TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Instruction:
Disposition: Notice To Comply

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

REPORT: On 5/7/19 at 1115 hours, I arrived at the facility to conduct a compliance inspection. I met with Sean Elkin, Acting Manager (909) 793-3204, Benjamin Galaz, Maintenance Manager (909) 478-3108, who accompanied during the inspection. This facility is a manufacturing facility with 5 active permits, Rule 1168 applies. I observed the following during the inspection:

P/O: E04549 - PSB #1
7'H x 8'W x 6'T w/ 16 20" x 20" filters. Binks Mach 1SL HVLP,

P/O: E04550 - PSB #2
7'H x 8'W x 6'T w/ 16 20" x 20" filters. Binks Mach 1SL HVLP,

Both booths did not match the permit description and did not have the 16 20" x 20" filters (NC E48359).

P/O: E04551 - PSB #3
Removed from the facility

P/O: E02559 - PSB #4
Removed from the facility

The facility uses Applied Products, CFB 100, 0.02 pounds per gallon of volatile organic compound (VOC), was in compliance with the VOC limit per Rule 1168, 2.1 pounds per gallon. A MSDS was provided to demonstrate compliance.

There is a hot melt Henkel-34-728A they sometimes use to glue repairs - 0 VOCs per MSDS.
Mr. Galaz provided me with a printout of the material and VOC usage summary of the adhesive purchased in the last two years. The facility receives about 2,100 lbs. of adhesive every few months. The facility averages 30 lbs. of VOC emissions per year.

I departed the facility at 1215 hours.

Inspection Date: 09/27/2013
Instruction:
Disposition: Notice To Comply

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

REPORT: On 9/27/2013, from 0815-1000 hrs., I arrived at this facility and conducted an E/L inspection. I met with Steve Goodwin, Manager, 909 793-3204 x2245, who escorted me during my inspection and his staff. He has been at the facility for a few weeks. This is a manufacturing facility. The rules that apply are 1168.

E04549 - PSB #1 - 7'H x 8'W x 6'T w/ 16 20" x 20" filters. No thru-put limits. Binks Mach 1SL HVLP.

E04550 - PSB #2 - 7'H x 8'W x 6'T w/ 16 20" x 20" filters. No thru-put limits. Binks Mach 1SL HVLP.

E04551 - PSB #3 - Removed from the facility

E02559 - PSB #4 - Removed from the facility

R1168 - The adhesive used in the booths is still Applied Products, CFB 100, 0.02 pounds per gallon of volatile organic compound (VOC), was in compliance with the VOC limit per Rule 1168, 2.1 pounds per gallon. A MSDS was provided to demonstrate compliance.

R1168 - There is a hot melt Henkel-34-728A they sometimes use to glue repairs - 0 VOCs per MSDS.

Mr. Goodwin provided me with the computerized printouts of the material and VOC usage summary of the adhesive purchases for the most recent four years. The facility generally receives approximately 2,000 lbs of adhesive every couple of months. Their VOC records still show they are still less than 2.0 lbs. a month VOC emissions. The yearly average of VOC emissions was approximately 30 lbs.

I issued N/C E20966 under H/S 42303 for an updated MSDS for the WAX emulsion they sometimes use to slip covers on foam products. I received it a short time later and it showed .02 #/gal VOC. Lubricants are exempt and as such only apply to a facility VOC cap. In this case there are none.

REPORT: On 10/18/11, at 1021 hours, I arrived at LA-Z-Boy West (facility Id# 24248). The facility was located at 301 Tennessee Street in the City of Redlands. I met with Marcia Murillo, Safety Manager Environmental Health (909.793.3204; Marcia.murillo@la-z-boy.com).

I inspected the facility with the following results:

Spray Booth P/O E04549; spray booth "1"

[The spray booth was operating at the time of the inspection; manometer read 0.10" W.C., heard fan working]

1.The spray booth on site matched the description on the P/O;

2.A single exhaust filter was installed that completely covered the area that would be covered by 16 20" x 20" exhaust filters;

3.The gun, Binks Mach 1SL, was high volume low pressure (HVLP) and cleaned with water;

4.The adhesive, Applied Products, CFB 100, 0.02 pounds per gallon of volatile organic compound (VOC), was in compliance with the VOC limit per Rule 1168, 2.1 pounds per gallon. A MSDS was provided to verify compliance;

5.The monthly VOC emissions records were not available (NC E11909);

6.A copy of the P/O was posted by.

Spray Booth P/O E04550; spray booth "2"

[The spray booth was operating at the time of the inspection; manometer read 0.03" W.C., fan was on, loud operational sound]

1.The spray booth on site matched the description on the P/O;

2.A single exhaust filter was installed correctly;

3.The gun, Binks Mach 1SL, was HVLP and cleaned with water;

4.The adhesive, Applied Products, CFB 100, 0.02 pounds per gallon of VOC, was in compliance with the VOC limit per Rule 1168, 2.1 pounds per gallon. A MSDS was provided to demonstrate compliance;

5.The monthly VOC emissions records were not available (NC E11909);

[The spray booth had been removed from the facility]

Spray Booth P/O E02559

[The spray booth had been removed from the facility]

I was informed by Ms. Murillo that the facility kept the spray booth permits active in case the facility may want to install and operated the units on site again.

Ms. Murillo was new in her position (the Environmental Safety Mgr retired in the last year). She stated that she was unaware of the daily or monthly record keeping required by the operation of the spray booths (rule 109 record keeping requirements). I informed Ms. Murillo of AQMD Rules 1168 and 109. I also informed her that I would send her a sample record keeping form by email (along with the VOC calculations). I issued Notice to Comply (NC) E11909 to LA-Z-Boy West and personally served the notice to Ms. Murillo. The notice required that the facility provide the most recent two years of monthly VOC emissions records (she stated that she thought they had done some).

Ms. Murillo then provided me with a summary of the adhesive purchases for the most recent two years. The facility generally receives approximately 2,000 lbs of adhesive every couple of months.

I departed the facility at 1110 hours.

A. Sanders 10/18/11

Reviewed by Paolo Longoni, 11/04/11

On 10/31/11, at 1742 hours, Ms. Murillo sent me an email providing the VOC emissions records that she found (records left before the previous environmental manager retired). I noticed that the records were provided from 2009 until May 2010. I emailed Ms. Murillo and left her a voicemail informing her that I needed to review all VOC emissions records kept until the date of my inspection.

On 11/04/11, Ms. Murillo called and left me a voicemail. She asked for assistance in learning how to calculate VOC emissions. I called her back and left her a voicemail that explained how to do so.

On 11/07/11, Ms. Murillo sent me an email that contained the rest of the VOC emissions records. Upon reviewing the records I found that the facility had monthly VOC emissions of less than 2.0 lbs. The yearly average of VOC emissions was approximately 30 lbs.

The facility was in compliance.

REPORT: The facility has four active Permit to Operate (P/O) for four adhesive spray booths (spray booths).

I arrived at the facility on 08/06/09 at 10:00 hrs to conduct an annual facility compliance inspection.

I met Tom Eder. Facilities/Continuous Improvement Portfolio Manager, (909) 793-3204 ext. 2304. who accompanied me on the facility inspection.

I inspected the facility with the following results:

Spray Booth P/O E04549

[The spray booth was not operating at the time of the inspection]

1.The spray booth on site matched the description on the P/O;

2.A single exhaust filter was installed that partially covered the area that would be covered by 16 20" x 20" exhaust filters (I asked Mr. Eder to increase the single exhaust filter);

3.The gun, Binks Mach 1SL, was high volume low pressure (HVLP) and cleaned with water;

4.The adhesive, Applied Products, CFB 100, 0.02 pounds per gallon of volatile organic compound (VOC), was in compliance with the VOC limit per Rule 1168, 2.1 pounds per gallon;

5.The monthly VOC emissions records showed less than 2 pounds emitted in any one month during the 2008 and 2009 calendar years;

6.A copy of the P/O was posted by.

Spray Booth P/O E04550

[The spray booth was not operating at the time of the inspection]

1.The spray booth on site matched the description on the P/O;

2.A single exhaust filter was installed;

3.The gun, Binks Mach 1SL, was HVLP and cleaned with water;

4.The adhesive, Applied Products, CFB 100, 0.02 pounds per gallon of VOC, was in compliance with the VOC limit per Rule 1168, 2.1 pounds per gallon;

REPORT: On 07-18-08 I arrived at LA-Z-Boy west to conduct a follow up inspection. I met with Tom Eder and James McHenry, Safety/Quality Managers. Mr. Eder escorted me to the spray booths and showed me the permits posted on the equipment. Mr. McHenry provided the MSDS sheets with the VOC content. Mr. Eder provided the monthly amount of glue being sprayed in the spray booths and I showed Mr. Eder and Mr. McHenry how to calculate the emissions of VOC from the information they provided. Mr. McHenry informed me that he would go back through the records and calculate all the emissions today now that they knew how to do it.

Notifications can not be accepted without the required fee (Rule 301). Asbestos removals of less than 100 square feet are exempt from notification and fees. Please make checks payable to "SCAQMD". Fees are per notification, not refundable, and vary according to the project size. Fees are as follows:

PROJECT SIZE in square feet		DEMOLITION OR REMOVAL		ADDITIONAL SERVICE CHARGES
1,000 or less	X	$ 53.15	X	Special Handling Fee ---- $ 53.15
1,001 to 5,000		$ 162.49		Revision to Notification- - $ 53.15
5,001 to 10,000		$ 380.33		Returned Check Fee --- - $ 25.00
10,001 to 50,000		$ 596.38		Planned Renovation ---- - $ 596.38
50,001 to 100,000		$ 864.30		Procedure 4 or 5 Plan----$ 596.38
100,001 or more		$ 1,440.49		Expedited 4 or 5 Plan.....$ 298.19

ATTENTION: Keep a copy of your notification. State law requires that you provide a copy of the demolition notification to Building and Safety before issuance of a demolition permit. For questions call 909-396-2336. Please mail the form and fee to AQMD. Mailing saves time, money and reduces traffic and air pollution

Re: Self Report of Non-Compliance with Asbestos Pre-Removal Notification Requirement

Gentlemen:

This letter is provided to report a non-compliance matter at our Redlands, California facility, which was recently discovered through our internal voluntary corporate-wide compliance reviews ("self-audits"). We wish to report this matter and request your consideration of appropriate handling of it pursuant to applicable law, policy and procedures, including the self-audit and self-reporting provisions.

Briefly, in November 2010, old carpet was removed and replaced with new carpet in an office of 308 square feet at the La-Z-Boy West facility at 301 Tennessee Street in Redlands. The work was done one evening by the outside carpet installer the facility has used before. The installer ("Top Gun Enterprises") is not a licensed asbestos contractor, nor did they ever hold themselves out as such (Top Gun business card copied in Attachment A). La-Z-Boy did not seek out an asbestos licensed contractor because none of the personnel involved with planning or oversight of the work was presently cognizant that there might be 9" tiles under the old carpet. Other areas in the building that were re-carpeted in recent years/decades had the old carpet directly on the concrete slab floor, and the old carpet in this room had covered the tiles a long time ago.

Top Gun did not begin the tear out until the La-Z-Boy office staff had left for the day. When La-Z-Boy personnel arrived in the morning, they found the old carpet and 9" tile attached to it staged for disposal but still present. Upon contacting Top Gun to ask why they had not disposed of the materials, Top Gun indicated that the 9" tiles might contain asbestos and that they were not qualified to dispose of it. La-Z-Boy personnel then arranged for disposal of the carpet and tile in three 55 gallon drums, disposal being handled by Heritage, a licensed asbestos disposal company (see Attachment B).

Rod A. Miller, P.E., Director of Environmental Affairs for La-Z-Boy Incorporated, identified the disposal manifests in the course of his routine internal compliance reviews. Upon his further inquiry, he learned that although none of the Redlands La-Z-Boy personnel could identify the extent of the surface area where 9" tiles had been present under the carpet (no La-Z-Boy personnel had seen the tiles until arriving in the morning by which time the floor was recovered with the new carpet and the old carpet and tile remained on the job site). Therefore, he requested to be advised as to the dimensions of the entire office area re-carpeted, and was advised by Redlands personnel on March 8, 2011 that the total floor area of the entire office was 308 sq. feet.

La-Z-Boy Incorporated
P.O. Box 8880
301 Tennessee St
Redlands, CA 92375-2080

P 909.793.3204
F 909.793.3671

www.lazboy.com

Recognizing that this may have been a noncompliance, he informed La-Z-Boy corporate legal counsel and together they contacted outside legal counsel for the company to assist in determining if there had been a violation of any applicable requirements. Since the untested 9" tile would be, under applicable law, presumed to be asbestos containing material, and since the area of the work may well have exceeded the square footage standard for notification and other requirements, La-Z-Boy has determined that it should be reported to you in accordance with La-Z-Boy's policies.

We have tried to anticipate questions and concerns that SCAQD may have, and want to provide information responsive to them. In terms of exposures, we note that the office area was re-carpeted and all adjacent areas were unoccupied at the time of the removal, since the work was done in one evening after business hours. Also, our personnel who encountered the carpet and tiles in the morning and followed up in terms of arranging for disposal by Heritage (who had been recommended by our regular recycler), observed that to the best of his recollection it appears that all of the tile came up with the carpet without being broken or crumbled. The tile remained adhered to the underside of the carpet except in those areas where the carpet was folded or cut. In those areas the tiles either had remained intact or had released from the carpet on one side of the fold without breaking, or where cut, it appeared that TGE had cut the carpet along lines matching the tile lines with the result that the tiles were not broken or cut. The carpet and tiles were placed in 55-gallon drums for disposal. The renovated area was clean and free of dust in the morning when company personnel arrived.

To provide relevant data to you in an efficient format, we have completed the forms that would have been appropriate to use for notification (Attachment C). We recognize that we are not a licensed asbestos contractor and do not imply such by use of the form to collect the information. Unfortunately, by the time the company became aware of the presence of the presumed asbestos, pre-removal notification had become moot. In dealing with the situation as they found it the next morning, our Redlands personnel recognized that the PACM required proper disposal. Unfortunately, they did not recognize that a report should also be made as to the accidental noncompliance with the advance notification requirement.

To further the goal of preventing any similar recurrences of an asbestos requirement being overlooked in the future, the following actions have been undertaken or are in process:

1) Ensure that the top Redlands management re-emphasizes to the appropriate personnel who are involved with any renovation or demolition activities the identity of the asbestos program manager as indicated in the Redlands facility Asbestos Control Plan and the corporate Asbestos O&M Plan, and ensure the asbestos program manager is trained in and familiar therewith,

2) Promptly and expressly notify the Director of Environmental Affairs in the event any areas containing ACM or PACM are intended to be renovated (including projects where PACM may be uncovered), and obtain clearance from the local asbestos program manager (with any support or assistance needed from the corporate Director of Environmental Affairs as needed), and

La-Z-Boy Incorporated
P.O. Box 8880
301 Tennessee St.
Redlands, CA 92375-2080

P 909.793.3204
F 909.793.3671

www.lazboy.com

3) Require the personnel at Redlands who authorized the carpet work to review and become familiar with such materials regarding asbestos, the Asbestos Control and O&M Plan, and applicable legal requirements, as are designated by the Director of Environmental Affairs, and confirm their review and understanding of those materials of the General Manager of the Redlands facility and to the corporate Director of Environmental Affairs.

We also have considered whether there was any economic benefit from the noncompliance. We firmly believe that there was none and the prospect of such played no role in the oversight that lead to the violation. To further assure that no gain is involved, we are tendering to your office checks for the payment that would have been due with the notification had it been made, plus another check in the same amount, either as the payment that would have been due if a notice had been made along with a request to expedite the project. We believe there was no any economic benefit sought or gained or potentially gained from the noncompliance, or in any manner motivating it. Rather, the company fell out of compliance due a lack of foresight by Redlands personnel to anticipate that the PACM tiles might be under the carpet.

The Guidance further states (page 5, section 3) that a company should make full disclosure in writing to the agency "promptly" and that "promptly" generally means within "21 working days" of the discovery that a violation had occurred. The requirement for notification was identified when our corporate Director of Environmental Affairs first noticed an unfamiliar manifest and tracked it to the re-carpeting of an office that had a total floor area of 308 SF, exceeding the threshold for the notification. Twenty-one working days after that discovery would be April 6, 2011. Being a multi-facility company and needing to gather information in Redlands and obtain some interpretations, guidance and recommendations internally as well as from outside counsel in Michigan, and with our Director of Environmental Affairs also based in Michigan and not Redlands, we have sought to gather and submit the voluntary report as quickly as possible, and have done so in well under said "21 working days."

The Guidance refers to a record free of such for three years as a mitigating factor. Our internal review of this matter indicates that La-Z-Boy has no history of asbestos violations whatsoever.

We have attempted to anticipate and provide any information you would need in connection with this report. La-Z-Boy places a high priority upon legal and environmental compliance. We must hear acknowledge, however, that although the desire to be compliant was fully present, lack of sufficient foresight and perhaps of a fully adequate local knowledge of all of the asbestos program requirements, resulted in the noncompliance reported here.

If any further information is needed, I will be happy to supply it. Also the contact information for both our Corporate Director of Environmental Affairs and our outside environmental legal counsel, both of whom have assisted me in addressing this matter, are set forth below. They would also be happy to address any questions or provide any additional information needed.

Sincerely,

3. ULTAFILTRATION UNIT.

4. RINSE TANK, 5' - 8" L. X 3' - 6" W. X 1' - 6" H., WITH ONE PNEUMATIC PUMP RATED AT 30 GALLONS PER MINUTE.

Conditions:

1. OPERATION OF THIS EQUIPMENT MUST BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT MUST BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. THE TOTAL QUANITY OF RESIN (SOLIDS) ADDED TO THIS TANK MUST NOT EXCEED 10 GALLONS IN ANY ONE DAY.

4. ONCE PER YEAR THIS TANK MAY BE DRAINED FOR MAINTENANCE PURPOSES AND FULLY RE-CHARGED.

5. THIS EQUIPMENT MUST BE OPERATED IN COMPLIANCE WITH RULE 1107 .

6. THE OPERATOR SHALL KEEP ADEQUATE RECORDS TO VERIFY DAILY USAGE AND DAILY VOLATILE ORGANIC COMPOUNDS (VOC) EMISSIONS IN A MANNER APPROVED BY THE DIRECTOR OF ENFORCEMENT IN WRITING. SUCH RECORDS SHALL BE RETAINED FOR A PERIOD OF TWO YEARS AND BE MADE AVAILABLE UPON REQUEST OF THE EXECUTIVE OFFICER OR HIS REPRESENTATIVE.

HAYWARD, CA 94545-1155

Equipment Location: 301 TENNESSEE ST, MAIN BUILDING, REDLANDS, CA 92373-8125

Equipment Description :

Sub-Slab Depressurization System (Main Building), primarily for mitigating Halogenated Hydrocarbon Intrusion, consisting of:

1. Subsystem No.1 consisting of:

   A. Suction pits, and riser pipes.

   B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

   C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

2. Subsystem No.2 consisting of:

   A. Suction pits, and riser pipes.

   B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

   C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

3. Subsystem No.3 consisting of:

   A. Suction pits, and riser pipes.

   B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

   C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

4. Subsystem No.4 consisting of:

   A. Suction pits, and riser pipes.

   B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

   C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

5. Subsystem No.5 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

6. Subsystem No.6 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

7. Subsystem No.7 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

8. Subsystem No.8 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

9. Subsystem No.9 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

10. Subsystem No.10 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

19. Subsystem No.19 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

20. Subsystem No.20 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

21. Subsystem No.21 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

22. Subsystem No.22 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

23. Subsystem No.23 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

24. Subsystem No.24 consisting of:

A. Suction pits, and riser pipes.

FILE COPY

B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

25. Subsystem No.25 consisting of:

A. Suction pits, and riser pipes.

B. Inline Fan, Fantech RN4, or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

Conditions :

1. Operation of this equipment shall be conducted in accordance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.

2. This equipment shall be properly maintained and kept in good operating condition at all times.

3. A flow indicator shall be installed and maintained in all Sub-Slab Depressurization (SSD) Subsystems to indicate the air flow rate in standard cubic feet per minute (SCFM) through each SSD subsystem, and to calculate the total air flow rate through all SSD subsystems. The total flow rate shall not exceed 1000 SCFM.

   If a pressure sensing device is used in place of the flow indicator, a conversion chart shall be made available to indicate the corresponding flow rate, in SCFM to the pressure reading. The flow rate shall be measured and recorded on each monitoring visit while the system is operating.

4. Upon system startup, the concentration of Total Volatile Organic Compounds (VOC) as Hexane shall be:

   A. Measured each day during the first week of operation, at the Exhaust Stack of each Sub-Slab Depressurization Sub-system.

   B. The concentration shall be measured using a Photo Ionization Detector (PID) or an South Coast AQMD approved Organic Vapor Analyzer (OVA) calibrated in parts per million by volume of Hexane (if another calibrating agent is used, it shall be correlated to ad expressed as Hexane). Calibration shall be performed with each monitoring visit. The analyzer shall be measured and calibrated per EPA Method 21.

5. The concentration of Carcinogenic Air Contaminants in the exhaust stack of each Sub-Slab Depressurization Sub-system shall not exceed the following emission limits:

Compounds	Permit Limit (PPMV)
1,1-Dichloroethane	0.1
1,2-Dichloroethane	0.1
Benzene	0.1
Carbon Tetrachloride	0.1
Chloroform	0.1

p-Dichlorobenzene (1,4-Dichlorobenzene)	0.1
Naphthalene	0.1
Perchloroethylene (PCE)	0.4
Trichloroethylene (TCE)	0.1

6. Samples shall be collected and analyzed at least once every calendar week of operation for the first five weeks of operation, and once per month for the first three months, and quarterly thereafter, for total volatile organic compounds and speciated for: 1,1-Dichloroethane; 1,2-Dichloroethane; Benzene; Carbon Tetrachloride; Chloroform; p-Dichlorobenzene (1,4-Dichlorobenzene); Naphthalene; Perchloroethylene (PCE) and Trichloroethylene (TCE) as follows:

   A. Bag or Canister samples shall be collected at the exhaust stack of each Sub-Slab Depressurization Subsystem.

   B. Sampling and analysis for the initial sampling event shall be conducted by an independent laboratory per Rule 304.

   C. Sampling shall conform to CARB Mehod 422 or equivalent. Samples with high moisture shall be collected using an appropriate method such as South Coast AQMD Method 25.1/25.3 or other methods approved by the South Coast AQMD.

   D. Analysis shall be conducted using EPA Method TO-15 or other method(s) approved by South Coast AQMD. The laboratory analysis detection levels shall be lower than the concentration limits specified in the conditions of this permit.

7. The Vapors vented by this equipment shall not contain any Carcinogenic Air Contaminant as identified in Rule 1401 Risk Assessment Proceedures Attachment "N" version 8.1, except for 1,1-Dichloroethane; 1,2-Dichloroethane; Benzene; Carbon Tetrachloride; Chloroform; p-Dichlorobenzene (1,4-Dichlorobenzene); Naphthalene; Perchloroethylene (PCE) and Trichloroethylene (TCE).

8. The concentration of Total VOC in the exhaust stack of each Sub-Slab Depressurization Sub-System shall not exceed 10 ppmv as Hexane.

9. The operator shall submit to the South Coast AQMD in writing the results of the first six months of operating records, including but not limited to: Monitoring Data, Lab Analysis, and Flow Readings, to prove compliance with the conditions of this permit. The first report shall be submitted within 45 days of the start-up date and addressed to:

   South Coast AQMD
   Energy and Waste Management Unit, Engineering and Permitting
   21865 Copley Drive
   Diamond Bar, CA 91765-4178

The report shall include the equipment location, application number, permit number, and the sampling and analysis dates and results. Subsequent reports shall be submitted to the South Coast AQMD in writing within 30 days after the submittal of the previous report.

10. This permit to construct/operate shall expire if construction of this equipment is not completed within one year from the date of issuance of this permit unless an extension is granted by the South Coast AQMD.

11. The operator shall keep and maintain records to prove compliance with all the permit conditions of this permit. Individual records shall be retained on file for at least two years and made available to the Executive Officer or his representative upon request.

NOTICE

In accordance with Rule 206, this Permit to Operate or copy shall be posted on or within 8 meters of the equipment.

This permit does not authorize the emission of air contaminants in excess of those allowed by Division 26 of the Health and Safety Code of the State of California or the applicable Rules and Regulations of the South Coast Air Quality Management District (SCAQMD). This permit cannot be considered as permission to violate existing laws, ordinances, regulations or statutes of other government agencies.

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 98 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

23. Subsystem No.23 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

24. Subsystem No.24 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 40 SCFM flowrate.

FILE COPY

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

25. Subsystem No.25 consisting of:

A. Suction pits, and riser pipes.

B. Inline Fan, Fantech RN4, or equivalent, Maximum 40 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

Conditions :

1. Operation of this equipment shall be conducted in accordance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.

2. This equipment shall be properly maintained and kept in good operating condition at all times.

3. A flow indicator shall be installed and maintained in all Sub-Slab Depressurization (SSD) Subsystems to indicate the air flow rate in standard cubic feet per minute (SCFM) through each SSD subsystem, and to calculate the total air flow rate through all SSD subsystems. The total flow rate shall not exceed 1000 SCFM.

   If a pressure sensing device is used in place of the flow indicator, a conversion chart shall be made available to indicate the corresponding flow rate, in SCFM to the pressure reading. The flow rate shall be measured and recorded on each monitoring visit while the system is operating.

4. Upon system startup, the concentration of Total Volatile Organic Compounds (VOC) as Hexane shall be:

   A. Measured each day during the first week of operation, at the Exhaust Stack of each Sub-Slab Depressurization Sub-system.

   B. The concentration shall be measured using a Photo Ionization Detector (PID) or an South Coast AQMD approved Organic Vapor Analyzer (OVA) calibrated in parts per million by volume of Hexane (if another calibrating agent is used, it shall be correlated to ad expressed as Hexane). Calibration shall be performed with each monitoring visit. The analyzer shall be measured and calibrated per EPA Method 21.

