Chapter 4 of Chapter 4 of Division 1 of Title 7 of the Government Code (commencing with Section 65900), excepting those powers and duties assigned to the Board of Zoning Adjustment under the Land Use Zoning Ordinance of Kern (Title 19 of this code) and under Section 2.30.030 of this Title.

2.34.030 Planning Agency.

A. The Kern County Planning Agency is established in accordance with Government Code Section 65100(a), which shall consist of a combination of the Board of Supervisors and the department of Planning and Community Development, and which shall have all the functions and duties of a planning agency, as provided in Chapter 3 of Division 1 of Title 7 of the Government Code (commencing with Section 65100). In the absence of any assignment of the function of the planning agency pursuant to the provisions of this code, the Board of Supervisors shall carry out all the functions of the Planning Agency, including those otherwise assignable to a planning commission.

B. The Board of Supervisors may, from time to time, in the exercise of its discretion, initiate and conduct any or all functions and duties of a planning agency or order the Department of Planning and Community Development to initiate and conduct any or all such functions and duties.

C. The Department of Planning and Community Development may, from time to time, in the exercise of the discretion of the Director of Planning and Community Development, initiate and conduct any or all functions and duties of a planning agency, consistently with any initiated or conducted by the Board of Supervisors, and except as otherwise ordered by the Board of Supervisors.

D. The Department of Planning and Community Development shall perform all the functions of a county planning agency as prescribed in the Government Code Section 65402.

2.34.040 Related Functions of Board of Supervisors - Procedures and Notices.

In connection with adoption or amendment of general plan elements, specific plans, or zoning regulations, the only procedures and notices to be observed shall be those required of a legislative body under Chapters 3 and 4 of Division 1 of Title 7 of the Government Code (commencing with Section 65100), for such respective adoptions or amendments.

Section 9. Subsection (A) of Section 2.36.010 of Chapter 2.36, Title 2 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

2.36.010 Established – Organization – Functions.

A. The term "Building Inspection Department" as used throughout this code shall mean and refer to the Building Inspection Division of the Engineering, Surveying,

and Permit Services Department, a component of the Development Services Agency of the County. The Director of the Development Services Agency shall exercise the authority and perform the duties provided by law for the Director of Building Inspection of the County and may delegate such authority to employees of the Engineering, Surveying, and Permit Services Department to administer and implement of the functions of his office.

Section 10. Subsection (B) of Section 2.36.010, Chapter 2.36, Title 2 of the Ordinance Code of the County of Kern remains unchanged.

Section 11. Subsections (C) and (D) of Section 2.36.010 of Chapter 2.36, Title 2 of the Ordinance Code of the County of Kern are hereby repealed.

Section 12. Sections 2.56.030 and 2.56.040 of Chapter 2.56, Title 2 of the Ordinance Code of the County of Kern, are hereby amended to read as follows:

2.56.030 Membership.

The committee shall be composed to twenty-three (23) members, including two (2) members of the Board of Supervisors and the Development Services Agency Director (who shall also provide the committee with secretarial services from his office staff) or his designee. Members shall be appointed by majority vote of the Board of Supervisors. Each Supervisor shall nominate four (4) persons to membership on the committee, not including the two (2) supervisor members and the Development Services Agency Director.

2.56.040 Terms of Members.

The terms of ten (10) members (except the Supervisors and the Development Services Agency Director serving thereon) shall expire December 31, 2004, and the terms of the remaining ten (10) members shall expire on December 31, 2006. The terms of members thereafter appointed shall be for four (4) years from and after the expiration of the term of their predecessors. Appointees filling vacancies shall serve the unexpired portion of the term of their predecessors. Members of the committee may be removed from office at any time upon majority vote of the Board of Supervisors. The Supervisors who are members of the committee shall serve at the pleasure of the majority of the Board.

Section 13. Subsection (C) of Section 2.66.030 of Chapter 2.66, Title 2 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

C. The Kern County Emergency Council shall be composed of the following members or their designees:

1. County Administrative Officer, who shall be chairman;
2. Director of Emergency Services (the Fire Chief), who shall be vice-chairman;
3. Sheriff-Coroner;

4. Director of Development Services Agency;
5. Director of Public Health Services;
6. Director of Emergency Medical Services;
7. Director of Environmental Health;
8. Director of Waste Management;
9. Assistant County Administrative Officer for General Services; and
10. Chief Executive Officer of Kern Medical Center.

Nonvoting members of the Council shall be composed of the following members or their designees:

1. Chairman of the Board of Supervisors;
2. County Counsel;
3. Emergency Services Manager;
4. Director of the Personnel Department
5. Director of the Human Services Department;
6. Director of the Mental Health Department;
7. Director of Aging and Adult Services Department;
8. Agricultural Commissioner/Sealer;
9. Director of the Engineering, Surveying, and Permit Services Department.

Section 14. Subsections (A), (B), and (D) through (G) of Section 2.66.030 of Chapter 2.66, Title 2 of the Ordinance Code of the County of Kern remain unchanged.

Section 15. Section 4.30.050, Chapter 4.30, Title 4 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

4.30.050 Fee – Payment.

The IM fee shall be paid in full, in cash, when collected at the time the project applicant makes application for a building permit. The fee may be paid by cash, pledged certificate of deposit, irrevocable letter of credit, or of performance/surety bond if the project applicant wishes to pay the IM fee prior to recordation of the final tract or parcel map. All but cash shall be made payable upon demand by the Director of the Planning and Community Development Department.

Section 16. Section 5.04.080, Chapter 5.04, Title 5 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

5.04.080 Investigation of Business Location.

No license for any of the businesses specified in this title shall be issued until it is determined that the appropriate zoning ordinance and regulations and the provisions of the Uniform Fire Code have been or will be complied with. It shall be the duty of the Director of Planning and Community Development, the County Health Officer, and the Fire Marshal to conduct the appropriate investigation, and for that purpose said persons and departmental employees are "investigating officers" as that term is used in this Title. To assure compliance with the applicable ordinances, rules, and regulations, such investigating officers may attach conditions to their respective approvals and may

conduct follow-up investigations to assure compliance and to determine that the conditions are being observed.

Section 17. Sections 5.16.130, Chapter 5.16, Title 5 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

5.16.130 Investigation of Applicant.

Upon receipt of the completed application, the Sheriff shall make an investigation to determine whether all of the statements in the application are true and shall refer the application to other interested departments of the County, including, but not limited to, the Directors of the Planning and Community Development Department, Public Health Services Department, and Fire Department to determine whether the appropriate zoning ordinances and regulations, building code ordinances, health ordinances and regulations, and the provisions of the Uniform Fire Code have been or will be complied with.

Section 18. Section 5.16.150, Chapter 5.16, Title 5 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

5.16.150 Denial of License.

In the event the Sheriff's Vice Division, or other interested department of the County, including, but not limited to, the Directors of the Planning and Community Development Department, Public Health Services Department, and Fire Department, recommends against the issuance of the license, the Sheriff shall refuse to issue the license and shall refund one-half (1/2) of the application fee to the applicant together with written notification of the denial of the license.

Section 19. Section 5.16.280, Chapter 5.16, Title 5 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

5.16.280 Attendance Limited to Occupancy Capacity.

Notwithstanding that bingo games are open to the public, attendance at any bingo game shall be limited to the occupancy capacity of the room in which such game is conducted, as determined by the Fire Department and Planning and Community Development Department of the County in accordance with applicable laws and regulations. The licensee shall not reserve seats or space for any person.

Section 20. Section 5.20.060 of Chapter 5.20, Title 5 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

5.20.060 Investigation by Sheriff.

Upon receipt of the completed application, the Sheriff's office shall make an investigation to determine whether the application is complete, whether there are material omissions, and whether all of the statements and information in the application are true, and shall refer the application to other interested departments of the County, including, but not limited to, the Directors of the Planning and Community Development

Department, Building Inspection Division, Public Health Services Department, and Fire Department to determine whether the appropriate zoning ordinances and regulations, building code ordinances, health ordinances and regulations, and the provisions of the Uniform Fire Code have been or will be complied with.

Section 21. Subsection (E) of Section 7.20.040 of Chapter 7.20, Title 7 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

E. "Enforcement Officer" shall mean the Development Services Agency Director or his/her designee. When enforcing the provisions of this chapter, the employees of the Enforcement Officer shall have the power to issue citations for violations of the provisions of this chapter.

Section 22. Subsections (A) through (D) and (F) through (M) of Section 7.20.040 of Chapter 7.20, Title 7 of the Ordinance Code of the County of Kern remain unchanged.

Section 23. Subsection (C) of Section 8.28.020 of Chapter 8.28, Title 8 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

C. "Enforcement Officer" means the Development Services Agency Director or his designee, the Director of Engineering, Surveying, and Permit Services or his designee, or the Director of the Waste Management Department or his designee. When enforcing the provisions of this chapter, the employees of the Enforcement Officer shall have the power to make arrests for violation of the provisions of this chapter which occur in their presence and to issue citations for such violation in accordance with Chapter 5 of Title 3 of Park 2 of the Penal Code of the State of California.

Section 24. Subsections (A), (B), and (D) through (K) of Section 8.28.020 of Chapter 8.28, Title 8 of the Ordinance Code of the County of Kern remain unchanged.

Section 25. Subsection (H) of Section 8.36.020 of Chapter 8.36, Title 8 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

H. To create noise from construction, between the hours of 9:00 p.m. and 6:00 a.m. on weekdays and 9:00 p.m. and 8:00 a.m. on weekends, which is audible to a person with average hearing faculties or capacity at a distance of one hundred fifty (150) feet from the construction site, if the construction site is within one thousand (1,000) feet of an occupied residential dwelling except as provided below:

1. The Development Services Agency Director or his designated representative may for good cause exempt some construction work for a limited time.

2. Emergency work is exempt from this section.

Section 26. Subsections (A) through (G) of Section 8.36.020 of Chapter 8.36, Title 8 of the Ordinance Code of the County of Kern remain unchanged.

Section 27. Subsections (C) and (D) of Section 10.08.040 of Chapter 10.08, Title 10 of the Ordinance Code of the County of Kern, are hereby amended to read as follows:

C. The Road Commissioner of the County is authorized and directed to cause signs, indicating the maximum gross weight capacity so established, be erected at each end of that portion of any alley upon which the permissible gross weight is established, as hereinafter provided.

D. In the event that any person, firm, or corporation finds it necessary to move or transport over any alley, upon which a weight limitation has been fixed, any vehicle or vehicle and load, the weight of which is in excess of the fixed weight limitations, and it is impossible to divide such load or reduce the weight thereof, application may be made to the Board of Supervisors and hearing conducted by the Board of Supervisors for a special permit to move such load over or upon such alley, in substantially the same manner and mode as prescribed by Sections 10.08.060 and 10.08.080 of this chapter. In lieu of an application presented to the Board of Supervisors, the application may be made to the Road Commissioner in substantially the same manner and mode as prescribed by Section 10.08.070 of this chapter.

Section 28. Subsections (A), (B), and (E) through (G) of Section 10.08.040 of Chapter 10.08, Title 10 of the Ordinance Code of the County of Kern remain unchanged.

Section 29. Section 10.08.070 of Chapter 10.08, Title 10 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

10.08.070 Permit to Move Indivisible Loads – Roads Commissioner Authority.

The application mentioned in Section 10.08.060 for a special permit to move indivisible loads or to move loads without reducing the weight thereof, may be made to the County Road Commissioner in lieu of to the Board of Supervisors, and the Road Commissioner shall then have the power to give approval to said application and grant the permit to move if he finds that the load in indivisible and that it is necessary to move it as stated in the application, and if, considering the structural strength of the road involved, the weight of the vehicle and load, and the precautions to be used to prevent damage to the road and any bridge therealong he believes that no damage to such road or bridge is likely to occur, or he may grant approval on such conditions as he sees fit to impose for the protection of such road or bridge. All such findings and permits shall be reported to the Board and the application and permit filed with the Board.

Section 30. Subsection (A) of Section 10.08.090 of Chapter 10.08, Title 10 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

A. The County Road Commissioner shall, upon application in writing, and if good cause appears, issue a special permit in writing authorizing the applicant to

operate or move over county roads a vehicle or combination of vehicles or special mobile equipment whose load exceeds the stated legal maximums for the purpose of moving perishable and semi-perishable raw agricultural products from the fields to processing plants when the applicant has a valid extralegal weight permit issued by the State Department of Transportation, Division of Highways for hauling such overweight agricultural loads on state roads or would otherwise be eligible for such a permit.

Section 31. Subsections (B) and (C) of Section 10.08.090 of Chapter 10.08, Title 10 of the Ordinance Code of the County of Kern remain unchanged.

Section 32. Subsections (6), (21), (24), (25), (26), (32), and (34) of Section 10.16.160, Chapter 10.16, Title 10 of the Ordinance Code of the County of Kern, are hereby amended to read as follows:

6. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, that portion of the highway being the east side of alley that is north of Decatur Street and ninety-six (96) feet west of Chester Avenue, beginning where said east side of alley intersects with north side of Decatur Street and a point seventy-five (76) feet north thereof along the alley, is established as a loading zone for that portion of the unincorporated area of the county.

b. Any person, other than the operator of a vehicle, when loading or unloading passengers, who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portions described in this paragraph (a) of this subsection as "loading zone" between 8:00 a.m. and 4:00 p.m., with the exception of Saturdays, Sundays, and holidays, is guilty of an infraction.

21. a. Pursuant to Section 21458 of the Vehicle Code of the State of California, a bus loading zone is established beginning at the southwest curb return of Fairview Road at Sparks Street, thence westerly along the south curb for a distance of one hundred thirty-nine (139) feet to the true point of beginning, thence westerly for a distance of one hundred five (105) feet.

b. Any person, other than the operator of a bus, when loading or unloading passengers, who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portion of the street described in paragraph (a) of this subsection as "bus loading zone" between the hours of 8:00 a.m. and 4:00 p.m., with the exception of Saturdays, Sundays, and holidays, is guilty of an infraction.

24. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, a passenger and freight loading and unloading zone on the north side of Minner Avenue beginning at a point two hundred seventy-seven (277) feet east of the easterly flowline of California Street, thence easterly for a distance of seventy (70) feet is established as a three (3) minute loading and unloading zone for that portion of the unincorporated area of the County.

b. Any person, other than the operator of a vehicle, when loading or unloading passengers or freight who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portions described in subparagraph (a) of this subsection as "loading and unloading zone" is guilty of an infraction.

25. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, a bus loading zone is established on Casa Loma Drive at Casa Loma School, beginning at the southwest curb return with Madison Street, thence westerly for a distance of three hundred ninety (390) feet to the true point of beginning, thence westerly for a distance of one hundred sixty-four (164) feet.

b. Any person, other than the operator of a bus, when loading or unloading passengers who stops, parks, or leave standing a vehicle adjacent to the curb on any portions of the street described in subparagraph (a) of this subsection as "bus loading zone" between the hours of 8:00 a.m. and 4:00 p.m., with the exception of Saturdays, Sundays, and holidays, is guilty of an infraction.

26. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, a bus loading zone is established on Oswell Street south of Center Street at Sierra Junior High School, beginning at the southwest curb return on Center Street, thence southerly for a distance of two hundred sixty-five (65) feet to the true point of beginning, thence southerly for a distance of one hundred sixty-one (161) feet.

b. Any person, other than the operator of a bus, when loading or unloading passengers who stops, parks, or leaves standing a vehicle adjacent to the curb on any portions of the street described in subparagraph (a) of this subsection as a "bus loading zone" between the hours of 8:00 a.m. and 4:00 p.m., with the exception of Saturdays, Sundays, and holidays, is guilty of an infraction.

32. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, a freight loading and unloading zone on the west side of Airport Drive beginning eighty (80) feet south of the curb return on Olive, thence southerly for a distance of forty-four (44) feet is established for that portion of the unincorporated area of the county.

b. Any person, other than the operator of a vehicle, when loading or unloading freight who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portions described in subparagraph (a) of this subsection as "loading and unloading zone" is guilty of an infraction.

34. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, a passenger and freight five (5) minute loading and unloading zone along the south side of Texas Street beginning at a point two hundred seventy (270) feet east of the southeast curb return at Bliss Street, thence easterly for a distance of two hundred eighty (280) feet is established.

b. Any person, other than the operator of a vehicle, when loading or unloading passengers or freight who stops, parks, or leaves standing a vehicle, whether

attended or unattended, in that space adjacent to the curb on any of the portion described in subparagraph (a) of this subsection as a five (5) minute "loading and unloading" zone is guilty of an infraction.

Section 33. Subsections (1) through (4), (9) through (11), (13) through (16), (19) through (20), (27) through (28) through (30), (33), (35), (37) through (39), (44) through (47), (50) through (57) of Section 10.16.160, Chapter 10.16, Title 10 of the Ordinance Code of the County of Kern remain unchanged.

Section 34. Subsection (1) of Section 10.16.170, Chapter 10.16, Title 10 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

1. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, that portion of the highway on the north side of Twenty-Mule Team Road, beginning two hundred forty (240) feet east of the east flowline of Boron Avenue, thence easterly for a distance of fifty (50) feet is established as a three (3) minute loading zone for that portion of the unincorporated area of the County.

b. Any person, other than the operator of a vehicle, when loading or unloading passengers or freight, who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portions described in subsection (a) of this section as "loading zone" is guilty of an infraction.

Section 35. Subsection (1) of Section 10.16.180, Chapter 10.16, Title 10 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

1. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, that portion of the highway on the west side of Main Street beginning at a point forty-three (43) feet south of the south curb line of First Street, thence southerly a distance of thirty-five (35) feet in Buttonwillow, California, is established as a loading zone for that portion of the unincorporated area of the County.

b. Any person, other than the operator of a vehicle, when loading or unloading passengers or depositing mail, who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portions described in subsection (a) of this section as "loading zone" for more than three (3) minutes, is guilty of an infraction.

Section 36. Subsection (1) of Section 10.16.190, Chapter 10.16, Title 10 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

1. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, that portion of the highway on the west side of Bace Street beginning at the southwest curb return on Base Street at the intersection of Taft Highway, thence south twenty-five (25) feet is established as a three (3) minute loading zone for that portion of the unincorporated area of the County.

b. Any person, other than the operator of a vehicle, when loading or unloading passengers or freight, who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portions described in subsection (a) of this section as "loading zone," is guilty of an infraction.

Section 37. Subsections (2), (3), and (4) of Section 10.16.200, Chapter 10.16, Title 10 of the Ordinance Code of the County of Kern, are hereby amended to read as follows:

2. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, that portion of the highway beginning at the south gutter line of Paradise Road where it intersects the west gutter line of Myrtle Avenue, thence westerly for a distance of seventy (70) feet along the south gutter line of Paradise Road, is established as a loading zone for that portion of the unincorporated area of the county.

b. Any person, other than the operator of a vehicle, when loading or unloading passengers or freight, who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portions described in paragraph (1) of this subsection as "loading zone" is guilty of an infraction.

3. a. Pursuant to section 22507 of the Vehicle Code of the State of California, on the south side of Palm Avenue beginning one hundred nineteen (119) feet east of the southeast curb return of Main Street on Palm Avenue, thence easterly for a distance of one hundred (100) feet, is established as a loading zone for that portion of the unincorporated area of the county.

b. Any persons other than the operator of a vehicle, when loading or unloading passengers or freight who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portions described in subparagraph (1) of this subsection as "loading zone is guilty of an infraction.

4. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, on the north side of Segrue Road beginning at the northeast curb return of Main Street on Segrue Road, thence easterly for a distance of ninety-seven (97) feet to the true point of beginning, thence easterly for a distance of one hundred (100) feet is established as a loading zone for that portion of the unincorporated area of the county.

b. Any person, other than the operator of a vehicle, when loading or unloading passengers or freight, who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portions described in subparagraph (1) of this subsection as "loading zone" is guilty of an infraction.

Section 38. Subsection (A) of Section 10.16.205, Chapter 10.16, Title 10 of the Ordinance Code of the County of Kern, are hereby amended to read as follows:

A. 1. Pursuant to Section 22507 of the Vehicle Code of the State of California, a bus loading zone is established along the west side of Laura Street, beginning at the southwest curb return with Pat Avenue, thence southerly for a distance of two hundred eighty (280) feet.

2. Any person, other than the operator of a bus, when loading or unloading passengers, who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portion described in paragraph (a) of this subsection as "bus loading zone" is guilty of an infraction.

Section 39. Subsection (1) of Section 10.16.230, Chapter 10.16, Title 10 of the Ordinance Code of the County of Kern, are hereby amended to read as follows:

1. a. Pursuant to Section 22507 of the Vehicle Code of the State of California, that portion of the north side of Park Road beginning one hundred forty-seven (147) feet west of Santa Maria Drive, thence westerly for a distance of three hundred sixty (360) feet, is established as a five (5) minute loading zone.

b. Any person, other than the operator of a vehicle, when loading or unloading passengers or freight, who stops, parks, or leaves standing a vehicle, whether attended or unattended, in that space adjacent to the curb on any of the portions described in subsection (a) of this section as "five (5) minute loading zone' is guilty of an infraction.

Section 40. Section 13.12.060, Chapter 13.12, Title 13 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

13.12.060 Appeals of the Environmental Health Division action.

If the Public Health Services Department acting through its Environmental Health Division denies a request for a variance to the ordinance or subjects the variance to conditions which the applicant believes to be unreasonable, the applicant may appeal the decision of the Department to the Board of Supervisors. The notice of appeal shall be filed with the Clerk of the Board of Supervisors within thirty (30) days after the decision of the Department and shall set forth each and all grounds of objection to the decision appealed.

The Clerk of the Board of Supervisors shall forthwith file a copy of the notice of appeal with the Department. The Board of Supervisors shall, within thirty (30) days after receipt of a written appeal, hold a hearing to determine whether the variance shall be issued to the applicant and if a variance is to be issued, the terms and conditions under which it shall be issued. Such a hearing shall be conducted in accordance with Section 13.12.070 of this chapter and may be continued from time to time by the Board. The decision of the Board of Supervisors shall be rendered within seven (7) days after the conclusion of the hearing and the decisions shall be final as to all matters determined. Notice of the decision shall be given as provided in Section 13.12.075 of this chapter.

Section 41. Section 13.12.090, Chapter 13.12, Title 13 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

13.12.090 Enforcement by the Environmental Health Division.

The Public Health Services Department acting through its Environmental Health Division and its employees have the duty to enforce the provisions of this chapter and are given the power pursuant to Penal Code Section 836.5 to make arrests and to issue citations pursuant to Chapter 5C of Title 3 of Part 2 of the Penal Code (commencing with Section 835.5) for the violation of any provisions of this chapter occurring in the Environmental Health Division employee's presence.

Section 42. Sections 13.12.100, Chapter 13.12, Title 13 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

13.12.100 Cooperation of the Department of Planning and Community Development.

The Public Health Services Department acting through its Environmental Health Division may call upon the Department of Planning and Community Development for technical assistance in the enforcement of the provisions of this chapter.

Section 43. Section 14.08.230, Chapter 14.08, Title 14 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

14.08.230 Hazardous Material Monitoring Well.

Hazardous material monitoring wells shall be constructed and sealed in conformance with the standards set forth in the County Health Department publication UT-50 or any successor publication.

Section 44. Subsection (4) of Section 14.12.300, Chapter 14.12, Title 14 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

4. "Building Inspector" means the Director of the Engineering, Surveying, and Permit Services Department of the County of Kern, and includes his deputies.

Section 45. Subsections (1) through (3) and (5) through (12) of Section 14.12.300 of Chapter 14.12, Title 14 of the Ordinance Code of the County of Kern remain unchanged.

Section 46. Subsections (B), (E), and (G) of Section 17.04.060, Chapter 17.04, Title 14 of the Ordinance Code of the County of Kern, are hereby amended to read as follows:

B. "Building Official," "Administrative Authority," "Plumbing Official," and "Chief Electrical Inspector" means the Director of the Development Services Agency of the County of Kern or his authorized designee.

E. "Building Inspection Department" and "Department" means the Building Inspection Division and the Engineering, Surveying, and Permit Services Department established by Section 2.36.010 of the Kern County Code.

G. "Director" means the Director of the Development Services Agency of the County of Kern or his designee.

Section 47. Subsections (A), (C), (D), (F), and (H) through (J) of Section 17.04.060 of Chapter 17.04, Title 17 of the Ordinance Code of the County of Kern remain unchanged.

Section 48. Subsection (A), Section 17.12.080, Chapter 17.12, Title 17 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

17.12.080 Chapter 2 Amended – Definitions.

Chapter 2 of the California Mechanical Code is amended by changing or adding certain definitions as follows:

A. Section 204:

"Building Code" means the Kern County Building Code as adopted by the Code of Building Regulations.

"Building Official" means the Director of the Development Services Agency of the County of Kern in his capacity as Building Official or his authorized designee.

Section 49. Subsection (B), Section 17.12.080 of Chapter 17.12, Title 17 of the Ordinance Code of the County of Kern remains unchanged.

Section 50. Subsection (A), Section 17.16.050, Chapter 17.16, Title 17 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

17.16.050 Section 401 Amended – Definitions.

Section 401 of the Uniform Housing Code is amended by changing or adding certain definitions as follows:

A. Definitions added.

"Building Official" is added and shall mean the Director of the Development Services Agency in his capacity as Building Official or his designee, under any other adopted code, is necessarily intended.

"Public Official" shall mean the Building Official, Health Officer, or designees.

Section 51. Subsection (B), Section 17.16.050 of Chapter 17.16, Title 17 of the Ordinance Code of the County of Kern remains unchanged.

Section 52. Section 17.20.170, Chapter 17.20, Title 17 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

17.20.170 Appendix K, Section K1 Amended – Private Sewage Disposal – General.

Section K1 of Appendix K of the California Plumbing Code is amended by adding paragraph (K) to read as follows:

(k) In certain areas of the County which have poor soils or other problems relative to sewage disposal, the sewage disposal system shall be installed and inspected before the building foundation inspection is made. In the case of a lot which will not accommodate the one hundred percent (100%) expansion area for leaching purposes, lying within a legal subdivision of land existing prior to the effective date of Ordinance G-5137, the Director of the Development Services Agency or his authorized designee may approve a lesser area for leaching purposes in exercise of his discretion.

Section 53. Subsection (D) of Section 17.24.020, Chapter 17, Title 17 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

D. "Director" means the Director of the Development Services Agency of the County of Kern or his designee.

Section 54. Subsections (A) through (C), (E), and (F) of Section 17.24.020, Chapter 17.16, Title 17 of the Ordinance Code of the County of Kern remain unchanged.

Section 55. Subsection (A), Section 17.36.060, Chapter 17.36, Title 17 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

17.36.060 Section 301 amended – Definitions.

Section 301 of the Uniform Housing Code for the Abatement of Dangerous Buildings is amended by changing or adding certain definitions as follows:

A. Definitions added.

"Board" and "Board of Appeals" are added and shall mean the Kern County Board of Supervisors.

"Public Works Department" and "Public Works Director" shall mean the Engineering, Surveying, and Permit Services Department and the Director thereof.

Section 56. Subsection (B), Section 17.36.060 of Chapter 17.36, Title 17 of the Ordinance Code of the County of Kern remains unchanged.

Section 57. Subsection (12), Section 17.48.060, Chapter 17.48, Title 17 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

12. "Building Official" means the Director of the Development Services Agency of the County of Kern or his/her designee.

Section 58. Subsections (1) through (11) and (13) through (75), Section 17.48.060 of Chapter 17.48, Title 17 of the Ordinance Code of the County of Kern remain unchanged.

Section 59. Subsection (B) of Section 17.52.180, Chapter 17.52, Title 17 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

B. The school district shall request the hearing required by this section. Such request shall contain the amounts needed for interim school facilities and the facts which support finding s paragraphs (1) through (5) of subsection (A) of this section. A copy of such request shall be forwarded to the County Department of Planning and Community Development, which shall determine whether the Board may properly make findings (A)(1) through (A)(5) of this section and advise the Board in writing of its conclusions.

Section 60. Subsections (A) and (C), Section 17.52.180 of Chapter 17.52, Title 17 of the Ordinance Code of the County of Kern remain unchanged.

Section 61. Section 18.05.070, Chapter 18.05, Title 18 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

18.05.070 Relationship to Other Regulations and Requirements.

The regulations of this title and requirements or conditions imposed pursuant to this title shall not supersede any other regulations or requirements adopted or imposed by the Kern County Board of Supervisors, the Kern County Fire Department, the Kern County Public Health Services Department acting through its Environmental Health Division, the Regional Water Quality Control Board, the Air Pollution Control District, the Kern County Engineering, Surveying, and Permit Services Department, the Kern County Water Agency, or any other local, state, or federal agency that has jurisdiction by law over uses and development authorized by this title. All uses and development authorized by this title shall comply with all other such regulations and requirements. Where two (2) or more ordinances regulate the same use or activity, the more restrictive ordinance shall apply unless a variation has been specifically granted.

No application authorized under this title shall be processed if the property for which the application is submitted contains any violations of the Kern County Zoning Ordinance (Title 19 - Kern County Ordinance Code) until such time as all such violations are fully abated, unless processing the application is necessary to abate the applicable Zoning Ordinance violation.

Section 62. Section 18.10.027, Chapter 18.10, Title 18 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

18.10.027 Development Services Agency.

The Development Services Agency includes the Planning and Community Development Department, the Roads Department, and the Engineering, Surveying, and Permit Services Department. The Development Services Agency Director may authorize changes in the scope of responsibilities in the member departments that are included in Development Services Agency that may result in some changes in the responsibilities of those member departments as set forth in this title.

Section 63. Subsection (A) of Section 18.10.030 of Chapter 18.10, Title 18 of the Ordinance Code of the County of Kern is hereby amended to read as follows:

A. Membership. The subdivision review committee is a staff level meeting to discuss technical matters relating to study maps, tentative tract maps, and any associated development and limited design variations. It shall be composed of the Planning and Community Development Director, the Environmental Health Director, the Fire Chief, the Director of Engineering, Surveying, and Permit Services, the Director of Roads Department, or their designated representatives. The Board of Supervisors may also appoint the head of any other County department or agency to membership on such committee. The Planning and Community Development Director or his designated representative shall act as chair of the committee. In the absence of both, the committee shall elect a temporary chairperson. By acting as chairperson, a member shall not be disqualified to vote.

Section 64. Subsection (B) of Section 18.10.030 of Chapter 18.10, Title 18, remains unchanged.

Section 65. Section 18.70.123, Chapter 18.70, Title 18 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

18.70.123 Planning Director.

"Planning Director" means the Director of the Planning and Community Development Department of the County of Kern or his/her designated representative.

Section 66. Section 18.70.140, Chapter 18.70, Title 18 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

18.70.140 Engineering and Survey Services - Director.

"Director of Engineering and Survey Services" means the Director of the Engineering, Surveying, and Permit Services Department of the County of Kern or his/her designated representative.

Section 67. Section 18.70.186, Chapter 18.70, Title 18 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

18.70.186 Health Officer.

"Health Officer" means the Director of Environmental Health for the County of Kern or his/her designated representative.

Section 68. Section 19.04.096, Chapter 19.04, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

19.04.096 Building Official.

"Building Official" means the Kern County Development Services Agency Director or his/her designee.

Section 69. Section 19.04.568, Chapter 19.04, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

19.04.568 Planning Director.

"Planning Director" means the Director of the Planning and Community Development Department of the County of Kern or his/her designee.

Section 70. Section 19.04.597, Chapter 19.04, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

19.04.597 Engineering and Survey Services Department.

"Engineering and Survey Services Department" means the Engineering, Surveying, and Permit Services Department of the County of Kern, including the County Surveyor's office.

Section 71. Section 19.04.600, Chapter 19.04, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

19.04.600 Engineering and Survey Services Director.

"Engineering and Survey Services Director" means the Engineering, Surveying, and Permit Services Director of the County of Kern or his/her designee.

Section 72. Subsection (C) of Section 19.14.130, Chapter 19.04, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

C. The breeding and raising of livestock, in greater numbers than allowed by subsection (A) of Section 19.14.130 of this chapter, by minors in conjunction with a student-oriented fair project sponsored by a bona fide agricultural organization shall be permitted upon application to and approval by the Planning and Community Development Director of a temporary animal permit in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title.

1. Application Contents. An application for a temporary animal permit shall include the following:

a. The name and address of the applicant;
b. The name(s) and address(es) of the property owner(s);
c. Assessor's Parcel Number(s);
d. Legal description of the subject property;
e. Name of the organization sponsoring the applicant;
f. A plot plan showing the location of proposed pens, coops, or areas for the breeding and raising of animals in relation to existing residence(s) and other buildings and structures within one hundred (100) feet of pens, coops, or areas housing livestock;
g. The signature of each owner of the real property abutting the subject lot consenting to the granting of the temporary animal permit.

2. Development Standards and Conditions. The breeding and raising of animals on a temporary basis shall comply with the following standards and conditions:

a. Applicant shall be sponsored by a bona fide organization, such as, but not limited to, Future Farmers of America, 4-H Club, Cow-Belles, or Junior Farmers.
b. The increase in animal density shall not exceed the density allowed by subsection (A) Section 19.14.130 of this chapter by more than fifty percent (50%). In any case, however, at least two (2), but no more than six (6), additional animals shall be allowed.
c. The temporary animal permit shall be effective for a maximum period of six (6) months from the effective date of the permit. No more than one (1) such permit shall be approved for any lot within a one (1) year period.
d. The written consent of each abutting property owner consenting to the granting of the temporary animal permit must be obtained.
e. The applicant shall allow inspection of animal maintenance facilities by the Kern County Engineering and Survey Services Department (Building Inspection Division) and the Kern County Health Department.
f. The Planning and Community Development Director may revoke the temporary animal permit at any time for noncompliance with subsection (C)(2) of Section 19.14.130 of this chapter or upon receipt of a recommendation for revocation from the Kern County Public Health Services Department.
g. Each additional animal authorized by the temporary animal permit over the allowable animal density specified by subsection (A) of Section 19.14.130 of this chapter shall be removed upon expiration of the permit.

Section 73. Subsections (A), (B), and (D) through (H) of Section 19.14.130 of Chapter 19.14, Title 19 of the Ordinance Code of the County of Kern remain unchanged.

Section 74. Subsection (A) of Section 19.60.150, Chapter 19.60, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

A. The breeding and raising of animals on a temporary basis shall comply with the following standards and conditions:

1. The applicant shall be sponsored by a bona fide organization, such as, but not limited to, Future Farmers of America, 4-H Club, Cow-Belles, or Junior Farmers.

2. The increase in animal density shall not exceed the density allowed by Section 19.60.020 of this chapter by more than fifty percent (50%). In any event, at least two (2), but no more than six (6), additional animals shall be allowed.

3. The temporary animal permit shall be effective for a maximum period of six (6) months from the effective date of the permit. No more than one (1) such permit shall be approved for any lot within a one (1) year period.

4. The written consent of each abutting property owner consenting to the granting of the temporary animal permit must be obtained.

5. The applicant shall allow inspection of animal maintenance facilities by the Kern County Engineering, Surveying, and Permit Services Department (Building Inspection Division) and the Kern County Public Health Services Department.

6. Each additional animal authorized by the temporary animal permit over the allowable animal density specified by Section 19.60.020 of this chapter shall be removed upon expiration of the permit.

Section 75. Subsection (B) of Section 19.60.150 of Chapter 19.60, Title 19 of the Ordinance Code of the County of Kern remains unchanged.

Section 76. Subsection (F) of Section 19.70.040, Chapter 19.70, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

F. Individual sewage disposal systems (e.g., septic tank systems), unless protected by flood control devices approved by the Kern County Engineering, Surveying, and Permit Services Department and constructed in accordance with the requirements of the Kern County Public Health Services Department so as to minimize infiltration of floodwaters into the systems and discharges from the systems into the floodwaters;

Section 77. Subsections (A) through (E), (G), and (H) of Section 19.70.040 of Chapter 19.70, Title 19 of the Ordinance Code of the County of Kern remain unchanged.

Section 78. Subsection (B) of Section 19.86.030, Chapter 19.86, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

B. Front-yard and street-side side-yard setback areas, excluding approved driveway entrances, maneuvering areas, and public sidewalks, shall be landscaped. Within this area, trees are required and shall be planted no farther than fifty (50) feet apart and no closer than five (5) feet from the back of the sidewalks. No plant material that will grow to a height of more than eighteen (18) inches shall be planted in the street right-of-way, except where authorized by the Roads Department.

Section 79. Subsections (A) and (C) through (E) of Section 19.86.030 of Chapter 19.86, Title 19 of the Ordinance Code of the County of Kern remain unchanged.

Section 80. Subsection (B) of Section 19.86.040, Chapter 19.86, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

B. Setback areas between streets and the perimeter fence of the mobile home park, excluding approved driveway entrances and public sidewalks, shall be landscaped. Within this area, trees are required and shall be planted no closer than five (5) feet from the back of the sidewalks. No plant material that will grow to a height of more than eighteen (18) inches shall be planted in the street right-of-way, except where authorized by the Roads Department.

Section 81. Subsections (A) and (C) through (E) of Section 19.86.040 of Chapter 19.86, Title 19 of the Ordinance Code of the County of Kern remain unchanged.

Section 82. Subsection (B) of Section 19.89.040, Chapter 19.89, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

B. The following performance standards shall apply to all adult businesses:

1. No alcoholic beverages shall be served, sold, or consumed on the premises.

2. The adult business shall not conduct or sponsor any special events, promotions, festivals, concerts, or similar activities which would create a demand for parking spaces beyond the number of spaces required for the business.

3. The traffic generated by the adult business shall not overload the capacity of the surrounding street system and shall not create a hazard to public safety, as determined by the Kern County Roads Department.

