EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 2 RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 8 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 8 UST sites within

approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 11 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SO CAL GAS/ALHAMBRA	FRONT ST. AND EDITH	NW 1/4 - 1/2 (0.448 mi.)	L64	245

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

BOB & GEORGE'S CHEVR	441 W VALLEY BLVD	ESE 0 - 1/8 (0.101 mi.)	D28	134

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist

NPL Status: Currently on the Final NPL
Substance ID: U228
CAS Number: 79-01-6
Substance: TRICHLOROETHYLENE (TCE)
Pathway: GROUND WATER PATHWAY
Scoring: 4

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 3) is a ground water plume that runs along the axis of the west fork of the Alhambra Creek in the San Gabriel ground water basin in Alhambra, Los Angeles County, California. The plume is about 2 miles long and 1 mile wide. Ground water is contaminated with trichloroethylene TCE) and perchloroethylene PCE), according to analyses by State agencies and local water companies. Many public wells in the area exceedthe EPA Suggested No Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts billion ppb) of TCE, a level considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service.
Status June 1984): A supplemental sampling program of contaminated wells

SAN GABRIEL VALLEY (AREA 3) (Continued) **1000114962**

will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of the contamination. This site, along with the three other San Gabriel Valley sites,was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

FIRE STATION #72 (Continued) **S101587102**

Violation Division: Los Angeles County Department of Public Works
Violation Program: UST
Violation Source: CERS,

Site ID: 19381
Site Name: CITY OF ALHAMBRA - FIRE DEPT #72
Violation Date: 07-18-2022
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: SB989 T2 DIESEL FILL SUMP FAILED TESTING ON 10/08/19.OVFL T2 FAILED 05/27/21. MUST SUBMIT PASSING RESULTS FOR THE FAILED SB989 AND OVFL.PERMITS WILL BE REQUIRED FOR REPAIRS.

Violation Date:	07-08-2019
Citation:	HSC 6.5 25144.6(b) - California Health and Safety Code, Chapter 6.5, Section(s) 25144.6(b)
Violation Description:	Failure to properly manage reusable soiled textile materials prior to being sent for laundering.
Violation Notes:	Returned to compliance on 07/08/2019. OBSERVATION: Reusable soiled textiles being managed on site were observed being stored on drums throughout the facility. Shop towels were placed in proper containers by the end of the inspection. CORRECTIVE ACTION: Submit documention to the CUPA demonstrating that you are properly managing reusable soiled textiles in accordance with HSC 25144.6(b).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Completed Document Type:	* Remedial or Removal Design
Completed Date:	07/14/1997
Comments:	DES/SOIL -- Approved the Engineering Design Report for the Alhambra MGP Site. The Design provides technical specifications for the excavation and removal of contaminated soil at the site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Plan
Completed Date:	05/30/1997
Comments:	RAP -- The Remedial Action Plan was approved for the project. The project will involve the relocation of affected residents and the excavation and removal of contaminated soil. All impacted residential properties will be returned to a safe use. It is anticipated that the project will begin on July 1 and take roughly 6 months to complete. ALLOC -- The allocoation of liability was completed in con- junction with approval of the RAP. The allocation of liability apportioned 82% to the Gas Company and 18% to orphan share. The allocation of liability was mailed to the Gas Company, and affected community and the public. CEQA -- The negative declaration for the Alhambra MGP was

SO CAL GAS/ALHAMBRA MGP (Continued) **S100714930**

finalized in conjunction with approval of the remedial action plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 08/23/1996
Comments: RI/FS -- The Department approved the RI/FS for the Alhambra Manufactured Gas Plant Site. The RI/FS identified wide- spread PAH and lead contamination in the surface and subsurface soils. The RI/FS characterized the lateral and vertical extent of the PAH and lead contamination at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Remedial Action Completion or Implementation
Completed Date: 02/11/1998
Comments: RMDL -- THE FINAL REMEDIAL ACTION REPORTS FOR THE SITE DESCRIBED IN DETAIL THE EXCAVATION AND REMOVAL ACTIVITIES THAT OCCURRED AT EACH RESIDENTIAL LOT. THE REPORT ALSO PRESENTED THE RESULTS OF THE CONFIRMATION SAMPLING AND THE STATISTICAL ANALYSIS CONDUCTED FOR EACH SITE SHOWING THAT THE ESTABLISHED CLEANUP VALUE WAS ACHIEVED.

Comments:	DESCRIBED IN DETAIL THE EXCAVATION AND REMOVAL ACTIVITIES
Comments Date:	02111998
Comments:	THAT OCCURRED AT EACH RESIDENTIAL LOT. THE REPORT ALSO
Comments Date:	02111998
Comments:	PRESENTED THE RESULTS OF THE CONFIRMATION SAMPLING AND THE
Comments Date:	02111998
Comments:	STATISTICAL ANALYSIS CONDUCTED FOR EACH SITE SHOWING THAT
Comments Date:	02111998
Comments:	THE ESTABLISHED CLEANUP VALUE WAS ACHIEVED.
Comments Date:	02251998
Comments:	CERT -- DTSC issued a certificate of completion to the Southern
Comments Date:	02251998
Comments:	California Gas Company for the Alhambra Manufactured Gas Plant
Comments Date:	02251998
Comments:	Site on 2/25/98.
Comments Date:	03211996
Comments:	Site conference held to outline SI requirements.
Comments Date:	04161996
Comments:	Enforceable agreement was signed between DSTC and SOCALGAS
Comments Date:	04161996
Comments:	to implement Chapter 6.85.
Comments Date:	05301997
Comments:	RAP -- The Remedial Action Plan was approved for the project.
Comments Date:	05301997
Comments:	The project will involve the relocation of affected residents
Comments Date:	05301997
Comments:	and the excavation and removal of contaminated soil. All
Comments Date:	05301997
Comments:	impacted residential properties will be returned to a safe
Comments Date:	05301997
Comments:	use. It is anticipated that the project will begin on July 1
Comments Date:	05301997
Comments:	and take roughly 6 months to complete.
Comments Date:	05301997
Comments:	ALLOC -- The allocoation of liability was completed in con-
Comments Date:	05301997
Comments:	junction with approval of the RAP. The allocation of liability
Comments Date:	05301997
Comments:	apportioned 82% to the Gas Company and 18% to orphan share.
Comments Date:	05301997

SO CAL GAS/ALHAMBRA MGP (Continued) **S100714930**

Comments:	The allocation of liability was mailed to the Gas Company, and
Comments Date:	05301997
Comments:	affected community and the public.
Comments Date:	05301997
Comments:	CEQA -- The negative declaration for the Alhambra MGP was
Comments Date:	05301997
Comments:	finalized in conjunction with approval of the remedial action
Comments Date:	05301997
Comments:	plan.
Comments Date:	07141997
Comments:	DES/SOIL -- Approved the Engineering Design Report for the
Comments Date:	07141997
Comments:	Alhambra MGP Site. The Design provides technical specifications
Comments Date:	07141997
Comments:	for the excavation and removal of contaminated soil at the
Comments Date:	07141997
Comments:	site.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Conferences for SB 923 Sites
Completed Date: 06/17/1999
Comments: CONF/SITE CONFERENCE -- Held a site conference for the Alhambra Combined Facility site. In attendance were Southern California Edison Company, City of Alhambra, and DTSC. The purpose of the meeting was to discuss ERAP requirements and scope the site investigation workplan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: ERAP Enforceable Agreements
Completed Date: 06/28/1999
Comments: Not reported

Completed Area Name: Area of Concern 1 (AOC-1)
Completed Sub Area Name: Not reported
Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 12/04/2008
Comments: AOC-1 Vapor Intrusion Modeling Report approved

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Expedited Remedial Action Program Agreement
Completed Date: 04/17/2000
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 08/22/2001
Comments: RAP - DTSC approved the draft Remedial Action Plan (RAP) for AOC-2 at the Alhambra combined facility Site. The draft RAP Proposed utilizing an in Situ Thermal Desorption System to treat contaminated soils impacted by past wood treating activities. It is anticipated that the project will take 6-8 months to complete. CEQA - DTSC approved the negative declaration in conjunction with the draft Remedial Action Plan (RAP) for the Alhambra combined facility Site. The draft RAP Proposes uitlizing an in Situ Thermal Desorption system to treat contaminated soils impacted by past wood treating activities. It is anticipated that the project will take 6-8 months to complete.

Background Info:	The site was the location of a pole treating facility from 1922 until 1957. Since 1957 the 32.55 acre property was used by Southern California Edison Company as a salvage center for metals recycling, storage of new and used electrical transformers, employee training facilities, and maintenance of fleet vehicles. A Preliminary Endangerment Assessment (PEA) conducted in 1999, determined that past uses of the site have resulted in the contamination of onsite soils with various metals, volatiles, polycyclic aromatic hydrocardons, polychlorinated biphenyls, and pentachlorophenol. Soil contamination has not impacted groundwater therefore the main threat is from direct contact. To expedite cleanup efforts the site was divided into three Areas of Concern (AOC). Currently AOC-2 where the former pole treatment area was located is undergoing remediation. The selected remedy for AOC-2 is In Situ Thermal Desorption The other AOC's still require further investigation.
Comments Date:	01311995
Comments:	Need to verify RCRA Lead.
Comments Date:	02012003
Comments:	In Situ Thermal Desorption system begins operating.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

EMCORE (ORTEL A DIV EMCORE) (Continued) **1000203445**

Waste Code: D018
Waste Description: Benzene

Waste Code: D021
Waste Description: Chlorobenzene

Waste Code: D026
Waste Description: Cresol

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P122
Waste Description: Zinc Phosphide Zn3p2, When Present At Concentrations Greater Than 10% (R,T)

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Discovery
Completed Date: 03/20/1991
Comments: Facility identified via a letter dated 03/20/91 from the Redevelopment Agency.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 04/11/1995
Comments: NFA FOR DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 07/15/1991
Comments: The site is a former gasoline station now owned and redeveloped by City. Soil is contaminated with petroleum products from the leak of underground tanks. L.A. County Dept of Public Works is overseeing site clean-up under Alhambra Redevelopment Agency lead. DTSC provided clean-up guidelines to the Agency.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/19/2023

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/19/2023

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/25/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TRIS: List of PFAS Added to the TRI

Section 7321 of the National Defense Authorization Act for Fiscal Year 2020 (NDAA) immediately added certain per- and polyfluoroalkyl substances (PFAS) to the list of chemicals covered by the Toxics Release Inventory (TRI) under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and provided a framework for additional PFAS to be added to TRI on an annual basis.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

East Map:	5630799 EL MONTE, CA
Version Date:	2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

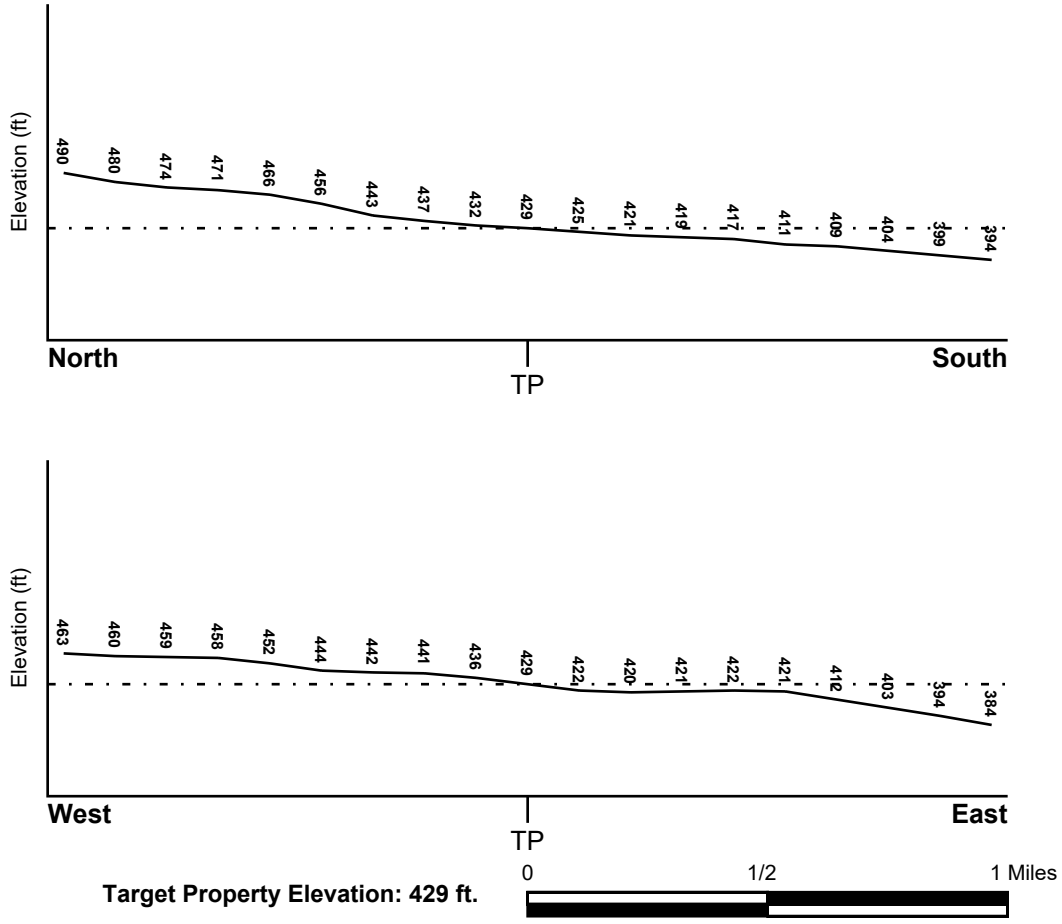
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1635F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1675F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LOS ANGELES	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
16	1/2 - 1 Mile SSW	S
1G	1/2 - 1 Mile SSW	S

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Public Records Request Number: PR3-122223-05

Locations: 612 N. Shorb Ave., Alhambra, CA 91803
1215 S. 6th St., Alhambra, CA 91803

APNs: 5350-007-900 & 5350-007-901

Dear Ms. Johnson:

On December 22, 2023, the Department of Toxic Substances Control (DTSC) received your email of the same date, requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

Many of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You will find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 818-717-6508 or via email at ChatsworthFileRoom@dtsc.ca.gov.

Sincerely,

Joseph M von Teichert

Joseph M von Teichert

INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.

2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.

3. A search for facility records can only be conducted by one or all of the following:

-- a) Facility Name, Address, or Identification Number

-- b) Facility Application Number, or Permit to Operate Number; or

-- c) Facility Notice of Violation/Notice to Comply Number.

4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.

5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.

6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.

7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.

8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.

9. The charge for the direct cost of duplication is as follows: Paper Copies, $0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, $5.00 each. After a preliminary estimate, advance payment may be required.

10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs $10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@aqmd.gov.

Hello,

This firm is performing a Phase I Environmental Site Assessment for the property located at the following addresses: 612 N Shorb Avenue and 1215 S 6th Street, Alhambra, CA 91803

APN: 5350-007-900 and 5350-007-901

We are requesting any information from your departments pertaining to:

- building permit records including demolitions, construction, tenant improvements, major sewer installations/removals, and certificates of occupancy on the property
- any reports of the storage, release or spillage of hazardous materials (HAZMAT), or substances or petroleum products that have ever been located on the property
- any underground storage tanks (USTs) and aboveground storage tanks (ASTs) on the property
- industrial wastewater discharge, clarifiers, storm water, or industrial waste water, including permits to operate and notices of violation on the property
- contaminated ground water or soil records on the property
- air emissions, including permits to operate, equipment lists and notices of violation on the property

Thank you,

Industrial Waste / Underground Storage Tanks / Stormwater

Back

You searched the following address:

Street Number: 612 Street Name: Shorb

Our office does not have any records (related to industrial waste/underground storage tanks/stormwater) for the requested site address.

Please double check the spelling of the street name or search a different address. Both street number and street name must be exact and spelled correctly as they appear for the facility on file. Do not include street direction prefix (i.e. N, S, E, W, etc...) or suffix (i.e. ST, AVE, RD, BLVD, etc...) unless they appear in the street name (i.e. AVENUE K, AVENIDA CESAR CHAVEZ, 10TH ST EAST, CROSSROADS PKWY N, etc...). Do not include any extra spaces after the street number or after the street name.

Our office does not have any records (related to industrial waste/underground storage tanks/stormwater) for the requested site address.

Please double check the spelling of the street name or search a different address. Both street number and street name must be exact and spelled correctly as they appear for the facility on file. Do not include street direction prefix (i.e. N, S, E, W, etc...) or suffix (i.e. ST, AVE, RD, BLVD, etc...) unless they appear in the street name (i.e. AVENUE K, AVENIDA CESAR CHAVEZ, 10TH ST EAST, CROSSROADS PKWY N, etc...). Do not include any extra spaces after the street number or after the street name.

CALIFORNIA - EPA Map of Radon Zones

http://www.epa.gov/radon/zonemap.html

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

All homes should be tested, regardless of zone designation.

IMPORTANT: Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of California" (USGS Open-file Report 93-292-I) before using this map. See http://energy.cr.usgs.gov/radon/grpinfo.html This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

RESUMES

Salena Johnson | Environmental Specialist

317 South Isis Avenue, Suite 207, Inglewood, California 90301 *310.854.6300*
salena.johnson@efiglobal.com

Professional Summary:

Ms. Johnson is an environmental specialist in EFI's Los Angeles, CA location. Her primary responsibilities are to conduct environmental research, request and review historical documentation and produce Phase I ESA reports for projects at commercial, industrial and residential sites. Ms. Johnson is experienced in the performance of Phase I environmental site assessments, data evaluation and technical report preparation, overseeing the drilling of soil borings, collecting soil, soil gas, and groundwater samples as well as monitoring oil excavations for contaminated media. Ms. Johnson has been in the industry since 2020.

Areas of Expertise:

- Phase I Environmental Site Assessments
  - Preparation
  - Data evaluation
  - Identification of potential environmental concerns

Licenses and Certifications:

OSHA 29 CFR 1910.120 40-Hour Safety Training

Project Experience:

Commercial Property with Upgradient Landfill, Riverside County, CA

Preparation of Phase I ESA as part of a commercial property. Previous Phase l ESA revealed historical upgradient landfill. Provided completion of report including site maps indicating wind and groundwater direction with outline of historical upgradient landfill. No further recommendations were necessary based on previous investigations.

Retail Property, Historical Gasoline Station, Fontana, CA

Preparation of Phase I ESA as part of a retail property's real estate due diligence. Historical documentation revealed historical gasoline station onsite. Provided completion of report including site maps outlining location of possible USTs and historical gasoline station. Recommended geophysical survey and subsurface investigation.

Commercial Property, Regional Groundwater Contamination, Costa Mesa, CA

Preparation of Phase I ESA as part of a commercial property's real estate due diligence. Site located within a regional groundwater issue from another source. Provided completion of report including site maps outlining origin of groundwater contamination.

Agricultural Property, Residential Redevelopment, Ventura, CA

Preparation of Phase I ESA as part of a real estate due diligence. Site was used for agricultural purposes with concerns of pesticide contamination. Provided completion of report including site maps outlining location of historical buildings associated with the agricultural purposes. Recommended completing shallow soil samples to test for pesticide contamination.

Heather Grizzell | Senior Project Manager

317 South Isis Avenue, Suite 207, Inglewood, California 90301 *310.854.6300*
Heather.Grizzell@efiglobal.com

Professional Summary:

Ms. Grizzell began work in the environmental industry in 2006 and entered the professional consulting field in 2007. Ms. Grizzell is an experienced environmental professional with experience working both for regulatory agencies and in the private sector. Ms. Grizzell has worked directly with clients and regulatory bodies to assess environmental conditions and has assisted in the development of plans by which to resolve such conditions. Ms. Grizzell's experience includes all stages of environmental due diligence including Phase I environmental site assessments, soil vapor surveys (Phase II), Property Condition Assessments, Seismic Risk Assessments, and project management of ALTA Surveys.

Ms. Grizzell meets the definition of an Environmental Professional as defined in 312.10 of 40 CFR 312 and ASTM International E-1527-13 standard.

Areas of Expertise:

- Phase I Environmental Site Assessment
- Property Condition Assessment
- Seismic Risk Assessment
- ALTA Surveys
- Team Management

Licenses and Certifications:

OSHA 29 CFR 1910.120 40-Hour Safety Training

OSHA 29 CFR 1910.120 8-Hour Refresher Safety Training (annual)

Environmental Professional, per the CFR Title 40, Chapter I, Subchapter J, Part 312, Subpart C, Section 312.21

Project Experience:

Housing Authority of the City of Los Angeles (HACLA), Los Angeles, California
Phase I Environmental Site Assessment
Ms. Grizzell conducted a Phase I of an approximately 99-acre project site including Jordan Downs Housing project, a 21-acre former steel mill (which was later remediated). Jordan Downs High School and privately owned industrial sites. Ms. Grizzell researched the property as part of an EIR and transferred the project to additional Site Assessment teams and Remediation. Involvement included attending meetings with the community and community activist. Ms. Grizzell continues to assess the property in updates as the property is undergoing redevelopment in phases.

Various Affordable Housing Developers, California
Phase I Environmental Site Assessments
Phase I Environmental Site Assessment Reports were conducted for various properties throughout the state of California for public agencies and private entities as potential sites for affordable

©2022 EFI Global, Inc.

housing projects. Special challenges involved with specific projects included soil sampling and pesticide testing for properties that were historically utilized for agricultural purposes.

Industrial Real Estate Firm, Los Angeles, California
Property Condition Assessments
Ms. Grizzell leads assessments of properties from Ventura to San Diego Counties for an industrial real estate firm acquiring properties in typically short escrows. Ms. Grizzell manages inspector and client needs to deliver quality final reports.

Lending Institutions, California
Environmental Site Assessment
Serves as senior project manager for lending sector projects which involve Phase I ESA, Property Condition Assessments, Seismic risk Assessments, and ALTA Surveys for local, regional and national lenders. Projects include adaptive reuse of existing historical other structures for affordable and low income housing and ground up construction projects on previously undeveloped, commercial and industrial properties.

Lending Intuition, Rosemead, California
Phase I Environmental Site Assessment, Firestone Boulevard – Southgate, California
Due diligence performed at a property which revealed a fill port during site inspection. In the 1940's and 1950's, the site had been identified as a historical "gas station" and "service station." Based on the observation of the fill port and historical data, a geophysical survey and soil sampling program was initiated at the site. As no contamination was encountered at the site after extensive testing, the bank loan was funded and a reserve account was establish to remove the UST post-closing.

Christopher Rude | Senior Project Manager, CSFT

317 Isis Avenue, Suite 207, Inglewood, California 90301 *310.854.6300*
christopher.rude@efiglobal.com

Professional Summary:

Mr. Christopher Rude is an Environmental Professional with approximately twenty-nine years of experience in preparing and managing Phase I and Phase II Environmental Site Assessments of various types of large and small commercial, heavy industrial, oil production, and manufacturing properties. Mr. Rude has worked directly with clients and regulatory agencies to determine and assess environmental impacts, develop plans by which mitigate such conditions, and carry out the planned approach for closure. Mr. Rude's experience includes all aspects of environmental projects including Phase I Environmental Site Assessments, soil, soil vapor and groundwater sampling - Phase II Subsurface Site Assessments, vapor intrusion risk assessments, site characterization, removal of Underground Storage Tanks (USTs), and multi-stage clarifiers, and remedial cleanups of properties impacted by arsenic, organochlorine pesticides, chlorinated solvents, and fuel hydrocarbons. Mr. Rude has completed numerous Phase II Environmental Site Assessments of dry cleaners, auto repair and gasoline service stations, Brownfield sites, oil field properties, plating facilities, and site related to the semiconductor industry. Mr. Rude has successfully obtained closure for numerous Brownfield sites on behalf of clients from DTSC, Los Angeles Regional Water Quality Control Board, Los Angeles County, Los Angeles City, and Ventura County Environmental Health. Mr. Rude has completed and conducted senior reviews of numerous wildfire soot, ash and char assessments of residential properties for major insurance carriers. Mr. Rude oversees and mentors Project Managers on all aspects of environmental site assessments, writing and communications with clients and agencies, and aids in the preparation of the staff to be promoted to the Phase II Environmental Site Assessment and Environmental Health and Safety Departments.

Areas of Expertise:

- Environmental Consulting
- Environmental Compliance
- Environmental Due Diligence (Phase I / II Environmental Site Assessments)
- Third Party Document Review
- Wildfire Soot, Ash and Char Sampling and Report Reviews

Licenses and Certifications:

- American Council for Accredited Certification, Council-Certified Fire & Smoke Damage Technician, No. 2009002
- Environmental Professional, per the CFR Title 40, Chapter I, Subchapter J, Part 312, Subpart C, Section 312.21
- OSHA 40-Hour Hazardous Waste Operations and Emergency Response Certified
- OSHA 8-Hour Hazardous Waste Operations and Emergency Response Certified

Project Experience:

Mr. Rude's current responsibilities as Senior Project Manager include the preparation of Phase I and Phase II Environmental Site Assessments throughout California and several western states. Additional responsibilities include managing, mentoring and training Project Managers in all

©2022 EFI Global, Inc.

aspects of Phase I and Phase II Environmental Site Assessments, Health and Safety Plans, marketing, and client relations, business development, and project management. Additionally, Mr. Rude is responsible for the completion and senior report review of Wildfire Soot, Ash and Char reports.

Sunflower Valley Farms LLC, Multiple Locations in Kings and Kerns Counties, CA
Phase I Environmental Site Assessment
Mr. Rude completed a Phase I Environmental Site Assessment for a 12,685 acre ranch developed with agricultural land, 120 active or abandoned oil wells, active oil sumps, hazardous materials, pesticide storage areas, and aboveground storage tanks. Phase II recommendations were made for active oil wells and oil sumps.

Primestor Development, Inc.
Phase I Environmental Site Assessment
Mr. Rude as the Senior Project Manager of a Phase I ESA and Asbestos/Lead Based Paint Survey of a 31-acre retail-commercial mall developed with twelve retail structures and medical clinic totaling approximately 383,000 square feet. The retail mall had undergone numerous subsurface assessments and remedial cleanup associated with a Leaking Underground Storage Tank (LUST) and Spills, Leaks, Investigations, and Cleanups (SLIC) cases associated with a former gasoline service station and former dry cleaning facilities. Case closure was issued by the overseeing regulatory agency for the LUST case. Review of available documentation indicated that the SLIC case was to be issued case closure for soil and groundwater.

Phase I Environmental Site Assessments
Mr. Rude as the Senior Project Manager of several Phase I Environmental Site Assessment reports which were completed on commercial, heavy industrial, manufacturing, oil production, and semi-conductor facilities throughout the United States. The sites were assessed due to the former underground storage tanks and long-term auto repair use of the property by multiple tenants. Several required Phase II Environmental Site Assessment. Results of the soil, soil vapor, and/or groundwater sampling indicated that the former or current uses did not represent an unacceptable risk to human health or the environment for commercial land use.

Major Insurance Institutions, Wildfire Soot, Ash and Char Assessments, Southern California
Mr. Rude has managed and conducted wildfire soot, ash and char assessments of residential properties with Southern California for several major insurance carriers in Southern California. Additionally, Mr. Rude is one of the lead senior reviewers of the assessment reports.

Phase II Environmental Site Assessments/Vapor Intrusion Risk Assessments
Mr. Rude has performed and provided project management on numerous Phase II Environmental Site Assessments on properties impacted by chlorinated solvents, fuel hydrocarbons, and heavy metals. Assessment activities also included oversight of geophysical surveys, sampling of soil, soil vapor, and groundwater using Geoprobe, hollow stem augers, or dual percussion air rotary rigs. Assessments also included monitoring for vapor intrusion and fixed gases. Conducted and prepared quarterly groundwater monitoring reports.

Professional Experience:

EFI Global Inc., Los Angeles, CA, Senior Project Manager, 2012 - Present
California Environmental, Agoura Hills, CA, Environmental Scientist, 1997 – 2012

November 14, 2023

City of Alhambra
c/o Corbis Studio
515 Flower Street, 18th Floor
Los Angeles, CA 90071
Attn.: Chuck Crowley

Subject: ***Asbestos and Lead Assessment***
612 West Shorb Avenue, Alhambra, CA 91803
EFI Job Number: 045.11973

1. Introduction

The City of Alhambra, c/o Corbis Studio (referred to hereunder as the client) retained EFI Global to perform sampling of building materials suspected to contain asbestos and surface coatings suspected to contain lead (i.e., suspect materials) within the subject property. EFI Global understands that the subject property is a two-story with basement, approximately 25,000 square foot Motel structure.

The purpose of the assessment was to identify whether asbestos-containing materials (ACM) and/or lead-based paint (LBP) were present so they may be properly managed.

The assessment was performed on October 26, 2023, October 27, 2023, and October 30, 2023, by Jacob Pulliam, a DOSH Certified Asbestos Consultant (CAC, DOSH Cert No. 12-4969) and California Department of Health (CDPH) Lead Sampling Technician (LST, Cert. No. LRC-00001469). The work was performed under the direction of Michael Pinkerton, a DOSH Certified Asbestos Consultant (CAC, DOSH Cert No. 20-6871) and Benjamin Curry, a CDPH Lead Inspector / Assessor (LIA, Cert. No. LRC-00000208).

During the assessment, no obvious signs of structural or fire damage were observed by the inspection in any areas of the subject properties.

2. Asbestos Assessment

The purpose of this assessment was to conduct bulk sampling in order to determine the presence of ACM, regulated asbestos-containing materials (RACM), and/or asbestos-containing construction materials (ACCM) at the subject properties so they may be properly managed. The scope of this assessment included a review of provided building records and/or previous investigation reports, visually identifying homogeneous sample areas, collecting bulk samples of building materials suspected to contain asbestos (i.e., suspect building materials), recording the friability and condition of suspect building materials, interpreting the laboratory results, and producing a written report of findings and recommendations. EFI requested but was not provided copies of previous investigation reports; it is assumed there are no such documents.

The sampling was performed in accordance with requirements of the following regulations:

- Asbestos Hazard Emergency Response Act (AHERA); 40 CFR 763 Subpart E
- Asbestos School Hazard Abatement Reauthorization Act (ASHARA); Section 206 of the Toxic Substance Control Act
- National Emissions Standards for Hazardous Air Pollutants (NESHAPS); 40 CFR 61 Subpart M.
- South Coast Air Quality Management District (SCAQMD) Rule 1403

This report is a record of activities performed, observations made, analytical results obtained, and our recommendations to date.

2.1 Asbestos Results Summary

The laboratory results indicate that the following materials contain asbestos above the threshold limit of 1%, or require additional analysis to confirm they are less than 1%, and are to be treated and disposed of as ACM.

- Thermal System Pipe Insulation – Interior Hallways (6% Amosite, 12% Chrysotile), samples; 03A-03E
- Acoustic Ceiling Material – Interior Hallways (3% Chrysotile), samples; 08A-08E
- Ceiling Plaster – Interior Rooms (3% Chrysotile), samples; 09A-09G
- Ceiling Tape – Interior Hallways and Rooms (6% Amosite, 12% Chrysotile), samples; 10A-10E

All of the above materials were found to be damaged and in poor condition at the time of the assessment.

All other materials sampled in this assessment were found to be None Detected for asbestos.

Please refer to Table 1 for a list of homogenous materials, their locations, asbestos content, friability, and estimated quantities. Sample locations are shown in the attached Figures. Analytical data can be found in Appendix II.

2.2 Methodology

All samples were collected using a clean knife, chisel or the appropriate sampling tool(s). Each sample was extracted carefully so as not to disturb adjacent materials while still penetrating through all layers of the material sampled. Each sample was sealed in the appropriately sized plastic baggie and the bag then labeled with a unique identification number. The sample number, description, and location were then recorded on a log and plotted on a floor plan of the structure or area, see Appendix I. Sampling tools were cleaned after collecting each sample. Any excess dust or debris from the sample location was cleaned using a moistened cloth. Whenever possible, samples were collected from previously damaged portions of the material in order to minimize damage to the material.

A total of 151 samples were submitted to Ecologics Laboratory located at 2487 East Orangethorpe Avenue in Fullerton, California, and can be reached at 714-632-8118. Ecologics is accredited under the NIST/NVLAP program for asbestos in bulk material by polarized light microscopy (PLM) and the State of California for asbestos analysis (NIST/NVLAP lab code 600190-0. The analytical report is provided in Appendix II.

The analyses of the samples in this report were performed using PLM in accordance with the EPA method 600/R-93/116. The phase abundances provided are visually estimated and expressed as percent area. Total percentage

of sample constituents may total greater than 100 due to trace amounts. The limit of detection for this analytical method is less than one percent (< 1%). In multilayer samples, unless otherwise specified, the asbestos concentration is reported for the layer where asbestos is found. These results lie within the statistical limits of variability calculated for standard reference samples routinely analyzed in the laboratory. On a per sample basis, the accuracy and precision of the results depend on the type of sample and its asbestos content.

2.3 Regulatory Limits

Government agencies have promulgated different regulatory threshold levels to classify materials containing asbestos. The levels of asbestos content and the terms used to classify them differ. Listed below are the current regulatory agencies that have defined materials containing asbestos, along with the respective action levels, regulatory terminology and applicability:

Agency / Regulation	Regulatory Code	Action Level (% Weight)	Terminology	Applicability
CAL OSHA	8 CCR Section 341.6I	> 0.1%	Asbestos-Containing Construction Material (ACCM)	Removal Work in California
Fed OSHA	29 CFR Section 1926.1101(b)	> 1.0%	Asbestos-Containing Material (ACM)	Removal Work in United States
NESHAP	40 CFR Part 61, Subpart M	> 1% and Friable	Regulated Asbestos-Containing Material (RACM)	Transport and Disposal of Waste in United States
SCAQMD	RULE 1403	>1%	Asbestos-Containing Material (ACM)	Removal Work, Transport and Disposal of Waste in SCAQMD District

2.4 Homogeneous Sample Materials Table

Homogeneous materials are defined as surfacing materials, thermal system insulation (TSI), or miscellaneous materials that are uniform in color and texture. Homogenous sample areas are the areas where homogenous materials are located. Multiple sample locations are selected within each homogenous sample area to be a true representation of each homogenous material. Typically, a minimum of three (3) samples must be collected from each homogeneous area when sampling materials that may have variable asbestos content because it was batch mixed or applied by different contractors. High asbestos content variability is especially true of surfacing materials (i.e., sprayed-on and/or troweled-on materials like plaster, fireproofing, and acoustic ceiling plaster) and TSI used to insulate pipes, boilers, tanks or ducts to prevent heat loss. As many as 9 samples may be collected of surfacing materials when they cover large surface areas.

It should be noted that materials which appear to be homogeneous may in fact be different materials, installed at different times and have different material content in terms of asbestos; only laboratory testing can determine whether they are really the same homogeneous area. Table presents the homogenous materials

identified during the assessment and the asbestos content of those identified materials. The homogenous materials found to contain asbestos are listed in **bold** type with ACM highlighted in **yellow**.

Table 1: Homogenous Building Materials & Asbestos Content

Sample Identification #	Material Description	Location	Asbestos Content (% Weight) *	Material Quantity **	Friability ***	Condition
01A – 01G	Plaster	Interior Throughout	None Detected	---	---	---

32A – 32C	HVAC Wrap	Attic	None Detected	---	---	---

** All quantities are approximations and should be verified by an abatement contractor.
*** Non-friable materials may be rendered friable during removal by mechanical or other aggressive methods

2.5 Asbestos Recommendations

EFI Global recommends that the identified damaged ACM/ACCM be removed by a CAL/DOSH registered asbestos abatement contractor. The abatement contractor should submit a Procedure 5 abatement notification, along with a detailed abatement work plan, prior to beginning abatement activities at the property. This recommendation is based on the observations made during the assessment of damaged thermal system pipe insulation, acoustic ceiling material and plaster ceiling material, with resulting debris on the floors, throughout the building. A Procedure 5 is required by South Coast Air Quality Management District (SCAQMD) when removing damaged asbestos from within the structure. Decontamination of all areas will be explained in details in the Procedure 5 work plan report. No persons, including owners and occupants, should enter the subject property until asbestos contamination has been removed and the impacted areas deemed clean by a Certified Asbestos Consultant.

Contractors are licensed for asbestos-related work by the California Department of Industrial Relations (DIR) Department of Occupational Safety and Health (DOSH). A list of contractors with current licenses may be found at: https://www.dir.ca.gov/databases/doshacru/acrusearch.html.

It is highly recommended that abatement monitoring be performed by the asbestos consultant if asbestos abatement is to be performed while non-abatement persons (employees, tenants, other building occupants, or general public) are present in adjacent areas. Abatement monitoring includes the collection of air samples in adjacent areas to demonstrate that asbestos fibers are not migrating out of the regulated areas. In addition to air sampling, the monitoring includes oversight of the abatement contractor to ensure that the work is being conducted in compliance with all applicable regulations and in accordance with the scope of work and

abatement specifications. Such abatement monitoring services can reduce risk and limit the legal liabilities of the building owner.

Any suspect materials, that are not identified above and may be impacted during work activities, must be presumed to contain asbestos until laboratory analysis of an adequate number of samples proves otherwise.

3. Lead-Based Paint Assessment

A total of 426 XRF readings were collected to test painted and coated surfaces for lead-based paint (LBP). The results are summarized in Section 3.1 and the table of results attached in Appendix III.

3.1 Lead Results Summary

The following materials were found to contain greater then 0.7 mg/cm^2 of lead and are considered lead-based paint:

- White Metal Drainpipe – Exterior, 9.55 to 14.97 mg/cm^2
- White Wood Awning – Exterior, 3.01, 3.07 and 3.59 mg/cm^2
- White Wood Drainpipe - Exterior, 10.07 mg/cm^2
- White Wood Cinerary Cover - Exterior, 14.84 mg/cm^2
- White Cement Door Frame - Exterior, 5.77 mg/cm^2
- White Metal Electric Pipe - Exterior, 4.94 mg/cm^2
- White Cement Window Seal - Exterior, 1.93 mg/cm^2
- White Stucco Awning - Exterior, 1.98 mg/cm^2

- White Metal Door – Hallway 8, 2.43 mg/cm^2
- Yellow Metal Engine – Room 75, 10.08 mg/cm^2

None of the other painted components tested by XRF were found to be at or above the respective levels considered to be lead-based paint (LBP); however, paint may contain detectable levels of lead in the coatings, which renders all work impacting those surfaces subject to the Cal/OSHA Lead in Construction Standard (Title 8 CCR 1532.1).

Sampling for this inspection was representative and any components that were not tested, but similar to those components that tested positive for LBP, shall be considered and treated as lead laden.

3.2 Methodology

XRF testing of the painted surfaces was performed in general accordance with Chapter 7 of the HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing. In every "room equivalent" within the tested property, one representative surface of each "testing combination" was tested. Multiple readings were collected to resolve inconsistencies in the test results.

The method employed was X-ray fluorescence (XRF) using a Heuresis PE 200i Cobalt 57. The instrument was operated in "Quick Mode," where the duration for each test result is determined by a combination of the:

- actual reading relative to the designated action level;
- age of the radioactive source; and
- substrate on which the test was taken.

The instrument's calibration was verified according to the manufacturer's specifications in compliance with the Performance Characteristic Sheet (PCS) developed for this instrument. The readings from this instrument produce a 95% confidence level that the "lead" reading accurately reflects the actual level of lead in the tested surfaces, relative to the federal action level.

3.3 Regulatory Limits

Government agencies have promulgated different regulatory threshold levels to classify Lead-Based Paint. Some of the established "levels" are quantified in different units of measurement. Listed below are the current regulatory agencies that have defined LBP, along with the respective action level:

Agency	Ordinance #	Action level (mg / cm^2)	Action level (ppm)
HUD / EPA	24 CFR 35.86 & 40 CFR 745.103	1.0 mg / cm^2	5,000 ppm
L.A. County	Title 11, 11.28.010	0.7 mg / cm^2	Not Specified
OSHA / CAL OSHA	29 CFR 1926.62 & Title 8, 1532.1	Not Specified	600 ppm

The Federal threshold for lead-based paint, 0.5 percent by weight, is higher than the local Los Angeles County action level and the lower of the two thresholds is the one that everyone within Los Angeles County must adhere to. In recognition of the various action levels the testing results are classified as follows for this report:

- Painted surfaces with readings at or above 0.7 mg / cm^2 are considered Positive
- Painted surfaces with readings below 0.7 mg / cm^2 are considered Negative

The individual readings have been provided in the XRF Results Table located in Appendix IV. Any future change in action levels by one of the regulating agencies may affect the classification of results.

For purposes of this survey, any material containing any detectable level of lead is subject to OSHA's Lead Exposure in Construction Rule (29 CFR Part 1926) and CAL/ OSHA Lead in Construction Standard (Title 8 CCR 1532.1). Any work that impacts these materials must be performed in accordance with these and any other applicable standards.

3.4 Lead Recommendations

All lead laden components identified in this report shall be demolished or abated by certified lead trained personnel in accordance with all applicable federal, state and local regulations. All suspected lead laden components shall undergo paint film stabilization before components are removed by manual intact methods. LBP that will be impacted by hot work (welding, torch Cutting, etc.) must be removed from the component by lead abatement workers to allow a minimum of 6 inches' clearance on either side of the location of the hot work to prevent the volatilization of lead into the air.

Paint found not to contain lead concentrations considered to be LBP may still contain detectable levels of lead in the coatings which make work impacting those surfaces subject to Cal / OSHA Lead in Construction Standard 1532.1. This standard requires that respiratory protection and containment is used when performing "trigger tasks" until results of personal air monitoring indicate that workers are not exposed to lead above the action level or permissible exposure level. Additionally, the demolition or removal of lead or components with lead coatings is subject to Title 17, Division 1, Chapter 8 of the California Code of Regulations.

Should the contractor choose not to remove the lead-based paint materials and demolish the structure in its entirety with the lead-paint components in place, it is recommended that the contractor stabilize the LBP components prior to demolition and then collect samples representative of the entire mass of the prospective waste stream. These samples should then be analyzed according to the United States Environmental Protection Agency (EPA) and the California Department of Toxic Substances Control (DTSC) prior to disposal facility acceptance.

4.0 Limitations

The inspection and testing report is based on the condition of the subject property existing and apparent on the precise time and exact date of the inspection. Not all conditions may be apparent on the inspection and testing date due to weather conditions, inoperable systems, inaccessibility of areas of the subject property, or for other reasons.

EFI Global has prepared this report for the exclusive use of its client. EFI Global, in performing its professional services, has applied scientific judgment that it believes is consistent with industry standards. EFI Global inspected structures and/or contents in a good faith effort to observe pertinent detail. Due to the limitations of time, access, and other variables, certain details may have been overlooked. EFI Global has relied in good faith upon the information and representations of others in the preparation of this report and the opinions expressed

herein. Accordingly, EFI Global accepts no responsibility for deficiencies, omissions, misrepresentations, or fraudulent acts of persons interviewed.

EFI Global assumes no liability for any loss, injury, claim, or damage arising directly or indirectly from any use or reliance on this report or the opinions expressed herein. EFI Global makes no warranty, express or implied. This report is limited only to the samples taken and locations sampled. Additional sampling may be needed to further identify other pollutants or asbestos affected areas inside the property.

Since destructive investigation was not performed during the survey, the report may not reveal concealed asbestos-containing materials. Subsequently, additional investigation including construction documents review and/or destructive investigation is recommended as a precaution to prevent accidental exposure when construction or demolition is planned for this facility.

Thank you for the opportunity to work with you on this project. Please contact the undersigned at (310) 854-6300, if you have questions or if additional services are necessary.

Paola Ducoing – Approved by

NAD = no asbestos detected; NA = not analyzed, PS = positive stop; Reporting Limits: CVES = 1%, 400 PT CT = 0.25%, 1,000 PT CT = 0.1%. The analyses of the samples in this report were performed and analyzed in accordance with the procedures outlined in EPA 600/R-93/116 (Method for Determination of Asbestos in Building Materials); EPA 600/M4-82-020 (Interim Method for the Determination of Asbestos in Bulk Insulation Samples) and US Federal Register 40 CFR Appendix E to Subpart E of Part 763 (Interim Method of the Determination of Asbestos in Bulk Insulation Samples). Samples were analyzed using Calibrated Visual Estimate (CVES), therefore results may not be reliable for samples with low concentration levels or other Non-Friable Organically Bound (NOB) materials. The limit of detection for this analytical method is less than one percent (<1%) and total sample constituents may total greater than 100% due to trace amounts. These results lie within the statistical limits of variability calculated with standard reference materials routinely analyzed in the laboratory. In multi-layer samples, unless otherwise specified, the asbestos concentration is reported for the layer where asbestos is found. This report only relates to the samples that were submitted and Ecologics Lab and its personnel assumes no responsibility and/or are not liable for any misinformation provided by the client such as “sample location” or “sample type.” This report may contain specific data not covered by NVLAP and is identified if footnotes are present. This report was issued by Ecologics Lab which is accredited by NVLAP (Lab Code 600190-0) and may not be reproduced except in full, without written approval of this laboratory. This report may not be used by the client to claim product certification, approval or endorsement by NVLAP, NIST or any agency of the Federal Government. NVLAP Lab Code: 600190-0

LEAD HAZARD EVALUATION REPORT

Section 1 — Date of Lead Hazard Evaluation October 27, 2023, October 28, 2023 & October 30, 2023

Section 2 — Type of Lead Hazard Evaluation (Check one box only)

☐ Lead Inspection ☐ Risk assessment ☐ Clearance Inspection ☐ Other (specify) _____

Section 3 — Structure Where Lead Hazard Evaluation Was Conducted

Address [number, street, apartment (if applicable)]	City	County	Zip Code
612 W. Shorb Avenue	Alhambra	Los Angeles	91803

Construction date (year) of structure	Type of structure	Children living in structure?
1960's	☐ Multi-unit building ☐ School or daycare ☐ Single family dwelling ☐ Other Motel	☐ Yes ☐ No ☐ Don't Know

Section 4 — Owner of Structure (if business/agency, list contact person)

Name	Telephone number
NA	N/A

Address [number, street, apartment (if applicable)]	City	State	Zip Code
612 W. Shorb Avenue	Alhambra	CA	91803

Section 5 — Results of Lead Hazard Evaluation (check all that apply)

☐ No lead-based paint detected ☐ Intact lead-based paint detected ☐ Deteriorated lead-based paint detected

☐ No lead hazards detected ☐ Lead-contaminated dust found ☐ Lead-contaminated soil found ☐ Other _____

Section 6 — Individual Conducting Lead Hazard Evaluation

Name	Telephone number
Michael Pinkerton	310-854-6300

Address [number, street, apartment (if applicable)]	City	State	Zip Code
317 W. Isis Avenue, Suite 207	Inglewood	CA	90301

CDPH certification number	Signature	Date
3397		11/14/23

Name and CDPH certification number of any other individuals conducting sampling or testing (if applicable)

Ben Curry, 0000208

Section 7 — Attachments

A. A foundation diagram or sketch of the structure indicating the specifc locations of each lead hazard or presence of lead-based paint;
B. Each testing method, device, and sampling procedure used;
C. All data collected, including quality control data, laboratory results, including laboratory name, address, and phone number.

Dear Certified Asbestos Consultant or Technician:

Enclosed is your certification card. **To maintain your certification, you must abide by the rules printed on the back of the certification card.**

Your certification is valid for a period of one year. If you wish to renew your certification, you must apply for renewal at least 60 days before the expiration date shown on your card. [8 CCR 341.15(h)(1)].

Please hold and do not send copies of your required AHERA refresher renewal certificates to our office until you apply for renewal of your certification.

Certificates must be kept current if you are actively working as a CAC or CSST. The grace period is only for those who are not actively working as an asbestos consultant or site surveillance technician.

Please contact our office at the above address or email w any changes in your contact/mailing information within 15 days of the change.

Sincerely,

Jeff Ferrell
Senior Safety Engineer

January 23, 2024

ESA
Attn.: Rid Hollands
San Diego, CA

Subject: **Water and Sanitary Sewer Service for the project located at 612 W Shorb Street, Alhambra**

Dear Mr. Hollands,

The City maintains and operates a State Water Resources Control Board approved potable water system. The water supply system is in compliance with all State and Federal regulations.

The City also operates and maintains the sewage collection system that services this property. Both systems have sufficient capacity to serve your proposed project located at 612 W Shorb Street, in the City of Alhambra.

However, should existing water service and/or sewer mains require upgrades to accommodate your project, this shall be completed at your expense and in accordance with the City of Alhambra Utilities Department Conditions of Approval letter.

If you have any questions, or require further information, you can contact me at (626) 570-3278.

Sincerely,

Martin Ray
Director of Public Works & Utilities

MEMORANDUM

Date:	May 20, 2024	GTS: 230702
To:	City of Alhambra	
From:	GTS	
cc:	ESA	
Subject:	Traffic Impact Study Scoping memorandum (updated)	
Project:	Alhambra Community Center	

General Technologies and Solutions (GTS) is pleased to present the Traffic Impact Study Scoping memorandum for the purposes of the Alhambra Community Center project within the City of Alhambra. The project involves the proposed Alhambra Community Center, to be constructed at 612 West Shorb Street, Alhambra, CA 91803.

This scoping memorandum consists of project description and maps, trip generation estimates, an overview of traffic study scenarios, and analysis of VMT screening criteria. The project is expected to generate 721 daily trips with 48 AM peak hour trips and 63 PM peak hour trips, and is expected to screen out for VMT analysis due to the project type (community institution).

1. Project Information

The Alhambra Community Center is a proposed development on an approximately 1.38-acre site located at 612 W. Shorb St. within the City of Alhambra. The Project Site is currently developed with an existing one- and two-story former clinic building in the northern portion of the Project Site and associated surface parking in the southern portion.

Of the alternatives presented, the City Council (at the meeting on March 25, 2024) selected the option known as “Connecting Gems.” This alternative would remove the south portion of the existing building but preserve the north portion, and construct a new wing. The new Community Center would contain a range of amenities such as multi-purpose space, fitness and art studios, classrooms, lounge, conference room, kitchen, and administrative offices, totaling approximately 25,000 square feet of new development.

The project would close W Shorb Street between S 7th Street and S 6th Street.

2. Study Area and Assumptions

The project site is a 1.38-acre parcel on a city block bounded by W Shorb St to the north, S 7th St to the west, and S 6th St to the east. To the south, the site abuts an alleyway and existing commercial and institutional uses (a fire station, tire shop, and restaurant). The selected concept design is shown in Figure 1 and the project's location within the City of Alhambra is shown in Figure 2.

Per the City of Alhambra's general plan, S 6th St is classified as a secondary arterial. W Shorb St and S 7th St are classified as local streets. Nearby to the south (200 feet distant) is Valley Boulevard, a primary arterial.

At present, W Shorb Street runs continuously from S Ethel Street to S 6th Street (about 4,500 feet). As such, it is part of the City's grid system of streets and runs parallel to Valley Boulevard. The project would curtail W Shorb Street at its intersection with S 7th Street. This means that traffic connecting between W Shorb St and S 6th St would have to seek alternate routes. Drivers going eastbound on W Shorb St intending to get to S 6th St would need to turn left onto Valley Blvd for one block at the unsignalized intersection of S 7th St and Valley Blvd, then make another left turn onto S 6th St.

According to California Vehicle Code (CVC) Section 21101, local authorities may close streets to vehicular traffic when, in the opinion of the legislative body having jurisdiction, the street is no longer needed for vehicular traffic.

The project site is located within the Public Facilities land use designation area, per the City's general plan. Adjacent land uses are institutional (Alhambra High School sports field), religious institutions, and low-density residential.

Information on future projects was obtained from the City of Alhambra. For this analysis, a review was carried out of all projects that are proposed, on appeal, approved, or under construction. A map of cumulative project locations is shown in Figure 3. The cumulative project list is provided in Table 1. Expected trip generation from cumulative trips on roads adjacent to the project site is shown in Figure 4.

The study intersections reflect the access routes to and from the project site. Based on the City of Alhambra *Transportation Study Guidelines*, the following intersections are proposed to be included and are displayed on the map in Figure 2:

1. W Shorb St at S 6th St (unsignalized)
2. Valley Blvd at S 6th St (signalized)
3. Valley Blvd at S 7th St (signalized)
4. W Shorb St at S 7th St (unsignalized)

Per the City of Alhambra *Transportation Study Guidelines*, turning movement data at the study intersections will be collected from 7:00 AM to 9:00 AM and from 4:00 to 6:00 PM. In addition, 24-hour Average Daily Traffic (ADT) will be counted on W Shorb St between S 6th St and S 7th St. The vicinity map with study intersections and count locations is shown in Figure 3.

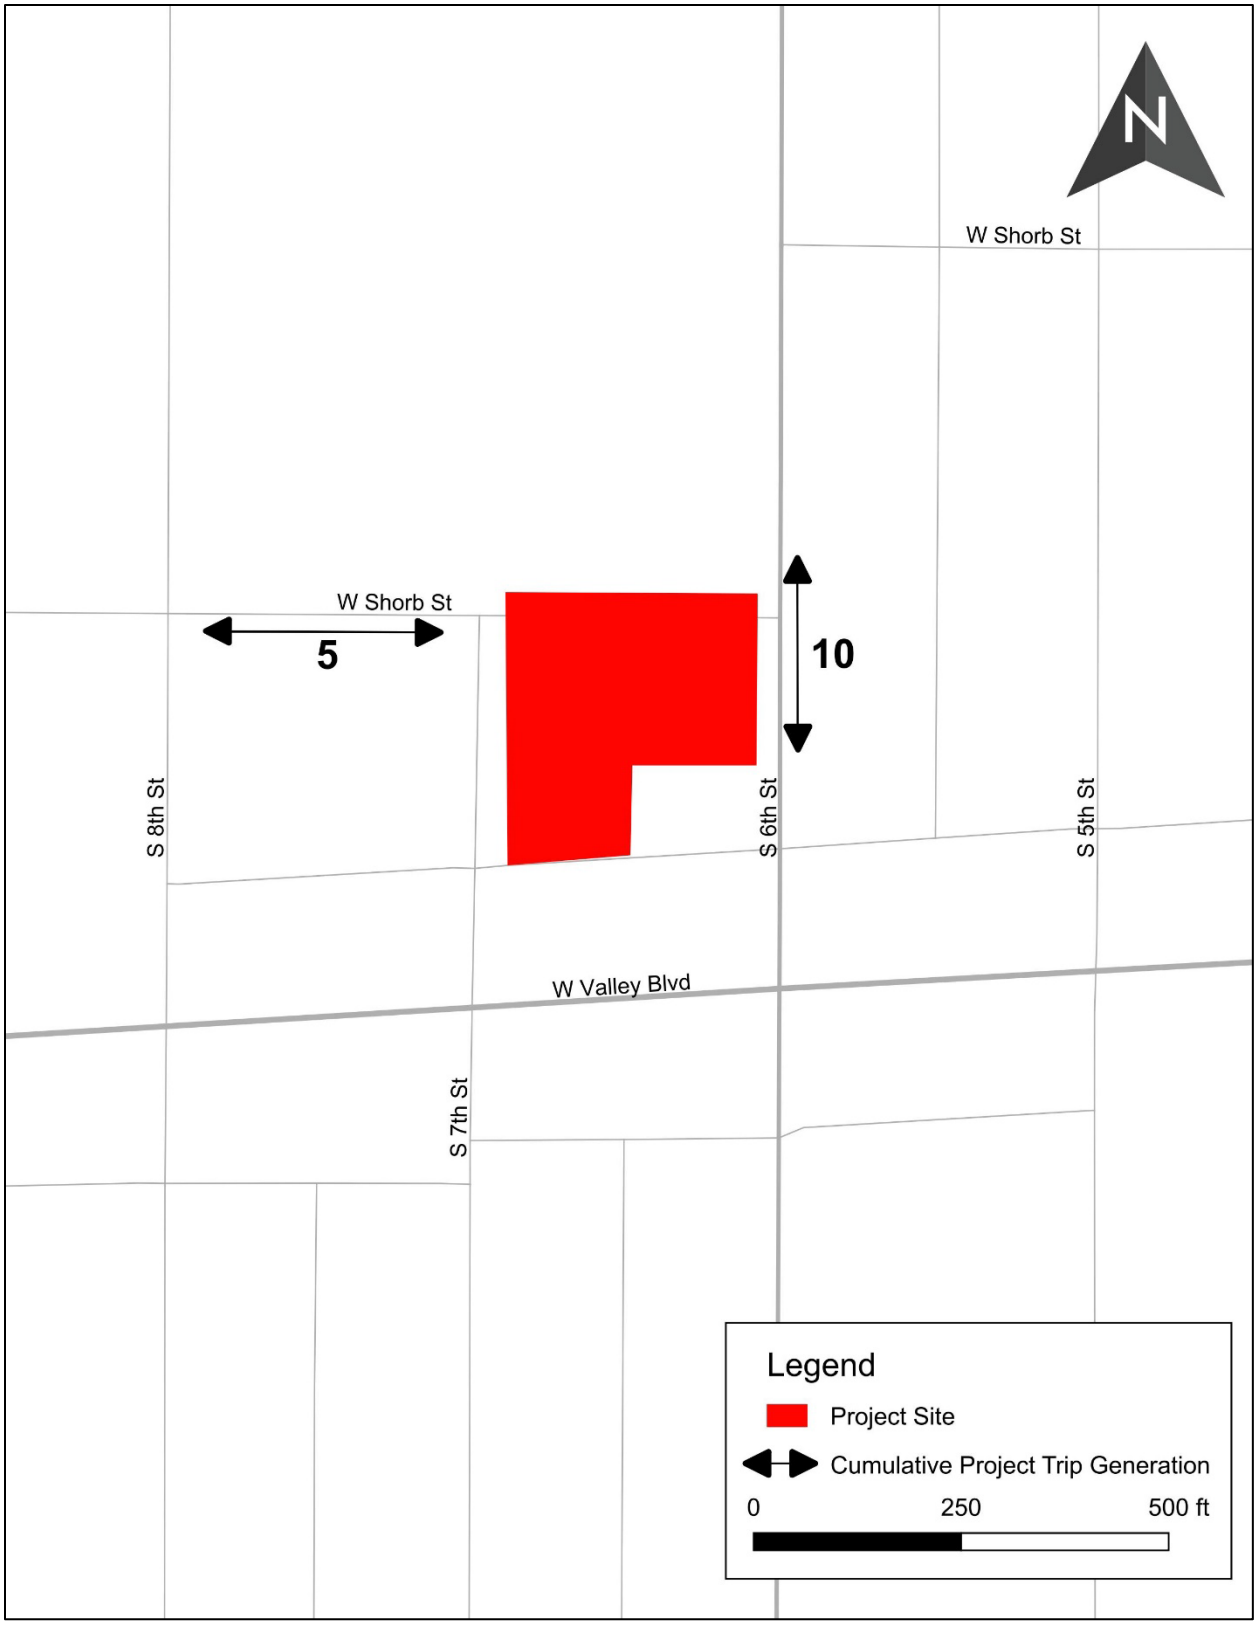

Figure 4. Trip Generation from Cumulative Projects

3. Trip Generation

The trip generation calculations use the following trip generation rates of the *Institute of Transportation Engineers (ITE) Trip Generation Manual, 11th Edition (2021)*:

- Recreational Community Center (ITE Land Use Code: 495)

Based on the proposed gross floor area (GFA) of the development, the project is expected to generate 721 daily trips (48 AM peak hour and 63 PM peak hour trips). The trip generation based on the currently planned GFA is shown in Table 2. It should be noted that the final project plans may have a lower GFA. Therefore the number of trips generated may ultimately be lower. Trip generation estimates in the final Traffic Impact Study will be updated based on the final GFA figures.

Table 2. Project Trip Generation

				AM Peak Hour			PM Peak Hour		
Land Use	**Area**	**Units**	**Daily**	**In**	**Out**	**Total**	**In**	**Out**	**Total**
Trip Rates									
495 - Recreational Community Center	1	1000 sq. ft. GFA	**28.82**	1.26	0.65	**1.91**	1.18	1.33	**2.50**
Project Trip Generation									
495 - Recreational Community Center	25	1000 sq. ft. GFA	721	32	16	48	29	33	63
Total Trip Generation			**721**	32	16	**48**	29	33	**63**

Source: Institute of Transportation Engineers (ITE), Trip Generation, 11th Edition, 2021.

4. Trip Distribution and Assignment

The distribution and assignment of project trips will be determined based on the prevailing travel patterns, which will be obtained when traffic counts are collected at nearby intersections.

5. Traffic Study Scenarios

Per the City of Alhambra Transportation Study Guidelines (p. 7), A transportation study which includes LOS analysis shall be required for a proposed project that meets any of the following criteria:

- When either the AM or PM peak hour trip generation is expected to exceed 100 vehicle trips from the proposed development

- Projects that will add more than 50 trips during the AM or PM peak hours to any intersection
- Any project where variations from the standards and guidelines provided in this manual are being proposed
- When determined by the City Traffic Engineer that existing or proposed traffic conditions in the project vicinity warrant evaluation

The proposed project does not meet any of the above criteria. However, since the project involves closing one block of W Shorb Street such that W Shorb Street will no longer connect to S 6th Street, which will change traffic patterns, it is considered consistent with best practices to carry out a LOS analysis. Therefore, LOS analysis will be included in the Traffic Impact Study. The proposed project driveways will also be analyzed to generate on-site queue lengths.

The following scenarios will be evaluated for LOS, per the City's guidelines:

- Existing conditions
- Opening year
- Opening year plus project

Per the City's guidelines, the Intersection Capacity Utilization (ICU) methodology will be used to determine LOS at signalized intersections and the Highway Capacity Manual (HCM) methodology will be used to determine LOS at unsignalized intersections.

In addition to the scenario analysis outlined above, the Traffic Impact Study will include the following elements:

- On-site Parking Analysis will be included.
- Access and Circulation Analysis will be included. This will address on-site circulation turning movements and truck circulation/loading-unloading.
- A truck turning exhibit will be included showing trash pick-up and deliveries.
- As part of the Access and Circulation Analysis, Sight Distance at the project driveways will also be evaluated.
- A CEQA Assessment for Active Transportation and Public Transit Analysis will be conducted.

6. VMT Screening Analysis

Per the "VMT Analysis Methodology" section of the *City of Alhambra Transportation Study Guidelines for Vehicle Miles Traveled and Level of Service Assessment*, some project types have been identified as having the presumption of a less than significant impact. The following VMT screening analysis follows the project steps outlined in the City's guidelines.

Step 1: Transit Priority Area Screening

Projects located within a Transit Priority Area (TPA) may be presumed to have a less than significant impact. The project site is within a TPA. However, per the City's guidelines, this criterion is not applicable to projects with a floor area ratio (FAR) of less than 0.75. The current planned FAR of the project is 0.42. Therefore, the project does not meet this screening criterion.

Step 2: Low VMT Area Screening

The project is within a low VMT-generating area. The SGVCOG (San Gabriel Valley Council of Governments) VMT Evaluation Tool Report is shown in Figure 5.

Step 3: Project Type Screening

The following is one of the uses that can be presumed to have a less than significant impact absent substantial evidence to the contrary, as its uses are local serving in nature:

- Community institutions (public libraries, fire stations, local government)

With the proposed use (Community Center) falling within the above category of community institutions, this project can be screened out for VMT analysis.

Appendix B
Notice of Preparation

City of Alhambra

City of Alhambra

Gateway to the San Gabriel Valley

111 South First Street Alhambra California 91801

NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT

DATE OF NOTICE:	May 28, 2024
TO:	State Clearinghouse, Agencies, Organizations, and Interested Parties
LEAD AGENCY:	City of Alhambra
SUBJECT:	Notice of Preparation of a Draft Environmental Impact Report
PROJECT TITLE:	Alhambra Community Center Project
REVIEW PERIOD:	May 28, 2024 through June 27, 2024
SCOPING MEETING:	June 18, 2024, at 6:00 pm at Alhambra Public Library, Reese Hall (101 South 1st Street, Alhambra, CA 91801)

This Notice of Preparation (NOP) has been prepared to notify agencies and interested parties that the City of Alhambra (City), as the Lead Agency, will prepare a Draft Environmental Impact Report (EIR) for the proposed Alhambra Community Center Project (Project) pursuant to the California Environmental Quality Act (CEQA) Guidelines Section 15082. This NOP provides information about the Project and its potential environmental effects and requests that comments be provided on the proposed scope and content of the Draft EIR.

PROJECT LOCATION

The Project Site is located at 612 W. Shorb Street on an approximately 1.77-acre (77,192-square-foot) site within the City of Alhambra (City), see figures below. Specifically, the Project site is located on a horizontally oriented, 'L'-shaped plot between S. 7th Street and S. 6th Street and includes the right-of-way at W. Shorb Street to the north. The Project site Assessor's Parcel number is 5350-007-900.

PROJECT DESCRIPTION

The City of Alhambra (City), proposes to develop the Alhambra Community Center Project on the 612 W. Shorb Street site, which totals approximately 1.37 acres (59,485 square feet [SF]) and also on the adjacent W. Shorb Street right-of-way, which the City intends to abandon and the Alhambra Unified School District intends to transfer its reversionary interest (curb, gutter, sidewalk, and street between 6th and 7th Streets) to the City so as to expand the Project site by 17,707 SF. These two areas total 77,192 SF (1.77 acres) (the Project site) and are improved with an existing one- and two-story abandoned brick (21,470 SF) medical clinic building (the Shorb Clinic) sited on the northern portion of the

Project site with associated surface parking found in the southern portion for the Project site.

The Project intends to adaptively reuse the northwest portion of the existing Shorb Clinic building's two-story element (approximately 9,000 SF), known as the west wing and demolish the balance of the existing Shorb Clinic facility. Along with the 9,000 SF of the existing Shorb Clinic building's west wing to be renovated and adaptively reused, the City intends to construct a new one- and two-story community center building (up to a height of approximately 38 feet) totaling 16,000 SF, hereinafter referred to as the east wing and north pavilion, along with associated parking and site improvements containing an additional approximate 35,650 SF of hardscaped open space and courtyards and 16,542 SF of exterior landscape areas, parkways and plantings.

POTENTIAL ENVIRONMENTAL IMPACTS OF THE PROPOSED PROJECT

The Initial Study prepared for the Project addresses potential environmental impacts that may result from implementation of the Alhambra Community Center Project. As evaluated in the Initial Study, the following issues would result in no impact or less than significant impacts and will not require further analysis in the Draft PEIR: aesthetics, agriculture and forestry resources, air quality, energy, greenhouse gas, hazards and hazardous materials, hydrology and water quality, land use and planning, mineral resources, population and housing, public services, recreation, transportation, utilities and service systems, and wildfire.

The Draft EIR will address the Project's potential effects for all other environmental resource areas as outlined in Appendix G of the State CEQA Guidelines, which includes the following:

- Biological Resources
- Cultural Resources
- Geology and Soils
- Noise
- Tribal Cultural Resources

The Draft EIR will propose mitigations to avoid and/or reduce impacts identified as being potentially significant, identify and evaluate a reasonable range of project alternatives, and compare the environmental impacts of the alternatives to the impacts of the proposed Project. The EIR will also include other required information including discussions about: 1) any significant environmental effects that cannot be avoided if the Project is implemented; 2) any significant irreversible and irretrievable commitments to resources; 3) growth-inducing impacts of the proposed Project; 4) effects found not to be significant; and 5) cumulative impacts.

PROJECT SCOPING PROCESS

Circulation of this NOP starts a 30-day public review and comment period on the scope of the Draft EIR that begins on May 28, 2024, and ends on June 27, 2024, at 5:00 p.m. All interested parties, including the public, responsible agencies, and

trustee agencies, are invited to provide comments and input on the scope of and content of the environmental analysis to be addressed in the Draft EIR. Responsible and trustee agencies should provide comments and input related to the agencies' respective areas of statutory responsibility. Comments received during the scoping period will be considered during preparation of the Draft EIR. Public agencies and interested parties will have an additional opportunity to comment on the proposed Project during the 45-day public review period to be held after the publication of the Draft EIR.

SCOPING MEETING

The City will conduct a Public Scoping Meeting to present the proposed Project and the EIR process and to receive public comments. The City invites interested parties to the following public scoping meeting for the proposed Project to learn more about the Project, ask questions, and submit comments:

Meeting Details: June 18, 2024, from 6:00 p.m. to 7:00 p.m. at Alhambra Public Library, Reese Hall

PUBLIC REVIEW AND COMMENT PERIOD

At this time, the City is soliciting comments on the scope of the EIR, including potential environmental impacts of the Project and alternatives to be considered. Pursuant to Public Resources Code Section 21080.4(a) and CEQA Guidelines Sections 15082(b) and 15096(b)(2), agencies must limit comments to environmental information about the agency's area of statutory responsibility. For all commenters, comments must be specific and related directly to the Project (CEQA Guidelines Section 15082[b][3]). Comments will be considered when preparing the Draft EIR's discussion of environmental impacts, mitigation measures, and alternatives. Because of time limits mandated by State law, comments must be received no later than 5:00 p.m. on June 27, 2024. Please include the name, mailing address, and email address of the commenter. Written comments may be submitted via the following:

Mail to: Mike Macias
City of Alhambra, Parks and Recreation Department
111 South First Street
Alhambra, CA 91801
Phone: (626) 570-3298
Email: mmacias@cityofalhambra.org

For comments submitted via email, please include "NOP Comments: Alhambra Community Center Project" in the subject line and the name and physical address of the commenter in the body of the email.

All comments on environmental issues received during the public scoping period will be considered and addressed in the Draft EIR, which is anticipated to be available for public review in the summer of 2024.

For questions regarding this notice, please contact Mike Macias at the contact information provided above.

DOCUMENT AVAILABILITY

The NOP and Initial Study are available online at the City's website (https://www.cityofalhambra.org/743/Alhambra-Community-Center-Project) and the CEQAnet website (https://ceqanet.opr.ca.gov/). A hardcopy of the NOP and Initial Study are available for review at the following locations:

Alhambra City Hall
Parks and Recreation Department
111 South First Street
Alhambra, CA 91801

Alhambra Civic Center Library
Reference Desk
101 South 1st Street
Alhambra, CA 91801

The document will be available to view from Monday through Thursday between 8:00 am and 5:30 pm.

Notice of Preparation and Scoping Meeting Comments

Notice of Preparation and Scoping Meeting Comments

Pursuant to the provision of CEQA Guidelines Section 15082, the City of Alhambra (City) circulated a Notice of Preparation (NOP) for the Alhambra Community Center Project (Project) to State, regional, and local agencies, interested organizations, and members of the public for a 30-day period, commencing May 28, 2024, and ending June 27, 2024. The purpose of the NOP was to formally convey that the City was preparing a Draft EIR for the Project and to solicit input regarding the scope and content of the Draft EIR.

A total of eight written comment letters and emails responding to the NOP were submitted to the City. In addition, four comment cards and verbal comments were received and documented at the in-person Public Scoping Meeting held on June 18, 2024. The table below provides a summary of all comments received in response to the NOP.

Organization or Affiliation	Name	Date Received	Comment Summary
Native American Heritage Commission	Andrew Green, Cultural Resources Analyst	June 3, 2024	Requests for the AB 52 and SB 18 process to be followed.
Los Angeles County Sanitation Districts	Patricia Horsley, Environmental Planner, Facilities Planning Department	June 13, 2024	Provides details on sewerage service, wastewater flows, connection fees, and growth forecast capacities.
Resident, Alhambra Historical Society	Susan Saunders	June 18, 2024 (Scoping meeting written and verbal comment)	Requests for the corner stone of the original site to remain intact and requests arts and cultural elements and landscaping on site.
Resident	L. Armendariz	June 18, 2024 (Scoping meeting written and verbal comment)	Concerned about the lack of attendance at the meeting and if outreach was conducted. Concerned that the Fire Department and Council members were not present at the meeting.
Alhambra Latino Association	Teresa Ybarra	June 18, 2024 (Scoping meeting written and verbal comment)	Concerned about the public meeting process and requests clarification on different aspects of the project.
Alhambra Historical Society	Chris Olson	June 18, 2024 (Scoping meeting written and verbal comment)	Requests confirmation on public review length.

Organization or Affiliation	Name	Date Received	Comment Summary
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Requests additional information about the use of the event space and if it will be available when football games are held at Moor Field.
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Suggests incorporation of a stage space to allow productions to be held.
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Concerned about lighting along 6th Street and how it will impact neighbors and affect public loitering at night.
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Requests additional information on the uses of the event space, if there will be a fee to use the space, and how event spaces will be equally shared and scheduled.
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Concerned about public transportation access and bike parking.
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Concerned about public outreach and if the public and Council members have been notified.
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Requests solar panels and large windows to be included in the project design.
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Requests the event space to be as flexible as possible with both indoor and outdoor uses. Requests a canopy or shade structure, seating, and a water feature or misting station.
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Requests accessibility to be part of the design, including handicap parking and ramps.
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Requests careful guidelines on only allowing service animals into event spaces.

Organization or Affiliation	Name	Date Received	Comment Summary
Resident	Resident	June 18, 2024 (Scoping meeting verbal comment)	Requests adequate outdoor seating with shade, including on the rooftop event space.
N/A	Ray Van Ness	June 24, 2024	Supportive of the preservation and adaptive reuse of the “Connecting Gems” design. Provides a history of the site and design process. Requests mitigation measures to protect the building’s historically significant character-defining features, to salvage historic materials, and include interpretive features detailing the site’s history. Requests retention of the site’s historic eligibility status, conformance with rehabilitation standards, and retention of a qualified preservation consultant throughout the Project.
Alhambra Historical Society and Alhambra Preservation Group	Chris Olson and Oscar Amaro	June 25, 2024	Supportive of the rehabilitation and adaptive reuse of the “Connecting Gems” design. Provides a history of the site and design process. Requests identification of design alternatives. Requests mitigation measures to protect the building’s character-defining features, to salvage historic materials, and include interpretive features detailing the site’s history. Requests retention of the site’s historic eligibility status, conformance with rehabilitation standards, and retention of a qualified preservation consultant throughout the Project.

Organization or Affiliation	Name	Date Received	Comment Summary
Historical Preservation Foundation of the Native Sons of the Golden West	Carl von Bargen	June 25, 2024	Provides the history and purpose of the Historical Preservation Foundation of the Native Sons of the Golden West. Supportive of the Alhambra Historical Society and Alhambra Preservation Group efforts. Supportive of a design option which preserves most of the historical and architecturally significant portions of the building.
Gabrieleño Band of Mission Indians – Kizh Nation	Andrew Salas, Chairman	June 21, 2024	Requests consideration of alternatives that retain and preserve the building. Provides a history of the Gabrieleño Band of Mission Indians- Kizh Nation. Supportive of the Alhambra Historical Society and Alhambra Preservation Group efforts to preserve the site.
N/A	Judith Garcia	June 27, 2024	Supportive of the preservation and adaptive reuse of the “Connecting Gems” design. Provides a history of the site and design process. Requests mitigation measures to protect the building’s historically significant character-defining features, to salvage historic materials, and include interpretive features detailing the site’s history. Requests retention of the site’s historic eligibility status, conformance with rehabilitation standards, and retention of a qualified preservation consultant throughout the Project.

Organization or Affiliation	Name	Date Received	Comment Summary
Resident	Laura Longoria	June 28, 2024	Supportive of the preservation and adaptive reuse of the “Connecting Gems” design. Provides a history of the site and design process. Requests mitigation measures to protect the building’s historically significant character-defining features, to salvage historic materials, and include interpretive features detailing the site’s history. Requests retention of the site’s historic eligibility status, conformance with rehabilitation standards, and retention of a qualified preservation consultant throughout the Project. Requests consideration of the green street rain water filtration system.

Re: 2024051172, Alhambra Community Center Project, Los Angeles County

Dear Mr. Macias:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b)). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1)). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements.** If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.

AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project: Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

- **a.** A brief description of the project.
- **b.** The lead agency contact information.
- **c.** Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).
- **d.** A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).

2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report: A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subds. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1(b)).

- **a.** For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).

3. Mandatory Topics of Consultation If Requested by a Tribe: The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

- **a.** Alternatives to the project.
- **b.** Recommended mitigation measures.
- **c.** Significant effects. (Pub. Resources Code §21080.3.2 (a)).

4. Discretionary Topics of Consultation: The following topics are discretionary topics of consultation:

- **a.** Type of environmental review necessary.
- **b.** Significance of the tribal cultural resources.
- **c.** Significance of the project's impacts on tribal cultural resources.
- **d.** If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).

5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process: With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).

6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document: If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

- **a.** Whether the proposed project has a significant impact on an identified tribal cultural resource.
- **b.** Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

7. Conclusion of Consultation: Consultation with a tribe shall be considered concluded when either of the following occurs:

a. The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or

b. A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).

8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document: Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).

9. Required Consideration of Feasible Mitigation: If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).

10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:

a. Avoidance and preservation of the resources in place, including, but not limited to:

i. Planning and construction to avoid the resources and protect the cultural and natural context.

ii. Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.

b. Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:

i. Protecting the cultural character and integrity of the resource.

ii. Protecting the traditional use of the resource.

iii. Protecting the confidentiality of the resource.

c. Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.

d. Protecting the resource. (Pub. Resource Code §21084.3 (b)).

e. Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).

f. Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).

11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource: An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:

a. The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.

b. The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.

c. The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf

SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf.

Some of SB 18's provisions include:

1. Tribal Consultation: If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).
2. No Statutory Time Limit on SB 18 Tribal Consultation. There is no statutory time limit on SB 18 tribal consultation.
3. Confidentiality: Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).
4. Conclusion of SB 18 Tribal Consultation: Consultation should be concluded at the point in which:
    a. The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
    b. Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: http://nahc.ca.gov/resources/forms/.

NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center (https://ohp.parks.ca.gov/?page_id=30331) for an archaeological records search. The records search will determine:
    a. If part or all of the APE has been previously surveyed for cultural resources.
    b. If any known cultural resources have already been recorded on or adjacent to the APE.
    c. If the probability is low, moderate, or high that cultural resources are located in the APE.
    d. If a survey is required to determine whether previously unrecorded cultural resources are present.

2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.
    a. The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
    b. The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

3. Contact the NAHC for:
   a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.
   b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.

4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.
   a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, §15064.5(f) (CEQA Guidelines §15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.
   b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.
   c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, §15064.5, subdivisions (d) and (e) (CEQA Guidelines §15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@NAHC.ca.gov.

Sincerely,

Andrew Green

VIA EMAIL mmacias@cityofalhambra.org

Mr. Mike Macias, Director of Parks and Recreation
City of Alhambra, Parks and Recreation Department
111 South First Street
Alhambra, CA 91801

Dear Mr. Macias:

NOP Response to Alhambra Community Center Project

The Los Angeles County Sanitation Districts (Districts) received a Notice of Preparation (NOP) of a Draft Environmental Impact Report (DEIR) for the subject project located in the City of Alhambra on May 31, 2024. The proposed project is located within the jurisdictional boundaries of District No. 16. We offer the following comments regarding sewerage service:

1. The wastewater flow originating from the proposed project will discharge to a local sewer line, which is not maintained by the Districts, for conveyance to the Districts' Alhambra "A" Line Trunk Sewer, located in East San Marino Avenue, at South Almansor Street. The Districts' 27-inch diameter trunk sewer has a capacity of 8.2 million gallons per day (mgd) and conveyed a peak flow of 5.2 mgd when last measured in 2015.

2. The expected average wastewater flow from the project, described in the Initial Study as a 25,000 square feet community center, is 3,125 gallons per day. For a copy of the District's average wastewater generation factors, go to www.lacsd.org, under Services, then Wastewater Program and Permits and select Will Serve Program, and click on the Table 1, Loadings for Each Class of Land Use link.

3. The wastewater generated by the proposed project will be treated at the Whittier Narrows Water Reclamation Plant (WRP) located near the City of South El Monte, which has a capacity of 15 mgd and currently processes an average recycled flow of 8.9 mgd, or at the Los Coyotes WRP located in the City of Cerritos, which has a capacity of 37.5 mgd and currently processes an average recycled flow of 18.8 mgd or at the A.K. Warren Water Resource Facility (formerly known as the Joint Water Pollution Control Plant) located in the City of Carson, which has a capacity of 400 mgd and currently processes an average flow of 247.2 mgd.

4. The Districts are empowered by the California Health and Safety Code to charge a fee to connect facilities (directly or indirectly) to the Districts' Sewerage System or to increase the strength or quantity of wastewater discharged from connected facilities. This connection fee is used by the Districts for its capital facilities. Payment of a connection fee may be required before this project is permitted to discharge to the Districts' Sewerage System. For more information and a copy of the Connection Fee Information Sheet, go to www.lacsd.org, under Services, then Wastewater (Sewage) and select Rates & Fees. In determining the impact to the Sewerage System and applicable connection fees, the Districts will determine the user category (e.g. Condominium, Single Family Home, etc.) that best represents the actual or anticipated use

of the parcel(s) or facilities on the parcel(s) in the development. For more specific information regarding the connection fee application procedure and fees, please contact the Districts' Wastewater Fee Public Counter at (562) 908-4288, extension 2727.

5. In order for the Districts to conform to the requirements of the Federal Clean Air Act (CAA), the capacities of the Districts' wastewater treatment facilities are based on the regional growth forecast adopted by the Southern California Association of Governments (SCAG). Specific policies included in the development of the SCAG regional growth forecast are incorporated into clean air plans, which are prepared by the South Coast and Antelope Valley Air Quality Management Districts in order to improve air quality in the South Coast and Mojave Desert Air Basins as mandated by the CAA. All expansions of Districts' facilities must be sized and service phased in a manner that will be consistent with the SCAG regional growth forecast for the counties of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial. The available capacity of the Districts' treatment facilities will, therefore, be limited to levels associated with the approved growth identified by SCAG. As such, this letter does not constitute a guarantee of wastewater service but is to advise the City that the Districts intend to provide this service up to the levels that are legally permitted and to inform the City of the currently existing capacity and any proposed expansion of the Districts' facilities.

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2742, or phorsley@lacsd.org.

Very truly yours,

Patricia Horsley

To: Macias, Mike <mmacias@cityofalhambra.org>
Subject: Alhambra Health Center comment

Dear Mr. Macias:

Thank you for the opportunity to comment on the Alhambra Community Center Project (Project), which is planned on the former site of the Alhambra Health Center (612 West Shorb Avenue, Alhambra, CA 91803). These comments are in response to the Notice of Preparation of a draft Environmental Impact Report (DEIR) for the proposed Project.

I support the preservation and adaptive reuse of the northernmost portion of the Alhambra Health Center as is proposed in Alternative Design II "Connecting Gems". Thank you to the Alhambra City Council for selecting this as the proposed design for the Project. My comments in this NOP response focus on the effects of the Project in the area of Cultural Resources, which is identified in the NOP as an environmental resource area whose impacts are required to be addressed in the Project's DEIR.