5. The concentration of Carcinogenic Air Contaminants in the exhaust stack of each Sub-Slab Depressurization Sub-system shall not exceed the following emission limits:

Compounds	Permit Limit (PPMV)
1,1-Dichloroethane	0.1
1,2-Dichloroethane	0.1
Benzene	0.1
Carbon Tetrachloride	0.1
Chloroform	0.1
p-Dichlorobenzene (1,4-Dichlorobenzene)	0.1
Naphthalene	0.1

Perchloroethylene (PCE)	0.4
Trichloroethylene (TCE)	0.1

6. Samples shall be collected and analyzed at least once every calendar week of operation for the first five weeks of operation, and once per month for the first three months, and quarterly thereafter, for total volatile organic compounds and speciated for: 1,1-Dichloroethane; 1,2-Dichloroethane; Benzene; Carbon Tetrachloride; Chloroform; p-Dichlorobenzene (1,4-Dichlorobenzene); Naphthalene; Perchloroethylene (PCE) and Trichloroethylene (TCE) as follows:

   A. Bag or Canister samples shall be collected at the exhaust stack of each Sub-Slab Depressurization Subsystem.

   B. Sampling and analysis for the initial sampling event shall be conducted by an independent laboratory per Rule 304.

   C. Sampling shall conform to CARB Mehod 422 or equivalent. Samples with high moisture shall be collected using an appropriate method such as South Coast AQMD Method 25.1/25.3 or other methods approved by the South Coast AQMD.

   D. Analysis shall be conducted using EPA Method TO-15 or other method(s) approved by South Coast AQMD. The laboratory analysis detection levels shall be lower than the concentration limits specified in the conditions of this permit.

7. The Vapors vented by this equipment shall not contain any Carcinogenic Air Contaminant as identified in Rule 1401 Risk Assessment Proceedures Attachment "N" version 8.1, except for 1,1-Dichloroethane; 1,2-Dichloroethane; Benzene; Carbon Tetrachloride; Chloroform; p-Dichlorobenzene (1,4-Dichlorobenzene); Naphthalene; Perchloroethylene (PCE) and Trichloroethylene (TCE).

8. The concentration of Total VOC in the exhaust stack of each Sub-Slab Depressurization Sub-System shall not exceed 10 ppmv as Hexane.

9. The operator shall submit to the South Coast AQMD in writing the results of the first six months of operating records, including but not limited to: Monitoring Data, Lab Analysis, and Flow Readings, to prove compliance with the conditions of this permit. The first report shall be submitted within 45 days of the start-up date and addressed to:

   South Coast AQMD
   Energy and Waste Management Unit, Engineering and Permitting
   21865 Copley Drive
   Diamond Bar, CA 91765-4178

   The report shall include the equipment location, application number, permit number, and the sampling and analysis dates and results. Subsequent reports shall be submitted to the South Coast AQMD in writing within 30 days after the submittal of the previous report.

FILE COPY

10. This permit to construct/operate shall expire if construction of this equipment is not completed within one year from the date of issuance of this permit unless an extension is granted by the South Coast AQMD.

11. The operator shall keep and maintain records to prove compliance with all the permit conditions of this permit. Individual records shall be retained on file for at least two years and made available to the Executive Officer or his representative upon request.

12. Individual Subsystems of this Sub-slab Depressurization System, may be individually shutdown, or removed from service. If a Subsystem is removed from service all vacuum wells shall be capped or sealed to prevent emissions of Toxic Air Contaminants.

THIS PERMIT TO CONSTRUCT/OPERATE R-G61173 SUPERSEDES PERMIT TO CONSTRUCT/OPERATE G61173 ISSUED 3/31/2020

NOTICE

In accordance with Rule 206, this Permit to Operate or copy shall be posted on or within 8 meters of the equipment.

8. Subsystem No.8 consisting of:

   A. Suction pits, and riser pipes.

   B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

   C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

9. Subsystem No.9 consisting of:

   A. Suction pits, and riser pipes.

   B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

   C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

10. Subsystem No.10 consisting of:

    A. Suction pits, and riser pipes.

    B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

    C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

11. Subsystem No.11 consisting of:

    A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

12. Subsystem No.12 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

13. Subsystem No.13 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

14. Subsystem No.14 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

15. Subsystem No.15 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

16. Subsystem No.16 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

17. Subsystem No.17 consisting of:

A. Suction pits, and riser pipes.

B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

FILE COPY

18. Subsystem No.18 consisting of:

    A. Suction pits, and riser pipes.

    B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

    C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

19. Subsystem No.19 consisting of:

    A. Suction pits, and riser pipes.

    B. Extraction Blower, Obar, GBR76 UD or equivalent, Maximum 50 SCFM flowrate.

    C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

20. Subsystem No.20 consisting of:

    A. Suction pits, and riser pipes.

    B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 50 SCFM flowrate.

    C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

21. Subsystem No.21 consisting of:

    A. Suction pits, and riser pipes.

    B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 50 SCFM flowrate.

    C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

22. Subsystem No.22 consisting of:

    A. Suction pits, and riser pipes.

    B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 50 SCFM flowrate.

    C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

23. Subsystem No.23 consisting of:

    A. Suction pits, and riser pipes.

    B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 50 SCFM flowrate.

    C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

24. Subsystem No.24 consisting of:

    A. Suction pits, and riser pipes.

FILE COPY

B. Extraction Blower, Obar, GBR75 SOE or equivalent, Maximum 50 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

25. Subsystem No.25 consisting of:

A. Suction pits, and riser pipes.

B. Inline Fan, Fantech RN4, or equivalent, Maximum 50 SCFM flowrate.

C. Exhaust Stack, 3 inch I.D., with a vertical discharge of 20 feet above grade, without a rain cap.

Conditions :

1. Operation of this equipment shall be conducted in accordance with all data and specifications submitted with the application under which this permit is issued unless otherwise noted below.

2. This equipment shall be properly maintained and kept in good operating condition at all times.

3. A flow indicator shall be installed and maintained in all Sub-Slab Depressurization (SSD) Subsystems to indicate the air flow rate in standard cubic feet per minute (SCFM) through each SSD subsystem, and to calculate the total air flow rate through all SSD subsystems. The total flow rate shall not exceed 1250 SCFM.

   If a pressure sensing device is used in place of the flow indicator, a conversion chart shall be made available to indicate the corresponding flow rate, in SCFM to the pressure reading. The flow rate shall be measured and recorded on each monitoring visit while the system is operating.

4. Upon system startup, the concentration of Total Volatile Organic Compounds (VOC) as Hexane shall be:

   A. Measured each day during the first week of operation, at the Exhaust Stack of each Sub-Slab Depressurization Sub-system.

   B. The concentration shall be measured using a Photo Ionization Detector (PID) or an South Coast AQMD approved Organic Vapor Analyzer (OVA) calibrated in parts per million by volume of Hexane (if another calibrating agent is used, it shall be correlated to ad expressed as Hexane). Calibration shall be performed with each monitoring visit. The analyzer shall be measured and calibrated per EPA Method 21.

5. The concentration of Carcinogenic Air Contaminants in the exhaust stack of each Sub-Slab Depressurization Sub-system shall not exceed the following emission limits:

Compounds	Permit Limit (PPMV)
1,1-Dichloroethane	0.1
1,2-Dichloroethane	0.3
Benzene	0.1
Carbon Tetrachloride	0.1
Chloroform	0.1

FILE COPY

p-Dichlorobenzene (1,4-Dichlorobenzene)	0.1
Naphthalene	0.1
Perchloroethylene (PCE)	0.4
Trichloroethylene (TCE)	0.4

6. Samples shall be collected and analyzed at least once every calendar week of operation for the first five weeks of operation, and once per month for the first three months, and quarterly thereafter, for total volatile organic compounds and speciated for: 1,1-Dichloroethane; 1,2-Dichloroethane; Benzene; Carbon Tetrachloride; Chloroform; p-Dichlorobenzene (1,4-Dichlorobenzene); Naphthalene; Perchloroethylene (PCE) and Trichloroethylene (TCE) as follows:

   A. Bag or Canister samples shall be collected at the exhaust stack of each Sub-Slab Depressurization Subsystem.

   B. Sampling and analysis for the initial sampling event shall be conducted by an independent laboratory per Rule 304.

   C. Sampling shall conform to CARB Mehod 422 or equivalent. Samples with high moisture shall be collected using an appropriate method such as South Coast AQMD Method 25.1/25.3 or other methods approved by the South Coast AQMD.

   D. Analysis shall be conducted using EPA Method TO-15 or other method(s) approved by South Coast AQMD. The laboratory analysis detection levels shall be lower than the concentration limits specified in the conditions of this permit.

7. The Vapors vented by this equipment shall not contain any Carcinogenic Air Contaminant as identified in Rule 1401 Risk Assessment Proceedures Attachment "N" version 8.1, except for 1,1-Dichloroethane; 1,2-Dichloroethane; Benzene; Carbon Tetrachloride; Chloroform; p-Dichlorobenzene (1,4-Dichlorobenzene); Naphthalene; Perchloroethylene (PCE) and Trichloroethylene (TCE).

8. The concentration of Total VOC in the exhaust stack of each Sub-Slab Depressurization Sub-System shall not exceed 25 ppmv as Hexane.

9. The operator shall keep and maintain records to prove compliance with all the permit conditions of this permit. Individual records shall be retained on file for at least two years and made available to the Executive Officer or his representative upon request.

10. Individual Subsystems of this Sub-slab Depressurization System, may be individually shutdown, or removed from service, or vented to a carbon adsorber (Rule 219 exempt modification). If a Subsystem is removed from service all vacuum wells shall be capped or sealed to prevent emissions of Toxic Air Contaminants.

NOTICE

In accordance with Rule 206, this Permit to Operate or copy shall be posted on or within 8 meters of the equipment.

This permit does not authorize the emission of air contaminants in excess of those allowed by Division 26 of the Health and Safety Code of the State of California or the applicable Rules and Regulations of the South Coast Air Quality Management District (SCAQMD). This permit cannot be considered as permission to violate existing laws, ordinances, regulations or statutes of other government agencies.

Executive Officer

SPECIAL INSPECTORS REPORT

Bar

PROJECT	INDUSTRIAL BUILDING ADDITION
LOCATION	301 Tennesee, Redlands
OWNER	Lazy Boy West
PERMIT OR APPLICATION NO.	#8758
GENERAL CONTRACTOR	Robert H. Schuler
WORK INSPECTED:	Chord Bar Welding
WORK PERFORMED BY	Pete's Welding
FIELD HOURS:	TRAVEL TIME

No inspection will be done unless plans and specifications are available.

The following was noted:

PLANS AND SPECIFICATIONS BY: Terry Haden

DESCRIPTION OF WORK: Welding of chord bar connections on concrete titl-up panels for addition to existing industrial building. Riginal welding design was unable to get adequate weld at connections. The engineer approved an additional matching size bar welded to each chord bar connection

WELDER:: Peter VanKinkle - City of Los Angeles #F-1170

ELECTRODE: 8018 B-2

All work covered by this report has been satisfactorily completed, unless noted above, and conforms to the approved plans and specifications.

INSPECTION ACKNOWLEDGED BY _____

Building and Safety Department Permit

PERMIT NO 29282

NOTE: THIS FORMAT IS AS REQUIRED AND PRESCRIBED BY STATE LAW.

LICENSED CONTRACTORS DECLARATION

☑ I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class: B License Number 63871

Signature F.C. Burgeson Date 12-2-95

OWNER-BUILDER DECLARATION

☐ I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Sec. _____ B.& P.C. (Attach Certificate)

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Labor Code).

☐ Certified copy is hereby furnished. Policy # _____

☐ Certified copy is filed with the City. Company _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

This section need not be completed if the permit is for one hundred ($100) or less. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to Workers' Compensation Laws of California.

Date _____ Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

☐ I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than thirty-six (36) feet high. (Chap. 3.2. Grp. 2. Art 2. Section 341. Title 8. C.A.C.).

☐ As owner-builder, I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the division.

☐ Division of Industrial Safety Permit No. _____

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.)

Lender's Name _____

Lender's Address _____

CERTIFICATE OF COMPLIANCE AND AUTHORIZATION OF ENTRY

I certify that I have read this application and state that the information given is correct. I agree to comply with all state laws and City ordinances relating to building construction, and authorize a representative of the City of Redlands, Department of Building and Safety to enter upon the property for which I have applied for this permit for the purpose of making inspections.

Building and Safety Department Permit

PERMIT NO 22061

NOTE: THIS FORMAT IS AS REQUIRED AND PRESCRIBED BY STATE LAW.

LICENSED CONTRACTORS DECLARATION

☐ I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class: _____ License Number _____

Signature _____ Date _____

OWNER-BUILDER DECLARATION

☐ I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Sec. _____ B.&P.C. (Attach Certificate)

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Labor Code).

☐ Certified copy is hereby furnished. Policy # _____

☐ Certified copy is filed with the City. Company _____

Date: _____ Applicant: _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

This section need not be completed if the permit is for one hundred ($100) or less. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to Workers' Compensation Laws of California.

Date _____ Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

☐ I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than thirty-six (36) feet high. (Chap. 3.2, Grp. 2, Art 2, Section 341, Title 8, C.A.C.).

☐ As owner-builder, I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above, unless such person has a permit to do such work from the division.

☐ Division of Industrial Safety Permit No. _____

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lender's Address _____

CERTIFICATE OF COMPLIANCE AND AUTHORIZATION OF ENTRY

I certify that I have read this application and state that the information given is correct. I agree to comply with all state laws and City ordinances relating to building construction, and authorize a representative of the City of Redlands, Department of Building and Safety, to enter upon the property for which I have applied for this permit for the purpose of making inspections.

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5 of the Business and Professions Code: Any city or county that requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

_____ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. (Sec. 7044 Business and Professions Code: The Contractors' State License Law does not apply to an owner of property who builds or improves thereon, and who does the work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

_____ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors' State License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law).

_____ I am exempt under Sec. _____, B. & P. C. for this reason: _____

WORKERS COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

_____ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Sec. 3700 of the Labor Code, for the performance of the work for which this permit is issued.

X I have and will maintain workers' compensation insurance, as required by Sec. 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: Travelers - Agent: Risco Policy No.: DTJ-UB-5737P094-12

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

_____ I certify that, in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with these provisions.

Date: _____ Applicant: _____

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES OF UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

☐ I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descent will be made in connection with work authorized with this permit, and that no building structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than thirty-six (36) feet high. Chap. 3.2. GRP2. Art2. Section 341, Title 8,C.A.C.)

☐ As owner-builder, I will not employ anyone to do work which would require a permit for Division of Industrial Safety, as noted above, unless such person has a permit to do such work form the division.

☐ Division of Industrial Safety Permit No._____

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (Commencing with Sec. 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. Lic. Class: C-39 Lic. No: 8[illegible]

Date: 5/26/17 Contractor: Frank Deming

WORKERS COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

_____ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Sec. 3700 of the Labor Code, for the performance of the work for which this permit is issued.

✓ I have and will maintain workers' compensation insurance, as required by Sec. 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: STARR INDEMNITY & LIABILITY Policy No.: 1000001352

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

_____ I certify that, in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with these provisions.

Date: _____ Applicant: _____

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES OF UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

☐ I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descent will be made in connection with work authorized with this permit, and that no building structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than thirty-six (36) feet high. Chap. 3.2. GRP2. Art2. Section 341. Title 8.C.A.C.)

☐ As owner-builder, I will not employ anyone to do work which would require a permit for Division of Industrial Safety, as noted above, unless such person has a permit to do such work form the division.

☐ Division of Industrial Safety Permit No._____

Will the facility have any of the equipment or perform any of the operations or will the occupant(s) handle, store or use hazardous materials or a mixture containing a hazardous material equal to or greater than the amounts specified in the hazardous materials guide? YES_____ NO_____

If yes, Fire Department approval of a risk management plan is required prior to final occupancy approval and a clearance letter from the South Coast Air Quality Management District is required prior to issuance. See Health and Safety Code 25505, 25533, 25534, 42301 and Government Code Section 65850.2.

CONSTRUCTION LENDING AGENCY

_____ I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Section 8172, Civil Code).

Lender's Name: _____

Lender's Address: _____

CERTIFICATE OF COMPLIANCE AND AUTHORIZATION OF ENTRY

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of the City of Redlands to enter upon the above mentioned property for inspection purposes.

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5 of the Business and Professions Code: Any city or county that requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

_____ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. (Sec. 7044 Business and Professions Code: The Contractors' State License Law does not apply to an owner of property who builds or improves thereon, and who does the work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

_____ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors' State License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law).

Re: Lazy-Boy Building
Redlands, Ca.

Dear Sirs:

Questionable soils were encountered in three pad footing excavations at the South East corner of the building. My recommendations are to excavate down to firm soil, back fill with 18" of crushed rock, and pour a 12" concrete base, using 2000 psi. mix prior to pouring actual pads. The actual soil bearing on these pads is less than 1500 psf., and therefore this accommodation should be more than sufficient to insure the competency of the pad footings in bearing.

Thank you,

Leonard C. Knapp,
Engineer of Record

La-Z-Boy West
300 Tennessee Street
Redlands, California 92373

Attn: Courtney A. Leckler,
Vice President

Re: Zone 3, Redlands-Zanja

Gentlemen:

This office has received your letter of June 4, 1973, wherein you indicated that the Flood Control District, in cutting a road along the channel abutting your property on Tennessee Street, has caused a considerable amount of erosion to your property. You note your intent to install chain link fence on your property line and asked that the District undertake a filling of the area to permit this.

In going over this matter and in confirmation of discussions with District representatives, we find that the District has undertaken no excavation of a road or undercut your property. During the recent floods, water eroded the area out. The District, in restoring its channel and levees, has brought them back to design height which, by chance, is lower than the natural ground of your adjoining property. In view of these circumstances, there would appear to be no need on the part of the District to further fill the area.

However, we do recognize the problems that the recent floods have caused your property, and the difficulty of installing a fence along the immediate property line. It would appear that a practical solution on your part, could be a grading of the remaining bank to create an adequate slope accomodating fencing at the toe or top of the slope. Should you wish to undertake filling extending onto District property permitting a fence at the property line, we would be most pleased to work with you or your representatives to ascertain how much encroachment would be feasible to leave adequate access along the channel.

RECEIVED
JUL 20 1973
BUILDING & SURVEY
DEPARTMENT

Although, we do not feel that the District would be able to spend public funds toward the resolution of this problem, we have inquired as to the possibility of excess fill material being available from the nearby County Museum construction, and the possibility of its being made available to you. As of this date, they are unable to definitely ascertain when, or if, it will be available but, such may be possible depending on their further progress. Should such material become available, we would be pleased to work with you to cooperate in your problem.

Very truly yours,

W. A. SIDLER
Flood Control Engineer

Building and Safety Department Permit

PERMIT NO. RD*34454*BTI*

NOTE: THIS FORMAT IS AS REQUIRED AND PRESCRIBED BY STATE LAW

OWNER-BUILDER DECLARATION

☐ I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☒ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ , B. & P.C. for this reason _____

NOTE: THIS FORMAT IS AS REQUIRED AND PRESCRIBED BY STATE LAW

OWNER-BUILDER DECLARATION

☐ I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____, B. & P.C. for this reason _____

NOTE: THIS FORMAT IS AS REQUIRED AND PRESCRIBED BY STATE LAW

OWNER-BUILDER DECLARATION

☐ I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☑ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____, B. & P.C. for this reason _____

Date 11-15-99 Owner LA-Z-BOY

WILL THE APPLICANT OR FUTURE BUILDING OCCUPANT HANDLE A HAZARDOUS MATERIAL OR A MIXTURE CONTAINING A HAZARDOUS MATERIAL EQUAL OR GREATER THAN THE AMOUNTS SPECIFIED ON THE HAZARDOUS MATERIALS GUIDE? ☐ YES ☐ NO

WILL THE PROPOSED BUILDING BE WITHIN 1000 FEET OF THE OUTER BOUNDARY OF A SCHOOL? ☐ YES ☐ NO

IF "YES" TO ANY OF THE ABOVE, YOU MUST OBTAIN PROPER PERMITS FROM SOUTH COAST AIR QUALITY MANAGEMENT. IF AIR PERMITS ARE NOT REQUIRED, PROVIDE A WRITTEN STATEMENT FROM AIR QUALITY AGENCY.

IF "YES" TO ANY OF THE ABOVE CONTACT: SAN BERNARDINO COUNTY, DEPARTMENT OF ENVIRONMENTAL HEALTH SERVICES, 385 N. ARROWHEAD - FIRST FLOOR PUBLIC COUNTER, SAN BERNARDINO CA 92415-0160 - (909) 387-3044

CITY OF REDLANDS
Building and Safety Department Permit

PERMIT NO. RD*49923*BPC*

NOTE: THIS FORMAT IS AS REQUIRED AND PRESCRIBED BY STATE LAW

OWNER-BUILDER DECLARATION

☐ I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____, B. & P.C. for this reason _____

Date _____ Owner _____

WILL THE APPLICANT OR FUTURE BUILDING OCCUPANT HANDLE A HAZARDOUS MATERIAL OR A MIXTURE CONTAINING A HAZARDOUS MATERIAL EQUAL OR GREATER THAN THE AMOUNTS SPECIFIED ON THE HAZARDOUS MATERIALS GUIDE? ☐ YES ☐ NO

WILL THE PROPOSED BUILDING BE WITHIN 1000 FEET OF THE OUTER BOUNDARY OF A SCHOOL? ☐ YES ☐ NO

IF "YES" TO ANY OF THE ABOVE, YOU MUST OBTAIN PROPER PERMITS FROM SOUTH COAST AIR QUALITY MANAGEMENT. IF AIR PERMITS ARE NOT REQUIRED, PROVIDE A WRITTEN STATEMENT FROM AIR QUALITY AGENCY.

IF "YES" TO ANY OF THE ABOVE CONTACT: SAN BERNARDINO COUNTY, DEPARTMENT OF ENVIRONMENTAL HEALTH SERVICES, 385 N. ARROWHEAD - FIRST FLOOR PUBLIC COUNTER, SAN BERNARDINO CA 92415-0160 - (909) 387-3044

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5 of the Business and Professions Code: Any city or county that requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

_____ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. (Sec. 7044 Business and Professions Code: The Contractors' State License Law does not apply to an owner of property who builds or improves thereon, and who does the work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

_____ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors' State License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law).

_____ I am exempt under Sec. _____, B. & P. C. for this reason: _____

Date: _____ Owner: _____

WILL THE APPLICANT OR FUTURE BUILDING OCCUPANT HANDLE A HAZARDOUS MATERIAL OR A MIXTURE CONTAINING A HAZARDOUS MATERIAL EQUAL OR GREATER THAN THE AMOUNTS SPECIFIES ON THE HAZARDOUS MATERIALS GUIDE? YES_____ NO_____

WILL THE PROPOSED BUILDING BE WITHIN 1000 FEET OF THE OUTER BOUNDARY OF A SCHOOL? YES_____ NO_____

IF "YES" TO ANY OF THE ABOVE, YOU MUST OBTAIN PROPER PERMITS FROM SOUTH COAST ARE QUALITY MANAGEMENT. IF AIR PERMITS ARE NOT REQUIRED , PROVIDE A WRITTEN STATEMENT FROM AIR QUALITY AGENCY.

IF "YES" TO ANY OF THE ABOVE CONTACT: SAN BERARDINO COUNTY, DEPARTMENT OF ENVIRONMENTAL HEALTH SERVICES, 385 N. ARROWHEAD - FIRST FLOOR PUBLIC COUNTER, SAN BERNARDINO CA. 9245-0160 - (909) 387-3044.

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (Commencing with Sec. 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. Lic. Class: CA Lic. No.: 736345

Date: 1/22/14 Contractor: [signature]

WORKERS COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

_____ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Sec. 3700 of the Labor Code, for the performance of the work for which this permit is issued.

✓ I have and will maintain workers' compensation insurance, as required by Sec. 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: COMPANION INS Policy No.: CPCA17045

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

_____ I certify that, in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with these provisions.

Date: _____ Applicant: _____

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES OF UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

☐ I hereby certify that no excavation five (5) or more feet in depth into which a person is required to descent will be made in connection with work authorized with this permit, and that no building structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than thirty-six (36) feet high. Chap. 3.2. GRP2. Art2. Section 341, Title 8,C.A.C.)

☐ As owner-builder, I will not employ anyone to do work which would require a permit for Division of Industrial Safety, as noted above, unless such person has a permit to do such work form the division.

☐ Division of Industrial Safety Permit No._____

CONSTRUCTION LENDING AGENCY

_____ I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name: _____

Lender's Address: _____

CERTIFICATE OF COMPLIANCE AND AUTHORIZATION OF ENTRY

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of the City of Redlands to enter upon the above mentioned property for inspection purposes.

ALEX KIMM
360 KANSAS STREET
REDLANDS CA 92374

SUBJECT: UNDERGROUND STORAGE TANK REMOVAL AT 360 KANSAS STREET, REDLANDS, CALIFORNIA

The Department has received the sample results and/or closure report submitted by **Erickson Inc.** dated **June 29, 1995**.

After review of the reports prepared by you or your agent, it has been determined that the extent of contamination or lack thereof would indicate that no further investigation is warranted at this time.

It is important to note that this can not be construed as a release of liability for the site or declaration that the site is free from contamination. Should further projects or environmental investigations reveal additional contaminants on site you will be responsible and held liable for the investigation and remedial actions.

If you have any questions, please call (909) 387-3082.

CUPA COMPLIANCE INSPECTION REPORT

NAME: **LA-Z-BOY WEST** FACILITY ID: **FA0004349**

ADDRESS: **301 Tennessee St** CERS ID:**10041319**

CITY: **Redlands** STATE: **CA** ZIP CODE: **92373** INSPECTION DATE: **11/17/2017**

Inspector was given permission to: [X] photograph [X] inspect

Inspection Narrative (v020000)

An inspection was conducted on November 17, 2017 to determine compliance with hazardous materials and hazardous waste, laws and regulations. Consent to inspect and photograph granted by Darrell Mealer, EHS Manager. The facility escort was Darrell Mealer.

The facility is a furniture assembly center. The facility stores hazardous materials as a result of adhesive used in furniture assembly. The facility does not generate hazardous waste.

INVENTORY:
Hazardous materials inventory is consistent with 4/25/17 CERS submittal.

DOCUMENTATION REVIEW:
- Hazardous materials handler permit was obtained and expire August 31, 2018.
- Business Plan is established and last updated April 25, 2017. CERS ID: 10041319.
- EPA ID Number obtained. CAD005544465 was active.
- Hazardous waste disposal records and manifests were not available for review.
- Employee training is provided annually.
- Universal waste managed lawfully.

No violations observed during inspection.

Contact Jerry Nguyen at 909-386-8401 or JNguyen@sbcfire.org with questions regarding this inspection report.

The following lines marked in the V column are violations that must be corrected. Marked items in the N column require additional information to determine compliance.