4. No adult business shall be operated in any manner that permits the observation of any persons or material depicting, describing, or related to "specified sexual activities" or "specified anatomical areas," inside the premises, from any public way or from any location outside the building or area of such establishment. This provision shall apply to any display, decoration, sign, show window, or other opening.

5. No loudspeakers or sound equipment shall be used by an adult business for the amplification of sound to a level audible beyond the walls of the building in which the business is located.

6. All exterior areas of the adult business, including buildings, landscaping, and parking areas shall be maintained in a clean and orderly manner at all times.

7. Any license required by the Kern County Sheriff's Department pursuant to Chapter 5.08 of this code shall be kept current at all times.

8. Each adult business shall confirm to all applicable laws and regulations.

Section 83. Subsection (A) of Section 19.89.040 of Chapter 19.86, Title 19 of the Ordinance Code of the County of Kern remains unchanged.

Section 84. Subsection (O) of Section 19.98.050, Chapter 19.98, Title 19 of the Ordinance Code of the County of Kern, is hereby amended to read as follows:

O. All required federal, state, and county rules and regulations shall be complied with at all times, including, but not limited to, the rules and regulations of the following agencies:

1. California Division of Oil and Gas;
2. Kern County Fire Department;
3. Kern County Public Health Services Department;
4. Regional Water Quality Control Board;
5. Air Pollution Control District;
6. Kern County Engineering, Surveying, and Permit Services Department.

Section 85. Subsections (A) through (N) of Section 19.98.050 of Chapter 19.98, Title 19 of the Ordinance Code of the County of Kern remain unchanged.

- **19.98.030 - Drilling by ministerial permit.**

A.

No well for use as an injection well and no well for the exploration for or development or production of oil or gas or other hydrocarbon substances may be drilled, and no related accessory equipment, structure or facility may be installed in the Light Industrial (M-1) or Recreation Forestry (RF) districts until an application for plot plan review has been submitted to and approved by the planning director as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. In approving an application for plot plan review, the planning director may waive any standards set out in Section 19.98.050 of this chapter if he/she determines that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity.

B.

Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1.

The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2.

The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation or entity.

(Ord. G-6077 § 310, 1994; Prior code § 7260.03)

- **19.98.040 - Drilling by conditional use permit.**

A.

No well for use as an injection well and no well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure or facility may be installed in any zoning district described in this title in which such uses are permitted as conditional uses until an application for a conditional use permit has been submitted to and approved by the planning commission as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the standards and procedures set out in Sections 19.102.130 through 19.102.180 and Chapter 19.104 of this title. In approving a conditional use permit, the planning commission may waive any condition set out in Section 19.98.050 of this chapter if it determines that such waiver will not result in material detriment to the public welfare or the property of other persons located in the vicinity.

B.

Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1.

The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2.

The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation or entity;

Current

1994 update

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

19.98.030 DRILLING BY MINISTERIAL PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil or gas or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in the Light Industrial (M-1)or Recreation-Forestry (RF) Districts until *an application* for *plot plan review has been submitted* to and approved by the Director of Planning and Development Services as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. In *approving an application* for plot plan review, the Director of Planning and Development Services may waive any standards set out in Section 19.98.050 of this chapter if he/she determines that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

19.98.040 DRILLING BY CONDITIONAL USE PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in any zoning district described in this title in which such uses are permitted as conditional uses until an application for a conditional use permit has been submitted to and approved by the Board of Zoning Adjustment as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the standards and procedures set out in Sections 19.102.130 through 19.102.180 and Chapter 19.104 of this title. In approving a conditional use permit, the Board of Zoning Adjustment may waive any condition set out in Section 19.98.050 of this chapter if it determines that such waiver will not result in material detriment to the public welfare or the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

July 1993 - May 1994

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

19.98.030 DRILLING BY MINISTERIAL PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil or gas or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in the Light Industrial (M-1)or Recreation-Forestry (RF) Districts until an application for plot plan review has been submitted to and approved by the Planning Director as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. In approving an application for plot plan review, the Planning Director may waive any standards set out in Section 19.98.050 of this chapter if he/she determines that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

19.98.040 DRILLING BY CONDITIONAL USE PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in any zoning district described in this title in which such uses are permitted as conditional uses until an application for a conditional use permit has been submitted to and approved by the Board of Zoning Adjustment as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the standards and procedures set out in Sections 19.102.130 through 19.102.180 and Chapter 19.104 of this title. In approving a conditional use permit, the Board of Zoning Adjustment may waive any condition set out in Section 19.98.050 of this chapter if it determines that such waiver will not result in material detriment to the public welfare or the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

1990 update

C.

If a producing well or service well is not completed upon land subject to a conditional use permit issued pursuant to this chapter and Chapter 19.104 of this title within twelve (12) months from the date of issuance of the permit, or within any extended period thereof, the conditional use permit shall expire and the premises shall be restored as nearly as practicable to their original condition. No permit shall expire while the permittee is continuously conducting drilling, redrilling, completing or abandoning operations, or related operations, in a well on the lands covered by such permit, which operations were commenced while such permit was otherwise in effect. Continuous operations are operations suspended not more than thirty (30) consecutive days. If, at the expiration of the twelve (12) month period, the permittee has not completed his drilling program on the lands covered by such permit, the planning commission may, upon a written request of the permittee, extend the permit for the additional time requested by permittee for the completion of such drilling program.

(Ord. G-6551 § 98, 1998: Ord. G-5346 § 100, 1990; Prior code § 7260.04

- **19.98.050 - Development standards and conditions.**

All wells drilled, pursuant to Section 19.48.020 of this title and Sections 19.98.030 and 19.98.040 of this chapter, for the exploration for or development or production of oil, gas and other hydrocarbon substances and related facilities and activities shall comply with the following standards, unless otherwise provided in this chapter:

A.

No oil or gas well shall be drilled within one hundred (100) feet of any public highway or building not necessary to the operation of the well, or within one hundred fifty (150) feet of any dwelling, or within three hundred (300) feet of any building used as a place of public assembly, institution or school, or within fifty (50) feet of any building utilized for commercial purposes constructed prior to the commencement of such drilling, without the written consent of the owner of such structure.

B.

All drilling and production activities shall conform to all applicable fire and safety regulations, and firefighting apparatus and supplies required by the county fire department shall be maintained on the site at all times during drilling and production operations.

C.

No signs, other than directional and warning signs and those required for identification of the well, shall be constructed, erected, maintained or placed on the premises or any part thereof, except those required by law or ordinance to be displayed in connection with the drilling or maintenance of the well.

D.

Sanitary toilet and washing facilities, if required by the county health department or other governmental agencies, shall be installed and maintained in a clean and sanitary condition during drilling operations, and at such other times as specified by these agencies.

E.

Proven technological improvements generally accepted and used in drilling and production methods shall be employed as they may become available if they are capable of reducing nuisances or annoyances.

F.

All derricks, boilers and other drilling equipment employed pursuant to this section to drill any well hole or to repair, clean out, deepen or redrill any completed or drilling well shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derricks, boilers and drilling equipment are to be used within a reasonable time, as determined by the planning director, for the drilling of another well or wells on the premises.

July 1997 - Jan 1999

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

19.98.030 DRILLING BY MINISTERIAL PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil or gas or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in the Light Industrial (M-1) or Recreation-Forestry (RF) Districts until an application for plot plan review has been submitted to and approved by the Planning Director as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. In approving an application for plot plan review, the Planning Director may waive any standards set out in Section 19.98.050 of this chapter if he/she determines that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

19.98.040 DRILLING BY CONDITIONAL USE PERMIT

A. No well for use as an injection well and no well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility may be installed in any zoning district described in this title in which such uses are permitted as conditional uses until an application for a conditional use permit has been submitted to and approved by the Planning Commission as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the standards and procedures set out in Sections 19.102.130 through 19.102.180 and Chapter 19.104 of this title. In approving a conditional use permit, the Planning Commission may waive any condition set out in Section 19.98.050 of this chapter if it determines that such waiver will not result in material detriment to the public welfare or the property of other persons located in the vicinity.

B. Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

Jan 1999 - Dec 1999

1. The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

C. If a producing well or service well is not completed upon land subject to a conditional use permit issued pursuant to this chapter and Chapter 19.104 of this title within twelve (12) months from the date of issuance of the permit, or within any extended period thereof, the conditional use permit shall expire and the premises shall be restored as nearly as practicable to their original condition. No permit shall expire while the permittee is continuously conducting drilling, redrilling, completing or abandoning operations, or related operations, in a well on the lands covered by such permit, which operations were commenced while said permit was otherwise in effect. Continuous operations are operations suspended not more than thirty (30) consecutive days. If, at the expiration of the twelve- (12-) month period, the permittee has not completed his drilling program on the lands covered by such permit, the Planning Commission may, upon a written request of the permittee, extend the permit for the additional time requested by permittee for the completion of such drilling program.

19.98.050 DEVELOPMENT STANDARDS AND CONDITIONS

All wells drilled, pursuant to Section 19.48.020 of this title and Sections 19.98.030 and 19.98.040 of this chapter, for the exploration for or development or production of oil, gas, and other hydrocarbon substances and related facilities and activities shall comply with the following standards, unless otherwise provided in this chapter:

A. No oil or gas well shall be drilled within one hundred (100) feet of any public highway or building not necessary to the operation of the well, or within one hundred and fifty (150) feet of any dwelling, or within three hundred (300) feet of any building used as a place of public assembly, institution, or school, or within fifty (50) feet of any building utilized for commercial purposes constructed prior to the commencement of such drilling, without the written consent of the owner of such structure.

B. All drilling and production activities shall conform to all applicable fire and safety regulations, and firefighting apparatus and supplies required by the Kern County Fire Department shall be maintained on the site at all times during drilling and production operations.

C. No signs, other than directional and warning signs and those required for identification of the well, shall be constructed, erected, maintained, or placed on the premises or any part thereof, except those required by law or ordinance to be displayed in connection with the drilling or maintenance of the well.

D. Sanitary toilet and washing facilities, if required by the Kern County Health Department or other governmental agencies, shall be installed and maintained in a clean and sanitary

Jan 1999 - Dec 1999

C.

If a producing well or service well is not completed upon land subject to a conditional use permit issued pursuant to this chapter and Chapter 19.104 of this title within twelve (12) months from the date of issuance of the permit, or within any extended period thereof, the conditional use permit shall expire and the premises shall be restored as nearly as practicable to their original condition. No permit shall expire while the permittee is continuously conducting drilling, redrilling, completing or abandoning operations, or related operations, in a well on the lands covered by such permit, which operations were commenced while such permit was otherwise in effect. Continuous operations are operations suspended not more than thirty (30) consecutive days. If, at the expiration of the twelve (12) month period, the permittee has not completed his drilling program on the lands covered by such permit, the planning commission may, upon a written request of the permittee, extend the permit for the additional time requested by permittee for the completion of such drilling program.

(Ord. G-6551 § 98, 1998: Ord. G-5346 § 100, 1990; Prior code § 7260.04

- **19.98.050 - Development standards and conditions.**

All wells drilled, pursuant to Section 19.48.020 of this title and Sections 19.98.030 and 19.98.040 of this chapter, for the exploration for or development or production of oil, gas and other hydrocarbon substances and related facilities and activities shall comply with the following standards, unless otherwise provided in this chapter:

A.

No oil or gas well shall be drilled within one hundred (100) feet of any public highway or building not necessary to the operation of the well, or within one hundred fifty (150) feet of any dwelling, or within three hundred (300) feet of any building used as a place of public assembly, institution or school, or within fifty (50) feet of any building utilized for commercial purposes constructed prior to the commencement of such drilling, without the written consent of the owner of such structure.

B.

All drilling and production activities shall conform to all applicable fire and safety regulations, and firefighting apparatus and supplies required by the county fire department shall be maintained on the site at all times during drilling and production operations.

C.

No signs, other than directional and warning signs and those required for identification of the well, shall be constructed, erected, maintained or placed on the premises or any part thereof, except those required by law or ordinance to be displayed in connection with the drilling or maintenance of the well.

D.

Sanitary toilet and washing facilities, if required by the county health department or other governmental agencies, shall be installed and maintained in a clean and sanitary condition during drilling operations, and at such other times as specified by these agencies.

E.

Proven technological improvements generally accepted and used in drilling and production methods shall be employed as they may become available if they are capable of reducing nuisances or annoyances.

F.

All derricks, boilers and other drilling equipment employed pursuant to this section to drill any well hole or to repair, clean out, deepen or redrill any completed or drilling well shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derricks, boilers and drilling equipment are to be used within a reasonable time, as determined by the planning director, for the drilling of another well or wells on the premises.

current

1993 update

G.

Within ninety (90) days after any well has been placed in production, or after its abandonment, earthen sumps used in drilling or production or both (unless such sumps are to be used within a reasonable time as determined by the planning director for the drilling of another well or wells) shall be filled and the drilling site restored as nearly as practicable to a uniform grade. Temporary earthen sumps may be used for cleanout or remedial work on an existing well or other production facility. However, these sumps shall be filled and the site restored as nearly as practicable to uniform grade within ninety (90) days after the cleanout or other remedial work is completed. Such restoration work shall comply with all applicable regulations of the California Division of Oil and Gas.

H.

Any derrick used for servicing operations shall be of the portable type, provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable type derrick will not properly service such well, the planning director may approve the use of a standard type of derrick.

I.

Whenever oil or gas is produced into and shipped from tanks located on the premises, such tanks, whenever located within five hundred (500) feet of any dwelling or commercial building, shall be surrounded by shrubs or trees, planted and maintained so as to develop attractive landscaping, or shall be fenced in such a manner as to, insofar as practicable, screen such tanks from public view. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

J.

Whenever a well is located within five hundred (500) feet of an existing dwelling unit, except in case of an emergency, no materials, equipment, tools or pipe used for either drilling or production operations shall be delivered to or removed from the drilling site, except between the hours of eight (8:00) a.m. and eight (8:00) p.m., unless otherwise required by the California Division of Oil and Gas.

K.

Pumping wells shall be operated by electric motors or muffled internal combustion engines.

L.

The height of all pumping units shall not exceed thirty-five (35) feet and shall be painted and kept in neat condition.

M.

All vehicle parking and maneuvering areas shall be treated and maintained with oiled sand or a similar dust-binding material.

N.

After production begins and a pump is installed on the wellhead, a fence at least six (6) feet in height shall be installed around the pump site or drilling island for public safety. This fence shall be constructed of chain link with wood or metal slats or other screening fence as may be approved by the planning director. This fencing and screening requirement shall apply only to those pump sites located within five hundred (500) feet of any dwelling. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

G.

Within ninety (90) days after any well has been placed in production, or after its abandonment, earthen sumps used in drilling or production or both (unless such sumps are to be used within a reasonable time as determined by the planning director for the drilling of another well or wells) shall be filled and the drilling site restored as nearly as practicable to a uniform grade. Temporary earthen sumps may be used for cleanout or remedial work on an existing well or other production facility. However, these sumps shall be filled and the site restored as nearly as practicable to uniform grade within ninety (90) days after the cleanout or other remedial work is completed. Such restoration work shall comply with all applicable regulations of the California Division of Oil and Gas.

H.

Any derrick used for servicing operations shall be of the portable type, provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable type derrick will not properly service such well, the planning director may approve the use of a standard type of derrick.

I.

Whenever oil or gas is produced into and shipped from tanks located on the premises, such tanks, whenever located within five hundred (500) feet of any dwelling or commercial building, shall be surrounded by shrubs or trees, planted and maintained so as to develop attractive landscaping, or shall be fenced in such a manner as to, insofar as practicable, screen such tanks from public view. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

J.

Whenever a well is located within five hundred (500) feet of an existing dwelling unit, except in case of an emergency, no materials, equipment, tools or pipe used for either drilling or production operations shall be delivered to or removed from the drilling site, except between the hours of eight (8:00) a.m. and eight (8:00) p.m., unless otherwise required by the California Division of Oil and Gas.

K.

Pumping wells shall be operated by electric motors or muffled internal combustion engines.

L.

The height of all pumping units shall not exceed thirty-five (35) feet and shall be painted and kept in neat condition.

M.

All vehicle parking and maneuvering areas shall be treated and maintained with oiled sand or a similar dust-binding material.

N.

After production begins and a pump is installed on the wellhead, a fence at least six (6) feet in height shall be installed around the pump site or drilling island for public safety. This fence shall be constructed of chain link with wood or metal slats or other screening fence as may be approved by the planning director. This fencing and screening requirement shall apply only to those pump sites located within five hundred (500) feet of any dwelling. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

- **19.98.060 - Plot plan review—Conditional use permit—Application contents.**

An application for plot plan review pursuant to Section 19.98.030 of this chapter and an application for a conditional use permit pursuant to Section 19.98.040 of this chapter shall include the following:

A. Name and address of the applicant;

B. Name(s) and address(es) of the property owner(s);

C. Assessor's parcel number(s);

D. Legal description of the property;

E. A plot plan or site development plan (in the case of a conditional use permit) drawn at the scale specified by the planning director, which includes the following information:

1. Topography and proposed grading,
2. Location of all proposed well holes and related accessory equipment, structures and facilities to be installed, and any abandoned wells if such are known to exist,
3. Location of all existing dwellings and buildings used for other purposes, located within three hundred (300) feet of the proposed well holes, identification of the use of each structure, and distances between well holes and existing buildings,
4. North arrow;

current

2. The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation, or entity.

C. If a producing well or service well is not completed upon land subject to a conditional use permit issued pursuant to this chapter and Chapter 19.104 of this title within twelve (12) months from the date of issuance of the permit, or within any extended period thereof, the conditional use permit shall expire and the premises shall be restored as nearly as practicable to their original condition. No permit shall expire while the permittee is continuously conducting drilling, redrilling, completing or abandoning operations, or related operations, in a well on the lands covered by such permit, which operations were commenced while said permit was otherwise in effect. Continuous operations are operations suspended not more than thirty (30) consecutive days. If, at the expiration of the twelve- (12-) month period, the permittee has not completed his drilling program on the lands covered by such permit, the Board of Zoning Adjustment may, upon a written request of the permittee, extend the permit for the additional time requested by permittee for the completion of such drilling program.

19.98.050 DEVELOPMENT STANDARDS AND CONDITIONS

All wells drilled, pursuant to Section 19.48.020 of this title and Sections 19.98.030 and 19.98.040 of this chapter, for the exploration for or development or production of oil, gas, and other hydrocarbon substances and related facilities and activities shall comply with the following standards, unless otherwise provided in this chapter:

A. No oil or gas well shall be drilled within one hundred (100) feet of any public highway or building not necessary to the operation of the well, or within one hundred and fifty (150) feet of any dwelling, or within three hundred (300) feet of any building used as a place of public assembly, institution, or school, or within fifty (50) feet of any building utilized for commercial purposes constructed prior to the commencement of such drilling, without the written consent of the owner of such structure.

B. All drilling and production activities shall conform to all applicable fire and safety regulations, and firefighting apparatus and supplies required by the Kern County Fire Department shall be maintained on the site at all times during drilling and production operations.

C. No signs, other than directional and warning signs and those required for identification of the well, shall be constructed, erected, maintained, or placed on the premises or any part thereof, except those required by law or ordinance to be displayed in connection with the drilling or maintenance of the well.

D. Sanitary toilet and washing facilities, if required by the Kern County Health Department or other governmental agencies, shall be installed and maintained in a clean and sanitary condition during drilling operations, and at such other times as specified by these agencies.

E. Proven technological improvements generally accepted and used in drilling and production methods shall be employed as they may become available if they are capable of reducing nuisances or annoyances.

July 1993 – May 1994

F. All derricks, boilers, and other drilling equipment employed pursuant to this section to drill any well hole or to repair, clean out, deepen, or redrill any completed or drilling well shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derricks, boilers, and drilling equipment are to be used within a reasonable time, as determined by the Director of Planning and Development Services, for the drilling of another well or wells on the premises.

G. Within ninety (90) days after any well has been placed in production, or after its abandonment, earthen sumps used in drilling or production or both (unless such sumps are to be used within a reasonable time as determined by the Director of Planning and Development Services for the drilling of another well or wells) shall be filled and the drilling site restored as nearly as practicable to a uniform grade. Temporary earthen sumps may be used for cleanout or remedial work on an existing well or other production facility. However, these sumps shall be filled and the site restored as nearly as practicable to uniform grade within ninety (90) days after the cleanout or other remedial work is completed. Such restoration work shall comply with all applicable regulations of the California Division of Oil and Gas.

H. Any derrick used for servicing operations shall be of the portable type, provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable type derrick will not properly service such well, the Director of Planning and Development Services may approve the use of a standard type of derrick.

I. Whenever oil or gas is produced into and shipped from tanks located on the premises, such tanks, whenever located within five hundred (500) feet of any dwelling or commercial building, shall be surrounded by shrubs or trees, planted and maintained so as to develop attractive landscaping or shall be fenced in such a manner as to, insofar as practicable, screen such tanks from public view. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

J. Whenever a well is located within five hundred (500) feet from an existing dwelling unit, except in case of an emergency, no materials, equipment, tools, or pipe used for either drilling or production operations shall be delivered to or removed from the drilling site, except between the hours of eight (8:00) a.m. and eight (8:00) p.m., unless otherwise required by the California Division of Oil and Gas.

K. Pumping wells shall be operated by electric motors or muffled internal combustion engines.

L. The height of all pumping units shall not exceed thirty-five (35) feet and shall be painted and kept in neat condition.

M. All vehicle parking and maneuvering areas shall be treated and maintained with oiled sand or a similar dust binding material.

N. After production begins and a pump is installed on the wellhead, a fence at least six (6) feet in height shall be installed around the pump site or drilling island

A. Name and address of the applicant

B. Name(s) and address(es) of the property owner(s)

C. Assessor's parcel number(s)

D. Legal description of the property

E. A plot plan or site development plan (in the case of a conditional use permit) drawn at the scale specified by the Director of Planning and Development Services, which includes the following information:

   1. Topography and proposed grading

   2. Location of all proposed well holes and related accessory equipment, structures, and facilities to be installed and any abandoned wells if such are known to exist

   3. Location of all existing dwellings and buildings used for other purposes, located within three hundred (300) feet of the proposed well holes, identification of the use of each structure, and distances between well holes and existing buildings

   4. North arrow

July 1993 - May 1994

Director. This fencing and screening requirement shall apply only to those pump sites located within five hundred (500) feet of any dwelling. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

0. All required federal, State, and County rules and regulations shall be complied with at all times, including, but not limited to, the rules and regulations of the following agencies:

1. California Division of Oil and Gas

2. Kern County Fire Department

3. Kern County Health Department

4. Regional Water Quality Control Board

5. Air Pollution Control District

6. Kern County Engineering and Survey Services Department

19.98.060 PLOT PLAN REVIEW—CONDITIONAL USE PERMIT—APPLICATION CONTENTS

An application for plot plan review pursuant to Section 19.98.030 of this chapter and an application for a conditional use permit pursuant to Section 19.98.040 of this chapter shall include the following:

A. Name and address of the applicant

B. Name(s) and address(es) of the property owner(s)

C. Assessor's parcel number(s)

D. Legal description of the property

E. A plot plan or site development plan (in the case of a conditional use permit) drawn at the scale specified by the Planning Director, which includes the following information:

1. Topography and proposed grading

2. Location of all proposed well holes and related accessory equipment, structures, and facilities to be installed and any abandoned wells if such are known to exist

3. Location of all existing dwellings and buildings used for other purposes, located within three hundred (300) feet of the proposed well holes, identification of the use of each structure, and distances between well holes and existing buildings

4. North arrow

F. Narrative description of the proposed development, including:

May 1994 - May 1995

- **Chapter 19.98 - OIL AND GAS PRODUCTION**

Sections:

- **19.98.010 - Purpose and application.**

The purpose of this chapter is to promote the economic recovery of oil, gas and other hydrocarbon substances in a manner compatible with surrounding land uses and protection of the public health and safety by establishing reasonable limitations, safeguards and controls on exploration, drilling and production of hydrocarbon resources. The procedures and standards contained in this chapter shall apply to all exploration drilling and production activities related to oil, gas and other hydrocarbon substances carried out in unincorporated Kern County.

(Prior code § 7260.01)

- **19.98.020 - Unrestricted drilling.**

No review or permit shall be required for the drilling of any steam injection well, steam drive well, service well, or any well intended for the exploration for or development or production of oil, gas and other hydrocarbon substances, or for any related accessory equipment, structure or facility in the Exclusive Agriculture (A), Limited Agriculture (A-1), Medium Industrial (M-2), Heavy Industrial (M-3), or Natural Resource (NR) districts, provided that:

A.

All drilling installations and operations comply with the requirements of state law and with applicable fire and safety ordinances and regulations of the county.

B.

Drilling shall not be commenced within one hundred (100) feet of any existing residence without the written consent of the owner thereof.

C.

Signs shall be limited to directional, warning and identification signs in connection with oil, gas or other hydrocarbon drilling and development operations.

D.

Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1.

The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2.

The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation or entity.

(Prior code § 7260.02)

- **19.98.030 - Drilling by ministerial permit.**

A.

No well for use as an injection well and no well for the exploration for or development or production of oil or gas or other hydrocarbon substances may be drilled, and no related accessory equipment, structure or facility may be installed in the Light Industrial (M-1) or Recreation Forestry (RF) districts until an application for plot plan review has been submitted to and approved by the planning director as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the procedures set out in Sections 19.102.040 through 19.102.060 of this title. In approving an application for plot plan review, the planning director may waive any standards set out in Section 19.98.050 of this chapter if he/she determines that such waiver will not result in material detriment to the public welfare or to the property of other persons located in the vicinity.

B.

Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1.

The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2.

The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation or entity.

(Ord. G-6077 § 310, 1994; Prior code § 7260.03)

- **19.98.040 - Drilling by conditional use permit.**

A.

No well for use as an injection well and no well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure or facility may be installed in any zoning district described in this title in which such uses are permitted as conditional uses until an application for a conditional use permit has been submitted to and approved by the planning commission as consistent with the standards set out in Section 19.98.050 of this chapter and in accordance with the standards and procedures set out in Sections 19.102.130 through 19.102.180 and Chapter 19.104 of this title. In approving a conditional use permit, the planning commission may waive any condition set out in Section 19.98.050 of this chapter if it determines that such waiver will not result in material detriment to the public welfare or the property of other persons located in the vicinity.

B.

Disposal of nonhazardous oilfield liquid waste and production water is considered an accessory facility only if the facility complies with the following:

1.

The nonhazardous oilfield liquid waste or production water is produced and disposed of within the same designated oilfield; or

2.

The nonhazardous oilfield liquid waste or production water disposed of outside the designated oilfield of origin is produced by and disposed of solely and only by the same individual, corporation or entity;

C.

If a producing well or service well is not completed upon land subject to a conditional use permit issued pursuant to this chapter and Chapter 19.104 of this title within twelve (12) months from the date of issuance of the permit, or within any extended period thereof, the conditional use permit shall expire and the premises shall be restored as nearly as practicable to their original condition. No permit shall expire while the permittee is continuously conducting drilling, redrilling, completing or abandoning operations, or related operations, in a well on the lands covered by such permit, which operations were commenced while such permit was otherwise in effect. Continuous operations are operations suspended not more than thirty (30) consecutive days. If, at the expiration of the twelve (12) month period, the permittee has not completed his drilling program on the lands covered by such permit, the planning commission may, upon a written request of the permittee, extend the permit for the additional time requested by permittee for the completion of such drilling program.

(Ord. G-6551 § 98, 1998: Ord. G-5346 § 100, 1990; Prior code § 7260.04

- **19.98.050 - Development standards and conditions.**

All wells drilled, pursuant to Section 19.48.020 of this title and Sections 19.98.030 and 19.98.040 of this chapter, for the exploration for or development or production of oil, gas and other hydrocarbon substances and related facilities and activities shall comply with the following standards, unless otherwise provided in this chapter:

A.

No oil or gas well shall be drilled within one hundred (100) feet of any public highway or building not necessary to the operation of the well, or within one hundred fifty (150) feet of any dwelling, or within three hundred (300) feet of any building used as a place of public assembly, institution or school, or within fifty (50) feet of any building utilized for commercial purposes constructed prior to the commencement of such drilling, without the written consent of the owner of such structure.

B.

All drilling and production activities shall conform to all applicable fire and safety regulations, and firefighting apparatus and supplies required by the county fire department shall be maintained on the site at all times during drilling and production operations.

C.

No signs, other than directional and warning signs and those required for identification of the well, shall be constructed, erected, maintained or placed on the premises or any part thereof, except those required by law or ordinance to be displayed in connection with the drilling or maintenance of the well.

D.

Sanitary toilet and washing facilities, if required by the county health department or other governmental agencies, shall be installed and maintained in a clean and sanitary condition during drilling operations, and at such other times as specified by these agencies.

E.

Proven technological improvements generally accepted and used in drilling and production methods shall be employed as they may become available if they are capable of reducing nuisances or annoyances.

F.

All derricks, boilers and other drilling equipment employed pursuant to this section to drill any well hole or to repair, clean out, deepen or redrill any completed or drilling well shall be removed within ninety (90) days after completion of production tests following completion of such drilling, or after abandonment of any well, unless such derricks, boilers and drilling equipment are to be used within a reasonable time, as determined by the planning director, for the drilling of another well or wells on the premises.

G.

Within ninety (90) days after any well has been placed in production, or after its abandonment, earthen sumps used in drilling or production or both (unless such sumps are to be used within a reasonable time as determined by the planning director for the drilling of another well or wells) shall be filled and the drilling site restored as nearly as practicable to a uniform grade. Temporary earthen sumps may be used for cleanout or remedial work on an existing well or other production facility. However, these sumps shall be filled and the site restored as nearly as practicable to uniform grade within ninety (90) days after the cleanout or other remedial work is completed. Such restoration work shall comply with all applicable regulations of the California Division of Oil and Gas.

H.

Any derrick used for servicing operations shall be of the portable type, provided, however, that upon presentation of proof that the well is of such depth or has such other characteristics, or for other cause, that a portable type derrick will not properly service such well, the planning director may approve the use of a standard type of derrick.

I.

Whenever oil or gas is produced into and shipped from tanks located on the premises, such tanks, whenever located within five hundred (500) feet of any dwelling or commercial building, shall be surrounded by shrubs or trees, planted and maintained so as to develop attractive landscaping, or shall be fenced in such a manner as to, insofar as practicable, screen such tanks from public view. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

J.

Whenever a well is located within five hundred (500) feet of an existing dwelling unit, except in case of an emergency, no materials, equipment, tools or pipe used for either drilling or production operations shall be delivered to or removed from the drilling site, except between the hours of eight (8:00) a.m. and eight (8:00) p.m., unless otherwise required by the California Division of Oil and Gas.

K.

Pumping wells shall be operated by electric motors or muffled internal combustion engines.

L.

The height of all pumping units shall not exceed thirty-five (35) feet and shall be painted and kept in neat condition.

M.

All vehicle parking and maneuvering areas shall be treated and maintained with oiled sand or a similar dust-binding material.

N.

After production begins and a pump is installed on the wellhead, a fence at least six (6) feet in height shall be installed around the pump site or drilling island for public safety. This fence shall be constructed of chain link with wood or metal slats or other screening fence as may be approved by the planning director. This fencing and screening requirement shall apply only to those pump sites located within five hundred (500) feet of any dwelling. Such fencing shall comply with the requirements of the California Division of Oil and Gas.

O.

All required federal, state, and county rules and regulations shall be complied with at all times, including, but not limited to, the rules and regulations of the following agencies:

1. California Division of Oil and Gas;
2. Kern County fire department;
3. Kern County public health services department;
4. Regional Water Quality Control Board;
5. Air Pollution Control District;
6. Kern County engineering, surveying, and permit services department.

(Ord. G-6077 §§ 312—315, 1994; Ord. G-5885 § 136, 1993; Prior code § 7260.05)

(Ord. No. G-8035, § 84, 4-20-10)

- **19.98.060 - Plot plan review—Conditional use permit—Application contents.**

An application for plot plan review pursuant to Section 19.98.030 of this chapter and an application for a conditional use permit pursuant to Section 19.98.040 of this chapter shall include the following:

A. Name and address of the applicant;

B. Name(s) and address(es) of the property owner(s);

C. Assessor's parcel number(s);

D. Legal description of the property;

E. A plot plan or site development plan (in the case of a conditional use permit) drawn at the scale specified by the planning director, which includes the following information:

1. Topography and proposed grading,
2. Location of all proposed well holes and related accessory equipment, structures and facilities to be installed, and any abandoned wells if such are known to exist,
3. Location of all existing dwellings and buildings used for other purposes, located within three hundred (300) feet of the proposed well holes, identification of the use of each structure, and distances between well holes and existing buildings,
4. North arrow;

F.

Narrative description of the proposed development, including:

1. Acreage or square footage of the property,
2. Nature of hydrocarbon development activity,
3. Description of equipment to be used,
4. Distance to all existing buildings,
5. Phasing or development schedule.

(Ord. G-6077 § 317, 1994; Prior code § 7260.06)

- **19.98.070 - Permit revocation and modification.**

Any permit issued pursuant to this chapter may be revoked or modified pursuant to Section 19.102.020 of this title.

(Prior code § 7260.07)

File: Oil and Gas Zoning Amendment

Holly A. King
13501 Arbolado ct.
Bakersfield, CA 93314

RE: Public Records Act Request Regarding Kern County Revisions to the Zoning Ordinance 2015 C

Dear Ms. King:

On behalf of Kern County, the Kern County Planning and Community Development Department is in receipt of your September 4, 2015 Public Records Act Request for the proposed Oil and Gas EIR. In response to your request, Staff notes that all materials, subject to California Public Records Request Act, related to the aforementioned project are available for review. These files have been provided in electronic format and are available in hard copy by contacting Christopher Mynk directly at (661) 862-8607 or by email MynkC@co.kern.ca.us to schedule an appointment. The appointment can be scheduled during normal business hours (Monday through Friday, from 8:00 am to 5:00 pm) at the Kern County Planning and Community Development Department, located at 2700 M Street, Suite 100, Bakersfield, California 93301.

This completes the Kern County Planning and Community Development Department's response to your Public Records Act Request. Please contact me directly if you have any questions or concerns as they relate to this letter.

Sincerely,

Christopher B. Mynk, AICP, Supervising Planner
Planning & Community Development Dept.

KERN COUNTY AGRICULTURAL PROPERTY OWNER

Re: Agricultural Preserve Program

The following information is furnished in response to your request regarding the Agricultural Preserve Program:

CALIFORNIA LAND CONSERVATION PROGRAM

The California State Legislature, in formulating the California Land Conservation Program, found that preservation of a maximum amount of the limited supply of agricultural land is necessary to the conservation of the State's economic resources and is necessary not only to the maintenance of the agricultural economy of the State but also for the assurance of adequate, healthful, and nutritious food for future residents of the State and Nation. The Program, referred to locally as the "Agricultural Preserve Program," is enforced through the provisions of the Government Code of the State of California relating to the California Land Conservation Act (Williamson Act), as well as local ordinances, policies, and procedures which have been or may be adopted and/or modified from time to time. The Program is indicative of the widespread concern of the people of the State of California and their legislators for the preservation of agriculture as the State's prime economic activity and the preservation of agricultural land for the production of food and fiber for future generations.

John C. Williamson, an Assemblyman from Kern County at the time he authored the Act, stated that his bill was drafted "to guarantee the future agricultural use of our best agricultural land and that farmers who are willing to provide the public with such a guarantee are entitled to protection from forces that might otherwise drive them out of agriculture." The basis for preferential taxation is justified since the farmer who voluntarily chooses to enter into a land use contract guarantees the continued use of his land for agricultural or open space activities. Contrary to the opinion of some, both within and outside the agricultural community, preferential tax treatment is a valid concept since it results in the perpetuation of agriculture in an era of rapidly rising property values and prevents premature urbanization and the need to provide public services comparable to those required in urban or metropolitan areas.

HISTORY OF THE PROGRAM IN KERN COUNTY

The California Land Conservation Act became law in 1965, but it was not until 1967 that an amendment of the State Revenue and Taxation Code established preferential tax procedures for lands subject to land use contracts or agreements. (This is commonly known as Constitutional Amendment XXVIII.)

On December 19, 1967, the Board of Supervisors established the first agricultural preserve in Kern County. Soon thereafter, the Board completed the establishment of 25 large-scale preserves within which they would consider land use contracts or agreements. On February 11, 1969, the Board voted to disestablish Preserves Number 15, Number 20, Number 21, Number 23, and Number 25. The disestablishment of these preserves occurred because of lack of interest by owners of agricultural lands in the desert regions of eastern Kern County in placing their lands under contract or agreement.

Beginning in 1968, two types of agricultural preserve instruments were approved for use:

1. Land Use Contract:

   Only owners of "prime agricultural land," as defined in Section 51201 of the Government Code, were offered the land use contract.

2. Land Use Agreement:

   Only owners of "nonprime agricultural land," described as marginal grazing, were offered the land use agreement, the contents of which are identical to those of a contract.

In February 1968, the first land use contracts and agreements were approved by Kern County. A total of 318 land use contracts and agreements, covering 57,392 acres of prime lands and 557,471 acres of nonprime lands, represented an initial-year total of 614,863 acres of agricultural lands. At that time, the Program was supervised by the Kern County Assessor's Office.

Since February 28, 1970, the land use contract has been the only document executed by Kern County. At present it is used for both prime and nonprime lands.

CURRENT APPLICABLE POLICIES AND PROCEDURES

The California Land Conservation Act is permissive legislation, and the policies and procedures adopted by local entities may be more but not less restrictive than the State legislation. Although the Administrator of the Agricultural Preserve Program in Kern County is the Director of the Planning Department, all policies and procedures for administering the Program are initiated, developed, and amended by the Board of Supervisors upon recommendation of the Director of the Planning Department.

