II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

RESPONSE PLAN – PAGE 2

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the California Emergency Management Agency at (800) 852-7550.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING (Check all that apply): A10.

☐ 1. HAZARDOUS MATERIALS; ☐ 2. HAZARDOUS WASTES

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR BY (Check all that apply): B1.

☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (e.g., 9-1-1)
☐ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☐ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

In the event of an emergency involving hazardous materials and/or hazardous waste, all facilities must IMMEDIATELY:
1. Notify facility personnel and evacuate if necessary in accordance with the Emergency Action Plan (Title 8 California Code of Regulations §3220);
2. Notify local emergency responders by calling 9-1-1;
3. Notify the local Unified Program Agency (UPA) at the phone number below; and
4. Notify the State Warning Center at (800) 852-7550.

Facilities that generate, treat, store or dispose of hazardous waste have additional responsibilities to notify and coordinate with other response agencies. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator must follow the appropriate requirements for the category of facility and type of release involved:
1. Title 22 California Code of Regulations §66265.56. Emergency Procedures for generators of 1,000 kilograms or more of hazardous waste in any calendar month.
2. Title 22 California Code of Regulations §66265.196. Response to Leaks or Spills and Disposition of Leaking or Unfit-for-Use Tank Systems.
3. Title 40 Code of Federal Regulations §302.6. Notification requirements for a release of a hazardous substance equal to or greater than the reportable quantity.
4. Title 22 California Code of Regulations §66262.34(d)(2) and Title 40 Code of Federal Regulations §262.34(d)(5)(ii) for generators of less than 1000 kilograms of hazardous waste in any calendar month.

Following notification and before facility operations are resumed in areas of the facility affected by the incident, the Emergency Coordinator shall notify the local UPA and the local fire department's hazardous materials program, if necessary, that the facility is in compliance with requirements to:
1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

I. EMPLOYEE TRAINING

Employee training is required for all employees and/or contractors handling hazardous materials and/or hazardous wastes during normal and/or emergency operations. Most facilities will need to submit a separate Training Plan. However, your CUPA may accept this section as the Training Plan for some small facilities.
Employee training plans may include the following content:

- Applicable laws and regulations;
- Emergency response plans and procedures;
- Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Hazards of materials and processes (e.g., fire, explosion, asphyxiation);
- Hazard mitigation, prevention and abatement procedures;
- Coordination of emergency response actions;
- Notification procedures for local emergency responders, CUPA, Cal OES, and onsite personnel;
- Communication and alarm systems;
- Personal protective equipment;
- Use and maintenance of emergency response equipment and supplies (e.g. Fire extinguishers, respirators, spill control materials);
- Decontamination procedures;
- Evacuation procedures and evacuation staging locations;
- Identification of facility areas, equipment, and systems vulnerable to earthquakes and other natural disasters.
- OTHER (Specify):

Check the applicable boxes below to indicate how the employee training program is administered.

- [ ] 1. FORMAL CLASSROOM
- [ ] 2. VIDEOS
- [x] 3. SAFETY MEETINGS
- [ ] 4. STUDY GUIDES / MANUALS I1.
- [ ] 5. OTHER (Specify): I2.
- [ ] 6. NOT APPLICABLE SINCE FACILITY HAS NO EMPLOYEES
- [ ] 7. CHECK IF A SEPARATE EMPLOYEE TRAINING PLAN IS USED AND UPLOADED TO CERS AS A PDF DOCUMENT I3.
- [ ] 8. CHECK IF EMPLOYEE TRAINING IS COVERED BY THE ABOVE REFERENCED CONTENT AND OTHER DOCUMENTS ONSITE I4.

EMPLOYEE TRAINING FREQUENCY AND RECORDKEEPING TRAINING MUST BE:

- Provided initially for new employees as soon as possible following the date of hire. New employees should not work in an unsupervised position that involves hazardous materials handling and/or hazardous waste management without proper training;
- Provided within six months from the date of hire for new employees at a large quantity generator;
- Ongoing and provided at least annually;
- Amended prior to a change in process or work assignment;
- Given upon modification to the Emergency Response/Contingency Plan.

Large Quantity Generator Training: Large quantity generators (1,000 kg or more) must retain written plan and documentation of employee training which includes:

- A written description of the type and amount of both initial and ongoing training that will be given to persons filling each job position having responsibility for hazardous waste management and/or emergency response.
- The name, job title and job description for each position at the facility related to hazardous waste management.
- Current employee training records must be retained until closure of the facility and former employee training records must be retained for at least three years after termination of employment.

Small Quantity Generator Training: Small quantity generators (less than 1,000 kg) must include basic hazardous waste management and emergency response procedures but a written employee training plan and training records are not required. In order to show that the facility has met the small quantity generator employee training requirement, an employee training plan and training records may be made available.

Hazardous Materials Business Plan Training: Businesses must provide initial and annual employee training that includes the content referenced above. The training may be based on the job position and training records must be made available for a period of at least three years.

THE C[redacted]CIAL NOTICE OF INSPECTION LAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P O Box 28070, San Jose, CA 95159-8070

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected Additionally, the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected If more space is needed, attach additional pages

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1 The yellow copy of each page must be submitted to HMCD The pink copy is for your records

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation In your Notice of Disagreement, you must explain in detail why the violation does not exist If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request Other pertinent information derived from the inspection is attached to this Notice of Inspection Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

NOTICE OF VIOLATION AT: Loomis Armored Inc.
128 E. St. John St., San Jose

Dear Mr. Fitzgerald:

On July 14, 1992 the Health Department - Office of Toxics Enforcement conducted an inspection at the above mentioned facility. As a result of this inspection, violations of the hazardous waste statutes (Health & Safety Code) and/or regulations (Title 22 California Code of Regulations) were found.

Upon receipt of this letter, Loomis Armored Inc. must correct all deficiencies noted on the official inspection form by the dates stipulated. Acting as a representative for this facility, you signed the original form acknowledging receipt of a copy.

This office may conduct a reinspection of this facility to verify compliance. The issuance of this Notice of Violations does not preclude this department or any other agency having legal jurisdiction from taking administrative, civil, or criminal action as a result of the violations noted on the official inspection form.

If you have any questions regarding this notice, please contact Bill Grimes at (408) 299-6930.

Sincerely,

Bill Grimes

- 25189.5 Currently spent floor sweep/absorbant is disposed of to the municipal waste dumpster. This material must be collected, stored and disposed of as hazardous waste. Store in a closed, labeled container and keep records documenting proper disposal.

- 66262.12 All generators must have a facility specific EPA I.D #. Confirm this number by calling State DTSC at 916-324-1789 or 324-1790. To obtain a EPA I.D. # if the facility does not have one call 916-324-1781.

- 66262.34 All containers holding hazardous waste must be properly labeled and the labels completely filled out. Several 55-gallon drums of waste diesel, one 55 gallon drum of oil/water in exterior lot were unlabeled. Label properly immediately. Labels can be obtained from vendors or from commercial companies such as LabelMASTER 800-621-5808 or HCL Labels (local).

- 66265.173 All containers holding hazardous waste must be ~~Kept~~ closed/sealed at all times except when adding or removing waste. Waste oil tank and waste oil/water drum in exterior lot were open during site inspection.

- 66262.34 Label waste oil tank as "hazardous waste", "waste

Comments: (See marked violations on page 1)

66262.12(cont.) It is unlawful to offer my waste for disposal without first obtaining an EPA I.D. Number. Consult guidance in earlier reference 66262.12 to confirm EPA I.D. # prior to shipment. Include this # on all manifests/receipts.

Send a letter to this department within 30 days outlining the steps taken/changes made to correct the above violations. Address each item in some detail. Send evidence of training, EPA I.D. Number and photograph of waste oil tank and waste storage area showing proper labeling of all waste containers (or schedule reinspection if photo is a problem.). Dispose of oil/water drum in exterior lot and clean up discharge/spill to ground. Prevent recurrance of this problem in future. Call if questions or extension needed.

Failure to correct the violations and comply with compliance directives may result in penalty or prosecution under H&S Code Div 20 Chp 6.5 etal and CCR Title 22.

Please complete the following information :

Identify **all** waste streams generated by your facility. For each waste stream, identify the California Waste Code, annual quantities produced and the current method of disposal for all waste manifested off site (i.e. Recycle is (01), Incineration is (07), etc.). See the attached table for reference in selecting proper numerical codes for waste streams and disposal methods.

Two common examples are provided.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e., shouting)*; ☐ Other *(specify* _____

b. ☐ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

DRAFT

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the State Office of Emergency Services at 1-800-852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:
   a. Name, address, and telephone number of the facility's owner/operator;
   b. Name, address, and telephone number of the facility;
   c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
   d. Name and quantity of material(s) involved;
   e. The extent of injuries, if any;
   f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
   g. Estimated quantity and disposition of recovered material that resulted from the incident;
   h. Cause(es) of the incident;
   i. Actions taken in response to the incident;
   j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: **[19 CCR §2731(e)]** Identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.**

AIR TANK

7. Hazard Mitigation/Prevention/Abatement **[19 CCR §2731(e)]** Describe procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled.**

Training, Continuous Monitoring, Spill Containment using absorbants

Provide an Attachment if more space in needed to complete your answer.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☑	Internal alarm/notification *
☑	Evacuation/re-entry procedures & assembly point locations*
☑	Emergency incident reporting
☑	External emergency response organization notification
☑	Location(s) and contents of Emergency Response/Contingency Plan
☐	Facility evacuation drills, that are conducted at least *(specify)*: *(e.g., "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☑	Safe methods for handling and storage of hazardous materials *
☑	Location(s) and proper use of fire and spill control equipment
☑	Spill procedures/emergency procedures
☐	Proper use of personal protective equipment *
☐	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e., inhalation, ingestion, absorption)* *
☐	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

☐	Personnel rescue procedures
☐	Shutdown of operations
☐	Liaison with responding agencies
☐	Use, maintenance, and replacement of emergency response equipment
☐	Refresher training, which is provided at least annually *
☐	Emergency response drills, which are conducted at least *(specify)*: *(e.g., "Quarterly", etc.)*

Record Keeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☑	Current employees' training records *(to be retained until closure of the facility)* *
☑	Former employees' training records *(to be retained at least three years after termination of employment)* *
☑	Training Program(s) *(i.e., written description of introductory and continuing training)* *
☑	Current copy of this Emergency Response/Contingency Plan *
☑	Record of recordable/reportable hazardous material/waste releases *
☑	Record of hazardous material/waste storage area inspections *
☐	Record of hazardous waste tank daily inspections * N/A
☐	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *[Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at* **www.unidocs.org***), you do not need to attach a copy.]*

Check the appropriate box:

☑	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections. .
☐	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the California Emergency Management Agency at (800) 852-7550.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g., pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.
Note to medical facilities: Do not list medical (i.e,. red bag) wastes on this form.

Comments (See marked violations on page 1)

- 66262.11 Many shops are managing brake lining grindings as hazardous waste due to presence of asbestos in semi-metallic pads/shoes. A sample of dusts should be collected and submitted to a state certified lab for PLM Bulk Asbestos Analysis (i.e. Asbestest in Campbell, other listed under 'Asbestos' in phone book) Collect materials and do not dispose until test results known

- 66265.16 State law requires that all persons handling hazardous waste receive annual training in Hazardous Waste Management. Sources of this training include Foothill, Mission and City Colleges as well as private firms. Train appropriate personnel as soon as possible. Retain certificates for future inspections.

Send a letter to this department within 30 days outlining the steps taken or changes made to correct the above violations. Send analytical results of brake lining testing and a Xerox copy of any training documentation. Call if questions or extension needed.

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report.

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e g., manifests) must be maintained for at least 3 years from the date of shipment.

U040	M	**TRAINED EMPLOYEE NOT ONSITE** Facility failed to ensure that an employee with current UST training from the facility's Designated UST Operator was on-site during all operating hours. ***UST TRAINING DOCUMENTATION FOR THE CLERK (ANA LOPEZ) THAT WAS PRESENT DURING THE INSPECTION COULD NOT BE LOCATED.*** Ensure that at least one employee with current training is on-site at all times during operating hours [23 CCR 2715(f)(2)]	
U052	M	**RECORD KEEPING: MONITORING & MAINT RECORDS** Facility failed to retain UST monitoring and maintenance records on-site for the required length of time. ***NO MAINTENANCE COULD BE LOCATED DURING TODAY'S INSPECTION.*** ***CONTACT RAY MAIDEN AT 408-918-1980 TO SCHEDULE A RECORDS INSPECTION.*** If possible, obtain copies of any missing records. In the future, retain UST records onsite for a minimum of: 3 years for monitoring and maintenance records, 5 years for written performance claims and calibration/maintenance records pertaining to release detection systems, and 6½ years for cathodic protection maintenance records, when applicable. Monitoring records must include Monitoring System Certification forms, any other monitoring equipment calibration and maintenance records, results of required visual inspections, the date and time of all monitoring or sampling activities, and the results of all sample analyses performed in a laboratory or in the field, including lab data sheets and the anaytical method used. [23 CCR 2712(b)]	
U105	II	**TAMPERING WITH MONITORING EQUIPMENT** UST leak detection equipment was disabled or tampered with in a manner that prevented the system from detecting a leak or alerting the UST owner/operator to a leak. ***OBSERVED THAT THE VEEDER-ROOT SENSOR FOR THE WASTE OIL TANK DID NOT MATCH THE VEEDER-ROOT ID TAG ON THE SENSOR WIRE AND THAT THE AREA OF THE SENSOR WHERE THE WIRE ENTERS THE PROTECTIVE NETTING HAD ELECTRICAL TAPE ON IT. THE LAST THREE DIGITS ON THE VEEDER-ROOT MODEL NUMBER ON THE SENSOR WIRE WAS 420. THE SENSOR IN USE IS A VEEDER-ROOT 794390-409. THE 409 SENSOR HAS BEEN RE-WIRED USING A WIRE FROM A 420 SENSOR .*** Immediately cease disabling or tampering activities related to UST leak detection equipment. [HSC 25299(f)(2)]

VC	Class	Violation	Corrective Actions Taken
U170	II	**PIPE MONITORING: PRESSURIZED DW PIPING LLD** Double-wall underground pressurized piping is not equipped with a line leak detector (LLD) capable of detecting a 3 gallon-per-hour leak rate at 10 p s i. within 1 hour and restricting or shutting off flow of product through the piping when a leak is detected. ***PROGRAMMABLE LINE LEAK DETECTOR FOR 89-GRADE AND 87-GRADE FAILED TO DETECT A 3-GALLON PER HOUR LEAK RATE AT 10-PSI.*** Submit plans to, and apply for a permit from, HMCD to retrofit the UST system with an approved LLD for each underground pressurized piping run. [Note: For emergency generator tank systems (EGTS) only, you may qualify for exemption from installing LLDs provided that: 1) The leak detection system monitoring piping secondary containment has audible and visual alarms; and 2) You perform and document daily checks of the UST monitoring system, either by remote electronic access or on-site visual inspections.] Emergency Generator Tank System Monitoring System Daily Inspection Log form, plan submittal requirements, permit application forms, and the fee schedule are available at www.EHinfo.org/hazmat. U210	II	**TESTING OF MONITORING EQUIPMENT** UST owner/operator did not have UST monitoring equipment tested and certified by a qualified UST Service Technician every 12 months for operability, proper operating condition, and proper calibration. ***THE LAST MONITORING CERTIFICATION WAS COMPLETED BY JOHNSON TANK TESTING ON 6/12/2009.*** ***THE FACILITY MUST SCHEDULE THE ANNUAL MONITORING CERTIFICATION DURING THE MONTH OF JUNE EACH YEAR.*** Ensure that all UST system leak detection equipment (i.e., monitoring consoles, leak sensors, line leak detectors, etc.) is tested and certified every 12 months. Testing must be done by an International Code Council certified UST Service Technician with current training from the monitoring equipment manufacturer(s) as required by 23 CCR 2715(i). Ensure that future testing is scheduled to reestablish the original testing schedule for this facility. [23 CCR 2638(a)]	
U230	II	**TESTING OF SECONDARY CONTAINMENT** The facility failed to perform UST secondary containment testing as required. ***THE LAST SECONDARY CONTAINMENT WAS COMPLETED BY JOHNSON TANK TESTING ON 6/12/09.*** ***THE FACILITY MUST SCHEDULE THE SECONDARY CONTAINMENT CERTIFICATION DURING THE MONTH OF JUNE EVERY 36-MONTHS (3-YRS).*** If proper testing has not yet been completed, make arrangements to have the testing performed or redone within 30 days. Notify HMCD at least two working days prior to testing. Testing must be performed within 6 month of installation and every 36 months thereafter by a licensed tank tester or a UST Service Technician meeting the requirements of 23 CCR 2715(i). UDC'S:
ALL UDC'S HAVE V/R 208 SENSORS WHICH WERE HYDROSTATICALLY TESTED WITH WATER TO CREATE POSITIVE SHUTDOWN AND AN AUDIBLE/VISUAL ALARM AT THE MONITORING PANEL; ALL PASSED.