SUPPLEMENTAL INSPECTION REPORT

INSPECTION DATE: 11.28.2011		
FACILITY ID 4349	FACILITY NAME: LA – Z – BOY WEST	FACILITY LOCATION: 310 TENNESSEE ST., REDLANDS
Consent Granted by: X Inspect X Photograph	NAME MS. MARCIA MURILLO	TITLE SAFETY MANAGER

Inventory (observed):

(18) 5-Gal containers of adhesive
(1) 55-Gal drum of adhesive
(2) 270-gal totes of adhesive
(2) 270-Gal totes of Cal Foam Bond 100
(1) 287-Gal tank of Propane
(2) 55-Gal drums of heavy duty degreaser
(4) 55-Gal drums of AW-60 wax
(1) ~1,000-Lbs pallet of poly glue
(4) 55-Gal drums of diesel
(2) 55-Gal drums of hydraulic fluid
(7) 55-Gal drums of universal waste (aerosols)
~(26) 55-Gal empty drums

Note: The above list is an approximation of the hazardous materials/hazardous waste inventory observed at the time of inspection. It is the operator's responsibility to disclose all hazardous materials at or above threshold quantities (200-Ft^3, 55-Gal or 500-Lbs) and any amount of all hazardous waste streams, in the Inventory section of the Business Emergency/Contingency Plan.

Document Review:

Hazardous materials CUPA permits are current. A CUPA Business Emergency/Contingency Plan has been established/submitted to this Division and is dated 2.25.2011. The Business Plan maps lack the storage locations of all hazardous materials inventory. The EPA ID number CAD005544465 issued to this facility was in active status at the time of inspection; however, this facility does not currently generate hazardous waste. Universal waste records are maintained. Universal waste management was discussed. Employee safety training is provided.

☒ NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

SUPPLEMENTAL INSPECTION REPORT

FACILITY ID	FACILITY NAME:	FACILITY LOCATION:	INSPECTION DATE:
FA0004349	La-Z-Boy West	301 Tennessee St., Redlands	4/21/08
Consent Granted by: ☒ Inspect ☒ Photograph	NAME: James McHenry	TITLE: Safety Manager	

Report Continued:

Since the process has changed, the inventory has also changed. So some of the manufacturing processes to are now outsourced. The only hazardous waste generated is some waste oil from the sewing machines. No paint related hazardous wastes are generated.

Inventory:

- one cabinet with small amounts of leather touch up paint.
- 1 pallet of 4x55 gallon drums of wax in the wood prep room.
- 2x 300 gallon totes of wood glue in the wood prep room.
- 1x 300 gallon tote of foam glue in wood prep room.
- 1x 300 gallon tote of foam glue in the prep room.
- 1x 287 gallon propane tank on the outside of the north end of bldg.
- 1x 55 gallon drum of waste oil. ~~four~~
- ~~Four~~ Two battery operated forklifts + ~~two~~ batt. operated haulers.

Violations to be corrected within 30 days:

#104 - Failure to obtain EPA ID number.
I was unable to confirm the establishment of an EPA ID# due to a lack of waste oil receipts.

Compliance Requirement: Provide a copy of an active EPA ID# to this department.

☒ NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

FA0004349	La-Z-Boy West	301 Tennessee St., Redlands
Consent Granted by: ☒ Inspect ☒ Photograph	NAME James McHenry	TITLE Safety manager

Violations Continued:

#111- Hazardous waste label incomplete.

#112- Accumulation start date missing.

The hazardous waste label on the waste oil drum was incomplete and missing required information.

Compliance Requirement: Provide a photo showing a completed hazardous waste label. Send the photo to this department.

#137- Consolidated manifesting records not available

This facility is a small quantity generator and has not disposed of any hazardous waste in over 1 year. Therefore the last record must be accessed in the archived files.

Compliance Requirement: Provide a copy of the last receipt showing removal of waste oil to this department.

#203- Failure to update / submit a business plan.

#230- Failure to implement the business plan.

The business plan for this facility was last submitted in 1994. The plan is required to be updated annually and submitted annually by March 1st.

Compliance Requirement: Complete the business plan and submit the original and one copy to this department.

☒ NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

Summarize the Business Plan inventory on this page. Place this summary in front of the inventory section of the Business Plan. Make copies of this sheet as necessary. Reminder: You need not report hazardous materials with a maximum quantity of less than 55 gallons, 500 pounds, 200 cubic feet, or the threshold planning quantity of an extremely hazardous substance. However, hazardous wastes, Category 1 and 2 pesticides, and explosives are reportable at any quantity.

III. SIGNATURE- EPCRA Facilities MUST sign the bottom of each individual attached inventory form.

EMERGENCY RESPONSE PLANS AND PROCEDURES

BUSINESS NAME (Same as FACILITY NAME or DBA)
La-Z-Boy West

State Law requires your business to complete all sections of the Emergency Response Procedure listed below:

For each of the following, **briefly** describe your business's standard operating procedures relating to the release or threatened release of hazardous materials located at your facility. You may attach additional pages if necessary, but do not include copies of facility manuals unless requested to do so by this Department. You may reference manuals that are used by your facility for these procedures, but you must still give a brief description here.

EVACUATION/NOTIFICATION: Indicate location(s) where employees, customers, visitors or others on site are to evacuate in an emergency. Describe how your business will immediately notify people and evacuate the facility in the event of a release or threatened release of hazardous materials. Include the route and meeting place.

- Through Plant Public announcement system all employees are notified that there is an emergency situation.
- All employees have had training and are to go to their designated emergency evacuation site.
- Roll is taken at each site
- All employees are kept at their designated site until released by someone from the emergency response ~~team~~.

PREVENTION/MITIGATION/ABATEMENT: Describe what policies and procedures your business will follow to prevent, reduce and/or remove the hazard to persons, property or the environment caused by a release or threatened release of hazardous materials and/or hazardous wastes. (√ Check those items that apply and write additional information in the space provided).

- ☐ Reduction of containers on site if not used or needed
- ☒ Containers are properly labeled and closed when not in use
- ☒ Compressed gas cylinders are properly secured
- ☐ Use of monitoring system Type: _____
- ☐ Other:

Date: 1/16/2012

EMERGENCY RESPONSE PLANS AND PROCEDURES

BUSINESS NAME (Same as FACILITY NAME or DBA) 3

La-Z-Boy West

FACILITY EMERGENCY EQUIPMENT: List facility emergency equipment on site (e.g. fire extinguisher, fire alarms, spill control equipment, SCBA, first aid kits, etc.). Include test/maintenance plan. (√ Check those items that apply and write additional information in the space provided)

	Equipment	Quantity/Type	Maintenance Schedule/Frequency
☒	Fire extinguisher(s)	50 FPP	Monthly checks / yearly service
☒	First aid kit(s)	6	Monthly
☒	Fire alarm(s)	One System	Quarterly
☒	Spill control equipment	One cart w/ absorbant	Yearly
☐	Monitoring system		
☐	Personal Protective Equipment		
☐			
☐			
☐			
☐			

FACILITY EARTHQUAKE RESPONSE: Identify areas of the facility as well as mechanical or other systems that require immediate inspection due to their vulnerability to earthquake related ground motion. (e.g. Hazardous materials or waste storage locations, vessels, piping, pipe and tank supports, valves, gauges, etc.) (√ Check those items that apply and write additional information in the space provided)

- ☒ Chemical Storage Locations – Product and Waste
- ☐ Process vessels
- ☒ Aboveground storage tanks
- ☒ Emergency shut-off systems
- ☒ Piping and pipe supports
- ☒ Utility connections
- ☐ _____
- ☐ _____
- ☐ _____
- ☐ _____

ARRANGEMENTS/AGREEMENTS: Describe any arrangements or agreements that you have with private emergency response teams, waste haulers, disposal companies, recyclers, local hospitals, police and/or fire. If you have no arrangements or agreements, state that fact in the space provided. (√ Check those items that apply and write additional information in the space provided)

- ☒ Hazardous waste hauler Material Handling (contractor)
- ☐ Emergency response team _____
- ☐ Local hospitals _____
- ☐ Other: _____
- ☐ No arrangements or agreements at this time

BUSINESS EMERGENCY/CONTINGENCY PLAN COVER SHEET

I. IDENTIFICATION

For Dept Use Only – Log In/Date Stamp

RECEIVED
JAN 25 2012
S.B. CO. FIRE DEPT.

FACILITY ID # F A 0 0 0 4 3 4 9

BUSINESS NAME (Same as FACILITY NAME or DBA)
La-Z-Boy West

BUSINESS SITE ADDRESS: 301 Tennessee St.

CITY: Redlands

ZIPCODE: 92373

II. SUBMISSION CHECKLIST

(Complete this Section if submitting an entire Business Emergency/Contingency Plan whether new or revised)

Submission Checklist ☒

- ☒ Business Activities Form
- ☒ Business Owner/Operator Identification Form
- ☒ Supplemental Emergency Contact Page
- ☐ Emergency Response Plans and Procedures
- ☐ Hazardous Materials Inventory Summary Form for the facility listing materials (including wastes) by item number
- ☐ One Hazardous Materials Inventory Form for each hazardous material (including wastes) which meet reporting criteria
- ☐ Material Safety Data Sheets attached to the inventory form of each material not listed in Appendix I
- ☐ Facility map (using grid form provided) consisting of all required features including the location of each inventoried item
- ☐ Site map (using grid form provided) consisting of all required features including surrounding facilities and areas.
- ☐ Area map - photocopied city map with location of site indicated
- ☐ Owner/Operator has signed and dated the plan and all required individual pages of the plan
- ☐ Submit the original and 1 copy to the Hazardous Materials Division. One is for distribution to the local fire jurisdiction
- ☐ ***Retain one copy of the business emergency/contingency plan at the facility.***

III. UPDATE/CERTIFICATION

(Complete this Section if submitting a partial update or re-certifying an existing Plan)

Check the appropriate boxes below and sign the certification statement. Submit 2 copies of all update information.

- ☒ Please incorporate the following into my Business Emergency/Contingency Plan
  - ☐ New Business Owner/Operator Identification Form
  - ☒ New Inventory Forms and new Inventory Summary Form (and maps, if affected)
  - ☐ New Supplemental Emergency Contact Page
- ☐ Other: _____

Brief explanation of changes: _____

☐ There have been no changes to the inventory. In place of submitting the annual inventory, I hereby attest to all of the following:

- The information contained in the inventory most recently submitted to the CUPA is complete, accurate and up to date.
- There has been no change in the quantity, storage, or handling of hazardous materials (including waste) reported in the most recently submitted inventory.
- No hazardous materials (including waste) subject to inventory requirements are being handled that are not listed on the most recently submitted inventory.
- This certification is **not** being made to meet annual inventory submission requirements of EPCRA. **(EPCRA requires complete annual submission)**

IV. SIGNATURE

(Complete this Section for all submissions)

Certification - Based on my inquiry of those individuals responsible for obtaining the information, I certify under penalty of law that I have personally examined and am familiar with the information submitted on this document and believe the information is true, accurate and complete.

SIGNATURE OF OWNER/OPERATOR: Jovito M. Dabu

II. ACTIVITIES DECLARATION

Does your facility...	If Yes, please complete these pages of the UPCF*....	
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release Prevention Program (CalARP)?	☐ YES ☒ NO 4a	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES ☒ NO 5	UST FACILITY UST TANK
D. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☐ YES ☒ NO 8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE		
Generate hazardous waste?	☒ YES ☐ NO 9	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per CHSC 25143.2)?	☐ YES ☒ NO 10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES ☒ NO 11	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as containing hazardous waste and cleaned on-site?	☐ YES ☒ NO 14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of Federal RCRA hazardous waste; or generate in any single calendar month, or accumulate at any time 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acutely hazardous waste.	☒ YES ☐ NO 14a	Obtain Federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES ☒ NO 14b	See CUPA for required forms.

CUPA
San Bernardino County Fire Department • Hazardous Materials Division
620 South 'E' Street, San Bernardino, CA 92415-0153
(909) 386-8401 • FAX (909) 386-8460 • www.sbcfire.org

ACCESS REQUEST to FACILITY RECORD IN CERS - SINGLE FACILITY*

For more information, see: http://www.sbcfire.org/hazmat/efile.aspx or call CERS help line (909) 386-8432

The purpose of the ACCESS REQUST is to ensure that only individuals designated by the facility owner/operator are authorized by the CUPA to access facility records and to create, edit, and submit electronic data on the owner's behalf to the statewide system, known as the California Environmental Reporting System (CERS). The initial business user authorized by the CUPA to have access to a facility on CERS is designated as a lead business user. Lead business users have the ability to add additional lead or standard business users, approve or reject other access requests, or delete other users for any facility for which they are listed as a lead user.

AUTHORIZED LEAD BUSINESS USER

Name	Title
Darrell Mealer	Safety Manager
Email Address	**Contact Phone**
dmealer@la-z-boy.com	909-251-2537

OWNER NAME	OWNER EMAIL ADDRESS
Steven Godwin	sgodwin@la-z-boy.com

OWNER MAILING ADDRESS	CITY	STATE	ZIP CODE	OWNER PHONE
301 Tennessee St.	Redlands	CA	92375-2080	909-793-3204 x2245

Fill out the following information for the facility

FACILITY ID *(e.g., FA0123456)*	FACILITY NAME *(e.g., CUPA AUTO)*	SITE ADDRESS *(e.g., 123 N. MAIN ST.)*	CITY *(e.g., ANYTOWN)*
FA4249	La-Z-Boy West	301 Tennessee St	Redlands

☑ I authorize the person and email address listed above to be a lead business user for the listed facility. This includes the ability to create, edit, and submit compliance data for the listed facility. I understand that as a lead business user this person may approve additional lead business users or standard business users, grant or reject facility access requests, and delete users from the facility listed on this authorization form.

Certification – I certify that I am the owner/operator or legal representative of the facility listed on this form. I understand that compliance documents prepared or submitted electronically are held to the same standard as their former paper equivalents.

SIGNATURE OF OWNER/OPERATOR OR LEGALLY DESIGNATED REPRESENTATIVE	DATE	NAME OF DOCUMENT PREPARER
Steven R Godwin	4/02/2014	DARRELL MEALER
NAME OF SIGNER (print)	**TITLE OF SIGNER**	
Steven Godwin	Human Resources Manager	

*Each facility record that is entered into CERS is assigned to a business/organization. Multiple facilities that have the same owner/operator and that will have the same users managing the facility record in CERS can be grouped together into a single "umbrella" business/organization. If you own or operate multiple facilities and if the same users will be managing all of the facilities in CERS, you may want them to be grouped into a single business/organization. For more information please contact the San Bernardino CERS help line at (909) 386-8432.

SUBJECT: **CERTIFIED RECORD SEARCH FINDINGS**
301 TENNESSEE STREET, REDLANDS, CALIFORNIA
APN#: 0292-192-11-0000

This is to confirm that the San Bernardino County Hazardous Materials Division has identified records that may pertain to the subject site, as described in your request for records search.

The file(s) shown below have been retrieved for review. If you wish to view the original documents, please e-mail this office at mmolina@sbcfire.org or call the number at the end of this letter to arrange an appointment.

ACTIVE PERMIT FACILITIES: (Regulatory files for facilities with annual operating permits to maintain underground storage tanks, handle hazardous materials, and/or generate hazardous waste. Files include permits, inspections, reports, test results, correspondence, and related materials. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities still in operation).

La-Z-Boy West 301 Tennessee St. Redlands	FA0004349 ~ Est. # 86007754 ~ CERS ID. 10041319 Conditionally Exempt Sm. Qty. Generator Permit Hazardous Materials 4-10 Chemicals Handler Permit (Last CERS Submission: 6/6/2019)

INACTIVE PERMIT AND/OR NON-PERMIT FACILITIES: (Inactive regulatory files for formerly permitted facilities that maintained underground storage tanks, stored hazardous materials, and/or generated hazardous waste and/or facilities with underground storage tanks removed and/or materials and waste removed. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities no longer operating underground tanks).

No record of inactive permit and/or non-permit facilities identified in this search.

PERMITS TO REMOVE/INSTALL/MODIFY UNDERGROUND STORAGE TANKS:

No record of permits to remove/install/modify underground storage tanks identified in this search.

CUPA COMPLIANCE INSPECTION REPORT

NAME: **LA-Z-BOY WEST** FACILITY ID: **FA0004349**

ADDRESS: **301 Tennessee St** CERS ID: **10041319**

CITY: **Redlands** STATE: **CA** ZIP CODE: **92373** INSPECTION DATE: **11/17/2017**

Inspector was given permission to: [X] photograph [X] inspect

Inspection Narrative (v020000)
An inspection was conducted on November 17, 2017 to determine compliance with hazardous materials and hazardous waste laws and regulations. Consent to inspect and photograph granted by Darrell Mealer, EHS Manager. The facility escort was Darrell Mealer.

The facility is a furniture assembly center. The facility stores hazardous materials as a result of adhesive used in furniture assembly. The facility does not generate hazardous waste.

INVENTORY:
Hazardous materials inventory is consistent with 4/25/17 CERS submittal.

DOCUMENTATION REVIEW:
- Hazardous materials handler permit was obtained and expire August 31, 2018.
- Business Plan is established and last updated April 25, 2017. CERS ID: 10041319.
- EPA ID Number obtained. CAD005544465 was active.
- Hazardous waste disposal records and manifests were not available for review.
- Employee training is provided annually.
- Universal waste managed lawfully.

No violations observed during inspection.

Contact Jerry Nguyen at 909-386-8401 or JNguyen@sbcfire.org with questions regarding this inspection report.

The following lines marked in the V column are violations that must be corrected. Marked items in the N column require additional information to determine compliance.

INSPECTION NARRATIVE

An inspection was conducted on 11.28.2011 to determine compliance with applicable hazardous materials and hazardous waste laws and regulations. Ms. Marcia Murillo – Safety Manager and Mr. David Stucker – Maintenance Manager, were the inspection escorts. Digital photos were taken.

This facility is a furniture assembly operation. The wood components are received pre-cut and assembled using either glue or staples. No wood cutting takes place at this facility. Large amounts of adhesives are stored/used on site. Hazardous waste is no longer generated. Universal waste (aerosol cans) is generated and properly managed. A propane tank is also stored on site.

Note:

Safety glasses are required prior to entering any production areas of the facility.

☒ NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

FACILITY ID	FACILITY NAME	FACILITY LOCATION
FA0004349	La-Z-Boy West	301 Tennessee St, Redlands
Consent Granted by: ☒ Inspect ☒ Photograph	NAME: James McHenry	TITLE: Safety Manager

Report Continued:

Since the process has changed, the inventory has also changed. So some of the manufacturing processes ~~to~~ are now outsourced. The only hazardous waste generated is some waste oil from the sewing machines. No paint related hazardous wastes are generated.

Inventory:

- One cabinet with small amounts of leather touch up paint.
- 1 pallet of 4x55 gallon drums of wax in the wood prep room.
- 2x300 gallon totes of wood glue in the wood prep room.
- 1x300 gallon tote of foam glue in wood prep room.
- 1x300 gallon tote of foam glue in the prep room.
- 1x287 gallon propane tank on the outside of the north end of bldg.
- 1x55 gallon drum of waste oil.
- ~~Four~~ Two battery operated forklifts + ~~two~~ four batt. operated haulers.

Violations to be corrected within 30 days:

#104 - Failure to obtain EPA ID number.

I was unable to confirm the establishment of an EPA ID# due to a lack of waste oil receipts.

Compliance Requirement: Provide a copy of an active EPA ID# to this department.

☒ NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

CORRECTIONS/NARRATIVES

Facility requested inspection to determine the necessity of permits for hazardous materials handler & hazardous waste generator. Facility has current permits, due to expire 4/30/96.

Facility is an upholstered furniture manufacturing operation onsite at time of inspection is the following -
10-55 gallon containers water based stains - adhesives
45-5 gallon containers water based stains
3-55 gallon containers gear oil / lubricants
4-5 gallon containers grease

All vehicles are serviced off-site. All solvents have been removed from site - All materials have been changed wherever possible to water based. Waste streams have been reduced to waste oil only. Welches services most uniforms

SUPPLEMENTAL INSPECTION REPORT

FACILITY NAME: LA Z BOY | FACILITY LOCATION: 301 Tennessee, Redlands

Waste oil accumulated onsite can be stored in a properly labeled & secured 55 gallon drum. An example of a proper label is included with this report.

Waste oil must be hauled within 90 days of reaching the accumulated amount of 55 gallons or at least once per year. A list of haulers licensed to haul waste oil is included with this report. Maintain receipts for all waste disposals for at least 3 years.

Review Business Plan to ensure that the plan reflects all the appropriate materials and wastes handled onsite. Submit any changes or updates.
Permits have been changed to reflect the appropriate catagories. (228701 → 228708 + 226002 → 226001)

Please Contact this office at (909) 387-3080 if there are any questions or if material & waste handling practices change.

CORRECTIONS/NARRATIVES

La-Z-Boy West manufactures reclines chairs ~~and couches~~. The plant assembles the furniture from material fabricated from other plants.

The manufacture process begins with the assembly of brackets and levers. The sepetate brackets are sent in for assembly & are not fabricated onsite.

Decorative wood is stained topcoated and ~~the~~ dried in an automated process. All stains and topcoats are water based. All solvent base stains & lacquers have been changed to waterbased. Brackets and metal parts are cleaned (degreased) and painted and baked in one electroplating machine. Paint utilized in this area is water-based and usually lasts 5 to 6 weeks.

In paint area is 16-5gal. Containers of stain & 10-55's of topcoat material.

HAZARDOUS FIELD SERVICES PROGRAM

SUPPLEMENTAL INSPECTION REPORT

INSPECTOR: Alvarez

FACILITY NAME:	FACILITY LOCATION:
LA-Z-Boy, West	301 Tennessee St., Redlands

In the poly-foam fabrication department large pieces of poly-foam is cut and formed to the appropriate shape. Water-based glue is utilized in this process. Solvent-based glue was replaced to decrease & eliminate this waste-stream. Foam remnants are resold to poly-foam manufacture to be made into carpet underlay material

All materials being now utilized in the process is water based - all machines are cleaned with water. The change to these materials has eliminated the waste streams of 111 TCE, solvents.

In the machining/maintance room where light equipment maintance is conducted is stored small quantities of lubricating oil, grease and 1 welding unit (acc./ox).

In the hazardous material storage building is stored:

4-55gal + 11 5-gal containers of oil/lubricant
small quantities of paint (for building maintance)
3-55gal - top coat wood finish
3-55 gal - LPS Precision clean prep
4-55 gal - H_2O based metal paint (used in electroplate p
3-55gal + 24 5-gal containers water based stains
7-5's turbine engine oil
3-55's water-based glue.

1.0 SUMMARY

This report presents the results of a Phase I Environmental Site Assessment (ESA) performed by Northgate Environmental Management, Inc. (Northgate) for ESRI (the Client) at the property located at 360 Kansas Street in Redlands, California (the Site). The Site consists of approximately 2.81 acres of land developed with a residential structure, a storage building, and vacant land occupied by commercial trailers and shipping containers. The Site is identified as Assessor's Parcel Number (APN) 0292-192-14 in San Bernardino County. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

Our review indicates that the Site historically consisted of orchard land from at least the late 1890s through the early 1950s. By at least 1953, the Site was redeveloped into a chicken ranch with a small residence on the western corner and chicken coops on the eastern portion of the Site. The Site reportedly remained operational as a chicken ranch until the 1990s when the chicken coop structures were removed and the Site remained occupied by a single-family residence. Tractor trailers and shipping containers are currently stored on the Site to the east of the private residence. Northgate was unable to access these containers for inspection as the containers are rented to various, private tenants who utilize the containers for storage. The Site owner did not have access to the locked container units and as a result, the contents could not be inspected during the course of this assessment. The owner was not aware of any hazardous materials or chemicals being stored in the tractor trailers or shipping containers. The Site is not listed on any environmental regulatory databases related to the use, storage, or release of hazardous materials reviewed during this investigation. However, a 300-gallon underground storage tank (UST) containing gasoline was removed on June 26, 1995. No installation date was provided but a soil sample was collected to confirm closure and regulatory closure was provided on July 3, 1995.

In summary, Northgate has performed a Phase I ESA of the property located at 360 Kansas Street in Redlands, California in conformance with the scope and limitations of ASTM Practice E 1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312). Any exceptions to, or deletions from, these practices are described in Section 2.3 of this report. Our review did not identify the presence of Recognized Environmental Conditions (RECs) in connection with the property. However, our review did identify the following Historic Recognized Environmental Condition in connection with the property:

- A 300-gallon gasoline UST was removed from the Site on June 26, 1995. A soil sample was collected to confirm closure and no further action was required by the San Bernardino County Fire Protection District (SBCFPD) prior to providing regulatory closure in a letter dated July 3, 1995.

Additionally, the following business environmental risks were identified during the course of this assessment:

- The Site was historically occupied by orchards from at least the late 1890s through the early 1930s. Historic orchard operations have the potential to have included the use of pesticides that may have impacted shallow soil at the Site and surrounding area.
- A former groundwater well and pump are located on a concrete pad is located to the east of the single family residence. This groundwater well is not reportedly used currently but does not appear to have been abandoned. Any redevelopment at the Site may likely require the proper abandonment of this groundwater well in accordance with applicable current standards.
- Several decommissioned vehicles were observed to be located throughout the Site including one in poor condition located on soil ground cover with the engine exposed to the elements. No evidence of leaks, stains, or spills was observed, but this represents a potential business environmental risk for the Site. Additionally, oily residue was observed on the floor of a storage structure, but was not observed on the surrounding soil ground cover.
- Properties adjacent to the east, south, and west have been identified as historic manufacturing of furniture, plastics, and a machine shop, respectively. No information was obtained that indicated a release from any of these manufacturing or machine shop facilities; however, they are land uses generally associated with the potential for releases of hazardous materials to the subsurface.

2.0 INTRODUCTION

This report presents the results of a Phase I ESA performed by Northgate at the property located at 360 Kansas Street in Redlands, California. The Site consists of approximately 2.81 acres of land developed with a residential structure, a storage building, and vacant land occupied by commercial trailers and shipping containers. The Site consists of one parcel identified as APN 0292-192-14 in San Bernardino County. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

2.1 Purpose

The purpose of Phase I ESA has been to identify and evaluate the presence of RECs at the Site. The term "RECs" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimus* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 Scope of Services

Northgate has performed the ESA in general conformance with the scope and limitations of ASTM E-1527-13, *Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and 40 CFR Part 312, *Standards and Practices for All Appropriate Inquiry – Final Rule*. This investigation was performed by Nicky Robinson, Senior Engineer with assistance and review by and Derrick Willis, Northgate Principal. The scope of work for the investigation included the following services:

- Review of readily available information regarding the history of the Site, including historic aerial photographs, maps, previous reports, and other information, and discussions with individuals familiar with the Site;
- Review of environmental lien documents obtained for the Site;
- A reconnaissance of the Site and near vicinity;
- Discussions with regulatory officials and review of regulatory agency publications and files, as applicable;

- Evaluation of RECs, development of conclusions and scope of work to evaluate potential on-Site contamination concerns; and
- Preparation of this report.