Kern County has adopted only those portions of the Act that apply to the preservation of agricultural lands. The many other aspects of the legislation, such as recreational uses, wildlife habitat, open space easements, wetland areas, salt ponds, etc., can be included only if they are secondary to the primary agricultural use of the land.

I. DEFINITIONS

Following are excerpts from the Government Code of the State of California relating to the Agricultural Preserve Program as administered in Kern County:

Section 51230 — An agricultural preserve shall consist of no less than 100 acres.

Section 51240 — Any County may by contract limit the use of agricultural land for the purpose of preserving such land pursuant and subject to the conditions set forth in the contract.

Section 51243 — Every such contract shall:

(a) Provide for the exclusion of uses other than agricultural, and other than those compatible with agricultural uses, for the duration of the contract.

(b) Be binding upon, and inure to the benefit of, all successors in interest of the owner. Whenever land under a contract is divided, the owner of any parcel may exercise, independent of any other owner of a portion of the divided land, any of the rights of the owner in the original contract, including the right to give notice of nonrenewal and the right to petition for cancellation.

Section 51244 — Each contract shall be for an initial term of no less than ten years. Each contract shall provide that on the anniversary date of the contract or such other annual date as specified by the contract, a year shall be added automatically to the initial term unless notice of nonrenewal is given as provided in Section 51245.

Section 51245 — If either the landowner or the County desires in any year not to renew the contract, that party shall serve written notice of nonrenewal of the contract upon the other party in advance of the annual renewal date of the contract. (In Kern County, the contract becomes null and void on its tenth anniversary date following the notice of nonrenewal.)

Section 51251 — The County or landowner may bring any action in court necessary to enforce any contract, including, but not limited to, an action to enforce the contract by specific performance or injunction.

Section 51281 — A contract may not be canceled except pursuant to a request by the landowner, and as provided in Article 5, Government Code.

Section 51282 — (a) The landowner may petition the Board (Board of Supervisors) for cancellation of any contract as to all or any part of the subject land. The Board may grant tentative approval for cancellation of a contract only if it makes one of the following findings:

(1) That the cancellation is consistent with the purposes of this chapter; or

(2) That cancellation is in the public interest.

(b) For purposes of paragraph (1) of subdivision (a), cancellation of a contract shall be consistent with the purposes of this chapter only if the Board makes all of the following findings:

(1) That the cancellation is for land on which a notice of nonrenewal has been served pursuant to Section 51245;

(2) That cancellation is not likely to result in the removal of adjacent lands from agricultural use;

(3) That cancellation is for an alternative use which is consistent with the applicable provisions of the County General Plan;

(4) That cancellation will not result in discontiguous patterns of urban development; and

(5) That there is no proximate, noncontracted land which is both available and suitable for the use to which it is proposed the contracted land be put, or, that development of the contracted land would provide more contiguous patterns of urban development than development of proximate, noncontracted land.

As used in this subdivision, "proximate, noncontracted land" means land not restricted by contract pursuant to this chapter which is sufficiently close to land which is so restricted that it can serve as a practical alternative for the use which is proposed for the restricted land.

As used in this subdivision, "suitable" for the proposed use means that the salient features of the proposed use can be served by land not restricted by contract pursuant to this chapter. Such nonrestricted land may be a single parcel or may be a combination of contiguous or discontiguous parcels.

(c) For purposes of paragraph (2) of subdivision (a), cancellation of a contract shall be in the public interest only if the Board makes the following findings:

(1) That other public concerns substantially outweigh the objectives of this chapter; and

(2) That there is no proximate, noncontracted land which is both available and suitable for the use to which it is proposed the contracted land be put, or, that development of the contracted land would provide more contiguous patterns of urban development than development of proximate, noncontracted land.

As used in this subdivision, "proximate, noncontracted land" means land not restricted by contract pursuant to this chapter which is sufficiently close to land which is so restricted that it can serve as a practical alternative for the use which is proposed for the restricted land.

As used in this subdivision, "suitable" for the proposed use means that the salient features of the proposed use can be served by land not restricted by contract pursuant to this chapter. Such nonrestricted land may be a single parcel or may be a combination of contiguous or discontiguous parcels.

(d) For purposes of subdivision (a), the uneconomic character of an existing agricultural use shall not by itself be sufficient reason for cancellation of the contract. The uneconomic character of the existing use may be considered only if there is no other reasonable or comparable agricultural use to which the land may be put.

(e) The landowner's petition shall be accompanied by a proposal for a specified alternative use of the land. The proposal for the alternative use shall list those governmental agencies known by the landowner to have permit authority related to the proposed alterative use, and the provisions and requirements of Section 51283.4 shall be fully applicable thereto. The level of specificity required in a proposal for a specified alternative use shall be determined by the Board as that necessary to permit them to make the findings required.

(f) In approving a cancellation pursuant to this section, the Board shall not be required to make any findings other than or in addition to those expressly set forth in this section, and, where applicable, in Section 21081 of the Public Resources Code.

Section 51283 In the event the Board approves a cancellation, a fee of 12 1/2 percent of the full assessed value of the parcel will be assessed as a penalty fee. This fee, when collected, shall be transmitted by the County treasurer to the State Controller. (In addition, the Kern County Board of Supervisors has levied a $990 administrative filing fee for consideration of a request to cancel a contract or any portion thereof.)

II. CONTRACT PROCEDURES

From January 1 through October 1, inclusive, is the time period set to file a property status report. The property status report must be completed on the form provided by the County and returned to the Kern County Planning Department, 2700 "M" Street, Suite 100, Bakersfield, California 93301, accompanied by a $265 filing fee to defray the cost involved in making the necessary studies. Separate property status reports must be filed for discontiguous lands.

Upon receipt of a timely filed and properly completed property status report, the Staff will conduct an investigation and a field study of the property relative to the following categories:

A. Preserve Status:

The land must be within an existing agricultural preserve; if it is not, the necessary petition for inclusion form will be mailed to you. This petition must be completed and returned to the Planning Department, along with the appropriate fee, **on or before October 1**.

B. Zoning:

The land must be within an Exclusive Agriculture (A) District; if it is not, the necessary application for zone change form will be mailed to you. This application must be properly completed and returned to the Planning Department, along with the appropriate fee, **on or before October 1**.

C. Conformity with the Standard Uniform Rules:

The land must be consistent with the Agricultural Preserve Standard Uniform Rules as adopted from time to time by the Board of Supervisors (see enclosure).

(Special Note: Upon execution of a land use contract, the use of the contracted land must remain within the limits specified in the Standard Uniform Rules.)

D. Land Use:

The land must be used for the production of agricultural commodities or devoted to the grazing of livestock for commercial purposes described in the Government Code as follows:

> Section 51201 (a) - "Agricultural commodity" means any and all plant and animal products produced in this State for commercial purposes.
>
> Section 51201 (b) - "Agricultural use" means use of land for the purpose of producing an agricultural commodity for commercial purposes.

E. Consistency with the General Plan:

The land must be classified as Intensive Agriculture, Extensive Agriculture, or Open Space on the Land Use, Open Space, and Conservation Element of the Kern County General Plan.

F. Soil Classification:

The soil classification must be determined.

III. CONTRACT DATES

Upon completion of the investigation and the field study, you will receive, by personal service or by mail, the relevant contract forms and instructions. These items may include the following:

1. Two sets of the Land Use Contract
2. Consent by Secured Party
3. Power of Attorney
4. Application for Zone Change
5. Petition for Inclusion Within the Boundaries of an Agricultural Preserve
6. Staff Recommendations
7. Instruction Sheet to Landowner Entering Into a Land Use Contract

Each owner of land who seeks to enter into a land use contract with the County shall file such contract, along with all other necessary documents, properly completed according to an instruction sheet to landowners, together with the correct contract fees, on or before November 1. Only one contract is required for lands under the same ownership.

IV. CONTRACT FEES

0 - 10 Assessor Parcels	$590.00
11 - 20 Assessor Parcels	$740.00
21 or more Assessor Parcels	$1035.00

After receipt and review of your contract by Staff, you will be billed for the appropriate recording fees.

No contract shall be considered unless the property status report, the land use contract, and the appropriate fee have been timely received.

V. CONTRACT EXECUTION

All acceptable and timely filed land use contracts will be presented to the Board of Supervisors for approval and execution by the Board Chairman. Upon execution, the contracts will be duly recorded with the Kern County Recorder, and a fully executed copy will be returned to the applicant by regular mail. Contracts must be recorded prior to January 1 in order to be effective for the following tax year.

VI. ASSESSMENT

After completion of the contract procedures, and following execution of the contract by the Board of Supervisors, the contract will begin its term with the upcoming fiscal year.

The tax assessment on the newly contracted land will shift from a market-approach method to a capitalization-of-income method as determined by the Kern County Assessor. No property tax reduction is guaranteed, and tax estimates cannot be given by this office. For information concerning tax assessment procedures, please contact:

Kern County Assessor's Office, Rural Division
1115 Truxtun Avenue
Bakersfield, CA 93301 Telephone (661) 868-3485

If at any time you have questions regarding Agricultural Preserves or Contracts, please call this office at (661) 862-8600.

Very truly yours,

TED JAMES, AICP, Administrator
Agricultural Preserve Program

Bakersfield, California 93301

SUBJECT: Draft EIR for Revisions to the Kern County Zoning Ordinance – 2015 C (Focused on Oil and Gas Local Permitting)

Dear Mr. Mynk:

The above referenced project proposing revisions to chapters of Title 19 Kern County Zoning Ordinance to implement a new permit process for oil and gas activities will not impact North of the River Recreation and Park District's facilities or services. 0026-1

Thank you for the opportunity to comment.

Sincerely,

Steph Sanders, PLA, ASLA
Landscape Architect & Park Planner

Subject: Draft EIR for Revisions to the Kern County Zoning Ordinance – 2015 C, Oil and Gas Local Permitting

Dear AICP Supervising Planner Mynk,

I am writing in support of our County's oil and gas industry and appreciate the opportunity to comment on the draft environmental review. As a resident of Kern County, we understand this industry's importance to not only our local economy and the well-being of our families, but to our national security and the goal to reduce our dependence on foreign oil. Once approved, this revised ordinance will continue to provide protection for our community and the environment, while stabilizing the permitting structure for oil and gas production, allowing for continued growth of this important industry in our county. 0027-1

The results of the thousands of jobs provided is obvious. The need for the product I would think is also obvious. The oil is available, but requires some intelligence not only in it's implementation, but among our leaders, realizing the market value and the ability to provide product in our own country, rather than transporting it thousands of miles, and still it must be refined here. We have raw product and it should be used. 0027-2

We thank you for the tremendous effort that has gone into studying the industry - utilizing science and factual data to arrive at a sensible permitting structure. We strongly urge approval and implementation of this report. 0027-3

Sincerely,

Lawrence Corcoran
201 Spruce St
Bakersfield, CA 93304

0027-1

Thank you for your comment and participation in the public review of the project and environmental document. The comment letter submitted indicates support of the project. The comment does not state a specific concern related to the adequacy of the Draft EIR or otherwise comment on the contents of the Draft EIR. Therefore, a detailed response is not required. This comment has been noted for the record and has been provided to the Kern County Planning Commission and the Kern County Board of Supervisors for consideration.

Subject: Draft EIR for Revisions to the Kern County Zoning Ordinance – 2015 C, Oil and Gas Local Permitting

Dear AICP Supervising Planner Mynk,

I am writing in support of our County's oil and gas industry and appreciate the opportunity to comment on the draft environmental review. As a resident of Kern County, we understand this industry's importance to not only our local economy and the well-being of our families, but to our national security and the goal to reduce our dependence on foreign oil. Once approved, this revised ordinance will continue to provide protection for our community and the environment, while stabilizing the permitting structure for oil and gas production, allowing for continued growth of this important industry in our county. 0029-1

We thank you for the tremendous effort that has gone into studying the industry - utilizing science and factual data to arrive at a sensible permitting structure. We strongly urge approval and implementation of this report. 0029-2

The oil industry is one of the most regulated industries in the country and I believe that each participant in the industry take every precaution to operate in safe and environmental prudent manner. It can be a potentially dangerous business but in Kern County there have been relatively few incidents that might cause concern. 0029-3

Anyone proposing to shut down or significantly reduce the oil production in this country must be clearly misinformed about how the oil industry contributes to the economy through employment, taxes (property and income), petroleum products, charitable contributions and community involvement, etc. 0029-4

Despite the the advances in alternate energy sources, nothing comes close to fossil fuels for running our country. Until alternate resources replace fossil fuels as the major source of energy, good or bad, I believe we must continue to pursue hydrocarbons in Kern County and elsewhere in America. If we don't, I suppose we can go back to living like that in the early 1900's. Even environmentalist might find that kind of living difficult, distasteful, and even unacceptable. 0029-5

Comments @ July 27, 2015 Joint workshop with Kern County Board of Supervisors & Planning Commission – Bakersfield , CA

Good Afternoon

Chairman Couch, Chairman Sprague, Members of the Kern County Board of Supervisors & Planning Commission and Lorilei & staff.

My name is Bob Shore. I am a consultant in the oil and gas industry.
I was born and raised in Kern County as was my wife, son and daughter.
My parents came to Kern County over 100 years ago.

I've worked in the oil and gas industry all over the U.S. but 95% of my effort has been in Kern County. I've worked as a roustabout, well puller, engineer, financial planner, Vice President, Owner, Director, President and consultant in our industry. I've worked for contractors, major oil companies and independents. The projects I've actively worked on in Kern County have produced over 3 billion barrels of oil and will produce over 1 billion barrels in the future. I've also coached or refereed AYSO soccer for 15 years, been an EB Kiwanian, lived in and been proud of our community.

Thank you for the opportunity to present my comments today regarding the EIR to meet the California Environmental Quality Act(CEQA) and other compliance requirements.

Fortunately, this EIR is a fact of life of the oil & gas operations in Kern County and CA. More so than anywhere else in the world. Kern County has also been recognized for sometime as one of the world centers for thermal enhanced oil recovery(TEOR) technology – not only to produce significant amounts of domestic oil from old oilfields but also developing the techniques to operate cleaner and more efficient.

One thing I've learned in 50 years working in the Kern County Oil & Gas industry is that you need to spend extra effort in the initial planning designing and permitting for a good project.
I believe this EIR can be a very important part and improvement in the process.

However, this is a critical, financially devastating, time in our industry. Oil prices have dropped approximately 60% and thousands of people have lost their jobs. Companies are going out of business and people are losing their homes. The new fee structure could cost $25 million to $75 million per year and over 20 years 1 billion dollars. I think reduced fee levels and tax incentives need to be explored.

There are 3 areas of concern I would like to focus my comments today. They are:

TAXES, AIR & WATER.

Comments @ July 27, 2015 Joint workshop with Kern County Board of Supervisors & Planning Commission – Bakersfield , CA

TAXES are a very significant consideration in our industries sustainability and should be considered in your plan.

Let's talk of the taxes paid in Kern County due to the oil & gas industry. I know you understand the significance and the turnout at today's workshop is a good representation.The property tax bills on the oil & gas operations approach 40% of the county total. The property tax bills of the peoples homes in the industry are significant. The property tax bills homes and businesses of the people who indirectly benefit from this industry are significant. I can site many other jobs and businesses that would be different if the Kern County oil & gas industry could not drill wells to develop the remaining reserves.

It is important to note that this CEQA EIR is about the effect of drilling new wells in Kern County and without the drilling activity the employment in our industry would be 80 to 90% less. This would have a devastating consequence on the tax sources in Kern County.

> So my first recommendation to maintain sustainability in our Kern County industry and the Kern County tax revenues, is to implement a tax credit applied to property tax bills of 10% of the first 12-months gross revenue not to exceed the permitting fee. The County would benefit from the tax on the new developed resource but the permitting fee would be offset with the tax credit and be revenue neutral. The County would still receive the taxes on the future value.

I would like to extend that thought into my next comments regarding AIR.
Because Kern County's oil production is very dependent on thermal enhanced oil recovery projects the protection of our air quality while generating steam needs has always been important. In the 1960's, the first thermal projects burned 1/3 of the oil produced to generate steam and wells produced into open sumps. Very quickly scrubber technology was designed and developed to remove sulphur and particulate emissions from the steam generators and enclosed automatic well test units and casing vent recovery systems were developed to control emissions from wells. In the 1970's, lower-cost natural gas became the fuel of choice and combustion technology has been developed to control NOx emissions. With other technology, dust control and Green House Gas offsets the Kern County oil and gas industry's influence on air quality has been minimized. The resultant Kern County oil industry is a proud example of the combination of best technology for oilfield development and environmental control

Our County's major issue with air quality is the transportation contribution mainly from cars and trucks outside or passing through Kern County.

So my second recommendation is to provide a $2,500 grant and /or tax incentive to homeowners and companies for purchasing or converting a vehicle to CNG, LNG or electricity and a $20,000 grant or tax incentive to install multi-customer natural gas fueling stations that are sorely needed. If we can't come up with a solution to this problem nobody will. Maybe some day we'll have more clear days and we can see Bear Mtn. more often.

I would now like to address my last comments to - WATER.
A very valuable commodity in Kern County and CA. Because of solar cycles that average every 11 years we have many years, like now, that we experience below average rainfall, or droughts. Before it rains a lot this coming winter and we forget. We all need to work towards efforts to provide an adequate system to use every source of water available, before the next drought cycle.

Most of our industry produces over 10 barrels of water for every 1 barrel of oil produced. A large portion of this water is recycled as steam and injected into the oil sands to produce more oil. Most of the excess water has less than 10,000 ppm of total dissolved solids(TDS) which now requires a permitted aquifer exemption for disposal or an approved beneficial use, such as agriculture. In the last 40 years, over 5 billion barrels(or approximately 1 million acre-feet) of water produced with oil has been cleaned and delivered for beneficial use in agriculture at a low cost. If it is forced to be injected into deeper high salt zones by the current change in permitting requirements it will be lost for beneficial use forever.

However the cost to clean and transport the excess produced water for agriculture use is prohibitive in most cases especially at the current low oil prices.

My third recommendation is to provide a grant or property tax incentive of $100 per acre-foot for the first 2 years of operation to provide the economic incentive to achieve the goal of 33,000 new acre-feet each year of beneficial use of oilfield produced water.

In summary, please consider reducing the fee structure and providing grants and tax credits to insure the financial burden is balanced between accomplishing the environmental goals and not becoming a burden on the sustainability of the Kern County oil and gas industry.

Thank you for the major efforts so far. I hope that this EIR process can proceed timely so that future requirements can be clearly defined before year-end 2015. At these times of financial stress in our industry, indecision on future development at year end can have severe consequences on a company's financial well being.

0030-1

Thank you for your comment and participation in the public review of the project and environmental document. The comment letter indicates support of the proposed project. The comment letter does not state a specific concern related to the adequacy of the Draft EIR or otherwise comment on the contents of the Draft EIR. Therefore, a detailed response is not required. This comment letter provides a general description of the history of Kern County's oil & gas industry and, in the commenter's view, the industry's improved environmental record over time. The comment also makes general recommendations regarding certain economic policies the County might pursue that, in the commenter's view, would further improve the Kern County environment. This comment has been noted for the record and has been provided to the Kern County Planning Commission and the Kern County Board of Supervisors for consideration.

Dear AICP Supervising Planner Mynk,

0032-1

I am writing in support of our County's oil and gas industry and appreciate the opportunity to comment on the draft environmental review. As a resident of Kern County, we understand this industry's importance to not only our local economy and the well-being of our families, but to our national security and the goal to reduce our dependence on foreign oil. Once approved, this revised ordinance will continue to provide protection for our community and the environment, while stabilizing the permitting structure for oil and gas production, allowing for continued growth of this important industry in our county.

0032-2

I have worked in the oil and gas industry for over thirty years, twenty of witch have been in Kern County. One of my sons Rick Schroeder became a Geologist, receiving his PHD in Calgary Canada. Now working for Conoco Philips. My son and I are only two people working in oil and gas. Kern County needs to keep oil and gas production going for every one.

0032-3

One important thing the oil industry needs to do, is be a good Stewart to the earth and take care or the environment. I have seen a lot of SHADY work being performed, harming the environment that could have been prevented, if procedure would have been followed.

Sincerely,

D.S. Schroeder OST

>
> Thank you for hearing my concerns today. Maybe there is little possibility for idle legacy wells and tanks such as mine to ever be restored to the landowners. Unfortunately, mine is now a beer party destination, and there is danger with people climbing the cat walks, drinking. My hope is that you will establish policy within this new code that will limit the time wells may remain idle before they must be abandoned. Kern needs to be protected from idle wells littering our county indefinitely into the future. 0034-1
>
> Address you requested is on a dirty road between Rudd and Heath, 1/4 mile south of Reina. APN 463 050-69 with last known lease owner being Sunray Petroleum, Inc. (DOGGR uses different identification…API 02965225). 0034-2
>
> Thank you for your concern...
>
> Chris Romanini

0034-1

The commenter's email followed up on a conversation with the Kern County Planning Department regarding idle wells, including nuisance conditions for idle wells. The Project includes future permitting activities rather than addressing legacy conditions, but in response to this and similar comments the County has added a new provision to the Revised Proposed Ordinance that allows members of the public to report suspected idle or abandoned wells to the County, that requires the County to report this information to DOGGR and to track DOGGR's responses, and to deny new permits to Applicants that DOGGR has determined to be in violation of applicable idle well regulations. (See Section 7.1.3) Commenter's concerns about idle wells are also noted for the record for consideration by the Planning Commission and Board of Supervisors.

0034-2

Commenter's report of an idle well, including address and DOGGR identification number, is noted for the record for consideration by the Planning Commission and Board of Supervisors.

RE: Comment on EIR on oil/gas well permitting.

Dear Mr. Mynk,

I am writing you to support the new report on oil and gas well permitting in Kern county. It is important to have local control over this process. We have a small farm on both north and south side of Shafter. We have a great working relationship with all the oil companies that operate in the area. We grow almonds and have found that energy companies are very responsive to our wishes. Since we need high paying jobs that stay local, we support the energy industry. They drilled the first well around us in 1995 and since then all concerns we have had for land use and water issues have been addressed in a timely and professional manner. I'm certain that will continue. As a small farm, we need to maximize our business; which includes oil products at competitive prices. Fertilizers and other chemicals we rely on are oil based. The energy industry supports many other industries in Kern county. We must keep it strong and viable.

0035-1

Thank you for your time and consideration.

David Bell,
President, Leland Bell Farms Inc.

Subject: oil and gas
Kern County Planning and Community Development Department
Attention: Christopher B. Mynk, AICP
2700 "M" Street, Suite 100 Bakersfield, CA 93301

Here are my comments related to the Oil and Gas Development Plan in Kern County: 0036-1

I am only commenting on two issues that I have personal experience with, which I believe are discussed infrequently. I feel the County's Plan is overdue and is a good idea to implement rules and guidelines.

1) Noise. As a layperson, I have found noise levels are relative and to assign a DB rating as "acceptable" does not fit all situations. Any mechanical or electrical device which creates - for example- 75DB, might not be noticeable when situated on a street corner within the city limits. Most oil production does not take place here (on a street corner) but rather out in the rural areas of our county. My research shows typical DB readings outside city limits to be around 35 to 40 DB. To most of us this is "quiet". No planes, no air conditioners, no cars. 0036-2

Now place a pumping unit about a quarter mile away, with a noise level of 75 db. That pumping unit noise now becomes the dominant noise in your previously "quiet" environment. Add 10 or 20 more pumping units, and you are effectively now living in an industrial zone. Most people can't understand that in a rural setting you can hear a converstation a quarter mile away depending on weather, wind and temperature. 0036-3

My property is zoned Agriculture, with one single family home permitted. Homes and oil production are not compatible without restrictions on noise - just like any other industry. What other industry is allowed to make ANY amount of noise, 24 hours a day, 364 days a year without restriction ? (Christmas) 0036-4

I have contacted the lease developer in this case. I can't say they have ignored me, but the problem increases as the number of wells are drilled. They have made it clear they will not install any sound proofing or change their practices, which are completey legal in Kern County. 0036-5

2) Dust. Simply stated, why does "Oil" have a free pass on dust mitigation compared to the 0036-6

rest of construction industries in the county ? Miles of top soil is removed and no treatment or mitigation for the resulting dust is employed. I have experienced (literally) severe dust storms on Highway 65 after top soil was scrapped off. It seems ludicrous that across town a home developer must water the construction site to minimize dust, which is literally a fraction of that created in oil production.

Thank you

Jack Patterson
381 Owl Road
Bakersfield, CA 93308

0036-7

I appreciate that my situation is unique relative to the general population and therefore will likely carry little weight in drafting a plan.

0036-1

Thank you for your comment and participation in the public review of the Project and the environmental document. This comment does not state a specific concern related to the adequacy of the DEIR and therefore does not require a detailed response. 0036-2

Thank you for your comment and participation in the public review of the Project and the environmental document. This comment does not state a specific concern related to the adequacy of the DEIR and therefore does not require a detailed response. For information regarding the basis for the EIRs thresholds of significance for noise impacts, please see DEIR pages 4.12-15 through 4.12-18.

0036-3

Thank you for your comment and participation in the public review of the Project and the environmental document. This comment does not state a specific concern related to the adequacy of the DEIR and therefore does not require a detailed response. For information regarding the basis for the EIR's thresholds of significance for noise impacts, please see DEIR pages 4.12-15 through 4.12-18.

0036-4

Thank you for your comment and participation in the public review of the Project and the environmental document. This comment does not state a specific concern related to the adequacy of the DEIR and therefore does not require a detailed response. For information regarding the basis for the EIR's thresholds of significance for noise impacts, please see DEIR pages 4.12-15 through 4.12-18. For more information regarding County noise regulations, please see DEIR pages 4.12-8 through 4.12-14.

0036-5

Thank you for your comment and participation in the public review of the Project and the environmental document. This comment does not state a specific concern related to the adequacy of the DEIR and therefore does not require a detailed response. This comments observations regarding existing oil and gas activities are noted and will be considered.

0036-6

Thank you for your comment and participation in the public review of the Project and the environmental document. The oil and gas industry does not get a "free pass" with respect to dust and is subject to numerous air pollution control laws, including those mandating fugitive dust control measures, as described in DEIR section 4.3-1, Air Quality. Indeed, this EIR recommends measures to mitigate the Project's potential dust impacts, including the requirement that all permit applicants develop and implement a detailed dust control plan, as described in mitigation measures MM 4.3-2.

0036-7

Thank you for your comment and participation in the public review of the Project and the environmental document. This comment does not state a specific concern related to the adequacy of the DEIR and therefore does not require a detailed response.

Re: Draft Environmental Impact Report for Revisions to the Kern County Zoning Ordinance – 2015(C) Focused on Oil and Gas Local Permitting

Dear Mr. Mynk:

We are farmers in Kern County with almond orchards located near Wasco. Our farm is on split estate lands with no oil wells on our property at this time. However, our larger family, and properties we manage, have split estate lands with eight oil wells located on the properties at this time. These oil wells and well pads take land out of production from the farm. We have already faced numerous impacts to the farm from these existing wells on the property such as reestablishment of irrigation systems, returning surface back to original condition, and overspray of crude oil onto agriculture property and crops. 0039-1

We are not opposed to oil and gas development in Kern County, but we are concerned that oil companies will drill new wells on our property and neighboring properties without sufficient protections for our crops, home, and workers. Kern County has an opportunity to ensure that new oil and gas wells will not endanger our health, quality of life, or the economic prosperity of Kern's agricultural industry. We do not believe the County's draft revisions to the zoning ordinance, or the mitigation measures in the Draft Environmental Impact Report (DEIR), go far enough in protecting our surface owner rights and well being of our property. In addition, the DEIR for this project seriously understates the project's impacts—especially to the agricultural community. 0039-2

Please consider the following comments and revise the DEIR to accurately reflect the project's impacts and identify additional mitigation measures. As the DEIR stands now, we don't believe it complies with the County's responsibility to inform the public and surface owner about the project's significant impacts and mitigate those impacts to the extent feasible as required under the California Environmental Quality Act. Surface owner notification and approval shall occur anytime the surface is being converted, accessed or altered from its agriculture condition before and during any oil or gas development. 0039-3

Aesthetic Impacts: 0039-4

- The DEIR concludes that the proposed Project would have significant unavoidable impacts to the County's rural character but it ignores mitigation such as limiting the number of drilling operations at any one time in scenic rural areas and requiring larger setbacks (e.g., 1,000 feet).
- To comply with Irrigated Lands Programs, surface owners shall be provided soil testing to ensure soil is restored to original condition upon removal of earthen sumps.

Landowner shall also be notified when earthen sump is to be constructed and upon filling in.

- Upon the construction or establishment of any shrubs, fence, permanent lighting, power lines or other non oil production infrastructure the surface owner shall be notified and approval granted prior to the construction. The use of existing infrastructure shall be used when possible.

0039-4 Continued

Agricultural Impacts:

- The DEIR underestimates the amount of farmland that will be converted to non-agricultural use because it does not consider that land in between or near oil and gas facilities cannot be farmed. When converting farmland to non agriculture the use of gross loss of land shall be considered as well, including all roads and disruption due to power lines and other infrastructure.
- The DEIR must identify mitigation measures requiring oil and gas facilities to be clustered together, instead of being spread out across contiguous parcels of land.
- The DEIR must discuss the problem of long-term idle wells and out of service facilities taking farmland out of production for longer than necessary. The DEIR's mitigation measures should require that unnecessary idle wells be abandoned and out of service equipment be removed before allowing other types of mitigation that do not restore farmland.
    - The formation of a conservation bank should allow agriculture and other industries to contribute when converting agriculture land. Surface owners whose loss of land is contributing to this bank shall receive priority when wells are being removed.
- Rangeland is an important part of Kern County and its agricultural economy. The DEIR must analyze the project's impacts to rangeland and fully mitigate for the loss of rangeland to oil and gas uses.

0039-5

Air Quality Impacts:

- The project will lead to even higher ozone levels in Kern County and negatively impact human health and agricultural yields. The DEIR must consider additional air quality mitigation measures.
- Oil and gas development must comply with all San Joaquin Valley Air Pollution Control Board regulatory standards for agriculture zoned areas. Surface owner must approve of the means to which the standards will be achieved.
- Air quality mitigation fees shall first look for compliance mitigation within the surface owner impacted by the specific project.

0039-6

Water Supply Impacts:

- The DEIR assumes there is more water available that is suitable for municipal and agricultural uses than there actually is. Farmers are finding salt levels in groundwater are increasing to the point where they are harming crops.
- DEIR doesn't identify which aquifers will be impacted the most by oil and gas development. The DEIR concludes that the project will cause water shortages in Kern County without discussing what the impacts of those shortages will be.
- The DEIR should identify additional mitigation measures to reduce the project's impact on water supplies. For instance, the DEIR should require oil and gas operations to treat and reuse more of the produced water from their wells.

0039-7

Land Use Impacts:

- The DEIR concludes that there will be significant land use conflicts between oil and gas operations and surface uses, such as agricultural operations. But nothing in the proposed zoning ordinance will reduce these conflicts and the mitigation measures proposed don't address many of the types of conflicts that can occur.
- The County should require surface owner sign-off for drilling on split estate lands to allow these conflicts to be worked out at the site-specific level. Other attorneys agree that the County has the authority to require sign-off without exposing the County to liability from mineral rights owners.
- If surface owner sign-off is not required, the County should require a conditional use permit for development on split estate lands to enable the County to consult with surface owners and address site-specific conflicts. The County does not expect a significant number of permits on split estate lands and regardless the County can charge applicants for the costs to process these permits, including hiring additional staff if necessary.
    - The notification requirements for conformity review are not sufficient enough at 30 days. A 60 day period would allow the surface owner ample time to review surface impacts.
    - Without required surface owner signature, each 30 day phase should be mandatory allowing a full 120 day period until approval. An educational meeting with surface owner feedback shall be called at each phase.

0039-8

Noise Impacts:

- The DEIR does not consider increased noise from actual conditions as they currently exist on the ground. It therefore vastly underestimates the Project's noise impacts in rural areas of the County.
- The DEIR's mitigation for noise impacts, including a trivial 190-foot setback requirement, will not go far enough to reduce those impacts to a less than significant level. The DEIR should include more realistic and effective setback requirements. All setbacks and noise buffers must be approved by surface owner.

0039-9

Traffic Impacts:

- The DEIR underestimates the amount of traffic that the proposed Project will generate and does not analyze hazardous conditions that could be caused by truck traffic. The DEIR must include additional mitigation for traffic safety impacts and emergency access.

0039-10

Project Description:

- The DEIR underestimates the number of new wells that could be drilled under the project, especially on agricultural lands. There has been an increase in drilling on agricultural lands over the last 10 years and it is unreasonable to assume that only 6% of future drilling will occur on agricultural lands going forward.

0039-11

Alternatives:

- The DEIR must consider the Conditional Use Permit (CUP) alternative in detail. Under the CUP alternative, the County can impose industry-wide mitigation while preserving its ability to consider the environmental effects of each permit on a case-by-case basis.

0039-12

Sincerely,

Tim Holtermann and Jenny Holtermann

From: Lucy Clark <lucyg391@gmail.com>
To: <MynkC@co.kern.ca.us>
Date: 9/8/15 5:04 PM
Subject: DEIR Oil and Gas Development

Kern County Planning Department
2700 'M' Street
Bakersfield, CA 93301

Thank you for the opportunity to comment on the Draft Environmental Impact Report for oil and gas development activities for the next 25 years in Kern County. I am concerned about the following issues: 0040-1

1. The KCPD cannot possibly know all of the issues that may arise that far into the future, which will affect the oil industry. It seems ridiculous to me to give permission to the industry to continue into the future practices that may be cutting edge in 2015, but that may be very backward and considered harmful, but cheaper, in 2040. I would hope that there would be included the right by the County to require safety, pollution control, water conservation, etc. upgrades when they are available to the industry.

We also do not know the needs of the Earth, as far as climate change issues, that might require a cessation of the use of oil.

2. The residents of Kern County have a right to know about the wells in their areas. A requirement of disclosure of locations, chemicals and amount of water used for each well, depth of wells, etc. will be absolutely necessary on a public website that the KCPD runs. 0040-2

3. There must be monitoring and enforcement included, and the money to provide this must be provided by the industry. County residents should not have to tax themselves for this, nor should we be asked to trust the oil companies' self-certification. 0040-3

4. The Biological Resources, Air Pollution, and Greenhouse Gas studies must be included, as they are in every other DEIR required by Kern County. The public needs to read these to see if they are being interpreted correctly. 0040-4

5. The issue of Environmental Justice must also be included in the DEIR. 0040-5

This DEIR appears to be written without concern for those residents not employed in the oil business. 0040-6

Sincerely,

Lucy G. Clark
HC3 Box 88
Bakersfield, CA 93308-9124

661-391-9302

0040-1

Thank you for your comment and participation in the public review of the Project and the environmental document. The comment does not state a specific concern related to the adequacy of the DEIR and therefore does not require a detailed response. The commenter is correct that County cannot possible know all of the issues that might arise far into the future. Thus, the EIR does not engage in such speculation, in accordance with CEQA. All future oil and gas activities permitted will be subject to safety, pollution control, water conservation law and regulations in effect and applicable at the time of permitting.

0040-2

Thank you for your comment and participation in the public review of the Project and the environmental document. The comment does not state a specific concern related to the adequacy of the DEIR and therefore does not require a detailed response. The EIR includes mitigation measures requiring all well operators to comply with all applicable federal, state and local laws and regulations. The location of every new well permitted by the County under Project-conditions will be a matter of public record. Please also see DEIR section 4.9 for a description of state laws regulating the disclosure of information regarding well chemical use, well depths and oil and gas water use.

0040-3

The EIR includes mitigation measures requiring all well operators to comply with all applicable federal, state and local laws and regulations, including those regarding monitoring. The Revised Zoning Amendment has been revised to require the County inspector or third-party expert retained by the County to confirm that permitted structures are constructed in compliance with the Revised Amended Ordinance and the Project mitigation measures at the permit applicant's expense.

0040-4

The EIR does include air quality and greenhouse gas studies. Please see DEIR sections 4.3 and 4.7, DEIR Appendix I, and DEIR Appendix J. Please also see Global Responses Air 1 and Air 4.

0040-5

Please see all responses to the DEIR comment letter received from the Center on Race, Poverty & the Environment (i.e., Letter 45).

0040-6

Thank you for your comment and participation in the public review of the Project and the environmental document. The comment does not state a specific concern related to the adequacy of the DEIR and therefore does not require a detailed response.

Chris Mynk - Drilling & oilwells in Residential Areas(noise)

From: Kirk Blair <westen96@hotmail.com>
To: "mynkc@co.kern.ca.us" <mynkc@co.kern.ca.us>
Date: 7/9/15 5:53 PM
Subject: Drilling & oilwells in Residential Areas(noise)
Attachments: Oilwell letter to owners.doc; oilwell 005.jpg; oilwell 003.jpg; oilwell 001.jpg; oilwell 002.jpg

Hi Mr. Mynk,
I've lived next to an oilwell, in a residential neighborhood for 20yrs. And in that time, the owners have continued to purchase agricultural type motors to run the well. These motors have no insulation for noise. Current rules allow 65 decibels, this is like having a diesel truck parked 100ft from your home running at a fast idle. The sound should be more like 45 decibels as the noise ordinance shows for other noises. Attached are some pics that are typical around here (I think the City makes them go electric). Perhaps going through process might shed some light on this.
There's no excuse nowadays to have archaic machinery in residential neighborhoods. The updated ordinance should require the same sound controls you find at places like the Kern County Fair regarding generators. In fact, you can't rent a generator that doesn't come with sound insulation anymore. These motors on oil wells should be the same as well.
I appreciate giving me the chance to have input in this process.
Thanks,

0041-1

0041-1

Thank you for your comment and participation in the public review of the project and environmental document. The EIR and the Revised Amended Zoning Ordinance contain detailed measures, including setbacks from sensitive receptors. See Mitigation Measures 4.12-1 and 4.12-2.