PLLD:
ALL TURBINES ARE EQUIPPED WITH V/R PLLD.
Q1: 91-GRADE (V/R 8484)
Q2: 89-GRADE (V/R 8484)
Q3: 87-GRADE (V/R 8484)

OVERFILL:
VERIFIED FLAPPER VALVES INSTALLED ALL DROP TUBES.

ALL GASOLINE SPILL BUCKETS ARE SUMP MOUNTED AND WERE FILLED WITH 5-GALLONS OF WATER AND HYDROSTATICALLY TESTED FOR 1-HR WITH NO DROP IN LIQUID LEVEL.

TESTING OF THE WASTE OIL SPILL BUCKET WAS UNDERWAY WHEN I DEPARTED THE SITE.

ALL PLLD'S WERE TESTED TO SIMULATE A 3-GALLON PER HOUR AT 10-PSI LEAK WITH A VMI TESTER AT DISPENSER 5-6 FOR ALL GRADES. ONLY PLLD FOR THE 91-GRADE FUNCTIONED AS REQUIRED (POSITIVE SHUTDOWN & AUDIBLE/VISUAL ALARM AT THE MONITORING PANEL).

ALL ANNULAR SPACE SENSOR WERE TESTED USING WATER, WHICH ACTIVATED AN AUDIBLE AND VISUAL ALARM AT THE MONITORING PANEL.

ALL STP SUMP SENSORS WERE TESTED USING WATER AND CREATED A POSITIVE SHUT-DOWN CONDITION AND ALSO ACTIVATED AN AUDIBLE AND VISUAL ALARM AT THE MONITORING PANEL.

SENSOR-OUT CREATED A POSITIVE SHUT-DOWN CONDITION FOR ALL TURBINES AND CREATED AN ALARM CONDITION AT THE MONITORING PANEL.

FAILSAFE TEST CREATED A POSITIVE SHUT-DOWN CONDITION FOR ALL TURBINES.

ALL LIGHTS ON THE MONITORING PANEL WERE FUNCTIONAL.

THE UST MONITORING PLAN AND UST RESPONSE PLAN ON FILE WITH THIS OFFICE IS CURRENT.

PRIOR TO MY ARRIVAL THE SB989 TEST WAS UNDERWAY. OBSERVED THE FOLLOWING:

ANNULAR SPACE:
91-GRADE WAS UNDER 10.1-INCHES OF HG FOR 60-MINUTES WITH NO CHANGE IN VACUUM.
89-GRADE WAS UNDER 10-INCHES OF HG FOR 60-MINUTES WITH NO CHANGE IN VACUUM.
87-GRADE WAS UNDER 10-INCHES OF HG FOR 60-MINUTES WITH NO CHANGE IN VACUUM.

FUEL LINES:
91-GRADE WAS PRESSURIZED WITH NITROGEN TO 5.2-PSI FOR 60-MINUTES WITH NO LOSS IN PRESSURE.
89-GRADE WAS PRESSURIZED WITH NITROGEN TO 5.2-PSI FOR 60-MINUTES WITH NO LOSS IN PRESSURE.
87-GRADE WAS PRESSURIZED WITH NITROGEN TO 5-PSI FOR 60-MINUTES WITH NO LOSS IN PRESSURE.

STP SUMPS:
91-GRADE SUMP WAS FILLED WITH WATER TO SUBMERGE THE PRESSURIZED PIPING. THE SUMP WAS TESTED USING THE INCONN ACCELERATED TEST FOR 15-MINUTES WITH NO DROP IN LIQUID LEVEL.

MONITORING SYSTEMS CERTIFICATION

CHEVRON
147 E. Santa Clara St.
San Jose, CA 95113

DRAFT

YR 2012-2013

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. If more than one monitoring system control panel is installed at the facility, a separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date. Instructions are printed on the back of this page.

A. General Information

Facility Name: Chevron Bldg. No.:

Site Address: 147 E. Santa Clara St. City: San Jose Zip:

Facility Contact Person: Raj Contact Phone No.: ( )

Make/Model of Monitoring System: Veeder Root TLS-350 Date of Testing/Servicing: 12-4-12

B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

Tank ID: 87

- ☐ In-Tank Gauging Probe. Model:
- ☒ Annular Space or Vault Sensor. Model: -409
- ☒ Piping Sump / Trench Sensor(s). Model: -208
- ☐ Fill Sump Sensor(s). Model:

*If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

C. Certification

I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Site Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; *(check all that apply)*: ☒ **System set-up** ☒ **Alarm history report** Given to inspector

D. Results of Testing/Servicing

Software Version Installed: _____

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: -which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments:

F. In-Tank Gauging / SIR Equipment:

☒ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☒ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☒ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In Section H, below, describe how and when these deficiencies were or will be corrected.**

H. Comments: 87 +89 Electronic Line Leak Detection failed to detect a 3gph Leak - Due to excessive Air in Lines Need to replace Siphon Jet, purge + retest

91 PWD Passed testing

1-22-13 - replaced Siphon jets on 87+89 retested 3gph All pass

Secondary Containment Testing Report Form

This form is intended for use by contractors performing periodic testing of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed form, written test procedures, and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

Monitoring System Certification

D. Means of Leak Monitoring

Software Version Installed: V.6

Complete the following checklist:

☑ Yes	☐ No*	Is the audible alarm operational?
☑ Yes	☐ No*	Is the visual alarm operational?
☑ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☑ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☑ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
☑ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electronically disconnected? If yes, which sensors initiate positive shut-down? (Check all that apply) ☑ Sump/Trench Sensors; ☑ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☐ Yes; ☐ No.
☐ Yes	☐ No* ☑ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If no, at what percent of tank capacity does the alarm trigger? 90 %
☐ Yes*	☑ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☑ No	Was liquid found inside any secondary containment systems designed as dry systems? (Check all that apply) ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☑ Yes	☐ No*	Was monitoring system set up (e.g. proper tank diameter) and calibrated? Attach set up report, if available.
☑ Yes	☐ No*	Is all applicable equipment operational per manufacturer's specifications?

* In Section E below, describe how and when these deficiencies were or will be corrected.

F. In-Tank Gauging / SIR Equipment:

☑ Check this box if tank gauging is used only for inventory con
☐ Check this box if no tank gauging or SIR equipment is install

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

Re: Notice of Significant Violation and intent to Issue Underground Storage Tank Red Tag to Fourth & Santa Clara Chevron @ 147 E. Santa Clara St., San Jose, CA (Facility ID FA0268192; CERS ID 10345927).

Dear Mr. Natt:

Your station described above has been issued notices of violation on multiple occasions over the past several years due to the used oil underground storage tank (UST) lacking appropriate leak detection monitoring equipment, as required by Title 23 California Code of Regulations (23 CCR) §2632(c)(2)(A). In February of this year, we received an incomplete application to retrofit the used oil UST with approved interstitial monitoring. Despite repeated requests by Hazardous Materials Program staff to submit additional information, we have not received the information necessary to issue a plan approval letter. Due to the chronic and serious nature of this violation, we have determined that it meets the definition of a "significant violation", as described in 23 CCR §2717(a)(3).

Pursuant to California Health and Safety Code (HSC) §25292.3(b), you have seven (7) days from receipt of this notice to provide written documentation that the used oil UST is suitable for conversion to hydrostatic interstitial monitoring. Retrofitting of the UST shall be completed within thirty (30) days of plan approval. Failure to correct this violation to the satisfaction of the Hazardous Materials Program within the timeframes described above will result in the issuance of a UST Red Tag and a directive to empty the noncompliant UST within 48 hours, in accordance with HSC §25292.3(a).

Per California Health and Safety Code (HSC) §25299(a)(6), the operator of a UST system is liable for a civil penalty of not less than five hundred dollars ($500) or more than five thousand dollars ($5,000) for each UST, for each day of violation. Your timely response to this letter will be considered when determining whether additional formal enforcement action is necessary.

Please work with Senior Hazardous Materials Specialist Greg Breshears to promptly bring your station into compliance. He may be reached at (408) 918-1978 or Greg.Breshears@cep.sccgov.org. Should you wish to contact me directly, I can be reached at (408) 918-4795 of Jennifer.Kaahaaina@cep.sccgov.org.

Board of Supervisors: Mike Wasserman, Cindy Chavez, Dave Cortese, Susan Ellenberg, Joe Simitian
County Executive: Jeffrey V. Smith

Sincerely,

Jennifer Kaahaaina

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	Yes

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	Yes

Hazardous Waste

Is your facility a Hazardous Waste Generator?	Yes
Does your facility treat hazardous waste on-site?	No
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	No
Does your facility consolidate hazardous waste generated at a remote site?	No
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	No
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	No
Is your facility a Household Hazardous Waste (HHW) Collection site?	No

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	No
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	No
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	No

LETTER FROM CHIEF FINANCIAL OFFICER

I am the Chief Financial Officer for **GEORGE F. SAUNDERS ENTERPRISES INC**
(Business name, business address, and correspondence address of owner or operator)

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least **$5,000** (Dollar Amount) per occurrence and **$5,000** (Dollar Amount) annual aggregate coverage.

Underground storage tanks at the following facilities are assured by this letter:

147 E. SANTA CLARA ST. SAN JOSE CA 95113
(Name and address of EACH facility for which financial responsibility is being demonstrated)

1.	Amount of annual aggregate coverage being assured by this letter	$ **5,000.00**
2.	Total tangible assets	$ **450,000.00**
3.	Total liabilities	$ **85,000.00**
4.	Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1)	$ **365,000.00**

I hereby certify that the wording of this letter is identical to the wording specified in section 2808.1, subdivision (c)(1), chapter 18, division 3, title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.

RESPONSE PLAN – PAGE 1

(One form per facility)

TYPE OF ACTION ☒ 1. NEW PLAN ☐ 2. CHANGE OF INFORMATION R01.

I. FACILITY INFORMATION

FACILITY ID # *(Agency Use Only)* 4 3 – 0 0 0 – 2 6 8 1 9 2 1.

BUSINESS NAME (Same as FACILITY NAME) 3.

Fourth & Santa Clara Chevron

BUSINESS SITE ADDRESS 103.	BUSINESS SITE CITY 104.

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

RESPONSE PLAN – PAGE 2

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the California Emergency Management Agency at (800) 852-7550.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

OWNER/OPERATOR AGREEMENT

Owner Certification

George F. Saunders Enterprises Inc, as the owner of the underground storage tank systems located at **147 E. Santa Clara St. San Jose, CA 95113**, hereby certify that:

1. We have entered into a written agreement with the operator of the UST systems at the referenced location. This agreement is contained in our contract with the UST Operator.

2. The UST Operator at the referenced facility is responsible for and will perform all monitoring, record keeping, and reporting requirements for the UST systems as outlined in the documents listed below.

3. The UST Operator has been provided a copy of the Permit to Operate the UST systems at the facility.

4. The UST Operator has been provided a copy of the provisions of the Health and Safety Code, Chapter 6.7, January 2006.

5. The UST Operator has been provided a copy of the California Code of Regulations,
   Title 23 – Waters
   Division 3 – State Water Resources Control Board
   Chapter 16 – Underground Storage Tank Regulations, October 2005.

6. We understand that we are required to notify the City of San Jose, Hazardous Materials Division in writing, of any of operation within thirty (30) days of any such changes.

UST Owner: **GEORGE F. SAUNDERS ENTERPRISES INC.**

We hereby certify that the preceding monitoring plan for underground storage tank systems will be implemented at our service station located at 147 E. Santa Clara St. San Jose, CA 95113. To the best of our knowledge, all information contained herein is true and correct.

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☒ Yes*	☐ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

F. In-Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☒ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

DRAFT

This form certifies that the annual line leak detector tests were performed at the above referenced facility according to the equipment manufacturers procedures and limitations and the results as listed are to my knowledge true and correct.The mechanical/electronic line leak detector test pass/fail is determined using a low flow rate threshold trip rate of 3 gph at 10psi.

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California
Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

C. Certification

- I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; *(check all that apply)*: ☐ **System set-up** ☒ **Alarm history report**

Technician Name (print): **Jeff Conger** Signature: 

Certification No.: **A22219** License. No.: **ICC 1801782**

Testing Company Name: **Pinnacle Fuel Compliance Services, Inc.** Phone No.: **(408) 206-9840**

Testing Company Address: **P.O. Box 32849 San Jose, CA 95152-2849** Date of Testing/Servicing: **6/29/2016**

D. Results of Testing/Servicing

Software Version Installed: **329.01**

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments: UST TANKS ARE DOUBLE WALLED WITH MECHANICAL OVERFILL DROPTUBES.

F. In-Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☒ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California
Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments:

Fuel Tanks are double wall with mechanical overfill device.

F. In-Tank Gauging / SIR Equipment:

☒ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☒ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California
Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

E. Comments: UST TANKS ARE DOUBLE WALLED WITH MECHANICAL OVERFILL DROPTUBES. Note that the Supreme annular sensor could not be returned to the bottom of annular space due to no pull string/rope/wire. The Regular annular sensor is stuck near top of annular space and could not be moved in either direction. Both the Regular and Supreme annular sensors were in alarm upon departure. Need to make repairs on both sensors to return them to the bottom of annulars, as result until then the Monitor is NOT certified operational.

Secondary Containment Testing Report

This form is intended for use by inspection staff performing testing during installation of UST secondary containment systems. Use the appropriate pages of this form to report results for all components tested. The completed forms, written test procedures, and printouts from tests (if applicable), shall be used in evaluating the installation of new equipment and repairs to existing equipment.

To: Interested Parties

(This letter supersedes our August 12, 2010 correspondence on the same subject.)

Until such time the State Water Resources Control Board (State Water Board) Staff revise Local Guidance (LG) Letter 113, this letter serves as interim documentation for use of the following sensors.

Veeder Root 794380-344 and 794390-420 Sensors

State Water Board Staff has reviewed the *Evaluation of the Veeder-Root MicroSensor and Tank Interstitial Sensors 794380-344 and 794390-420 Sensors for use with the TLS 450 Series*[1], *TLS-350 Series, TLS-300 Series, EMC Series, EMC Basic, Red Jacket ProMax and Red Jacket ProPlus Final Report* dated August 5, 2010 prepared by Mr. Ken Wilcox. This report documents the evaluation of the 794380-344 and 794390-420 sensors tested for use with waste oil. In this report Mr. Wilcox certifies that the 794380-344 and 794390-420 liquid level sensors were tested under conditions according to Veeder Root's instructions and that the evaluation was performed using methods described in the Alternative Environmental Protection Agency Test Procedures for Liquid Level Sensors. Based on Mr. Wilcox's certification that the sensors were evaluated in accordance with an acceptable leak detection test method protocol and that the sensors meet the Environmental Protection Agency performance standards the 794380-344 and 794390-420 sensors are eligible for use in the detection of liquid leaks for waste oil underground storage tank (UST) systems.