2.3 Limitations and Exceptions

2.3.1 Limitations

The purpose of an environmental assessment is to reasonably evaluate the potential for, or actual impact of, past practices on a given site area. In performing an environmental assessment, it is understood that a balance must be struck between a reasonable inquiry into the environmental issues and an exhaustive analysis of each conceivable issue of potential concern. No investigation is thorough enough to absolutely rule out the presence of hazardous materials at a given site. If hazardous conditions have not been identified during the assessment, such a finding should not be construed as a guarantee of the absence of such materials on the Site, but rather as the result of the services performed within the scope, limitations, and cost of the work performed.

Environmental conditions may exist at the Site that cannot be identified by visual observation. Where subsurface work was performed, our professional opinions are based in part on interpretation of data from discrete sampling locations that may not represent actual conditions at un-sampled locations.

Except where there is express concern of our client, or where specific environmental contaminants have been previously reported by others, naturally occurring toxic substances, potential environmental contaminants inside buildings, or contaminant concentrations that are not of current environmental concern may not be reflected in this document.

Where the scope of services is limited to interview and/or review of readily available reports and literature, any conclusions and/or recommendations are necessarily based largely on information supplied by others, the accuracy or sufficiency of which may not be independently reviewed by Northgate.

Any opinions and/or recommendations presented apply to Site conditions existing at the time of performance of services. We are unable to report on, or accurately predict, generally unforeseeable events that may impact the Site following performance of services, whether occurring naturally or caused by external forces. Therefore, we cannot assume responsibility for such events or their impact. We also cannot assume responsibility for changes in environmental standards, practices, or regulations.

2.3.2 Exceptions

The time intervals between some historical information sources may exceed five years due to the unavailability of such records. However, in our opinion, this data gap does not significantly impact our ability to evaluate historic land use conditions at the Site given the availability of other sources for this information.

There were no limiting conditions, with the exception of locked tractor trailers and shipping containers on the eastern half of the Site to the east of the single-family residence. According to the property owner, the containers are rented to various tenants who utilize the containers for storage and the owner did not have access to the locked container units. The owner was not aware of any hazardous materials or chemicals being stored in the tractor trailers or shipping containers. However, the lack of access and ability to observe each container's contents represents a limiting condition at the Site.

2.4 User Reliance

This report has been prepared for the exclusive use of the Client and their corporations, subsidiaries, affiliates, partnerships, and lenders in evaluating environmental conditions at the Site. Others may not use or rely on the information contained in this report without the express written consent of Northgate.

3.0 SITE DESCRIPTION

3.1 Site Location and Legal Description

The Site consists of 2.81 acres of land located at 360 Kansas Street in Redlands, California. The Site consists of one parcel identified as APN 0292-192-14 in San Bernardino County. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

3.2 Site Vicinity General Characteristics

The Site is developed with a residential structure, a storage building, and vacant land occupied by commercial trailers and shipping containers. The Site is located in an area occupied primarily by commercial and industrial development with residential development located farther to the east, south, and south-east of the Site.

3.3 Geology and Groundwater

3.3.1 Geology

The Site is located within the Peninsular Ranges Geomorphic Province of Southern California near the base of the San Bernardino Mountains between the San Jacinto Fault Zone and the San Andreas Fault Zone. The Site vicinity is generally underlain by middle Holocene axial-valley alluvium deposits consisting of slightly to moderately consolidated silt, sand, and gravel (Matti, 2003 and RAI, 2019). Subsurface investigations performed by others in the Site vicinity indicate that the area is generally underlain by shallow fill materials consisting of silty sands, sandy silts, and sands with some debris. The fill material is underlain by alluvial materials that consist primarily of interbedded sand, silty sands, and sandy silts to approximate depths of 30 feet bgs (LOR, 2009). The surface topography at the Site and in the vicinity generally slopes gently to the west-northwest towards the Santa Ana River (LOR, 2011).

3.3.2 Groundwater

The Site is located within Upper Santa Anna Valley Groundwater Basin within the eastern portion of the Bunker Hill Subbasin within the Upper Santa Ana Valley Groundwater Basin, approximately two and a half miles south of the Santa Ana River, which is typically dry. The Bunker Hill Basin is bound by the San Bernardino Mountains to the northeast, the Crafton Mountains and the Badlands to the south, by a low east-facing escarpment produced by the San Jacinto Fault to the southwest, and by the San Gabriel Mountains to the northwest (CH2M HILL, 2010 and RAI, 2019). It is bordered by the Banning fault to the south, the Redlands fault to the east, the San Andreas Fault to the north, and the Glen Helen and San Jacinto Faults roughly to

the west. The subbasin has been divided into lower and upper aquifers. The lower and upper aquifers have a maximum thickness of 650 feet and 350 feet, respectively. The lower aquifer is confined over a 25 square mile area in the valley where a poorly permeable clay layer exists between the aquifers. Groundwater movement is restricted by the boundary faults (CGB 118, 2004).

Groundwater information reported for nearby sites indicates that groundwater has historically been encountered at depths of approximately 100 to 130 feet below the ground surface (bgs) in the Site vicinity. Groundwater flow direction is reported to be primarily directed towards the west and northwest, consistent with the topography and directed towards the Santa Ana River (LOR, 2011). The Mission Zanja, a former man-made irrigation channel, is the nearest surface water body located immediately to the north of the Site. The Santa Ana River is located approximately two and a half miles north of the Site.

The Bunker Hill Subbasin is known to contain several contaminated groundwater plumes. The Redlands plume, located between Judson Street and Waterman Avenue, primarily contains trichloroethene (TCE) and perchlorate, with low levels of tetrachloroethylene (PCE) and dibromochloropropane. The perchlorate portion of this plume extends into the vicinity of the subject Site. Additional plumes in the area include the Norton Air Force Base, Newark, and Muscoy plumes consisting of TCE and PCE and the Santa Fe Plume consisting of petroleum hydrocarbons (LOR, 2011). None have been shown to have directly impacted the subject Site.

3.4 Current Use of the Property

The Site is developed with 2.81 areas consisting of a single-family residence, a dirt lot occupied by tractor trailers, shipping containers and vehicle storage, a garage used by a mason contractor for storage of their equipment and materials, and another small storage shed leftover from a former chicken farm, now filled with small household debris and trash.

3.5 Description of Structures, Roads, Sewage, and Potable Water Sources

The Site is currently developed with an approximate 2,000 square-foot building occupied by a single-home residence, storage sheds and garages, and a dirt lot used as additional storage. Water and sewer connections are provided by the City of Redlands.

3.6 Current Uses of Adjoining Properties

The Site is located in an area of industrial and commercial development located approximately 0.66 miles to the south of the Interstate 10 freeway. The Site is bordered to the north by The Mission Zanja historic irrigation canal, which is now tributary to the Santa Ana River, and

Orange Blossom Trail followed by industrial and commercial development including an automobile towing company. The Site is bordered to the east by commercial development including a former furniture manufacturing store followed by Tennessee Street then commercial development. To the south, the Site is bordered by commercial development including a boat and locker storage facility. The Site is bordered to the west by Kansas Street followed by a machine shop then the Mission Zanja historic irrigation canal, the Orange Blossom Trail, and industrial development.

4.0 USER PROVIDED INFORMATION

4.1 Environmental Liens or Activity and Use Limitations

An environmental lien and activity and use limitation (AUL) search was conducted for the Site by Environmental Data Resources (EDR). EDR's review indicates that there are no environmental liens or activity and use limitations of record on the Site. A copy of the Environmental Lien and AUL Search is included in Appendix A (EDR, 2020a).

4.2 Valuation Reduction for Environmental Issues

The Client has not provided Northgate with any information indicating that the value of the property has been reduced due to environmental issues.

4.3 Owner, Property Manager, and Occupant Information

The Environmental Lien and AUL Search shown in Appendix A indicate that the title to the Site is vested in Rettig Machine Shop; however, the Site has never been reported to operate as a machine shop and has been occupied by a private residence, a chicken ranch, and presently vacant land occupied by commercial trailers and shipping containers. The Site is occupied by a family. The remaining portions of the property is used as storage for a mason contractor (who doesn't live or work on the property), and for parked tractor trailers, shipping containers and vehicle storage.

4.4 Specialized Knowledge

The Client has not indicated that they possess any additional specialized knowledge regarding the Site. Northgate also submitted an interview questionnaire regarding Site land use history to Mr. Franz Rettig, a representative for the owner/occupant of the Site.

Mr. Rettig indicated that he has been associated with the Site as the owner for 25 years. He was not aware of any environmental cleanup liens or any activity or land use limitations against the Site. Mr. Rettig noted that the Site was previously occupied by a chicken ranch. He also noted that he was not aware of any specific chemicals that were present or used at the Site or any chemical spills or environmental cleanups that have taken place at the Site. Mr. Rettig indicated that he is not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site, including any notices from any governmental entity regarding any possible environmental violations. He indicated that he was not aware of any further permits or registrations for the Site. A copy of the Phase I ESA Questionnaire is included in Appendix B.

4.5 Reason for Performing the Phase I ESA

Northgate understands that the Client is looking to potentially purchase the Site and is requesting a Phase I ESA as part of their due diligence evaluation.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

To determine if the Site has any documented environmental concerns, or if other sites with documented environmental concerns exist within the search radii of the Site prescribed by ASTM 1527-13 and *All Appropriate Inquiry*, Northgate reviewed a summary of regulatory agency database listings prepared by EDR. In addition, where appropriate, we reviewed local regulatory agency files for additional specific information regarding sites identified in the EDR report judged to be of possible concern to the subject Site. The EDR report presenting a summary of the agency databases reviewed and a map showing the location of the identified sites is provided as Appendix C (EDR, 2018b). The results of the database search and follow-up agency file review are summarized below.

5.1.1 Site

The Site is listed in the HAZNET and HWTS databases for recycling 0.40 tons of empty containers of 30 gallons or more in 1995. Based on information obtained from the regulatory file review at the San Bernardino County Fire Protection District, this appears to be related to the removal and off-Site transport of a 300-gallon gasoline UST on June 26, 1995. No other records related to the use, storage, or release of hazardous materials were found for the Site.

5.1.2 Off-Site Sources

The regulatory agency database search prepared by EDR indicates the presence of 77 agency-listed sites located within an approximate one-mile radius of the Site. The EDR database report containing a list of the agency databases searched is attached in Appendix C. Sites with documented releases impacting groundwater located within 0.25 mile upgradient and/or cross-gradient of the Site, or otherwise judged to be of potential impact to soil, soil vapor, or groundwater quality at the Site, are summarized in the following table.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
Redlands Corporate Yard / Southern CA Fleet Services Inc. / Redlands City – 1270 W Park Avenue / Bldg F, Redlands	LUST, UST, RCRA NONGEN/NLR, CERS HAZ WASTE, CERS TANKS, EMI, SAN BERN. CO. PERMIT, SWEEPS UST, CA FID UST, HIST CORTESE and CERS.	Approximately 0.15-miles to the northeast (cross-gradient) of the Site	This facility was identified for a release of diesel from a UST that impacted soil in 1999. The facility received regulatory closure from San Bernardino County on June 14, 2000. No cleanup action was record, and no further information was available regarding this facility or the release. Given that the release at this facility is limited to soil, regulatory closure status, and the relative location, this facility does not appear to represent a significant potential threat to soil, soil vapor, and/or groundwater at the subject Site.
Plant 1 – 410 Missouri Court, Redlands	US MINES	Approximately 0.15-miles to the northeast (cross-gradient) of the Site	This facility is identified on the US Mines database as surface mine facility for crushed and broken stone. It received several citations and violations from 2012 through 2017 related to surface mines but no further information was provided related to the violations. No additional information was available. Given the relative location and lack of documented information related hazardous materials or a release, this facility does not appear to represent a significant potential threat to soil, soil vapor, and/or groundwater at the subject Site.

5.2 Vapor Encroachment Screening

A vapor encroachment screening (VES) evaluation was performed for the Site using EDR's vapor encroachment condition application (VEC App), which assists in screening for vapor encroachment risk in accordance with ASTM E2600 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." A "Tier I" VES was performed to evaluate the potential for vapors associated with contaminated soil and/or groundwater to impact the Site, whether originating from the Site or from nearby off-Site sources. For properties where a VEC could not be ruled out, existing subsurface investigation reports, if available, were used to evaluate potential impacts to the Site (Tier 2 screening).

The following table presents a summary of the VES findings:

Potential for Vapor Intrusion on Site	
Areas of Concern	*Conclusion*
Site (existing conditions)	VEC not present
Site (former condition)	VEC not present.
Adjoining Property or near-by Property Operations or Existing Conditions	VEC not present
Historical Uses of Adjoining Property or Near-by Properties	VEC not present.

Based on this screening, a VEC is not present for the subject Site. Facilities of potential concern to the subject Site are discussed in Section 5.1.2 above.

5.3 Additional Environmental Record Sources

Northgate contacted local regulatory agencies for information regarding the use or storage of hazardous materials at the Site, and reviewed files at any agency maintaining a file for the subject Site. The following agencies were contacted for information regarding the use or storage of hazardous materials at the Site:

- Department of Toxic Substances Control (DTSC) EnviroStor Website;
- State Water Resources Control Board (SWRCB) GeoTracker Website;
- California Environmental Protection Agency (CalEPA) Website;
- San Bernardino Regional Water Quality Control Board (SBRWQCB);
- San Bernardino County Fire Protection District (SBCFPD);
- San Bernardino County Public Health (SBCPH), Environmental Health Services;
- San Bernardino County Agricultural Commissioner (SBCAC);
- City of Redlands Planning Department (CRPD);
- South Coast Air Quality Management District (SCAQMD); and

- Oil and Gas Wells.

The results of our review are described in the following sections. Copies of pertinent Site documents obtained from this review are provided in Appendix D.

5.3.1 Department of Toxic Substances Control (DTSC) EnviroStor Website

The Site is not listed on the DTSC EnviroStor website, and thus, there are no files related to the property.

5.3.2 State Water Resources Control Board (SWRCB) GeoTracker Website

The Site is not listed on the GeoTracker website, and thus, there are no files related to the property.

5.3.3 California Environmental Protection Agency (CalEPA) Website

The Site is not listed on the CalEPA portal website, and thus, there are no files related to the property.

5.3.4 San Bernardino Regional Water Quality Control Board (SBRWQCB)

Northgate submitted a file review request to the San Bernardino County Regional Water Quality Control Board (SBRWQCB). The SBRWQCB indicated that they do not have any files or documents on record for the subject Site.

5.3.5 San Bernardino County Fire Protection District (SBCFPD)

Northgate submitted a file review request to the San Bernardino County Fire Protection District (SBCFPD). Available records indicated that a 300-gallon gasoline UST was removed from the Site on June 26, 1995 under a permit issued to AG's Alex Kimm. No installation date was provided for this UST. The UST was located approximately 52 feet west of Kansas Street and 170 feet north of the southern property long in the driveway between the residential structure and the garage, which is now used as storage by a masonry contractor. It was reported to have been in good condition upon removal. One soil sample was reported to have been collected at a depth of seven feet bgs. Analytical results for the soil sample indicated that total petroleum hydrocarbons and gasoline and gasoline related volatile organic compounds benzene, toluene, ethylbenzene, and xylenes were not reported above their respective laboratory detection limits in the soil sample. Lead was measured at a concentration of 9.2 milligrams per kilogram.

The SBCFPD indicated that no further action was required prior to providing regulatory closure in a letter dated July 3, 1995. The SBCFPD did not find any other records, including any other incidents, site remediation, or active permits to handle hazardous materials for the Site.

5.3.6 San Bernardino County Public Health (SBCPH), Environmental Health Services

Northgate submitted a file review request to the San Bernardino County Public Health (SBCPH), Environmental Health Services, who indicated they do not have any files or documents related to the Site.

5.3.7 San Bernardino County Agricultural Commissioner (SBCAC)

Northgate submitted a file review request to the San Bernardino County Agricultural Commissioner (SBCAC). The SBCAC maintains records of pesticide use, but indicated that they did not have any files on record associated with the subject Site.

5.3.8 City of Redlands Planning Department (CRPD)

Northgate submitted a file review request to the City of Redlands Planning Department (CRPD). Plumping records from different contractors were found for the Site to replace the on-site sewer lateral, to replace the roof HVAC, and to repair fire-damaged areas. No other building permits were found related to the property.

5.3.9 South Coast Air Quality Management District (SCAQMD)

The Site is not listed on the South Coast Air Quality Management District (SCAQMD) website, and thus, there are no files related to the property.

5.3.10 Oil and Gas Wells

According to the EDR GeoCheck® - Physical Setting Source Addendum located in the EDR Radius Report (Appendix C), there are no oil and gas wells located within 1-mile of the Site. Information available on the California Division of Oil, Gas, and Geothermal Resources website indicates that there are no wells located on or within a 0.25-mile radius of the Site. Oil and gas wells do not appear to represent an environmental concern to the Site.

5.4 Other Environmental Issues

5.4.1 Floodplain Maps

Northgate viewed an online version of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for San Bernardino County, Flood Map number 06071C8712H. According to the FIRM, the Site is located in Flood Zone AO – special flood hazard areas subject to inundation by the 1% annual chance flood with flood depths of one to three feet (usually sheet flow on sloping terrain). The Site is located within an area listed for flood depths of two feet (FEMA, 2008).

5.4.2 Radon

The California Department of Health Services' (DHS') online list of indoor radon levels indicates that radon concentrations from 29 indoor air samples collected in zip code area 92373 were all less than 4.0 pico-curies per liter (pCi/L) (DHS, 2016). According to the EDR Radius Report (Appendix C), the federal Environmental Protection Agency (EPA) radon zone for San Bernardino is Zone 2 (indoor average level greater than or equal to 2 pCi/L and less than or equal to 4 pCi/L).

The State of California Division of Drinking Water and Environmental Management maintains a database of radon test results indicating that out of 18 samples collected in San Bernardino County in California, in the living area-first floor, 100% were below 4 pCi/L. The DHS and the EPA recommend that some form of mitigation be conducted for houses with indoor radon concentrations of 4 pCi/L or greater.

These results indicate that radon gas does not appear to constitute a significant environmental concern at the Site.

5.5 Land Use History

Information on historical land use at the Sites and adjacent area was evaluated by reviewing historic aerial photographs, maps, and other documents. A summary of our investigation findings is presented below.

5.5.1 Aerial Photographs

Northgate reviewed historic aerial photographs of the Sites from 1930, 1938, 1949, 1953, 1959, 1966, 1968, 1975, 1985, 1989, 1994, 2006, 2009, 2012and 2016 obtained from EDR (EDR, 2020c). Copies of the aerial photographs are provided in Appendix E. A summary of our aerial photograph review is presented below.

Year: 1930	**Scale:** 1" = 500'	**Source:** FAIR
Site Description: The Site is fully occupied by orchards.		
North:	A river followed by orchards, roads, and limited residential development.	
East:	Orchards, continuation of the river, roads, and limited residential development.	
South:	Orchards, roads, a small river and wash area, and limited residential development.	
West:	A road, orchards and the continuation of the river, and limited residential development.	

Year: 1938	**Scale:** 1" = 500'	**Source:** USDA
Site Description: Appears similar to the 1930 photograph.		
North:	Appears similar to the 1930 photograph, except ta railroad is mapped farther north of the Site and residential development has expanded slightly.	
East:	Appears similar to the 1930 photograph.	
South:	Appears similar to the 1930 photograph, except residential development has expanded slightly.	
West:	Appears similar to the 1930 photograph.	

Year: 1949	**Scale:** 1" = 500'	**Source:** USDA
Site Description: The Site appears similar to the 1938 photograph.		
North:	Appears similar to the 1938 photograph, except commercial development has expanded slightly in the vicinity of the railroad.	
East:	Appears similar to the 1938 photograph.	
South:	Appears similar to the 1938 photograph.	
West:	Appears similar to the 1938 photograph.	

Year: 1953	**Scale:** 1" = 500'	**Source:** USDA
Site Description: A residential structure is located in the western portion of the Site in addition to a long, rectangular structure in the southwestern portion of the Site. The remainder of the Site is occupied by orchards.		
North:	Appears similar to the 1949 photograph.	
East:	Appears similar to the 1949 photograph, except some orchards have been replaced by vacant, graded land.	
South:	Appears similar to the 1949 photograph, except residential and commercial development have expanded slightly	
West:	Appears similar to the 1949 photograph.	

Year: 1959	**Scale:** 1" = 500'	**Source:** USDA
Site Description: The Site appears similar to the 1953 photograph except that the orchards have been replaced by vacant, graded land for redevelopment.		
North:	Appears similar to the 1953 photograph, except commercial development has expanded slightly	
East:	Appears similar to the 1953 photograph, except residential and commercial development have expanded slightly	
South:	Appears similar to the 1953 photograph, except commercial development has expanded slightly	
West:	Appears similar to the 1953 photograph.	

Year: 1966	**Scale:** 1" = 500'	**Source:** USGS
Site Description: The Site appears similar to the 1959 photograph except that two long, rectangular structures are shown on the eastern portion of the Site.		
North:	Appears similar to the 1959 photograph, except that Interstate 10 is now present to the north of the Site and several orchards have been replaced with vacant, graded land and residential development.	
East:	A road the commercial development and vacant land followed by a road and additional commercial and residential development.	
South:	Appears similar to the 1959 photograph, except a residential development is shown farther to the southeast of the Site.	
West:	Appears similar to the 1959 photograph.	

Year: 1968	**Scale:** 1" = 500'	**Source:** USDA
Site Description: The Site appears similar to the 1966 photograph.		
North:	Appears similar to the 1966 photograph.	
East:	Appears similar to the 1966 photograph.	
South:	Appears similar to the 1966 photograph, except that several orchards have been replaced by vacant, graded land and limited residential and commercial development.	
West:	Appears similar to the 1966 photograph.	

Year: 1975	**Scale:** 1" = 500'	**Source:** USGS
Site Description: The Site appears similar to the 1968 photograph, except a small structure is now present near the residential structure in the northwestern portion of the Site.		
North:	Appears similar to the 1968 photograph.	
East:	Appears similar to the 1968 photograph.	
South:	Appears similar to the 1968 photograph except that a commercial development is shown adjacent to the south of the Site.	
West:	Appears similar to the 1968 photograph.	

Year: 1985	**Scale:** 1" = 500'	**Source:** USDA
Site Description: The Site appears similar to the 1975 photograph.		
North:	A river followed by vacant, graded land and roads then commercial development and a railroad followed by the Interstate 10 freeway.	
East:	Appears similar to the 1975 photograph, except residential and commercial development have expanded slightly.	
South:	Appears similar to the 1975 photograph, except residential development has expanded slightly to the southeast of the Site.	
West:	Most of the A road then vacant, graded land and the continuation of the river with limited commercial development.	

Year: 1989	**Scale:** 1" = 500'	**Source:** USDA
Site Description: The Site appears similar to the 1985 photograph.		
North:	Appears similar to the 1985 photograph, except commercial development has expanded slightly.	
East:	Appears similar to the 1985 photograph, except commercial development has expanded slightly.	
South:	Appears similar to the 1985 photograph, except residential development has expanded slightly farther south of the Site.	
West:	A road followed by commercial development and the continuation of the river.	

Year: 1994	**Scale:** 1" = 500'	**Source:** USGS/DOQQ
Site Description: The residential structure remains on the western portion of the Site but the three long, rectangular structures are no longer present. Three smaller potential garage or storage structures are mapped across the Site with one located in the northeastern portion of the Site and two in the southeastern portion of the Site.		
North:	Appears similar to the 1989 photograph.	
East:	Appears similar to the 1989 photograph.	
South:	Appears similar to the 1989 photograph, except that commercial development has expanded slightly and parks/recreation areas are now mapped in the area.	
West:	Appears similar to the 1989 photograph.	

Year: 2006	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: The Site appears similar to the 1994 photograph except that the eastern portion of the Site is shown as vacant land used for the storage of storage containers and trailers.		
North:	Appears similar to the 1994 photograph, except that commercial development has expanded slightly.	
East:	Appears similar to the 1994 photograph, except that commercial development has expanded slightly.	
South:	Appears similar to the 1994 photograph, except that commercial and residential development have expanded slightly.	
West:	Appears similar to the 1994 photograph, except that commercial development has expanded slightly.	

Year: 2009	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: The Site appears similar to the 2006 photograph, except that the storage unit and trailer storage area has expanded to include the central and eastern three-quarters of the Site.		
North:	Appears similar to the 2006 photograph, except that commercial development has expanded slightly.	
East:	Appears similar to the 2006 photograph.	
South:	Appears similar to the 2006 photograph.	
West:	Appears similar to the 2006 photograph.	

Year: 2012	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: The Site appears similar to the 2009 photograph.		
North:	Appears similar to the 2009 photograph.	
East:	Appears similar to the 2009 photograph.	
South:	Appears similar to the 2009 photograph.	
West:	Appears similar to the 2009 photograph.	

Year: 2016	**Scale:** 1" = 500'	**Source:** USDA/NAIP
Site Description: The Site appears similar to the 2012 photograph.		
North:	Appears similar to the 2012 photograph.	
East:	Appears similar to the 2012 photograph.	
South:	Appears similar to the 2012 photograph.	
West:	Appears similar to the 2012 photograph.	

5.5.2 Sanborn Maps

No Sanborn Map coverage was available for the subject Site or surrounding properties. A copy of the Sanborn Maps letter stating this is provided in Appendix F (EDR, 2020d).

5.5.3 Topographic Maps

Northgate reviewed historic topographic maps for the Site obtained from EDR for the years 1899, 1901, 1954, 1967, 1973, 1980, 1988, 1996, and 2012. Copies of the topographic maps are provided in Appendix G (EDR, 2020e). Information from the topographic maps is summarized below.

Quadrangle: Redlands	**Scale:** 1:62,500	**Series:** 15 Minute
1899:	The Site is shown as vacant land that is part of a riverbed located north of the San Bernardino Motor Line railroad track and south of the Highlands Division railroad track. The Site is located within an area occupied by a grid of streets with limited development with dense urban development located farther to the east of the Site. A river is mapped to the south of the Site. The topography at the Site generally slopes gently to the west with topography in the Site vicinity generally sloping to the west and northwest.	
1901:	The Site and vicinity appear similar to the 1899 map.	