This comment has been noted for the record and has been provided to the Kern County Planning Commission and the Kern County Board of Supervisors for consideration.

42 Peter Decker, Five America North Combustion

Maine, Michelle L (SFR - X56907)

From: Peter Decker <Peter.Decker@fivesgroup.com>
Sent: Wednesday, September 09, 2015 3:28 PM
To: MynkC@co.kern.ca.us
Subject: Draft Environmental Impact Report for Revisions to the Kern County Zoning Ordinance - Question

Hi Christopher,

In reviewing the Draft EIR I noticed six alternatives up for consideration that could "substantially lessen any of the significant effects of the Project and that would feasibly attain most of the basic Project objectives." 0042-1

- Alternative 1 keeps the status quo. 0042-2
- Alternative 2 creates more restrictions on new drilling activity by requiring conditional use permits. 0042-3
- Alternative 3 limits ground disturbance by requiring the clustering of new wells in locations immediately adjacent to existing wells. 0042-4
- Alternative 4 outlaws the highly effective and vital, but politically charged technology of hydraulic fracturing. 0042-5
- Alternative 5 mandates the use of CLIR's Duplex (or equivalent) technology. 0042-6
- Alternative 6 would require operators to recycle an equivalent amount of municipal and industrial (M&I) water used in their operations via underground injection. 0042-7

It seems that only one of the alternatives actually lessens the "significant effects" and attains all of the project objectives which the KCP identified as the superior alternative to the Project. And that's Alternative 5, which would require Clearsign's Duplex or equivalent be installed on every new OTSG and retrofitted on every existing OTSG within five years. 0042-8

It is interesting the Clearsign's technology is specifically called out in the draft EIR considering there are existing commercially available low emission steam generator technology in the market. And Clearsign's has not proven it can provide their equipment on a commercial basis. Can you tell why Clearsign was specifically called out in Alternative 5? Can you provide more information on what could be considered it's equivalent? 0042-9

0042-1

Please see Response 0080-9.

0042-2

Please see Response 0080-9.

0042-3

Please see Response 0080-9.

0042-4

Please see Response 0080-9.

0042-5

Please see Response 0080-9.

0042-6

Please see Response 0080-9.

0042-7

Please see Response 0080-9.

0042-8

Please see Response 0080-9.

0042-9

The commenter is correct that the Draft EIR fully evaluated the six project alternatives identified in this comment letter. The commenter is also correct that the Draft EIR identified Alternative 5, the Low-Emission Enhanced Oil Recovery (EOR) Technology Alternative as the environmentally superior alternative. As explained on Draft EIR pages 6-24 through 6-25, Alternative 5 is identical to the Project, excepted that it would require oil and gas well permit applicants to implement low-emission EOR technology as a condition of approval or new and replacement steam generators, and to replace existing steam generators constructed prior to 1990 within five years of enactment of the amended Ordinance.

If the Board votes to approve Alternative 5, then lower-emission technology would be required under circumstances to be specified by the Board. In no event, however, would an Alternative require use of any particular technology made by any particular manufacturer. Identification of the Clearsign Duplex Tile combustion technology in the Draft EIR was intended to be one illustrative example of the types of technologies that may be available and/or suitable. This comments claim regarding the current commercial availability of Clearsign's technology is noted, as are its comments regarding the current commercial availability of other unspecified low emission steam generator technology.

It is further noted that MM 4.3-8, described in the Draft EIR at page 4.3-100, incentivizes permit applicants to use lower-emission technology. Per MM 4.3-8, permit applicants are required to completely offset their emission of designated criteria pollutants by paying funding emission reduction projects in the airshed. As an alternative to paying the fee, an applicant may reduce emissions for one or more designated criteria emissions through actual reductions in air emissions from the applicant's other sources, subject to County and the San Joaquin Valley Air Pollution Control District. Such reductions may be achieved by replacing or retrofitting diesel-powered stationary equipment with lower-emission equipment.

Please see Global Response Alt-2.

43 Chris Romanini

Kern Draft EIR for zoning revisions to 2015(C), oil and gas permitting

comments by Chris Romanini Sept 9, 2015

To: Kern County Planning and Community Development Dept.
Attn: Christopher Mynk,

The California Council on Science & Technology released it's Berkeley Lab's Independent Scientific Assessment of Well Stimulation July 15, 2015. It describes needed measures and studies to address threats to the environment from well stimulation, but also from oil and gas production as a whole. Some key comments in the **Executive Summary**:
Conclusion **3.2.** "Operators have unrestricted use of many hazardous and uncharacterized chemicals". "Limit the use of hazardous and poorly understood chemicals" 5.2. "Evaluate the effectiveness of hydraulic fracturing regulations designed to protect groundwater from leakage along existing wells". 7.2 "How does oil and gas production as a whole …affect California's water system?" 7.2 "there were also few investigations designed to look for contamination." 7.2 "How can the public best be protected from air pollution associated with oil and gas production? 7.2. "Future research would fill knowledge gaps. Questions remain at the end of this initial assessment …that can only be answered by new research and data collection."
Kern's EIR can not be adequate until these scientific findings are evaluated and recommendations are applied.

0043-1

Comments on Draft EIR We farm in the Rosedale area with idle oil equipment on our land, some in bankruptcy. This EIR is insufficient as it has not addressed **Idle wells on split estates**, which are a safety, health, and welfare issue. Kern should embrace their existing powers to protect us by **establishing a policy to abandon idle wells.** DEIR should require returning the surface to the surface owner should a well no longer be productive. With currently almost 12,000 idle wells in Kern, after 25 years and no change in county policy, Kern could be littered with unproductive, idle wells and rusting tanks.

0043-1 Continued

California recognizes the need to abandon idle wells. The state has Resource Code 3206.5 which gives the county the pathway to force abandonment through DOGGR. **Kern should develop an idle well list per this statute.** According to our local DOGGR office, they can't recall Kern ever using this statute to abandon any well. Have you considered creating wording to make the state's intent to abandon idle wells workable and required in Kern?

0043-2

EIR 4.3-85 shows 11,827 Idle wells in Kern in 2012. The DEIR provides no proof that the number will stay consistent per their statement…"The number of idle wells is the same for every Project year 2015 – 2035…". What about future impacts? As the price of oil sinks and as more alternative energy comes online, could more oil wells be economically unprofitable, be idled, and go **bankrupt?** Where are the controls to prevent the oil companies from allowing to go idle any number of additional wells? Where are there safeguards to prevent split estates accumulating bankrupt equipment?

0043-3

Establish criteria Idle wells can squat indefinitely on fertile, prime farmland. **Kern should establish a time limit** after which an idle well must be either reactivated, or abandoned. How about 10 year? Or is 15 years more realistic? We have an idle well on our farmland with DOGGR logs showing NO activity for 29 years !! Is forever idle acceptable to Kern? I hope not. Kern's goal should be to **put farmland back into production in a timely manner.**

0043-4

Kern Draft EIR for zoning revisions to 2015(C), oil and gas permitting

comments by Chris Romanini Sept 9, 2015

Kern should require the oil companies to develop an idle well management plan on **EACH** idle well. Oil companies should be required to give yearly updates on their idle wells with goals of reactivation in a limited timeframe, or return the surface to it's owner. 0043-5

MM 4.2-1 Mitigation: **Kern should require abandonment of an idle well for every new permit issued.** Mitigation for a new well on split estates should be to abandon an idle well from Kern's list of idle wells created from the 3206.5 Resource Code. They should take from the list an idle well on the same property or property owned by the same surface owner. If there are no idle facilities that can be abandoned on the surface owner's property, they must then take out an idle well on another surface owner's property within Kern County, abandoning the oldest idle wells on the list first. Only if there are no wells available to abandon would they be allowed to use the ag conservation easement as mitigation. This needs to be studied. 0043-6

Increase fees on idle wells . Currently, idle well fees are so minimal there is no incentive to abandon them. (only $100/year for up to 10 years of idleness, or an escrow account of $5000). Unless an oil company is required to abandon an idle well, they most likely will just pay the tiny fee, forever. **Has the county studied creating a substantial idle well fee that could motivate abandonment and returning the land to the surface owner?** 0043-7

Require a sizable Bond when wells go into production to insure abandonment funds are available for all wells, and **adequate to cover equipment in bankruptcy.** We have idle wells and tanks on our farm land that have been in **bankruptcy** for over 4 years, with no activity and neglected for over 10 years. Those companies do not maintain their stuff. These sites are derelict and dangerous as they attract mischief-makers. We are challenged by people fooling around the tanks, tearing down the fences, and having beer parties on the cat walks. **(examples of bankrupt facilities on page 3)**. The EIR has not addressed this dangerous liability issue. Have you considered a bond adequate enough to cover the cost of eventual abandonment of wells? Have you considered if this bond could be used to maintain facilities in bankruptcy? The bond should remain in place the life of the well until it is properly abandoned. 0043-8

T**he county should Require meaningful inspections and Require penalties for noncompliance.** What new **team** of inspectors will Kern propose that will handle all unforeseen stuff for 25 years?? One man is not enough. Currently, oil companies can be **over- due for years** in doing pressure testing on idle wells. Why? What are the penalties for their tardiness? Are the penalties strong enough to compel action? Or are timely tests just voluntary, with **no penalty at all?** Could old wells have cracks that allow leaks to contaminate groundwater? Could there be a health issue from those idle, decaying tanks with soupy material stagnating on the bottom? Could they leak into irrigation systems? **Is anyone testing wells in bankruptcy?** You need to address this oversight. 0043-9

Protect our farms as we coexist with oil. The EIR is incomplete without a vision of abandoning idle wells on split estates and giving the land back to be productive, again. The EIR needs to address more robust fees and bonds on split estates. It needs to address the poor oversight of current DOGGR inspections and fines. The county needs to develop a new layer of protection. Kern needs to get a policy for bankrupt facilities. The safety**,** health, and welfare issues of idle wells give Kern the power to establish new policy, NOW. 0043-10

Kern Draft EIR for zoning revisions to 2015(C), oil and gas permitting

comments by Chris Romanini Sept 9, 2015

0043-11

Facilities on our ranch
in **Bankruptcy**
for over 4 years

Idle and neglected over
10 years

Is anyone testing or inspecting ?

Posted “NO Trespassing” does not stop beer parties. And what eyesores.

Kern Draft EIR for zoning revisions to 2015(C), oil and gas permitting

comments by Chris Romanini Sept 9, 2015

0043-1

The commenter's opinion that this EIR cannot be adequate until the scientific findings of CCST have been evaluated is noted for the record for consideration by the Planning Commission and Board of Supervisors. As explained in GR 12, Volume I of the CCST report was considered in the Draft EIR and Volumes 2 and 3 have been considered in this Final EIR. Commenter's specific concerns about contamination and air emissions, hazardous chemical use, and the new SB 4 hydraulic fracturing regulations, are also noted and are addressed in the Draft EIR and in response to other comments.

0043-1 cont'd

0043-2

Commenter's concerns about idle wells are noted for the record for consideration by the Planning Commission and Board of Supervisors. Please see response 33-1, GR Haz-1, and Section 2.7.3 which includes a new procedure for addressing idle well concerns.

0043-3

Please see response to 0043-1.

0043-4

Please see response to 0043-1.

0043-5

Please see response to 0043-1.

0043-6

Please see response to 0043-1.

0043-7

Please see response to 0043-1.

0043-8

Commenter's questions about enforcement are noted for the record for consideration by the Planning Commission and Board of Supervisors. The Revised Amended Ordinance clarifies inspection and compliance requirements, and GR 19 explains the enforcement process (and penalties) for ordinance requirements and mitigation measures. Enforcement through the Zoning Ordinance does not include a bonding requirement, but this comment is noted for the record for consideration by the Planning Commission and Board of Supervisors.

0043-9

Please see response to 0043-8.

0043-10

Commenter's request that the EIR require that abandoned wells on split estates to allow agricultural uses is noted for the record for consideration by the Planning Commission and Board of Supervisors. Well abandonment regulations administered by DOGGR govern abandonment requirements, but the EIR recognizes the agricultural mitigation value of removing legacy equipment and this has been included, and prioritized, in MM 4.2-1.

0043-11

Commenter's photographs showing oil equipment that commenter explains has been abandoned by bankrupt operators, which include visible debris and commenter notes is used for beer parties, is noted for the record for consideration by the Planning Commission and Board of Supervisors. The Project includes the future permitting of oil and gas activities under the County Zoning Ordinance, and does not include remediation of past legacy conditions. Please see the Revised Amended Ordinance, pursuant to which the County will help interested parties coordinate with DOGGR regarding enforcement of idle well regulations.

Re: Comments on Draft Environmental Impact Report for Revisions to Kern County Zoning Ordinance-2015(c) Focused On Oil and Gas Local Permitting

Dear Mr. Mynk:

This firm represents Pacific Ag Management, Inc. in matters relating to the proposed Kern County Zoning Ordinance-2015(c) Focused On Oil and Gas Local Permitting ("Zoning Ordinance" or "Project"). Pacific Ag manages almond and pistachio orchards in Kern County. It is a leader in environmentally sustainable farming practices and is committed to protecting California's precious farmlands and agricultural economies for future generations. Pacific Ag is deeply concerned about the far-ranging environmental impacts the Project may have throughout the County and its particular impacts on agricultural lands and farmworkers. 0044-1

On behalf of Pacific Ag, we respectfully submit these comments to ensure that the County's decision-makers fully comply with the California Environmental Quality Act ("CEQA"), Public Resources Code § 21000 *et seq*., and the CEQA Guidelines, California Code of Regulations, title 14, § 15000 *et seq*. ("CEQA Guidelines"). After carefully reviewing the Draft Environmental Impact Report ("DEIR") for the Project, we have concluded that the DEIR fails to comply with CEQA in numerous respects. 0044-2

The County is proposing a ministerial permit system that would allow nearly all future oil and gas development in Kern County to occur as of right. There will be no further environmental review or opportunities to refine the DEIR's mitigation measures for as long as the Zoning Ordinance remains in place. With no expiration date or mandate to update the Ordinance at any time, it is critical that the County prepare an adequate EIR. 0044-3

Unfortunately, instead of fully informing the public and the Board of Supervisors about the Project's extensive impacts, the DEIR systematically downplays the amount of oil and gas development that could occur under the Zoning Ordinance and masks the effects of this development with broad generalizations and shoddy analysis. Worse yet, the County's proposed mitigation measures largely consist of vague suggestions; there is little evidence that they will effectively reduce the Project's significant impacts. Our letter focuses on the DEIR's most critical failures in analyzing and mitigating the Project's significant agricultural, land use, water supply, aesthetic, noise, traffic, climate change, growth inducing, and air quality impacts. We also discuss the DEIR's failure to adequately describe the project or consider alternatives. 0044-4 0044-5

The EIR is "the heart of CEQA." *Laurel Heights Improvement Ass'n v. Regents of Univ. of Cal.* (1988) 47 Cal.3d 376, 392. It is "an environmental 'alarm bell' whose purpose it is to alert the public and its responsible officials to environmental changes before they have reached ecological points of no return. The EIR is also intended 'to demonstrate to an apprehensive citizenry that the agency has, in fact, analyzed and considered the ecological implications of its action.' Because the EIR must be certified or rejected by public officials, it is a document of accountability." *Id.* (citations omitted). 0044-6

Where, as here, the DEIR fails to fully and accurately inform decision-makers, and the public, of the environmental consequences of proposed actions, it does not satisfy the basic goals of the statute. *See* Pub. Res. Code § 21061 ("The purpose of an environmental impact report is to provide public agencies and the public in general with detailed information about the effect that a proposed project is likely to have on the environment; to list ways in which the significant effects of such a project might be minimized; and to indicate alternatives to such a project.") 0044-7 0044-8

As a result of the DEIR's numerous and serious inadequacies, there can be no meaningful public review of the proposed Zoning Ordinance. The County must revise and recirculate the DEIR in order to permit an adequate understanding of the environmental issues at stake. 0044-9

I. The DEIR Suffers From Several Overarching Deficiencies.

0044-10

Our review of the DEIR identified several overarching deficiencies including an inadequate level of detail in describing the Project and evaluating its impacts and in identifying feasible mitigation measures.

A. The DEIR Does Not Describe the Project or Evaluate Its Impacts in Sufficient Detail.

0044-11

CEQA sets a high bar for the County's evaluation of this Project and the DEIR does not come close to clearing it. The "fundamental purpose of an EIR is 'to provide public agencies and the public in general with *detailed* information about the effect which a proposed project is likely to have on the environment.'" *Vineyard Area Citizens for Responsible Growth v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 428 (emphasis added). Where, as here, an agency prepares a project-level EIR, the impact evaluations must "examine in detail site-specific considerations." *In re Bay Delta Programmatic Envtl. Impact Report Coordinated Proceedings* (2008) 43 Cal.4th 1143, 1169.

0044-12

0044-13

The DEIR, however, does not describe the Project in sufficient detail or conduct site-specific evaluations. For instance, it does not explain the maximum number of wells, roads, and associated infrastructure that could be developed on specific agricultural parcels, scenic vistas, groundwater aquifers, or occupied habitats. Instead, the DEIR is replete with regional characterizations that overlook sensitive local areas. Its impact evaluations are so generic that they fail to inform the public or decision-makers how the Project will impact their local parks, water supplies, farms, schools, and vistas.

0044-14

The DEIR's generic approach prevents the sort of environmental analysis that CEQA envisions. CEQA requires public agencies to evaluate a Project's impacts to the extent "reasonably feasible." CEQA Guidelines § 15151. An EIR must make a "good faith effort at full disclosure." *Id.* This includes summarizing the main points of disagreement among the experts. *Id.* In numerous respects detailed below, the County has failed to make a good faith effort to disclose the Project's impacts in a manner that will allow decision-makers and the public to intelligently take account of the Project's environmental consequences.

0044-15

Courts have noted that the level of specificity required for an EIR is determined by the nature of the project and the 'rule of reason.' *Friends of Mammoth v. Town of Mammoth Lakes Redevelopment Agency* (2000) 82 Cal.App.4th 511, 533. The

0044-15 Continued

County could argue that because this Project stems from a zoning ordinance amendment, it need not analyze site-specific details. But this ignores a key difference between this Project and other planning projects. This Project establishes a *ministerial* permit system for nearly all oil and gas development throughout the County. Zoning Ordinance § 19.98.040 (ministerial permit for Tiers 1, 2, 3, and 5); DEIR Figure 3-3 (Tier map).[1] There will be no other opportunity for site-specific review of the Project's impacts.

0044-16

0044-17

As stated in the leading CEQA treatise: "Once the project has received all necessary discretionary approvals, the CEQA process ends. No further environmental review can be required even though circumstances change significantly or important new information becomes available." Kostka & Zischke, Continuing Education of the Bar, "Practice Under the California Environmental Quality Act" (2015), § 19.22. Even if the project analyzed in an EIR changes significantly, CEQA review will not be reopened by applying for ministerial permits. *Id.* at § 19.32.

0044-18

In short, the Project that the County proposes gives a green light to all future drilling activities regardless whether: (1) future extraction technologies are more harmful and require new mitigation measures or limits, (2) the County's resources become depleted and need extra protection, or (3) future drilling surpasses what was considered in this DEIR.

0044-19

To be sure, the County has the discretion to establish such a ministerial permit process. But if it proposes to do so, CEQA does not permit the type of broad-brush analysis attempted in much of the DEIR. If the County chooses to foreclose the possibility of future environmental review, it must provide site-specific evaluations of the Project now.

B. The DEIR Does Not Adequately Identify Mitigation for the Project's Significant Environmental Impacts.

0044-20

In addition to its failure to describe the Project in sufficient detail or conduct site-specific evaluations, the DEIR's description of the Project's mitigation lacks adequate detail to properly inform decision-makers and the public. CEQA requires that a lead agency adopt all feasible mitigation measures that can substantially lessen a project's

[1] Only 25 of the 2,697 annual new wells projected (less than 1%) are expected to occur within Tier 4 residential areas where a CUP is required. DEIR at 3-32 to 3-34 (well forecast by Tiers). We reserve the right to argue that issuance of any particular Oil and Gas Conformity Review or Minor Activity Review permit is not a ministerial act.

0044-21

significant impacts. Pub. Res. Code § 21002. The agency must ensure that these measures are "fully enforceable" through permit conditions, agreements, or other legally binding instruments. Pub. Res. Code §§ 21002, 21081.6(b); CEQA Guidelines §§ 15002(a)(3), 15126.4(a)(2); *City of Marina v. Bd. of Trustees of the Cal. State Univ.* (2006) 39 Cal.4th 341, 359, 368-69. The requirement for enforceability ensures "that feasible mitigation measures will actually be implemented as a condition of development, and not merely adopted and then neglected or disregarded." *Federation of Hillside & Canyon Ass'ns v. City of Los Angeles* (2000) 83 Cal.App.4th 1252, 1261 (italics omitted); CEQA Guidelines § 15126.4(a)(2). 0044-21 Continued

To be enforceable, a mitigation measure must be detailed and specific. California courts have clarified that an EIR is inadequate where its proposed mitigation measures are so undefined that it is impossible to evaluate their effectiveness. *San Franciscans for Reasonable Growth v. City & County of San Francisco* (1984) 151 Cal.App.3d 61, 79. In particular, a mitigation measure must include criteria or performance standards against which the mitigation's actual implementation can be measured. *See San Joaquin Raptor Rescue Ctr. v. County of Merced* (2007) 149 Cal.App.4th 645, 670 (*"County of Merced"*). The reader must be able to discern what steps will be taken to mitigate the project's impacts. *Id.* Without such detail, there is no way for decision-makers and the public to weigh whether the proposed measures will sufficiently mitigate a project's impacts, causing the EIR to fail in its core, informational purpose. 0044-22

The DEIR relies on mitigation to reduce no fewer than 62 impacts to less-than-significant levels, and numerous impacts will remain significant. DEIR at 1-9 to -18. Yet the DEIR's proposed mitigation generally fails to satisfy CEQA's mandate because many of the measures are vague, poorly-defined, or unenforceable. Specifically, many measures fail to provide adequate detail regarding how they will be implemented, monitored, and enforced. The DEIR must be revised to identify, at a minimum, the following for each mitigation measure: the purpose for the measure and how that purpose will be accomplished; the event that triggers implementation of the measure; who is responsible for implementing the measure and verifying that it is accomplished; and any other information that may be necessary to ensure the measure is properly carried out and meets its purpose of mitigating the Project's significant impacts. 0044-23 0044-24

Further, the timing of developing mitigation is crucial. As a general rule, CEQA requires that the EIR fully describe a project's proposed mitigation measures. CEQA prohibits deferral of mitigation, except in the following narrow circumstances: (1) there must be practical considerations that preclude development of the measures at 0044-25

the time of project approval, (2) the EIR must contain specific criteria to govern the future actions implementing the mitigation, and (3) the agency must have assurances that the future mitigation will be both "feasible and efficacious." *Californians for Alternatives to Toxics v. Dept. of Food & Agric*. (2005) 136 Cal.App.4th 1, 17.

0044-25 Continued

Conversely, deferral is not permitted "when an EIR puts off analysis or orders a report without either setting standards or demonstrating how the impact can be mitigated in the manner described in the EIR." *Preserve Wild Santee v. City of Santee* (2012) 210 Cal.App.4th 260, 280-81. For example, an EIR is inadequate if the mitigation of a project's significant effects "largely depend[s] upon management plans that have not yet been formulated, and have not been subject to analysis and review within the EIR." *County of Merced*, 149 Cal.App.4th at 670.

0044-26

Here, the DEIR fails to satisfy CEQA's requirements because it relies on mitigation measures that are improperly deferred. The DEIR neither explains why deferral is necessary nor provides the criteria necessary to ensure that feasible and effective mitigation will be developed in the future. As discussed, the DEIR must contain a high level of detail now, as this EIR is the only opportunity that the County will have to impose mitigation for the Project's severe environmental impacts, which will occur for decades.

0044-27

II. The Project Description Is Inaccurate and Impermissibly Vague.

0044-28

In order for an EIR to adequately evaluate the environmental ramifications of a project, it must first provide a comprehensive description of the project itself. "An accurate, stable and finite project description is the sine qua non of an informative and legally sufficient EIR." *San Joaquin Raptor/Wildlife Rescue Center v. County of Stanislaus* (1994) 27 Cal.App.4th 713, 730 (quoting *County of Inyo v. City of Los Angeles* (1977) 71 Cal.App.3d 185, 193). An accurate project description is "the heart of the EIR process" and "necessary for an intelligent evaluation of the potential environmental effects of a proposed activity." *Sacramento Old City Ass'n. v. City Council* (1991) 229 Cal.App.3d 1011, 1023; *San Joaquin Raptor/Wildlife Rescue Center,* 27 Cal.App.4th at 730. While extensive detail is not necessary, the law requires that EIRs describe proposed projects with sufficient detail and accuracy to permit informed decision-making. *See* CEQA Guidelines § 15124 (project description).

Thus, a vague, inaccurate, or incomplete project description renders the analysis of significant environmental impacts inherently unreliable. Consequently, courts have found that, even if an EIR is adequate in all other respects, the use of a "truncated

0044-29

project concept" mandates the conclusion that the lead agency did not proceed in a manner required by law. *San Joaquin Raptor/Wildlife Rescue Center,* 27 Cal.App.4th at 730. Here, the DEIR does not come close to meeting the established legal standards for an accurate project description.

0044-29 Continued
0044-30

A. The Project Description Does Not Accurately Describe the Zoning Ordinance.

0044-31

The Project consists of an amendment to the County's Oil and Gas Zoning Ordinance and implementation of future oil and gas development undertaken pursuant to the amended ordinance. DEIR at 3-21. Unfortunately, however, the DEIR's project description does not accurately reflect the proposed Zoning Ordinance.

0044-32

To begin with, the DEIR incorrectly assumes that all the mitigation measures identified in the EIR and incorporated in the Zoning Ordinance will be complied with. It states that the new ministerial application review process will "ensure compliance with the updated development and implementation standards and conditions" and "will require consistent, comprehensive mitigation" that is incorporated into those standards and conditions. DEIR at 3-21 to 3-22. These statements are inaccurate.

0044-33

The Zoning Ordinance actually allows applicants for ministerial approvals who are "not . . . able to comply" with the mitigation measures to apply for a Conditional Use Permit ("CUP") instead. Zoning Ordinance § 19.98.50(C). In approving a CUP, the Planning Commission may waive any mitigation condition if it determines the waiver will not result in "material detriment" to the public welfare or nearby property. *Id.* § 19.98.50(A),(B), and (C).[2] The DEIR, however, fails to mention that some development under the Project may occur without complying with the Zoning Code's standards and conditions. Nor does it examine the extent to which this waiver would be applied. This omission undermines all of the conclusions in the DEIR's impact analyses, which assume mitigation measures will be implemented across the board.

0044-34

[2] The Zoning Ordinance does not even assure that ministerial applications will be required to comply with the mitigation measures. The DEIR states that "An application package must be submitted that includes a site plan and written documentation assuring compliance with all applicable Development and Implementation Standards." DEIR at 3-22. Yet, the Zoning Ordinance does not require any such documentation of compliance; it only requires basic site plan and location information. *See Zoning Ordinance* § 19.98.080.

The Project description also overstates the activities that would be regulated by the Zoning Ordinance. The DEIR claims that a Minor Activity Review permit would be required for all minor oil and gas activities. DEIR at 3-22. Yet, the Zoning Ordinance appears to require such a permit only for activities performed in association with a newly drilled well. Zoning Ordinance § 19.98.40(A). Similarly, the DEIR states that a Conformity Review permit is required for "deepening, redrilling, workover, [and] reworking . . ." DEIR at 3-30. Yet the Zoning Ordinance does not define "drilling" to include these activities. DEIR at 11-24. In short, the Project description does not accurately explain the extent to which the Zoning Ordinance's standards and conditions would apply to reworking, well stimulation, maintenance, or new support facilities for wells existing prior to adoption of the ordinance. Considering that hydraulic fracturing and other well stimulation techniques are commonly used on existing wells, this is a significant oversight. 0044-35

Finally, the DEIR's Project description severely overstates the accommodations made for surface owners. For instance, The DEIR claims that when an application is submitted for drilling on split estate lands without a signature by the surface owner, "the review process will take 30-days to allow time for surface owner consultation, with an automatic 30-day second review period." DEIR at 3-22. Yet the Zoning Ordinance requires only one review period if the application is complete. Zoning Ordinance §19.98.100(B),(C). Moreover, both the first and second review periods could be less than 30 days. Thirty days is the *maximum* amount of time that the Zoning Ordinance allows for such reviews. *Id.* The County could just as easily approve the permit in two days. The DEIR further suggests that County staff will "contact the Surface/Landowner and offer an in-person meeting to review the county process, development and implementation standards, Mitigation Monitoring and Reporting Program (MMRP) and answer any questions." DEIR at 3-28 to 3-29. Yet, the Zoning Ordinance itself does not require any such meeting with the surface owner. *See* §19.98.080(H); 19.98.100. These discrepancies are significant given that the DEIR relies on measures to accommodate surface owners to reduce the Project's land use impacts to a less than significant level. DEIR at 4.10-87. 0044-36

B. The Project Description Does Not Analyze the Whole of the Project. 0044-37

Under CEQA, the Project is "*the whole of an action* which has a potential for resulting in either a direct physical change in the environment, or a reasonable foreseeably indirect physical change in the environment . . . ." CEQA Guidelines § 15378 (emphasis added). Under well-established case law, the "whole" of a general plan or zoning amendment is the amendment's maximum development potential. "An evaluation

of a 'first phase-general plan amendment' must necessarily include consideration of the larger project, i.e. the future development *permitted* by the amendment." *City of Redlands v. County of San Bernardino* (2002) 96 Cal.App.4th 398, 409 (emphasis added).

0044-37 Continued

The County, however, fails to describe the Project's maximum development potential. Instead, the DEIR describes a "potential future oil and gas development scenario" that impermissibly truncates the total number of new wells, the geographic extent of their location, and the time period over which they would be drilled.

0044-38

1. The DEIR Does Not Describe the Number of New Exploratory Or Injection Wells.

0044-39

In addition to new producing wells, the Zoning Ordinance would permit new injection wells and new exploratory wells throughout the County. Zoning Ordinance §19.98.40. Yet the DEIR's future oil and gas development scenario, upon which its impacts analysis is based, only estimates the number of "new producing wells." DEIR at 3-30, 3-32. Drilling new exploratory and injection wells will produce air quality, aesthetic, traffic, biological and agricultural impacts that must be examined in the DEIR. The Project description is incomplete for failing to include this activity in the DEIR's well projections. CEQA Guidelines § 15378.

2. The DEIR Impermissibly Relies On an "Average" Annual Number of Wells, Rather Than the "Maximum" That Could Occur In Any Given Year.

0044-40

The DEIR assumes that the Project will result in 2,697 new producing wells per year and uses this number in all of its impact analyses. DEIR at 3-30. Yet, as the DEIR admits, "[t]he level of well drilling in any given year may be higher or lower than this average . . . ." DEIR at 3-32. In fact, as oil and gas expert David Hughes explains, the number of new wells drilled will greatly exceed—and could even double this average during periods of high-oil prices, which are expected to occur regularly in the future. Letter from David Hughes to Heather Minner, September 9, 2015 at 4,6, attached as Exhibit PD 1. The Project's public health, noise, air quality, and traffic impacts, among others, will be much greater—and may even be qualitatively different—in years when closer to 5,000 new wells are drilled in Kern County as compared to the DEIR's estimated 2,697. The DEIR must be revised to reflect these spikes and evaluate the maximum number of new wells that could be drilled in any given year.

0044-41

0044-42

0044-43

0044-44

In *County of Merced*, 149 Cal.App.4th 645, the Court of Appeal confirmed an agency's obligation to analyze the impacts from the whole of the project, and "not some smaller portion of it." *Id*. at 654. The project at issue was a new Conditional Use Permit ("CUP") for an existing aggregate mine and processing operation. The new CUP authorized a maximum production level of 550,000 tons per year, which was an increase over existing levels. However, historic mine production rates indicated that actual production could be less than the theoretical maximum. Based on historic rates and projected future rates, the EIR "estimated average production of about 260,000 tons per year." *Id.* at 655. The court held that the EIR's identification of the estimated average in the project description, rather than the maximum level of production authorized by the CUP, violated CEQA. The court stated: "By giving such conflicting signals to decisionmakers and the public about the nature and scope of the activity being proposed, the Project description was fundamentally inadequate and misleading." *Id.* at 655-56. The DEIR here suffers from the same deficiency as in *County of Merced.* It must be revised to include the Project's maximum number of wells, not a theoretical average.

0044-45

0044-46

3. The DEIR Fails to Describe All Reasonably Expected Future Drilling.

Not only does the DEIR ignore foreseeable spikes in drilling rates, but it also greatly underestimates the total number of future wells. The DEIR's estimates assume that drilling rates will be the same as they have been in the past. Exhibit PD 1 at 4. However, as oil and gas expert David Hughes explains, production at existing oil fields has been declining while the number of wells required to produce this oil has been steadily increasing. *Id.* at 3. In other words, drilling is not occurring at a flat rate now. Further, meeting the project objectives of increased oil production in Kern County will require an additional ramp up in drilling rates. *Id.* at 4. In light of these factors, "the assumed number of future new producing wells should be increased substantially from the estimate in the DEIR." *Id.* at 6.

0044-47

Further, the oil and gas industry is actively engaged in research to develop new technologies that will allow it to access the vast amount of oil currently locked in the Monterey Shale formation. *Id.* at 8 If it succeeds in "cracking the code" within the next 25 years, the number of new producing wells will greatly exceed those estimated in the DEIR." *Id.* This is not mere speculation. The industry's track record in developing hydraulic fracturing methods to extract oil and gas from other shale formations across the nation, and its concentrated efforts to develop technology for the Monterey Shale formation, make the DEIR's reliance on past drilling levels to project the future naively unrealistic. *Id.* at 5-6, 8. Courts have consistently held that an EIR must examine a

project's *potential* to impact the environment, even if the development may not ultimately materialize. *Bozung v. Local Agency Formation Com.* (1975) 13 Cal.3d 263, 279, 282. The DEIR must be revised to acknowledge and describe the very real possibility of future technological innovations.

0044-47 Continued

In addition to ignoring that new technology could cause drilling levels to far outpace its estimates, the DEIR impermissibly truncates the number of years the Zoning Ordinance will be in effect. The DEIR only analyzes the impacts of new wells through the year 2040. DEIR at 3-32. Yet the DEIR admits that "[t]here is no scheduled expiration date for a Zoning Ordinance" and nothing requires the County to readopt the Zoning Ordinance after 2040. DEIR at 3-30. Accordingly, the DEIR must consider that future oil and gas development will occur under the Zoning Ordinance well beyond 2040.

0044-48

Without accounting for this extended time period, the DEIR fails to analyze the "whole of the Project" as CEQA requires. *Christward Ministry v. Superior Court* (1986) 184 Cal.App.3d 180, 194–95 ("The fact future development is not certain to occur and the fact the environmental consequences of a general plan amendment changing a land use designation are more amorphous does not lead to the conclusion no EIR is required."); *City of Carmel-by-the-Sea v. Board of Supervisors of Monterey County* (1986) 183 Cal.App.3d 229, 244 ("the rezoning by itself . . . did in fact represent a commitment to expanded use of the property . . . .").

0044-49

4. The County Cannot Cure Its Faulty Estimates With Future Environmental Review.

The DEIR admits that its estimates for the number of new wells could be exceeded. DEIR at 3-30. However, it states that if these levels are exceeded, the County would need to consider whether further environmental review is required under CEQA Section 21166 and CEQA Guidelines Section 15162 (due to new or substantially more severe significant environmental impacts than those considered in the EIR). The DEIR claims that if the extra new wells met this standard, "further review would be required for continued reliance on the Conformity Review Process." This claim is wrong for two reasons.

0044-50

First, "CEQA's demand for meaningful information is not satisfied by simply stating information will be provided in the future." *Vineyard Area Citizens for Responsible Growth,* 40 Cal.4th at 834 (internal quotations omitted). Accordingly, an approving agency may not defer analyzing project details that are available at the time of the approval. *Stanislaus Natural Heritage Project v. County of Stanislaus* (1996) 48

0044-51

Cal.App.4th 182. The County can establish maximum build-out for the Project and it must do so now to evaluate the Project's reasonably foreseeable impacts.

0044-52

Second, the County knows full well that it will never need to conduct supplemental or subsequent environmental review under CEQA section 21166 and CEQA Guidelines section 15162. This is because those sections are triggered only when an agency is considering a *discretionary* action. Pub. Res. Code § 21080(a); CEQA Guidelines §15162(c); *San Diego Navy Broadway Complex Coalition v. City of San Diego* (2010) 185 Cal.App.4th 924, 935. Because ministerial approvals are exempt from CEQA, further CEQA review would not be required if the County permits a greater number of new wells than analyzed in the EIR. *See Health First v. March Joint Powers Authority* (2009) 174 Cal.App.4th 1135, 1143. Accordingly, CEQA demands that this DEIR consider the environmental impacts of the Project's maximum build-out.