Detector type, comments, and any specific limitations noted in the current LG 113 listing for these sensors still apply, and can be found at http://www.waterboards.ca.gov/water_issues/programs/ust/leak_prevention/lg113/.

Veeder Root 794390-420, 794380-430, 794380-345, 794380-208, 794380-323, and 794380-344 Sensors

State Water Board Staff has reviewed the documentation provided by Mr. Wilcox regarding the 794390-420, 794380-430, 794380-345, 794380-208, 794380-323, and

[1] Please note the TLS-450 is not yet available for use in California.

794380-344 sensors. Mr. Wilcox attests that these interstitial sensors will function properly in containment areas other than tank interstitial spaces, such as containment sumps and other contained enclosures. Based on Mr. Wilcox's findings the 794390-420, 794380-430, 794380-345, 794380-208, 794380-323, and 794380-344 sensors are eligible for use in containment sumps and contained enclosures; however these sensors are to be installed at the lowest point of the containment to ensure early detection and may not be modified in the field in anyway.

Detector type, comments, and any specific limitations noted in the current LG 113 listing for these sensors still apply, and can be found at http://www.waterboards.ca.gov/water_issues/programs/ust/leak_prevention/lg113/.

If you have questions regarding this letter please contact me at (916) 341-5870 or lfisher@waterboards.ca.gov.

Sincerely,

Laura S. Fisher, Chief
Underground Storage Tank Technical Unit

Comments:

Sensors are reusable.
208 and 209 sensors are also compatible with 300 series.
*Evaluations determined these sensors' responses to the liquids shown above. Biodiesel blends B6-B20 meeting ASTM D7467 and biodiesel B100 meeting ASTM D6751 would also produce an alarm if the sensor threshold is exceeded. Responses to these fuels were not determined, but

would be expected to be very similar to the diesel responses.
Comparison of TLS-450 with TLS-350 series console showed comparable results when evaluated with representative sensors.
This sensor is identified as an interstitial sensor, but will function properly in other containment areas such as containment sumps, contained risers and other contained enclosures. This sensor must be installed at the lowest point of the containment enclosure to insure early detection of liquids. **Evaluations determined that the 794380-208 sensor responds to 100% Lubrizol Ultrazol 9888. Alarm and response can be expected to be very similar to the response values listed above.
***Micro Sensor 794380-340 is not supported by TLS 450 series console.

***** This sensor is identified as an interstitial sensor, but will function properly in other containment areas such as containment sumps, contained risers and other contained enclosures. This sensor must be installed at the lowest point of the containment enclosure to insure early detection of liquids.

Specificity Results (in addition to above):
Activated: diesel, heating oil #2, water.
Evaluations determined these sensors' responses to the liquids shown above and those indicated in the following section. Biodiesel blends B6-B20 meeting ASTM D7467 and biodiesel B100 meeting ASTM D6751 would also produce an alarm if the sensor threshold is exceeded. Specificity Results:
Evaluator claims both 794380-343 and 794380-344sensors will respond in any liquid after the sensor threshold is exceeded.
Sensor 794380-343 is designed to discriminate between product and water. Separate alarms are designed to be triggered for product and water.

Manufacturer's Specifications:
Sensors 794380-343 and 794380-344 can be removed, cleaned, and reinstalled, for periodic testing, if an alarm is triggered or if service is necessary.
Sensor 794380-343 has no moving parts.
Sensor 794380-344 is designed for use in contained risers and the interstitial space of double-wall steel tanks. When product or an open sensor (referred to as “Sensor Out”) is detected, an audible alarm is actuated, a message is displayed on the TLS-350 or TLS-350R console, and a printed message is generated if the console is equipped with a printer. The alarms are also recorded as part of the TLS-350 or TLS-350R “Alarm History Report”.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e., shouting)*; ☐ Other *(specify* _____

b. ☐ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

DRAFT

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the State Office of Emergency Services at 1-800-852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:
   a. Name, address, and telephone number of the facility's owner/operator;
   b. Name, address, and telephone number of the facility;
   c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
   d. Name and quantity of material(s) involved;
   e. The extent of injuries, if any;
   f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
   g. Estimated quantity and disposition of recovered material that resulted from the incident;
   h. Cause(es) of the incident;
   i. Actions taken in response to the incident;
   j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)] Identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.**

AIR TANK

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(e)] Describe procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled.**

Training, Continuous Monitoring, Spill Containment using absorbants

***Provide an Attachment if more space in needed to complete your answer.*

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☑	Internal alarm/notification *
☑	Evacuation/re-entry procedures & assembly point locations*
☑	Emergency incident reporting
☑	External emergency response organization notification
☑	Location(s) and contents of Emergency Response/Contingency Plan
☐	Facility evacuation drills, that are conducted at least *(specify)*: *(e.g., "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☑	Safe methods for handling and storage of hazardous materials *
☑	Location(s) and proper use of fire and spill control equipment
☑	Spill procedures/emergency procedures
☐	Proper use of personal protective equipment *
☐	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e., inhalation, ingestion, absorption)* *
☐	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

☐	Personnel rescue procedures
☐	Shutdown of operations
☐	Liaison with responding agencies
☐	Use, maintenance, and replacement of emergency response equipment
☐	Refresher training, which is provided at least annually *
☐	Emergency response drills, which are conducted at least *(specify)*: *(e.g., "Quarterly", etc.)*

Record Keeping

(Hazardous Materials Business Plan Module) Page _____ of _____

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☑	Current employees' training records *(to be retained until closure of the facility)* *
☑	Former employees' training records *(to be retained at least three years after termination of employment)* *
☑	Training Program(s) *(i.e., written description of introductory and continuing training)* *
☑	Current copy of this Emergency Response/Contingency Plan *
☑	Record of recordable/reportable hazardous material/waste releases *
☑	Record of hazardous material/waste storage area inspections *
☐	Record of hazardous waste tank daily inspections * N/A
☐	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *[Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at* **www.unidocs.org***), you do not need to attach a copy.]*

Check the appropriate box:

☑	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections. .
☐	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

ALL ANNULAR SPACE SENSOR WERE TESTED USING WATER, WHICH ACTIVATED AN AUDIBLE AND VISUAL ALARM AT THE MONITORING PANEL.

ALL STP SUMP SENSORS WERE TESTED USING WATER AND CREATED A POSITIVE SHUT-DOWN CONDITION AND ALSO ACTIVATED AN AUDIBLE AND VISUAL ALARM AT THE MONITORING PANEL.

SENSOR-OUT CREATED A POSITIVE SHUT-DOWN CONDITION FOR ALL TURBINES AND CREATED AN ALARM CONDITION AT THE MONITORING PANEL.

FAILSAFE TEST CREATED A POSITIVE SHUT-DOWN CONDITION FOR ALL TURBINES.

ALL LIGHTS ON THE MONITORING PANEL WERE FUNCTIONAL.

THE UST MONITORING PLAN AND UST RESPONSE PLAN ON FILE WITH THIS OFFICE IS CURRENT.

PRIOR TO MY ARRIVAL THE SB989 TEST WAS UNDERWAY. OBSERVED THE FOLLOWING:

ANNULAR SPACE:
91-GRADE WAS UNDER 10.1-INCHES OF HG FOR 60-MINUTES WITH NO CHANGE IN VACUUM.
89-GRADE WAS UNDER 10-INCHES OF HG FOR 60-MINUTES WITH NO CHANGE IN VACUUM.
87-GRADE WAS UNDER 10-INCHES OF HG FOR 60-MINUTES WITH NO CHANGE IN VACUUM.

FUEL LINES:
91-GRADE WAS PRESSURIZED WITH NITROGEN TO 5.2-PSI FOR 60-MINUTES WITH NO LOSS IN PRESSURE.
89-GRADE WAS PRESSURIZED WITH NITROGEN TO 5.2-PSI FOR 60-MINUTES WITH NO LOSS IN PRESSURE.
87-GRADE WAS PRESSURIZED WITH NITROGEN TO 5-PSI FOR 60-MINUTES WITH NO LOSS IN PRESSURE.

STP SUMPS:
91-GRADE SUMP WAS FILLED WITH WATER TO SUBMERGE THE PRESSURIZED PIPING. THE SUMP WAS TESTED USING THE INCONN ACCELERATED TEST FOR 15-MINUTES WITH NO DROP IN LIQUID LEVEL.

Comments: On-site today to oversee annual monitoring certification and spill bucket testing. Technician Jeff Conger from Pinnacle Fuel Compliance Service performed the testing and has valid ICC, Veeder-Root, and VMI testing certifications.

Site consists of:
1x10,000 gal 87 Gasoline
1x10,000 gal 91 Gasoline
1x10,000 gal Diesel

Facility recently switched (approximately 4 months ago) from 89 to diesel.
Tested annular space sensors (Veeder Root 409) of all gasoline and diesel tanks. Annular space of the used oil tank is currently monitored by a Veeder-Root 407 sensor. All sensors were tested in water and performed as designed.
STP sump sensors (Veeder-Root 208) were tested in water and performed as designed. Positive shutdown of turbines was observed.
UDCs are monitored by a Veeder-Root 208 sensors. Sensors were tested in water and positive shutdown of turbines was observed.
Fail Safe and sensor out was performed shutting down all turbines.
Overfill prevention is provided by flapper valves in automotive fuel tanks.
Spill buckets for the 3 automotive fuel tanks and the used oil tank were hydrostatically tested for a minimum of 1 hour. No drop of liquid level was observed.
Electronic Line Leak Detectors detected a simulated leak of 3 gal/hr at 10 psi.

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Inspection Type: UST SECONDARY CONTAINMENT TESTING

Comments / Observations

The SB-989 Secondary Containment Testing was performed by Tony Fontana, ICC UST Service technician #1064273, exp. date = 5/29/16; Incon Tester # 1718713702, exp. date = 2/21/18

The following components were completed during the inspection:

3 Tank annulars (87, 91, diesel) tested at 10 inches of mercury for one hour. Test result = pass.

3 secondary product piping runs (87, 91, diesel) tested at 5 psi for hour. Test results = pass.

3 STP sumps (87,91 diesel) were tested hydrostatically using the INCON accelerated test method. Test results = pass.

1 UDC sump (1/2) was tested hydrostatically using the INCON accelerated test method. Test results = pass.

The waste oil tank was under test at 10 inches of mercury for one hour and holding at the completion of the inspection.

The UDC sump 3/4 was under test and passing at the completion of the inspection.

The following components shall be tested on this date: 2 UDC sumps (5/6, 7/8).

Send the secondary containment testing results to our office within 30 days.

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Comments: FUNCTIONAL TESTING OF THE UST SYSTEM TOOK PLACE ON 06/30/17 AND INSPECTION REPORT WAS ISSUED TODAY VIA E-MAIL TO THE OWNER. TESTING WAS CONDUCTED BY ANEIL CHAND WITH PINNACLE FUELS. MR. CHAND HAS CURRENT ICC AND VEEDER ROOT CERTIFICATIONS.

PRIOR TO AND AFTER COMPLETION OF TESTING THERE WERE NO ACTIVE ALARMS AT THE VEEDER ROOT PANEL.

THE FOLLOWING COMPONENTS WERE TESTED DURING THIS INSPECTION AND PASSED;
- 3 STP SENSORS PROVIDED A POSITIVE SHUT-DOWN CONDITION AT THE TURBINE.
- 4 ANNULAR SENSORS PROVIDED AN AUDIBLE/VISUAL ALARM AT THE PANEL (INCLUDING USED OIL TANK).
- 4 SPILL BUCKETS WERE HYDROSTATICALLY TESTED FOR 60 MINUTES AND PASSED (INCLUDING USED OIL TANK).
- 3 PLLD'S WERE TESTED AND PROVIDED A SHUT-DOWN CONDITION AT THE TURBINE AND AN AUDIBLE/VISUAL ALARM AT THE PANEL.
- FAILSAFE AND SENSOR OUT WERE VERIFIED DURING THIS INSPECTION.
- 4 UDC SENSORS WERE TESTED AND PROVIDED A POSITIVE-SHUT DOWN CONDITION AT THE TURBINE.
- OVERFILL PREVENTION IN ALL 3 FUEL TANKS IS PROVIDED BY MECHANICAL FLAPPER VALVES.

THE FOLLOWING DOCUMENTS WERE REVIEWED DURING THIS INSPECTION;
- DO MONTHLY RECORDS
- EMPLOYEE TRAINING RECORDS

NOTES:
1) THE LAST CERS SUBMITTAL WAS DONE VIA CERS# 10345927 ON 06/26/15. THIS WAS REVIEWED BY JONATHAN BLAZO FROM OUR DEPARTMENT.

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716 or via e-mail to the inspector noted on the "Inspected By" line of the report.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

T570	II	**OVERFILL PREVENTION NOT INSTALLED / FUNCTIONAL [2030036]** One or more underground storage tank (UST) fill openings is either not equipped with approved overfill prevention equipment or the overfill prevention equipment installed is non-functional. ***The technician found about 4 inches of used oil inside the overfill prevention riser during this inspection. There were no alarms to demonstrate that the used oil tank had overfill. At this time the used oil tank is not equipped with an approved/functional overfill prevention equipment. Within 30 days conduct the required testing for the overfill prevention for this tank and provide to our office in writing how this issue will be resolved.*** Have a qualified UST Service Technician repair or replace any non-compliant overfill prevention equipment. No permit is required from HMCD for replacement of light bulbs or like-for-like replacement of outdoor audible and visual alarm units or automatic tank gauge probes. For installation of other overfill prevention equipment, you must obtain a UST retrofit permit from HMCD before beginning work. Plans must be submitted in accordance with HMCD's "Plan Submittal Requirements for Hazardous Materials Systems" (HMCD-004) available at www.EHinfo.org/hazmat. Upon plan check approval, have the work done as soon as possible and schedule an inspection for HMCD to witness installation/repair inspection and testing of the overfill prevention equipment. Submit a copy of the State required "Underground Storage Tank Overfill Prevention Equipment Inspection Report Form" within 30 days of the inspection. Each UST fill opening must be equipped with an approved overfill prevention system which can not allow manual override and must either: 1) Alert the transfer operator when the UST is 90% full by restricting the flow into the UST or triggering an audible and visual alarm; or 2) Restrict flow to the UST at least 30 minutes before tank overfill, provided that the restriction occurs at no more than 95% of tank capacity and triggers an audible alarm at least 5 minutes before tank overfill; or 3) Provide positive shut-off of flow to the UST when the tank is no more than 95% full; or 4) Provide positive shut-off of flow to the UST so that none of the fittings on the top of the tank are exposed to product due to overfilling. On and after 10/1/2018, the installation, repair, or replacement of flow restrictors (ball floats) on vent piping to meet overfill prevention equipment requirements is not allowed. Flow restrictors installed before 10/1/2018 may remain in place and serve as overfill prevention provided they do not interfere with the proper function of other installed overfill prevention equipment. [23 CCR 2635(c)(1), 2635(d), 2665] [Exception: Per 23 CCR 2635(c)(2), tanks may be exempted from overfill prevention provided that the tank fill inlet is located in an observable area, the spill container is adequate to collect any overfill, and the tank system is filled by transfers of no more than 25 gallons at one time.]

Comments: Functional testing of the equipment took place on 07/19/19 and inspection report was issued today. Testing was conducted by Aneil Chand with Pinnacle Fuels. Mr. Chand has the following certifications; ICC#5119959 exp., 06/02/2020; VR#A21873 exp., 03/01/2020; VMI#2307 exp., 02/28/2020.

Prior to and after testing there were no active alarms at the veeder root panel.

The following components were tested and passed during this inspection;
- 3 STP sump sensors provided a positive shut-down condition at the turbine.
- 1 Vapor pot sump sensor provided a positive shut-down condition at the turbine.
- 4 UDC sump sensors provided a positive shut-down condition at the turbine.
- 4 annular sensors provided an audible/visual alarm at the veeder root panel.
- 1 overfill sensor for the used oil tank provided an audible/visual alarm at the veeder root panel.
- 3 PLLD's were tested and provided a shut-down condition of fuel at the dispenser when a 3.0 g.p.h leak at 10 p.s.i was detected.
- Failsafe and sensor out were verified during this inspection.