Quadrangle: Redlands	**Scale:** 1:24,000	**Series:** 7.5 Minute
1954:	The Site is entirely occupied by orchards. The Site vicinity is mapped with a grid of streets and land primarily occupied by orchards. A stream is mapped adjacent to the northern property boundary with railroads located to the north and south of the Site. Downtown Redlands is mapped to the east of the Site. Oil tanks are mapped farther to southwest and northwest of the Site.	
1967:	The Site is mapped as vacant land with a residential structure on the western corner. The Site vicinity appears similar to the 1954 map except that the Interstate 10 Freeway is mapped approximately half a mile north of the Site running east to west. Commercial development is mapped to the north and east of the Site, concentrated near the Interstate 10 Freeway, railroads and main highways.	
1973:	The Site and vicinity appear similar to the 1967 map.	
1980:	The Site is mapped with the residential structure in the western portion of the Site in addition to a small structure in the north-central portion of the Site, two long, rectangular structures in the northeastern portion of the Site, and an additional long, rectangular structure in the southwestern portion of the Site. The Site vicinity appears similar to the 1973 map, except that commercial and industrial development has expanded primarily to the north, east, and southeast of the Site with the remainder of the area occupied by orchards.	
1988:	The Site and vicinity appear similar to the 1980 map, except that commercial and industrial development has expanded in the Site vicinity primarily northwest alongside the Interstate 10 Freeway.	
1996:	The Site and vicinity appear similar to the 1988 map, except that downtown Redlands has expanded slightly to the east of the Site.	
2012:	The Site and vicinity are mapped in a grid of roads and highways and urban development. Greenbelts have replaced the orchards on the north, east and southwest vicinity.	

5.5.4 City Directories

Northgate reviewed a summary of local city directory listings for the Site and nearby vicinity available at approximate five year intervals from 1965 to 2017 obtained from EDR. A copy of the EDR city directory search is provided in Appendix H (EDR, 2020f).

The Site is identified at the historic address of 10843 Kansas Street as a private residence occupied by Alex and Elizabeth Kim between 1972 and 1981. It continued to be identified as a private residence occupied by Alex and Elizabeth Kim at the current address of 360 Kansas Street between 1985 and 1995. The Site was identified as a private residence with an unknown occupant between 2000 and 2014 and was not listed on the 2017 directory.

Listings in the Site vicinity were primarily private residences and commercial businesses including city offices, retail stores, rental business, transportation and shipping companies, storage unit companies, and building material sales and services. Royalite Plastics was identified at 300 Kansas Street, located adjacent to the south of the Site, between 1992 and 2000 followed by Spartech at this address in 2005 and a storage facility in 2014. Based on information available online, this facility appears to have operated as a plastic manufacturing facility.

Rettig Machine Shop, located across Kansas Street to the west of the Site, was identified at 301 Kansas Street between 1995 and 2017. Information available online indicates that this machine shop has been operational since 1946 and has included medium to heavy manufacturing and fabrication work for the aerospace, construction mining, railroads, and steel and aluminum processing industries.

Additionally, information obtained during the Site reconnaissance indicated that a furniture manufacturing facility, La Z Boy, previously operated adjacent to the east of the Site at 301 Tennessee Street between 1966 and 2019. No information was obtained that indicated a release from any of these manufacturing or machine shop facilities; however, they are land uses generally associated with the potential for releases of hazardous materials to the subsurface. Listings in the Site vicinity determined to be of potential environmental concern to the subject Site are described in detail in Section 5.1.2.

5.6 Interviews

The Site owner, Mr. Franz Rettig, was interviewed during a Site reconnaissance performed on April 14, 2020 with information obtained from him incorporated into Section 6.0 below. Additionally, Mr. Rettig provided information related to the history of the Site in response to a questionnaire as summarized in Section 4.4 above. No additional interviews were performed during the course of this assessment.

5.7 Previous Reports

No previous reports for the Site were provided to Northgate or were obtained during the course of this assessment through regulatory file reviews.

6.0 SITE RECONNAISSANCE

Current Site conditions were observed during a reconnaissance of the Site and near vicinity by Mr. Joshua Kajiyama of Northgate on April 14, 2020. Mr. Kajiyama was escorted by Mr. Franz Rettig, the property owner. Site photographs from the reconnaissance are attached at the end of this report. A Site Plan is shown on Figure 2.

6.1 Methodology and Limiting Conditions

The Site reconnaissance was performed by traversing the Site on foot and the general Site vicinity by car. There were no limiting conditions, with the exception of locked tractor trailers and shipping containers on the Site to the east of the single-family residence. According to Mr. Rettig, the containers are rented to various tenants who utilize the containers for storage. Mr. Rettig stated he did not have access to the locked container units and only those who rented the storage space had access to the containers. Mr. Rettig was not aware of any hazardous materials or chemicals being stored in the tractor trailers or shipping containers. However, the lack of access and ability to observe each container's contents represents a limiting condition at the Site.

6.2 General Site and Vicinity Conditions

6.2.1 Site

The Site is located in an area predominantly occupied by industrial and commercial development in Redlands, California. It is located north of West State Street and east of Kansas Street. The Site is occupied by a single-family residence that is located in the southwestern portion of the Site. A garage and storage shed are located along the northern boundary in the western half of the Site. The remainder of the western half of the Site is occupied by a dirt lot that is used for the storage of tractor trailers, shipping containers, and vehicles. The eastern half of the Site, which is separated from the western half by a north-south trending chain-link fence, is an open dirt lot. This dirt lot on the eastern portion of the Site was formerly used by La-Z-Boy Furniture for storage of their tractor trailers. Vegetation in the form of weeds and small trees is present along the Site boundaries.

A single-family residence is located in the southwestern portion of the Site. The single-family residence is a single-story structure of timber construction that contains two bedrooms, one bathroom, a kitchen, a living room, and a dining room. The front of the residence includes a driveway, a garage, and a landscaped yard. A pole-mounted transformer owned by Southern California Edison is located in the southwestern corner of the Site within the front yard area.

The transformer appears to be fairly new and in good condition. No evidence of ground staining or leaks was observed. At the time of the reconnaissance, the residence was occupied by Mr. Rubin Tucker and was filled with household furniture and personal belongings. A backyard is located to the east of the structure. No hazardous materials or chemicals were observed to be generated, stored, or used in this portion of the Site.

A former groundwater well and pump are located on a concrete pad is located to the east of the single family residence. Mr. Rettig indicated that the groundwater well was utilized by the chicken ranch that previously operated at the Site and has not been operated since. The well does not appear to have been abandoned. Any redevelopment at the Site may likely require the proper abandonment of this groundwater well in accordance with applicable current standards.

A garage and associated storage area that is reportedly utilized by a masonry contractor for storage of their materials and equipment, is located to the east of the residential structure. Materials stored by the masonry contractor included cement, mixing materials, bricks, stucco, and other similar products. Additional debris and household items were observed in the garage. A decommissioned vehicle was observed to be located within the garage adjacent to the masonry contractor's storage. Another decommissioned vehicle was present adjacent to the west of the garage in poor condition located on soil ground cover with the engine exposed to the elements. No evidence of leaks, stains, or spills was observed from any of the decommissioned vehicles.

A storage shed is located to the east of the garage area that is used for the storage of masonry related equipment. Equipment for concrete finishing, compressors, and a pump were observed in the shed. An approximately 2-gallon container filled about half full with gasoline was observed to be stored on the floor of the storage shed. Oil staining was observed on the floor of the shed likely from minor leaks from equipment. No soil staining was observed outside the shed. A smaller storage shed is located to the east of the garage and storage shed and was observed to be utilized for the storage of household debris and trash.

The north-central portion of the Site is used for the storage of vehicles and equipment. A boat, a construction truck with a crane, a front loader, two shipping containers, and various steel excavator buckets were observed to be stored in this area. The vehicles appeared to be in fair to good condition and operational. Northgate was not provided access to the storage containers during the Site reconnaissance. Mr. Rettig was not aware of any hazardous materials or chemicals being stored in the tractor trailers or shipping containers.

Various shipping containers and tractor trailers are stored along the southern fenceline of the Site. These shipping containers and tractor trailers were reported to be rented to various private tenants for storage. As a result, Northgate was not able to access these privately occupied

storage containers. Mr. Rettig was not aware of any hazardous materials or chemicals being stored in the tractor trailers or shipping containers.

The eastern half of the Site is separated from the western half by a north-south trending chain-link fence. The eastern half of the Site is an open dirt lot that is accessed via the former "La-Z-Boy Furniture" manufacturing facility located adjacent to the Site at 301 Tennessee Street. The lot is vacant and contains vegetation and household trash.

6.2.2 Site Vicinity

The Site is located in an area of industrial and commercial development located approximately 0.66 miles to the south of the Interstate 10 freeway. The Site is bordered to the north by The Mission Zanja historic irrigation canal, which is now tributary to the Santa Ana River, and Orange Blossom Trail followed by industrial and commercial development including an automobile towing company. The Site is bordered to the east by commercial development including a former furniture manufacturing store followed by Tennessee Street then commercial development. To the south, the Site is bordered by commercial development including a boat and locker storage facility. The Site is bordered to the west by Kansas Street followed by a machine shop then the Mission Zanja historic irrigation canal, the Orange Blossom Trail, and industrial development.

7.0 PHASE I ESA CONCLUSIONS AND RECOMMENDATIONS

This report presents the results of a Phase I ESA performed at the property located 360 Kansas Street in Redlands, California. The purpose of the investigation is to identify the potential presence of RECs at the Site. During the Site reconnaissance, Northgate was unable to access the tractor trailers and shipping containers stored on the Site as the containers are rented to various, private tenants who utilize the containers for storage. The Site owner did not have access to the locked container units and as a result, the contents could not be inspected during the course of this assessment. The owner was not aware of any hazardous materials or chemicals being stored in the tractor trailers or shipping containers. However, the lack of access and ability to observe each container's contents represents a limiting condition at the Site.

A REC refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following RECs were identified during the course of this assessment:

- Northgate did not identify any RECs during the course of this assessment.

A Controlled Recognized Environmental Condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Northgate did not identify any CRECs during the course of this assessment.

A Historical Recognized Environmental Condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following HRECs were identified during the course of this assessment:

- A 300-gallon gasoline UST was removed from the Site on June 26, 1995. A soil sample was collected to confirm closure and no further action was required by the SBCFPD prior to providing regulatory closure in a letter dated July 3, 1995.

A business environmental risk is defined by ASTM E 1527-13 as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those

environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations.

- The Site was historically occupied by orchards from at least the late 1890s through the early 1930s. Historic orchard operations have the potential to have included the use of pesticides that may have impacted shallow soil at the Site and surrounding area.
- A former groundwater well and pump are located on a concrete pad is located to the east of the single family residence. This groundwater well is not reportedly used currently but does not appear to have been abandoned. Any redevelopment at the Site may likely require the proper abandonment of this groundwater well in accordance with applicable current standards.
- Several decommissioned vehicles were observed to be located throughout the Site including one in poor condition located on soil ground cover with the engine exposed to the elements. No evidence of leaks, stains, or spills was observed, but this represents a potential business environmental risk for the Site. Additionally, oily residue was observed on the floor of a storage structure, but was not observed on the surrounding soil ground cover.
- Properties adjacent to the east, south, and west have been identified as historic manufacturing of furniture, plastics, and a machine shop, respectively. No information was obtained that indicated a release from any of these manufacturing or machine shop facilities; however, they are land uses generally associated with the potential for releases of hazardous materials to the subsurface.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

APPENDIX B

PHASE I ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

northgate
environmental management, inc.

Phase I Environmental Site Assessment Questionnaire

(User Provided Information Questionnaire)

Date: April 2, 2020

Your Name: FRANZ Rettig

Your Title: PARTNER

Site Name: _____

Site Location: 3600 KANSAS ST Redlands, CA

Relationship to Site: ☒ **Owner** ☐ **Occupant** ☐ **Purchaser** ☐ **Other (please explain)**

Length of Time Associated with Site: 25yrs

Please review and complete this questionnaire which will assist Northgate in completing our site assessment. If sufficient space in not provided, please compete your response on a separate sheet of paper and attach it to this questionnaire.

1. Are you aware of any environmental cleanup liens against the Site that are filed or recorded under federal, tribal, state or local law?

   ☐ Yes ☒ No ☐ Unknown ☐ N/A

   If Yes, please explain:_____

   _____

24411 Ridge Route Drive, Suite 130, Laguna Hills, California tel 949.716.0050 fax 949.716.0055
www.ngem.com

2. Are you aware of any activity or land use limitations, such as engineering controls (for contaminant control), land use restrictions or institutional controls, that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

3. Do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

4. Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

a) Do you know the past uses of the Site?

☒ Yes ☐ No ☐ Unknown ☐ N/A

If Yes, please explain: Chicken Ranch

_____

b) Do you know of specific chemicals that are present or once were present at the Site?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

c) Do you know of chemical spills that have taken place at the Site?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

d) Do you know of any environmental cleanups that have taken place at the Site?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

e) Do you know if any fill material has been imported to the Site?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

5. Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

6. Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

7. Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

8. Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of contamination at the Site?

☐ Yes ☒ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

9. Does the Site's purchase price reasonably reflect the fair market value of the property?

☒ Yes ☐ No ☐ Unknown ☐ N/A

If No, do you know the reason for lower purchase price? Is it possible that the lower purchase price is because of contamination known or believed to be present at the Site?

☐ Yes ☐ No ☐ Unknown ☐ N/A

If Yes, please explain:_____

_____

10. Have any of the following documents been prepared for the Site and, if so, can copies be provided to Northgate:

- Environmental site assessment reports ☐ Yes ☒ No ☐ Copies available
- Environmental compliance audit reports ☐ Yes ☒ No ☐ Copies available
- Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, National Pollutant Discharge Elimination System permits, underground injection permits) ☐ Yes ☒ No ☐ Copies available
- Registrations for underground storage tanks (USTs) and/or above ground storage tanks (ASTs) ☐ Yes ☒ No ☐ Copies available
- Registrations for underground injection systems ☐ Yes ☒ No ☐ Copies available

- Material safety data sheets ☐ Yes ☒ No ☐ Copies available
- Community right-to-know plan ☐ Yes ☒ No ☐ Copies available
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc. ☐ Yes ☒ No ☐ Copies available
- Reports regarding hydrogeologic conditions on the Site or in the surrounding area
  ☐ Yes ☒ No ☐ Copies available
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Site or relating to environmental liens encumbering the Site ☐ Yes ☒ No ☐ Copies available
- Hazardous waste generator notices or reports ☐ Yes ☒ No ☐ Copies available
- Risk assessments ☐ Yes ☒ No ☐ Copies available
- Recorded Activity and Use Limitations (e.g. deed restriction, asphalt cap)
  ☐ Yes ☒ No ☐ Copies available

If you know of specific chemicals or other hazardous materials (e.g., PCB associated with transformers, batteries, etc.) that are present or were once present at the property, how were they used, stored, and disposed?

No

Do you know of aboveground or underground storage tanks on the property? If yes, what did they contain?

No

Do you have any knowledge or experience with nearby/adjacent properties? If yes, do you have knowledge of chemicals, releases, or cleanups on these properties?

No

How long have you owned, operated, leased, or been familiar the present and past uses of the property?

25 yrs

Northgate Environmental appreciates your assistance on this project.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

TELEDYNE INC TELEDYN EPA ID:: CAD008386641	***840 W BROCKTON AVE***	***NE 1/2 - 1 (0.807 mi.)***	***P77***	***351***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SOUTHERN CALIFORNIA EPA ID:: CAD981681497	287 TENNESSEE	ESE 0 - 1/8 (0.117 mi.)	D16	86

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/28/2019 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 10/28/2019 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 10/21/2019 has revealed that there are 11 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 20 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Hazardous Waste Summary:

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D008
. Waste name: LEAD

SPARTECH PLASTICS INC (Continued) **1000148996**

. Waste code: D009
. Waste name: MERCURY

Violation Status: No violations found

FINDS:
Registry ID: 110002664475
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002664475

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site Name:	RETTIG MACHINE SHOP, INC
Violation Date:	11-26-2014
Citation:	HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description:	Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 12/04/2014. Failure to manage contaminated containers lawfully (CCR 66261.7) Containers, or inner liners removed from a container, that previously held a hazardous material or a hazardous waste are considered contaminated containers and shall be managed properly. Empty contaminated containers larger than 5 gallons must be marked with the word G EmptyG , the date that the container became empty and must be removed from the site within one year of that

RETTIG MACHINE SHOP INC (Continued) **S104769520**

date. Observed (10) empty 55 gallon drums that previously held hazardous materials. Per operator, the date that the drums became empty is unknown. Corrective Text: Remove all empty containers that previously held hazardous materials or hazardous waste within 30 days of this report. SUBMIT copies of all waste records to this Department.

Violations:

Site ID:	61379
Site Name:	RETTIG MACHINE SHOP, INC
Violation Date:	11-26-2014
Citation:	HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description:	Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 12/04/2014. Failure to manage contaminated containers lawfully (CCR 66261.7) Containers, or inner liners removed from a container, that previously held a hazardous material or a hazardous waste are considered contaminated containers and shall be managed properly. Empty contaminated containers larger than 5 gallons must be marked with the word G EmptyG , the date that the container became empty and must be removed from the site within one year of that date. Observed (10) empty 55 gallon drums that previously held hazardous materials. Per operator, the date that the drums became empty is unknown. Corrective Text: Remove all empty containers that previously held hazardous materials or hazardous waste within 30 days of this report. SUBMIT copies of all waste records to this Department.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: Yes
Transporter of hazardous waste: Yes
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Region:	STATE
Facility Status:	**Open - Site Assessment**
Status Date:	07/13/2018
Global Id:	T10000011531
Lead Agency:	SANTA ANA RWQCB (REGION 8)
Lead Agency Case Number:	Not reported
Latitude:	34.06056
Longitude:	-117.20033
Case Type:	Cleanup Program Site
Case Worker:	CAB
Local Agency:	Not reported
RB Case Number:	T10000011531
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Diesel, Gasoline
Site History:	On June 19, 2003, various above ground fuel storage tanks (ASTs), above and below ground piping, and fuel dispensers were removed from the site during demolition activities. The ASTs were reported to contain diesel fuel, gasoline or kerosene. Additionally, an underground storage tank (UST) containing waste oil was also excavated and removed. The tank and fuel system removal activities were completed by A&J ENVIRONMENTAL, INC. of Riverside, California. During the removal of the various fueling systems on June 19, 2003, under the supervision of Ms. Betti MacGregor of the SBCFD, initial compliance soil samples were collected by A&J staff. All samples were collected between approximately two and three feet below site grade. The results of the soil analyses showed evidence of petroleum fuel releases near several of the fueling system features. On December 18, 2003, AEM observed the excavation of the shallow soil in the areas of elevated concentrations of petroleum compounds, based on the previous samples collected on June 19, 2003. Verification samples were then collected from the bottom and sidewalls of five distinct excavated areas. These verification soil samples indicated that the vertical extent of impacted soil was not removed in three of the five excavation locations.

3851 ft. **Site 1 of 2 in cluster O**

Relative: Higher
Actual: 1323 ft.

Manufactured Gas Plants:

The site is a 1-acre parcel which was operated as a MGP from 1906 to 1921 by various utility companies. In 1921, the Gas Company discontinued operations at the site. The site was dismantled prior to 1928. PEA field work conducted in June 1993 revealeed visible soil contamination (possibly with lampblack).

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 12/21/2001
Comments: RP placed wood chips to fully cover the exposed soil in two planters at the site. High concentrations of lead have been detected at these planters during previous investigations. The placement of these wood chips is a temporary measure that will minimize the contaminant exposure to human health.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 09/11/2003
Comments: CEQA - ND: DTSC completed Removal Action Workplan (RAW) and Negative Declaration (ND). The RAW and ND were approved on 9/11/03. The Notice of Determination (NOD) of a CEQA was signed on 9/11/03. Removal action will occur with the adjacent Redlands II site. The proposed cleanup option is excavation and offsite treatment and offsite stabilization. Approximately 40,000 cubic yards of contaminated soil will be removed from these two sites.

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D018
. Waste name: BENZENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6484789.8

Waste code: D008
Waste name: LEAD
Amount (Lbs): 7051932.8

Hazardous Waste Summary:

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 272
. Waste name: Polymeric resin waste

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 491
. Waste name: Unspecified sludge waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

TELEDYNE INC TELEDYNE BATTERY (Continued) **1000201836**

. Waste code: 611
. Waste name: Contaminated soil from site clean-ups

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D000
. Waste name: Not Defined

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D018
. Waste name: BENZENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6484789.8

Waste code: D008
Waste name: LEAD
Amount (Lbs): 7051932.8

Violations:
Site ID: 74280
Site Name: TELEDYNE BATTERY PRODUCTS
Violation Date: 05-09-2018
Citation: 22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes: Returned to compliance on 06/06/2018. OBSERVATION: A written hazardous waste tank assessment has not been maintained for the water treatment tank system. CORRECTIVE ACTION: Obtain a written hazardous waste tank system assessment for the water treatment tank system in accordance with 22 CCR 15 66265.192 and submit a copy to the CUPA.

Citation: 22 CCR 15 66265.192(a) - California Code of Regulations, Title 22,

TELEDYNE BATTERY PRODUCTS (Continued) **1000201837**

	Chapter 15, Section(s) 66265.192(a)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes:	Returned to compliance on 06/06/2018. OBSERVATION: A written hazardous waste tank assessment has not been maintained for the water treatment tank system. CORRECTIVE ACTION: Obtain a written hazardous waste tank system assessment for the water treatment tank system in accordance with 22 CCR 15 66265.192 and submit a copy to the CUPA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020

Next Scheduled EDR Contact: 04/13/2020
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

KANSAS STREET PROPERTY
360 KANSAS STREET
REDLANDS, CA 92373

TARGET PROPERTY COORDINATES

Latitude (North):	34.05679 - 34° 3' 24.44''
Longitude (West):	117.203136 - 117° 12' 11.29''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	481252.9
UTM Y (Meters):	3768276.8
Elevation:	1257 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630631 REDLANDS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

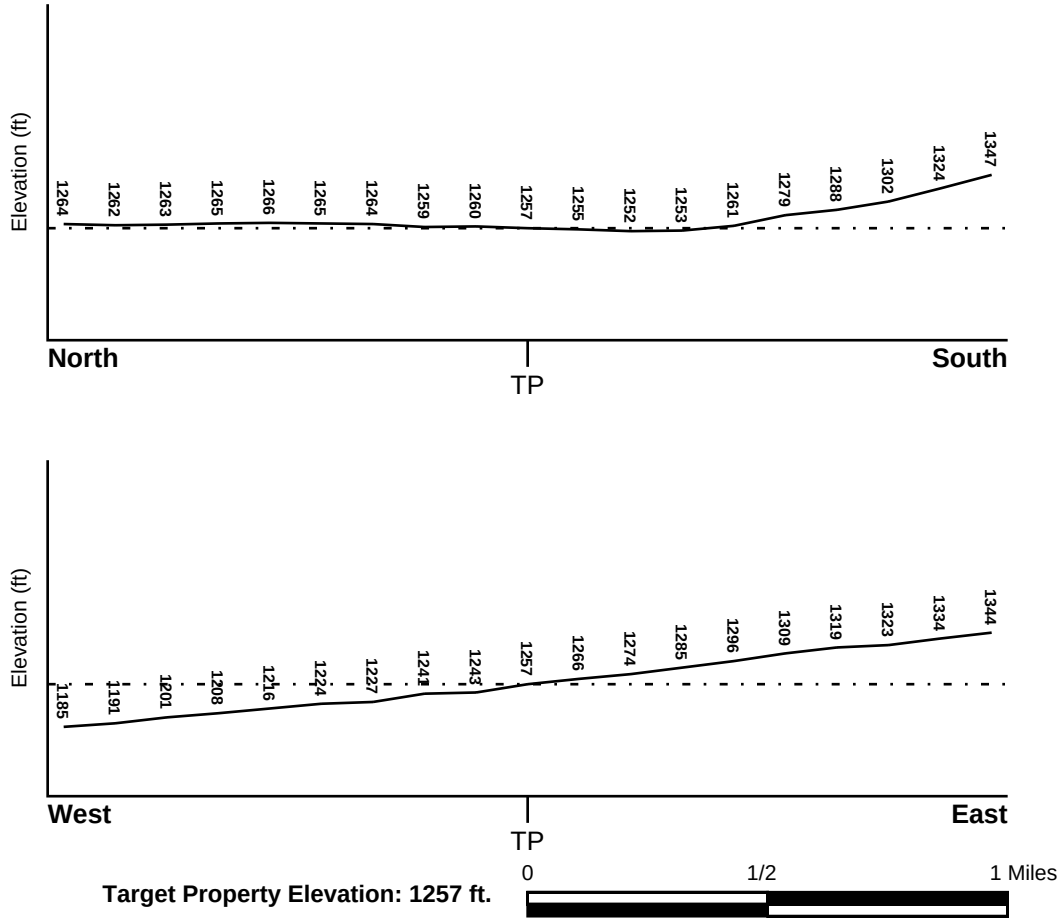
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 1257 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C0090G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06071C8703H	FEMA FIRM Flood data
06071C8704H	FEMA FIRM Flood data
06071C8708H	FEMA FIRM Flood data
06071C8711H	FEMA FIRM Flood data
06071C8716H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
E19	1/2 - 1 Mile South	WNW
2G	1/2 - 1 Mile South	WNW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6
2	11 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

360 KANSAS STREET
REDLANDS CA 92374

SUBJECT: UNDERGROUND STORAGE TANK REMOVAL AT 360 KANSAS STREET, REDLANDS, CALIFORNIA

The Department has received the sample results and/or closure report submitted by **Erickson Inc.** dated **June 29, 1995**.

After review of the reports prepared by you or your agent, it has been determined that the extent of contamination or lack thereof would indicate that no further investigation is warranted at this time.

It is important to note that this can not be construed as a release of liability for the site or declaration that the site is free from contamination. Should further projects or environmental investigations reveal additional contaminants on site you will be responsible and held liable for the investigation and remedial actions.

If you have any questions, please call (909) 387-3082.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Northgate Env. Management, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX I

ENVIRONMENTAL PROFESSIONAL QUALIFICATIONS

DERRICK S. WILLIS
PRINCIPAL II

Mr. Willis has over 28 years' experience serving both public sector and private clients in California and Canada on a wide variety of environmental projects. For the last several years, Mr. Willis' focus has been on formulating and facilitating closure and development strategies for large, complex, high profile, environmental projects for aerospace, industrial, and real estate development firms. Mr. Willis has extensive experience with due diligence/property transfer and development issues in a wide variety of industrial and regulatory settings. He is familiar with the industrial processes that generate environmental wastes, the fate and transport of chemicals in the environment, the potential adverse effects of these substances on human and ecological receptors, compliance challenges faced by business operators, the performance of remedial technologies, and how these issues play into site acquisition, development, and divestiture.