Historical Significance of the Alhambra Health Center

The Alhambra Health Center is historically and architecturally significant to Alhambra, the state of California and our nation. Built in 1930, it features a classic Monterey Colonial Revival architectural style and was designed by LA County Architect Karl W. Muck. The Alhambra Health Center is listed in the California Register of Historical Resources in the California Office of Historic Preservation's Built Environment Resources Directory (BERD), and two historic resources surveys completed in 1984 and 2023 designated the Alhambra Health Center as formally eligible for the National Register of Historic Places.

Evaluation of Design Alternative II "Connecting Gems" in DEIR

On March 25, 2024 Alhambra City Council voted unanimously to adopt Design Alternative II "Connecting Gems" as the proposed design of the Project.

As currently proposed, the Project would raze the eastern one-story portion of the former Alhambra Health Center as well as the south-extending two-story portion. The Project would preserve and adaptively reuse the northernmost, two-story wing of the Alhambra Health Center.

The City of Alhambra must honor the unanimous March 25, 2024 Alhambra City Council decision, and the DEIR needs to evaluate Design Alternative II, also known as "Connecting Gems" for the Project.

Mitigating the Project's Effects on the Alhambra Health Center's Historic Fabric

The former Alhambra Health Center possesses extensive character-defining features, both on the exterior and interior of the building, which make up the building's rich historic fabric. I request that the DEIR address and propose the appropriate mitigation measures to protect the building's historically significant character-defining features.

The demolition of any portion of the Alhambra Health Center must include a plan to salvage historic materials from the building should community organizations or individuals express an interest in preserving those elements off-site.

The DEIR should also include a plan for interpretative features within the project that educate the general public about the original Alhambra Health Center, celebrate its rich history and connect residents with the legacy of this site, which proudly served the San Gabriel Valley community for 60 years.

Construction Compatibility

The Project and the adaptive reuse of the Alhambra Health Center should not jeopardize its present eligibility for the National Register of Historic Places designation, its listing on the California Register of Historic Resources and its future local landmark status. The Project as a whole must conform to the Secretary of the Interior's Standards for rehabilitation, and the City of Alhambra should retain a qualified preservation consultant throughout the entirety of the Project.

Thank you for your consideration!

Sincerely,

Ray Van Ness

Subject: Notice of Preparation (NOP) Comments - Alhambra Community Center Project

Dear Mr. Macias,

Thank you for the opportunity to comment on the Alhambra Community Center Project, which is planned on the former site of the Alhambra Health Center (612 West Shorb Avenue, Alhambra, CA 91803). These comments are in response to the Notice of Preparation of a draft Environmental Impact Report (DEIR) for the proposed Alhambra Community Center Project (Project).

On behalf of both Alhambra Historical Society (AHS) and Alhambra Preservation Group (APG), we submit these comments and the need to consider alternatives that retain and preserve the historic Alhambra Health Center as part of the ongoing environmental review process.

Both AHS and APG have long considered the Alhambra Health Center to be a highly significant historical and architectural treasure in Alhambra. In April 2021, November 2023 and March 2024, AHS and APG submitted written comments opposing the demolition of the Alhambra Health Center for the proposed Alhambra Community Center. In December 2023, representatives from both AHS and APG participated in a tour of the Alhambra Health Center which included Alhambra Mayor Ross J. Maza, City of Alhambra representatives, members of the project team, representatives from the LA Conservancy and representatives from Chattel, Inc., a historic preservation consultant. In March 2024, more than 25 Alhambrans joined us in providing comments that encouraged Alhambra City Council to adopt project design Alternative II, “Connecting Gems”, which called for the preservation of a major portion of the most historically and architecturally significant part of the former Alhambra Health Center.

We commend the Alhambra City Council for selecting “Connecting Gems” for the Project, which was a good compromise in its design.

AHS and APG support the rehabilitation and adaptive reuse of the northernmost portion of the Alhambra Health Center, as is proposed in “Connecting Gems.” We also look forward to engaging with the City of Alhambra throughout the EIR process to ensure that the appropriate mitigation measures are taken to preserve and protect the Alhambra Health Center and that the proposed new construction is compatible with this historic resource.

Our comments in this NOP response focus on the effects of the Alhambra Community Center Project (Project) in the area of Cultural Resources, which is identified in the NOP as an environmental resource area whose impacts are required to be addressed in the Project’s DEIR.

A. Historical and Architectural Significance of the Alhambra Health Center

The Alhambra Health Center, located at 612 West Shorb Street in Alhambra, was built in 1930 and features a classic Monterey Colonial Revival architectural style. The Alhambra Health Center is listed in the California Register of Historical Resources in the California Office of Historic Preservation’s Built Environment Resources Directory (BERD). (Primary Number: 437894; OTIS ID: 35405; Evaluation Information: 2S2, 08/08/1994, DOE-19-94-0338-0000 | 2S2, 08/08/1994, HRG940202Z | 3S, , 1801-0031-0000; Construction Year: 1930)

In both 1984 and 2023, an Alhambra Historic Resources Survey Report designated the Alhambra Health Center as formally eligible for the National Register of Historic Places. The California Department of Parks and Recreation (DPR) Primary Record for the Alhambra Health Center, dated June-July 2023, states:

> “612 W. Shorb Street has been formally determined eligible for listing in the National Register of Historic Places, therefore it is automatically listed in the California Register of Historical Resources. The property appears eligible for listing at the local level.
>
> The property is significant as an example of 1930s institutional development in Alhambra. During the late 1920s and early 1930s, the County of Los Angeles expanded health care facilities to include satellite clinics located outside of major hospitals. These health clinics were intended to provide basic health care to the local communities. The Alhambra Health Center was established in 1930 to provide basic care to a territory of approximately 130,000 residents. The establishment of the Shorb Clinic in 1930 reflects the city’s growing population as well as new municipal health provisions.
>
> The property is also significant as an excellent example of Monterey Colonial Revival style architecture in Alhambra. The building was designed by County architect Karl W. Muck, and at the time of its dedication, it was described as ‘constructed along the Monterey type of architecture showing Andalusian and colonial California influence’ (Los Angeles Times, August 14, 1930). It exhibits

high quality of design and distinctive characteristics that are associated with the style as expressed by its form, massing, composition, and architectural details, including its brick construction, complex roof, and balcony. The Monterey Colonial Revival style developed in and around Monterey and combined vernacular adobe construction with elements of American Federal and Greek Revival architecture, including multi-light sliding sash windows, louvered shutters, paneled doors, and Classical details executed in wood. The style's most distinguishing characteristic is a second-floor covered wood balcony, often cantilevered, extending the length of the primary façade, and sometimes wrapping one or two sides."

B. Design Alternative II "Connecting Gems", adopted as the Project's proposed design by Alhambra City Council on March 25, 2024

On March 25, 2024 Alhambra City Council voted unanimously to adopt Design Alternative II "Connecting Gems" as the proposed design of the Alhambra Community Center Project.

As currently proposed, the Project would raze the eastern one-story portion of the former Alhambra Health Center as well as the south-extending two-story portion. The Project would preserve and adaptively reuse the northernmost, two-story portion of the Alhambra Health Center.

The City of Alhambra must honor the unanimous March 25, 2024 Alhambra City Council decision, and the DEIR must therefore evaluate Design Alternative II, also known as "Connecting Gems" for the Project.

We specifically ask for a response to the following query: Please identify the number of design alternatives that will be addressed in the DEIR, and provide a brief description of what each will include.

C. Mitigating the Project's Effects on the Alhambra Health Center's Historic Fabric

The former Alhambra Health Center possesses extensive character-defining features, both on the exterior and interior of the building, which make up its rich historic fabric. We expect that the DEIR will identify and propose the appropriate mitigation measures to protect those character-defining features.

As stated in the 2023 DPR Primary Record on the Alhambra Health Center, it exhibits a high quality of design and distinctive characters that are associated with the Monterey Colonial Revival style. Special care must be taken in preserving both the center's exterior features including wood doors, multi-light sliding sash windows, louvered shutters and its most distinguishing characteristic, and a second-floor covered wood balcony, which extends the length of the primary façade. Its interior features, which includes a wooden staircase to the second floor, rooms with wood-paneling, rooms with hexagonal-tiled floors, tile mosaics, wood-paneled doors and various fixtures, also demand special care in their preservation.

The demolition of any portion of the Alhambra Health Center must include a plan to salvage historic materials from the building should community organizations or individuals express an interest in preserving those elements off-site.

Additionally, the DEIR should also include a plan for interpretative features within the project that educate the general public about the original Alhambra Health Center, celebrate its rich history and connect residents with the legacy of this site, which proudly served the San Gabriel Valley community for 60 years.

D. Construction Compatibility

The Alhambra Health Center's present eligibility for the National Register of Historic Places designation, its listing on the California Register of Historic Resources and its future local landmark status should not be jeopardized by the adaptive reuse of the current structure.

We expect to see extensive details in the DEIR about the adaptive reuse as well as the compatibility of the new development in regards to massing, materials, height and design elements. The project as a whole must conform to the Secretary of the Interior's Standards for rehabilitation, and the City of Alhambra should therefore retain a qualified preservation consultant throughout the entirety of the project.

As you are aware, Alhambra Historical Society and Alhambra Preservation Group are Alhambra's most prominent historic preservation non-profit organizations. Established in 1966 and 2003 respectively, both organizations' all-volunteer board of directors work to preserve and elevate Alhambra's historically, culturally, and architecturally significant buildings and rich heritage through education and advocacy. The Alhambra Historical Society operates a museum, located at 1550 West Alhambra Road, Alhambra, CA 91801. We look forward to continuing our work to preserve, protect and celebrate Alhambra' rich history.

Thank you for your consideration. Please do not hesitate to contact us at alhambrahistsoc@att.net.

Kind regards,

Chris Olson

Subject: Notice of Preparation (NOP) Comments - Alhambra Community Center Project

Dear Mr. Macias,

Thank you for the opportunity to comment on the Alhambra Community Center Project, which is planned on the former site of the Alhambra Health Center (612 West Shorb Avenue, Alhambra, CA 91803). These comments are in response to the Notice of Preparation of a draft Environmental Impact Report (DEIR) for the proposed Alhambra Community Center Project.

On behalf of the Historical Preservation Foundation of the Native Sons of the Golden West, we submit these comments regarding the need to consider alternatives that retain and preserve the historic Alhambra Health Center as part of the ongoing environmental review process.

The Historical Preservation Foundation of the Native Sons of the Golden West ("HPF") was established in March 2000, and is an independent, nonprofit, tax exempt 501 (c)(3) corporation which functions under the corporation laws of the State of California. The mission of the HPF is to preserve California's history, making it accessible, informative, and meaningful to the public through the restoration, preservation and promotion of historical sites and events accomplished through donations, grants, and sponsorships. The organization has raised over $600,000 from its

6,000 members and 71 parlors located throughout the state. Over 1,500 grants have been awarded to historical organizations including the State of California, to meet their needs in preserving their California history.

The Historical Preservation Foundation (HPF) of the Native Sons of the Golden West operate as the historic preservation directive for the fraternal order of the Native Sons of the Golden West, one of the leading California historical preservation organizations. Through the efforts of the Native Sons, California historical landmarks such as Sutter's Fort, James Marshall Gold Discovery Site, the Donner Pioneer Monument and the all the California Missions have been preserved for future generations to enjoy and appreciate.

Today, it continues to preserve, restore, and recognize significant historical sites which include numerous state parks and local sites throughout California, and ranging from museums and cemeteries, to historical buildings, theaters, and many other noted historical venues and landmarks. Its recipients for grants or matching grants have included California State Parks, National Parks, County Museums, community organizations and activities, and higher education, which include providing scholarships for the Western Archives Institute.

The Alhambra Health Center is listed on the California Register of Historical Sites and is eligible for inclusion on the National Register. The HPF considers the Alhambra Health Center which was built in 1928 as part of the State of California and Los Angeles County's Health Program to serve the residents of the state and county, to be a historical preservation project which meets our foundations' mission and objectives. We fully support the efforts of the Alhambra Historical Society and Alhambra Preservation Group, who on three separate occasions submitted written comments opposing the demolition of the Alhambra Health Center for the proposed Alhambra Community Center. These comments as well as strong support from the community of Alhambra provided the stimulus for the Alhambra City Council to select a design option which preserves most of the of the historical and architecturally significant portions of the nearly 100-year-old brick building.

The Historical Preservation Foundation and the Native Sons of the Golden West have been a leader in preserving the history of California, and we proudly support the Alhambra Historical Society and Alhambra Preservation Group in preserving the Alhambra Health Center and its importance to the Alhambra community and Los Angeles County. We look forward to working with the City of Alhambra, Alhambra Historical Society and Alhambra Preservation Group in supporting Alhambra's commitments to preserving, protecting, and celebrating Alhambra' rich history.

Thank you for your consideration.

Kind regards,

Carl Von Bargen

Carl Von Bargen, HPF Chairman
Historical Preservation Foundation of the Native Sons of the Golden West

GABRIELEÑO BAND OF MISSION INDIANS - KIZH NATION
Historically known as The San Gabriel Band of Mission Indians
recognized by the State of California as the aboriginal tribe of the Los Angeles basin

Friday, June 21, 2024

Mr. Mike Macias
City of Alhambra, Parks and Recreation Department
111 South 1st Street
Alhambra, CA 91901

Subject: Notice of Preparation (NOP) Comments- Alhambra Community Center Project

Dear Mr. Marcias,

Thank you for the opportunity to comment on the Alhambra Community Center Project planned at the former site of the Alhambra Health Center (612 West Shorb Avenue, Alhambra, CA 91803). These comments are in response to the Notice of Preparation of a draft Environmental Impact Report (DEIR) for the proposed project. On behalf of the Gabrieleno Band of Mission Indians – Kizh Nation, we urge you to consider alternatives that retain and preserve the historic Alhambra Health Center as part of the ongoing environmental review process.

The Gabrieleno Band of Mission Indians – Kizh Nation are the original aboriginal tribe of the greater Los Angeles Basin, with roots dating back to the time of the Spanish Missionaries and the Mission San Gabriel. Our tribal members have lived in the San Gabriel, Alhambra, El Monte, Monterey Park, and Los Angeles areas for the past 250 years. Since its opening in 1931, the Alhambra Health Center has provided essential services and care to our people, helping us endure the economic and political uncertainties of the mid-20th century.

We consider the Alhambra Health Center to be a significant historical and architectural treasure in Alhambra. We fully support the efforts of the Alhambra Historical Society and Alhambra Preservation Group, who have repeatedly opposed the demolition of the Alhambra Health Center for the proposed community center. These efforts, along with strong community support, have led the Alhambra City Council to choose a design option that preserves the majority of the historic and architecturally significant portions of the 95-year-old health center.

The Gabrieleno Band of Mission Indians – Kizh Nation has been recognized by the State of California since 1994, with all current members having certified genealogical records tracing back to the Mission San Gabriel starting in 1771. Our ancestors were instrumental in building the Mission San Gabriel, El Molino Viejo (the old grist mill), and the Zanja Madre ("mother ditch" for irrigation), all of which are still preserved today. They also worked the fields of the Mission San Gabriel, making it the most prosperous of all the California Missions.

Kizh Nation has played a critical role in the history and culture of the San Gabriel-Alhambra-Los Angeles area. We proudly stand with the Alhambra Historical Society and Alhambra Preservation Group in preserving the Alhambra Health Center and its importance to our community. We look forward to working with the City of Alhambra, the Alhambra Historical Society, and the Alhambra Preservation Group to support Alhambra's commitment to preserving, protecting, and celebrating its rich history and diverse culture. Thank you for your consideration.

Kind regards,

Subject: Notice of Preparation (NOP) Comments - Alhambra Community Center Project

Dear Mr. Macias:

Thank you for the opportunity to comment on the Alhambra Community Center Project (Project), which is planned on the former site of the Alhambra Health Center (612 West Shorb Avenue, Alhambra, CA 91803). These comments are in response to the Notice of Preparation of a draft Environmental Impact Report (DEIR) for the proposed Project.

I support the preservation and adaptive reuse of the northernmost portion of the Alhambra Health Center as is proposed in Alternative Design II "Connecting Gems". Thank you to the Alhambra City Council for selecting this as the proposed design for the Project. My comments in this NOP response focus on the effects of the Project in the area of Cultural Resources, which is identified in the NOP as an environmental resource area whose impacts are required to be addressed in the Project's DEIR.

Historical Significance of the Alhambra Health Center

The Alhambra Health Center is historically and architecturally significant to Alhambra, the state of California and our nation. Built in 1930, it features a classic Monterey Colonial Revival architectural style and was designed by LA County Architect Karl W. Muck. The Alhambra Health Center is listed in the California Register of Historical Resources in the California Office of Historic Preservation's Built Environment Resources Directory (BERD), and two historic resources surveys completed in 1984 and 2023 designated the Alhambra Health Center as formally eligible for the National Register of Historic Places.

Evaluation of Design Alternative II "Connecting Gems" in DEIR

On March 25, 2024 Alhambra City Council voted unanimously to adopt Design Alternative II "Connecting Gems" as the proposed design of the Project.

As currently proposed, the Project would raze the eastern one-story portion of the former Alhambra Health Center as well as the south-extending two-story portion. The Project would preserve and adaptively reuse the northernmost, two-story wing of the Alhambra Health Center.

The City of Alhambra must honor the unanimous March 25, 2024 Alhambra City Council decision, and the DEIR needs to evaluate Design Alternative II, also known as "Connecting Gems" for the Project.

Mitigating the Project's Effects on the Alhambra Health Center's Historic Fabric

The former Alhambra Health Center possesses extensive character-defining features, both on the exterior and interior of the building, which make up the building's rich historic fabric. I request that the DEIR address and propose the appropriate mitigation measures to protect the building's historically significant character-defining features.

The demolition of any portion of the Alhambra Health Center must include a plan to salvage historic materials from the building should community organizations or individuals express an interest in preserving those elements off-site.

The DEIR should also include a plan for interpretative features within the project that educate the general public about the original Alhambra Health Center, celebrate its rich history and connect residents with the legacy of this site, which proudly served the San Gabriel Valley community for 60 years.

Construction Compatibility

The Project and the adaptive reuse of the Alhambra Health Center should not jeopardize its present eligibility for the National Register of Historic Places designation, its listing on the California Register of Historic Resources and its future local landmark status. The Project as a whole must conform to the Secretary of the Interior's Standards for rehabilitation, and the City of Alhambra should retain a qualified preservation consultant throughout the entirety of the Project.

In 1959, I was treated as a child in this facility for a serious facial laceration. At the time there were no emergency rooms so my mother took me to the clinic and luckily, a plastic surgeon was on duty as the covering physician. Thanks to that doctor my facial wound was repaired with the best outcome possible. I can still remember the day and how well we were treated. To lose such a historical building and all its significance to the community would be a tragic loss.

Thank you for your consideration!

Sincerely,
Judith Garcia

IPaC resource list

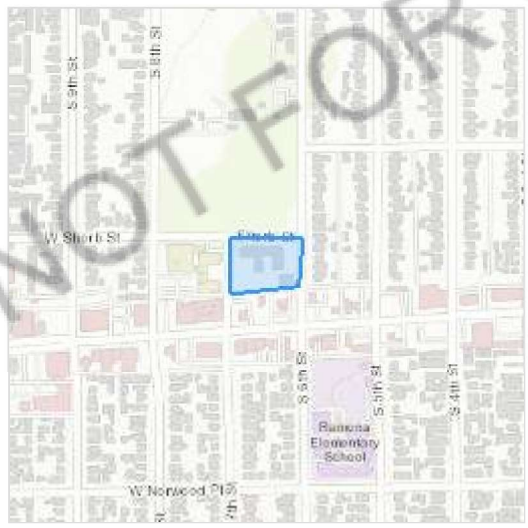
This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

NOT FOR CONSULTATION

Location

Los Angeles County, California



Local office

Carlsbad Fish And Wildlife Office

(760) 431-9440
(760) 431-5901

2177 Salk Avenue - Suite 250
Carlsbad, CA 92008-7385

NOT FOR CONSULTATION

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species[1] and their critical habitats are managed by the Ecological Services Program of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries[2]).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact NOAA Fisheries for species under their jurisdiction.

---

1. Species listed under the Endangered Species Act are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the listing status page for more information. IPaC only shows species that are regulated by USFWS (see FAQ).

NOT FOR CONSULTATION

2. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Birds

NAME	STATUS
Coastal California Gnatcatcher *Polioptila californica californica* Wherever found There is **final** critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/8178	Threatened

Reptiles

NAME	STATUS
Southwestern Pond Turtle *Actinemys pallida* Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/4768	Proposed Threatened

Amphibians

NAME	STATUS
Western Spadefoot *Spea hammondii* Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/5425	Proposed Threatened

Insects

NAME	STATUS
Monarch Butterfly *Danaus plexippus* Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/9743	Candidate

Flowering Plants

NAME	STATUS

NOT FOR CONSULTATION

Slender-horned Spineflower Dodecahema leptoceras Endangered

Wherever found

No critical habitat has been designated for this species.
https://ecos.fws.gov/ecp/species/4007

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

There are no critical habitats at this location.

You are still required to determine if your project(s) may have effects on all above listed species.

Bald & Golden Eagles

Bald and golden eagles are protected under the Bald and Golden Eagle Protection Act[1] and the Migratory Bird Treaty Act[2].

Any person or organization who plans or conducts activities that may result in impacts to bald or golden eagles, or their habitats[3], should follow appropriate regulations and consider implementing appropriate conservation measures, as described in the links below. Specifically, please review the "Supplemental Information on Migratory Birds and Eagles".

Additional information can be found using the following links:

- Eagle Management https://www.fws.gov/program/eagle-management
- Measures for avoiding and minimizing impacts to birds https://www.fws.gov/library/collections/avoiding-and-minimizing-incidental-take-migratory-birds
- Nationwide conservation measures for birds https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf
- Supplemental Information for Migratory Birds and Eagles in IPaC https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action

NOT FOR CONSULTATION

There are likely bald eagles present in your project area. For additional information on bald eagles, refer to Bald Eagle Nesting and Sensitivity to Human Activity

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the PROBABILITY OF PRESENCE SUMMARY below to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle *Haliaeetus leucocephalus* This is not a Bird of Conservation Concern (BCC) in this area, but *warrants attention* because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Jan 1 to Aug 31
Golden Eagle *Aquila chrysaetos* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1680	Breeds Jan 1 to Aug 31

NOT FOR CONSULTATION

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted

Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.

2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

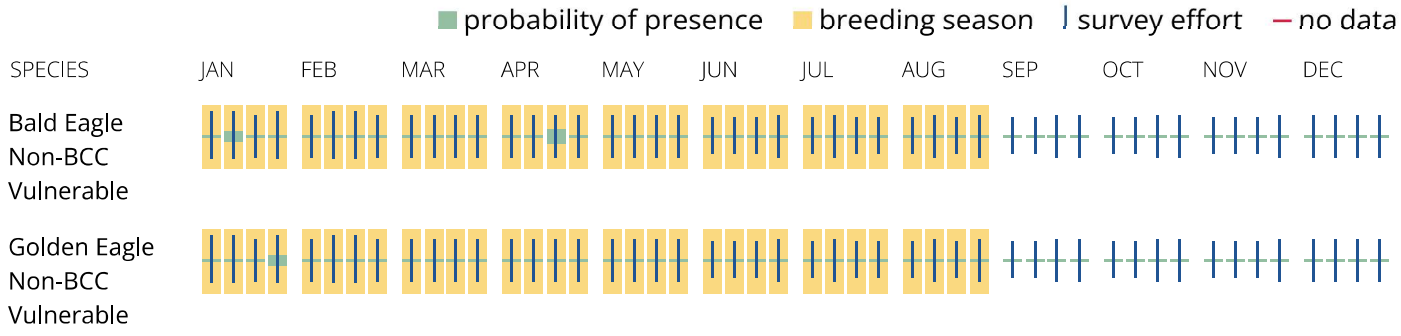
Survey Effort (|)
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

NOT FOR CONSULTATION



What does IPaC use to generate the potential presence of bald and golden eagles in my specified location?

The potential for eagle presence is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply). To see a list of all birds potentially present in your project area, please visit the Rapid Avian Information Locator (RAIL) Tool.

What does IPaC use to generate the probability of presence graphs of bald and golden eagles in my specified location?

The Migratory Bird Resource List is comprised of USFWS Birds of Conservation Concern (BCC) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the Rapid Avian Information Locator (RAIL) Tool.

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the Eagle Act should such impacts occur. Please contact your local Fish and Wildlife Service Field Office if you have questions.

NOT FOR CONSULTATION

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act[1] and the Bald and Golden Eagle Protection Act[2].

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats[3] should follow appropriate regulations and consider implementing appropriate conservation measures, as described in the links below. Specifically, please review the "Supplemental Information on Migratory Birds and Eagles".

1. The Migratory Birds Treaty Act of 1918.
2. The Bald and Golden Eagle Protection Act of 1940.

Additional information can be found using the following links:

- Eagle Management https://www.fws.gov/program/eagle-management

- Measures for avoiding and minimizing impacts to birds https://www.fws.gov/library/collections/avoiding-and-minimizing-incidental-take-migratory-birds
- Nationwide conservation measures for birds https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf
- Supplemental Information for Migratory Birds and Eagles in IPaC https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action

The birds listed below are birds of particular concern either because they occur on the USFWS Birds of Conservation Concern (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ below. This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the E-bird data mapping tool (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found below.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the PROBABILITY OF PRESENCE SUMMARY below to see when these birds are most likely to be present and breeding in your project area.

Wrentit Chamaea fasciata This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	Breeds Mar 15 to Aug 10

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (▪)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence

NOT FOR CONSULTATION

in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is 0.25/0.25 = 1; at week 20 it is 0.05/0.25 = 0.2.

3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)
Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

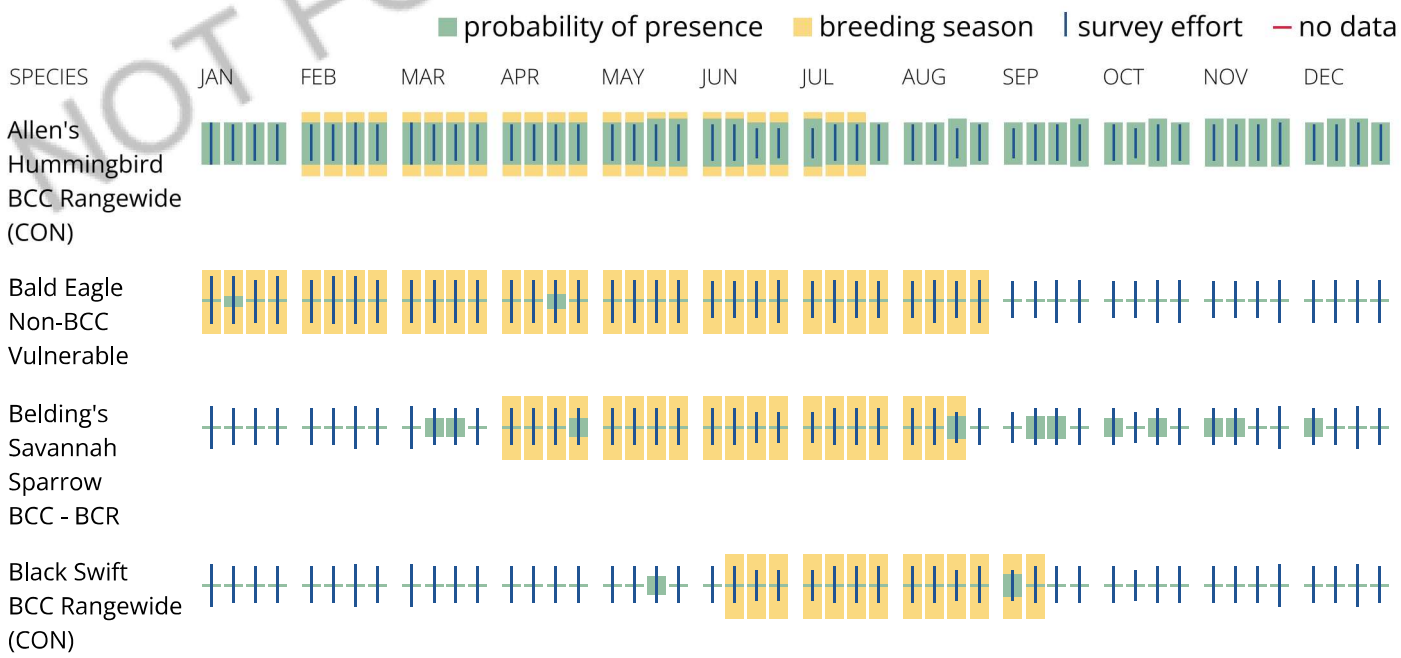
Survey Effort (|)
Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

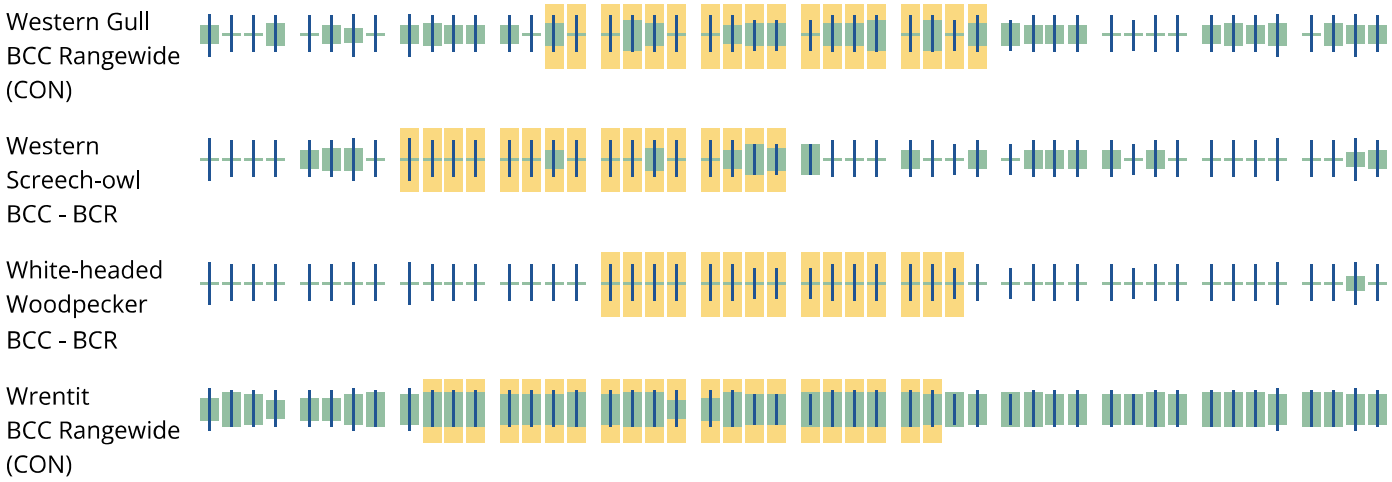
No Data (–)
A week is marked as having no data if there were no survey events for that week.

Survey Timeframe
Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

NOT FOR CONSULTATION



NOT FOR CONSULTATION



Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

Nationwide Conservation Measures describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. Additional measures or permits may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the list of migratory birds that potentially occur in my specified location?

The Migratory Bird Resource List is comprised of USFWS Birds of Conservation Concern (BCC) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the Avian Knowledge Network (AKN). The AKN data is based on a growing collection of survey, banding, and citizen science datasets and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle (Eagle Act requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the Rapid Avian Information Locator (RAIL) Tool.

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the Avian Knowledge Network (AKN). This data is derived from a growing collection of survey, banding, and citizen science datasets.

NOT FOR CONSULTATION

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering or migrating in my area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may query your location using the RAIL Tool and look at the range maps provided for birds in your area at the bottom of the profiles provided for each bird in your results. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are Birds of Conservation Concern (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the Eagle Act requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the Northeast Ocean Data Portal. The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the Diving Bird Study and the nanotag studies or contact Caleb Spiegel or Pam Loring.

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the Eagle Act should such impacts occur.

NOT FOR CONSULTATION

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the National Wildlife Refuge system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

There are no refuge lands at this location.

Fish hatcheries

There are no fish hatcheries at this location.

NOT FOR CONSULTATION

Wetlands in the National Wetlands Inventory (NWI)

Impacts to NWI wetlands and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local U.S. Army Corps of Engineers District.

This location did not intersect any wetlands mapped by NWI.

NOTE: This initial screening does **not** replace an on-site delineation to determine whether wetlands occur. Additional information on the NWI data is provided below.

NOT FOR CONSULTATION

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tuberficid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should

seek the advice of appropriate Federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

EXECUTIVE SUMMARY

Alhambra Community Center Project - Archaeological Resources Assessment Report

Environmental Science Associates (ESA) has been retained by the City of Alhambra (City) to conduct an archaeological resources assessment of the Alhambra Community Center Project to identify potential impacts to archaeological resources for purposes of complying with the California Environmental Quality Act (CEQA). The City proposes to develop the Alhambra Community Center (Project) on a 1.77-acre property located at 612 W. Shorb Street (Project Site). The Project Site is currently developed with a medical building (the Shorb Clinic), surface parking, and landscaping. The Project would abandon the adjacent W. Shorb Street to expand the Project Site. The Project would adaptively reuse the northwest portion of the existing Shorb Clinic building's two-story element, known as the west wing and demolish the balance of the existing Shorb Clinic facility. Along with the existing Shorb Clinic building's west wing to be renovated and adaptively reused, the City would construct a new one- and two-story community center building, along with associated parking and site improvements including courtyards and exterior landscaped areas. The City is the lead agency pursuant to CEQA.

This report presents the assessment of archaeological resources as part of the overall cultural resources assessment. The assessment of architectural or built environment resources is presented in a separate document.

A cultural resources records search was conducted on August 29, 2023, at the California Historical Resources Information System (CHRIS) South Central Coastal Information Center (SCCIC) housed at California State University, Fullerton. The records search included a review of all recorded cultural resources and previous studies within the Project Site and a 0.50-mile radius. The records search results indicate that 11 cultural resources studies have been conducted within a 0.50-mile radius of the Project Site; however, none of these studies have included the Project Site.

A Sacred Lands File (SLF) search conducted by the California Native American Heritage Commission (NAHC) on January 10, 2024, yielded negative results. Consultation required by Assembly Bill 52 (AB 52) is ongoing between the City and California Native American tribes and will be summarized in the Environmental Impact Report for the Project.

A cultural resources pedestrian survey of the Project Site was conducted on September 1, 2023, by qualified ESA staff. The survey was aimed at identifying any cultural resources within the Project Site. Architectural historians cross-trained in identifying archaeological materials

conducted a preliminary opportunistic survey to identify areas with visible ground surface in addition to elements of the built environment. This survey demonstrated that the ground surface visibility was less than five percent due to most of the Project Site being developed with existing buildings, surface parking, and covered with contemporary landscaping vegetation. No surface indication of archaeological resources were identified in the limited areas of ground surface visibility within the Project Site during the pedestrian survey. Therefore, ESA determined that a subsequent archaeological pedestrian survey would not produce any additional benefit and the analyses in this report rely on the existing survey and an archaeological sensitivity assessment.

The archaeological sensitivity assessment indicates that the Project Site has a moderate to high potential to yield buried precontact archaeological resources due to the Project Site being located within the general vicinity of water sources and Native American villages. The moderate to high potential for precontact archaeological resources is due to the following reasons: 1) the Project Site is located on a flat surface and contains soils that are conducive to the preservation of subsurface precontact archaeological deposits; 2) the Project Site is located between two rivers and a wash in the vicinity providing beneficial conditions for precontact use and occupation; 3) villages were located in the vicinity of the Project Site; and 4) the Project Site was located in an area where multiple historic routes crossed, which likely represent a continuation of precontact travel and trade routes. The archaeological sensitivity assessment also indicates that the Project Site has a moderate to high potential for encountering buried historic-period archaeological resources associated with the previous residential uses at the Project Site. There is also potential to encounter archaeological resources related to Gaspar de Portolá's nearby exploration route and the mission roads located immediately north of the Project Site. As such, recommended mitigation measures for archaeological construction monitoring are provided in the *Summary and Recommendations* section at the close of this report.

ALHAMBRA COMMUNITY CENTER PROJECT

Archaeological Resources Assessment Report

Introduction

Environmental Science Associates (ESA) has been retained by the City of Alhambra (City) to conduct a cultural resources assessment in support of an Environmental Impact Report (EIR). The City proposes to develop the Alhambra Community Center (Project) at 612 W. Shorb Street (Project Site), totaling approximately 1.77-acres. The Project Site is currently developed with a medical building (the Shorb Clinic), surface parking, and landscaping. The Project would abandon the adjacent W. Shorb Street to expand the Project Site. The Project would adaptively reuse the northwest portion of the existing Shorb Clinic building's two-story element, known as the west wing and demolish the balance of the existing Shorb Clinic facility. Along with the existing Shorb Clinic building's west wing to be renovated and adaptively reused, the City would construct a new one- and two-story community center building, along with associated parking and site improvements including courtyards and exterior landscaped areas. The City is the lead agency pursuant to the California Environmental Quality Act (CEQA).

ESA personnel involved in the preparation of this report are as follows: Daniel Woodward, M.A., RPA., project director; Fatima Clark, B.A, Project Manager and report author; Evan Tudor Elliott, M.A., RPA, report author; and Kyle Garcia, M.A., RPA, Principal Investigator; Shannon Papin, M.A., and Anokhi Varma, M.S., surveyors; and Jessica McKay, GIS specialist. Resumes of key personnel are included in **Appendix A**.

Project Location

The Project Site is located at 612 W. Shorb Street in the central portion of the City, in the San Gabriel Valley within Los Angeles County (**Figure 1**). The Project Site is bounded by Moor Field to the north, the Alhambra Fire Department Station #72 immediately to the south, S. 6th Street to the east, and S. 7th Street immediately to the west (**Figure 2**). Specifically, the Project Site is located in Township 1 South, Range 12 West, Section 15 on the Los Angeles, CA U.S. Geological Survey (USGS) 7.5-minute topographic quadrangle (**Figure 3**).

Alhambra Community Center Project

Figure 3
Project Location

Project Description

The City proposes to develop the Alhambra Community Center Project on the 612 W. Shorb Street site, which totals approximately 1.37-acre (59,485 SF) and also on the adjacent W. Shorb Street right-of-way, which the City intends to abandon and which Alhambra Unified School District intends to transfer its reversionary interest in (curb, gutter, sidewalk and street between 6th and 7th Streets) to the City so as to expand the Project Site by 17,707 SF. These two areas total 77,192 SF (1.77-acres) (the Project Site) and are improved with an existing one- and two-story abandoned brick (21,470 SF) medical clinic building (the Shorb Clinic) sited on the northern portion of the Project Site with associated surface parking found in the southern portion for the Project Site. The Project intends to adaptively reuse the northwest portion of the existing Shorb Clinic building's two-story element (approximately 9,000 SF), known as the west wing and demolish the balance of the existing Shorb Clinic facility. Along with the 9,000 SF of the existing Shorb Clinic building's west wing to be renovated and adaptively reused, the City intends to construct a new one- and two-story community center building (up to a height of approximately 38 feet) totaling 16,000 SF, hereinafter referred to as the east wing and the north pavilion, along with associated parking and site improvements containing an additional approximate 35,650 SF of hardscaped open space and courtyards and 16,542 SF of exterior landscape areas, parkways and plantings.

The Project would require demolition of the existing Shorb Clinic building components that are not being retained and excavation and grading across the site to accommodate the new building foundations, utilities, and other improvements. Construction staging would be entirely internal to the Project Site. The Project would require excavation to a maximum depth of 5 feet below grade at the new construction locations. In addition to the excavation of the Project's above ground structures, their foundations and utilities, and including the storm water runoff (low impact development) drywell infiltration basin and over-excavation, the Project would require 6,270 cubic yards (CY) of cut, 7,130 CY fill and attendant soil import of 860 CY. The drywell infiltration basin would be installed at an approximate depth of 25 feet below grade[1].

Setting

Precontact Setting

The first generalized chronology of coastal southern California was produced by William J. Wallace in 1955, dividing the precontact past into four general time periods. Wallace referred to these as Horizon I through IV, with Horizon I being speculative due to limited evidence at the time. The subsequent three periods were called the "Millingstone," the "Intermediate," and the "Late" horizons (Wallace 1955). This remains a basis for commonly used chronologies of the region. In the late 1960s, Claude Warren (1968) and Makoto Kowta (1969) revised and updated Warren's chronology, using terms for periods based on particular locales. Excavations in Orange County by Mason and Peterson (1994) led to refinement of the Millingstone Period into three subcategories (MS1-3). More recent refinements to this chronology were based on the decades of

[1] A drywell infiltration basin is an underground structure (often a cylinder with holes) that collects and stores excess water runoff. Rainwater collects in the drywell and then slowly leaks out through the holes and into the ground.

excavation at Playa Vista along the Ballona Lagoon (Stoll et al. 2003; Homburg et al. 2014). This report follows that most recent chronology: the Paleocoastal Period (12,000 to 8,500 years before present [B.P.]), the Millingstone Period (8,500 to 3,000 B.P.), the Intermediate Period (3,000 to 1,000 B.P.), and the Late Period (1,000 B.P. to A.D. 1542), ending at the first documented contact between indigenous Californians and Europeans (Homburg et al. 2014:26, 28, 33, 35). This chronology is manifested in the archaeological record by particular artifacts and burial practices that indicate specific technologies, economic systems, trade networks, and other aspects of culture.

Paleocoastal Period (12,000–8,500 B.P.)

While it is not certain when humans first came to California, their presence in Southern California by about 11,000 B.P. has been well documented (Erlandson et al. 2007a:62). At Daisy Cave, on San Miguel Island, cultural remains have been radiocarbon dated to between 11,100 and 10,950 B.P. Radiocarbon dates from the Arlington Springs Woman site on Santa Rosa Island indicate a human presence in the region by about 13,000 years B.P. (Erlandson et al. 2007a:57; Glassow et al. 2007:191-192). On the southern Channel Island of San Clemente, site SCLI-43 (Eel Point) revealed evidence of boat technology dating to around 8,000 B.P. (Cassidy et al. 2004). This fits with the coastal migration hypothesis from Erlandson and others (2007b) wherein humans followed the coast and the offshore kelp forest habitats from northeast Eurasia. Contrary to the common view of early inhabitants of North America, based largely on the Clovis tool technology, the limited evidence indicates that Paleocoastal peoples along the Pacific appear had diverse diets, harvesting plants, fishing, gathering marine shellfish, and hunting sea birds and marine mammals (Erlandson et al. 2007a:60-61; Glassow et al. 2007:191-192). However, there is limited archaeological evidence of Paleocoastal occupation with secure dates in the Los Angeles Basin. This changes with the onset of the following Millingstone Period (Douglass et al. 2014:27-28).

Millingstone Period (8,500–3,000 B.P.)

The Millingstone Period saw the appearance or significant increase of ground stone implements for plant processing and is characterized by regional differentiation and adaptation to local conditions and the intensified use of ground stone (Douglass et al. 2014: 28; Wallace 1955). Millingstone cultures were characterized by the collection and processing of plant foods such as small seeds, and the hunting of a wider variety of game animals, as well as continued exploitation of shellfish (Byrd and Raab 2007:219; Wallace 1955). Millingstone cultures also established more permanent settlements that were located primarily on the coast and in the vicinity of estuaries, lagoons, lakes, streams, and marshes where the inhabitants had access to a variety of resources, including seeds, fish, shellfish, small mammals, and birds. During the Millingstone Period, more sites are present in the interior of the Los Angeles Basin and portions of the coast may have been abandoned or used in a limited fashion. This may have been caused by a decline in coastal shellfish populations due to extensive estuary silting (Byrd and Raab 2007:220). While the early use of acorns may extend to the early Millingstone Period or earlier, the appearance and shift from milling slabs to mortars and pestles after around 5,000 B.P. indicates that this became an important food during the late Millingstone Period (Douglass et al. 2014:30). An artifact unique to Southern California, the cogstone or cogged stone, is a marker of the Millingstone

Period, although the use and purpose of this type of ground stone is unknown (Douglass et al. 2014:32).

Intermediate Period (3,000–1,000 B.P.)

Many aspects of Millingstone culture persisted into the Intermediate Period, but there are also significant socioeconomic changes, including shifts in economic activities and trade, settlement patterns, and mortuary activities, as well as introduction of new technologies (Byrd and Raab 2007; Douglass et al. 2014:33; Erlandson 1994; Wallace 1955; Warren 1968). The indigenous populations of coastal Southern California were becoming less mobile and gathering in small sedentary villages with satellite resource-gathering camps. Increasing population size necessitated the intensified use of existing terrestrial and marine resources (Erlandson 1994). Manos and metates, used to process small seeds, become quite rare while the rate of mortars and pestles continue to increase. This could indicate that a reliance on acorns or geophytes largely replaced the earlier reliance on small seeds, but paleoethnobotanical research has shown little reliance on acorns in the coastal region south of the Santa Inez Mountains and geophytes rarely appear in assemblages (Douglass et al. 2014:33; Reddy 2016:231). During this period stone-lined earth ovens appear in the Los Angeles Basin, suggesting that agave or yucca were being processed, supported by carbonized yucca found in earth ovens in the San Gabriel Mountains (Douglass et al. 2014:33; Johnson 1966:4, 19; Milburn, Doan, and Huckabee 2009:10). The Intermediate Period overall is characterized by increased labor specialization, expanded trading networks for both utilitarian and non-utilitarian materials, and extensive travel routes. Around 1,500 B.P., near the end of this period, bow and arrow technology is introduced to the region while Yuman-type pottery appears at the end of the period, marking the shift into the subsequent Late Period (Byrd and Raab 2007; Douglass et al. 2014:33-34).

Late Period (1,000 B.P.–A.D. 1542)

The Late Period in the Los Angeles Basin is associated with the florescence of the Gabrielino. This period saw the development of elaborate trade networks in the region and beyond and extensive use of shell-bead currency. Increasing social differentiation is suggested by complex villages and burial areas with variable mortuary practices and different amounts of items included in burials (Douglass et al. 2014:35). In the Newport Bay and San Joaquin Hills area, Koerper and others (2002:73-74) observed only a small number of large residential sites and a greater number of smaller residential sites with non-contemporaneous discrete hearth features, suggesting shifting occupation of family groups. This is interpreted to show a settlement pattern consisting of dispersed family groups that revolved around a relatively limited number of permanent village settlements that centrally with respect to a variety of resources (Koerper et al. 2002:74). Evidence in some areas indicates that overexploitation of larger, high-ranked food resources may have led to a shift in subsistence, towards a focus on acquiring greater amounts of smaller resources, such as shellfish and small-seeded plants (Byrd and Raab 2007:222). Fishing became an increasingly significant part of subsistence strategies at this time, and investment in fishing technologies, including the plank canoe, are reflected in the archaeological record (Erlandson 1994). The end of this period, sometimes referred to as the Protohistoric Period, saw the first contact with the Spanish and the beginning of colonization and missionization of the region (Douglass et al. 2014:39-40).

Ethnographic and Ethnohistoric Setting

The Project Site is within the traditional and ancestral territory of people referred to as the Gabrielino or Gabrieleño, including those who self-identify as the Tongva or the Kizh (Bean and Smith 1978; Golla 2011). The following summary is not intended to provide a comprehensive account of these groups, but is instead a brief historical overview based on available information from resources cited below.

Gabrielino (or Tongva and Kizh)

The terms "Gabrielino" or "Gabrieleño" generally refer to those Native Americans who were forcibly removed from their lands and relocated by the Spanish to Mission San Gabriel Arcángel, as well as their descendants today (Bean and Smith 1978). Additionally, two indigenous terms are commonly used by descendants and tribal groups to refer to themselves, with some descendant groups preferring Tongva and others preferring Kizh (Heizer 1968). The Gabrielino language is a dialect of the Gabrielino-Fernandeño (Tongva) language, part of the Takic branch of the Uto-Aztecan language family (Bean and Smith 1978; Golla 2011:178-179). Prior to European colonization, speakers of the Gabrielino-Fernandeño language occupied a diverse area that included the watersheds of the Los Angeles, San Gabriel, and Santa Ana rivers; the Los Angeles basin; and the islands of San Clemente, San Nicolas, and Santa Catalina (Bean and Smith 1978; Golla 2011:178-180). Speakers of the closely related Fernandeño dialect occupied the San Fernando Valley and the northern parts of the Santa Monica Mountains, while the areas south and east were home to Gabrielino-speakers (Golla 2011:178-179). The neighbors of the Gabrielino-Fernandeño-speakers included the Chumash and Tataviam to the northwest and west, the Juañeno to the southeast, the Serrano to the north and northeast, and the Cahuilla to the east. The Gabrielino are reported to have been second only to the Chumash in terms of population size and regional influence (Bean and Smith 1978).

The Gabrielino were hunter-gatherers and lived in permanent communities located near persistent water supplies, with distributed camps and settlements at areas with food resources. Subsistence consisted of hunting, fishing, and gathering. Small terrestrial game was hunted with deadfalls, rabbit drives, and by burning undergrowth, while larger game such as deer were hunted using bows and arrows (Bean and Smith 1978). The lifeways of the colonial-period Gabrielino were very similar to those documented archaeologically from the Late Prehistoric Period (1,500 years B.P. to the mission era), a time associated with the florescence of the Gabrielino (Wallace 1955). Community populations generally ranged from 50 to 100 inhabitants, although larger settlements may have existed. Kroeber (1925:893) estimated that the population of the Gabrielino to be around 5,000 in the pre-contact period, a number that Cook (1976:38-41) agreed with, despite there being at least 5,500 baptisms at the San Gabriel and San Fernando missions alone. Preston (1996; 1999; 2002) argues that this number is low (along with most estimates of precolonial Indigenous Californian populations) as European diseases rapidly arrived in California, likely prior to Spanish missionaries. Events such as the devastating 1781 smallpox outbreak at Mission San Gabriel Arcangel were unlikely to have been confined to just the mission and would have had depopulating effects on the surrounding areas (Preston 2002:84). The fact that overall, there are few epidemics recorded during the early Spanish colonial period, despite the presumed lack of

immunity to European diseases in Indigenous Californians, suggests that many of these diseases had already arrived through the extensive precolonial trade networks (Preston 2002:86). It follows then that the populations observed by the Spanish and who were subject to baptism in the missions had already experienced declines from these diseases.

In October of 1542, Juan Rodriguez Cabrillo was the first European to make contact with the Gabrielino when his ship landed on what is likely Santa Catalina Island. The following day Cabrillo sailed across the channel into what he called the "Bay of Smokes," commonly considered to be San Pedro Bay. Interestingly, some of the Gabrielino who paddled out to meet Cabrillo's ship communicated that there were parties of Spanish exploring the interior, perhaps the multiple expeditions to the Southwest Pueblo region in the 1530s, Francisco de Ulloa's 1536 visit to the Gulf of California, or Hernando Alarcón's exploration of the lower Colorado River (Elsasser 1979; McCawley 1994; Rabbitt 1976). After sailing north to Monterey Bay, Cabrillo's party overwintered on Santa Catalina, where Cabrillo himself died (McCawley 1994). In 1595, Sebastian Rodriguez Cermeño's ship, the San Agustín, wrecked off Drakes Bay in Marin County, and he and his crew built a small boat and travelled down the California coast for seven weeks before arriving in Navidad, Mexico. This crew likely interacted with Gabrielino people during this voyage (Dell'Osso 1995). Seven years later, Sebastián Vizcaíno followed Cabrillo and stopped in Santa Catalina in 1602 (McCawley 1994). The next Spanish contact was with Gaspar de Portolá, who crossed Gabrielino territory three times in 1769 traveling between San Diego and Monterey as the first expedition of Spanish conquest and colonization (McCawley 1994).

Travel diaries and other records produced by early explorers and missionaries indicate that at least 26 Gabrielino villages were within a mile to known Los Angeles River courses, while an additional 18 villages were reasonably close to the river (Gumprecht 2001). Combining the named villages in other documents, there were at least 25 villages in the San Gabriel Valley, with a concentration in the area adjacent and between the Rio Hondo and San Gabriel River (Johnston 1962; McCawley 1994). For more information, see "Review of Native American Villages" below.

Historic Setting

Spanish Period (A.D. 1769 – 1821)

Although Spanish sailors made brief visits to the region in 1542, 1595, and 1602, sustained contact with Europeans did not commence until the onset of the Spanish Period. In 1769 Gaspar de Portolá led an expedition from San Diego, passing through the Los Angeles Basin and the San Fernando Valley, on its way to the San Francisco Bay (McCawley 1996). Father Juan Crespi, who accompanied the 1769 expedition, noted the suitability of the Los Angeles area for supporting a large settlement. This was followed in 1776 by the expedition of Father Francisco Garcés (Gumprecht 2001; Johnson and Earle 1990).

In the late 18th century, Spanish Franciscans expanded the established mission system in Baja California into Alta California, with Mission San Diego founded in 1769. At the same time, Spanish expeditions founded military presidios and civilian pueblos, and joined the Franciscans in forcibly relocating and converting native peoples. Mission San Gabriel Arcángel was founded

on September 8, 1771, El Pueblo de la Reina de los Ángeles was founded in 1781,and Mission San Fernando Rey de España established on September 8, 1797 (Gumprecht 2001). By the early 1800s, the majority of the surviving Gabrielino-Tongva had entered the mission system, either at San Gabriel or San Fernando. Mission life offered some degree of perceived security in a time when traditional trade and political alliances were failing and epidemics and subsistence instabilities were increasing (Jackson and Gardzina 1999). This also brought with it significant negative consequences for Gabrielino- health and cultural integrity.

On September 4, 1781, El Pueblo de la Reina de los Ángeles was established not far from the site where Portolá and his men camped during their 1769 excursion, with a land grant of 28 square miles issued by California Governor Felipe de Neve in 1781 (Gumprecht 2001). The pueblo was established in response to the increasing agricultural needs of Spanish missions and presidios in Alta California. The original pueblo consisted of a central square surrounded by twelve houses and a series of agricultural fields. Thirty-six fields occupied 250 acres between the town and the river to the east (Gumprecht 2001).

By 1786, the flourishing pueblo attained self-sufficiency and funding by the Spanish government ceased. Fed by a steady supply of water and an expanding irrigation system, agriculture and ranching grew, and by the early 1800s the pueblo produced surplus wheat, corn, barley, and beans for export. A large number of livestock, including cattle and sheep, grazed in the surrounding lands (Gumprecht 2001).

Mexican Period (A.D. 1821-1848)

The 11-year-long Mexican War of Independence largely did not touch Alta California. After Mexico gained its independence from Spain in 1821, the government continued to promote settlement of California with the issuance of land grants. Los Angeles became the capital of the California territory in 1835 (Gumprecht 2001). In 1833, Mexico began the process of secularizing the missions, claiming the majority of mission lands originally set aside to support the missions and the indigenous neophyte populations and redistributed them as land grants to Mexican citizens. According to the terms of the Secularization Law of 1833 and Regulations of 1834, at least a portion of the lands would be returned to the Native populations, but this rarely occurred (Milliken et al. 2009).

Both the previous and new land grant ranchos were used for cattle grazing by settlers during the Mexican Period. Hides and tallow from cattle became a major export for the Mexican settlers in California, known as Californios, many of whom became wealthy and prominent members of society. The hide and tallow trade brought American traders to the ports of California, slowly drawing the eye of the United States. An increasing number of Americans and Europeans began to arrive in California, obtaining Mexican citizenship and receiving land grants. Generally, Californios led easy lives, establishing themselves as essentially landed nobility, leaving the hard work to vaqueros and indigenous laborers (Pitt 1994; Starr 2007).

American Period (A.D. 1848-present)

During the Mexican-American War, small battles took place between Californio and American forces, primarily as part of the 1846 Siege of Los Angeles. The 1847 Capitulation of Cahuenga ended the active hostilities in Alta California. Mexico ceded California to the United States as part of the Treaty of Guadalupe Hildalgo in 1848. California officially became one of the United States in 1850. While the treaty recognized the right of Mexican citizens to retain ownership of land granted to them by Spanish or Mexican authorities, the claimant was required to prove their right to the land before a patent was given. The process was lengthy and generally resulted in the claimant losing at least a portion of their land to attorney's fees and other costs associated with proving ownership (Starr 2007).

When the discovery of gold in northern California was announced late in 1848, a huge influx of people from other parts of North America and South America flooded into California and the population of Los Angeles tripled between 1850 and 1860. The increased population led to additional demand for the Californios' cattle. As demand increased, the price of beef skyrocketed and some Californios reaped the benefits. However, a devastating flood in 1861, followed by droughts in 1862 and 1864, led to a rapid decline of the cattle industry; over 70 percent of cattle perished during these droughts (McWilliams 1946; Dinkelspiel 2008). These natural disasters, coupled with the burden of proving ownership in US courts, caused many Californios to lose their property, despite their rights to the land in the Treaty of Hildalgo. Former ranchos were settled, subdivided and sold for agriculture and residential settlement (Gumprecht 2001; McWilliams 1946).

Los Angeles was connected to the transcontinental railroad via San Francisco on September 5, 1876, and the population again exploded. The city would experience its greatest growth in the 1880s after two more direct rail connections to the East Coast were constructed. The Southern Pacific completed its Second Transcontinental Railway, the Sunset Route from Los Angeles to New Orleans, in 1883 (Orsi 2005). In 1885, the Santa Fe Railroad completed a competing transcontinental railway to San Diego, with connecting service to Los Angeles (Mullaly and Petty 2002). The resulting fare wars led to an unprecedented real estate boom. Despite a subsequent collapse of the real estate market, the population of Los Angeles increased 350 percent from 1880 to 1890 (Dinkelspiel 2008). Los Angeles continued on its upward trajectory in the first few decades of the 20th century with the rise of tourism, automobile travel, and the movie industry (McWilliams 1946).

Regulatory Framework

State

California Environmental Quality Act

CEQA is the principal statute governing environmental review of projects occurring in the state and is codified at Public Resources Code (PRC) Section 21000 et seq. CEQA requires lead agencies to consider if a proposed project would have a significant effect on the environment, including significant effects on historical resources or unique archaeological resources. Under

CEQA (Section 21084.1), a project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment.

The CEQA Guidelines (Title 14 California Code of Regulations [CCR] Section 15064.5) define a "historical resources" as (1) a resource listed in, or determined to be eligible by the State Historical Resources Commission, for listing in the California Register of Historical Resources (California Register); (2) a resource included in a local register of historical resources, as defined in PRC Section 5020.1(k) or identified as significant in a historical resource survey meeting the requirements of PRC Section 5024.1(g); and (3) any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California by the lead agency, provided the lead agency's determination is supported by substantial evidence. CEQA Guidelines Section 15064.5 states that a cultural resource will be considered "a resource shall be considered by the lead agency to be "historically significant" by the CEQA lead agency if the resource meets the criteria for listing on the California Register specified in CCR 14 Section 4852 and PRC Section 5024.1(c). The fact that a resource does not meet the three criteria outlined above does not preclude the lead agency from determining that the resource may be an historical resource as defined in PRC Sections 5020.1(j) or 5024.1.

If a lead agency determines that an archaeological site is a historical resource, the provisions of CEQA Section 21084.1 and CEQA Guidelines Section 15064.5 apply. If an archaeological site does not meet the criteria for a historical resource contained in the CEQA Guidelines, then the site may still be considered a "unique archaeological resource" in accordance with the provisions of Section 21083.2. This section defines a "unique archaeological resource" as "an archaeological artifact, object, or site" where "there is a high probability that it meets any of the following criteria:"

- "Contains information needed to answer important scientific research questions and there is a demonstrable public interest in that information;
- Has a special and particular quality such as being the oldest of its type or the best available example of its type; or,
- Is directly associated with a scientifically recognized important prehistoric or historic event or person."

If an archaeological site meets the criteria for a unique archaeological resource as defined in Section 21083.2, then the site is to be treated in accordance with the provisions of Section 21083.2, which state that if the lead agency determines that a project would have a significant effect on unique archaeological resources, the lead agency may require reasonable efforts be made to permit any or all of these resources to be preserved in place (Section 21083.1(a)). If preservation in place is not feasible, mitigation measures shall be required.

A significant effect under CEQA would occur if a project results in a substantial adverse change in the significance of a historical resource as defined in CEQA Guidelines Section 15064.5(a).

Substantial adverse change is defined as "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of a historical resource would be materially impaired" (CEQA Guidelines Section 15064.5(b)(1)). According to CEQA Guidelines Section 15064.5(b)(2), the significance of a historical resource is materially impaired when a project demolishes or materially alters in an adverse manner those physical characteristics that:

A. Convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register; or

B. Account for its inclusion in a local register of historical resources pursuant to section 5020.1(k) of the Public Resources Code or its identification in a historical resources survey meeting the requirements of section 5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or

C. Convey its historical significance and that justify its eligibility for inclusion in the California Register as determined by a Lead Agency for purposes of CEQA.

California Register of Historical Resources

The California Register is "an authoritative listing and guide to be used by State and local agencies, private groups, and citizens in identifying the existing historical resources of the State and to indicate which resources deserve to be protected, to the extent prudent and feasible, from substantial adverse change" (PRC Section 5024.1[a]). The criteria for eligibility for the California Register are based upon National Register criteria (PRC Section 5024.1[b]). Certain resources are determined by the statute to be automatically included in the California Register, including California properties formally determined eligible for, or listed in, the National Register.

To be eligible for the California Register, an archaeological or built environment resource must be significant at the local, state, and/or federal level under one or more of the following four criteria:

- Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
- Is associated with the lives of persons important in our past;
- Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
- Has yielded, or may be likely to yield, information important in prehistory or history.

A resource eligible for the California Register must meet one of the criteria of significance described above and retain enough of its historic character or appearance (integrity) to be recognizable as a historical resource and to convey the reason for its significance. It is possible that a historic resource may not retain sufficient integrity to meet the criteria for listing in the National Register, but it may still be eligible for listing in the California Register.

Additionally, the California Register consists of resources that are listed automatically and those that must be nominated through an application and public hearing process. The California Register automatically includes the following:

- California properties listed on the National Register and those formally determined eligible for the National Register;
- California Registered Historical Landmarks from No. 770 onward; and,
- Those California Points of Historical Interest that have been evaluated by the OHP and have been recommended to the State Historical Commission for inclusion on the California Register.

Other resources that may be nominated to the California Register include:

- Historical resources with a significance rating of Category 3 through 5 (those properties identified as eligible for listing in the National Register, the California Register, and/or a local jurisdiction register);
- Individual historical resources;
- Historical resources contributing to historic districts; and,
- Historical resources designated or listed as local landmarks, or designated under any local ordinance, such as an historic preservation overlay zone.

California Health and Safety Code Section 7050.5

California Health and Safety Code Section 7050.5 requires that in the event human remains are discovered, the County Coroner be contacted to determine the nature of the remains. In the event the remains are determined to be Native American in origin, the Coroner is required to contact the NAHC within 24 hours to relinquish jurisdiction.

California Public Resources Code Section 5097.98

California PRC Section 5097.98, as amended, provides procedures in the event human remains of Native American origin are discovered during project implementation. PRC Section 5097.98 requires that no further disturbances occur in the immediate vicinity of the discovery, that the discovery is adequately protected according to generally accepted cultural and archaeological standards, and that further activities take into account the possibility of multiple burials. PRC Section 5097.98 further requires the NAHC, upon notification by a County Coroner, designate and notify a Most Likely Descendant (MLD) regarding the discovery of Native American human remains. The MLD has 48 hours from the time of being granted access to the site by the landowner to inspect the discovery and provide recommendations to the landowner for the treatment of the human remains and any associated grave goods.

In the event that no descendant is identified, or the descendant fails to make a recommendation for disposition, or if the land owner rejects the recommendation of the descendant, the landowner may, with appropriate dignity, reinter the remains and burial items on the property in a location that will not be subject to further disturbance.

California Government Code Sections 7927.000 – 7927.005

These sections of the California Public Records Act were enacted to protect archaeological sites from unauthorized excavation, looting, or vandalism. Section 7927.000 explicitly authorizes public agencies to withhold information from the public relating to "Native American graves, cemeteries, and sacred places" maintained by the Native American Heritage Commission. Section 7929.005 specifically exempts from disclosure requests for "records that relate to archaeological site information and reports, maintained by, or in the possession of the Department of Parks and Recreation, the State Historical Resources Commission, the State Lands Commission, the Native American Heritage Commission, another state agency, or a local agency, including the records that the agency obtains through a consultation process between a Native American tribe and a state or local agency."

Assembly Bill 52 and Related Public Resources Code Sections

Assembly Bill (AB) 52 was approved by California State Governor Edmund Gerry "Jerry" Brown, Jr. on September 25, 2014. The act amended California PRC Section 5097.94, and added PRC Sections 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2, and 21084.3. AB 52 applies specifically to projects for which a Notice of Preparation (NOP) or a Notice of Intent to Adopt a Negative Declaration or Mitigated Negative Declaration (MND) will be filed on or after July 1, 2015. The primary intent of AB 52 was to include California Native American Tribes early in the environmental review process and to establish a new category of resources related to Native Americans that require consideration under CEQA, known as tribal cultural resources. PRC Section 21074(a)(1) and (2) defines tribal cultural resources as "sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American Tribe" that are either included or determined to be eligible for inclusion in the California Register or included in a local register of historical resources, or a resource that is determined to be a tribal cultural resource by a lead agency, in its discretion and supported by substantial evidence. On July 30, 2016, the California Natural Resources Agency adopted the final text for tribal cultural resources update to Appendix G of the CEQA Guidelines, which was approved by the Office of Administrative Law on September 27, 2016.

PRC Section 21080.3.1 requires that within 14 days of a lead agency determining that an application for a project is complete, or a decision by a public agency to undertake a project, the lead agency provide formal notification to the designated contact, or a tribal representative, of California Native American Tribes that are traditionally and culturally affiliated with the geographic area of the project (as defined in PRC Section 21073) and who have requested in writing to be informed by the lead agency (PRC Section 21080.3.1(b)). Tribes interested in consultation must respond in writing within 30 days from receipt of the lead agency's formal notification and the lead agency must begin consultation within 30 days of receiving the tribe's request for consultation (PRC Sections 21080.3.1(d) and 21080.3.1(e)).

PRC Section 21080.3.2(a) identifies the following as potential consultation discussion topics: the type of environmental review necessary; the significance of tribal cultural resources; the significance of the project's impacts on the tribal cultural resources; project alternatives or appropriate measures for preservation; and mitigation measures. Consultation is considered

concluded when either: (1) the parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or (2) a party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached (PRC Section 21080.3.2(b)).

If a California Native American tribe has requested consultation pursuant to Section 21080.3.1 and has failed to provide comments to the lead agency, or otherwise failed to engage in the consultation process, or if the lead agency has complied with Section 21080.3.1(d) and the California Native American tribe has failed to request consultation within 30 days, the lead agency may certify an EIR or adopt an MND (PRC Section 21082.3(d)(2) and (3)).

PRC Section 21082.3(c)(1) states that any information, including, but not limited to, the location, description, and use of the tribal cultural resources, that is submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public without the prior consent of the tribe that provided the information. If the lead agency publishes any information submitted by a California Native American tribe during the consultation or environmental review process, that information shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public.

Local

City of Alhambra General Plan

The General Plan for the City of Alhambra, adopted in 2019, includes a section on cultural resources (architectural, archaeological, and paleontological). This includes the following goal and policies:

> **Goal R-6** Preservation of the cultural identity of Alhambra as a diverse residential and commercial city with distinct single-family neighborhoods.[2]
>
> **Policy R-6A** Promote and encourage the preservation of Alhambra's significant historic, architectural, cultural, archaeological, and paleontological resources.
>
> **Policy R-6B** Promote the formation and maintenance of neighborhood associations to foster neighborhood preservation.
>
> **Policy R-6C** Promote and maintain the unique history and architectural character of individual neighborhoods.
>
> **Policy R-6D** Develop and implement design standards that maintain the character of established residential neighborhoods, as discussed in the Land Use and Community Design chapter.

[2] Rincon Consultants and RRM Design Group, "Alhambra General Plan, Vision 2040-A Community Mosaic" (Alhambra: Alhambra City Council, August 12, 2019), 75,76.

Policy R-6E Enforce applicable historic preservation laws to preserve state or federally designated historic resources and other resources (e.g., archaeological and paleontological) eligible for such designation.

Policy R-6F Investigate the possible establishment of a local regulatory framework for the designation and protection of significant historic and cultural resources.

Archival Research

SCCIC Records Search

A cultural resources records search for the Project was conducted on August 29, 2023, at the California Historical Resources Information System (CHRIS) South Central Coastal Information Center (SCCIC), housed at California State University, Fullerton. The records search included a review of all recorded cultural resources and previous studies within the Project Site and a 0.50-mile radius.

Previous Cultural Resources Investigations

The records search results indicate that 11 cultural resources studies have been conducted within a 0.50-mile radius of the Project Site (**Table 1**). Approximately five percent of the 0.50-mile records search radius has been included in previous cultural resources assessments. Of the 11 previous studies, none have included the Project Site.

Previously Recorded Cultural Resources

The records search results indicate that there is only one previously recorded cultural resource within a 0.50-mile radius of the Project Site. This consists of a historic architectural resource, the Union Pacific Railroad (P-19-186112). No archaeological resources have been recorded within the Project Site or the 0.50-mile radius.

Sacred Lands File Search

The NAHC maintains a confidential Sacred Lands File (SLF) which contains sites of traditional, cultural, or religious value to the Native American community. The NAHC was contacted on December 12, 2023, to request a search of the SLF. The NAHC responded to the request in a letter dated January 10, 2024, indicating that the results were negative (**Appendix B**).

Review of Native American Villages

There is a good deal of information about the names and approximate locations of the Gabrielino villages or rancherias from the Spanish and Mexican periods. The baptism rolls of Mission San Gabriel Arcangel list places or indigenous groups, but without providing locations (Merriam 1968). Scottish immigrant Hugo Reid, who married Indigenous Gabrielino woman Victoria Reid (Bartolomea Comcrabit) from the rancheria of *Comicranga*, wrote a series of published letters where he described the "lodges" or villages in the San Gabriel Valley and vicinity (Reid 1852). In the early 20th century, Alred Kroeber and John Harrington interviewed Gabrielino descendants, resulting in additional place names and details about their locations (Harrington 1914-1935; Kroeber 1907; 1925).

ESA cultural resources specialists reviewed a variety of ethnographic and ethnohistoric maps of the Los Angeles Basin and the San Gabriel Valley. The *Gabrielino Indians at the Time of the Portola Expedition,* illustrated by Allen W. Welts (1955) and labeled by Bernice Johnston (1962) depicts the village of *Otsungna* in the vicinity of the Project Site, with *Sibangna* to the northeast and "*Apachiangna/Santcangna"* to the south (Johnston 1962). McCawley's (1996) *Gabrielino Communities Located on the Los Angeles-Santa Ana Plain* map also depicts the village of *Ochuunga* (another name for *Otsungna*) as located in the vicinity of the Project Site. The village of *Ochuunga* is specifically shown between Los Angeles River to the west and the Hondo River to the east. McCawley (1996:57) quotes José Zalvidea saying the community of *Ochuunga* was '"on the road from San Gabriel to Los Angeles, about three miles from San Gabriel"'. McCawley (1996:57) also states that *Ochuunga* is derived from *ochuur*, which means wild rose and that the

Spanish placename for the village was '"Rosa de Castilla"' due to many wild roses found there. Harrington's notes from interviews with José Zalvidea say "'otšŭvit, means Rosa de Castilla. The name of a place is derived from 'otšŭr, wild rose. Basques used to live there. There is a big matanza (slaughter house) there now at the site of 'otsuvit, about half way between Los Angeles and San Gabriel. Railroad and wagon road pass by Rosa de Castilla.". In another note, he wrote that "Z[alvidea] knows the place name 'utšŭvit well. It means rosa de castilla and is on the road from San Gabriel to Los Angeles, about three miles from San Gabriel." Harrington also noted that "Uchubit" appears in Sugranes' list of Gabrielino rancherias (Harrington 1914-1935: MF 3, R102, image 327). Two other similar names, "Ojobit" and "Utucubit" appear in Sugranes' (1909) list of Gabrielino rancherias. The suffix "-*bit*" may indicate a person from a place, signified by "-*ngna*," "-*gna*," or "-*nga*", but it can also indicate a place in the closely related Serrano languages (Johnston 1962:10; Heizer in Reid 1852:7).

The Basques referred to by Zalvidea are likely the Batz family, who bought *Rancho Rosa de Castilla* in the 1850s and inhabited one of the first adobes in the region, on land that Catalina Batz patented in 1876, in the southwest corner of Section 20 of Township 1 South/Range 12 West, and shown on various maps in that area (Reynolds 1870; Hansen 1856). The village reportedly existed on the banks of the Arroyo Rosa de Castilla, on the eastern edge of the neighborhood of El Sereno (Caltrans 2014; El Sereno Historical Society, 2024). It is not certain where the village may have been in relation to the Batz Adobe, as the entire rancho was called Rosa de Castilla and there were multiple Basque people living there in the late 19th century. This location is also roughly 4 miles from Mission San Gabriel Arcangel, when the village was described by Zalvidea as about 3 miles. It was also described as being on the road and railroad between Los Angeles and San Gabriel, which passed north of the Batz Adobe.

McCawley (1996) also indicates that the site of Mission San Gabriel Arcángel was a Gabrielino place name called *Toviscanga*. The name *Toviscanga* appears on the title page of the Book of Confirmations at the mission by Father Junipero Serra (McCawley, 1996).

Review of Historical Routes

Review of the *Kirkman-Harriman Pictorial and Historical Map of Los Angeles County* (Kirkman 1937) depicts the Project Site as located immediately south of and in close proximity to Gaspar de Portolá's "First Exploring Route". The Kirkman (1937) map also depicts "Mission Roads" located north of the Project Site and leading to the Mission San Gabriel Arcángel located 1.7 miles northeast of the Project Site. Welts' (1955) *Gabrielino Indians at the Time of the Portola Expedition* map also shows Portolá's route passing through the vicinity of the Project Site. The 1870 US General Land Office (GLO) Plat Map for Township 1 South, Range 12 West, shows many roads throughout the area, including one that matches the route of Kirkman's Mission Roads passing right by the Project Site.

Historical maps are rarely precise enough to place the Project Site exactly, and other features depicted on these maps may also not be plotted precisely. Roads in California prior to the 1850s were often more appropriately referred to as routes, with people traversing a broader area rather than a single lane. Additionally, as people camped and conducted other activities along the edges

of these roads, the presence of known travel routes increases the likelihood of encountering archaeological sites related to travel. While the current route of Mission Road is approximately 0.6 miles north of the Project Site, that road does not represent exactly the main historical route or all the routes referred to as "Mission Road" in historical documents and maps. Notably, the route of Mission Road can be clearly seen in 1870 *Road from Los Angeles to the Monte and San Gabriel River* maps produced by Frank Lecouvreur (1870a; 1870b; 1870c). This road intersects with another road very near to the Project Site in Section 15 and the other road may represent a second Mission San Gabriel to Los Angeles Road on a more southerly route. A road matching the rough course of that can be seen on G. Hansen's 1856 *Map of Los Angeles City*.

Historical Maps and Aerial Photographs

ESA staff examined historical maps and aerial photographs to provide historical information about land uses of the Project Site and to contribute to an assessment of the Project Site's archaeological sensitivity. Staff did not find any maps depicting the vicinity of the Project Site that predated 1850, with the earliest being the 1852 diseño for Rancho Rosa de Castilla, which shows one route of Mission Road.

The 1857 Map of the Mission Lands of San Gabriel shows the Project Site, but does not include details in the immediate area. However, it does depict partial routes of the southern route between Los Angeles and the San Gabriel Mission that would logically extend very near the Project Site. These same roads are depicted on the 1865 map of the township (Hansen 1865). The 1870 US GLO Plat Map for Township 1 South, Range 12 West (surveyed prior to 1869) does not show any houses in the vicinity of the Project Site, but does depict a large number of roads passing through the section, between Los Angeles and the Mission (**Figure 4**).

USGS topographic maps available for the area include the 1894, 1896, and 1900 Los Angeles and Pasadena 15-minute quadrangles. The 1928 historical aerial photograph was reviewed for the Project Site. A Sanborn Fire Insurance map was available for 1931 (EDR 2023). Review of the 1894, 1896, and 1900 topographic maps show the Project Site as undeveloped and an unnamed wash, later labeled as the Alhambra Wash (tributary of Rio Hondo), depicted approximately 1.6 miles to the east. The Southern Pacific Railroad is depicted approximately 0.50 miles to the north of the Project Site (**Figure 6**).

A 1928 aerial photograph shows the Project Site as developed with a residence on the northeast and second residence overlapping the western portion. A row of trees (north-south direction) is observed along the western portion of the Project Site (**Figure 7**). The 1931 Sanborn Map depicts the Project Site as containing a double-L-shaped split-level brick structure, labeled the Alhambra Health Center, with a hospital located in the one-story wing and welfare offices in the two-story wing of the center. The Project Site had been developed along West Shorb Street, bound by 7th Street to the west and 6th Street to east. The Alhambra Fire Station had been constructed on 6th Street, to the southeast of the Project Site **(Figure 8)**.

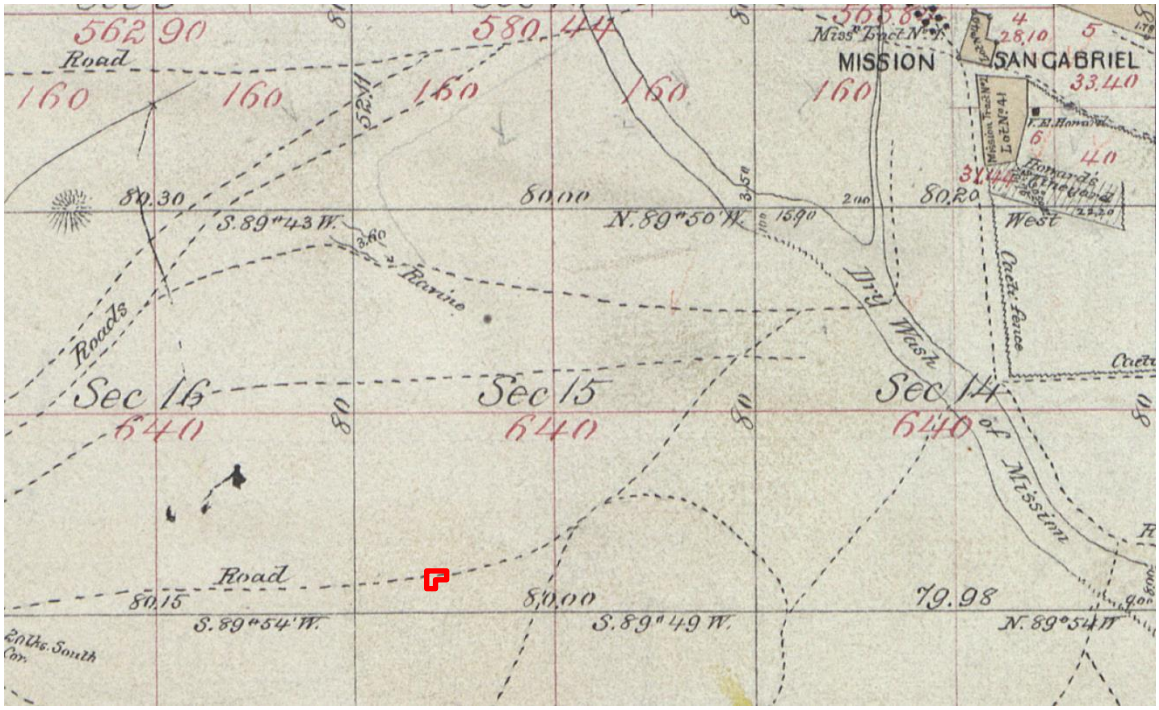

Figure 4

Project Site on portion of 1870 US GLO Plat Map for Township 1 South, Range 12 West

The first detailed depiction of the Project Site is on a series of 1870 transportation maps produced by Lecouvreur for Los Angeles County. This shows the parcel as empty, but close to the Los Angeles to El Monte and San Gabriel River road (now Valley Blvd) and near two portions of roads labeled "Road to the New Mission" (**Figure 5**).

Cultural Resources Survey

Methods

ESA staff Shannon Papin, M.A., and Anokhi Varma, M.S., conducted a cultural resources survey of the Project Site on September 1, 2023. The survey was aimed at identifying any archaeological resources within the Project Site and to document the built environment resources. The archaeological survey was opportunistic in nature, identifying any areas with visible ground surface (**Figure 9**).

Results

No cultural resources were encountered within the Project Site during the pedestrian survey. With the exception of the 16,000 square feet covered by the existing buildings, the pedestrian survey covered approximately 100 percent of the Project Site. Ground surface visibility was less than five percent due to most of the Project Site being developed with surface parking and covered with sod/grasses/trees.

Archaeological Sensitivity Assessment

The desktop analysis of the Project Site was undertaken to assess the potential for the Project to encounter subsurface archaeological resources within. Sources reviewed include the geologic map encompassing the Project Site, the *Geotechnical Engineering Investigation* report (geotechnical report) prepared for the Project (Geotechnologies, Inc. 2023), and historic map and aerial review.

Geologic Map

Review of the Geologic Map of the Los Angeles quadrangle (scale 1:24,000) by Dibblee and Ehrenspeck (1989) indicated that the Project Site is located within Quaternary alluvium (Qa) deposits dated to the Holocene epoch.

Geotechnical Report

The geotechnical report prepared for the Project describes a total of five exploratory borings (using 8-inch diameter hollowstem augers) drilled at the Project Site, extending to depths between 2 and 50 feet below ground surface (bgs). The borings contained fill soils from the surface down to 3 to 5 feet bgs. There were native alluvial sediments beneath the fill strata. The alluvial sediments consisted of a combination of sands and silts with cobbles and pebbles (Geotechnologies, Inc. 2023). This fits with the California Soil Resource Laboratory (2024) data describing the local soils as a mix of urban fill soil and Montello silt loam that form in human transported materials on graded alluvial fans and native Azuvina loam that formed on alluvial fans and fan remnants weathered from granitic sources. These soils are mapped to at least 1.6 meters below surface. This shows evidence of soils development that can preserve and obscure archaeological deposits.

