Subject: **Phase I Environmental Site Assessment**
49 and 95 North 4th Street, 147 East Santa Clara Street and Towers Parking Lot
San Jose, California 95112
AEI Project No. 422609
Client Reference Name: ICON Block: N. 4th Street at E. Santa Clara Street

DRAFT

Dear Alex Sinunu:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (925) 746-6000 or pmcintyre@aeiconsultants.com.

Sincerely,
DRAFT
Peter McIntyre, PG
Executive Vice President
AEI Consultants

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Urban Catalyst Operating Partnership LLC to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 49 and 95 North 4th Street, 147 East Santa Clara Street and Towers Parking Lot, San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	49 and 95 North 4th Street, 147 East Santa Clara Street and Towers Parking Lot, San Jose, Santa Clara County, California 95112
Property ID (APN or Block/Lot)	Parcel 1: APN 467-20-060 Legal addressing: 77 N 4th, 95-99 N 4th, 126-128 E St. John Parcel 2: 467-20-081 Legal addressing: 49 N 4th Parcel 3: 467-20-080 (parking lot portion) Legal addressing: 60 N 3rd Parcel 4: 467-20-079 Legal addressing: 147 E Santa Clara
Location	Bound by East St. John Street to the northwest, by North 4th Street to the northeast, and East Santa Clara Street to the southeast
Property Type	Commercial
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	2.1/Client provided
Number of Buildings	5
Building Construction Date(s)/Source	Parcel 1: Western building: 1948*, Central building: 1948*, Eastern building: Approximately 1930** Parcel 2: 1972* Parcel 3: n/a (assessing parking lot portion only) Parcel 4: 1969* Source: *San Jose Building Department (SJBD) **Sanborn maps Note: However, historical sources/permits indicate the western building on Parcel 1 was being used for automotive repair in 1930.

DRAFT

Building Square Footage (SF)/Source	N/A
Number of Floors/Stories	One
Basement or Subgrade Area(s)	None identified
Number of Units	N/A
Additional Improvements	Asphalt-paved parking areas and associated landscaping
On-site Occupant(s)	Parcel 1- Ink Vested (central) and two vacant buildings (west/ east) Parcel 2 - First Presbyterian Church Parcel 3 - Parking lot Parcel 4 - Chevron-branded gas station
Current On-site Operations/Use	A gas station and auto repair shop, a church/homeless support center, a tattoo parlor, two vacant commercial buildings, a parking lot
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	RGA LUST (x7), EDR Hist Auto (x2), CIWQS (x2), CERS (x7), Hist Cortese (x2), HAZNET (x17), HWTS (x21), HAZMAT (x3), RCRA NonGen / NLR (x3), FINDS (x5), ECHO (x2), CERS HAZ WASTE (x3), CUPA Listings (x6), LUST (x2), HIST LUST (x2), HIST UST (x2), EDR Hist Cleaner, EMI (x2), SWEEPS UST, CERS TANKS, UST, WDS

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
All Parcels		
Prior to 1884	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps, agency records, prior report
1884-1915	Multiple commercial and residential buildings/Glenwood Lumber Company, Central Miller's Milling Company, Mt. Hamilton Livery	Sanborn Maps
1916-1929	Unknown use/Data failure	Refer to Section 1.6.1
Parcel 1		
1939	Northeastern corner - historical commercial building, use unknown, refer to Section 1.6.2	Aerial photograph
1948-Present	West building (126/128 E St. John): Current building/auto repair (1930-2005), vacant (present) Central building: (95 N 4th): Current building/gas station with presumed auto repair (1948-1998), dry cleaners (2015), tattoo shop (present) East Building (77 N 4th): Current commercial building/Diaper cleaning service and/or french laundry (1930-1970s), pottery story (1970s)	Aerial photographs, city directories, agency records, Sanborn maps, Google Street View, site visit
Parcel 2		
1939	Portion of a church	Aerial photograph

DRAFT

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1950-1969	Vacant land, portion of a church	Sanborn maps, aerial photographs
1972-Present	Current church (49 North 4th Street)	Aerial photographs, city directories, site observation, Sanborn maps
Parcel 3		
1950	Vacant lot and small auto parking building, parking	Sanborn map
1950-present	Current parking lot	Aerial photographs, Sanborn maps, site observation
Parcel 4		
1930-1965	Historical buildings/auto repair and sales, with fueling (117 East Santa Clara Street)	Agency records, prior report, Sanborn maps, city directories, aerial photographs
1966-1969	Historical buildings/vacant	City directory, Sanborn map
1969-Present	Service station building/Gas station and auto repair, current configuration/remodel in 1985 (147 East Santa Clara Street)	Aerial photographs, city directories, site observation, prior report, agency records

DRAFT

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	North 4th Street followed by: 100 N 4th Street Parking (100 N 4th Street) Donner Lofts Studio Apartments (158 East St. John Street) ParkSJ: Fourth/St. John Garage (50 North 4th Street) Construction site (21 North 5th Street)	EDR Hist Auto (155 North Santa Clara Street) CUPA LISTINGS, RCRA NONGEN/NLR (21 N 5th Street) EDR Hist Auto, LUST, CERS (100 North 4th Street) SLIC, CERS (167-193 East Santa Clara Street)
Southeast	East Santa Clara street followed by: Multiple commercial storefronts (118-150 East Santa Clara Street) San Jose City Hall (200 East Santa Clara Street)	EDR Hist Cleaner (x3) (118, 134, 144 East Santa Clara Street) EDR Hist Auto (x2), Hist Cortese, LUST, HIST LUST, SWEEPS UST, HIST UST, CUPA Listings, CERS (South 4th and East Santa Clara, 152-154 East Santa Clara Street) SLIC, HWTS, EMI, HAZNET, CERS (200, 224 E Santa Clara) HIST CLEANER (2), HIST AUTO (168, 184, 190 E Santa Clara)

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Southwest	Multi-tenant commercial building (101-115 East Santa Clara Street) Westca (30 North 3rd Street) Town Park Towers (60 North 3rd Street) US Labor Department (96 North 3rd Street)	HAZMAT (96 North 3rd Street)
Northwest	East St. John Street followed by: Auto Locksmith San Jose (115 North 4th Street) Office building (110 N 3rd Street)	CUPA Listings (115 North 4th Street)

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- REC #1: The subject property is equipped with an oil/water separator system located in in the western building on Parcel 1 at 128 East St. John Street (refer to Figure 3 within the Appendices). Historical/regulatory agency source review indicates that auto repair businesses (including auto rebuilding and/or painting) occupied this building from at least 1930 through 2005. AEI observed a water hose located near the separator cover, suggesting that the space may have also been used for vehicle washing. Due to their subsurface nature, oil water separators and their associated piping can act as preferential pathways for contaminants such as oil, grease, fuel, or cleaning solvents discharged or released during on-site activities. This is further supported by the fact that the structural integrity of these features and/or their associated piping can become compromised over time, especially when located in areas prone to high seismic activity or freeze/ thaw cycles. Consequently, the potential exists that the historical operation of the on-site oil water separator and the associated auto repair/painting activities may have resulted in an impact to the subsurface of the subject property.
- REC #2: Review of historical sources, Google Street View images and a prior report (Section 6.3) revealed that the central building within Parcel 1 at 95-99 N 4th Street (refer to Figure 3 within the Appendices), was formerly utilized as a gas station and auto repair operation, along with a dry cleaners. The gas station operations were investigated under a closed LUST event and are discussed within the below CREC segment. However, it should be noted that the automotive repair operations were not investigated within the scope of the LUST case. Additionally, based on review of of 2015 Google Street View image, the building was later occupied by a dry cleaning business. It is unknown whether or not dry cleaning operations occurred onsite. Based on the nature of these occupancies, hazardous substances and/or petroleum products would have likely been utilized. Based on the duration/nature of occupancy, these former site uses may have resulted in releases to the subsurface and are representative of a REC. Additionally, based on the nature of occupancy, the potential for a related vapor-phase migration concern cannot be ruled out.

DRAFT

- REC #3: Review of historical sources and a prior report (Section 6.3) revealed that the subject property, specifically the eastern building on Parcel 1 at 77 North 4th Street (refer to Figure 3 within the Appendices), was formerly occupied by a 'French Laundry' business. According to city directories, New Style French Laundry occupied this unit from approximately 1930 to 1945. This business was not listed in the 1922 to 1950 directories. A French Laundry and baby diaper cleaning service business appeared present in Sanborn maps and city directories from 1950 through 1970. No other information was found regarding this business, and as a result, it is not known whether the dry cleaner was a pickup and drop-off location, or if dry cleaning was actually performed on site. The only way to determine if a release has occurred from these operations would be through the performance of subsurface sampling. Additionally, based on the nature of former use, the potential for a related vapor-phase migration concern cannot be ruled out.
- REC #4: The subject property (Parcel 4, 147 E Santa Clara) is currently equipped with three fuel USTs and one waste oil UST (Figure 6, within Appendices) in association with the current retail gas station operations. The tanks were installed in 1985 and are of double-walled fiberglass construction with Veeder Root leak detection system. Based on the age of the USTs and lack of continual/consistent documentation regarding historical testing results and operational status of the system/noted violations (Refer to Section 4.1), AEI is unable to rule out the potential that a release from the USTs has affected the subsurface of the subject property. Additionally, a recurring significant violation was issued to the site by the Santa Clara County Department of Environmental Health (SCCDEH) in 2019 with respect to the lack of a proper leak detection system for the waste oil UST and sensor tampering for many years. On this basis, the storage of petroleum products in a USTs at the subject property is considered a REC. Refer to below bullet for discussion of documented subsurface impacts detected in 2019.
- REC #5: The previous 2019 Phase I ESA report (Section 6.3) for Parcel 4 (147 E Santa Clara) included a Preliminary Phase II Soil Vapor and Groundwater Quality Evaluation. Four soil vapor and groundwater samples were collected and identified contamination above residential Environmental Screening Levels (ESLs) for Total Petroleum Hydrocarbons as Gasoline (TPH-g), 1,2-Dichloroethane (1,2-DCA), and Chlorobenzene at GW-3. Methyl Tertiary Butyl Ether (MTBE) and Ethyl t-butyl were detected at concentrations below ESLs. TPH-g, Toluene, Ethyl Benzene, m,p-xylene and 0-xylene were all detected detected in soil vapor samples, but below July 2019 San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Tier 1 ESLs. Benzene was detected in all four soil vapor samples at levels exceeding residential ESLs. The presence of petroleum hydrocarbons and Volatile Organic Compounds (VOCs) in groundwater and soil vapor above residential ESLs represents a REC.
- REC #6: According to historical sources, the subject property Parcel 4 appears to have been developed with a gas station since at least 1969 (current building/configuration). Sanborn maps and a previous report (Section 6.3) identify a fuel pump island on the east side of Parcel 4. AEI did not obtain information regarding the location or removal of USTs associated with the former pump island/former gas station configuration(s) - see Figure 6 within the appendices. Additionally, review of a prior report and historical sources indicate that a gas station (associated with the larger historical auto dealership/ service building present from 1915 through at least 1966) may have been present on the parcel as early as 1930 (see REC #8, below). No information pertinent to the

removal of former generation(s) of USTs was found during regulatory agency document review. Based on the duration of occupancy, multiple generations of USTs may have likely been present and remain unaccounted for. Therefore, the presence of the former gas stations' operations is considered a REC.

- REC #7: According to a map reviewed within a prior report (Section 6.3), three underground lifts and an oil/water separator were formerly located in the current service station building on Parcel 4 (see Figure 6 within appendices). The installation date(s) are unknown; however it is presumed that they would have been installed in 1969, during building construction. No information pertinent to the removal/sampling of these underground features was on file with the regulatory agencies. It is unknown if the features remain present (station building has since been remodeled) or were removed. AEI observed a metal plate adjacent to the southwestern exterior of the station building during the site visit. It is possible that this feature may be the clarifier (refer to photograph log in appendices).

  Due to their subsurface nature, oil water separators and their associated piping can act as preferential pathways for contaminants such as oil, grease, fuel, or cleaning solvents discharged or released during on-site activities. This is further supported by the fact that the structural integrity of these features and/or their associated piping can become compromised over time, especially when located in areas prone to high seismic activity or freeze/ thaw cycles. Consequently, the potential exists that the operation of the on-site oil water separator related to the auto repair occupancy may have resulted in an impact to the subsurface of the subject property.

  Based on the potential pre-1977 installation of the lifts, the potential exists that the hydraulic fluid within the lift systems previously contained PCBs. Due to the age of the equipment, the integrity of the equipment is unknown; therefore, the potential exists that a release of hydraulic fluid which may have contained PCBs has occurred on site. In addition, due to the shallow depth to groundwater at the property, the potential exists that groundwater would be impacted by such a release. Therefore, the presence of the hydraulic lifts represents a REC.

- REC #8: According to historical/regulatory agency sources and a previous report (Section 6.3), the southern half of Parcel 4 was formerly developed with a large auto dealership/ service business building that occupied the entire parcel in at least 1915. City directories indicate that these operations existed through at least 1960. The associated building was noted as vacant in a 1966 city directory. Based on the nature of operations, it is presumed that the operation utilized hazardous substances/petroleum products and may have operated features of concern such as USTs, clarifiers, drains and/or lifts. Due to the long-term duration of use, nature of use, time period of operation (when regulatory oversight with respect to hazardous substance storage/disposal practices would have been non-existent), these former operations may have resulted in impacts to the subsurface and thus are representative of a REC.
- REC #9: Based on review of a prior report (Section 6.3) and Sanborn maps, a GT (gas tank) UST was present in the roadway adjacent to the southern boundary of Parcel 4. During the prior report site visit, two UST vent pipes were observed in the vicinity of this

DRAFT

feature. No information was found regarding the removal of this UST(s) and no evidence of sampling was found for these features and thus a release cannot be ruled out and represents a REC.

- REC #10: Based on a review of historical records, a dry cleaning facility noted as a 'cleaning and dying' (presumably indicative of dry cleaning operations) was located on the the eastern corner of Parcel 4 (149 East Santa Clara Street) in 1915 (see Figure 6 within appendices). The next available resource was a city directory from 1930 indicating a change in use to an automotive garage. Therefore this former dry cleaning operation may have been present from at least 1915 through 1929. Dry cleaning operations typically use chlorinated solvents, particularly Tetrachloroethylene (PCE), during the dry cleaning process. These solvents, even when properly stored and handled, can readily migrate into the subsurface as a result of small releases associated with on-site operations. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and soil gas, and migrate to groundwater beneath a facility. Based on this information, the presence of a dry cleaning facility on the subject property represents evidence of a REC. Additionally, based on the nature of former use, the potential for a related vapor-phase migration concern cannot be ruled out.
- REC #11: According to review of Sanborn maps, all four parcels on the subject property were occupied by Sterling Lumber Company/Glenwood Lumber Company from at least 1891 to at least 1915. Additional lumber storage use appeared in an 1884 Sanborn map. Lumber mills pose a potential environmental concern due to the likely storage of treated wood. The most common chemical used in wood treating is creosote. Other RCRA Wastes commonly related to lumber mills include: Pentachlorophenol and Copper Napthenate. The subject property is currently planned for redevelopment for mixed use (including residential) purposes. Based on the historical use and planned site redevelopment, AEI is unable to rule out impacts to site soil from this former operation.; therefore this historical usage is representative of a REC.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI reviewed files with the GeoTracker Database for information on the closed LUST case in Parcel 1 at 128 East Saint John Street. Loomis Armored used the western and central buildings as a terminal/warehouse building and locker/business building, respectively. The LUST case was focused on the area to the east of the central building. A case closure letter was issued in 1996. Three fuel USTs, one waste oil UST and associated piping were removed in 1990. Documentation estimated the tanks' age to be approximately 43 years, as of 1990, per an employee interview. Since the subject property was used as a gas station dating back to at least 1950, the tanks removed in 1990 appear to have been the original generation of tanks. Four monitoring wells were installed with groundwater encountered at 12-20 feet below ground surface (bgs). Groundwater flowed to the west-southwest and northwest in this location. 150 cubic yards of soil was removed in 1990 and 750 cubic yards of soil was removed in 1995. Soil testing following cleanup identified TPH-gasoline at 440 parts per million (ppm), TPH-diesel at 84 ppm, Benzene at 5.2 ppm, Toluene at 12 ppm, Xylene at 15 ppm, and Ethylbenzene at 5.9 ppm.

Groundwater testing following cleanup identified TPH-gasoline at 60 parts per billion (ppb), Benzene at 1.4 ppb, Toluene at 1 ppb, Xylene at 1.6 ppb, Ethylbenzene at 1.4 ppb, and MTBE at 10 ppb. Documentation indicated that waste oil tank soil samples did include analysis for VOCs and SVOCs (EPA Method 8240, 8270, respectively) and were low to non-detect. The documentation stated that pollution concentrations in groundwater indicated a declining trend and localized dissolved petroleum hydrocarbons. The closure letter concluded that "if subsurface work is to be performed in the area of residual pollution, the responsible party should prepare a Health and Safety Plan before proceeding." Based on these factors, the closed LUST case represents a CREC.