REPRESENTATIVE EXPERIENCE

Environmental Site Assessments

- ***RREEF, Multiple Sites, Southern California —*** Mr. Willis serves as client director for RREEF on multiple projects including acquisition studies (which include mold, asbestos and indoor air quality surveys), tenant audit programs, soil remediation, groundwater investigation and remediation, third party oversight, agency negotiation, and mold and asbestos abatement programs.
- ***Watson Land Company, Multiple Sites, Southern California —*** Mr. Willis has directed over 40 acquisition-related due diligence investigations for Watson Land Company (Watson). Scope of work has included Phase I ESAs, soil and groundwater investigations, risk evaluations, agency negotiation, and aiding Watson in evaluating and quantifying the potential risk associated with recognized environmental concerns.
- ***Various Clients, Various Locations, Southern California —*** Project manager for more than 200 Phase I environmental assessments (ESAs) for industrial facilities including aerospace, furniture and paper manufacturing factories; utility companies, vehicle and equipment maintenance facilities; and landfills as well former agricultural land. The objective of the ESAs was to evaluate and quantify potential liabilities associated with the acquisition and development of the properties.

Site Investigation and Remediation

- ***Kimco Realty Corporation, multiple locations in California and Nevada, –*** Serves Principal-in-Charge and program manager for investigation and remediation of several dry-cleaner sites in California (Cupertino, Daly City, Lakewood, and LaVerne) and Reno, Nevada. Projects range from investigation of soil impact to remediation of soil and groundwater. Mr. Willis is responsible for developing remedial strategies, negotiating with regulatory agencies, and providing technical direction to staff in order to evaluate and remediate site impacts, and bring sites to regulatory closure.

- ***Baker Cold Storage, Port of Long Beach Pier B Facility, California –*** Serves as project manager for investigation, remediation and redevelopment support of a 12-acre former wood treatment facility in the Port of Long Beach. The site is impacted with pentachlorophenol (PCP), metals, VOCs, and dioxins/furans. In addition, tidally influenced groundwater is impacted with PCP and petroleum hydrocarbons and methane charged from oilfield operations. Mr. Willis evaluated investigation data, managed a groundwater investigation program and develop a remedial approach for soil and groundwater. Mr. Willis successfully streamlined the regulatory process by aggregating the remedial work plans including RCRA closure of a drip pad, into one encompassing work plan (Soil and Groundwater Response Plan) and one Remedial Design Document ([RDD] that incorporated the facility design components into building mitigation design), and securing agency approvals on components of site construction concurrent with development of the RDD. Site is currently being developed with a 250,000 square-foot cold storage facility.
- ***RREEF, Villa Marina Marketplace, Marina Del Rey, California —*** Mr. Willis managed the design and installation of a groundwater treatment system to treat groundwater impacted from metals and selenium to meet NPDES discharge requirements for a basement dewatering system for a shopping center. He currently manages the operation, maintenance and reporting associated with the ongoing dewatering system.
- ***Black Mountain Industrial Complex Remedial Design and Implementation, Nevada –*** Served as project manager for expedited investigation and remediation program for the Tronox industrial facility within the BMI Complex. Previously the world's largest magnesium production facility during World War II, the site was later utilized for the manufacture of rocket fuel, other products, and most recently alkali and manganese oxide-based chemicals. Historical Industrial operations resulted in subsurface impacts from heavy metals, perchlorate, pesticides, chlorinated solvents, asbestos, radionuclides, and other chemicals. Developed streamlined investigation and remedial approach, prepared remedial plans, and rapidly mobilized and managed a team of staff and subcontractors to remove approximately 800,000 cubic yards of soil from the site to meet commercial soil cleanup goals for direct contact exposure in an expedited timeframe.
- ***Hawaii Wood Preserving Company Treatment Facility, Maui, Hawaii –*** Served as project manager, for decommissioning, investigation, remediation, and closure for a former wood treatment facility to allow for redevelopment. The site operated as from 1972 to 2001 to treat lumber with PCP, chromated copper arsenate (CCA), permithrin, and disodium octoborate. Chemicals were profiled, all equipment was decontaminated and ecommissioned, and verification sampling was conducted as part of decommissioning. A remedial investigation and remedial alternatives analysis was developed and implemented to investigate and develop a path-forward to closure. The implemented remedial approach consisted of site capping and long-term groundwater monitoring.
- ***Lockheed Martin Former International Light Metals Facility, Torrance, California —*** Served as project manager and principal investigator for a 67-acre aerospace facility where client objective was expedited redevelopment. The project included facility demolition, preparation and implementation of a Resource Conservation and Recovery Act (RCRA) closure plan for 11 permitted RCRA units, negotiations with the Department of Toxic Substance Control (DTSC), preparation of a RCRA Facility Assessment (RFA) (210 features identified that required intrusive investigation), implementation of a RCRA Facility Investigation (RFI) for soil and groundwater, preparation of a health-based risk assessment, and implementation of soil remediation. Site closure for soil was granted only three years after project initiation, in contrast to the normal six to eight year process, and has been used as an example by head DTSC officials as an example of

industry and the regulatory community working together to achieve expedited site closures for property redevelopment purposes. Mr. Willis also developed strategy for groundwater investigation and remediation and negotiated the corrective action consent agreement (CACA) with DTSC.

- ***Playa Capital Corporation, Playa Vista Development Project, Los Angeles, California —*** Mr. Willis served as program manager for the Playa Vista project, one of the largest and most visible brownfield development projects in the country. At 1,100 acres, it is the largest underway in Los Angeles County. His primary responsibility included environmental program management (including scoping, developing, scheduling, and tracking environmental activities for the development project), risk management (including developing and negotiating with agencies for appropriate cleanup criteria), remedial strategy/management (including development and implementation of pilot tests and oversight of investigation and remediation activities), agency/RP/buyer negotiations, consultant and contractor selection/oversight, coordination with Playa's infrastructure group on the development/implementation of integrated remedial approach where appropriate, litigation support, data management, and transactional support with respect to the sale of remediated parcels.
- ***Project Manager, Confidential Client, Buena Park, California —*** Served as project manager for multi-media remediation project at a commercial development in Buena Park, California. The site was a former food processing facility that was redeveloped into commercial offices and warehouse space. Evaluated the environmental liability for a Real Estate Investment Trust (REIT) that subsequently purchased the property, and managed remediation program in conjunction with site redevelopment.
- ***Project Manager, Brownfield Redevelopment, Torrance, California —*** Served as project manager for site redevelopment project for a PacTrust. Evaluated environmental liabilities associated with a 12-acre parcel that was part of a butadiene plant (Del Amo Superfund Site) left undeveloped as a brownfield, and formulated a strategy to expedite regulatory closure and redevelopment. A comprehensive investigation was completed on the parcel, and the report submitted to the Environmental Protection Agency (EPA) for review. Successfully negotiated with EPA to conduct a non-Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) closure program. Conducted soil remediation program under EPA oversight in conjunction with site construction activities.
- ***Project Manager, Investigation and Remediation Program, Safety Kleen, Vancouver, British Columbia, Canada —*** Managed remediation of former solvent recycler transfer stations in British Columbia and Alberta, Canada. Sites involved characterization and remediation of soil and perched groundwater zones. Assessed feasibility of vapor extraction for cleanup of vadose zone contamination, and designed and installed a dewatering system for perched water in former tank cavities and surficial saturated zone for Vancouver transfer station. Achieved regulatory site closure two years faster than previous consultant's estimate.
- ***Cupples Manufacturing, Investigation and Remediation Program, La Mirada, California —*** Project manager for soil/groundwater characterization and remediation program at a truck maintenance facility in La Mirada, California. Conducted an underground storage tank and clarifier removal program in conjunction with site characterization activities. Implemented remediation of soil and groundwater impacted with petroleum hydrocarbons. Negotiated and received closure from Regional Water Quality Control Board (RWQCB).
- ***Alberta Environment, Abandoned Wood Treatment Sites, Various Locations, Alberta, Canada —*** Project manager for the Wood Preserving Sites Characterization Program for Alberta

Environment. Performed site characterization of four former wood preservation sites in Alberta, Canada. The sites had been used for many years for treating wood poles and railroad ties with a pentachlorophenol/diesel mixture. Soil and/or groundwater were impacted at the sites. Soil borings and groundwater monitoring wells were installed, and laboratory analysis of soil and groundwater was performed, to help determine the lateral and vertical migration of dissolved-phase hydrocarbons in the groundwater and dense non-aqueous phase liquids (DNAPLs) through glacial tills and several non-confining layers. Detailed drilling and sampling plans were necessary to ensure correct evaluation of vertical DNAPL migration. Aquifer tests were performed and receptor data were collected in order to formulate a quantitative assessment of both health-based and environmental risk.

- ***Texaco Refining and Marketing Inc., Investigation and Remediation Programs, Various Locations, Southern California —*** Responsible for remediation programs at several petroleum retail outlets for Texaco in the southern California area. Projects included soil and groundwater investigation programs, underground storage tank (UST) removals, remedial design (including design and implementation of vapor extraction and aquifer tests), implementation of remedial program, and operation and maintenance of remediation systems. This included designing, specifying, permitting, and installing of all equipment (including piping, downhole pumps, off-gas treatment, and water treatment).
- ***Groundwater Contamination Investigation and Analysis, Technisol, Raymond, Alberta, Canada —*** Conducted a groundwater investigation program at a solvent recycling facility located in southern Alberta, Canada. The program was implemented to determine the lateral and vertical extent of several species of chlorinated volatile organic compounds present in the confined aquifer beneath the facility. Aquifer testing was performed to estimate migration rates and to provide preliminary data for remedial action. Successfully negotiated with Alberta Environment (lead regulatory agency) for monitored natural attenuation approach.
- ***Pier A Railyard, Port of Los Angeles, Los Angeles, California —*** Managed a soil and groundwater investigation program at a Port of Los Angeles rail transfer yard. The objective of the project was to characterize previously identified polynuclear aromatic compounds, volatile organic compounds, and petroleum hydrocarbons in the soil and groundwater, and identify any regulated building materials in the site structures in order to facilitate an expedited redevelopment program. The project was finished ahead of schedule and under budget.
- ***Soil and Groundwater Remediation, Texaco, Various Locations, Southern California —*** Conducted vapor extraction tests, performed data analysis, and generated recommendations for an industrial manufacturing facility to determine the viability of using vapor extraction for remediating chlorinated solvents, primarily tetrachloroethene (PCE), present in the soil beneath the facility. Each test was designed to assess air flow rates and vacuums, vertical interference and crossflow, radii of influence, potential for water upwelling, and effectiveness of vapor extraction in both vadose and capillary zones. Extracted vapors were collected to determine volatile organic compound concentrations. Data were used to determine well spacing and slotting intervals, optimum flow rate/vacuum combinations, extraction blower sizing, and vapor treatment equipment.
- ***Texaco, Various Locations, Southern California—*** Responsible for preparation of South Coast Air Quality Management District (SCAQMD) permitting, installation, operation and maintenance of thermal and catalytic oxidizers/vapor extraction systems for the remediation of soil (containing petroleum hydrocarbons) beneath operating service stations.

Litigation Support

- ***Litigation Support, Confidential Client, City of Commerce, California –*** Conducted site review of historical records, developed and implemented soil, soil vapor, and groundwater investigation, and developed Site Conceptual Model (SCM) for former aerospace facility that was now developed as a multi-tenant warehouse. Successful in being able reconstruct historical SCM to show that environmental impacts were caused by historic aerospace operations from the 1940s to 1960s and not from the more recent tenant operations. Provided information and deposition for property management firm's counsel.
- ***Mediation Support, Confidential Client, Los Angeles, California –*** Project manager for mediation support of insurance claim for cost reimbursement for handling, transportation and disposal of petroleum contaminated soil encountered during development of a high rise on a former hospital site. Work consisted of using photogrammetry and historical records to develop a volume of contaminated soil and expert witness report using spatial data analysis, rebuttal of expert witness reports, and expert witness testimony as part of mediation where a judgement was made in favor of our client for the full reimbursement cost.

EDUCATION

B.S., Geology, University of Alberta, Alberta, 1988

PROFESSIONAL HISTORY

Northgate Environmental Management, Principal, 2006 to date
LFR Levine Fricke, Principal Hydrogeologist, 2002 – 2006
Integrated Environmental Services, Director of Operations/Senior Program Manager, 1999– 2002
ARCADIS Geraghty & Miller, Inc. Senior Hydrogeologist, 1993 – 1999
Environmental Design Corporation, Vice President, 1992
Environmental Science & Engineering, Inc., Staff Geologist, 1991
Terracon Geotechnique, Ltd., Geologist, 1989 – 1991
Contract Positions, Various Locations, Geologist, 1988

REGISTRATIONS

Certified Environmental Manager, Nevada, No. EM 2252

NICKY G. ROBINSON, PE, QSD, QSP
SENIOR I ENGINEER

Ms. Robinson is a Professional Engineer with a variety of experience serving both public sector and private clients. Her professional engineering and management experience has been focused in remediation design and construction site oversight, Phase I and II environmental site assessments, environmental field sampling, environmental audits, site inspections, and technical data review. Ms. Robinson's environmental field experience includes soil and groundwater sampling, soil vapor studies, stormwater sampling, indoor air quality studies, air monitoring activities, and site cleanups. She has considerable experience managing and performing environmental due diligence and property transfer projects. Ms. Robinson's project experience also includes management of Total Maximum Daily Loading (TMDL) studies in surface waters; collecting storm water samples to quantify "first-flush" impacts and composite samples for pollutant loading characterization; obtaining NPDES permits and managing the water sample collection and analysis process to ensure permit compliance. Ms. Robinson is a licensed Civil Engineer in the state of California. She is a California licensed Qualified SWPPP Developer and Qualified SWPPP Practitioner and has received the OSHA 40 Hour HAZWOPER Training.

REPRESENTATIVE EXPERIENCE

Environmental Characterization and Remediation

- ***Southern California Edison (SCE) Power Pole Relocation into Closed Landfill, Carson, California*** **–** Ms. Robinson was the project manager for the relocation of power poles and associated anchoring systems into a closed and capped landfill, which was under the regulatory oversight of the DTSC. Ms. Robinson was responsible for providing environmental and engineering direction to SCE to guide their design, construction, and monitoring activities related to operations at the landfill to obtain DTSC approval. She provided direct field oversight of a field investigation program to obtain environmental and geotechnical design data to direct the final power pole design, which included air monitoring for SCAQMD Rules 1150, 402, and 403. Ms. Robinson was responsible for communication and providing technical support to SCE on this project. She was also responsible for preparing technical documents and management to ensure the overall project success and quality.
- ***Baker Cold Storage Facility Brownfield Clean-up, Long Beach, California*** **–** Ms. Robinson is the engineer of record for the remedial design for a site that is impacted with pentachlorophenol (PCP), metals, VOCs, and dioxins/furans and under the regulation of the DTSC. She assisted with the development of the Soil and Groundwater Response Plan and the Remedial Design Document for the site that is currently being developed with a 250,000 square-foot cold storage facility. During development, Ms. Robinson conducted oversight of the site activities, including soil import/export, excavation, construction, and the installation of a methane barrier, and she has performed work zone and perimeter air monitoring. She also prepared daily activity reports including the analysis of air monitoring and Rule 1166 monitoring data to submit to the DTSC. Ms. Robinson coordinated field activities including the decontamination and sampling of former drip pads, air monitoring

activities, and wastewater sampling. She managed the data obtained from daily field activities and trained the field staff. Ms. Robinson prepare the Remedial Action Completion Report and the Operation and Maintenance Plan for the remedial activities.

- ***Black Mountain Industrial Complex, Henderson, Nevada –*** Ms. Robinson was a field engineer on site for the remediation of Tronox's industrial facility in Henderson, Nevada in which approximately 800,000 cubic yards of impacted soil were removed. Previously the world's largest magnesium production facility during World War II, the site was later utilized for the manufacture of rocket fuel, other products, and most recently alkali and manganese oxide-based chemicals. Historical Industrial operations resulted in subsurface impacts from heavy metals, perchlorate, pesticides, chlorinated solvents, asbestos, radionuclides, and other chemicals. Her responsibilities included providing technical oversight of excavation, construction, and groundwater pumping well installation activities; collecting groundwater samples; obtaining soil and air samples; monitoring dust levels; and conducting weekly site inspections for SWPPP compliance. Ms. Robinson coordinated with design engineers to oversee the installation of their remediation and monitoring systems and provide field support and input for design revisions.
- ***CenterCal Development, Long Beach, California –*** Ms. Robinson is the engineer of record for the remedial design of a property in Long Beach that was formerly partially occupied by a gasoline service station with documented leaking underground storage tanks (USTs) impacting the subsurface. Historic site operations also included oil wells and crude oil pipelines. Ms. Robinson assisted with the design of an excavation program to remove impacted materials to accommodate the development of a mixed-use commercial and residential facility. Her work included analyzed historic investigation results and analytical data to determine the remediation program and provide support for the engineering decisions to reach a settlement agreement with the responsible party for the contamination present at the Site. Ms. Robinson also assisted with the preparation of various documents and reports for the site including a Remedial Action Plan, remedial costing analysis, and responses to questions from regulators and the responsible party.
- ***Kimco Lakewood Plaza, Bellflower, California –*** Ms. Robinson conducted soil and indoor air sampling to help determine a remedial design for soil impacts with VOCs from a former dry cleaning operation. She oversaw excavation activities and collected confirmation samples. Ms. Robinson managed the data and documents associated with the project and assisted with the preparation of final reports.

Environmental Site Assessments, Due Diligence, and Site Investigations

- ***Baker Cold Storage Facility Brownfield Clean-up, Long Beach, California –*** Ms. Robinson prepared an initial Phase I ESA and conducted site visits for the site that is impacted with pentachlorophenol (PCP), metals, VOCs, and dioxins/furans and under the regulation of the DTSC. In addition, tidally influenced groundwater is impacted with PCP and petroleum hydrocarbons and methane charged from oilfield operations. She also conducted a groundwater investigation program to evaluate impacts for the design of the remedial actions and prepared reports documenting the field investigations for submittal to the DTSC.
- ***CenterCal Development, Long Beach, California –*** Ms. Robinson prepared an initial Phase I ESA, conducted site visits, coordinated a site investigation program with soil, groundwater, and soil vapor sampling, and prepared reports and documentation for a property in Long Beach that was

formerly partially occupied by a gasoline service station. The site was purchased by a developer to construct a mixed-use commercial and residential facility after remediating the known impacts that resulted from releases at the underground storage tanks associated with the gasoline station.

- ***Historic Oil Fields, Brea, California –*** Ms. Robinson conducted a Phase I ESA of historic oil fields spanning over 3,000 acres in Brea with operations still active across portions of the site. She coordinated a limited Phase II investigation across the site and utilized the results to prepare remedial cost documents, estimate of impacted material, and recommendations for areas of potential concern for redevelopment. She prepared all documentation, figures, and spreadsheets for meetings with developers interested in redeveloping the site.
- ***Park and Market Redevelopment, San Diego, California –*** Ms. Robinson managed and performed field activities, investigations, and oversight of the redevelopment of a property located in downtown San Diego that was formerly occupied by automobile repair facilities and several burn wells and pits associated with historic residential development. She conducted a Phase I and II ESA of the site which is currently being redeveloped with a high-rise residential tower over commercial development with subterranean parking extending to approximately 50 feet below ground surface. During excavation activities, impacted soils were encountered when former burn wells impacted with elevated concentrations of lead up to 60,000 parts per million. Ms. Robinson prepared a site-specific Health and Safety Plan and a Soil Management Plan for use during redevelopment. She also collected samples of impacted areas encountered, provided guidance to the developer regarding the disposal of the impacted material and proper handling procedures, and provided oversight of all work conducted with impacted materials. Ms. Robinson prepared summary reports of the field activities including analytical results, impacted soil removal totals, and photograph documentation of all activities.
- ***Monsanto Former Detergent Manufacturing Facility, Carson, California –*** Ms. Robinson measured groundwater levels and collected groundwater samples to monitor for hydrocarbons, predominantly benzene, which migrated through the soil to the groundwater beneath the site and migrated downgradient. Some samples were collected on the adjacent oil refinery property and Ms. Robinson received the appropriate training to access the refinery.
- ***Oxygen Biosparge Pilot Scale Investigation, Carson, California –*** Ms. Robinson collected groundwater samples using low flow sampling techniques as part of an oxygen biosparge in situ treatment system. Work was performed using supplied air in Level B personal protective equipment. She also routinely works in conjunction with a mobile laboratory to simultaneously collect and analyze soil vapor samples to monitor benzene concentrations as part of the pilot scale investigation.
- ***Los Angeles World Airports, Los Angeles International Airport, Los Angeles, California –*** Ms. Robinson reviewed historical reports, documents, and data for multiple portions of the Los Angeles International Airport and prepared summary documents. She also managed the review of similar work by other consultants for the facility. Ms. Robinson utilized the results of these investigation efforts to develop a facility wide groundwater monitoring program.
- ***Former Paint Facility, City of Commerce, California –*** Ms. Robinson was responsible for coordinating the field activities associated with collecting soil vapor and LNAPL samples for a former paint facility. A soil vapor extraction system was operated on the site and sampling was performed to develop a conceptual site model to assess the effectiveness of continued remediation

at the Site. Ms. Robinson was responsible for coordinating the sample collection and analysis with the laboratory and worked to draft the analytical report.

- ***Port of Oakland Embarcadero Cove, Oakland, California –*** Ms. Robinson was a staff engineer on site to oversee the abandonment of existing groundwater monitoring wells and the installation and development of new groundwater monitoring wells. Her responsibilities also included annual groundwater sampling at the site that is known to have been impacted by VOCs, SVOCs, organochlorine pesticides, PCBs, dioxins, and furans from facilities that previously occupied the site that were known to have handled and stored solvents, refined petroleum products, wood, preservatives, pesticides, and herbicides. She also assisted the preparation of the annual report and five-year review for the site.
- ***Former Apartment Complex Close-Out, Carson, California –*** Ms. Robinson was responsible for the oversight of environmental field activities related to the demolition of an existing apartment complex for redevelopment. Field activities included asbestos and lead-based paint surveys and removal, hazardous waste packaging and disposal, geophysical surveys, and air monitoring. Ms. Robinson also prepared close out reports and documents for the site.
- ***Former Dry-Cleaning Facility, Santa Rosa, California –*** Ms. Robinson performed low flow groundwater sampling for quarterly reporting for a site containing both a dry cleaner and a residential apartment building to monitor impacts to the groundwater. The site is known to have existing soil and groundwater impacts from historic use and storage of petroleum products and other hazardous substances on surrounding sites.
- ***Wetland Restoration Project, San Francisco, California –*** Ms. Robinson reviewed contractor submittals, including dust control, decontamination, soil stabilization, and execution plans for compliance with the project specifications and regulatory requirements and prepared responses to requests for information for the restoration of 26.5 acres of tidal wetland habitat. The site is known to have soil containing naturally occurring asbestos, copper, lead, nickel, zinc, TPH, PAHs, pesticides, and PCBs and some metals impacting groundwater.
- ***Environmental Site Assessments, Various Locations, California, Nevada, and Texas –*** Ms. Robinson has managed and conducted dozens of Phase I and Phase II environmental site assessments for commercial, industrial, and residential properties. Her responsibilities included complete site history reviews, identifying recognized environmental conditions and areas of potential concern, as well as field sampling and analysis to investigate potential impacts to soil and groundwater quality. Ms. Robinson assisted with the design of investigation programs, coordinated with field staff and subcontractors, and analyzed results to determine remedial actions. She also managed budgets, schedules, and client communication. Work was performed in general conformance with the ASTM environmental assessment standard and the U.S. EPA *All Appropriate Inquiry* guidelines. She has also conducted and completed preliminary endangerment assessments and obtained necessary permits for construction (NPDES, Rule 1166, etc.) on behalf of the developer to support the redevelopment activities.

Stormwater Monitoring and Compliance

- ***Machado Lake Nutrient TMDL Sampling, Torrance, California –*** Ms. Robinson manages the stormwater monitoring, sampling, and reporting for the City of Torrance in accordance with the provisions of the Machado Lake TMDL Special Studies Work Plan and the Machado Lake

Eutrophic, Algae, Ammonia, and Odors (Nutrient) TMDL (established by the Los Angeles Regional Water Quality Control Board) to monitor nutrients, including nitrogen and phosphorous discharged from the City of Torrance to Machado Lake. She coordinates routine sampling activities and has been a field lead for activities that include rapid mobilization during wet weather and dry weather events on a monthly basis since 2012 and data collection from data loggers to calculate flow rate and discharge volume and to monitor storm events. Ms. Robinson is also responsible for maintaining a network of flow sensors in subsurface conveyances and storm drains to quantify hydrology of the storm drain system and determine mass-based discharge compliance. She maintains discharge flow and volume calculations for annual reporting and prepares the annual report document. Ms. Robinson is also responsible for communicating with the City of Torrance, maintaining the scheduling, and ensuring the project stays within budget.

- ***Walteria Lake Monitoring Program for Nutrients and Toxics, Torrance, California –*** Ms. Robinson manages a monitoring program for discharge from Walteria Lake in accordance with the Walteria Lake Monitoring Program Nutrients and Toxics Study Work Plan developed by the Los Angeles County Flood Control District. She coordinates with the City of Torrance to conduct field sampling activities during pumping events that discharge from Walteria Lake. Ms. Robinson also maintains and analyzes the analytical and flow data from the stormwater and dry weather flow in relation to the applicable nutrients and toxics TMDL waste load allocations to determine if the lake contributes or removes pollutant loading from the flow. She also maintains communication with the City of Torrance and manages the budget and reporting for the project.
- ***Stormwater Basins Enhancement Project Monitoring and Reporting, Torrance, California –*** Ms. Robinson manages a project for the City of Torrance that includes stormwater sampling and flow measurements at various locations within three stormwater basins. The work is conducted in accordance with a plan approved by the Los Angeles Regional Water Quality Control Board. Ms. Robinson manages communication with the client, field sampling events, the schedule, and the project budget.
- ***Nutrient TMDL Sampling, Peter Weber Equestrian Center, Rolling Hills Estates, California –*** Ms. Robinson manages a project involving the collection of stormwater samples and flow measurements to monitor nutrients, including nitrogen and phosphorous at an active equestrian facility in Rolling Hills Estates following facility upgrades designed to reduce surface water impacts.
- ***Machado Lake Nutrient TMDL Sampling, Rolling Hills Estates, California –*** Ms. Robinson was the field lead for the collection of stormwater samples and flow measurements in accordance with the Palos Verdes Peninsula Coordinated Monitoring Plan and the Machado Lake Eutrophic, Algae, Ammonia, and Odors (Nutrient) TMDL (established by the Los Angeles Regional Water Quality Control Board) to monitor nutrients, including nitrogen and phosphorous discharged from Rolling Hills Estates to Machado Lake. Sampling activities included rapid mobilization during wet weather and dry weather events on a monthly basis between 2012 and 2016 to collect samples from surface waters and confined conveyance systems. She calculated monthly averages of total nitrogen and total phosphorous and compared the results to waste load allocations to determine attainment status.
- ***Anthropogenic Source Nutrient Assessment, Rolling Hills Estates, California –*** Ms. Robinson was a field lead for wet weather event stormwater sampling conducted for identification of nutrient

sources to study nutrient load reduction at the Model Equestrian Center Project, Rolling Hills Estates, California.