Figure 9

General Overview of Project Site, view to the east

Archaeological Sensitivity

Precontact Archaeological

The potential for finding buried precontact archaeological deposits at the Project Site has been assessed based on the following concepts: 1) age of the underlying soil contemporaneous or postdating with period of human occupation of the area; 2) proximity to permanent or semi-permanent water sources capable of supporting long-term or seasonal occupation of the area; 3) flat or gently sloped topography conducive to human habitation; and 4) historical accounts on Native American villages and historic-period routes. Previous research conducted elsewhere in California has indicated that the presence of buried archaeological sites is positively correlated with proximity to water, as well as flat to gently sloped landforms (Meyer et al., 2010).

The geologic map review depicts Quaternary alluvium mapped at surface within the Project Site. The Holocene-age of this alluvium encompasses the entirety of human occupation in North America, and is, therefore, conducive to the preservation of subsurface precontact archaeological deposits. Although the results of the records searches through the SCCIC and NAHC yielded negative results, archival research demonstrates that there is the possibility of encountering buried deposits. The Project Site is located on a flat surface between the Los Angeles River approximately 5.5 miles to the west and the Hondo River approximately 5.15 miles to the east, with the Alhambra Wash in the general vicinity (approximately 1.6 miles away), providing beneficial conditions for precontact use and occupation. Although the Alhambra Wash is assumed to have gone through cycles of wet and dry periods, providing water to people in a seasonal manner. Additionally, the archival research based on historical accounts indicates that several villages were located in the vicinity of the Project Site. Definitive locational information on Native American villages (refer to *Review of Native American Villages* section) is not available. Nevertheless, historical accounts indicate that locations for villages, settlements, and resource processing areas were chosen to be close enough to water sources to access water, plant, and animal resources that riparian corridors provided, even when there was little water present. Larger settlements were located far enough away to reduce the risk of flooding. Additionally, villages were surrounded by smaller settlements, camps, and activity areas, and extended beyond village boundaries. While the current route of Mission Road is approximately 0.6 miles north of the Project Site, historical research (see *Review of Historical Routes* Section) showed that there were more than one road between the Pueblo of Los Angeles and Mission San Gabriel, and that such routes were not tightly bounded. Historical documents indicate that the Project Site was between multiple routes, with one passing perhaps through or immediately west of the Project Site, another less than a mile east, and the predecessor of the current road between 0.5 and 0.75 miles to the north. These roads likely represent a continuation of precontact travel and trade routes. Based on these results, the Project Site has a moderate to high potential for encountering buried precontact archaeological resources beneath the recent fill soil layers. The moderate to high potential is due to the following reasons: 1) the Project Site is located on a flat surface and contains soils that are conducive to the preservation of subsurface precontact archaeological deposits; 2) the Project Site is located between two rivers and a wash in the vicinity providing beneficial conditions for precontact use and occupation; 3) villages were located in the vicinity of

the Project Site; and 4) the Project Site was located in an area where multiple historic routes crossed, which likely represents a continuation of precontact travel and trade routes.

Historic-Period Archaeological

The archival research shows that the Project Site is depicted on multiple maps as being along important travel routes. Review of the *Kirkman-Harriman Pictorial and Historical Map of Los Angeles County* (Kirkman, 1937) found that it depicts the Project Site as located immediately south and in close proximity to Gaspar de Portolá's "First Exploring Route" and "Mission Roads" located north of the Project Site running between Mission San Gabriel Arcángel and the Pueblo (later City) of Los Angeles. This research also found that the Project Site was developed in the early 20th century, with a residence on the northeast and another residence partially falling within the western portion of the Project Site. The northeast and western portions of the Project Site are currently undeveloped and covered with sod. It is not clear when exactly these residences were built, but they date to the period before organized trash collection and may have had associated refuse pits or privies. Based on these results, the Project Site has a moderate to high potential for encountering buried historic-period archaeological deposits associated with the previous residential uses at the Project Site, as well as with Portolá's exploration route and the mission roads and travel corridors. Such deposits could be found within the fill soils as well as immediately below those layers.

Conclusions and Recommendations

The archaeological sensitivity assessment indicates that the Project Site has a moderate to high potential for encountering buried precontact archaeological resources and historic-period archaeological resources. Since the Project includes ground disturbance up to 5 feet in depth and up to 25 feet deep for the drywell infiltration basin, the following mitigation measures are recommended in order to reduce potential impacts to previously unknown archaeological resources to less than significant levels under CEQA.

A number of existing regulatory provisions mandate requirements for the handling of human remains inadvertently uncovered during excavation activities. As previously detailed, these include State Health and Safety Code Section 7050.5, Public Resources Code Section 5097.98, and CEQA Guidelines Section 15064.5(e). Pursuant to these codes, in the event of the discovery of unrecorded human remains during construction, excavations shall be halted, and the County Coroner shall be notified. If the human remains are determined to be Native American, the California Native American Heritage Commission (NAHC) would be notified within 24 hours and the guidelines of the NAHC would be adhered to in the treatment and disposition of the remains. Compliance with these regulatory protocols would ensure that impacts on human remains would be less than significant

Recommended Archaeological Mitigation Measures

Mitigation Measure CUL-1: Prior to issuance of demolition permit, the City of Alhambra shall retain an archaeologist who meets the Secretary of the Interior's Professional Qualifications Standards for Archaeology (Qualified Archaeologist) to oversee an

archaeological monitor who shall be present during construction excavations such as demolition, clearing/grubbing, grading, trenching, or any other construction excavation activity associated with the Project. The minimum education and experience for a Qualified Archaeologist include a graduate degree in archaeology, or related field; at least one year of full-time professional experience or equivalent specialized training in archaeological research, administration, or management. The minimum education and experience for an archaeological monitor includes having a bachelor's degree in a relevant field of study and either two months of archaeological construction monitoring experience or two months of supervised training with prehistoric archaeological materials in a field or laboratory setting. The frequency of monitoring shall be based on the rate of excavation and grading activities, proximity to known archaeological resources, the materials being excavated (younger alluvium vs. older alluvium), and the depth of excavation, and if found, the abundance and type of archaeological resources encountered, as determined by the Qualified Archaeologist). The frequency of monitoring shall be determined based on the factors presented above, and full-time archaeological monitoring in any area can be reduced to part-time inspections or ceased entirely if determined appropriate by the Qualified Archaeologist, in consultation with the City. Prior to commencement of excavation activities, a Cultural Resources Sensitivity Training shall be given for construction personnel. The training session shall be carried out by the Qualified Archaeologist and shall focus on how to identify indications of archaeological resources that may be encountered during earthmoving activities and the procedures to be followed in such an event.

Mitigation Measure CUL-2: In the event that historic or precontact archaeological resources (e.g., artifacts, cultural soils, features, etc.) are unearthed, ground-disturbing activities shall be halted or diverted away from the vicinity of the find by the archaeological monitor, so that the find can be evaluated by the Qualified Archaeologist. If for some reason the archaeological monitor is not on site, the area will be avoided by the construction crew and the Qualified Archaeologist shall be contacted. After consulting with the City, the Qualified Archeologist shall establish an appropriate buffer area in accordance with industry standards, reasonable assumptions regarding the potential for additional discoveries in the vicinity, and safety considerations for those making an evaluation and potential recovery of the discovery. This buffer area shall be established around the resource and will demarcate where construction activities shall not be allowed to continue. Work shall be allowed to continue outside of the buffer area.

All archaeological resources unearthed by Project construction activities shall be evaluated by the Qualified Archaeologist. If the Qualified Archaeologist determines the find to constitute a "historical resource" pursuant to CEQA Guidelines Section 15064.5(a) or a "unique archaeological resource" pursuant to Public Resources Code Section 21083.2(g), the Qualified Archaeologist shall coordinate with the City of Alhambra to develop a reasonable and feasible treatment plan that would serve to reduce impacts to the resources. The treatment plan established for the resources shall be in accordance with CEQA Guidelines Section 15064.5(f) for historical resources and Public Resources Code Sections 21083.2(b) for unique archaeological resources. The treatment plan shall include measures regarding the curation of the recovered resources that may include curation at a public, non-profit institution with a research interest in the materials, such as the Natural History Museum of Los Angeles County or the Fowler Museum, if such an institution agrees to accept the material. If no institution accepts the resources, they may be donated to a local school or historical society in the area for educational purposes.

Mitigation Measure CUL-3: Prior to the release of the grading bond, the Qualified Archaeologist shall prepare a final report and appropriate California Department of Parks and Recreation (DPR) Site Forms at the conclusion of archaeological monitoring. The report shall include a description of resources unearthed, if any, treatment of the resources, results of the artifact processing, analysis, and research, and evaluation of the resources with respect to the California Register of Historical Resources and CEQA. The report and the DPR Site Forms shall be submitted by the City to the South Central Coastal Information Center, and representatives of other appropriate or concerned agencies to signify the satisfactory completion of the Project and required mitigation measures.

Kyle Garcia has 20 years of experience in the archaeology and prehistory of southern California, with a specialization in faunal analysis. During his career, he has authored or contributed to more than 800 projects subject to the requirements of the California Environmental Quality Act, the National Environmental Policy Act (NEPA), and regulations implementing Section 106 of the National Historic Preservation Act (Section 106 of the NHPA). He is well-versed in the archaeological resources of California's coastal, interior, and island settings. He is skilled in evaluation historic and prehistoric archaeological resources; agency and Native American consultation; pedestrian surveys, testing and evaluation excavations as well as archaeological and paleontological construction monitoring, and laboratory processing. During his tenure, he has authored or contributed to more than 400 technical reports and sections to support all levels of CEQA and NEPA documents. Kyle's portfolio of projects includes energy, water, and transportation infrastructure as well as residential, commercial, mixed-use, institutional, and urban redevelopment serving public and private sector clients. Kyle has conducted archaeological work throughout California and is a certified archaeologist and paleontologist in Riverside and Orange counties.

Paleontology. In addition to his archaeological work, Kyle has been cross-trained in paleontological mitigation monitoring and assisted in the excavations of a Miocene whale fossil near Irvine and a new species of extinct tuna in Laguna Niguel, California. Kyle has also managed or conducted more than 200 paleontological assessments and 40 paleontological monitoring projects throughout southern California. He has assisted ESA's paleontologists with the preparation of paleontological reports in compliance with CEQA and local paleontological guidelines, including guidelines for the Society for Vertebrate Paleontology.

Archaeological/Paleontological Monitoring. Kyle has managed more than 120 archaeological and/or paleontological construction monitoring projects in Los Angeles, Orange, Riverside, San Bernardino, and Ventura counties. His recent monitoring experience in Culver City for mixed-use development projects include Ivy Station, Culver Studios (9336 Washington Blvd), 8888 Washington Blvd, and 8777 Washington Blvd projects. His recent monitoring experience in the City of Los Angeles for mixed-use development projects include the Park Fifth Apartments (437 Hill St), Essex Hollywood (6250 Sunset Blvd), 6th and Virgil Project, 1500 Figueroa, 1340 Figueroa, and 10000 Santa Monica Blvd.

Relevant Experience

Northwest Casmalia Exploratory Enhanced Oil Recovery Project, near Orcutt/Casmalia, CA. *Project Manager and Archaeological Monitor*. The 245-acre Project included the drilling for and extract of petroleum from subsurface deposits. The project area is located in the Casmalia Hills along the northeastern margin of Casmalia Canyon in

northern Santa Barbara County, approximately six miles west of the town of Orcutt. Kyle conducted Phase II testing and evaluation investigations in the project area and archaeological monitoring in compliance with Santa Barbara County's conditions of approval for the Project. The monitoring was conducted alongside the Santa Ynez Band of Chumash Indians. The scope of work included testing of eight previously recorded prehistoric archaeological sites, three previously recorded prehistoric isolates, two previously recorded historic-period sites, and archaeological construction monitoring of all ground-disturbing activities in the project area. The goals of the Phase II testing program were to determine whether or not the previously identified archaeological resources and surrounding buffer zones contained buried archaeological deposits and to collect enough information to support significance evaluations pursuant to CEQA and provide further recommendation measures.

Southern California Edison On-Call Cultural Resources Services Contract, Various Locations, CA. *Project Director*. As an on-call consultant to Southern California Edison (SCE), Kyle managed over 100 SCE projects and managed SCE purchase order contracts in excess of $1.5 million. These projects were subject to requirements of CEQA, Section 106 of the NHPA, and other local ordinances. These projects included deteriorated pole replacements, conduit and vault installations, and distribution circuit installations (aboveground and underground) located throughout SCE's service area in Central and Southern California. Kyle not only managed the budgets and supervised the work for these projects but also conducted most of the record searches, surveys, report writing, site recordation, and client/agency coordination for these projects. In addition, Kyle supervised and participated in the emergency on-call archaeological survey and monitoring services for SCE property that was affected by the Devore Heights, Corral, and Santiago fires located in Devore, Malibu, and eastern Orange County, California, respectively. These projects entailed rapid response services, including close-interval surveys, construction monitoring, and sensitivity assessments for SCE property in areas damaged by the fires.

Rancho Campana High School and Performing Arts Center Construction Monitoring, Camarillo, CA. *Project Manager*. Kyle led the archaeological and paleontological monitoring for the project as a part of ESA's on-call contract with Oxnard Union High School. He managed and coordinated the effort and prepared the associated report. ESA identified two archaeological resources (56-001512/CA-VEN-1512 and 56-001513/CA-VEN-1513H) during monitoring efforts and several paleontological localities during the monitoring and sediment screening activities and worked together with the Ventureño Chumash regarding treatment for the archaeological resources. Although several archaeological and paleontological resources were encountered during the construction monitoring efforts, the resources were treated in accordance with the mitigation measures and, as a result, the impacts to the resources were reduced to a less than significant level pursuant to the CEQA.

SCE Tea Fire Emergency Services, Santa Barbara County, CA. *Project Manager*. After the Tea Fire (Fire) burned nearly 2,000 acres and destroyed 210 homes in the communities of Montecito and Mission Canyon, the City of Santa Barbara, and the Los Padres National Forest in southeastern Santa Barbara County, California, SCE determined that it was necessary to replace 22 damaged Power Poles along the Stanwood 16kV distribution line in order to restore electrical power to the affected areas. ESA was contacted by SCE to conduct emergency archaeological services for this project. The scope of work for these services included an archaeological survey of the Area of Potential Affect (APE) of 22 damaged Power Poles and two dirt access roads and archaeological monitoring during the pole replacements and re-grading of the access roads. The purpose of the archaeological services was to identify and evaluate any archeological resources that might be encountered during the project.

Kyle Garcia, MA, RPA (Continued)

Principal Archaeologist

Archaeological Testing and Evaluation of Site CA-SBR-2845; Cucamonga Creek Watershed Regional Water Quality Proposal, Chino, CA. *Project Manager.* In 2011, Kyle prepared and implemented a phase II archaeological testing and evaluation plan of a 20-acre archaeological site (CA-SBR-2845) in coordination with the U.S. Army Corps of Engineers (USACE) to determine whether the site was eligible for listing in the National Register of Historic Places for the purpose of complying with Section 106 and NEPA. In order to evaluate the site for listing in the National Register, Kyle prepared a research design complete with research questions and data requirements that also included a plan to excavate 73 Shovel Test Probes (STPs), eight Controlled Excavation Units (CEUs) (1 x 1s), and three Backhoe Trench units across the site. The test excavations did not yield any prehistoric artifacts, ecofacts, or features. The items encountered included small clear and amber brown glass fragments, intrusive cow bones, small metal fragments, a shotgun shell casing, and modern plastics and fabric. All of the items appeared to be of recent or unknown age. Given the poor integrity of the archaeological site and the lack of an intact buried cultural deposit, the data potential of the site appeared to be limited. As a result, the Kyle recommended the site as ineligible for listing in the National Register and the California Register of Historical Resources. The USACE and the State Historic Preservation Office agreed with Kyle's determination. Kyle served as project director/manager, crew chief, and lead author of the testing plan and the final report.

Phase I and II Archaeological and Paleontological Resources Assessment of the Proposed Crystal Geyser Roxane Cabin Bar Ranch Water Bottling Facility, Olancha, Inyo County, CA. *Principal Investigator/Archaeological Task Manager/Crew Chief.* Between 2011 and 2012, Kyle conducted phase I and II archaeological and paleontological resources assessments of the project to determine the potential impacts to archaeological and paleontological resources associated with the proposed project for the purpose of complying with CEQA and the County of Inyo's General Plan. ESA manually excavated 38 Shovel Test Probes (STPs) within the boundaries of a prehistoric lithic scatter in order to determine whether the resource was eligible for listing in the California Register of Historical Resources. Seven obsidian flakes (all debitage) were identified at depth during the testing effort and 19 obsidian flakes from the surface in the immediate vicinity of the STPs. Thirty-eight percent (n=10) of the flakes were utilized including one that was utilized on all edges, including the notch. One flake exhibits attribute of platform preparation or pressure flaking. Kyle served as project director/manager, crew chief (during survey and excavation effort), liaison with the County and Native American monitors, artifact sorted and analyst, and lead author of the final report.

Gregory Canyon Landfill EIS, San Diego County, CA. *Archaeologist.* Kyle prepared the archaeological analysis for the Environmental Impact Study regarding the proposed Gregory Canyon Landfill, a Class III landfill on a 1,770-acre site in Northern California. Kyle performed the analysis and coordinated with the U.S. Army Corps of Engineers in compliance with Section 106 of the NHPA.

Archaeological Treatment and Restoration Plan for The Cove Project, Riverside County, CA. *Deputy Project Manager.* Kyle served as Deputy Project Manager for this 238-acre project that was subject to the Section 106 Process. He supervised the thorough recordation and documentation of oven 350 significant prehistoric artifacts which included detailed artifact photography and illustrations. He conducted the field survey, Native American consultation, and was lead author of the final report. Kyle is continuing to coordinate with the U.S. Army Corps of Engineers, the California State Historic Preservation Officer, and the Soboba Band of Luiseño Indians, to approve the final report.

LAX Specific Plan Amendment Study EIR (LAX SPAS), Los Angeles, CA. *Archaeological/Paleontological Task Manager.* Kyle managed the Phase I archaeological and paleontological resources assessment for the proposed LAX SPAS project and prepared the associated cultural resource documentation that supported the EIR for the project. The Specific Plan Amendment Study (SPAS) focused on potential environmental impacts that could result from replacement of the Yellow

Light Projects with Alternative Projects. The EIR evaluated 4 alternatives co-equally (Relocate Runway 6L-24R 260' North, No Increased Runway Separation, No Project/Implement Master Plan, Modified No Project/No Yellow Light Project) and 5 additional alternatives.

Southwest Remain Overnight Apron Project/West Aircraft Maintenance Area Project (LAX): Cultural Resources Assessment, **Los Angeles, CA.** *Cultural Resources Manager*. Kyle led the cultural resources assessment of the proposed concrete pad/apron area and staging area within the southwest portion of LAX. The apron area would be used by aircraft for parking overnight or during the day as well as for light maintenance/servicing during the day. The intent of the cultural resources assessment was to determine the project's potential adverse effects to archaeological, historical, and paleontological resources in compliance with Section 106 and FAA guidelines. The scope of work for this assessment included a cultural resources records search through the California Historical Resources Information System-South Central Coastal Information, a Sacred Lands File search through the California Native American Heritage Commission, review of historic topographic maps and aerials, review of a recent paleontological records search from the Natural History Museum of Los Angeles County, and a pedestrian survey of the Area of Potential Effect.

Archaeological and Paleontological Construction Monitoring for the Central Utility Plant Replacement Project (LAX)., Los Angeles, CA *Project Manager.* Kyle managed the archaeological and paleontological monitoring services to LAWA to support implementation of mitigation measures associated with the LAX Central Utility Plant Replacement Project (CUP-RP). These services were conducted in accordance with the mitigation measures from the CUP-RP Final Environmental Impact Report (FEIR). These measures were carried out in conformance with the more specific requirements set forth in the LAX Master Plan Mitigation Monitoring & Reporting Program Archaeological Treatment Plan (ATP) and Paleontological Management Treatment Plan (PMTP). Several invertebrate fossil specimens were encountered during trenching and drilling activities associated with the project.

Fatima Clark

Archaeologist

EDUCATION

BA, Anthropology, California State University, Fullerton

15 YEARS' EXPERIENCE

CERTIFICATIONS/ REGISTRATION

Orange County Certified Archaeologist

HAZWOPER Certified

PROFESSIONAL AFFILIATIONS

Society for California Archaeology

Fatima has 15 years of hands-on archaeological experience and is practiced in project management and client and agency coordination. Her field experience is complimented by the course study and participation in numerous archaeological excavations in California, Arizona, and Peru. Fatima has written California Environmental Quality Act (CEQA)-level technical reports, Environmental Impact Report (EIR) sections, Initial Study sections, archaeological peer reviews, archaeological monitoring reports, and reports pursuant to California Department of Transportation (Caltrans) requirements. She is also experienced in performing archaeological testing, site recordation, laboratory analysis, pedestrian surveys, records searches through several California Historical Resources Information Systems-Information Centers, and monitoring for a wide variety of projects, including mixed-use, residential, and energy, water, and road infrastructure projects. In addition to her archaeology background, Fatima has been cross-trained in conducting paleontological surveys and monitoring and has co-authored and managed associated reports.

Relevant Experience

Los Angeles Department of Water and Power, Fort Independence Travel Plaza Power Project, Independence (Owens Valley), CA. *Project Manager*. Fatima is in the process of preparing the cultural resources assessment in compliance with NEPA, Section 106, and CEQA. LADWP proposes to install 13 new temporary poles, one (1) anchor, and replace one (1) existing pole for a 34.5 kV line extension to provide power during construction of a new Travel Center at 141 N. Highway 395 in Fort Independence, Inyo County, California.

Landify ECT Corporation, Lower Sweetwater Park Project, City of Chula Vista, CA. *Project Manager*. Fatima has prepared a cultural resources assessment in compliance with CEQA. The Project proposes to redevelop the existing 21.3 acre Project Site with sports facilities within the City of Chula Vista.

County of Los Angeles, Department of Public Works, Whittier Boulevard Underground Utility Project, Los Angeles County, CA. *Project Co-Manager.* Fatima prepared the cultural resources assessment in support of a Class 2 Categorical Exemption. The project consists of the removal of utility poles and overhead lines, and the excavation for underground utility lines along Whittier Boulevard right-of-way. One historical resource, the early-to-mid 20th century Los Angeles Railway (or Yellow Cars), was identified in the project area as a result of archival research and geotechnical investigations. Fatima also managed the archaeological monitoring of construction activities and prepared the monitoring report.

City of Carson, Avocet Energy Storage System Project, City of Carson, CA. *Archaeologist.* Fatima managed the preparation of the archaeological and paleontological resources assessment reports in compliance with CEQA. The proposed Project includes the development of an approximately 200-megawatt battery energy storage system on a

6.96-acre site (BESS site), improvements and upgrades to the existing SCE Hinson Substation (SCE Hinson Substation site), the construction of a gen-tie line to connect to substation to the BESS site (proposed gen-tie line route), and other associated improvements. The proposed gen-tie route would cross three jurisdictions including: the City of Carson, the City of Los Angeles, and the City of Long Beach.

Storm Properties, Inc. Storm Hill Lane Project, Rolling Hills, CA. *Project Manager.* Fatima managed the day-to-day coordination for the monitoring and preparation of the archaeological/paleontological monitoring report pursuant to CEQA. As a result of the monitoring, several fossils were identified and these are currently being analyzed. The Project requires the reconstruction and expansion of Storm Hill Lane from the currently addressed and developed lot at 4 Storm Hill Lane to the three undeveloped lots.

Kiewit Infrastructure West Co., Ballona Wetlands Sequence 1 & 2 Restoration, Culver City, CA. *Project Manager.* Fatima managed the coordination for the monitoring with the archaeological and biological monitors, as well as coordination with the client. ESA's monitors were present during trenching and grading within portions of Ballona Creek in Culver City.

Southern California Association of Governments (SCAG) 2024 Connect SoCal Program PEIR, Los Angeles, Riverside, San Bernardino, Orange, Imperial and Ventura, CA. *Deputy Project Manager.* Fatima led the preparation of the PEIR Sections (cultural, paleontological, and tribal resources), as well as coordinated the Native American consultation efforts. Connect SoCal 2024 is a long-range comprehensive plan for the region's multi-modal transportation system. Preparing the Plan is one of SCAG's primary statutory responsibilities under federal and state law. A regional transportation plan (RTP) is the mechanism used in California by both metropolitan planning organizations and regional transportation planning agencies to conduct long-range (at least 20-year) planning in their regions. SCAG must adopt an RTP and update it every four years, or more frequently, if the region is to receive federal and state transportation dollars for public transit, streets/roads, and bicycle and pedestrian improvements.

Culver City, Crossings Campus (Culver City & City of Los Angeles, CA). *Deputy Project Manager.* Fatima led the preparation of the archaeological resources report and coordinated the preparation of the paleontological resources report. Fatima also led the preparation of the EIR sections (cultural, paleo, tribal). Culver Crossings Properties LLC, the Applicant, proposes to develop an office project (Project) on an approximately 4.46-acre site (Project Site) comprised of two properties: one 1.63-acre parcel is located in the City of Culver City (City), while the second 2.83-acre parcel is located in the City of Los Angeles.

County of San Diego Department of Parks and Recreation, Sweetwater Campground Geotech Boring Monitoring, San Diego County, CA. *Project Co- Manager.* Fatima co-managed the archaeological monitoring and coordinated with Red Tail for Native American monitoring and the County of San Diego Department of Parks and Recreation during Geotech borings for the Project.

Los Angeles County Department of Regional Planning, East San Gabriel Valley Area Plan (ESGVAP) Program EIR, Eastern Portion of Los Angeles County, CA. *Deputy Project Manager.* Fatima managed the preparation of the PEIR Sections (cultural, paleontological, and tribal resources). The ESGVAP is part of the Los Angeles County 2035 General Plan, which will require an amendment. The ESGVAP is a long-range policy document developed to guide long-term growth of the area through development of a guiding vision, goals, policies, and implementation actions for the unincorporated communities in the East San Gabriel Valley. The ESGVAP's planning area consists of 24 unincorporated islands and communities and encompasses a total land area of 210.5 square miles.

Fatima Clark (Continued)

Archaeologist

Los Angeles County Department of Regional Planning, Los Angeles County 2045 Climate Action Plan (CAP) Update and PEIR, Los Angeles County, CA. *Deputy Project Manager.* Fatima managed the preparation of the PEIR Sections (cultural, paleontological, and tribal resources). The County adopted the *Unincorporated Los Angeles County Community Climate Action Plan 2020* (2020 CCAP) in 2015 as a component of the Air Quality Element of the General Plan. The 2020 CCAP aligned with General Plan goals, policies, and programs, as well as several other existing programs in Los Angeles County. The 2020 CCAP was the first attempt to set greenhouse gas (GHG) emissions reduction goals in Los Angeles County. Although the targets for the 2020 CCAP were ultimately not fully met, the plan provided a road map for implementing the County's GHG reduction measures. The 2020 CCAP actions were implemented through County Code amendments and programs related to climate action. The Draft 2045 CAP builds on previous work and defines new reduction targets beyond the year 2020.

Eastern Municipal Water District, San Jacinto Valley Groundwater Treatment Facility Project, San Jacinto, CA. *Archaeologist.* Fatima assisted with the Phase II archaeological testing for the Project. The site was the location of the region's first trading post/general store, established ca. 1868. It later became the Palma Hotel, constructed by Henry T. Hewitt. The hotel was also used as a Riverside County hospital before it was destroyed in an earthquake in 1899.

San Manuel Band of Mission Indians, Sand Canyon Flood Control Permitting Project, San Bernardino County, CA. *Archaeologist.* Fatima was in charge of preparing the cultural resources assessment in compliance with Section 106. Fatima also conducted the pedestrian survey. The San Manuel Band of Mission Indians is considering taking over operation and maintenance of a concrete-lined channel and debris basin (known as Sand Creek) along Sand Canyon, within unincorporated San Bernardino County.

City of Long Beach, 615 E. Ocean Boulevard Project, Long Beach, CA. *Deputy Project Manager.* Fatima led the preparation of the cultural and paleontological resources reports in support of an addendum to the Certified City of Long Beach Downtown Plan Program Environmental Impact Report. The Project would develop a 21-story high-rise residential building on an approximately 0.4-acre site located at 615 East Ocean Boulevard within the City's limits (Project site).

City of Long Beach Department of Development Services, Planning Bureau, 7250 Carson Street Project, City of Long Beach, CA. *Deputy Project Manager.* Fatima led the preparation of the cultural and paleontological resources reports in compliance with CEQA. The Project Applicant proposes to subdivide a 20-acre parcel into two parcels (Parcel A and Parcel B). Other than the approval of the tentative parcel map to subdivide the existing parcel, no proposed improvements or development for Parcel A are included as part of the Project. Development of Parcel B (Project Site) would include the development of two fast-food restaurants and parking spaces.

City of Diamond Bar, Crooked Creek Residential Subdivision Project, Los Angeles County, CA. *Archaeologist.* Fatima conducted the archaeological and paleontological resources assessments in compliance with CEQA and the City of Diamond Bar General Plan Policy RC-P-42. The studies included records searches, pedestrian survey, and subsurface sensitivity assessments. No cultural resources were identified in the project site, but the area was found to have the potential to contain subsurface prehistoric archaeological resources and paleontological resources. The project consisted of the development of seven single-family residences and associated infrastructure on approximately 2.5 acres. The project required approval of a Vesting Tentative Tract Map, Conditional Use Permit, Tree Permit, and Development Review.

Board Member, Preservation Sacramento

With almost 20 years of experience performing fieldwork, research, analysis, and writing about archaeology and anthropology, Evan Tudor Elliott provides an in-depth understanding of the intersection of cultural resources and federal, state, and local environmental regulations in the western United States. He regularly leads projects, supervises field efforts, conducts archival and ethnohistorical research, and prepares recommendations on the eligibility of cultural resources for listing on the National Register and California Register. He is also experienced in performing Native American consultation and coordination and has worked with tribes to identify and protect their culturally-significant places. Among his primary responsibilities is preparing technical reports and compliance documents that emphasize compliance with the NEPA, NHPA Section 106, CEQA, and the Federal Land Policy and Management Act (FLPMA).

Evan is a Registered Professional Archaeologist who exceeds the Secretary of the Interior's Professional Qualification Standards as an archaeologist in accordance with Appendix A of 36 CFR Part 61 and has specialized knowledge in the history and prehistory of the western United States. His Master's thesis consisted of an extensive Class I Prehistoric Overview of a 76,000-acre Bureau of Land Management (BLM) property, now part of the Berryessa Snow Mountain National Monument.

Evan has served as the Principal Investigator on renewable energy projects in California, Oregon, Washington, and Idaho. He was the principal investigator and ethnohistorian for a Native American consultation and culturally-significant place documentation project in the BLM-managed portion fo the Berryessa Snow Mountain National Monument. Evan served as a senior reviewer and consultation specialist for the California Public Utilities Commission (CPUC) on a long transmission line project through the Mojave involving over a thousand resources and 18 Native American tribes.

Relevant Experience

CPUC, Ivanpah-Control Transmission Line Replacement Project California Public Utilities Commission Review, Inyo, Kern, San Bernardino Counties, CA. *Senior Cultural Resources and Tribal Consultation Specialist.* The CPUC is the lead CEQA agency for Southern California Edison's Ivanpah-Control Transmission Line Replacement Project. Evan was a lead on the project, representing the CPUC as their cultural resources team due to CPUC expertise deficits. This included the review of archaeological and built environment survey and evaluation documents, subsequent archaeological testing reports, ethnohistoric archival research and mapping of places of potential significance to Tribes, consultation with 18 state and federally recognized tribal organizations (including Fort Mojave, Colorado River Indian Tribes, San Manuel Band, and Timbisha Shoshone), identification of tribal cultural resources (TCR), making determinations of eligibility, assessing project impacts, producing cultural resources and TCR sections of the EIR, and producing memoranda preparing the CPUC project manager for project efforts and documenting the analysis.

BLM Bakersfield Field Office, BLM Sierra Nevada Fuel Reduction Surveys, Fresno, Tulare, and Kern Counties, CA. *Principal Investigator.* The Bakersfield BLM Field Office was planning fuel load reduction work in a series of properties in the western Sierra Nevada. This included approximately 2,000 acres spread over nine survey areas in three counties. Evan

served as Principal Investigator and project manager for the Section 106 project, supervising fieldwork, site record production, report writing, and providing NRHP eligibility recommendations.

SCE, Kaweah Hydroelectric Facility Relicensing Project, Tulare County, CA. *Principal Investigator, Field Director.* Southern California Edison (SCE) was relicensing its Kaweah Hydroelectric Facility from the Federal Energy Regulatory Commission (FERC), triggering Section 106 of the NHPA. This facility includes areas within the BLM Case Mountain Extensive Recreation Area. In support of this effort, Evan served as the field director and Principal Investigator for the archaeological portion of the effort, including re-recording approximately 30 sites, identifying 25 new sites, and surveying areas that extended along linear features such as flowlines, roads, and transmission lines.

SCE, Bishop Creek Penstock Project, Bishop, Inyo National Forest, Inyo County, CA. *Principal Investigator.* A penstock in the Bishop Creek Hydroelectric system required upgrades and repairs and was subject to Section 106 due to FERC oversight. Evan led the field survey, recording historic-era built environment and archaeological resources, as well as a portion of a precontact canal, milling features, and lithic concentrations, and then was the lead author of the report.

CEC, Desert Renewable Energy Conservation Plan (DRECP), Southern California Desert Region, CA. *Senior Cultural Resources Specialist*. The goal of this this large BLM and CEC programmatic planning project was to create an efficient and effective mitigation and conservation program providing renewable project developers with permit timing and cost certainty under the federal and California Endangered Species Acts while at the same time preserving, restoring and enhancing natural communities and related ecosystems. The DRECP Plan Area consists of approximately 22.5 million acres of federal and non-federal California desert land in Imperial, Inyo, Kern, Los Angeles, Riverside, San Bernardino, and San Diego counties. Evan was an author of the Cultural Resources and Native American Concerns chapters of the NEPA/CEQA Draft EIS/EIR. Additionally, he provided support to the BLM for Section 106 Native American consultation, meetings with other stakeholders, and drafting the PA and its technical appendices for the DRECP.

Western-DSW, Parker–Headgate Rock and Parker-Bouse Transmission Line Reroute Project, San Bernardino County, CA, and La Paz County, AZ. *Cultural Resources Project Manager.* Evan served as lead cultural resources specialist for this NEPA and Section 106 Western Area Power Administration Desert Southwest Region (Western-DSW) project. This project involved the decommissioning of the existing Parker–Headgate Rock Double Circuit line and the proposed reroute along the Colorado River in San Bernardino County, CA, and La Paz County, AZ. This included land managed by the BLM and portions of the Colorado River Indian Tribes reservation. Evan managed subcontractors, reviewed cultural resources technical reports, and authored the cultural resources sections of the EA. He also consulted with the BLM Needles Field Office for their concurrence on the project.

Western-DSW, ED2 to Saguaro Transmission Line Rebuild Project, Pima County, AZ. *Cultural Resources Project Manager.* Evan served as lead cultural resources specialist for this Section 106 Western-DSW transmission rebuild project. The rebuild consisted of replacement of older wooden poles along 37 miles of transmission line through Pima County, Arizona. Under contract with Western-DSW, Evan managed subcontractors, reviewed cultural resources technical reports, reviewed NRHP evaluations, authored the cultural resources sections of the EA, and liaised with U.S. Bureau of Reclamation staff.

CVMC, Coachella Valley Mountains Trail Development, Riverside County, CA. *Principal Investigator, Field Director.* Evan served as the Principal Investigator for the Coachella Valley Mountains Trail Development, undertaken by the Coachella Valley Mountains Conservancy (CVMC). CVMC proposed to construct and formalize three trails in the northern Coachella Valley, crossing private parcels, state-owned lands, and BLM and U.S. Bureau of Reclamation property, triggering CEQA, NEPA, and Section 106. Evan performed an analysis of all three trail locations and prepared the cultural resources sections for the CEQA IS/MND and NEPA EA documents. He also led the Section 106 survey and site recordation effort and authored the cultural resources technical report.

Evan Tudor Elliott, MA RPA (Continued)

Cultural Resources

Coachella Valley Water District, Thousand Palms Flood Control Project, Thousand Palms, CA. *Principal Investigator.* Evan led the cultural resources compliance activities for the Thousand Palms Flood Control Project, where the Coachella Valley Water District proposed to construct a series of flood control improvements to minimize flooding hazards for developed areas in the vicinity oof Thousand Palms. The involvement of the USACE necessitated a joint CEQA/NEPA document. Evan performed an analysis of cultural resources in the area, reviewed USACE and subcontractor cultural resources technical reports, and authored the cultural resources sections of the EIR/EIS.

LADWP, Haiwee Creek Monitoring Station Rebuild Project, Inyo County, CA. *Principal Investigator, Lead Cultural Resources Specialist.* Evan served as Principal Investigator and lead cultural resources specialist for this Los Angeles Department of Water and Power (LADWP) project. A series of flooding events washed out the stream flow monitoring station on Haiwee Creek, necessitating an emergency reroute of the creek and rebuild of the station. Although categorically exempted under CEQA and categorically exempted under NEPA, it required Section 106 compliance as it was within Inyo National Forest. Under the USFS Region 5's NHPA Section 106 PA, this project required monitoring for unanticipated discoveries and damage to known sites. Evan liaised with LADWP and USFS staff, supervised field monitors, performed artifact analysis, and served as author of the technical report.

Southern California Edison, Coolwater-Lugo Transmission Line Project, San Bernardino County, CA. *Cultural Resources Specialist, Crew Chief.* Evan led crews, supervised field inventory efforts, and prepared site records and evaluations this SCE transmission line project. The involvement of the BLM and the CPUC necessitated the creation of a joint NEPA/CEQA document for the construction of transmission lines between the Coolwater Generating Station and the Lugo Substation in the Mojave Desert. Evan supervised field crews and produced GIS data for an intensive survey and site recording effort along the 12,000-acre corridor, primarily on BLM property. After completion of the fieldwork, Evan supervised the production of DPR 523 series records and contributed to the technical report and the EIS/EIR.

Inyo County, Inyo County Renewable Energy Generation Plan Amendment, CA. *Lead Cultural Resources Specialist.* Evan served as lead cultural resources specialist for this CEC-funded renewable energy programmatic-level planning project for Inyo County. This project consisted of a programmatic EIR to inform an amendment to the Inyo County General Plan regarding the permitting of renewable energy projects. Evan developed a cultural resources sensitivity model for Solar Energy Development Areas and was the author of the cultural resources EIR sections.

Imperial County, Imperial County Conservation and Open Space Element Baseline General Plan Amendment, CA. *Lead Cultural Resources Specialist.* Evan served as lead cultural resources specialist for this programmatic-level planning project for Imperial County. This project consisted of an opportunities and constraints analysis and programmatic EIR to inform an update to the General Plan Conservation and Open Space Element. Evan developed a GIS cultural resources sensitivity model for the entire County to determine areas with higher probability of encountering cultural resources. Additionally, he was the author of the cultural resources sections of the programmatic EIR.

San Bernardino County, Donnell Basin Improvement Project, Twentynine Palms, CA. *Lead Cultural Resources Specialist.* Evan was the lead cultural resources specialist for this San Bernardino County Special Districts Department Flood Control District project. The project involved the construction and maintenance of a series of improvements to the existing Donnell Basin, a 63-acre regional flood control detention basin. Evan was a co-author of the cultural resources technical report and the cultural resources section of the IS/MND for this project. Important cultural issues included indirect impacts to a lithic quarry and built environment resources, and the potential for buried historic period and prehistoric resources in the project area.

Re: Alhambra Community Center Project, Los Angeles County

Dear Ms. Clark:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

ALHAMBRA HEALTH CENTER
Historic Resources Assessment

1.0 Introduction

Environmental Science Associates (ESA) has been retained by the City of Alhambra (Client) to prepare a Historic Resources Assessment Report (Report) for the property located at 612 West Shorb Street (Project Site) in Alhambra, California (AIN 5350-007-900). The Project Site is improved with an existing structure and associated parking lot (Subject Property) that previously served as a health center and clinic. The building was constructed in 1930 and, therefore, meets the 45-year age threshold for the California Environmental Quality Act (CEQA). This report was prepared in support of a focused Environmental Impacts Report and in anticipation of the demolition of the Subject Property and potential redevelopment of the Project Site. The Report identifies and evaluates potential historical resources located at the Project Site, as well as potential historic resources in the vicinity of the Project that may be indirectly impacted by the Project.

This Report assesses the Subject Property as a potential historical resource pursuant to the California Environmental Quality Act (CEQA) Guidelines, Section 15064.5. The Subject Property was evaluated for its potential eligibility for individual listing on the National Register of Historic Places (National Register) and the California Register of Historical Resources (California Register). The Report includes a discussion of the survey methods used, background information on the San Gabriel Valley region, the City of Alhambra, the development of medical services in Los Angeles County, the Monterey Revival architectural style associated with the building, and a description and evaluation of the Subject Property.

Through research, survey, and subsequent evaluation under the applicable federal, state, and local eligibility criteria, ESA finds that the Alhambra Health Center located at 612 West Shorb Street meets the level of significance required for individual listing on the National Register and the California Register under criterion A/1, for its association with early medical and health services in Los Angeles County and for its association with the early institutional development of the City of Alhambra. Additionally, it is eligible under criterion C/3, as an example of the Monterey Revival architectural style. The building has undergone minimal alterations and retains a high degree of historical integrity.

Therefore, the Alhambra Health Clinic located at 612 West Shorb Street, is considered a historical resource pursuant to CEQA.[1] ESA recommends that 612 West Shorb Street be assigned

[1] California Historical Resources Status Codes, California State Office of Historic Preservation.

the California Register Status Code of "3S," meaning the property "appears eligible for National Register individually through survey evaluation." [2]

1.1 Project Location

The Project Site is located at 612 West Shorb Street in Alhambra, Los Angeles County, California. Alhambra is located in the San Gabriel Valley, northeast of the City of Los Angeles, and bordered by the cities of Monterey Park, San Gabriel, San Marino, and South Pasadena, as shown in **Figure 1**, *Regional and Project Vicinity Location*. The Project Site is currently improved with a single structure, a double L-shaped, split-level building of approximately 22,929 square feet that occupies the northern portion of the Project Site with associated landscape and parking occupying the rest of the site. The Project Site is bound by West Shorb Street to the north, South 6th Street to the east, South 7th Street to the west, and West Valley Boulevard to the far south. The Alhambra High School's Moors Field is located to the immediate north of the Project Site across West Shorb Street and the Alhambra Fire Department Station No 2., is located directly southeast of the Project Site across an alleyway at the southern edge of the parcel. The Project Site is accessible from the north, east, and west, as shown in **Figure 2**, *Project Location Aerial Photograph*. The Project Site is located in central Alhambra, in a historic neighborhood with mixed uses, including residential development to the east and northwest, commercial development to the south along Valley Boulevard, and institutional development to its immediate north and west.

1.2 Research and Field Methodology

This Report was prepared by a team of ESA's architectural historians including Shannon L. Papin, M.A., Architectural History Program Manager; Anokhi Varma, M.S., Architectural Historian and Antonette Hrycyk, M.S., Architectural Historian - all of whom meet and exceed the *Secretary of the Interior's Professional Qualification Standards* in history and architectural history. Professional qualifications are provided in **Appendix A**.

Shannon Papin and Anokhi Varma conducted a site survey of the Project Site on September 1, 2023. This intensive-level pedestrian survey documented the existing conditions of the exterior of the Subject Property and its immediate vicinity. Ms. Papin later toured the interior of the building in February of 2024. ESA conducted research on the Subject Property's construction and occupancy history and analyzed its history within the context of the development of City of Alhambra, and public medical services in Los Angeles County.

ESA

Preparation of the Report also involved a review of the National Register of Historic Places and its annual updates, the California Register of Historical Resources, the California Built Environment Resources Database (BERD) maintained by the State Office of Historic Preservation (OHP), California Historical Resources Information System South Central Coastal Information Center (SCCIC) housed at University of California, Fullerton, and a previous historical resources survey conducted by the City of Alhambra (City). Sources were used to identify previously recorded properties within or near the Subject Property. In addition, other tasks performed for the study included:

- Conducted field inspections of the subject property and utilized the survey methodology of the State OHP.
- Photographed the subject property and associated landscape features and examined other properties in the vicinity that exhibited potential architectural and/or historical associations.
- Conducted site-specific research on the property utilizing building permits, Sanborn Fire Insurance Maps (Sanborn Maps), City directories, historical photographs, Online Archive of California, Calisphere, University of Southern California (USC) Digital Collections, the historical *Los Angeles Times*, and other published sources.
- Conducted research at the City's Building and Safety and Planning departments.
- Reviewed and analyzed ordinances, statutes, regulations, bulletins, and technical materials relating to federal, state, and local historic preservation, designation assessment processes, and related programs.
- Evaluated potential historical resources based upon criteria used by the National Register, and California Register.

2.0 Regulatory Framework

Historical resources fall within the jurisdiction of the federal, state, and local designation programs. Federal laws provide the framework for the identification and, in certain instances, protection of historical resources. Additionally, state and local jurisdictions play active roles in the identification, documentation, and protection of such resources within their communities. The National Historic Preservation Act (NHPA) of 1966, as amended and the California Public Resources Code (PRC), Section 5024.1, are the primary federal and state laws and regulations governing the evaluation and significance of historical resources of national, state, regional, and local importance. Descriptions of these relevant laws and regulations are presented below.

2.1 Federal Eligibility Criteria and Integrity Aspects

National Register of Historic Places

The National Register was established by the NHPA as "an authoritative guide to be used by federal, state, and local governments, private groups and citizens to identify the Nation's cultural resources and to indicate what properties should be considered for protection from destruction or impairment."[3] The National Register recognizes properties that are significant at the national, state, and/or local levels.

[3] 36 CFR Section 60.2.

To be eligible for listing in the National Register, a resource must be significant in American history, architecture, archaeology, engineering, or culture. Four criteria for evaluation have been established to determine the significance of a resource:

A. Associated with events that have made a significant contribution to the broad patterns of our history;

B. Associated with the lives of persons significant in our past;

C. Embodies the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction;

D. Yields, or may be likely to yield, information important in prehistory or history.[4]

Districts, sites, buildings, structures, and objects that are 50 years in age must meet one or more of the above criteria ***and*** retain integrity (that is, convey their significance) to be eligible for listing.

Under the National Register, a property can be significant not only for the way it was originally constructed, but also for the way it was adapted at a later period, or for the way it illustrates changing tastes, attitudes, and uses over a period of time.[5]

Within the concept of integrity, the National Register recognizes seven aspects or qualities that, in various combinations, define integrity: Location, Design, Setting, Materials, Workmanship, Feeling, and Association:

Location is the place where the historic property was constructed or the place where the historic event occurred. The relationship between the property and its location is often important to understanding why the property was created or why something happened. The actual location of a historic property, complemented by its setting, is particularly important in recapturing the sense of historic events and persons. Except in rare cases, the relationship between a property and its historic associations is destroyed if the property is moved.

Design is the combination of elements that create the form, plan, space, structure, and style of a property. It results from conscious decisions made during the original conception and planning of a property (or its significant alteration) and applies to activities as diverse as community planning, engineering, architecture, and landscape architecture. Design includes such elements as organization of space, proportion, scale, technology, ornamentation, and materials. A property's design reflects historic functions and technologies as well as aesthetics. It includes such considerations as the structural system; massing; arrangement of spaces; pattern of fenestration; textures and colors of surface materials; type, amount and style of ornamental detailing; and arrangement and type of plantings in a designed landscape.

4 "Guidelines for Completing National Register Forms," in *National Register Bulletin 16*, U.S. Department of Interior, National Park Service, September 30, 1986. This bulletin contains technical information on comprehensive planning, survey of cultural resources and registration in the NRHP.

5 *National Register Bulletin 15: How to Apply the National Register Criteria for Evaluation*, U.S. Department of the Interior, National Park Service, 19, https://www.nps.gov/subjects/nationalregister/upload/NRB-15_web508.pdf.

Setting is the physical environment of a historic property. Whereas location refers to the specific place where a property was built or an event occurred, setting refers to the *character* of the place in which the property played its historic role. It involves *how*, not just where, the property is situated and its relationship to surrounding features and open space.

Workmanship is the physical evidence of the crafts of a particular culture or people during any given period in history or prehistory. It is the evidence of artisans' labor and skill in constructing or altering a building, structure, object, or site. Workmanship can apply to the property as a whole or to its individual components.

Materials are the physical elements that were combined or deposited during a particular period of time and in a particular pattern or configuration to form a historic property.

The choice and combination of materials reveal the preferences of those who created the property and indicate the availability of particular types of materials and technologies. A property must retain key exterior materials dating from the period of its historic significance.

Feeling is a property's expression of the aesthetic or historic sense of a particular period of time. It results from the presence of physical features that, taken together, convey the property's historic character.

Association is the direct link between an important historic event or person and a historic property. A property retains association if it is the place where the event or activity occurred and is sufficiently intact to convey that relationship to an observer.[6]

To retain historic integrity, a property will always possess most of the aspects and depending upon its significance, retention of specific aspects of integrity may be paramount for a property to convey its significance.[7] Determining which of these aspects are most important to a particular property requires knowing why, where and when a property is significant.[8] For properties that are considered significant under National Register Criteria A and B, *National Register Bulletin 15: How to Apply the National Register Criteria for Evaluation (National Register Bulletin 15)* explains, "a property that is significant for its historic association is eligible if it retains the essential physical features that made up its character or appearance during the period of its association with the important event, historical pattern, or person(s)."[9] In assessing the integrity of properties that are considered significant under National Register Criterion C, *National Register Bulletin 15* states, "a property

6 *National Register Bulletin 15*,44-45.

7 The National Register defines a property as an "area of land containing a single historic resource or a group of resources and constituting a single entry in the National Register of Historic Places." A "Historic Property" is defined as "any prehistoric or historic district, site, building, structure, or object at the time it attained historic significance." "National Register Bulletin 16a: How to Complete the National Register Registration Form," U.S. Department of the Interior, National Park Service, Appendix IV, Glossary of National Register Terms, https://www.nps.gov/subjects/nationalregister/upload/NRB16A-Complete.pdf.

8 *National Register Bulletin 15*, 44.

9 "A property retains association if it is the place where the event or activity occurred and is sufficiently intact to convey that relationship to an observer. Like feeling, association requires the presence of physical features that convey a property's historic character. Because feeling and association depend on individual perceptions, their retention alone is never sufficient to support eligibility of a property for the National Register." Ibid, 46.

important for illustrating a particular architectural style or construction technique must retain most of the physical features that constitute that style or technique."[10]

2.2 State Register and Eligibility Criteria

California Register of Historical Resources

The OHP, as an office of the California Department of Parks and Recreation (DPR), implements the policies of the NHPA on a statewide level.

The OHP also carries out the duties as set forth in the PRC and maintains the HRI and the California Register. The State Historic Preservation Officer (SHPO) is an appointed official who implements historic preservation programs within the state's jurisdiction.

Also implemented at the state level, CEQA requires projects to identify any substantial adverse impacts that may affect the significance of identified historical resources.

The California Register was created by Assembly Bill 2881, which was signed into law on September 27, 1992. The California Register is "an authoritative listing and guide to be used by state and local agencies, private groups, and citizens in identifying the existing historical resources of the state and to indicate which resources deserve to be protected, to the extent prudent and feasible, from substantial adverse change."[11] The criteria for eligibility for the California Register are based upon National Register criteria.[12]

The California Register consists of resources that are listed automatically and those that must be nominated through an application and public hearing process. The California Register automatically includes the following:

- California properties listed on the National Register and those formally Determined Eligible for the National Register; [13]
- California Registered Historical Landmarks from No. 770 onward;
- Those California Points of Historical Interest (PHI) that have been evaluated by the OHP and have been recommended to the State Historical Commission for inclusion on the California Register.[14]

[10] "A property that has lost some historic materials or details can be eligible if it retains the majority of the features that illustrate its style in terms of the massing, spatial relationships, proportion, pattern of windows and doors, texture of materials, and ornamentation. The property is not eligible, however, if it retains some basic features conveying massing but has lost the majority of the features that once characterized its style." Ibid.

[11] PRC Section 5024.1(a).

[12] PRC Section 5024.1(b).

[13] PRC Section 5024.1(d).

[14] PRC Section 5024.1(d).

Other resources which may be nominated to the California Register include:

- Individual historical resources;
- Historical resources contributing to historic districts;
- Historical resources identified as significant in historical resources surveys with significance ratings of Category 1 through 5;
- Historical resources designated or listed as local LAHCMs, or designated under any local ordinance, such as an HPOZ.[15]

To be eligible for the California Register, a historical resource must be significant at the local, state, or national level, under one or more of the following four criteria:

1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
2. Is associated with the lives of persons important in our past;
3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
4. Has yielded, or may be likely to yield, information important in prehistory or history.

Additionally, a historical resource eligible for listing in the California Register must meet one or more of the criteria of significance described above and retain enough of its historic character or appearance to be recognizable as a historical resource and to convey the reasons for its significance. Historical resources that have been rehabilitated or restored may be evaluated for listing. Integrity is evaluated with regard to the retention of seven aspects of integrity similar to the National Register (location, design, setting, materials, workmanship, feeling, and association). Also, like the National Register, it must also be judged with reference to the particular criteria under which a resource is proposed for eligibility. Alterations over time to a resource or historic changes in its use may themselves have historical, cultural, or architectural significance. It is possible that historical resources may not retain sufficient integrity to meet the criteria for listing in the National Register, but they may still be eligible for listing in the California Register. A resource that has lost its historic character or appearance may still have sufficient integrity for the California Register if it maintains the potential to yield significant scientific or historical information or specific data.[16]

[15] PRC Section 5024.1(e)

[16] Codified in California Code of Regulations, Title 14, Chapter 11.5, Section 4852(c) which can be accessed on the internet at http://ohp.parks.ca.gov.

2.3 Local Cultural Heritage Ordinance and Eligibility Criteria

City of Alhambra Historic Preservation

The City of Alhambra does not have a historic preservation ordinance. The General Plan for the City of Alhambra, adopted in 2019, does include a section on Historic, Archaeological, and Cultural Resources. This includes General Plan Goal R-6:

> **Goal R-6** Preservation of the cultural identity of Alhambra as a diverse residential and commercial city with distinct single-family neighborhoods.[17]

Associated with this goal are the following policies:

> **Policy R-6A** Promote and encourage the preservation of Alhambra's significant historic, architectural, cultural, archaeological, and paleontological resources.
>
> **Policy R-6B** Promote the formation and maintenance of neighborhood associations to foster neighborhood preservation.
>
> **Policy R-6C** Promote and maintain the unique history and architectural character of individual neighborhoods.
>
> **Policy R-6D** Develop and implement design standards that maintain the character of established residential neighborhoods, as discussed in the Land Use and Community Design chapter.
>
> **Policy R-6E** Enforce applicable historic preservation laws to preserve state or federally designated historic resources and other resources (e.g., archaeological and paleontological) eligible for such designation.
>
> **Policy R-6F** Investigate the possible establishment of a local regulatory framework for the designation and protection of significant historic and cultural resources.

3.0 Identification of Potential Historical Resources within the Subject Property and Surrounding Area

3.1 Previous Evaluations of the Subject Property

The subject property at 612 West Shorb Street has been identified as a historical resource in two previous surveys, once in 1984 and once in 1994. The *Alhambra Historic and Cultural Resources Survey, 1984-1985*, was a part of the State Historic Survey Program, wherein the City of Alhambra received a grant from the California Office of Historic Preservation to conduct a historic resources survey. The 1984-1985 survey recognized the Alhambra Health Center at 612 West Shorb Street as an important civic institution, along with the neighboring fire station, Alhambra Fire Department Station No 2. Both buildings were evaluated for eligibility in the National Register of Historic Places and given the status code of "3", denoting that a property

[17] Rincon Consultants and RRM Design Group, "Alhambra General Plan, Vision 2040-A Community Mosaic" (Alhambra: Alhambra City Council, August 12, 2019), 75,76

"Appears eligible for individual listing."[18] The California OHP updated the status codes in August of 2003, after which the Alhambra Health Center was given an updated status code of "3S," meaning the property "appears eligible for National Register individually through survey evaluation." [19] The 1994-1995 survey was conducted by Historic Resources Group, where the Alhambra Health Center at 612 West Shorb Street was given the status "2S2," stating it was "individually determined eligible for NR by consensus through Section 106 process." The *Alhambra Historic and Cultural Resources Survey, 1984-1985* is included in **Appendix F**. The 1994-1995 survey was not publicly available for review.

During the preparation of this HRA, Historic Resources Group, in conjunction with the City of Alhambra, released the "City of Alhambra Historic Resources Survey Report," the first comprehensive citywide survey of the built environment of Alhambra. The draft DPR 523 forms prepared by HRG recommend 612 W. Shorb Street as eligible for the NR under Criterion 1/A under the following contexts:

- City Expansion and Industrial Growth (1920-1940)
- Civic and Institutional Development (1920-1940)

In addition, 612 W. Shorb Street was recommended eligible for the NR under Criterion 3/C "as an example of Monterey Colonial Revival style architecture in Alhambra."[20]

A copy of these DPR 523 forms is included in **Appendix H**.

Archival Research

A records search for the proposed project through the California BERD was conducted by ESA staff on August 23, 2023. The subject property has been previously recorded in the BERD and is given the status code "2S2." The BERD replaces the former Historic Properties Directory (HPD) that previously provided evaluation status information for resources processed through the OHP. The records search included a review of all previously documented historic architectural resources and studies within a 0.25-mile radius of the Project. A records search for the Project was conducted on September 20, 2022, at the SCCIC housed at University of California, Fullerton. The records search included a review of all recorded archaeological resources, historic architectural resources, and previous studies within the Project Area and a quarter-mile radius of the Project Area. The SCCIC record search indicated four cultural resources studies conducted within a quarter-mile radius of the Project Area, but no resources.

3.2 Results

Nearby Resources

Listed below in **Table 1** are results of the search of the BERD, which revealed 12 historic architectural resources have been previously recorded within a 0.25-mile radius of the Project Site, including the Project Site (**Table 1**). Except for one resource, all of the resources are residential and located over 0.22 miles (1,187 feet) away from the Project Site. The Alhambra Fire Department Station No 2., at 1215 South 6th Street is located to the southeast at less than 0.02 miles (114 feet) from the Project Site and has a direct view of the Project Site.

Previous Cultural Resources Investigations

The records search results indicate that four cultural resources studies have been conducted within a 0.25-mile radius of the Project Area (**Table 2**). Two of the four previous studies (LA5428 and LA 6389) have areas adjacent to the Project Site.

Description of Identified Resources Immediately Adjacent to the Project Site

1215 S 6th St, City of Alhambra Fire Department Station 72

The Alhambra Fire Station No.2 at 1215 S 6th Street is located 114 feet southeast of the Alhambra Community Center. The Alhambra Fire Station No.2 was designed by architect John Walker Smart and constructed in 1930 to serve the southeast section of the City of Alhambra. Both the Alhambra Community Center and the Alhambra Fire Station were designed to blend in with the neighboring residential community in terms of massing and scale. As listed above, the fire station has a status code of "3S" as it is an "appears eligible for NR as an individual property through survey evaluation."

4.0 Environmental Setting

4.1 Neighborhood Development

Mission San Gabriel and Rancho Huerta de Cuati

Most of the land comprising the present-day City of Alhambra was part of Mission San Gabriel, established in 1771 by the Spanish missionaries. In 1784, Manuel Nieto, a soldier at the Los Angeles Presidio, received a 300,000-acre land grant known as Rancho Los Nietos from Governor Pedro Fages.[21] In 1830, Nieto was forced to give the portion of the land back to the San Gabriel Mission. This portion of the land was acquired by a Gabrielino/Tongva/Kizh woman, Victoria Bartolomea Comicrabit, who descended from a prestigious line of tribal chiefs.[22] This land was known as Rancho Huerta de Cuati, and Victoria and her husband Hugo Reid, a thriving rancher, cultivated the land for agricultural use for fourteen years.[23] Victoria had to sell the land due to a

questionable legal claim, the death of her husband, and financial constraints due to prolonged legal battles. She eventually sold the property to Benjamin Davis Wilson on February 6, 1854.[24]

City of Alhambra

Benjamin Wilson was a rich trapper and trader originally from Tennessee, who visited Southern California in 1841. Fascinated by the San Gabriel Valley, Wilson settled in the area and purchased a large tract of land in what is now Pasadena, San Gabriel, Westwood, and San Pedro. He married Ramona Yorba, the daughter of Bernardo Yorba who owned Rancho de Santa Anna, and remarried in 1853 to Margaret Hereford, following the death of Ramona in 1849.

By 1854, Wilson had purchased Rancho Huerta de Cuati and developed the land with a variety of fruits, including large orange groves, as well as ornamental trees. The ranch was laid out in avenues and named Lake Vineyard. Wilson expanded to viticulture and partnered with his son-in-law, James De Barth Shorb, originally from Baltimore, to keep the ranch afloat and eventually to expand the winery. In 1871, Wilson purchased the land on which the present-day Alhambra would be developed. Wilson and Shorb established the Lake Vineyard Land and Water Association in 1875 and began developing the future Alhambra Tract. The land was subdivided into five- and ten-acre parcels and named after Washington Irving's book "The Alhambra," that Shorb's daughter was reading at the time.[25]

Shorb, trained as an engineer, developed an iron pipe water system exclusive to the Alhambra Tract lots. This unique amenity, as well as the proximity of the Southern Pacific Railroad, resulted in the successful sale of all the lots on the tract. With the help of Shorb's irrigation method, the lots were cultivated into small orchards with orange groves, pepper trees, and lined cypress hedges.[26] Based on this success, Wilson and Shorb purchased adjacent land to the west and named it the Alhambra Addition Tract.[27].

The completion of the transcontinental railroad in 1869 led to increased visitors to Southern California in the late 1880s and, subsequently, significant population growth in the Greater Los Angeles Area. To fulfill the increased demand for housing, parcels on the Alhambra Addition Tract were further subdivided into smaller lots. The area, formerly dominated by agriculture, saw a flurry of real estate development during the early 1880s, with the establishment of the Alhambra Hotel, grocery stores, blacksmith shops, three churches, a dry goods store, a drugstore and two commercial blocks. [28] However, the land boom in Southern California was short-lived and left behind a tangled mess of the pastoral Alhambra Addition filled with dead trees, undergrowth, and

many vacant lots in the mid-1880s. This combination of events resulted in Alhambra's population becoming largely comprised of immigrants.[29]

Around the mid-1880s, James Shorb moved his family closer to the Alhambra Tract at the behest of his daughter Edith, who wanted to attend school closer to her father. Shorb donated the land he received as a gift from Wilson to the Sisters of Holy Cross when he married Maria, Wilson's daughter with his wife Ramona.[30] This land was called the Ramona Tract, named after Shorb's mother-in-law. In 1889, the Catholic Sisters established the Ramona Convent School, which is still extant.[31]

Alhambra slowly started to recover from the aftermath of the late 1880s land crash, with residents insisting on incorporation and the formation of a town improvement association to improve the "sanitary and living conditions of the town. [32] The town developed with many civic institutions and schools, including the First Methodist Church, the First Presbyterian Church, and the First Baptist Church. In 1893, the town's first hospital was established in a remodeled bungalow at the corner of Second Street and Boabdil Street.[33] Regular rail service to Los Angeles was established in 1902, allowing Alhambra to grow as an early streetcar suburb of the City.[34]

Alhambra was formally incorporated as a city on July 11, 1903, after several attempts by the residents.[35] The first decades of the 20th century saw Alhambra develop civic infrastructure, including city hall, a public library, road improvements, and a fire department to support the growing population[36]. The early 20th century saw a substantial rise in the population of Alhambra from 5,000 residents in 1910 to 40,000 in 1930.[37] Municipal water, gas, electric, and waste management departments supported the growth of neighborhoods created on large tracts of land that were further subdivided.[38] This included the Ramona Tract, where the Project Site is located, subdivided in 1929.

In the decades leading up to the outbreak of World War II, Alhambra underwent a demographic transition. The dual forces of restrictive federal immigration policies throughout the 1920s and the development of exclusionary housing loans beginning in 1939, backed by the federal government's Home Owners Loan Corporation, led to Alhambra becoming a city where the majority of the population was White and the number of foreign-born residents shrunk.[39] Still, the

continued prominence of Los Angeles County's agricultural industry, along with the growth of industrial manufacturing to support military preparations, drew thousands of Americans to the San Gabriel Valley, bringing Alhambra's population to just under 40,000 residents in 1940.[40] Civic infrastructure in the 1930s was largely constructed by Los Angeles County, as in the case of the Subject Property, or through New Deal-funded projects, such as the expansion of school buildings in the city.[41]

Following the Attack on Pearl Harbor and America's entry into World War II, President Roosevelt signed Executive Order 9066. Japanese residents of the San Gabriel Valley were relocated to Santa Anita or Pomona Assembly Centers, located at the racetrack and fairgrounds, respectively. This unprecedented Executive Order ensured that first and second-generation Japanese Americans, many of whom were legally American citizens, were detained for the duration of the war for no reason. Internees were only permitted to bring one suitcase with them, and many lost their homes, business, and property because of foreclosure during the War. After their initial relocation to the Assembly Centers, most of the San Gabriel Valley Japanese internees spent the majority of WWII at Heart Mountain in Wyoming.[42] Alhambra was considered to be part of a potential combat zone if Japanese forces attacked the American West Coast, leading to a U.S. Army Unit being stationed in the City.[43] Residents of Alhambra found work in the wartime industrial boom, though population growth stagnated during the war years.

The passage of the Servicemen's Readjustment Act in 1944, commonly known as the G.I. Bill, led to an explosion in new residential construction. Through this bill, veterans could obtain a house with no down payment. Nationally, veterans were responsible for 20% of new home construction in the post-war era; it is likely to have been higher in Los Angeles County, which saw massive population growth in the post-war era.[44] This funding, combined with postwar economic prosperity for US industry and the ability to mass-produce houses, led to a boom in residential construction. In 1948, Alhambra's residential construction for that year was valued at $12,309,205.[45] Alhambra's population continued to grow, though less drastically than surrounding cities with less pre-war residents, from 40,000 in 1940 to 54,000 in 1960, an increase of 35%.

Following the initial wave of post-war residential immigration, new residents to the area in the later half of the 20th century were largely Asian immigrants, helped significantly by the passage of the Immigration and Nationality Act of 1965.[46] The largest wave of new residents to the San Gabriel Valley at this time were immigrants from Taiwan and Hong Kong who came to America for educational and economic opportunities, especially in the face of political strife in their

homeland.[47] The demographic shift in Alhambra and the greater San Gabriel Valley was compounded by a second wave of white flight as the children of the initial post-war residents moved or sold their homes. Throughout the 1960s and 1970s, the need for more housing units predicated a shift to multi-family apartment complexes, many of which replaced former single-family residences.[48]

Infrastructure improvements, including the construction of the San Bernardino and Long Beach freeways (Interstate 10 and 710, respectively), further assisted Alhambra residents in accessing a variety of opportunities for work in Los Angeles County.[49] Redevelopment projects throughout the 1960s and 1970s included the construction of a new headquarters for the fire department in 1968, a new Community Hospital and courthouse in 1974, and a new public library in 1975.[50] Today, Alhambra is a well-developed suburban city with 26 identified residential neighborhoods and various institutions, businesses, religious structures, and hospitals that cater to the community at large.

Project Site and Neighborhood Development

Tract History

The Project Site, located at 612 W Shorb St., occupies Lots 9,10,11,12,13,14, 15, and 16 of Tract 6527, located in the central portion of Alhambra. The Huntington Land and Improvement Company originally subdivided this tract from the Ramona Tract (portions of Lots 2 and 3 Block 23) on April 19, 1929 (**Figures 3 and 4**). The Huntington Land and Improvement Company was a real estate company established by Henry Edwards in 1902 to purchase, subdivide, and re-sell land surrounding the Pacific Electric and Los Angeles Railways.[51]

The Project site is part of the Carpenter-Nathanson Tract neighborhood and nestled in between the highly residential neighborhoods of Carpenter-Nathanson and Mayfair Park (to the east) (**Figure 5**). The Carpenter Nathanson Tract neighborhood is bound by Mission Road to the north, Valley Boulevard to the south, South Atlantic Boulevard to the west, and Garfield Avenue and the Mayfair Park neighborhood to the east. The Project Site was one of the later developments of the neighborhood that saw major residential growth between 1910 and 1940. The Mayfair Park neighborhood developed to the immediate east of the Project Site in the 1930s.

The earliest aerial photograph, from 1928, shows the Project Site and immediate surroundings are largely undeveloped, though there are scattered residences to the far west and Valley Boulevard, to the south, is well developed (**Figure 6**). South of Valley Boulevard, the East Ramona neighborhood is well-developed with residences. The subdivision of Tract 6527 was filed with the Los Angeles County Assessor in 1929, and the Subject Property was constructed in 1930. A 1931 Sanborn Map shows the Project Site, bounded by W. Shorb Street to the north, 7th Street to the west, and 6th Street to the east, developed with a double L-shaped, brick structure labeled as

"Alhambra Health Center." The easternmost wing of the building is labeled as "hospital" and the westernmost wing labeled as "Welfare Offices" (**Figure 7**). The 1928 aerial photograph shows the Alhambra Fire Station immediately to the southeast of the Project Site, and a gas station, service area, and shop on the corner of 6th Street and W. Valley Boulevard, with residential and civic structures (a church and a school) within a one block radius.

A 1938 aerial photograph shows the Mayfair Park residential neighborhood to the immediate east and northeast of the Project Site is fairly developed with tree-lined streets while areas to the immediate north, west, and south of the Project Site remain vacant with scattered trees. To the north of the Project Site, the high school athletic field appears to be developed with a large, oval track and a rectangular structure in the northern portion of the field, south of San Marino Avenue. The same 1938 aerial photograph shows the Subject Property to be surrounded by a landscaped area to the east and west, the area to the south vacant, and trees lining the Project Site along West Shorb Street to the north of the Project Site (**Figure 8**).

During the post-World War II era, Alhambra experienced a boom in residential development, as seen in a 1948 aerial photograph, with significant residential infill to the east and west of the Project Site (**Figure 9**). No changes to the Project Site are seen on the 1948 aerial or on a 1950 Sanborn Map. However, the Subject Property is labeled "Alhambra Health and Welfare Center" (**Figure 10**). The 1959 Sanborn Map shows increasing commercial density along West Valley Boulevard, to the south of the Project Site, including auto shops, a gas station, a clinic, and offices (**Figure 11**). By 1965, an aerial photograph shows the continued development of West Valley Boulevard and the addition of three baseball fields in the athletic fields north of the Project Site (**Figure 12**). An aerial photograph from 1972 shows no changes in the Project Site or the residential and commercial development around it (**Figure 13**). The clinic at the corner of 8th Street and West Valley Boulevard is shown to have expanded in a 1981 Sanborn Map; the Project Site remains unchanged, though it is now labeled "Alhambra Health Clinic" (**Figure 14**). By 1989, the high school athletic fields to the north of the Subject Property were developed with additional structures. However, the aerial photograph shows no changes to the Project Site or its immediate vicinity (**Figure 15**). No significant changes were observed in the Project Site or the surrounding areas in aerial photographs until 2002 when a surface parking lot was shown south of the Subject Property (**Figure 16**).

A 2005 aerial photograph shows a change in the orientation of the baseball fields to the north of the Project Site, in addition to a change in the appearance of the roof of the two-story wing of the Subject Property, possibly a result of the seismic upgrades the building was undergoing during this time (**Figure 17**). By 2009, aerial photographs show the roof of the two-story wing of the Subject Property (west), resembling its original appearance (**Figure 18**).

All the Tract maps and Sanborn Maps are included in Appendix B and C, respectively.

4.2 Historic Contexts

Context: Public and Private Health and Medicine in Los Angeles County, 1850–1980

The Los Angeles County hospital system was built under changing and often conflicting social policies governing public health and the welfare of the poor. The county's health care system began in 1856, when six members of the Daughters of Charity of St. Vincent DePaul traveled to Los Angeles from Emmitsburg, Maryland, to open an eight-bed hospital.[52] Between then and now, the operation of public hospitals in Los Angeles has shifted from a state-mandated responsibility to part of the county's broader public health mission. Los Angeles County hospitals have also transitioned from a county-financed system to one with significant participation of state and federal government sources.[53]

The Daughters of Charity's facility, the Los Angeles Infirmary, now known as St. Vincent's Hospital, was originally located in a Sonoratown adobe owned by then-Mayor of Los Angeles, Don Cristobal Aguilar. After incorporating as a charity in 1869, nuns sold medical services for indigent patients to the County for $1.22 a day.[54] The same year, builders laid the cornerstone for the permanent French Hospital at College and Hill Streets, which became the first non-partisan hospital in Los Angeles. The French Hospital was financed through funds raised by members of the French Benevolent Society.[55] Shortly after, the cost of caring for the indigent became an issue in Los Angeles, and in 1878, the county opened its own 100-bed Los Angeles County Hospital as a way of lowering costs. In 1885, Good Samaritan Hospital, affiliated with the Episcopalian Church, was opened by Sister Mary Wood. Shortly afterward, California Hospital Medical Center was opened by Dr. Walter Lindley in 1887, where the first X-rays taken in Los Angeles were performed a few years later.[56]

By the early 1900s, California had one of the most extensive public hospital systems in the nation, and a 1925 Department of Public Welfare survey identified 69 county hospitals spread across all but four California counties. County hospitals provided a broad range of inpatient and outpatient services to individuals who met indigent requirements. The major responsibility for supporting county hospitals rested on the counties themselves, financed primarily through property taxes, with minor contributions from other sources.[57] Privately owned hospitals continued to flourish in Los Angeles as well. In 1902, Los Angeles businessman Kaspare Cohn donated a two-story Victorian home in Angeleno Heights for a 12-bed hospital called the Kaspare

Cohn Hospital, now known as Cedars-Sinai. Hollywood Hospital opened in 1924 and merges with Clara Barton Hospital a few years later, becoming Hollywood Clara Barton Hospital.

The County of Los Angeles began to take an active role as a national leader in providing medical care through dispersed facilities for its citizens, under the direction of J.L. Pomeroy, M.D. In 1929, in an article published in the *Journal*, Pomeroy, a County Health Officer, advocated for the need to create a dispersed network of county-run medical clinics that would be able to meet the needs of the growing population of Los Angeles County. Later, in 1935, Pomeroy spoke of the local health center as a key component of successful health stories throughout Los Angeles County. The County health department, at this time, was concerned with the spread of communicable diseases such as syphilis and tuberculosis and often tied the spread of these diseases to general sanitation and hygiene concerns.[58]

Private physicians opposed the County Clinics, thinking it would draw business away from their practices. This, along with budget pressures during the Great Depression, led to the reduction in the network of County Health services in the late 1930, even while a new Los Angeles County General Hospital was opened in 1933.[59]

Beginning in the 1930s and continuing through the post-World War II era, employers began to voluntarily provide health insurance for their workers. Employer demand for workers coverage options prompted the development of private insurance programs such as Blue Cross and Blue Shield, and prepaid delivery systems, such as Kaiser Permanente.[60] This, combined with the post-war population boom and a shift from prevention of infectious diseases to a more general health care model, resulted in Los Angeles County's patient population becoming largely poor and lower class.

To serve this growing population, Los Angeles County General Hospital expanded to 3,800 beds in 1942 and two additional properties, former military hospitals in Long Beach and Torrance, were acquired in 1945.[61] A psychiatric hospital was constructed next to County General in 1955.[62]

Newly available funding for private hospitals through government insurance programs like Medi-Cal, Medicare, and employer-sponsored health plans reduced demand for county hospitals. Of the 66 county hospitals operating in 1965, fifteen were closed, sold, or leased by 1973, and an additional ten hospitals were closed by 1978.[63] As employment-related, private health insurance expanded and private hospitals were built to serve growing middle-class suburban communities, health care for the poor became the prominent domain of the Los Angeles County General Hospital, which was renamed the Los Angeles County University of Southern California Medical Center.[64]

As new medical technology was developed, hospital costs increased. Patient care costs grew to $450.00 per day in 1978, a growth of over 11,150% from $4.00 in 1937. Many other jurisdictions opted to close their hospitals as costs rose, but Los Angeles County turned to higher levels of government for help, beginning a shift from a largely county-financed system of care to one with the participation of state and federal governments.[65]

Lines between health care and public health began to blur in the 1960s with the merger of the Los Angeles City Health Department into the County Health Department. In 1972, in further efforts to consolidate and integrate services, the county departments of hospitals, public health, and mental health and the County Veterinarian's Office were merged into the Department of Health Services.[66] Integration promised a rational health planning system whereby the deployment of health services would be based on demographic data or health status.[67]

Throughout California, the success of Medi-Cal and Medicare in improving access to private care, along with Proposition 13, accelerated the closure or sale of many county hospitals. By 1985, fewer than half of the counties in California operated public hospitals. Similar trends were noted nationally. Los Angeles County's policy efforts turned increasingly to institutional survival, as its health budget was strained by dwindling revenue and an unprecedented expansion in the demand for hospital care. By increasing financial dependence on the state, county health systems became increasingly sensitive to changes in state policy and politics.[68]

Sub-Context: Los Angeles County Public Health Clinics, 1900-1930

The first three decades of the 20th Century saw a population boom in Los Angeles County, facilitated by cheaper rail travel and the need for workers to support the growing metropolis. From 1900 to 1920, the population of Los Angeles grew from 170,298 in 1900 to nearly one million in 1920, an increase of 550%. Los Angeles County's population would be over two million in 1930.[69] A large portion of this population growth was Mexican and Filipino immigrants, who primarily worked as laborers in the unincorporated areas of the county in agriculture[70]. Building on irrigation systems used by Spanish and Mexican ranchos and further benefitting from the completion of the Los Angeles Aqueduct in 1913, the San Fernando and San Gabriel Valleys were the center of Los Angeles agriculture during this period. The result was Los Angeles becoming the nation's most productive agricultural county from 1909 to 1950.[71]

When Dr. John L. Pomeroy was appointed the first health officer of Los Angeles County in 1915, he prioritized public health efforts, focusing on the immigrant families of the agricultural areas. In addition to addressing sanitation, sewage treatment, and inspection of public eating places,

Pomeroy concentrated on preventative care throughout the county.[72] The result was the construction of a network of County Health Clinics throughout Los Angeles County, which would address public health from a holistic point of view. In a 1931 article in *California and Western Medicine* (now known as the *Western Journal of Medicine)*, Pomeroy explained the rationale behind the creation of county health clinics as such:

> The conception of the Health Center in Los Angeles County is based on definite provision for persons in all three of these agencies [physicians, health officers, and social workers] to work together in the same building, keeping accurate records of each of their part in the program, and to adjust the difficulties by frequent discussion as the problems arise. These Health Centers which are maintained by Los Angeles County are an application of modern business principles in public work and the adoption of group action in dealing with problems as closely inter-related as medical economics.[73]

Pomeroy continued by describing the rationale behind the selection of predominately immigrant, rural areas:

> In many large cities we find literally hundreds of agencies (in Los Angeles 127) engaged in some form of health or medical work. On the contrary, in rural districts and small cities these functions are relatively undeveloped. Thus comes about a failure in proper distribution of services – a tremendous concentration in a few institutions, while the small towns and rural districts remain undeveloped.[74]

When the Subject Property was constructed in 1930, it was the sixth in the network of County Health Clinics developed by Pomeroy. The first to be built was in San Fernando in 1926, at 604 S. Maclay Avenue, "in a building formerly used by the San Fernando Baptist Church"[75]. The next year, in 1927, a new clinic was constructed in Compton. Pomeroy said that this building, located at the intersection of Wilmington and Orange Streets, was "the first building of its kind in the country."[76] The same year, a clinic in Pomona opened in a central location "adjacent to the various municipal buildings" such as City Hall.[77] Of the Pomona Clinic, Pomeroy was quoted as saying:

> I believe that this health center [Pomona] is really the first of its kind that I know of in the United States and far superior to the other two which the country health department has built, and eventually will be recognized as a model from which others throughout the county may be patterned.[78]

76 "Health Clinic at Compton Planned," *Long Beach Press-Telegram*, December 24, 1926. Note: Both streets referenced by Pomeroy subsequently changed names. Orange Street was changed to Rosecrans Avenue and Mona Boulevard was changed to Willowbrook Avenue, as indicated on the "Walton Villa Tract Map" (MB 7-144) as obtained from the Los Angeles County Assessor's Office.

77 "Newest addition to list of local public buildings," *Pomona Progress Bulletin*, December 8, 1927.,

78 "Without Equal in U.S., Claim," *Pomona Progress Bulletin*, December 8, 1927.

A clinic at 1525 Euclid Street in Santa Monica was next in 1928, the fourth in Pomeroy's plans to "decentralize the functions of the county health department.[79] This was followed in 1929 by the East Side Health and Welfare Center, one of the first planned subdivisions in Los Angeles County.[80] The Subject Property, known as the Alhambra Health and Welfare Center, the sixth health center constructed under Pomeroy's plan, opened in 1930 to serve the needs of residents in the San Gabriel Valley.[81]

As of 2024, only three of these original six health clinics remain extant. The San Fernando Clinic was destroyed in the 1994 Northridge Earthquake. Aerial photographs of the Belvedere Gardens neighborhood in East Los Angeles show the East Side Health Center was demolished circa 1980-1987. The Pomona Clinic was likely demolished circa 1973, along with the original city hall, and replaced by a 25-acre civic center designed by Welton Becket and Associates.[82] The Compton Health Center, the Santa Monica Health Center, and the Alhambra Health Center (Subject Property) remain extant. Like the Subject Property, the Compton location remains vacant. The Santa Monica Location is now home to the LA Spanish School, operated in conjunction with the City of Santa Monica.[83] It is designed in a Spanish Colonial Revival style somewhat similar to the Subject Property.

Monterey Style, 1925-1955

A blend of Spanish and American Colonial features, the Monterey Revival is a unique style of residential architecture in the American Southwest that originated in the nineteenth and early twentieth centuries. One of the first examples of the style was the 1835 two-story adobe home of Thomas O. Larkin in Monterey, California.[84] The residence had a low-pitched roof that extended to cover the cantilevered balcony on the second floor, a shaded veranda with slender colonial-style columns, and the use of mud bricks and wood framing for construction.[85] The functionality of the house and the lighter structure gained popularity in the area and became an important precedent of the Monterey style of architecture. The style evolved over time, with earlier examples showing more Spanish Colonial influences and later ones leaning more towards American Colonial. The Spanish arches were replaced by slender wood columns and flat wall window openings flanked by shutters; the construction material was often a combination of brick and wood with a whitewash or stucco finish. The most prominent feature of the style was the cantilevered balconies at the second floor extending to the full width of the building. [86]

The style was widely favored in the mid-1920s, reaching peak popularity in Southern California and Alhambra in the 1930s, with several examples of Monterey Style residences and institutions extant in the city. Los Angeles County architect Karl W. Muck was also a fervent admirer and advocate of the style, incorporating it into his designs of various residences and institutions in and around Alhambra.[87]

The following context table is excerpted from the City of Alhambra Historic Context Statement *Architecture and Design, Theme: 20th Century Revivals, Sub-Theme: Monterey Colonial Revival,* that was prepared by Historic Resources Group for the City of Alhambra, Community Development Department in April of 2022.