- AEI reviewed files with the GeoTracker database and the previous report, discussed in Section 6.3, for information on the closed LUST case located in Parcel 4 at 147 East Santa Clara Street. Four USTs (fuel and waste oil) were reportedly replaced in 1985; however the locations of former USTs are unknown and no record of UST removals was found. Associated piping was replaced in 1994. Twenty-four monitoring wells were installed. Groundwater was encountered at 9-30 feet bgs. Groundwater flow was to the northwest. In 1983, 148 gallons of gasoline was released due to a piping leak. Site characterization was completed in 2009. On May 21, 2010, the DEH issued a closure letter indicating that that no further action related to the petroleum release(s) is required. In an associated case closure summary and information noted in the prior report (Section 6.3), the DEH described the residual remaining contamination at the Site and stipulated the following Site management requirements:

  Please note the following conditions still remain at the site: residual contamination remains in soil of 2,200 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 2,900 ppm Total Oil and Grease (TOG), 1 ppm Benzene, 0.65 ppm Toluene, 43 ppm Ethylbenzene, 195 ppm Xylenes, 0.014 ppm Methyl tert-Butyl Ether (MtBE), and 0.97 ppm Acetone; and in groundwater of 5,200 parts per billion (ppb) TPHg, 1,000 ppb TPH as Diesel (TPHd), 100 ppb Benzene, 3.4 ppb Toluene, 200 ppb Ethyl benzene, 14 ppb Xylenes, 56 ppb MtBE, 6,600 ppb Tert Butyl Alcohol (TBA), 61 ppb Acetone, 2 ppb Vinyl Chloride (VC), and 61 ppb 1,2-Dichloroethane (DCA). AEI note: Parcels 2, 3 and 4 have been impacted by this release case.

  Residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety or the environment. This could necessitate additional sampling, health risk assessment and mitigation measures. DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement.

Based on residual contamination left in place and site management requirements, this closed LUST case represents a CREC.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- Due to the age of the subject property buildings, there is a potential that ACMs are present. According to the site contact, Mr. Evin Weiser, demolition of all of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.
- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of all of the subject property buildings are planned**.** AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition and worker/ occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- AEI observed interior areas of the subject property buildings in order to identify the presence of mold. During the on-site reconnaissance, obvious visible signs of mold growth or conditions conducive for suspect mold growth were observed in Parcel 2, at 49 North 4th Street. Although typically not included in the scope of work for a Phase I ESA, the presence of the suspect mold identified may pose a health and safety concern to any subsequent occupants and/or construction workers during future renovation activities. AEI understands that the building is slated for demolition, therefore no additional action is recommended with respect to the observed mold growth.
- Sanborn maps indicate that railroad tracks were historically located within the center of North 4th Street, adjoining northeast to the subject property. Railroad tracks and spurs represent environmental concerns due to the historical application of oils containing PCBs, herbicides, and arsenic for pest and weed control, as well as the potential presence

DRAFT

of creosote on the rail ties, and the historical common practice of using coal cinders for track fill material. The area of the former railroad tracks is currently paved over, prohibiting any direct contact with near surface soils. Therefore the former adjoining railroad tracks are not expected to represent a significant environmental concern at this time.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 49 and 95 North 4th Street, 147 East Santa Clara Street and Towers Parking Lot, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section. AEI recommends the following:

- Item #1: All Parcels: Phase II Subsurface Investigation (re: historical use of entire block as a lumber mill/storage facility)
- Item #2: Parcel 1: Phase II Subsurface Investigation (re: historical auto repair use in western building/central building, French Laundry use in eastern building and cleaners use in central building)
- Item #3: Parcel 1: Proper closure and removal/subsurface sampling of the current inactive oil/water separator within the western building
- Item #4: Parcel 1: Consult with regulatory agencies with respect to planned redevelopment/grading/change in use (re: the closed LUST case)
- Item #5: Parcel 4: Proper closure and removal/subsurface sampling of four current USTs
- Item #6: Parcel 4: Phase II Subsurface Investigation/confirmation of removal (re: former clarfier and three former in-ground lifts related to auto repair use)
- Item #7: Parcel 4: Consult with regulatory agencies, with respect to planned redevelopment/grading/change in use (re: closed LUST case; known subsurface impacts on Parcels 2, 3, 4)
- Item #8: Parcel 4: Geophysical survey to locate previous generation(s) of gas station UST(s)
- Item #9: Parcel 4: Geophysical survey to locate gasoline UST (noted in Sanborn maps adjacent to southwest of parcel)
- Item #10: Parcel 4: Geophysical survey to further investigate use of two fill pipes (observed during 2019 site visit)
- Item #11: Parcel 4: Further characterization/delineation of documented subsurface impacts detected in 2019 (re: former 'cleaning and dyeing' facility (potential dry cleaner), current auto repair operations, former auto dealership/repair)

DRAFT

- Item #12: All Parcels: Due to the planned groundbreaking activities, redevelopment and change in site use, the User should implement a Site Management Plan (SMP) to protect the health and safety of construction workers in connection with respect to the known residual subsurface contamination which will be encountered. The document should also address the proposed construction, related excavation and grading activities to include plans for encountering, handling and disposing of soil/groundwater potentially impacted by hazardous substances and/or petroleum products or other yet unidentified features or conditions that may exist.
- Item #13: Parcels 1, 2, 4: Pre-Demolition ACM and LBP Surveys for current structures

DRAFT

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 49 and 95 North 4th Street, 147 East Santa Clara Street and Towers Parking Lot, San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

DRAFT

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

DRAFT

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- Due to the large volume of stored products/materials within the buildings, direct visual observation of many of the floor and wall areas of the buildings was not possible. Features may be present that were not observed during AEI's field reconnaissance.
- Due to the large volume of vehicles within the parking areas of the subject property, direct visual observation of the ground in many areas was not possible. Features may be present that were not observed during AEI's site inspection.
- AEI was not able to gain entry within the central building on Parcel 1 (tattoo parlor at 95 N 4th) as the site contact did not have keys to the building. The tenant, who has keys, could not be reached. Based on the quality of information obtained from a previous report and current site use, this limitation is not expected to significantly alter the findings of this assessment.
- AEI performed a search of building, planning, and fire department permit history activity via the City of San Jose's online permit search portal. Based on AEI's project experience, San Jose Fire Department (SJFD) documentation pertaining to hazardous substances is generally not available online and must be viewed at the City Hall Self-Help center lobby public computers. Due to the covid-19 coronavirus pandemic, City Hall is not currently open to the public. AEI therefore submitted an email FOIA request to SJFD to determine if any additional documentation, not present on the website, may exist. However, based on the quality of information obtained from other sources, this limitation is not expected to significantly alter the findings of this assessment.
- On May 27, 2020, Bay Area Air Quality Management District was contacted for information on the subject property in order to identify historical tenants, property use and/or hazardous materials handling. Due to the time frame of this assessment, records at the Bay Area Air Quality Management District for the addressing of 117, 147 and 149

DRAFT

East Santa Clara Street were not available for review. However, based on the quality of information obtained from other sources including SCCDEH, this limitation is not expected to significantly alter the findings of this assessment.

- The subject property owner/seller was not interviewed during this assessment; however interviews were requested via the site contact. A response to AEI's request for interview is currently pending. Based on information obtained from other sources, including the key site manager, this limiting condition is not expected to alter the overall findings of this assessment.

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was a Sanborn Map from 1984 indicating that the subject property was developed with residences, a lumber yard, flour/grist mill and hay storage/stables. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for these purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment. The use of the property from 1916 to 1929 could not be determined. In 1915, the property contained a lumber mill/lumber storage. By 1930, the property contained two of the current buildings on Parcel 1 and a former auto dealership/repair building was present on Parcel 4. It is presumed that the property would have been used for similar purposes during this gap and therefore this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, previous report, interviews

DRAFT

1.6.2 SIGNIFICANT DATA GAPS

The following significant data gap was identified during the course of this assessment:

Significant Data Gap	In the 1939 aerial photograph, what appeared to be a commercial building was present in the northeastern corner of Parcel 1. Due to the image quality, and lack of other tenancy information, the nature of use of this building is unknown. However, based on the quality of information obtained from the prior report, this data gap is not expected to significantly alter the Findings of this report.
Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, previous report, interviews

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of Urban Catalyst Operating Partnership LLC. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by Urban Catalyst Operating Partnership LLC on May 19, 2020. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.3 Site and Vicinity Characteristics

The subject property is located in a downtown commercial area of San Jose, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	North 4th Street followed by: 100 N 4th Street Parking (100 N 4th Street) Donner Lofts Studio Apartments (158 East St. John Street) ParkSJ: Fourth/St. John Garage (50 North 4th Street) Construction site (21 North 5th Street)	EDR Hist Auto (155 North Santa Clara Street) CUPA LISTINGS, RCRA NONGEN/NLR (21 N 5th Street) EDR Hist Auto, LUST, CERS (100 North 4th Street) SLIC, CERS (167-193 East Santa Clara Street)
Southeast	East Santa Clara street followed by: Multiple commercial storefronts (118-150 East Santa Clara Street) San Jose City Hall (200 East Santa Clara Street)	EDR Hist Cleaner (x3) (118, 134, 144 East Santa Clara Street)

DRAFT

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
		EDR Hist Auto (x2), Hist Cortese, LUST, HIST LUST, SWEEPS UST, HIST UST, CUPA Listings, CERS (South 4th and East Santa Clara, 152-154 East Santa Clara Street) SLIC, HWTS, EMI, HAZNET, CERS (200, 224 E Santa Clara) HIST CLEANER (2), HIST AUTO (168, 184, 190 E Santa Clara)
Southwest	Multi-tenant commercial building (101-115 East Santa Clara Street) Westca (30 North 3rd Street) Town Park Towers (60 North 3rd Street) US Labor Department (96 North 3rd Street)	HAZMAT (96 North 3rd Street)
Northwest	East St. John Street followed by: Auto Locksmith San Jose (115 North 4th Street) Office building (110 N 3rd Street)	CUPA Listings (115 North 4th Street)

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Qa: Alluvial gravel, sand, silt, and clay; represents undifferentiated stream alluvium in drainages and younger alluvial fan deposits at base of slopes and on fan areas, age Holocene/USGS and United States Department of the Interior
Soil Series: Description/Source	Urban land-Elpaloalto complex: Clay loam, silty clay loam, well drained, not prime farmland/USDA Soil Survey
Groundwater Flow Direction/Source	Northwest/LUST documentation for the subject property closed LUST case at 147 E Santa Clara
Depth to Groundwater/ Source	9-27 feet bgs/Subject property environmental subsurface investigation (Cornerstone, 2019)
Surface waters on the subject property or adjoining sites	None
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
All Parcels		
Prior to 1884	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, Sanborn maps, agency records, prior report
1884-1915	Multiple commercial and residential buildings/Glenwood Lumber Company, Central Miller's Milling Company, Mt. Hamilton Livery	Sanborn Maps
1916-1929	Unknown use/Data failure	Refer to Section 1.6.1
Parcel 1		
1939	Northeastern corner - historical commercial building, use unknown, refer to Section 1.6.2	Aerial photograph
1948-Present	West building (126/128 E St. John): Current building/auto repair (1930-2005), vacant (present) Central building: (95 N 4th): Current building/gas station with presumed auto repair (1948-1998), dry cleaners (2015), tattoo shop (present) East Building (77 N 4th): Current commercial building/Diaper cleaning service and/or french laundry (1930-1970s), pottery story (1970s)	Aerial photographs, city directories, agency records, Sanborn maps, Google Street View, site visit
Parcel 2		
1939	Portion of a church	Aerial photograph
1950-1969	Vacant land, portion of a church	Sanborn maps, aerial photographs
1972-Present	Current church (49 North 4th Street)	Aerial photographs, city directories, site observation, Sanborn maps
Parcel 3		
1950	Vacant lot and small auto parking building, parking	Sanborn map
1950-present	Current parking lot	Aerial photographs, Sanborn maps, site observation
Parcel 4		
1930-1965	Historical buildings/auto repair and sales, with fueling (117 East Santa Clara Street)	Agency records, prior report, Sanborn maps, city directories, aerial photographs
1966-1969	Historical buildings/vacant	City directory, Sanborn map

DRAFT

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1969-Present	Service station building/Gas station and auto repair, current configuration/remodel in 1985 (147 East Santa Clara Street)	Aerial photographs, city directories, site observation, prior report, agency records

The following historical addresses were associated with the subject property: 1-99 North 4th Street (odds), 113-149 East Santa Clara Street (odds), 126-148 East St. John Street, 34-74 North 3rd Street - evens (building area on western side of APN 467-20-080, not included in this assessment). These addresses were also researched as part of this assessment.

The historical use of the subject property is discussed in the Findings.

If available, copies of historical sources are provided in Appendix D.

3.1 Aerial Photographs

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939	**Two current commercial buildings** (west and east) and historical commercial building on Parcel 1, a portion of a church on Parcel 2, vacant land/parking on Parcel 3 and two large commercial buildings (one of which is the former auto dealership per Sanborn maps) on Parcel 4	NORTHEAST: A roadway followed by multiple commercial buildings and **two gas stations** SOUTHEAST: A roadway followed by multiple commercial structures SOUTHWEST: Multiple commercial structures NORTHWEST: Roadway, commercial building and vacant land
1948, 1950, 1956	Two commercial buildings and a **gas station** on Parcel 1 (current buildings), a portion of a church on Parcel 2, vacant land on Parcel 3 and two large commercial buildings (one of which is the former auto dealership per Sanborn maps) on Parcel 4	No significant changes, **additional gas station to southeast**
1968	No significant changes	NORTHEAST: No significant changes SOUTHEAST: No significant changes SOUTHWEST: A large commercial structure, a church and a vacant lot NORTHWEST: Two large commercial buildings and parking lot
1974, 1982, 1993, 1998*	Two commercial buildings and a **gas station** on Parcel 1 (current buildings), the current church on Parcel 2, vacant land/parking on Parcel 3 and the current **gas station** on Parcel 4	NORTHEAST: Multiple commercial buildings SOUTHEAST: No significant changes SOUTHWEST: A large commercial structure, the current apartment complex and a parking lot NORTHWEST: No significant changes

DRAFT

Year(s)	Subject Property Description	Adjoining Site Descriptions
2005	Three commercial buildings on Parcel 1, the current church on Parcel 2, vacant land on Parcel 3 and the current **gas station** on Parcel 4	NORTHEAST: Multiple commercial buildings and a large construction lot SOUTHEAST: Commercial use and City Hall SOUTHWEST: Two large commercial structure and the current apartment complex NORTHWEST: No significant changes
2006, 2009, 2010, 2012	No significant changes	NORTHEAST: A commercial building, the current apartment complex and a large vacant lot SOUTHEAST: No significant changes SOUTHWEST: No significant changes NORTHWEST: No significant changes

Please refer to the Findings for additional information regarding the historical use of the subject property.

The multiple historical adjoining gas stations are discussed in Section 5.1.

Due to poor image quality and/or scale, detailed observation of site features was not possible in various images.

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1884	Hay, wood, coal and ice storage sheds, multiple miscellaneous sheds/stables, a lumber house and storage lot, and Miller's Flour & Grist Mill including multiple sheds, a carriage house, a hay barn and a wood shed with portable generator (125-129 East Santa Clara Street, 128 East St. John Street)	NORTHEAST: North 4th Street and a centered railroad track followed by lumber piles, San Jose Brush Electric Light Co engine room with an elevated tank, a fruit packing building and multiple dwellings SOUTHEAST: East Santa Clara Street followed by multiple stores, multiple dwellings, a boarding house, and Chinese Wash Houses SOUTHWEST: Remainder of the grist mill, carpet weaving store, multiple sheds, a lumber yard, a warehouse, an engine room, boilers, and multiple dwellings NORTHWEST: East St. John Street followed by vacant land an multiple sheds/dwellings
1891	**Glenwood Lumber Company**, lumber piles, a corral with multiple sheds and dwellings, The Central Milling Company Flour Mill including scales warehouses, boilers, a mill an engine room and sheds, Mt. Hamilton Livery, a harness shop and a carpenter shop	NORTHEAST: North 4th Street and a centered railroad track followed by Mechanics Mill, multiple lumber yards, San Jose Electric Light Company with an engine room, Mt. Hamilton Stage Company carriage house and dwellings, Garden City Stage Line with multiple sheds

DRAFT

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
	(125-145 East Santa Clara Street, 121 East St. John Street)	and multiple dwellings SOUTHEAST: East Santa Clara Street followed by a blacksmith, multiple dwellings and a Chinese Laundry, many small illegible buildings SOUTHWEST: Multiple stores, sheds, lumber yards, and multiple dwellings NORTHWEST: East St. John Street followed by a boarding house, residence and vacant land
1915	**Glenwood Lumber Company** including multiple lumber yards and sheds, a coal shed, carpentry, store, and a **cleaning and dyeing shop** (143-149 East Santa Clara Street, 128 East St. John Street,15-99 North 4th Street)	NORTHEAST: North 4th Street and a centered railroad track followed by an apartment building, a storage ware house, a garage, Pacific Gas and Electric Co Storage with oil room, multiple junk and scrap iron yards, an iron storage shed and multiple stores SOUTHEAST: East Santa Clara Street followed by multiple stores including a bicycle repair shop and paint store SOUTHWEST: Vacant land, Sperry Flour Company warehouse, a lumber shed, 1st Presbyterian Church, and multiple dwellings NORTHWEST: East St. John Street followed by vacant land, a garage, and a Wells Fargo building
1950	The current buildings on Parcel 1 including a 30 **car garage and repair area, an auto service shop with gas station, and a French laundry** Vacant land and a portion of the southwestern adjoining 1st Presbyterian Church, an auto parking building **Auto Sales and Service shop** in Parcel 4 with **associated gas tank located south beneath East Santa Clara Street** (117-149 East Santa Clara Street, 128 East St. John Street, and 21-99 North 4th Street)	NORTHEAST: North 4th Street and a centered railroad track followed by apartment buildings, two roofing material warehouses, a cold storage building, a vacant lot, a bicycle repair store, and two **gas stations** SOUTHEAST: East Santa Clara Street followed by multiple stores and a **gas station** SOUTHWEST: A grocery store, a spray painting building, an office, 1st Presbyterian Church, a parking lot and dwellings NORTHWEST: East St. John Street followed by a parking lot and residential
1969	The current buildings on Parcel 1 including a **private garage, office, gas station, and a French laundry** Vacant land and a portion of the southwestern adjoining 1st Presbyterian Church Previous dealership buildings (now vacant) in Parcel 4 with **associated gas tank located south beneath East Santa Clara Street**	NORTHEAST: North 4th Street and a centered railroad track followed by apartment buildings,a parking lot, a county office building, a vacant lot, and **two gas stations** SOUTHEAST: No significant changes SOUTHWEST: A paint store, a parking lot, a youth center, 1st Presbyterian Church, and a vacant lot NORTHWEST: East St. John followed by a bank and vacant land

DRAFT

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
	(117-149 East Santa Clara Street, 126-128 East St. John Street, and 77-99 North 4th Street)	
1984	The current buildings on Parcel 1 including a **private garage, a gas station/ commercial use**, and a commercial building The current 1st Presbyterian Church on Parcel 2 Parking on Parcel 3 **Gas station** (current formation) in Parcel 4 (117-149 East Santa Clara Street, 126-128 East St. John Street, and 21-99 North 4th Street)	NORTHEAST: Not depicted, however it appears that previously noted railroad tracks remain SOUTHEAST: No significant changes (portion covered) SOUTHWEST: Multiple commercial buildings, the current Park Towers apartments and a large office building NORTHWEST: No significant changes, additional office building

The historical use of the subject property is discussed in the Findings segment.