Engineering Design

- ***Baker Cold Storage Facility Brownfield Clean-up, Long Beach, California –*** Ms. Robinson is the engineer of record for the remedial design for a site that is impacted with pentachlorophenol (PCP), metals, VOCs, and dioxins/furans and under the regulation of the DTSC. She assisted with the development of the Soil and Groundwater Response Plan and the Remedial Design Document for the site that is currently being developed with a 250,000 square-foot cold storage facility. The remedial design included a passive vapor mitigation system with a site cap. Ms. Robinson prepare the Remedial Action Completion Report and the Operation and Maintenance Plan for the remedial activities.
- ***Power Pole Relocation into Closed and Capped Landfill, Carson, California –*** Ms. Robinson managed the environmental component of a power pole relocation project that required removing two power poles and installing two new power poles with associated anchors and wires into a closed and capped landfill under the regulatory oversight of the DTSC. She worked with the client to develop an exploratory boring program on the landfill to guide the overall design, obtain necessary permits include a Rule 1150 permit from the AQMD, develop soil handling and monitoring procedures, prepare a work plan for DTSC approval, and oversaw the environmental monitoring during all excavation, power pole placement, backfilling, and landfill cap restoration procedures. Ms. Robinson coordinated with various entities including the DTSC, the client, the landowner, the site occupant, the engineer of record for the landfill, and the AQMD for the various components of this project. She prepared all documentation including work plans for the exploratory program and the power pole installation, health and safety plans, and completion reports.
- ***Vapor Barrier System Design for Duplex Development, Los Angeles, California –*** Ms. Robinson was one of the engineers responsible for the design of a vapor barrier system to prevent intrusion of VOCs in soil vapor into the development of several residential duplexes. Her work included working with a Principle Engineer to design the system and details and prepare the design drawings. Ms. Robinson also prepared inspections and oversight of the installation of the system.

Regulatory Compliance

- ***National Pollutant Discharge Elimination System Monitoring, Marina del Rey, California –*** Ms. Robinson coordinates field activities associated with water quality sampling and analysis, flow data collection and analysis, and system operation and maintenance for a groundwater treatment system for VOCs, selenium, and metals prior to discharge to the storm drain. Her responsibilities also include preparing quarterly and annual monitoring reports for the Regional Water Quality Control Board per requirements in the monitoring and reporting program of the NPDES permit for the project. She currently manages the testing, maintenance, and reporting associated with the ongoing dewatering system.
- ***Environmental Audits, Various Locations, California –*** Ms. Robinson has performed and managed multiple environmental audits at several commercial and industrial facilities in California.

Her responsibilities included conducting interviews with current tenants, inspecting site facilities to determine environmental compliance or potential issues, and completing a final audit report of findings. She also managed budgets, schedules, and client communication.

Subject: Phase I and II Environmental Site Assessment
Former La-Z-Boy West Facility
301 Tennessee Street
APN 0292-192-11
Redlands, San Bernardino County, California

Attached herewith is the Phase I and II Environmental Site Assessment (ESA) conducted by this firm for the above-referenced, former La-Z-Boy facility in Redlands, California.

This assessment was planned and executed based upon a scope of services generally outlined in our Proposal to Perform Phase I and II ESA, dated October 3, 2019, and other written and verbal communication.

We appreciate the opportunity to provide this environmental assessment for the subject site. If you have any questions or comments regarding this assessment, please do not hesitate to contact this firm at your convenience.

EXECUTIVE SUMMARY

This firm conducted a Phase I Environmental Site Assessment (ESA) for the former La-Z-Boy West Facility, Assessor's Parcel Number (APN) 0292-192-11, located at 301 Tennessee Street in Redlands, California. This Phase I ESA was conducted in conformance with American Society for Testing and Materials (ASTM) E1527-13 and All Appropriate Inquiries (AAI) set forth in 40 CFR (Code of Federal Regulations) part 312. Concurrent with this, a Phase II ESA was also performed in conformance ASTM E1903-11.

The subject site had agricultural, residential, and/or industrial usage dating back to at least 1930. Past agricultural usage from at least 1930 until the mid 1960s was a grove, among which was a residence and garage. The present day manufacturing facility, recently vacated by La-Z-Boy, has three buildings which were designated as "Buildings 1, 2, and 3" for the purposes of this Phase I ESA. The original portion of Building 1 (main manufacturing building) and Building 3 (smallest onsite building), a total of 72,000 square feet, were permitted in 1965 to 1966. In 1969, Building 2, 12,000 square feet, was permitted, along with an addition of 28,000 square feet to Building 1. Another addition to Building 1 of 43,600 square feet was permitted in 1972. An addition of unspecified size, likely the approximate 21,000 square foot south end of Building 1, was permitted in 1986. The last addition to Building 1, 9,225 square feet, was permitted in 1991. The subject site remains vacated in preparation for planned commercial use.

Based on the age of the onsite buildings, lead-based paint (LBP) and/or asbestos-containing materials (ACM) may be present. As the onsite buildings will remain, no demolition is planned. However, modification of or addition to the onsite buildings will likely require a LBP and ACM survey to identify any affected building materials. The LBP and ACM survey should be conducted in accordance with the regulatory agencies having jurisdiction.

Numerous containers up to approximately 300 gallons with hazardous materials or hazardous wastes were present onsite. The hazardous materials and wastes included glues/adhesives, diesel fuel (red-dyed), waste oil, paint, mineral spirits, lithium grease, concrete sealer, wax emulsion, latex rubber wax, neutralizing acid absorber, degreasers (non-chlorinated), polyurethane additive (release agent), epoxy, wood stain, floor tile adhesive, asphalt crack filler, chemical cleaner, and urethane. All of the observed containers of hazardous materials and wastes were transported offsite, apparently by Safety Kleen.

Past environmental site assessment reports prepared for the subject site were provided by the client. The reports include two prepared by RMT, Inc. (RMT), Limited Subsurface Investigation, dated November 29, 1994, and Results of the Subsurface Investigation, dated March 1995. The subsurface investigations by RMT in 1994 and 1995 were performed to determine whether the soil in the vicinity of the former fire suppression water overflow collection trap (seepage pit) had been impacted by past operations conducted at the onsite facility. These investigations included soil sample collection from seven soil borings (SB-1 through SB-7) to maximum exploration depths ranging from approximately 30 to 50 feet bgs. Soil samples were collected at 5-foot intervals with select ranges of soil samples analyzed within the depth range of 10 to 30 feet bgs. The soil samples were analyzed for total petroleum hydrocarbons as gasoline (TPH-G), diesel fuel (TPH-D), and motor oil (TPH-MO), and VOCs. Reportable concentrations of TPH-MO were reported in two 15-foot soil samples at concentrations of 93 to 100 mg/kg. Reportable concentrations of VOCs included total xylenes up to 0.007 mg/kg, 1,1,1-TCA up to 0.74 mg/kg, 1,1,2-trichloroethane (1,1,2-TCA) up to 0.007 mg/kg, TCE up to 0.10 mg/kg, 1,1-DCA up to 0.093 mg/kg, 1,2-dichloroethane (1,2-DCA) up to 0.008 mg/kg, 1,1-DCE up to 0.064 mg/kg, cis-1,2-DCE up to 0.045 mg/kg, and methylene chloride up to 0.008 mg/kg. The soil samples with the most VOC compounds and generally the highest were collected at soil boring SB-2, located north of the former collection trap, reportedly within 5 feet. RMT evaluated the leaching potential of TPH and hydrocarbon VOCs to groundwater and performed a health risk/hazard assessment. RMT estimated the combined health risks (cancer) and hazard quotients were less than 1 in a million (10^{-6}) and 1, respectively. RMT concluded the VOC- and TPH-impacted soils onsite posed little or no health risk/hazard or potential of adversely impacting groundwater quality.

Records reviewed at the County of San Bernardino Fire Department, Hazardous Materials Division (CSBFD-HMD) for the subject site indicated that from 1984 to August 2015, the subject site was permitted for handling hazardous materials, hazardous waste generation, limited hazardous waste generation, conditionally exempt small quantity hazardous waste generation, and/or as an EPCRA (Emergency Planning and Community Right-to-Know Act) facility. More recent permit records were not available. Business Plans from 1987 to 2014 included inventories of hazardous materials and wastes, including hydraulic fluid (and waste), CalFoam-Bond 100 (natural latex compound), AW-60 wax (wax emulsion), adhesives, synthetic resin, lead-acid batteries, sulfuric acid, heavy duty degreaser (butoxyethanol, sodium hydroxide, and sodium metasilicate), diesel, aerosols (universal waste), waste empty containers, waste non-hazardous liquid, and propane. County permit application documentation from 1993 lists 1,1,1-trichloroethane (1,1,1-TCA) and oil wastes, and hazardous materials, including 1,1,1-TCA, oil, and finish material. County permit

application documentation from 1986 lists boiler cleaner waste, cleaning solvents, degreasing waste, latex waste, and alkaline cleaner. The September 14, 1994 inspection report indicates many materials used onsite were changed from solvent-based (including 1,1,1-TCA) to water-based. The April 23, 1996 inspection report indicates onsite hazardous waste streams had been reduced to waste oil only. The April 21, 2008 inspection report indicates the only hazardous waste generated was waste oil from sewing machines. The January 5, 2012 inspection report for the November 28, 2011 inspection indicates hazardous waste was no longer being generated onsite.

The online California Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS) hazardous waste manifest records for the subject site are listed under two California Environmental Protection Agency (EPA) ID profiles, one for La-Z-Boy and the other for Hahan Contractors. The California hazardous waste manifest data is from 1994 to 2015, and documents asbestos-containing waste, other inorganic solid waste, off-specification, aged or surplus organics, other organic solids, and liquids with halogenated organic compounds $\geq$1,000 milligrams per liter (mg/L).

Online South Coast Air Quality Management District (SCAQMD) records for the subject site includes multiple permits for spray equipment ("spray equipment open" and "spray booth paint and solvent"). Also included are a drying oven, dip tank coating paint, paints drying, and degreaser methylene chloride. Permits for the listed equipment was issued from 1978 to 1991. There have been no reported Notice of Violation (NOV), but a handful of Notices to Comply (NTC) have been reported. The NTC occurred from April 2008 to May 2019, and are all shown as being in compliance. The reported NTC involved posting permits, providing material safety data sheets (MSDS) and volatile organic compound (VOC) content of glue sprayed and wax MSDS, maintaining records, submitting compliance forms and fees, and operating equipment according to the conditions specified in the permit to operate. Records obtained directly from the SCAQMD provided digital records for the subject site. These records include permits for similar equipment as indicated above, dated in the time period from 1978 to 1991. Some of the spray equipment permits made reference to stain, glue, and lacquer. One of the two permits for degreasers from 1984 specified only 1,1,1-TCA, trichlorotrifluoroethane, methylene chloride, or a combination of these solvents was to be used as a cleaning solvent in the degreasing equipment. One of the permitted pieces of equipment, permitted in 1989, was an electrodeposition line that included a dip tank. The 1988 permit application for this equipment listed "Ransplate - Electro Deposition Plating", with the word "plating" crossed out and "painting" written next to it.

Based on the past historical onsite uses dating back to at least 1930, including agricultural grove and industrial use (furniture manufacturing), a Phase II ESA was performed. Thirty-four (34) soil vapor probe locations (SVP-1 through SVP-34), with 3- to 5-foot probes, were placed at current and past onsite features to assess potentially impacted subsurface soil vapor. Coincident with three of these locations (SVP-2 through SVP-4), soil samples (SS-2 through SS-4) were collected at multiple depths to assess potentially impacted subsurface soils along a former railroad spur track and/or fill materials along the south side of the original portion of Building 1 to a maximum depth of approximately 4 feet below ground surface (bgs). Three soil samples (SS-5 through SS-7) were collected at 1- to 1.5-foot depths to evaluate potential impacts from the offsite main railroad line within West State Street. Four soil samples (SS-8 through S-11) were collected at approximate 1-foot depths to evaluate potential pesticide impacts from past agricultural activities.

The 1- and 3.5-foot soil samples collected at SS-2 through SS-4 had no reportable concentrations of extractable oil- and diesel-range (fuel screen) hydrocarbons (TPH-FS) and semi-volatile organic compounds (SVOCs). Concentrations of the organochlorine pesticides (OCPs) dieldrin and DDT (4,4'-dichlorodiphenyltrichloroethane) were reported up to 0.0050 milligrams per kilogram (mg/kg) and 0.0061 mg/kg, respectively. The 1.5- and 4-foot soil samples collected at SS-2 through SS-4 had reportable concentrations of heavy metals (total), including arsenic up to 8.87 mg/kg, barium up to 54.6 mg/kg, chromium up to 70.7 mg/kg, cobalt up to 7.98 mg/kg, copper up to 21.3 mg/kg, lead up to 12.6 mg/kg, nickel up to 29.9 mg/kg, vanadium up to 34.6 mg/kg, and zinc up to 937 mg/kg. The 1- to 1.5-foot soil samples collected at SS-5 through SS-7 had no reportable concentrations of TPH-FS and SVOCs. Reportable concentrations of heavy metals (total) include arsenic up to 2.26 mg/kg, barium up to 51.9 mg/kg, chromium up to 15.0 mg/kg, cobalt up to 6.69 mg/kg, copper up to 14.6 mg/kg, lead up to 7.30 mg/kg, nickel up to 9.64 mg/kg, vanadium up to 31.1 mg/kg, and zinc up to 52.7 mg/kg. The 1-foot soil samples collected at SS-8 through SS-11 had reportable concentrations of the OCPs chlordane up to 0.022 mg/kg, DDE (4,4'-dichlorodiphenyldichloroethene) up to 0.0098 mg/kg, dieldrin up to 0.0043 mg/kg, and heptachlor epoxide up to 0.0050 mg/kg. Concentrations of total arsenic were reported up to 1.87 mg/kg. However, soil samples SS-10 and SS-11 were reported as non-detect for arsenic at laboratory reporting limits ranging from 4.98 to 5.03 mg/kg. These elevated reporting limits were due to sample matrix effects on the laboratory internal standard requiring sample dilution. As arsenic often exceeds the regulatory soil screening levels, local background concentrations are used to evaluate potential soil impacts. The elevated laboratory reporting limits for arsenic, around 5 mg/kg, are higher than the expected local background range under 4 mg/kg. All of the reported concentrations of OCPs are less than the California DTSC soil screening levels for

residential and commercial/industrial soils (DTSC, 2019a). The reported concentrations of California Title 22 heavy metals (total) are generally less than the California DTSC soil screening levels for residential and commercial/industrial soils or within the expected background ranges, with the exception being a reported concentration of arsenic at 8.87 mg/kg in the 1.5-foot sample at SS-3.

Twelve (SVP-1 through SVP-12) of the thirty-four (34) soil vapor probe locations were non-detect for total petroleum hydrocarbons as gasoline (TPH-G) and VOCs. The remaining twenty-two (SVP-13 through SVP-34) soil vapor probe locations had concentrations of multiple chlorinated VOCs reported, including chloroform up to 0.22 micrograms per liter (µg/L), cis-1,2-dichloroethene (cis-1,2-DCE) up to 1.65 µg/L, 1,1-dichloroethane (1,1-DCA) up to 58.71 µg/L, 1,1-dichloroethene (1,1-DCE) up to 22.54 µg/L, tetrachloroethene (PCE) up to 1.51 µg/L, 1,1,1-trichloroethane (1,1,1-TCA) up to 1,054.42 µg/L, and trichloroethene (TCE) up to 37.33 µg/L. The soil vapor probe locations in Buildings 1 and 2 generally were reported with only PCE and TCE, with multiple VOCs reported at the soil vapor probe locations at and near Building 3. The highest reported concentrations of VOCs were at soil vapor probe SVP-20, located at the estimated location of the former subsurface collection trap for fire suppression water.

Due to the onsite soil vapor concentrations reported above, the client had air sampling performed. Citadel Environmental Health and Safety Consultants (CEHSC) collected eleven onsite air samples, including one outdoor air sample (SC1) and ten indoor air samples (SC2 through SC11). Two of the indoor air samples (SC2 and SC3) were collected in onsite Building 2 and the remaining eight indoor air samples (SC4 through SC11) were collected in onsite Building 1. The outdoor air sample had reportable concentrations of ethanol at 7.6 micrograms per cubic meter (µg/m^3), benzene at 0.47 µg/m^3, carbon tetrachloride at 0.63 µg/m^3, and naphthalene at 0.39 µg/m^3. The reported outdoor air concentrations of benzene and naphthalene exceed the DTSC screening levels for residential and commercial/industrial air (DTSC, 2019a). The reported outdoor air concentration of carbon tetrachloride falls between the DTSC screening levels for residential and commercial/industrial air. The two indoor air samples from Building 2 had reported concentrations of ethanol up to 6.7 µg/m^3, benzene up to 0.51 µg/m^3, carbon tetrachloride up to 0.65 µg/m^3, chloroform at 0.14 µg/m^3, naphthalene up to 0.37 µg/m^3, and TCE up to 0.17 µg/m^3. The reported concentrations of benzene and naphthalene in Building 2 air samples exceed the DTSC screening levels for residential and commercial/industrial air. The reported concentrations of carbon tetrachloride and chloroform in Building 2 air fall between the DTSC screening levels for residential and commercial/industrial air. The eight indoor air samples from Building 1 had reported

concentrations of ethanol up to 13 µg/m^3, trichlorofluoromethane (Freon 11) up to 24 µg/m^3, acetone up to 10 µg/m^3, 1,1,1-TCA up to 22 µg/m^3, benzene up to 0.65 µg/m^3, carbon tetrachloride up to 0.81 µg/m^3, chloroform up to 0.23 µg/m^3, 1,4-dichlorobenzene up to 0.17 µg/m^3, 1,2-DCA up to 0.14 µg/m^3, 1,2-dichloropropane up to 0.12 µg/m^3, naphthalene up to 0.42 µg/m^3, PCE up to 32 µg/m^3, TCE up to 4.0 µg/m^3, and 1,1-DCA up to 2.8 µg/m^3 (estimated value exceeding the laboratory calibration range). The reported concentrations of benzene, carbon tetrachloride, chloroform, 1,2,-DCA, naphthalene, PCE, TCE, and 1,1-DCA in Building 1 air samples exceed the DTSC screening levels for residential and/or commercial/industrial air.

There are numerous sites listed in environmental regulatory and proprietary databases within 1 mile of the subject site, including the subject site. Based on our research, Vapor Encroachment Screen (utilizing ASTM E2600-15), Phase II ESA findings, and indoor air sampling performed by Citadel Environmental Health and Safety Consultants, a vapor encroachment condition exists at the subject site.

This Phase I and II ESA has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject site, except for the following:

- Past subsurface soil investigation by RMT in 1994 revealed concentrations of trace chlorinated VOCs within the upper 30 feet in the north central portion of the subject site near or in the general vicinity of a former collection trap (seepage pit) for fire suppression water. Based on the concentrations reported, the chlorinated VOCs are an HREC. However, the lateral and vertical extent of chlorinated VOCs was not assessed.

- Past manufacturing use of the subject site has involved the use of chlorinated solvents, including 1,1,1-TCA is a REC. The recently conducted Phase II ESA has identified the presence of impacted, shallow subsurface soil vapor within the central and north portions of the subject site. Recently conducted indoor air sampling indicated concentrations of VOCs exceeding DTSC screening levels for residential and/or commercial/industrial air.

- Soil sampling was conducted during the recent Phase II ESA to evaluate past agricultural grove and railroad track usage, including an onsite spur track. Elevated concentrations of some California Title 22 heavy metals (total) were reported, including arsenic, chromium, nickel, and zinc, is a REC.

However, these concentrations are generally less than the California DTSC soil screening levels for residential and commercial/industrial soils or within expected background ranges, with the exception being a reported concentration of arsenic at 8.87 mg/kg in the 1.5-foot sample at SS-3. This isolated concentration of arsenic is not anticipated to have a significant impact to the subject site.

The onsite, impacted subsurface soil and soil vapor by VOCs represents both responsible party liability for cleanup and health risk concerns. To determine the lateral and vertical extent of impacted soil and soil vapor, additional Phase II ESA would be needed. Depending on the extent of impacted soil and soil vapor and/or other impacted media, potentially including groundwater, regulatory agency oversight may be warranted. Based on the recent indoor air sampling analytical results, CEHSC, who performed the indoor air sampling, recommended that interim engineering controls for indoor air be implemented, including increasing ventilation rates and installing air scrubbers, while a more comprehensive remediation plan is developed. As a result of these recommendations to address the onsite impacts to subsurface soil vapor and indoor air, it is our understanding that the client has solicited proposals from CEHSC and other consultants to implement subsurface slab depressurization and/or soil vapor extraction through vertical wells to prevent vapor intrusion into the onsite buildings and possibly affect sufficient remediation to negate the future need to operate and maintain a vapor extraction system for subsurface slab depressurization. We recommend no occupation of the onsite buildings until sufficient control of indoor air has been established, including concentrations of VOCs less than DTSC screening levels for commercial/industrial (indoor) air.

INTRODUCTION

From October 2019 to January 2020, a Phase I and II ESA was conducted by this firm for the former La-Z-Boy West Facility, APN 0292-192-11, located at 301 Tennessee Street in Redlands, San Bernardino County, California. The subject site is a former chair and sofa manufacturing facility, with the operation currently in the process of moving offsite. The onsite facility includes three buildings, a larger, main building (“Building 1"), a smaller building in the northwest corner (“Building 2"), and the smallest building (“Building 3") in the north central portion. The subject site is planned for future commercial usage.

The Phase I ESA was conducted in conformance with the Standard Practice for Environmental Site Assessments: Phase I ESA Process, ASTM E1527-13, and AAI set forth in 40 CFR Part 312. The purpose was to identify RECs, HRECs, and/or CRECs that may be associated with the Site. A REC is defined as the presence or likely presence of any hazardous substance or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. A HREC is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meets the unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls, which would fall under a controlled recognized environmental condition or CREC). This does not include de minimis conditions, that generally, do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of the appropriate government agency. Conditions determined to be de minimis are not recognized environmental conditions or controlled recognized environmental conditions.

Concurrent with this Phase I ESA, a Phase II ESA was performed in conformance with the Standard Practice for Environmental Site Assessments: Phase II ESA Process, ASTM E1903-11. The purpose was to assess hazardous substances that may be associated with the RECs or HRECs identified within the concurrent Phase I ESA, and is effectively a screening assessment to determine if further Phase II ESA is warranted. The scope of this assessment has been performed with the concurrence of the client.

The approximate location of the site within its regional setting is presented on an Index Map (Figure 1).

The findings of our Phase I and II ESA, as well as our conclusions and recommendations, are presented in the following sections of this report.

NON-SCOPE CONSIDERATIONS

The following environmental issues are outside the scope of ASTM E1527-13 and 40 CFR Part 312:

- Lead in Drinking Water
- Lead-Based Paint
- Wetlands
- Methane
- Radon
- Cultural Land Historical Resources
- Industrial Hygiene
- Health and Safety
- Ecological Resources
- Endangered Species
- Indoor Air Quality
- Mold and Mildew
- Asbestos-Containing Materials
- Mineral Resources
- Regulatory Compliance
- Natural Hazards
- High Voltage Power Lines

METHODOLOGY AND PROCEDURES

For the Phase I ESA, per ASTM E1527-13 and AAI, User provided information was reviewed, as available, and evaluated with respect to site history, usage, and environmental concerns.

A review of the physical setting of the subject site, including general geology and hydrogeology, was performed. This review, in part, provides information regarding the potential for groundwater to be contaminated and the potential pathways for contaminant transport.

Historical aerial photographs were examined to investigate the past use of the subject site and surrounding region. Other historical information, including Assessor's information, city directory information, and Sanborn Fire Insurance and topographic maps, were reviewed as available.

Person(s) knowledgeable about the subject site were interviewed, as available, to obtain any known information regarding site use(s) and potential environmental concerns.

Concurrent with our public and governmental agency interviews and literature research, a site reconnaissance of the property was conducted. The site reconnaissance was conducted in order to determine current uses of the site and the potential for soil and/or possible groundwater contamination based on aboveground visual observation.

During this Phase I ESA, public regulatory agencies, potentially including environmental, building, etc. were contacted directly or online research was conducted for information regarding permits, underground storage tanks (USTs), hazardous materials incidents, and general information about the subject site and surrounding area to ascertain the past uses with respect to environmental concerns.

Federal, state, local, tribal, and proprietary lists and databases were reviewed to ascertain the presence of known environmentally impaired sites on the subject site or within the immediate area, and to determine their impact, if any, to the subject site.

As part of the Phase I ESA, a Vapor Encroachment Screen was conducted to determine if a vapor encroachment condition exists, based on the information obtained during the Phase I ESA.

A Phase II ESA per ASTM E1903-11 involved subsurface soil and soil vapor sampling, and was conducted to assess whether past onsite grove and railroad track usage, and subsequent usage for chair and sofa manufacturing have impacted the subject site.

More details regarding the above methodology and procedures are described in other sections of this report.

USER PROVIDED INFORMATION

ASTM E1527-13 defines a User as the party seeking to use Practice E1527 to complete an environmental site assessment of the property. A User may include, without limitation,

a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.

Under ASTM E1527-13 and AAI, specific tasks are assigned to the User that will help identify the possibility of RECs in connection with the property. These tasks do not require the technical expertise of an environmental professional and are generally not performed by environmental professionals performing a Phase I ESA. The User may provide the information gathered from these tasks, including the following:

- Any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law;
- Any activity and land use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law;
- Specialized knowledge or experience (that is material to RECs in connection with the property) of the User related to the property or nearby properties (for example, is the User involved in the same line of business as the current or former occupants of the property or an adjoining property so that the User would have specialized knowledge of the chemicals and processes used by this type of business);
- Relationship of the purchase price to the fair market value of the property if it were not contaminated (reason for significantly lower purchase price, such as contamination is known or believed to be present at the property);
- Commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases (such as the past uses of the property, specific chemicals that are present or once were present at the property, spills or other chemical releases that have taken place at the property, and any environmental cleanups that have taken place at the property);
- Any obvious indicators that point to the presence or likely presence of contamination at the property, based on the knowledge and experience of the User related to the property; and
- Other information, including the reason why the Phase I ESA is required and/or is being performed, the type of property and type of property transaction (sale, purchase, exchange, etc.), the complete and correct address for the property, the scope of services desired for the Phase I ESA, identification of all parties who will

- rely on the Phase I ESA report, identification of the site contact and how the contact can be reached, any special terms and conditions which must be agreed upon by the environmental professional, and any other knowledge or experience with the property that may be pertinent to the environmental professional (for example, copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the property and its environmental condition).