0044-53

5. The DEIR Does Not Accurately Describe the Extent of New Wells On Tier 2 (Agricultural) Lands.

The DEIR not only underestimates the total number of wells that could occur annually or over time, but also fails to accurately describe how new wells will be distributed geographically. The DEIR notes that 95% of oil and gas activities in the County have occurred within DOGGR Administrative Boundary areas. DEIR at 3-24. This makes sense, because DOGGR determines the extent of its Administrative Boundaries based on proven oil and gas extraction. *Id.* at 3-23. The DEIR, however, makes the faulty assumption that 95% of all *future* oil and gas drilling will also occur within or adjacent to existing Administrative Boundaries. *Id.* at 3-24. It further assumes that a full 90% of new wells will occur within Tier 1 lands, where oil and gas activity is already the primary land use. *Id.* at 3-32 to 3-34; Exhibit PD 1 at 7. According to the DEIR, just 6% of new wells will occur on the County's vast Tier 2 (agricultural) lands. The evidence is to the contrary.

0044-54

0044-55

As explained by oil and gas expert David Hughes, given that existing fields are largely mature and in decline, "increased oil and gas production in Kern County will require developing new fields outside of Tier 1 lands . . . ." *Id.* at 8. Most of these new fields will be located in Tier 2 lands, given the vast extent of these lands and evidence that recoverable oil is located beneath them. *Id.* at 8-9. "Accordingly, the DEIR greatly underestimates the number of new producing wells that may be drilled on Tier 2 lands. This is true even assuming no technological advancements beyond existing production methods." *Id.* at 8. If the oil industry is successful in its efforts to produce oil directly from the source rocks of the Monterey Shale formation, which is not an unreasonable

0044-56

0044-57

assumption, there will be "still larger numbers of new producing wells on Tier 2 lands, greatly exceeding those estimated in the DEIR" *Id.*

0044-57 Continued

By mistakenly assuming that almost all of the Project's new wells will occur in areas already converted to oil and gas uses, the DEIR's analyses of biological, agricultural, aesthetic, traffic, and other impacts are fatally flawed. The Project's impacts will clearly be much greater than reported in the DEIR because the Project description does not accurately describe the location of new wells throughout the County.

0044-58

6. The DEIR Underestimates the Amount of Hydraulic Fracturing That Will Occur In the Future.

California's Senate Bill 4 (2013) ("SB 4") regulates "well stimulation treatments" which include hydraulic fracturing, acid fracturing and acid matrix stimulation. These oil and gas activities have the potential for more significant environmental impacts than conventional oil and gas extraction methods. But the DEIR assumes that the use of well stimulation treatments will remain the same as during the baseline year for the duration of the project. DEIR at 3-52 ("…levels and distribution of SB4 regulated activity in the County would likely be similar in future years [as in 2012]"). This assumption is unwarranted and results in the DEIR underestimating the Project's impacts.

0044-59

In fact, given the maturity and declining productivity of existing fields, and the need to develop new fields to add production, it is likely that well stimulation treatments will be used at *increasing* levels in the Project area in coming years. Exhibit PD 1 at 9-10. Although stimulation technologies have been used in the oil and gas industry for many decades, advances in hydraulic fracturing technology have allowed access to previously inaccessible shale deposits across the U.S. Using the newest well stimulation technologies often makes otherwise unprofitable wells profitable. Given the increased use of hydraulic fracturing and other well stimulation treatment techniques across the Country for the past 20 years, it is unreasonable to assume that these activities will remain at 2012 levels for the lifetime of the Project.

0044-60

These technologies will certainly be used more extensively in Kern County in the future if production is to increase. *Id*. "Cracking the code" on new plays like the Monterey Shale Formation will likely be due to the evolution of contemporary well stimulation treatment techniques, and/or the development of new breakthrough technologies. The EIR must acknowledge both that more wells be drilled in the future in order to meet the applicants' plans for increased oil and gas production, and that a larger

0044-61

proportion of these wells will be stimulated with technologies currently regulated under SB 4. 0044-61 Continued

7. The DEIR Fails to Analyze All Components of the Project.

The DEIR also impermissibly truncates the Project description by refusing to acknowledge that the Project will demand construction of additional infrastructure—infrastructure that itself will have environmental impacts unexamined by the DEIR. For instance, the DEIR admits that "[e]xtending existing high-voltage electric transmission lines (i.e., lines above 50 kV) to provide a permanent supply of electricity to a new well pad or facility may be required." DEIR at 3-40. But instead of analyzing where these extensions would need to occur, the DEIR claims that construction of these new lines "is not within the scope of this EIR" because they are regulated by the California Public Utilities Commission and would require separate "project-level CEQA review." *Id.* To the contrary, CEQA requires the DEIR to evaluate these extensions now. 0044-62

Long-standing CEQA law holds that "when one activity is an integral part of another activity, the combined activities are within the scope of the *same CEQA project*" and must be analyzed together. *Tuolumne County Citizens for Responsible Growth, Inc. v. City of Sonora* (2007) 155 Cal.App.4th 1214, 1229 (emphasis added). For example, when a development is contingent on the construction of new or expanded infrastructure, both the development and the infrastructure are part of the same project and must be analyzed in the same EIR. *Id.*; *San Joaquin Raptor/Wildlife Reserve Center v. County of Stanislaus* (1994) 27 Cal.App.4th 713, 729-30. It is irrelevant that the infrastructure improvements may require separate approvals. "The Guidelines . . . establish that the need for separate approvals does not sever all of the connections between the two acts." *Tuolumne County Citizens for Responsible Growth, Inc.*, 155 Cal.App.4th at 1228 (citing CEQA Guidelines § 15378(c)). Accordingly, the DEIR must be revised to include a description of the number of new high-voltage electrical transmission lines that the Project will require and where those lines could be located. 0044-63 0044-64 0044-65

The DEIR also attempts to avoid analyzing the construction and operation of new cogeneration facilities that are almost certain to occur as a result of the Project. A cogeneration facility generates both steam for enhanced oil recovery operations and the electricity needed to produce the steam. They are often large, and very polluting facilities. *See, e.g., Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 692 (proposed cogeneration plant with capacity for 19.9 megawatts of electricity and 35,000 pounds of steam per hour, emitting particulate matter, sulfur dioxide, nitrogen oxides, carbon monoxide, nonmethane hydrocarbons, and trace metals). 0044-66

The County argues that it need not analyze cogeneration facilities because it has not approved a cogeneration facility for 10 years and electricity markets now make it "less attractive" to construct the facilities "in many locations." DEIR at 3-44. The County even claims that "any estimate regarding the number or technology for future cogeneration facilities would be entirely speculative." *Id.* 0044-66 Continued

The DEIR's position is untenable, as it is no more speculative to estimate new cogeneration facilities and technology than to estimate new wells and extraction technology. In fact, cogeneration facilities are being proposed elsewhere in California and can similarly be expected in Kern County in the future. For example, a natural gas-fired combined heat and power facility was approved in Stockton on July 30, 2015. *See* San Joaquin Valley Air Pollution Control District, Authority to Construct Application Review – Ingredion Incorporated (July 22, 2015), attached as Exhibit PD 2. As proposed, the facility will generate 7.3 megawatts of electricity and is a Major Source of emissions of nitrogen oxides, carbon monoxide, and volatile organic compounds. *Id.* The DEIR must also account for expansion of existing cogeneration facilities to serve the Project's projected new wells. The EIR claims that any new cogeneration facility will require a CUP and separate CEQA review. But the County may not chop its zoning ordinance into individual projects in this manner. *Bozung,* 13 Cal.3d at 283-84; *San Joaquin Raptor/Wildlife Rescue Center*, 27 Cal.App.4th at 729-30. Further, it is far from clear that a cogeneration facility would require a CUP. The Zoning Ordinance allows steam generators to be approved through Conformity Review, and a cogeneration facility is simply a type of steam generator. Zoning Ordinance §19.98.070. 0044-67 0044-68 0044-69 0044-70

C. The DEIR Must Analyze the Project's Maximum Build-Out or Limit the Development Permitted by the Zoning Ordinance

The DEIR must be revised to describe the Project's maximum build-out. This would describe the maximum density of oil and gas operations that could occur adjacent to different types of land uses (such as schools and parks) as well as the maximum density that could occur on split estate lands, such as farms and ranches. It would also describe the total number of new wells that could be developed over time if future conditions optimized oil and gas development. In other words, the DEIR must describe the outer limit of what experts believe could potentially occur based on the amount of oil and gas reserves in Kern County. 0044-71

The DEIR may also continue to describe a "projected" build-out that the County believes is reasonably foreseeable based on articulated factors. But only by providing the potential full build-out will the public and decision-makers be able to make 0044-72

an intelligent decision about the Project. Decision-makers may choose to bet that approval of the Zoning Ordinance will not result in full build-out and that actual development will be closer to projected levels. But in order to make an informed decision, as CEQA requires, the DEIR must describe what full build-out would be, what its impacts would be, and the factors that will determine whether full build-out or a lesser level of development will occur. Without this evaluation, decision-makers are deprived of the information they need to make an educated decision.

0044-72
Continued

If the County desires to limit its analysis in the DEIR to a predicted number of new wells, within predicted geographic areas, over a limited period of time, and exclude certain types of infrastructure, it must amend the proposed Zoning Ordinance to reflect these restrictions. Only then will the DEIR's current Project Description accurately describe the development permitted by the Zoning Ordinance, as it must. Capping the amount of development permitted within certain zones is a common planning tool, and there is no reason the County could not cap the number of new wells (annually and by 2040) within the various Tiers established here. *See generally* William Fulton and Paul Shigley, Guide to California Planning, 4th ed. (2012), Ch. 11, attached as Exhibit PD 3; *see also Construction Industry Association of Sonoma County v. City of Petaluma* (1975) 522 F.2d 897, 901, 909 (upholding citywide cap of 500 dwelling units per year and requiring building permits to be divided evenly between west and east sections of the city). So, too, could the County prohibit new cogeneration facilities and any new wells located outside of the Project Area.

0044-73

0044-74

0044-75

Without limiting the Zoning Ordinance's permitted development or revising the DEIR to analyze maximum potential build-out, the County fails to accurately describe the whole of the Project, rendering the DEIR fundamentally misleading to the public and decision-makers in violation of CEQA. "[O]nly through an accurate view of the project may the public and interested parties and public agencies balance the proposed project's benefits against its environmental cost, consider appropriate mitigation measures, assess the advantages of terminating the proposal and properly weigh other alternatives." *City of Santee v. County of San Diego* (1989) 214 Cal.App.3d 1438, 1454. Because the DEIR fails to describe the Project properly, it fails to serve its purpose as an informational document. *See County of Merced*, 149 Cal.App.3d at 674.

0044-76

III. The DEIR's Analysis of and Mitigation for the Project's Environmental Impacts Are Inadequate.

A. The DEIR Fails to Disclose the Extent of the Project's Significant Agricultural Impacts or Adopt All Feasible Mitigation Measures.

The California Legislature has repeatedly emphasized that the preservation of agricultural land, including range land, is an important public policy. In adopting the California Land Conservation Act of 1965, Gov. Code section 51200 *et seq*., (unofficially, the "Williamson Act"), the Legislature found that "the preservation of a maximum amount of the limited supply of agricultural land is necessary to the conservation of the state's economic resources, and is necessary not only to the maintenance of the agricultural economy of the state, but also for the assurance of adequate, healthful and nutritious food for future residents of this state and nation." Gov. Code § 51220; *see also* Civ. Code, § 815 ("the preservation of land in its natural, scenic, *agricultural*, historical, forested, or open-space condition is among the most important environmental assets of California") (emphasis added); Pub. Res. Code § 10201 ("These lands contribute to the economic betterment of local areas and the entire state and are an important source of food, fiber, and other agricultural products. . . . The long-term conservation of agricultural land is necessary to safeguard an adequate supply of agricultural land . . . .").

0044-77

The Legislature has also declared that CEQA is intended to effectuate this important public policy. Stats. 1993, ch. 812, § 1, p. 4428 ("Agriculture is the state's leading industry . . . . The conversion of agricultural lands to nonagricultural uses threatens the long-term health of the state's agricultural industry. The California Environmental Quality Act plays an important role in the preservation of agricultural lands.").

0044-78

Kern County has also emphasized the importance of agricultural land, adopting numerous General Plan policies and goals to protect and conserve the County's vast agricultural lands. *See* DEIR at 4.2-114.2-14. The County has a long history of agricultural operations and encompasses extensive harvested agricultural land and rangeland. Crops in Kern County accounted for a gross value of $6 billion in 2012, contributing significantly to the economy of the region and the state as a whole. *Id.* at 4.2-1.

0044-79

Farming in Kern County is under considerable pressure, however. The County repeatedly ranks first in the state for nonrenewal of Williamson Act contracts. *Id.*

0044-80

at 4.2-6. According to the DEIR, since 1998 the County has been losing an average of 1,085 acres of farmland each year. *Id.* at 4.2-24. Oil and gas development can be a significant driver of agriculture and range land conversions and fragmentation. *See* Brady Allred *et al*., *Ecosystem Services Lost to Oil and Gas in North America,* 348 Science Magazine No. 6233, pp. 401-02 (April 24, 2015), attached as Exhibit Ag 20; David Jones *et al.*, *Comparing the Ecological Impacts of Wind and Oil & Gas Development: A Landscape Scale Assessment,* Plos One (Nov. 27, 2013), attached as Exhibit Ag 21. Conversions can occur both when oil and gas operations are established on actively farmed lands or when oil companies purchase farmland and cease farming operations entirely. *See* letter from Holly King to Kern County Planning and Community Development Department ("H. King Letter"), forthcoming. 0044-80 Continued

The DEIR, however, gives short shrift to the Project's potential to impact agricultural and rangeland resources. It repeatedly employs methodologies that downplay or ignore the Project's impacts. In doing so it violates CEQA's core informational purpose. *Mira Monte Homeowners Assn. v. County of Ventura* (1985) 165 Cal.App.3d 357, 365 (EIR protects "the right of the public to be informed in such a way that it can intelligently weigh the environmental consequences of a[] contemplated action"). The DEIR does not even evaluate impacts to rangeland. Nor does the DEIR adopt all feasible mitigation measures to reduce the Project's significant impacts on agricultural resources as CEQA requires. Pub. Res. Code § 21002; CEQA Guidelines § 15002. 0044-81 0044-82

1. The DEIR Vastly Underestimates the Extent to Which the Project Will Convert Farmland to Non-Agricultural Use.

Under CEQA, the Project will have a significant impact if it converts Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (collectively "Farmland") to non-agricultural use. DEIR at 4.2-15. In order to assess the Project's potential to convert Farmland, the County calculated the average number of acres converted per well in each of the three Project Subareas and multiplied that number by the DEIR's estimated number of new wells in Tier 2 (agricultural) lands. DEIR at 4.2-17, Appendix F. The County's approach downplayed the Project's conversion potential in a number of respects, however, and the DEIR's conclusions are inaccurate—and highly misleading—as a result. 0044-83

As discussed in detail in Section II.B.5 of this letter, the DEIR unreasonably assumes that only 6% of the new producing wells will occur on Tier 2 lands. In fact, the number of new wells within Tier 2 is likely to be much higher than the 0044-84

DEIR's estimates. This is because Tier 2 makes up 87% of the Project Area and increased oil and gas production in Kern County will require developing new fields outside of the mature and declining Tier 1 fields. New production is most likely to occur on Tier 2 lands, even with existing technology, and if extraction technology continues to advance as it has in the past, the number of new wells could greatly exceed the DEIR's estimates. Unless the DEIR accounts for these factors and revises its "future development scenario" accordingly, the DEIR's analysis of agricultural impacts is useless. 0044-84 Continued

Further, the DEIR based its farmland conversion estimates on the *average* acreage of land disturbance that occurs per producible well in each Subarea. Appendix F at 1. As discussed in Section II.B.2 of this letter, CEQA requires an analysis of the Project's maximum buildout, not a hoped for average. *County of Merced*, 149 Cal.App.4th at 655-56. Moreover, the averages used by the DEIR deviate significantly from the acreage that has actually been converted per well in individual fields. For instance, the DEIR estimates 2.0 acres of disturbance per well in the Western Subarea. Appendix F at 15. But of the 10 fields surveyed, 5 had disturbed more than 2.0 acres per well, with one field disturbing as high as 4.60 acres per well. *Id.* at 13. The DEIR seriously understates the Project's potential to convert Farmland in the Western Subarea by suggesting that future wells will result in 2.0, as opposed to 4.6 acres of lost Farmland. The difference between the average and maximum disturbance in the Central Subarea is even greater, with the DEIR estimating 3.0 acres per well while the ground disturbances are as high as 7.60 acres per well in the surveyed fields. *Id.* at 14-15. 0044-85 0044-86

Even the maximum disturbance acreage surveyed may not accurately reflect the DEIR's potential Farmland conversion. This is because the DEIR surveyed only the 10 *largest* producing fields. *Id.* at 1. But there are certainly economies of scale that occur in high-producing fields where infrastructure can be shared by multiple wells. Much of the oil and gas development on Tier 2 lands is likely to be more dispersed, with the need to duplicate infrastructure that would otherwise be shared in more developed fields. The DEIR must take this difference into account. 0044-87

In addition, the DEIR considered only the acreage that was physically replaced by oil and gas infrastructure, such as well pads and processing tanks. In other words, the infrastructure footprint. The DEIR did not consider the actual acreage taken out of production. Often, oil and gas infrastructure is located in a manner that isolates a piece of land or renders the irrigation system inoperable, making it impossible or uneconomical to farm. For example, DEIR Exhibit G Figure AES-O3 shows future conditions on a farm with existing and new oil and gas infrastructure permitted under the 0044-88

Project. The multiple wells, roads, and other infrastructure dispersed throughout the farm leaves the larger parcel unable to be farmed. H. King Letter. The loss of Farmland is thus larger than the infrastructure footprint and this additional acreage must be accounted for. 0044-89

The DEIR's analysis also fails to account for situations when oil and gas companies buy Farmland and dedicate the entire parcel to oil and gas uses. For instance, one agricultural company in Kern County has sold numerous acres to oil companies because doing so was preferable to continuing to farm with the interference caused by oil and gas operations. *See* H. King Letter. In another example, one family farmer sold his house and farm to an oil company to avoid noxious drilling operations established near his house. *See* H. King Letter. The DEIR must inform the public of the extent to which entire Farmland parcels would be lost due to the sale of surface rights for oil and gas uses. 0044-90

Finally, the DEIR's estimate of potential Farmland conversions did not even consider all Farmland. It considered only Farmland located in Tier 2 lands, reasoning that only Tier 2 lands are currently zoned as agricultural. Appendix H at 12. CEQA, however, requires an analysis of the potential conversion of *all* Farmland based on soil type, not on whether the Farmland is actively farmed or currently zoned for agricultural uses. Pub. Res. Code §21060.1 (definition of agricultural land); CEQA Guidelines Appendix G.II. In sum, the DEIR has seriously underestimated the amount of Farmland that could be converted to non-agricultural uses. 0044-91

Further, even the DEIR's analysis of the underestimated 298 acres that could be converted annually under the Project is not conducted in sufficient detail to inform the public or decision-makers. For instance, the DEIR only describes where these conversion would happen within the three Project Subareas, not at a scale that is meaningful to local residents. 0044-92

2. The DEIR's Farmland Conversion Mitigation Measure Is Inadequate and Does Not Reduce the Project's Significant Farmland Impacts to a Less Than Significant Level.

The DEIR recognizes, as it must, that even its underestimated conversion of 298 acres of Farmland per year is a significant impact under CEQA. *See Citizens for Open Government v. City of Lodi* (2012) 205 Cal.App.4th 296 (conversion of 40 acres of prime farmland a significant impact). However, the mitigation measure the DEIR 0044-93

identifies, Mitigation Measure MM 4.2-1, is woefully inadequate to effectively reduce this impact. DEIR at 4.2-19. 0044-93 Continued

To begin with, the County is only requiring mitigation at a ratio of 1:1 for conversion of Farmlands "that have been actively farmed 5 years or more out of the last 10 years." *Id.* Yet, as mentioned above, CEQA does not distinguish between actively farmed and idle Farmland. Pub. Res. Code §21060.1; CEQA Guidelines Appendix G.II. The County must mitigate for the loss of *all* Farmland, regardless of whether it has been actively farmed 5 out of the last 10 years. 0044-94

In addition, the County is only applying the 1:1 mitigation requirement to the "actual ground disturbance area for oil and gas activities." DEIR at 4.2-19. But as mentioned above, the Project can convert additional Farmland to non-agricultural use when oil and gas infrastructure is not clustered, isolates parcels too small to farm, or disrupts the parcel in such a way that the entire parcel is not farmable. The DEIR must also identify mitigation for the loss of these Farmlands. 0044-95

Further, Mitigation Measure 4.2-1 allows the applicant to mitigate for the loss of Farmland by conserving equivalent Farmland anywhere in the state "if qualifying lands cannot be found in Kern County." DEIR 4.2-19. The measure contains no standards for how the County is to determine if mitigation lands cannot be found. If the applicant asks a few farmers over the period of two months, can it give up? This vague measure is in effect no limitation at all. Further, the purchase of Farmland in other parts of the state will do nothing to mitigate for the loss of Farmland in Kern County, which is a key part of the County's economy and open space resources. Further, as discussed in more detail below, the loss of Farmland in Kern County can reach a tipping point when the entire industry is affected due to the lack of a critical mass. Preserving Farmland in other counties will only accelerate this risk. 0044-96 0044-97 0044-98

Moreover, the DEIR provides no criteria governing future conservation easements as it must. *Preserve Wild Santee,* 210 Cal.App.4th at 280-81. What types of organizations are qualified to hold the easements? Will an endowment for management be required? What standard terms must be included in the easement? Without specifying these types of criteria for a qualifying easement, there is no assurance that the DEIR's vague requirement will be effective as CEQA requires. *Id.* For instance, the Land Trust Alliance has developed a land trust certification system to ensure easement holders comply with nationally accepted performance standards. Requiring Land Trust Alliance certification avoids the risk that agricultural conservation easements will be held by "rogue" land trusts with no interest in effectively managing or enforcing the easement. 0044-99 0044-100

In addition to relying on purchasing or funding undefined conservation easements, the DEIR anticipates mitigation through purchasing of credits from an established farmland mitigation bank, an equivalent "farmland preservation program," or participating in an "agricultural land mitigation program" adopted by the County. The DEIR does not identify any established farmland mitigation banks, however, and the County has not yet adopted other programs to mitigate for the loss of farmland. 0044-101

The DEIR's Farmland mitigation programs must be developed and established now, through the EIR process, and not delayed to a later date. *California Native Plant Society v. County of El Dorado* (2009) 170 Cal.App.4th 1026 ("to be adequate the payment of fees must be tied to a *functioning* mitigation program"). As the court explained in *South County Citizens for Responsible Growth v. City of Elk Grove,* (Cal. Ct. App., Feb. 5, 2004) 2004 WL 219789, at *8 (unpublished, attached as Exhibit Ag 1), "EIR discussion and public response are necessary to determine how and when the fees should be paid and spent. For example, should the fees be paid up-front upon project approval or should they be paid on a per-acre basis as the property is developed? Should the fees be spent immediately or should they be held and pooled with fees from other developers? What areas or properties should have priority for acquisition? . . . These are matters that can and should be addressed through an EIR with an opportunity for public response." 0044-102 0044-103

Finally, in order to reduce the impact of the loss of Farmland to the extent feasible as required by CEQA, the County must first require replacement of lost Farmland onsite, or offsite, if no opportunities exist onsite. Pub. Res. Code § 21002. This is because the net loss of agricultural land is permanent, and mitigation such as a conservation easement, does not eliminate that significant impact. *Citizens for Open Government,* 205 Cal.App.4th 296 (conversion of 40 acres of prime farmland was a significant impact even after conservation easement mitigation measures). Even at a 1:1 ratio, conservation easements could result in half of the Farmland in the County being lost, since easements are placed over existing Farmland. Accordingly, where opportunities exist to ensure a no-net loss of Farmland, they must be required. 0044-104

Here, the County has identified the possibility of "restoring agricultural lands to productive use through the removal of legacy oil and gas production equipment, including well abandonment and removal of surface equipment" as an optional mitigation measure. DEIR at 4.2-19. This mitigation measure should not be one of several options; it must be required first. In addition, the County must establish a program to implement this measure now, rather than rely on the vague description currently appearing in the DEIR. The DEIR's current mitigation will not achieve the no-net loss of Farmland that 0044-105

could occur by requiring restoration. Applicants are unlikely to select the County's optional measure of properly abandoning an idle well, given that purchasing a conservation easement would be much less expensive. *See* Kern County Planning and Community Development Department, Workshop Staff Report (July 27, 2015) at 23. 0044-105 Continued

Despite these grave deficiencies, the DEIR finds that Mitigation Measure 4.2-1 reduces the Project's significant Farmland conversion impacts to a less than significant level. DEIR at 4.2-19. There is no evidence to support this conclusion. The DEIR does not analyze the amount of Farmland that will *not* be mitigated at a 1:1 ratio, nor does it analyze the effectiveness of the 1:1 mitigation measures. Indeed, such an analysis is not even possible given the measure's vague terms and unestablished programs. 0044-106

Given the importance of Farmland to the state and the County, even minor conversions are significant. *See Masonite Corp. v. Cnty. of Mendocino* (2013) 218 Cal.App.4th 230. Furthermore, because the net loss of agricultural land is permanent, the resulting impact would be significant and unavoidable even if other Farmland is permanently protected. *Citizens for Open Government,* 205 Cal.App.4th 296; *South County Citizens for Responsible Growth v. City of Elk Grove,* 2004 WL 219789 at *5 (approving EIR's conclusion that the loss of Farmland of Statewide Importance is a significant impact that cannot be mitigated to a level of less than significant despite proposed mitigation fees), attached as Exhibit Ag 1. The DEIR must be revised to identify the Project's significant and unavoidable Farmland conversion impacts. 0044-107 0044-108 0044-109

3. The County Must Revise the DEIR's Farmland Conversion Mitigation Measure.

The deficiencies in Mitigation Measure MM 4.3-1 should be addressed along the lines as follows, with additional details to be provided by the County—including establishing these mitigation programs before Project approval as required by CEQA: 0044-110

- Every five years the County shall request from the State Oil and Gas Supervisor a list of long-term idle wells pursuant to Public Resources Code Section 3206.5. The County will then use this list ("County List") to identify feasible mitigation projects for Loss of Farmland and Grazing land.

- Using the County List, mitigation for conversion shall first occur on-site or common ownership, by abandoning any idle wells on the County's list, or

removing any out of service facilities, and returning the surface to the surface owner after performing soil tests and remediating any contamination. The property shall be restored to allow for agricultural use. This includes plugging wells to a depth that allows for reasonably foreseeable cultural practices such as deep ripping. No conservation easement is required to mitigate loss of farmland caused by a new well that has been offset by abandoning an idle well at a 1:1 ratio.

0044-110
Continued

- If no idle wells or out of service facilities exist on-site, the Applicant shall offset the conversion of Farmland by abandoning idle wells from the County List or removing out of service facilities on other Farmland within Kern County. Only if such offsets are not available may other mitigation measures as listed below, such as purchasing conservation easements, be employed.

- If the County List is exhausted, other effective means of mitigation may be used subject to the following:

    - Mitigation at the ratio of 1:1 shall be applied to total areas of lost agricultural use for oil and gas activities (inclusive of temporary construction and permanent operational impact areas), but excluding non-farmed existing areas such as roads, and tank and maintenance areas, and lands for which agricultural mitigation has previously been provided at a 1:1 ratio. Mitigation must be provided for the total area of lost agricultural use, not just the ground disturbance footprint area. For example, if the roads and well pads are intermittent across the parcel such that it is no longer economically feasible to plant a row crop or tree crop and large portions of the parcel are not farmable, this surface shall be added to the lost Farmland total.

    - Prior to ground-disturbing activity, the Applicant shall submit to the County written evidence of completion of one or more of the permissible measures to achieve this 1:1 mitigation ratio.

    - Mitigation shall be provided for conversion of all lands designated Prime Farmland, Farmland of Statewide Importance, or Unique Farmland, regardless of whether the lands have been actively farmed 5 years or more out of the last 10 years.

- Mitigation shall be provided for conversion of lands designated as Grazing Land.

- Mitigation lands shall meet the definition of Prime Farmland, Farmland of Statewide Importance, Grazing Land and/or Unique Farmland, and be of similar or higher agricultural quality as the lost lands, as established by the California Department of Conservation. Completion of the selected measure or, with the Kern County Planning and Community Development Director's approval, a combination of measures, are to occur on qualifying land in Kern County.

- Other types of vehicles for mitigation include:

  a. Funding and/or purchasing agricultural conservation easements.

  b. Purchasing of credits for conservation of agricultural lands from an established agricultural farmland mitigation bank.

0044-110
Continued

In addition to revising Mitigation Measure MM 4.3-1 , the County should adopt the following measures regarding agricultural conservation easements:

- Agricultural conservation easements shall be located within Kern County or, if no such easements are available, within 10 miles of County borders.

- Agricultural conservation easements shall be held by a land trust accredited by the Land Trust Alliance. (The DEIR should list standard terms for such easements.)

- Any County farmland preservation or mitigation program must be established in advance of approving the proposed Zoning Ordinance. A farmland preservation or mitigation program may also be established by a land trust accredited by the Land Trust Alliance or other public agency dedicated to open space or agricultural conservation.

4. The DEIR Does Not Adequately Evaluate How the Project Will Lead to Additional Farmland Conversions.

0044-111

In addition to analyzing a Project's direct conversion of Farmland, CEQA requires a lead agency to evaluate whether a project would "involve other changes in the existing environment, which due to their location or nature, could result in conversion of Farmland to non-agricultural use . . . ." CEQA Guidelines Appendix G.II(e). The DEIR includes a cursory discussion of some of the ways that oil and gas operations can indirectly convert Farmland, including fragmentation into smaller field sizes, disruption of irrigation systems, dust generation, soil compaction, and risk of exposure to hazardous chemicals. DEIR at 4.2-21 to 4.2-22. However, the DEIR's discussion fails to inform the reader of the details or extent of these problems. It also ignores other ways in which oil and gas operations can lead to the conversion of Farmland.

a. Loss of Farmland Due to Parcelization and Fragmentation.

Many studies have documented the impacts of fragmentation or parcelization on farm productivity. As explained in one article:

> This parcelization of farmlands leads to a 'checkerboard distribution of farmlands, i.e. many noncontiguous fields. Farming such scattered plots is problematic. For example, field surveillance to monitor crop growth and pest populations is difficult, as is the movement of farm equipment because of transportation problems. Under these conditions consolidation of landholdings to achieve efficient scales of operation is nearly impossible.

Brabec & Smith, *Agricultural land fragmentation: the spatial effects of three land protection strategies in the eastern United States*, 58 Landscape and Urban Planning 255, 256 (2002), attached as Exhibit Ag 2.

In particular, the physical presence of well pads and roads can make it uneconomical to farm sections of Farmland. *See* James William Gibson, *Bombing North Dakota*, Earth Island Journal (Winter 2013) (7-acre well pad precluding farming 20-acre field), attached as Exhibit Ag 3; Mike Soraghan, *Drilling regulators pull double duty as industry promoters*, E&E News (Nov. 30, 2011) (documenting other instances when oil and gas operations precluded farming an entire field), attached as Exhibit Ag 4. As

0044-111
Continued

discussed above, such fragmentation impacts are already occurring in Kern County, causing farmers to reduce or abandon farming operations. *See* H. King Letter. The DEIR must evaluate how the location of oil and gas infrastructure can lead to uneconomical farms or unreachable field islands, and identify mitigation measures to reduce this impact.

In addition to physical fragmentation within individual farms, "there is the issue of regional fragmentation: the erosion of the farmland base leading to a loss of sufficient farm support operations and facilities, which raise operating costs." Exhibit Ag 2 at 256. It has been well documented that fragmentation of the regional farming landscape exacerbates the demise of surrounding farmland. *See* P.J. Drohan, *et al.*, *Early Trends in Landcover Change and Forest Fragmentation Due to Shale-Gas Development in Pennsylvania: A Potential Outcome for the Northcentral Appalachians*, 49 Environmental Management 1061, 1071 (2012) ("the development of agricultural landscapes for urban sprawl puts pressure on remaining farmland . . . and can result in the loss of more farmland due to indirect effects of farmland conversion"), attached as Exhibit Ag 5; JunJie Wu, *Land Use Changes, Economic, Social, and Environmental Impacts*, AAEA (2008), attached as Exhibit Ag 6. The DEIR must address the Project's potential to cause these regional conversion impacts.

b. Loss of Farmland Due to Water Shortages and Contamination.

0044-112

Oil and gas operations can compete with agricultural production for already limited water supplies. The DEIR's own water supply analysis finds that there is no surplus water available in Kern County and the Project's water demands will result in water shortages in every water year scenario considered by the DEIR. *Id*. at 4.17-51 to 4.17-53. The DEIR's agricultural impacts analysis never mentions these conclusions, however, despite the fact that water shortages often result in the loss of Farmland. For instance, a UC Davis report estimates that in 2015, an additional 540,000 acres of land will go fallow due to the current drought. Richard Howitt et al, *Economic Analysis of the 2015 Drought For California Agriculture*, UC Davis Center for Watershed Sciences (August 17, 2015) at ES-1, attached as Exhibit Ag 7. One study found that during times of water shortages in Kern County, farming operations are cut back, while oil and gas operations continue their water use. Jeremy Miller, *California Drought is No Problem for Kern County Oil Producers*, Circle of Blue Water News, (August 24, 2010) attached as Exhibit Ag 8. The DEIR must analyze how the Project's water supply impacts could lead to the loss of Farmland.

0044-113

In addition, Farmland can be lost due to oil and gas spills or other accidents that lead to contamination. *See, e.g.*, Jeremy Miller, *Oil and Water Don't Mix with California Agriculture*, High Country News (Dec. 15, 2010) (irrigation water contamination in Kern County), attached as Exhibit Ag 9; Nicholas Kusnetz, *North Dakota's Oil Boom Brings Damage Along with Prosperity*, ProPublica (June 7, 2012), attached as Exhibit Ag 10 (oil spills and wastewater dumping impacting agriculture in North Dakota). Accidents and equipment failures do happen. And while the DEIR is right to include best management practices to avoid them, it cannot assume that the potential for water and soil contamination will disappear. *Center for Biological Diversity v. San Benito County* (Monterey Superior Court Case No. M123956), July 21 2014 decision, at 14-17, attached as Exhibit Ag 19.

c. Loss of Farmland Due to Soil Compaction.

0044-114

The DEIR mentions soil compaction in passing, but it provides no mitigation measures for this impact and does not even discuss the extent of the problem. DEIR at 4.2-22.

0044-115

Soil compaction is "virtually permanent," lowering soil productivity and increasing surface runoff. Sjoerd W. Duiker, *Effects of Compaction on Crop Yields*, Penn State Extension 1 (2004), attached as Exhibit Ag 11. Cropland is particularly susceptible to compaction when oil and gas operations are present because oil and gas trucks and production machinery are much heavier than most farm equipment. Marcellus Education Fact Sheet, *Avoiding and Mitigating Soil Compaction Associated with Natural Gas Development,* Penn State Extension 1 (2009), attached as Exhibit Ag 12. The DEIR must be revised to analyze this problem and identify appropriate mitigation.

d. Loss of Farmland Due to the Failure to Timely Abandon Idle Wells.

0044-116

There are thousands of idle wells in Kern County and many of these are located on agricultural lands. State laws allow oil and gas companies to keep wells in an idle state for a small fee. Pub. Res. Code § 3206. Due to the much higher cost to properly abandon a well, there is a perverse incentive to keep wells idle for long past their useful lifespan. One farmer reports that a well on his fields has been out of operation for 29 years. *See* H. King Letter. Other farmers report similar problems. *Id.* These idle wells keep Farmland and Grazing Land out of production and create all of the same fragmentation impacts discussed above. *Id.*

The DEIR implicitly recognizes that the failure to restore agricultural lands to productive use by promptly removing unneeded oil and gas equipment and abandoning long-term idle wells contributes to the loss of Farmland in the County. DEIR at 4.2-19. Yet, the DEIR provides no meaningful discussion or analysis of this problem. The DEIR must be revised to show the location of idle and long-term idle wells on Farmland and Grazing Land within the Project Area. 0044-117

The DEIR may not cure its failure to *analyze* these impacts by rotely acknowledging the impacts' significance. As the Court of Appeal explained, "this acknowledgement is inadequate. 'An EIR should be prepared with a sufficient degree of analysis to provide decisionmakers with information which enable them to make a decision which intelligent takes account of environmental consequences.'" *Galante Vineyards v. Monterey Peninsula Water Mgmt. Dist.* (1997) 60 Cal.App.4th 1109, 1123 (quoting CEQA Guidelines § 15151). 0044-118

5. The DEIR's Mitigation Measure To Protect Crops Adjacent to Oil and Gas Activities Is Insufficient to Reduce the Project's Indirect Conversion Impacts to a Less Than Significant Level.