Monterey Style, 1925-1955[88]

Context	Architecture and Design
Sub context	N/A
Theme	20th Century Revivals
Sub theme	Monterey Colonial Revival
Property Type	Properties eligible under this context may be any property type: Residential, Commercial, Institutional, or Industrial.
Property Sub Type	N/A
Geographic Location	N/A
Criteria	C/1
Period of Significance	1925-1955
Significance	• Properties significant for their architectural merit are evaluated under this context, which includes separate themes for the predominant architectural styles found in the city. • Individual residential properties that are eligible under this criterion may be significant as: • A good/excellent or rare example of an architectural style, property type, or method of construction. Eligible examples typically exhibit high quality of design and distinctive features. • A distinctive work by a noted architect, landscape architect, builder, or designer. • Many resources that are eligible under this context may also be significant under other contexts as well.
Eligibility Standards	Individual Resource: • Dates from the period of significance of the applicable theme; and • Represents a rare or good/excellent example of the style or type with high quality of design and distinctive details; and • Displays most of the character-defining features of the style or type; and • Retains the essential aspects of historic integrity

87 "Gracious Charm in Monterey Manner," *Los Angeles Evening Citizen News,* February 22, 1935.

88 For additional information please refer to pages 282-283 of the Alhambra Historic Context Statement, developed by HRG for the City of Alhambra, April 2022, https://www.historicalhambra.com/.

Character Defining/ Associative Features	• Rectangular or L-shaped plans • Typically, two-stories • On the second floor of the primary façade, there is often a wide, shaded balcony with square or turned wooden posts. • Exterior cladding is generally brick, wood, or stucco. • Frequently, different materials are used for first and second floor cladding (e.g. wood siding over brick). • Roofs have a low pitch and are covered with clay tile or wood shingles • Rafters and brackets are often exposed in the eves • Short chimneys are usually placed at one or both sides of the gable ends • Windows are typically multi-paned an either casement or double-hung sash, and doors are single or paired. • Windows and doors are generally of wood, with American Colonial surrounds. • Windows are often paired and flanked by decorative wood shutters.
Integrity Considerations	A property that is eligible for designation as a good/excellent or rare example of its style or type should retain most – though not necessarily all – of the character-defining features of the style. • A property that is significant for its architectural/design merit should retain integrity of Design, Materials, Workmanship, Feeling, and Association, at a minimum. • Eligible bungalow courts and courtyard apartments must retain their original plan and layout. • Landscape and hardscape features may also be contributing features to eligible multi-family residential properties. • A property important for illustrating a particular architectural style or construction technique must retain most of the physical features that constitute that style or technique. • A property can be eligible if it has lost some historic materials or details but retains the majority of the essential features from the period of significance. These features illustrate the style in terms of the massing, spatial relationships, proportion, pattern of windows and doors, texture of materials, and ornamentation.

The following context table is excerpted from the City of Alhambra Historic Context Statement *Development of the Built Environment in Alhambra, 1920-1940, Theme: Civic and Institutional Development, 1920-1940,* that was prepared by Historic Resources Group for the City of Alhambra, Community Development Department in April of 2022.

Civic and Institutional Development, 1920-1940[89]

Context	Development of Built Environment in Alhambra, 1920-1940.
Sub context	N/A
Theme	Civic and Institutional Development, 1920-1940
Sub theme	N/A

Property Type	Civic Buildings Post Offices, Fire and Police Stations Schools Libraries Religious Buildings Hospitals and Medical Facilities Social Clubs and Cultural Institutions Parks Infrastructure Improvements and other Civic Amenities, including electrical substations, reservoirs, roadways, and bridges. Public Art Historic District Hospitals and Medical Facilities
Property Sub Type	N/A
Geographic Location	N/A
Area of Significance	Communications, Entertainment, Industry, Ethnic Heritage
Criteria	A/1
Period of Significance	1920-1940
Significance	Civic and institutional properties are evaluated for potential historic designation based on the patterns of development identified in this context. Institutional development during this period reflects the city's continued expansion following World War I, and through the Great Depression. Individual properties or historic districts that are eligible under this context may be significant: • As the site of an important event in history; or • As an example of civic or institutional development representing the continued civic and institutional growth during the 1920s and the Great Depression; or • For an association with New Deal-era federal funding programs. Civic and institutional properties that are significant for their architectural merit are evaluated under a separate theme.
Eligibility Standards	• Dates from the period of significance; and • Has a proven association with an event important in history; or • Represents important civic or institutional development from the period; and • Displays most of the character-defining features of the property type or style; and • Retains the essential aspects of historic integrity.
Character Defining/ Associative Features	• Retains the essential physical features that made up its character or appearance during the period of its association with the important event or historical pattern • May be associated with the Public Works Administration or the Works Project Administration • May also be significant under the Architecture and Design contexts
Integrity Considerations	• At a minimum, should retain integrity of Location, Design, Feeling, and Association • Should retain the majority of features that illustrate its style or type • Setting may have changed (surrounding buildings and land uses) • Original use may have changed • Signage may have changed

4.3 History of the Subject Property

Construction History

Building permits on file with the City of Alhambra Building Department (**Table 3**)**,** Sanborn Maps, aerial photos and historic newspapers were used to create a construction history for the Subject Property, which was known as The Alhambra Health Center**.**

TABLE 3
612 WEST SHORB ST
CITY OF ALHAMBRA BUILDING DEPARTMENT

Issued	Location	Permit/ Assessor Record	Owner	Contractor (C) or Architect (A) Engineer (E)	Valuation ($)	Description
9/15/1955	612 W Shorb	55053	Los Angeles County Hospital	Los Angeles County Mechanical Department	N/A	Plumbing permit for the addition of Gas system
7/14/1960	612 W Shorb	A 16377	County of Los Angeles	Los Angeles County Mechanical Department (C)	N/A	Electrical permit to disconnect a 400 AMP

The Subject Property was constructed in 1930 at 612 West Shorb Street for a cost of approximately $180,000.[90] The building was designed by Los Angeles County Architect Karl Wilhelm Muck in the Monterey style with Andalusian influences. It featured a California padre tile roof, whitewashed brick exterior, and green shutters with wrought-iron fixtures **(Figure 19)**.[91] According to the earliest Sanborn map showing the Subject Property in 1931, the building was a split-level unreinforced brick masonry structure with a double-L-shaped footprint. A hospital operated in the one-story wing, and welfare offices were housed in the two-story wing.

While there are only two available permits for the Subject Property on file, both for minor repair work **(see Table 3),** a review of Sanborn Maps, aerial photos, and historic newspapers revealed that the building remained intact and mostly unaltered from its original construction until 1990, when the unreinforced masonry (URM) structure was deemed seismically unsafe in the event of a moderate to severe earthquake.[92] Various ideas were weighed to address the issue, including the closure of the Alhambra Health Center and a search for a new facility or relocation of the current facility to El Monte or Monrovia; significant protests from the local community kept the center open. Eventually, in 1994, the County of Los Angeles put out a bid for work on the Alhambra Health Center to "seismically upgrade the facility while being sensitive to the existing exterior character of the building and to implement a major interior renovation of the building, including rehabilitation or replacement of the building systems (i.e., HVAC, electrical, and plumbing)." [93] The Alhambra Health Center was granted $4,000,000 under a Community Development Block

Grant (CDBG) provided by the U.S. Department of Housing and Urban Development for earthquake relief activity following the 1994 Northridge earthquake.[94]

Per a newspaper article on September 14, 2002, the Center was "refurbished in 2000 with new floors, new light fixtures and paint."[95] The building underwent further seismic upgrades in 2005 (**Figures 20-21**). A review of the available as-built drawings from this seismic upgrade confirmed that the work was carried out in conformance with the Secretary of Interior Standards. The drawings were prepared by Caldwell Architects and their structural consultants KPFF. Per the drawings, the building underwent seismic and accessibility upgrades, wherein Unreinforced Masonry (URM) shear tests were conducted, and interior code-compliant shear walls were constructed along the corridors. Other work conducted at the time included the repair of cracks in the masonry wall by injection of compatible strengthening material and the addition of ramps at the exterior. The existing historic roof was completely removed with the intent of waterproofing the roof and abating any asbestos in the roofing material. The drawings note that the roof tiles should be removed carefully and reused.[96] All the downspouts, vents, and gutters were retained in place. Any plaster and flooring removed for the structural work and shear tests were repaired in kind. The building also underwent an Americans with Disabilities Act (ADA) accessibility upgrade with the addition of ADA-compliant ramps at the exterior, ADA-accessible bathrooms, and door hardware. Additional structural posts were added to the east elevation of the two-story wing. The traditional roof trusses at the two-story wing had additional joists and horizontal diaphragms constructed, possibly to anchor the roof securely to the walls and floors.[97] Based on photos, it is also likely that the exterior whitewash finish of the center was removed during the retrofit.

The Alhambra Health Center housed all the offices in the two-story wing and all the examination rooms, and medical services in the one-story wing. The building has been vacant since the 1990s, with all the windows and doors boarded.[98] The footprint of the building appears to remain unchanged since its original construction in 1930[99].

Architect: Karl W. Muck

Karl Wilhelm Muck was born in Los Angeles, California on April 21st, 1892, to Peter Muck and Annie Baker. Muck began his career in 1913, working as an "uncertified" architect with an office located in the building of Venice Realty and Investment Company at the corner of Lorelei Avenue and Trolleyway in Venice, California.[100] Very early in his career, Muck served as the managing architect for companies such as Southern California Home Builders and the Western Building and Investment Company. He was involved in designing hotel buildings on the Ocean Front in Venice, California, while residing with his parents at the Beverly Apartments at 20 Westminster Avenue.[101] He married Cecil Lovett in 1915 and by 1917, he was residing in El Dorado, Kansas, with his wife and child, continuing to work as an architect.[102] While in Kansas, Muck designed various types of buildings, including residences, retail stores, offices, and a Gothic church in the town of Potwin. He extensively utilized brick as construction material in his designs.[103] Although Muck found El Dorado a "lively and progressive city," by January 1920, Muck had moved back to Los Angeles with his wife, Ceciel and daughter, Frances.[104] Newspaper

reports indicate that by 1927, he was serving as the County Architect for Los Angeles County, working on the construction of the County Health Center in Pomona (**Figure 22**).[105]

As the County Architect, Muck designed various civic and institutional buildings such as fire stations, health centers, sanatoriums, hospitals, administration buildings, and residences. The sketches and renderings of these buildings were featured in the Architects Building Material Exhibit, an exhibition held by the Office of Los Angeles County Architects in 1930.[106] Muck utilized "the Spanish and early Californian style of architecture because of the fireproof character of the construction type and its suitability to Southern California."[107] His well-known projects include a one-story frame and stucco addition to the Olive View Sanatorium in Van Nuys, the Los Angeles General Hospital, county fair structures at Pomona, the Alhambra Health Center, and various buildings of the Rancho Los Amigos Hospital Campus including the iconic Harriman Building on the North Campus (**Figure 23**).[108]

By 1931, Muck was making $7,200 a year as County Architect and managed a staff of 45 employees.[109] However, budget cuts during that year led to the abolishment of the Office of County Architect, with the *Pomona Progress Bulletin* noting that "there was no criticism of Muck" and the closure of the office was "taken in the interest of economy in an effort to keep the county budget at a low enough rate so that no tax rate increase need[ed] to be made."[110]

He then opened a private architectural practice and by 1935 had offices located at 7510 Sunset Boulevard.[111] In his 24 years of architectural practice in Southern California, Muck became an advocate of the Monterey Style because of its functional designs and economic advantage (**Figure 24**).[112] With its linear arrangement, the Monterey Style allows a smooth interconnection of all the spaces in a residence. Mixed with modest construction materials, it proves to be an economically functional style of architecture. However, in 1936, Muck died by suicide at the age of 43 for reasons unknown.[113]

Occupancy History

Table 4 below summarizes the occupancy history of the Alhambra Health Center at 612 W. Shorb Street. The information included was developed utilizing historic newspaper articles, historic phone books and city directories, and building permits on file with the City of Alhambra Building Department. The subject property was constructed as the Alhambra Health Center, operated by the Los Angeles County Health Services, and owned by the Los Angeles County until 2019, when it was transferred to the City of Alhambra[114].

Alhambra Health Center

The Alhambra Health Center was the sixth in a chain of health centers established by LACHD. In 1925, Dr. John L. Pomeroy, the county health officer, proposed the idea of establishing health centers to provide health and hygiene services accessible to each densely populated district and its ever-growing community.[115] Before the construction of the Subject Property, the Alhambra District of LACHD operated a health center at 156 South Garfield Avenue, but it no longer could service the ever-growing population of Alhambra and the San Gabriel Valley.[116] County Health Officer Dr. John L. Pomeroy, Dr. S. J. Stewart, head of the Alhambra district health center, and Supervisors Wright and Frank Shaw and other county officials spent almost three years gathering funds and scouting for an appropriate location to host the new Alhambra Health Center.[117] In 1929, Los Angeles County budgeted $150,000 to construct the health center and acquired the site at 612 West Shorb Street.[118]

The Alhambra Health Center was constructed in 1930 at 612 West Shorb Street, Alhambra, California. It was constructed by the Alhambra District of the Los Angeles County Health Department (LACHD) to serve the ever-increasing population of the San Gabriel Valley, which includes the communities of Alhambra, San Gabriel, Wilmar, El Monte, Monterey Park, Baldwin Park, Puente, Lamanda Park, Altadena, and West Azusa. The structure was designed by County Architect Karl W. Muck who had also designed the health centers at East Side, Santa Monica, and Pomona. [119] The facility housed clinics, laboratories, an emergency hospital, a women's ward on the first floor, administrative offices, a nursing section, and district sanitation offices on the second floor. The objective of the LACHD health center program was to ensure a high level of "efficiency in community medical and promotion of hygienic safeguards" and design each center as an "architectural asset to the place in which it is located."[120]

The Alhambra Clinic, as the sixth center constructed, was designed to be "one of the most modern and best-equipped health establishments in Southern California with an emergency hospital, a dental laboratory, X-ray laboratory, and clinics." [121] Other Los Angeles County health centers include one in San Fernando completed in 1926 for $153,732, followed by one in Compton in 1927 for $168,000, one in Pomona in 1927 for $61,000, one in Santa Monica in 1928 for $17,000, and the east side health center at Belvedere Gardens in 1929 for $98,000.[122]

When it opened in August of 1930, the Alhambra Health Center cost an estimated total of $180,000 for the building and medical clinic and was designed to serve a population of approximately 150,000 local residents. The Alhambra Health Center included cardiac and

metabolic clinics, tuberculosis and chest clinics, and a fully equipped dental department for adults and children. The design of the building and the equipment allowed "maximum efficiency with minimum time expended."[123] The Center also housed administrative offices for child hygiene and business administration, laboratories, a social bureau of medical services, and a state-of-the-art emergency hospital. The emergency hospital was located away from the hustle and bustle of the city and mitigated a major problem of accidental deaths in the area. The number of vehicular accidents in the area had increased, but due to Los Angeles General Hospital being farther from the City of Alhambra, many victims were not provided medical attention in time. The emergency hospital provided immediate surgical services as needed and saved time and many lives.[124]

However, the Health Center's operation was not always smooth. In 1939, emergency hospital services were temporarily closed due to funding issues, though a first aid clinic was operated to provide emergency treatment to the local community.[125] The service was eventually reopened in 1942.[126] During World War II, the Subject Property was designated as an air raid casualty station in the case of a Japanese attack.[127] As public health was considered a matter of national defense during the war, the Subject Property was the site of venereal disease screenings to assist the Selective Service System and provided pre-natal and tuberculosis chest screenings for any citizen who desired.[128]

Following the end of World War II, the City of Alhambra, along with the rest of the San Gabriel Valley, experienced a population boom encouraged by government financing of housing, benefits provided to war veterans, and the transition of formerly agricultural areas of Los Angeles County to large swaths of mass-produced, tract housing. Many former staff members who served in World War II returned to their positions with the Center and continued their careers with Los Angeles County Health.[129] Despite this growing population, the Alhambra Health Center continued to serve a vital role in the public health infrastructure of Los Angeles County throughout the twentieth century.

Through the late 1940s and 1950s, the Center offered various events and services, including Open Houses to screen public health films,[130] presentations on lectures on public health,[131] diphtheria vaccination booster clinics,[132] and chest x-rays for teens and adults.[133] The Alhambra Health Center also offered welfare services, hearing tests and diagnostic services, a family planning clinic for women along with low-cost screening and free clinic services, programs for teenage mothers, skin tests for tuberculosis, free treatment for communicable diseases, and immunization shots.[134]

The Clinic also served as the headquarters of the local health department for the reporting of communicable diseases such as mumps.[135] Courses for expectant parents were a recurring program throughout the 1950s.[136] Following the discovery of the polio vaccine in 1955, the Alhambra Health Clinic was one of the myriad sites throughout the San Gabriel Valley where individuals under 40 could receive the Salk vaccine.[137] In 1962, the Clinic was also the site of polio vaccinations using the Sabin "live" vaccine, with payment on a sliding scale based on need.[138] The late 1960s and 1970s saw the clinic host measles immunization clinics[139] and cancer screenings, including pap smears.[140] 1969 saw the Alhambra Health Center open a family planning clinic, which offered women's health screenings, a variety of birth control options, including IUDs and consensual sterilization, and therapeutic or voluntary abortions.[141] At the time, California was one of only four states in which no reason was needed for a woman to obtain an abortion.[142] Public health clinics, such as those for blood pressure screening[143] and required school immunizations[144] continued to be the most popular offerings at the Clinic throughout the 1980s.

In 1990, the structure was deemed unsafe in the event of a moderate to severe earthquake and the Center was on the verge of closure. Los Angeles County officials sought various options to keep the Center open, including searching for a new building to house the center and transferring the department to another location such as Monrovia or El Monte. However, all the ideas were eventually eliminated, overcome by the need for the current center to continue serving the Alhambra School District and residents of Alhambra and immediately adjacent communities including San Gabriel, Monterey Park, San Marino, Rosemead, South Pasadena, and Temple City. The seismic upgrades eventually took place in 2005.

By the 1990s, the Alhambra Health Center continued to serve approximately 4,500 patients each month.[145] In 2001, the subject property was briefly occupied by the Plaza Community Clinic. In 2002, the Los Angeles County Health Care System suffered a huge setback due to a lack of funds, which led to the eventual closure of 11 of the 18 public health clinics, including the Alhambra Health Center.[146] It appeared to be the "only clinic in the city of 86,000, making it the sole source of medical treatment to the communities around".[147] Additionally, the Center was the major source of treatment for the migrant and underprivileged population of Alhambra.[148] The Alhambra Health Center closed its doors in September 2002, after almost 72 years of serving the City of Alhambra

and the San Gabriel Valley. In 2008, Chinatown Service Centers occupied the building for an unknown period of time. As of 2024, the building has been vacant for the last 12-15 years.

Architectural Description

Setting

The Subject Property is located at 612 West Shorb Street, an L-shaped parcel bordered by West Shorb Street to the north, South 7th Street to the west, South 8th Street to the east, and Alhambra High School sports fields to the north (AIN 53501-007-900). An alleyway sits to the south of the parcel, and the Alhambra Fire Department Station No. 2 sits to the southeast. The surrounding neighborhood is characterized by a series of recreational fields to the north, low-scale churches and commercial buildings to the west, and a one-story residential development to the east. A low-scale commercial development with associated parking lots sits to the south of the subject property along Valley Boulevard, which is the main thoroughfare in the area.

The Project Site is improved with one structure with ample landscaped grass lawns surrounding the building. Mature trees and plantings are located primarily along the north, west, and east elevations (**Figure 25**). Surface parking lots toward the center of the property are accessible from South 6th Street and off a southern alleyway in the southwest corner of the property (**Figures 26-28**). The subject property slopes upward to the center of the lot, and two sets of steps extend from the sidewalk along W. Shorb Street towards the building (**Figure 29**). The eastern set of brick steps leads to brick pavers that extend toward the primary entrance and includes brick pony walls (**Figure 30**). The western set of concrete steps includes concrete pony walls with brick capping and metal handrails (**Figure 31**). A concrete wheelchair ramp with metal handrails leads from S. 7th Street to the southern parking lot.

Architectural Description

The subject property at 612 West Shorb Street is oriented north along West Shorb Street. Constructed in 1930 in the Monterey Style, the brick building's footprint is comprised of two L-shaped forms: a two-story volume at the west and a one-story volume at the east. The two volumes intersect along the building's northern facade, and both include wing extensions that project south. The brick exteriors are in a four-to-one common bond and were previously whitewashed in lime before being removed in a 2005 seismic update.

Two-Story Western Wing

The building's two-story western wing includes a cross-gabled, low-pitched roof clad in terracotta tile (**Figures 32 and 33**). Shallow exposed rafter tails extend beyond the building and terminate in metal rain gutters. Accessed by a brick porch with brick steps, the building's recessed primary entrance sits at the asymmetrical north facade (**Figure 34**). The facade is characterized by a full-width Monterey-style cantilevered balcony at the second story. The wood balcony includes square balustrades and columns that support a shed roof that slightly projects from the primary roofline.

The north entrance is flanked by a pair of windows with false metal shutters. The building's cornerstone sits adjacent to the entrance at the ground floor. Window openings continue at regularly spaced intervals along the first floor, while floor-to-ceiling window openings are located on the upper floor (**Figure 35**). The floor-to-ceiling openings are interspersed by perforated open-course

brick configurations. It appears that the perforated open course brick configurations served as screens overglazing. The majority of the building's fenestration is enclosed with painted plywood, which is punctuated with air conditioning units at irregular intervals. Original glazing is visible in select locations and mostly consists of six-over-six double-hung wood windows.

Additional ground floor entrances with brick porches sit at the west and south gabled ends. These entrances include both surmounting wood decks supported by simple square columns and square balustrades, which are accessed by prominent exterior wood staircases (**Figures 36 and 37**). The staircases lead to second-floor wood decks and recessed double-door entrances (see **Figure 38**). Both gabled ends include brick arched gable vents with brick sills that sit centered above the second-floor entrances. Another vent is found on the two-story wing's east elevation.

The building's L shape forms a southeastern courtyard with mature trees and shrub plantings (**Figure 39**). Two ground-floor entrances sit within this area, including an arched brick entrance toward the crux of the "L" and another located toward the south of the extending wing (**Figure 40**). The southern entrance includes brick steps and a Colonial Revival-style surround with Doric pilasters supporting an open pediment (**Figure 41**).

One-Story Eastern Wing

The subject property's one-story eastern wing connects to the two-story portion along W. Shorb Street, centered below the east elevation gable (**Figures 42- 43**). The one-story eastern wing similarly includes a cross-gabled, low-pitched roof clad in terracotta tile. Shallow exposed rafter tails extend beyond the building and terminate in metal rain gutters, with terracotta coping at the gabled ends. The one-story portion includes a south projecting wing that forms a "U" shape, enclosing another courtyard with a grass area and a parking lot (**Figure 44**). A southern brick porch sits at the wing's west elevation and includes simple square columns that support a terracotta-clad lean-to roof extension. Original glazing is visible in select locations at the one-story volume and includes six-over-six double-hung wood windows with brick sills. Windows are interspersed with perforated open course brick configurations of a similar size. A brick arched gable vent with a brick sill sits centered within the southern gabled end (**Figure 45**).

The one-story wing's east elevation terminates at W. Shorb Street with a lean-to roof that extends along its north elevation (**Figure 46**). Anchored at the building's northeast corner sits a brick porch with a flared Regency-style metal canopy with stylized wrought iron supports (**Figure 47**). The eastern steps along W. Shorb Street formerly led to this entrance; they are now covered with plant overgrowth (**Figure 48**). The one-story portion's north elevation steps back and includes pairs and single windows, some with false metal shutters and perforated open course brick configurations (**Figure 49**).

Interior

The interior layout of the Alhambra Health Center is linear, with an L-shaped central corridor with rooms on either side. The two-story wing has a central staircase for vertical circulation, as well as exterior staircases at the south and west elevations and a cantilevered balcony at the north elevation. The one-story wing housed examination rooms and x-ray rooms, whereas the two-story wing housed most of the offices. In some areas, the interior appears to have linoleum flooring,

plastered walls, and wood paneling. The central staircase in the two-story wing has wood paneling and a decorative wood balustrade **(Figures 50-52)**.

5.0 Evaluation

5.1 Significance Evaluation

The property history, architectural description, and historic contexts included in this report provide the background necessary to evaluate the historic and architectural significance of the Subject Property, including the history of its construction and alternations. In order to be eligible as a historical resource, a property must possess both significance and integrity.

ESA evaluated the Subject Property against the criteria for listing in the National Register and the California Register, under the contexts *Public and Private Health and Medicine in Los Angeles (1850-1980)* and the sub-context *Los Angeles County Health Centers (1900-1930)*, both developed by ESA.

ESA also evaluated the Subject Property against the criteria for listing in the National Register and the California Register, under the contexts *Development of the Built Environment in Alhambra, 1920-1940, Theme: Civic and Institutional Development, 1920-1940*, and *Monterey Style (1925-1955),* developed by Historic Resources Group as part of the City of Alhambra Historic Context Statement.

Broad Patterns of History

With regard to broad patterns of history, the following are the relevant criteria:

- **National Register Criterion A:** Is associated with events that have made a significant contribution to the broad patterns of our history.
- **California Register Criterion 1:** Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.

The Alhambra Health Center was constructed at 612 West Shorb Street in Alhambra, California in 1930 and was one of the most modern and well-equipped health centers in Southern California at the time of its opening. Originally named the Alhambra Health and Wellness Center, the center was established as part of a Los Angeles County program dedicated to making healthcare and hygiene services more accessible to the public in the more outlying areas of the county. The facility served as a comprehensive medical complex for the growing communities of the San Gabriel Valley, and housed multiple clinics, laboratories, an emergency hospital, a women's ward, administrative offices, a nursing section, and district sanitation offices. The mission of the Los Angeles County-planned health center program was to ensure a high level of "efficiency in community medical and promotion of hygienic safeguards" along with the foresight to design each center as an "architectural asset to the place in which it is located."[149] The Alhambra Center was constructed in central Alhambra with these goals in mind and was among the largest and most well-appointed health centers to be established in Los Angeles County in the 1930s, serving approximately 130,000 visitors in its first year alone. Out of the six original health clinics constructed by Los Angeles County, the Subject Property is one of three that remain extant. The Center remained in full-time service to the general public until its closure in 2002. The Alhambra Health Center is significant at a local level under criterion A/1 for being one of the earliest and

[149] Record Unit Health Program Under way, Los Angeles Times, October 27, 1929

largest county-owned medical centers in the public healthcare system of Los Angeles County, offering a wide variety of healthcare services at one location for over 70 years.

The Alhambra Health Center is also significant for its association with the early civic and institutional development of the City of Alhambra. Often known as "the gateway to the San Gabriel Valley," Alhambra was one of the foremost cities that was established after the Southern Pacific Railroad was extended through the valley in 1873. What had previously been a strictly rural and agricultural area with loose associations to the nearby San Gabriel Mission, the area saw rapid development in the land boom of the 1880s, with further growth incentivized by one of the first iron pipe water systems in Los Angeles. Residential, civic, and institutional development remained steady after the city's incorporation in 1903, peaking between 1920 and 1929 when 3,761 land parcels were developed in Alhambra. Built to serve the burgeoning population of the east San Gabriel Valley, the Alhambra Health Clinic at 612 West Shorb Street was the first public medical institution built in the city of Alhambra, and it continued to serve the population for over 70 years.

Therefore, the Alhambra Health Center at 612 West Shorb Street is significant under National Register Criterion A at the local level of significance, as well as California Register Criterion 1, for its association with the Los Angeles County public health and medical system. The period of significance for the subject property runs from its original construction in 1930 through 1978, which is the end of the historic era as defined by CEQA.

In addition, the Alhambra Health Center at 612 West Shorb Street is significant under National Register Criterion A at the local level of significance and California Register Criterion 1 for its association with the early civic and institutional development of the city of Alhambra. The period of significance for the subject property runs from its original construction in 1930 through 1940.

Significant Persons

With regard to associations with important persons, the following are the relevant criteria:

- **National Register Criterion B:** Is associated with the lives of persons significant in our past.
- **California Register Criterion 2:** Is associated with the lives of persons important in our past.

The Alhambra Health Center at 612 West Shorb Street is not identified with historic personages in national or state local and is not associated with significant individual owners or occupants. Research did not indicate that a significant individual was associated with the property during the 71-year period the building was in use as a hospital and medical clinic.

Therefore, the Alhambra Health Center at 612 W. Shorb Street does not appear to be significant under National Register Criterion B or California Register Criterion 2.

Architecture

With regard to architecture, design, or construction, the following are the relevant criteria:

- **National Register Criterion C:** Embodies the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction.
- **California Register Criterion 3:** Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.

The Alhambra Health Center was designed by Los Angeles County architect Karl Wilhelm Muck and constructed in 1930. Muck designed several health centers in his role as a Los Angeles County architect, and while he is not a notable practitioner, the building itself is an excellent example of the Monterey Revival style, exhibiting typical massing, fenestration, materials, and details. Spanish influences are evident in its double-L shaped footprint with a small courtyard/lawn between the east and west wings and the low-pitched gable roof of red mission-style tiles, while American Colonial Revival details include brick construction and 6/6 wood sash windows with rowlock sills, many with green wood shutters and wrought-iron fixtures. Distinctive to the Monterey Revival style, a wood balcony with slender columns and a simple balustrade, all painted white, is cantilevered off the second floor of the north elevation. The Alhambra Health Center remains in its original location in central Alhambra, setback from the northeast corner of West Shorb Street and South Sixth Street, with grassy lawns between the complex and the streets and a surface parking lot directly southwest of the building. While Alhambra has grown significantly since the building's original construction in 1930, the city remains an urban center of the western San Gabriel Valley, and the neighborhood immediately surrounding the Center remains a suburban residential environment. The building retains nearly all of its original design, materials, and craftsmanship. The removal of an original lime whitewash on the brick exteriors is the only known significant alteration.

Monterey Revival is one of the few architectural styles native to California, and the Alhambra Health Center is a remarkably intact example of that style. Combined with the immediately adjacent Fire Station No. 2, the building serves as a historic centerpiece of central Alhambra and an exemplary representation of institutional architecture in public medicine.

Therefore, the Alhambra Health Center at 612 West Shorb Street is significant under National Register Criterion C at the local level of significance and California Register Criterion 1, as an example of the Monterey Revival style. The period of significance for the subject property is 1930, the date of its original construction.

Data

- **National Register Criterion D:** It yields, or may be likely to yield, information important in prehistory or history.
- **California Register Criterion 4:** Has yielded, or may be likely to yield, information important in prehistory or history.

While most often applied to archaeological districts and sites, Criterion D/4 can also apply to buildings, structures, and objects that contain important information. In order for these types of properties to be eligible under Criterion D/4, they themselves must be or must have been, the principal source of the important information. None of the buildings on the subject property appear to yield significant information that would expand our current knowledge or theories of design, methods of construction, operation, or other information that is not already known about the period in which they were constructed, their method of construction, or their design. The building reflects common building practices and materials of the early twentieth century, which have already been well documented.

Therefore, Alhambra Health Center at 612 West Shorb Street, does not meet the eligibility requirements under National Register Criterion D and California Register Criterion 4.

5.2 Integrity Analysis

The National Register and California Register recognizes a property's integrity through seven aspects or qualities: location, setting, design, materials, workmanship, feeling, and association. Eligible properties should retain several, if not most, of these aspects. Both registers require that a resource retain sufficient integrity to convey its significance, and the property must retain the essential physical features that enable it to convey its historical identity. Integrity is based on significance and understanding why a property is important. *National Register Bulletin 15* states that "only after significance is fully established can you proceed to the issue of integrity."[150]

Location – The property has not moved from its original location; therefore, **it retains the integrity of location.**

Setting – The Project Site is located in central Alhambra, in a historic neighborhood with mixed uses, including residential development to the east and northwest, with commercial development to the south along Valley Boulevard and institutional development to its immediate north and west. The immediate surroundings of the Subject Property have not undergone major changes since its original construction in 1930 and have remained largely intact, excepting the expansion of the adjacent church and further development along the commercial strip of Valley Boulevard. While Alhambra has grown in size and population since the building's original construction in 1930, the neighborhood of the Subject Property remains a center of business and service-related activity in the eastern San Gabriel Valley. The building's location has not changed, nor has its historical association with the surrounding landscape, neighborhood, or city. **Therefore, the property retains integrity of setting**.

Design – The subject property was originally designed and constructed as a split-level brick structure in the Monterey Style. The building has undergone only minor alterations since 1930 and retains the majority of its character-defining features, including the original double L-shaped footprint that divides the building into two wings, the brick exterior in a 4/1 common bond, the window and door openings, the wood shutters with metal ties, and the cantilevered wood balcony at the second floor on the north elevation. Apart from the structural upgrades in 2005 (done

[150] U.S. Department of the Interior, 2002.

mostly on the interior) and removal of the exterior whitewash, the building remains intact as an example of the Monterey Style as applied to a public medical facility. **Therefore, the property retains the integrity of design.**

Workmanship – The property's original workmanship from 1930, including the wall assembly, wood frame cantilever balconies, brick and mortar work, and coursed red clay tile roof remain intact. A seismic update in 2005 added interior shear walls and roof diaphragms and removed exterior limewash, but otherwise there have been few, if any alterations to the building. **Therefore, the property retains integrity of workmanship.**

Materials –The property retains the majority of its original exterior materials, including brick in a 4/1 common bond, 6/6 wood sash windows with wood shutters, wood balconies and staircases, and mission-style clay tile roofing. The most significant alterations appear to be the removal of a whitewashed lime finish on the building and the replacement in kind of the original red clay tile roofing. **Therefore, the property retains the integrity of materials.**

Feeling – Despite the removal of the exterior whitewash finish of the building, all other characteristics specific to the Monterey style of architecture have been retained and preserved. The building retains its original design, materials, workmanship, and setting and continues to relay the feeling of an institutional building in the first half of the 20th century. While its specific use as a medical clinic is not discernable from the exterior, it is easily recognizable as a historic building of civic importance from the early days of Alhambra's existence. **Therefore, the property still conveys the historic character of the Monterey Style Alhambra Health Center and retains the integrity of feeling**

Association – The building was originally designed as a health and medical center and remained in use as such for over 70 years. It is an intact representation of an institutional building designed to be an "architectural asset to the place in which it is located," during a period of significant development in the outlying, now suburban areas of Los Angeles County.[151] Although the San Gabriel Valley and Alhambra specifically have grown substantially since the building's original construction, they remain part of the broader metropolitan area of the City of Los Angeles, with a large population numbers requiring services While most medical centers constructed today are not designed in a manner as high-style as the Alhambra Health Center, it is a rare remnant from a period where institutional architecture was designed to inspire the residents of the surrounding community. **Therefore, the property still retains its integrity of association**.

5.3 Conclusion

As a result of ESA's research and survey investigations and, through the application of the federal, state, and local eligibility evaluation criteria, ESA recommends the Alhambra Health Center at 612 West Shorb Street individually eligibility under National Register Criterion A and California Register Criterion 1 for its association with public medical and health services in Los Angeles County Public and for its association with the early civic and institutional development of the City of Alhambra. Additionally, ESA recommends the building as individually eligible for

[151] Record Unit Health Program Under way, Los Angeles Times, October 27, 1929

an intact example of Monterey Style of architecture. ESA concurs with the status codes of 2S2 (determined individually eligible for National Register through Section 106 process) and proposes to assign the additional status code of 3S (appears eligible for NR individually through survey evaluation).

6.0 CEQA Impacts Analysis

Identified below are the thresholds for determining the significance of environmental effects on historical resources are derived from the CEQA Guidelines as defined in §15064.5. Pursuant to this guidance, a project that would physically detract, either directly or indirectly, from the integrity and significance of the historical resource such that its eligibility for listing in the National Register or the California Register. Adverse impacts, that may or may not rise to a level of significance, result when one or more of the following occurs to a historical resource: demolition, relocation, conversion, rehabilitation, or alteration, or new construction on the site or in the vicinity.

6.1 CEQA Guidelines

According to the State *CEQA Guidelines*, Section 15064.5(b) a project involves a "substantial adverse change" in the significance of the resource when one or more of the following occurs:

- Substantial adverse change in the significance of an historical resource means physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired.
- The significance of a historical resource is materially impaired when a project:
  A. Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for inclusion in, the California Register of Historical Resources; or
  B. Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to Section 5020.1(k) of the PRC or its identification in a historical resources survey meeting the requirements of Section 5024.1(g) of the PRC, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or
  C. Demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA.

Under CEQA, a proposed development must be evaluated to determine how it may impact the eligibility of a district, structure(s) or a site for designation as a historic resource. The Secretary of the Interior's Standards were developed to evaluate and approve work for federal grants for historic buildings and then for the federal rehabilitation tax credit (see 36 Code of Federal Regulations ("CFR") Section 67.7). Similarly, CEQA recognizes the value of the Standards by using them to demonstrate that a project may be approved without an EIR if a project complies with the Standards. In effect, CEQA has a "safe harbor" by providing either a categorical exemption or a

negative declaration for a project which meets the Standards (see State *CEQA Guidelines* Section 15331 and 15064.5(b)(3)). Alternatively, however, if a project does not strictly comply with the Standards, an EIR may not be necessary because CEQA impacts to historic resources could still be less than significant.

Thresholds of Significance

In accordance with Appendix G of the State CEQA Guidelines, a project would have a significant impact related to historical resources if it would:

Threshold (a): Cause a substantial adverse change in the significance of an historical resource pursuant to Section 15064.5

Assessment of the Project's potential impacts related to historical resources was performed utilizing guidance detailed in *California Office of Historic Preservation Technical Assistance Series #1: California Environmental Quality Act (CEQA) and Historical Resources* (Guidelines).[152] These Guidelines define "substantial adverse change" as follows:

> "Substantial adverse change" includes demolition, destruction, relocation, or alternation such that the significance of an historical resource would be impaired (PRC § 5020.1 (q)).
>
> While demolition and destruction are fairly obvious significant impacts, it is more difficult to assess when change, alteration, or relocation crosses the threshold of substantial adverse change. The CEQA Guidelines provide that a project that demolishes or alters those physical characteristics of an historical resource that convey its historical significance (i.e., its character-defining features) can be considered to materially impair the resource's significance.[153]

6.2 Secretary of the Interior's Standards

Under CEQA, a project that follows the *Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing, Historic Buildings* or the *Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings* (1995), Weeks and Grimmer, shall be considered as mitigated to a level of less than a significant impact on the Historical Resource.[154]

1. A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.
2. The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

[152] California Office of Historic Preservation, "Preservation Technical Assistance Series #1: California Environmental Quality Act (CEQA) and Historic Resources," California Department of Parks and Recreation, May 23, 2001. http://ohp.parks.ca.gov/pages/1054/files/ts01ca.pdf

[153] California Office of Historic Preservation, "Preservation Technical Assistance Series #1: California Environmental Quality Act (CEQA) and Historic Resources," 6.

[154] California Environmental Quality Act, 15064.5 (b)(3).

3. Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.
4. Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.
5. Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a property shall be preserved.
6. Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.
7. Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.
8. Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.
9. New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.
10. New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Methodology

Under CEQA, the evaluation of impacts to historical resources consists of a two-part inquiry: (1) a determination of whether the Project site contains or may otherwise impact any historic resource(s), and, if so, (2) a determination of whether the Project would result in a "substantial adverse change" in the significance of the identified resource or resources. [155]

6.3 Project Description

The City of Alhambra (City), proposes to develop the Alhambra Community Center Project on the 612 W. Shorb Street site, which totals approximately 1.37-acre (59,485 square feet [SF]) and also on the adjacent W. Shorb Street right-of-way, which the City intends to abandon and which Alhambra Unified School District intends to transfer its reversionary interest (curb, gutter, sidewalk and street between 6th and 7th Streets) to the City so as to expand the Project Site by 17,707 SF. These two areas total 77,192 square feet (1.77-acres) (the Project Site) and are improved with an existing one- and two-story abandoned brick (21,470 SF) medical clinic building (the Shorb Clinic) sited on the northern portion of the Project Site with associated surface parking found in the southern portion for the Project Site. The Project intends to adaptively reuse the northwest portion of the existing Shorb Clinic building's two-story element

[155] Pub. Res. Code Section 21084.1; CEQA Guidelines Section 15064.5

(approximately 9,000 SF), known as the north wing and demolish the balance of the existing Shorb Clinic facility. Along with the 9,000 SF of the existing Shorb Clinic building's north wing to be renovated and adaptively reused, the City intends to construct a new one- and two-story community center building (up to a height of approximately 38 feet) totaling 16,000 SF, hereinafter referred to as the east wing, along with associated parking and site improvements containing an additional approximate 35,650 SF of hardscaped open space and courtyards and 16,542 SF of exterior landscape areas, parkways and plantings.

While the Project as proposed contains 25,000 SF of community center uses, the funding sources for the entire Project are not entirely accounted for. Currently, the grant funding that has been secured for the Project is only enough to construct a 17,000 SF facility. The City is hopeful that it will be able to secure additional funding, in which case the size of the Project would increase to between 21,000 and 25,000 SF. To ensure the most conservative impact analysis and to provide coverage for the largest possible project, this Initial Study assumes the development of the largest option, a 25,000 SF community center.

Once constructed, operation of the Project would be split between three broad program elements: 1) recreation and community center programs; 2) building support functions; and 3) exterior space programs. The primary program consists of active community center uses, including but not limited to: 1) a large, single-story divisible event space that can be split into three separate high volume spaces (along with attendant warming kitchen and banquet facility storage for tables and chairs, foyer and outdoor event court); 2) a series of larger capacity group fitness/multi-purpose rooms with interior clear ceiling heights between approximately ten and twelve feet, smaller, lower capacity multi-purpose rooms and a recreation room, all of varying dimensions and sizes (typically between approximately 500 SF and 1,300 SF) that would be split between the north wing, and the two new-build structures; and 3) main support/administrative uses would be located in the north wing and include a lobby, restrooms, multiple storage locations, director and staff offices, as well as back-of-house facilities such as electrical, janitorial, audio and visual, and circulation.

The Project would provide a total of 93 vehicular parking spaces, with 70 spaces to be provided on-site and 23 spaces to be provided west of the Project Site on 7th Street as perpendicular parking. Electric vehicle (EV) spaces are to be provided as required by the building code in effect at the time of Project approval, but likely to be no less than 17 EV capable spaces with four of those spaces designated as EV Charging Spaces (EVCS) based on the requirements of Section 5.106.5.3 of the 2022 California Green Building Standards Code, Title 24, Part 11 (CALGreen) with July 2024 Supplement. Two vehicular ingress/egress access points would be provided to/from the Project Site, including a two-way entrance/exit along S. 7th Street and a two-way entrance/exit along S. 6th Street. Consistent with the requirements of the City of Alhambra Zoning Code (which requires bike parking spaces equal to 20 percent of the required number of automobile parking spaces), the Project would provide 19 bicycle parking spaces.

In addition to the development of the community center building, the Project proposes the vacation of W. Shorb Street between S. 7th Street and S. 6th Street. The street vacation would expand the site by approximately 17,700 SF, affording the Project's event space, bike path and courtyards additional land area. The City would restripe the 80-foot-wide S. 7th Street right-of-

way, between Valley Boulevard and W. Shorb Street, to accommodate 23 perpendicular parking spaces along the east side of 7th Street.

6.4 Analysis of Project Impacts

Direct Impacts

Under CEQA 15064.5 (b), the changes to a building and its setting would only cause a substantial adverse change if they would detract from the integrity (location, design, setting, materials, workmanship, feeling, association) of the historical resource such that the historical resource's ability to convey its significance would be materially impaired to the degree that it would no longer be eligible as a historical resource pursuant to CEQA 15064.5 (a). As discussed above, the subject property, Alhambra Health Clinic, located at 612 W. Shorb Street was determined to be individually eligible as a historical resource for both the National Register of Historic Places and the California Register of Historical Resources under criteria A/1 and C/3. As such, the property is considered a historical resource according to CEQA.

The proposed Project proposes a partial demolition and partial adaptive reuse of the Subject Property wherein the two-story wing (west wing) will be adaptively reused, and the single-story (east wing) will be demolished in preparation for the construction of a new east wing. The existing building has been abandoned since the 1990s and is largely deteriorated, however this deterioration has not affected the Subject Property's integrity of location, setting, design, workmanship, materials, feeling, and association and therefore it is still able to convey its historic significance as it relates to the Subject Property's association with the Los Angeles County public health and medical system, Los Angeles County public health clinics of the early twentieth century, the early civic and institutional development of the City of Alhambra, and as an example of the Monterey Revival Style of architecture.

The Project proposes to retain the northern half and part of the southern half of the two-story west wing of the Subject Property, which includes the full-width balcony on the front façade that defines the building's Monterey style, and other significant character-defining features, including its low-pitch cross-gabled roof clad in terracotta barrel tiles, the majority of its six-over-six double-hung wood sills with rowlock sills, and wood French doors on the second level of the north elevation. Interior character-defining features to be retained include a lobby with a significant original interior staircase, and some original wood doors and associated hardware. The eastern wing will be demolished in its entirety, although portions of the interior historic fabric would be partially retained and reused, including historic interior tile murals and light fixtures.

The new east wing of the Proposed Project would be a series of buildings inspired by the idea of the connecting gems of a necklace and designed to create a campus design look and feel. The exterior design components of the new east wing building would derive materiality from the historic fabric of the existing Shorb Clinic building, including brick, stone, and plaster materials. Architectural elements such as trellises and arches would also be used to reference and complement the existing historic structure, but they would be designed in a modern way to show the distinction from the historic structure clearly.

While the reduced preservation option is designed to follow the SOI Standards to an extent via the partial adaptive reuse of the west wing, the demolition of the east wing and construction of a new east wing would result in material changes that would substantially detract from the integrity of the Subject Property such that it would no longer be able to convey its historic associations. The proposed demolition of the existing east wing and the new construction detailed above constitute a substantial adverse change to the resource such that the eligibility for listing would be lost. Therefore, ESA concludes that the impact of the Proposed Project on the Subject Property/Historic Resource would be significant and unavoidable.

Indirect Impacts

Indirect impacts were analyzed to determine if the proposed Project would result in a substantial material change to the integrity of historical resources located within 0.25-mile of the Project Site that would detract from their ability to convey their significance. There are 12 historical resources that have been previously identified within 0.25-mile of the Project Site, and one resource (Alhambra Fire Station #72) within 150 feet, that has indirect views of the Project Site. The other resources do not have a direct or indirect view of the Project Site. These resources are identified in **Table 1** of the historic Resources Assessment Report in the "Previous Evaluations" section.

The resource at 1215 S 6th Street, the Alhambra Fire Station #72 is located adjacent to and 114 feet southeast of the Alhambra Community Center. The fire station has an indirect view of the Alhambra Community Center from its public right of way on S 6th Street. Currently, the east elevation of the existing one-story east wing is partially visible from the public right of way of the fire station. A wood fence separates the fire station from the Shorb Clinic. The fire station is however not visible from the public right of way of the Shorb Clinic.

The proposed Project would not affect the integrity of location, design, materials, workmanship, feeling, or association of the Alhambra Fire Station #72, nor would the proposed Project affect the integrity of setting, as the Alhambra Fire Station #72 was designed to complement the surrounding residential neighborhood. The immediate surroundings of the Alhambra Fire Station #72 have not undergone major changes since its original construction in 1930 and have remained largely intact further development along the commercial strip of Valley Boulevard. While Alhambra has grown in size and population since the building's original construction in 1930, the neighborhood of the Alhambra Fire Station #72 remains a center of business and service-related activity in the eastern San Gabriel Valley. The building's location has not changed, nor has its historical association with the surrounding landscape, neighborhood, or city.

Therefore, the proposed Project would have less than significant indirect impacts on 1215 S 6th Street due to the demolition of the partially visible existing one-story east wing of the Shorb Clinic and construction of a new one-and two-story east wing to the immediate north of the fire station.

Cumulative Impacts

While the proposed Project's indirect impacts on the adjacent historic resource Alhambra Fire Station #72 were found to be less than significant, as detailed in the indirect impacts analysis above, the Project's direct effects on the Subject Property/Historic Resource were found to be significant and unavoidable. **Regardless of any other related development projects in the vicinity of the Subject Property, there is a significant and unavoidable impact from the Proposed Project on the Subject Property/Historic Resource.**

7.0 Recommendations

The Project would adaptively reuse the existing two-story west wing and demolish the existing one-story east wing of the Alhambra Health Center at 312 West Shorb Street, which was identified as a historical resource as part of this HRA report. As the demolition of a historical resource constitutes a substantial adverse change to the resource such that its eligibility for listing would be lost, this impact is considered significant. **Therefore, it is concluded that the impact of the Project on the historical resource would be significant and unavoidable.**

7.1 Mitigation Measures

CEQA requires the Lead Agency to examine and impose feasible Mitigation Measures or feasible Project alternatives that would avoid or minimize any impacts or potential impacts to historical resources. According to CEQA, mitigation includes:

- Avoiding the impact altogether by not taking a certain action or parts of an action;
- Minimizing impacts by limiting the degree or magnitude of the action and its implementation;
- Rectifying the impact by repairing, rehabilitating, or restoring the impacted environment;
- Reducing or eliminating the impact over time by preservation and maintenance operations during the life of the action;
- Compensating for the impact by replacing or providing substitute resources or environments (CEQA Guidelines Section 15370).

Presently, the Proposed Project includes the planned mitigation measure of HABS-like recordation of the building and its site prior to the commencement of any demolition or construction activities. However, even with the implementation of this Mitigation Measure, the **Proposed Project mitigation measures would not reduce the impact on the Subject Property/Historic Resource to less than significant.**

For there to be no impacts, the Project redesign would be developed in accordance with the Secretary of the Interior Standards, eliminating objectionable or damaging aspects of building demolition, which is detailed below in *Historic Mitigation Measure 1: Project Redesign.* **Should HMM 1 be adopted, the impacts on the Subject Property/Historic Resource would be mitigated to a less than significant level.**

Should the Subject Property be retained or rehabilitated onsite or in a new location, additional mitigation measures to ensure no impacts to historical resources would include the development

of the following documents, detailed in *Historic Mitigation Measures 2-5*: *Preservation Design Recommendations, Plan Review and Impacts Analysis, Preservation Treatment Plan, and Construction Monitoring.* **Should HMM 2-5 be adopted in combination with HMM 1, the impacts on the Subject Property/Historic Resource would be avoided.**

All options preferable to demolition of the Subject Property should be investigated, including *Historic Mitigation Measure 6: Relocation of Building*. While this is a delicate operation that should only be undertaken when all options to save the structure from demolition have been considered, is a possible option through the skillful application of technology. **Should HMM 6 be adopted, the impacts on the Subject Property/Historic Resource may be mitigated to a less than significant level.**

Assuming that the Project proceeds as planned, the following mitigation measures are proposed to reduce, but would not eliminate, potential impacts on historical resources. *Historic Mitigation Measure 7-8: HABS Level III Report and Interpretative Exhibit* would be incorporated into the Project redesign in order to interpret the existing historic building, and to document the property. **Should HMM 7-8 be adopted, the impacts on the Subject Property/Historic Resource would be reduce impacts on the Subject Property/Historic Resources but not to a less than significant level.**

Historic Mitigation Measure 1: Project Redesign

The Subject Property is considered a historic resource under CEQA and also has been recommended as eligible for inclusion on the National Register of Historic Places for its association with in the early institutional and medical history of the City of Alhambra. The proposed Project would retain and preserve the existing exterior appearances of the building's northern half and part of the southern half of the two-story west wing of the Subject Property, which includes the full-width balcony on the front façade that defines the building's Monterey style, and other significant character-defining features, including its low-pitch cross-gabled roof clad in terracotta barrel tiles, the majority of its six-over-six double-hung wood sills with rowlock sills, and wood French doors on the second level of the north elevation. Interior character-defining features to be retained include a lobby with a significant original interior staircase, and some original wood doors and associated hardware.

However, the proposed Project also calls for the demolition of the eastern wing of the building in its entirety. This demolition of a substantial portion of the building would directly impact the building such that its significance as an individual historic resource would be materially impaired, detracting from its eligibility for listing on the National Register. Review of the proposed plans found that the proposed Project do not fully comply the ten of the Secretary of the Interior's Standards for Rehabilitation; therefore, pursuant to CEQA, the proposed project would result in a significant adverse impact to the historic building. It is recommended that the project be redesigned to mitigate the potential direct impacts of the structural changes and interior alterations to bring the proposed project fully into conformance with the Secretary of the Interior's Standards for Rehabilitation and reduce potential impacts to historical resources to less than significant under CEQA.

Historic Mitigation Measures 2 – 5: Design Review and Monitoring

Historic Mitigation Measure 2: Preservation Design Recommendations

The City of Alhambra shall retain a qualified preservation consultant who meets the Secretary of the Interior's Professional Qualifications Standards for Architectural History, Architecture, or Historic Architecture pursuant to 36 CFR 61. The consultant should have at least 10 years of experience in design review and collaborative experience in applying the Standards (Qualified Preservation Professional) to provide input as part of the Project redesign which will incorporate the rehabilitation, adaptive reuse, or the retention of a portion of the historical resource in accordance with the Secretary of the Interior's Standards for Rehabilitation. A list or matrix detailing the character-defining features list of the building shall be prepared. The purpose of the character-defining features matrix is to identify those features or elements that give the building its individual and unique visual character and which should be taken into account to preserve and/or rehabilitate them to the maximum extent possible, according to the National Park Service.

Historic Mitigation Measure 3: Plan Review and Impacts Analysis

The City of Alhambra shall retain a qualified preservation consultant who meets the Secretary of the Interior's Professional Qualifications Standards for Architectural History, Architecture, or Historic Architecture pursuant to 36 CFR 61 and who has at least 10 years of experience in design review and collaborative experience in applying the Standards (Qualified Preservation Professional) to review the final plans for the rehabilitation of the subject property at 612 West Shorb Street and all new proposed construction and to ensure conformance with the Secretary of the Interior's Standards for Rehabilitation (Standards). Once the final design and the 90%–100% construction plans become available, they shall be reviewed by a Qualified Preservation Professional for conformance with the Standards for Rehabilitation. Upon completion of the final design plans and the 90-100% construction plans, the Qualified Preservation Professional shall submit a draft report and make the necessary recommendations to ensure the design is in conformance with the Standards to the extent feasible. After the City has made the final revisions, the Qualified Preservation Professional shall review the final construction plans and prepare a final report documenting conformance with the Standards. The final plan review report shall be submitted along with the final plan set prior to submittal of the construction drawings and issuance of a grading permit and/or building permit. The lead agency governing the Project is the City of Alhambra who would be responsible for ensuring that this mitigation measure is completed prior to the issuance of a grading permit and/or building permit for the proposed Project.

Historic Mitigation Measure 4: Preservation Treatment Plan

The City of Alhambra shall retain a qualified preservation consultant, meeting the Secretary of the Interior's Professional Qualifications Standards for Architectural History, Architecture, or Historic Architecture pursuant to 36 CFR 61 and who has at least 10 years of demonstrated experience conducting Standards conformance reviews to prepare a detailed historic preservation treatment and protection plan. The historic preservation treatment and protection plan will detail the specific treatment procedures, protection, removal, and process of each character-defining feature of the subject property prior to construction and preservation of the same character-defining feature post-construction. These specifications for preservation treatments shall be

included in the final construction documents to ensure protection and preservation of the historic features of the subject property in conformance with the Secretary of Interior Standards. The preservation treatment plan shall be approved by the planning department of the City of Alhambra as a part of the project review process, and the final Preservation Treatment Plan shall be submitted with the final construction documents to the City prior to issuance of a grading and/or building permit.

Historic Mitigation Measure 5: Construction Monitoring

The City of Alhambra shall retain a qualified preservation consultant, meeting the Secretary of the Interior's Professional Qualifications Standards for Architectural History, Architecture, or Historic Architecture pursuant to 36 CFR 61 and who has at least 10 years of demonstrated experience conducting Standards conformance reviews and construction monitoring, who shall conduct construction monitoring at key points when historic fabric may be affected— including during both demolition and construction—to ensure that damage to any historic fabric tis avoided or minimized. The qualified preservation professional shall conduct the monitoring and provide preservation treatment recommendations to address any unanticipated issues that may arise and to ensure that the Project is completed in conformance with the Standards. The construction monitoring process shall be documented in a monitoring report for each visit, and a substantial completion letter report shall document Project conformance with the Standards. At the completion of construction, the monitoring reports and completion report shall be placed in the property file at the Planning Division.

Historic Mitigation Measure 6: Relocation of the Building

Before implementation of the project, initial mitigation measures should include a feasibility study to examine the possibility of moving the structure to a different site. While this is a delicate operation that should only be undertaken when all options to save the structure from demolition have been considered, is a possible option through the skillful application of technology. The first step would be to identify possible receiver site(s) in a historically appropriate setting. Priorities for a receiver site would include a location within the same subdivision or similar pattern of development, a location in close proximity, a compatible neighborhood context and pattern of development, and a similar parcel configuration and setback. While moving a historic structure inevitably destroys some of the historic fabric and lessens its historic integrity, it is a preferable option to demolition.

Historic Mitigation Measures 7 – 8: Documentation and Recordation

Historic Mitigation Measure 7: Historic American Buildings Survey (HABS) Level III Report

Prior to initiation of construction, the City of Alhambra shall commission a qualified architectural historian who satisfies the Secretary of the Interior's Professional Qualification Standards for Architectural History (36 CFR 61), and a qualified photographer to record the existing conditions at 612 West Shorb Street in a HABS Level III report that shall document the history and significance of the Alhambra Health Clinic in a written narrative and professional photographs in accordance with HABS guidelines. HABS Level III documentation is considered the appropriate level of documentation for a building that is significant at the local level, according to the

National Park Service's 2003 Guidelines for Architectural and Engineering Documentation. The HABS shall serve as a base line reference to inform future work that may be undertaken at this location. The HABS Level III report shall include the original historic plan, existing conditions plans, exterior and interior views, and an architectural data form, along with supporting documentation and references per HABS guidelines. The report shall be archivally produced and deposited in a publicly accessible archive, such as the Alhambra Public Library, the Los Angeles Public Library, the Los Angeles Conservancy and/or the South Central Coastal Information Center (SCCIC) located at California State University Fullerton.

Historic Mitigation Measure 8: Interpretive Exhibit

An Interpretative Exhibit, which would promote cultural awareness of the history of the Alhambra Health Center and its relationship to the development of medical services in Los Angeles County and as an important institutional building in the early history of Alhambra, shall be developed and be located at a prominent location as part of the Project. The Interpretative Exhibit shall be open to the public and would present a photographic history of the Center and showcase other information that would educate the public about the evolution of public health services in Los Angeles County and the early history of the City of Alhambra. The Interpretative Exhibit shall be completed and open to the public after the new development as part of the Project is placed in service. In this manner, information about the subject property's construction and design as well as the associated history, would be retained and preserved.

Approved Consultant, California Historical Resources Information System Consultant List (History & Architectural History)

Certified Historian & Architectural Historian, New Mexico SHPO Directory

Approved Historian, City of Santa Fe, NM

PROFESSIONAL AFFILIATIONS

Society of Architectural Historians, Member

National Trust for Historic Preservation and NTHP Forum, Member

Preservation Action, Member

Shannon is a Senior Architectural Historian and Cultural Resource Specialist with 23 years of professional experience in architectural history, cultural resource management, and historic preservation planning, policy, and economics. She has authored historic resource assessment, State and National Register Nominations, historic structure reports, CEQA Impacts Analysis, feasibility studies, LAHCM nominations, and HABS/HAER reports.

Relevant Experience

Historic Resource Evaluation, Mayfield Junior School, Pasadena, CA. *Project Manager.* Shannon surveyed entire campus and prepared an evaluation of three historic resources, including CEQA impacts analysis for a proposed master plan.

Historic Structure Report, Isadore House, Los Angeles, CA. *Project Manager.* Shannon prepared a structural assessment, documentation, and evaluation of Isadore House, a historic property owned by the LA Department of Recreation and Parks. The Report included a CEQA impacts analysis in preparation for a planned redevelopment

CEQA Impacts Analysis, 1715 – 1739 Bronson Avenue, Los Angeles, CA. *Project Manager.* Shannon analyzed the potential impacts of construction of a 24-story, mixed-use project in Hollywood, adjacent to the historic Lombardi House for compliance with CEQA impacts threshold and for conformance with the SOI Standards.

Culver Crossings Historic Resource Assessment and EIR, Culver City and Los Angeles, California. *Senior Architectural Historian.* Shannon authored a historic resource assessment of a large industrial site located on the border of Los Angeles and Culver City for a proposed redevelopment. Work involved research on the property and its history as well as an evaluation of the site's eligibility.

910 North Roxbury Drive Historic Resource Assessment, Beverly Hills, CA. *Project Manager Shannon* assessed the eligibility of an American Colonial Revival residence designed by master architect Robert V. Derrah in Beverly Hills. The report involved digital and archival research and an assessment of the home's integrity using historic plans and images.

1707 Tropical Drive, Historic Resource Assessment, Beverly Hills, CA. *Architectural Historian.* Claire assessed the eligibility of an American Colonial Revival residence built by Carleton Lyle Burgess and occupied by Edward Paul Dentzel. Research included a construction chronology and identification of alterations, research on the builder and occupants, and analysis of neighborhood integrity.

448 West Cypress, Historic Resource Assessment, Glendale, CA. *Project Manager* Shannon authored a Historic Resource Assessment of an industrial warehouse constructed in the Tropico neighborhood of Glendale in 1908. Research included an integrity evaluation, research on Tropico's history as an early agricultural center, and the strawberry industry.

Shannon L. Papin (Continued)

Cultural Resource Specialist IV

28307 Agoura Road Historic Resource Assessment, Agoura Hills, CA. *Project Manager.* Shannon authored a Historic Resource Assessment for a 1940s commercial property in Agoura Hills. Work involved researching the rural character and history of Agoura Hills, conducting research at the Agoura Hills Library and Building Division, identifying occupants of the structure, and assessing the property's eligibility.

Los Angeles Historic Cultural Monument Nomination, Kun House II, Los Angeles, CA. *Project Manager.* Shannon prepared LAHCM nomination for the Joseph Kun House II, 1950 residence designed by Richard Neutra and presented the nomination to the Cultural Heritage Commission.

Los Angeles Historic Cultural Monument Nomination, 1828 Edgemont St, Hollywood, CA. *Project Manager.* Shannon prepared LAHCM nomination for a 1940 Garden Apartment complex in Hollywood and presented the nomination to the Cultural Heritage Commission.

Silver Lake Reservoir Complex EIR and Impacts Analysis, Los Angeles, CA. *Senior Architectural Historian.* Shannon conducted research on the historic development of the Silver Lake Reservoir Complex and identified all previously identified historic resources within 0.25-mile of the perimeter of the site to conduct a direct, indirect, and cumulative impacts analysis for the Complex's proposed master plan.

Environmental Impact Report, 1600 Naud and 1635 – 1639 Main St, Los Angeles, CA. *Senior Architectural Historian*. Shannon managed cultural portion of CEQA environmental review process, focusing on ten cold-storage facilities as potential historic resources, including eligibility evaluations, analysis of projects impacts and recommendations on adaptive reuse and mitigation.

Seismic Retrofit Project, Lockwood Elementary School and First Street Elementary School, Los Angeles, CA. *Project Manager.* Shannon managed a documentation project for two LAUSD campuses in preparation for a planned seismic retrofit. Project deliverables includes character-defining matrixes and California DPR forms for multiple historical resources.

Historic Structure Report, New Mexico Veteran's Home, Truth or Consequences. *Project Manager.* Shannon served as the Project Manager on the preparation of an Historic Structure Report for a 1937 hospital for crippled children, including historic narrative and context, evaluation of significance, documentation of original construction and later modifications, and historic preservation recommendations.

State & National Register Nomination, Ashley Pond Residence (535 East Palace Avenue), Santa Fe, NM. *Project Manager.* Shannon prepared State and National Register nomination of a 1925 residence and compound designed by John Gaw Meem.

Multiple Property Documentation Form for the Cañon neighborhood, Taos, NM. *Project Manager.* Shannon performed the initial neighborhood survey, individual nominations for three resources, and associated historic context. The properties listed included a residential compound, a guesthouse/hotel and a community chapel.

Architectural Survey of the Sioux Falls Historic District & Pettigrew Heights neighborhood, Sioux Falls, SD. *Project Manager.* Shannon served as the Project Manager on the re-survey of a 1974 National Register district, including approximately 240 residential resources. New survey of an adjoining neighborhood with approximately 120 residential resources. She also prepared survey reports with recommendations on district expansion and new district possibilities.

Shannon L. Papin (Continued)

Cultural Resource Specialist IV

County-wide Architectural Surveys, South Dakota. *Project Manager.* Shannon served as the Project Manager on four county-wide architectural surveys, including integrity evaluation, identification of potentially significant resources for inclusion in the National Register of Historic Places; research and writing of an accompanying historic context.

- Tripp County: 1,617 square miles, 351 surveyed resources.
- McPherson County: 1,152 square miles, 168 surveyed resources.
- Walworth County: 745 square miles, 211 surveyed resources.
- Moody County: 521 square miles, 204 surveyed resources

Cultural Resource Surveys. Shannon performed cultural resource surveys for a variety of compliance documents including Environmental Impacts Reports, Section 106, Section 4F, and NEPA compliance. Project duties included consultation with states, local municipalities, tribes and planning consultants, as well as overseeing the archaeological portion of the survey.

- Cold War Era Properties Survey, Shaw Air Force Base, Sumter, SC
- Property Surveys for EA, Fort Bliss Army Base, El Paso, TX
- Portales Railroad Depot Focus Area, Portales, NM
- Washington Avenue Pedestrian Improvements, Lovington, NM
- Environmental Assessment, Water Control Facilities, Montezuma, NM
- Interstate 25 Landscape Improvements, Glorieta/Rowe, NM
- 12.68-mile Pipeline Expansion, Bosque, NM
- Housing Rehabilitation Project, Santo Domingo Pueblo
- NM Visual Impact Assessment, various Plateau Cell Towers, NM
- Construction at Day School Complex, Picuris Pueblo, Penasco, NM
- Santa Fe County Courthouse, Santa Fe, NM

Historic American Building Surveys, Walker Air Force Base, Roswell, NM. *Project Manager.* Shannon prepared the building documentation (HABS Level III standard) of three buildings at the former Walker Air Force Base as well as the former Roswell Airfield Terminal Building

Historic American Building Surveys, Kirtland Air Force Base, Albuquerque, NM. *Project Manager.* Shannon prepared the building documentation (HABS Level II standard) of the 21st EOD Headquarters at Kirtland Air Force Base.

Historic American Building Surveys, White Sands Missile Range, Alamogordo, New Mexico. Shannon prepared the building documentation (HABS Level II standards) of the old Officer's Club at White Sands Missile Range.

National Conference of State Historic Preservation Officers,Washington D.C. *Director of Communications and State Services.* Shannon served as the primary liaison and resource for all fifty-nine State Historic Preservation Offices and represented NCSHPO to Congress and the federal government as well as the press, partner organizations and general public. Worked extensively with the National Park Service and the Advisory Council onHistoric Preservation and served on task forces dealing with the Section 106 review process, the Secretary of the Interior's Standards for Rehabilitation of Historic Buildings, and National Register Criteria and Processes.

CarrAmerica Urban Development, Inc., Washington, DC. *Development Assistant.* Shannon was the assistant for multiple downtown development projects including a mixed-use project of approximately 450,000 square feet combining office, residential andpreferred arts retail in three historic buildings along with new construction. Duties included assistance with project approvals, design review, due diligence,acquisition and development documents, pro forma analysis as well as workingwith public and private groups to garner support and necessary approvals.

Anokhi Varma

Architectural Historian

The Association for Preservation Technology, Member

California Preservation Foundation, Member

AWARDS

AEP Outstanding Award for Environmental Analysis Document for the 2311 N. Hollywood Way Sustainable Communities Environmental Assessment (SCEA)

Anokhi is an experienced conservation architect with a demonstrated history of working in the architecture & planning industry. Her areas of expertise include Historic Structure Assessment, NRHP Nominations, Secretary of Interior Standards, LiDAR Scanning, HABS/HAER/HAL documentation, Construction Monitoring, Preservation Design and Consultation, and Cultural Resource Management. In addition to her architectural history background, Anokhi is a strong art and design professional skilled in AutoCAD, Adobe Design, and Revit.

Relevant Experience

Mt. Helix Park Rock Wall Short-Term Preservation Project, San Diego, CA. *Architectural Historian/ Preservation Architect.* Anokhi is providing preservation recommendations for rehabilitation efforts and long-term preservation planning of the 1932 rock wall that borders the Mt. Helix Park, an "H" designated County landmark. Work has included observing the conditions of the failing portions of the rock wall, research through local archives, developing a character-defining features matrix for the rock walls, and providing recommendations for the preservation and rehabilitation of the same. Working closely with Mel Green Associates and Silman Structural Engineers, ESA has developed treatment and stabilization recommendations for the deteriorating rock wall portions.

Isadore House Significance Evaluation and Historic Resources Structures Report, Los Angeles, CA. *Architectural Historian.* Anokhi prepared a significance evaluation to establish the building's historic significance, which included extensive research about the building, its site, associated designers, relevant patterns of development, and an analysis of the building's historic integrity. And prepared a historic structure report compiling the architectural conditions assessment, HABS documentation and preservation recommendations for Isadore House, a historic property owned by the LA Department of Recreation and Parks.

Historical Resources and Preservation Consulting Services for The Culver Studios, Culver City, CA. *Architectural Historian.* ESA' s Historic Resources Practice has provided a suite of services including historical resources evaluation, environmental review and documentation, and historic preservation consultation services for the CPA-6 Specific Plan, and the CPA-7 Specific Plan known as "The Innovation Plan," a blueprint for the future of The Culver Studios. As part of implementing the mitigation program for historical resources including HABS documentation of Stages 2/3/4 and a salvage program, preparation of a preservation plan for the Studio, and development of an interpretive program for the Studio, Anokhi conducted a site visit and photographic documentation of the resources, produced character-defining features table and conducted extensive archival research to create the narrative for the HABS documentation in accordance with NPS standards. Currently Anokhi is producing a Historic Structures Report and a

Preservation Plan, along with assisting in the production of a Site Development Overlay Map for the Studio, and an Interpretive Plaque for the Bungalows S, T, U and V as part of the mitigation measures under CPA-7.

Historic Resources and Preservation Consultation Services for the Redevelopment of the Fred C. Nelles State Reform School, Whittier, CA. *Architectural Historian.* The Fred C. Nelles Correctional Facility is a listed California State Landmark and is significant as the state's first reform school for boys. The 1920s-1930s Tudor Revival-style campus is currently being redeveloped as a multi-use residential and commercial project, "The Groves", entitled under the certified Lincoln Specific Plan EIR. Anokhi is conducting construction monitoring and providing preservation consultation for the rehabilitation and adaptive reuse of the retained resources.

31204 & 31180 Ceanothus Drive, Plan Review and Impacts Analysis on the Halliburton House, Laguna Beach, CA. *Architectural Historian.* The neighboring subject property parcels were part of the larger parcel of the Halliburton House property, a two-story Moderne house with Brutalist influence. The Halliburton home at 31172 Ceanothus Drive is considered eligible for listing on the National Register of Historic Places, and the California Register of Historical Resources and is listed on Laguna Beach's Historic Resources Inventory. Anokhi conducted a Plan Review, assessed the proposed single-family projects on the empty parcels for conformance with the Secretary of Interior's Standards for Treatment of Historic Properties, and conducted an Impacts Analysis of the proposed single-family residential projects and its associated cultural landscape for compliance with CEQA.

951 Cliff Drive, Plan Review and Impacts Analysis, Laguna Beach, CA. Anokhi conducted a Plan Review, assessed the proposed single-family projects on the empty parcels for conformance with the Secretary of Interior's Standards for Treatment of Historic Properties, and conducted an Impacts Analysis of the proposed single-family residential projects and its associated cultural landscape for compliance with CEQA.

1499 Carla Ridge Historic Resources Assessment, Beverly Hills, CA. *Architectural Historian.* Anokhi co-authored the 1499 Carla Ridge Historic Resource Evaluation (HRA) to establish the building's historic significance, which included extensive research about the building, its site, associated designers, relevant patterns of development, and an analysis of the building's historic integrity.

1145 N. Hillcrest Road, Historic Resources Assessment, Beverly Hills, CA. *Architectural Historian.* Anokhi co-authored 1145 N. Hillcrest Road Historic Resources Assessment report, to establish the building's historic significance, which included extensive research about the building, its site, associated designers, relevant patterns of development, and an analysis of the building's historic integrity.

400 Walker Drive, Historic Resources Assessment, Beverly Hills, CA. *Architectural Historian.* Anokhi co-authored the HRA which involved research and an evaluation of a Mid-Century Modern style single-family residence. Designed by notable architect William R. Stephenson in 1962, the property is located in the Trousdale Estates neighborhood. Anokhi conducted historic research and a plan review to analyze the property's historic integrity.

2949 S. Coast Highway, Plan Review and Impacts Analysis Laguna Beach, CA. *Architectural Historian*. A two-story Mediterranean Revival residence, constructed in 1929 as a mixed-use building on the South Coast Highway in Laguna Beach, California was determined to be a historic resource in 1981. The property was converted into a single-family residence in 2002 and some unpermitted alterations were carried out in 2011. Anokhi prepared and analyzed the analysis of the character-defining features to determine the level of significance of the affected features, conducted Plan Review, and identified all previously identified nearby historic resources within 0.25-mile of the perimeter of the site to

conduct a direct, indirect, and cumulative impacts analysis of the unpermitted alterations carried out on the historic part of the property on the nearby Historic Resources.

5426 San Fernando Road Historic Due Diligence Services, Glendale, CA. *Architectural Historian.* Anokhi coauthored the 5426 San Fernando Historic Resources Assessment report and conducted a building permit search and construction history for a cluster of 6-7 buildings on the site.

Bijou Building, Tenant Improvements Project at 1221 and 1227 Hermosa Avenue, Hermosa Beach, CA. *Construction Monitor.* Anokhi conducted construction monitoring during various stages of construction including Structural installations, repair, particularly rehabilitation of historic brick walls, and removal and reinstallation of the historic wood stage at the historic theatre (1221) and during various stages of staircase relocation and historic mezzanine restoration at the commercial space at 1227 Hermosa Avenue. Prepared relevant reports and provided preservation consultation, subsequently identifying and documenting the historic features to be retained and observing the restoration process in conformance with Secretary of Interior Standards and in coordination with the client and contractor.

2311 N Hollywood Way Historic Resources Assessment, Burbank, CA. *Architectural Historian.* Anokhi coauthored the 2311 N Hollywood way Historic Resources Assessment report, conducted the building permit search, and researched the construction history of the building on the site.

First Street Elementary School- LAUSD, Character Defining Features Matrix, Boyle Heights, CA. *Architectural Historian.* Anokhi conducted an architectural survey and prepared a character-defining features analysis for the eligible First Street Elementary School. She conducted a conditions assessment and provided recommendations for appropriate means and methods of preservation in accordance with the Secretary of the Interior's Standards.

6362 Hollywood boulevard, Historic Resources Assessment, Beverly Hills, CA. *Architectural Historian.* Conducted Plan Review and Impacts Analysis in conformance with Secretary of Interior Standards for adaptive reuse of the Palmer Hotel as a boutique hotel in the National Register Hollywood Boulevard Commercial and Entertainment District.

Restoration and Adaptive Reuse of 14th Century Surat Castle, Surat, India. *Architectural Designer/Historic Architect.* Served on a team of experts tasked with making decisions comprised of archaeologists, architects, and engineers for the Surat Municipal Corporation, City of Surat. Prepared a design brief inclusive of architectural conservation design, adaptive reuse plans, interior design, utility services, site development, design, and landscape design. Coordinated and supervised archaeological digs, endoscopic tests, and non-destructive tests, and prepared a comprehensive assessment report recounting the condition of the various construction layers of the Castle. Managed a team of junior architects and interns. Prepared construction documents based on the design briefs, condition assessment recommendations, and building codes along with maintaining the integrity of the heritage site. Curated furniture and antiquities, developed branding, and created display content to showcase Castle as a historic exhibit and prevalent construction practices of the Tughlaq, Mughal, Dutch, and British Surat. (Project Area: 107,640 Square Feet)

Revival of Irish Presbyterian Mission Chapel, Surat, India. *Historic Architect.* Prepared redesign proposal and construction documents based on the evaluation of a 110-year-old gothic chapel with documentation and condition mapping and supervised onsite conservation work. (Project Area: 3767 Square Feet)

Restoration and rejuvenation of historical edge of Gandhi Garden (Victoria Garden), Surat Municipal Corp., India. *Historic architect.* Part of the Urban Renewal project of the historic district of the city. Rejuvenation, pedestrianization, and development of the early 19th Century Gandhi Garden. (Project Area 7,007 Square Feet)

Anokhi Varma (Continued)

Architectural Historian

Heritage development of the area between four historic gates of Vadodara, Vadodara Municipal Corp., India. *Historic Architect.* Conducted archival research, on-site study of construction techniques, the study of historical maps, investigative research to look for footprints, and conduct authentic restoration and revival of the historical precinct to make it an inherent component of the urban social space. (Project Area: 21,000 Square Feet)

Restoration and Adaptive Reuse of Juni Sudhrai, Surat Municipal Corp., India. *Historic Architect.* Conducted an evaluation of early 20th-century Dutch construction style site "Juni Sudhrai" consisting of two corporation buildings. Provided condition assessment report with proposed conservation methods. Prepared bid documents estimate and rate analysis for civil and conservation works, interior works, and utility services. (Project Area 8,611 Square Feet)

Heritage Impact Assessment, Surat Municipal Corp., India. *Historic Architect*. Prepared HIA to assess, and analyze the effects and consequences of the development of the Macchiwar (fish market) in the old town area on the historic monument Khwaja Dana Saheb's Rouza (a mausoleum).

Sarvajanik College of Engineering and Technology and Veer Narmad South Gujarat University. *Visiting Faculty* (January 2015 – April 2019). Conducted undergraduate level classes for Architectural Conservation, Adaptive Reuse Studio, History of Art and Literature, Basic Design, Architectural journalism, and Architectural Graphics

Barlow Preservation Services LLC, Boulder, CO. *Historic Preservation Intern* (March 2013 – March 2014). 2013 Old Town Louisville historic resource reconnaissance survey of individual properties. Developed and maintained database, drafted survey document, assisted with site inspections, historic context writing, research photography, and scholarship typical of an architectural historian. Aided in the restoration of historic windows, doors, and exterior trim including paint removal and surface prep, wood repairs, glazing, and other traditional skills.

Antonette is an architectural historian with a background in historic research, museum collections, exhibit design, educational outreach, and planning. Her work with historic research and cultural heritage in California has included authoring and contributing research to historic contexts statements, historic resource assessments, National and California Register Nominations, visitor studies of museums and public history sites, in addition to extensive archival research. Antonette applies her understanding of urban development and historic research to inform evaluation assessments of historic resources in the Southern California area, with a focus in the Greater Los Angeles area and San Diego.

Relevant Experience

West San Gabriel Valley Area Plan Historic Context Statement, Los Angeles County, CA. *Architectural Historian.* Antonette is the lead researcher and author of the Historic Context Statement for seven unincorporated communities within the West San Gabriel Valley Planning Area. Involving archival research, windshield surveys, and on-going collaboration with Los Angeles County Department of Planning, the Historic Context Statement will provide a framework for future historic assessments within these unincorporated areas. In addition, Antonette was a contributor to the Historic Preservation Element of the West San Gabriel Area Plan.

San Diego Rowing Club, San Diego, CA *Architectural Historian*. Antonette assisted on the development Character Defining Feature of the National-Register listed San Diego Rowing Club in preparation for its redevelopment for the Port of San Diego.

San Manuel Ancestral Land Exchange Section 106 Cultural Resources Evaluation, San Bernadino National Forest, San Bernadino County, CA *Architectural Historian*. Antonette served as the lead historic research and author of a combined Cultural Resources Evaluation Assessment for eight resources on parcels as a part of a land exchange between the US Forest Service and the Yuhaaviatam of San Manuel Nation. These included a NR evaluation of the California Register-listed Arrowhead Landmark, which was recommended eligible for the National Register under Criterion A for its association with the development and civic identity of the City of San Bernadino, in addition to eligibility as a Traditional Cultural Property for its importance to the Yuhaaviatam of San Manuel Nation.

Burbank Airport Flight Path, Section 106, Los Angeles and Ventura Counties *Architectural Historian*. Antonette assisted on this large-scale analysis of the potential impacts of the change in flight path at the Burbank Airport on all listed historic resources underneath. Antonette's use of GIS and mapping skills in addition to integrity analysis assisted and streamlined the overall impacts assessment.

Antonette M. Hrycyk (Continued)

Architectural Historian

300-324 Dyer Road, Santa Ana, CA *Architectural Historian*. Antonette was the lead research and author of a Historic Resource Assessment of six mid-century industrial buildings within the Industrial area of Santa Ana.

5835 Washington Boulevard Historic Resources Assessment, Culver City, CA. *Architectural Historian.* Antonette was the lead researcher and author of the Historic Research Assessment on two buildings which had functioned as nightclubs, industrial sites, and commercial properties. 5835 Washington was previously listed on Culver City's HPAC Survey; Antonette's reevaluation of its significance under criteria A/1 and C/3 contributed to an updated understanding of Culver City's preserved built environment.

3592 Eastham Drive Historic Resources Assessment, Culver City, CA. *Architectural Historian.* Antonette was the lead researcher and author of the Historic Resource Assessment on a property that included one mid-century modern office building and two industrial buildings within the Hayden Tract in Culver City.

3550 Hayden Avenue Historic Resources Assessment, Culver City, CA. *Architectural Historian.* Antonette was the lead researcher and author of the Historic Resource Assessment on a large mid-century modern industrial warehouse in the Hayden Tract in Culver City.