The following documents were reviewed during this inspection;
- 12 months of DO records
- List of Employees Trained by DO.
- UST information currently found on CERS as of 12/20/2018 and was reviewed as part of this inspection.

Within 30 days provide to our office the following;
1) Copies of today's testing report for all the components tested during this inspection.

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716 or via e-mail to the inspector noted on the "Inspected By" line of the report.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

T110	M	**THIRD-PARTY APPROVAL OF UST LEAK DETECTION EQUIPMENT / METHODS [2030015]** Underground storage tank (UST) owner/operator failed to demonstrate to HMCD that the equipment and methods used to monitor a UST system are certified by an independent third-party as complying with the performance standards specified in California UST Regulations as required by 23 CCR 2643(f). ***Used oil tank annular space is currently monitored by a Veeder-Root 407 sensor. This sensor is not approved for use in a used oil tank. Replace with an approved sensor (eg. Veeder-Root 344 optical sensor).*** Within 30 days, either submit documentation to HMCD demonstrating that the monitoring equipment is third-party approved for use as installed at this facility or apply for a permit to replace the non-compliant equipment with approved monitoring equipment (i.e., equipment listed in Local Guidance Letter LG-113 at www.waterboards.ca.gov/water_issues/programs/ust/leak_prevention/index.shtml). Sensors and monitoring consoles must be approved for use with each other (i.e., you cannot mix and match components from different manufacturers). A retrofit permit from HMCD is required prior to modifying, replacing, or installing monitoring equipment. Refer to the "Plan Submittal Requirements for Hazardous Materials Systems" guidance document (HMCD-004), available at www.EHinfo.org/hazmat. [23 CCR 2630(d), 2643, 2644.1(a)(2)]	→ In process with our contractor Pinnacle Fuel Systems. → Need to work with county dept to ask for further investigation.

Comments: On-site today to oversee annual monitoring certification and spill bucket testing. Technician Jeff Conger from Pinnacle Fuel Compliance Service performed the testing and has valid ICC, Veeder-Root, and VMI testing certifications.

Site consists of:
1x10,000 gal 87 Gasoline
1x10,000 gal 91 Gasoline
1x10,000 gal Diesel

Facility recently switched (approximately 4 months ago) from 89 to diesel.
Tested annular space sensors (Veeder Root 409) of all gasoline and diesel tanks. Annular space of the used oil tank is currently monitored by a Veeder-Root 407 sensor. All sensors were tested in water and performed as designed.
STP sump sensors (Veeder-Root 208) were tested in water and performed as designed. Positive shutdown of turbines was observed.
UDCs are monitored by a Veeder-Root 208 sensors. Sensors were tested in water and positive shutdown of turbines was observed.
Fail Safe and sensor out was performed shutting down all turbines.
Overfill prevention is provided by flapper valves in automotive fuel tanks.
Spill buckets for the 3 automotive fuel tanks and the used oil tank were hydrostatically tested for a minimum of 1 hour. No drop of liquid level was observed.
Electronic Line Leak Detectors detected a simulated leak of 3 gal/hr at 10 psi.

Summary of Violations & Notice to Comply

Program: PR0398112 - UNDERGROUND STORAGE TANK - 2399
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
T060	M	**RECORD KEEPING: GENERAL [2010]** Underground storage tank (UST) records are not maintained in sufficient detail to enable HMCD to determine whether the UST systems are in compliance. ***Fuel alarm for L15 Dispenser 7-8 occurred on 10-16-15 however there is only acknowledgment of alarm without resolution. DO indicates that another contractor was hired to address the alarm but failed to leave documentation as to how it was addressed. Keep records in sufficient detail to indicate how an alarm was addressed.*** Keep records of UST monitoring, testing, repairs, and closure in sufficient detail to enable HMCD to determine whether the UST systems are in compliance with applicable provisions of California UST law/regulations and your UST Permit to Operate. [HSC 25293]	Understood, will keep records in future.
T110	II	**THIRD-PARTY APPROVAL OF UST LEAK DETECTION EQUIPMENT / METHODS [2030015]** Underground storage tank (UST) owner/operator failed to demonstrate to HMCD that the equipment and methods used to monitor a UST system are certified by an independent third-party as complying with the performance standards specified in California UST Regulations as required by 23 CCR 2643(f). ***Annular space for waste oil tank is currently monitored by a Veeder-Root 407 sensor that is not approved for use with used oil. Replace with a sensor compatible for used oil (eg. Veeder-Root 344 microsensor) or, if manufacturer allows, convert the dry annular to a hydrostatically monitored space. REPEAT VIOLATION FROM 6-26-15 INSPECTION.*** Within 30 days, either submit documentation to HMCD demonstrating that the monitoring equipment is third-party approved for use as installed at this facility or apply for a permit to replace the non-compliant equipment with approved monitoring equipment (i.e., equipment listed in Local Guidance Letter LG-113 at www.waterboards.ca.gov/water_issues/programs/ust/leak_prevention/index.shtml). Sensors and monitoring consoles must be approved for use with each other (i.e., you cannot mix and match components from different manufacturers). A retrofit permit from HMCD is required prior to modifying, replacing, or installing monitoring equipment. Refer to the "Plan Submittal Requirements for Hazardous Materials Systems" guidance document (HMCD-004), available at www.EHinfo.org/hazmat. [23 CCR 2630(d), 2643, 2644.1(a)(2)]	→ Working under guidance of Aniel Chand, Pinnacle Fuel System. → Aniel is apprising county about using existing monitoring, as mandated by State Enviro laws

T900	II	**RESPONSE TO NOTICE OF VIOLATION [2010]** Underground storage tank (UST) permit holder failed to implement corrective actions within 30 calendar days of receiving an Official Notice of Inspection (Notice to Comply) from HMCD citing violations of UST law or regulations. ***Facility failed to respond to the official Notice of Inspection issued on 6-26-2015.*** Correct all outstanding violations. Submit to HMCD the previous Official Notice(s) of Inspection with the "Corrective Actions Taken" column and "Certification of Compliance" signature section completed. If any violation has not yet been corrected, describe the corrective actions that will be taken and provide a specific date by which those actions will be completed. [23 CCR 2712(f)]	— N/A —

Comments: On-site to witness annual monitoring certification, spill bucket testing, and to perform an inspection of the underground storage tank(UST) system. Testing is performed by Jeff Conger with Pinnacle Fuel Compliance. Mr. Conger has all required certifications to perform testing.

Monitoring system performed as required with exception of the used oil tank which does not have an approved sensor for monitoring used oil leaks. See violation.

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
T120	II	**MONITORING: DETECTION AT EARLIEST OPPORTUNITY [2060015 RD]** Underground storage tank (UST) monitoring equipment and procedures are not capable of detecting a leak from all portions of the UST system at the earliest possible opportunity (i.e., equipment is installed and functional, but not able to quickly detect a leak due to improper placement of a leak sensor or other factor). ***OBSERVED 3- VR#208 SENSORS INSIDE THREE OF THE STP SUMPS FOR TANKS FOR 87, 91, AND DIESEL, WHERE THE SENSOR WAS NOT PLACED IN AN UPRIGHT POSITION BUT RATHER AT AN ANGLE (PHOTOGRAPHS WERE TAKEN). ALL SENSORS ARE LOCATED INSIDE A PVC SLEEVE. ENSURE THAT THE SLEEVE WITH THE SENSOR INSIDE IT'S REPOSITION TO AN UPRIGHT POSITION. THIS IS TO ENSURE THAT THE SENSOR IT'S ABLE TO DETECT A LEAK AT AN EARLIEST OPPORTUNITY. PROVIDE TO OUR OFFICE IN WRITING HOW THIS ISSUE WAS RESOLVED.*** Monitoring equipment and/or procedures must be capable of detecting a leak from all portions of the UST system at the earliest possible opportunity. Liquid sensors must be located at the low point of the secondary containment system they monitor. Valve stems on piping secondary containment test boots must be open and pointed downward (between the 3:00 and 9:00 position) if the test boots are not pulled back from the secondary piping. [23 CCR 2630(d), 2641(a)]	→ has been in contact with our contractor → he will repair and make sensors upright
T220	II	**TANK MONITORING: INTERSTITIAL MONITORING NON-FUNCTIONAL (TANK INSTALLED 1/2/84-6/30/04) [2030016 RD]** Leak detection equipment monitoring the annular space of an Underground storage tank (UST) installed between 1/2/1984 and 6/30/2004 failed to function properly when tested or is otherwise non-functional. ***THE USED OIL ANNULAR SENSOR CURRENTLY FOUND INSIDE THE USED OIL TANK IS NOT THE APPROVED SENSOR TO BE USE FOR USED OIL. THIS IS A REPEAT VIOLATION FROM LAST YEAR. PROVIDE TO OUR OFFICE IN WRITING HOW THIS ISSUE WAS RESOLVED.*** UST annular spaces must be continuously monitored. Have a qualified UST Service Technician replace the non-functional leak detection equipment as soon as possible and submit documentation of the repair and startup testing results with your written response to this Notice to Comply. No permit is required from HMCD for like-for-like replacement (same manufacturer and model number) of sensors. If sensor replacement will not be like-for-like, or if the monitoring system console must be replaced, apply for a UST retrofit/repair permit from HMCD. Plans must be submitted in accordance with HMCD's "Plan Submittal Requirements for Hazardous Materials Systems" (HMCD-004) available at www.EHinfo.org/hazmat. Upon plan check approval, have the work done per the approved plans as soon as possible and schedule an inspection so HMCD can witness functional testing of the monitoring equipment. [23 CCR 2631(g)]	→ Finding resolution to this problem. → Facility is thinking about shutting the garage and subsequently then will be no need of waste oil tank. → Will update county accordingly

Comments: FUNCTIONAL TESTING OF THE UST SYSTEM TOOK PLACE ON 06/30/17 AND INSPECTION REPORT WAS ISSUED TODAY VIA E-MAIL TO THE OWNER. TESTING WAS CONDUCTED BY ANEIL CHAND WITH PINNACLE FUELS. MR. CHAND HAS CURRENT ICC AND VEEDER ROOT CERTIFICATIONS.

PRIOR TO AND AFTER COMPLETION OF TESTING THERE WERE NO ACTIVE ALARMS AT THE VEEDER ROOT PANEL.

THE FOLLOWING COMPONENTS WERE TESTED DURING THIS INSPECTION AND PASSED;
- 3 STP SENSORS PROVIDED A POSITIVE SHUT-DOWN CONDITION AT THE TURBINE.
- 4 ANNULAR SENSORS PROVIDED AN AUDIBLE/VISUAL ALARM AT THE PANEL (INCLUDING USED OIL TANK).
- 4 SPILL BUCKETS WERE HYDROSTATICALLY TESTED FOR 60 MINUTES AND PASSED (INCLUDING USED OIL TANK).
- 3 PLLD'S WERE TESTED AND PROVIDED A SHUT-DOWN CONDITION AT THE TURBINE AND AN AUDIBLE/VISUAL ALARM AT THE PANEL.
- FAILSAFE AND SENSOR OUT WERE VERIFIED DURING THIS INSPECTION.
- 4 UDC SENSORS WERE TESTED AND PROVIDED A POSITIVE-SHUT DOWN CONDITION AT THE TURBINE.
- OVERFILL PREVENTION IN ALL 3 FUEL TANKS IS PROVIDED BY MECHANICAL FLAPPER VALVES.

THE FOLLOWING DOCUMENTS WERE REVIEWED DURING THIS INSPECTION;
- DO MONTHLY RECORDS
- EMPLOYEE TRAINING RECORDS

NOTES:
1) THE LAST CERS SUBMITTAL WAS DONE VIA CERS# 10345927 ON 06/26/15. THIS WAS REVIEWED BY JONATHAN BLAZO FROM OUR DEPARTMENT.
2 OBSERVED A SMALL AMOUNT OF WATER INSIDE THE DIESEL STP SUMP. THIS WAS REMOVED BY THE TECHNICIAN DURING THIS INSPECTION.
3) WITHIN 30 DAYS PROVIDE A COPY OF TODAY'S TESTING (ANNUAL MONITORING SYSTEM CERTIFICATION).

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 08/03/2017, unless otherwise noted by the inspector.

T056	M	**RECORD KEEPING: MAINTENANCE RECORDS [2010008 RD]** Underground storage tank (UST) owner/operator failed to maintain UST maintenance records on-site in sufficient detail and/or for the required length of time. ***Facility failed to retain the annual monitoring certifications on-site for the following years: 2013, 2014, 2015, 2016, 2017. Ensure a copy is maintained on-site.*** If possible, obtain copies of any missing records. Keep records onsite for a minimum of: 3 years for maintenance records; and 5 years for written performance claims and calibration and maintenance records pertaining to release detection systems (i.e., Monitoring System Certification forms and required attachments such as system setup reports and alarm history reports; any other monitoring equipment calibration and maintenance records). [23 CCR 2712(b)]	The copies of UST Maintenance records are on site and will be available for inspection.
T061	M	**RECORD KEEPING: GENERAL [2010012]** Underground storage tank (UST) records are not maintained in sufficient detail to enable HMCD to determine whether the UST systems are in compliance. ***Monthly Designated Operator reports from the following dates failed to acknowledge or provide any information regarding the used oil tank:*** ***February 2018*** ***April 2018*** ***May 2018*** ***June 2018*** ***Ensure monthly inspections include the used oil tank.*** Keep records of UST monitoring, testing, repairs, and closure in sufficient detail to enable HMCD to determine whether the UST systems are in compliance with applicable provisions of California UST law/regulations and your UST Permit to Operate. [HSC 25293]	Our 'DO' has been instructed about the 'Oil tank', and he has noted the discrepancy. Starting July the proper records will be maintained per 'DO'.
T110	II	**THIRD-PARTY APPROVAL OF UST LEAK DETECTION EQUIPMENT / METHODS [2030015]** Underground storage tank (UST) owner/operator failed to demonstrate to HMCD that the equipment and methods used to monitor a UST system are certified by an independent third-party as complying with the performance standards specified in California UST Regulations as required by 23 CCR 2643(f). ***Used oil tank annular space is currently monitored by a Veeder-Root 407 sensor. This sensor is not approved for use in a used oil tank. Replace with a third party approved sensor.*** Within 30 days, either submit documentation to HMCD demonstrating that the monitoring equipment is third-party approved for use as installed at this facility or apply for a permit to replace the non-compliant equipment with approved monitoring equipment (i.e., equipment listed in Local Guidance Letter LG-113 at www.waterboards.ca.gov/water_issues/programs/ust/leak_prevention/index.shtml). Summary of Violations & Notice to Comply

Program: PR0398112 - UNDERGROUND STORAGE TANK - 2399
Inspection Type: UST SECONDARY CONTAINMENT TESTING

VC	Class	Violation	Corrective Actions Taken

Comments: On-site to witness triennial secondary containment testing performed by Aneil Chand with Pinnacle Fuel Compliance Services, Inc. Mr. Chand has all required certifications to perform testing (eg. tank tester, Caldwell).

The following components were tested:
Annular Spaces (87,91, Diesel) - tested at 10 inches hg of vacuum for 1 hour. PASS.
Sumps (87,91, Diesel) - hydrostatically tested for 30 minutes using Caldwell. PASS.
Piping (87, 91, Diesel) - pressure tested at 5 psi for 1 hour. PASS.
UDCs (1/2, 3/4) - hydrostatically tested for 30 minutes using Caldwell. PASS.

N/A

Components yet to be tested today:
Annular space (used oil) - To be tested at 10 inches hg of vacuum for 1 hour.
UDC (5/6, 7/8) - To be tested hydrostatically for 30 minutes using caldwell.