The DEIR concludes that the Project's significant impacts due to indirect Farmland conversions would be reduced to a less than significant level. It bases this conclusion on Mitigation Measure 4.2-2, which is purportedly designed"[t]o protect crops and structures adjacent to oil and gas activities on active agricultural lands." DEIR at 4.2-22 to 4.2-23. But MM 4.2-2 is far too vague to afford any meaningful protection. In fact, the DEIR fails to provide *any* mitigation measures for many of these indirect impacts and there is no evidence to support its finding that Farmland conversions would not be significant. 0044-119

For example, the DEIR does not include any measures to avoid or reduce the effects of soil compaction, despite the availability of many potential solutions. These include restoration of soil surface to original contours; limiting drilling activities to periods of drier soil conditions; alleviating severe compaction by subsoiling; limiting axle load weights and altering truck design; implementing strategies to decrease traffic; increasing organic matter in the soil; and more. *See* Exhibit Ag 12 at 2; Exhibit Ag 11 at 12. 0044-120

Further, as discussed in Section III.C.3 of this letter, the DEIR does not include sufficient mitigation to offset the Project's water shortage impacts. Nor does it provide any measures to avoid the impacts of Farmland parcelization and fragmentation 0044-121

by requiring clustered oil and gas operations, as discussed in Section III.B.2.b of this letter. Finally, it does not effectively address the problem of long-term idle wells that should be abandoned. Additional, feasible mitigation measures are available to address this problem. A County staff report regarding the DEIR stated that "mitigation measures will require abandoned wells and existing operations that are not maintained to be brought up to standards before a permit is issued, as well as provide an option for obtaining mitigation credit for Legacy equipment removal." See Kern County Planning and Community Development Department, Workshop Staff Report (July 27, 2015) at 16. However, the DEIR does not include such measures, or any explanation why the County is rejecting staff's advice on this subject. 0044-121 Continued 0044-122

Without mitigation measures to reduce these impacts, the DEIR's indirect Farmland conversion impacts remain significant. 0044-123

Finally, some of the DEIR's proposed mitigation measures will themselves adversely impact agricultural operations and Farmland and create land use conflicts. These should be revised to reduce those impacts as shown on the attached Exhibit Ag 13, "Revised and Additional Feasible Mitigation Measures to Reduce Agricultural Impacts and Land Use Conflicts." For example, many measures require access to Farmland but such access can be disruptive or dangerous at times. To give just one example, farmers occasionally apply restricted materials that prohibit anyone from safely entering the property during these times. To avoid such potential conflicts, the mitigation measures must require access permission from the surface owner. Exhibit Ag 13 also shows additional, feasible modifications to the DEIR's mitigation measures that could further protect Farmland, and therefore must be adopted under CEQA. 0044-124 0044-125 0044-126

6. The DEIR's Cumulative Agricultural Impacts Analysis Is Insufficient.

As with other sections of the DEIR, the DEIR's analysis of cumulative agricultural impacts is woefully deficient. It simply states that the underestimated 298 acres of converted Farmland per year "could combine with other losses through the County to result in a significant cumulative impact on agriculture." DEIR at 4.2-24. It notes that the average annual conversion rate from 1998 to 2013 has been 1,085 acres, but provides no indication if this rate has been increasing in recent years or where these conversions have occurred. *Id.* Similarly, the DEIR notes that the Kern COG Regional Transportation Plan (RTC)/Sustainably Communities Strategy (SCS) forecasts the conversion of 24 square miles (15,360 acres) of Farmland, but it gives no indication of whether that is annually, or over a period of time. *Id.* at 4.2-25. The same omissions 0044-127

occur for the 80,854 acres of Prime and Important Farmland and 55,000 acres of grazing lands forecast to be lost under the Kern County General Plan. The DEIR does not even disclose where these conversions would occur within the three Project Subareas, much less at a level meaningful to local communities. 0044-128

In addition, as discussed in III.D.4 of this letter regarding the Project's aesthetic impacts, the DEIR fails to consider other relevant plans and projects. For example, it omits any reference to the Tier 5 specific plans, which allow oil and gas development that is not regulated under the project (DEIR at 4.2-14), or to the potential for future wind and solar development. 0044-129

Nor does the DEIR consider cumulative impacts that will result from the reactivation of idle wells located on Tier 2 lands throughout the County. The DEIR must develop a map showing the location of idle and long-term idle wells and consider the potential reactivation of these wells and construction of associated infrastructure. 0044-130

Finally, the DEIR must evaluate the tipping point for local agricultural economies and determine whether the projected Farmland conversions will result in a cascading decline of Kern's agricultural economy and a corresponding increase in the conversion of Farmland. 0044-131

8. The DEIR Fails to Analyze or Mitigate Impacts to Rangeland.

The Project Area contains 982,166 acres of Grazing Land, even more than the 880,326 acres of Farmland within the Project Area. DEIR at 4.2-4. These rangelands are significant contributors to the local economy. Milk was the County's third highest valued agricultural commodity and cattle and calves were the sixth. DEIR at 4.2-2; *see also* Department of Agriculture and Measurement Standards*, 2014 Kern County Agricultural Crop Report* (2015), attached as Exhibit Ag 14 (milk and cattle products together accounting for over $1.3 billion in 2014 crop receipts). 0044-132

Not only is rangeland of special value to Kern County, but California's Legislature has also signaled its broad importance to the state. For example, the Legislature enacted the California Rangeland, Grazing Land, and Grassland Protection Program, whose purpose is to "prevent the conversion of rangeland . . . to nonagricultural uses" and to "protect the long-term sustainability of livestock grazing" through the use of conservation easements. Pub. Res. Code § 10331. In addition to providing water and wildlife benefits, rangeland produces food, medicine and other products, and provides energy savings by producing food and fiber with little expenditure of fossil fuel. U.S. 0044-133

Department of Agriculture, *RCA Issue Brief #6* (Nov. 1995), attached here as Exhibit Ag 15. It also provides important social and economic benefits. William Wetzel et. al. *Analysis reveals potential rangeland impacts if Williamson Act eliminated,* University of California, 66 California Agriculture 131 (Oct.-Dec. 2012), attached as Exhibit Ag 16.

0044-133
Continued

Remarkably, the DEIR provides no analysis of the Project's potential impact to this important environmental resource. Further, while the DEIR requires a 1:1 mitigation for loss of active Farmlands, it provides no mitigation whatsoever for impacts to rangeland or grazing operations.

a. Rangeland Is an Environmental Resource Under CEQA.

Under CEQA, an EIR must "identify the significant effects on the environment of a project." Pub. Res. Code § 21002.1(a). CEQA defines "environment" broadly to include "the physical conditions which exist within the area which will be affected by a proposed project, including land, air, water, minerals, flora, fauna, noise, objects of historic or aesthetic significance." Pub. Res. Code § 21060.5. Rangeland and grazing cattle are, of course, lands and fauna within this definition.

0044-134

The County, however, has suggested at public workshops on the DEIR that impacts to rangeland need not be analyzed or mitigated as impacts to agriculture. To be sure, the Legislature placed a special importance on the analysis of agricultural lands when it amended CEQA to ensure that agricultural land conversions are considered in a quantitative manner. Pub. Res. Code §§ 21060.1, 21095. However, there is no evidence that the Legislature intended EIRs to ignore impacts to other agricultural or environmental resources. In fact, CEQA Guidelines Appendix G recognizes that rangelands are important environmental resources by requiring an analysis of whether a project would "conflict with existing zoning for agricultural use, or a Williamson Act contract." Grazing is an agricultural use and one that the Williamson Act seeks to protect.

Indeed, the courts have specifically recognized that EIRs must independently analyze and mitigate for the loss of rangeland and grazing when a project could impact this resource. In *Save Panoche Valley v. San Benito County*, a solar power project was proposed on a 4,885 acre site that was primarily used for cattle grazing. (2013) 217 Cal.App.4th 503, 509. The EIR's agricultural impact analysis for the project calculated the number of grazing animals per acre that the land could support as well as the number of animal unit months (AUM) that the land could support with and without the project. *Id*. at 509, 528-29. It also included mitigation measures to place

0044-135

conservation easements on offsite rangeland and to introduce seasonal sheep grazing on project lands that previously supported cattle grazing. The court held that these mitigation measures "adequately addressed the potential impacts on agricultural resources, *including the impact on grazing land*." *Id*. at 529 (emphasis added). Accordingly, impacts to loss of rangeland and grazing must be analyzed and mitigated under CEQA and in this DEIR.

b. The Project's Impacts to Rangeland and Grazing Are Significant.

0044-136

Although the DEIR fails to analyze impacts to rangelands, a comparison of the Project Area's rangelands with the Core Areas for future drilling demonstrates that a significant number of new wells will convert rangeland to oil and gas uses. *See* DEIR Figure 4.2-1. These conversions are especially significant given that California is losing rangeland at an alarming rate. Every year, 20,000 acres of rangeland in California are converted to other uses. Pelayo Alvarez, *Conserving and Managing Prairie, Grassland, and Vernal Pool Landscapes Through Collaboration*, 39 Fremontia 49, 51 (2011), attached as Exhibit Ag 17.

Kern County is likely also losing significant amounts of rangeland given the high number of Williamson Act contract cancellations in the County. DEIR at 4.2-6; Exhibit Ag 16. Further, researchers have concluded that as ranchers exit the business, those that remain are negatively impacted because auction yards, where most cattle are sold, require a large volume of activity to operate efficiently. Matt Andersen, *California's cattle and beef industry at the crossroads,* 56 California Agriculture 156 (Sept. – Oct. 2002), attached as Exhibit Ag 18. In addition, the location of these rangelands in Kern County is especially important given their relatively close proximity to California's limited number of slaughter facilities. *Id.* at 153. Their location near significant amount of feed grains also makes these rangelands and especially valuable resource for grazing. *Id*. at 156; DEIR at 4.2-2. Given the importance of rangeland in the region, the DEIR must be revised to disclose and mitigate the Project's significant impact on this environmental resource.

B. The DEIR's Analysis of Land Use Impacts Is Inadequate.

1. The DEIR's Description of the Environmental Setting for Land Use Is Inadequate.

0044-137

The DEIR must accurately depict the existing environmental setting of land uses and land use planning in Kern County in sufficient detail to allow an analysis of the Project's land use impacts. CEQA Guidelines § 15125. As with other sections of the DEIR, however, the document falls short in this regard.

0044-138

The DEIR's environmental setting for land use does not have a sufficiently detailed description of the existing land uses that occur within the Project Area. For instance, it does not provide a map of existing land uses. The DEIR must be revised to show the extent of existing land uses and their geographic locations within the Project Area. This should include a summary table of existing land uses and gross acreage and maps that show the existing land use patterns, locations of the existing communities, and overall circulation system within the project area. Without this information, there is no clear land use baseline for the analysis of the land use impacts of the proposed project. For instance, the DEIR's analysis of whether the Project would physically divide an established community is inadequate because it does not include an evaluation of the existing established communities and where oil and gas infrastructure would be located under the Project's full buildout.

2. The DEIR Fails to Disclose or Mitigate the Project's Significant Land Use Impacts and Project Approval Would Violate State Planning and Zoning Law.

0044-139

A project's impacts on land use will be significant and must be disclosed when the project conflicts with existing land use plans. The conflict itself is a significant impact under CEQA. *Endangered Habitats League v. County of Orange* (2005) 131 Cal.App.4th 777; *The Pocket Protectors v. City of Sacramento* (2005) 124 Cal.App.4th 903, 928. The DEIR, however, employs tortured logic in an attempt to find that the Project's clear conflicts with governing land use plans are avoidable and therefore insignificant.

0044-140

Further, approval of the Project would violate State Planning and Zoning Law because of these inconsistencies. State Planning and Zoning Law requires zoning ordinances to be consistent with the general plan. Gov. Code § 65860; *Neighborhood Action Group v. County of Calaveras* (1984) 156 Cal.App.3d 1176, 1182-86. A project

cannot be found consistent with a general plan if it conflicts with a plan policy that is fundamental, mandatory, and clear, regardless of whether the project is consistent with other general plan policies. *Families Unafraid to Uphold Rural El Dorado County v. El Dorado County* (1998) 62 Cal.App.4th 1332,1341-42. Even in the absence of a direct conflict, a local agency may not approve a project if it frustrates the general plan's policies and objectives. *Napa Citizens for Honest Gov. v. Napa County* (2001) 91 Cal.App.4th 342, 378-79.

0044-140
Continued

The Project would allow oil and gas development on lands governed by the Kern County General Plan and the Metropolitan Bakersfield General Plan. These Plans include key policies to ensure that (1) new development will not conflict with existing land uses, (2) there will be adequate water supplies to serve new development, and (3) industrial developments are clustered in order to minimize the extent of their impacts. The Project clearly conflicts with these three objectives.

0044-141

a. The Project Would Result in Significant Land Use Conflicts Between Oil and Gas and Agricultural Operations and Is Inconsistent With General Plan Policies to Avoid These Conflicts.

One of the core purposes of land use planning is to reduce conflicts between different types of uses. *Euclid v. Ambler Realty Co.* (1926) 272 U.S. 365, 394. The Kern County General Plan and the Metropolitan Bakersfield General Plan contain the following policies prohibiting the County from approving projects that would result in incompatible land uses.

0044-142

Kern County General Plan:

- Chapter 1.9 (Industrial) Goal 3. Ensure compatibility with land use designations such as residential, commercial, or other land uses that may be affected by such activities.
- Chapter 1.9 (Resources) Goal 3. Ensure the development of resource areas minimize effects on neighboring resource lands.
- Chapter 1.9 (Resources) Policy 7. Areas designated for agricultural use, which include Class I and II and other enhanced agricultural soils with surface delivery water systems, should be protected from incompatible

residential, commercial, and industrial subdivision and development activities.

0044-142
Continued

Metropolitan Bakersfield General Plan:

- Land Use Element, Goal 3. Accommodate new development which is compatible with and complements existing land uses.

- Conservation Element (B. Mineral Resource) Policy 10. Implement, as appropriate, the California Environmental Quality Act to minimize land use conflicts and reduce environmental impacts of all proposed resource extraction operations (I-2).

The DEIR admits, as it must, that under the Project "land use conflicts between surface owners, such as agricultural producers, and subsurface mineral rights owners, such as oil and gas developers, would result in a significant impact." DEIR at 4.10-87. Yet the DEIR fails to describe the nature and extent of this impact, contrary to CEQA's mandate. Pub. Res. Code § 21002.1(d), (e); CEQA Guidelines §15151. There is substantial evidence of numerous land use conflicts that can occur between oil and gas and agricultural operations, and these conflicts are already occurring with growing frequency in Kern County.

i. Co-locating Oil and Gas and Agricultural Operations Can Create Significant Land Use Conflicts.

Agriculture has a long history in Kern County and over a third of the Project Area is actively farmed agricultural land. DEIR at 4.2-3 to 4.2-4. Additional lands are used as active rangelands. *Id*. The mineral rights on many of these lands are severed from the surface ownership, meaning oil and gas operators can use farmlands to develop mineral rights. DEIR at 3-17. *See* H. King Letter. Oil and gas production on active farmlands is occurring with increasing frequency in Kern County. According to County staff, "over the last 10 years, new discoveries, technology and market forces have moved [oil and gas] production into areas that are used for agriculture and ranching." Kern County Planning and Community Development Department Workshop Staff Report (July 27, 2015) ("Workshop Staff Report"), at 11. These encroachments into actively farmed agricultural lands will continue to expand under the Project. See Section II.B.5, above, discussing the DEIR's Project Description.

0044-143

Co-location of oil and gas and farming operations can lead to numerous land use conflicts, which are becoming increasingly common in Kern County. Workshop Staff Report at 12. As the County admits, when mineral rights owners establish oil and gas operations on active farmland "the reality of negotiations and real world implementation have created instances of conflicts and disputes." *Id.* at 11-12. While the DEIR is silent on these land use conflicts, the County has elsewhere reported the following examples (Staff Report at 12): 0044-144

- Creating new access roads and pipelines diagonally across parcels that take out crops.
- Installation of new electric lines that interfere with tree growth.
- Dispersing well pads and tanks throughout fields, preventing or impeding agricultural operations on more land than necessary.
- Insufficient protections for water sources and residences located on farmland.
- Allowing equipment and materials storage and traffic to disrupt agricultural operations.
- Failing to maintain oil and gas facilities, including broken fencing and lack of weed control.
- Failing to properly abandon wells that are no longer in use.

Examples of these and other land use conflicts between oil and gas and farming operations are well known to local farmers. *See* H. King Letter.

The impediments that oil and gas operations pose to farming operations are often reflected in decreased land values. *See, e.g.,* Jared B. Fish, *The Rise of Hydraulic Fracturing: A Behavioral Analysis of Landowner Decision-Making*, 19 Buffalo Environmental Law Journal 219 (2012) (discussing several case studies where landowners have lost value), attached as Exhibit LU 1; John S. Baen, *The Impact of Mineral Rights and Oil and Gas Activities on Agricultural Land Values*, The Appraisal Journal 74 (Jan. 1996) ("Oil and gas activities are a major disruption of the surface and have significant value implications for surface estate owners"), attached as Exhibit LU 2; *Drilling vs. the American Dream: Fracking impacts on property rights and home values*, 0044-145

Resource Media (March 14, 2014), attached as Exhibit LU 3 (discussing instances of loss of farmland values due to surface and mineral rights conflicts).

0044-145
Continued

The DEIR must be revised to discuss the types of land use conflicts that occur between oil and gas and agricultural operations. Doing so will clearly show that the Project does not come close to reducing this land use impact to a less than significant level.

ii. The Zoning Ordinance and Mitigation Measures Do Not Reduce Land Use Conflicts to a Less Than Significant Level.

0044-146

While the DEIR admits that land use conflicts between oil and gas and agricultural operations "would result in a significant impact," it concludes that "[r]evisions to the Zoning Ordinance would reduce these impacts to less than significant" and therefore no additional mitigation measures are required. DEIR at 4.10-87 to 4.10-88; *see also id.* at 4.10-97 (concluding the Project is consistent with Kern County General Plan Chapter 1.9, Goal 3 because "development standards are intended to provide greater environmental protection"); *id.* at 4.10-140 (concluding the Project is consistent with the Metropolitan Bakersfield General Plan Land Use Goal 3 because new development standards would ensure that oil and gas development is compatible with existing land uses); *id.* at 4.10-148 (concluding the Project is consistent with Bakersfield Mineral Resource Policy 10 because the "proposed development standards are intended to minimize land use conflicts" and the proposed Zoning Ordinance[3] "would implement a new Oil and Gas Conformity Review Process, which includes a system of surface owner sign off and notification in order to reduce land use conflicts"). The proposed Zoning Ordinance will do nothing to reduce the instances of land use conflicts, however.

0044-147

Requiring surface owner sign off on site plans for new oil and gas development on split estate lands would minimize this impact to a less than significant level, because it would ensure that development is designed to be compatible with site-specific surface operations. The Zoning Ordinance, however, does not actually require surface owner sign off. Instead, it allows oil and gas operators to receive a Conformity Review permit without a surface owner signature and creates a second review process that is purportedly more streamlined for applications with a surface owner signature.

[3] The DEIR incorrectly states that the Oil and Gas Conformity Review process is established in Mitigation Measure 4.10-1.

The County claims that the second process incentivizes oil and gas operators to contact the surface owner and negotiate issues because an application without a surface owner's signature will take longer to process and cost more. Staff Report at 13-14. But this claim is not supported by the plain language of the Zoning Ordinance itself. *See* Comparison of County Claims re Zoning Ordinance Process and Plain Text of the Zoning Ordinance, attached as Exhibit LU 4. 0044-148

In fact, there is no meaningful difference between the two pathways. Under the Zoning Ordinance, the County must determine, within 10 days, whether an application with a surface owner signature is complete and meets the development standards. Zoning Ordinance § 19.98.090. After construction, an applicant with a surface owner signature may self-certify compliance. *Id.* § 19.98.130. For an application without a surface owner signature, the County must determine whether it is complete and meets development standards within 30 days, but the County could approve the permit sooner than that. *Id.* § 19.98.100. And, while the applicant without a surface owner signature must have an inspector present during construction, *id.* § 19.98.140, nothing requires the applicant to pay for this inspector. *Id.;* Staff Report at 23. 0044-149

The assurance of having an application processed a few days sooner and avoiding the presence of an inspector to ensure compliance with laws that must be followed anyway is not sufficient incentive to cause oil and gas operators to avoid the land use conflicts identified above. Even if the County were to modify the proposed Zoning Ordinance to do everything it claims, Staff Report at 13-14, a six-month review period and the cost of paying for one additional on-site employee is unlikely to incentivize resolution of the most acute land use conflicts. *See* H. King Letter. Moreover, the Zoning Ordinance does not even create a separate review process for Minor Activity Review permits without landowner sign off. 0044-150

The mitigation measures identified in the DEIR similarly fail to adequately remedy land use conflicts between oil and gas and agricultural operations. Many of the measures simply require compliance with existing laws, which is already required as a matter of course. And, the DEIR does not include any measures to avoid many of the land use conflicts discussed above. Most importantly, there are no measures that require wells and facilities to be clustered to avoid unnecessary disruptions of agricultural activities. 0044-151

Finally, neither the Zoning Ordinance nor the mitigation measures provide any opportunity for the surface owner to identify the extent and nature of potentially impacted agricultural operations. Only by developing a process for landowners to share 0044-152

this information and address potential conflicts on a site-specific basis can the County ensure that oil and gas activities avoid interfering with surface uses to the extent feasible. 0044-153

The DEIR's other reasons for claiming the Project is consistent with general plan policies designed to ensure compatible land uses defy common sense. The DEIR suggests that Kern County General Plan Chapter 1.9, Goal 3 was only intended to analyze impacts on resource lands located outside of the County, when the Goal obviously refers to impacts on resource lands that neighbor the proposed development. DEIR at 4.10-100. The DEIR also concludes that the Project is consistent with Chapter 1.9, Goal 7, requiring the County to protect agricultural lands from incompatible development, because the County's zoning ordinance regarding Williamson Act contracts identifies oil and gas as a compatible land use. But simply stating the two uses are generally compatible does not make it so, especially on a site-specific basis. The County cannot square this logic with the DEIR's finding on page 4.10-87 that the Project could result in land use conflicts that create a significant land use impact. 0044-154

In short, the County has not produced any evidence, much less substantial evidence, that the significant land use conflicts between oil and gas and agriculture—conflicts that will only increase with the Project—would be reduced to a less than significant level under the Zoning Ordinance. 0044-155

iii. There Are Additional, Feasible Mitigation Measures to Reduce the Project's Significant Land Use Impacts.

Because the Project would result in significant land use impacts, as the DEIR admits, the DEIR must be revised to identify all feasible mitigation measures to reduce those impacts. Pub. Res. Code § 21002.1(b); CEQA Guidelines § 15126.4. This would include, at minimum, the following measures: 0044-156

- Require landowner sign off as follows: Applications for Oil and Gas Conformity Review and Minor Activity Review permits must include the signature of the Land/Surface Owner agreeing to the site plan.

- Require a Conditional Use Permit on split estates as follows: No well for use as an injection well and no well for the exploration for or development or production of oil, gas, or other hydrocarbon substances may be drilled, and no related accessory equipment, structure, or facility, on property where the Land/Surface Owners are different from the Mineral Rights

Owners, may be installed in any zoning district in which such uses are permitted until an application for a conditional use permit, which includes the information specified in Section 19.98.080, has been submitted to and approved by the Planning Commission as consistent with the standards set out in Section 19.98.060 and in accordance with the standards and procedures set out in Sections 19.102.130 through 19.102.180 and Chapter 19.98 of the Zoning Ordinance. 0044-158

- The location of drill pads, roads, improvements, and other infrastructure must avoid irrigation systems or the applicant must arrange to have them rerouted at the Applicant's expense to allow continued agricultural use of the entire remaining property.

- The Applicant shall maintain the surface free of debris, weeds, graffiti and equipment in disrepair. These conditions are a nuisance and will be subject to abatement by the County with costs paid by the mineral rights owner.

- On properties with split estates, the Application shall comply with any applicable deed restriction in the mineral estate severance deed.

- The location of all wells and improvements shall be clustered to the extent feasible and shall not disturb more surface area than is reasonable and necessary. If a well on the property is designated as active or inactive, but has not produced for two years, the well may remain but the Applicant shall restore the well pad area no longer being used and return it to the surface owner. Remediation will include testing of the soils to ensure that the quality of the soil is equivalent to the baseline quality of soil established prior to drilling being initiated.

- Locations for wells, roads, pipelines, overhead electrical lines, and other production facilities, and the means of operation shall prevent or reduce impacts of the oil and gas operation on the surface use to the extent feasible. The County will consult with the surface owner regarding current surface operations in considering whether this requirement has been met.

- The following language should be added to mitigation measure MM 4.1-2 re removing equipment after drilling: "The Applicant shall perform soil testing and if contaminants are found, those must be removed/remediated and the soil character returned to a baseline sample taken prior to the

commencement of drilling. The Applicant shall reduce the size of the drill pads to the extent feasible after drilling is complete. Oil pads shall be no larger than necessary."

0044-158
Continued

- Require additional information on the site plan provided to the Surface/Land owner as shown on the attached Exhibit LU 5 (Modifications to Site Plan Requirements in Draft Zoning Ordinance).

- Abandon wells that are removed shall be capped in the DOGGR required range of 5 to 10 feet, but also at a level agreed to by the surface owner based on the crop they are growing. Soils will be tested and remediated to allow replanting and growing of a crop. All pipelines and other infrastructure connected to or associated with the abandoned well shall be removed when the well is plugged and capped.

- Well pads will be constructed such that they will prevent erosion, leakage, drainage in to the surrounding agricultural land.

- Surface and mineral owner/operator shall provide advance notification of chemical applications in accordance with provisions of their surface access agreements for split estate properties.

- Within one year of a production facility being marked "out of service", the facility is to be removed and the surface returned to the landowner following the soil tests and contamination remediation protocols discussed above.

The DEIR must be revised to include these and other mitigation measures that would effectively reduce land use conflicts between oil and gas and agricultural operations on split estates.

b. The Project Conflicts with General Plan Policies Requiring Industrial Uses to be Clustered.

Another way the Kern County and Metropolitan Bakersfield General Plans attempt to reduce land use conflicts is by requiring the most impactful type of development—industrial development—to be clustered next to existing industrial uses, rather than dispersed throughout the County or a particular site. These policies include the following:

0044-159

0044-159
Continued

Kern County General Plan:

- Chapter 1.9 (Industrial) Policy 5: Provide for the clustering of new industrial development adjacent to existing industrial uses and along major transportation corridors.

Metropolitan Bakersfield General Plan:

- Policy 34. Provide for the clustering of new industrial development adjacent to existing industrial uses and along major transportation corridors (I-1).

The DEIR concludes that the Project is consistent with these policies because the DEIR's future development scenario assumes that 90% of new wells will be located in Tier 1 areas, where oil and gas is already the dominant use. DEIR at 4.10-98. Yet, nothing in the Zoning Ordinance *requires* new oil and gas development to be located in Tier 1 areas. In fact, as oil and gas expert David Hughes explains, most of the Project's new wells will be dispersed outside of Tier 1 areas. Exhibit PD 1 at 8. Further, nothing in the Zoning Ordinance requires new drilling to occur adjacent to existing wells when oil and gas development already occurs on split estate lands or in residential neighborhoods. Without such provisions, there is no basis for the DEIR to conclude that the Project is consistent with General Plan policies to cluster industrial developments.

c. The Project Conflicts with General Plan Policies Requiring Adequate Water Supply.

0044-160

Given the severe water supply constraints in this arid County, it is not surprising that the Kern County General Plan and the Metropolitan Bakersfield General Plan contain several policies to ensure that new development will not create water shortages for existing uses. These policies include the following:

Kern County General Plan:

- Chapter 1.4 (Public Facilities and Services) Goal 5. Ensure that adequate supplies of quality (appropriate for intended use) water are available to residential, industrial, and agricultural users within Kern County.

- Chapter 1.10.6 (Surface Water and Groundwater) Policy 41. Review development proposals to ensure adequate water is available to accommodate projected growth.

- Chapter 1.10.6 (Surface Water and Groundwater) Policy 45. New high consumptive water uses, such as lakes and golf courses, should require evidence of additional verified sources of water other than local groundwater. Other sources may include recycled stormwater or wastewater.

0044-160
Continued

Metropolitan Bakersfield General Plan:

0044-161

- Conservation Element (D. Water Resources) Goal 2. Assure that adequate groundwater resources remain available to the Planning Area.
- Conservation Element (D. Water Resources) Goal 3. Assure that adequate surface water supplies remain available to the Planning Area.
- Public Services and Facilities Management Element (B. Water Distribution) Policy 3. Require that all new development proposals have an adequate water supply available.

0044-162

The DEIR's own water supply analysis demonstrates that the Project is in direct conflict with these General Plan goals and policies. It notes that the Project's water demand will come from "M&I" quality water, that is, water that is clean enough for municipal and industrial uses. DEIR at 4.17-50. The water supply analysis finds that there is no surplus M&I quality water available in Kern County. *Id.* As a result, the Project's water demands will result in water shortages in every water year scenario considered by the DEIR—average, single dry year, and multiple dry years. *Id.* at 4.17-51 to 4.17-53. Consequently, "existing entitlements and resources are insufficient to meet current and projected future M&I water demand in the Project Area" and the Project will result in significant and unavoidable water supply impacts. *Id.* at 4.17-57, 4.17-60.

0044-163

The DEIR's land use analysis never mentions these conclusions. Instead, it attempts to dodge the Project's unmet water demands by suggesting that mitigation measures, which were already considered in the water supply analysis, would "reduce" dependency on municipal water supplies, and that the Project's impacts on surface and groundwater resources would be "reduced." *Id.* at 4.10-111 to 4.10-112, 4.10-151. But the General Plan policies cited above do not require the County to "reduce" a project's unmet water demands; they require the County to ensure that there will be no unmet water demands.

The County's General Plan is especially protective of groundwater, requiring high consumptive water uses, such as lakes and golf courses, to demonstrate additional verified sources of water other than groundwater. Chapter 1.10.6, Policy 45. The DEIR again employs tortured logic in an attempt to find the Project is consistent with this policy. It argues that the Project is consistent because "treated oil and gas process water is not used for lakes and golf courses" and because oil and gas developers will implement the DEIR's water quality and water supply mitigation measures. DEIR at 4.10-112. But Policy 45 does not apply to projects that supply water to manmade lakes and golf courses; it applies to projects that consume significant amounts of water, such as the types of oil and gas operations permitted by the Zoning Ordinance. Further, as discussed above, the water supply analysis already concluded that the Project will result in water shortages, even with the mitigation measures identified in the DEIR. 0044-164

The DEIR must be revised to identify the Project's inconsistency with General Plan policies that protect existing land uses from water shortages, dispersed industrial operations, and incompatible land uses. These conflicts constitute significant land use impacts under CEQA that must be disclosed in the DEIR. *Endangered Habitats League,* 131 Cal.App.4th 777. Further, until the Project is made consistent with all General Plan policies, the County's approval would violate State Planning and Zoning Law. *See* Gov't Code § 65860. 0044-165

3. The DEIR Fails to Analyze the Project's Inconsistency With All Applicable Land Use Plans.

Finally, the DEIR does not discuss whether the Project is consistent with applicable specific plans or regional plans, such as the Sustainable Communities Strategy ("SCS") and habitat conservation plans, as CEQA requires. CEQA Guidelines §15125(d). The DEIR briefly mentions these plans, but does not provide sufficient information to determine whether the Project is consistent with them. Nor does it make any consistency determinations. 0044-166

For instance, the DEIR states that "[o]il and gas resources, as well as other land uses, are components of the SCS." DEIR at 4.10-14. Yet there is no follow-up discussion of the specific policies or implementation strategies in the SCS that are applicable to the Project. This is particularly problematic in the discussion of cumulative impacts, where the DEIR states: "the proposed Project would be consistent with planning efforts within the Project Area, such as . . . RTP/SCS . . . ." *Id.* at 4.10-90. There is no evidence to substantiate this conclusion. The DEIR must be revised to include the SCS policies and implementation strategies that are applicable to the Project and an analysis 0044-167

whether there are any inconsistencies with these provisions. CEQA Guidelines §15125 (d).

0044-167 Continued

C. The DEIR's Analysis of Impacts on Water Supply Resources Is Inadequate.

Kern County faces some of the most grave water-supply constraints in the State. The County is naturally arid, enjoying little rain even in non-drought years. Yet the County must support the extensive water demands of its resident and industries. These conditions, now combined with an ongoing drought of historic proportions, have led to severe overdraft of the County's aquifers, resulting in plummeting groundwater levels and unprecedented land subsidence.

0044-168

In light of these concerns, the DEIR's water-supply analysis is one of the most critical topics for evaluating the impacts of the Project on the environment. Water is a basic necessity for all of the County's residents, farmers, industry, habitat, and wildlife. In particular, the County ranks second in the State for agricultural production. Accordingly, the DEIR must carefully analyze the Project's impacts on the County's essential water resources, to ensure it fulfills its "fundamental purpose" of "provid[ing] public agencies and the public in general with detailed information about the effect which the proposed project is likely to have on the environment." *Vineyard Area Citizens for Responsible Growth, Inc.,* 40 Cal.4th AT 428 (quoting Pub. Res. Code § 21061).

0044-169

Unfortunately, the DEIR fails in its task. It provides a grossly insufficient description of the current groundwater resources in the County, not even bothering to differentiate among the County's many aquifers or account for the ongoing drought. Then, the DEIR fails to describe any impacts of the Project on specific groundwater sources, instead providing a simplistic comparison of all water supply in the Project Area to all water demand in the Area. Finally, the DEIR declines to suggest feasible—and, frankly, obvious—mitigation measures that would lessen the Project's significant impacts on water supply. The DEIR must be revised to correct these unlawful shortcomings.

0044-170

1. The DEIR Fails to Accurately Describe the Project's Existing Groundwater Setting.

It is essential that an EIR accurately and fully describe a project's environmental setting because this description forms the baseline for evaluating the project's environmental impacts. *See* CEQA Guidelines § 15125(a). This requirement is crucial to a valid EIR: "[k]nowledge of the regional setting is critical to the assessment

0044-171

of environmental impacts . . . . The EIR must demonstrate that the significant environmental impacts of the proposed project were adequately investigated and discussed and it must permit the significant effects of the project to be considered *in the full environmental context*." CEQA Guidelines § 15125(c) (emphasis added). In other words, it is impossible for an EIR to fulfill its informational purpose when it does not adequately describe the existing environment that may be impacted by a project.

0044-171
Continued

Here, the DEIR's description of the Project Area's groundwater as a single, undifferentiated mass of underground water utterly distorts reality. In fact, the massive Project Area, which covers 3,700 square miles, contains numerous aquifers, each unique. The DEIR's approach of ignoring these individual aquifers undermines the usefulness of its analysis. To describe the Project's impacts on water supply in the proposed area of oil and gas development, the DEIR should have first provided a complete description of the existing groundwater resources. This description must include, at a minimum, specific information about each aquifer, including its location, the amount of water it is estimated to contain, its depth, its water quality, its rate of recharge, uses that currently rely on its water, and other sources of water in the area. Without this information, the DEIR cannot analyze the Project's real, on-the-ground impacts.

0044-172

There are several problems with the DEIR's consideration of the Project Area's groundwater resources as a single mass. To begin with, the DEIR fails to differentiate between groundwater suitable for human and agricultural use and groundwater that is too saline or otherwise of too low a quality to be used for drinking or irrigation. Instead, it assumes that *all* of the water is usable for all purposes. But not all accessible groundwater in the Project Area is of the same quality. The DEIR itself recognizes that the quality of water available is important to determining whether it can be used for agricultural purposes. For example, water with Total Dissolved Solids ("TDS"), which is higher in water with increased salinity, above 1,000 mg/L can degrade agricultural soil and damage crops. *See* DEIR at 4.9-22. Oil and gas production also requires a certain amount of high-quality, clean ("municipal and industrial" or "M&I") water for certain activities, such as well drilling and maintenance, well stimulation, and supplemental steam generation. *See* DEIR at 4.17-21. Yet, the DEIR fails to provide any information about existing groundwater quality in the Project Area, and instead relies on the faulty assumption that all groundwater is usable for all purposes. Because the DEIR thus overestimates available water supplies, it underestimates the Project's water-supply impacts.

0044-173

Indeed, there is substantial evidence that underground injection disposal of oil and gas produced wastewater, which contains high levels of TDS, has already

0044-174

contaminated groundwater aquifers in the Project Area, in some cases leading to significant crop damage. Most notably, DOGGR has allowed injection of produced oil and gas water into aquifers that are in the Project Area that are protected by the federal Safe Water Drinking Act as sources of fresh water. *See* Letter from DOGGR to U.S. EPA (May 15, 2015), attached as Exhibit Wat 1. State Water Board staff has determined that, of the underground disposal wells injecting into the cleanest aquifers, "53 of the 155 injection wells are potentially impacting water supplies." *Id.* And between 2009 and 2012, the U.S. Environmental Protection Agency ("EPA") received twenty-four allegations of groundwater contamination from underground injection wells in California. U.S. Gov. Accountability Office, Drinking Water: EPA Program to Protect Underground Sources from Injection of Fluids Associated with Oil and Gas Production Needs Improvement, at 33 (June 2014), attached as Exhibit Wat 2. In its water-quality analysis, the DEIR acknowledges the ongoing investigation into DOGGR's underground injection disposal program, *see* DEIR at 4.9-74-75, but the DEIR omits any mention of it when discussing water-supply, even though the issue is highly relevant. Nor does the DEIR identify the aquifers likely to have been impacted by this contamination—an inexplicable omission, as the information is available. *See* DOGGR, Preliminary Assessment of 11 Aquifers Historically Treated as Exempt (July 15, 2015), attached as Exhibit Wat 3.

0044-174
Continued

Also, surface disposal of produced water by an oilfield wastewater management facility has polluted groundwater near Bakersfield. *See* John Cox, Facility Operator Wins Time, But Appeal Awaits, *The Bakersfield Californian* (Sept. 6, 2015), attached as Exhibit Wat 4. The facility has been disposing of oilfield produced water for over fifty years by spraying it across ground populated with non-native plants that are tolerant of high-saline water. *Id.* Now, the groundwater beneath the disposal fields is contaminated with chloride, boron, and TDS at levels seven to nineteen times the allowable limits—and the pollution plume is spreading at the rate of 100 feet per year. *Id.* The DEIR does not acknowledge this contamination—or any other similar surface-disposal groundwater contamination—and it must.