44900 N. 60th St., W. Historic Resources Assessment, Lancaster, CA. *Architectural Historian.* Antonette served as the lead researcher and author of the Historia Research Assessment of a mid-century modern community hospital, which was designed by Adrian Wilson & Associates, and was originally operated as a Tubercular Hospital by the Los Angeles County Sheriff. Antonette's research determined the hospital was not a significant historic resource.

Control Gorge Modular Homes Historic Resources Assessment, Bishop & Los Angeles, CA. *Architectural Historian.* Antonette was the primary researcher and author of this unique assessment which looked at the structures associated with the Control Gorge Hydroelectric Plant, owned and operated by LADWP. Antonette constructed a full site chronology of the Control Gorge Site and wrote a detailed historical context of the Owens Gorge Hydroelectric Project. This project, though located in Bishop, California, the Subject Property was evaluated under LAHCM criteria as it has been continuously owned, improved, and operated by LADWP, in addition to being inextricably tied to the development of Los Angeles' power supply. Though the research determined the assessed structure to not be significant, recommendations for future potential districts were included in the HRA.

1038 Venice Boulevard Historic Resources Assessment, Pico-Union, Los Angeles, CA. *Architectural Historian.* Antonette was the lead researcher and author of the Historic Research Assessment on an office space and warehouse in the Pico-Union neighborhood of Los Angeles.

5880 Adams Boulevard Historic Resources Assessment, Culver City, CA. *Architectural Historian.* Antonette was the lead researcher and author of the Historic Research Assessment on a large mid-century modern industrial warehouse in Culver City.

1845, 1853, and 1857 Taft Avenue Historic Resources Assessment, Hollywood, Los Angeles, CA. *Architectural Historian.* Antonette was the lead author of the Historic Resources Assessment which determined that the three Craftsman homes were each significant as an individual resource under National and California Register C. Constructed in 1912 and 1915, these three homes are significant for their association with the Craftsman style, a previously common style in the residential development of Hollywood. Antonette assembled the construction and occupancy history of the properties and wrote the significance and integrity evaluation.

Antonette M. Hrycyk (Continued)

Architectural Historian

Morningside High School Mitigated Negative Declaration, Hollywood, Los Angeles, CA. *Architectural Historian.* Antonette assisted with research on the Inglewood School District historical context and completed a construction chronology Antonette also assisted with organization and preparation of HABS documentation.

Compton Boulevard, Et Al, Historic Resource Assessment, Compton, CA. *Architectural Historian.* Antonette was the primary researcher of this Historic Resource Assessment, which resulted in three diverse properties being submitted for nomination on the National and California Register. These properties included Dale's Donuts under criteria A/1 for its significance to Compton's neighborhood identity and criteria C/3 as a rare extant example of a programmatic drive-thru restaurant; Colin P. Kelly Elementary School under criteria A/1 for its significance to the educational history of the City of Compton; and East Rancho Dominguez Park under criteria B/2 for its historic and continued association with the tennis history of Venus and Serena Williams. Antonette conducted supplemental in-depth research and assisted with the significance and integrity evaluation.

Project Bristol, Historic Research Assessment, Santa Ana, California. *Architectural Historian.* Antonette was a contributing author and primary researcher of the historic significance evaluation determination for Project Bristol, a planned demolition of seven contemporary Spanish Colonial Revival strip mall buildings, banks, and other commercial buildings. Antonette researched and wrote the historic context on the development of the strip mall in Southern California and researched and wrote a detailed construction chronology and occupancy history for each of the seven buildings in the project.

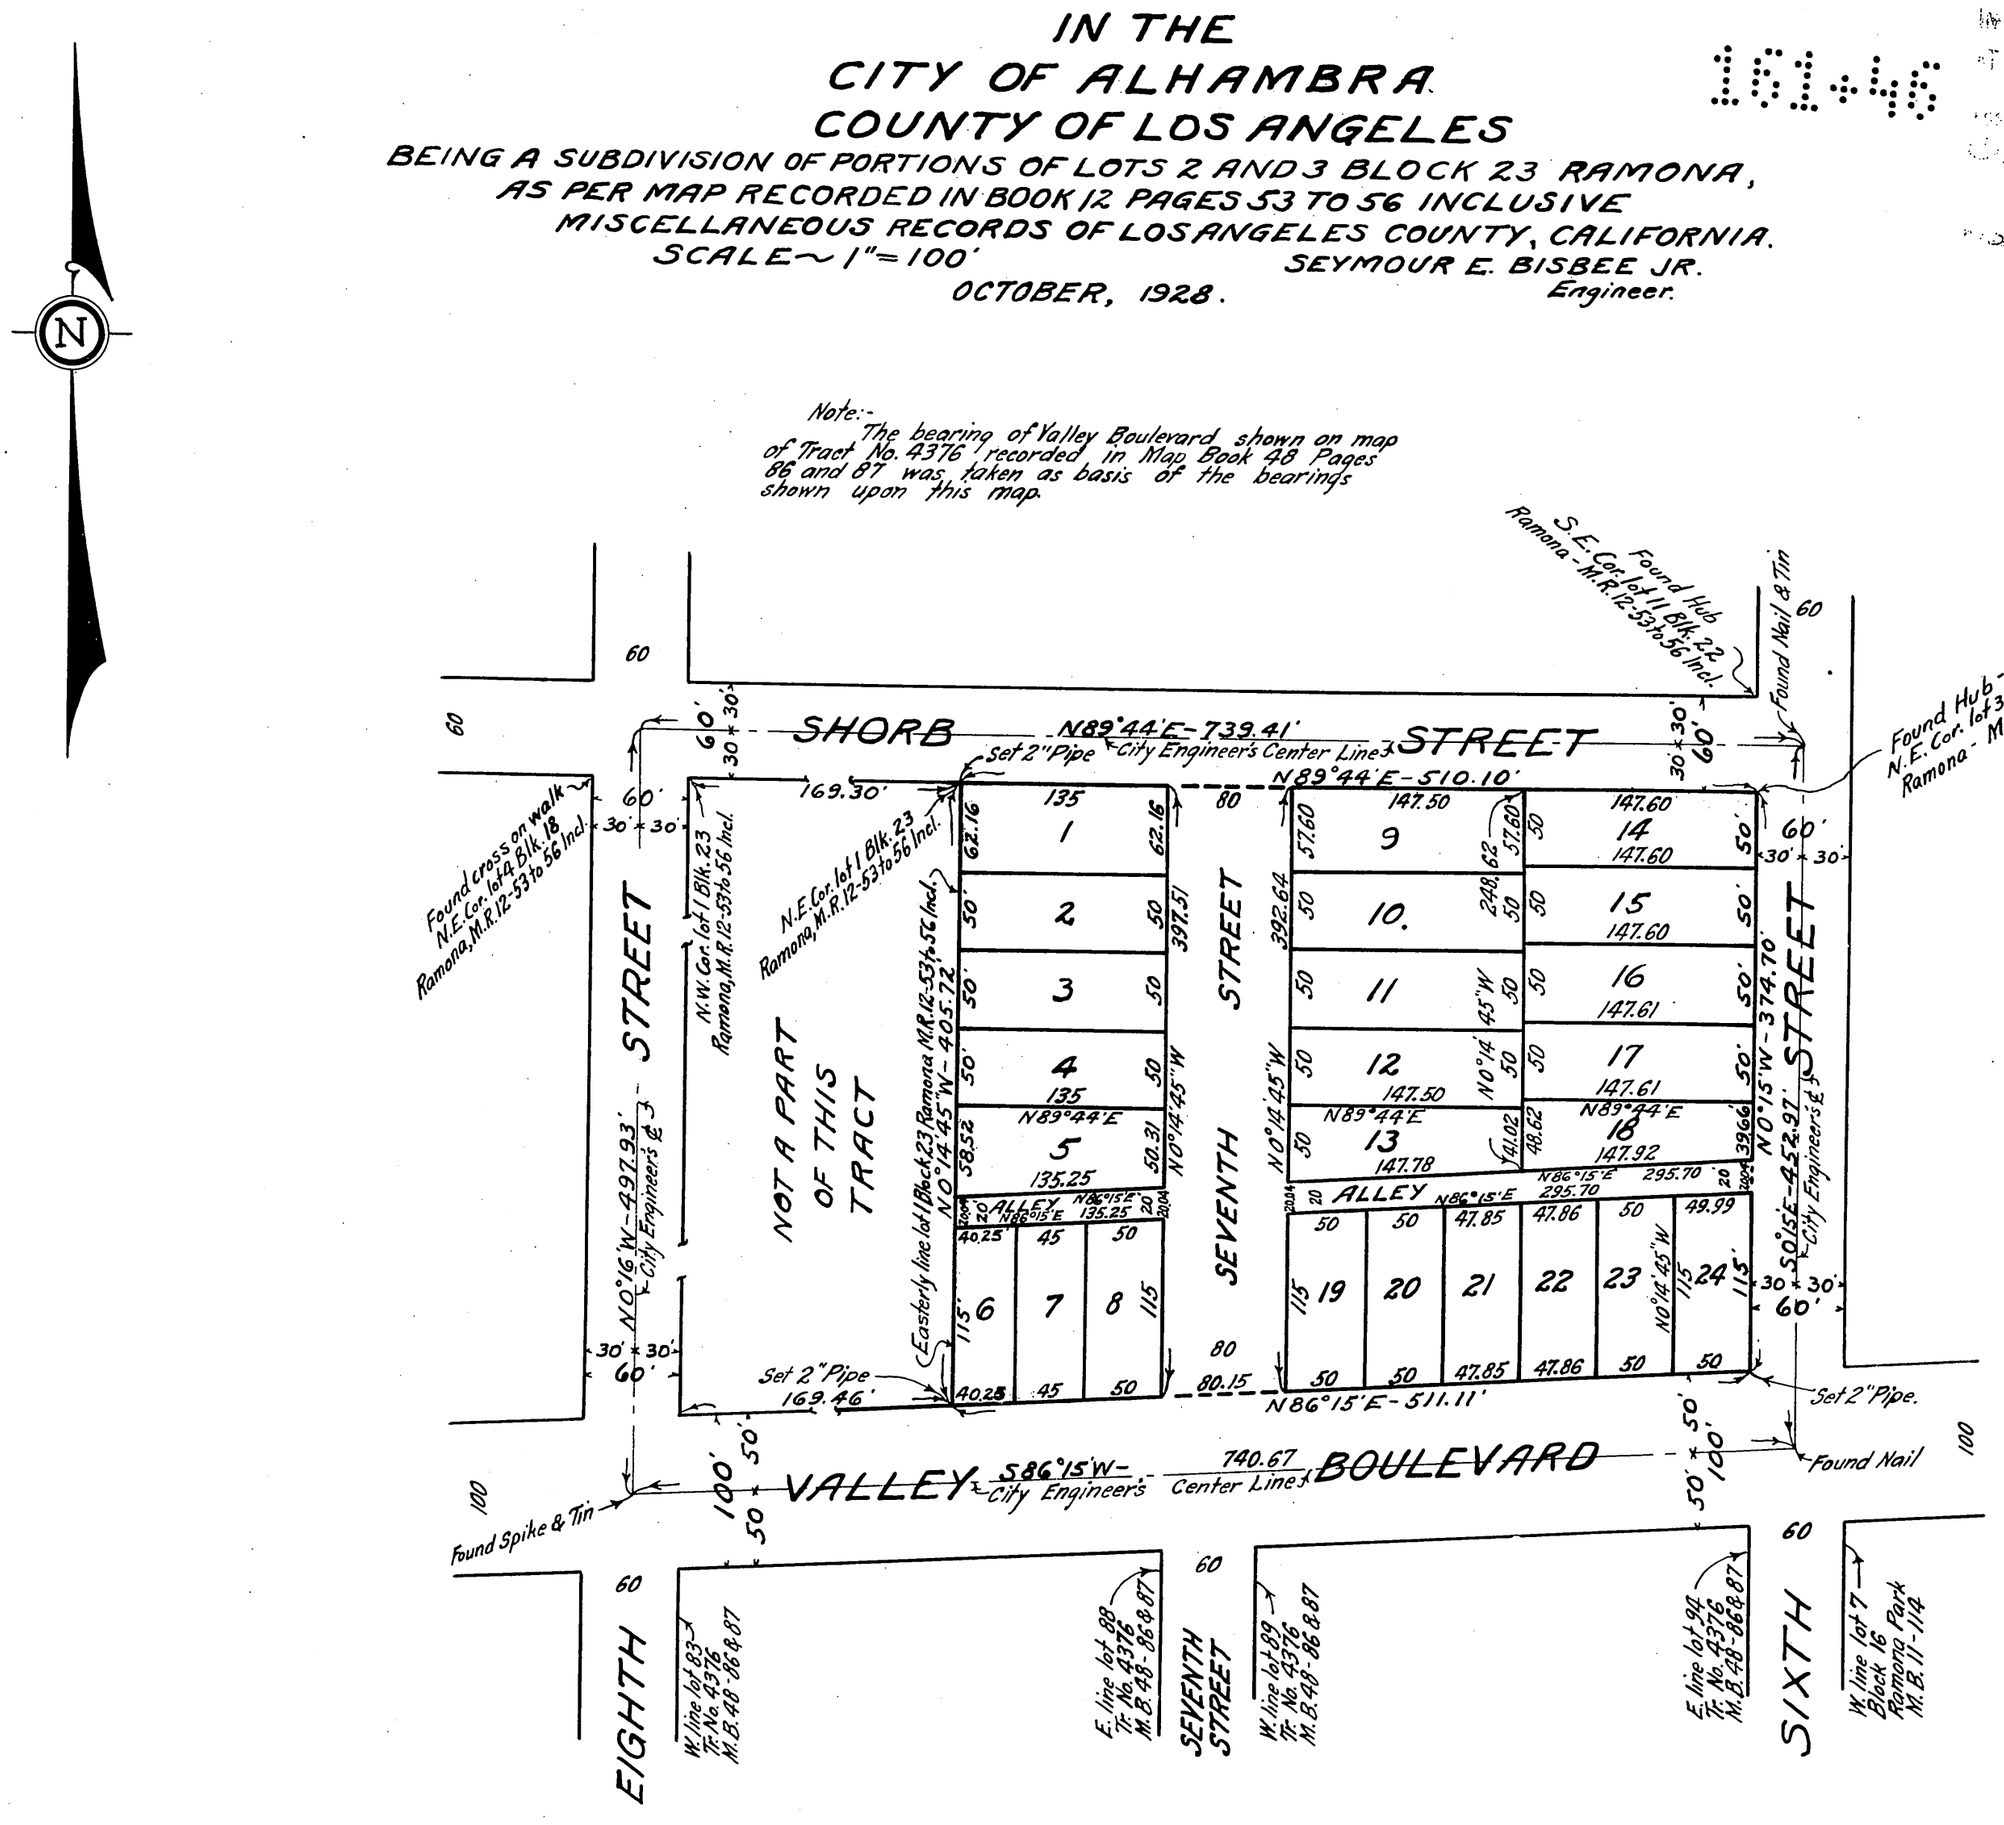
161-46

Note:- The bearing of Valley Boulevard shown on map of Tract No. 4376 recorded in Map Book 48 Pages 86 and 87 was taken as basis of the bearings shown upon this map.



We hereby certify that we are the owners of or interested in the land included within the subdivision shown on the annexed map and that we are the only persons whose consent is necessary to pass a clear title to said land and we consent to the making of said map and subdivision as shown within the colored border line and hereby dedicate to the Public use the Street and Alley shown on said map within said subdivision.

Huntington Land and Improvement Company } _____ President.
_____ Secretary.

STATE OF CALIFORNIA } SS.
COUNTY OF LOS ANGELES }

On this first day of October in the year one thousand nine hundred and twenty eight before me, Paul F. Koehl a Notary Public in and for said County of Los Angeles, State of California, residing therein, duly commissioned and sworn, personally appeared A. G. Walker known to me to be the president and C. E. Culver known to me to be the secretary of the Huntington Land and Improvement Company the Corporation, that executed the within instrument, and known to me to be the persons whose names are subscribed thereto and acknowledged to me that such Corporation executed the same.

In Witness Whereof I have hereunto set my hand and affixed my official seal the day and year in this certificate first above written.

Paul F. Koehl
Notary Public in and for Los Angeles County, State of California.
My Commission Expires Jan. 27, 1929.

I hereby certify that the commissioners of the City of Alhambra by resolution adopted April 19, 1929, approved the attached map and accepted on behalf of the Public for highway purposes the Street and Alley shown upon said map within said subdivision, and therein offered for dedication as public highways.

Dated April 19, 1929. R. B. Wallace
City Clerk.

I, Seymour E. Bisbee, Jr. hereby certify that I am a Licensed Surveyor of the State of California and that this map consisting of one sheet, correctly represents a survey made under my supervision October, 1928 and that all of the monuments shown hereon actually exist, and their positions are correctly shown.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ESA were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

STORM WATER PROVISIONS

ATTACHMENT A

BEST MANAGEMENT PRACTICES FOR CONSTRUCTION ACTIVITIES*

Storm Water Pollution Control Requirements for Construction Activities
Minimum Water Quality Protection Requirements for All Development Construction Projects/Certification Statement

The following is intended minimum notes or as an attachment for construction and grading plans and represent the minimum standards of good housekeeping which must be implemented on all construction sites regardless of size. (Applies to all permits)

- Eroded sediments and other pollutants must be retained on site and may not be transported from the site via sheetflow, swales, area drains, natural drainage courses or wind.
- Stockpiles of earth and other construction related materials must be protected from being transported from the site by the forces of wind or water.
- Fuels, oils, solvents and other toxic materials must be stored in accordance with their listing and are not to contaminate the soil and surface waters. All approved storage containers are to be protected from the weather. Spills must be cleaned up immediately and disposed of in a proper manner. Spills may not be washed into the drainage system.
- Non-storm water runoff from equipment and vehicle washing and any other activity shall be contained at the project site.
- Excess or waste concrete may not be washed into the public way or any other drainage system. Provisions shall be made to retain concrete wastes on site until they can be disposed of as solid waste.
- Trash and construction related solid wastes must be deposited into a covered receptacle to prevent contamination of rainwater and dispersal by wind.
- Sediments and other materials may not be tracked from the site by vehicle traffic. The construction entrance roadways must be stabilized so as to inhibit sediments from being deposited into the public way. Accidental depositions must be swept up immediately and may not be washed down by rain or other means.
- Any slopes with disturbed soils or denuded of vegetation must be stabilized so as to inhibit erosion by wind and water.
- ☐ Other: _____

As the project owner or authorized agent of the owner, I have read and understand the requirements listed above, necessary to control storm water pollution from sediments, erosion, and construction materials, and I certify that I will comply with these requirements.

GENERAL NOTES

1. THE INTENT OF THESE DRAWINGS AND SPECIFICATIONS IS TO INCLUDE ALL LABOR, MATERIALS AND SERVICES NECESSARY FOR COMPLETION OF ALL WORK SHOWN, PRESCRIBED, OR REASONABLY IMPLIED BUT NOT LIMITED TO THAT EXPLICITLY INDICATED IN THE CONTRACT DOCUMENTS.

2. STRUCTURAL, ELECTRICAL, AND PLUMBING, DRAWINGS ARE SUPPLEMENTAL TO THE ARCHITECTURAL DRAWINGS. THE CONTRACTOR SHALL REVIEW ALL PLANS AND DRAWINGS. IN THE EVENT OF CONFLICTING STATEMENTS, INSUFFICIENT INFORMATION OR ERRORS, THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER AND OBTAIN CLARIFICATION BEFORE ANY WORK IS BEGUN. WORK INSTALLED WHERE CONFLICTING CONDITIONS EXIST SHALL BE CORRECTED AT CONTRACTORS EXPENSE.

3. ALL WORK SHALL BE IN ACCORDANCE WITH THE LATEST ADOPTED EDITION OF THE UBC, TITLE 24 OF THE CALIFORNIA CODE OF REGULATIONS, LOS ANGELES COUNTY BUILDING CODE AND ALL OTHER APPLICABLE CODES, ORDINANCES AND REGULATIONS. NOTHING HEREIN SHALL BE INTERPRETED TO THE CONTRARY.

4. ALL ELECTRICAL AND PLUMBING WORK SHALL CONFORM TO THE REQUIREMENTS OF ALL LEGALLY CONSTITUTED AUTHORITIES HAVING JURISDICTION.

5. WHENEVER AN ARTICLE, DEVICE, OR PIECE OF EQUIPMENT IS SHOWN, INDICATED, OR REFERRED TO ON THE DRAWINGS OR THESE NOTES IN THE SINGULAR NUMBER, SUCH REFERENCES APPLY TO AS MANY SUCH ARTICLES AS ARE REQUIRED TO COMPLETE THE INSTALLATION.

6. ANY ITEMS INDICATED WITH "(E)" SHALL BE DEEMED TO BE EXISTING. ANY ITEMS INDICATED OTHERWISE SHALL BE CONSIDERED NEW WORK AND SHALL BE PART OF THIS CONTRACT, UNLESS NOTED OTHERWISE.

7. ARCHITECT WILL INTERPRET THE INTENT OF THE DOCUMENTS IN CASE OF POSSIBLE CONFLICT OR DISCREPENCY.

8. DO NOT SCALE THE DRAWINGS.

9. ALL DIMENSIONS ARE TO FACE OF FINISH UNLESS SHOWN OTHERWISE.

10. DETAILS NOTED AS "TYP" OR "TYPICAL" SHALL APPLY IN ALL CASES WHETHER OR NOT SPECIFICALLY REFERENCED.

11. DRAWING KEYNOTE SYSTEM: A KEYNOTING SYSTEM IS USED ON THE DRAWINGS FOR MATERIALS REFERENCES AND NOTES. REFER TO THE KEYNOTE LEGEND ON THE DRAWINGS FOR INFORMATION WHICH RELATES TO EACH KEYNOTE SYMBOL ON TEH RESPECTIVE DRAWING. EACH KEYNOTE SYMBOL CONSISTS OF A 5-DIGIT NUMBER FOLLOWED BY A PERIOD AND LETTER SUFFIX. THE FIRST 4 DIGITS OF THE NUMBER GENERALLY RELATE TO THE SPECIFICATION SECTION WHICH COVERS THE ITEM THAT IS REFERENCED, AND THE LETTER SUFFIX IDENTIFIES THE SPECIFIC REFERENCE NOTATION USED ON TEH DRAWING. THE LETTER SUFFIX DOES NOT RELATE TO ANY CORRESPONDING REFERENCE LETTER IN THE SPECIFICATION. THE ORGANIZATION OF THE KEYNOTING SYSTEM ON THE DRAWINGS, WITH THE KEYNOTE REFERENCE NUMBERS RELATED TO THE SPECIFICATIONS SECTIONS NUMBERING SYSTEM, SHALL NOT CONTROL THE CONTRACTOR IN DIVIDING THE WORK AMONG SUBCONTRACTORS OR IN ESTABLISHING THE EXTENT OF WORK TO BE PERFORMED AT ANY TRADE.

12. EXISTING CONDITIONS MAY NOT BE SHOWN EXACTLY. THE GENERAL CONTRACTOR AND ALL SUB-CONTRACTORS SHALL VERIFY ALL DIMENSIONS AND CONDITIONS ON THE JOB SITE PRIOR TO BEGINNING CONSTRUCTION AND SHALL REPORT ANY DISCREPANCIES OR UNIDENTIFIED CONDITIONS TO THE ARCHITECT FOR RESOLUTION BEFORE ANY WORK IS BEGUN, OR IMMEDIATELY UPON DISCOVERY.

13. NEITHER THE ARCHITECT'S REVIEW NOR APPROVAL OF SHOP DRAWINGS SHALL RELIEVE THE CONTRACTOR FROM RESPONSIBILITY FOR DEVIATIONS FROM DRAWINGS OR SPECIFICATIONS UNLESS HE HAS CALLED THE ARCHITECT'S ATTENTION IN WRITING TO SUCH DEVIATIONS AT THE TIME OF SUBMISSION NOR SHALL IT RELIEVE HIM OF RESPONSIBILITY FOR ERRORS OF ANY SORT IN THE SHOP DRAWINGS.

14. PROVIDE ATTACHMENT AND CONNECTION DEVICES AND METHODS FOR SECURING WORK PROPERLY AS IT IS INSTALLED: TRUE TO LINE AND LEVEL, PER CODE AND WITHIN RECOGNIZED INDUSTRY TOLERANCES IF NOT OTHERWISE INDICATED. ALLOW FOR EXPANSIONS AND BUILDING MOVEMENTS. PROVIDE UNIFORM JOINT WIDTHS IN EXPOSED WORK, ORGANIZED FOR BEST POSSIBLE VISUAL EFFECT. REFER QUESTIONABLE VISUAL-EFFECTS CHOICES TO ARCHITECT FOR FINAL DECISION.

15. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MEANS, METHODS, TECHNIQUES AND PROCEDURES EMPLOYED IN THE PERFORMANCE OF WORK IN, ON OR ABOUT THE JOB SITE; THE CONTRACTOR SHALL COORDINATE AND VERIFY ALL WORK PERFORMED BY SUB-CONTRACTORS.

16. LOCATIONS OF ALL UTILITIES SHOWN ON THE DRAWINGS ARE APPROXIMATE. THE CONTRACTOR SHALL EXERCISE EXTREME CAUTION IN EXCAVATION AND TRENCHING TO AVOID INTERCEPTING EXISTING PIPING OR CONDUITS. THE CONTRACTOR IS RESPONSIBLE TO VERIFY LOCATION OF ALL SITE UTILITIES AND TO COORDINATE AND AVOID CONFLICT IN THE LOCATIONS OF NEW UNDERGROUND AND SITE UTILITIES. THE CONTRACTOR SHALL INCLUDE ALL NECESSARY UTILITY FEES, METERS/AND CONNECTIONS IN HIS BID. CALL DIG ALERT 1-800-227-2600.

17. ALL CONTRACTORS AND SUB-CONTRACTORS PERFORMING WORK ON, OR RELATED TO THIS PROJECT SHALL CONDUCT THEIR OPERATIONS SO THAT ALL EMPLOYEES ARE PROVIDED A SAFE PLACE TO WORK AND THE PUBLIC IS PROTECTED, AND SHALL COMPLY WITH THE "OCCUPATIONAL SAFETY AND HEALTH REGULATION" OF THE U.S. DEPARTMENT OF LABOR AND WITH ANY AND ALL OTHER APPLICABLE STATE AND/OR LOCAL SAFETY REGULATIONS.

18. WORKMANSHIP STANDARDS: REMOVE AND REPLACE WORK WHICH DOES NOT COMPLY WITH WORKMANSHIP STANDARDS AS SPECIFIED AND AS RECOGNIZED IN THE CONSTRUCTION INDUSTRY FOR APPLICATIONS INDICATED. REMOVE AND REPLACE OTHER WORK DAMAGED OR DETERIORATED BY FAULTY WORKMANSHIP OR ITS REPLACEMENT.

19. MANUFACTURER'S INSTRUCTIONS: WHERE INSTALLATIONS INCLUDE MANUFACTURED PRODUCTS, COMPLY WITH MANUFACTURER'S APPLICABLE INSTRUCTIONS AND RECOMMENDATIONS FOR INSTALLATION, TO EXTENT THESE ARE MORE EXPLICIT OR MORE STRINGENT THAN REQUIREMENTS INDICATED IN CONTRACT DOCUMENTS.

20. ITEMS TO BE REUSED OR STORED: EXERCISE THE GREATEST POSSIBLE CARE WHEN REMOVING ITEMS SCHEDULED FOR REUSE. USE ONLY MECHANICS SKILLED IN THE APPROPRIATE CRAFTS. IDENTIFY POINT OF REUSE, STORE AND PROTECT AT LOCATIONS AS DIRECTED BY OWNER OR OWNER'S REPRESENTATIVE. CLEAN REUSED ITEMS BEFORE INSTALLING AT NEW LOCATIONS. MOUNT ITEMS IN SAME MANNER AS PREVIOUSLY DONE UNLESS NOTED OTHERWISE.

21. ANY REQUIRED INTERRUPTION OF OR REMOVAL OF ANY UTILITY SERVICE SERVING THE EXISTING FACILITY SHALL NOT BE PERFORMED UNTIL A MINIMUM OF 72-HOUR PRIOR NOTICE IS GIVEN TO THE OWNER BY THE CONTRACTOR. SUCH WORK AS RELATES TO THE NEW OR EXISTING WORK SHALL BE COORDINATED WITH THE OWNER AND THE APPLICABLE UTILITY COMPANY, AS MAY BE NECESSARY.

GENERAL NOTES

22. CUTTING AND PATCHING: EXECUTE CUTTING, FITTING AND PATCHING OF WORK REQUIRED TO MAKE THE SEVERAL PARTS FIT PROPERLY, TO REMOVE AND REPLACE DEFECTIVE WORK, TO REMOVE AND REPLACE WORK NOT CONFORMING TO REQUIREMENTS OF THE CONTRACT DOCUMENTS, AND TO INSTALL SPECIFIED WORK IN EXISTING CONSTRUCTION. PERFORM REMOVALS TO EXTENT REQUIRED PLUS SUCH ADDITIONAL REMOVALS AS ARE NECESSARY FOR COMPLETION EVEN THOUGH NOT INDICATED OR SPECIFIED.

23. RESTORE WORK WHICH HAS BEEN CUT OR REMOVED, INSTALL NEW PRODUCTS TO PROVIDE COMPLETED WORK IN ACCORDANCE WITH THE CONTRACT DOCUMENTS. REFINISH PATCHED, NEW AND EXISTING SURFACES TO MATCH ADJACENT, UNDISTURBED CONSTRUCTION. WHERE REPAINTING IS NECESSARY, THE PAINTING SHALL BE CARRIED TO NATURAL BREAKS OR NATURAL TERMINATIONS, AS APPROVED. PRIOR TO PAINTING, PREPARE PATCHED AREAS AS SPECIFIED FOR THE SAME NEW WORK.

24. MATERIALS: EXCEPT AS OTHERWISE INDICATED OR APPROVED BY ARCHITECT, PROVIDE MATERIALS FOR CUTTING-AND-PATCHING WHICH WILL RESULT IN EQUAL-OR-BETTER WORK THAN WORK BEING CUT-AND-PATCHED IN TERMS OF PERFORMANCE CHARACTERISTICS AND INCLUDING VISUAL EFFECT WHERE APPLICABLE. USE MATERIALS IDENTICAL WITH ORIGINAL MATERIALS WHERE FEASIBLE AND WHERE RECOGNIZED THAT SATISFACTORY RESULTS CAN BE PRODUCED THEREBY. REMOVE AND REPLACE WORK JUDGED BY ARCHITECT TO BE CUT-AND-PATCHED IN A VISUALLY UNSATISFACTORY OR OTHERWISE OBJECTABLE MANNER. RESTORE EXPOSED FINISHES OF RESTRICTION ONTO RETAINED WORK ADJOINING, IN A MANNER WHICH WILL ELIMINATE EVIDENCE OF PATCHING.

25. FINAL CLEANING MUST BE DONE TO OWNER'S SATISFACTION AND SHALL INCLUDE, BUT NOT BE LIMITED TO, CLEANING OF EXISTING LIGHT FIXTURES AND LAMPS AND REMOVAL OF TEMPORARY PROTECTION DEVICES. SEE SPECIFICATIONS FOR ADDITIONAL FINAL CLEANING REQUIREMENTS.

26. THE STRUCTURE IS DESIGNED AS A STABLE UNIT AFTER ALL COMPONENTS ARE IN PLACE. THE CONTRACTOR SHALL DESIGN AND PROVIDE ALL SHORING AND BRACING NECESSARY TO ENSURE THE STABILITY OF ANY AND ALL PARTS OF THE BUILDING DURING CONSTRUCTION.

27. UNLESS SPECIFICALLY SHOWN OR NOTED ON THE DRAWINGS, NO STRUCTURAL MEMBER SHALL BE CUT, NOTCHED, BORED, WELDED, OR OTHERWISE MODIFIED WITHOUT THE PERMISSION OF THE ENGINEER.

28. INSPECTION OF CONDITIONS: INSPECT SUBSTRATE TO RECEIVE WORK AND CONDITIONS UNDER WHICH WORK WILL BE PERFORMED, AND REPORT UNSATISFACTORY CONDITIONS. DO NOT PROCEED WITH THE WORK UNTIL UNSATISFACTORY CONDITIONS HAVE BEEN CORRECTED.

29. CHANGES TO THE APPROVED DRAWINGS AND SPECIFICATIONS SHALL BE MADE BY ADDENDA OR CHANGE ORDER.

QUALITY STANDARDS

GENERAL

1. ALL WALLS, DOORS AND THEIR RELATED FRAMES, AND WINDOWS AND THEIR RELATED FRAMES SHALL BE PLUMB AND STRAIGHT, TYPICAL.

2. ALL WALLS, CEILINGS AND MISCELLANEOUS ITEMS SUCH AS HANDRAILS, ALL PREVIOUSLY PAINTED ITEMS, SHALL RECEIVE PAINT, WHETHER INDICATED OR NOT, EXCEPTION: UNLESS NOTED OTHERWISE, DO NOT PAINT UNPAINTED CONCRETE, UNPAINTED MASONRY, CASEWORK, OR FACTORY FINISHED ITEMS SUCH AS LIGHT FIXTURES, CARPET, COVERPLATES, GRILLES, FIXTURES, NEW CEILING TILES, ETC.

CEILING

3. FINISH CEILINGS SHALL BE FLUSH AND LEVEL, UNLESS NOTED OTHERWISE.

CORRIDOR

4. MINIMUM CORRIDOR WIDTH SHALL BE 44" CLEAR. ELECTRICAL CABINETS, WAINSCOT, ETC. SHALL NOT PROJECT INTO THIS CLEAR DIMENSION.

DOORS

5. ALL PIN-TYPE HINGES WHICH ARE ACCESSIBLE FROM OUTSIDE THE SECURED AREA WHEN THE DOOR IS CLOSED SHALL HAVE NON-REMOVABLE HINGE PINS. IN ADDITION, THEY SHALL HAVE MINIMUM 1/4" DIAMETER STEEL JAMB STUD WITH 1/4" MINIMUM PROTECTION UNLESS THE HINGES ARE SHAPED TO PREVENT REMOVAL OF THE DOOR IF THE HINGES PINS ARE REMOVED.

6. THE STRIKE PLATE FOR LATCHES AND THE HOLDING DEVICE FOR PROJECTING DEADBOLTS IN WOOD CONSTRUCTION SHALL BE SECURED TO THE JAMB AND THE WALL FRAMING WITH SCREWS NOT LESS THAN 2 1/2" IN LENGTH.

7. DEADBOLTS SHALL HAVE HARDENED INSERTS. DEADLOCKING LATCH KEY-OPERATED LOCKS ON EXTERIOR; LOCKS OPENABLE WITHOUT KEY, SPECIAL KNOWLEDGE OR EFFORT ON INTERIOR.

8. STRAIGHT DEADBOLTS SHALL HAVE A MINIMUM THROW OF 1" AND AN EMBEDMENT OF NOT LESS THAN 5/8".

9. A HOOK-SHAPED OR AN EXPANDING-LUG DEADBOLT SHALL HAVE A MINIMUM THROW OF 3/4".

10. CYLINDER GUARDS SHALL BE INSTALLED ON ALL CYLINDER LOCKS WHENEVER THE CYLINDER PROJECTS BEYOND THE FACE OF THE DOOR OR IS OTHERWISE ACCESSIBLE TO GRIPPING TOOLS.

11. SECURE INACTIVE LEAF OF DOUBLE DOOR AND UPPER LEAF OF DUTCH DOOR.

FLOOR

12. THE SURFACE OF THE FLOORS SHALL BE SLIP-RESISTANT. WALKS SHALL BE AS SLIP-RESISTANT AS A MEDIUM SALTED FINISH.

GYPSUM BOARD

1. GYPSUM WALLBOARD AND SOFFITS SHALL CONFORM TO CHAPTER 25 OF TITLE 24, PART 2, UNLESS OTHERWISE NOTED.
2. GYPSUM WALLBOARD SHALL CONFORM TO CHAPTER 47 OF C.B.C. U.N.O.
3. ALL GYPSUM BOARD USED IN JANITOR'S ROOMS AND ALL TOILET ROOMS SHALL BE WATER RESISTANT EXCEPT AT CEILINGS PER 1997 UBC SECTION 2512.
3. J-BOXES INSTALLED ON OPPOSITE SIDES OF FIRE RATED WALLS SHALL BE MINIMUM 24" APART.

ACCESSIBLITY NOTES

GENERAL

1. DURING PERIODS OF PARTIAL OR RESTRICTED USE OF A BUILDING OR FACILITY, THE ENTRANCES USED FOR PRIMARY ACCESS SHALL BE ACCESSIBLE TO AND USABLE BY PHYSICALLY HANDICAPPED PERSONS.

2. THE SPACE REQUIRED FOR A WHEELCHAIR TO MAKE A 180 DEGREE TURN IS A CLEAR SPACE OF 60" DIAMETER OR A T-SHAPED SPACE.

3. IF THE CLEAR FLOOR SPACE ONLY ALLOWS A FORWARD APPROACH TO AN OBJECT, THE MAXIMUM HIGH FORWARD REACH ALLOWED SHALL BE 48". SEE FIGURE 11B-5C(a) IN THE 1999 U.B.C. THE MINIMUM LOW FORWARD REACH IS 15". IF THE HIGH FORWARD REACH IS OVER AN OBSTRUCTION, REACH AND CLEARANCES SHALL BE AS SHOWN IN FIGURE 11B-5C(b) IN THE 1999 U.B.C.

4. IF THE CLEAR FLOOR SPACE ALLOWS PARALLEL APPROACH BY A PERSON IN A WHEELCHAIR, THE MAXIMUM HIGH SIDE REACH ALLOWED SHALL BE 54" AND THE LOW SIDE REACH SHALL BE NO LESS THAN 9" ABOVE THE FLOOR AS SHOWN IN FIGURES 11B-5(a) & (b)IN THE 1999 U.B.C. IF THE SIDE REACH IS OVER AN OBSTRUCTION, THE REACH AND CLEARANCES SHALL BE AS SHOWN IN FIGURE 11B-5D(c) IN THE 1999 U.B.C.

5. EMPLOYEE WORK AREAS SHALL BE ACCESSIBLE BY MEANS OF A 36" MINIMUM AISLE AND A 32" MINIMUM CLEAR OPENING DOOR WIDTH.

6. WHERE FIXED OR BUILT-IN SEATING, TABLES, OR COUNTERS ARE PROVIDED FOR THE PUBLIC, AND IN GENERAL EMPLOYEE AREAS, 5%, BUT NOT LESS THAN 1 MUST BE ACCESSIBLE. AS REQUIRED IN SECTION 11228.

7. MOUNTING HEIGHTS: WHERE MOUNTING HEIGHTS ARE NOT INDICATED, MOUNT INDIVIDUAL UNITS OF WORK AT MOUNTING HEIGHTS AS LISTED IN APPLICABLE CODE, ESPECIALLY CA TITLE 24. REFER QUESTIONABLE MOUNTING HEIGHT CHOICES TO ARCHITECT FOR FINAL DECISION.

8. THE TOPS OF TABLES AND COUNTERS SHALL BE 28" TO 34" FROM THE FLOOR OR GROUND.

9. WHERE A SINGLE COUNTER CONTAINS MORE THAN ONE TRANSACTION STATION, SUCH AS (BUT NOT LIMITED TO) A BANK COUNTER WITH MULTIPLE TELLER WINDOWS OR A RETAIL SALES COUNTER WITH MULTIPLE CASH REGISTER STATIONS, AT LEAST 5%, BUT NEVER LESS THAN 1, OF EACH TYPE OF STATION SHALL BE LOCATED AT A SECTION OF COUNTER THAT IS AT LEAST 36" LONG AND NO MORE THAN 28" TO 34" HIGH.

PATH OF TRAVEL

1. GROUND AND FLOOR SURFACES ALONG ACCESSIBLE ROUTES AND IN ACCESSIBLE ROOMS AND SPACES, INCLUDING FLOORS, WALKS, RAMPS, STAIRS, AND CURB RAMPS, SHALL BE STABLE, FIRM, AND SLIP RESISTANT.

2. IN BUILDINGS OR FACILITIES, FLOORS OF A GIVEN STORY SHALL BE A COMMON LEVEL THROUGHOUT, OR SHALL BE CONNECTED BY PEDESTRIAN RAMPS OR SPECIAL ACCESS LIFTS.

3. IF CARPET OR CARPET TILE IS USED ON A GROUND OR FLOOR SURFACE, IT SHALL BE SECURELY ATTACHED; HAVE A FIRM CUSHION, PAD OR BACKING OR NO CUSHION OR PAD; AND HAVE A LEVEL LOOP TEXTURED LOOP, LEVEL CUT PILE, OR LEVEL CUT/UNCUT PILE TEXTURE. THE MAXIMUM PILE HEIGHT SHALL BE 1/2". EXPOSED EDGES OF CARPET SHALL BE FASTENED TO FLOOR SURFACES AND HAVE TRIM ALONG THE ENTIRE LENGTH OF THE EXPOSED EDGE.

4. OBJECTS PROJECTING FROM THE WALLS WITH THEIR LEADING EDGES BETWEEN 27" AND 80" ABOVE THE FINISHED FLOOR SHALL PROTRUDE NO MORE THAN 4" INTO WALKS, HALLS, CORRIDORS, PASSAGEWAYS OR AISLES.

5. OBJECTS MOUNTED WITH THEIR LEADING EDGED AT OR BELOW 27" ABOVE THE FINISHED FLOOR MAY PROTRUDE ANY AMOUNT INTO WALKS, HALLS, CORRIDORS, PASSAGEWAYS OR AISLES.

6. FREE-STANDING OBJECTS MOUNTED ON POSTS OR PYLONS MAY OVERHANG 12" MAXIMUM FROM 27" TO 80" ABOVE THE GROUND OR FINISHED FLOOR.

7. PROTRUDING OBJECTS SHALL NOT REDUCE THE CLEAR WIDTH OF AN ACCESSIBLE ROUTE OR MANEUVERING SPACE.

8. WALKS, HALLS, CORRIDORS, PASSAGEWAYS, AISLES OR OTHER CIRCULATION SPACES SHALL HAVE 80" MINIMUM CLEAR HEAD ROOM.

9. ANY OBSTRUCTION THAT OVERHANGS A PEDESTRIAN WAY SHALL BE A MINIMUM OF 80" ABOVE THE WALKING SURFACE AS MEASURED FROM THE BOTTOM OF THE OBSTRUCTION.

10. IF A WALK CROSSES OR ADJOINS A VEHICULAR WAY, AND THE WALKING SURFACES ARE NOT SEPARATED BY CURBS, RAILINGS OR OTHER ELEMENTS BETWEEN THE PEDESTRIAN AREAS AND VEHICULAR AREAS, THE BOUNDARY BETWEEN THE AREAS SHALL BE DEFINED BY A CONTINUOUS DETECTABLE WARNING WHICH IS 36" WIDE, COMPLYING WITH SECTION 1024.3 IN THE 1999 U.B.C.

ACCESS WALKS

1. SITE DEVELOPMENT AND GRADING SHALL BE DESIGNED TO PROVIDE ACCESS TO ALL ENTRANCES AND EXTERIOR GROUND FLOOR EXITS, AND ACCESS TO NORMAL PATHS OF TRAVEL, AND WHERE NECESSARY TO PROVIDE ACCESS, SHALL INCORPORATE PEDESTRIAN RAMPS, CURB RAMPS, ETC.

2. THE ACCESSIBLE ROUTE OF TRAVEL SHALL BE THE MOST PRACTICAL DIRECT ROUTE BETWEEN ACCESSIBLE BUILDING ENTRANCES, ACCESSIBLE SITE FACILITIES, AND THE ACCESSIBLE ENTRANCE TO THE SITE.

3. AT LEAST ONE ACCESSIBLE ROUTE WITHIN THE BOUNDARY OF THE SITE SHALL BE PROVIDED FROM PUBLIC TRANSPORTATION STOPS, ACCESSIBLE PARKING AND ACCESSIBLE PASSENGER LOADING ZONES, AND PUBLIC STREETS OR SIDEWALKS, TO THE ACCESSIBLE BUILDING ENTRANCES THEY SERVE. THE ACCESSIBLE ROUTE SHALL, TO THE MAXIMUM EXTENT FEASIBLE, COINCIDE WITH THE ROUTE FOR THE GENERAL PUBLIC.

4. WALKS AND SIDEWALKS SHALL HAVE A CONTINUOUS COMMON SURFACE, NOT INTERRUPTED BY STEPS OR BY ABRUPT CHANGES IN LEVEL EXCEEDING 1/2", AND SHALL BE A MINIMUM OF 48" IN WIDTH.

ACCESSIBLITY NOTES

5. ABRUPT CHANGES IN LEVEL, EXCEPT BETWEEN A WALK OR SIDEWALK AND DRIVEWAY, OR WHEN A GAURDRAIL OR HANDRAIL IS PROVIDED, EXCEEDING 4 INCHES IN A VERTICAL DIMENSION SHALL BE IDENTIFIED BY CURBS PROJECTING AT LEAST 6 INCHES IN HEIGHT ABOVE WALK OR SIDEWALK SURFACE TO WARN THE BLIND OF A POTENTIAL DROP-OFF.

6. WHEN ABRUPT CHANGES IN LEVEL NOT EXCEEDING 1/2" OCCUR, THEY SHALL BE BEVELED WITH A SLOPE NO GREATER THAN 1:2, EXCEPT THAT LEVEL CHANGES NOT EXCEEDING 1/4" SHALL BE VERTICAL.

7. ABRUPT CHANGES IN LEVEL ALONG ANY ACCESSIBLE ROUTE EXCEEDING 1/2" SHALL COMPLY WITH THE REQUIREMENTS FOR CURB RAMPS.

8. WHEN THE SLOPE IN THE DIRECTION OF TRAVEL OF ANY WALK EXCEEDS 1 VERTICAL TO 20 HORIZONTAL IT SHALL COMPLY WITH THE PROVISION IN SECTION 1007 AS A PEDESTRIAN RAMP.

9. WALK AND SIDEWALK SURFACE CROSS SLOPES SHALL NOT EXCEED 1/4" PER FOOT EXCEPT WHEN THE ENFORCING AGENCY FINDS THAT DUE TO LOCAL CONDITIONS IT CREATES AN UNREASONABLE HARDSHIP, THE CROSS SLOPE CAN BE INCREASED TO A MAXIMUM OF 1/2" PER FOOT FOR DISTANCES NOT TO EXCEED 20'.

10. WALKS SHALL BE PROVIDED WITH A LEVEL AREA NOT LESS THAN 60" AT A DOOR OR GATE THAT SWINGS TOWARD THE WALK, AND NOT LESS THAN 48" WIDE BY 44" DEEP AT A DOOR GATE THAT SWINGS AWAY FROM THE WALK.

11. WALKS SHALL EXTEND A MINIMUM OF 24" TO THE SIDE OF THE STRIKE EDGE OF A DOOR OR A GATE THAT SWINGS TOWARD THE WALK.

12. ALL WALKS WITH CONTINUOUS GRADIENTS SHALL HAVE LEVEL AREAS AT LEAST 5' IN LENGTH AT INTERVALS OF AT LEAST EVERY 400'.

13. WALK SURFACES WITH A SLOPE OF LESS THAN 6% GRADIENT SHALL BE AT LEAST AS SLIP-RESISTANT AS THAT DESCRIBED AS A MEDIUM SALTED FINISH.

14. WALK SURFACES WITH A SLOPE OF 6% OR GREATER GRADIENT SHALL BE SLIP RESISTANT.

PARKING

1. IN PARKING FACILITIES THAT DO NOT SERVE A PARTICULAR BUILDING, ACCESSIBLE PARKING SHALL BE LOCATED ON THE SHORTEST ACCESSIBLE ROUTE OF TRAVEL TO AN ACCESSIBLE PEDESTRIAN ENTRANCE OF THE PARKING FACILITY.

2. WHEN MORE THAN ONE ACCESSIBLE PARKING SPACE IS PROVIDED, IN LIEU OF PROVIDING A 14' WIDE SPACE FOR EACH PARKING SPACE, TWO SPACES CAN BE PROVIDED WITHIN A 23' WIDE AREA LINED TO PROVIDE A 9' PARKING AREA ON EACH SIDE OF A 5' LOADING AND UNLOADING ACCESS AISLE IN THE CENTER.

3. THE MINIMUM LENGTH OF AN ACCESSIBLE PARKING SPACE SHALL BE 18'.

4. ONE IN EVERY EIGHT ACCESSIBLE SPACES, BUT NOT LESS THAN ONE, SHALL BE SERVED BY AN ACCESS AISLE 96" WIDE MINIMUM AND SHALL BE DESIGNATED VAN ACCESSIBLE. ALL SUCH SPACES MAY BE GROUPED ON ONE LEVEL OF THE PARKING STRUCTURE.

5. SURFACE SLOPES OF ACCESSIBLE PARKING SPACES SHALL BE THE MINIMUM POSSIBLE AND SHALL NOT EXCEED 1/4" PER FOOT IN ANY DIRECTION.

6. ACCESSIBLE PARKING SPACES SHALL BE SO LOCATED THAT PERSONS WITH DISABILITIES ARE NOT COMPELLED TO WHEEL OR WALK BEHIND PARKED CARS OTHER THAN THEIR OWN.

7. IN EACH PARKING AREA, A CURB OR WHEELSTOP SHALL BE PROVIDED TO PREVENT ENCROACHMENT OF CARS OVER THE REQUIRED WIDTH OF WALKWAYS WHERE NECESSARY.

8. EACH PARKING SPACE RESERVED FOR PERSONS WITH DISABILITIES IS IDENTIFIED BY A REFLECTORIZED SIGN PERMANENTLY POSTED IMMEDIATELY AT THE HEAD OF EACH STALL OR SPACE, CONSISTING OF A PROFILE VIEW OF A WHEELCHAIR WITH OCCUPANT IN WHITE OR DARK BLUE BACKGROUND. THE SIGN SHALL NOT BE SMALLER THAN 70 SQUARE INCHES IN AREA AND, WHEN IN A PATH OF TRAVEL SHALL BE POSTED AT A MINIMUM HEIGHT OF 80" FROM THE BOTTOM OF THE SIGN TO THE PARKING SPACE FINISHED GRADE.

9. SIGNS TO IDENTIFY ACCESSIBLE PARKING SPACES ARE CENTERED ON THE STALL AT THE INTERIOR END OF THE PARKING SPACE AT A MINIMUM HEIGHT OF 80" FROM THE BOTTOM OF THE SIGN TO THE PARKING SPACE FINISHED GRADE.

10. VAN ACCESSIBLE PARKING SPACES SHALL HAVE AN ADDITIONAL SIGN STATING "VAN ACCESSIBLE" MOUNTED BELOW THE SYMBOL OF ACCESSIBILITY.

11. AN ADDITIONAL SIGN SHALL ALSO BE POSTED, IN A CONSPICUOUS PLACE, AT EACH ENTRANCE TO OFF-STREET PARKING FACILITIES, OR IMMEDIATELY ADJACENT TO AND VISIBLE FROM EACH STALL OR SPACE. THE SIGN SHALL BE NOT LESS THAN 17" BY 22" IN SIZE WITH LETTERING NOT LESS THAN 1" IN HEIGHT, WHICH CLEARLY AND CONSPICUOUSLY STATES THE FOLLOWING: "UNAUTHORIZED VEHICLES PARKED IN DESIGNATED ACCESSIBLE SPACES NOT DISPLAYING DISTINGUISHING PLACARDS OR LICENSE PLATES ISSUED FOR PERSONS WITH DISABILITIES MAY BE TOWED AWAY AT OWNER'S EXPENSE. TOWED VEHICLES MAY BE RECLAIMED AT _____ OR BY TELEPHONING (626) 570-5168."

12. THE SURFACE OF EACH ACCESSIBLE PARKING SPACE OR STALL SHALL HAVE A SURFACE IDENTIFICATION DUPLICATING EITHER OUTLINING OR PAINTING THE STALL OR SPACE IN BLUE AND OUTLINING ON THE GROUND IN THE STALL OR SPACE IN WHITE OR SUITABLE CONTRASTING COLOR A PROFILE VIEW DEPICTING A WHEELCHAIR OCCUPANT; OR OUTLINING A PROFILE VIEW OF A WHEELCHAIR WITH OCCUPANT IN WHITE ON BLUE BACKGROUND. THE PROFILE VIEW SHALL BE LOCATED SO THAT IT IS VISIBLE TO A TRAFFIC ENFORCEMENT OFFICER WHEN A VEHICLE IS PROPERLY PARKED IN THE SPACE AND SHALL BE 36"H X 36"W.

ACCESS RAMP

1. THE MAXIMUM SLOPE OF A RAMP THAT SERVES ANY ENTRY, PROVIDES ACCESS FOR PERSONS WITH DISABILITIES, OR IS IN THE PATH OF TRAVEL SHALL BE 1' RISE IN 12' OF HORIZONTAL RUN.

2. THE CROSS SLOPE OF RAMP SURFACES SHALL BE NO GREATER THAN 1:50.

3. THE WIDTH OF RAMPS SHALL BE AS REQUIRED FOR STAIRWAYS AND EXITS.

4. PEDESTRIAN RAMPS SERVING PRIMARY ENTRANCES TO BUILDINGS HAVING AN OCCUPANT LOAD OF 300 OR MORE SHALL HAVE A MINIMUM CLEAR WIDTH OF 60".

5. NOT USED.

6. ALL OTHER PEDESTRIAN RAMPS SERVING PRIMARY ENTRANCES SHALL HAVE A MINIMUM WIDTH OF 48".

7. LANDINGS SHALL BE PROVIDED AT THE TOP AND BOTTOM OF EACH RAMP.

8. INTERMEDIATE LANDINGS SHALL BE PROVIDED AT INTERVALS NOT EXCEEDING 30" OF VERTICAL RISE AND AT EACH CHANGE OF DIRECTION.

9. TOP LANDINGS SHALL NOT BE LESS THAN 60" WIDE AND SHALL HAVE A LENGTH OF NOT LESS THAN 60" IN THE DIRECTION OF RAMP RUN.

10. DOORS IN ANY POSITION SHALL NOT REDUCE THE MINIMUM DIMENSION OF THE RAMP LANDING TO LESS THAN 42" AND SHALL NOT REDUCE THE REQUIRED WIDTH BY MORE THAN 3'-0" WHEN FULLY OPEN.

11. THE WIDTH OF THE LANDING SHALL EXTEND 24" PAST THE STRIKE EDGE OF ANY DOOR OR GATE FOR EXTERIOR RAMPS AND 18" PAST THE STRIKE EDGE FOR INTERIOR RAMPS.

12. AT BOTTOM AND INTERMEDIATE LANDINGS, THE WIDTH SHALL BE AT LEAST THE SAME AS REQUIRED FOR THE RAMP.

13. INTERMEDIATE LANDING AT A CHANGE OF DIRECTION IN EXCESS OF 30 DEGREES AND BOTTOM LANDINGS SHALL HAVE A DIMENSION IN THE DIRECTION OF RAMP RUN OF NOT LESS THAN 72" TO ACCOMMODATE THE HANDRAIL EXTENSION.

14. OTHER INTERMEDIATE LANDINGS SHALL HAVE A DIMENSION IN THE DIRECTION OF RAMP RUN OF NOT LESS THAN 60".

15. RAMPS LANDINGS ARE NOT CONSIDERED IN DETERMINING THE MAXIMUM HORIZONTAL DISTANCE OF EACH RAMP.

16. HANDRAILS ARE REQUIRED ON RAMPS THAT PROVIDE ACCESS IF THE RAMP SLOPE EXCEEDS 1' RISE IN 20' OF HORIZONTAL RUN.

17. HANDRAILS SHALL BE PLACED ON EACH RAMP, SHALL BE CONTINUOUS THE FULL LENGTH OF THE RAMP, SHALL BE 34" TO 38" ABOVE THE RAMP SURFACE, SHALL EXTEND A MINIMUM OF 1' BEYOND THE TOP AND BOTTOM OF THE RAMP, AND THE ENDS SHALL BE RETURNED.

18. THE GRIP PORTION OF HANDRAILS SHALL BE NOT LESS THAN 1-1/4" NOR MORE THAN 1-1/2", OR THE SHAPE SHALL PROVIDE AN EQUIVALENT GRIPPING SURFACE, AND ALL SURFACES SHALL BE SMOOTH WITH NO SHARP CORNERS. HANDRAILS SHALL NOT ROTATE WITHIN THEIR FITTINGS.

19. HANDRAILS PROJECTING FROM A WALL SHALL HAVE A SPACE OF 1-1/2" BETWEEN THE WALL AND THE HANDRAIL.

20. HANDRAILS MAY BE LOCATED IN A RECESS IF THE RECESS IS A MAXIMUM OF 3" DEEP AND EXTENDS AT LEAST 18" ABOVE THE TOP OF THE RAIL.

21. ANY WALL OR OTHER

ACCESSIBLITY NOTES (CONTINUED)

17. TOILET TISSUE DISPENSERS SHALL BE LOCATED ON THE WALL WITHIN 12" OF THE FRONT EDGE OF THE TOILET SEAT AND NO LOWER THAN 19" FROM THE FLOOR. DISPENSERS THAT CONTROL DELIVERY OR THAT DO NOT PERMIT CONTINUOUS PAPER FLOW SHALL NOT BE USED.

18. TOILET ROOM FLOORS SHALL HAVE A SMOOTH, HARD, NON-ABSORBENT SURFACE SUCH AS PORTLAND CEMENT, CONCRETE, CERAMIC TILE OR OTHER APPROVED MATERIAL WHICH EXTENDS UPWARD ONTO THE WALLS AT LEAST 5". WALLS WITHIN WATER CLOSET COMPARTMENTS AND WALLS WITHIN 24" OF THE FRONT AND SIDES OF URINALS SHALL BE SIMILARLY FINISHED TO A HEIGHT OF 48" AND, EXCEPT FOR STRUCTURAL ELEMENTS, THE MATERIALS USED IN SUCH WALLS SHALL BE A TYPE WHICH IS NOT ADVERSELY AFFECTED BY MOISTURE.

19. GRAB BARS AT THE SIDE SHALL BE AT LEAST 42" LONG WITH THE FRONT END POSITIONED 24" IN FRONT OF THE WATER CLOSET STOOL AND WITH THE BACK END POSITIONED NO MORE THAN 12" FROM THE REAR WALL. GRAB BARS AT THE BACK SHALL NOT BE LESS THAN 36" LONG.

20. GRAB BARS SHALL BE SECURELY ATTACHED 33" ABOVE AND PARALLEL TO THE FLOOR, EXCEPT THAT WHERE A TANK-TYPE TOILET IS USED WHICH OBSTRUCTS PLACEMENT AT 33", THE GRAB BAR MAY BE AS HIGH AS 36".

21. THE DIAMETER OR WIDTH OF THE GRIPPING SURFACES OF A GRAB BAR SHALL BE 1-1/4" TO 1-1/2" OR THE SHAPE SHALL PROVIDE AN EQUIVALENT GRIPPING SURFACE. IF GRAB BARS ARE MOUNTED ADJACENT TO A WALL, THE SPACE BETWEEN THE WALL AND THE GRAB BARS SHALL BE 1-1/2".

22. BENDING STRESS IN A GRAB BAR OR SEAT INDUCED BY THE MAXIMUM BENDING MOMENT FROM THE APPLICATION OF A 250-LB POINT LOAD SHALL BE LESS THAN THE ALLOWABLE STRESS FOR THE MATERIAL OF THE GRAB BAR OR SEAT.

23. SHEAR STRESS INDUCED IN A GRAB BAR OR SEAT BY THE APPLICATION OF A 250-LB POINT LOAD SHALL BE LESS THAN THE ALLOWABLE SHEAR STRESS FOR THE MATERIAL OF THE GRAB BAR OR SEAT, AND ITS MOUNTING BRACKET OR OTHER SUPPORT IS CONSIDERED TO BE FULLY RESTRAINED, THEN DIRECT AND TORSIONAL SHEAR STRESSES SHALL NOT EXCEED THE ALLOWABLE SHEAR STRESS.

24. SHEAR FORCE INDUCED IN FASTENER OR MOUNTING DEVICES FROM THE APPLICATION OF A 250-LB POINT LOAD, PLUS THE MAXIMUM MOMENT FROM THE APPLICATION OF A 250-LB POINT LOAD, SHALL BE LESS THAN THE ALLOWABLE WITHDRAWAL LOAD BETWEEN THE FASTENED AND SUPPORTING STRUCTURE.

25. TENSILE FORCE INDUCED IN A FASTENER BY A DIRECT TENSION FORCE OF A 250-LB POINT LOAD, PLUS THE MAXIMUM MOMENT FROM THE APPLICATION OF A 250-LB POINT LOAD, SHALL BE LESS THAN THE ALLOWABLE WITHDRAWAL LOAD BETWEEN THE FASTENER AND SUPPORTING STRUCTURE.

26. GRAB BARS SHALL NOT ROTATE WITHIN THEIR FITTINGS.

27. DRINKING FOUNTAIN BUBBLERS SHALL BE ACTIVATED BY A CONTROL THAT IS EASILY OPERATED BY A DISABLED PERSON SUCH AS A HAND-OPERATED LEVER TYPE CONTROL LOCATED WITHIN 6" OF THE FRONT OF THE DRINKING FOUNTAIN. THE BUBBLER OUTLET ORIFICE SHALL BE LOCATED WITHIN 6" OF THE FRONT OF THE DRINKING FOUNTAIN AND AT LEAST ONE OUTLET SHALL BE WITHIN 36" OF THE FLOOR. THE WATER STREAM FROM THE BUBBLER SHALL BE SUFFICIENTLY PARALLEL TO THE FRONT EDGE OF THE DRINKING FOUNTAIN.

TELEPHONE

1. IF PUBLIC TELEPHONES ARE PROVIDED, THEY SHALL BE MADE ACCESSIBLE.

2. A CLEAR FLOOR OR GROUND SPACE AT LEAST 30" BY 48" THAT ALLOWS EITHER A FORWARD OR PARALLEL APPROACH BY A PERSON USING A WHEELCHAIR SHALL BE PROVIDED AT TELEPHONES.

3. BASES, ENCLOSURES AND FIXED SEATS SHALL NOT IMPEDE APPROACHES TO TELEPHONES BY PEOPLE WHO USE WHEELCHAIRS.

4. THE HIGHEST OPERABLE PART OF THE TELEPHONE SHALL BE WITHIN 48" OF THE FLOOR IF FORWARD APPROACHED AND 54" IF SIDE APPROACHED.

5. TELEPHONES MOUNTED DIAGONALLY IN A CORNER THAT REQUIRE WHEELCHAIR USERS TO REACH DIAGONALLY SHALL HAVE THE HIGHEST OPERABLE PART NO HIGHER THAN 54" ABOVE THE FLOOR.

6. THE CORD FROM THE TELEPHONE TO THE HANDSET SHALL BE AT LEAST 29" LONG.

7. TELEPHONES SHALL HAVE PUSH-BUTTON CONTROLS WHERE SERVICE FOR SUCH EQUIPMENT IS AVAILABLE.

8. FOR FORWARD APPROACH TELEPHONES, IF THE ENCLOSURE OVERHANG IS GREATER THAN 12", THE CLEAR WIDTH OF THE ENCLOSURE SHALL BE 30" MINIMUM; IF THE CLEAR WIDTH OF THE ENCLOSURE IS LESS THAN 30", THE HEIGHT OF THE LOWEST OVERHANGING PART SHALL BE EQUAL TO OR GREATER THAN 27".

9. ENTRANCES TO FULL-HEIGHT ENCLOSURES SHALL BE 30" WIDE MINIMUM.

10. TELEPHONES SHALL BE EQUIPPED WITH A RECEIVER THAT GENERATES A MAGNETIC FIELD IN THE AREA OF THE RECEIVER CAP. IF BANKS OF PUBLIC TELEPHONES ARE PROVIDED, AT LEAST ONE IN EACH BANK AND A TOTAL OF AT LEAST 25% OF THE TOTAL NUMBER OF PUBLIC TELEPHONES, INCLUDING CLOSED CIRCUIT TELEPHONES IN A BUILDING OR FACILITY, SHALL BE EQUIPPED WITH VOLUME CONTROL. SUCH TELEPHONES SHALL BE CAPABLE OF A MINIMUM OF 12 DBA AND A MAXIMUM OF 18 DBA ABOVE NORMAL. IF AN AUTOMATIC RESET IS PROVIDED, 18 DBA MAY BE EXCEEDED. PUBLIC TELEPHONES WITH VOLUME CONTROL SHALL BE HEARING AID COMPATIBLE AND SHALL BE IDENTIFIED BY A SIGN CONTAINING A DEPICTION OF A TELEPHONE HANDSET WITH RADIATING SOUND WAVES.

11. IF A TOTAL OF FOUR OR MORE PUBLIC TELEPHONES ARE PROVIDED AT THE INTERIOR AND EXTERIOR OF A SITE, AND IF AT LEAST ONE OF THE TOTAL IS IN AN INTERIOR LOCATION, THEN AT LEAST ON INTERIOR PUBLIC TEXT TELEPHONE SHALL BE PROVIDED.

12. TEXT TELEPHONES SHALL COMPLY WITH THE FOLLOWING: TEXT TELEPHONES USED WITH A PAY TELEPHONE SHALL BE PERMANENTLY AFFIXED WITHIN OR ADJACENT TO THE TELEPHONE ENCLOSURE. IF AN ACOUSTIC COUPLER IS USED, THE TELEPHONE CORD SHALL BE SUFFICIENTLY LONG TO ALLOW CONNECTION OF THE TEXT TELEPHONE AND TELEPHONE RECEIVER.

ACCESSIBLITY NOTES (CONTINUED)

13. PAY TELEPHONES DESIGNED TO ACCOMMODATE A PORTABLE TEXT TELEPHONE SHALL BE EQUIPPED WITH A SHELF AND AN ELECTRICAL OUTLET WITHIN OR ADJACENT TO THE TELEPHONE ENCLOSURE. THE TELEPHONE HANDSET SHALL BE CAPABLE OF ACCOMMODATING A TEXT TELEPHONE AND SHALL HAVE 6" MINIMUM VERTICAL CLEARANCE IN THE AREA WHERE THE TEXT TELEPHONE IS TO BE PLACED.

14. EQUIVALENT FACILITATION MAY BE SUBSTITUTED FOR THE ABOVE REQUIREMENTS AS DESCRIBED IN SECTION 1117B.2.9.2.3.

15. TEXT TELEPHONES SHALL BE IDENTIFIED BY THE INTERNATIONAL TDD SYMBOL (SEE FIGURE 11B-4 IN 1994 U.B.C.). IF A FACILITY HAS A PUBLIC TEXT TELEPHONE, DIRECTIONAL SIGNAGE INDICATING THE LOCATION OF THE NEAREST SUCH TELEPHONE SHALL BE PLACED ADJACENT TO ALL BANKS OF TELEPHONES THAT DO NOT CONTAIN A TEXT TELEPHONE. SUCH DIRECTIONAL SIGNAGE SHALL INCLUDE THE INTERNATIONAL TDD SYMBOL. IF A FACILITY HAS NO BANKS OF TELEPHONES, THE DIRECTIONAL SIGNAGE SHALL BE PROVIDED AT THE ENTRANCE OR IN A BUILDING DIRECTORY.

16. IF TELEPHONE BOOKS ARE PROVIDED, THEY SHALL BE LOCATED WITH IN 48" OF THE FLOOR IF FORWARD APPROACHED AND 54" IF SIDE APPROACHED.

17. THE HIGHEST OPERABLE PART OF ALL CONTROLS, DISPENSERS, RECEPTACLES, AND OTHER OPERABLE EQUIPMENT SHALL BE PLACED WITHIN 48" OF THE FLOOR BUT NOT LOWER THAN 15" IF FORWARD APPROACHED AND WITHIN 54" BUT NOT LOWER THAN 9" IF SIDE APPROACHED.

SIGNS

1. CHARACTERS AND NUMBERS ON SIGNS SHALL BE SIZED ACCORDING TO THE VIEWING DISTANCE FROM WHICH THEY ARE TO BE READ. THE MINIMUM HEIGHT IS MEASURED USING AN UPPER CASE X. LOWER CASE CHARACTERS ARE PERMITTED. FOR SIGNS SUSPENDED OR PROJECTED ABOVE THE FINISH FLOOR IN COMPLIANCE WITH SECTION 11218 IN THE 1999 U.B.C., THE MINIMUM CHARACTER SHALL BE 3".

2. CHARACTERS AND SYMBOLS SHALL CONTRAST WITH THEIR BACKGROUND, EITHER LIGHT CHARACTERS ON A DARK BACKGROUND OR DARK CHARACTERS ON A LIGHT BACKGROUND.

3. WHEN RAISED CHARACTERS OR SYMBOLS ARE USED, THEY SHALL CONFORM TO THE FOLLOWING:

   LETTERS AND NUMBERS ON SIGNS SHALL BE RAISED 1/32" MINIMUM AND SHALL BE SAN-SERIF UPPERCASE CHARACTERS ACCOMPANIED BY GRADE 2 BRAILLE.

   RAISED CHARACTERS OR SYMBOLS SHALL BE A MINIMUM OF 5/8" HIGH.

   PICTORIAL SYMBOL SIGNS (PICTOGRAMS) SHALL BE ACCOMPANIED BY THE EQUIVALENT VERBAL DESCRIPTION PLACED DIRECTLY BELOW THE PICTOGRAM. THE BORDER DIMENSION OF THE PICTOGRAM SHALL BE A MINIMUM OF 6" IN HEIGHT.

4. THE INTERNATIONAL SYMBOL OF ACCESSSIBILITY SHALL CONSIST OF A WHITE FIGURE ON A BLUE BACKGROUND. THE BLUE SHALL BE EQUAL TO COLOR NO. 15090 IN FEDERAL STANDARD 595B.

5. LETTERS AND NUMBERS ON SIGNS SHALL HAVE A WIDTH TO HEIGHT RATIO OF BETWEEN 3:5 AND 1:1 AND A STROKE WIDTH TO HEIGHT RATIO BETWEEN 1:5 AND 1:10.

6. CONTRACTED GRADE 2 BRAILLE SHALL BE USED WHEREVER BRAILLE SYMBOLS ARE REQUIRED. DOTS SHALL BE 1/10" ON CENTERS IN EACH CELL WITH 2/10" SPACE BETWEEN CELLS. DOTS SHALL BE RAISED A MINIMUM OF 1/40" ABOVE THE BACKGROUND.

7. ALL BUILDING ENTRANCES THAT ARE ACCESSIBLE TO AND USABLE BY PERSONS WITH DISABILITIES AND AT EVERY MAJOR JUNCTION ALONG OR LEADING TO AN ACCESSIBLE ROUTE OF TRAVEL SHALL BE IDENTIFIED WITH A SIGN DISPLAYING THE INTERNATIONAL SYMBOL ACCESSIBILITY AND WITH ADDITIONAL DIRECTIONAL SIGNS, AS REQUIRED, TO BE VISIBLE TO PERSONS ALONG APPROACHING PEDESTRIAN WAYS.

8. WHEN PERMANENT IDENTIFICATION IS PROVIDED FOR ROOMS AND SPACES, RAISED LETTERS SHALL BE PROVIDED AND SHALL BE ACCOMPANIED BY BRAILLE IN CONFORMANCE WITH SECTION 11178.5.4. THROUGH 11178.5.6.3 IN THE 1999 U.B.C. SIGNS SHALL BE INSTALLED ON THE WALL ADJACENT TO THE LATCH SIDE OF THE DOOR. WHERE THERE IS NO WALL SPACE ON THE LATCH SIDE, INCLUDING AT DOUBLE LEAF DOORS, SIGNS SHALL BE PLACED ON THE NEAREST ADJACENT WALL, PREFERABLY ON THE RIGHT. MOUNTING HEIGHT SHALL BE 60" ABOVE THE FINISHED FLOOR TO THE CENTERLINE OF THE SIGN. MOUNTING LOCATION SHALL BE DETERMINED SO THAT A PERSON MAY APPROACH WITHIN 3" OF SIGNAGE WITHOUT ENCOUNTERING PROTRUDING OBJECTS OR STANDING WITHIN THE SWING OF A DOOR.

HISTORICAL BLDG. CODE NOTES

CHAPTER 34, DIVISION II, CALIFORNIA BUILDING CODE, 2001

1. REPAIRS TO ANY PORTION OF A QUALIFIED HISTORICAL BUILDING OR PROPERTY MAY BE MADE IN-KIND WITH HISTORIC MATERIALS AND THE USE OF ORIGINAL OR EXISTING HISTORIC METHODS OF CONSTRUCTION, SUBJECT TO CONDITIONS OF THIS CODE. (SEE 8-105.1)

2. IT IS THE INTENT OF THIS CODE TO ALLOW THE USE OF THESE ALTERNATIVES OR ANY OTHER ACCEPTABLE REGULATION OR METHODOLOGY OF DESIGN OR CONSTRUCTION IN WHOLE OR IN PART, WITH THE REGULAR CODE, OR IN ANY COMBINATION OF THE REGULAR CODE AND THIS CODE. THESE REGULATIONS ARE NOT INTENDED TO PRECLUDE THE USE OF ANY PROPOSED ALTERNATIVE OR METHOD OF DESIGN OR CONSTRUCTION NOT SPECIFICALLY PRESCRIBED OR OTHERWISE ALLOWED BY THESE REGULATIONS. ANY OTHER ALTERNATIVE MAY BE SUBMITTED OF EVALUATION TO THE APPROPRIATE ENFORCING AGENCY FOR REVIEW AND ACCEPTANCE. THE ENFORDING AGENCY MAY REQUEST THAT SUFFICIENT EVIDENCE OR PROOF BE SUBMITTED TO SUBSTANTIAL ANY CLAIMS THAT MAY BE MADE REGARDING SUCH ALTERNATIVES. ANY ALTERNATIVE OFFERED IN LIEU OF THAT PRESCRIBED OR ALLOWED IN THIS CODE SHALL BE REASONABLY EQUIVALENT IN QUALITY, STRENGTH, EFFECTIVENESS, DURABILITY AND SAFETY TO THAT OF THIS CODE.

3. EXISTING OR ORIGINAL ROOFING MATERIALS MAY BE REPAIRED OR RECONSTRUCTED SUBJECT TO THE FOLLOWING REQUIREMENTS:
   a. THE ORIGINAL OR HISTORIC ROOFING SYSTEM SHALL BE DETAILED OR MODIFIED AS NECESSARY IN ORDER TO BE CAPABLE OF PROVIDING SHELTER TO THE BUILDING OCCUPANTS AND EXCLUDE DAMPNESS, WHILE PRESERVING THE HISTORIC MATERIALS AND APPEARANCE OF THE ROOF.
   b. WOODEN ROOF MATERIALS MAY BE UTILIZED WHERE FIRE RESISTANCE IS REQUIRED PROVIDED THEY ARE TREATED WITH FIRE-RETARDANT TREATMENTS TO ACHIEVE AN EQUIVALENCE TO A CLASS C FIRE-RESISTIVE RATING, OR AS OTHERWISE PERMITTED ON A CASE-BY CASE BASIS.

4. THE REGULAR CODE FOR ACCESS FOR PERSONS WITH DISABILITIES SHALL BE APPLIED TO QUALIFIED HISTORICAL BUILDINGS OR PROPERTIES UNLESS STRICT COMPLIANCE WITH THE REGULAR CODE WILL THREATEN OR DESTROY THE HISTORICAL SIGNIFICANCE OR CHARACTER-DEFINING FEATURES OF THE BUILDING OR PROPERTY.

5. IF THE HISTORICAL SIGNIFICANCE OR CHARACTER-DEFINING FEATURES ARE THREATENED, ALTERNATIVE PROVISIONS FOR ACCESS MAY BE APPLIED PURSUANT TO THIS CHAPTER PROVIDED THE FOLLOWING CONDITIONS ARE MET:
   a. SUCH ALTERNATIVE PROVISIONS SHALL BE APPLIED ONLY ON AN ITEM-BY-ITEM OR A CASE-BY-CASE BASIS (SEE, SECTION 8-603)
   b. THE ALTERNATIVE PROVISION ARE APPLIED ACCORDING TO THE PRIORITIES OUTLINED IN SCITON 8-603 WHEREBY THE ALTERNATIVE PROVIDING THE GREATEST ACCESSIBILITY IS LISTED FIRST.
   c. DOCUMENTATION IS PROVIDED STATING THE REASONS FOR THE APPLICATION OF THE ALTEERNATIVE PROVISIONS, SUCH DOCUMENTATION SHALL BE MAINTAINED AS A PART OF THE PUBLIC RECORD.

6. ENTRY. THESE ALTERNATIVES DO NOT ALLOW EXCEPTIONS FOR THE REQUIREMENT OF LEVEL LANDINGS IN FRONT OF DOORS, EXCEPT AS PROVIDED IN SECTION 8-603.3. ALTERNATIVES LISTED IN ORDER OF PRIORITY ARE:
   a. ACCESS TO ANY ENTRANCE USED BY THE GENERAL PUBLIC AND NO FURTHER THAN 200 FEET(60,960mm) FROM THE PRIMARY ENTRANCE.
   b. ACCESS AT ANY ENTRANCE NOT USED BY THE GENERAL PUBLIC BUT OPEN AND UNLOCKED WITH DIRECTIONAL SIGNS AT THE PRIMARY ENTRANCE AND AS CLOSE AS POSSIBLE TO, BUT NO FURTHER THAN200 FEET (60,960mm)FROM, THE PRIMARY ENTRANCE.

7. DOORS. ALTERNATIVES LISTED IN ORDER OF PRIORITY ARE:
   a. SINGLE-LEAF DOOR WHICH PROVIDES A MINIMUM 30 INCHES (762mm) OF CLEAR OPENING.
   b. SINGLE-LEAF DOOR WHICH PROVIDES A MINIMUM 29½ INCHES (749mm) CLEAR OPENING.
   c. DOUBLE DOOR, ONE LEAF OF WHICH PROVIDES A MINIMUM 29½ INCHES (749mm) CLEAR OPENING.
   d. DOUBLE DOOR OPERABLE WITH A POWER-ASSIST DEVICE TO PROVIDE A MINIMUM 29½ INCHES (749mm) CLEAR OPENING WHEN BOTH DOORS ARE IN THE OPEN POSITION.

8. POWER-ASSISTED DOORS. A POWER-ASSISTED DOOR OR DOORS MAY BE CONSIDERED AN EQUIVALENT ALTERNATIVE TO LEVEL LANDINGS, STRIKESIDE CLEARANCE AND DOOR-OPENING FORCES REQUIRED BY THE REGULAR CODE.

9. TOILET ROOM. IN LEIU OF SEPARATE-GENDER TOILET FACILITIES AS REQUIRED IN THE REGULAR CODE, AN ACCESSIBLE UNISEX TOILET FACILITY MAY BE DESIGNATED.

10. EXTERIOR AND INTERIOR RAMPS AND LIFTS. ALTERNATIVES LISTED IN ORDER OR PRIORITY ARE:
    a. A LIFT OR A RAMP OF GREATER THAN STANDARD SLOPE BUT NO GREATER THAN 1:10, FOR HORIZONTAL DISTANCES NOT TO EXCEED 12 FEET (3,658mm). SIGNS SHALL BE POSTED AT UPPER AND LOWER LEVELS TO INDICATE STEEPNESS OF THE SLOPE.
    b. ACCESS BY RAMPS OF 1:6 SLOPE FOR HORIZONTAL DISTANCE NOT TO EXCEED 13 INCHES (330mm). SIGNS SHALL BE POSTED AT UPPER AND LOWER LEVELS TO INDICATE STEEPNESS OF THE SLOPE.
    c. ACCESS PROVIDED BY EXPERIENCES, SERVICES, FUNCTIONS, MATERIALS AND RESOURCES THROUGH METHODS, INCLUDING, BUT NOT LIMITED TO, MAPS, PLANS, VIDEOS, VIRTUAL REALITY, AND RELATED EQUIPMENT, AT ACCESSIBLE LEVELS. THIS ALTERNATIVE SHALL BE DOCUMENTED AS REQUIRED IN SECTION 8-605

11. EQUIVALENT FACILITATION. USE OF OTHER DESIGNS AND TECHNOLIGIES, OR DEVIATION FROM PARTICULAR TECHNICAL AND SCOPING REQUIREMENTS, ARE PERMITTED IF THE APPLICATION OF THE ALTERNATIVE PROVISIONS CONTAINED IN SECTION 8-603 WOULD THREATEN OR DESTROY THE HISTORICAL SIGNIFICANCE OR CHARACTER-DEFINING FEATURES OF THE BUILDING OR SITE OR CAUSE UNREASONABLE HARDSHIP. ALTERNATIVES TO SECTION 8-604 ARE PERMITTED ONLY WHERE THE FOLLOWING CONDITIONS ARE MET:
    a. SUCH ALTERNATIVES SHALL BE APPLIED ONLY ON AN ITEM-BY-ITEM OR A CASE-BY-CASE BASIS.
    b. THE ALTERNATIVE DESIGN AND/OR TECHNOLOGIES USED WILL PROVIDE SUBSTANTIALLY EQUIVALENT OR GREATER ACCESSIBILITY TO, AND USABILITY OF, THE FACILITY.
    c. THE OFFICAL CHARGED WITH THE ENFORCEMENT OF THE STANDARDS SHALL DOCUMENT THE REASONS FOR THE APPLICATION OF THE ALTERNATIVE DESIGN AND/OR TECHNOLOGIES AND THEIR EFFECT ON THE HISTORICAL SIGNIFICANCE OR CHARACTER-DEFINING FEATURES. SUCH DOCUMENTATION SHALL BE IN ACCORDANCE WITH SECTION 8-602.2, ITEM 3, AND SHALL INCLUDE THE OPINIONS AND COMMENTS OF STATE OR LOCAL ACCESSIBILITY OFFICIALS AND THE OPINIONS AND COMMENTS OF REPRESENTATIVE LOCAL GROUPS OF PEOPLE WITH DISABILITIES. SUCH DOCUMENTATION SHALL BE RECORDED AND ENTERED INTO THE PERMANENT FILE OF THE ENFORCING AGENCY.

