Re:	Revision to Information Submitted to CEQAnet for State Clearinghouse #2023030107

To Whom It May Concern:

On Wednesday, March 1, 2023, the Central Valley Regional Water Quality Control Board created a new document in CEQAnet for the Lower Blue Lake Dam Seepage Mitigation and Weir Replacement Project. It was issued State Clearinghouse #2023030107.

It has come to our attention that (1) CEQA public noticing had not been completed at the time of submission, necessitating an extension of the public review period and (2) An Administrative Draft version of the Initial Study/Proposed Mitigated Negative Declaration (IS/MND) was submitted to CEQAnet containing information that should not have been published.

We therefore respectfully request that the following changes be made to the CEQAnet entry for State Clearinghouse #2023030107:

- Please extend the local review period end date to April 11, 2023.
- Please replace the Notice of Intent with the revised Notice of Intent that identifies the public review period end date as April 11, 2023.
- Please replace the IS/MND the revised, "Public Draft" version which has redacted the information that should not have been published.

Thank you very much for your assistance in this matter.