0044-175

In addition, different aquifers across the Project Area have naturally varying water quality. For example, groundwater in the Western subarea tends to be highly saline, potentially limiting its uses. *See* DEIR at 4.9-5. The DEIR must detail these natural water quality variations, and identify, on a site-by-site basis, how much groundwater is actually suitable for municipal, industrial, and agricultural uses. Without this information, the DEIR is useless for determining whether there is sufficient groundwater available to actually meet the County's needs. Again, because the DEIR treats available groundwater as one undifferentiated mass, all of which is high-quality,

0044-176

readers are left in the dark as to the amount and location of usable water—and the Project's effect on that supply.

0044-176 Continued

The DEIR's description of Project setting suffers not only from its failure to consider specific aquifers within the Project Area, but also from its underestimation of the effect of the current drought and climate change on water availability. In its various drought scenarios, the DEIR bases its assumptions about future water supply on *past* conditions, generally occurring before 2011. It does not discuss—or even acknowledge—that past conditions are unlikely to accurately reflect water supply in the face of California's ongoing, historic drought and global climate change. Even though there have been multi-year droughts in the past, none approach the magnitude of California's current mega-drought, which was induced by climate change and is likely to extend into the future. *See* P. Martineau, California Water Year 2014 Among Driest Years on Record, Association of California Water Agencies (Sept. 30, 2014), attached as Exhibit Wat 5; T.R. Ault, et al., Assessing the Risk of Persistent Drought Using Climate Model Simulations and Paleoclimate Data, at 7545 (Oct. 15, 2014), attached as Exhibit Wat 6 . A recent study of droughts in California concluded that anthropogenic climate change will continue to cause the co-occurrence of warm and dry periods in California, which in turn will exacerbate water shortages and groundwater overdraft. *See* N.S. Diffenbaugh, et al., Anthropogenic Warming Has Increased Drought Risk in California, at 3935 (Mar. 31, 2015), attached as Exhibit Wat 7. Indeed, scientists have determined that climate change has likely intensified the current drought by 15 to 20 percent, and droughts are almost certain to keep getting worse. *See* A. Park Williams, et al., Contribution of Anthropogenic Warming to California Drought During 2012-2014, at 8 (Aug. 31, 2015), attached as Exhibit Wat 8; *see also* Justin Gillis, California Drought Is Made Worse by Global Warming, Scientists Say, *N.Y. Times* (Aug. 20, 2015), attached as Exhibit Wat 9. In light of this mounting evidence, the DEIR's drought scenarios used to analyze the Project's impacts are almost certainly underestimated.

0044-177

It is especially important that the DEIR take into account long-term climate and drought conditions because the Project includes oil and gas development in Kern County for decades to come. Also, the current drought, like the most recent previous drought (2007-2009), has had a particularly harmful effect in the San Joaquin Valley, impacting the same extremely limited water supply on which this Project plans to rely. *See* Cal. Dept. of Water Res., California's Most Significant Droughts: Comparing Historical and Recent Conditions, at 59-60 (Feb. 2015), attached as Exhibit Wat 10. Specifically, the California Department of Water Resources identified the San Joaquin Valley as one of the worst-affected groundwater basins in the state, as groundwater levels

0044-178

in the Valley have plummeted to more than 100 feet below previous historical lows. Cal. Dept. of Water Res., Public Update for Drought Response, Groundwater Basins with Potential Water Shortages and Gaps in Groundwater Monitoring, at 2 (April 30, 2014), attached as Exhibit Wat 11.

0044-178 Continued

The County must revise and recirculate the DEIR to provide adequate information about the environmental setting, including a complete description of the affected aquifers and a realistic assessment of the drought's effect on water supplies in the Project Area. Without this information, it is impossible for the document to provide an accurate analysis of the Project's water supply impacts.

0044-179

2. The DEIR Fails to Disclose the Project's Potential Impacts on Water Supply.

The DEIR fails to properly analyze the Project's significant impacts on area water supplies. In *Vineyard Area Citizens for Responsible Growth, Inc.,* 40 Cal.4th at 431-432, the Supreme Court imposed four primary obligations on an EIR's water-supply analysis:

0044-180

- The EIR must identify and analyze the water supply for the project. "CEQA's informational purposes are not satisfied by an EIR that simply ignores or assumes a solution to the problem of supplying water to a proposed land use project." *Id.* at 431. This analysis must include consideration of the environmental impacts of tapping that supply.

- The EIR must consider the water demands of the entire project, through all phases of development. "An EIR evaluating a planned land use project must assume that all phases of the project will eventually be built and will need water, and must analyze, to the extent reasonably possible, the impacts of providing water to the entire proposed project." *Id.*

- "[T]he future water supplies identified and analyzed must bear a likelihood of actually proving available; speculative sources and unrealistic allocations ('paper water') are insufficient bases for decision-making under CEQA." *Id.* at 432. The EIR's determination concerning the likelihood of the availability of these supplies must be supported by substantial evidence.

0044-180
Continued

- "Finally, where, despite a full discussion, it is impossible to confidently determine that anticipated future water sources will be available, CEQA requires some discussion of possible replacement sources or alternatives to use of the anticipated water, and of the environmental consequences of those contingencies." *Id.*

0044-181

The DEIR fails to meet the minimum standards set forth in *Vineyard Area Citizens for Responsible Growth, Inc*. The DEIR's entire analysis is to acknowledge that the Project will have unavoidable significant impacts on the area's water supplies because "surplus M&I-quality [ground]water is not available in the Project Area. Any new use reduces the availability of M&I-quality water to another Project Area user, or increases the regional groundwater overdraft if supply shortfalls are addressed by increased groundwater extraction." DEIR at 4.17-50. This abbreviated analysis is deficient for three reasons.

0044-182

First, the DEIR does not adequately analyze water supply for the Project. *Vineyard,* 40 Cal.4th at 431. The DEIR's water supply analysis is on so broad a scale that it provides no useful information regarding the Project's actual, specific impacts on the environment. Like its description of the environmental setting, the DEIR looks at all groundwater potentially available in the Project Area as a single, undifferentiated whole. The DEIR presents a string of tables, along with scant narrative, purporting to quantify water supply and demand in the entire Project Area over the next twenty years. *See* DEIR at 4.17-51 to -56. The tables indicate that, overall, there will be more demand than supply in the 3,700 square-mile Project Area. However, the DEIR does not break down its analysis for the numerous separate aquifers in the Area—aquifers that are drawn on for different uses, have different qualities, and will experience wildly different impacts from the Project. Rather, the DEIR considers only three massive "subareas." *See id.*. This "breakdown" is far too generalized to provide meaningful information as to of the Project's actual impacts on the ground and on any local water supply and is unlawful.

0044-183

Because the EIR for this Project is the *only* environmental review for thousands of new oil and gas wells over decades, CEQA requires a full and detailed analysis of the Project's actual impacts. *See, e.g.*, *Sierra Club v. State Bd. of Forestry* (1994) 7 Cal.4th 1215, 1220 (CEQA violated where agency failed to consider site-specific data about environment prior to approving timber harvest). A broad, hypothetical assessment of whether there is enough water in the whole Project Area to serve all hypothetical demands on the supply is insufficient in these circumstances. To satisfy CEQA, the EIR must analyze the impacts of the Project on water supply on the scale of individual aquifers. The EIR must identify the users of each aquifer and how much water they use. The EIR must describe whether the aquifer is currently

overdrafted, or if the area has sufficient surface water that groundwater is rarely used. For each aquifer, it must disclose how many new oil and gas wells are expected to be drilled in areas above the aquifer. It must explain what sources of water those wells will rely on and how much water the wells will need from different sources. The EIR must document how produced water will be managed at those wells.

0044-183
Continued

Second, the DEIR fails to analyze the actual impacts of the water-supply deficit it predicts, as CEQA requires. *Vineyard Area Citizens for Responsible Growth, Inc.*, 40 Cal.4th at 431. The DEIR simply observes that there is no surplus groundwater available to meet the Project's needs, and then declares the impact on water supply "significant." But CEQA does not allow an EIR to state that impacts will be significant and end the inquiry there. Instead, the statute requires the document to analyze the full extent of the project's impacts, even if these impacts cannot be avoided despite mitigation. *Santiago County Water Dist. v. County of Orange* (1981) 118 Cal.App.3d 818, 831. Accordingly, the DEIR here must disclose how increased competition for limited groundwater will impact current users, such as municipalities and agriculture. For example, if there is not enough water to go around, how will the shortfall affect crop production? If there is a groundwater deficit, which users will bear the brunt of the deficiency? If the Project results in increased groundwater extraction, how will that activity impact particular aquifers' long-term viability? Will there be land subsidence? And where will the impacts be felt the most?

0044-184

Finally, the DEIR fails to identify the new sources of water that would be necessary to meet the Project's needs. "CEQA's informational purposes are not satisfied by an EIR that simply ignores or assumes a solution to the problem of supplying water to a proposed . . . project." *Vineyard Area Citizens for Responsible Growth, Inc.*, 40 Cal.4th at 430-31. Here, the DEIR identified only part of the water supply for the Project: its reuse of some produced water. But the DEIR acknowledges that this recycled water will not serve all of the Project's needs because some operations at oil and gas wells require high-quality, M&I water. *See* DEIR at 4.9-86, 4.17-57. Because there is only sporadic availability of surface water in the area, the DEIR identifies groundwater as the Project's sole potential source of M&I water. DEIR at 4.17-22. Yet, while the DEIR goes on to admit that there is no groundwater in the area to spare, DEIR at 4.17-57, it fails to disclose where the Project would acquire necessary M&I water. This omission violates CEQA because it denies decision-makers and the public the information necessary to "evaluate the pros and cons of supplying the amount of water that the [project] will need." *Vineyard Area Citizens for Responsible Growth, Inc.*, 40 Cal.4th at 431 (citation omitted; brackets original).

0044-185

Even if it is impossible to identify a sufficient water supply for the Project, "CEQA requires some discussion of possible replacement sources or alternatives to use of the anticipated water, and of the environmental consequences of those contingencies." *Id.* at 432. The DEIR here provides no such discussion, leaving its readers uninformed as to how the Project will acquire the water it needs for its operations. 0044-186

3. The DEIR's Water Supply Mitigation Is Inadequate.

An EIR must describe feasible mitigation measures that would minimize a project's impacts. Pub. Res. Code § 21002; CEQA Guidelines § 15126.4. Even though this Project's water-supply impacts are significant and purportedly unavoidable, CEQA requires that the EIR identify mitigation measures that can lessen the Project's impacts. *See id.* The three mitigation measures described in the DEIR do not fulfill this requirement. Furthermore, the DEIR does not identify all feasible mitigation measures that could reduce the Project's water supply impacts—even those identified elsewhere in the DEIR. 0044-187

First, Mitigation Measure ("MM") 4.17-2 requires that the oil and gas operations increase reuse of produced water and reduce use of M&I water "to the extent feasible." DEIR at 4.17-59. To this end, the measure purports to require the oil and gas trade associates requesting the Project Zoning Ordinance amendments (collectively referred to in the DEIR as "Applicant") to identify the five largest oil-industry water users, who "shall work together to develop and implement a plan identifying new measures to reduce [M&I] water use by 2020." *Id.* The five oil companies are also supposed to work with local agriculture producers and water districts to identify new uses for produced water. *Id.* Instead of identifying concrete ways that the oil and gas operators could increase reuse of water, however, the measure states only that operators should do so "to the extent feasible." This measure is too vague and undefined to be enforceable, and thus is legally inadequate. 0044-188

MM 4.17-2 is inadequate not only because it is vague, but also because it is deferred into the future. Rather than imposing present mitigation, the measure postpones defining specific requirements, standards, or practices that would result in a reduction of M&I water use, relying on large oil companies to "identify[] new measures to reduce [M&I] water use by 2020." DEIR at 4.17-59. CEQA allows deferred mitigation only where: (1) there is an articulated reason or basis for the deferral, and (2) the proposed mitigation measure contains performance standards that will be met by the more specific measures to be developed later. *County of Merced*, 149 Cal.App.4th at 669-71. Here, MM 4.17-2 satisfies neither of these requirements. Further, California courts have made 0044-189

clear that allowing a project applicant to formulate specific mitigation at some later date does not satisfy CEQA's requirements. There is no reason the County could not conduct discussions with the Project Applicant now, to identify specific, new water-saving measures.

0044-189 Continued

MM 4.17-2 also provides no explanation of how the County would enforce this mitigation measure against the Applicant, or how the Applicant could compel five oil-industry giants to collaborate on developing water-saving measures. The DEIR cannot rely on the expectation that oil companies and associations will voluntarily agree to spend uncompensated time developing conservation measures that may be against their financial interest. The Project allows permits to be issued before these measures are developed and there is no consequence if they are never developed. Without assurances that the oil companies can be required to take these measures, the mitigation is unenforceable and speculative and, thus, inadequate.

0044-190

Second, MM 4.17-4 is both vague and deferred, so that it provides no effective mitigation for the Project's impacts. The measure states, in full: "The Applicant shall work with the County on the Groundwater Sustainability Plan to increase Applicant's use of reclaimed water and reduce the Applicant's use of [M&I] quality imported surface water or groundwater." DEIR at 4.17-60. First, the County is not solely responsible for developing the Groundwater Sustainability Plan ("GSP"). In Kern County, the responsible agency is the Kern Groundwater Authority, a joint powers authority, of which the County is but one of twenty member agencies. Accordingly, the County does not have the authority to unilaterally decide the contents of the GSP.

0044-191

And even if the County could dictate the contents of the GSP, MM4.17-4 lacks necessary detail. For example, the measure does not explain what "work with" means. Would the County and the Applicant develop a plan together? Would the County take only suggestions? Further, the measure fails to set any standards for how much increase in use of reclaimed water and decrease in use of high-quality M&I water is necessary to mitigate the Project's impacts. CEQA does not permit such ineffective, deferred mitigation measures. *See Communities for a Better Environment v. City of Richmond* (2010) 184 Cal.App.4th 70, 95-96.

0044-192

Third, MM 4.17-3 fails to mitigate for the Project's water-supply impacts because it improperly defers development of the actual mitigation measures. The measure merely states that the Applicant will work with the County to develop some best practices for the oil and gas industry that would "encourage the re-use of produced water from oil and gas activities" with the "goal" of reusing 30,000 acre-feet per year. DEIR at

0044-193

4.17-60. The DEIR does not explain why it cannot impose a specific and enforceable water-reuse mitigation measure now. For this reason alone, the mitigation measure is legally inadequate. *See County of Merced*, 149 Cal.App.4th at 669-71.

0044-193
Continued

Finally, the DEIR fails to identify other measures that could reduce the Project's impacts on the water supply. For example, in the DEIR's alternatives section, the DEIR discusses a Project alternative that would *require* oil and gas operations to treat and reuse an amount of produced water at least equivalent to the amount of high-quality M&I water used by the operations. DEIR at 6-26. As the DEIR recognizes, this proposal for treatment and reuse could end up producing more water of a high enough quality for crop irrigation than currently exists, resulting in an environmental benefit. DEIR at 6-27. In other words, this is a proven, feasible mitigation measure that could reduce the Project's significant impact on water supply. Indeed, as the DEIR admits, it could very well mitigate the impacts to a less than significant level:

0044-194

> [P]otential groundwater impacts would be mitigated to less than significant levels if sufficient amounts of produced water otherwise subject to disposal were treated and reused to offset the consumption of M&I water for oil and gas exploration and production.

DEIR at 4.9-154.

0044-195

The DEIR must identify required treatment of produced water for reuse as a feasible mitigation measure for the Project's significant water-supply impacts. Pub. Res. Code § 21002.1(b); CEQA Guidelines § 15126.4. Treatment of produced water clearly falls within CEQA's definition of mitigation, which includes "[c]ompensating for the impact by replacing or providing substitute resources or environments." CEQA Guidelines § 15370. The County may not attempt to avoid adopting this measure by describing it as a project alternative. The California Supreme Court recently emphasized that "CEQA does not authorize an agency to proceed with a project that will have significant, unmitigated effects on the environment, based simply on a weighing of those effects against the project's benefits, unless the measures necessary to mitigate those effects are *truly* infeasible." *City of San Diego v. Bd. of Trustees of California State Univ.* (2015) 61 Cal. 4th 945, 352. As a result, the County must revise the DEIR to include all feasible mitigation measures, including required treatment and reuse of produced water.

Another feasible mitigation measure that the DEIR fails to consider is directly reusing produced water for well stimulation, which can be done without the

0044-196

treatment necessary for produced water to be released into the environment. In its Independent Scientific Assessment of Well Stimulation in California, Volume II, Chapter 2, attached as Exhibit Wat 12, the California Council on Science and Technology ("CCST") suggested this direct reuse of water, observing that "[p]roduced water reuse for well stimulation has been shown to be feasible . . . and is becoming more common across the United States." Exhibit Wat 12 at 146. The DEIR must be revised to include this reasonable and feasible mitigation measure.

0044-196
Continued

D. The DEIR Fails to Adequately Analyze the Project's Visual/Aesthetic Impacts.

Under CEQA, it is the state's policy to "[t]ake all action necessary to provide the people of this state with . . . enjoyment of aesthetic, natural, scenic, and historic environmental qualities." Pub. Res. Code § 21001(b). Thus, courts have recognized that aesthetic issues "are properly studied in an EIR to assess the impacts of a project." *The Pocket Protectors,* 124 Cal.App.4th at 937. To be adequate, an EIR must analyze a project's impacts on "view and other features of beauty." *Ocean View Estates Homeowners Assn., Inc. v. Montecito Water District* (2004) 116 Cal.App.4th 396, 401.

0044-197

Although the DEIR correctly notes that there will be significant and unavoidable impacts to visual and aesthetic resources, the document does not provide the comprehensive analysis necessary to accurately evaluate the severity and extent of the project-specific or cumulative impacts. In particular, the document fails to adequately describe the existing setting, to adequately analyze visual impacts that would be created for certain user groups, to adequately analyze cumulative impacts, or to identify feasible mitigation measures. As a result of these omissions, the DEIR "travel[s] the legally impermissible easy road to CEQA compliance . . . [by] simply labeling the effect 'significant' without accompanying analysis . . . ." *Berkeley Keep Jets Over the Bay Comm. v. Bd. of Port Comm'rs* (2001) 91 Cal.App.4th 1344, 1371.

0044-198

1. Because the DEIR Fails to Describe the Extent and Location of the Project, It Has Not Adequately Analyzed Its Visual Impacts.

Like other sections of the DEIR, the aesthetics section suffers as a result of the essentially programmatic nature of the Project. Because the DEIR does not disclose the extent or location of oil and gas development under the Project, the document fails to properly analyze its visual impacts. The DEIR admits as much, stating that visual impacts in some areas are simply uncertain and that the severity of the Project's aesthetic impacts "would depend not only on the reduction of unity, intactness, and vividness

0044-199

produced by the operation activities, but also on the visibility and proximity of these activities to viewers." DEIR at 4.1-35. Indeed, throughout the DEIR, it is clear that the preparers have given up any attempt to provide an accurate description of the visual impacts of the Project. Instead, the DEIR resorts to vague, hedged statements referring to possible future "scenarios" that "may occur." DEIR at 4.1-27 ("impacts are assessed for likely potential scenarios of oil and gas development that may occur"); DEIR at 4.1-28 (visual simulations "illustrate concepts for likely potential scenarios of oil and gas development that could occur"). 0044-199 Continued

In short, the DEIR acknowledges that, due to the uncertainties inherent in the Project itself, it has not predicted the potential impacts that the proposed oil and gas activities will have on aesthetics. But this cursory, generic approach is unlawful for a project-level EIR. Because there will be no further site-specific review for this 3,700 square-mile development project, discussing a mere handful of visual "concepts" simply does not suffice. CEQA requires "a good faith effort at full disclosure." *Kings County Farm Bureau,* 221 Cal.App.3d at 712. Here, the DEIR must identify *all* scenic landscapes and important user groups, and demonstrate the extent to which views will be impacted by the Project's maximum potential build-out. 0044-200

2. The DEIR Fails to Adequately Describe or Graphically Depict the Existing Aesthetic Setting.

One of the first steps in the process of determining visual impacts is to accurately depict the environmental setting. CEQA Guidelines § 15125. A description of the setting is necessary to determine the baseline against which the EIR must assess the impacts of a project. *Save Our Peninsula Committee v. Monterey County Bd. of Supervisors* (2001) 87 Cal.4th 99, 119. The description of physical environmental conditions must include a local and regional perspective. CEQA Guidelines § 15125. Critically, it must also place special emphasis on environmental resources that are rare or unique to the region and that would be affected by a project. CEQA Guidelines § 15125(a). 0044-201

Here, the proposed Project area encompasses 3,700 square miles and includes most of the San Joaquin Valley floor. DEIR at 4.1-3. The Project encompasses a number of important preserves and open spaces including the Kern River Plan Area; Tule Elk Reserve State Park; portions of the Temblor Mountain Range; Kern National Wildlife Refuge; the southwestern most portion of the Sequoia National Forest; and a number of County parks. Considered some of Kern County's crown jewels, these areas offer spectacular scenery. 0044-202

Remarkably, the DEIR's aesthetics environmental setting discussion, which consists of a single paragraph, ignores these and other important visual resources. Instead, it describes the terrain of most of the Project area generically as "gently rolling with some hilly and steeply rolling terrain near the west, south and east boundaries of the Project area" and "mostly flat" in the central part of the Project area." DEIR at 4.1-4. It also states that "the predominant land uses and associated views are agricultural, oil and gas-related uses, and recreational and other open space. *Id.* While the DEIR acknowledges that there are wetlands and stream corridors, it provides no information regarding their location or visual character. *Id.* As a result, the DEIR's description is so vague as to be meaningless. 0044-203

The DEIR's treatment of the Kern River Plan area, which covers a 14,250-acre area along 35 miles of the river, illustrates the problem. The Kern River Plan describes the area as follows: 0044-204

> "The River has been described as the single most valuable visual resource in the southern San Joaquin Valley. The River provides visual relief to the relative flatness of the Valley. It provides prime habitat for countless forms of wildlife that make up part of the visual scene." Kern River Plan at 2f.
>
> "The Kern River is a landmark resource and is one of the major rivers of California. From its start at Gregory's Monument in Tulare County, and for much of its length, the recreational and scenic values of the River are recognized and protected by National Forests and Parks. Each year, these qualities draw visitors by the thousands to its banks." *Id.* at Chapter II at 1.
>
> "As it enters the dry environment of the southern San Joaquin Valley, the Kern River has inestimable visual and psychological value to the inhabitants of the region." *Id.*at Chapter II at 2.

The DEIR, on the other hand, presents a different view: its discussion of aesthetics environmental setting does not even mention the Kern River and its adjacent open space recreational areas. 0044-205

0044-205
Continued

The DEIR's failure to place any emphasis, much less special emphasis, on environmental resources like the Kern River area, the Tule Elk Reserve State Park, portions of the Temblor Mountain Range, the Kern National Wildlife Refuge, the southwestern most portion of the Sequoia National Forest, and various County and local parks, violates CEQA. *See* CEQA Guidelines § 15125. The DEIR also errs in failing to distinguish between distinctive areas that are visually scenic, such as the County's numerous uninterrupted agricultural and rangeland vistas, and areas that are highly disturbed or urbanized. Indeed, the DEIR's stark misrepresentation of the area's visual setting undermines the integrity of the entire visual impact analysis.

0044-206

3. The DEIR Fails to Analyze Impacts on Views to and from Numerous Public Parks and Scenic Open Spaces.

The proposed Project would result in several significant visual impacts, yet the DEIR analyzes none of them. To be adequate, an EIR must analyze impacts on views from public parks and trails. *See Quail Botanical Gardens Found., Inc. v. City of Encinitas* (1994) 29 Cal.App.4th 1597, 1605, 1607 (holding that a housing project could have significant aesthetic impacts if it would block views of the ocean from a public park); *Ocean View Estates Homeowners Assn.,* 116 Cal.App.4th at 402 (an EIR must analyze the project's visibility from public trails). The DEIR completely fails to meet this standard.

The DEIR all but ignores the Project's obstruction of views of the region's scenic and open space areas, as well as views from important recreational areas (e.g., Kern River Parkway, Tule Elk Reserve State Park; portions of the Temblor Mountain Range; the Kern National Wildlife Refuge; and southernmost portions of Sequoia National Forest, a number of County and local parks, and other open spaces). As discussed above, views of open space lands are treasured by area residents and visitors. Any obstruction of these open vistas would clearly constitute a significant impact but, here too, the DEIR provides only a generic discussion of impacts and never bothers to show how views of particular scenic resources would be affected. For example, the DEIR presents only one viewpoint looking towards the Temblor Range and no viewpoints from trails where hikers and equestrians would be looking outward to the valley. *See* Figure AES-C9.

Disregarding the importance of local aesthetics, the DEIR includes only ten key observation points for the entire 3,700 square-mile Project area. Six of these ten views are from roadways. Only three of the key observation points are taken from parks to simulate park users' experience, and one of these depicts views from an active use

0044-206
Continued

park, where enjoyment of scenic views is secondary to the activity. *See* DEIR Figures AES-C6 and AES-010. Figures AES-C1 and AES-C6, taken from Panorama Park and the Spring Wildflowers Trailhead in the Wind Wolves Preserve, are the only photographs that are not taken from a roadway. Yet the vantage point of these photographs is from a considerable distance; drill rigs proposed by the Project can barely be seen in the distant horizon. These photos are misleading to a reader of the DEIR, as they fail to disclose the proposed Project's proposal to allow oil and gas development directly adjacent to many public open space, recreational areas, and parks and the alarming aesthetic impacts such proximity will create. *See* DEIR Figure 4.10-2 (zoning map); Exhibit Aes 1 (depicting examples of existing oil wells near Highway 46). Further, the figures in Appendix G, Visual Resources Technical Report, which are supposed to provide the visual simulations of the proposed Project for this Project EIR, only provide images that are conceptual. For example, the notation on Figure AES-C3 in Appendix G states, "This simulation represents a concept design for potential development of oil and gas facilities based on data provided to the County by the Applicant. Facilities shown are generally to scale and representative of the general types and mix of facilities that could potentially be developed in this area; however, the precise density, locations, heights, colors, and mix of facilities will vary for the actual development." Without the provision of this information in the DEIR, the analysis of the project-specific impacts of the proposed Project related to aesthetics cannot possibly be provided.

With the exception of the two uninformative photos from Panorama Park and Spring Wildflowers Trailhead, the DEIR completely ignores vantage points from other open space lands, recreational areas, and County and local parks. For instance, the document never acknowledges more than a dozen parks that comprise the Kern River Parkway. Nor does it acknowledge County recreational areas such as the Buena Vista Aquatic Recreation Area, Camp Okihi, Stramler Park, Hart Memorial Park and numerous other parks in Kern County.

Although the Project would certainly interfere with the use and enjoyment of the open space, recreational areas, and parks, the DEIR fails to examine how users would be affected by the proposed Project. Attached is a list of some of the parks and recreational areas in the County that stand to be affected by the Project. See Exhibit Aes 2, maps of parks and recreational areas in the County. The DEIR must evaluate views from these and other parks and open space areas that would be impacted. The DEIR must address the following questions, at a minimum:

0044-206
Continued

* What scenic views and vistas are open to the public from the open space areas, recreational areas, and County and local parks in and adjacent to the Project Area?

* How are the scenic views and vistas at these locations being used by the public?

* Where do these scenic views and vistas, including trails, have the most prominent views of the Project Area and the proposed Project?

Only after these questions about the existing environmental setting are answered can the DEIR begin the hard work of actually analyzing the impacts related to visual aesthetics on the public pursuant to CEQA.

In short, given the proximity of the open space, recreational areas, and parks in the Project Area to the proposed areas of oil and gas drilling and production, the public that use these facilities will likely suffer a significant deterioration in their aesthetic experience. The DEIR's failure to identify any of these open space, recreational areas, and parks by name, to analyze their use related to scenic resources, or to provide text or photographs describing the views and scenic vistas of and from these areas, violates CEQA.

4. The DEIR's Mitigation Measures For Visual/Aesthetic Impacts Are Inadequate.

0044-207

CEQA's core mandate is that "public agencies should not approve projects as proposed if there are feasible alternatives or feasible mitigation measures available which would substantially lessen the significant environmental effects of such projects." *Berkeley Keep Jets Over the Bay Comm.*, 91 Cal.App.4th at 1354 (quoting Pub. Res. Code § 21002). CEQA requires lead agencies to identify and analyze *all feasible mitigation*, even if this mitigation will not reduce the impact to a level of insignificance. CEQA Guidelines § 15126.4(a)(l)(A).

Here, the DEIR takes the approach of identifying the proposed Project's impacts to aesthetics as significant and identifying very limited mitigation measures that do little to minimize these, leaving the impacts as significant and unavoidable. The DEIR estimates that the Project would allow an average of 2,687 new producing wells to be drilled annually along with the construction of associated ancillary facilities in the Project Area. DEIR at 3-32. It also acknowledges that agricultural and open space areas with

0044-207
Continued

predominantly rural or natural aesthetic character "could be converted to a predominantly industrial developed character . . . ." *Id.* The document goes on to conclude that these impacts are significant. DEIR at 4.1-41.

Yet, the proposed mitigation does little to address the addition of oil and gas facility construction activities and the ongoing operation of production facilities to the rural characteristics of the agricultural and open space lands in the Project Area. For example, Measure MM 4.1-1 requires applicants to use existing roads "whenever possible" and generally calls on the applicant to "minimize the amount of disturbance." This measure, which includes no performance standards, is impermissibly vague. CEQA Guidelines § 15126.4. It must be revised to detail a maximum square footage of new roads per parcel in order for the DEIR to rely on it to reduce the proposed Project's aesthetic impacts.

Measure MM 4.1-2 requires that all equipment be removed from drilling sites within 90 days after completion of work. *Id.* The DEIR, however, describes construction periods that range from several weeks to several years. DEIR at 4.1-30. This measure does little to relieve the burden of visual impacts on area residents and recreational area and park users, as it does nothing to limit the number of operations in any given area or to regulate where they are located. The remaining three measures require only that applicants comply with existing laws. DEIR at 4.1-41. However, complying with existing laws is not mitigation. The DEIR provides no evidentiary support that the proposed measures would effectively reduce impacts to visual character.

Under CEQA, an EIR is inadequate if it fails to identify feasible mitigation measures, or if its proposed mitigation measures are so undefined that it is impossible to evaluate their effectiveness. *San Franciscans for Reasonable Growth,* 151 Cal.App.3d at 79. The County must revise its aesthetic mitigation measures to ensure they are clearly defined, enforceable, and can achieve some effectiveness to reduce the significant and unavoidable impacts to aesthetics.

The County must also identify additional feasible mitigations to reduce the impacts to the extent possible. Additional feasible mitigation measures include the following:

- Limit the number of drilling operations at any one time in the scenic viewsheds of the Project Area's open space, recreational areas, and parks.

0044-207
Continued

- To minimize the significant impacts due to the changes in the visual characteristics in the Project Area, increase the setbacks between oil drilling construction and operations and existing residents to a minimum of 1,000 feet.

- Create setbacks for oil drilling construction and operations from public open space, recreational areas, and parks.

- Limit oil and gas operations to areas outside the sensitive viewsheds open to the public from open space areas, recreational areas, and County parks.

- Cluster drilling operations to minimize obstruction of sensitive viewsheds and reduce the effects of the changes in the visual rural characteristics in the Project Area.

- Enforce height limits for drilling rigs and pumping units and other structures, such as tanks, in sensitive viewsheds.

0044-208

5. The DEIR Fails to Adequately Analyze the Cumulative Visual/Aesthetic Impacts.

Not surprisingly, the DEIR's analysis of cumulative visual/aesthetic impacts is also flawed. Under the CEQA Guidelines, "a cumulative impact consists of an impact which is created as a result of the combination of the project evaluated in the EIR together with other projects causing related impacts" CEQA Guidelines § 15130(a)(1). Because "[c]umulative impacts can result from individually minor but collectively significant projects" (CEQA Guidelines 15355(b)), an impact that appears less than significant (or mitigable to such a level) when only the project is scrutinized may turn out to contribute to a significant cumulative impact. In that case, the EIR must determine whether the project's contribution is "cumulatively considerable," that is, whether its "incremental effects . . . are significant when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects." CEQA Guidelines § 15065(a)(3).

Here, the DEIR's analysis of cumulative impacts betrays an essential misunderstanding of the concept of cumulative impacts. First, the DEIR fails to employ either of the methods for conducting such an analysis as required under CEQA. Section 15130(b) of the CEQA Guidelines requires that the discussion of cumulative impacts include either of the following elements:

0044-208
Continued

> (A) A list of past, present, and probable future projects producing related or cumulative impacts, including, if necessary, those projects outside the control of the agency; or
>
> (B) A summary of projections contained in an adopted general plan or related planning document, or in a prior environmental document which has been adopted or certified, which described or evaluated regional or area wide conditions contributing to the cumulative impact.

The DEIR claims to have used the plan/projection approach to cumulative analysis, and refers to both the Kern County General Plan and the regional growth plan and projections included in the Kern COG Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) approved in 2014. DEIR at 3-78. Yet, the DEIR fails to summarize any projections that these documents may have made regarding the extent of future industrial development in the County. Nor does the DEIR identify any description or evaluation in these documents of regional development conditions contributing to cumulative aesthetic impacts as CEQA requires. The reader is left completely in the dark as to what these plans might actually say about this crucial subject. *See* DEIR at 3-78, 4.1-50, 4.1-51.

Not only does the DEIR fail to disclose any projections, but the DEIR also conducts no cumulative impacts *analysis* that would inform the public and decision-makers what the addition of 67,425 new wells, in combination with other industrial projects projected for the County, would look like. The DEIR simply states the obvious: the Project, "in combination with the implementation of other reasonably foreseeable plans, will continue to result in visible changes within Kern County . . . and some may view these visual changes as adverse aesthetic impacts." DEIR at 3-30.

The DEIR also fails to include in its cumulative impacts analysis other obvious plans and projects. For instance, it does not consider the County's numerous Specific Plans that allow for oil and gas and industrial development. Nor does it consider any projections for the reactivation of thousands of idle wells throughout the County and the new drilling and pumping equipment associated with those reactivations.

The DEIR also ignores the quickly-expanding number of industrial renewable energy projects in Kern County. Kern County has recently approved or is considering for approval 23,247 acres of industrial solar projects and 4,211 acres of industrial wind projects. *See* Exhibit Aes 3 (Master Kern Solar Project List); Exhibit Aes 4 (Master Kern Wind Project List). In addition, the Desert Renewable Energy

0044-208
Continued

Conservation Plan will streamline renewable energy project development in the eastern portion of Kern County. *See* Exhibit Aes 5 (Draft DRECP Executive Summary, full Plan and DEIR are available at http://www.drecp.org/draftdrecp/). The DEIR must consider how this booming renewable energy development will contribute to the Project's significant degradation of Kern County's scenic landscapes.

The DEIR's failure "to include relevant information precludes informed decisionmaking and informed public participation, thereby thwarting the statutory goals of the EIR process." *Kings County Farm Bureau,* 221 Cal.App.3d at 712; *see also* § 21005. In *Kings County Farm Bureau,* the cumulative impacts analysis for a proposed cogeneration facility considered only 30 projects in the mid-San Joaquin Valley area even though the administrative record showed that some 116 projects were planned in the entire San Joaquin Valley. *Id*. at 724. The court held that "[b]ecause the record does not provide information regarding similar energy developments in the San Joaquin Valley air basin, the agency could not, nor can we, determine whether such information would have revealed a more severe impact. Accordingly, the EIR is inadequate. To conclude otherwise would place the burden of producing relevant environmental data on the public rather than the agency and would allow the agency to avoid an attack on the adequacy of the information contained in the report simply by excluding such information." *Id.* The court also found that the EIR's treatment of cumulative impacts on water resources was inadequate because the document contained "no list of the projects considered, no information regarding their expected impacts on groundwater resources and no analysis of the cumulative impacts." *Id*. at 728-29; *see also San Bernardino Valley Audubon Society v. Metropolitan Water Dist. of Southern Cal.* (1999) 71 Cal.App.4th 382, 386, 399 (holding a "summary discussion of cumulative impacts is inadequate"). Similarly here, the DEIR fails to provide sufficient information regarding other projects in the County that degrade aesthetic resources.

Moreover, the DEIR neglects to identify feasible mitigation for the Project's cumulative visual impacts. As noted above, an EIR must propose feasible, effective measures to mitigate every significant impact. *San Franciscans for Reasonable Growth*, 151 Cal. App. 3d at 79. The revised DEIR must include an analysis of, and mitigation for, the Project's cumulative impacts upon visual and aesthetic resources.

E. The DEIR Does Not Adequately Analyze or Mitigate the Project's Noise Impacts.

0044-209

The Project will generate both construction-related and operational noise. DEIR at 4.12-18 to -21. Among other noise-producing activities, the Project will include:

0044-209
Continued

truck traffic; land clearing and grading; access road construction; well drilling, maintenance and repair; well stimulation; and well decommissioning and abandonment activities. DEIR at 4.12-16 to -17. These activities will variously require the use of heavy equipment such as graders, bulldozers, drilling rigs, and truck-mounted pumps, and associated power-generation equipment, all of which will result in noise impacts. *Id.* Moreover, the construction, maintenance, and drilling activities will be anything but temporary. The DEIR admits that "staggered development of multiple wells or other oil and gas facilities within a particular area could occur over the course of *several years*." DEIR at 4.12-17 (emphasis added).