HISTORICAL BLDG. CODE NOTES (CONTINUED)

12. EXCEPTIONS. IF THE HISTORICAL SIGNIFICANCE OR CHARACTER-DEFINING FEATURES WOULD BE THREATENED OR DESTROYED BY THE APPLICATION OF ALTERNATIVE ACCESS STANDARDS AS PROVIDED BY THIS CHAPTER, AND NO EQUIVALENT FACILITATION AS PROVIDED IN SECTION 8-604 IS FEASIBLE, AND EXCEPTION FROM THE LITERAL REQUIREMENTS FOR FULL AND EQUAL ACCESS OR ANY ALTERNATIVE PROVISIONS MAY BE PROVIDED ONLY IF THE FOLLOWING CONDITIONS ARE MET:
    a. SUCH EXCEPTION IS CONSIDERED ONLY ON AN ITEM-BY-ITEM OR A CASE-BY-CASE BASIS.
    b. INTERPRETIVE EXHIBITS AND/OR EQUAL SERVICES OF THE EXEMPTED SIGNIFICANT HISTORICAL ASPECTS ARE PROVIDED FOR THE PUBLIC IN A LOCATION FULLY ACCESSIBLE TO AND USABLE BY PERSONS WITH DISABILITIES, INCLUDING PERSONS WITH HEARING AND SIGHT IMPAIRMENT.
    c. SERVICES ARE PROVIDED IN AN ACCESSIBLE LOCATION EQUAL TO THOSE PROVIDED IN THE EXCEPTED LOCATION.
    d. THE OFFICAL CHARGED WITH ENFORCEMENT OF THE STANDARDS SHALL DOCUMENT THE REASONS FOR THE APPLICATION OF THE ALTERNATIVE DESIGN AND/OR TECHNOLOGIES AND THEIR EFFECT ON THE HISTORICAL SIGNIFICANCE OR CHARACTER-DEFINING FEATURES. SUCH DOCUMENTATION SHALL BE IN ACCORDANCE WITH SECTION 8-602.2, ITEM 3, AND SHALL INCLUDE THE OPINIONS AND COMMENTS OF STATE OR LOCAL ACCESSIBILITY OFFICALS, AND THE OPINIONS AND COMMENTS OF REPRESENTATIVE LOCAL GROUPS OF PEOPLE WITH DISABILITIES. SUCH DOCUMENTATION SHALL BE RECORDED AND ENTERED INTO THE PERMANENT FILE OF THE ENFORCING AGENCY.

13. WHERE NONSTRUCTURAL HISTORIC MATERIALS EXIST IN USES WHICH DO NOT MEET THE REQUIREMENTS OF THE REGULAR CODE, THEIR CONTINUED USE IS ALLOWED BY THIS CODE, PROVIDED THAT ANY PUBLIC HEALTH AND LIFE-SAFETY HAZARDS ARE MITIGATED SUBJECT TO THE CONCURRENCE OF THE ENFORCING AGENCY.

14. EXISTING SOLID MASONRY WALLS OF ANY TYPE, EXCEPT ADOBE, MAY BE ALLOWED, WITHOUT TESTING, A MAXIMUM VALUE OF 3 POUNDS PER SQUARE INCH (20.7kPa) IN SHEAR WHERE THERE IS A QUALIFYING STATEMENT BY THE ARCHITECT OR ENGINEER THAT AN INSPECTION HAS BEEN MADE, THAT MORTAR JOINTS ARE FILLED AND THAT BOTH BRICK AND MORTAR ARE REASONABLY GOOD. THE ALLOWABLE SHEAR STRESS ABOVE APPLIES TO UNREINFORCED MASONRY, EXCEPT ADOBE, WHERE THE MAXIMUM RATIO OF UNSUPPORTED HEIGH OR LENGTH TO THICKNESS DOES NOT EXCEED 12, AND WHERE MINIMUM QUALITY MORTAR IS USED OR EXISTS. WALL HEIGHT OR LENGTH IS MEASURED TO SUPPORTING OR RESISTING ELEMENTS THAT ARE AT LEAST TWICE AS STIFF AS THE TRIBUTARY WALL. STIFFNESS IS BASED ON THE GROSS SECTION. ALLOWABLE SHEAR STRESS MAY BE INCREASED BY THE ADDITION OF 10 PRECENT OF THE AXIAL DIRECT STRESS DUE TO THE WEIGHT OF THE WALL DIRECTLY ABOVE. HIGHER QUALITY MORTAR MAY PROVIDE A GREATER SHEAR VALUE AND SHALL BE TESTED IN ACCORDANCE WITH UBC STANDARD 21-6 AS REFERENCED IN THE 1997 UBC.

15. RECONSTRUCTED WALLS. TOTALLY RECONSTRUCTED WALLS UTILIZING ORIGINAL BRICK OR MASONRY, CONSTRUCTED SIMILAR TO ORIGINAL, SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE REGULAR CODE. REPAIRS OR INFILLS MAY BE CONSTRUCTED IN A SIMILAR MANNER TO THE ORIGINAL WALLS WITHOUT CONFORMING TO THE REGULAR CODE.

HAZARDOUS MATERIALS

1. ASBESTOS CONTAINING MATERIALS ARE PRESENT IN THIS BUILDING AND WILL BE ENCOUNTERED DURING THE EARTHQUAKE REPAIRS. REFER TO THE HAZARDOUS MATERIALS SURVEY REPORT FOR THE IDENTIFICATION OF THE LOCATIONS OF ASBESTOS CONTAINING MATERIALS. ALSO REFER TO THE CONSTRUCTION DRAWINGS AND SPECIFICATION SECTION 02082 - "ASBESTOS REMOVAL" FOR FURTHER INFORMATION AND PROCEDURAL REQUIREMENTS.

2. LEAD-BASED MATERIALS ARE PRESENT IN THIS BUILDING AND WILL BE ENCOUNTERED DURING THE EARTHQUAKE REPAIRS. REFER TO THE HAZARDOUS MATERIALS SURVEY REPORT FOR THE IDENTIFICATION OF THE LOCATIONS OF LEAD-BASED MATERIALS. ALSO REFER TO THE CONSTRUCTION DRAWINGS AND SPECIFICATION SECTION 02083 - "LEAD-BASED PAINT REMOVAL" FOR FURTHER INFORMATION AND PROCEDURAL REQUIREMENTS.

STORM WATER PROVISIONS

1. ERODED SEDIMENTS AND OTHER POLLUTANTS MUST BE RETAINED ON SITE AND MAY NOT BE TRANSPORTED FROM THE SITE VIA SHEETFLOW, SWALES, AREA DRAINS, NATURAL DRAINAGE COURSES OR WIND.

2. STOCKPILES OF EARTH AND OTHER CONSTRUCTION RELATED MATERIALS MUST BE PROTECTED FROM BEING TRANSPORTED FROM THE SITE BY THE FORCES OF WIND OR WATER.

3. FUELS, OILS, SOLVENTS AND OTHER TOXIC MATERIALS MUST BE STORED IN ACCORDANCE WITH THEIR LISTING AND ARE NOT TO CONTAMINATE THE SOIL AND SURFACE WATERS. ALL APPROVED STORAGE CONTAINERS ARE TO BE PROTECTED FROM THE WEATHER. SPILLS MUST BE CLEANED UP IMMEDIATELY AND DISPOSED OF IN A PROPER MANNER. SPILLS MAY NOT BE WASHED INTO THE DRAINAGE SYSTEM.

4. NON-STORM WATER RUNOFF FROM EQUIPMENT AND VEHICLE WASHING AND ANY OTHER ACTIVITY SHALL BE CONTAINED AT THE PROJECT SITE.

5. EXCESS OR WASTE CONCRETE MAY NOT BE WASHED INTO THE PUBLIC WAY OR ANY OTHER DRAINAGE SYSTEM. PROVISIONS SHALL BE MADE TO RETAIN CONCRETE WASTES ON SITE UNTIL THEY CAN BE DISPOSED OF AS SOLID WASTE.

6. TRASH AND CONSTRUCTION RELATED SOLID WASTES MUST BE DEPOSITED INTO A COVERED RECEPTACLE TO PREVENT CONTAMINATION OF RAINWATER AND DISPERSAL BY WIND.

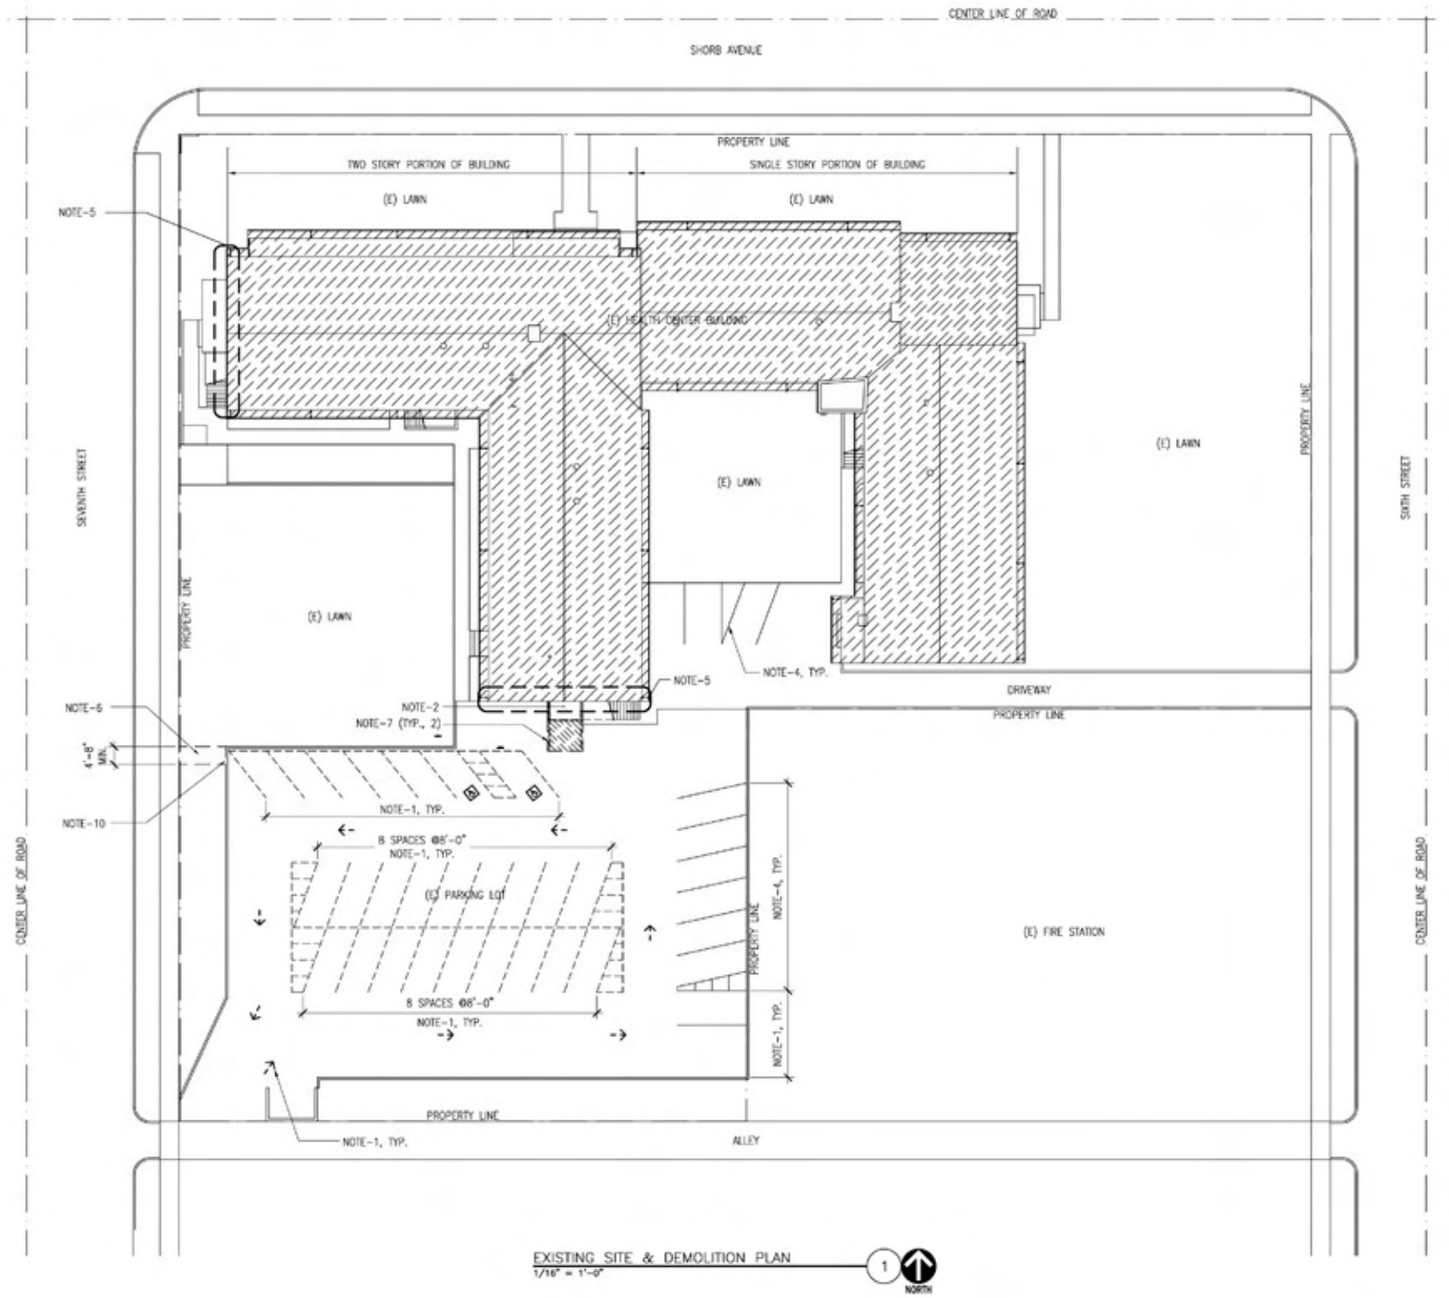
7. SEDIMENTS AND OTHER MATERIALS MAY NOT BE TRACKED FROM THE SITE BY VEHICLE TRAFFIC. THE CONSTRUCTION ENTRANCE ROADWAYS MUST BE STABILIZED SO AS TO INHIBIT SEDIMENTS FROM BEING DEPOSITED INTO THE PUBLIC WAY. ACCIDENTAL DEPOSITIONS MUST BE SWEPT UP IMMEDIATELY AND MAY NOT BE WASHED DOWN BY RAIN OR OTHER MEANS.

8. ANY SLOPES WITH DISTURBED SOILS OR DENUDED OF VEGETATION MUST BE STABILIZED SO AS TO INHIBIT EROSION BY WIND AND WATER.

HISTORIC RESOURCE EVALUATION

SUMMARY REVIEW: THE FOLLOWING TABLE LISTS FEATURES THAT ARE "IMPACTED" BY WORK THAT IS SHOWN ON THE CONSTRUCTION DRAWINGS, CLASSIFIES THOSE FEATURES AS CHARACTER-DEFINING OR NOT, AND EVALUATES WHETHER THERE IS A NEGATIVE IMPACT ON EACH FEATURE. IF AN IMPACTED FEATURE IS NOT CHARACTER-DEFINING, THEN THERE IS BY DEFINITION NO IMPACT WITH RESPECT TO HISTORIC FABRIC AND VISUAL CHARACTER. THE INDIVIDUAL IMPACTS ON HISTORIC FABRIC AND VISUAL CHARACTER ARE NOT SUBSTANTIAL, AND THE ACCUMULATION OF IMPACTS ON THE BUILDING AND SITE ARE NOT SUBSTANTIAL. THE BUILDING BENEFITS SUBSTANTIALLY BY THE APPROPRIATE ADDITION OF STRUCTURAL FEATURES THAT RESIST SEISMIC FORCES, THEREBY DECREASING THE RISK OF DAMAGE TO THE HISTORIC RESOURCE IN THE EVENT OF AN EARTHQUAKE. THEREFORE, THE PROPOSED WORK CONFORMS TO THE SECRETARY OF THE INTERIOR'S STANDARDS FOR REHABILITATION IN THE OPINION OF THE PROJECT CONSULTANTS.

Item No.	Work Item	Comments	Feature Impacted	Character-Defining	Evaluation
1	Remove existing parking striping in south parking lot	All areas where striping is removed will be slurry sealed to match adjacent asphalt	Parking lot/asphalt	No	No impact
2	Provide new parking striping in south parking lot and install detectable warning surface between parking lot and walkway	New striping will match existing colors. Accessible parking spaces and path of travel shall be blue. Detectable warning surface will be installed in asphalt surface	Parking lot/asphalt	No	No impact
3	Provide directional signage at various locations to accessible entrances	Required by state and federal accessibility laws	Public sidewalk/ parking areas	No	No impact
4	Remove small area of existing turf and concrete curb on west side and provide concrete infill to match adjacent sidewalk	Provides accessible path of travel	Lawn/concrete curb	No	No impact
5	Remove and re-install existing roof tiles to allow new construction	Tiles are being removed to allow seismic upgrades including installation of new plywood sheathing on the roof for seismic strengthening. The roof tiles to be removed are historically significant and care will be taken in their removal per notes on the drawings. If tiles are accidentally broken, they will be replaced in kind at the approval of the architect.	Roof tiles	Yes	Removing the roof tiles and re-installing them so they will remain in no substantial loss to historic fabric or visual character
6	Repair earthquake damage on south and west gable walls	Wall cracks are to be repaired by grout injection, wood shear panels, ceiling, grout is color & texture-matched to existing	South and west gable walls	Yes	These repairs will benefit the resource by strengthening the wall, and improve the visual character of the building
7	Repair stucco damage on south and west elevations	Crews were taken to determine the construction and strength of the original wall. Bricks adjacent to the cross beds will be removed to access and repair the cross. Bricks will be replaced in kind at the approval of the architect.	South and west elevations	Yes	These repairs will benefit the resource by restoring the visual character of the brick wall
8	Repair brick push-pull test damage on all elevations	Areas of previous repair at push-pull test locations will be re-pointed to match existing stucco	All elevations	Yes	These repairs will benefit the resource by restoring the visual character of the brick walls
9	Remove existing concrete entrance ramp and adjacent metal railing	Replace with new handrail and concrete ramp that meets state and federal accessibility laws	Concrete ramp	No	This is an appropriate and compatible, relatively small, and reversible addition at the rear of the building
10	Install surface mounted push plate and door operating system. Provide new automatic hardware for doors at building entrance	System will be mounted to historically significant wood post near of building entrance. Hardware will convert manual swing doors to power operation with electric strike and remote control operation, meeting both accessibility and security requirements	Existing wood post/ Entrance doors	Yes	Instrumental impact to visual character. The addition of automated door hardware will enable the operation of the historically significant doors while providing an accessible entrance.
11	Remove and re-install existing pair of doors at building entrance.	Doors are being removed to abate lead based paint. The doors are historically significant and will be reinstalled. Abatement will use methods described in specifications for historic elements.	Entrance doors	Yes



EXISTING SITE & DEMOLITION PLAN

KEYNOTES

NOTE-1 REMOVE (E) PARKING STRIPING AND DIRECTIONAL ARROWS.

NOTE-2 (E) BRICK LANDING TO REMAIN. BRICK IS OF HISTORICAL SIGNIFICANCE.

NOTE-3 DO NOT DISTURB (E) WOOD POSTS (ON (E) BRICK LANDING) SUPPORTING LANDING ABOVE.

NOTE-4 (E) STRIPING TO REMAIN.

NOTE-5 SEE STRUCTURAL DRAWINGS FOR EARTHQUAKE DAMAGE REPAIR. (1,2 / S3-2)

NOTE-6 REMOVE (E) TURF AS REQUIRED TO PROVIDE ACCESSIBLE PATH OF TRAVEL.

NOTE-7 (E) METAL RAILING BETWEEN (E) BRICK WALL AND (E) WOOD POSTS TO REMAIN. REMOVE (E) METAL RAILING ATTACHED TO (E) CONCRETE RAMP.

NOTE-8 NOT USED.

NOTE-9 NOT USED.

NOTE-10 SAW-CUT AND REMOVE (E) PORTION OF CURB AS REQUIRED TO ALLOW FOR ACCESSIBLE PATH OF TRAVEL.

LEGEND

(E) ROOF TILE IS OF HISTORIC SIGNIFICANCE AND SHALL BE REMOVED W/OUT BREAKAGE. IN THE EVENT BREAKAGE OCCURS, CONTRACTOR SHALL REPLICATE EACH BROKEN TILE IN SHAPE, SIZE, COMPOSITION AND FINISH. ARCHITECT SHALL REVIEW SAMPLES FOR EXACT MATCH. REINSTALL. SEE (1 / A1.2) AND STRUCTURAL DRAWINGS FOR FURTHER INFORMATION.

REFER TO SPECIFICATION SECTION 01351 "SPECIAL PROCEDURES FOR HISTORIC TREATMENT".

PROPERTY LINE

CENTER LINE OF ROAD

REMOVE (E) CONCRETE RAMP.

GENERAL NOTES

1. REFER TO STRUCTURAL DRAWINGS FOR ADDITIONAL INFORMATION.
2. THE SCOPE OF THE PROJECT INCLUDES THE COMPLETE REMOVAL AND REPLACEMENT OF THE EXISTING ROOF TILE AND ASBESTOS CONTAINING COMPOSITION ROOFING MATERIAL, AND A PORTION OF THE EXISTING ROOF SHEATHING. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MAKING THE BUILDING WATERTIGHT AT ALL TIME. ANY DAMAGE TO ANY PORTION OF THE BUILDING CAUSED BY THE CONTRACTOR'S FAILURE TO MAKE THE BUILDING WATERTIGHT, SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO REPAIR OR REPLACE. THIS INCLUDES BUT IS NOT LIMITED TO: WALLS, FLOORING, CEILING, STRUCTURAL MEMBERS AND CONNECTIONS, WINDOWS, DOORS, ELECTRICAL AND MECHANICAL SYSTEMS, LIGHTING FIXTURES, CASEWORK AND BUILDING FINISHES, EQUIPMENT, ANY MOLD REMOVAL AND DAMAGE TO ANY ITEMS IN THE BUILDING.

NOTE-1 NOT USED

NOTE-2 NOT USED.

NOTE-3 (E) CHIMNEY TO REMAIN (15/A8.1)

NOTE-4 (E) ROOFING VENT TO REMAIN (17/A8.1)

NOTE-5 NOT USED.

NOTE-6 (E) DOWNSPOUT TO REMAIN

NOTE-7 (E) COPPER ROOF TO REMAIN. PROTECT IN PLACE.

LEGEND

SLOPE

(E) ROOFING VENT

REMOVE (E) HISTORIC TILE WITHOUT BREAKAGE. IN THE EVENT BREAKAGE OCCURS, CONTRACTOR SHALL REPLICATE EACH BROKEN TILE IN SHAPE, SIZE, COMPOSITION AND FINISH. ARCHITECT SHALL REVIEW SAMPLES FOR EXACT MATCH. REINSTALL AFTER STRUCTURAL WORK OVER NEW 1/2" SHEATHING TO BE ATTACHED TO (E) SHEATHING. SEE STRUCTURAL DRAWINGS FOR FURTHER INFORMATION.

ABATE ASBESTOS CONTAINING COMPOSITION ROOFING MATERIAL WITH GRANULAR CAP SHEET. REFER TO SPECIFICATION SECTION 01351-SPECIAL PROCEDURES FOR HISTORIC TREATMENT AND SECTIONS 02081-INDEPENDENT AIR MONITORING & TESTING AND 02082-ASBESTOS REMOVAL FOR ASBESTOS ABATEMENT.

REMOVE, RETAIN, AND REINSTALL OR REPLACE IN KIND PORTION OF (E) SHEATHING.

GENERAL NOTES

1. ALL FLASHINGS TO BE 24 GA. GALV. STEEL UNLESS NOTED OTHERWISE.
2. IF COMPONENTS OF (E) GUTTERS, DOWNSPOUTS AND ASSOCIATED ITEMS ARE RUSTED THROUGH, THEN THEY MAY BE SELECTIVELY REPLACED. ALL SOUND COMPONENTS SHALL BE RETAINED, CLEANED, PREPPED AND PAINTED.
3. THE SCOPE OF THE PROJECT INCLUDES THE COMPLETE REMOVAL AND REPLACEMENT OF THE EXISTING ROOF TILE AND ASBESTOS CONTAINING COMPOSITION ROOFING MATERIAL AND A PORTION OF THE (E) ROOF SHEATHING. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MAKING THE BUILDING WATERTIGHT AT ALL TIME. ANY DAMAGE TO ANY PORTION OF THE BUILDING CAUSED BY THE CONTRACTOR'S FAILURE TO MAKE THE BUILDING WATERTIGHT, SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO REPAIR OR REPLACE. THIS INCLUDES BUT IS NOT LIMITED TO: WALLS, FLOORING, CEILING, STRUCTURAL MEMBERS AND CONNECTIONS, WINDOWS, DOORS, ELECTRICAL AND MECHANICAL SYSTEMS, LIGHTING FIXTURES, CASEWORK AND BUILDING FINISHES, EQUIPMENT, ANY MOLD REMOVAL AND DAMAGE TO ANY ITEMS IN THE BUILDING.
4. (E) FLASHING CAN BE REUSED, IF IN GOOD CONDITION, TO PROVIDE A FULLY WATER TIGHT ROOF SYSTEM. CONTRACTOR SHALL VERIFY CONDITION OF (E) FLASHING WITH PROJECT MANAGER AND ARCHITECT.

SEISMIC RETROFIT OF UNREINFORCED MASONRY

1. BUILDING SHALL NOT BE OCCUPIED DURING THE RETROFIT WORK.
2. ALL CONSTRUCTION IS EXISTING (DENOTED "E" ON DRAWINGS) UNLESS NOTED AS NEW (DENOTED "N" ON DRAWINGS).
3. IN-PLACE SHEAR TESTS ON BRICK MASONRY WERE PERFORMED TO DETERMINE THE ALLOWABLE SHEAR STRESSES. THE IN-PLANE SHEAR TESTS WERE PERFORMED BY SMITH-EMERY COMPANY. THE TEST RESULTS ARE SHOWN ON S1-2 & S1-3.
4. SHEAR BOLTS, TENSION BOLTS, AND COMBINATION BOLTS TO BE EMBEDDED IN EXISTING URM WALLS SHALL CONFORM TO THE FOLLOWING:
   (A) DRILLING SHALL BE DONE WITH AN ELECTRICAL ROTARY DRILL.
   (B) DRILLED HOLES SHALL BE CLEANED WITH A NYLON BRUSH AND COMPRESSED AIR.
   (C) HIT HY-20 ADHESIVE IS INJECTED INTO A GALVANIZED SCREEN TUBE WHICH IS THEN DEPOSITED INTO THE PREDRILLED HOLE.
5. TEST REQUIREMENTS:
   (A) TENSION BOLTS –
      1) FIVE PERCENT OF ANCHORS MUST BE TESTED, WITH A MINIMUM OF TWO TEST REQUIRED. TEST MUST SHOW BOLTS CAN MAINTAIN A TENSILE LOAD OF 3,000 POUNDS FOR 5 MINUTES.
      2) TWENTY PERCENT OF INSTALLED ANCHORS MUST BE TESTED BY A SPECIAL INSPECTOR USING A TORQUE-CALIBRATED WRENCH TO A MINIMUM TORQUE OF 60 FOOT-POUNDS.
   (B) SHEAR BOLTS –
      TWENTY FIVE PERCENT OF ANCHORS MUST BE TESTED BY A SPECIAL INSPECTOR USING A TORQUE-CALIBRATED WRENCH TO A MINIMUM TORQUE OF 60 FOOT-POUNDS.
6. IMPACT TYPE TOOLS SHALL NOT BY USED ON ANY EXISTING MASONRY WALLS INCLUDING REMOVAL OF BRICK.
7. ANY DAMAGED OR CRACKED UNREINFORCED MASONRY WALLS OR CONCEALED STRUCTURAL DAMAGE DISCOVERED DURING CONSTRUCTION SHALL BE BROUGHT TO THE ENGINEERS ATTENTION.
8. ALL MASONRY WALLS HAVING DETERIORATED MORTAR JOINTS SHALL BE PROPERLY POINTED SUCH WORK SHALL BY DONE UNDER CONTINUOUS INSPECTION OF A REGISTERED DEPUTY INSPECTOR WHO MUST FILE A WRITTEN REPORT FOR APPROVAL WITH THE DEPARTMENT.
9. REPOINTING IS REQUIRED ON ALL JOINTS AS INDICATED ON THE DRAWINGS. REPOINTING WORK SHALL BE MADE UNDER THE CONTINUOUS INSPECTION BY A DEPUTY INSPECTOR. THE FOLLOWING GUIDELINES ARE TO BE FOLLOWED WHILE PERFORMING THE WORK.

(A) MORTARS FOR REPOINTING SHOULD BE SOFTER IN COMPRESSIVE STRENGTH THAN THE MASONRY UNITS AND NO HARDER THAN THE HISTORIC MORTAR. THIS IS NECESSARY TO PREVENT DAMAGE TO THE MASONRY UNITS. STRESSES WITHIN A WALL CAUSED BY EXPANSION, CONTRACTION, AND OTHER CAUSES MUST BE RELIEVED BY THE SOFTER MORTAR GIVE RATHER THAN MASONRY UNITS.

(B) JOINT PREPARATION: OLD MORTAR SHALL BE REMOVED BY HAND TO 1¼" DEPTH OR TO THE END OF ANY LOOSE OR DISINTEGRATED MORTAR. ON WALLS WITH LARGE STEPPING JOINT CRACKS CAUSED BY EARTHQUAKE DAMAGE, A CARBIDE POWER SAW (GRINDER) MAY BE USED ONLY IF DEMONSTRATED ADEQUATELY TO THE ENGINEER AND THE INSPECTOR THAT NO FINAL PREPARATION OF THE JOINT SHALL BE FINISHED BY HAND. BEFORE PLACING MORTAR, JOINTS SHALL BE RINSED WITH A WATER JET TO REMOVE ALL LOOSE PARTICLES AND DUST. AT THE TIME OF FILLING, THE JOINTS SHALL BE DAMP BUT WITH NO STANDING WATER PRESENT..

(C) MORTAR PREPARATION: MORTAR SHALL BE CAREFULLY DRY MIXED BY VOLUME BEFORE THE ADDITION OF WATER. HALF THE WATER SHOULD BE ADDED, FOLLOWED BY MIXING FOR APPROXIMATELY 5 MINUTES. THEN THE REMAINING WATER ADDED IN INCREMENTS UNTIL THE DESIRED CONSISTENCY IS REACHED. MORTAR SHALL BE USED WITH 40 MINUTES OF FINAL MIXING, AND NOT BE RETEMPERED.

(D) FILLING THE JOINTS THE DEEPER JOINTS SHALL BY FILLED FIRST, COMPACTING THE NEW MORTAR IN SEVERAL ½" LAYERS. IT IS IMPORTANT TO ALLOW EACH LAYER IS APPLIED AS THIS WILL MINIMIZE SHRINKAGE. THE JOINT SHALL BE TOOLED TO MARCH THE EXISTING AFTER THE FINAL LAYER REMOVE EXCESS MORTAR TO CLEAN WITH A BRISTLE BRUSH AFTER MORTAR IS DRIED BUT PRIOR TO HARDENING (1 TO 2 HOURS).

(E) CLEANING: CAREFUL JOINT FILLING WILL MINIMIZE THE NEED FOR CLEANING. THE MORTAR SHALL BE FULLY HARDENED BEFORE CLEANING (30 DAYS IS USUALLY SUFFICIENT). CLEAN MORTAR ONLY USING WATER AND A STIFF NATURAL BRISTLE BRUSH. ANY CLEANING OTHER THAN WATER SHALL HAVE PRIOR APPROVAL FROM THE ENGINEER.

STRUCTURAL STEEL

1. STRUCTURAL STEEL SHALL BE DETAILED, FABRICATED AND ERECTED BY AN APPROVED AND LICENSED FABRICATOR IN ACCORDANCE WITH THE AISC SPECIFICATION FOR THE DESIGN, FABRICATION AND ERECTION OF STRUCTURAL STEEL FOR BUILDINGS (LATEST EDITION), AND WITH CHAPTER 22 OF THE CODE.
2. ALL STRUCTURAL STEEL SHALL CONFORM TO THE ASTM DESIGNATION AS INDICATED BELOW (UNO):

CONNECTION PLATES, ANGLES, CHANNELS, AND MISC.	A-36
BOLTS	A-325 U.N.O.
THREADED RODS IN MASONRY	A-36

3. BOLT HOLES USED IN STEEL SHALL BE 1/16" LARGER IN DIAMETER THAN NOMINAL SIZE OF BOLT USED, EXCEPT AS NOTED.
4. ALL STRUCTURAL STEEL SURFACES THAT ARE ENCASED IN CONCRETE, SPRAY ON FIREPROOFING, OR ARE ENCASED BY BUILDING FINISH, SHALL BE LEFT UNPAINTED.
5. ALL WELDING IS TO BE DONE BY CERTIFIED WELDERS USING E70XX ELECTRODES (UNO). ALL WELDS SHALL BE IN CONFORMITY WITH THE PROJECT SPECIFICATIONS AND THE CODE FOR WELDING IN BUILDING CONSTRUCTION (AWS D1.1 LATEST REVISION) OF THE AMERICAN WELDING SOCIETY. SEE SPECIAL INSPECTIONS SECTION FOR WELDING INSPECTION REQUIREMENTS.
6. WELD LENGTHS CALLED FOR ON PLANS ARE THE NET EFFECTIVE LENGTH REQUIRED. WHERE FILLET WELD SYMBOL IS GIVEN WITHOUT INDICATION OF SIZE, USE MINIMUM SIZE WELDS AS SPECIFIED IN AISC MANUAL OF STEEL CONSTRUCTION 9TH EDITION, SECTION 1.17.2.
7. ALL EXPOSED STRUCTURAL STEEL AND MISCELLANEOUS METAL SHALL BE HOT DIP GALVANIZED AFTER FABRICATION.

HOLDOWNS

1. ALL HOLDOWNS SHALL BE SIMPSON TYPE. ANY SUBSTITUTION SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW.
2. STUD BOLTS ATTACHING HOLDOWNS TO WOOD MEMBERS SHALL BE NO CLOSER THAN 7x BOLT DIAMETER FROM END OF MEMBER.
3. PROVIDE ALL WASHERS REQUIRED BY MANUFACTURER TO ATTAIN FULL DESIGN VALUES.

SPECIAL INSPECTIONS

THE FOLLOWING ELEMENTS OF CONSTRUCTION SHALL BE INSPECTED BY A REGISTERED SPECIAL INSPECTOR PRIOR TO COVERING OF WORK:

1. ADHESIVE ANCHORS IN EXISTING MASONRY.
2. REINFORCING STEEL WELDING.
3. HOLDOWNS

TESTING

ALL MATERIALS INSTALLED WILL BE SUBJECT TO TESTING. SUCH TESTS WILL BE PERFORMED AT THE OWNERS EXPENSE. THE CONTRACTOR SHALL FACILITATE FOR THE EXECUTION OF SUCH TESTS IF DEEMED REQUIRED. ANY DIFFICIENCES FOUND SHALL BE REPAIRED OR REPLACED AT NO COST TO THE OWNER. THESE TESTS MAY INCLUDE BUT NOT LIMITED TO PULL-OUT TESTS FOR ANCHOR BOLTS.

STRUCTURAL OBSERVATION

1. A PRE-CONSTRUCTION MEETING INCLUDING THE STRUCTURAL ENGINEER, THE CONTRACTOR, AND AN APPROPRIATE SUBCONTRACTOR SHALL BE HELD TO REVIEW THE DETAILS OF THE STRUCTURAL SYSTEM TO BE STRUCTURALLY OBSERVED.
2. DURING THE COURSE OF CONSTRUCTION, THE STRUCTURAL ENGINEER SHALL VISUALLY REVIEW THE STRUCTURAL SYSTEM FOR GENERAL CONFORMANCE WITH THE APPROVED PLANS. ANY OBSERVED DEFICIENCES SHALL BE REPORTED IN WRITING TO THE OWNER'S REPRESENTATIVE AND TO THE CONTRACTOR.

GENERAL

1. ALL WORK SHALL CONFORM TO THE MINIMUM STANDARDS OF THE FOLLOWING CODES: COUNTY OF LOS ANGELES, 1999 BUILDING CODE, CHAPTER 96, AND ANY OTHER REGULATING AGENCIES WHICH HAVE AUTHORITY OVER ANY PORTION OF THE WORK, INCLUDING THE STATE OF CALIFORNIA DIVISION OF INDUSTRIAL SAFETY, AND THOSE CODES & STANDARDS LISTED IN THESE NOTES.
2. THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS & EXISTING CONDITIONS PRIOR TO STARTING CONSTRUCTION. THE ENGINEER SHALL BE NOTIFIED OF ANY DISCREPANCIES OR INCONSISTENCIES. ANY WORK PERFORMED IN CONFLICT WITH THE CONTRACT DOCUMENTS OR ANY CODE REQUIREMENTS SHALL BE CORRECTED BY THE CONTRACTOR AT THEIR OWN EXPENSE AND AT NO EXPENSE TO THE OWNER.
3. THE REMOVAL, CUTTING DRILLING ETC. OF EXISTING WORK SHALL BE PERFORMED WITH GREAT CARE AND SMALL TOOLS IN ORDER NOT TO JEOPARDIZE THE STRUCTURAL INTEGRITY OF THE BUILDING. IF EXISTING STRUCTURAL MEMBERS, NOT INDICATED FOR REMOVAL, INTERFER WITH THE NEW WORK, THE ENGINEER SHALL BE NOTIFIED IMMEDIATELY, AND APPROVAL OBTAINED, BEFORE REMOVAL OF THE EXISTING MEMBERS.
4. NOTES AND DETAILS ON DRAWINGS SHALL TAKE PRECEDENCE OVER GENERAL NOTES. WHERE NO DETAILS ARE GIVEN, CONSTRUCTION SHALL BE AS SHOWN FOR SIMILAR WORK.
5. THE CONTRACT STRUCTURAL DRAWINGS AND SPECIFICATIONS REPRESENT THE FINISHED STRUCTURE. THEY DO NOT INDICATE STRUCTURE, THE METHOD OF CONSTRUCTION. THE CONTRACTOR SHALL PROVIDE ALL MEASURES NECESSARY TO PROTECT THE STRUCTURE AND ITS OCCUPANTS DURING CONSTRUCTION. SUCH MEASURES SHALL INCLUDE BUT NOT BE LIMITED TO, SCAFFOLDING, BRACING, SHORING FOR LOADS DUE TO CONSTRUCTION EQUIPMENT, ETC. OBSERVATION/VISITS TO THE SITE BY THE STRUCTURAL ENGINEER SHALL NOT INCLUDE INSPECTION OF THE ABOVE ITEMS.
6. THE CONTRACTOR SHALL BE RESPONSIBLE FOR RESTORING ALL FINISHES, INCLUDING, BUT NOT LIMITED TO, CEILINGS, PARTITIONS, EFFECTED PAINTED SURFACES, ROOFING AND FIREPROOFING MATERIAL TO THEIR ORIGINAL CONDITIONS AFTER THE STRUCTURAL WORK IS COMPLETED.
7. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE TEMPORARY OR PERMANENT RELOCATION OF ALL BUILDING SYSTEMS OR ANY OF THEIR COMPONENTS INCLUDING ELECTRICAL, MECHANICAL, FIRE SPRINKLER, PLUMBING AND COMMUNICATION LINE'S WHERE REQUIRED TO ACCOMPLISH THE STRUCTURAL RETROFIT WORK. SUCH WORK SHALL BE CLOSELY COORDINATED WITH THE BUILDING OWNERS AND THEIR TENANTS.
8. CONSTRUCTION MATERIAL SHALL BE SPREAD OUT IF PLACED ON FRAMED ROOF OR FLOOR. LOAD SHALL NOT EXCEED 20 PSF ON FRAMED ROOF AND 50 PSF ON FRAMED FLOOR.

ADHESIVE ANCHORS

1. NEW THREADED RODS SHALL BE ATTACHED TO STRUCTURE BY: HILTI TYPE HIT HY-20 ADHESIVE PER ICBO REPORT NUMBER 4815 OR APPROVED EQUAL.
2. INSTALL ANCHORS PER MANUFACTURER SPECIFICATIONS.
3. WHEN INSTALLING ANCHORS TO MASONRY, USE CARE AND CAUTION TO AVOID CUTTING OR DAMAGING THE EXISTING REINFORCING BARS.

WOOD

1. ALL STRUCTURAL LUMBER SHALL BE DOUGLAS FIR, VISUALLY GRADED OR MACHINE GRADED UNDER THE 1970 LUMBER GRADING RULES OF WEST COAST LUMBER INSPECTION BUREAU. ALL LUMBER SHALL BEAR LEGIBLE IDENTIFICATION STAMP. ALL FRAMING MEMBERS SHALL BE AS FOLLOWS U.N.O.:

THICKNESS	GRADE
LARGER THAN 2" NOM.	GRADE NO. 1

2. LUMBER SHALL BE DRY AND WELL SEASONED, AND THE MOISTURE CONTENT SHALL NOT EXCEED 19%.
3. ALL LUMBER IN CONTACT WITH CONCRETE OR MASONRY SHALL BE PRESSURE TREATED PER SPECIFICATIONS.
4. ALL STRUCTURAL PLYWOOD SHEATHING SHALL BE DOUGLAS FIR STANDARD GRADE CDX WITH EXTERIOR GLUE CONFORMING TO THE LATEST EDITION OF PS 1. ALL PANELS SHALL BEAR LEGIBLE DFPA STAMPS. ORIENTED STRAND BOARS (OSB) MAYBE SUBSTITUTED FOR PLYWOOD SHEATHING, IF IT IS RATED BY APA'S PERFORMANCE STANDARD RATING AND IS OF THE SAME NUMBER OF LAYERS AS PLYWOOD PLY INDICATED ON PLANS.
5. ALL SHEATHING SHALL BE LAID FACE GRAIN PERPENDICULAR TO FRAMING AND SHALL BE APPROVED BY THE BUILDING INSPECTOR BEFORE COVERING.
6. ALL NAILINGS SHALL CONFORM TO THE APPLICABLE BUILDING CODE AND REGULATIONS.
7. ALL BOLT HEADS AND NUTS WHICH BEAR AGAINST THE FACE OF WOOD MEMBERS SHALL BE PROVIDED WITH METAL WASHERS.
8. ALL NAILS FOR CONNECTING WOOD MEMBERS SHALL BE COMMON WIRE WHICH CONFORM TO TABLE 23-I-G OF THE CODE AND SECTION 2340.1.2 OF THE CODE, MINIMUM NAILING REQUIREMENTS OUTLINED IN TABLE 23-I-Q SHALL BE FOLLOWED UNLESS OTHERWISE NOTED.
9. RETIGHTEN BOLTS BEFORE CLOSING-IN.
10. USE OF MACHINE NAILING IS SUBJECT TO A SATISFACTORY JOBSITE DEMONSTRATION FOR EACH PROJECT AND THE APPROVAL BY THE PROJECT ARCHITECT OR STRUCTURAL ENGINEER AND THE OFFICE OF THE STATE ARCHITECT, THE APPROVAL IS SUBJECT TO CONTINUED SATISFACTORY PERFORMANCE. MACHINE NAILING WILL NOT BE APPROVED IN 5/16" PLYWOOD. IF NAILHEADS PENETRATE THE OUTER PLY MORE THAN WOULD BE NORMAL FOR A HAND HAMMER OR IF MINIMUM ALLOWABLE EDGE DISTANCES ARE NOT MAINTAINED, THE PERFORMANCE WILL BE DEEMED UNSATISFACTORY.
11. ALL BOLTS CALLED OUT ON DRAWINGS, INCLUDING ANCHOR BOLTS (A.B.) SHALL HAVE STEEL SQUARE PLATE WASHERS AS LISTED BELOW UNDER THE HEAD AND/OR NUT BEARING ON WOOD.

BOLT DIAMETER	1/2"	5/8"	3/4"	7/8"	1"
WASHER - THICKNESS	3/16"	1/4"	5/16"	5/16"	3/8"
WASHER - WIDTH	2"	2 1/2"	2 3/4"	3"	3 1/2"

ALL ANCHOR BOLTS (A.B.) SHALL BE 12" LONG, UNLESS NOTED OTHERWISE.

12. FRAMING ACCESSORIES AND STRUCTURAL FASTENERS SHALL BE MANUFACTURED BY SIMPSON STRONG TIE (OR ENGINEER APPROVED EQUAL) AND OF THE SIZE AND TYPE SHOWN ON THE DRAWINGS. HARDWARE SHALL BE FULLY NAILED FOR MAXIMUM CAPACITY, UNLESS NOTED OTHERWISE.

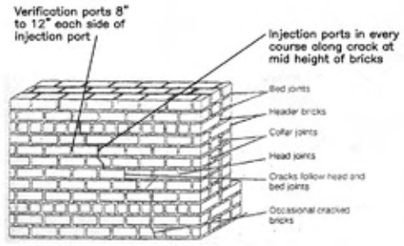

FIGURE 1 :
INJECTION AND VERIFICATION PORT PATTERN

CRACK REPAIR OF UNREINFORCED MASONRY WALLS WITH GROUT INJECTION
(MODIFIED CITY OF L.A. RGA #1-91)

1. MATERIALS

A. GROUT (PARTS SHALL BE MEASURED BY VOLUME)

- 3 PARTS #60 SILICA SAND
- 1 PART #90 SILICA SAND
- 1 PART PLASTIC PORTLAND CEMENT
- 1/2 PART TYPE S LIME
- 1/2 PART TYPE F FLY ASH

APPROXIMATELY 2-1/2 PARTS OF WATER SHALL BE ADDED. WATER SHALL BE SUFFICIENT TO ACHIEVE A POURABLE BUT NOT WATERY CONSISTENCY AS DETERMINED BY THE FLOW TEST DESCRIBED BELOW.

CONDUCT A FLOW TEST OF EACH GROUT MIX BATCH FOR EACH DAY OF GROUTING. THE PROCEDURE IS AS FOLLOWS:

- A GROUT SAMPLE SHALL BE TAKEN FROM THE INJECTION WAND. FILL A 2 INCH DIAMETER BY 4 INCH HIGH CYLINDER.
- POUR THE SAMPLE SLOWLY FROM 12 INCHES HIGH ONTO AN IMPERVIOUS SMOOTH LEVEL SURFACE.
- PROPER CONSISTENCY IS INDICATED BY A SIX INCH TO 8 INCH DIAMETER PUDDLE ON THE IMPERVIOUS SURFACE.

WATER MAY BE ADDED TO THE MIX TO MAINTAIN THE REQUIRED CONSISTENCY. GROUT SHALL NOT BE USED MORE THAN 2-1/2 HOURS AFTER INITIALLY ADDING WATER TO THE DRY INGREDIENTS.

GROUT SHALL ATTAIN A MINIMUM COMPRESSIVE STRENGTH OF 2,000 PSI AT 28 DAYS.

B. MORTAR (TYPE N)

- 4-1/2 TO 6 PARTS MASONRY SAND
- 1 PART TYPE I OR TYPE II LOW ALKALI CEMENT
- 1 PART TYPE S LIME

2. PREPARATION OF THE WALLS

A. APPLY 1 COAT OF A MASONRY SEALANT TO ANY PORTION OF MASONRY WALL TO REMAIN EXPOSED ON WHICH GROUT MAY SPILL.

B. REMOVE LOOSE MORTAR FROM OPEN JOINTS. MORTAR NOT BONDED TO AT LEAST ONE BRICK OF AN OPEN JOINT, OR EASILY DEBONDED SHALL BE REMOVED.

C. CLEAN THE CRACKS BY FLUSHING WITH WATER.

D. FILL THE PREMOISTENED CRACKS AND OPEN JOINTS WITH PRE-HYDRATED MORTAR 1/2 INCH DEEP. TOOL THE MORTAR JOINTS TO MATCH THE ADJACENT EXISTING JOINTS.

E. REMOVE AND RESET, WITH MORTAR, BRICKS THAT ARE DETERMINED VISUALLY OR BY HAND TO BE DEBONDED FROM ADJACENT BRICKS. CLEAN LOOSE MORTAR FROM THE CAVITY AND FLUSH WITH WATER BEFORE RESETTING THE BRICK.

F. DRILL 3/4 INCH MINIMUM DIAMETER INJECTION HOLES INTO THE CRACK AT A HEAD JOINT OR CRACKED BRICK IN EACH COURSE OF A BRICK. HOLES SHALL PENETRATE TO THE NEAR FACE OF THE FAR WYTHE OF BRICK. SEE FIGURE 1.

G. DRILL 3/4 INCH MINIMUM DIAMETER VERIFICATION PORTS INTO THE HEAD APPROXIMATELY 8 TO 12 INCHES ON EACH SIDE OF THE CRACK TO THE SAME DEPTH AS IN F. SEE FIGURE 1.

H. THOROUGHLY WASH AND SATURATE THE WALL BY FLUSHING WITH WATER APPROXIMATELY 24 HOURS BEFORE INJECTION. USE WATER AT CITY PRESSURE THROUGH AN INJECTION AND THAT CAN BE INSERTED THE FULL DEPTH OF THE HOLES. FLUSH EACH INJECTION HOLE AND VERIFICATION PORT, WORKING FROM FAR COLLAR JOINT FROM TO NEAR COLLAR JOINT IN EACH HOLE AND FROM TOP TO BOTTOM. FLUSH EACH HOLE UNTIL THE WATER FLOWS CLEAR.

I. THOROUGHLY SATURATE THE WALL BY THE SAME METHOD IMMEDIATELY PRIOR TO GROUT INJECTION. REPEAT IF MORE THAN TWO HOURS HAVE ELAPSED BETWEEN FLUSHING AND INJECTION.

3. GROUT INJECTION

GROUT SHALL BE DELIVERED INTO THE WALL THROUGH AN INJECTION WAND CAPABLE OF SEALING THE INJECTION HOLE APPROXIMATELY 2 INCHES BEHIND THE NOZZLE. THE GROUT PUMP SHALL BE ABLE TO DEVELOP AT LEAST 30 P.S.I. INJECT GROUT INTO THE WALL AT EACH INJECTION HOLE, FILLING THE COLLAR JOINTS STARTING AT THE FAR COLLAR JOINT, PROCEEDING TO THE NEAR COLLAR JOINT, WORKING FROM ON END TO THE OPPOSITE END. VERIFICATION PORTS SHOULD BE PLUGGED AS GROUT FLOWS FROM THEM. WHEN GROUT FLOWS FROM THE INJECTION HOLE ABOVE, APPLY A TEMPORARY PLUG TO THE HOLE BEING INJECTED AND APPLY GROUT TO THE INJECTION HOLE ABOVE. CONTINUE UNTIL ALL INJECTION HOLES HAVE BEEN INJECTED. INJECT GROUT INTO VERIFICATION PORTS FROM WHICH NO FLOW OCCURS. WASH GROUT SPILLAGE FROM THE WALL IMMEDIATELY.

4. CLEAN-UP

A. WHEN THE GROUT IS FIRM, REMOVE THE TEMPORARY PLUGS AND POINT HOLES WITH MORTAR. TOOL THE MORTAR TO MATCH THE ADJACENT EXITING. REFER TO SEISMIC RETROFIT OF UNREINFORCED MASONRY NOTES ON SHEET S1-1 FOR EXISTING BRICK REPOINTING REQUIREMENTS.

B. REMOVE AND DISPOSE OF ALL SPILLED MORTAR AND GROUT.

5. INSPECTION

CONTINUOUS INSPECTION SHALL BE PERFORMED BY A CONCRETE OR MASONRY DEPUTY BUILDING INSPECTOR. THE DEPUTY INSPECTOR SHALL BE PRESENT DURING WASHOUT, BATCHING AND ALL INJECTION OF THE GROUT. HOWEVER, DEPUTY INSPECTION IS NOT REQUIRED DURING THE INITIAL WASHOUT OF THE HOLES WHICH OCCURS 24 HOURS PRIOR TO INJECTION.

1/8" = 1'-0"
NORTH

GENERAL NOTES

1. REFER TO SPECIFICATION SECTION (1)08710 (FINISH HARDWARE) AND SECTION 08740 (LOW ENERGY DOOR OPERATORS) FOR PRODUCT SPECIFICATION, DESIGN INTENT AND FUNCTIONAL REQUIREMENTS. CONTRACTOR SHALL SUBMIT COMPLETE SHOP DRAWINGS FOR A FULLY OPERABLE SYSTEM. REFER TO MANUFACTURER'S WIRING DIAGRAMS DOOR-O-MATIC

NOTES

(1) DOOR SWING – WD SWING ASSEMBLY OPERATOR MOUNTED IN VESTIBULE. LOCATE EXTERIOR BOX ON PUSH SIDE OF THE DOOR. ELECTRIC STRIKE AT HEADER OF THE DOOR WITH LOW VOLTAGE POWER SUPPLY.

(2) INTERIOR PAIR DOOR (PUSH–PULL) WITHOUT LOCKING, OPERATOR MOUNTED IN VESTIBULE.

(3) ELECTRIC DOOR STRIKE WITH POWER SUPPLY

(4) N.P. PUSH PLATE WITH HANDICAP SIGN +42"MT MOUNTED ON EXISTING WOOD POST.

(5) PUSH PLATE WITH HANDICAP SIGN, +42"MT MOUNTED ON EXISTING WALL.

(6) EXISTING FLUSH MOUNTED PANEL/LOAD CENTER (E)1213; 100AMP 120/240V+43M 30 CIRCUITS. USE EXISTING SPACE (E)3 TO POWER THE DOOR OPERATORS(), INTERCOM STATION, TIME CLOCK, ELECTRIC DOOR STRIKE AND POWER SUPPLIES. PROVIDE (1)20A–1P CIRCUIT BREAKER TO MATCH EXISTING BY TYPE, STYLE AND AIC RATING. LABEL NEW BREAKER AS "DOT DOOR HARDWARE" AND UPDATE PANEL DIRECTORY. PROVIDE BREAKER LOCK–ON DEVICE.

(7) PROVIDE SURFACE MOUNTED VIDEO SECURITY ENTRY AND ACCESS CONTROL SYSTEM– MANUFACTURED BY AIPHONE MODEL #KCS–1MRD WITH KC–DAR AND KC–1MRD, PS–2410A POWER SUPPLY, 2 WIRE 18 AWG CABLES #841802 BETWEEN KC–1MRD, KC–DAR, POWER SUPPLY PS–2410A & DOOR STRIKE. (MAX–DISTANCE 330 FEET FROM STATION TO MONITOR, 16 FEET TO POWER SUPPLY). CONNECT NORMALLY OPEN DRY CONTACT FOR DOOR RELEASE. PROVIDE KA–DOR STAINLESS, STEEL HOUSING FOR KC–DAR DOOR STATION AND WDM–S DESK STAND FOR AIPHONE MONITOR.

(8) THE DOOR ACCESS ENTRY SYSTEM SHALL BE TIME CLOCK CONTROLLED FOR NORMAL BUSINESS HOURS. TIME CLOCK SHALL BE TORK #E2300L–36. AFTER HOUR USAGE SHALL BE CONTROLLED BY AIPHONE VIDEO SECURITY ENTRY AND ACCESS CONTROL SYSTEM.

(9) INSIDE MONITOR STATION, DESK MOUNTED WITH PS–2410A POWER SUPPLY. PROVIDE 120V POWER TO POWER SUPPLY.

I. OVERVIEW

1.1: History of Alhambra.

A little over one hundred years ago, th
twenty-five families living on five and ten acre plo
subdivided land. A portion of a rancho which originally had been part of a Spanish land grant, the subdivision was the brainchild of Don Benito Wilson, an American who made his way to California with John C. Fremont in 1841. Young Wilson had planned to go on to China, it is said, but ended up staying in the area and marrying Ramona Yorba, the daughter of a Mexican rancher.

In 1854, Wilson purchased a 128-acre ranch in the San Gabriel Valley called "Huerte de Custe" from the widow of another adventurer, Scotsman Hugo Reid. Reid had received the land in payment for services to the Mexican government. Wilson renamed the property "Lake Vineyard," because its numerous streams enabled him to grow a plentiful supply of grapes. The wooded Lake Vineyard ranch included portions of what is now Alhambra, San Marino, South Pasadena, and Pasadena.

In 1867, Wilson's daughter Maria married an engineer from Baltimore, Jacob de Barth Shorb. Their wedding present was a ranch adjoining the Wilson property, which Shorb named "San Marino." Shorb played a key role in his father-in-law's plan to subdivide the valley, for he created a superior irrigation system using iron pipes which gave the tracts he and Wilson subdivided a distinct edge over those planned by others.

The Wilson family continued to settle in the Valley, as relatives of Wilson's second wife arrived rom Mississippi in 1871. In 1873,

J.C. Wallace built the first residence within the present city limits of Alhambra, with lumber taken from Mount Wilson and transported by Indians to the site in the 1200 block of Granada Avenue.

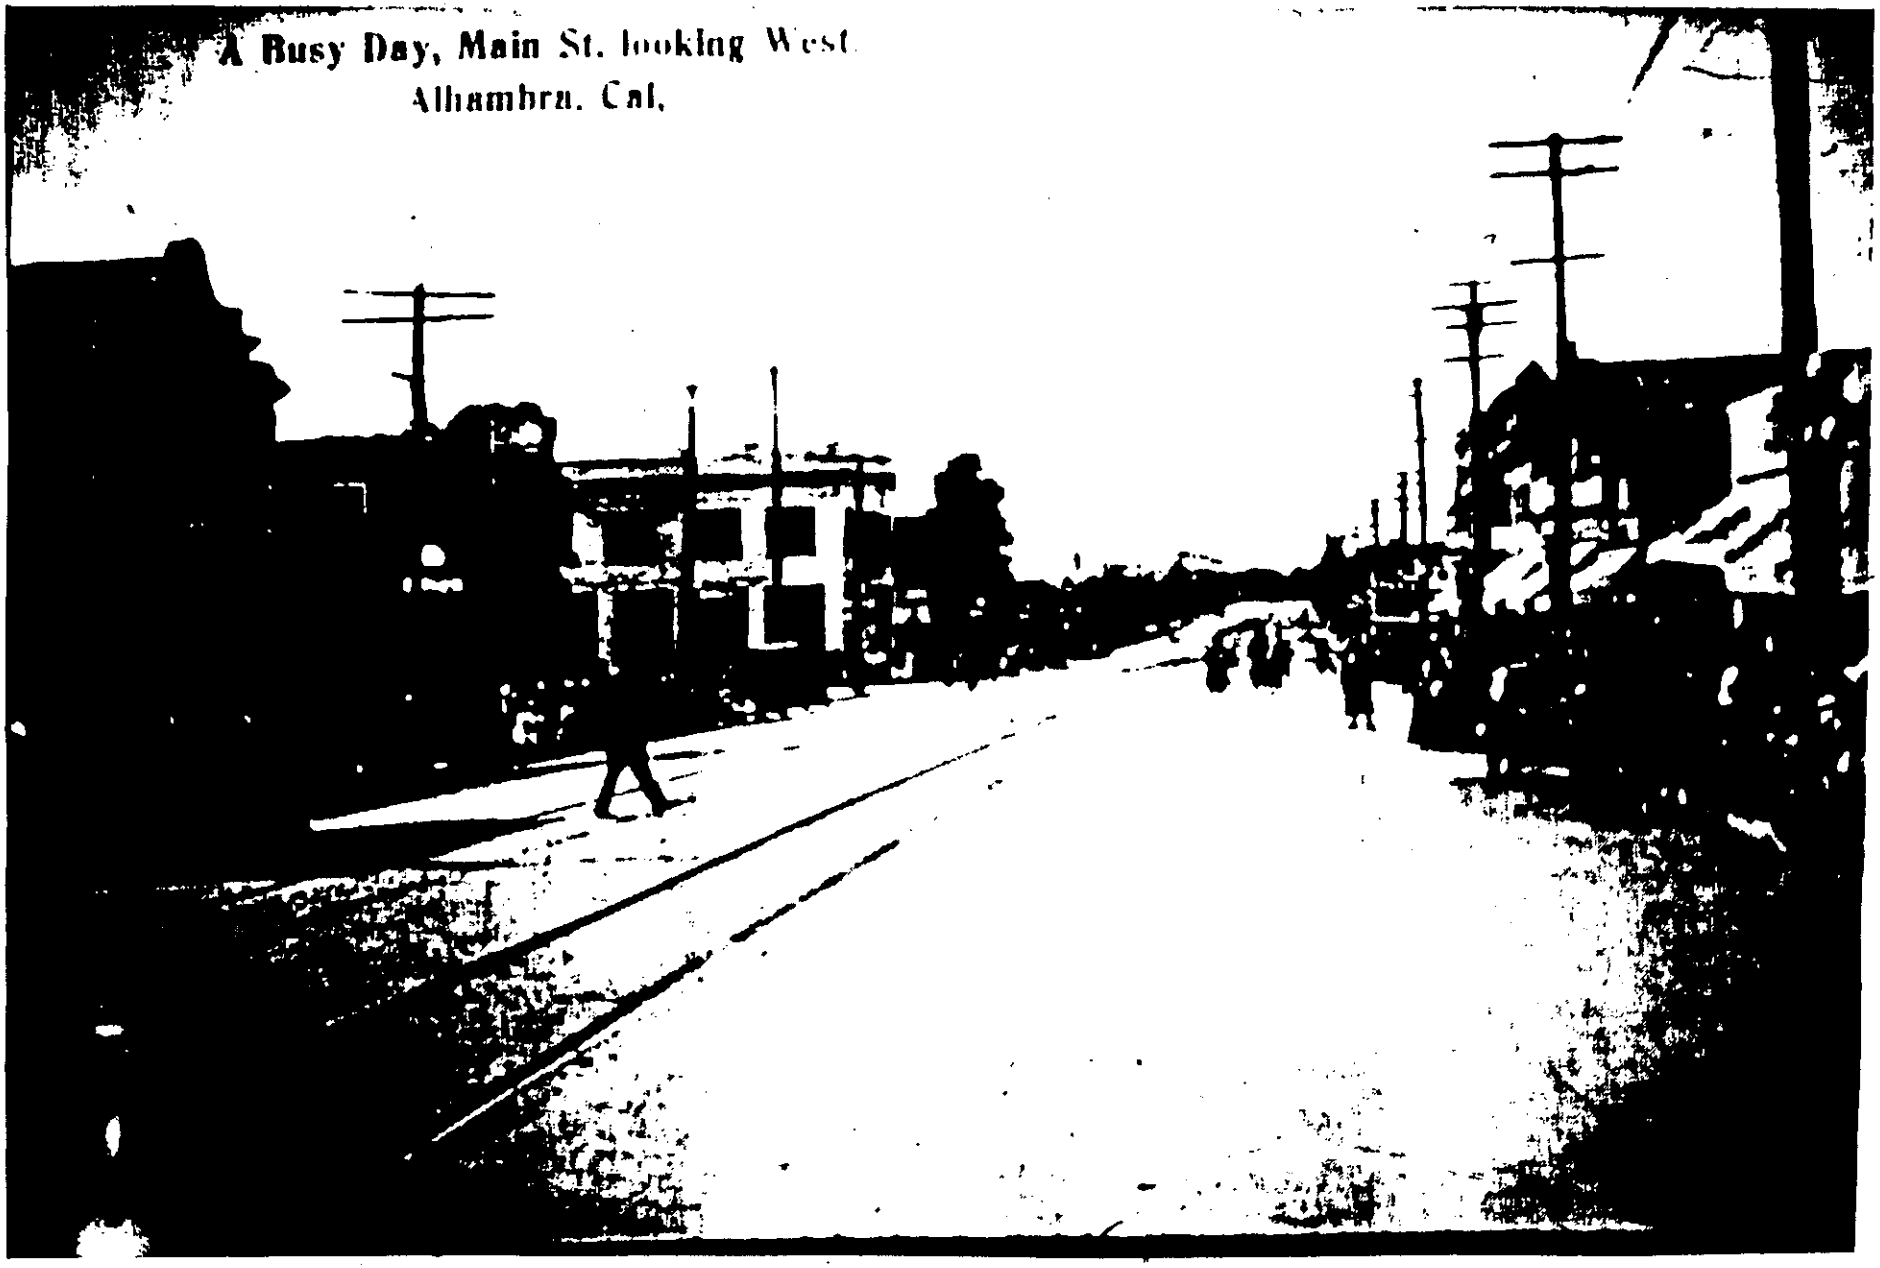
Wilson and Shorb continued to acquire tracts of land throughout the 1870s, often naming the streets after members of their families: Ramona (Shorb's daughter, for whom Helen Hunt Jackson's famous novel is also named), Yorba, Benita, de Barth, and Ynez. But rising taxes on that land forced them to find a way to profit from their large holdings. In 1874, Wilson subdivided a tract between the Arroyo and the Old Mill Wash into five and ten acre homesites. Daughters Ruth and Maria had been reading Washington Irving's romantic Tales of the Alhambra and were struck by the similarities in the descriptions of Moorish Spain and the San Gabriel Valley landscape. It was decided to call the new subdivision the "Alhambra Tract," and the streets were named after characters or places in the story: Granada, Almansor, Vega, and Boabdil (now Main Street). Shorb's system of iron pipes was a distinct improvement over the muddy ditches or makeshift wooden pipes commonly used for irrigation throughout Southern California at the time, and more than one prospective buyer cited this availability of water as the deciding factor in his decision to settle in Alhambra.

With its proximity to the Southern Pacific rail line and a plentiful water supply, the success of the first tract was assured. By 1877, all the plots were sold, and Wilson and Shorb bought an additional 2,500 acres to the west, which became known as the Alhambra Addition Tract. The first streets in this tract were Wilson (now Atlantic), Garfield (after the President of the United States), Cleveland (later Third Street), and Chapel (the location of the Methodist Chapel).

Agriculture was the principal business in the Valley. The Shorbs owned the San Gabriel Valley Vineyard, said to be the largest in the world at the time, which stretched north from the railroad tracts to Alhambra Road between Fremont and Marengo, an area of about 800 acres. Grapes were brought from all over the San Gabriel Valley to the winery on Main Street. The enterprise was successful for a time, but competition from newer and more modern operations in Northern California threatened the business, and by 1895 it had been sold. After passing through a series of owners, including I.W. Hellman and Henry Huntington, the buildings became a felt factory in 1903. Now the Standard Felt Company, it remains the location of the first industry in Alhambra. For years the facility and the area adjacent were known as Dolgeville, after its owner Alfred Dolge.

Most of the Alhambra Tract residents grew fruit, primarily citrus, with oranges the favorite crop. Initially, each grower made his own arrangements to market his crop until it was deemed necessary to have some protection against unscrupulous shippers. In 1896, the Alhambra Orange Growers Association was formed, continuing until 1932, when the continued subdivision of groves for housing forced its demise.

The increased population of the area brought a demand for goods and services. Until 1885, residents had to travel to San Gabriel, Pasadena, or Los Angeles to shop, but in that year, H.W. Stanton, a former school teacher, agreed to build a store and post office if he could receive the appointment as postmaster. Stanton's "post office" was a cracker box on the counter of his store at Main and Garfield, where settlers could come and collect their mail, which he brought once a day from San Gabriel. A large room above the store functioned as a



A Busy Day, Main St. looking West
Alhambra. Cal.

community center and auditorium. The wooden store was joined shortly thereafter by Dr. Elwood's drug store and Mr. Bessonett's dry goods establishment, and the Alhambra business district was launched.

The boom of the eighties saw an escalation in real estate values as the rest of the country "discovered" California as a place to spend the winter, to recover from an illness, or simply to make a fresh start. Like Pasadena and other towns, Alhambra capitalized on the booming tourist trade by building the Alhambra Hotel, a three story edifice designed in an eclectic "Moorish" style. Opened in 1887, the wood building had fifty rooms, spacious public areas, and highly touted dining facilities. Across the street was the Jones Block, a three-story brick commercial structure, and the Alhambra Savings Bank. Rooms above the bank housed the community library. Alhambra was on its way.

But prosperity disappeared in the 1890s, as a period of depression followed the boom. Absentee owners left declining groves, and the tourist trade dwindled. It was not until 1903 that the citizens of Alhambra began a drive to upgrade the community by soliciting a Pacific Electric line, planning for improved gas, electric and telephone service, and, most importantly, incorporating as a city of the sixth class.

With a formal city government of its own, Alhambra turned its attention to providing for the changing needs of its again increasing population. There had been rudimentary teaching facilities in the area since the 1880s. The first school, located at Garfield and Alhambra Road, was a two story, four room frame building, which served all grade levels and opened in 1887 with 27 students. In 1905, Marengo School was added, and the cornerstone of the first Alhambra High School was

laid. Religious needs were met by a variety of denominations, some of whose congregations had begun in the 1870s with the first settlement, but who continued to enlarge their facilities during the first years of the century.

In 1900, George Adams had begun the first "reading room" above the bank on Main Street. Books were donated by the Alhambra Book Club and the Wednesday Afternoon Club. In 1903, the library was placed in the school building on Garfield and Alhambra Road, and moved from there to the new high school building in 1906. Citizens elicited the cooperation of Andrew Carnegie in their effort to build a suitable facility, but when these approaches came to naught, they passed a bond measure in 1914 which resulted in the construction of a facility at the intersection of Fourth and Main. A branch was established in 1930 in Granada Park. Due to earthquake damage, the main library was condemned in 1968, and a new one erected on the same site.

Like many communities in Southern California, Alhambra became known as a healthy environment for those with respiratory diseases or other debilitating illnesses. The first hospital was a small bungalow at Second and Main, which two doctors from Chicago opened in 1893. Several doctors opened offices in the Jones Block. In 1914, the Adams residence at Chapel and Main was used as a hospital for a short period. From these rudimentary beginnings, Alhambra's medical community proliferated. In the spirit of healthy outdoor living for which the region was famous, the new city provided for open spaces as well, planning for Alhambra Park (on land donated by Henry Huntington), Granada Park, and Story Park.

Alhambra's prosperity increased. The citrus groves were subdi-

vided again and again, as farmers found it more profitable to provide homesites to newcomers which were close to the burgeoning city of Los Angeles. By 1910, Alhambra was a city of homes, with bungalow tracts co-existing with older farmhouses and large Victorian residences. The subdivision activity continued into the 1920s and 30s, and resumed again after World War II. Even the Alhambra Airport, for many years the site of Western Airlines passenger activity, recreational aviation, and even the location for several movies, was subdivided after the war into 600 homesites. Another open space, the prestigious Midwick Country Club, met the same fate. The Alhambra Chamber of Commerce began a concerted effort in the 1920s to attract industry to the city, as a syndicate of local residents purchased a tract of land near the railroad suitable for manufacturing.

The history of Alhambra parallels that of other Southern California communities of its age, from its rural beginnings to its present residential character, and remnants of this heritage are still to be found. Most of the earliest residents came to the region from the Midwest, and their houses were evocative of the farmhouses back home. Wood-frame, utilitarian, and tall and narrow in proportion, these simple dwellings were sometimes influenced by the Greek Revival style. But the austerity and simplicity of that period gave way, during the heady boom days of the 1880s, to the decorative exuberance of the Queen Anne and Eastlake styles. Soon Main Street (then Boabdil) and its environs were lined with Victorian era mansions and cottages. An ornate hotel stood proudly at the corner of Main and Garfield. The characteristics that typified these buildings were towers and turrets, bay windows balconies, and extensive use of wood ornament, especially

that made using jig saws, band saws, and lathes. Around the turn of the century and the years just after, the vernacular American Foursquare house, occurring in both one and two story versions, was built in great number all over the nation. Recognizable by its box-like volume capped by a hipped roof and a dormer, the Foursquare homes were often decorated with American Colonial Revival detail, such as columns or dentils. By 1906 and continuing through World War I, the Craftsman bungalow tradition was pre-eminent. These one and two story homes traded verticality for horizontality and emphasized the natural qualities of materials, structure and landscape, rather than the artificiality of applied ornament, for beauty. Bungalows of another kind proliferated in large tracts all over Alhambra in the 1920s. Although some of these one story homes incorporated Craftsman elements, most were clothed in the popular revival styles: American Colonial, Spanish Colonial and Tudor. These same architectural fashions were also exploited for their romantic and gracious qualities in larger, more elaborate single family homes, many located in the northeast quadrant of the city. Few multiple family buildings were constructed in Alhambra prior to World War II; those that were built include bungalow courts beginning in the teens, and small apartment buildings such as four-plexes in the 1920s.

Architecture of commercial, institutional, and public buildings also evolved in Alhambra along familiar lines. Victorian era wood and brick structures were replaced in the twentieth century by brick structures dignified by classical detailing. Public buildings also succumbed to the more monumental qualities of Neoclassicism. The 1920s were an era when many of the city's social and religious institutions

embarked upon ambitious building programs. Spanish and Mediterranean styles were especially favored, and a number of notable architects contributed their talents to the various projects. Main Street continued to change and grow during the years before and after World War II, responding to the needs of merchants and the demands of a growing community. Art Deco and Moderne elements were introduced.

Today, all of these visual reminders of previous eras enable the community to preserve a sense of continuity, tradition, and place, as it continues to develop as one of the major centers of the San Gabriel Valley. Postwar tract homes and modern structures, many of which reflect the art and culture of a growing Asian population, continue to diversify the city's built environment.

1.2: City Participation.

The events of the past twenty years reflect an intense period of change for the City of Alhambra. Redevelopment began in 1968 in Alhambra's industrial area, now a mixture of historically interesting early century structures along with modern plants. The commercial areas, particularly downtown Main Street, are in the midst of a City-sponsored revitalization project, begun in 1981. Responding to a decline in the Central Business District, a program of revitalization through redevelopment and the addition of a major retail shopping center was planned. Storefronts were rehabilitated, and a program of street improvements instituted. In conjunction with this redevelopment activity, the firm of Charles Hall Page identified and mapped structures of potential significance in and around the Central Business District. This analysis was based on a windshield survey performed by the firm; no research was performed on the sites in question.

In response to recent development trends, there has been a growing consciousness in the City of the need to preserve the City's rich architectural and cultural heritage. In the absence of any formal preservation policies or programs within the City, the State Historic Survey Program was viewed as an opportunity to generate increased community awareness and appreciation, and as a starting point towards the development of more concentrated and specialized preservation efforts. Considerable development activity has been seen in the residential areas. As a result, the City was particularly interested in studying neighborhoods that were developed before 1920, especially those with at least 75% of the original structures intact, as well in the identification of locally significant structures city-wide.

Between 1910 and 1920, over 7,000 homes were built in Alhambra. It is estimated that approximately 4,500 of these remain today. Many of the structures are located in multiple-family residential zones, and are being replaced with higher density apartment and condominium buildings. In fact, there has been up to 2% growth per year in housing units all through redevelopment of older neighborhoods, a cause for considerable concern in Alhambra.

1.3: Role of the Alhambra Historical Society.

While the City has become increasingly aware of the need for a systematic inventory of potentially significant structures, community organizations such as the Alhambra Historical Society (AHS) have continued in their efforts to preserve Alhambra's heritage. Formed in 1966, the Society's goals were:

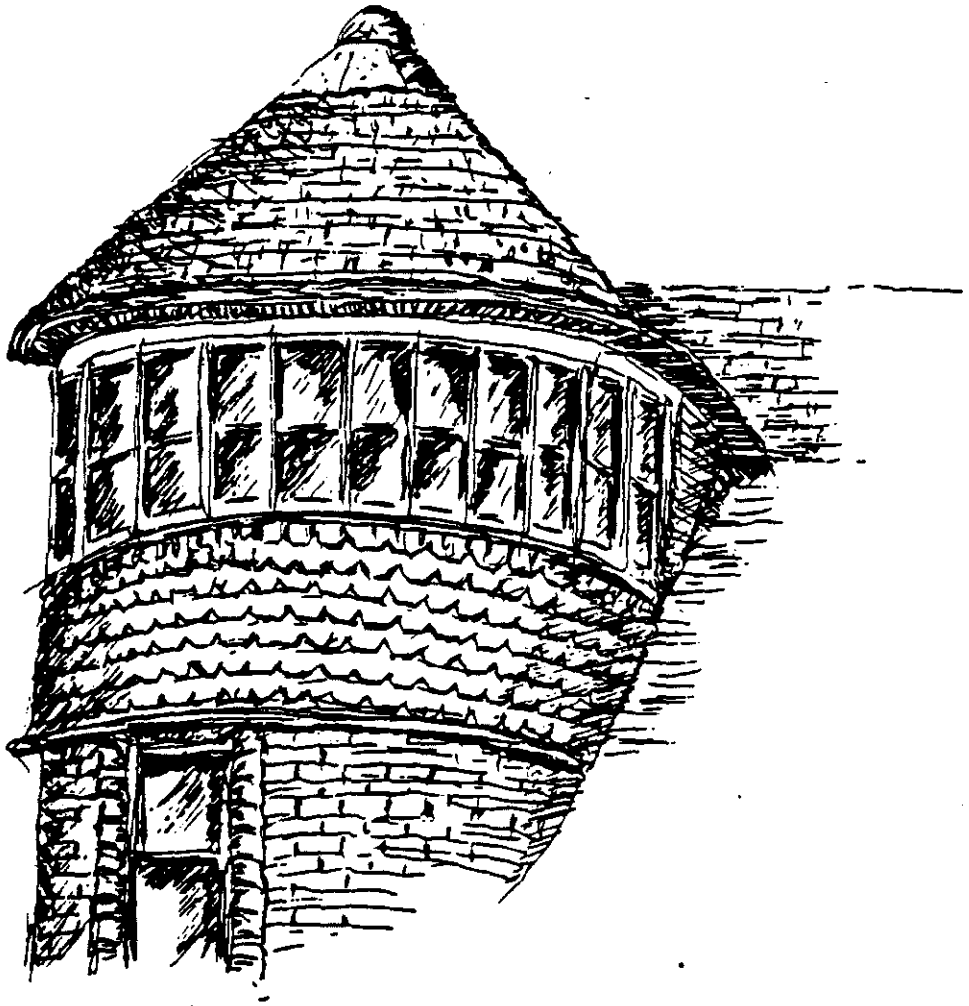
- to encourage and promote the study of history in its relation to the popul[illegible]on and development of Alhambra;

- to collect, classify, publish, and disseminate historical information, data and facts;

- to locate, restore, mark, and preserve historical places and structures worthy of recognition.

One of the first projects of the Society was the formation of a museum and the search for a site. The resulting attempts to save the "Captain Gray House," an elaborate Victorian located at the corner of Second and Commonwealth, came to naught when the house was razed in 1970. However, the acquisition of artifacts and the accumulation of oral histories and research has continued. The Society now maintains an exhibit room and storage facilities for its collection in the Alhambra Main Library.

In 1983, AHS began a program to identify historic residences in the community. A questionnaire asked members to submit the address and a brief description of the property, together with any additional historical data available. This effort had just begun when the Society was contacted by Darrell Cozen of the Alhambra Planning and Building Department regarding the City's intent to apply for a survey grant. The Society immediately became an enthusiastic participant, pledging the participation of its members as volunteers and $1,000 of its funds to the program. Members of the board of directors subsequently became involved in the planning process and the selection of consultants.



II. STATEMENT OF PURPOSE

The rate of growth and development experienced by the city in recent years was a consideration in the decision to seek a survey grant. Another was a growing awareness of the public's lack of knowledge and information regarding the community's built environment. As a city with a growing population of several different ethnic backgrounds, the community saw a need to provide its citizens with information about its history. The Historical Society, whose public education programs were a substantial portion of its activity, felt that a systematic survey could expand its outreach program even further.

The City of Alhambra, in its grant application of January, 1984, identified several areas of the city as being potential candidates for an historic survey. These included four residential neighborhoods and a portion of the commercial district along Main Street. In addition, it was anticipated that approximately 25 individual sites of historic and/or architectural importance scattered throughout the city would be documented in the first year. The choice of areas and sites was governed by the following considerations:

- The integrity and quality of pre-1920 housing stock within the city. Neighborhoods with at least 75% of the original structures intact were targeted.

- The current zoning of residential neighborhoods. Several historic neighborhoods of predominantly single-family residences have multi-unit zoning in the current plan. Research was needed to provide the Planning Department with data concerning the existing building stock.

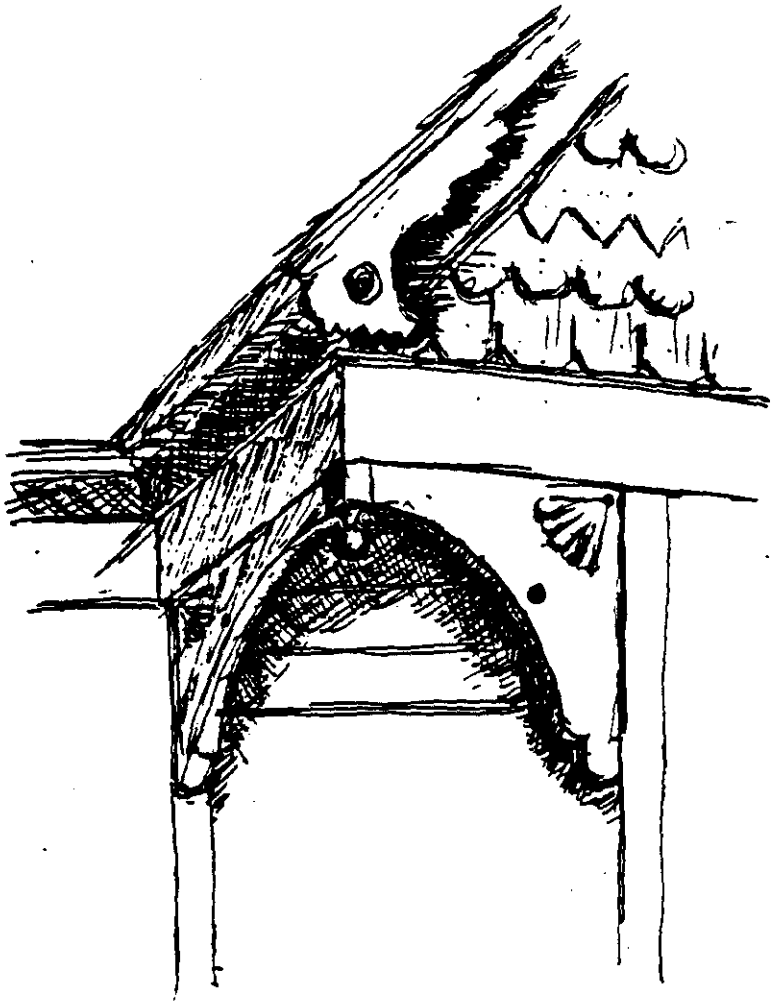
- The lack of available research on the institutional buildings of the community (churches, schools, clubs, fraternal and civic organizations), as well as the residences of prominent Alhambrans scattered throughout the community.