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
T020	II	**UST FINANCIAL RESPONSIBILITY [2010007]** Petroleum underground storage tank (UST) owner/operator failed to submit or keep current evidence of UST financial responsibility for taking corrective action and for compensating third parties for bodily injury and property damage caused by a release. ***Letter from the Chief Financial Officer (CFO) submitted in most recent electronic submission on 12-18-18 fails to follow the wording as required per 2808.1, subdivision (c)(1). Correct the regulatory reference in the letter from "section 2802.1, subdivision (d)(1)" to "section 2808.1, subdivision (c)(1)".*** ***Additionally, CFO Letter provided incomplete coverage per occurrence and indicated $500 instead of $5,000.*** ***CORRECTED AT TIME OF INSPECTION, NO FURTHER ACTION IS REQUIRED.*** Financial responsibility must be demonstrated by the UST owner or UST operator. Within 30 days, upload and electronically submit a UST Certification of Financial Responsibility (CFR) via the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. Keep a copy of the CFR and all required supporting documentation at this facility or at your place of business. If the State UST Cleanup Fund is used as a financial responsibility mechanism, update the chief financial officer (CFO) letter every 12 months, within 150 days after the close of each fiscal year. If a financial test of self-insurance, guarantee, or local government financial test is used, update the CFO letter every 12 months, within 120 days after the close of each fiscal year. If insurance is used, ensure that the policy or endorsement contains language meeting the requirements of 40 CFR 280.97. The "Certification of Financial Responsibility for Underground Storage Tanks Containing Petroleum" form (UN-049) and Petroleum UST Financial Responsibility Guide are available at www.EHinfo.org/hazmat. [HSC 25292.2(a), 25292.2, 25299.30-25299.34; 23 CCR 2711(a)(11), 2808.1, 2809-2809.2]	UPLOADED TO CERS SYSTEM & ACCEPTED BY HMCD
T901	II	**RESPONSE TO UST NOTICE OF VIOLATION [2030073]** Underground storage tank (UST) permit holder failed to implement corrective actions within 30 days of receiving an Official Notice of Inspection (Notice to Comply) from HMCD citing violations of UST law or regulations. ***Facility provided a written response to the most recent Notice of Violation issued 6-26-18 but failed to implement the corrective actions within 30 days as the following violations remain uncorrected:*** ***T110 Third-Party Approval of UST Leak Detection Equipment /Methods*** ***T901 Response to UST Notice of Violation (including corrections)*** Correct all outstanding violations. Submit to HMCD the previous Official Notice(s) of Inspection with the "Corrective Actions Taken" column and "Certification of Compliance" signature section completed. If any violation has not yet been corrected, describe the corrective actions that will be taken and provide a specific date by which those actions will be completed. [23 CCR 2712(f)]	→ Permit Application has been applied as of Feb 11th, 2019. → CONTRACTOR - PINNACLE FUEL will perform the conversion per permit

Comments:

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 01/19/2019, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. Program: SR0859591 - UNDERGROUND STORAGE TANK - 2314
Inspection Type: FINAL PERMIT ACTIVITY

Comments: Functional testing of the equipment took place on 07/19/19 and inspection report was issued today via e-mail. Testing was conducted by Aneil Chand with Pinnacle Fuels. Mr. Chand has the following certifications; ICC#5119959 exp., 06/02/2020; VR#A21873 exp., 03/01/2020; and VMI#2307 exp., 02/28/2020.

Observed the functional testing of the dual-point hydrostatic annular sensor for the used oil tank and it provided an audible/visual alarm at the veeder root panel.

Notes;
1) Within 30 days provide a copy of today's testing report.
2) Annular sensor installed was; Veeder Root Model #794380-301
3) Update your UST Monitoring Plan for the Used Oil Tank via CERS to reflect the change in the annular sensor.
4) This inspection closes out permit#SR0859591 with our Department.

Project Description: Convert Used Oil Underground Storage Tank Annular Space to Hydrostatic Monitoring.

DRAFT

Santa Clara County Hazardous Materials Program has reviewed the submittal for the project referenced above and **approves the plans with the following conditions**:

1. Systems shall be configured as described in the enclosed approved Hazardous Materials Construction Permit Application and Equipment List for Underground Storage Tank Systems.
2. Contact HMCD a minimum of 2 working days in advance to schedule an inspection to witness functional testing of the new annular sensor within 30 days.
3. The installation contractor shall follow the tank and monitoring equipment manufacturers' installation and testing requirements.
4. George F. Saunders Enterprises, Inc. shall revise the Used Oil tank's UST Monitoring Plan in the California Environmental Reporting System (CERS) within 30 days of conversion to hydrostatic monitoring.

Any substitution of equipment or reconfiguration of systems as described in approved plans requires prior approval from HMCD. Be advised that plan check approval by San Jose Building Department may also be required prior to beginning work. A copy of this letter and one set of approved plans shall remain on the job site until final construction inspection sign-off is received from HMCD.

Should you have any questions, contact the undersigned inspector at (408) 918-1978.

HAZARDOUS MATERIALS CONSTRUCTION PERMIT APPLICATION

For Aboveground Projects Within the Cities of Los Altos Hills, Monte Sereno, or Saratoga, or in Unincorporated Areas of Santa Clara County; and for Underground Storage Tank System Projects In Those Areas or Within the Cities of Los Altos, Morgan Hill, Palo Alto, or San Jose.*

I. General Information

HMCD plan review and approval for regulatory compliance is required before installing or modifying hazardous materials storage or handling systems. One completed copy of this form is required with each plan review submittal. When completing Section V, limit the description to work that directly involves or impacts hazardous materials storage or handling systems (e.g., backup power battery systems for communications sites; dry cleaning machines; fuel tanks, piping and dispensing systems; leak detection systems; etc.).

SETTING MONITORING FLUID LEVELS

1. INTRODUCTION

1.1. Follow the Supplemental Instructions as well as all instructions covered in the most recent edition of Containment Solutions , Inc. (CSI) Tank Installation Instructions (Pub. No. INST 6001).

2. ASSEMBLY

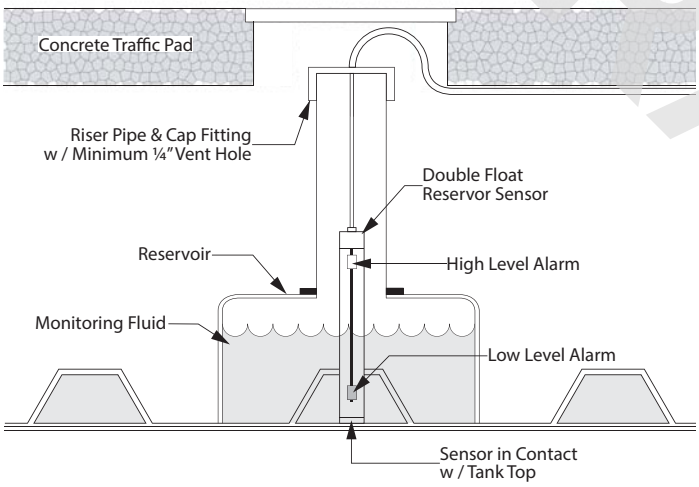
2.1. The float sensor must sit on top of the tank wall. Do not hang the sensor in the reservoir or the standpipe such that it is suspended off the tank top.

2.2. The low alarm float must trip at a fluid level of 2" or less.

2.3. There must be at least 11" between the low float and the high float trip points.

2.4. Hydrostatic monitoring reservoir must be vented at all times. If unvented, pressure buildup can cause tank damage.

2.5. Improper setting of the monitoring fluid level will result in false alarms. Do not set the brine level above the high float or up into the standpipe.



3. SETTING FLUID LEVEL

3.1. If there is no monitoring fluid visible in the reservoir when the tank arrives, immediately contact Containment Solutions Field Services at 1-800-822-1997.

3.2. To properly set the reservoir fluid level:

3.2.1. Estimate the tank fuel level (empty, half-full, full).

3.2.2. Using Table 1, determine the reservoir fluid level in Column A based on tank size and approximate fuel level.

3.2.3. Adjust the reservoir monitoring fluid level to the proper level identified in 2.1.2.

3.3. Fuel temperature can also affect the monitoring fluid level setting. A more accurate setting for the monitoring fluid level incorporates the fuel temperature into the adjustment. Most of the time it is not necessary to adjust for the fuel temperature, but if you are receiving false alarms using Column A, you should reset the brine level to account for fuel temperature as follows:

3.3.1. Determine the fuel temperature. If the fuel temperature is unknown, use the last 3 days average ambient air temperature as the fuel temperature.

3.3.2. Adjust the default fluid level in Column A by either adding or removing monitoring fluid according to Column B. The proper reservoir fluid level will be the value of Column A plus (or minus) the value of Column B based on the fuel temperature.

DAMAGE CLAIMS / LOST EQUIPMENT

Thoroughly examine all components and units as soon as they are received. If any cartons are damaged or missing, write a complete and detailed description of the damage or shortage on the face of the freight bill. The carrier's agent must verify the inspection and sign the description. Refuse only the damaged product, not the entire shipment.

Veeder-Root must be notified of any damages and/or shortages within 30 days of receipt of the shipment, as stated in our Terms and Conditions.

VEEDER-ROOT'S PREFERRED CARRIER

1. Contact Veeder-Root Customer Service at 800-873-3313 with the specific part numbers and quantities that were missing or received damaged.
2. Fax signed Bill of Lading (BOL) to Veeder-Root Customer Service at 800-234-5350.
3. Veeder-Root will file the claim with the carrier and replace the damaged/missing product at no charge to the customer. Customer Service will work with production facility to have the replacement product shipped as soon as possible.

CUSTOMER'S PREFERRED CARRIER

1. It is the customer's responsibility to file a claim with their carrier.
2. Customer may submit a replacement purchase order. Customer is responsible for all charges and freight associated with replacement order. Customer Service will work with production facility to have the replacement product shipped as soon as possible.
3. If "lost" equipment is delivered at a later date and is not needed, Veeder-Root will allow a Return to Stock without a restocking fee.
4. Veeder-Root will NOT be responsible for any compensation when a customer chooses their own carrier.

RETURN SHIPPING

For the parts return procedure, please follow the appropriate instructions in the "General Returned Goods Policy" pages in the "Policies and Literature" section of the Veeder-Root **North American Environmental Products** price list. Veeder-Root will not accept any return product without a Return Goods Authorization (RGA) number clearly printed on the outside of the package.

Introduction

This manual contains installation procedures for the installation or replacement of a Dual-Point Hydrostatic Sensor or Single-Point Hydrostatic Sensor for fiberglass tanks

This manual assumes all preliminary site preparation is completed, and that wiring from the monitor to the sensor junction box is in place and meets the requirements set out in the appropriate Console Site Prep manual. If this is a new installation or if site preparation is necessary, you must refer to the applicable Site Prep manual.

Contractor Certification Requirements

Veeder-Root requires the following minimum training certifications for contractors who will install and setup the equipment discussed in this manual:

Installer (Level 1) Certification: Contractors holding valid Installer Certification are approved to perform wiring and conduit routing; equipment mounting; probe, sensor and carbon canister vapor polisher installation; wireless equipment installation; tank and line preparation; and line leak detector installation.

ATG Technician (Level 2/3 or 4) Certification: Contractors holding valid ATG Technician Certifications are approved to perform installation checkout, startup, programming and operations training, system tests, troubleshooting and servicing for all Veeder-Root Series Tank Monitoring Systems, including Line Leak Detection. In addition, Contractors with the following sub-certification designations are approved to perform installation checkout, startup, programming, system tests, troubleshooting, service techniques and operations training on the designated system.

- Wireless 2
- Tall Tank

Warranty Registrations may only be submitted by selected Distributors.

Safety Warnings

⚠ WARNING

This product is to be installed and operated in the highly combustible environment of a gasoline storage tank where flammable liquids and explosive vapors may be present.

FAILURE TO COMPLY WITH THE FOLLOWING WARNINGS AND SAFETY PRECAUTIONS COULD CAUSE DAMAGE TO PROPERTY, ENVIRONMENT, RESULTING IN SERIOUS INJURY OR DEATH.

1. **Read and follow all instructions in this manual, including all safety warnings to protect yourself and others from serious injury, explosion, or electrical shock.**
2. **Comply with all applicable codes including: the National Electrical Code; federal, state, and local codes; and other applicable safety codes.**
3. **To protect yourself and others from being struck by vehicles, block off your work area during installation or service.**
4. **Do not alter or modify any component or substitute components in this kit.**
5. **Warning! Substitution of components may impair intrinsic safety.**
6. **Field wiring to the Sensor must not share a conduit with any non-intrinsically safe device's wiring.**
7. **Warning! To prevent ignition of flammable or combustible atmospheres, disconnect power before servicing.**
8. **Before installing or taking the unit into a hazardous area, earth the unit in a safe area to remove any static charge. Then immediately transport the unit to the installation site. Do not rub or clean the unit prior to installation. Cleaning is not required under normal service conditions. Do not rub or clean the unit after installation. If the unit is not fixed to a known earth point when installed, ensure that a separate earth connection is made to prevent the potential of a static discharge. When fitting or removing the unit, use of anti-static footwear or clothing is required.**
9. **Materials used in the construction of this device do not contain, by mass, more than 10% in total of aluminum, magnesium, zirconium and titanium or 7.5% in total of magnesium, titanium and zirconium.**

Safety Precautions

The following safety symbols may be used throughout this manual to alert you to important safety hazards and precautions.

EXPLOSIVE
Fuels and their vapors are extremely explosive if ignited.

FLAMMABLE
Fuels and their vapors are extremely flammable.

ELECTRICITY
High voltage exists in, and is supplied to, the device. A potential shock hazard exists.

TURN POWER OFF
Live power to a device creates a potential shock hazard. Turn Off power to the device and associated accessories when servicing the unit.

DRAFT

INJURY
Careless or improper handling of materials can result in bodily injury.

WEAR EYE PROTECTION
Wear eye protection when working with pressurized fuel lines or epoxy sealant to avoid possible eye injury.

GLOVES
Wear gloves to protect hands from irritation or injury.

USE SAFETY BARRICADES
Unauthorized people or vehicles in the work area are dangerous. Always use safety cones or barricades, safety tape, and your vehicle to block the work area.

READ ALL RELATED MANUALS
Knowledge of all related procedures before you begin work is important. Read and understand all manuals thoroughly. If you do not understand a procedure, ask someone who does.

System Description

The Veeder-Root Hydrostatic Reservoir Sensor accurately detects the fluid level change in the reservoir and interstitial space of a double-wall fiberglass tank.

The hydrostatic sensor is available in a Dual-Point or Single-Point configuration. The Dual-Point version is ideal for high groundwater areas, and can differentiate between a high level alarm condition and a low level alarm condition. If an inner-wall leak occurs, the brine solution seeps into the tank lowering the brine level in the reservoir. The Dual-Point Sensor will then trigger a low level alarm. If an outer-wall leak occurs, the groundwater seeps into the reservoir. The Dual-Point sensor will then trigger a high level alarm.

The Single-Point Sensor is ideal for low groundwater areas, since it only detects low level alarm conditions. If an inner-wall leak occurs, the brine solution seeps into the tank. If an outer-wall leak occurs, the brine solution seeps out of the tank. In both cases, the brine level decreases and the Single-Point Sensor triggers a low level alarm.

The housing is constructed of clear PVC, allowing the operator to pull the sensor from the reservoir to visually inspect float operation. A vented riser cap restricts liquid from entering the reservoir.

DETECTION CAPABILITIES

- Dual-Point sensor alarm conditions:
  - Leak in inner wall triggers a low level alarm.
  - Leak in outer wall triggers a high level alarm in high groundwater areas and a Low level alarm in low groundwater areas.
- Single-Point sensor alarm conditions:
  - Leak in inner or outer wall triggers a low level alarm in low groundwater areas.