The World Health Organization recognizes noise as a serious public health problem. *See, e.g.,* excerpts from Traffic Noise Reduction in Europe, attached as Exhibit Noise 1. Given the severity and duration of the Project's potential noise impacts, coupled with the public health effects that elevated noise levels have on nearby residents, the DEIR should have rigorously examined this issue. Unfortunately, the document's analysis of noise impacts is replete with errors and critical omissions. The September 9, 2015 Report by Charles M. Salter and Associates, attached as Exhibit Noise 2 ("Salter Report"), provides additional comments on the shortcomings in the DEIR's noise analysis, the most troubling of which are briefly described here.

1. The DEIR Does Not Analyze the Project's Impacts Against the Existing Environmental Setting, as Required by CEQA.

0044-210

Although the DEIR describes existing noise conditions, it does not analyze the Project's impacts against them. Instead, it measures impacts against a regulatory noise standard. This approach has been soundly rejected by Courts. *See, e.g., Environmental Planning & Information Council v. County of El Dorado* (1982) 131 Cal.App.3d 350 (EIR inadequate where the document compared the project's impacts against the existing general plan, rather than the existing environment); *Communities for a Better Environment,* 48 Cal.4th at 320-23.

0044-211

The DEIR purports to evaluate whether the Project will result in a substantial permanent increase in ambient noise levels in the Project vicinity above levels existing without the Project. DEIR at 4.12-25 (Impact 4.12-3). However, its actual analysis does not provide that evaluation. Rather, the DEIR states that "[a] substantial permanent increase in ambient noise levels would occur if noise levels increase in excess of 65 dBA CNEL." *Id.* The DEIR evidently derives the 65 dB CNEL[4] criterion from the

[4] CNEL stands for Community Noise Equivalent Measure.

0044-211
Continued

standards set forth in the County's General Plan, although the DEIR does not specify as much. *See* DEIR at 4.12-11 to -13 (setting forth the goals and policies of the County General Plan's noise element, as background). However, 65 dB CNEL is not a measurement of the "level[] existing without the Project." DEIR at 4.14-25 (initial caps omitted). In other words, the County deftly replaces the actual, measured ambient noise levels with a manufactured baseline of 65 dB. This maneuver dramatically inflates the purported existing ambient level without the Project and thereby results in a failure to identify or analyze significant noise impacts. Exhibit Noise 2 at 2-3. The DEIR then finds that although there is potential for permanent ambient noise levels to increase beyond 65 dB CNEL, the 190-foot setback requirement will mitigate this impact to a less than significant level. DEIR at 4.12-25 (impacts would be less than significant after implementing MM 4.12-1).

As the Salter Report explains, even if the proposed mitigation were to successfully reduce ambient noise levels to 65 dB CNEL (which it will not), the Project would still result in a projected increase of more than 20 dB over existing ambient noise levels in some areas of the County. Exhibit Noise 2 at 3-4. To put this in perspective, a 5dB increase in ambient noise levels is easily perceptible and treated in many jurisdictions as a significant impact. Exhibit Noise 2 at 4; *see also* DEIR at 4.12-12 (City of Bakersfield noise standard states that a 5 dB increase over the existing ambient noise level, where the existing ambient level is less than 60 dB CNEL, is significant). It is therefore inexcusable that the County could ignore this enormous increase in noise. Yet that is exactly what the DEIR's approach achieves. And, while the day-night average noise level may increase by more than 20 dB, the daytime construction hourly noise level and the nighttime hourly noise level may increase even more—by more than 32 and 35 dB, respectively. Exhibit Noise 2 at 3. The County cannot ignore this significant increase permanent increase in ambient noise levels existing without the Project.

Similarly, the DEIR's purported analysis of temporary or periodic increases in ambient noise levels does not measure the Project-related noise level increases against existing ambient noise levels. DEIR at 4.12-26 to -28 (Impact 4.12-4). Again, the DEIR appears to measure this impact against a 65 dB CNEL standard, although even that is unclear. *See* DEIR at 4.12-27 ("sensitive noise receptors could hear construction noise and these noise levels would be in excess of 65 dBA CNEL"). Again, the DEIR manages to find that impacts would be less than significant with mitigation. DEIR at 4.12-28. The DEIR also states that "[o]il well operation for extraction purposes typically would not result in substantial temporary or permanent increases in ambient noise levels," citing

0044-211
Continued

Table 4.12-9.[5] *Id.* But Table 4.12-9 does not address ambient noise levels; it simply estimates the distance from well production noise sources to 50, 55, and 60 dB noise contours. DEIR at 4.12-20. Thus, the County has no basis for determining what this impact is, let alone whether it will be significant.

The County's failure to analyze the Project's noise impacts against a baseline of existing environmental conditions is a glaring violation of CEQA, and undermines the DEIR's entire discussion of noise impacts and mitigation. *Communities for a Better Environment* is instructive. 48 Cal.App.4th 310. In that case, the agency attempted to use the total air emissions a refinery was allowed under an existing permit as the baseline for analyzing the impacts of expanding the refinery' operations, even though the refinery was in fact emitting below permitted levels. The California Supreme Court rejected this approach. Citing the CEQA Guidelines and quoting the extensive caselaw on this issue, the Court held that the baseline of "existing physical conditions in the affected area" meant "real conditions on the ground . . . rather than the level of development or activity that *could* or *should* have been present according to a plan or regulation." *Id.* at 321 (internal quotation marks and citations omitted; emphases in the original). Thus, the County failed to comply with CEQA by considering the Project's impacts only against a 65 dB CNEL standard, and not against existing ambient noise levels in the Project area. *See also Berkeley Keep Jets Over the Bay Com.*, 91 Cal.App.4th at 1381 (EIR's noise analysis was inadequate where the threshold would allow the project to increase noise levels up to 64.9 dB CNEL without necessitating a finding of significant impact).

2. The DEIR Fails to Analyze Single-Event Noise.

0044-212

Another egregious oversight is the DEIR's failure to evaluate single noise events. The DEIR analyzes the Project's potential impacts only in terms of averaging metrics.[6] The Project, however, will result in construction activities and truck passbys that will give rise to intermittent single-event noise. Exhibit Noise 2 at 6. The DEIR should have evaluated the effect that single noise events from traffic, construction, and

[5] In fact, the DEIR cites to Table 4.2-9, but we assume that this is an error and that the DEIR intended to cite to Table 4.12-9. Table 4.2-9 addresses acreage of agricultural land and is unrelated to the noise analysis.

[6] The DEIR variously uses both CNEL and Day-Night Average Noise Level ("DNL"). Both are averaging metrics and the distinctions between CNEL and DNL are minor and not relevant here.

0044-212
Continued

operation activities will have on the communities in the Project area. Yet, rather than analyze how these single-noise events will affect receptors, the DEIR focuses only on average noise.

California courts have rejected using only this "averaging" approach because affected residents do not hear noise averages, but single events. *See Berkeley Keep Jets Over the Bay Com.,* 91 Cal.App.4th at 1382. Single-event noise levels have been shown to result in sleep disruption and speech interference, as well as heightened levels of stress and annoyance. Noting that "sound exposure level [a non-averaging metric] has been found to be the most appropriate and useful descriptor for most types of single event sounds," the court in *Berkeley Keep Jets Over the Bay Com.* held that the EIR was incomplete without a supplementary noise analysis. *Id.* Accordingly, the DEIR must analyze the impacts of single event noise on sleep, speech, stress and annoyance levels, and propose measures to mitigate those impacts.

3. The DEIR Fails to Adequately Analyze Nighttime Noise Impacts.

0044-213

Noise can be far more intrusive during the evening and nighttime hours, when ambient noise levels are at their lowest and when sensitive receptors are sleeping. Since the surrounding area is quieter at these times, the masking effect of other noise does not screen the noise. This phenomenon is especially prevalent in rural areas of Kern County, where the measured nighttime hourly noise level is as low as 25 dB. Exhibit Noise 2 at 3. The DEIR should have taken into account this higher sensitivity to noise and evaluated how the increase in noise from the Project, including truck trips and construction activities, would affect receptors during these sensitive time periods. As the Salter Report explains, even assuming the proposed mitigation is effective, the Project would still result in increases of over 35 dB over existing nighttime hourly ambient noise levels. Exhibit Noise 2 at 3-4. The County must correct this deficiency.

4. The DEIR Fails to Analyze Impacts to Interior Noise Levels.

0044-214

The DEIR also improperly omits analysis of noise impacts on interior noise levels. Although the Kern County General Plan Noise Element establishes an interior noise standard of 45 dB or less for sensitive receptors, DEIR at 4.12-8, -9, -12, the DEIR provides no indication of whether the Project's noise impacts will meet or exceed this standard. This is a key omission. As the Salter Report explains, residential facades with open windows can be expected to reduce sound only by 12 to 15 dB. Exhibit Noise 2 at 6. The County only attempts to mitigate sensitive receptors' exposure to exterior sound

levels above 65 dB. Therefore, interior sound levels may reach up to 50 dB, well in excess of the County's 45 dB interior noise standard. Exhibit Noise 2 at 6. The DEIR must evaluate the Project's effect on interior noise levels and identify appropriate mitigation.

0044-214
Continued

5. The DEIR Ignores Its Own Thresholds of Significance for Vibration Impacts.

0044-215

The DEIR's analysis of vibration impacts is also flawed. The DEIR establishes a threshold of significance for vibration from the Project, but completely ignores this threshold when analyzing the Project's impacts. DEIR at 4.12-23 to -25.

0044-216

The Project will result in groundborne vibration from construction activities and geophysical surveys during oil and gas exploration, which could affect buildings, businesses, or other sensitive receptors. DEIR at 4.12-23. These activities include detonating blast charges underground (the "shothole method") and intentionally generating ground vibration from truck-mounted units ("vibroseis"). *Id*. These latter two activities will result in "typical" vibration levels that will exceed the state guidelines for vibration annoyance and damage potential criteria. *Compare* DEIR at 4.12-24 (Table 4.12-10) *with* DEIR at 4.12-8 (Tables 4.12-5 and 4.12-6). For example, Table 4.12-10 discloses that a 13.2 lb shothole charge will result in groundborne vibration of more than 2.25 PPV at 100 feet, which exceeds the state guidelines' threshold of 2.0 PPV for "severe" annoyance potential and damage to modern industrial/commercial buildings. *Id.* Nonetheless, the DEIR finds, surprisingly, that no mitigation is required, and that impacts will not be significant. DEIR at 4.12-25.

No evidence supports the above conclusion. The DEIR suggests (but does not require) that operators will not set charges less than 300 feet away from structures. DEIR at 4.12-24 (noting that "operators generally follow" U.S. Dep't of Interior's Blasting Guidance Manual, and that "operators generally set charges at least 300 feet from water wells and engineered structures unassociated with oil and gas development.") This suggestion is no substitute for enforceable mitigation, and does nothing to ensure that nearby residents and property owners are actually protected from vibrational effects. *See* Pub. Res. Code § 21081.6(b); CEQA Guidelines § 15126.4(a) ("Mitigation measures must be fully enforceable through permit conditions, agreements, or legally binding instruments."). And, even at 300 feet, some types of shothole blasting would be distinctly perceptible and could cause damage to fragile buildings. *Compare* DEIR at 4.12-24 (Table 4.12-10) *with* DEIR at 4.12-8 (Tables 4.12-5 and 4.12-6); *see* Exhibit Noise 2 at 6.

0044-216
Continued

By ignoring the thresholds of annoyance and damage and dismissively concluding that the Project's vibration impacts will be less than significant without mitigation, the DEIR violates CEQA.

0044-217

6. The DEIR's Proposed Mitigation for Noise Impacts Is Inadequate.

The DEIR provides insufficient evidence to conclude that the mitigation measures proposed for the Project will actually reduce its noise impacts to a less than significant level. Accordingly, sensitive receptors in the County will be exposed to significant noise impacts that could have been avoided or reduced. As explained above, the DEIR uses the incorrect baseline for analyzing the Project's noise impacts. Consequently, the proposed mitigation measures do not even attempt to mitigate for significant impacts to sensitive receptors that nonetheless fall outside the 65 dB CNEL contour. Exhibit Noise 2 at 3-5. Thus, there is no basis for the DEIR to conclude that reliance on these measures will mitigate impacts 4.12-3 and 4.12-4 (permanent or temporary substantial increase in ambient noise levels) to less than significant levels. *Id.*

What's more, the noise consultant hired by the County for the Project determined the "minimum distances between the activity and a noise-sensitive use that must be achieved so that applicable thresholds of significance will not be exceeded." Noise Technical Report at 17. These distances, which are summarized in the Table X of the Noise Technical Report (*id.*), should form the basis for concrete setback requirements included as mitigation in the DEIR. Yet instead of adopting these distances as setbacks, which would ensure that all activities meet the 65 dB CNEL noise standard, the County largely ignores them. The only true setback proposed is 190 feet—far shorter than the distances listed in column 2 of Table X.[7] To satisfy CEQA's requirements, the County must propose concrete, enforceable mitigation, including effective setbacks, to reduce the Project's significant noise impacts.

[7] Only the 55 dB setback distances, identified in column 2 of Table X, can ensure compliance with the 65 CNEL standard. Noise Technical Report at 17 ("The 60 dB contour also correlates to the distance where the activity could exceed the County's 65 dB DNL exterior noise levels standard. It is noted that compliance with the County's 65 DNL threshold of significance is assured only if the hourly thresholds described above (50 dB and 55 dB) are not exceeded.").

Finally, the DEIR proposes that applicants "[a]rrang[e] for the voluntary, temporary relocation of the occupants of the sensitive receptor during the construction period." This proposed mitigation should be removed as it is not feasible to assume that residents within 3,000 feet of a construction site could be relocated from their homes for an undefined length of time, and possibly numerous times over the life of the Project.

0044-217
Continued

F. The DEIR Does Not Adequately Analyze or Mitigate the Project's Transportation and Traffic Impacts.

0044-218

The DEIR's analysis of Project-related traffic impacts contains numerous deficiencies that must be remedied in order for the public and decision-makers to fully understand the Project's impacts. These flaws stem from the DEIR's failure to properly describe the Project or the location of current and projected Project activities. Additionally, the DEIR's analysis of traffic impacts is incomplete and confusing, making it impossible to determine whether the analysis is valid.

0044-219

Specifically, the evaluation of the Project's transportation and traffic impacts: (1) uses a level of service ("LOS") analysis that fails to identify the extent and severity of significant impacts; (2) relies on unsubstantiated assumptions; (3) relies on inappropriate methods and erroneous data; (4) fails to identify and mitigate significant impacts; (5) fails to consider the safety effects of truck traffic; (6) provides a deficient safety analysis; (7) fails to adequately analyze impacts to pedestrians and bicyclists; and (8) provides a deficient analysis of the Project's impacts on emergency access. These issues are discussed in greater detail in the Letter from Neal Liddicoat, MRO Engineers, to Carmen Borg, September 8, 2015 ("MRO Report"), attached as Exhibit Trans 1. Rather than reiterate all of the points in the MRO Report, we summarize the main points below.

0044-220

0044-221

In addition to the above deficiencies, we note a critical, over-arching flaw in the DEIR. The transportation analysis in the DEIR is based on information presented in the March 2015 traffic and transportation impact report prepared by Ruettgers & Schuler Civil Engineers ("R&S Report"), which is provided as DEIR Appendix W. Remarkably, however, the DEIR itself includes very little of the R&S Report's analysis. Additionally, the DEIR's graphs of the traffic volumes evaluated are illegible. Exhibit Trans 1 at 5. The DEIR thus fails to provide sufficient documentation to allow for an independent assessment of its traffic analysis. *See* Exhibit Trans 1.

This confused approach to environmental review does not meet CEQA's minimum requirements. California courts require that an agency's analysis be presented

0044-221
Continued

in the EIR. *See Santa Clarita Organization for Planning the Environment v. County of L.A.* (2003) 106 Cal.App.4th 715, 722 (agency's analysis must be contained in the EIR, not "scattered here and there in EIR appendices"). Decision-makers and the general public should not be forced to sift through obscure minutiae or appendices in order to ferret out the fundamental assumptions that are being used for purposes of the environmental analysis. *County of Merced*, 149 Cal.App.4th at 659; *see also Vineyard Area Citizens for Responsible Growth, Inc.,* 40 Cal.4th at 442 ("The data in an EIR must not only be sufficient in quantity, it must be presented in a manner calculated to adequately inform the public and decision makers, who may not be previously familiar with the details of the project."). Because only select portions of the analysis actually appear in the DEIR, and because the report itself cannot be understood by a layperson and contains errors, the DEIR fails in its role as a public informational document.

0044-222

1. The DEIR's Analysis of Level of Service Fails to Describe the Extent and Severity of Significant Impacts.

The DEIR appears not to have analyzed "existing plus project" traffic conditions. Typically, a traffic analysis provides intersection and roadway segment LOS results for multiple scenarios including: existing conditions; existing plus project conditions; cumulative no project conditions; and cumulative plus project conditions. This information allows the public and decision-makers to understand the magnitude of the project's incremental impact on traffic operations under each condition. But, as the MRO Report explains, the DEIR appears not to have analyzed the "existing plus project" traffic conditions, or to have analyzed them without presenting the data as part of the DEIR. Exhibit Trans 1 at 2-3. Neither the DEIR nor the R&S Report explains what analysis *was* performed. Exhibit Trans 1 at 2.

The DEIR presents tables of intersection and roadway segment impacts and mitigation measures, but these tables do not include "existing plus project conditions." R&S Report at 80-92. Moreover, the DEIR provides limited additional information. For example, the DEIR indicates that impacts at certain intersections and roadway segments would be significant simply by designating the impacts with an "x". But by omitting existing level of service values, the DEIR makes it impossible to gauge the extent and severity of the Project's impacts on intersection and roadway operations. See DEIR Table 4.16-12 at 4.16-46.

The DEIR's analysis of traffic impacts is also inadequate. It indicates that several signal-controlled intersections will have an *improved* LOS after the addition of Project traffic under 2035 conditions. Exhibit Trans 1 at 9; R&S Report Tables 2 and 3 at

4.16-42 to 4.16-45. Although it is occasionally possible for an intersection with no signals to experience reduced delays with additional traffic, the same is not true of signal-controlled intersections. Exhibit Trans 1 at 10. The LOS calculations are therefore erroneous.

0044-222
Continued

The DEIR's failure to provide the detailed delay and LOS results for the key "Existing plus Project" scenario conceals the Project's incremental impact on traffic operations. One of the "basic purposes" of CEQA is to "[i]nform governmental decision makers and the public about the potential, significant environmental effects of proposed activities". CEQA Guidelines § 15002(a)(1). CEQA additionally requires "adequacy, completeness, and a good-faith effort at full disclosure" in an EIR. *Id*. § 15003(i). The DEIR's analysis of the Project's traffic impacts fails to meet these standards.

2. The DEIR's Traffic Analysis Relies on Unsubstantiated Assumptions.

0044-223

The DEIR's traffic analysis is further flawed because it relies on a number of unsubstantiated assumptions. Exhibit Trans 1 at 2-5. The DEIR bases its trip generation estimates on suspect assumptions, calling into question whether they provide a reasonable, conservative estimate of Project-related traffic. Exhibit Trans 1 at 3. For example, in several cases, the DEIR describes a range of potential assumptions associated with a particular activity or operation. In those cases, a conservative estimate would require use of the highest assumption. Instead, the DEIR uses values near the midpoint of the range. Exhibit Trans 1. The County may not cherry-pick its data in this manner. As explained in the MRO Report, because the DEIR provides none of the data used to derive the assumed values used in the analysis, it is impossible to judge whether these values are appropriate. *Id*.

Similarly, the DEIR relies on questionable traffic forecast assumptions. MRO Report at 6. Here too, the DEIR employs the mid-point of the available range of growth-rates of oil and gas activities where it may be inappropriate. The DEIR discloses that actual annual growth rates range from 0.72 percent to 0.81 percent (*id*.), but uses a growth rate of 0.76 percent. Nowhere does the DEIR justify its use of the mid-point range. Again, a conservative analysis would employ a value at or near the top end of the growth factor range.

In another example, the DEIR's estimate of Project trip generation assumes an average vehicle occupancy rate of 1.5 people per vehicle. Exhibit Trans 1 at 5. This rate is not based on any source commonly used for these types of estimates, such as the

0044-223
Continued

Federal Highway Administration, United States Census, or Caltrans. *Id*. These agencies have documented average vehicle occupancy rates ranging from 1.10 to 1.15. In comparison, the DEIR's occupancy rate of 1.5 is 30-35 percent higher than commonly used rates, resulting in estimated trips that are approximately 30 percent lower. The DEIR thus underestimates car and truck trips by thousands of trips. *Id*.

Traffic volumes are the most critical input parameter in evaluating LOS. If the traffic analysis uses inaccurate numbers, it will misrepresent the project impacts. Because the DEIR here uses questionable assumptions that likely underestimate future traffic impacts, it must be revised to either substantiate its assumptions and/or to reflect the corrected analysis. Moreover, as discussed further below, because traffic volumes inform the DEIR's analysis of air quality, noise, and greenhouse gas impacts, those analyses are compromised by the defective traffic analysis and must also be revised.

0044-224

3. The DEIR's Traffic Analysis Employs Inappropriate Methodology and Presents Erroneous Data.

The DEIR employs analytical methods that are unsuitable for a project of this type and scale. Specifically, the DEIR analyzes roadway segment LOS impacts using the volume/capacity ("V/C") ratio. *See* Exhibit Trans 1 at 12-14. This type of V/C analysis is typically used only in the most broad-brush planning analyses. The DEIR should use the more informative, state-of-the-art methodology for two-lane highways documented by the Highway Capacity Manual (Transportation Research Board, 2010). *Id*. The Highway Capacity Manual's prescribed method incorporates input parameters and procedures that reflect the actual physical characteristics of the roadway (e.g., shoulder width, terrain, hourly vehicle volume, etc.). Use of this method, which is industry standard, would yield a more accurate indication of operating conditions on two-lane highways throughout the County. *Id*. Because the County intends not to conduct CEQA review for future Project operations, its use of the overly simplistic V/C analysis is inappropriate.

The DEIR's traffic analysis also presents clearly erroneous information. For example, DEIR Table 4.16-17 presents information on the "Project % Share," which identifies the proportion of the total improvement cost attributed to the Project. Exhibit Trans 1 at 17-18; DEIR at 4.16-53 to 4.16-76. Although the R&S Report clearly indicated how these values are derived, several of the calculations contain errors, such as project-share values that exceed 100 percent.

0044-224
Continued

The Project-share figures also arbitrarily assign a 1.00 percent share to more than half of the roadway segments where the volume of project-related traffic is apparently unknown. Exhibit Trans 1 at 18. This approach is problematic because the non-primary and non-secondary roads to which this default share has been applied are most likely low-volume roads, where even a small volume of project traffic might represent a substantial percentage of the total of volume, in which case, the project's fair share would be significantly higher than 1.00 percent. *Id*. The result is that the DEIR provides misleading information about the magnitude of the project's impacts countywide.

0044-225

4. The DEIR's Traffic Analysis Fails to Identify and Adequately Mitigate Significant Impacts.

The DEIR establishes that the Project would result in a significant impact if Project traffic reduces the LOS to below standard D. DEIR at 4.16-45. The R&S Report reveals that several Project area intersections will meet this significance threshold. Exhibit Trans 1 at 10-11; R&S Report at Tables 2 and 3. Yet the DEIR does not identify these impacts as significant and thus fails to mitigate them.

The County's significance criteria for traffic impacts will allow most roadways in the County to operate at LOS F. DEIR at 4.16-45; Exhibit Trans 1 at 7. As explained in the MRO Report, LOS F is defined as the worst possible roadway system operation, representing a condition under which traffic demand exceeds the capacity of the intersection or roadway. For signal-controlled intersections, LOS F means that the average driver would be delayed for over 80 seconds. At a stop sign, a driver would be delayed for over 50 seconds. *Id*.

Yet, under the County's criteria, no matter how much congestion exists or how much intersection and traffic operations are impacted, they will still be defined as LOS F as there is no lower LOS category. Because it will be impossible to have an impact that is deemed significant, no form of mitigation will be identified and implemented. As a result, this policy will ensure the presence of substantial traffic congestion within the study area and could even result in the creation of hazardous conditions. Exhibit Trans 1 at 7.

Even where the DEIR does disclose significant intersection and roadway LOS impacts, it fails to provide adequate mitigation. Exhibit Trans 1 at 11. While the DEIR identifies "improvements needed" for each affected intersection and roadway (R&S Report at 80-92), the Project's mitigation program does not incorporate any of

0044-225
Continued

these improvements. Exhibit Trans 1 at 11. Consequently, none of the significant impacts on traffic are mitigated and traffic operations in the study area will deteriorate to unacceptable levels. Id. The DEIR must revise the analysis to identify all significant impacts and identify mitigation measures to fully address the impacts. See Pub. Res. Code § 21002 (lead agency must adopt all feasible mitigation measures that can substantially lessen a project's significant impacts).

0044-226

5. The DEIR's Safety Analysis Is Inadequate.

a. Traffic Safety

The DEIR's analysis of traffic safety conditions is inadequate and incomplete. A valid safety analysis must develop and compare accident rates, measured in collisions per million-vehicle-miles, for key roadway segments. The R&S Report discloses that "historical activity indicates that such issues (conflicts and accidents) may arise periodically," but it fails to include a complete assessment. R&S Report at 93. The R&S Report recommends a mitigation measure to address the identified impact, but the DEIR declines to incorporate this recommended mitigation. Exhibit Trans 1 at 18-19. The DEIR must be revised to include a detailed analysis of Project-related safety impacts and to identify and adopt needed mitigation measures.

0044-227

b. Truck Safety

The DEIR indicates that a substantial portion of Project-generated traffic will consist of heavy trucks. R&S Report at 79. Specifically, as much as ten percent of "oil and gas traffic" will consist of heavy trucks and over half of those will be trucks with four or more axles. *Id*. Nonetheless, the DEIR includes no discussion or analysis of auto-truck conflicts and the potential safety issues associated with mixing automobile traffic with a considerable amount of heavy vehicle traffic. This is a substantial deficiency in the DEIR. A revised EIR must correct this deficiency.

0044-228

c. At-Grade Railroad Crossing Safety

The Project area is served by both passenger and freight rail service, but the DEIR does not describe the amount of rail traffic passing through the study area. DEIR at 4.16-24; Exhibit Trans 1 at 19. With mainlines for two railroads passing through the area, it is likely that numerous at-grade crossings of streets and highways exist and each of those represents potentially hazardous conditions. As explained in the MRO Report, Project-generated traffic on area road systems will result in increased conflicts between

cars and trains. Exhibit Trans 1 at 18. The DEIR fails to evaluate the serious safety issues associated with at-grade rail crossings.

0044-228

0044-229

6. The DEIR Fails to Adequately Analyze Impacts to Pedestrians and Bicyclists.

The DEIR's thresholds of significance for impacts to pedestrian and bicycle facilities address the potential for the Project to "decrease the performance or safety of such facilities." DEIR at 4.16-45. However, the DEIR ignores Project elements that could lead to significant operational and safety-related impacts throughout the County as the Project is implemented. Under these circumstances, pedestrians and bicyclists are more likely to be exposed to unsafe conditions, as frustrated motorists become impatient and make poor decisions. The substantial increase in truck traffic associated with the Project will also increase safety risks for pedestrians and bicyclists. As the MRO Report points out, it is essential that the DEIR include a meaningful analysis of the Project's impacts on alternative modes of transportation. The DEIR contains no such analysis.

0044-230

7. The DEIR Fails to Adequately Analyze the Project's Impacts on Emergency Access.

The DEIR admits that implementing the Project could interfere with emergency access throughout the study area. DEIR at 4.16-80. It then relies on Mitigation Measure MM 4.16-2, which calls for the preparation of a Construction Traffic Control Plan, to reduce emergency access impacts to less than significant levels. *Id*. However, this mitigation measure only applies during the construction process. DEIR at 4.16-77. Consequently, it does not address impacts for the duration of the Project.

The County's significance criteria for traffic impacts will allow most roadways in the County to operate at LOS F. DEIR at 4.16-45; Exhibit Trans 1 at 6. As a result, the County's future roadways will not provide adequate emergency access. Roads operating at LOS F will be clogged with traffic, which will impede all traffic, including emergency vehicles, resulting in delays in emergency response times. Delays in response times can translate directly to patient fatalities. The DEIR ignores this significant impact, in violation of CEQA.

G. The DEIR's Analysis and Mitigation of Climate Change Impacts Are Inadequate.

0044-231

The DEIR's analysis of climate change impacts is seriously flawed. The law is clear that lead agencies must thoroughly evaluate a project's impacts on climate change under CEQA. *See Communities for a Better Env't v. City of Richmond* (2010) 184 Cal.App.4th 70, 89-91. In 2007, the state Legislature passed Senate Bill 97, which required the Governor's Office of Planning and Research to prepare guidelines "for the mitigation of greenhouse gas emissions or the effects of greenhouse gas emissions *as required by* [CEQA]. . . ." SB 97 (2007), codified as Public Resources Code § 21083.05 (emphasis added). Consistent with this mandate, the state Natural Resources Agency adopted revisions to the CEQA Guidelines that require lead agencies to determine the significance of a proposed project's greenhouse gas ("GHG") emissions. CEQA Guidelines § 15064.4. If an agency's analysis indicates that a proposed project will have a significant project-specific or cumulative impact on climate change, the agency must identify and adopt feasible mitigation measures to address this impact. CEQA Guidelines § 15126.4(c).

Reducing GHG emissions in order to minimize the harms from climate change is one of the most urgent challenges of our time. In recognition of this urgency, in 2005, Governor Schwarzenegger signed Executive Order S-3-05. The order established a long-term goal of reducing California's emissions to 80 percent below 1990 levels by 2050. The order also directed several state agencies (collectively known as the "Climate Action Team") to carry its goals forward. The following year, the Legislature enacted the Global Warming Solutions Act of 2006 ("AB 32"), codified at Health and Safety Code § 38500, *et seq*. By these authorities, California has committed to reducing emissions to 1990 levels by 2020, and to 80 percent below 1990 levels by 2050. Most recently, Governor Brown took further action to meet this challenge by issuing a new executive order, B-30-15. It sets an interim target of 40 percent below 1990 levels by the year 2030. This order, like EO S-3-05, is binding on state agencies.

Despite the scientific consensus, the potentially catastrophic impacts on the State, and California's well-founded commitment to reducing emissions, the DEIR's climate change analysis falls short. The Project will result in massive GHG emissions. The fossil fuel industry is Kern County's largest contributor of GHGs, accounting for 40 percent of the County's GHG emissions in 2012, the baseline year. DEIR 4.7-7 to -8. This represents nearly *two and a half times* the amount of emissions of the next leading

0044-231
Continued

sector. *Id.* As the DEIR acknowledges, the sector emitted over 16 $MMTCO_2e/yr$[8] in 2012. DEIR at 4.7-35. To put that number in perspective, it is the equivalent of the annual emissions from more than 3.5 million passenger cars driving on California's roadways. *See* California Air Resources Board, "Conversion of 1 MMT CO2 to Familiar Equivalents," October 29, 2007, attached as Exhibit GHG 1. By the County's own estimation, the number of operating wells will increase from 43,028 in 2012 to 82,136 in 2035. DEIR at 4.7-30. The DEIR acknowledges that this will result in a near-doubling of annual direct GHG emissions from the Project. *See* DEIR at 4.7-34 to -35 (Table 4.7-9 showing projected increase from 16.95 $MMTCO_2e$ annually in 2012 to 32.40 in 2035).

In spite of this huge increase in GHG emissions, the DEIR downplays the Project's effects. It fails to calculate emissions for the full duration of the Project or to provide an estimate of the Project's aggregate emissions, instead providing only annual emissions for the next 20 years. It then dismisses emissions from the biggest oil and gas GHG emitters who are subject to the Cap-and-Trade program, and fails to provide an accurate estimate of the emissions from other sources related to the Project. Thus, the DEIR fails to satisfy the most basic purpose of an EIR: to disclose to decision-makers and the public a project's significant environmental impacts. *See* Pub. Res. Code § 21061 ("The purpose of an environmental impact report is to provide public agencies and the public in general with detailed information about the effect that a proposed project is likely to have on the environment"). Finally, the DEIR does not identify effective, credible, and enforceable mitigation measures that will actually reduce or avoid the Project's contributions to climate change. As a result of these failings, the DEIR does not comply with CEQA.

1. The DEIR Fails to Account for All of the Project's GHG Emissions.

a. The DEIR Must Calculate Annual Greenhouse Gas Emissions From the Project Through at Least 2050 and It Must Calculate Aggregate Emissions.

The DEIR calculates annual GHG emissions from the Project only to the year 2035. DEIR at 4.7-35 (Table 4.7-9), 4.7-30. As a result, the document considers at

[8] This denotes million metric tons of Carbon Dioxide equivalent per year. Carbon Dioxide equivalent ("CO_2e") provides a universal standard of measurement against which the impacts of releasing different types of GHGs can be evaluated.

0044-231
Continued

most only 20 years' worth of emissions—a small fraction of the realistic lifetime of the Project, which will allow for the construction and operation of petroleum operations that will continue to emit long after 2035. This time horizon fails to provide the public with a meaningful assessment of the Project's long-term impacts. The DEIR should have analyzed GHG emissions at least through the year 2050, in order to determine if the Project is consistent with the long-term emissions reductions targets for climate stabilization articulated in EO S-3-05 and B-30-15. The statewide reduction goals set forth in EO S-3-05 and B-30-15 call for reducing emissions levels to 80 percent below 1990 levels by the year 2050. Accordingly, 2050 is the minimum appropriate planning horizon for analyzing annual emissions of a long-term project such as the proposed Kern rezoning.

The DEIR further understates the Project's GHG emissions because it does not calculate the Project's aggregate emissions. While annual emissions is an important metric, it does not tell the whole story here. This Project is not a single infrastructure or development project with a final construction completion date. Rather, it involves the ongoing issuance of entitlements to build petroleum extraction and refining infrastructure and facilities. These entitlements will be issued throughout the next 20 years. The DEIR states, for example, that it anticipates 4,083 new wells to be constructed in the County in 2035, the final year of the Project. DEIR 4.7-30. But facilities permitted in 2035 will continue to operate in 2036 and beyond. By simply analyzing annual emissions from permitted sources and cutting off its analysis after year 2035, the DEIR fails to capture the full magnitude of emissions from the Project. In other words, under the County's misleading approach, the later a facility is constructed, the smaller the portion of its actual lifetime cumulative emissions the DEIR considers. But the DEIR must reasonably calculate the *total* emissions for the expected life of every source that it anticipates will be built as part of the Project. Failure to do so is a violation of CEQA's mandate to consider all of the Project's potentially significant impacts. *Stanislaus Natural Heritage Project,* 48 Cal.App.4th at 195.

b. The DEIR May Not Dismiss Emissions from Facilities Subject to the Mandatory Reporting Regulation.

Industrial facilities emitting over 25,000 $MTCO_2e$/yr are included under California's AB 32 Cap-and-Trade program and are subject to mandatory reporting regulations ("MRR"). The EIR reasons that because this category of GHG-emitting sources is already "capped," all emissions from these sources are automatically mitigated to less-than-significant levels. DEIR at 4.7-23 ("the Cap-and-Trade program will fully mitigate any project emission increases for emissions included under the cap"). Thus, the

0044-231
Continued

DEIR essentially treats MRR permitted emissions as though they will not occur. This approach violates CEQA.

As a preliminary matter, AB 32's Cap-and-Trade program extends only to 2020; it does not cover emissions occurring later. 17 C.C.R. § 95840 (third and final compliance period ends Dec. 31, 2020). Even if the existence of the Cap-and-Trade program somehow excused mitigation of GHG emissions from MRR permitted sources (and it does not), the EIR utterly fails to analyze or mitigate for the impact of the emissions that will occur annually from 2020 throughout the life of the Project. An EIR must consider the pollution a project will generate over its entire lifespan. *Vineyard Area Citizens for Responsible Growth,* 40 Cal.4th at 431.

Additionally, the DEIR's dismissal of capped emissions cannot be squared with CEQA's requirements or purpose. The emissions generated by the Project's oil and gas facilities will still occur, and these emissions will still contribute to climate change, even if other entities in California reduce their emissions as a result of Cap-and-Trade permits. Consequently, under CEQA, the City must consider all of the Project's GHG emissions in evaluating whether the Project will have a significant effect on the environment. The Cap-and-Trade program created by AB 32 is wide-ranging; most of the state's GHG emissions come within its scope. If a lead agency could complete a CEQA "analysis" of GHG emissions by stating that project emissions are covered by the Cap-and-Trade program, climate change—the single largest environmental threat facing California—would be largely ignored by lead agencies in their CEQA analyses. The state and the public would be deprived of key environmental protections if lead agencies were not required to consider additional mechanisms for mitigating or avoiding GHG emissions.

Moreover, the DEIR's approach to emissions from these sources would render the amendments to the CEQA Guidelines regarding GHG analysis and mitigation (*e.g.*, CEQA Guidelines §§ 15064.4, 15126.4(c)) largely superfluous. Local agencies—arguably the best positioned to address the serious land use decisions necessary to fight climate change—would be excused from conducting any analysis of feasible project alternatives or mitigation measures in approving land use decisions. And future environmental review documents would fail to give decision-makers and the public accurate information about the Project's significant impacts on climate change. By establishing a Cap-and-Trade program, the proponents of AB 32 did not intend thus to eviscerate CEQA's power to require disclosure and mitigation of environmental harms.