The adjoining historical railroad tracks are discussed in the Findings segment.

Based on a review of Sanborn maps, the adjoining properties to the north/northeast and southeast were formerly developed with gas stations. Please refer to Section 5.1 for additional information.

3.3 City Directories

A search of historical city directories was conducted for the subject property utilizing EDR. Please refer to the appendices for a complete list of historical subject property tenants identified by EDR. Directories were reviewed in approximate five-year increments from 1922 to 2017. The first listing for the subject property appeared in 1930. The following table summarizes the potential tenants of concern based on AEI's review of the historical city directories.

Year(s)	Address - Occupant Listed
1930	21 North 4th Street - Vacant 117 East Santa Clara Street - **Garden City Durant Co**
1930, 1945	149 East Santa Clara Street - **Mc Mullen Garage**
1935*	21 North 4th Street - Garden City Mission
1935	135 East Santa Clara - **Enos Auto sales**
1930-1945	77 North 4th Street - **New Style French Laundry**
1935*	117 East Santa Clara Street - **Jack Sonflieth Autos**
1935-1960	117 East Santa Clara Street - **Garden City Chevrolet auto service and parts,** (and/or **Bob Coyle Chevrolet***)
1940	23 North 4th Street - Garden City Transportation Co
1950-1960	95 North 4th Street - **Fites Automotive Service Gas Station, Texaco Gas Station**
1940-1955	128 East St. John Street - Continental Baking Co
1950-1970	77 North 4th Street - **Babys Diaper Service**

DRAFT

Year(s)	Address - Occupant Listed
1930-1963	126 East St. John Street - **Wadley's Auto Service, other auto service/auto painting businesses**
1957	139 East Santa Clara Street - Mary S Bright Spot L
1957-2004	128 East St. John Street - **Loomis Armored Co. Car Service**
1975	77 North 4th Street - Firth Carpets and Rugs Storage 147 East Santa Clara Street - **Standard Stations Inc**
1975	139 East Santa Clara Street - Frank Rath used cars
1975-2017	49 North 4th Street - First Presbyterian Church
1980-2009	77 North 4th Street - Branchs Pottery
2000	77 North 4th Street - **Loomis Fargo**
1994-2017	147 East Santa Clara Street - **Chevron gas station, Save Money auto repair and glass, smog test only (2014-2017)**
1996	49 North 4th Street - First Presbyterian Church, Natural Express Photo & Service
2000	49 North 4th Street - First Presbyterian Church

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

Refer to Section 3.0 for additional discussion of subject property tenancies.

*Obtained from previous report discussed in Section 6.3.

3.4 Historical Topographic Maps

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 Chain of Title

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Department of Environemntal Health (SCCDEH)	May 21, 2020	Website	Ms. Melissa Belloso	Records discussed below

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
1992	Fourth & Santa Clara Chevron	Notice of Inspection	Auto repair including waste oil, waste oil filters, waste antifreeze and used batteries on-site
1992	Loomis Armored Co.	Violation list	Multiple violations including: improper management of used oil filters, floor absorbent being dumped in dumpster. Waste inventory includes waste motor oil, waste anti freeze, and solvent, waste oil tank labeling (AEI note: presumably an AST), labeling of oil/ water drums
1999	128 E. St. John st.	Notice of Inspection	Notes of used antifreeze containers
200-2002	Fourth & Santa Clara Chevron	Notice of Inspection	Auto repair including used oil and used antifreeze on-site
2012	Fourth & Santa Clara Chevron	Photolog	Photos of used oil tank and monitoring system
2012	Fourth & Santa Clara Chevron	Inspection	**Tampering with tank monitoring sensor equipment for waste oil UST** **Last monitoring cert/ secondary containment test in 2009 (pass)** **LLDs failed for two fuel tanks**
2013	Fourth & Santa Clara Chevron	Inspection	Tank sumps, UDCs passed Last SB 989 in 2009
2014	Fourth & Santa Clara Chevron	Spill Bucket Testing	**Tank 3 failure. Waste oil/ debris in waste oil UST spill bucket.**

DRAFT

Date	Occupant	Document Type	Document Notes/Violations
2009-2018	Fourth & Santa Clara Chevron	Certification of Financial Responsibility	No violations
2015	Fourth & Santa Clara Chevron	Monitoring System Cert/ Inspection	Pass - fuel tanks Pass - all tanks (spill buckets) **Sensor type for waste oil UST not approved (noted in 2016, 2017, 2018, 2019 as well)** **Sensor position issues with other tanks**
2016	Fourth & Santa Clara Chevron	Monitoring System Cert, Spill Bucket Test UDC	Pass
2017	Fourth & Santa Clara Chevron	Monitoring System Cert and Inspection	Secondary Containment Tested Tanks 1 and 2 - pass All Tanks Pass - Spill Buckets **Sensors in fuel tanks not in correct positions**
2005-2019	Fourth & Santa Clara Chevron	CERS UST Permitting	Four tanks including two 10,000-gallon gasoline, one 10,000-gallon diesel, and one 1,000-gallon waste oil tank
2018	Fourth & Santa Clara Chevron	Inspection	**No permit to operate UST found** **91 spill bucket not functional** Secondary containment test - pass
2019	Fourth & Santa Clara Chevron	Notice of Significant Violation Inspection	**Significant violation for multiple violations for the used oil UST lacking appropriate leak detection monitoring equipment for several years.** **Sensors placed at wrong angle in tanks** **Spill buckets failed** **UST testing past due** **Evidence of overfilling of the used oil UST**

Review of information on file for the subject property at the SCCDEH revealed the use of hazardous materials on-site, refer to the Findings for discussion.

DRAFT

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Fire Department (SJFD)	May 21, 2020	Website	N/A	Website records discussed below. Refer to Section 1.5 for additional discussion regarding pending FOIA.

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
1997	49 North 4th Street	Fire Inspection	No violations
2005	128 E St. John	Fire Prevention Inspection	Facility closure and haz mat permit final. Notes to clean all residual oil remaining on floor in parking garage area in May 2005. All floors power washed in June 2005.
2009	147 E Santa Clara Street	Fire prevention	Hazardous Materials Permit

Review of information on file for the subject property at the SJFD revealed the use of hazardous materials at the subject property; refer to the Findings.

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Building Department (SJBD)	May 21, 2020	Website	N/A	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
1936	Garden City Chevrolet 145 E Santa Clara	Occupancy permit as a public garage
1947	Permit for auto repair and sales 117 E Santa Clara	Permit for alterations
1947	77 North 4th Street	Building permit for baby laundry
1948	95 North 4th Street	Building permit for gas station
1948	Wadley Service Co.- 126 East St. John	Building permit for auto repair, gas station, and garage.
1949	Wadley Service Co.- 126 East St. John	Permit for locker room in public garage
1951	Bob Coyle Chevrolet 149 E Santa Clara	Permit for alterations and additions / auto repair
1952	Bob Coyle Chevrolet 149 E Santa Clara	Permit for alterations / auto sales and repair
1956	Loomis Arm Car Service - 126 East St. John	Permit for an office
1956	77 North 4th Street	Building addition for Baby's Diaper Service

DRAFT

Year(s)	Owner/Applicant	Description of Permit and Building Use
1962, 1964	Loomis Arm Car Service - 126 East St. John	Parking garage permit and inspection
1967	Gasoline Station 117 E Santa Clara	Electrical Permit
1968	77 North 4th Street	Gas permit for Baby's Diaper Service
1969	147 East Santa Clara Street	Building permit for gas station Includes three gas pumps
1972	49 North 4th Street 147 East Santa Clara Street	Building permit for church Electrical permit for Standard Oil Company
1973	128 East St. John Street	Permit for condensate drain
1973	95 North 4th Street	Plumbing permit
1976	77 North 4th Street - Branches Pottery	Alterations for pottery sales business
1983	147 East Santa Clara Street	Building shell permit, kiosk for cashier booth
1987	147 East Santa Clara Street	New signs
1989	128 East St. John Street	Sign permit
1990	128 East St. John Street	Reroof permit
1990	147 East Santa Clara Street	Water Treatment Cleanup System
1993	147 East Santa Clara Street	Remove and replace fuel dispensers
1996	49 North 4th Street	Sign permit
2003	147 East Santa Clara Street	Electrical permit for installation of ground remediation equipment
2005	Pitman Family Parts LP - 128 East St. John Street	Electrical permit
2005	Loomis Fargo & CO - 128 East St. John Street	Hazardous Materials Storage System Permit Application - Four ASTs including one 220-gallon motor oil tank, one 160-gallon ATF oil tank, one 160-gallon gear oil tank and one 220-gallon used oil tank. Inventory includes new and used motor oil, new and used antifreeze, new and used transmission fluid, gear oil, diesel fuel, freon, argon, oxygen, acetylene and propane. A note that this business moved to an address in Milpitas in 2005 and emptied all tanks.
2009	147 East Santa Clara Street	Proposed installation of Phase II Enhanced Vapor Recovery System upgrade
2011	147 East Santa Clara Street	Convert two auto repair bays to expand use of existing convenience store
2014	128 East St. John Street	Zoning approval to change from commercial general to downtown primary commercial zoning
2017	95 North 4th Street	Address change to add 95 North 4th Street to APN 467-20-060 (Parcel 1)
2017	95 North 4th Street	Tenant improvement for Inkvested tattoo shop

DRAFT

Year(s)	Owner/Applicant	Description of Permit and Building Use
2019	147 East Santa Clara Street	Install backflow

Evidence indicating current or prior use or storage of hazardous substances was on file for the subject property with the SJBD; refer to Section 5.1 and the Findings for discussion.

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

DRAFT

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

Facility Name	Chevron, Fites Automotive, Town Park Towers, Loomis Armored, New Style French Laundry, San Jose Smog Check, Save Money Auto Repair, 4th and Santa Clara, George Saunders
Address	95 North 4th Street, 128 E St. John, 77 N 4th Street (Parcel 1) 60 North 3rd Street (Parcel 3) 147 East Santa Clara Street (Parcel 4)
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	RGA LUST (x7), EDR Hist Auto (x2), CIWQS (x2), CERS (x7), Hist Cortese (x2), HAZNET (x17), HWTS (x21), HAZMAT (x3), RCRA NonGen / NLR (x3), FINDS (x5), ECHO (x2), CERS HAZ WASTE (x3), CUPA Listings (x6), LUST (x2), HIST LUST (x2), HIST UST (x2), EDR Hist Cleaner, EMI (x2), SWEEPS UST, CERS TANKS, UST, WDS
Comments	**Parcel 1:** <u>95 North 4th Street (Central building), 128 E St. John (west building)</u> The property (95 N 4th) is listed in the EDR Hist Auto Database as a gas station from 1950-1955. The property (128 E St. John) is listed in the HAZNET database for the disposal of hazardous waste materials discussed in Section 4.6. The property is also listed in 1990 for 1.668 ton of tank bottom waste and 1991 for 0.15 ton of contaminated soil from site clean-up. Other empty containers were removed in 1990/1991. The 1990 and 1991 listings appear to be related to the former USTs and related closed LUST case. The property is listed for a LUST/RGA LUST case (128 E St. John) in 1990-1992 and 2003-2012. The property (128 E St. John) is listed in the HIST UST database for three USTs including a 2,000 gallon gasoline tank, a 3,900 gallon gasoline tank, and a 3,681 gallon gasoline tank with unknown installation dates. A "waste" tank was also noted. These tanks were removed as part of the now closed LUST case. Loomis Armored is listed in the CUPA database for generating 100 kg to 5 tons per year of hazardous waste. The property is listed in the HIST Cortese database for a leaking tank.

DRAFT

	AEI reviewed additional files with the GeoTracker Database for information on the LUST case at 128 East Saint John Street. Refer to the Findings for additional discussion. <u>77 N 4th (east building)</u> The property is listed in the EDR Hist Cleaner database as New Style French Laundry from 1930-1945 and as Baby Laundry Service in 1950. Refer to the Findings for additional discussion. **Parcel 3:** This parcel (60 N 3rd Street) is largely associated with an apartment complex located adjoining to the southwest of the subject property. The property is listed in the HAZNET database for the disposal of hazardous waste materials discussed in Section 4.6. These included oil-containing waste and liquids with halogenated organic compounds. The property is listed in the HAZMAT database as an auto wrecking/misc simple facility. Based on AEI's experience, the term 'auto wrecking/miscellaneous simple facility' has been erroneously applied to facilities that are not conducting such operations. The label indicates that the site is permitted for hazardous waste generation with the City of San Jose. The property is listed in the RCRA database as a hazardous waste handler with no violations. The property is listed in the CERS database for minor violations including failure to provide emergency training to employees, failure to submit site map with generator location, and failure to report 589 gallons of diesel fuel associated with generator. Based on the lack of a documented release on this parcel, these listings for Parcel 3 are not expected to represent a significant environmental concern. **Parcel 4:** The property is listed for a LUST case in 1993-2007. The propert is listed in the CIWQS database as managed by the Chevron Environmental Management Company and in the CERS database for NPDES wastewater and stormwater. The property is listed in the HIST Cortese database for a leaking tank. The property is listed in the EMI database for hydrocarbon emissions in 2017. The property is listed in the CUPA database as an HMBP facility and as generating waste oil only. The property is listed in the CERS database with a violation found for failure to property manage used oil filters. The 55-gallon drum of filters was found with two inches of oil in the bottom of the container, indicating oil is not being drained property before disposal. Another violation was found in 2014 for finding

DRAFT

four inches of waste oil in the spill bucket of the waste oil UST. Hazardous wastes identified include compressed Ar, Co2 and N2 cylinders, 200 gallon used oil UST, and two 55-gallon drums of used oil filters. Refer to Section 4.1 for discussion of additional regulatory agency compliance records.

The property is listed for a LUST case beginning in 1983. The property is listed for this LUST case as closed in 2010. This LUST case involves MTBE/TBA/other fuel oxygenates, and gasoline affecting 'groundwater with uses other than drinking water.' A leak was detected in the gasoline line near the southwestern edge of the fuel pump island. In January 1984, six groundwater monitoring wells were installed and commenced weekly monitoring for free product (FP). In February 1984, one inch of FP was measured in well MW-5 and also present in other wells. In June 1984, a leak was detected in the dispenser at the southeastern edge of the fuel pump island. In October 1984, two additional monitoring wells were installed. In November 1984, a hole was discovered in one of the gasoline USTs. The UST was removed and replaced in 1985. In May 1985, USTs and piping were replaced. In November 1989, six soil borings were advanced and two monitoring wells were installed. Three areas containing contamination were identified near the UST complex, the waste oil UST and the southeastern dispenser islands. MW-6 and MW-8 located near the waste oil UST were destroyed, though both contained measurable amounts of FP. MW-11 was installed as a replacement. In January 1990, five soil borings were advanced on-site and 19 soil borings were advanced off-site including one monitoring-well. Four extraction wells were installed along the northern border of the property. In April 1990, hydraulic testing and a soil vapor extraction pilot study were conducted. The study indicated a full-scale SVE system could remediate hydrocarbons in the unsaturated soils beneath the site. In December 1991, four off-site monitoring wells were installed. Groundwater extraction and treatment processed 1,765,354 gallons of water and removed 17 pounds of petroleum hydrocarbons from 1992-1996. In May 2000, eleven soil borings and two piezometers were advanced. A risk-based corrective action (RBCA) assessment from 2002 indicated all soil concentrations were below risk-based screening levels (RBSLs) assigned by the Regional Water Quality Control Board (RWQCB). RBSLs accounted for the nearby residential apartment complex based on the potential for the plume to migrate beneath that building. The RBCA identified inhalation of benzene vapor in indoor air as a potential exposure pathway. The theoretical cancer risks and hazard quotients were less than the respective Cal-EPA limits of one in a million. In January 2004, a two-phase extraction and treatment system began and ran through November 2006. In September 2008, nine soil borings were advanced for confirmation samples.