On June 11, 1984, the Office of Historic Preservation notified the

City that a grant of $15,000 had been approved for such a survey. A contract between the State of California and the City of Alhambra was signed on August 20, 1984. The City then interviewed several consultants, and subsequently requested a proposal from Johnson Heumann Research Associates. The contract between that firm and the City, based upon the scope of work outlined in the Johnson Heumann proposal, was finalized in December of 1984. A work plan and methodology were approved and four products agreed upon:

- California Historic Resources Inventory forms and encoding sheets for all buildings with a National Register of Historic Places status of "5" or higher.
- A final report.
- Maps of survey results.
- Text for a brochure highlighting survey findings.

With the Cooperation of the City, the consultants refined the scope of the survey effort. The inventory would include buildings and districts significant for their architectural, historical, or cultural associations or role in the growth of the community prior to World War II, and community design features of historic interest. It was agreed that the consultants, using volunteers, would survey two of the four previously identified neighborhoods. These are: Area 1, bounded by Bushnell Avenue, Pine Street and Huntington Drive, Atlantic Boulevard, and Alhambra Road; and Area 2, bounded by Ninth Street, Norwood Place, Garfield Avenue, and Ramona Avenue. In addition, twenty-five "at large" sites to be selected by the City, Historical Society, and consultants would be documented. The contract between Johnson Heumann Research and the City was executed on December 1, 1984 and was to terminate September 30, 1985.



III. METHODS USED

3.1: Personnel.

The City selected the firm of Johnson Heumann Research Associates to administer the survey project. The principals, Christy Johnson McAvoy and Leslie Heumann, have extensive backgrounds in historic preservation and in all aspects of architectural and historic resource surveys. Specialists in the management of surveys which require volunteer participation, the consultants have been involved with survey efforts in Pasadena, Hollywood, Glendale, Santa Monica, and Los Angeles. They were assisted in Alhambra by their employee, Dawn Jacobson, a history graduate with experience in local research and computer data management. The liaisons within the City were Scott Lee, Senior Planner, and David Carmany, Assistant City Manager and Director of Housing and Community Development. Ruth Barry, president of the Alhambra Historical Society, received periodic reports and helped in the volunteer recruitment phase. Bill Kinman of the Alhambra Library coordinated the logistics of the volunteer training and the use of the library.

The consultants were assisted in the accomplishment of survey tasks by volunteers from the Historical Society, university interns, and the community at large (see Appendix for volunteer roster). Over the project period, 36 volunteers participated. An initial group of 42 attended a two-day survey training workshop. The first session utilized slide lectures to present a background of the survey concept, its purposes and goals, and to illustrate the development, both architecturally and historically of Alhambra, the San Gabriel Valley, and

Southern California over the past 100 years.

The second session was designed as a demonstration of research techniques. Held on site at various repositories of pertinent information in City Hall and at the Alhambra Library, the session was intended to give participants the opportunity for "hands-on" research. Several volunteers also received additional training at the Los Angeles County Archives.

To assist the volunteers in their efforts, the following were distributed as explanatory or reference materials (see Appendix):

1. Alhambra research guide, including:
2. History and
3. Research Form.
4. "Description."
5. "Significance."
6. "Glossary."
7. "General Information."
8. "Bibliography."
9. "Residential Site Inspection List."
10. "Survey Objectives."
11. Sample Research Form.
12. Photography Instructions.
13. Volunteer Questionnaire.
14. Volunteer Time Sheets.
15. Letters of Introduction.
16. Identification Cards.
17. Sample DPR 523 Form.

These volunteers were joined by others with prior expertise and assigned to write descriptions, research buildings, take black and white photographs, and prepare graphic materials. Limited clerical assistance was provided by city staff.

Volunteer consultants also played a major role in the survey. An evaluation committee of five experts was assembled and met three times to review survey findings in terms of the criteria for listing in the National Register, and to make recommendations for future management of historic resources. The committee members were:

Warren Doty, member of the Alhambra Historical Society and other civic associations. Mr. Doty has been a resident of Alhambra and the San Gabriel Valley for 70 years. As a postal employee and a member of a number of civic organizations, he was familiar with prominent citizens and their roles in Alhambra's development.

William Ellinger III, architect, is a specialist in historic preservation. A member of the California Preservation Foundation, Pasadena Heritage, and Pasadena Architectural and Historical Inventory Review Committee, Mr. Ellinger is very knowledgeable about issues in historic preservation.

Scott Lee, Senior Planner for the City of Alhambra, provided expertise about the community's current planning and zoning efforts, design guidelines, and future goals.

Denver Miller, Assistant Coordinator of Pasadena Architectural and Historical Inventory. A planner by profession, Mr. Miller has been involved with surveys in Hollywood, Orange County, and Pasadena. He provided particular information about vernacular architecture, as well as insight into similar development patterns, contractors, and citizens active in the Pasadena area. Head of the Los Angeles Conservancy's Cultural Resource Committee, Mr. Miller is well-acquainted with local landmark designation programs in several cities.

Richard Rowe, community planner with the Community Redevelopment Agency of Los Angeles. As part of the project team for the historic Broadway/Spring Street district and a member of the board of the Southern California Chapter of the Society of Architectural Historians, Mr. Rowe provided the committee with knowledge of rehabilitation techniques and redevelopment issues as well as a background in planning and architectural history.

Two additional professionals facilitated the work of the survey team with their efforts. Luis Hernandez, a planner for the City of El Monte, produced pen and ink drawings of notable structures. Carol Stone, reference librarian at the main branch of the Alhambra Library, provided materials and work space to coordinators and volunteers alike which greatly increased their efficiency and expanded the data base of information.

3.2: Survey Methodology.

Specific criteria for choosing buildings and other resources to be surveyed were formulated as follows:

An improvement* may be included in the inventory of Alhambra architectural and historical resources if it meets one or more of the following criteria:

A. It exemplifies, symbolizes, or manifests elements of the cultural, social, economic, political, or architectural history of the city.

B. It has aesthetic or artistic interest or value, or other noteworthy interest or value.

C. It is identified with historic personages or with important events in local, state, or national history.

D. It embodies distinguishing architectural characteristics valuable to a study of a period, style, method of construction, or the use of indigenous materials or craftsmanship.

E. It is representative of the work or product of a notable builder, designer, or architect.

F. Its unique location or singular physical characteristic represents an established and familiar visual feature of a neighborhood.

G. It contributes to the continuity or character of a visually or thematically cohesive street, neighborhood, or area.

H. It has integrity as a natural or man-made environment that strongly contributes to the well-being of the people of the city.

A preliminary survey was conducted by the consultants to develop a base list of potential architectural and historical resources in the two neighborhood survey areas. The list was compiled in several stages. First, a windshield survey identified the historic building stock of the area. Then, a second windshield survey was made in order to eliminate buildings of marginal architectural quality or interest, impaired design integrity, or non-existent neighborhood context. Finally, the consultants walked the areas and further revisions made to the list.

---

*An "improvement" means any building, structure, place, site, work of art, landscape feature, plant life, scenic condition, or other object constituting a physical addition of real property · any part of such addition.

Local area histories were read in order to add to the list buildings of no visual significance but of potential historic importance. The final version of the preliminary survey list was produced and included approximately 590 sites.

Compiling the preliminary survey list for the "at large" sites presented a different problem. Initially, the consultants were given an informal list of 30 buildings and their locations assembled from suggestions made by the general membership of the Alhambra Historical Society. It was then decided that a systematic windshield survey of the entire city would more accurately reflect the most historically or architecturally outstanding buildings in Alhambra outside of the identified survey areas. The effort resulted in two lists, the first containing the addresses of thirty-four sites to be documented as part of the present program, and the second, identifying 105 sites for study in future projects. Several considerations governed inclusion on these lists, among them:

- Outstanding architectural quality representing a particular style or period.
- Age and scarcity of resources from the period.
- Institutional, social and religious associations.
- Use or building type.
- Method of construction.
- Historic significance.
- Community interest.

Using the preliminary survey list, assignments were made to volunteers to describe, research, and photograph in black and white the sites on the list. It soon became apparent that the volunteers were most comfortable with the source specific research and photographic

phases of survey documentation; therefore the descriptive and site-specific research portions of the survey were performed almost exclusively by the consultants. Descriptions outlined those features of a building visible on the facade from the public right-of-way. Site-specific research included, at a minimum, most of the following information for each site:

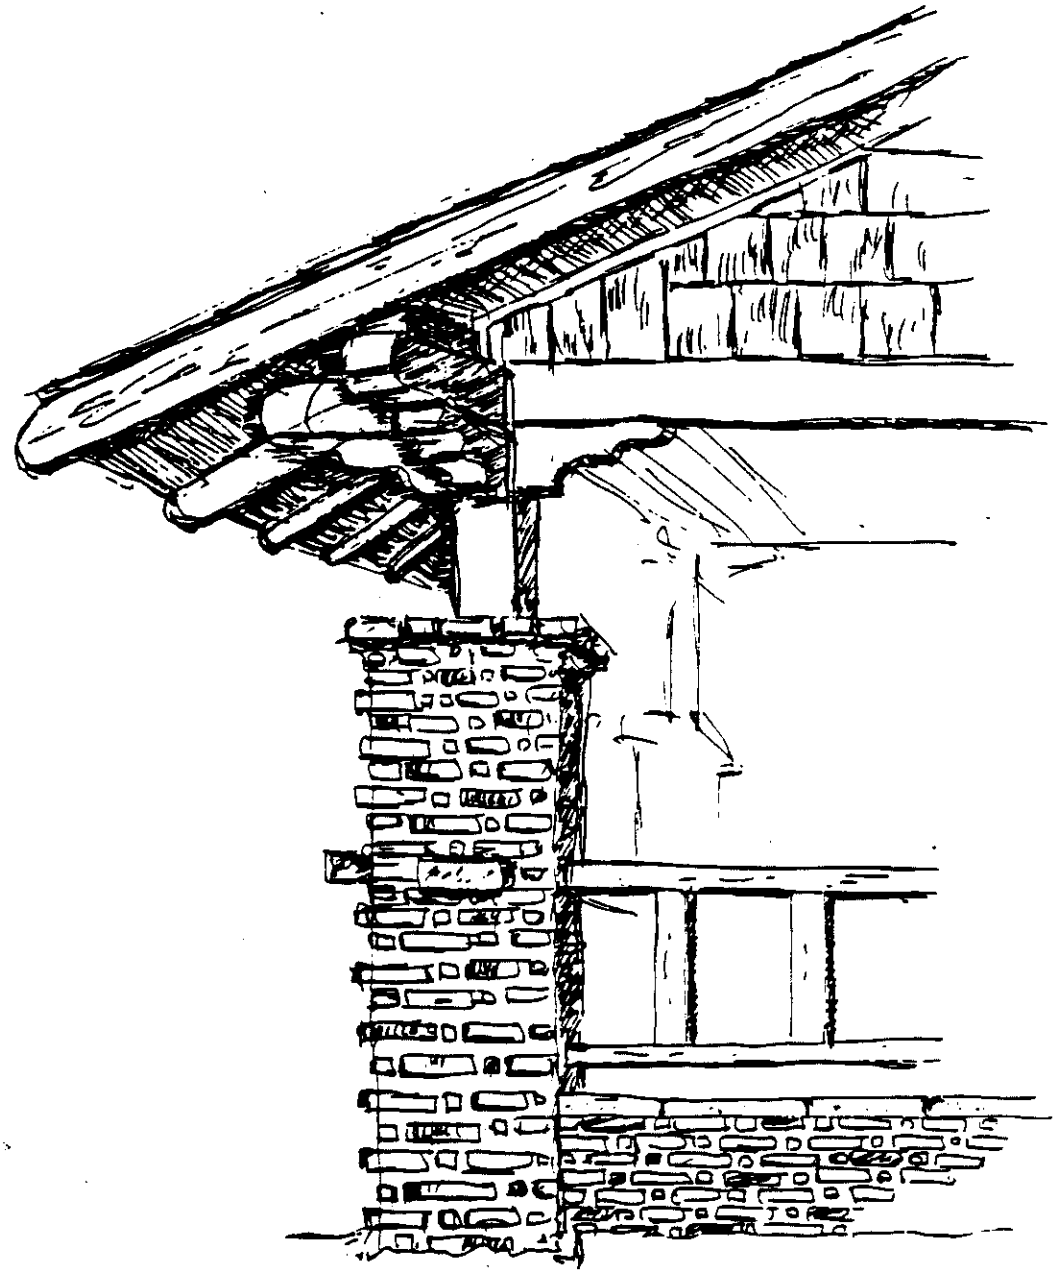
- Present ownership, obtained from the Real Estate Atlas or from the Los Angeles County Tax Assessor's 1984 Local Roll.
- Building permit records, searched for original construction and for significant alterations. It was discovered that the earliest permits were incomplete and dated back to 1911. Recordkeeping became more comprehensive in 1927 for scattered addresses, and in 1937 for all addresses. Since most of the buildings in the inventory pre-dated 1937, other sources were usually consulted to establish or verify dates of construction.
- Determination of the date of first assessed improvements, from the historic map books in the Los Angeles County Archives. This was the most utilized alternative resource, due to gaps in the building permit records within the city.
- Alhambra City Directories for selected years, consulted in order to build a profile of the residential composition of a neighborhood. Local histories were then combed for references to identified persons or buildings.

In the absence of a conclusive date from any of the above sources, an estimated guess was made, based on available data and building style. Source-specific research was extremely helpful in verifying the expanding knowledge of original construction. Supervised by the consultants, volunteers systematically read and indexed The Alhambran-Advocate and the Southwest Contractor and Manufacturer for most of the years between 1906 and 1913, a period of prolific building that directly affected development in the survey areas. Black and white photography, like descriptions, focused on the public facades, visible from the street.

After the research phase of the survey documentation was completed, each potentially significant site was presented, by slide, and, in some cases, by an individual's site visit, to the evaluation committee for review. Using the National Register categories established by the state (see Appendix), a numerical rating of 1 through 6 was assigned. The committee found it necessary to amplify these categories in order to more accurately represent the nature of the resources in the survey area. Specifically, a "5" evaluation reflected the Committee's conviction that many buildings worthy of note in a local context may not be eligible for local landmark designation, should such an ordinance be enacted in Alhambra, but merited more attention that a "6," which is usually interpreted as a non-significance judgement. The dilemma was resolved by specifically noting buildings which appear to qualify for "landmark" designation on both the evaluation committee agenda (5*) and on the map of survey results. For every site thereby evaluated a "5" or better, documentation on an individual or neighborhood historic resources inventory form was prepared. All sites were then plotted on base maps provided by the City.

The survey was a nine month effort, with the bulk of the time spent on research and architectural descriptions. The actual cost of the project is accurately reflected in the monthly billing statements which accompanied the progress reports to the City, and the amount of volunteer time expended (see Volunteer Information, Appendix).

In total, 684 structures were surveyed in the two residential areas, 633 of those documented in the final inventory.



IV. FINAL RESULTS

4.1: Overview of Survey Results.

The first year of the Alhambra Historic and Cultural Resources Survey included 637 buildings and community design features in the final inventory. The majority of the buildings assessed were in two residential neighborhoods, while an additional thirty-four sites chosen as representative institutions, public buildings, or residences with a high degree of historic association or architectural significance made up the remainder. A significant portion of the residential structures evaluated were rated "5D" as contributors to locally significant neighborhood groupings. Forty-two buildings and clusters were singled out as worthy of local landmark designation. Nine structures were classified "4," potentially eligible for listing in the National Register if further research is performed or a rehabilitation occurs. Thirty-six buildings were evaluated as "3," potentially eligible for listing on the National Register of Historic Places or "3D," potentially eligible as a contributor to a district. There are no structures in Alhambra currently listed on the National Register of Historic Places. By usage, 618 residential buildings, nine community/institutional structures, and six commercial/industrial buildings included in the inventory. It should be noted that this is by no means an indication of the total number of potentially significant buildings in the community. The consultants and two members of the evaluation committee conducted windshield surveys of the entire city in which they identified several additional neighborhoods of merit and well over 100 additional potentially significant sites for either local landmark or

National Register consideration (see Section 3.2 above).

In addition to the buildings, the survey noted community design features which contributed to the area's sense of time and place. Significant community design features in the city include:

- Views of the San Gabriel Mountains to the north and the San Bernardino Mountains to the east.

- Vintage street lights, particularly those with the bell, star and crescent on a concrete base, on Commonwealth; other styles on Bushnell, Electric, and Marguerita Avenues in Survey Area 1; on South Seventh, Eighth, and Ninth Streets in Survey Area 2; and those on Valley Boulevard.

- Historic neon signs, with special attention to those at the city boundaries.

- Historic commercial and/or rooftop signs, notably that of the Garfield Theatre building and on tower marquees.

- Street trees. In many neighborhoods, the ambience of the street is greatly enhanced by the trees planted in the parkway. Several streets in the city were originally named for varieties of trees; some retain the appellation (Date, Palm, Oak, Cedar).

- Arroyos and parks. The open space within the city limits has historically been connected with the deep arroyos which divided the community. While several of these canyons have been filled, some remain, providing a sense of continuity with the past. Two of the parks are connected to the arroyo configuration.

- Historic water towers and other utilitarian structures.

4.2: Survey Area 1: Wuest Tract, et al.

The residential area on the northwestern edge of the city bounded by Bushnell Avenue, Huntington Drive and Pine Avenue, Atlantic Boulevard and Alhambra Road contains 337 documented residences constructed between 1900 and 1930. One of the tracts in this area was subdivided in 1905 by Samuel Wuest, a prominent rancher, and his family. Wuest arrived in Alhambra in 1893, buying a twenty-four acre orange grove in the northwest corner of the survey area. He became instrumental in the use of fumigation in the San Gabriel Valley. In 1905, he subdivided

the grove, calling it the Wuest Tract, into 102 homesites, laid out and paved the streets, and secured utilities for the area. The tract was sold out within three months, some of the lots being purchased for between $350.00 and $800.00. Many were sold through an office Wuest had opened in Los Angeles. He continued his interest in real estate and in ranching, building several of the area's homes and going into the chicken ranching business. He maintained a residence near the tract on Huntington Drive. Wuest was married to Berthena Bushnell, who gave her maiden name to a street in the tract. Their daughter Gladys Wuest Behlow and her family also built several homes in the neighborhood.

Following the subdivision of the Wuest tract in 1905, several other subdividers began to offer residential lots for sale in the surrounding area. John Carr, a member of the prominent Carr family of Pasadena, whose "Carmelita" estate, a 42-acre showplace at Colorado and Orange Grove was noted for its variety of ornamental plantings and fruit trees and for its hospitality (it is said that Helen Hunt Jackson wrote a portion of Ramona while visiting there), subdivided the Bushnell Avenue and Electric Villa Tracts in 1906. Adolph Graffen, (whose primary residence, an elegant turn of the century structure at 1306 W. Pine), subdivided a portion of his ranch in 1909 to create the La Marguerita Tract.

The major portion of Survey Area 1, including the aforementioned tracts and Dos Robles Park (subdivided by Florence Bull in 1907), La Senda (Southern Trust Co., 1908), Souders Tract (Fred Souders, 1909), Tract 1145 (Anna Brady, et al, 1911), and Tract 2903 (Samuel Block, et al, 1913), was subdivided by 1913, marking a period of tremendous

growth in Alhambra's history. Billing itself as a suburb of Los Angeles with country living, the city attracted residents from all parts of the country. Beginning with an estimated population of 800 in 1900, the city grew to over five thousand in ten short years. In 1906, $200,000.00 worth of building permits were issued; by 1909, the figure was $433,000.00. Costs for a residence in the survey area during this initial phase of development varied from several hundred dollars to as much as $8,000.00. Early residences were one and two story Craftsman homes. Developers often retained several lots and built homes for themselves and their families as well as selling them to newcomers. Gladys (Wuest) Behlow is listed as the original owner of 1003 Bushnell, Roscoe Behlow (a member of the Board of Trustees for the city) as the owner of 817 N. Electric Avenue, and Samuel Wuest as the owner of 931 Bushnell and 932 N. Electric. All four of these residences were built shortly after the subdivision. John Carr erected 621 Electric in the Electric Villa Tract, and may have been part of the Southern Trust Company, as he and Ira Carr had property (901 and 907 N. Atlantic Boulevard) in the La Senda Tract on the northeastern boundary of the survey area. Fred Souders, owner of the Souders Tract along the lower portion of Marguerita, built three homes at 606, 611 and 618 respectively, to encourage development of the tract. His son John built a home at 700 N. Marguerita Ave. While this pattern, for the most part, does not continue in the La Marguerita, 6469, and 3837 Tracts, 1920s subdividers W.F. Goss and J.S. Glasscock continued the practice in the 5608 Tract, subdivided in 1923. The southeast portion of the neighborhood was the last to be developed. In addition to developers or partial owners of the tract building homes, a number of

families bought more than one piece of property, and built several homes in close proximity to each other. These include Mary Scoville (703, 704 and 710 Dos Robles Place), Mary Deats (930 Bushnell Avenue, 932 N. Electric Avenue), the Woodburys (801 and 805 N. Marguerita Avenue), R.W. Turner (821, 822 and 825 N. Olive Avenue), and the Sidney Graves family (920 and 926 N. Olive Avenue). A.C. Thompson Builders purchased three lots at 909, 917, and 919 Dos Robles, where they erected three two story residences at a cost of $4,000.00 each.

The majority of the homes, however, were built by their owners, sometimes with the assistance of a local contractor. Contractors in Survey Area 1 who built a variety of residences include H.A. and E.P. Whitney, salesmen-turned-contractors and realtors, Aaron Zilarro, Earl Sprague, and W.F. and E.B. Goss. The Goss family were partial owners of Tract 5608, subdivided in 1923.

Notable residents of the tract included:

George Wirth, owner of Descanso Court (see Section 4.4) and member of Alhambra Board of Trustees, at 919 N. Curtis Avenue.

Walter Q. Patten of Patten-Davies Lumber in Alhambra, 920 Marguerita Avenue.

W.H. Judson, manufacturer of art glass, 919 Marguerita Avenue.

R. Paul Judson, manufacturer of art glass, 805 N. Electric Avenue.

J.B. Scullin, president of the Alhambra Business Men's Association, 702 N. Bushnell Avenue.

Two prominent Los Angeles contractors are represented in the tract: the Milwaukee Building Company, the precursor of the architectural firm of Meyer and Holler, who designed the Chinese Theatre in Hollywood, and the Ye Planry Building Co., a Hollywood firm specializing in Craftsman homes. Frank M. Tyler, a noted Southern California

architect, designed the residence at 901 N. Bushnell. No other associations with architects were able to be verified by the survey research, perhaps due to the nature of the surviving research resources.

While most buildings were constructed as single family residences on large lots, there are some interesting groupings on Dos Robles with common driveways which merit attention. V. Robinson and O.D. Casselman designed and built the pairs at 621 and 623 and 629 and 631 Dos Robles Place. Other similar pairings exist at 813 and 815, 911 and 913, and 917 and 919 Dos Robles.

Several individual homes stand out, as well, for architectural quality or as representatives of major periods in the architectural-evolution of Alhambra. The Graffen House (1306 W. Pine) is the best example of the American Foursquare genre in the survey area. Built concurrently with the two story Foursquare houses, single story cottages shared many of the same characteristics. Examples of this phase in residential construction include 901 and 926 Bushnell, and 906 and 915 N. Electric. It is the principles and aesthetics of the Craftsman era, however, that dominate the architectural landscape in the neighborhood. Swiss chalets were especially popular for design inspiration during this time, well-illustrated by 639 Bushnell. Another popular bungalow variation was the so-called "airplane bungalow," examples of which are located at 702 and 816 Bushnell. Other notable bungalows were built at 619 and 917 Bushnell, 733 and 927 N. Electric, 629 N. Marguerita, and 912 and 924 N. Curtis. Significant clusters of Craftsman homes are located at 819 to 909 N. Marguerita and on the west side of the 900 block of N. Atlantic. An alternative to the Craftsman style, the Mission Revival, is represented at 914 Bushnell. Although

the great majority of bungalows in this survey area are Craftsman, a significant minority were built in the revival styles popular between the wars. A four-plex, at 624-626 Bushnell is the best example Spanish Colonial Revival, and a bungalow at 730 N. Electric demonstrates a typical American Colonial Revival scheme. Two non-residential buildings, a two story commercial vernacular at 1700-1706 W. Huntington Drive and a pre-fab Moderne gas station at 1519 W. Alhambra Road. were included in the survey and are thus notable for their use.

Visually, one of the most remarkable features of Survey Area I is its integrity. Although many lots have additional units or garage apartments, the dominant quality is that of a single family neighborhood. This impression is heightened by the consistency of scale and setback. Other unifying features include the compatibility of the architecture in terms of style, materials, and roof configuration, the regular alternation of front yards and side driveways, and the presence of street trees where they occur. Some intrusions, from recent construction or from insensitive alterations, have taken place. Nonetheless, a strong sense of time and place emerges, a product of the interaction of the historic architecture, community design features, and easily recognized boundaries.

4.3: Survey Area 2: Ramona Park, et al.

The southern survey area is comprised of three tracts: Ramona Park, subdivided in 1906, and Tracts 4704 and 4376, subdivided in 1921. Located near the southern city limits, Survey Area 2 is bounded by South Ninth Street on the west, West Norwood Place on the north, South Garfield Avenue on the east and West Ramona Road on the south. The Ramona Park subdivision dominates the historic identity of the survey

area.

Ramona Park was one of Alhambra's early premiere subdivisions. The Ramona Park Building Company, with principals John B. and Daniel T. Althouse, Otto Arnold, and Jonathan S. Dodge, created design standards by building several Craftsman residences of exceptional quality at various locations within the tract. Those remaining are: 1600, 1609, 1610, 1617, and 1700 S. Second Street; 1605 S. Fourth Street, 1808 S. Sixth Street, and 301, 311, 313, and 325 W. Ramona Road. The generous proportions of the houses were accommodated by amply-scaled lots, many of which boasted a 110-foot frontage and a 160-foot depth.

In 1908, Ramona Park was annexed to the City of Alhambra, along with the settlements of Shorb and Dolgeville. The newspapers reported that "heavy restrictions have been put on all the structures, and the result is that practically all the houses are of the $2,000 to $5,000 class." (The Advocate, January 29, 1908, p. 1). Construction notices were regular: a Sixth Street grouping of residences by the Ramona Park Building Co., each costing $4,000, was listed in the Alhambran Advocate of 1911. Alhambra's passion for horticulture was apparent in an article on the Fred W. Marshall residence at 1601 S. Fourth Street, where Mr. Marshall, a real estate broker, was said to cultivate "giant" chrysanthemums in "one of the finest private gardens" in the area. By 1912, a new lighting system had been installed by the city and ordinances for paving, grading, and curbing had been approved. Homes were selling for $6,500 and up.

Throughout the subdivision, which extended from Garfield west to Sixth Street, a number of substantial residences remain. In addition to those built by the Ramona Park Building Company, several others

deserve mention. They are the Marshall, Johnson, and Dietrick Residences at 1601, 1815, and 1833 S. Fourth Street, the Schneller residences at 1821, 1825, and 1829 S. Fifth Street, 1850 S. Fifth Street, and 405-07 and 409-11 W. Ramona Road.

In the 1920s, the area saw a resurgence of growth as Alhambra's population soared. Two subdivisions on the west side of the survey area were opened as a result. Housing constructed at this time was primarily one story Period Revival, Mediterranean, and American Colonial Revival bungalows, built on the standard 50 x 150 lots of Tracts 4376 and 4704. The 1600-1800 blocks of S. Sixth, Seventh, Eighth and Ninth Streets contain a high concentration of relatively intact housing from this period. Infill construction in Ramona Park was quite common, with the larger lots often being subdivided by the owners.

Several contractors and builders made their mark on the area. J.T. Smoot and T.R. Hyatt each built several residences in the area, but by far the most prolific was George Peterson. Peterson, the owner of the Alhambra Lumber Company, was said to have erected about 3,000 homes in Alhambra and Southern California. Born in Sweden in 1887, he arrived in Alhambra in 1907 and proceeded to play a major role in shaping the built environment of the community. He lived just south of the survey area on Wilson Avenue, now Atlantic Boulevard.

While the residents who built homes in the tract at the turn of the century were retired, professionals, or ranchers, the population during the 1920s were carpenters, electricians, mechanical engineers, and teachers. Families often lived in close proximity to each other, children buying a lot across the street from their parents or a few blocks away. As in the case of Survey Area 1, investors would buy

several lots and use the same contractor on each project. Among these developers were Carrie Boller (with contractor T.R. Hyatt); Roy Johnson, William Luethke and George Cree (contractor George Peterson); E.E. Betts (contractor Vance Auxier); and C.B. Collins (contractor, Eugene Weston).

Residences of special interest in the survey area, in addition to the aforementioned Ramona Park Building Company houses are:

1708 S. Second St. **Paden Residence, 1914.** This Craftsman residence, which retains its fine detailing, was built for the daughter of Jonathan S. Dodge, the "prominent Southern California capitalist" who was one of the developers of Ramona Park, and her husband Franklin Paden, an attorney who became the chief public defender for Los Angeles County.

1719 S. Second St. **De Borde Residence, 1922.** Somewhat of an anachronism, the construction of this Mission Revival Style residence may have been motivated by a campaign in the 1920s to rekindle interest in Alhambra's Moorish past.

1615 S. Third St. **Bentel Court, 1924.** Constructed by a real estate developer who lived nearby at 1601 S. Third, this complex is an example of a housing type that is becoming rare in Alhambra. The U-shaped Mediterranean-style court has eight units grouped around a central courtyard and is compatible in style and scale with the neighborhood's single family residences.

1601 S. Fourth St. **Fred W. Marshall Residence, 1911.** Real estate entrepreneur Marshall and his family occupied a large Craftsman residence on the corner of Fourth and Norwood. His gardens were a fine example of the area's interest in horticulture. The residence is largely intact, and retains its third floor billiard room.

1815 S. Fourth St. **J. Herbert Johnson Residence, 1908.** James Johnson, a "manager," occupied this residence with his wife Bessie. Later it was the home of one of Alhambra's mayors, Norma Yocum. Located on two lots in the Ramona Park Tract, it is a good example of the area's first residences.

1833 S. Fourth St. **Dietrick Residence, 1910.** With its neighboring structure, the Johnson residence, this substantial turn of the century residence typifies the lifestyle in the tract in the early years of the community's development. The residence exhibits a combination of Victorian and Craftsman elements in its plan.

1820 S. Fifth St. A Craftsman residence with an Oriental flair,

the home's central feature is its porch. The piers and roof supports give the bungalow an exotic appearance. Largely intact, it is evocative of the character of Ramona Park during its prime period of growth.

1812 S. Sixth St. Howes Residence, 1931. The most notable example of Spanish Colonial Revival architecture in Survey Area 2, this residence incorporates many features of the style, including a courtyard entry, colorful glazed tile and wrought iron detailing.

Unlike Survey Area 1, this neighborhood has suffered from high density zoning leading to incompatible new construction. Even so, certain groupings retain a strong sense of historic character. Specifically, the Ramona Park Building Company's bungalows on South Second and West Ramona are landmarks not only in terms of their outstanding architectural qualities and historic association with community development, but also in terms of their quite notable physical presence. They defined the neighborhood when it was first built, and they continue in that function today. In recognition of this fact, the evaluation committee accorded these bungalows a rating of "3D," indicating a potential National Register District.

4.4: At Large Sites.

In addition to the two neighborhoods documented above, the Alhambra survey identified over 100 individual sites within the city limits which possess historic, architectural, or cultural significance. Thirty-four sites were chosen for documentation by the 1984-85 survey. These included twenty residences, four religious institutions, one educational facility, five institutional buildings, and four commercial and/or industrial structures. The majority of the thirty-four structures reviewed were determined potentially eligible for listing on the National Register of Historic Places; all were deemed to possess local

landmark status.

A. **Residences:** Included in this category were the oldest extant residences in Alhambra which were not part of either neighborhood survey area, homes of Alhambra pioneers, and houses which possess outstanding architectural merit. These are:

200, 204, 208 E. Beacon
217 S. First
403 S. Garfield
300 N. Granada
111, 117 N. Stoneman

Alhambra's collection of Victorian era buildings dates from the 1880s and 1890s. Three of these residences establish a grouping on E. Beacon and were formerly part of one of Alhambra's earliest hospitals. 200 E. Beacon is the former residence of pioneer George B. Adams, a retired merchant from Chicago, who came to Alhambra in 1876, and helped shape the city's destiny. The home was moved from its original location on Main Street. As a whole, these Victorian era homes typify the lifestyle of the retirees and wealthy ranchers who inhabited them before the turn of the century. 208 E. Beacon, a proto-typical Queen Anne cottage, is perhaps the most intact 19th century building in Alhambra.

11 Halstead Circle. Reputedly the oldest residence in Alhambra, this Greek Revival wooden structure was built by the Samuel M. Halstead family shortly after their arrival in 1877. Halstead purchased ten acres of surrounding property from Don Benito Wilson, planting the acreage in oranges. Three or four houses were built by relatives on Halstead Circle, but No. 11 is the only survivor. Halstead died in 1879, but his wife successfully operated the "Orienta Ranch" for many years. The original ranch was subdivided in 1922. The Halstead family remained active in civic and religious affairs in the community until the mid-1960s.

502 N. Story. The residence of F.Q. Story, the home was built in 1883-84 by one of the founders of Alhambra's citrus industry. Mr. Story was one of the organizers of the Alhambra Orange Growers Association and president of the California Fruit Growers Exchange. He was also instrumental in providing rapid transit to the community in the form of the Pacific Electric rail line.

822 N. Monterey, 1904. An example of turn of the century transitional architecture poised between the exuberance of the Victorians and the simpler Craftsman designs.

816 E. Alhambra Rd., James A. Reid Residence, 1912. A particularly fine example of the Craftsman style located in the northeast section of the community.

22, 107, 115, 125, 130 Champion Place. Like Halstead Circle, this unusual cul-de-sac on the city's eastern border maintains an ambience of a former time. S.W. Champion subdivided

the area around his residence at Champion Place and Main St. in 1909, naming it the Orienta Tract. Lots were large (75' x 150') and several residences were developed with attractive gardens. The Seth Champion Residence at 125 retains its garden, located on the corner of Orienta and Champion. The street attracted a number of artists, such as Norman Rockwell (who married resident Mary Barstow) and Tenney Johnson.

Courts: 341 N. Garfield (1904) and 509 N. Atlantic (1911). Both of these Craftsman courts are excellent examples of multi-family apartment courts built during the early years of the century. Designed to be compatible in style and scale with the single family residences which surrounded them, the courts offered privacy without the maintenance of a home. While Descanso Court, at 509 N. Atlantic, adheres to the traditional plan of separate bungalows grouped in a U-shape around a central garden, the Garfield Inn, at 341 N. Garfield, departs from convention by incorporating a continuous two story structure around its court. Both were popular with tourists seeking to escape cold winters in the East.

1350 S. Fremont. The A.D. Cajal Residence is a fanciful example of the Oriental influences on Craftsman architecture. The carved dragons on each pier and rafter give this c. 1906 home an exoticism seldom matched in Southern California. The origins of this residence are shrouded in mystery, but it is known that its owner, a well-known insurance broker, planned an extensive estate consisting of several buildings at this location.

1700 Grandview. Known as the Pyrenees Castle, this 1926 mansion modeled after a castle in Northern Spain is the brainchild of Sylvester Dupuy, an immigrant who made his fortune in agriculture. Reputedly built at a cost of $250,000 atop a hill in southeast Alhambra, the Castle has been a local landmark since its construction.

B. Religious Institutions:

Carmel of St. Therese, 215 E. Alhambra Rd., 1923. Apparently designed by noted Southern California architect John C. Austin, this retreat for a contemplative order from Chicago is an oasis of serenity. The chapel also served as a parish church briefly in the 1920s, until the parish of St. Therese relocated further to the east on Alhambra Road in 1927.

First United Methodist Church, 9 E. Almansor, 1923. Founded in Alhambra in 1887 by the Halstead, Adams, and Weeks families, on land donated by B.D. Wilson, the present church building is the second site for this congregation. One the grounds of the one-time Temple Estate, the building, designed by C.F. Skilling, was dedicated in 1926.

St. Stephen's Serbian Orthodox Church, 2511 S. Garvey, 1949

(social hall), 1952 (cathedral). The central office for the Western District of the Serbian Orthodox Diocese for the United States and Canada, this facility is very dramatic in its use of materials and Byzantine-Romanesque design. Its siting, on a hill high above the surrounding community, emphasizes its prominence. It is the only building included in the survey that post-dates 1940.

Holy Trinity Church (Guild Hall), 9 E. Grand, 1908. One of the oldest religious institutional buildings still in use in Alhambra, the Guild Hall was built in 1908 by contractors Robert and Wiley for $1,800 on land given by H.C. Marsh. Now used as a meeting hall, the simple wooden edifice is evocative of the modest beginnings of the congregation.

C. Educational Institutions.

Ramona Convent, 1700 S. Marengo, 1889/1910. The convent is the oldest educational facility in the city still in operation. Founded to provide appropriate education to the young ladies of the San Gabriel Valley, the school has maintained its place in the community since its inception. Administered by the sisters of the Sacred Names of Jesus and Mary, the main building and 1910 additions were designed by noted Los Angeles architect A.C. Martin. Like the Pyrenees Castle, the Convent is located on a hill, and its siting, scale, and styling combine to make it a landmark in the most literal sense.

D. Commercial/Industrial:

904-06 E. Alhambra Rd., Southern California Edison Substation, 1940. A power facility whose inobtrusive design does not impact the residential area it serves.

1240-1314 E. Garfield, Valley Grand Bldg./Garfield Theatre, 1925-26. The San Gabriel Valley's premiere Egyptian Revival style theatre interior housed in a fine example of the brick Renaissance Revival popular in the 1920s. The auditorium seats 1,200. Particularly significant are the iron roof sign, and the Vitaphone mural on the east wall of the structure.

115 S. Palm, Standard Felt Co. The oldest industrial site in Alhambra, this property was once a winery owned by Jacob De Barth Shorb, son-in-law of B.D. Wilson, Alhambra's founder. Passing for a time into the hands of I.W. Hellman and Henry Huntington, the property and its remaining buildings were sold in 1903 to Alfred Dolge, who converted it into a felt factory. The area west of Marengo was renamed Dolgeville, and was annexed to the city in 1908. The utilitarian brick and iron buildings exemplify the beginnings of industry in the city, and one structure may date to the late nineteenth century (Los Angeles Times, 10/25/03).

17 S. First, L.A. Gas & Electric/Red Cross, 1928. One of the best remaining examples of Renaissance Revival archisouth of Main Street was in close proximity to the civic and commercial centers of the city. Fine detailing, executed in terra cotta, ornaments the brick structure.

E. Civic Institutions:

601 E. Main, Elks/Masons/YMCA, 1930. This two story, U-shaped Spanish Colonial Revival structure on Main Street is an integral part of Alhambra's business district. This building has the unique distinction of being headquarters to several fraternal and civic organizations. Originally constructed by the Elks, it then became the home of the Granada Park Masons, and then of the YMCA in 1943.

1919 S. Palm, Boy Scout Hut, 1937. One of the more unusual structures in the community, this large log cabin was built by the Boy Scouts of Alhambra as a troop project in 1937. It is now used as a developmental center for the mentally disabled.

204 S. Second, Wednesday Afternoon Club/Alhambra Women's Club, 1908. Formed for the purposes of the intellectual improvement and social enjoyment of the ladies of the community, the organization was founded in 1893 by Mrs. George Rice. Called a "very pleasing application of Swiss architecture" at the time of its dedication in 1908, the Craftsman clubhouse was originally located on the corner of Main Street at the arroyo. A portion of the building was destroyed by a flood in 1913, and the rest was moved to its present location. A new dining room and sun room were added in the style of the original. The organization continued to support charitable and cultural causes, changing its name in 1925 to Alhambra Women's Club so as to better reflect its location and membership. Activity has been continuous for over ninety years.

1215 S. Sixth, Firestation No. 2, 1930.
612 W. Shorb, Alhambra Health Center, 1930. Serving the southeast section of the city, this community complex just north of Valley Boulevard is comprised of two brick buildings, a fire station and a health center. Both are built to conform to the residential scale of the surrounding neighborhood. The firestation, designed by John Walker Smart, architect of the Pyrenees Castle, has a tower, while the health center is designed in the Monterey Colonial Revival style.

4.5: Local Architects and Contractors.

While the survey did not uncover a vast quantity of structures

designed by notable Los Angeles or Pasadena architects and builders, it is of interest that several prominent local firms were represented. Most of these efforts were not located within the present survey areas. John C. Austin (architect of the Griffith Park Observatory) and A.C. Martin (who designed the St. Vincent de Paul Church in Los Angeles) both built structures for the Catholic Church--the Carmel of St. Therese retreat by Austin (1923) and the Ramona Convent complex by A.C. Martin (1889/1910) Austin also designed a substantial residence for W.B. Allen in 1910. Frank M. Tyler designed a residential structure in Survey Area 1 (901 N. Bushnell), as well as the Bradford, Hanscome, Rice, Rowe, and True residences in other parts of the city. Norman-Marsh, developer Abbott Kinney's architect for Venice and designer of Hollywood's first public library, planned a small residence for a Mrs. Kohler in Alhambra. Other Los Angeles architectural firms who gained commissions in Alhambra were Hunt, Eager and Burns (Orr residence on Vega and Burns' own residence on Almansor), and Hudson and Munsell, the architects of the Los Angeles Museum of Science and Industry (Martin, Richardson, and Valentine residences). C.F. Driscoll, a veteran Pasadena architect whose designs included many notable residences in that community and who published "The Pasadena Book of Homes" (c. 1905), planned homes in Ramona Park for A.M. Warren and Albert L. Granger (both demolished) and for Edmond Lincoln in the Marengo Tract. Wm. J. Saunders, architect of the Rhodes residence on Bellevue Drive in Pasadena, designed a Mission-style apartment for a Mr. Shannon in 1907.

Building companies of Los Angeles whose work appears in Alhambra are the Milwaukee Building Company and the Ye Planry Company (see above). A dozen notices of building activity were filed by the Milwau-

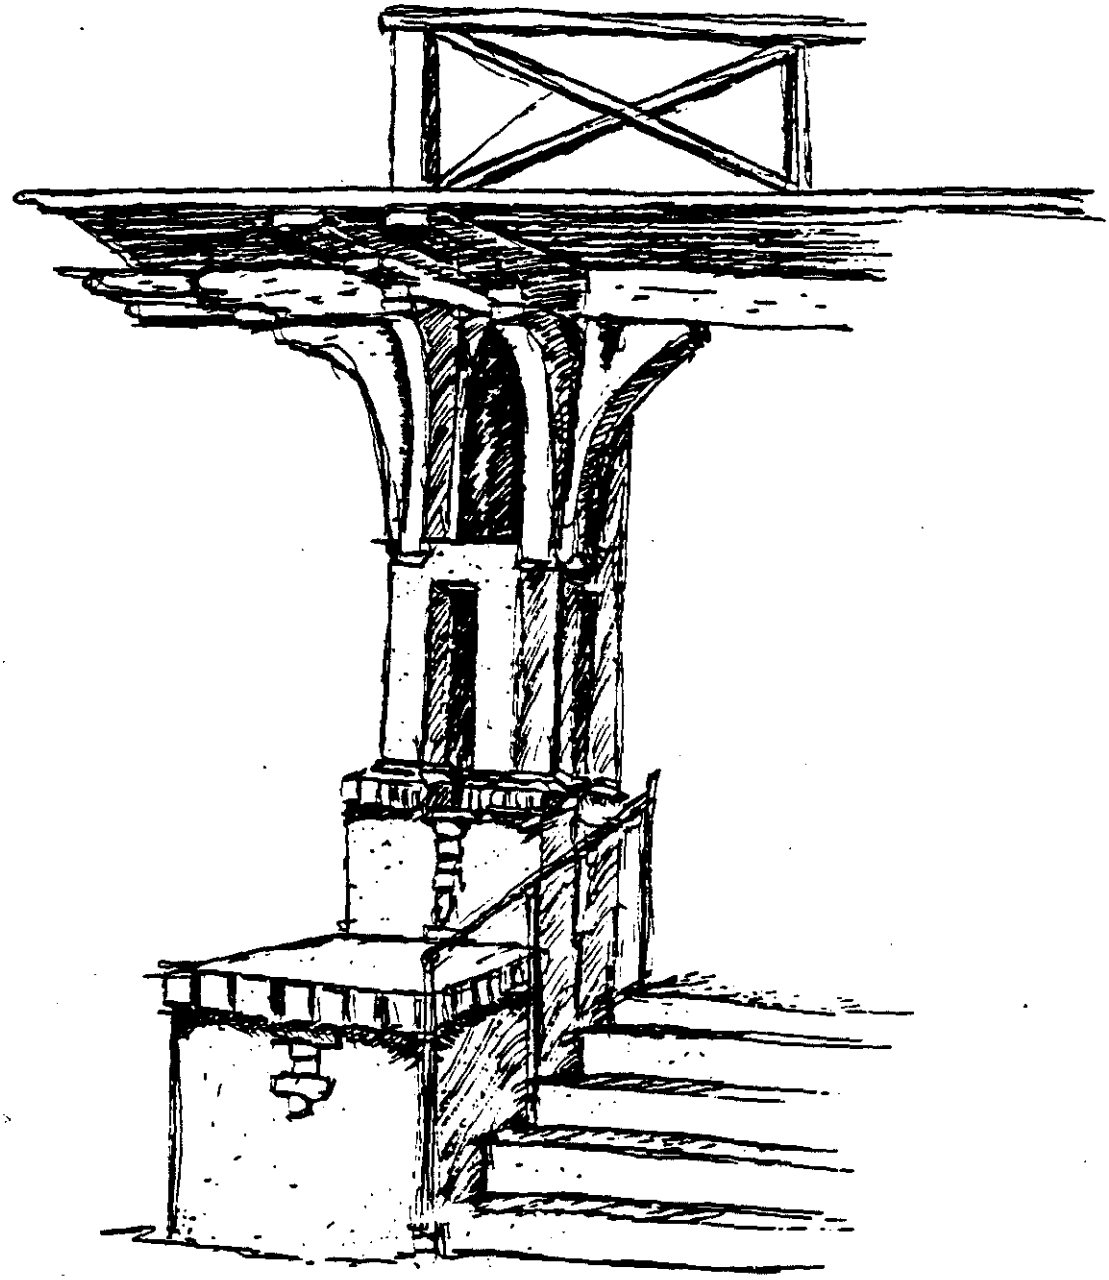
kee Building Company between 1907 and 1910, indicating substantial activity on the part of the firm in Alhambra. Most were five to eight room residences ranging from $1,000 to $4,000. Pasadena contractors Schilling and Luce built several similar six room dwellings in the area for an approximate cost of $2,000 each.

Research has indicated that two local architects, P. August Westberg and R. Myron Woolpert, made a strong contribution to Alhambra's built environment in the early years of the century. Most of their documented work appears to have been demolished. Westberg prepared both commercial and residential designs; among them the Methodist Chapel (Main and Chapel, 1909), a 9-unit brick store building for Sidney Beach (1909), and the Newstrom (Pine and Garfield, 1907), Myren (139 N. Fifth St., 1907), and A. Johnson (1907) residences. R. Myron Woolpert studied architecture at the University of Southern California, and practiced in Los Angeles before moving to Alhambra in 1905. Woolpert, who was also the city building inspector in 1908 when he planned the new city hall and "detention" center on North Second Street, designed the Wednesday Afternoon Club building (see individual sites), the Knights of Pythias building (Main and Gardenia, 1907), the Masonic Temple (First and Main, 1907), two brick buildings on North Garfield (1908), and the Dolgeville Bank. His residential designs included plans for C.S. Wilson (25 S. Hidalgo, 1909), A.L. Johns (Fifth St., 1910), J. Peck (Alhambra St., 1910), Herman Martens (Main and Hidalgo, 1908), C. Bootes (S. Hidalgo, 1910), and A.G. Hutchinson (29 N. Almansor, 1910).

4.6: Summary.

The 1984-85 Alhambra Historic and Cultural Resources Survey unco-

vered a rich resource for the community. Several neighborhoods exemplify the quality of life in the city during various periods in its development. Of particular interest is the city's high concentration of notable Craftsman residences, the quality and variety of its religious institutions, and the examples of Victorian era residences scattered through the city. Several neighborhoods and sites not documented as part of the 1984-85 effort deserve further study (see below). The survey has begun the process of documenting the city's built environment, revealing the patterns, trends, and personalities who helped to shape the area.



V. RECOMMENDATIONS

In accordance with the purposes and goals of the survey stated in Section II, the following recommendations address community needs and interests from both a planning perspective and a public education standpoint.

5.1: City Actions.

It is anticipated that the Alhambra Historic and Cultural Resources Survey will play an important role in future planning efforts by the city. The staff of the Planning and Building Department is aware of the project's purpose, having attended a workshop midway through the program to familiarize them with the process, its methodology, and the results of similar efforts in other communities. Copies of the survey products, including the final report, forms, and maps, as well as recommendations for future survey work, will be available to the department.

At present, the City of Alhambra has no comprehensive and specific policy directed towards the preservation and enhancement of the city's historic built environment. It is recommended that an **Historic Preservation Element** be adopted to formulate such policy, bring it into compatibility with other city policies and procedures, and to establish implementation measures and programs. Historic preservation elements of general plans are authorized in California by Section I, Section 65303,j. of the Government Code.

A vital component of such a plan is the enactment of a **heritage conservation ordinance.** Such an ordinance would recognize the findings of the Alhambra Historic and Cultural Resources survey by establishing

mechanisms for the designation of individual landmarks and of neighborhood conservation zones. The criteria used in the survey and submitted to the city for approval were formulated with these purposes in mind (see Section 3.2). Moreover, the evaluation categories established by the State for local surveys specifically address these goals. It is important to recognize that the concept of an "historic environment" includes not only individual landmarks, but also districts of buildings which individually may not qualify for designation, but as a whole are particularly evocative of a historic period. In addition to buildings, community design features (see Section 4.1) should also be considered for their contribution to the historic fabric of the environment. The ordinance should include, but not necessarily be limited to, provisions which:

1. Itemize criteria and procedures for designation;
2. Encourage appropriate rehabilitation of historic resources by issuance of certificates of appropriateness;
3. Discourage demolition of structures fifty years or older or which contribute to a historic district by allowing a minimum 90-day stay of demolition for review of alternatives.
4. Promote public awareness of Alhambra's heritage.

The City has indicated that it would seriously consider the establishment by ordinance of qualified historic districts identified by the survey.

Currently, the City has several design standards which must be met by all new construction. These standards require design compatibility in order to maintain the character of the city's neighborhoods. The City's planning staff will be much better able to enforce the design standards when the architectural style and historic significance of

buildings and neighborhoods has been carefully researched. In addition, the survey has highlighted the important role of parkways, street trees, setbacks, driveways, and parking configurations play in determining the character of neighborhoods. Roof shapes and heights, scale, and materials of construction also directly affect the quality of the historic built environment and conformance to historic practices should be encouraged.

The City is very interested in reviewing the zoning of certain multiple-family areas. Presently, 55% of the residential land in Alhambra is zoned for multi-family use. Many of these areas are still developed primarily with single family homes. A revision of the General Plan is now in progress, and is targeting areas where down-zoning is desirable. The survey should play a large part in determining where down-zoning and preservation will occur.

In addition to identifying buildings, districts, and features which could be designated by local ordinance, the survey identified buildings and districts with potential for listing on the National Register of Historic Places. This will facilitate compliance with Section 106 of the National Historic Preservation Act of 1966, which requires an assessment of impact on historic structures and consideration of mitigating measures for all federally-funded projects. The requirements of the California Environmental Quality Act (CEQA) will also be easier met with the Historic and Cultural Resources Survey in place. It should be stressed, however, that the existence of a survey is not a substitute for the standard review process, but a tool to ensure the accurate assessment of historic properties in Alhambra.

5.2: Rehabilitation of Historic Structures.

The City of Alhambra uses a portion of its Community Development

Block Grant (CDBG) monies to fund low-interest rehabilitation loans for residences. Over the course of the survey, the coordinators spoke with loan program staff about appropriate techniques of rehabilitation. It is recommended that the City monitor city-assisted improvements to encourage appropriate treatments for historic buildings. Specific areas of concern include:

1. **Siding.** The re-surfacing of wood exteriors with stucco or textured coatings should be discouraged, especially on exteriors visible from the street which contribute to the architectural or historical identity of the city. In addition, the re-stuccoing of originally plastered buildings should attempt to duplicate the original textures and techniques.

2. **Windows.** The replacement of wood window frames with aluminum ones, especially those of a different size, seriously compromises historic character.

3. **Porches.** Inappropriate replacement of porch supports, or the removal of the porch altogether by expanding the interior, also detracts from the quality of the building and its contribution to the streetscape.

4. **Roofs.** Care should be taken that features which contribute to the original design, such as shingles or exposed rafters, be retained, repaired, or compatibly replaced.

5. **Secondary materials.** The retention of character-defining secondary materials in their original state, including art glass, brick, cut stone and cobblestone, is encouraged.

Survey documentation will also facilitate private sector participation in rehabilitation projects. Investors should be encouraged to renovate historic properties through the use of federal tax incentives, and by technical assistance with appropriate rehabilitation techniques, as well as with low-cost, city-sponsored loans. A 25% investment tax credit is available for buildings which are potentially eligible, either individually or as contributors to a district, for listing in the National Register, are income-producing, whose rehabilitation costs meets certain requirements, and whose renovation plans are in confor-

mance with the Secretary of the Interior's Guidelines for Rehabilitation of Historic Buildings. Information concerning the tax credits will be provided to the Planning Department for dissemination to real estate developers, agents, and other interested parties. The 1984-85 survey identified thirty-six sites of potential National Register eligibility, and there are others which were not evaluated within the scope of the present contract. Alhambra has a rich architectural resource in its variety of institutional and religious structures, many of which merit special consideration in future planning efforts. Organizations should be aided and encouraged to maintain and rehabilitate these properties sensitively, with an eye to preserving their historic character. Adaptive re-use, if appropriate, should be carefully considered as an alternative to demolition.

Other sources of funding may also be available for rehabilitation in Alhambra. It may be possible that a portion of the redevelopment funds generated through tax increment financing could be directed towards preservation activities. The use of industrial development bonds, particularly those known as Marks Act Historical Rehabilitation Bonds, should be explored.

5.3: Public Education.

One of the primary purposes both the City and the Alhambra Historical Society had in sponsoring the survey was to strengthen the community awareness of Alhambra's sense of place and historical identity and to encourage community involvement in preservation. Three aspects of the work program were structured to meet this goal.

First, the involvement of citizen volunteers in the survey has

been demonstrated to be a potent tool for community outreach. Participation in the survey enables the volunteer to better understand his environment, learn how to find out more about it, and to have his contributions, as part of the survey, become part of the planning process. The materials prepared for the survey, especially the guide "How to Research Buildings in Alhambra" and the various architectural glossaries distributed during the survey training, could be re-used and more widely distributed, in part as a component of a further survey effort. Future volunteer programs are to be encouraged, and should be successful, given the reception of this year's project.

Second, newspaper articles and press releases were planned to coincide with the initiation and termination of the first year's survey effort. Several reporters have expressed interest in various aspects of the process, from uncovering unknown "treasures" to volunteer involvement (see Appendix). Perhaps the most effective method to stimulate interest in the city's heritage, newspaper articles should be actively sought in the future by the City and the Alhambra Historical Society.

Third, a format, text, and graphics for a brochure were prepared as part of the current program. Designed to be used as self-guided walking, driving, or bicycling tours, the brochures should be published and made widely available. The City perceives the results of the survey to be a public relations tool; the brochures will be helpful in this regard.

Other actions and programs should be explored for their potential to stimulate community interest and appreciation of Alhambra's cultural heritage. The survey results, including Historic Resources Inventory

Forms, Final Report, and maps will be housed in the Planning Department, where they will become part of the public record. In addition, survey work products, such as the extensive research files that were compiled, will also be turned over to the City. It is recommended that copies of all or part of these materials be turned over to the Reference Department of the Alhambra Library for the widest possible exposure. The Alhambra Historical Society's close and mutually beneficial relationship with the library should be exploited, perhaps by the establishment of an Alhambra History Center, and the Society's museum and oral history projects encouraged. Survey data could also be used to plan special events, such as neighborhood tours, block parties, or Historical Society programs. Rehabilitation workshops for property owners or for potential investors are an option, as is the development of educational materials for children.

5.4: Continuation of the Survey.

In order for many of these recommendations to be effective, the City needs a comprehensive, city-wide inventory. Indeed, the City has indicated that this was an expectation in planning for the present program. See Section 6.2 for a discussion of the potential for future surveys. It is recommended that the services and financial assistance of both the Alhambra Historical Society and the Office of Historic Preservation be enlisted in a second-year effort.

VI. CONCLUSIONS

6.1: Successes and Failures.

The Alhambra Historic and Cultural Resources Inventory successfully developed a work program designed to aid the city in future preservation and survey efforts. The methodology used in this endeavor was designed to ensure a comprehensive and systematic approach to documentation of the built environment. One of the chief components of the program was the preparation and dissemination of a step-by-step research guide, "How to Research Buildings in Alhambra," and a form to record raw data. A brief community history was also included. Other materials designed to aid the surveyor are included in the appendix. As a result of this first year effort, Alhambra not only has a comprehensive picture of the development of two historic neighborhoods and a history of many of the most prominent buildings in the community, but also a format and procedure for future surveys.

A second success of the survey effort involved the mobilization of people in a volunteer effort. Press releases were published in several sections of the Los Angeles Times (Real Estate, Volunteer Opportunities, San Gabriel) and other local newspapers, as well as in the newsletters of historical societies and preservation organizations. The publicity resulted in the recruitment of a cadre of dedicated volunteers, many of whom contributed substantially to the survey's general research files.

The general research file documents building notes from local newspapers, historical brochures, trade journals, and other sources, which combined constitute a comprehensive record of most building activity in the community for the years 1908-1913. Because this infor-

mation is not limited to the survey area, it provides a more comprehensive picture of Alhambra's development. This file also contains some biographies and other articles on street improvements. It is the beginning of a tremendous resource for those interested in Alhambra's built environment.

Over the course of the survey, the volunteers and consultants answered questions asked by residents of the survey area, creating a heightened awareness among the general public about the survey's goals. Residents have indicated a willingness to participate in planning for the protection of their neighborhood character. In addition, a presentation made to the Alhambra Coordinating Council for dissemination to its numerous membership organizations was very well received.

The partnership of the City and the Historical Society is to be commended. From the beginning, the Society played an active role in interviewing the coordinators, recruiting volunteers, and committing financial resources to the project. The city staff provided valuable assistance, displaying a positive attitude about the project. Among those who were especially helpful were the staffs of the Planning Department and the library. Both directed public inquiries to the coordinators, resulting in dialogue about the use of the investment tax credit for eligible properties, re-use of endangered buildings, and public participation in future planning efforts regarding historic properties.

Perhaps most importantly, the survey demonstrated, to the city government and to the public, that Alhambra does indeed have an architectural heritage. Like so many communities across the nation, particularly in Southern California where the traditional concept of

"history" must be re-defined, Alhambra's residents have gotten into the habit of equating "old" with "old-fashioned" at best and "blighted" at worst. This is particularly evident in the City's redevelopment philosophy and in the high capacity zoning of many older residential neighborhoods. The survey provides a tool for encouraging a more liberal city policy towards older buildings. It will also be the foundation of a public education effort by the City and the Alhambra Historical Society that will begin with the publication of a self-guided tour of the survey areas.

There were, however, some difficulties encountered in the completion of the survey contract. Foremost among them was the confusion of specific deadlines for the signing of the contract between the City and the State and the resulting shortened timespan imposed on the coordinators when the discrepancy in the funding schedule was discovered at the end of April. The coordinators were able to negotiate a mutually satisfactory deadline for the transmittal of final documents with Gene Itogawa of the State Office of Historic Preservation. Due to a change in personnel in the Planning Department, it appeared that the City was unaware of contract deadlines and the funding cycles of State grants. Closer communication between the Office of Historic Preservation and its grantees is strongly encouraged, and perhaps some written deadline schedule given to the grantee at the time of the award is in order.

An additional difficulty in the 1984-85 project handicapped the last months of research effort. Almost all copies of the Southwest Contractor and Manufacturer (Southwest Builder and Contractor) were removed from the Los Angeles area to Ann Arbor, Michigan for microfilming. Three sets of this invaluable trade journal exist in Southern

California, and are located at the Los Angeles Public Library, at UCLA's Architecture Library, and at USC's Architecture and Fine Arts Library. All were sent out in mid-April, hampering the research effort considerably. While in some surveys this resource is not critical, it was considered a major part of the 1984-85 study due to a lack of adequate building permit records in the city for the years 1900-1937.

6.2: Potential for future surveys.

As has been stated elsewhere in this report, there is great potential for a continuing survey effort in Alhambra. Using the methodology developed in 1984-85, the City should continue to document the individual sites and neighborhoods identified by consultants and members of the evaluation committee. The initial windshield survey by Charles Hall Page and Associates of the Central Business District should be expanded and documented. Additional possibilities for future surveys are:

- The two residential neighborhoods identified by Alhambra but not part of the first year effort.
- The at-large site list, consisting of 108 addresses, not documented during 1984-85.
- The residential area north of Main and east of Garfield to the city limits, including the Linderaxa Park area.
- Certain building types, including churches, bungalow courts, institutional or public buildings.
- Special design features: Parks, open space, and the remaining arroyos, physical features which played a vital historical role in Alhambra's development. The City's interest in horticulture and the influence of the citrus industry deserve attention as well.

The 1984-85 survey effort enhanced the accumulation of information begun by the Alhambra Historical Society's oral history and museum programs, adding to the data base by documenting Alhambra's built

environment in a systematic way. In addition to the actual building files, other resources have been generated which should be expanded in the coming years. Volunteers should continue to research building notes in the Alhambra Advocate and to cross-reference city-directories and historic pamphlets.

6.3: SOHP Participation in the Survey Process.

As the funding agency, the Office of Historic Preservation is most certainly the catalyst in most survey efforts. In its role as advisor and mentor to local governments, A greater impact on the local community could be made by pursuing the following suggestions:

A. The redefinition or further amplification of the "5" category (now stated as "individually listed or eligible for listing under a local preservation or landmark ordinance"). While it is the intent of the state to encourage preservation of locally significant structures and groupings, this category may need to be clarified in the manner of the "4" category which precedes it. Many communities have no ordinance and therefore no criteria on which to base this classification. Others include language in their ordinance criteria which may allow for the designation of outstanding structures only, and not representative examples of a type. OHP has used different terminology in evaluating redevelopment area surveys, which might be advantageous in this situation as well. Category "5" might be amended to include the phrase "worthy of note" meaning that the structure is a typical example of a particular style or contributes to a substantially intact neighborhood or district.

B. OHP should encourage local governments to become involved in, or at least be cognizant of, regional networks and organizations which could assist in preservation planning activities. For example, the National Trust for Historic Preservation, Southern California Association of Governments, the Los Angeles Conservancy, and the American Planning Association have all provided technical assistance on preservation issues to Southern California Governments in the past year, but many communities did not take advantage of these opportunities.

C. OHP should encourage the implementation of survey grants through follow-up. Technical assistance grants for the drafting of ordinances, design guidelines, etc. should be solicited from cities which have successfully completed surveys.

D. OHP should facilitate and closely monitor all projects using federal or state funds, where the requirements of Section 106 or CEQA may be involved. While many local governments use such funds for rehabilitation programs, low-cost loans, etc., many at the staff level seem unaware of the compliance process required when impacting potentially historic structures.

6.4: Conclusion.

The 1984-85 Alhambra Historic and Cultural Resources Survey has succeeded in documenting the history of the built environment in Alhambra for over 650 residential structures in two neighborhoods and thirty-four individual sites. It has identified the developers, contractors, and architects who shaped the city during the years 1900-1930, a period of tremendous growth and development in the community. It has provided a record of original owners, their occupations, and the lifestyle of each neighborhood. It has begun to document the city's institutions—religious, social, and civic —which have played a role in creating the personality of the city. And it has succeeded in creating a new awareness of the community's heritage from which to build the future.

ALHAMBRA HISTORIC AND CULTURAL RESOURCES SURVEY

National Register of Historic Places Criteria

CRITERIA FOR EVALUATION
NATIONAL REGISTER OF HISTORIC PLACES

The following criteria are designed to guide the States, Federal agencies, and the Secretary of the Interior in evaluating potential entries (other than areas of the National Park System and National Historic Landmarks) for the National Register.

The quality of *significance* in American history, architecture, archeology, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and:

A. that are associated with events that have made a significant contribution to the broad patterns of our history; or
B. that are associated with the lives of persons significant in our past; or
C. that embody the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that posses high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
D. that have yielded, or may be likely to yield, information important in prehistory or history.

Ordinarily cemeteries, birthplaces, or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years *shall not be considered eligible* for the National Register. However, such properties *will qualify* if they are integral parts of districts that do meet the criteria or if they fall within the following categories:

A. a religious property deriving primary significance from architectural or artistic distinction or historical importance; or
B. a building or structure removed from its original location but which is significant primarily for architectural value, or which is the surviving structure most importantly associated with a historic person or event; or
C. a birthplace or grave of a historical figure of outstanding importance if there is no other appropriate site or building directly associated with his productive life; or
D. a cemetery which derives its primary significance from graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events; or
E. a reconstructed building when accurately executed in a suitable environment and presented in a dignified manner as part of a restoration master plan, and when no other building or structure with the same association has survived; or
F. a property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own historical significance; or
G. a property achieving significance within the past 50 years if it is of exceptional importance.

ALHAMBRA HISTORIC AND CULTURAL RESOURCES SURVEY

National Register of Historic Places Categories

NATIONAL REGISTER OF HISTORIC PLACES
ELIGIBILITY STATUS

1. Individually listed on the National Register.
1D. Listed on the National Register as part of a district.
2. Determined individually eligible to the Register by the U.S. Department of the Interior.
2D. Determined eligible only as part of a district.
3. Appears eligible for individual listing.
3D. Appears eligible for listing only as a contributor to a potential National Register district.
4. May become eligible for listing when:
   a) more historical or architectural research is performed.
   b) the property is restored to an earlier appearance.
   c) more significant examples of the property's architectural style are demolished.
   d) the property becomes old enough to meet the Register's 50-year requirement.
4D. May become eligible (as above) only as a contributor to a district.
5. Is listed or is eligible for listing under a local preservation or landmark ordinance.
5D. Is listed or is eligible for listing as a contributor to a locally designated historic district or preservation area.
6. None of the above.
7. Has not been evaluated.

ALHAMBRA HISTORIC AND CULTURAL RESOURCES SURVEY

Publicity and Recruitment

Newsmakers / Surv

Alhambra will take a close look at its history in the coming months during a comprehensive survey of its historical structures.

The city has received a $15,000 grant from the state Office of Historic Preservation to survey and research neighborhoods and commercial districts developed before 1930.

The survey will include more than 800 buildings and focus on potential city landmark structures, the downtown revitalization district, the Main Street redevelopment area and two downtown areas.

The survey has received the support of the Alhambra Historical Society and will be the subject of its meeting 7:30 p.m. next Wednesday at the Alhambra Public Library, 410 W. Main St.

Christy Johnson McAvoy and **Leslie Heumann** of the historic and architectural research firm of Johnson Research Associates will speak at the meeting.

The survey is a major undertaking and volunteers are needed to help conduct it. Those interested in doing so can sign up after the meeting.

For more information call Bill Kinman at (818) 570-5079.

JOHNSON HEUMANN RESEARCH ASSOCIATES

HISTORIC AND ARCHITECTURAL CONSULTANTS

An internship opportunity for interested students is available this winter. The City of Alhambra, with the support of the Alhambra Historical Society, has retained our firm to conduct an architectural and historical survey of significant Alhambra structures and two residential neighborhoods, funded by a grant from the State Office of Historic Preservation. Results of the survey will be used to promote broad public awareness of Alhambra's architectural heritage. The project will extend through June, 1985, but it is hoped that subsequent surveys will encompass other areas of the city.

We are looking for qualified students to participate in this study on a volunteer basis. It will be a good introduction to hands-on architectural history, to research, and to preservation planning, and can be structured to provide credit as independent study. Volunteers will be asked to describe and research significant buildings, to complete California Historic Resources Inventory forms, and to undertake special projects. The qualified volunteer should be familiar with local architectural history and should have some research experience. A two-day workshop will be held in February to train participants in survey work, including the completion of California inventory forms, and to familiarize volunteers with research sources and techniques. Volunteers will then be assigned projects which will require approximately five hours per week from late February through May 1985.

Please make this opportunity known to your students. The project is somewhat flexible, and we can work with you to structure assignments according to the students' course requirements. Application for volunteer internships must be made by January 20, 1985, by contacting us at (213) 851-8854.

Sincerely yours,

Christy Johnson McAvoy

FOR IMMEDIATE RELEASE

ALHAMBRA RETAINS CONSULTANTS TO CONDUCT HISTORIC SURVEY

The City of Alhambra and the Alhambra Historical Society, with a grant from the State Office of Historic Preservation, are sponsoring a survey of major architectural landmarks and residential neighborhoods. Consultants Christy Johnson-McAvoy and Leslie Heumann have been retained to direct the project. Volunteers are needed to describe and research significant buildings, to complete California Historic Resources Inventory forms, and to undertake special research projects. Prior research experience or familiarity with local architectural styles would be helpful.

A two day workshop, beginning Saturday, February 9, will be held to train participants in survey and research techniques. Following the workshop, volunteers will be assigned projects which will require approximately five hours per week for a period of twelve weeks.

Interested persons are asked to contact Christy McAvoy or Leslie Heumann at (213)851-8854 or (818)570-5038 to register for the training workshop or for further information.

JANUARY 1985

HAPPY NEW YEAR

Alhambra Historical Society

410 West Main Street, Alhambra, Ca 91801 (818) 570-5008

(IN THE PUBLIC LIBRARY)

President, Ruth Barry

MEMBERSHIP MEETING, WEDNESDAY, JANUARY 23, 7:30 p.m., ALHAMBRA PUBLIC LIBRARY

Mrs. Claire Bogaard, Executive Director of Pasadena Heritage, and advisor for the National Trust of Historical Preservation, will present a program on the "History and Architecture of the San Gabriel Valley", complete with slides showing preservation efforts of many familiar area buildings. Don't miss this important meeting!

ALHAMBRA HISTORIC SURVEY

Speaking of historical architecture, Christy Johnson McAvoy and Leslie Heumann, coordinators of Alhambra's Historic Preservation Survey, have begun their local research, and have scheduled a training session for all who are interested in volunteering to assist in this important project. On Saturday, February 9, at the Granada Park Branch Library, 2037 So. Fremont, volunteers will be trained in survey and research techniques, after which they will be assigned projects for a period of twelve weeks.

The Historical Society has pledged assistance to this project - so please call Christy or Leslie to add your name to the list of participating volunteers. Call either (213) 851-8854 or (818) 570-5038.

HISTORICAL SOCIETIES ROSEMEAD MINI-CONFERENCE, JANUARY 19

The Associated Historical Societies of Los Angeles County will hold their January 19 Mini-Conference in Rosemead at the Community Recreation Center, 3936 N. Muscatel. The Conference can't get much closer to us or be more convenient - why don't you plan to attend.

On the agenda: an historical overview of Rosemead by Hugh Foutz, a presentation of L.A. County Library's "California Collection", a Talk on "Early California Cemeteries" by Dr. Edwin Carpenter. Lunch, following the meeting, will be at T & J's, but is optional.

Afternoon tours, which are highly recommended, are the Savannah Cemetery in Rosemead at 1:30, the Dinsmoor Heritage House in Rosemead at 2:00, and the El Monte Museum at 2:45.

The whole affair begins at 9:00 a.m. - try to attend all or part of the festivities. Reservations must be made right away. Call Ruth Barry at (213) 283-3886.

MISSING A SWEATER?

It's Cold, you left your sweater in the Historical Room, and you can't find it? Call (213) 283-3886 to be reunited with your sweater.

NEW MEMBERS

A warm Alhambra Historical Society welcome to:

William J. Martin, 1705 Fletcher, So. Pasadena, 91030 (818) 799-6235
Marlene Seidel, 915 Edith, Apt. A, Alhambra, 91803 (818) 284-0890
Ann Sullivan, 2825 W. Grand, Alhambra, 91801 (818) 281-5431

A MINI-CONFERENCE FOR YOUR LONG RANGE CALENDAR

Involvement Opportunities

Pacific Asia Museum Seeks Volunteers

MUSEUM—The Pacific Asia Museum will hold a meeting for prospective volunteers at 10:30 a.m. Jan. 30 at the museum, 46 N. Los Robles, Pasadena. Men and women who can help on weekdays or weekends are needed in the bookstore, Collectors Gallery, administrative offices and to give garden talks. Information: 449-2742.

★

PHOTOGRAPHERS—Volunteers are needed to create slides for television public service announcements for the Linden Center, an organization that works with severely abused and neglected children and their families. For information call 391-1098.

★

HOSPITAL—Valley Park Medical Center in Canoga Park is seeking people to work in the hospital's gift shop and other areas. Director of Volunteer Services is Bonnie Hughes, (818) 348-0500.

★

ARCHITECTURE PROJECT—The City of Alhambra and the Alhambra Historical Society, with a grant from the State Office of Historic Preservation, are sponsoring a survey of major architectural landmarks and residential neighborhoods.

Volunteers are needed to assist by describing and researching buildings, completing state inventory forms and helping with special research projects. Prior research experience or familiarity with local architectural styles would be helpful.

A training workshop will begin Feb. 9. Information is available from project consultants Christy McAvoy and Leslie Heumann at 851-8854 or (818) 570-5038.

★

CRISIS STAFF—An eight-week course will begin Feb. 6 to train volunteers to staff the crisis counseling lines for the San Fernando Valley Shelter for Battered Women and Their Children. Prospective volunteers should call for an interview by Jan. 30. Volunteer coordinator is Nikki Stone at (818) 887-6587.

★

FUND DRIVE—"Green Sunday" on Jan. 27 will be the second annual phone-a-thon to raise funds for trees to be planted in Israel and marks the New Year for the Jewish National Fund, which has planted more than 200 million trees in the last 84 years.

Volunteers are needed to serve for two-hour sessions on the phones and to help with assignments and refreshments. Volunteers will work at a North Hollywood location. Information: (818) 990-0511.

★

FREE CLINIC—Pharmacists who can volunteer time in the evenings or on Wednesday afternoons and lab technicians who can help on Tuesday and Thursday afternoons are needed at the Los Angeles Free Clinic. To inquire call Sandi Benning at 653-1990.

★

FOOD CENTER—The Rio Hondo Area Volunteer Center is recruiting volunteers for the Ecumenical Food Center, which gives food free of charge to people in need. Especially needed are people with trucks to pick up donated items. Also needed are volunteers to sort, pack and distribute food. Information: 693-4023.

SAH/SCC Newsletter, February 1985

Alhambra Architectural Survey

Lend Christy & Leslie a Hand

The City of Alhambra and the Alhambra Historical Society, with a grant from the State Office of Historic Preservation, are sponsoring a survey of major architectural landmarks and residential neighborhoods.

Long time SAH/SCC members, Christy Johnson McAvoy and Leslie Huemann have been retained to direct the project. Christy and Leslie need volunteers to describe and research significant buildings, to complete California Historic Resources Inventory forms, and to undertake special research projects. Prior research experience or familiarity with local architectural styles would be helpful.

A two day workshop, Saturday and Sunday, February 9th and 10th, will be held to train participants in survey and research techniques. Following the workshop, volunteers will be assigned projects which will require approximately five hours per week for a period of twelve weeks.

Interested persons are asked to contact Christy Johnson McAvoy or Leslie Huemann at (213) 851-8854 or (818) 570-5038 to register for the training workshop or for further information.

On the Prowl for City History

Volunteers Vital to Neighborhood Surveys

By DIANE KANNER

They roam the Mary E. Foy California room of the downtown library, searching for historical clues. They hole up in the county Hall of Record's Room 103, flipping through 10-pound, leather-bound tract indexes. In settings such as Hollywood High School auditorium, yuppie and senior types listen to the advice of architectural historians.

"If there seems to be a lack of focus here," Robert Winter is saying of his topic, "Magnificent Los Angeles," "it wasn't always so. The town houses and gardens of the old Plaza once gave Los Angeles an orderly idea."

Next, they wander the streets of Southern California neighborhoods, eyeballing the buildings that have been assigned for their evaluation, scribbling in notebooks and clicking away with cameras. At home, they complete state inventory forms.

Who are these snoopy people? Tax collectors? Census takers? Graduate students gone berserk?

None of the above, but a group of volunteers with a special interest the architecture of their community.

They scavenge records and canvass neighborhoods in pursuit of data for the "cultural resources survey."

A dozen Southern California communities, from Redlands to Santa Monica, have been surveyed. Directors are paid from federal grants matched by the municipalities. According to the 1966 Historic Preservation Act, volunteers have to do the legwork if a community is to receive financial backing.

Recent grants have been awarded to Beverly Hills, Redondo Beach and Santa Monica. Twenty Santa Monicans documented 600 buildings in the first phase of the city's survey, and a new $14,000 federal grant will allow them to complete downtown and head into the suburbs.

In Beverly Hills, community development specialist Audrey Arlington says that even though they have yet to select a coordinator or determine when they should begin recruiting, volunteers have already phoned, anxious to help survey the 10,000 addresses.

The city intends to mine the ranks of its new historical society for volunteers. In Los Angeles, where a survey has been in the works for five years, volunteers were drawn from the preservation-oriented Los Angeles Conservancy. Their task is to determine when and where a structure was constructed, who the architect, or contractor, or both, were, and who has held title.

So-called "street furniture," such as manholes and lamp posts are noted, as are parks and open spaces. Even retaining walls, if they are worth noting for their material or craftsmanship, go down in the books. In East Los Angeles, murals were documented as meticulously as 150-year-old haciendas.

Volunteers who already know a thing or two about architecture come away from the survey experience with bits of information they couldn't pick up in a textbook. The legion of 200 who assisted the Los Angeles City Bureau of Engineering in a Hollywood Watlles Park-area survey learned, for instance, that the motel evolved from the bungalow court, right here in Southern California.

Where else but at a Robert Winter lecture could one learn that Simon Rodia of Watts Towers fame had been a tile setter for the phone company? Only Occidental's doctor of ideas could look at a color transparency of Bullocks Wilshire and tell his audience that its stepped tower might have been a mooring for the Graf Zeppelin.

"Survey volunteers need education, but not the variety that you find in the formal university process," according to Leslie Heumann, a one-time volunteer who worked her way into the directorships of the Pasadena, Santa Monica, Glendale and Alhambra cultural resources surveys.

Heumann and her associate, Christy Johnson McAvoy, are reviewing the results of a partial survey of Alhambra. Because city records were not available prior to 1930, volunteers perused early editions of The Alhambran Advocate and the trade publication, Southwest Contractor & Manufacturer, to find vital statistics on a plethora of high-quality Craftsman bungalows that were documented.

Data was compiled on Ramona Convent, an 1889 school for girls that sits above the San Bernardino Freeway. When they found permits that indicated prominent architect Albert C. Martin had designed a 1910 addition, the volunteers knew they'd unearthed "a find." When another religious structure, Carmel of St. Therese convent, was determined to have been designed by John C. Austin, a Martin contemporary who is also well respected, McAvoy and Heumann were buoyed in their belief that Alhambra needs further study.

JOE KENTNER / Los Angeles Times

Christy Johnson McAvoy, left, and Leslie Heumann check out Alhambra Craftsman residence.

In a Hollywood survey, McAvoy learned that residents of a particular neighborhood also were neighbors in Big Bear Lake, where they built second homes.

"Information like this," she says, "adds to a community's self awareness. Surveys allow volunteers to take an active interest in their environment. Surveys have resulted in the creation of brochures, house tours and slide shows. In Pasadena's Orange Heights neighborhood, tremendous spirit came about because of the city's survey. No one can drive through Orange Heights today without an awareness of its architecture."

"California is not lagging behind any state in this effort," asserts Gene Itogawa, a historian of the State Office of Historic Preservation. Every year, Itogawa helps

Please see HISTORY, Page 26

HISTORY: Volunteers Conduct Surveys

Continued from Page 15

determine which of the dozens of California municipalities that apply for federal matching funds will receive them. This year, $164,000 was available.

"In California, or in any state, no one knows neighborhoods better than the local residents," he says.

"Without volunteers," Heumann agrees, "you have an in-house survey and that's politically ill-advised. Without them, you lose an extra pair of eyes."

One Pasadena volunteer reads microfilm of early local newspapers, frayed copies of city directories and minutes of bygone City Council meetings. Through such means, she discovered the architects of homes built for the Scripps and Kellogg families, and found a house designed by the team of Charles and Henry Greene, that had been moved to a location that even local architectural historians were unaware of.

Several other Pasadena women became so intrigued with the Arroyo Seco arts-and-crafts movement that they constructed a model of a Craftsman bungalow and gave it to survey directors for a teaching aid. In Santa Monica, residents of the South Beach area read every city directory and newspaper of a certain era so they could compile an annual directory of the tenants and homeowners in their tract.

McAvoy and Heumann believe that Pasadena has the best records in the Southland, but in any city, a battle of wits ensues when a researcher takes on the records.

"Finding the information on one house can take you to half a dozen record books," Heumann says, "and when you strike out in looking for a building permit for a place on North Sierra Bonita, you try South. You learn to play games with the records. In communities like Pasadena, which hasn't thrown anything out since the 1880s, your work is easier than in those that throw out everything after 30 years. Early Los Angeles records, for instance, are spotty."

But Roger Hathaway, who uncovered significant Irving Gill-designed buildings during his survey of Torrance, and who taught a group of Los Angeles Conservancy volunteers how to winnow their way through the Los Angeles record maze, feels that the City of Angels has the "best" records in the state.

Hathaway is a map maven—"maps are our least utilized resource"—with a propensity for the Sanborn Map library at Cal State Northridge. He tells research recruits to take a look at tract maps, "sometimes the only maps you'll find—period," at U.S. Geological Survey maps, "good for remote areas," and at the county Museum of Natural History's collection of Work Progress Administration maps.

"The WPA maps were a living for out-of-work students and architects," he says. "There's a set in the Los Angeles city engineer's vault. Even the original color of the building materials is drawn in."

These records are available to anyone with an urge to research. Yet without the training, it's unlikely that a curious homeowner could fit the pieces of his dwelling's heritage together in a manner precise enough for a survey.

If a structure is found to be significant because of its style or architect or previous residents, or it was associated with a historical event, it could be nominated for Los Angeles cultural landmark status and inclusion on the National Register of Historic Places. It may also be included in the state Historic Resources Inventory.