OPERATING CAPABILITIES

- Operating temperature Range: -25°C to +50°C
- Storage Temperature Range: -40°C to +60°C
- Operates in solutions containing up to 30% calcium chloride or 50% ethylene glycol.
- Cable length: 12 feet
- Single-Point Sensor Dimensions: 6.0" high, 2.5" diameter

- Dual-Point Sensor Dimensions: 17.3" high, 2.5" diameter
- Clear PVC housing permits visual inspection of float operation.

Installation

Dual-Point Hydrostatic Sensor Installation

1. Turn Off power to the console.
2. Lower the sensor into the riser until it rests on the bottom of the reservoir (see Figure 3). Note: Refer to the tank manufacturer's instructions for setting the proper brine levels. The ideal brine solution level is approximately halfway between the high and low water levels. With the Dual-Point Sensor resting on the inner-tank wall, the sensor will alarm when the brine level is below 2" or when the brine level is above 13".
3. Install a cord grip bushing/nut into one of the two riser cap fittings. Loosen the nut and push the straight end of the vent tube down through the bushing (ref. Figure 3) about an inch and tighten the cord grip nut. Insert the remaining cord grip bushing and nut from the riser cap kit in the other riser cap fitting. Push the sensor cable up through the loosened second cord grip. Place the cap in the riser and snap down the cap lever to seat the gasket against the inside of the pipe.

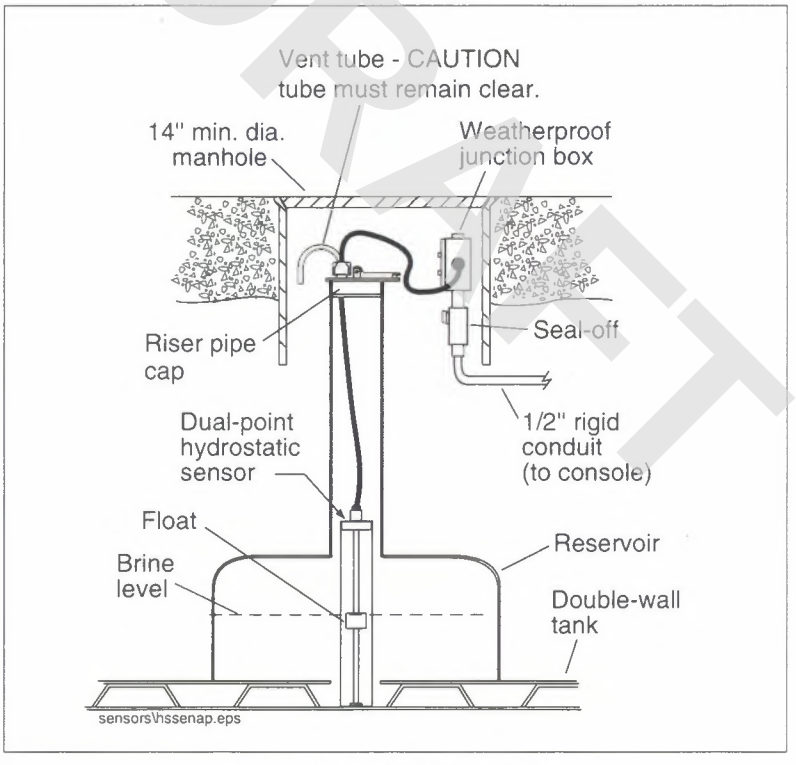

Figure 3. Dual-Point Sensor Installation

4. With the sensor still resting on the bottom of the reservoir, gently pull out the excess sensor cable, leaving a little slack in cable between the cap and the sensor. Tighten the cable's cord grip nut.
5. Install the cord grip from the Cable Seal kit into the field junction box. Push the sensor cable into the junction box through the cord grip. Using the wire nuts from the kit, connect the sensor cable to the console cable as shown in Figure 4. Tighten the cord grip.
6. Seal wire nuts with epoxy sealant following the instructions in Figure 5.
7. Push the epoxy sealed bag into the junction box. Replace and tighten the junction box cover.

3. Install the cord grip from the Sensor Install Kit into the field junction box. Push the sensor cable into the junction box through the cord grip. Using the wire nuts from the Sensor Install Kit, connect the sensor cable to the console cable as shown in Figure 4. Tighten cord grip.
4. Seal wire nuts with epoxy sealant following the instructions in Figure 5.
5. Turn On power to the console.
6. With the sensor resting on the top of the tank, mark the cable position at the riser cap with a piece of tape.
7. Pull the sensor up until it triggers an alarm on the console. Mark the cable position at the top of the cap with a piece of tape.
8. Lower the sensor until the riser cap is halfway between the taped marks on the cable.
9. Secure the sensor in position by tightening the cable cord grip in the cap (see Figure 6).

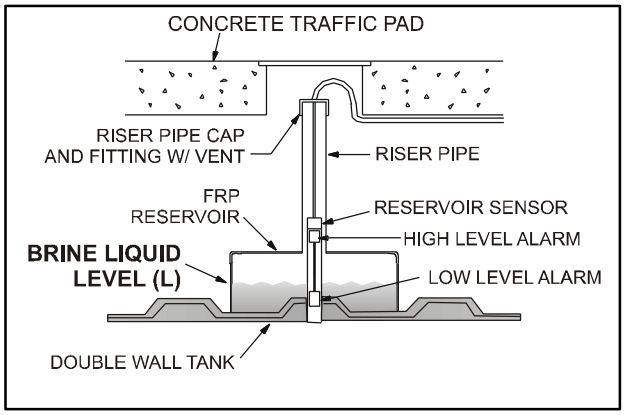
SETTING BRINE LEVEL

You have selected the most reliable annular space monitoring system available in the market. There are a few **CRITICAL** steps required to ensure the system functions properly for the life of the tank.

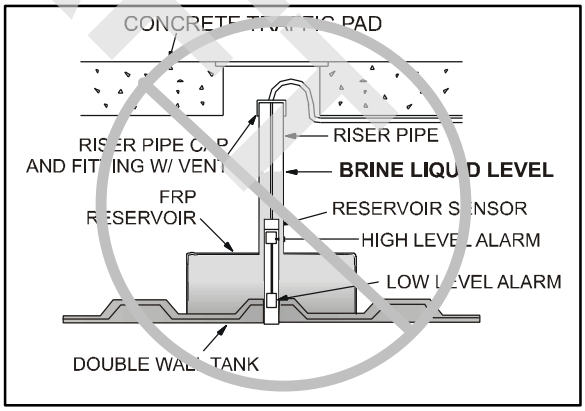
1. Set brine level in accordance with Containment Solutions Installation Instructions (Pub. No. INST 6001) as follows:

TANK SIZE	LIQUID LEVEL MEASUREMENT (L) WHEN TANK IS **EMPTY**	LIQUID LEVEL MEASUREMENT (L) WHEN TANK IS **FULL**
4□(1M and less)	5□	8□
4□(over 1M), 6□	3-1/2□	5□
8□	3-1/2□	5□
10□(10M, 12M, 15M)	3-1/2□	5-1/2□
10□(20M)	4□	6-1/2□
10□(25M, 30M)	4-1/2□	8-1/2□
10□(over 30M)	4□	7□

For compartment tanks, use total volume of all compartments to determine tank size.



CORRECT BRINE LEVEL



INCORRECT BRINE LEVEL

NOTE: SETTING BRINE LEVEL IN RISER PIPE WILL CAUSE FALSE ALARMS!!!!

2. Use a hydrostatic sensor with high and low level floats and a minimum of 11□between floats. Proper venting of the hydrostatic system is essential for proper sensor operation.

3. If there is no brine visible in the reservoir when the tank arrives, immediately contact Containment Solutions Services at 1-800-822-1997.

Emergency Overview

No unusual emergency situations are expected from this product.

****

Primary Route(s) of Exposure: inhalation, skin, eye

Potential Health Effects:

ACUTE (short term): Inhalation of vapors from this product are unlikely due to physical properties. Mists may cause irritation to the upper respiratory tract. Eye contact may cause moderate to severe irritation with corneal injury, which may be slow to heal. Short single exposure is not likely to cause significant skin irritation. Prolonged or repeated exposure may cause skin irritation and a bum. May cause more severe response if confined to skin or skin is scratched or cut. A single prolonged exposure is not likely to result in the product being absorbed through the skin in harmful amounts. Ingestion may cause gastrointestinal irritation or ulceration. Material is sometimes encountered at elevated temperatures and more intense effects as well as thermal burns are possible. See Section 8 for exposure controls.

CHRONIC (long term): No known chronic effects. See Section 11 of MSDS for an explanation of the toxicological data.

Medical Conditions Aggravated by Exposure: None likely.

DRAFT

SECTION 4: First Aid Measures

Inhalation: Move person to fresh air. Administer cardiac or pulmonary resuscitation (CPR) if a pulse is not detectable or if unable to breathe. Provide oxygen if breathing is difficult. Obtain immediate medical assistance.

Eye Contact: Flush eyes with running water for at least 15 minutes. Seek medical attention immediately.

Skin Contact: Remove contaminated clothing. Wash with mild soap and running water. Seek medical attention if irritation persists.

Ingestion: If swallowed, induce vomiting immediately as directed by medical personnel. Never give anything by mouth to an unconscious person. Seek medical assistance.

Note to physician: Perform gastric lavage in accordance with procedures for ingestion of petroleum products.

SECTION 5: Fire Fighting Measures

Flash Point and Method: Not Applicable

Flammability Limits (%): LFL: Not Applicable UFL: Not Applicable

Auto Ignition Temperature: Not Applicable

Extinguishing Media: Material is not combustible.

Unusual Fire and Explosion Hazards: None known.

Fire Fighting Instructions: Wear positive pressure self-contained breathing apparatus (SCBA).

Hazardous Combustion Products: Not Applicable

SECTION 6: Accidental Release Measures

Releases of this product to the land, water and air may require reporting to local, state and federal agencies.

Land Spill: Prevent material from entering sewers or waterways. Absorb with inert materials (vermiculite or sand) and place in a closed container for disposal as solid waste. Wash area well with water.

Water Spill: Material is soluble. Disperse any remaining residue to reduce aquatic harm.

Air Release: Only water vapor will be released.

SECTION 7: Handling and Storage

Storage Temperature: Not Applicable.

Storage Pressure: Not Applicable.

General: Avoid eye and prolonged skin contact. Always use cool water (less than 80*F, 27*C) when diluting calcium chloride solutions. Heat (possibly high temperatures) will develop during dilution operations.

DRAFT

SECTION 8: Exposure Controls and Personal Protection

Ingredient	OSHA PEL (8-hr TWA)	ACGIH TLV (8-hr TWA)
Calcium Chloride	None Established	None Established
Potassium Chloride	None Established	None Established
Sodium Chloride	None Established	None Established

Engineering Controls: General dilution ventilation and/or local exhaust ventilation should be provided to minimize exposures.

Personal Protection:

Respiratory Protection: If irritation occurs, use a NIOSH/MSHA approved air purifying respirator for dusts/mists. Use respiratory protection in accordance with your company's respiratory protection program, local or OSHA regulations under **29 CFR 1910.134.**

Skin Protection: Wear long sleeved shirt, long pants and chemical resistant gloves such as polyvinyl alcohol, polyethylene or vitron. Leather clothing and shoes will be damaged by calcium chloride.

Eye Protection: Wear chemical protective goggles and a face shield.

Work/Hygienic Practices: Handle in accordance with good industrial hygiene and safety practices. These include avoiding any unnecessary exposures and removal of the material from skin, eyes and clothing. Launder contaminated clothing before reuse. Safety showers and eye wash stations should be available.

Evaporation Rate (n-Butyl Acetate=1): Not Available

Odor Type: None

SECTION 10: Stability and Reactivity

General: Stable.

Incompatible Materials and Conditions to Avoid: Calcium chloride will: corrode most metals exposed to air; attack aluminum (and its alloys) and yellow brass; react with sulfuric acid to form hydrogen chloride which is corrosive, irritating and reactive; give exothermic reaction with water-reactive materials such as sodium; result in runaway polymerization reaction with methyl vinyl ether; and, in solution form react with zinc (galvanizing) to yield hydrogen gas which is explosive.

Hazardous Decomposition Products: None known. See Section 5 of MSDS for combustion products statement.

Hazardous Polymerization: May occur is combined with methyl vinyl ether.

SECTION 11: Toxicological Information

Carcinogenicity: The following table indicates whether or not each agency has listed each ingredient as a carcinogen:

DAMAGE CLAIMS / LOST EQUIPMENT

Thoroughly examine all components and units as soon as they are received. If any cartons are damaged or missing, write a complete and detailed description of the damage or shortage on the face of the freight bill. The carrier's agent must verify the inspection and sign the description. Refuse only the damaged product, not the entire shipment.

Veeder-Root must be notified of any damages and/or shortages within 30 days of receipt of the shipment, as stated in our Terms and Conditions.

VEEDER-ROOT'S PREFERRED CARRIER

1. Contact Veeder-Root Customer Service at 800-873-3313 with the specific part numbers and quantities that were missing or received damaged.
2. Fax signed Bill of Lading (BOL) to Veeder-Root Customer Service at 800-234-5350.
3. Veeder-Root will file the claim with the carrier and replace the damaged/missing product at no charge to the customer. Customer Service will work with production facility to have the replacement product shipped as soon as possible.

CUSTOMER'S PREFERRED CARRIER

1. It is the customer's responsibility to file a claim with their carrier.
2. Customer may submit a replacement purchase order. Customer is responsible for all charges and freight associated with replacement order. Customer Service will work with production facility to have the replacement product shipped as soon as possible.
3. If "lost" equipment is delivered at a later date and is not needed, Veeder-Root will allow a Return to Stock without a restocking fee.
4. Veeder-Root will NOT be responsible for any compensation when a customer chooses their own carrier.

RETURN SHIPPING

For the parts return procedure, please follow the appropriate instructions in the "General Returned Goods Policy" pages in the "Policies and Literature" section of the Veeder-Root **North American Environmental Products** price list. Veeder-Root will not accept any return product without a Return Goods Authorization (RGA) number clearly printed on the outside of the package.

Introduction

This manual contains installation procedures for the installation or replacement of a Dual-Point Hydrostatic Sensor or Single-Point Hydrostatic Sensor for fiberglass tanks

This manual assumes all preliminary site preparation is completed, and that wiring from the monitor to the sensor junction box is in place and meets the requirements set out in the appropriate Console Site Prep manual. If this is a new installation or if site preparation is necessary, you must refer to the applicable Site Prep manual.

Contractor Certification Requirements

Veeder-Root requires the following minimum training certifications for contractors who will install and setup the equipment discussed in this manual:

Installer (Level 1) Certification: Contractors holding valid Installer Certification are approved to perform wiring and conduit routing; equipment mounting; probe, sensor and carbon canister vapor polisher installation; wireless equipment installation; tank and line preparation; and line leak detector installation.

ATG Technician (Level 2/3 or 4) Certification: Contractors holding valid ATG Technician Certifications are approved to perform installation checkout, startup, programming and operations training, system tests, troubleshooting and servicing for all Veeder-Root Series Tank Monitoring Systems, including Line Leak Detection. In addition, Contractors with the following sub-certification designations are approved to perform installation checkout, startup, programming, system tests, troubleshooting, service techniques and operations training on the designated system.

- Wireless 2
- Tall Tank

Warranty Registrations may only be submitted by selected Distributors.

Safety Warnings

⚠ WARNING

This product is to be installed and operated in the highly combustible environment of a gasoline storage tank where flammable liquids and explosive vapors may be present.

FAILURE TO COMPLY WITH THE FOLLOWING WARNINGS AND SAFETY PRECAUTIONS COULD CAUSE DAMAGE TO PROPERTY, ENVIRONMENT, RESULTING IN SERIOUS INJURY OR DEATH.