The property is listed for multiple USTs under the HIST/SWEEPS UST. Tanks 1-4 appear to be the current generation of USTs, installed in 1985. Tanks 5-8 appear to be the previous generation of USTs, which directly preceded the current tanks.
SWRCB #43-060-401244-000001 - 1,000-gallon waste oil - active
SWRCB #43-060-401244-000002 - 10,000-gallon regular unleaded - active
SWRCB #43-060-401244-000003 - 10,000-gallon regular unleaded - active
SWRCB #43-060-401244-000004 - 10,000-gallon regular unleaded - active
SWRCB #43-060-401244-000005 - 1,000-gallon waste oil - not reported
SWRCB #43-060-401244-000006 - 10,000-gallon motor vehicle fuel, leaded - status no reported

	SWRCB #43-060-401244-000007 - 12,000-gallon motor vehicle fuel, regular unleaded - status no reported SWRCB #43-060-401244-000008 - 5,000-gallon motor vehicle fuel, regular unleaded - status no reported The property is listed in the CERS database failure to provide tank testing information for February-June 2018, for using the wrong sensor system with the used oil tank, failure to respond to violations in 2013-2017, for three UST spill buckets failing to meet testing requirements in 2019, for overfill protection of waste oil tank not functioning properly to sound an alarm when overfill was occurring in 2018. Refer to Section 4.1 for further discussion of related regulatory agency inspection records. The property is listed in the HAZNET database for hazardous wastes disposal in 1989-1994 and 2003 including oil-containing waste, waste oil, contaminated soil and drilling mud and other empty containers. The property is also listed for tank bottom waste with halogenated organics generated in 2014. The listings appear to be related to UST removal, waste oil removal and the closed LUST case activities. The 1994 'other empty containers' listing appears to be related to the piping replacement conducted in that year. The 1990 'other empty containers' listing occurred in the same year as 'drilling mud' was generated; therefore it is possible that a subsurface feature may have been removed that year. The property is listed in the WDS database for solid wastes and contaminated groundwater as a moderate threat to water quality should a release occur. The property is listed in the EDR Hist Auto database as a gas station from 1975-1980. AEI reviewed files with the GeoTracker database and the previous report discussed in Section 6.3 for information on the closed LUST case. Refer to the Findings for additional discussion.

Facility Name	Hall G B, Hop Sam, Save-U-Cleaers
Address	118, 134, 144 East Santa Clara Street
Distance & Direction	Adjoining to the southeast following East Santa Clara Street
Hydrologic Position	Up-gradient
Databases Listed	EDR Hist Cleaner (x3)
Comments	The site is listed as a cleaner/dyer in 1922 and 1960 (two separate locations) and an 'oriental laundry' in 1922-1925. The property is listed as a Chinese Laundry in Sanborn maps, as discussed in Section 3.2. Based on the lack of a documented release, nature of operations for the Chinese Laundry (typically, 'Chinese Laundry' operations were hand-wash laundry facilities which did not operate dry cleaning machines) and single year listings for the cleaner/dyer listings, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	T-Mobile SF04916A

DRAFT

Address	96 North 3rd Street
Distance & Direction	Adjoining to the southwest
Hydrologic Position	Cross-gradient
Databases Listed	HAZMAT
Comments	The site is listed in the HAZMAT database as an 'auto wrecking/miscellaneous simple facility.' Based on AEI's experience, the term 'auto wrecking/ miscellaneous simple facility' has been erroneously applied to facilities that are not conducting such operations. The label indicates that the site is permitted for hazardous waste generation with the City of San Jose. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Sasaki Bros Phillips 66, Downtown Auto Express SJ
Address	South 4th and East Santa Clara, 152-154 East Santa Clara Street
Distance & Direction	Adjoining to the Southeast following the intersection of South 4th Street and East Santa Clara Street
Hydrologic Position	Cross to up-gradient
Databases Listed	EDR Hist Auto (x2), Hist Cortese, LUST, HIST LUST, SWEEPS UST, HIST UST, CUPA Listings, CERS
Comments	The site is listed in the EDR Hist Auto database as a gas station in 1940-1983. The site is listed as an auto repair shop from 1987-2000. The site is listed in the Hist Cortese database for a leaking tank. The site is listed for a LUST case in 1987 that was closed in 1998 for a release of gasoline affecting 'other groundwater.' The site is listed in the SWEEPS UST database for six USTs including a 10,000 gallon gasoline tank, a 4,000 gallon gasoline tank, a 2,000 gallon gasoline tank, a 1,000 gallon gasoline tank, and a 500 gallon waste oil tank. The site is listed in the CERS database as a leaking underground storage tank cleanup site. AEI reviewed additional files with the GeoTracker database for information on the LUST case. A case closure letter was issued by the RWQCB in 1998. Six USTs and associated piping were removed in 1987. The closure letter indicates 16 cubic yards of contaminated soil was removed from the UST area. Groundwater contaminant concentrations had reduced to levels below regulatory concern. The closure letter does not indicate that contamination was migrating off of the site. Based on case closure, regulatory oversight, low levels of groundwater contamination, and site redevelopment, this is not expected to represent a significant environmental concern.

Facility Name	Natural Exp 1 HR Photo & Gifts
Address	115 North 4th Street

DRAFT

Distance & Direction	Adjoining to the northwest following East St. John Street
Hydrologic Position	Down-gradient
Databases Listed	CUPA Listings
Comments	The site is listed in the CUPA database as a hazardous waste generator of silver waste only. Based on the lack of a documented release and gradient, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Mark and Jack S Service
Address	100 North 4th Street
Distance & Direction	Adjoining to the north following the intersection East St. John Street and North 4th Street
Hydrologic Position	Cross-gradient
Databases Listed	EDR Hist Auto, LUST, CERS
Comments	The site is listed in the EDR Hist Auto database as a gas station in 1950 and 1955. The site is listed as a LUST case in 2000 and closed in 2006 involving gasoline affecting 'groundwater with uses other than as drinking water.' The property is listed in the CERS database as a leaking underground storage tank cleanup site. AEI reviewed additional files with the GeoTracker database for information on the LUST case. The LUST case was closed in with residual contamination in place affecting soil and groundwater. The site located approximately 85 feet north of the subject property across the intersection of North 4th Street and East St. John Street. A geophysical survey was conducted in 2006 that determined that no USTs remained at the site. Based on the site characterization, distance, regulatory status and gradient, this site is not expected to represent a significant environmental concern.

Facility Name	Deluxe Cleaners, Civic Plaza, 200 E Santa Clara Street Higgins Barney, Japanese Laundry, Lee Yick
Address	200 and 224 E Santa Clara Street 168, 184, 190 E Santa Clara
Distance & Direction	Adjoining to the southeast, beyond the intersection of N 4th and E Santa Clara Within the boundaries of the current City Hall complex
Hydrologic Position	Up-gradient
Databases Listed	SLIC, HWTS, EMI, HAZNET, CERS HIST CLEANER (2), HIST AUTO (168, 184, 190 E Santa Clara)
Comments	These sites are former businesses located within the boundaries of the current, larger, multi-parcel City Hall complex redevelopment. The businesses listed included: dry cleaning (1992-1995), Oriental Laundry (1922-1930) and a gas station (1930-1940).

DRAFT

	The gas station listing appears to be related to the previously discussed closed LUST case at 154 E Santa Clara. Based on the apparent short duration of dry cleaning operations, site redevelopment and regulatory status of the LUST case (related to the former gas station), the review of additional regulatory files was not deemed necessary and therefore the listings are not expected to represent a significant environmental concern.

Facility Name	Pacific Car Wash
Address	21 N 5th Street
Distance & Direction	Adjoining to the northeast following North 4th Street
Hydrologic Position	Cross to up-gradient
Databases Listed	CUPA LISTINGS, RCRA NONGEN/NLR
Comments	These listings are associated with a former car wash on the northeastern adjoining property. The site is part of a larger cleanup case/redevelopment project which is discussed below.

Facility Name	Standard Stations Inc
Address	155 East Santa Clara Street
Distance & Direction	Adjoining to the northeast following North 4th street
Hydrologic Position	Cross to up-gradient
Databases Listed	EDR Hist Auto
Comments	The site is listed as a gas station in 1966-1970. The site is part of a larger cleanup case/redevelopment project which is discussed below.

Facility Name	SJSC Towers
Address	167-193 East Santa Clara Street
Distance & Direction	Adjoining, northeast beyond N 4th Street
Hydrologic Position	Cross to up-gradient
Databases Listed	CPS-SLIC, CERS
Comments	The site is listed as an open cleanup program site in 2017 involving lead, diesel, gasoline and total petroleum hydrocarbons (TPH) affecting groundwater with uses other than as drinking water. According to the database, the "site is planned for development of two 28 story towers with 3 levels of below grade parking. Residual contamination from past site use has been reported at the site. Select areas of the site with elevated levels of lead will be excavated down to 3 feet and disposed of off-site. The remaining soils will then be excavated to approximately 40 feet and disposed of off-site."

DRAFT

	AEI reviewed additional files with the GeoTracker database for information on the open SLIC case. The site was historically used for many commercial/ industrial businesses including a dry cleaner and two gas stations. A site completion report was completed in 2019 stating no further action was necessary with respect to environmental conditions at the site. The report states identified petroleum hydrocarbon and lead impacted soil were appropriately handled and properly disposed of off-site. Case closure had not been issued yet, presumably based on updating confirmation sampling and reports to reflect new environmental screening levels issued by the RWQCB. An email in the GeoTracker database indicate the RWQCB was waiting on updated soil, groundwater, and soil gas data to reflect the ESL changes. Based on regulatory oversight, site completion report, and no indication that residual contamination was migrating towards the subject property, this is not expected to represent a significant environmental concern.

Facility Name	Bank of Trade Building
Address	100 East Santa Clara Street
Distance & Direction	111 feet south
Hydrologic Position	Cross to up-gradient
Databases Listed	LUST, HIST LUST, HIST CORTESE, CERS
Comments	The site is listed for a LUST case in 1989 that was closed in 2000 involving diesel affecting groundwater with uses other than as drinking water. The site is listed in the HIST CORTESE and CERS database a leaking underground tank site. AEI reviewed additional files with the GeoTracker database for information on the LUST case. A case closure letter was issued in 2000 by the RWQCB. A UST and nearby soils were removed in 1989. Soil contamination with TPH-diesel remained during case closure. Groundwater sampling from 1993-1994 did not identify the COCs in sampling. Based on case closure, regulatory oversight, lack of identified contamination in groundwater, and distance from the subject property, this is not expected to represent a significant environmental concern.

Facility Name	Century City Parking
Address	15 South Third Street
Distance & Direction	264 feet south
Hydrologic Position	Cross-gradient (based on site-specific flow)
Databases Listed	CPS-SLIC, CERS
Comments	The site is listed as a closed cleanup program site in 2007 involving contamination of 'groundwater with uses other than as drinking water.' AEI reviewed additional files with the GeoTracker database for information on the SLIC case. The case closure letter indicates groundwater flow is to the west, away from the subject property. According to the case closure letter, "in a July 22, 2005 letter the Water Board concurred that remedial activities had been completed and no further action for the site itself was required, however

DRAFT

	additional investigation of potential offsite migration of contaminated groundwater was necessary. The purpose of the offsite groundwater investigation was to determine if groundwater contamination extends offsite. Three grab groundwater samples were collected at selected locations. Two of the samples contained TPH-g and several related petroleum compounds at low levels. TPH-g was found at 161 and 264 ug/l, exceeding the Water Board's Environmental Screening Level (ESL) of 100 ug/l for water considered a source of drinking water, but below the ESL of 500 ug/l for water not considered a source of drinking water. No other VOCs were found. Shallow groundwater in downtown San Jose is neither currently used nor likely to be used as a drinking water source. The level of contamination remaining is unlikely to have any impact on the deep regional aquifer used as a municipal supply for the Santa Clara Valley." Based on the case closure letter, low levels of residual contamination found 15 years ago, and the indication that groundwater is migrating away from the subject property at the site, this listing is not expected to represent a significant environmental concern. Additional listings: This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Potential vapor migration concerns for the subject property are discussed in the Findings segment.

DRAFT

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Prospective Purchaser	UC Chevron Owner LLC, represented by Alex Sinunu - Development Manager	June 4, 2020	Email	2019	Mr. Sinunu was aware of the gas station located on Parcel 4 with associated USTs and waste oil tank. Mr. Sinunu provided the previous report discussed in Section 6.3. Mr. Sinunu indicated the subject property is slated for redevelopment into a parking garage, a 400,000 SF office tower, and a 300,000 SF residential tower.
Property Sellers	N/A	N/A	N/A	N/A	Interview pending; refer to Section 1.5
Key Site Manager	Mr. Evin Weiser	June 3, 2020	In Person	2019	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/Comment
Do you have any knowledge of USTs, clarifiers or oil/ water separators, sumps, or other subsurface features?	N/A	Yes
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	No
Are you aware of any known plans for site redevelopment or change in site use?	N/A	Yes
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No

DRAFT

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/Comment
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	No
Additional information provided:	N/A	Mr. Weiser was aware of the gas station located on Parcel 4 and the redevelopment plans.

6.1.2 Past Owners, Operators, and Occupants

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User Questionnaire was completed by Mr. Alex Sinunu, Development Manager representing UC Chevron Owner LLC, prospective purchaser. The following table represents information contained therein.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	No
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)).	No

DRAFT

Question	Response/ Comment
Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Yes
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	No
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	No

DRAFT

6.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI by Mr. Alex Sinunu, Client, during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment and Preliminary Phase II Soil Vapor and Groundwater Quality Evaluation (147 East Santa Clara Street), prepared by Cornerstone Earth Group (May 15, 2019)

This report describes the subject property generally consistent with current conditions with the following exceptions: the previous report only includes Parcel 4 of the subject property.

The previous report concluded with the following Recognized Environmental Conditions:

- "USTs are suspected to have been present at the former on-Site Gulf gasoline station, as well as below East Santa Clara Street adjacent to the Site. Three below ground hydraulic lifts and an oil-water separator also were present within the existing service station building. No information documenting the removal of these USTs, the lifts or the oil-water separator was identified during this study. There is a potential that these features may have impacted the Site."
- "Based on the long developed history of the Site, there is a potential that impacted soil, soil vapor and/or groundwater resulting from former businesses (e.g., the cleaning/dying business, former Gulf gasoline station, former automobile dealership, etc.) could be present on-Site at locations not identified during the prior studies. If impacted materials are encountered, mitigation measures and/or proper disposal may be required."
- "The Site consists of an operating Chevron gasoline station. Gasoline, diesel and waste oil are stored in USTs. USTs and associated piping are common contaminant sources and have a potential to impact the Site."

The previous report concluded with the following Controlled Recognized Environmental Condition:

- "A LUST case at the Site was closed by the DEH in 2010. Residual contaminant concentrations were reported to remain in soil and groundwater at the Site. Site management requirements were stipulated by the DEH that must be fulfilled prior to any changes in land use, grading activities, excavation, or installation of water wells."

The previous report included a Preliminary Phase II Soil Vapor and Groundwater Quality Evaluation. Four soil vapor and groundwater samples were taken and identified contamination above residential ESLs for TPH-g, 1,2-DCA, and Chlorobenzene at GW-3. MTBE and Ethyl t-butyl were detected at concentrations below ESLs. TPH-gasoline, Toluene, Ethyl Benzene, m,p-xylene and 0-xylene were all detected detected in soil vapor samples, but below Tier 1 ESLs. Benzene was detected in all four soil vapor samples at levels exceeding residential ESLs.

The consultant recommended consultation with an environmental attorney due to the noted RECs.

The potential for ACMs and LBP may also be present based on the building's age.

A copy of the report is included in the appendices.

Note: As the above documentation was not prepared by AEI, the information obtained was not verified for accuracy and a critique of the information contained therein is beyond the scope of this assessment.

6.4 Environmental Lien Search

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	June 3, 2020
AEI Site Assessor(s)	Thomas Lapoint
Property Escort(s)/ Relationship(s) to Property	Mr. Evin Wieser/Site Contact
Units/Areas Observed	Building interior areas: Parcel 1: 77 North 4th Street/Vacant Building 128 East St. John Street/Vacant Building Parcel 2: 49 North 4th Street/Church Parcel 4: 147 East Santa Clara Street/Chevron Gas Station Exterior areas: Parking and all exterior spaces
Area(s) not accessed and reason(s)	Central Building: 95 North 4th Street/Tattoo parlor (Parcel 1) Refer to Section 1.5 for discussion of limiting condition(s).
Other Physical Constraints	Volume of materials/parked cars Refer to Section 1.5 for discussion of limiting condition(s).

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use	✔	
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)	✔	
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use	✔	
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✔	
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		

DRAFT

Other	✔	

7.1 Subject Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use

Substance/Waste (size/quantity)	Location	Operations Associated with Material	Disposal Method/ Frequency	Secondary Containment	Staining/ Spills
Retail oil containers (1-gallon container/ 50)	Convenience store	Retail sales	N/A	None	None
Compressed gas (15-gallon cylinder/2)	Convenience store	Soft drinks	N/A	None	None
Propane cylinders (5-gallon/18)	Propane cage	Retail sales	N/A	None	None
Absorbent rag container (10-gallon/1)	Auto repair	Auto repair	N/A	None	None

The above-mentioned materials were observed on Parcel 4.

No drains or other subsurface conduits were observed in these areas. Refer to the Findings segment for discussion related to the associated auto repair activities.

7.1.2 Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

UST(s)

	UST #1	UST #2	UST #3	UST #4
Tank Capacity (Gallons)	10,000	10,000	10,000	1,000
Tank Contents	Gasoline	Gasoline	Diesel	Waste Oil
Tank Installation Date	1/1/1985	1/1/1985	1/1/1985	1/1/1985
Tank Material	Fiberglass	Fiberglass	Fiberglass	Fiberglass
Tank Construction	Double Wall	Double Wall	Double Wall	Double Wall
Piping Installation Date	Replaced in 1994	Replaced in 1994	Replaced in 1994	N/A
Piping Material	Fiberglass	Fiberglass	Fiberglass	N/A

DRAFT

	UST #1	UST #2	UST #3	UST #4
Piping Construction	Double Wall	Double Wall	Double Wall	N/A
Cathodic Protection Present	Yes	Yes	Yes	Yes
Spill/Overfill Protection Present	Yes	Yes	Yes	Yes
Tank Release Detection Method	Veeder Root	Veeder Root	Veeder Root	Veeder Root
Piping Release Detection Method	Veeder Root	Veeder Root	Veeder Root	None
Permitting Agency	California Environmental Reporting System	California Environmental Reporting System	California Environmental Reporting System	California Environmental Reporting System
Permit/ Registration Confirmed	Yes	Yes	Yes	Yes

Refer to the Findings for discussion of the UST system.