A User Questionnaire was completed by a representative of the client (a User). The purchase price of the site is indicated to reflect fair market value. The information provided in the completed questionnaire does not directly indicate any RECs are associated with the subject site; however, the site is indicated to have historical use as a furniture manufacturing plant which represents a potential environmental concern. Past environmental site assessment is indicated to have occurred. Reports for this past environment site assessment are discussed below. The purpose for conducting this assessment is to satisfy the requirements of AAI. NYS New, LLC, the client, and NYS, LLC are identified as the parties who will rely on this report. A copy of the completed User Questionnaire is provided in Appendix A.

Historical plans and hand drawings of the La-Z-Boy West Facility, dating from the 1960s to the 2000s, were provided by the client. Past environmental site assessment reports prepared for the subject site and indoor air sample analytical results and associated hand drawn sample locations on aerial photograph image were also provided by the client. The reports include two prepared by RMT, Inc. (RMT), Limited Subsurface Investigation, dated November 29, 1994, and Results of the Subsurface Investigation, dated March 1995. The indoor air sampling analytical results and sample locations were provided in an email from the client on November 22, 2019.

The historical plans and hand drawings include the original plans for Building 1 and subsequent additions to the west, south, and north, as well as expansion of the office area along the central portion of the east side. Of note for Building 1 is the “Spray Room”, recently utilized as a maintenance shop, shown with a 36-inch concrete pit for degreaser in the southwest corner and “Ransburg”, likely spray paint-related equipment, along the west side. Adjacent to the north of the “Spray Room” was a “Finishing Room”, which included four paint booths and an oven. Adjacent to the north of the “Finishing Room” was a “Maintenance Crib” which was indicated to be a fenced area. Along the west wall, just south of the present day northwest corner, “Ransburg” is indicated, likely spray paint-related equipment. The 1987 addition along the south side of Building 1 resulted in the removal or building on top of the railroad spur track that had been approximately 15 to

16 feet south of the south building wall prior to the addition. The main railroad track within West State Street was approximately 17 feet south of the subject site. At the northwest corner of the present day Building 1, an aboveground propane tank is shown. Building 2 is largely shown with no labeling as to its purpose, but is labeled on at least one plan as “Foam Process”, including cutting. Building 3 is shown as being divided in half, as at the present day. The south half is been labeled with “Lacquer Storage”, “Lacquer Shed”, or “Finishing Room”. The north half is been labeled with “Compressor Room” or “Boiler Garage”. East-southeast of and near the southeast corner of Building 3, a 5-foot diameter, 20-foot deep leaching (seepage) pit was present, noted to have been filled in. Pipes connected to this pit, apparently from Buildings 1 and 3, were noted to be rerouted. The leaching pit coincides with the collection trap for fire suppression water, the subject of the subsurface investigations discussed below. A survey map of the agricultural grove that preceded the construction of the La-Z-Boy West Facility is shown with a garage (approximately 20 feet east-west by 15 feet north-south) along the east side of the grove, roughly 130 feet north of Citrus Avenue (present day West State Street).

The subsurface investigations by RMT in 1994 and 1995 were performed to determine whether the soil in the vicinity of the former fire suppression water overflow collection trap (seepage pit) had been impacted by past operations conducted at the onsite facility and to help develop closure strategies and remediation cost estimates. These investigations included soil sample collection from seven soil borings (SB-1 through SB-7) to maximum exploration depths ranging from approximately 30 to 50 feet bgs. Soil samples were collected at 5-foot intervals with select ranges of soil samples analyzed within the depth range of 10 to 30 feet bgs. The soil samples were analyzed for total petroleum hydrocarbons as gasoline (TPH-G), diesel fuel (TPH-D), and motor oil (TPH-MO), and VOCs. Reportable concentrations of TPH-MO were reported in two 15-foot soil samples at concentrations of 93 to 100 mg/kg. Reportable concentrations of VOCs included total xylenes up to 0.007 mg/kg, 1,1,1-TCA up to 0.74 mg/kg, 1,1,2-trichloroethane (1,1,2-TCA) up to 0.007 mg/kg, TCE up to 0.10 mg/kg, 1,1-DCA up to 0.093 mg/kg, 1,2-dichloroethane (1,2-DCA) up to 0.008 mg/kg, 1,1-DCE up to 0.064 mg/kg, cis-1,2-DCE up to 0.045 mg/kg, and methylene chloride up to 0.008 mg/kg. The soil samples with the most VOC compounds and generally the highest were collected at soil boring SB-2, located north of the former collection trap. The March 1995 RMT report indicates soil borings SB-1 and SB-2 were located within 5 feet of the former collection trap. However, Figure 1: Soil Boring Locations from this report shows these borings approximately 15 feet to the east and north, respectively, from the former collection trap. RMT evaluated the leaching potential of TPH and hydrocarbon VOCs to groundwater using the 1989 California State Water Resources Control Board Leaking Underground Fuel Tank (LUFT) manual. RMT’s evaluation resulted

in TPH and hydrocarbon VOC (total xylenes) concentrations less than the allowable concentrations using LUFT guidelines. RMT performed a health risk/hazard assessment, and estimated the combined health risks (cancer) and hazard quotients were less than 1 in a million (10^{-6}) and 1, respectively. RMT concluded the VOC- and TPH-impacted soils onsite posed little or no health risk/hazard or potential of adversely impacting groundwater quality.

On November 19, 2019, Citadel Environmental Health and Safety Consultants (CEHSC) collected eleven onsite air samples in Summa® canisters, including one outdoor air sample (SC1) and ten indoor air samples (SC2 through SC11). Two of the indoor air samples (SC2 and SC3) were collected in onsite Building 2 and the remaining eight indoor air samples (SC4 through SC11) were collected in onsite Building 1. These air samples were analyzed for VOCs using United States Environmental Protection Agency (USEPA) Method TO-15 and TO-15 SIM. The outdoor air sample had reportable concentrations of ethanol at 7.6 micrograms per cubic meter (µg/m^3), benzene at 0.47 µg/m^3, carbon tetrachloride at 0.63 µg/m^3, and naphthalene at 0.39 µg/m^3. The reported outdoor air concentrations of benzene and naphthalene exceed the DTSC screening levels for residential and commercial/industrial air. The reported outdoor air concentration of carbon tetrachloride falls between the DTSC screening levels for residential and commercial/industrial air. The two indoor air samples from Building 2 had reported concentrations of ethanol up to 6.7 µg/m^3, benzene up to 0.51 µg/m^3, carbon tetrachloride up to 0.65 µg/m^3, chloroform at 0.14 µg/m^3, naphthalene up to 0.37 µg/m^3, and TCE up to 0.17 µg/m^3. The reported concentrations of benzene and naphthalene in Building 2 air samples exceed the DTSC screening levels for residential and commercial/industrial air. The reported concentrations of carbon tetrachloride and chloroform in Building 2 air fall between the DTSC screening levels for residential and commercial/industrial air. The reported concentrations of TCE in Building 2 air are less than the DTSC screening levels for residential and commercial/industrial air. The eight indoor air samples from Building 1 had reported concentrations of ethanol up to 13 µg/m^3, trichlorofluoromethane (Freon 11) up to 24 µg/m^3, acetone up to 10 µg/m^3, 1,1,1-TCA up to 22 µg/m^3, benzene up to 0.65 µg/m^3, carbon tetrachloride up to 0.81 µg/m^3, chloroform up to 0.23 µg/m^3, 1,4-dichlorobenzene up to 0.17 µg/m^3, 1,2-DCA up to 0.14 µg/m^3, 1,2-dichloropropane up to 0.12 µg/m^3, naphthalene up to 0.42 µg/m^3, PCE up to 32 µg/m^3, TCE up to 4.0 µg/m^3, and 1,1-DCA up to 2.8 µg/m^3 (estimated value exceeding the laboratory calibration range). The reported concentrations of benzene, carbon tetrachloride, chloroform, 1,2,-DCA, naphthalene, PCE, TCE, and 1,1-DCA in Building 1 air samples exceed the DTSC screening levels for residential and/or commercial/industrial air. The reported concentrations of Freon 11, acetone, 1,1,1-TCA, 1,4-dichlorobenzene, and 1,2-dichloropropane in Building 1 air are less than the DTSC screening levels for residential and commercial/industrial air.

Environmental Cleanup Liens and Activity and Use Limitations

Under AAI and ASTM E1527-13, a search for environmental cleanup liens and AULs must be conducted, typically by the User. The subject site, whose researched historical use has included agricultural grove, residential, and industrial usage (a chair and sofa manufacturer), did not appear in the state and/or federal liens, deed, or activity/use limitation databases in The Environmental Data Resources, Inc. (EDR) Radius Map™ Report with GeoCheck® (Appendix H), and the records on file with the CSBFD-HMD do not indicate there are any environmental cleanup liens or AULs associated with the subject site.

PHYSICAL SETTING

Topography

The subject site is situated at ground surface elevations ranging from approximately 1,259 to 1,269 feet above mean sea level (amsl). The topography of the subject site is generally planar with an overall gentle fall in a westerly direction. However, in the northwest portion of the subject site, north of the main onsite industrial building (Building 1), the topography is generally graded to drain to the north across asphalt-paved parking lot/drive areas along an asphalt-paved swale and concrete paved ribbon gutter towards the adjacent, offsite Mission Zanja Creek flood control channel.

Geology

The subject site is situated near the southern end of an alluviated valley lying between the San Bernardino Mountains to the northeast and the Crafton Hills and the Badlands to the east/southeast and south, respectively. This valley makes up the far northeastern portion of the Peninsular Ranges geomorphic province of Southern California. The Peninsular Ranges geomorphic province incorporates the vast region extending from the San Gabriel and San Bernardino Mountains south into the Baja California Peninsula. This region is characterized by a series of northwest-trending, small mountain ranges. The dominate drainage pattern of the region is the Santa Ana River which lies approximately 2.5 miles north of the subject site. Erosion of the surrounding highlands and the subsequent deposition in the lower regions by the Santa Ana River and its watershed tributaries has resulted in the deposition of these relatively unconsolidated alluvial units over the valley floor. The depth of these units at the subject site was not determined during this study, but is considered to be on the order of several hundred to several thousand feet to older sedimentary bedrock and crystalline bedrock. Most of the subject site has been mapped

as being underlain by young (middle Holocene) axial-valley deposits, described as slightly to moderately consolidated silt, sand, and gravel deposits (Matti et al., 2003). Along/near the south end of the subject site, from the middle to the southeast corner, very old (middle to early Pleistocene) axial-valley deposits have been mapped, described as moderately to well consolidated silt, sand, and gravel. The north side of the subject site is mapped as being underlain by very young wash deposits (latest Holocene), described as very slightly consolidated sand and gravel deposits in active washes.

The nearest known active earthquake fault is the Crafton Hills complex located approximately 1.9 miles to the southeast. Other active earthquake faults in the region include the San Jacinto fault, located approximately 2.7 miles to the southwest, and the San Andreas fault, located approximately 5.5 miles to the northeast.

Hydrogeology

The subject site is located in the Bunker Hill Subbasin, which is situated within the Upper Santa Ana Valley Groundwater Basin. The Bunker Hill Subbasin consists of the alluvial materials that underlie the San Bernardino Valley. This subbasin is bounded by contact with consolidated rocks of the San Gabriel Mountains, San Bernardino Mountains, and Crafton Hills, and by several faults. The southern boundary is the Banning fault, the east boundary is the Redlands fault, the San Andreas fault is roughly the northern boundary, the Glen Helen fault abuts the northwest boundary, and the southwest boundary is the San Jacinto fault. The Santa Ana River, Mill Creek, and Lytle Creek are the main tributary streams in the subbasin (California Department of Water Resources, 2004).

The Bunker Hill Subbasin contains several groundwater contamination plumes. The Redlands plume, located between Judson Street and Waterman Avenue in Redlands, is primarily composed of trichloroethene (TCE) and perchlorate, with lower levels of tetrachloroethene (PCE) and 1,2-dibromo-3-chloropropane (DBCP). The Norton Air Force Base plume consists of TCE and PCE, and stretches approximately 2.5 miles long. The Newmark and Muscoy plumes are spread around the east and west sides of the Shandon Hills in northern San Bernardino. These plumes consist of TCE and PCE, and are designated Superfund sites. The Santa Fe plume, located approximately 1.3 miles south of the Newmark and Muscoy plumes, is primarily of petroleum-based contaminants. Based on the location of the subject site and groundwater analytical results from monitoring wells in the area, the site does not appear to be located in any of the plumes, except perhaps for the perchlorate portion of the Redlands plume (California State Water Resources Control Board, 2019).

The regional groundwater flow direction is estimated towards the Santa Ana River, generally in a westerly direction, coincident with the fall in local ground surface topography.

Groundwater well data from the Cooperative Well Measuring Program, Spring 2019 (Watermaster Support Services et al., 2019) and the California Department of Water Resources (DWR) online Water Data Library website indicate that the current depth-to-groundwater beneath the subject site is over 150 feet bgs, and has been slowly dropping over recent years.

The nearest wells in the Cooperative Well Measuring Program and DWR database include State Well No. 01S03W28J001S ("New York Well"), located along the west side of New York Street, halfway between West State Street and Pine Avenue, approximately 0.3 mile east-southeast of the subject site, and State Well No. 01S03W28C001S ("Redlands/Tennessee"), located near the intersection at West Redlands Boulevard and Tennessee Street, located approximately 0.3 mile north of the subject site. The New York Well has groundwater measurements available from June 1993 to June 2019. The groundwater levels recorded over this time period ranged from approximately 112 to 214 feet bgs. The Redlands/Tennessee Well has groundwater measurements available from June 1928 to October 2008. The groundwater levels recorded over this time period ranged from approximately 70 to 161 feet bgs.

HISTORY OF SITE USAGE

To obtain a history of previous site usage, a search was conducted for historical Sanborn Fire Insurance Maps, topographic maps, aerial photographs, Assessor's parcel information, and city building records. A representative of the current owner of the subject site was interviewed.

Sanborn Fire Insurance Maps

No coverage of Sanborn Fire Insurance Maps was available for the subject site. The Certified Sanborn® Map Report from EDR is provided in Appendix B.

Historical Topographic Maps

Historical topographic maps of the quadrangle that includes the subject site, at a scale of approximately 1"=2,200', provided by EDR from 1899, 1901, 1954, 1967, 1973, 1980, 1988, 1996, and 2012, were reviewed. The historical EDR topographic maps are provided in Appendix C.

The early map images, 1899 and 1901, are essentially the same, from large scale maps (likely 1:62,500 or larger). These map images show the subject site as essentially vacant land, with a road of some type running east-west across the south end/side. Bordering to the east is a road along the present day Tennessee Street. Just north of and immediately adjacent to the northwest of the subject site is a natural channel shown flowing generally along the alignment for the present day Mission Zanja Creek flood control channel. The surrounding properties are either vacant land or sparsely developed with residence-sized buildings. Adjacent to the south is a railroad track, and based on online research, belonged to Southern Pacific Railroad (SPRR), and was their "Redlands and San Bernardino Motor Line" (National Environmental Title Research, LLC, 2019). The densely developed downtown area of Redlands is shown over 0.5 mile east of the subject site.

The map image from 1954 is likely from a map at a scale of 1:24,000. This map shows a residence-sized building near the southeast corner of the subject site, which is otherwise shown as agricultural grove. The road shown across the south end/side of the subject site is absent. The present day road along West State Street, shown as Citrus Avenue, is located immediately south of the SPRR track. The creek to the north is indicated to have been artificially channelized, likely along the present day alignment for the present day Mission Zanja Creek flood control channel. Agricultural grove, some with associated residence-sized buildings, are present on adjacent or adjoining properties in all directions from the subject site, except to the northeast across Tennessee Street, where there are largely only residence-sized buildings.

The map images from 1967 and 1973 are essentially the same, likely from maps at a scale of 1:24,000. These images show the subject site with the residence-sized building and agricultural grove gone, with a relatively large industrial building (Building 1) in the east half of the site and a relatively small building (Building 3) just north of it. A railroad spur track coming off of the SPRR track to the south is shown. This spur track runs east-west near and south of the large onsite industrial building. Offsite agricultural groves have been removed to the east, south, and partially to the west. Apparent, offsite commercial buildings are located to the south across Citrus Avenue (present day West State Street),

just west of the subject site along the present day Kansas Street, and just east of the subject site beyond Tennessee Street.

The map images from 1980, 1988, and 1996 are essentially the same, likely from maps at a scale of 1:24,000. The onsite large industrial building (Building 1) has been added onto, including to the west and south, more than doubling its size. Also, a third building (Building 2) has been added to the northwest corner of the subject site. A remnant of the onsite spur track, likely truncated by the addition to the south side of the large industrial building, is shown. The grove adjacent to the west of the subject site is completely removed, except perhaps for a remnant row or two along Kansas Street. At this offsite property to the west are now half a dozen buildings, including three narrow, rectangular buildings and a larger rectangular building, likely commercial or industrial. Most of the grove to the north of the Mission Zanja Creek channel is gone. Grove to the southeast of the intersection at Tennessee and West State Streets is gone with several residential-sized buildings present.

The map image from 2012 is likely from a map at a scale of 1:24,000. This map image generally does not show structural features. However, the road to the south is now labeled as West State Street (formerly Citrus Avenue). The SPRR railroad track, along with the remnant onsite spur track, are absent.

Aerial Photograph Review

Digital aerial photographs provided by EDR, from 1930, 1938, 1949, 1953, 1959, 1966, 1968, 1975, 1985, 1989, 1994, 2006, 2009, 2012, and 2016, were reviewed to investigate the past use of the subject site and the surrounding properties. Google Earth Pro computer program (2019) recent (1994 to 2018) and online (Nationwide Environmental Title Research, LLC, 2019) historical digital aerial images were used to enhance our review and/or provide supplementary review.

Copies of the historical aerial photographs provided by EDR with the approximate boundaries of the subject site are provided in Appendix D.

A brief summary of the site and surround conditions during the various times, as reflected in the EDR aerial photographs, is given below.

1. March 25, 1930, Source: EDR (FAIR), Approximate Scale: 1"=500'

This early digital aerial photograph is of poor quality, but shows the subject site as mostly agricultural grove. The last row along the east side of the onsite grove is likely immediately offsite. The far north end of the subject site is vacant land with vegetation and drainage features that are likely affected by the nearby Zanja Creek (present day Mission Zanja flood control channel). Due to the poor quality of the photograph it is difficult to discern, however, there may be a structure, possibly a residence, located near the east boundary of and southeast corner for the subject site. There appear to be at least a couple of mature trees along the east subject site boundary near this possible residence. Near and just offsite to the south, within the present day road for West State Street, is a railroad track (belonging to SPRR according to historical topographic maps). Adjacent to the south of this railroad track is Citrus Avenue (within present day West State Street), an apparent asphalt-paved, 2-lane, unimproved road. Bordering to the east of the subject site is Tennessee Street, apparently an asphalt-paved, 2-lane, unimproved road. Most of the surrounding properties are agricultural grove, some with associated structures, likely residences and outbuildings. Beyond the Zanja Creek to the north and northeast are cleared properties that may have had groves formerly present, and one or both of these properties may have young trees planted.

2. June 14, 1938, Source: EDR (USDA), Approximate Scale: 1"=500'

The subject site and surrounding properties appear largely the same as previously shown. Grove trees in the north end of the subject site and adjacent property to the west have been removed, along with much of the vegetation at/near the Zanja Creek which appears to have undergone recent channelization, possibly due to recent heavy rainfall. There may be young trees replanted in the north end of the subject site and adjacent property to the west. Maturing grove trees are evident at the property to the north beyond the Zanja Creek.

3. May 8, 1949, Source: EDR (USDA), Approximate Scale: 1"=500'

The subject site and surrounding properties appear largely the same as previously shown. Due to the quality of the photograph, the onsite residence near the east boundary and southeast corner appears evident. The grove trees in the north end of the subject site and property adjacent to the west have matured somewhat. A couple of rows of grove trees are situated between the subject site and the Zanja Creek. Relatively dense vegetation, likely natural re-vegetation, is evident along the Zanja Creek. To the northeast across Tennessee Street and Zanja Creek are structures, likely including residences.

4. January 15, 1953, Source: EDR (USDA), Approximate Scale: 1"=500'

The subject site and surrounding properties appear largely the same as previously shown. Rectangular structures, likely agricultural or otherwise commercial related, have been added to the adjacent or adjoining properties to the east, southwest, and west.

5. June 22, 1959, Source: EDR (USDA), Approximate Scale: 1"=500'

The subject site appears essentially the same as previously shown. A residence has been added across the street to the east of the northeast corner of the subject site. An approximate 4-acre grove has been removed to the north of the east portion of the subject site beyond the Zanja Creek. The north approximate one-third of the grove at the property adjacent to the west has been removed, with a residence near Kansas Street to the west and two long, rectangular structures present, which appear to be associated with some sort of animal farm, possibly dairy or poultry. Two rectangular structures have been added to the property to the southwest across Citrus Avenue (present day West State Street), possibly part of a poultry farm. The beginning of a commercial development in a nearly 1-acre rectangular area at the southeast corner of the intersection at Tennessee Street and Citrus Avenue includes a rectangular building and several smaller buildings.

6. April 16, 1966, Source: EDR (USGS), Approximate Scale: 1"=500'

The grove and residence have been removed from the subject site. The present day industrial Building 3 for the La-Z-Boy West facility has been built, with the original portion of Building 1 under construction. Tennessee Street has been recently re-paved with asphalt and widened. The grove across Tennessee Street to the east has been removed, and is now a commercial yard (based on recent Phase I ESA of this site by LOR, this site was a concrete pipe manufacturer and later pipeline contractor). Most of the present day Southern California Edison (SCE) facility has been constructed across Citrus Avenue (present day West State Street) to the south. Half a dozen rectangular structures have been removed from the property to the southwest, with a few concrete slab foundations remaining. One of the two previously shown rectangular structures at the property adjacent to the west is gone, with another added near and just south of the removed structure. Other smaller structures appear to be present at this property.

7. August 22, 1968, Source: EDR (USDA), Approximate Scale: 1"=500'

The east half of the subject site is developed with industrial Buildings 1 (original portion) and 3 completed. The west half of the subject site is largely vacant land. Entering the west side of the subject site, near and just north of the southwest corner, is a railroad spur track. This spur track appears to extend to or near the southeast corner of Building 1, running along the south side of the building. The grove to the southwest has been removed. The remainder of the grove to the west has also been removed, with the west end of one of the rectangular structures shortened.

8. December 1, 1975, Source: EDR (USGS), Approximate Scale: 1"=500'

In this digital infrared photograph, the entire subject site is shown as being developed, including an approximate doubling in the size of Building 1 and construction of Building 2. The subject site appears largely as it does at the present day. Citrus Avenue to the south appears widened. The property to the southwest across Citrus Avenue has been completely cleared of structures and mature trees, and sits as vacant land. A relatively large, rectangular commercial or industrial building has been built on the central and south portions of the adjacent property to the west. North of this building, the rectangular structure that was previously shortened at the west end has also been narrow, and is now less than half its original size. Near and north of this reduced structure and approximately 200 feet to the west-northwest, are two new rectangular structures, one larger and longer (north) and the other smaller (west-northwest). The purpose of the rectangular structures at this property are likely non-agricultural commercial or industrial. An approximate 4-acre grove has been removed to the north of the west portion of the subject site beyond the Zanja Creek. Zanja Creek has been widened as an earthen channel, and is essentially the same as at present day, bordering the subject site to the north. To the northeast across Tennessee Street and Zanja Creek, there are numerous objects, possibly including vehicles, and may be a junk yard. The yard was smaller in the previous (1968) aerial photograph image, and has expanded.

9. July 28, 1985, Source: EDR (USDA), Approximate Scale: 1"=500'

This digital infrared photograph is of somewhat poor quality. However, the subject site appears to be essentially the same as previously shown. To the southwest across Citrus Avenue, the SCE facility has been expanded westward. The previously reduced structure to the west is gone. The grove to the northwest beyond the Zanja Creek has been removed. Beyond the Zanja Creek to the north of the east half of the subject site, several commercial buildings, two rectangular and two “L”-shaped, have been constructed.

10. August 15, 1989, Source: EDR (USDA), Approximate Scale: 1"=500'

The subject site and surrounding properties appear somewhat the same as previously shown. An addition has been made to the south side of onsite Building 1, and the railroad spur track has been removed as a result. Citrus Avenue is widened and more improved, and now appears essentially the same as at present day for West State Street. The SCE facility to the south has expanded farther westward, and is as extensive as at present day. To the northeast across Tennessee Street and Zanja Creek, over half a dozen commercial buildings are present. The commercial development at the southeast corner of the intersection at Tennessee Street and Citrus Avenue has expanded slightly to the east.

11. June 1, 1994, Source: EDR (USGS/DOQQ), Approximate Scale: 1"=500'

The subject site and surrounding area appear largely the same as previously shown. An addition has been made along the north side of onsite Building 1, and the subject site appears essentially the same as at present day. The three larger, rectangular structures at the adjacent property to the west have been removed, and there is now some apparent truck trailer parking there near and adjacent to the north portion of the subject site. At the property to the north of the west portion of the subject site beyond the Zanja Creek, there are dirt roads drives, some cleared vegetation, and apparent piled materials, possibly soils or green waste.

12. 2006, Source: EDR (USDA/NAIP), Approximate Scale: 1"=500'

The subject site and surrounding properties appear largely the same as previously shown. Truck trailer parking has doubled offsite and near/adjacent to the subject site to the west. Across the Zanja Creek to the northwest, a property has expanded development to the east, and may be residential and/or commercial use. To the north of this property are apparent industrial buildings under development (grading). The residence to the east across Tennessee Street from the northeast corner of the subject site appears to have been removed and is now asphalt parking/drive area.

13. 2009, Source: EDR (USDA/NAIP), Approximate Scale: 1"=500'

The subject site and surrounding properties appear largely the same as previously shown. Truck trailer parking to the west has increased. The two industrial buildings beyond the Zanja Creek to the northwest have been completed.

14. 2012, Source: EDR (USDA/NAIP), Approximate Scale: 1"=500'

The subject site and surrounding properties appear essentially the same as previously shown.

15. 2016, Source: EDR (USDA/NAIP), Approximate Scale: 1"=500'

The subject site and surrounding properties appear largely the same as previously shown, except there appear to be numerous containers, likely including dumpsters and roll-off bins at the property to the north of the west portion of the subject site across the Zanja Creek.

16. 2016-2018, Google Earth Pro Aerial Images, Various Scales