1. **Read and follow all instructions in this manual, including all safety warnings to protect yourself and others from serious injury, explosion, or electrical shock.**
2. **Comply with all applicable codes including: the National Electrical Code; federal, state, and local codes; and other applicable safety codes.**
3. **To protect yourself and others from being struck by vehicles, block off your work area during installation or service.**
4. **Do not alter or modify any component or substitute components in this kit.**
5. **Warning! Substitution of components may impair intrinsic safety.**
6. **Field wiring to the Sensor must not share a conduit with any non-intrinsically safe device's wiring.**
7. **Warning! To prevent ignition of flammable or combustible atmospheres, disconnect power before servicing.**
8. **Before installing or taking the unit into a hazardous area, earth the unit in a safe area to remove any static charge. Then immediately transport the unit to the installation site. Do not rub or clean the unit prior to installation. Cleaning is not required under normal service conditions. Do not rub or clean the unit after installation. If the unit is not fixed to a known earth point when installed, ensure that a separate earth connection is made to prevent the potential of a static discharge. When fitting or removing the unit, use of anti-static footwear or clothing is required.**
9. **Materials used in the construction of this device do not contain, by mass, more than 10% in total of aluminum, magnesium, zirconium and titanium or 7.5% in total of magnesium, titanium and zirconium.**

Safety Precautions

The following safety symbols may be used throughout this manual to alert you to important safety hazards and precautions.

EXPLOSIVE
Fuels and their vapors are extremely explosive if ignited.

FLAMMABLE
Fuels and their vapors are extremely flammable.

ELECTRICITY
High voltage exists in, and is supplied to, the device. A potential shock hazard exists.

TURN POWER OFF
Live power to a device creates a potential shock hazard. Turn Off power to the device and associated accessories when servicing the unit.

DRAFT

INJURY
Careless or improper handling of materials can result in bodily injury.

WEAR EYE PROTECTION
Wear eye protection when working with pressurized fuel lines or epoxy sealant to avoid possible eye injury.

GLOVES
Wear gloves to protect hands from irritation or injury.

USE SAFETY BARRICADES
Unauthorized people or vehicles in the work area are dangerous. Always use safety cones or barricades, safety tape, and your vehicle to block the work area.

READ ALL RELATED MANUALS
Knowledge of all related procedures before you begin work is important. Read and understand all manuals thoroughly. If you do not understand a procedure, ask someone who does.

System Description

The Veeder-Root Hydrostatic Reservoir Sensor accurately detects the fluid level change in the reservoir and interstitial space of a double-wall fiberglass tank.

The hydrostatic sensor is available in a Dual-Point or Single-Point configuration. The Dual-Point version is ideal for high groundwater areas, and can differentiate between a high level alarm condition and a low level alarm condition. If an inner-wall leak occurs, the brine solution seeps into the tank lowering the brine level in the reservoir. The Dual-Point Sensor will then trigger a low level alarm. If an outer-wall leak occurs, the groundwater seeps into the reservoir. The Dual-Point sensor will then trigger a high level alarm.

The Single-Point Sensor is ideal for low groundwater areas, since it only detects low level alarm conditions. If an inner-wall leak occurs, the brine solution seeps into the tank. If an outer-wall leak occurs, the brine solution seeps out of the tank. In both cases, the brine level decreases and the Single-Point Sensor triggers a low level alarm.

The housing is constructed of clear PVC, allowing the operator to pull the sensor from the reservoir to visually inspect float operation. A vented riser cap restricts liquid from entering the reservoir.

DETECTION CAPABILITIES

- Dual-Point sensor alarm conditions:
  - Leak in inner wall triggers a low level alarm.
  - Leak in outer wall triggers a high level alarm in high groundwater areas and a Low level alarm in low groundwater areas.
- Single-Point sensor alarm conditions:
  - Leak in inner or outer wall triggers a low level alarm in low groundwater areas.

OPERATING CAPABILITIES

- Operating temperature Range: -25°C to +50°C
- Storage Temperature Range: -40°C to +60°C
- Operates in solutions containing up to 30% calcium chloride or 50% ethylene glycol.
- Cable length: 12 feet
- Single-Point Sensor Dimensions: 6.0" high, 2.5" diameter

- Dual-Point Sensor Dimensions: 17.3" high, 2.5" diameter
- Clear PVC housing permits visual inspection of float operation.

Installation

Dual-Point Hydrostatic Sensor Installation

1. Turn Off power to the console.
2. Lower the sensor into the riser until it rests on the bottom of the reservoir (see Figure 3). Note: Refer to the tank manufacturer's instructions for setting the proper brine levels. The ideal brine solution level is approximately halfway between the high and low water levels. With the Dual-Point Sensor resting on the inner-tank wall, the sensor will alarm when the brine level is below 2" or when the brine level is above 13".
3. Install a cord grip bushing/nut into one of the two riser cap fittings. Loosen the nut and push the straight end of the vent tube down through the bushing (ref. Figure 3) about an inch and tighten the cord grip nut. Insert the remaining cord grip bushing and nut from the riser cap kit in the other riser cap fitting. Push the sensor cable up through the loosened second cord grip. Place the cap in the riser and snap down the cap lever to seat the gasket against the inside of the pipe.

DRAFT

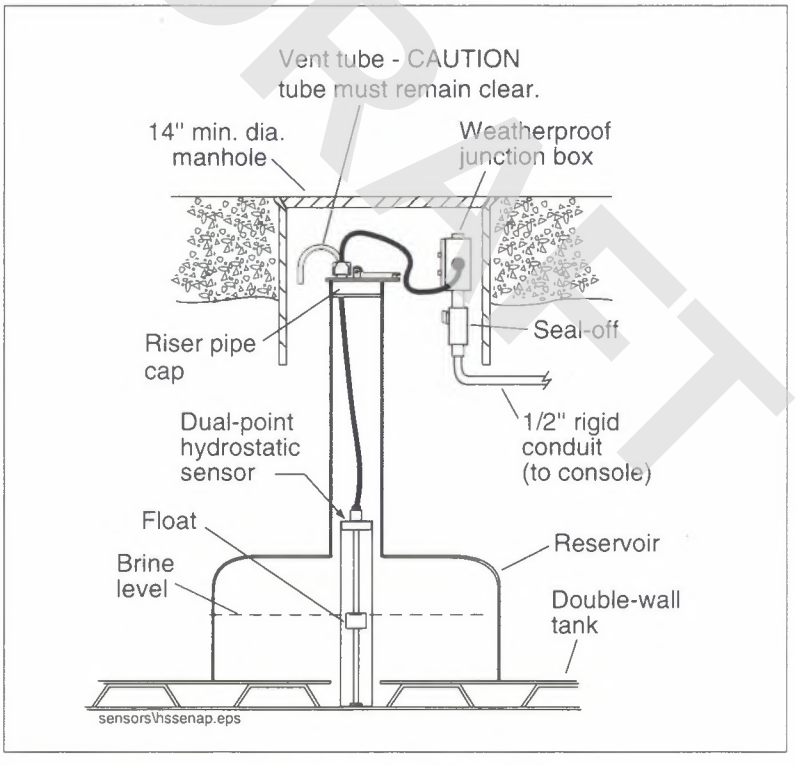

Figure 3. Dual-Point Sensor Installation

4. With the sensor still resting on the bottom of the reservoir, gently pull out the excess sensor cable, leaving a little slack in cable between the cap and the sensor. Tighten the cable's cord grip nut.
5. Install the cord grip from the Cable Seal kit into the field junction box. Push the sensor cable into the junction box through the cord grip. Using the wire nuts from the kit, connect the sensor cable to the console cable as shown in Figure 4. Tighten the cord grip.
6. Seal wire nuts with epoxy sealant following the instructions in Figure 5.
7. Push the epoxy sealed bag into the junction box. Replace and tighten the junction box cover.

Single-Point Hydrostatic Sensor Installation

1. Turn Off power to the console.
2. Install a cord grip bushing/nut into one of the two riser cap fittings. Loosen the nut and push the straight end of the vent tube down through the bushing (ref. Figure 6) about an inch and tighten the cord grip nut. Insert the remaining cord grip bushing and nut from the riser cap kit in the other riser cap fitting. Push the sensor cable up through the loosened second cord grip. Place the cap in the riser and snap down the cap lever to seat the gasket against the inside of the pipe.

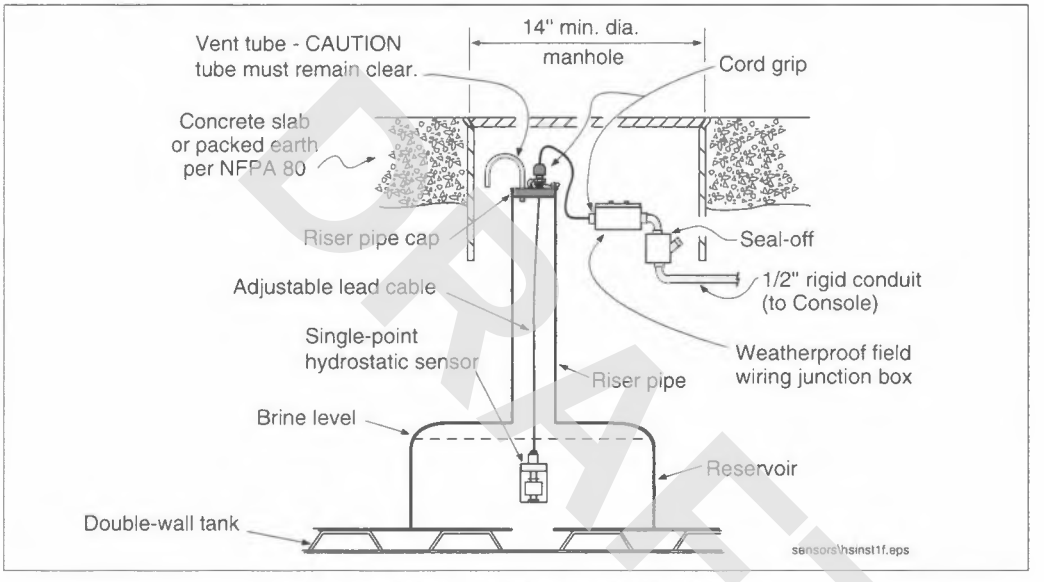

Figure 6. Single-Point Sensor Installation

3. Install the cord grip from the Sensor Install Kit into the field junction box. Push the sensor cable into the junction box through the cord grip. Using the wire nuts from the Sensor Install Kit, connect the sensor cable to the console cable as shown in Figure 4. Tighten cord grip.
4. Seal wire nuts with epoxy sealant following the instructions in Figure 5.
5. Turn On power to the console.
6. With the sensor resting on the top of the tank, mark the cable position at the riser cap with a piece of tape.
7. Pull the sensor up until it triggers an alarm on the console. Mark the cable position at the top of the cap with a piece of tape.
8. Lower the sensor until the riser cap is halfway between the taped marks on the cable.
9. Secure the sensor in position by tightening the cable cord grip in the cap (see Figure 6).

Reference: Calcium Chloride Brine Solution

DRAFT

Owens-Corning and now Containment Solutions, Inc. uses a calcium chloride brine solution in the interstitial space of our double wall tanks to hydrostatically monitor the tank walls for leaks. Green food grade dye is added for visibility. The calcium chloride brine is a 30 percent solution that allows freeze protection down to approximately minus 55 degrees Fahrenheit. If you add more than a 30 percent solution of the calcium chloride, the freeze protection is dramatically reduced.

If a customer is making his own calcium chloride brine solution, use either of these recipes.

Mixture A: 2-1/2 pounds of salt to 5 gallons of water. Salt used in water softening systems is acceptable, granular salt is preferred. Dissolve salt in water completely in a container before adding to tank or reservoir.

Mixture B: 5.2 pounds of calcium chloride to 5 gallons of water. Dissolve calcium chloride in water completely in a container before adding to tank or reservoir.

When purchasing calcium chloride, you may be told or realize that it is not pure calcium chloride. The material normally has 1 to 3 percent potassium chloride, and 1 to 2 percent sodium chloride, this is acceptable. To purify the material without these trace amounts of other material would be prohibitively expensive.

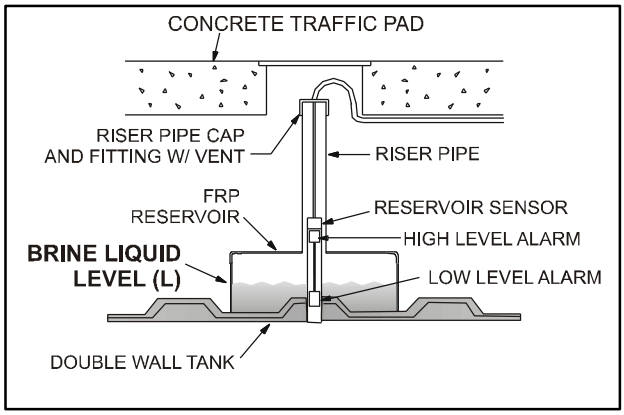
SETTING BRINE LEVEL

You have selected the most reliable annular space monitoring system available in the market. There are a few **CRITICAL** steps required to ensure the system functions properly for the life of the tank.

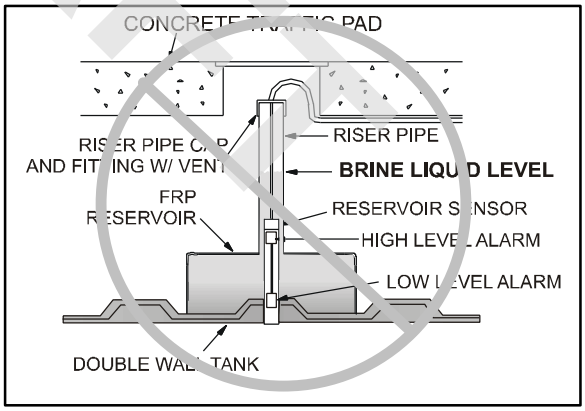
1. Set brine level in accordance with Containment Solutions Installation Instructions (Pub. No. INST 6001) as follows:

TANK SIZE	LIQUID LEVEL MEASUREMENT (L) WHEN TANK IS **EMPTY**	LIQUID LEVEL MEASUREMENT (L) WHEN TANK IS **FULL**
4□(1M and less)	5□	8□
4□(over 1M), 6□	3-1/2□	5□
8□	3-1/2□	5□
10□(10M, 12M, 15M)	3-1/2□	5-1/2□
10□(20M)	4□	6-1/2□
10□(25M, 30M)	4-1/2□	8-1/2□
10□(over 30M)	4□	7□

For compartment tanks, use total volume of all compartments to determine tank size.



CORRECT BRINE LEVEL



INCORRECT BRINE LEVEL

NOTE: SETTING BRINE LEVEL IN RISER PIPE WILL CAUSE FALSE ALARMS!!!!

2. Use a hydrostatic sensor with high and low level floats and a minimum of 11□between floats. Proper venting of the hydrostatic system is essential for proper sensor operation.

3. If there is no brine visible in the reservoir when the tank arrives, immediately contact Containment Solutions Services at 1-800-822-1997.

Note: See Section 8 of MSDS for exposure limit data for these ingredients.

SECTION 3: Hazards Identification

Appearance and Odor: Green liquid with no odor.

****

Emergency Overview

No unusual emergency situations are expected from this product.

****

Primary Route(s) of Exposure: inhalation, skin, eye

Potential Health Effects:

ACUTE (short term): Inhalation of vapors from this product are unlikely due to physical properties. Mists may cause irritation to the upper respiratory tract. Eye contact may cause moderate to severe irritation with corneal injury, which may be slow to heal. Short single exposure is not likely to cause significant skin irritation. Prolonged or repeated exposure may cause skin irritation and a bum. May cause more severe response if confined to skin or skin is scratched or cut. A single prolonged exposure is not likely to result in the product being absorbed through the skin in harmful amounts. Ingestion may cause gastrointestinal irritation or ulceration. Material is sometimes encountered at elevated temperatures and more intense effects as well as thermal burns are possible. See Section 8 for exposure controls.

CHRONIC (long term): No known chronic effects. See Section 11 of MSDS for an explanation of the toxicological data.