7.1.3 Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use

Substance/Waste	Size/Quantity	Location	Secondary Containment	Staining/Spills
Diesel fuel	589-gallon belly tank/1	Generator	No	No

A diesel-fueled generator is located on Parcel 3 that serves the southwestern adjoining apartment complex. Based on the lack of a documented release and the lack of evidence of mismanagement, these materials are not expected to represent a significant environmental concern.

7.1.4 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/ No)
Pad-Mounted	1	PG&E	Unknown	No	No
Subsurface	1	PG&E	Unknown	Unknown	Unknown

DRAFT

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the pad-mounted transformer. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern. Due to the sub-grade nature of the remaining transformer, its condition was not evaluated.

7.1.5 Drains, Sumps, and Clarifiers

The subject property is equipped with an oil/water separator system located in in the western building on Parcel 1 at 128 East St. John Street (refer to Figure 3 within the Appendices). Historical/regulatory agency source review indicates that auto repair businesses (including auto rebuilding and/or painting) occupied this building from at least 1930 through 2005. AEI observed a water hose located near the separator cover, suggesting that the space may have also been used for vehicle washing. Due to their subsurface nature, oil water separators and their associated piping can act as preferential pathways for contaminants such as oil, grease, fuel, or cleaning solvents discharged or released during on-site activities. This is further supported by the fact that the structural integrity of these features and/or their associated piping can become compromised over time, especially when located in areas prone to high seismic activity or freeze/ thaw cycles. Consequently, the potential exists that the historical operation of the on-site oil water separator and the associated auto repair/painting activities may have resulted in an impact to the subsurface of the subject property.

Multiple storm drains were observed in the parking areas of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.1.6 Wells

Although not observed during the site visit, multiple monitoring wells were installed on the subject property during the two closed LUST cases (Parcel 1 and 4). Refer to the Findings (CREC) and Section 5.1 for discussion.

7.1.7 Other

Cleaning supplies and detergents are stored in the kitchens and in janitor rooms in Parcel 2 and 4. All chemicals were packaged in consumer quantities. Based on the nature of these materials, the presence of cleaning supplies at the subject property is not expected to represent a significant environmental concern.

During the site reconnaissance for the prior report (Section 6.3), a boarded up 'concrete vault' was observed on the southwestern portion of the subject property (apparently on Parcel 4). The nature of use of the feature is unknown, however the prior consultant speculated that it may have been used as a ventilation shaft for the western adjacent building. Based on this presumed use, the feature is not expected to represent a significant environmental concern. This feature was not observed during AEI's site visit.

According to a map reviewed within a prior report (Section 6.3), three underground lifts and an oil/water separator were formerly located in the current service station building on Parcel 4 (see Figure 6 within appendices). The installation date(s) are unknown; however it is presumed that they would have been installed in 1969, during building construction. No information pertinent to the removal/sampling of these underground features was on file with the regulatory agencies. It is unknown if the features remain present (station building has since been remodeled) or were removed. AEI observed a metal plate adjacent to the southwestern exterior of the station building during the site visit. It is possible that this feature may be the clarifier (refer to photograph log in appendices). Due to their subsurface nature, oil water separators and their associated piping can act as preferential pathways for contaminants such as oil, grease, fuel, or cleaning solvents discharged or released during on-site activities. This is further supported by the fact that the structural integrity of these features and/or their associated piping can become compromised over time, especially when located in areas prone to high seismic activity or freeze/ thaw cycles. Consequently, the potential exists that the operation of the on-site oil water separator related to the auto repair occupancy may have resulted in an impact to the subsurface of the subject property.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI did not observe any of the items listed in the above Reconnaissance Findings Summary table.

DRAFT

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

DRAFT

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

According to the Mr. Evin Weiser, site contact, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

DRAFT

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 31 tests were conducted for radon levels in the subject property zip code (95112) in 2016. One of the tests exceeded the action level of 4.0 pCi/L set forth by the US EPA. While a relatively small percentage of the test results exceeded the EPA threshold, the majority of the locations sampled were below 4.0 pCi/L. Consequently, radon does not appear to be a widespread concern; however, radon sampling would be required to determine site-specific radon levels.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

DRAFT

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property building on Parcel 2 in order to identify the presence of mold. During the on-site reconnaissance, the following obvious visible signs of mold growth or conditions conducive for suspect mold growth were observed:

Location	Material Affected
Parcel 2 Church Gathering Room	Ceiling in center of room and carpet near windows on southeast side
Parcel 2 Church Hall and Closet	Ceiling drywall

Please refer to the appendices for related photographs.

Although typically not included in the scope of work for a Phase I ESA, the presence of the suspect mold identified may pose a health and safety concern to any subsequent occupants and/or construction workers during future renovation activities. AEI understands that the building is slated for demolition, therefore no additional action is recommended with respect to the observed mold growth.

DRAFT

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/30/2020 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 72 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 20 CPS-SLIC sites within approximately 0.5 miles of the target property.

HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 41 HIST LUST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 24 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 34 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

GARDEN CITY GAS WORK	W. ST JOHN AND MONTG	WSW 1/2 - 1 (0.792 mi.)	292	761

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 14 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 17 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SAN JOSE SMOG CHECK (Continued) **S113883253**

Violation Source: CERS

Site ID: 375321
Site Name: SAN JOSE SMOG CHECK
Violation Date: 06-27-2014
Citation: 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130
Violation Description: Failure to properly handle, manage, label, and recycle used oil and fuel filters.
Violation Notes: THE 55 GALLON DRUM USED TO COLLECT USED OIL FILTERS WAS FOUND WITH APPROXIMATELY 2 INCHES OF WASTE OIL IN THE BOTTOM OF A 1/6TH FILLED DRUM. THIS SHOWS THAT OIL FILTERS ARE NOT BEING PROPERLY DRAINED. RE-DRAIN ALL FILTERS IN A SECURE SYSTEM THAT WILL NOT INCREASE THE RISK OF SPILL OR DISCHARGE. UNLESS THIS DRUM AND THE CURRENT CONTENTS IS TO BE MANAGED AS HAZARDOUS WASTE, THIS DRUM SHALL HAVE ALL OF FILTERS REMOVED AND DRAINED COMPLETELY, IN A SECURE SYSTEM THAT WILL NOT INCREASE THE RISK OF SPILL OR DISCHARGE. THEN REMOVE THE POUR-ABLE WASTE OIL AND MANAGED AS HAZARDOUS WASTE. THE PAPER FILTERS SHALL BE SEPARATED FROM THE METAL FILTERS AND DISPOSED OF AS SOLID HAZARDOUS WASTE. BRAKE PARTS SHALL BE SEPARATED FROM THE METAL FILTERS AND RECYCLED OR DISPOSED OF PROPERLY.

SAN JOSE SMOG CHECK (Continued) **S113883253**

Violation Date:	07-11-2018
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Facility employees stated that used oil is picked up once year. Facility may hold used oil in a container or tank for up to 180 days. Schedule a disposal of this waste and forward a copy of the receipt to HMCD (or forward a receipt to show that used oil has not accumulated for greater than 180 days).

Violation Date:	07-11-2018
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Observed 1 x 55 gallon drum of oil filters containing the following: paper and metal-cased used oil filters, free-flowing liquid used oil, and oily rags. REMOVE FREE LIQUID, PAPER FILTERS, AND RAGS. PLACE RAGS AND PAPER FILTERS IN A CLOSED AND LABELED HAZARDOUS WASTE CONTAINER. Observed paper and metal filters in the "drained used oil and fuel filters" container. Per section 66266.130, only metal-cased filters are exempt from regulation as a hazardous waste under the scrap metal provision found in federal law. All paper filters must be disposed as hazardous waste and may be sent off with other oil contaminated solids (absorbents and saturated rags).

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-27-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: ON SITE FOR 2014 HAZARDOUS WASTE PERMIT INSPECTION JOSUE MATEOS, BUSINESS OWNER, SAN JOSE SMOG CHECK, ON SITE TO PROVIDE FACILITY ACCESS AND RECORDS REVIEW. THIS FACILITY IS A WASTE OIL GENERATOR ONLY. THE SPILL BUCKET ON THE UNDERGROUND STORAGE TANK (UST) WAS FOUND WITH APPROXIMATELY 4 INCHES OF WASTE OIL INSIDE. THIS SPILL BUCKET IS TO BE MAINTAINED AS CLEAN AND DRY. THE DRAIN VALVE SHALL BE SERVICED, OPERATIONAL, AND MAINTAINED AS DESIGNED. NOTE: THIS IS IDENTIFIED ON THE INSPECTION REPORT FOR THE UST BUSINESS OWNER, FOURTH & SANTA CLARA CHEVRON. THE SPILL BUCKET WAS EMPTIED AND CLEANED WHILE ON SITE BY JOSUE MATEOS. THE WASTE OIL WAS PLACED INTO THE UST. THE CONTAMINATED PAPER RAGS AND OTHER WASTE OIL CONTAMINATED MATERIALS WERE PLACED INTO A SOLID WASTE CONTAINER. THIS IS AN INITIAL ACCUMULATION START DATE. A 55 GALLON DRUM IDENTIFIED AS USED OIL FILTERS WAS OBSERVED 1/6TH FILLED, WITH APPROXIMATELY 2 INCHES OF WASTE OIL IN THE BOTTOM, SEVERAL PAPER [Truncated]

Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E08L01f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: 12/83, a leak in the gasoline product line was discovered near the southwestern edge of the fuel dispenser island and a corroded section of pipe was replaced to stop the leak. 1/84, 6 groundwater monitoring wells were installed and commenced weekly monitoring for free product (FP). 2/84, one inch of FP measured in well MW-5 and also present in monitoring wells located near the USTs. 6/84, a pinhole sized leak was detected and repaired in the dispenser filter located at the southeastern edge of the fuel dispenser island. 2 additional monitoring wells were installed 10/84. 11/84 a hole was discovered near the northwest corner of a UST containing regular gasoline. The gasoline was pumped out of the UST, and the UST was removed from service until it was replaced in 1985. 5/85, USTs and piping were replaced. Product conveyance piping was also replaced with cathodic-protected conveyance piping. 11/89, advanced 6 soil borings, installed 2 wells, and determining the hydraulic conductivity and transmissivity after performing slug tests. Three areas containing soil and/or groundwater contamination were identified in the

DRAFT

CHEVRON #9-4259 (Continued) **U001602681**

investigation: UST complex; waste oil UST and steam-cleaning area; and dispsenser islands in the southeast portion of the Site. 3/90, wells MW-6 and MW-8 located near the waste oil UST and steam-cleaning area were destroyed. Both wells had contained measurable amounts of FP and it was suspected that oily residue from the steam cleaning process was collecting in them and providing an additional source of groundwater contamination. Well MW-11 was installed as a replacement. Jan-Aug 1990, 5 soil borings advanced onsite; 19 borings and 1 monitoring well were advanced off-site. 4 extraction wells were also installed onsite along the northern border of the property. 4/90, conducted hydraulic testing and a soil vapor extraction (SVE) pilot study. The results of the SVE pilot study indicated that a full-scale SVE system could be used to remediate hydrocarbons in the unsaturated soils beneath the Site. 12/91, 4 off-site monitoring wells were installed. Groundwater extraction and treatment (GWET) system operated 2/92-6/96 and removed approximately 1,765,354 gal. of water and removed approximately 17 pounds of petroleum hydrocarbons. 5/00, 11 soil borings and 2 piezometers were advanced. 2002, a risk-based corrective action (RBCA) assessment was conducted to determine if the petroleum hydrocarbons in the soil and groundwater on and off-site presented a risk to human health. The RBCA indicated that all soil concentrations were below risk-based screening levels (RBSLs) assigned by the Regional Water Quality Control Board for the specified receptors (commercial workers, construction workers on and residents). Residents were included as on-site receptors based on the proximity of the Site to the senior apartment complex and the potential for the dissolved hydrocarbon plume to migrate beneath the building. The only exposure pathway of concern identified in the RBCA assessment was inhalation of benzene vapors in indoor air. The theoretical excess cancer risks and hazard quotients (for non carcinogens) were less than the respective Cal-EPA limits of one in a million. 1/04 a 2-phase extraction and treatment (TPET) system began operating and ran through 11/06. 9/08, 9 soil borings were advanced to collect confirmation soil samples.

Violations:
Site ID: 31389
Site Name: FOURTH & SANTA CLARA CHEVRON
Violation Date: 07-22-2019
Citation: 23 CCR 16 2715(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(f)
Violation Description: Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).
Violation Notes: Returned to compliance on 07/22/2019. Testing of the UST monitoring equipment was conducted late. The anniversary date for the monitoring equipment is in June. Ensure that all future monitoring system certifications are conducted in the month of June.
Violation Division: Santa Clara County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 31389
Site Name: FOURTH & SANTA CLARA CHEVRON
Violation Date: 12-20-2018
Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 12/20/2018. Letter from the Chief Financial Officer (CFO) submitted in most recent electronic submission on 12-18-18 fails to follow the wording as required per 2808.1, subdivision (c)(1). Correct the regulatory reference in the letter

Eval Notes:	FUNCTIONAL TESTING OF THE UST SYSTEM TOOK PLACE ON 06/30/17 AND INSPECTION REPORT WAS ISSUED TODAY VIA E-MAIL TO THE OWNER. TESTING WAS CONDUCTED BY ANEIL CHAND WITH PINNACLE FUELS. MR. CHAND HAS CURRENT ICC AND VEEDER ROOT CERTIFICATIONS. PRIOR TO AND AFTER COMPLETION OF TESTING THERE WERE NO ACTIVE ALARMS AT THE VEEDER ROOT PANEL. THE FOLLOWING COMPONENTS WERE TESTED DURING THIS INSPECTION AND PASSED; - 3 STP SENSORS PROVIDED A POSITIVE SHUT-DOWN CONDITION AT THE TURBINE. - 4 ANNULAR SENSORS PROVIDED AN AUDIBLE/VISUAL ALARM AT THE PANEL (INCLUDING USED OIL TANK). - 4 SPILL BUCKETS WERE HYDROSTATICALLY TESTED FOR 60 MINUTES AND PASSED (INCLUDING USED OIL TANK). - 3 PLLD'S WERE TESTED AND PROVIDED A SHUT-DOWN CONDITION AT THE TURBINE AND AN AUDIBLE/VISUAL ALARM AT THE PANEL. - FAILSAFE AND SENSOR OUT WERE VERIFIED DURING THIS INSPECTION. - 4 UDC SENSORS WERE TESTED AND PROVIDED A POSITIVE-SHUT DOWN CONDITION AT THE TURBINE. - OVERFILL PREVENTION IN ALL 3 FUEL [Truncated]

Eval Notes:	The SB-989 Secondary Containment Testing was performed by Tony Fontana, ICC UST Service technician #1064273, exp. date = 5/29/16; Incon Tester # 1718713702, exp. date = 2/21/18 The following components were completed during the inspection: 3 Tank annulars (87, 91, diesel) tested at 10 inches of mercury for one hour. Test result = pass. 3 secondary product piping runs (87, 91, diesel) tested at 5 psi for hour. Test results = pass. 3 STP sumps (87,91 diesel) were tested hydrostatically using the INCON accelerated test method. Test results = pass. 1 UDC sump (1/2) was tested hydrostatically using the INCON accelerated test method. Test results = pass. The waste oil tank was under test at 10 inches of mercury for one hour and holding at the completion of the inspection. The UDC sump 3/4 was under test and passing at the completion of the inspection. The following components shall be tested on this date: 2 UDC sumps (5/6, 7/8). Send the secondary [Truncated]

SIC Code:	5541
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	CNWTRS
Waste Type2:	Not reported
Waste2:	Contaminated Ground Water
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lead Agency: SANTA CLARA COUNTY LOP
Lead Agency Case Number: 2017-15s
Latitude: 37.33833
Longitude: -121.88725
Case Type: Cleanup Program Site
Case Worker: AC
Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Lead, Diesel, Gasoline, Total Petroleum Hydrocarbons (TPH)
Site History: Site is planned for development of two 28 story towers with 3 levels of below grade parking. Residual contamination from past site use has been reported at the site. Select areas of the site with elevated levels of lead will be excavated down to 3 feet and disposed of off-site. The remaining soils will then be excavated to approximately 40 feet and disposed of off-site. Please refer to the Soil and Groundwater Management Plan to review details of the reported contamination as well as the mitigation measures proposed to protect human health and the environment.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	* Chlorinated Solvents - PCE
Site History:	This site is an historical building in downtown San Jose. It was formerly a hotel that had a dry cleaning facility in the basement. There has been a release of tetrachloroethene (PCE), a solvent used in dry cleaning, to soil and groundwater. Soil and groundwater investigation is underway and a remedial action plan is required.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 05-01-2018
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Operations/Maintenance - General
Violation Notes: The fire extinguisher located at the generator site was last serviced on 2016. All fire extinguishers must be serviced at a minimum annually. Replace fire extinguisher with one that has been serviced. in the future, make sure that all fire extinguishers located at the generator are serviced annually by a third party company.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-14-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: THERE IS AN EMERGENCY GENERATOR LOCATED ON THE SAN FERNANDO ST.. ENTRANCE TO THE PARKING STRUCTURE. THE EMERGENCY GENERATOR IS FOR THE FIRE SUPPRESSION SYSTEM AT THE PARKING STRUCTURE AS WELL AS BACK UP POWER. THE PARKING STRUCTURE IS OWNED BY THE CITY OF SAN JOSE. THE EMERGENCY GENERATOR IS AN ONAN GENERATOR. THE BELLY TANK OF THE GENERATOR HOLDS 200 GALLONS OF DIESEL. THE EMERGENCY GENERATOR IS SERVICED BY EMPLOYEES OF THE CITY OF SAN JOSE-PUBLIC WORKS DIVISION ON A ROUTINE BASIS. IN CASE OF AN ALARM AT THE GENERATOR THIS GETS RELAYED TO THE CITY OF SAN JOSE COMMUNICATIONS LINE. THEN AN EMPLOYEE WILL BE DISPATCHED TO THE EMERGENCY GENERATOR IN QUESTION. I WAS INFORMED BY MR. JOHNSON THAT ONCE A YEAR THE RUPTURE BASIN AND OVERFILL ALARMS ARE SERVICED TEC-ACCUTITE FOR FUNCTIONALITY. NOTES: DURING THIS INSPECTION REVIEWED THE EMERGENCY GENERATOR LOGS AND FIRE EXTINGUISHER IS CURRENT IT WAS LAST SERVICED ON JULY 2015. IT IS NOW REQUIRED TO KEEP TRAINING RECORDS [Truncated]
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-01-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site with Danny Camara to inspect the emergency generator at this site. Notes: 1) This emergency generator is re-fueled by a City of San Jose employee; Tony Murphy. The refueling truck used is equipped with spill control equipment. 2) The most current copy of the CERS submittal is of; 11/29/17.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-26-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Conducted a Hazardous Material Business Plan (HMBP) and Permit Inspection and Andrew Dyer was on site as Inspection Trainer. Reola Laury was the facility representative that provided a facility walk through and paperwork access. Facility was unable to prove that property notification was conducted. Inspector provided a Property Owner Notification template. Last HMBP submittal was 12/13/2006. The following reportable hazardous materials were observed during the inspection: 1. 200 gallons of diesel fuel

Potential Contaminants of Concern:	Heating Oil / Fuel Oil
Site History:	UST found in basement of apartment building. It is believed that it was installed after 1926 to store bunker fuel for boilers located in

DRAFT

REDEVELOPEMENT AGENCY CITY OF SAN JOSE (Continued) **S112893570**

the basement. The boilers were reportedly used until the mid to late 1950s. In January 2015, the UST was found and it contained dark black viscous material. Approximately 1,950 gallons of mostly water and bunker fuel was pumped from the tank. Due to location, UST will be closed in place. Background: In January 2015 the property owner initiated the process of closing the UST in place by removing any residual contents and filling it with a cement slurry. Part of this closure in place included soil and groundwater sampling from areas around the UST. Petroleum hydrocarbons were detected on soil and groundwater samples around the UST. Contaminants detected in soil and groundwater include Total Petroleum Hydrocarbons as gasoline (TPHg), Total Petroleum Hydrocarbons and diesel (TPHd), and Oil and Grease range hydrocarbons. No wells were installed and only grab groundwater samples collected. Two phases of investigation have adequately defined the nature and extent of contamination which is limited in extent.

TOWNSEND AUTOMOTIVE (Continued) **S112347009**

Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	10-12-2017
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Due to the number and nature of violations observed during inspection, personnel are not thoroughly familiar with hazardous waste management. Provided facility with the County's free Hazardous Waste Management Training Course flyer.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	10-12-2017
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Observed free flowing amounts of liquid in both the used oil and waste coolant secondary containment vessels and on top of the used oil drums. Ensure that drum tops and secondary containment are clean of free flowing liquids to minimize the possibility of an unplanned release into the environment.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	08-15-2013
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes:	Returned to compliance on 03/01/2017.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	10-12-2017
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: Yes
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Case Type:	LUST Cleanup Site
Geo Track:	http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608501104
Global Id:	T0608501104
Latitude:	37.340279
Longitude:	-121.886595
Status:	Open - Verification Monitoring
Status Date:	04/12/2018
Case Worker:	TLF
RB Case Number:	14-294
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08F01f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	1985 In February, 2 soil samples were collected from 9 and 10 feet below the ground surface (ft bgs) prior to closing an underground storage tank (UST) in place. These samples were reported to contain 740 and 4,600 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg). The USTs had not been in use for approximately 15 years and were reported to be empty. 1986 In July, the 500-gallon UST was reportedly removed. No documentation of the UST removal was found in the file. 1 soil sample was reported to have been collected at 14 ft bgs and contained 11,000 ppm TPHg. It is reported in a later report that approximately 20 cubic yards of soil were removed at this time. In September, the remaining USTs were reported to have been closed in-place by filling them with slurry. 1992 In August, 2 monitoring wells (MW1 and MW2) were installed onsite to 19.5-20.5 ft bgs. 6 soil samples were collected and reported to contain maximum concentrations of 170 ppm TPHg, 9.3 ppm Benzene, 3.9 ppm Toluene, 12 ppm Ethylbenzene, and 11 ppm Xylenes in samples collected from MW1. Well MW1 is located near the closed in-place USTs. In September, the initial groundwater samples were collected from the wells and reported to contain maximum concentrations of 36,000 parts per billion (ppb) TPHg, 6,800 ppb Benzene, 4,500 ppb Toluene, 1,800 ppb Ethylbenzene, and 3,600 ppb Xylenes. The wells have been sampled sporadically since this time. 1994 In November, well MW3 was installed onsite to approximately 22 ft bgs. 3 soil samples were collected and reported to contain 2,200 ppm TPHg, 7.1 ppm Benzene, 0.36 ppm Toluene, 11 ppm Ethylbenzene, and 2.1 ppm Xylenes. This well was added to the groundwater monitoring program. 1996 In July, 2 monitoring wells (MW4 and MW5) were installed offsite to depths of 17.5 and 20.5 ft bgs. 7 soil samples were collectyed and reported to contain low to non-detectable concentrations of the Constituents of Concern (COCs). These wells were added to the groundwater monitoring program. 1998 In April, monitoring well MW6 was installed offsite to 20 ft bgs. 2 soil samples were collected. The sample collected at 14 ft bgs was reported to contain 3,200 ppm TPHg, 3.9 ppm Benzene, 3 ppm Toluene, 23 ppm Ethylbenzene, 40 ppm Xylenes. Methyl tert-Butyl Ether

DRAFT

RICHARDSONS AUTO SERVICE (Continued) **S103645849**

(MtBE) was not reported to be present above the laboratory reporting limits. This well was added to the groundwater monitoring program. 2008 In May, 11 soil borings (EB1 through EB11) were advanced on and offsite. 11 soil samples were collected and reported to have maximum concentrations of 1,100 ppm TPHg, 6.3 ppm Benzene, 28 ppm Toluene, 9.8 ppm Ethylbenzene, and 51 ppm Xylenes. The highest TPHg concentrations were reported for samples collected from EB9 and EB11. 12 depth discrete grab groundwater samples were collected and reported to contain maximum concentrations of 3,000 ppb TPHg, 3.7 Benzene, 3.8 ppb Toluene, 0.6 ppb Ethylbenzene, and 2.1 ppb MtBE. The highest TPHg concentration was reported for the sample collected from EB8. In March 2010, a vapor extraction well was installed along with air sparge wells. Remedial feasibility testing is scheduled to be conducted. In November 2010, air sparge feasibility testing and vapor extraction feasibility testing was conducted. High concentrations were reported in the recovered soil vapor, which demonstrates mass is still present in areas near the building onsite. CAP to do SVE, AS and GWE at the site was approved 5/1/13. Delays have been encountered with obtaining necessary permits for the City of San Jose Building department. Proposed remedial action should be successful in reducing the mass remaining near and possibly under the onsite building.

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D024
. Waste name: M-CRESOL

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P075
. Waste name: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

. Waste code: U034
. Waste name: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

DRAFT

WALGREENS #5219 (Continued) **1004676053**

. Waste code: U165
. Waste name: NAPHTHALENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 370

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 49

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 6

Waste code: D010
Waste name: SELENIUM
Amount (Lbs): 6

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Amount (Lbs): 6

Waste code: P075
Waste name: NICOTINE, & SALTS
Amount (Lbs): 21

Violation Status: No violations found

Facility Status:	**Open - Inactive**
Status Date:	09/15/2015
Global Id:	SL0608548367
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.33481
Longitude:	-121.888049
Case Type:	Cleanup Program Site
Case Worker:	UUU
Local Agency:	Not reported
RB Case Number:	43S1109
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	* Petroleum - Automotive gasolines, * Solvents, Stoddard solvent / Mineral Spriits / Distillates
Site History:	Development of site is in two phases. Phase I is complete. About one half of the site is included in Phase 1. Phase 1 was excavated to 30-40 feet and dewatered during construction. Contaminated soil and groundwater were handled in accordance with an approved RAP. An nfa letter was issued for the Phase 1 portion of the site. Phase 2 is currently a parking lot. A RAP was being developed for Phase 2 prior to the elimination of the redevelopment agency. Currently the site R.P. for the Phase 2 portion of the site is the Sucessor Agency to the San Jose Redevelopment Agency.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-06-2019
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site to perform a routine Hazardous Materials Business Plan (HMBP) inspection. Facility handles compressed carbon dioxide above HMBP State-reportable thresholds for their soda machines. Observed the following: - 3 compressed carbon dioxide gas cylinders (approx. 1000 cubic ft.) Business last submitted a complete HMBP on 7/23/2018 via the California Environmental Reporting System (CERS), CERS ID: 10467099. This was ACCEPTED. Facility information and inventory obtained during inspection accurately reflect what was electronically submitted. Notes: - Per Store Manager, Ernesto Lopez, employees have been trained in HMBP emergency response procedures. - Mr. Lopez also stated that he believes 7-Eleven has taken care of providing the HMBP Property Owner notification. - Upon re-inspection, Mr. Lopez was informed to have these documents available for review. Template forms were provided. Contact email: lopez132870@outlook.com

Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil

DRAFT

MERCADOS SUVIANDA (Continued) **S109229642**

Potential Contaminants of Concern: Diesel, Gasoline
Site History: Phase II Assessment was conducted June 2008. Former gasoline service station believed to have been in operation from 1915 through 1965. Soil borings resulted in finding soil and groundwater contamination as follow:In soil 1,200 ppm TPHd, 297 ppm TPHg, 0.22 ppm n-Propylbenzene at 17.5 ft bgs and in groundwater 12,200 ppb TPHd, 2,300 ppb TPHg, 69.2 ppb n-Propylbenzene. Additional soil and groundwater investigation took place August 2008 and showed high levels of TPHg and TPHd. Work Plan was requested to be submitted in July 2009 for additional site assessment report to inlcude determination of groundwater flow direction and the gradient and efforts to locate the UST. Extension to submit the work plan was given to April 2010.

BLOCK 2 CITY OF SAN JOSE PARKING LOT (Continued) **S108937591**

East San Fernando Street, between South First Street and South Second Street, in downtown San Jose. This 1-acre parcel has been used as a paved parking lot since at least 1980. Prior to 1980, the Site was occupied by several small stores and the OB Hale and Company Department Store. Prior to 1900, the Site operation included a paint shop. Block 3, an adjacent lot, has similar land use histories and has detected VOCs and TPHs in soil and groundwater. A former coal gasification plant was formerly located about 300 feet away. The Redevelopment Agency of the City of San Jose (the Agency) is currently planning to construct a new mixed-use building complex and underground parking structure. Specifically, the planned development includes excavation of the entire site to a depth of about 40 feet below the current surface to accommodate a three-level, underground parking structure. The space above the parking structure at ground level is planned for commercial use. The space above the commercial area is planned for hotel and residential use. To date, three rounds of site investigation have been conducted to study Site soil, groundwater, and soil gas. Investigation results were used in a Human Health Risk Evaluation and compared to screening levels such as CHHSL, ESLs and PRGs for the proposed exposure scenarios. Overall, the Site data compare favorably to these screening levels. Exceedances of those screening levels were found in only one soil sample for mercury (21 mg/kg vs. 18 mg/kg) and in soil gas samples for 1,3-butadiene (16.0 vs. 4.85 ug/cubic meter). However, the targeted exposure pathway may not even be complete when considering the proposed land use scenario (i.e., with the underground parking) and construction method.

Completed Document Type:	Phase 1
Completed Date:	06/14/1994
Comments:	Pursuant to the MOU, DTSC has reviewed a Phase I Environmental Site Assessment and other documents for the Family Health Foundation of Alviso, Inc., St. James Health Center (FHFA). The subject property is an existing health clinic which is owned and operated by FHFA. No change in use is being proposed. A Supplemental Phase I Environmental Assessment Report was prepared by DTSC and concluded that no action was needed for this property there is no contamination on the property.

OUR LADY OF LA VANG (Continued) **S112935775**

Latitude:	37.34028
Longitude:	-121.88283
Case Type:	Cleanup Program Site
Case Worker:	GOR
Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Tetrachloroethylene (PCE)
Site History:	The church is undergoing a redevelopment project and site assessment data reported chlorinated solvent contamination in groundwater beneath the property. The contaminated groundwater is from an up-gradient dry cleaner currently regulated by the Regional Water Quality Control Board. Additional assessment is underway to determine vapor intrusion risk.

Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08M03f
Potential Media Affect:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Benzene, Toluene, Trichloroethylene (TCE), Xylene, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	In 1997 a Phase I Environmental Site Assessment (ESA) was performed and a potential UST was noted near the northern site boundary. In January 1998, a Phase II ESA was performed and discovered the presence of petroleum hydrocarbons and related constituents in soil and groundwater beneath the site. In May 1998 two USTs were removed from the site. On May 10, 1998 a UST (Tank 1) with an estimated volume of 8,000 gallons was removed and was suspected to have contained leaded gasoline. On May 19, 1998 a second UST (Tank 2) with an estimated volume of was removed and was suspected to have also contained leaded gasoline. The UST removal included overexcavation of the impacted soils. However, excavation of visibly impacted soils to the north was stopped due to concerns regarding the integrity of Carlysle Street. The maximum level of TPH-g detected below the tank were was 3,300 ppm. At that time 460 tons of soil was removed to Kirby Canyon landfill in Morgan Hill. In September 1999 additional soil sampling was performed. The maximum level of contamination in soil was 280 ppm TPH-g, 2 ppm benzene, 9 ppm toluene, 8.5 ppm ethylbenzene and 38 ppm xylenes. Groundwater contamination was up to 2,400 ppb TPH-g, 11 ppb benzene, 44 ppb toluene, 28 ppb ethylbenzene and 170 ppb xylenes. MTBE was not detected. On December 9, 1999 additional soil was excavated from the area around the former USTs. Approximately 344 tons of soil was removed and disposed of at the Forward Landfill in Manteca on December 17, 1999. Eight soil samples were collected in and around the excavated area. The maximum detected soil concentrations were 14 ppm lead, 19 ppm TPG-g and 0.22 ppm benzene. On December 29, 1999 approximately 93 tons of soil was excavated from the area near the former USTs (between shoring columns 10 and 14) and eventually disposed of at the Forward Landfill in Manteca. Confirmation soil samples detected TPH-g and benzene up to 250 and 1.6 ppm, respectively in sample location E-1-19'). On December 30, 1999 302 tons of soil was excavated and transported to Forward Landfill. Confirmation soil samples collected from sample location E-13 identified an area of concern. Consequently, on

DRAFT

SAN JOSE MERCURY NEWS (Continued) **S103473094**

December 31, 1999 further excavation was performed between columns 17 and 19 and confirmation samples E-14 through E-16 were collected for chemical analyses. It was determined that the area of concern had been removed. Approximately 302 tons of soil was removed to the Forward Landfill. On February 10, 2000 approximately 20 tons of soil was excavated and disposed at Forward Landfill. Confirmation soil samples taken from the excavation indicated that all constituents were below the affected zone criteria. Prior to March 13, 2000 13 soil samples were collected from the base of the northern portion of the site excavation area. A sample collected between columns 13 and 14 at a depth of 23.5 feet contained 0.83 ppm benzene. Approximately 5 cubic yards (7 tons) of soil was excavated at this location and disposed of off-site. Two additional soil samples collected at this location on January 10, and February 18, 2000. The soils samples were below the affected zone criteria. Groundwater extraction was used to dewater the site to allow for construction activities beginning on October 11, 1999. Extraction rates varied between 5 and 30 gallons per minute (gpm) from the eleven extraction wells. The permit to discharge water was terminated on March 9, 2000. Approximately 7,176,000 gallons of impacted water was discharged to the sanitary sewer during site development activities.

Lead Agency Case Number:	Not reported
Latitude:	37.3401325736545
Longitude:	-121.881769143517
Case Type:	Cleanup Program Site
Case Worker:	REG
Local Agency:	Not reported
RB Case Number:	43S1102
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Aquifer used for drinking water supply, Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Gasoline
Site History:	The site is an inactive dry cleaner. Previous site investigations indicated that the dry cleaning chemical tetrachoroethene had contaminated soil and groundwater beneath the site. The Regional Water Board has required the responsible parties to define the extent of contamination originating from the site. Investigation is still ongoing with the remedial actions to be evaluated by June 2016.

Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08N03f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel
Site History:	The site is currently an AT&T property occupying an entire city block. The surrounding area is primarily commercial properties. Currently a nine story office building which originally dates back to approximately 1950 when AT&T purchased land from the Greyhound bus lines company. In 1992, five 10,000 gallon underground storage tanks (USTs) containing diesel fuel and all associated piping were removed from the southwest corner of the site. Soil samples collected during the UST removal contained elevated concentrations of petroleum hydrocarbons. Three new 20,000 gallon USTs were subsequently installed approximately 90 feet to the north of the original UST pit. In 1995 six monitoring wells were installed on-site to monitor groundwater contamination. In 1996 free product was observed in monitoring wells MW-1 and MW-6 and both passive and active free product removal activities were initiated. Groundwater monitoring and free product recovery continued through 2001 when a corrective action plan (CAP) was approved. The CAP approved injection of oxygen-releasing compound (ORC) into the subsurface to promote biodegredation. In 2002 passive free product recovery skimmers were installed in wells MW-1 and MW-6 and currently remain in these wells. In 2008 another CAP was submitted recommending the removal of remaining contamination through excavation. In 2012 the pre-excavation design investigation was performed during which two direct push soil borings and nineteen CPT UVOST borings were drilled to determine the extent of soil contamination in order to help finalize and excavation design. Groundwater monitoring is currently being performed on a semi-annual basis in the first and third quarters.

WDS:
Name: 153 W JULIAN BRNDNBRG FAM ASC
Address: 153 W JULIAN ST
City: SAN JOSE
Facility ID: San Francisco Bay 438194002
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAG912003 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 2
Facility Telephone: 4082795200
Facility Contact: BILL BARON
Agency Name: BRANDENBURG FAMILY ASSOCIATES
Agency Address: 1122 Willow Street Suite 200
Agency City,St,Zip: SAN JOSE 95125
Agency Contact: BILL BARON
Agency Telephone: 4082795200
Agency Type: Private
SIC Code: 7399
SIC Code 2: Not reported
Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Primary Waste: CNWTRS
Waste Type2: Not reported
Waste2: Contaminated Ground Water
Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum

- File Location: All Files are on GeoTracker or in the Local Agency Database
- Local Case Number: 07S1E08P02f
- Potential Media Affect: Other Groundwater (uses other than drinking water)
- Potential Contaminants of Concern: Heating Oil / Fuel Oil
- Site History: Underground heating oil tank located within the basement of the building. In 1992, a water main/line ruptured near this building and flooded the basement. The flooding caused the product to come out of the tank. The tank was taken out of service and the tank was left in place. Subsurface investigation conducted in 2010 found soil and groundwater contamination. The UST will be properly closed in place.

Local Agency:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08H02f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	Leak detection well MW-1 was installed in 1985 as part of underground storage tank (UST) compliance requirements. Monitoring wells MW-2 through MW-4 were installed in April 1989, in response to an unauthorized release report filed in September 1988. The report was based on 15 gallons of fuel released due to line damage during an underground fueling system upgrade, and detection of liquid phase hydrocarbons (LPH) in well MW-1. Hydrocarbons in soil and groundwater were detected in MW-2, but not in MW-3 or MW-4. Wells MW-1 through MW-4 were tested for concurrent use as groundwater monitoring and soil vapor extraction (SVE) wells in July 1991. Dedicated SVE wells VW-1 and VW-2 and groundwater monitoring wells MW-5 and MW-6 were installed in November 1991. Vapor extraction testing conducted in January 1992 indicated a general SVE radius of influence of 20 feet. Monitoring wells MW-7 and MW-8 were installed and four soil borings (B-1 through B-4) were drilled in February 1992. Monitoring well MW-9 and sparge wells SP-1 and SP-2 were installed in December 1993. Five cone penetrometer points (CPT-1 through CPT-5) were advanced downgradient of the main plume area in December 1993. Samples collected from the cone penetrometer points did not contain dissolved hydrocarbons above laboratory reporting limits. An SVE system (including horizontal vapor extraction wells HVW-1 and HVW-2) was installed in August 1993, and was turned off in September 1994, after extracted vapor concentrations declined to stable minimum levels. Air sparging was done concurrently with SVE. Sparge testing performed in January 1994 indicated an approximate radius of influence of 15 feet. The SVE/air sparging system, wells MW-1, VW-1, VW-2, and (original) sparge wells SP-1 and SP-2 were removed in September 1995, during upgrade of the site fueling system and removal of 350 tons of soil from the hydrocarbon source area. Additional offsite assessment (soil borings B-1 through B-5, GP-1 through GP-6) performed in March and May 1999 indicated dissolved methyl-tert-butyl ether (MtBE) concentrations in the furthest downgradient grab water sample to be 256 micrograms per liter ("g/L) at 30 feet below ground surface (bgs). The 1999 assessment was conducted in conjunction with onsite injection of microbial/nutrient and oxygen-releasing compound slurry as an enhanced passive bioremediation measure. Quarterly monitoring data from January, April, and June 2000 indicated that dissolved nutrient levels showed evidence of reduction (via microbial consumption) over time, and that areas of relatively high heterotrophic microbial population density corresponded to areas of higher dissolved hydrocarbon and oxygenate levels. Dissolved MtBE levels showed evidence of decline in response to treatment measures, but did not yet comply with Santa Clara Valley Water District (SCVWD) remedial goals. Dissolved oxygen (DO) level increases observed just

DRAFT

7-ELEVEN #17496 (Continued) **S109280436**

after treatment were not sustained. Based on these data, the SCVWD requested establishment of a groundwater monitoring grid at depths of 30 feet bgs, and initiation of further remediation. Monitoring wells MW-7A and MW-10 through MW-12 were installed in March 2001, to monitor vertical plume distribution and replace buried source area well MW-7. Sparge wells SP-1 through SP-6 (including new wells SP-1 and SP-2) were installed in March 2001, and an oxygen uptake study was conducted in conjunction with a vapor extraction test in April 2001, to demonstrate the feasibility of combined oxygen injection/SVE remediation at the site. In March 2003, periodic injection of oxygen into sparge wells began onsite. On August 13, 2003, two soil samples were collected from beneath each fuel dispenser. The soil samples did not contain concentrations of total petroleum hydrocarbons as gasoline (TPHg), benzene, toluene, ethylbenzene, and total xylenes (BTEX), MtBE, di-isopropyl ether(DIPE), tert-amylmethyl ether (TAME), ethyl-t-butyl ether (EtBE), tert-butyl alcohol (TBA), 1,2-dichloroethane (DCA) and 1,2-dibromoethane (EDB) above laboratory reporting limits. On November 17 through 19, 2004, SECOR supervised the installation of SP-7 through SP-10, SP-13, and tank pit well TP-1. Proposed oxygen injection wells SP-11 and SP-12 were not installed due to the inability to confirm or deny the presence of utilities in the proposed boring locations. Proposed monitoring wells MW-13 and MW-14 were not drilled due to the presence of fiber optic lines. On December 19-20, 2005, SECOR conducted a SVE test utilizing tank pit well TP-1 at the site. The purpose of the test was to determine if residual concentrations of TPHg, BTEX, or MtBE are present in the tank pit backfill. Soil vapor samples collected during the SVE test did not contain concentrations of TPHg, BTEX, or MtBE above laboratory reporting limits. On January 3, 2006, SECOR supervised the installation of one offsite deep monitoring well, MW-13(D). Proposed oxygen injection wells SP-11 and SP-12 were not installed due to the presence of pea gravel in the proposed locations. The last oxygen injection occurred on 10/29/09.

Eval Notes: On site to witness the annual monitoring system certification performed by Mr. Jesus Saldivar (all certifications current) of Tanknology. NOTE: The spill bucket testing and paperwork review were performed on 1/13/2017. See that inspection report for details. The annular, under dispenser containment (UDC) and sump sensors were tested in water and provided audible and visible alarms. The turbine sump and UDC sensors also provided positive shutdown of the turbines. Sensor out and power out (fail safe) triggered positive shutdown of all turbines. The electronic line leak detectors (ELLD) were tested and detected a simulated 3 gph leak at 10 PSI using the Tanknology LDT-5000 tester and provided turbine shutdown. Overfill protection is provided by flapper valves in the fill tubes. The emergency shut off (ESO) button was tested and shut down both turbines. email: sbala4@yahoo.com, Jamil.Hershewe@7-11.com Submit a copy of the Monitoring Certification and [Truncated]

containment (UDC) sensors were tested in water and provided audible and visible alarms except as noted above. The sump and UDC sensors also provided positive shutdown of the turbines. Sensor out and power out (fail safe) triggered positive shutdown of all turbines. The electronic line leak detectors (ELLD) were tested and detected a simulated 3 gph leak at 10 PSI and provided audible and visible alarms and turbine shutdown. Overfill protection is provided in all tanks by a flapper valve in the fill riser. The spill buckets are direct buried and passed a vacuum test at 30 inHg. The same issue noted in the 2015 inspection report with the L2 and L4 alarms not clearing occurred today. Maintenance records of another company troubleshooting the issue after the prior monitoring [Truncated]

Eval Division: Santa Clara County Environmental Health
Eval Program: UST
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-15-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site with Jesus Saldivar of Tanknology. Mr. Saldivar's certifications were verified and current. 2 tanks: 87 and 91 The following components were tested and functioned as required: - 2 tank annular sensors; audible and visual alarm - 2 STP sump sensors; positive shutdown was observed - 2 under dispenser containment sensors; positive shutdown was observed - sensor out and fail safe; positive shutdown was observed - 2 electronic line leak detectors; positive shutdown was observed - 2 direct buried fill spill buckets were hydrostatically tested for 60 mins with no loss - mechanical overfill valves are installed for each tank DUSTO monthly reports, annual employee training, copies of testing reports and maintenance documentation were reviewed and current. Verified that all equipment tested today matches the CERS submittal dated 1/9/19 Permit valid through Dec 31, 2021 Submit a copy of the completed monitoring system certification form and spill [Truncated]

Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to witness the underground storage tank system secondary containment (SB989) testing performed by Mr. Jarrod Cooke (certifications current) of Tanknology. Product piping is flexible pipe and the secondary was tested at 5 psi for one hour with no loss. The annular space of the tanks were tested at 10 inHg for one hour.

DRAFT

7-ELEVEN INC #17496 (Continued) **1000282134**

The regular passed one hour with no loss. The Super test could not be completed due to time constraints. The piping sumps and under dispenser containment (UDC) were tested with a Tanknology VPLT accelerated test. The sumps passed a 30 minute test and the UDCs passed a 15 minute test. Contact our office at least two days prior to testing the Premium tank annular space. Submit a copy of the Secondary Containment Test report to our office within 30 days and keep a copy available for review for at least 3 years. Reports may be sent via email to USTinspector@deh.sccgov.org.

- Site History: The approximately 0.65-acre Site is located at 235 West Julian Street near the intersection of Terraine Street and West Julian Street in San Jos, California in a commercial/light industrial area. The Site was occupied by Ropers Fruit Packing Depot in 1891; Bean Spray and Pump Company (with on-Site spray mixing, spray storage and machine shop activities) in 1915; a U.S. Government Warehouse in 1950; and foundry and lithograph businesses in 1969. A 2005 SECOR environmental investigation (Phase I and II) revealed elevated metal concentrations (arsenic, chromium, copper, lead, nickel and zinc in the upper 2 feet of soil. Diesel ranged petroleum hydrocarbons also were at depths ranging from 15 to 20 feet. Secor also reported elevated diesel ranged petroleum hydrocarbons in ground water (SB-8 @ 12,000 ppm). The results of the human health risk assessment indicated that

potential on-Site construction workers and potential future residents will not incur significant carcinogenic or noncarcinogenic health effects via indoor and outdoor inhalation of the Chemicals of Concern in soil, soil vapor and ground water. The Site is zoned for commercial/industrial use but will be rezoned to high density residential use. The proposed Site use is for a 10 to 16 story residential tower. Construction is planned to commence in 2014 but could be as early as 2011. The discharger is proposing capping the Site with the development effectively limiting exposure to future residents.

Site History: August 2018 Block BF LLC is planning to construct a 5-story podium-style apartment building with one full level of ventilated, subterranean parking. Prior commercial operations at the site date back to 1884 and have included underground storage tanks, oil water separators, associated piping, a railroad spur(s), and manufacturing of specialty bicycle parts. The Regional Water Board has issued several no further action letters for parcels within the site when the site was zoned for commercial use. Block BF LLC has submitted a vapor intrusion mitigation system (VIMS) VIMS Design Report that includes the following elements: Excavation of soil at the entire site to approximately10 feet below ground surface (bgs) to allow for the subterranean parking Excavation of soil at the elevator pit locations to approximately 15 feet bgs Vapor barrier under the entire building footprint Vapor collection system installed beneath the vapor barrier with 50 spacing Ventilation risers to the roof fitted with active fans on the rooftop Implementation of a construction quality assurance plan under the oversight of VIMS design engineer Subslab sampling layer and four subslab sampling points Two rounds of indoor air and subslab sampling at four locations Submittal of a VIMS completion report and O&M plan

Name:	ROTTEN ROBBIE #42
Address:	455 E. JULIAN ST.
City,State,Zip:	SAN JOSE, CA 95112
Lead Agency:	SANTA CLARA COUNTY LOP
Case Type:	LUST Cleanup Site
Geo Track:	http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608502019
Global Id:	T0608502019
Latitude:	37.3450679180605
Longitude:	-121.884663105011
Status:	Completed - Case Closed
Status Date:	06/18/2014
Case Worker:	AC
RB Case Number:	18-007
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08B01f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Benzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates
Site History:	On December 22, 2009 sampling subcontractor, GeoRestoration, Inc., collected groundwater samples from the three on-site monitoring wells MW-1, MW-2, and MW-3 and one off-site monitoring well, MW-4. On November 3, 2009, RMA met with the SCDEH staff to discuss the status and conduct of several on-going Robinson Oil Company (ROC) projects including the Rotten Robbie 42 site. Particular concern was expressed regarding the benzene concentration that had been detected in the groundwater grab sample that had been collected from soil boring SB-1 on June 20, 2003. SB-1 is located on the ROC site but is less than 10 feet from the building on the adjacent property (317 N. 10th Street) that is used as a church. The benzene concentration of 750 ug/L detected in the grab sample from SB-1 is higher than the benzene environmental screening level for vapor intrusion of 540 ug/L. A

DRAFT

ROTTEN ROBBIE #42 (Continued) **U001602621**

subsequent groundwater grab sample collected from soil boring SB-2 installed (May 13, 2004) immediately adjacent to the church on the opposite (northwest) side was non-detect for benzene at <0.5 ug/L. During the discussion, it was decided that an additional soil boring (SB-5) would be installed proximal to the earlier boring SB-1. Only if the benzene concentration in the groundwater grab sample exceeded the vapor intrusion screening level (540 ug/L), would soil vapor testing be required. On December 22, 2009, concurrent with groundwater monitoring at the site, soil boring SB-5 was installed using a hand auger. Benzene was reported at 164 ug/L in the grab groundwater sample collected in SB5. Remediation at this site was removal of soil when USTs were replaced in 1997. This case was closed by the SWRCB.

Violation Date:	02-28-2019
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Facility failed to inspect the overfill prevention equipment by 10/15/2018 as required. The overfill prevention equipment was inspected on 2/26/19. This violation was noted as corrected during today's inspection, no further action is required.

Violation Date: 03-05-2015
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 03/05/2015. THE 5-GALLON SPILL BUCKET FAILED WHEN IT WAS HYDROSTATICALLY TESTED WITH WATER. TECHNICIAN CLEANED OUT THE DRAIN VALVE AND CHECK THE SWIVEL ADAPTER. ADDITIONALLY THE TECHNICIAN ADDED WD40 TO THE ADAPTER TO MAKE IT LOOSER. THE SPILL BUCKET WAS THEN RETESTED AND PASSED. NO FURTHER ACTION IS REQUIRED.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Facility failed to inspect the overfill prevention equipment by 10/15/2018 as required. The overfill prevention equipment was inspected on 2/26/19. This violation was noted as corrected during today's inspection, no further action is required.

Citation: HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)
Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes: _____ Diesel was observed to be pooling the piping sump and pipe transition sump during todayG s inspection. In aggregate, approximately 0.5 gallons of diesel was removed from the piping sump and pipe transition pump. Diesel has previously been observed in the pipe transition sump during the 3/23/2015 and 3/22/2016 inspections and in the piping sump during the 3/23/2015 inspection. Per maintenance records and Ms. WalkerG s statements, no repairs or corrective actions have been taken to repair the piping. IMMEDIATELY begin investigating the source of the fuel leak and submit a work plan for any necessary repairs to HMCD for review. Depending on the scope of work necessary, a permit from HMCD may be required for the repairs. THIS IS A CONTINUOUS, REPEAT, AND UNCORRECTED CLASS I VIOLATION FROM THE OFFICIAL NOTICE OF INSPECTION REPORT ISSUED ON 3/22/2016 AND A CONTINUOUS, REPEAT, AND UNCORRECTED CLASS II VIOLATION THE [Truncated]

Violation Description: Failure of leak detection equipment to be located such that equipment

DRAFT

SAN JOSE MARRIOTT (Continued) **S108219554**

is capable of detecting a leak at the earliest possible opportunity.

Violation Notes: The Veeder-Root 794380-208 sensor was observed to be in a location that does not provide the earliest opportunity of leak detection. The sensorG s improper location was verified by the fact that the diesel accumulating in the sump was at a different location than the sensor (i.e. the sensor was dry while there was diesel in the sump). The sensor was re-located to a location that provides leak detection at the earliest opportunity. This violation was corrected at the time of inspection. NO FURTHER ACTION IS NEEDED. However, ensure that the sensor remains in the proper location.

Violation Date: 03-20-2017
Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)
Violation Description: Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the CUPA, for the life of the UST.
Violation Notes: No annual monitoring system certifications from the past 5 years and no spill bucket test reports and secondary containment test reports from the past 3 years are available for review. Ensure that annual monitoring system certification reports are maintained on-site for 5 years and that spill bucket test reports and secondary containment test reports are maintained on-site for 3 years.