Medical Conditions Aggravated by Exposure: None likely.

DRAFT

SECTION 4: First Aid Measures

Inhalation: Move person to fresh air. Administer cardiac or pulmonary resuscitation (CPR) if a pulse is not detectable or if unable to breathe. Provide oxygen if breathing is difficult. Obtain immediate medical assistance.

Eye Contact: Flush eyes with running water for at least 15 minutes. Seek medical attention immediately.

Skin Contact: Remove contaminated clothing. Wash with mild soap and running water. Seek medical attention if irritation persists.

Ingestion: If swallowed, induce vomiting immediately as directed by medical personnel. Never give anything by mouth to an unconscious person. Seek medical assistance.

Note to physician: Perform gastric lavage in accordance with procedures for ingestion of petroleum products.

SECTION 5: Fire Fighting Measures

Flash Point and Method: Not Applicable

Flammability Limits (%): LFL: Not Applicable UFL: Not Applicable

Auto Ignition Temperature: Not Applicable

Extinguishing Media: Material is not combustible.

Unusual Fire and Explosion Hazards: None known.

Fire Fighting Instructions: Wear positive pressure self-contained breathing apparatus (SCBA).

Hazardous Combustion Products: Not Applicable

SECTION 6: Accidental Release Measures

Releases of this product to the land, water and air may require reporting to local, state and federal agencies.

Land Spill: Prevent material from entering sewers or waterways. Absorb with inert materials (vermiculite or sand) and place in a closed container for disposal as solid waste. Wash area well with water.

Water Spill: Material is soluble. Disperse any remaining residue to reduce aquatic harm.

Air Release: Only water vapor will be released.

SECTION 7: Handling and Storage

Storage Temperature: Not Applicable.

Storage Pressure: Not Applicable.

General: Avoid eye and prolonged skin contact. Always use cool water (less than 80*F, 27*C) when diluting calcium chloride solutions. Heat (possibly high temperatures) will develop during dilution operations.

DRAFT

SECTION 8: Exposure Controls and Personal Protection

Ingredient	OSHA PEL (8-hr TWA)	ACGIH TLV (8-hr TWA)
Calcium Chloride	None Established	None Established
Potassium Chloride	None Established	None Established
Sodium Chloride	None Established	None Established

Engineering Controls: General dilution ventilation and/or local exhaust ventilation should be provided to minimize exposures.

Personal Protection:

Respiratory Protection: If irritation occurs, use a NIOSH/MSHA approved air purifying respirator for dusts/mists. Use respiratory protection in accordance with your company's respiratory protection program, local or OSHA regulations under **29 CFR 1910.134.**

Skin Protection: Wear long sleeved shirt, long pants and chemical resistant gloves such as polyvinyl alcohol, polyethylene or vitron. Leather clothing and shoes will be damaged by calcium chloride.

Eye Protection: Wear chemical protective goggles and a face shield.

Work/Hygienic Practices: Handle in accordance with good industrial hygiene and safety practices. These include avoiding any unnecessary exposures and removal of the material from skin, eyes and clothing. Launder contaminated clothing before reuse. Safety showers and eye wash stations should be available.

DRAFT

SECTION 9: Physical and Chemical Properties

Vapor Pressure (mm Hg @ 250C): 7 - 15

Vapor Density (Air--l): Same as water.

Specific Gravity (water--l): 1.3 - 1.44

Boiling Point: 230 - 251 OF (110 - 1220C)

Solubility in Water: Soluble

Viscosity: Not Available

pH: Not Available,

Slightly Basic Physical State: Liquid

Appearance: Green Liquid.

Freezing Point: Not Available

Evaporation Rate (n-Butyl Acetate=1): Not Available

Odor Type: None

SECTION 10: Stability and Reactivity

General: Stable.

Incompatible Materials and Conditions to Avoid: Calcium chloride will: corrode most metals exposed to air; attack aluminum (and its alloys) and yellow brass; react with sulfuric acid to form hydrogen chloride which is corrosive, irritating and reactive; give exothermic reaction with water-reactive materials such as sodium; result in runaway polymerization reaction with methyl vinyl ether; and, in solution form react with zinc (galvanizing) to yield hydrogen gas which is explosive.

Hazardous Decomposition Products: None known. See Section 5 of MSDS for combustion products statement.

Hazardous Polymerization: May occur is combined with methyl vinyl ether.

SECTION 11: Toxicological Information

Carcinogenicity: The following table indicates whether or not each agency has listed each ingredient as a carcinogen:

Ingredient	ACGIH	IARC	NTP	OSHA
Calcium Chloride	No	No	No	No
Potassium Chloride	No	No	No	No
Sodium Chloride	No	No	No	No

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

A. General Information

D. Results of Testing/Servicing

Software Version Installed: **329.01**

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☒ Yes*	☐ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments: UST TANKS ARE DOUBLE WALLED WITH MECHANICAL OVERFILL DROPTUBES. A NEW Backup **Battery was installed.**

DRAFT

F. In-Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☒ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California
Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

A. General Information

Facility Name: **Chevron** Bldg. No.:

Site Address: **147 E Santa Clara St.** City: **San Jose** Zip: **95113**

Facility Contact Person: **Manager -** Contact Phone No.: **(408) 295-3964**

Make/Model of Monitoring System: **Veeder Root TLS350** Date of Testing/Servicing: **6/26/2015**

B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

Tank ID: #1-Diesel

- ☒ In-Tank Gauging Probe. Model: 847390-107
- ☒ Annular Space or Vault Sensor. Model: 794390-407
- ☒ Piping Sump / Trench Sensor(s). Model: 794380-208
- ☐ Fill Sump Sensor(s). Model:
- ☐ Mechanical Line Leak Detector. Model:
- ☒ Electronic Line Leak Detector. Model: VR PLLD
- ☐ Tank Overfill / High-Level Sensor. Model:
- ☐ Other (specify equipment type and model in Section E on Page 2).

Tank ID: #2-Supreme

- ☒ In-Tank Gauging Probe. Model: 847390-107
- ☒ Annular Space or Vault Sensor. Model: 794390-407
- ☒ Piping Sump / Trench Sensor(s). Model: 794380-208
- ☐ Fill Sump Sensor(s). Model:
- ☐ Mechanical Line Leak Detector. Model:
- ☒ Electronic Line Leak Detector. Model: VR PLLD
- ☐ Tank Overfill / High-Level Sensor. Model:
- ☐ Other (specify equipment type and model in Section E on Page 2).

Tank ID: #3-Regular

- ☒ In-Tank Gauging Probe. Model: 847390-107
- ☒ Annular Space or Vault Sensor. Model: 794390-407
- ☒ Piping Sump / Trench Sensor(s). Model: 794380-208
- ☐ Fill Sump Sensor(s). Model:
- ☐ Mechanical Line Leak Detector. Model:
- ☒ Electronic Line Leak Detector. Model: VR PLLD
- ☐ Tank Overfill / High-Level Sensor. Model:
- ☐ Other (specify equipment type and model in Section E on Page 2).

Tank ID: Waste Oil

- ☐ In-Tank Gauging Probe. Model:
- ☒ Annular Space or Vault Sensor. Model: 794390-407
- ☐ Piping Sump / Trench Sensor(s). Model:

- ☐ Dispenser Containment Float(s) and Chain(s).

Dispenser ID:

- ☐ Dispenser Containment Sensor(s). Model:
- ☐ Shear Valve(s).
- ☐ Dispenser Containment Float(s) and Chain(s).

*If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

C. Certification

- I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; *(check all that apply)*: ☐ **System set-up** ☒ **Alarm history report**

Technician Name (print): **Jeff Conger** Signature: Jeff Conger

Certification No.: **A22219** License. No.: **ICC 1801782**

Testing Company Name: **Pinnacle Fuel Compliance Services, Inc.** Phone No.: **(408) 206-9840**

Testing Company Address: **P.O. Box 32849 San Jose, CA 95152-2849** Date of Testing/Servicing: **6/26/2015**

D. Results of Testing/Servicing

Software Version Installed: **329.01**

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☐ Yes	☒ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☐ Yes	☒ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☐ Yes	☒ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments:

UST TANKS ARE DOUBLE WALLED WITH MECHANICAL OVERFILL DROPTUBES. Note that the Supreme annular sensor could not be returned to the bottom of annular space due to no pull string/rope/wire. The Regular annular sensor is stuck near top of annular space and could not be moved in either direction. Both the Regular and Supreme annular sensors were in alarm upon departure. Need to make repairs on both sensors to return them to the bottom of annulars, as result until then the Monitor is NOT certified operational.

F. In-Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☒ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

MONITORING SYSTEM CERTIFICATION

REVIEWED
By Greg Breshears at 8:00 am, Dec 05, 2018

For Use By All Jurisdictions Within the State of California
Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

A. General Information

Facility Name: **Chevron** Bldg. No.:

Site Address: **147 E Santa Clara St.** City: **San Jose** Zip: **95113**

Facility Contact Person: **Manager -** Contact Phone No.: **(408) 295-3964**

Make/Model of Monitoring System: **Veeder Root TLS350** Date of Testing/Servicing: **6/29/2016**

B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

Tank ID: #1-Diesel
- ☒ In-Tank Gauging Probe. Model: 847390-107
- ☒ Annular Space or Vault Sensor. Model: 794390-407
- ☒ Piping Sump / Trench Sensor(s). Model: 794380-208
- ☐ Fill Sump Sensor(s). Model:
- ☐ Mechanical Line Leak Detector. Model:
- ☒ Electronic Line Leak Detector. Model: VR PLLD
- ☐ Tank Overfill / High-Level Sensor. Model:
- ☐ Other (specify equipment type and model in Section E on Page 2).

Tank ID: #2-Supreme
- ☒ In-Tank Gauging Probe. Model: 847390-107
- ☒ Annular Space or Vault Sensor. Model: 794390-407
- ☒ Piping Sump / Trench Sensor(s). Model: 794380-208
- ☐ Fill Sump Sensor(s). Model:
- ☐ Mechanical Line Leak Detector. Model:
- ☒ Electronic Line Leak Detector. Model: VR PLLD
- ☐ Tank Overfill / High-Level Sensor. Model:
- ☐ Other (specify equipment type and model in Section E on Page 2).

Tank ID: #3-Regular
- ☒ In-Tank Gauging Probe. Model: 847390-107
- ☒ Annular Space or Vault Sensor. Model: 794390-407
- ☒ Piping Sump / Trench Sensor(s). Model: 794380-208
- ☐ Fill Sump Sensor(s). Model:
- ☐ Mechanical Line Leak Detector. Model:
- ☒ Electronic Line Leak Detector. Model: VR PLLD
- ☐ Tank Overfill / High-Level Sensor. Model:
- ☐ Other (specify equipment type and model in Section E on Page 2).

Tank ID: Waste Oil
- ☐ In-Tank Gauging Probe. Model:
- ☒ Annular Space or Vault Sensor. Model: 794390-407
- ☐ Piping Sump / Trench Sensor(s). Model:
- ☐ Fill Sump Sensor(s). Model:
- ☐ Mechanical Line Leak Detector. Model:
- ☐ Electronic Line Leak Detector. Model:
- ☒ Tank Overfill / High-Level Sensor. Model: 794390-420
- ☐ Other (specify equipment type and model in Section E on Page 2).

Dispenser ID: 1-2
- ☒ Dispenser Containment Sensor(s). Model: 794380-208
- ☒ Shear Valve(s).
- ☐ Dispenser Containment Float(s) and Chain(s).

Dispenser ID: 3-4
- ☒ Dispenser Containment Sensor(s). Model: 794380-208
- ☒ Shear Valve(s).
- ☐ Dispenser Containment Float(s) and Chain(s).

Dispenser ID: 5-6
- ☒ Dispenser Containment Sensor(s). Model: 794380-208
- ☒ Shear Valve(s).
- ☐ Dispenser Containment Float(s) and Chain(s).

Dispenser ID: 7-8
- ☒ Dispenser Containment Sensor(s). Model: 794380-208
- ☒ Shear Valve(s).
- ☐ Dispenser Containment Float(s) and Chain(s).

Dispenser ID: L.C.T. (Vapor Pot)
- ☒ Containment Sensor(s). Model: LS3
- ☐ Shear Valve(s).
- ☐ Dispenser Containment Float(s) and Chain(s).

Dispenser ID:
- ☐ Dispenser Containment Sensor(s). Model:
- ☐ Shear Valve(s).
- ☐ Dispenser Containment Float(s) and Chain(s).

*If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility.

C. Certification

- I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; *(check all that apply)*: ☐ System set-up ☒ Alarm history report

Technician Name (print): **Jeff Conger** Signature: Jeff Conger

Certification No.: **A22219** License. No.: **ICC 1801782**

Testing Company Name: **Pinnacle Fuel Compliance Services, Inc.** Phone No.: **(408) 206-9840**

Testing Company Address: **P.O. Box 32849 San Jose, CA 95152-2849** Date of Testing/Servicing: **6/29/2016**

D. Results of Testing/Servicing

Software Version Installed: **329.01**

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments: UST TANKS ARE DOUBLE WALLED WITH MECHANICAL OVERFILL DROPTUBES.

DRAFT

F. In-Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☒ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

MONITORING SYSTEM CERTIFICATION

REVIEWED
By Greg Breshears at 8:02 am, Dec 05, 2018

For Use By All Jurisdictions Within the State of California
Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

D. Results of Testing/Servicing

Software Version Installed: **329.01**

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments:

Fuel Tanks are double wall with mechanical overfill device.

DRAFT

F. In-Tank Gauging / SIR Equipment:

☒ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☒ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

Testing Company Address: **P.O. Box 32849 San Jose, CA 95152-2849** Date of Testing/Servicing: **6/26/2018**

D. Results of Testing/Servicing

Software Version Installed: **329.01**

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments: UST TANKS ARE DOUBLE WALLED WITH MECHANICAL OVERFILL DROPTUBES.

F. In-Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☐ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☒ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☒ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

RESPONSE PLAN – PAGE 2

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. - A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. EXAMINATION RESULT: **PASS**

Congratulations! You have passed the above named examination. Your wallet card will be forwarded to you by ICC within six weeks from the last day of the month in which you tested. Generally, ICC certificates are current for two years; check with your state for expiration periods in your state.

You may request a wall certificate from ICC as well. This certificate will be provided at no cost to you, if you request it within 90 days of your exam. Only one wall certificate per exam passed will be provided to you at no charge. For more information on requesting a wall certificate, go to www.iccsafe.org/inspector.

It is extremely important that you notify Pearson VUE and ICC of any changes in name and/or address to avoid the possibility of your wallet card and/or certificate not being received. Please contact Pearson VUE at 800-275-8301 and ICC at certexam@iccsafe.org with changes to your name and address (name changes may require additional documentation). There may be an additional fee if a certification is re-issued due to a misspelled name or incorrect address.

The authenticity of this score report can be validated by using Pearson VUE's Online Score Report Authentication found at:

Re: Failure to Electronically Submit a Hazardous Materials Business Plan (HMBP) for SAN JOSE SMOG CHECK, 147 E SANTA CLARA ST STE B, SAN JOSE CA 95113.

Dear Business Owner/Operator,

Our records indicate that you have a Hazardous Materials Business Plan (HMBP) permit with our office because your facility handles hazardous materials above State reporting thresholds. However, your business has not submitted or recertified your facility's HMBP annually, as required by California Health and Safety Code section 25508(a)(1)(A).

Effective January 1, 2013, HMBPs are required to be submitted electronically. You may satisfy this requirement by using our local electronic reporting website, FrontCounter (https://frontcounter.sccgov.org/). Within 30 days, complete your annual submission using FrontCounter.

To request access to FrontCounter, visit the website and click "Sign up now." Complete the form using your Owner ID Number and PIN, provided above. As long as the information is entered correctly, you should receive an e-mail within minutes containing your username and password. Check your spam/junk e-mail folder for automated messages from DEH.HMCD@deh.sccgov.org if you have not received a response within 24 hours.