Violation Date: 03-13-2018
Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: This is an uncorrected and repeat Class I violation. UST information submitted via CERS on 3/13/2018 is missing the required UST Certification of Financial Responsibility (CFR). The most recent CFR for this facility expired on 9/30/2014. The CFR must be updated annually with current insurance policy information and electronically submitted via CERS. Prepare and submit a current CFR form. [Note: A

Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes: Facility did not submit a complete HMBP to CERS as noted in the 3/24/2015 Notice of Inspection (NOI). Ensure all items noted in the 3/24/2015 inspection report are addressed and submit a complete HMBP to CERS. Ensure the HMBP is properly updated within 30 days of changes to personnel, chemicals stored or operations. Ensure the HMBP is certified at least annually. Complete the response to the 3/24/2015 NOI and submit with the response to today's report. A copy of the 3/24/2015 NOI was delivered during the inspection.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Timothy Elebeck (ICC #8001435-UT, exp. 11/26/2014; VR L4 #B35252, exp. 9/9/2015) of Tanknology. Site consists of a single UST supplying an emergency backup generator located on the 27th floor penthouse. The annular space, piping sump, transition sump, and pump room floor (bermed epoxy floor used for secondary containment) are monitored by a Veeder-Root TLS-300C located in the pump room. The time on the TLS-300C was off by 2 hours on arrival and was immediately corrected. On the 27th floor, the day tank secondary and single-walled piping at the generator are monitored by the generator panel remote annunciator/light located in the engineering office. The sensors (piping sump, transition sump, pump room containment- VR 208; annular VR -420) were tested in water and provided audible and visible alarms at the VR panel. The day tank and

Completed Sub Area Name:	Not reported
Completed Document Type:	5 Year Review Reports
Completed Date:	05/02/2008
Comments:	The remedy (cap) continues to be protective of public health, safety and the aenvironment. the next 5 year review is due March 2013.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	06/20/1991
Comments:	Report of Completion of Interim Remedial Measure/Removal Action (IRM/RA). Polynuclear aromatic hydrocarbons (PAHs) contaminated soil (23,000 cubic yards(CY)) resulting from a former PG&E gas manufacturing site was excavated and encapsulated into the nearby parking lots. Gasoline contaminated soil (17,000 CY) was also excavated and stockpiled nearby for vapor extraction treatment. The excavated area was backfilled with clean fill.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	06/28/1991
Comments:	Completion of Phase I Construction Documentation Report. Required a deed restriction to be filed. PNA contaminated soil from a former PG&E site was excavated and encapsulated into a nearby parking lot. Gasoline contaminated soil was also excavated and stockpiled on a nearby lot for vapor extraction treatment. The excavated areas were

DRAFT

SAN JOSE SPORTS ARENA (Continued) **S105954447**

backfilled with clean soil. The volume of excavation for PNA contaminated soil was approximately 23,000 cubic yards. The volume of excavation for gasoline contaminated soil was approximately 17,000 cubic yards. Groundwater treatment was performed under San Francisco RWQCB's requirements. Current files at the RWQCB list the site closed on 06/20/97.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 05/01/2006
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 05/23/2003
Comments: A Deed Restriction limiting future use of property including the material encapsulation areas which requires no disturbance of the encapsulated areas and the slurry wall. If the areas are disturbed, DTSC is to be notified, a health and safety plan prepared, the material from the encapsulation area will be handled properly, and repairs to the area will be done as quickly as possible.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 04/27/2007
Comments: No problems noted during inspection.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 07/21/2006
Comments: Comments on the report were: a soil management plan is required; asphalt removal, if needed and liquifaction issues for the SE corner will need to be addressed, and any other project ("Ball Park") that might involve a parking structure to be added to the parking lot at the HP pavilion.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/27/2003
Comments: Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 05/30/2012
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the

DRAFT

SAN JOSE SPORTS ARENA (Continued) **S105954447**

restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/20/1991
Comments: Report of Completion of Interim Remedial Measure/Removal Action (IRM/RA). Polynuclear aromatic hydrocarbons (PAHs) contaminated soil (23,000 cubic yards(CY)) resulting from a former PG&E gas manufacturing site was excavated and encapsulated into the nearby parking lots. Gasoline contaminated soil (17,000 CY) was also excavated and stockpiled nearby for vapor extraction treatment. The excavated area was backfilled with clean fill.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/28/1991
Comments: Completion of Phase I Construction Documentation Report. Required a deed restriction to be filed. PNA contaminated soil from a former PG&E site was excavated and encapsulated into a nearby parking lot. Gasoline contaminated soil was also excavated and stockpiled on a nearby lot for vapor extraction treatment. The excavated areas were backfilled with clean soil. The volume of excavation for PNA contaminated soil was approximately 23,000 cubic yards. The volume of excavation for gasoline contaminated soil was approximately 17,000 cubic yards. Groundwater treatment was performed under San Francisco RWQCB's requirements. Current files at the RWQCB list the site closed on 06/20/97.

Comments: No problems noted during inspection.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 07/21/2006
Comments: Comments on the report were: a soil management plan is required; asphalt removal, if needed and liquifaction issues for the SE corner will need to be addressed, and any other project ("Ball Park") that might involve a parking structure to be added to the parking lot at the HP pavilion.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/27/2003
Comments: Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 05/30/2012
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Background Info:	The current address on the building is 525 West Santa Clara Street. The site is bounded by Autumn Street to the east; West Santa Clara Street to the south; Julian Street, Montgomery Street, and St. John Street to the north; and the Southern Pacific Railroad tracks to the west. In May 1987, a site screening identified contaminants in the soil as polycyclic aromatic hydrocarbons (PAH's) from a former Pacific Gas & Electric (PG&E) site with concentrations ranging from non-detect to above 3,000 ppm in localized areas. EPA completed screening site inspection in 1989. The City of San Jose Redevelopment

DRAFT

SAN JOSE SPORTS ARENA (Continued) **S105954447**

Agency (SJRA) acquired 22 parcels in a former industrial area in downtown San Jose that had a former Pacific Gas & Electric (PG&E) coal gasification plant, various automobile repair and service businesses, underground storage tanks, oil/water clarifers, and drums.

Completed Document Type: Site Screening
Completed Date: 12/27/1991
Comments: Completed Site Screening. In January 1989, additional sampling was conducted at the site. Soil boring results detected total oil and grease (TOG) and total petroleum hydrocarbons as diesel (TPHd) in excess of 1000 ppm. Lead was detected at 938 ppm. In May 1989, two groundwater monitoring wells (MW-1 and MW-2) were installed at the property. Lead was detected in groundwater at a concentration of 0.181 ppm. In May 1989, contaminated soil was removed from the previous sampled area. Final soil sample results indicated only one sample contained TOG at 780 ppm and lead at 191 ppm. The sample that contained the TOG and lead was collected beneath the foundation of the building. The excavations were backfilled with clean, imported fill.

Violations:
Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 05-04-2017
Citation: HSC 6.5 25201 - California Health and Safety Code, Chapter 6.5, Section(s) 25201
Violation Description: Failure to obtain a permit or grant of interim status after generator has accumulated hazardous waste on-site for longer than 90 days.
Violation Notes: Used oil generated from facility-wide equipment maintenance is consolidated into 5 gallon containers in the used oil accumulation area on the second floor and is taken to a household hazardous waste (HHW) drop-off location to be discarded. Mr. Chavez stated that pumps and equipment require oil changes approximately once per year and equipment and pumps observed during inspection were labeled with the most recent G serviceG dateG and next service due date. The five gallon bucket currently used to accumulate used oil was observed to be marked with an initial accumulation date of 2/11/2017, but per the augerG s label, the used oil consolidated into the container during inspection (see corrected container marking violation below) was generated on approximately 1/26/2017. Furthermore, HHW receipts reviewed during inspection only identified used oil being disposed of on 3/29/2017 and 4/2/2015 during the past three years. Hazardous waste cannot accumulate on-site for longer than [Truncated]
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 05-04-2017
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Used oil was observed to be leaking and accumulating on the floor near the mixing tank. Some of the spill was observed to still be in liquid form, while dried used oil residue was observed in other places on the floor. Furthermore, the drains in the floor are automatically directed to the on-site elementary neutralization unit (before POTW discharge), which is not equipped to separate and capture used oil from the other

Draft

aqueous waste streams. Ensure that any spilled used oil is immediately collected and managed as hazardous waste.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 05-04-2017
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include one or more elements in the Contingency Plan including but not limited to the following: description of actions personnel will take in response to a release or emergency, arrangements with local authorities, list of emergency coordinators including name, addresses & phone numbers, list of emergency equipment and their physical description, location and capabilities,- evacuation plan, and OES phone number. (If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) Plan or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions.)
Violation Notes: The facilityG s Contingency Plan does not contain the required information: - The names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator. Note: Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates. - All of the emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment). Furthermore, the plan does not include a physical description of each item on the list, and a brief outline of its capabilities.

Violation Date: 05-04-2017
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: 1) The facility is a brewery who is in SIC Code Major Group 20 (SIC Code 2082) and is exempted from obtaining a hazardous waste treatment permit for the elementary neutralization of their 2.8%-5% sodium hydroxide wastes and 1.4%-5% sulfuric acid wastes generated from CIP activities pursuant to HSC 25201.13(c). However, the facility also directs any corrosive wastes, including wastes which meet hazardous waste corrosivity criteria, generated from leaking pipes, equipment malfunctions, and spills to the neutralization units via the drains located throughout the facility. At the time of inspection, a pipe associated with the G caustic tankG holding 5% sodium hydroxide used for CIP activities was leaking and mixing with the water condensate on the floor underneath and in front of the tank. The resultant caustic-water condensate mixture was pH stripped and determined to

Violation Description: Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.
Violation Notes: 1) The pH chart recorder for the two wastewater neutralization tanks and sampling point prior to POTW discharge were reviewed for the time period between 11/29/2016 G 4/11/2017. At least five occurrences of the sample pointG s pH being at or greater than 12.5 (e.g. 12.9, 12.5-12.7, 12.8) and the pH of the second neutralization tank being greater than 12.5 were observed on the chart recorders for the time period between 3/5/2017-4/11/2017. Three of the corrosive discharges continued for a prolonged period of time, while the others were short spikes. The sample pointG s pH was also recorded as 12.6 for least one time period between 2/3/2017-3/5/2017 and once between 11/29/2016-1/4/2017. 2) HMCD was notified by San Jose-Santa Clara Regional Wastewater that a sample of the facilityG s discharged corrosive wastewater on 12/30/2015 had a pH of 1.8. Upon inquiry as to what caused the illegal discharge of pH 1.8 corrosive wastewater on 12/30/2015, Mr. Chavez said that there was a [Truncated]

Violation Date:	05-04-2017
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	The facility routinely generates hazardous waste and has CA EPA ID Number CAL000335296, but the ID Number has been inactive since 6/30/2014. Furthermore, the facility has repeatedly obtained temporary EPA ID Numbers to dispose of hazardous waste at household hazardous waste collection facilities (see comments section below). All generators who routinely generate hazardous waste must obtain a permanent EPA ID Number and the EPA ID Number must remain active pursuant to HSC 25205.16(c). Temporary EPA ID Numbers are not for use by generators who routinely generate hazardous waste. A copy of DTSC FORM 1358 will be provided with this inspection report.

Violations:
Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 05-04-2017
Citation: HSC 6.5 25201 - California Health and Safety Code, Chapter 6.5, Section(s) 25201
Violation Description: Failure to obtain a permit or grant of interim status after generator has accumulated hazardous waste on-site for longer than 90 days.
Violation Notes: Used oil generated from facility-wide equipment maintenance is consolidated into 5 gallon containers in the used oil accumulation area on the second floor and is taken to a household hazardous waste (HHW) drop-off location to be discarded. Mr. Chavez stated that pumps and equipment require oil changes approximately once per year and equipment and pumps observed during inspection were labeled with the most recent G serviceG dateG and next service due date. The five gallon bucket currently used to accumulate used oil was observed to be marked with an initial accumulation date of 2/11/2017, but per the augerG s label, the used oil consolidated into the container during inspection (see corrected container marking violation below) was generated on approximately 1/26/2017. Furthermore, HHW receipts reviewed during inspection only identified used oil being disposed of on 3/29/2017 and 4/2/2015 during the past three years. Hazardous waste cannot accumulate on-site for longer than [Truncated]

Violation Date: 05-04-2017
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Used oil was observed to be leaking and accumulating on the floor near the mixing tank. Some of the spill was observed to still be in liquid form, while dried used oil residue was observed in other places on the

DRAFT

GORDON BIERSCH BREWING CO (Continued) **S103655146**

floor. Furthermore, the drains in the floor are automatically directed to the on-site elementary neutralization unit (before POTW discharge), which is not equipped to separate and capture used oil from the other aqueous waste streams. Ensure that any spilled used oil is immediately collected and managed as hazardous waste.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 05-04-2017
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include one or more elements in the Contingency Plan including but not limited to the following: description of actions personnel will take in response to a release or emergency, arrangements with local authorities, list of emergency coordinators including name, addresses & phone numbers, list of emergency equipment and their physical description, location and capabilities,- evacuation plan, and OES phone number. (If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) Plan or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions.)
Violation Notes: The facilityG s Contingency Plan does not contain the required information: - The names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator. Note: Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates. - All of the emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment). Furthermore, the plan does not include a physical description of each item on the list, and a brief outline of its capabilities.

Violation Date: 05-04-2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: The facility routinely generates hazardous waste and has CA EPA ID Number CAL000335296, but the ID Number has been inactive since 6/30/2014. Furthermore, the facility has repeatedly obtained temporary EPA ID Numbers to dispose of hazardous waste at household hazardous waste collection facilities (see comments section below). All generators who routinely generate hazardous waste must obtain a permanent EPA ID Number and the EPA ID Number must remain active pursuant to HSC 25205.16(c). Temporary EPA ID Numbers are not for use by generators who routinely generate hazardous waste. A copy of DTSC FORM 1358 will be provided with this inspection report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/30/2020

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

DRAFT

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DRAFT

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2017
Date Data Arrived at EDR: 05/29/2019

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

DRAFT

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

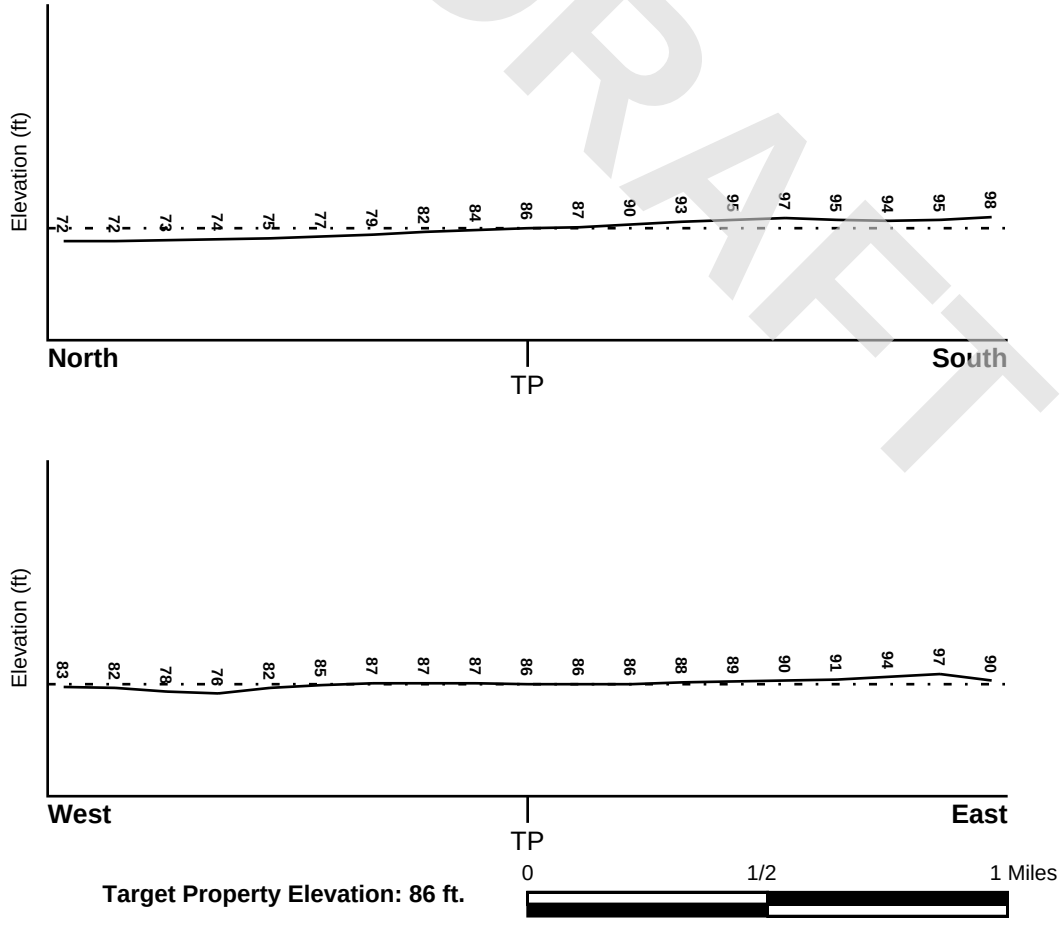
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

DRAFT

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

SAN JOSE WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	River Park Development-Lincoln Props
Site EPA ID Number:	CAD981676430
Surficial Aquifer Flow Dir.:	SW. THIS FLOW APPLIES TO THE "A" AQUIFER.
Measured Depth to Water:	approximately 22 feet in the surficial "A" aquifer and approximately 95 feet in the underlying "B" aquifer.
Hydraulic Connection:	A silty clay layer separates the "A" and "B" aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

DRAFT

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

DRAFT

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

DRAFT

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