A neighborhood may be nominated for Historic Preservation Overlay Zone status. Angelino Heights and South Carthay were designated as HPOZs. Wattles Park was surveyed for its HPOZ potential. Application for the designation will be made with the approval of Wattles Park residents and Ara Kasparian, an environmentalist in the Los Angeles Bureau of Engineering, and Alma Carlisle, architectural assistant.

Kasparian began the Los Angeles survey in Westlake, San Pedro, Venice and Echo Park. In 1981, volunteers worked in Sun Valley, Kedren Park, West Adams, Florence/Avalon and Boyle Heights neighborhoods. During the third year, Wattles Park, North University Park, South Carthay, Vermont/Slauson, Watts, Crenshaw and Sylmar were documented.

In 1984, when the State Office of Historic Preservation cut back funds for the Los Angeles survey, Carlisle, a one-time volunteer, remained as the only paid staff. Since then, she and volunteer photographer Bob Galbraith have documented Pacoima, Melrose Hill, Vernon/Central and the Olympic/Normandie neighborhoods.

A number of surveyed buildings have received the city's historic-cultural landmark status, a designation which makes it mandatory that demolition or alteration permits be approved by the Cultural Heritage Board. The demolition/alteration process may be delayed for up to 360 days. Recent additions to the landmark list include the Elks Building at 607 S. Park View St., which was honored for its *Ecole de Beaux Arts* style, embellished "with Bertram Goodhue influences."

A bridge at 4th and Lorena streets was deemed noteworthy because of its ornamental lighting standards which once supported power lines that moved trolley cars across the bridge.

A two-story home on a bluff above Echo Park Lake was chosen because the board felt it was an excellent example of the style which Southern Californians love best—the Spanish Colonial Revival.

Another, with strong Spanish overtones is La Fonda Restaurant, 2501 Wilshire Blvd., which was chosen because of its architects, the prolific 1920s team of Morgan, Walls & Clements, and because of its former tenant, the once-popular Vagabond restaurant.

A Queen Anne-style home at 541 S. Park View St. was designated just before it was moved to Manhattan Beach.

Its architectural cousin, the Eastlake-style Collins home at 2930 Whittier Blvd. in Boyle Heights, has changed little since it was built in 1888. Fish-scale shingling, decorative millwork and a sunburst panel, appear today as they did in 1888 when City Councilman Michael Collins lived there.

Once a volunteer asked Roger Hathaway how a building like the Collins house could remain untouched by time.

"The answer," he said, "is poverty. It preserves."

Kanner is a free-lance writer.

ALHAMBRA HISTORIC AND CULTURAL RESOURCES SURVEY

Training Materials

DESCRIPTION

In describing the physical appearance of any structure, site or object for inclusion on the State Historic Resources Inventory (Item No. 6 on State Form DFR 523) every attempt should be made to create a full and accurate verbal picture. Under ideal circumstances any person utilizing the Inventory at a later date should be able to visualize the cultural resource described without reference to a photograph.

To achieve this goal try to define the cultural resource in simple terms. Just what are you looking at? What kind of structure is it? What is its shape? Scanning the structure from the top downwards, how would you describe the roof shape? The roof finish? How many stories does the structure have? Does the structure rest directly on the ground or on a raised basement?

> Your opening sentences might incorporate all of these factors:
>
> A one and one half story structure resting on a raised basement, the house at 2212 Woodside is rectangular in plan with a small rear addition. A hipped wood shingle roof caps the main unit, while an asphalt composition roof caps the addition.

To continue your analysis, stand back and look at the overall structure again. What is the structural framework? What is the exterior finish?

> A narrow clapboard siding sheathes a wood-frame structural system. The raised basement is faced with flat granite stones bound with cement mortar. The rear addition is aluminum frame with screens.

Next, ask yourself about the structure's design. Does the building fit a stylistic label(s)? Period? Is it representative of the design work of a particular architect? Many times a building will incorporate details derived from several different styles. This should be noted. If a building appears to be an example of an architectural transition from one style to another, this too should be mentioned.

> Representative of several architectural trends, this house incorporates prominent details from the Colonial Revival, as well as rafter and masonry construction of widespread popularity ca. 1905.

Now that you have set a picture for yourself, focus on accents. What gives the design its special character? Are these details related to structure, style, climate, geography? If possible describe the interior briefly.

Most notable among its design accents are the porch columns, shed dormer and leaded glass windows associated with the Colonial Revival. The granite facing and split rafters also add character.

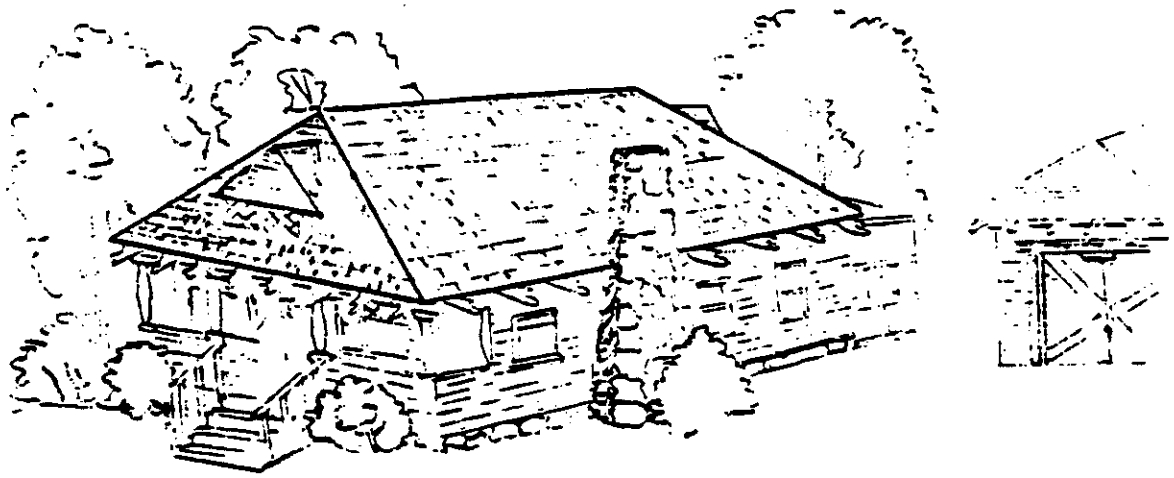
To finish your analysis, place the structure firmly in its context. Are there any secondary structures? Are these original or additions? How does the building relate to its streetscape or setting?

A small garage set to the side rear, apparently original, is the only secondary structure related to the house. The entire unit is landscaped and set back from the street.

Finally, ask a qualitative question of yourself. Has the integrity of the original design been affected by the passage of time? By alterations? Does the building contribute to its environment? If so, how?

The integrity of the house in intact, with only the minor alteration of the rear addition, It contributes to a streetscape of similar houses.

By tieing together the above fragments of analysis you achieve a complete description, discovering that it was not that difficult after all.



A one and one half story structure resting on a raised basement, the house at 2212 Woodside is rectangular in plan with a small rear addition. A hipped wood shingle roof caps the main unit, while an asphalt composition roof caps the addition. A narrow clapboard siding sheathes a wood-frame structural system. The raised basement is

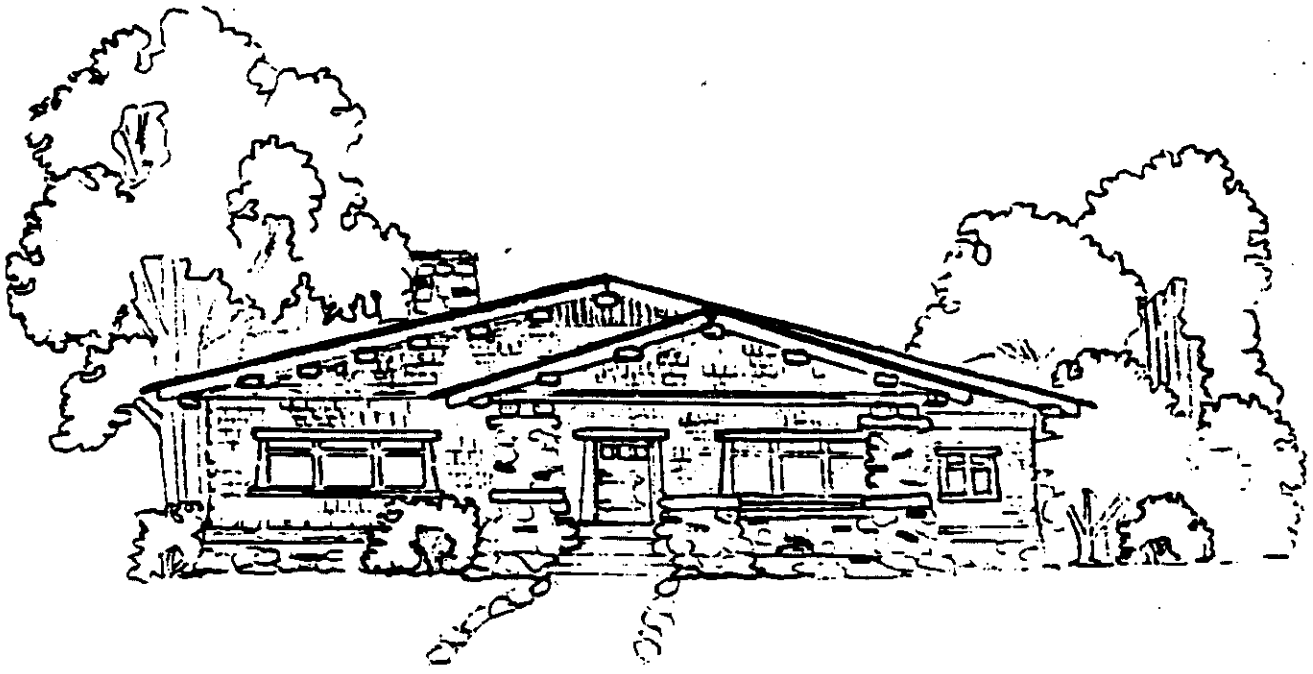
faced with flat granite stones bound with cement mortar. The rear addition is aluminum frame with screens. Representative of several architectural trends, this house incorporates prominent details from the Colonial Revival, as well as rafter and masonry construction of widespread popularity ca., 1905. Most notable among its design accents are the porch columns, shed dormer and leaded glass windows associated with the Colonial Revival. The granite facing and split rafters also add character. A small garage set to the side rear, apparently original, is the only secondary structure related to the house. The entire unit is landscaped and set back from the street. The integrity of the house is intact, with only the minor alteration.

Although this description is more lengthy than most that you will develop for the Inventory form, it provides a full working example. If you can look at a structure, site or object with this framework, then not only may you draw an excellent word photograph for your reader, but you may also see more yourself.

SIGNIFICANCE

"Significance" (Item No. 20 on State Form DPR 523) is proving to be the most difficult question faced in the survey process. The difficulty arises, perhaps, when survey field teams, project managers and survey evaluators realize that "significance" is the crux of the matter and that here, in a short space, they must justify including a property, structure or object in the final inventory. Further, they must put field observation, description and documentation together, draw a conclusion, and answer one simple challenge: so what?

"Instructions for Filling out California Historic Resource Inventory Forms", commenting on "significance", concludes with this advice: "Above all, the statement should identify qualities that make the historic resource worthy of preservation." We would add that the values you detect in an inventory item need to be described, simply. While this may seem to be a difficult challenge - often because a subjective, undefined feeling attracted a survey worker to the property, caused them to pause, look harder, and then choose to select the property, structure or object for further study - we would suggest that this initial subjective reaction may be the key to your success: What is it you saw, what did you like, why should others appreciate what you discovered? It may be as simple as explaining what it was that attracted the survey to the property.



This modest house, the integrity of its design and materials intact, is a fine representative of the mass produced "builder bungalow" of the period 1905-1915. Built in 1912, workman families have occupied the structure over 65 years demonstrating the popularity this simple, relaxed, natural style had with common people. Architectural details - softened exposed beams, stylized door, clinker brick and boulder chimney and porch - all carried out in an unobtrusive manner, remind us that the 'craftsman' ethic promoted simplicty and natural living. The heavy landscaping shelters the house and enhances its sturdy, rustic feel.

Glossary

This glossary is a basic guide to architectural terms used in *What Style Is It?* For more precise definitions consult architectural dictionaries listed in the bibliography.

Adobe—A sun-dried, unburned brick of earth (generally clay) and straw; a structure made with such bricks.

Aisle—A part of a church parallel to the nave and divided from it by piers or columns; a passageway between rows of seats, such as in a church or auditorium.

Angularity—The state, condition or quality of being angular; an emphasis on hard edges and planes.

Arcade—A series of arches supported by columns or piers; a building or part of a building with a series of arches; a roofed passageway, especially one with shops on either side.

Architrave—The lower part of a classical entablature, resting directly on the capital of a column; the molding around a window or door.

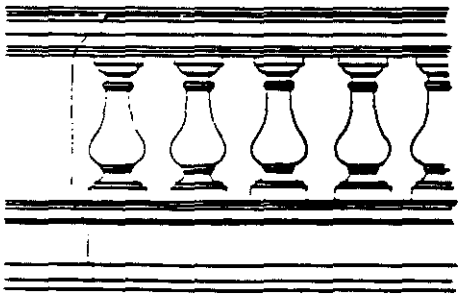
Ashlar—Hewn or squared stone, also masonry of such stone; a thin, dressed rectangle of stone for facing walls, also called ashlar veneer.

Astylar—Without columns or pilasters.

Axiality—Symmetrical disposition of parts of a building or of structures along an axis.

Baluster—An upright, often vase-shaped, support for a rail.

Balustrade—A series of balusters with a rail.



Balustrade

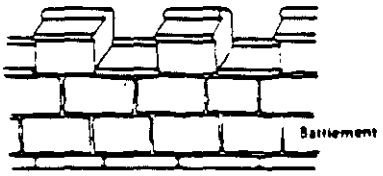
Band Windows—A horizontal series of uniform windows that appear to have little or no separation between them.

Baptistery—A part of a church or formerly a separate building used for baptism.

Bargeboard—A board, often ornately curved, attached to the projecting edges of a gable roof; sometimes referred to as verge boards.

Batter—The receding upward slope of a wall or structure.

Battlement—A parapet built with indentations for defense or decoration.



Battlement

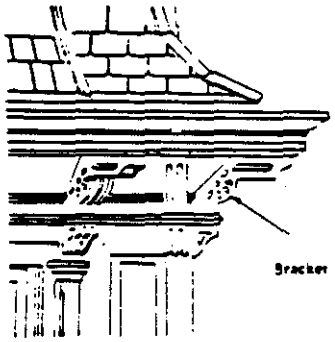
Bay—One unit of a building that consists of a series of similar units, commonly defined by the number of window and door openings per floor or by the space between columns or piers.

Belt Course—A narrow horizontal band projecting from the exterior walls of a building, usually defining the interior floor levels.

Blind Arch—An arch that does not contain an opening for a window or door, but is set against or indented within a wall.

Brace—A diagonal stabilizing member of a building frame.

Bracket—A support element under eaves, shelves or other overhangs; often more decorative than functional.



Bracket

Buttress—A projecting structure of masonry or wood for supporting or giving stability to a wall or building.

Cantilever—A projecting beam or part of a structure supported only at one end.

Capital—The top decorated member of a column or pilaster crowning the shaft and supporting the entablature.

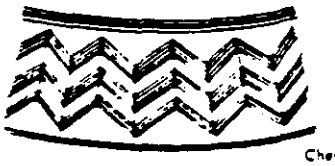
Cartouche—An ornamental panel in the form of a scroll, circle or oval, often bearing an inscription.

Casement (or casement window)—A window with sash hung vertically and opening inward or outward.

Castellated—Having battlements and turrets, like a medieval castle.

Cast Iron—Iron, shaped in a mold, that is brittle, hard and cannot be welded; in 19th-century American commercial architecture cast-iron units were used frequently to form entire facades.

Chevron—A V-shaped decoration generally used as a continuous molding.



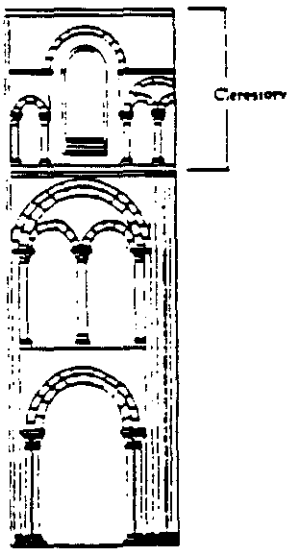
Chevron

Chimney Pot—A pipe placed on top of a chimney, usually of earthenware, that functions as a continuation of the flue and improves the draft.

Clapboard—A long, narrow board with one edge thicker than the other, overlapped to cover the outer walls of frame structures; also known as weatherboard.

Classical—Pertaining to the architecture of ancient Greece and Rome.

Clerestory—The upper part of the nave, transepts and choir of a church containing windows; also, any similar windowed wall or construction used for light and ventilation.

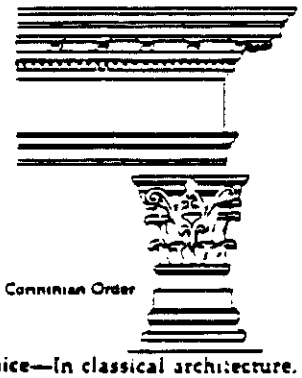


Clerestory

FROM WHAT STYLE IS IT? BY THE PRESERVATION PRESS

Corbel—A bracket or block projecting from the face of a wall that generally supports a cornice, beam or arch.

Corinthian Order—The most ornate of the classical Greek orders of architecture, characterized by a slender fluted column with a bell-shaped capital decorated with stylized acanthus leaves; variations of this order were extensively used by the Romans.



Corinthian Order

Cornice—In classical architecture, the upper, projecting section of an entablature; also projecting ornamental molding along the top of a building or wall.

Coursed Masonry—A wall with continuous horizontal layers of stone or brick.

Crenellation—A battlement.

Crocket—In Gothic architecture, carved projections in the shape of stylized leaves that decorate the edges of spires, gables, pinnacles.

Crocket

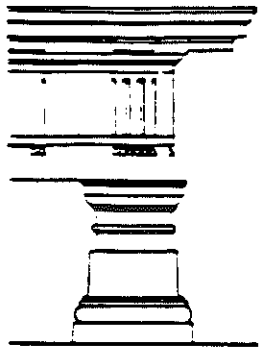
Dependency—A structure subordinate to, or serving as an adjunct to, a main building.

Doric Order—The oldest and simplest of the classical Greek orders, characterized by heavy fluted columns with no base, plain saucer-shaped capitals and a bold simple cornice. (Illustrated top center)

Dormer—A vertically set window on a sloping roof; also, the roofed structure housing such a window.

Double Hung Sash Window—A window with two sash, one above the other, arranged to slide vertically past each other.

Double Portico—A projecting two-story porch with columns and a pediment.



Doric Order

Eaves—The projecting overhang at the lower edge of a roof.

Egg-and-Dart—A decorative molding comprised of alternating egg-shaped and dart-shaped motifs.

End Chimney—A chimney located at the side wall or gable end of a building.

Entablature—In classical architecture, the part of a structure between the column capital and the roof or pediment; comprised of the architrave, frieze and cornice.

Eyebrow Dormer—A low dormer in which the arched roofline forms a reverse curve at each end giving it the general outline of an eyebrow.

Fanlight—A semicircular or fan-shaped window with radiating members or tracery set over a door or window.

Fenestration—The arrangement of windows in a wall.

Festoon—A carved, modeled or painted garland of fruit, flowers or leaves suspended between two points in a curve.

Finial—An ornament at the top of a spire, gable, pinnacle.

Flemish Gable—A gable with stepped and occasionally multicurved sides, derived from 16th-century Netherlandish prototypes.

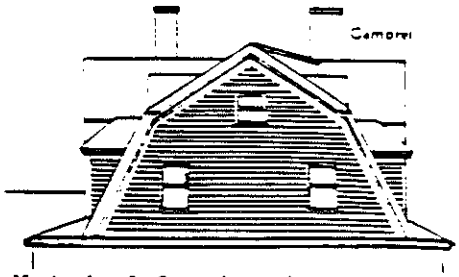
Fluted—Having regularly spaced vertical, parallel grooves or *flutes*, as on the shaft of a column, pilaster or other surface.

Foliated—Decorated with leaf ornamentation or a design comprised of arcs or lobes.

Gables—The triangular wall segments at the end of a double-pitch or gable roof.

Gallery—A roofed promenade, colonnade or corridor; an outdoor balcony; in the South, a porch or veranda.

Gambrel—A ridged roof with two slopes on each side, the lower slope having the steeper pitch.



Gambrel

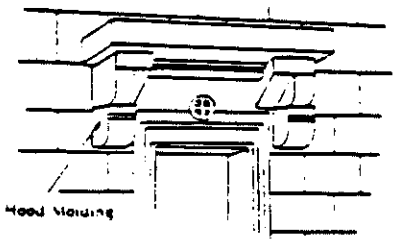
Hacienda—In Spanish-speaking countries or areas influenced by Spain, a large estate, plantation or ranch; also, the house of the ranch owner; in southwestern United States, a low sprawling house with projecting roof and wide porches.

Half-timbering—Wall construction in which the spaces between members of the timber frame are filled with brick, stone or other material.

Hewn and Pegged—A frame construction system in which the beams are hewn with an adze (predating saws) and joined by large wooden pegs.

Hipped Roof—A roof with four uniformly pitched sides.

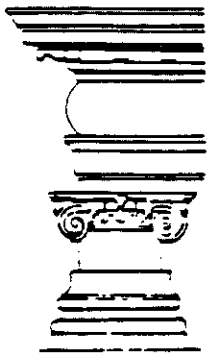
Hood Molding—A large molding over a window, originally designed to direct water away from the wall; also called a drip molding.



Hood Molding

Horseshoe Arch—An arch shaped like a horseshoe; common in Islamic architecture.

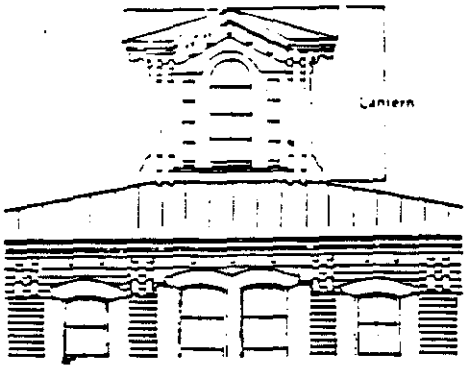
Ionic Order—An order of classical Greek architecture, characterized by a capital with two opposed volutes.



Ionic Order

Lancet—A narrow pointed arch.

Lantern—A structure built on the top of a roof with open or windowed walls.



Leaded Glass—Small panes of glass which are held in place with lead strips; the glass may be clear or stained.

Lean-to—A simple structural addition that has a single-pitch roof.

Lozenge—A diamond-shaped decorative motif.

Manor House—Specifically, the house of the lord of a manor; more generally, the large rural house of landed gentry.

Mansard Roof—A roof that has two slopes on all four sides.

Masonry—Wall construction of such materials as stone, brick and adobe.

Measured Drawing—An exact scale drawing based on measurements taken from an existing building.

Medallion—An object resembling a large medal or coin.

Minaret—A tall, slender tower attached to a mosque with one or more projecting balconies.

Miter—The edge of a piece of material, generally wood, that has been beveled preparatory to making a miter joint.

Modillion—An ornamental bracket or console used in series under the cornice of the Corinthian and other orders.

Molded Brick—Brick shaped in a mold; commonly refers to bricks molded into decorative shapes.

Molding—A continuous decorative band that is either carved into or applied to a surface.

Nave—The long, narrow main part of a church that rises higher than the flanking aisles.

Nogging—The brick or rubble material used to fill the spaces between wooden frame.

Obelisk—A tall, four-sided shaft that is tapered and crowned with a pyramidal point.

Order—Any of several specific styles of classical and Renaissance architecture characterized by the type of column used (e.g., Doric, Ionic, Corinthian, Composite, Tuscan).

Palladian Window—A tripartite window opening with a large arched central light and flanking rectangular side lights.

Parapet—A low, solid, protective wall or railing along the edge of a roof or balcony.

Patera—A circular ornament used in decorative relief work.

Pavilion—A part of a building projecting from the rest; also, an ornamental structure in a garden or park.

Pediment—A wide, low-pitched gable surmounting the facade of a building in a classical style; also, any similar triangular crowning element used over doors, windows and niches.

Pilaster—A shallow pier attached to a wall; often decorated to resemble a classical column.

Plinth—The base of a pedestal, column or statue; a continuous course of stones supporting a wall.

Podium—A low platform or base.

Polychromy—The use of many colors in decoration, especially in architecture and statuary.

Portal—The principal entry of a structure or wall of a city.

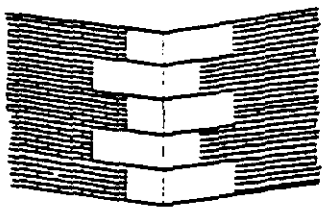
Porte Cochère—A large covered entrance porch through which vehicles can drive.

Portico—A major porch, usually with a pedimented roof supported by classical columns.

Pressed Metal—Thin sheets of metal molded into decorative designs and used to cover interior walls and ceilings.

Pueblo—Indian communities in the Southwest with distinctive flat-roofed structures of adobe and stone.

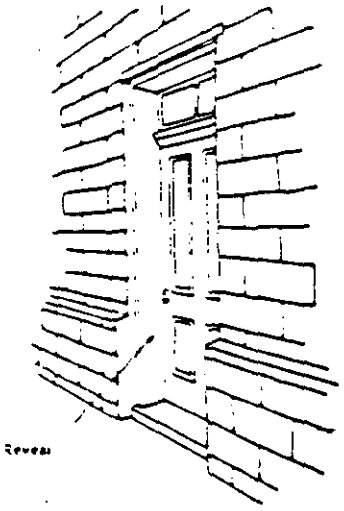
Quoin—Units of stone or brick used to accentuate the corners of a building.



Reeded—Decoration of parallel convex moldings (the opposite of fluted).

Reredos—An ornamental screen behind an altar.

Reveal—The vertical side of a door or window opening between the frame and the wall surface.



Rinceau—A band of ornament consisting of intertwining foliage.

Rococo—The decorative style developed from the Baroque; characterized by delicacy, light colors and a general reduction in building scale.

Rosette—Stylized floral decoration.

Rustication—Masonry cut in massive blocks separated from each other by deep joints.

Saltbox—A gable-roofed house in which the rear slope is much longer than the front.

Sash—A frame in which the panes of a window are set.

Setback—An architectural expedient in which the upper stories of a tall building are stepped back from the lower stories; designed to permit more light to reach street level.

Shaft—The main part of a column between the base and capital.

Skeleton Frame—A freestanding frame of iron or steel that supports the weight of a building and on which the floors and outer covering are hung.

Spandrel—The triangular space between the left or right exterior curve of an arch and the rectangular framework surrounding it; the space between adjacent arches and the horizontal molding or cornice above them; also, in skeleton frame construction.

the horizontal panels below and above windows between the continuous vertical piers.

Spindle—A turned wooden element, often used in screens, stair railings and porch trim.

Stair Hall—A room specifically designed to contain a staircase.

Stair Tower—A projecting tower that contains a staircase serving all floors; usually found in castles and châteaux.

Stringcourse—A narrow, continuous ornamental band set in the face of a building as a design element; also known as a *cordon*.

Swag—A festoon in which the object suspended resembles a piece of draped cloth.

Terra-cotta—A fine grained, brown-red, fired clay used for roof tiles and decoration; literally, cooked earth.

Tracery—The curved mullions of a stone-framed window; also, ornamental work of pierced patterns in or on a screen, window glass or panel.

Trefoil—A design of three lobes, similar to a cloverleaf.

Tudor Arch—A low, wide, pointed arch common in the architecture of Tudor England.

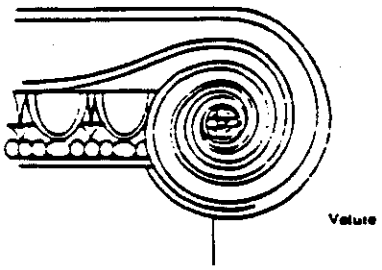
Turret—A small, slender tower usually at the corner of a building, often containing a circular stair.

Vault—An arched ceiling of masonry.

Veranda—A roofed open gallery or porch.

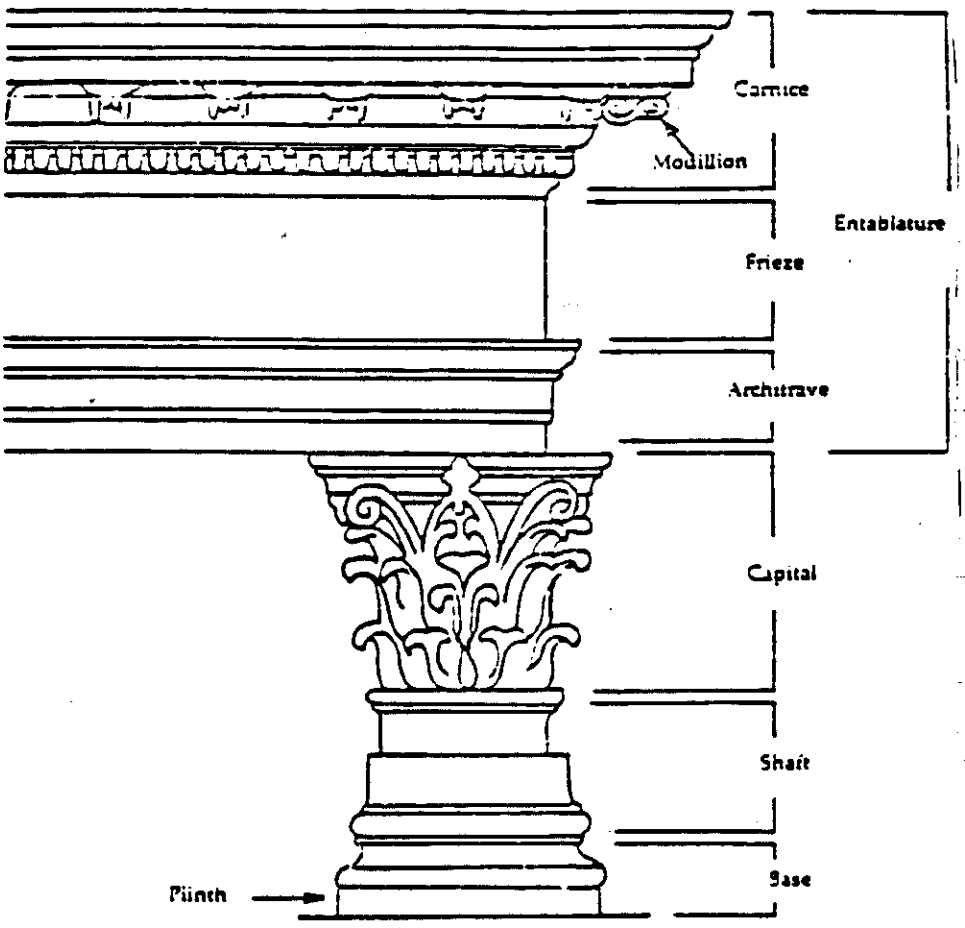
Viga—Spaced wooden beams used to support the roof of an Indian pueblo structure; the ends usually project through the outer walls.

Volute—A spiral, scroll-like ornament.



Wattle and Daub—A method of construction with thin branches (wattles) plastered over with clay mud (daub).

Weatherboard—Clapboard; wooden siding.



Corinthian Order showing elements that comprise a column.

GENERAL INFORMATION

PLACEMENT WITH OTHER BUILDINGS (as seen from directly above)

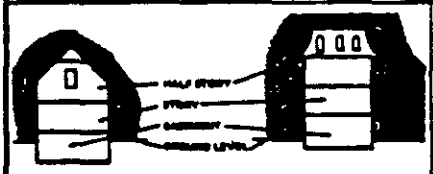
1. BUILDING STANDS ALONE	2. ONE SIDE AGAINST BUILDING	3. ON END OF A ROW OF BUILDINGS (OF SAME OR DIFFERENT STYLES)	4. BETWEEN OTHER BUILDINGS IN A ROW	5. WITHIN A GROUP OR COMPLEX SURROUNDED OR ATTACHED ON SEVERAL SIDES (EXAMPLE: FACTORY)	6. OTHER

PLAN – The basic shape of the building (including wings and additions) as seen from above. List the closest one – don't worry about minor projections such as bay windows or small porches.

1. SQUARE	2. RECTANGULAR	3. CENTER SPACE	4. L SHAPE	5. T SHAPE	6. U SHAPE	7. H SHAPE	8. CROSS-AXIAL	9. IRREGULAR	10. POLYGONAL

11. CIRCULAR	12. OTHER

STORIES – The number of floors in a building above the basement (floors above or within the roof line count as half stories). Some buildings have a major portion of the basement above ground level – do not confuse this with the first story.



1. UNKNOWN	2. 1 STORY	3. 1½ STORIES	4. SPLIT LEVEL	5. 1 FRONT 2 REAR	6. 2 FRONT 1 REAR	7. 2 STORIES

8. 2½ STORIES	9. 3 STORIES	10. 3½ STORIES	11. 4 STORIES	12. 5 OR MORE	13. IRREGULAR	14. OTHER

BASEMENT

1. NONE	2. UNKNOWN	3. BASEMENT PRESENT	4. GROUND LEVEL BASEMENT (UNDER ELEVATED MAIN FLOOR)	5. OTHER

FOUNDATION MATERIAL

1. NONE	2. UNKNOWN	3. WOOD	4. STONE	5. CONCRETE BLOCK	6. POURED CONCRETE	7. BRICK	8. OTHER

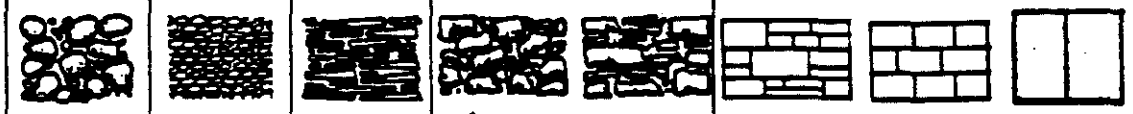
EXTERIOR WALLS

EXTERIOR WALL MATERIAL -- WOOD

1. NONE | 2. UNKNOWN | 3. ROUGH LOG | 4. SHAPED (SMOOTH) LOG | 5. HALF-TIMBER (WOOD & PLASTER) | 6. SMOOTH, FLUSH BOARDS OR PLANKS | 7. SHIPLAP | 8. VERTICAL BOARD AND BATTEN

9. OVERLAPPING BOARDS (CLAPBOARDS, ETC.) | 10. STICK STYLE | 11. PANEL OR PLYWOOD | 12. PLAIN SHINGLE | 13. PATTERNED SHINGLE (FISH SCALE) | 14. PATTERNED SHINGLE (OTHER DESIGN) | 15. OTHER

EXTERIOR WALL MATERIAL – STONE



1. NONE | 2. UNKNOWN | 3. FIELDSTONE (LARGE IRREGULAR ROCKS) | 4. COBBLE (SMOOTH ROUNDED ROCKS FROM STREAM BEDS) | 5. SHALE OR SLATE | 6. RUBBLE (IRREGULAR ROCK BROKEN TO FIT ROUGHLY) | 7. CUT STONE (MAY BE SMOOTH OR ROUGH SURFACE – DON'T CONFUSE WITH BRICK)

8. COMPOSITION STONE (MANUFACTURED IMITATION) | 9. OTHER

EXTERIOR WALL MATERIAL – ADOBE OR OTHER EARTH

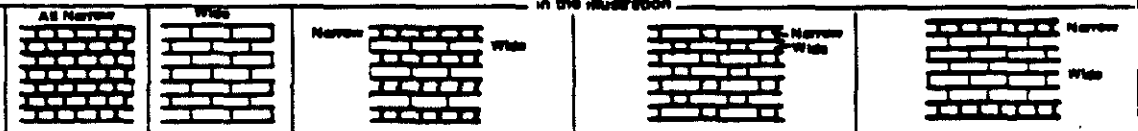
1. NONE | 2. UNKNOWN | 3. ADOBE (SUN DRIED) | 4. TAMPED OR RAMMED EARTH | 5. SOD & TURF | 6. OTHER

EXTERIOR WALL MATERIAL – BRICK, TILE, OR COMPOSITION

1. NONE | 2. UNKNOWN | 3. COMPOSITION (ASPHALT) SHINGLE OR SHEET (INCLUDES TARPAPER & IMITATION BRICK PAPER) | 4. PLASTER OR STUCCO | 5. ASBESTOS SIDING | 6. TILE | 7. BRICK | 8. OTHER

EXTERIOR WALL MATERIAL – BRICK OR ADOBE COURSING

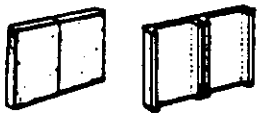
Match the pattern of the bricks or adobe block rows to those shown in the illustration



1. NONE | 2. UNKNOWN | 3. HEADER BOND | 4. STRETCHER BOND (ALL WIDE) | 5. ENGLISH BOND (ALTERNATING ROWS OF NARROW AND WIDE) | 6. FLEMISH BOND (NARROW & WIDE ALTERNATE WITHIN THE SAME ROW) | 7. COMMON BOND (WIDE ROWS SEPARATED BY OCCASIONAL NARROW ROW)

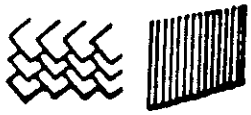
8. GARDEN WALL | 9. OTHER

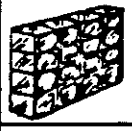
EXTERIOR WALL MATERIAL – CONCRETE



1. NONE	2. UNKNOWN	3. POURED (SMOOTH OR WITH EXPOSED PEBBLES)	4. PLAIN BLOCK	5. SIMULATED STONE BLOCK (CAST STONE)	6. PRECAST PANEL (PLAIN OR SHAPED)	7. OTHER

EXTERIOR WALL MATERIAL – METAL OR GLASS





1. NONE	2. UNKNOWN	3. METAL SHEET (CORRUGATED, RIBBED OR FLAT)	4. METAL PANEL (FRAMING VISIBLE)	5. ALUMINUM SIDING	6. CAST IRON	7. GLASS BLOCKS	8. GLASS WALL	9. OTHER

EXTERIOR SHEATHING

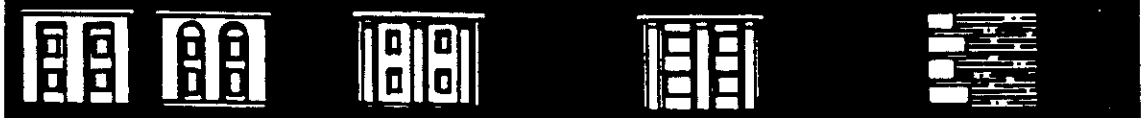
Original wall material covered with a different type of material (sheathing). Examples: plaster over brick wall, aluminum siding over wooden clapboard wall.

1. NONE	2. UNKNOWN	3. WOOD	4. TILE OR TERRACOTTA	5. PLASTER OR STUCCO	6. STONE	7. BRICK	8. METAL	9. COMPOSITION (ASPHALT SHINGLE, TAR-PAPER)	10. COMPOSITION (IMITATION STONE)

11. OTHER	

WALL DESIGN AND DETAIL

Design of major parts of the building's walls. Sections 3-5 show elements that cover more than one story, or may be repeated from floor to floor as in a multi-storied building.



1. NONE	2. UNKNOWN	3. RECESSED PANEL (WITH OR WITHOUT WINDOWS; TOP FLAT OR ARCHED	4. WALL SECTIONS SEPARATED BY EMBEDDED ROUND COLUMNS OR SQUARE PILLARS	5. SQUARE VERTICAL PILLARS CONNECTED BY HORIZONTAL CROSS PANELS	6. QUOINS – STONE-LIKE BLOCKS ARRANGED VERTICALLY AT BUILDING CORNERS

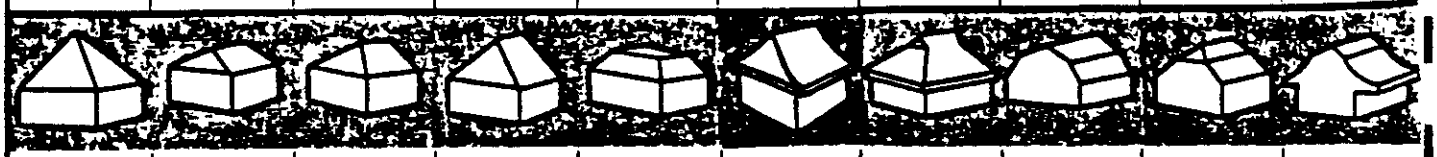
7. END BOARD AT BUILDING CORNERS	8. HORIZONTAL ORNAMENTED OR PLAIN BAND OFTEN WITH SHELF & BRACKETS AT OR NEAR THE ROOF LINE	9. PLAIN OR DECORATED HORIZONTAL BAND BETWEEN FLOOR LEVELS	10. ARCHED OR STEPPED CORBELING (SUPPORTS PROJECTING BAND ABOVE WINDOWS OR NEAR ROOF LINE)	11. OTHERS

ROOFS

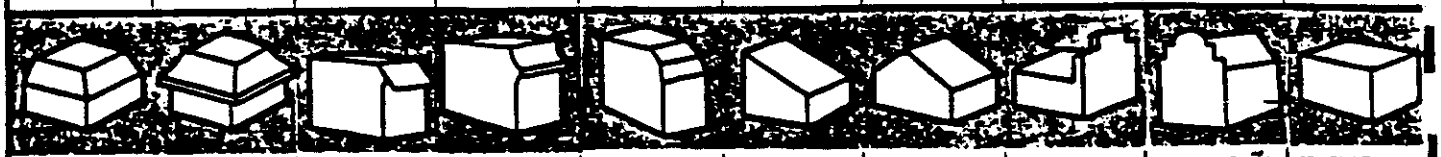
ROOF SHAPE

Mark the shape which most closely resembles the building's roof. If several types are combined on the building, treat as multiple. Note that 38-41 deal with placement of church steeples.

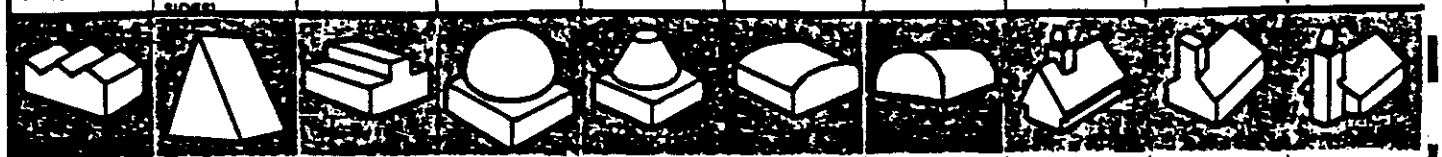
1. NONE	2. UNKNOWN	3. LOW GABLE	4. MEDIUM GABLE	5. HIGH GABLE	6. CENTER GABLE	7. OFFSET GABLE	8. CROSS GABLE	9. HIPPED GABLE	10. SELLCAST GABLE



11. PYRAMIDAL	12. LOW HIP	13. MEDIUM HIP	14. HIGH HIP	15. TRUNCATED HIP	16. SELLCAST HIP	17. GABLET	18. GAMBREL	19. HIPPED GAMBREL	20. SELLCAST GAMBREL



21. MANSARD (SEVERAL SIDES)	22. SELLCAST MANSARD (SEVERAL SIDES)	23. MANSARD (FRONT)	24. SELLCAST MANSARD (FRONT ONLY)	25. GAMBREL (FRONT)	26. SHED	27. SALTBOX	28. FALSE FRONT	29. ESPADAÑA	30. FLAT



31. SAWTOOTH	32. A-FRAME	33. MONITOR	34. DOME	35. CONICAL	36. VAULTED OR ARCHED	37. QUONSET	38. STEEPLE SET BACK FROM EDGE ALONG ROOF PEAK	39. STEEPLE TOWER SET FLUSH WITH FRONT	40. STEEPLE ON TOWER SET OUT FROM FRONT

41. STEEPLE WITH TOWER AT SIDE(S)	42. OTHER

ROOF MATERIAL

1. NONE	2. UNKNOWN	3. SREA (TAR USED WITH STICKS OR THATCH)	4. WOOD (SHINGLE)	5. TILE	6. METAL	7. SLATE	8. COMPOSITION (ASPHALT SHINGLES, TARPAPER)	9. GLASS	10. CONCRETE
11. TAR AND GRAVEL	12. OTHER								

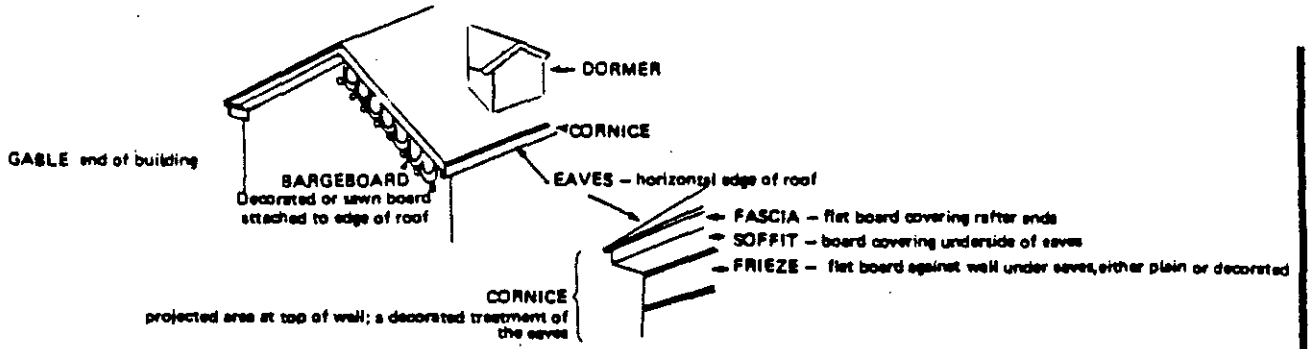
CHIMNEYS

1. NONE	2. UNKNOWN	3. ONE CHIMNEY	4. MORE THAN ONE CHIMNEY

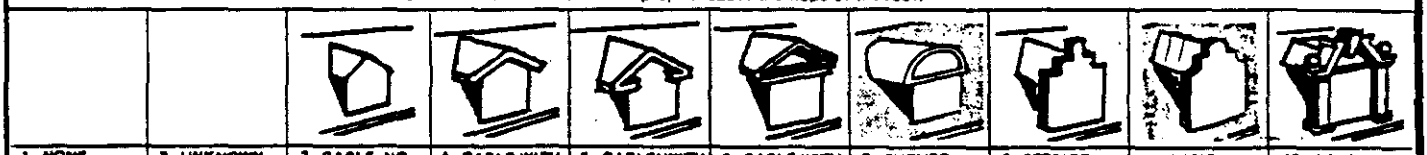
CHIMNEY MATERIAL

1. NONE	2. UNKNOWN	3. TILE OR TERRACOTTA	4. METAL	5. STONE	6. BRICK	7. CONCRETE	8. OTHER

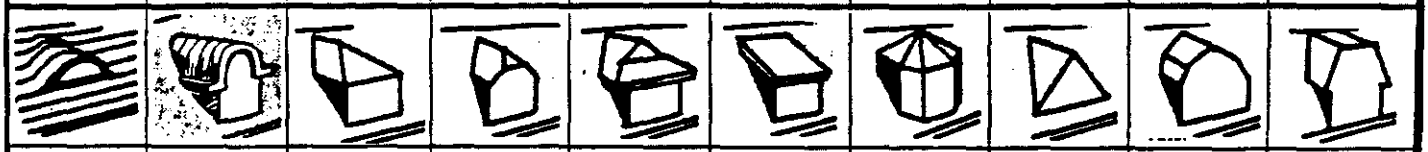
The following illustration shows the locations of parts of the building discussed



DORMER SHAPE A dormer is a window or a louvered vent section which projects above the slope of the roof.



1. NONE | 2. UNKNOWN | 3. GABLE, NO OVERHANG | 4. GABLE WITH OVERHANG | 5. GABLE; WITH RETURN | 6. GABLE WITH PEDIMENT | 7. CURVED PEDIMENT | 8. STEPPED GABLE | 9. MISSION STYLE GABLE | 10. DECORATED GABLE



11. SWEPT | 12. HOODED | 13. HIPPED | 14. HIPPED GABLE | 15. GABLET | 16. SHED | 17. BAY | 18. TRIANGULAR | 19. GAMBREL | 20. MANSARD

21. VICTORIAN SEGMENTAL | 22. VICTORIAN ROUND | 23. OTHER

ROOF TRIM – EAVES This deals with the area where the edge of the roof meets the top of the walls. There are many variations of the basic types; choose the example which most closely resembles the eaves of the building

1. NONE | 2. UNKNOWN | 3. CLOSE EAVES | 4. EAVES PROJECTING, NO RAFTERS EXPOSED | 5. EAVES PROJECTING, RAFTERS EXPOSED | 6. CORNICE FASCIA ALONE | 7. FRIEZE ALONE | 8. PROJECTING EAVES AND FRIEZE | 9. FASCIA AND FRIEZE | 10. CORNICE WITH FASCIA AND BRACKETS

11. PLAIN BOXED CORNICE (EAVES BOXED IN, RAFTER ENDS ENCLOSED) | 12. DECORATED BOXED CORNICE | 13. BOXED CORNICE SLOPED SOFFIT | 14. BOXED CORNICE, SLOPED SOFFIT & FRIEZE | 15. BOXED CORNICE, WITH BRACKETS | 16. BOXED CORNICE, WITH FRIEZE & BRACKETS | 17. BOXED CORNICE, PLAIN, FRIEZE PLAIN

18. BOXED CORNICE, FRIEZE DECORATED | 19. DECORATED BOXED CORNICE FRIEZE PLAIN | 20. DECORATED BOXED CORNICE FRIEZE DECORATED | 21. BARGEBOARD | 22. PLAIN PARAPET (WALL AROUND EDGE OF ROOF) | 23. CRENELLATED (CASTELLATED) PARAPET | 24. PARAPET WITH ENTABLATURE | 25. PARAPET WITH BALUSTRADE | 26. OTHER PARAPET | 27. OTHER EAVES

ROOF TRIM – GABLE END

Applies only to roofs having gables (area formed by the meeting of the angled part of a pitched roof and the exterior walls).
If the building has several gables with different trim, you may choose more than one illustration.

1. NONE

2. UNKNOWN

3. EDGE OF ROOF CLOSE TO WALL

4. EDGE OF ROOF PROJECTING, NO DECORATION

5. EDGE OF ROOF PROJECTING WITH BOARDS ATTACHED AT ROOF EDGE

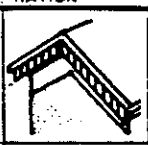
6. PLAIN BOXED CORNICE

7. DECORATED BOXED CORNICE

8. ROOF EDGES PROJECTING, WITH FRIEZE

9. ROOF EDGES PROJECTING WITH ENDBOARDS (AS IN NO. 5) WITH FRIEZE

10. PLAIN BOXED CORNICE WITH FRIEZE



11. DECORATED BOXED CORNICE WITH FRIEZE

12. BOXED CORNICE WITH BRACKETS (WITH OR WITHOUT FRIEZE)

13. PLAIN BOXED CORNICE WITH EAVES EXTENDING PARTLY AROUND CORNER (WITH OR WITHOUT FRIEZE)

14. DECORATED BOXED CORNICE WITH EAVES EXTENDING PARTLY AROUND CORNER (WITH OR WITHOUT FRIEZE)

15. PEDIMENTED BOXED CORNICE (PLAIN OR DECORATED

16. BARGEBOARD (CARVED OR SAWN END BOARDS)

17. GABLED PARAPET

18. STEPPED PARAPET

19. DECORATED PARAPET

20. ESPADAÑA (MISSION STYLE)

21. OTHER

ROOF TRIM – SPECIAL FEATURES

Choose as many of the following features which are found on or near the roof.

1. NONE

2. UNKNOWN

3. CUPOLA (OPEN OR CLOSED

4. WIDOW'S WALK

5. FINIAL

6. CRESTING (METAL OR WOOD)

7. PENDANT

8. MONUMENTAL PEDIMENT (USUALLY OVER MAIN ENTRANCE)

9. ROOF FLAGPOLE

10. STICKWORK IN THE GABLE (ATTACHED TO ROOF EDGE, NOT WALL)

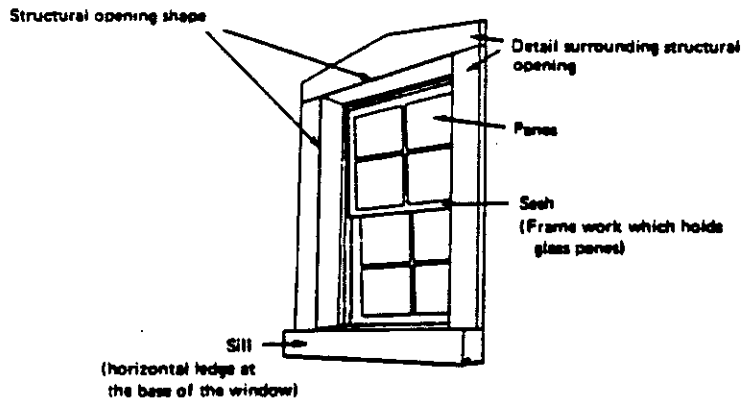
11. ADDITIONAL GABLES (PLAIN OR DECORATED)

12. WEATHER VANE

13. OTHER

WINDOWS

The following illustration shows the locations of parts of the building discussed



WINDOWS – STRUCTURAL OPENING SHAPE

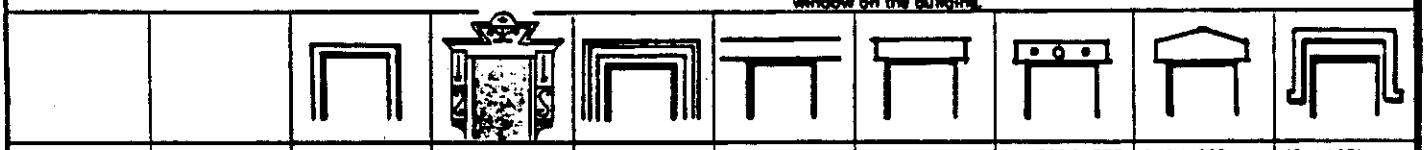
The shape of the opening in the wall in which the window is placed. May contain more than one window.

1. NONE	2. UNKNOWN	3. FLAT	4. FLAT WITH ROUND CORNERS	5. SEGMENTAL	6. SEMI-ELLIPTICAL	7. SEMI-CIRCULAR	8. 4-CENTER OGEE	9. 2-CENTER POINTED	10. PARABOLLIC

11. TRIANGULAR	12. OTHER

WINDOWS – SURROUNDING DETAIL OF TOP OF STRUCTURAL OPENING

There are many variations – select the one which is most similar to the window on the building.

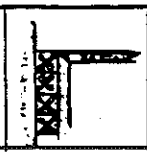


1. NONE	2. UNKNOWN	3. PLAIN MOLDING	4. VICTORIAN DECORATED TRIM (MANY VARIATIONS)	5. MOLDED TRIM	6. CONTINUOUS TRIM ABOVE	7. PLAIN LINTEL	8. DECORATED LINTEL	9. SHAPED LINTEL	10. LABEL

11. FLAT WITH BRICKS OR STONES SET VERTICALLY	12. FLAT OR ARCHED WITH RADIATING BRICKS OR STONES	13. FL. OR ARCH. WITH RADIATING BRICKS OR STONES AND CENTER KEYSTONE	14. FL. OR ARCH WITH ALTERNATING RADIATING BRICKS OR STONES	15. FL. OR ARCH WITH STEPPED RADIATING BRICKS OR STONES	16. PLAIN OR MOLDED ARCH TRIM	17. PLAIN OR MOLDED ARCH TRIM WITH CENTER KEYSTONE

18. SHELF	19. TRIANGULAR PEDIMENT	20. SEGMENTAL PEDIMENT	21. DOUBLE CURVED PEDIMENT	22. BROKEN PEDIMENT	23. HOOD, WITH OR WITHOUT BRACKETS	24. CURVED HOOD, WITH OR WITHOUT BRACKETS	25. OTHER

WINDOWS – SURROUNDING DETAIL OF SIDES OF STRUCTURAL OPENING

1. NONE	2. UNKNOWN	3. PLAIN	4. MOLDED TRIM	5. TILED TRIM	6. QUOINS	7. ROUND OR FLAT COLUMNS ATTACHED TO WALL SURFACE	8. OTHER DECORATED TRIM	9. OTHER	

WINDOWS – DETAIL AT BOTTOM OF STRUCTURAL OPENING (SILLS)

								
1. NONE	2. UNKNOWN	3. SLIPSILL (EVEN WITH SIDES OF OPENING	4. LUGSILL (EXTENDS BEYOND SIDES OF OPENING)	5. DECORATED SLIPSILL	6. DECORATED LUGSILL	7. CONTINUOUS SILL	8. OTHER	

WINDOWS – DIVISION

This section is concerned with the division of the window into sashes. Do not be concerned with window movement or opening – the sashes may or may not be moveable.

							
1. NONE	2. UNKNOWN	3. ONE SASH	4. 2 SASH	5. 1 SASH & TRANSOM	6. 2 SASH & TRANSOM	7. 2 SASH DIVIDED VERTICALLY	8. 2 SASH DIVIDED VERTICALLY SEPARATED BY AN UPRIGHT BAR

			
9. 3 OR MORE SASHES DIVIDED VERTICALLY (WITH OR WITHOUT UPRIGHT DIVIDING BARS)	10. ONE OR MORE SASHES WITH GLASS SIDEPANELS	11. OTHER	

WINDOWS – OPENING MOVEMENT

									
1. NONE	2. UNKNOWN	3. DOUBLE HUNG SLIDES UP AND DOWN	4. CASEMENT (OPENS OUTWARD FROM SIDES)	5. HINGED AT TOP OR BOTTOM	6. PIVOTED	7. HORIZONTAL SLIDING	8. FIXED (DOES NOT OPEN)	9. OTHER	

WINDOWS – WINDOW PANES

Generally, most windows are divided into upper and lower sashes, or right and left sashes. If this is the case for the window, identify the number of panes (glass panels) in the sash or sashes.

UPPER SASH OR LEFT SASH

1. NONE	2. UNKNOWN	3. ONE	4. TWO	5. THREE	6. FOUR	7. FIVE	8. SIX	9. SEVEN	10. EIGHT
11. NINE	12. TEN	13. MORE THAN TEN	14. OTHER						

LOWER SASH OR RIGHT SASH

1. NONE	2. UNKNOWN	3. ONE	4. TWO	5. THREE	6. FOUR	7. FIVE	8. SIX	9. SEVEN	10. EIGHT
11. NINE	12. TEN	13. MORE THAN TEN	14. OTHER						

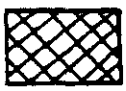
SPECIAL WINDOW SHAPES

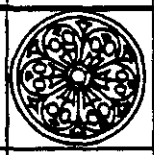
The illustrations outline the shapes of any special or ornamental windows. They may be located anywhere on the building.

									
1. NONE	2. UNKNOWN	3. ROUND	4. HALF-ROUND	5. QUARTER-ROUND	6. POLYGONAL	7. ELLIPTICAL	8. HALF-ELLIPTICAL	9. EYEBROW	10. GOTHIC
									
11. TRIANGULAR TOP	12. SEMI-CIRCULAR TOP	13. OVAL	14. PALLADIAN	15. OTHER					

SPECIAL WINDOW TYPES

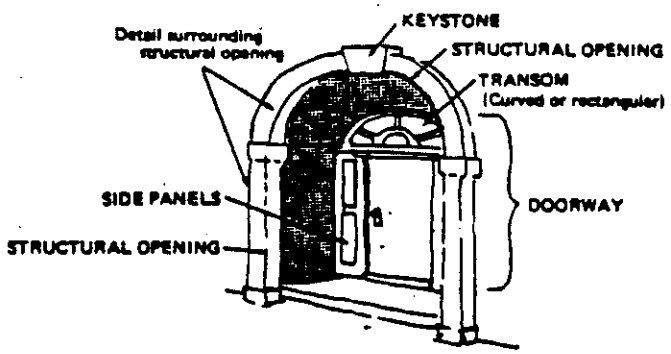
May be located anywhere on the building.

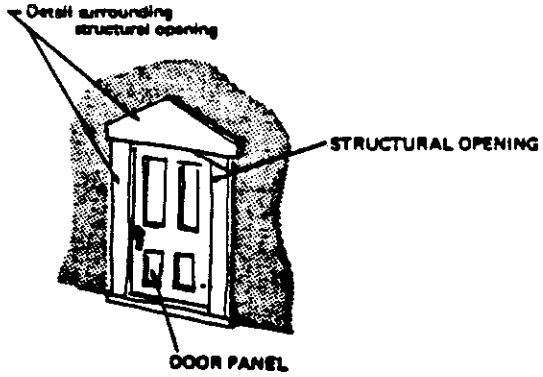
							
1. NONE	2. UNKNOWN	3. QUATREFOIL & VARIATIONS		4. QUATREFOIL (STAR)	5. BULLS EYE	6. STAINED GLASS, GEOMETRIC (COLORED SQUARES & RECTANGLES)	7. OPALESCENT (SEMI-TRANSPARENT) STAINED GLASS (PASTEL DESIGNS, OFTEN FLOWERS)
							




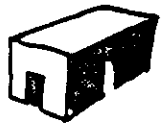
8. STAINED GLASS SCENE (PERSONS, BIRDS, SHIPS, LANDSCAPE, ETC.)		9. LEADED GLASS, LATTICE (DIAMOND SHAPED PANES SEPARATED BY LEAD STRIPS)		10. ROSE WINDOW (ROUND CHURCH WINDOW)	11. OTHER		

DOORWAYS AND PORCHES





DOOR LOCATION Locate the main doorway. Note that items 3-5 deal only with buildings that have the main entrance in the gable end.

1. NONE	2. UNKNOWN	3. MAIN DOOR IN CENTER GABLE END	4. MAIN DOOR OFF CENTER GABLE END	5. MORE THAN ONE DOOR, GABLE END	6. CENTER DOOR	7. DOOR OFF CENTER	8. MORE THAN ONE DOOR	9. MORE THAN ONE MAIN BUILDING FACE WITH DOOR WAY(S) (MAY FACE ON DIFFERENT STREETS)
								
10. CORNER DOORWAY(S)	11. OTHER							

DOOR – STRUCTURAL OPENING SHAPE Deals with the shape of the opening in the wall in which the door is placed. May contain more than one door.

									
1. NONE	2. UNKNOWN	3. FLAT	4. FLAT WITH ROUND CORNERS	5. SEGMENTAL	6. SEMI-ELLIPTICAL	7. SEMI-CIRCULAR	8. 4-CENTER OGEE	9. 2-CENTER POINTED	10. PARABOLIC
									
11. TRIANGULAR	12. OTHER								

DOOR TYPE Indicate the number of doors within the main doorway opening.

1. NONE	2. UNKNOWN	3. SINGLE	4. DOUBLE	5. MULTIPLE	6. OTHER

DOOR TYPE Indicate the type of door or doors within the main doorway opening. The panels in the illustration may be blind (no glass) or may be glass panels. Do not be limited by the drawings; panels can be many shapes and can be used in a variety of arrangements. Select the example which is most similar to the main door of the building.

1. NONE	2. UNKNOWN	3. PLAIN	4. PLAIN, DIVIDED VERTICALLY	5. PLAIN DIVIDED DIAGONALLY	6. SINGLE PANEL	7. TWO PANEL		8. THREE PANEL	
9. FOUR PANEL		10. FIVE PANEL	11. SIX OR MORE PANELS	12. LOWER WOOD PANELS AND RECTANGULAR GLASS ABOVE		13. DOOR WITH GLASS OVAL OR CIRCLE		14. DOOR WITH FAN PANEL	15. DECORATED DOOR
16. DUTCH DOOR	17. FRENCH DOOR	18. REVOLVING DOOR	19. IRON DOOR WITH OR WOUT PANELS	20. OTHER					

DOOR MATERIAL You may choose more than one if several materials are present.

1. NONE	2. UNKNOWN	3. WOOD	4. METAL	5. GLASS	6. OTHER

DOOR GLAZING Which of the following best describes the glass in the door?

1. NONE	2. UNKNOWN	3. GLASS PRESENT IN PART OF DOOR	4. ALL GLASS, WITH OR WITHOUT FRAME	5. ETCHED OR FROSTED GLASS PANEL(S) WITH DESIGN	6. STAINED GLASS PRESENT IN DOOR	7. OTHER

DOORWAY – SIDE PANELS This item describes the wood (blind) or glass panels which are adjacent to the door within the structural opening. Choose the illustration which most closely resembles the side panels of the building's main doorway.

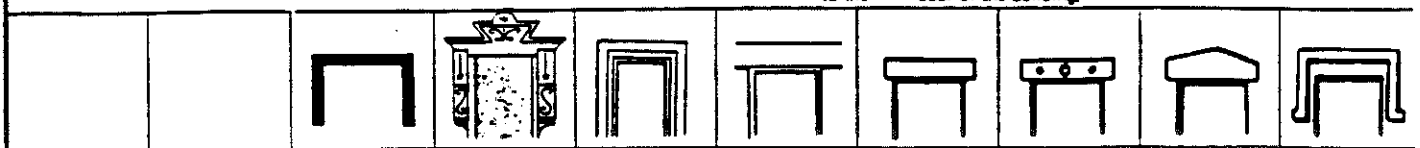
1. NONE	2. UNKNOWN	3. BLIND (NO GLASS)	4. SOME OR ALL SIDE PANELS HAVE GLASS	5. PANEL ON ONE SIDE ONLY, EITHER WITH OR WITHOUT GLASS	6. OTHER	

DOORWAY – TRANSOM PANELS A transom is an opening over the door, usually for ventilation. It may be a blind (no glass) panel or may have glass.

1. NONE	2. UNKNOWN	3. BLIND (NO GLASS)	4. SINGLE RECTANGULAR PIECE OF GLASS	5. GLASS, WITH PANELS DIVIDED BY SMALL UPRIGHT BARS	6. FANLIGHT WITH GLASS OR BLIND (NO GLASS) (MAY BE SINGLE OR DIVIDED BY SPOKES)	7. OTHER	

DOOR - SURROUNDING DETAIL OF TOP OF STRUCTURAL OPENING

There are many variations – select the one which is most similar to the door of the building.



1. NONE	2. UNKNOWN	3. PLAIN MOLDING	4. VICTORIAN DECORATED TRIM (MANY VARIATIONS)	5. MOLDED TRIM	6. CONTINUOUS TRIM ABOVE	7. PLAIN LINTEL	8. DECORATED LINTEL	9. SHAPED LINTEL	10. LABEL

11. FLAT WITH BRICKS OR STONES SET VERTICALLY	12. FLAT OR ARCHED WITH RADIATING BRICKS OR STONES	13. FLAT OR ARCHED WITH RADIATING BRICKS OR STONES AND CENTER KEYSTONE	14. FLAT OR ARCHED WITH ALTERNATING RADIATING BRICKS OR STONES	15. FLAT OR ARCHED WITH STEPPED RADIATING BRICKS OR STONES	16. PLAIN OR MOLDED ARCH TRIM	17. PLAIN OR MOLDED ARCH TRIM WITH CENTER KEYSTONE

18. SHELF	19. TRIANGULAR PEDIMENT	20. SEGMENTAL PEDIMENT	21. DOUBLE CURVED PEDIMENT	22. BROKEN PEDIMENT	23. HOOD, WITH OR WITHOUT BRACKETS	24. CURVED HOOD, WITH OR WITHOUT BRACKETS	25. OTHER

DOOR – SURROUNDING DETAIL OF SIDES OF STRUCTURAL OPENING

1. NONE	2. UNKNOWN	3. PLAIN	4. MOLDED TRIM	5. TILED TRIM	6. QUOINS	7. ROUND OR FLAT COLUMNS ATTACHED TO WALL SURFACE	8. OTHER DECORATED TRIM	9. OTHER

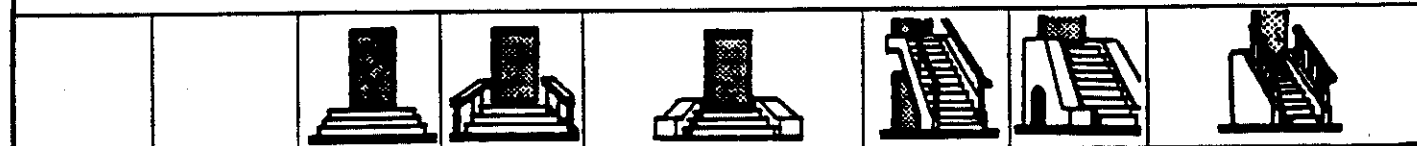
DOOR – DOORWAY TYPE

Doorway is the area inside the structural opening in the wall, between the door itself and the edge of the material surrounding the structural opening. The doorway may be flush with the exterior wall, or may be set back from the surface of the wall.

1. NONE	2. UNKNOWN	3. PLAIN (FLUSH OR RECESSED WITH WALL)	4. DECORATED (FLUSH WITH WALL OR RECESSED)	5. FLAT COLUMNS ATTACHED FLUSH WITH WALL	6. FLAT COLUMNS ATTACHED, RECESSED BACK FROM OUTSIDE WALL	7. ROUND COLUMNS ATTACHED FLUSH WITH WALL	8. ROUND COLUMNS ATTACHED, RECESSED BACK FROM OUTSIDE WALL
9. OTHER							

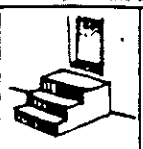
STAIRS – LOCATION AND DESIGN

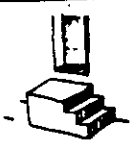
Shows the type and extent of the stairway

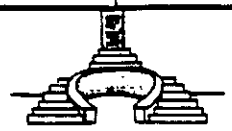


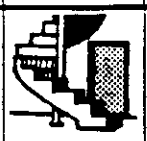
1. NONE	2. UNKNOWN	3. GROUND OR FIRST FLOOR, PLAIN	4. GROUND OR FIRST FLOOR WITH OPEN RAILING	5. GROUND OR FIRST FLOOR WITH SOLID RAILING	6. UPPER FLOORS WITH OPEN RAILING	7. UPPER FLOORS WITH SOLID RAILING	8. UPPER FLOOR WITH HANDRAIL SUPPORTED BY ROW OF COLUMNS
9. OTHER							

STAIRS – SHAPE This shows the shape of the stairway as it approaches the entrance.

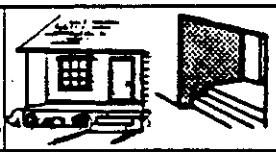


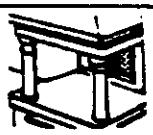
1. NONE	2. UNKNOWN	3. STRAIGHT	4. STRAIGHT, APPROACH FROM SIDE	5. STRAIGHT, REVERSED	6. STRAIGHT, DOUBLE	7. CURVED	8. DOUBLE CURVE
							




9. COMBINATION OF DOUBLE CURVE AND STRAIGHT		10. SPIRAL	11. LARGE PLATFORM, CURVED OR STRAIGHT		12. OTHER		

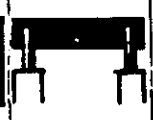
PORCH May cover one or more stories in height.



1. NONE	2. UNKNOWN	3. STOOP	4. RECESSED INTO WALL OR INTO CORNER	5. OPEN PORCH WITH SQUARE POSTS OR ROUND COLUMNS	6. PORCH WITH STICKWORK	7. CLOSED PORCH (MAY BE ENCLOSED WITH WOOD, GLASS, OR SCREEN.)
						
8. OPEN VERANDA (EXTENDS ACROSS FRONT, SOMETIMES AROUND SIDES		9. CLOSED VERANDA	10. GUYED (SUPPORTED BY CABLES FROM ABOVE)	11. MARQUEE OR OTHER PORCH WITHOUT SUPPORTS	12. OTHER	

PORCH SUPPORTS Indicate the type of supporting structures that hold up the roof of the porch.

1. NONE	2. UNKNOWN	3. POSTS, SQUARED OR TURNED	4. OPEN DECORATIVE LACY METAL SUPPORTS	5. LARGE SQUARE POSTS OR PILLARS	6. COLUMNS	7. ARCADE (ROW OF ARCHES)	8. WALL	9. SUPPORTS ON PIERS OR BLOCKS	10. CABLES, RODS OR WIRE
11. OTHER									

PORCH SUPPORTS – MATERIAL

1. NONE	2. UNKNOWN	3. WOOD	4. ADOBE	5. STONE	6. BRICK	7. TILE OR TERRACOTTA	8. CONCRETE OR SIMULATED STONE BLOCKS	9. PLASTER OR STUCCO	10. METAL
11. OTHER									

PORCH – HEIGHT Indicate the height covered by the porch.

1. NONE	2. UNKNOWN	3. FIRST STORY	4. FIRST AND SECOND STORIES	5. THREE OR MORE STORIES	6. OTHER

OTHER FEATURES

ADDITIONAL BUILDING FEATURES

Select any additional features found on the building.

1. NONE						
2. UNKNOWN	3. EXTERIOR CHIMNEY AGAINST WALL	4. TOWER OR TURRET	5. SPIRE OR STEEPLE (MOSTLY WITH CHURCHES)	6. EXTERIOR MASSIVE WALL SUPPORTS OR BUTTRESS. USUALLY BRICK, STONE, OR CONCRETE	7. ADDITIONAL ROW OF ARCHES OR COLUMNS NOT DESCRIBED EARLIER	8. BALCONY

				9. ADDITIONAL PORCH	10. GARAGE AS PART OF THE BUILDING	11. BAY WITH WINDOWS	12. ROUNDED BUILDING CORNERS	13. SHUTTERS (WOOD OR IRON COVERS THAT CLOSE ACROSS WINDOWS OR DOORS)

RESIDENTIAL SITE INSPECTION LIST

Use this checklist (when you visit each site) as an aid to recording the information you will need to write the description section (Section 7) on the DPR 523 form.

Have you checked?

_____Placement of house on site (center, corner, rear)
_____Plan
_____Number of stories
_____Foundation material
_____Exterior wall materials
_____Roof shape
_____Roof material
_____Chimneys:
    _____number
    _____location
    _____shape
    _____material
_____Roof trim:
    _____eaves
    _____gable ends
    _____dormers
_____Windows:
    _____shape
    _____location
    _____type (sash, casement, etc.)
    _____framing/decoration
_____Doors:
    _____type
    _____location
    _____framing/decoration
_____Porch:
    _____size/shape
    _____location
    _____material
    _____type of supports
    _____details
_____Other features:
    _____bays
    _____ornament
_____Surroundings (check as many as apply):
    _____open land
    _____densely built up
    _____residential
    _____commercial
    _____outbuildings
_____Condition:
    _____excellent _____fair
    _____good _____deteriorated

SURVEY OBJECTIVES

A comprehensive survey must first establish clear definitions, or categories, of what to look for so that survey workers will be alerted to items they might normally overlook. Categorization also provides a systematic presentation format later when the inventory is put into published form. Try to keep categories open-ended to admit new items as knowledge grows or tastes develop and change, e.g., ten years ago the craftsman bungalow probably was not considered by most to be of any historical value.

Categories might logically follow chronology or include "themes" as used in the State Inventory of Historic Resources; however phrased or arranged, certain categories of cultural resources should be included:

architectural history - as many possible representatives of the diverse styles and variations of residential and commercial architecture, whether vernacular or works of identifiable artisans, master craftsmen, builders or architects important locally or with wider significance. This category will contribute to the following "groupings" category, since a good representation of a particular period or style might mean an entire street of such structures (of minor importance singularly, but of great importance in a cluster).

community design and esthetic features - objectives or relationships of design interest or importance of setting. This category might include street trees, light fixtures, street graphics, street furniture, local or unusual building materials, interesting or pleasant design components, or landscape features that contribute to the "look and feel" of the community.

cultural history - sites and structures important to the history of the community. These sites and structures might include those associated with early or continuing cultural events such as yearly festivals, parades or theatre; those associated with literary or political figures and events; and places associated with educational, religious or ethnic groups or individuals important in the community.

development history and industrial archaeology - surviving sites, routes, or structures important to the early settlement, economic origins, or technological development of the locale. This category might include evidences of the Spanish colonial or Mexican period, early agriculture or industry, town plat indications or subdivision history, and transportation routes from paths and trails to canals, railroads, and more recent highways.

historic districts - groupings or structures, historic sites or features, design components, natural features and landscape architecture, or other interesting details which together create an

exceptionally rich historic or cultural ambiance. Clusters of significant historic, cultural, esthetic elements will normally justify designation as a special district. Such future districts are often readily apparent to residents and are long recognized as areas of special significance. Sometimes, however, the survey will uncover unsuspected clusterings of significant structures, important historic sites and unique design elements. The survey form should be designed to make survey workers alert to this possibility. In either a well-known or newly discovered district, informed judgement is helpful in establishing the validity of district designation.

natural features - hills, geological formations, bodies of water, arroyos, gorges, remaining forests or natural vegetation and other striking or familiar physical characteristics are often important to the special character, historic identity or esthetic setting of the community. Such features are not to be confused with purely physical features but should like an important person have a place in the history of the community.

paleontological sites and archaeological sites - those capable of yielding information about the prehistoric activities of man, evidences of earlier historic cultures once inhabiting the area or locale, areas of cultural, social, or economic importance to these people's daily lives, well-being or survival (e.g., petroglyphs, ritual sites, hunting or gathering areas, and grounds potentially rich in fossil findings) and also sites having spiritual or cultural significance to living Native Americans.

ALHAMBRA HISTORIC AND CULTURAL RESOURCES SURVEY

PHOTOGRAPHY INSTRUCTIONS

1. Identify each frame by address, and view or description (e.g. "east elevation", "porch detail") on the photography log issued to you with your assignment.

2. For most buildings, one documentary black and white photograph will be sufficient. Choose the angle of the shot, either directly in front or showing two elevations, based on which is the most revealing and which is the most attractive composition.

3. Extraordinary details also merit photographic documentation. Use your judgement as to what additional shots are indicated by the quality or interest of the building.

4. Some buildings present certain problems in finding a viewpoint from which a photograph can be made. If foliage obscures the structure, either take a picture through a break in the vegetation, or simply photograph the site as it appears from the street, foliage, fence, and all.

5. Choose your time of day with the position of the sun in mind. Plan on doing buildings on the west side of the street in the morning, etc.

6. Compose your shots so that the frame is mostly filled by the structure, and not by sky or the street, if possible. Try to avoid cars. (People are O.K.)

7. Bracketing shots in order to obtain correct exposures is acceptable.

8. Photographing buildings, especially dark ones or bungalows with shadowed porches, is a challenge. It is usually necessary to overexpose the shot by one or two f-stops.

9. Try to avoid parallax distortion by holding your camera straight.

10. The kind of photography required by the survey can be accomplished by a 35mm or larger format camera. Camera which make only automatic exposures may be a problem, due to the conditions described above (item 8). A wide angle lens or other specialized lens is not necessary, but can add a great deal of flexibility and variety to your shots. Use filters, tripods, and other equipment at your own discretion. Film (Kodak Plus-X) will be supplied to you. Return the exposed roll to us for processing. The negatives will be in the

possession of the survey. Arrangements can be made for an extra copy of the proof sheet at cost.

11. Remember to respect private property and to carry identification at all times.

City of Alhambra
111 South First Street · Alhambra, California 91801
Gateway to the San Gabriel Valley

To Whom It May Concern:

This is to introduce _____, a volunteer for the Alhambra Historic and Cultural Resources survey. This architectural and historic survey is a project of the City of Alhambra, funded in part by the State Office of Historic Preservation.

Volunteers will be writing architectural descriptions, taking photographs, and performing a variety of research tasks in an effort to systematically document the City's historic neighborhoods and individual sites of architectectural or historic significance. Your cooperation in this effort will be much appreciated.

If you have any questions about the survey, or would like to participate, please call Scott Lee at (818) 570-5038.

Sincerely,

David Carmany

Appendix G

Character Defining Features Matrix

ESA

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
Site				
1. Overall Site	L- shaped parcel with grassy lawns to the east, west and along the north of the parcel	 Source: Google Earth 2023	SIGNIFICANCE ☒ Primary ☐ Contributing ☐ non-Contributing ☒ Original/Early Feature ☐ non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☐ Medium ☒ Low	The L-shaped parcel should be retained and preserved in conformance with the SOI Standards.
2. Overall Site (east of the building, west of the building and north of the building along Shorb Street)	Mature trees and shrubs along the east, west, and north of the building. Significant grass lawns to the east, west and north that are graded towards the building, providing a setback and height that increases the visibility of the building along the public right of way on West Shorb Street and 6th Street.		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ non-Contributing ☒ Original/Early Feature ☐ non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☐ Medium ☒ Low	The grassy lawns and other landscape areas should be retained and preserved in place, as should the site grading.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
3. Northeast portion of site along Shorb Street towards one-story wing; directly north of the NE corner of the building	Concrete steps with stuccoed pony walls with brick capping at the northeast of the site leading to the canopied entrance (east entrance) of the one-story wing. The metal handrail is a later addition.	  	SIGNIFICANCE ☐ Primary ☒ Contributing ☐ non-Contributing ☒ Original/Early Feature ☐ non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☐ Medium ☒ Low	To be retained and preserved in place.
4. Northern portion of the site along West Shorb Street, directly north of main entrance to two-story wing	Brick steps with brick pony walls in front of primary entrance of the two-story wing		SIGNIFICANCE ☐ Primary ☒ Contributing ☐ non-Contributing ☒ Original/Early Feature ☐ non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☐ Medium ☒ Low	To be retained and preserved in place. It should be repaired following *NPS Brief 2: Repointing Mortar joints in Historic Masonry Buildings*. The wall should be retained and preserved.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
5. Overall Building	Double L Shaped footprint of the building delineating the western two-story wing and eastern one-story wing (*highlighted yellow and blue respectively*) with a central courtyard between	 Source: Google Earth 2023	SIGNIFICANCE ☒ Primary ☐ Contributing ☐ non-Contributing ☒ Original/Early Feature ☐ non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☐ Medium ☒ Low	The double L-shaped footprint should be retained along with the central courtyard. The footprint and one and two-story horizontal massing should be retained and preserved in place.
6. Overall Building	Exposed unreinforced brick exterior (previously whitewashed) with horizontal massing		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ non-Contributing ☒ Original/Early Feature ☐ non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☒ High ☐ Medium ☐ Low	Retain and rehabilitate the brick wall in conformance with the SOI Standards. Should be assessed by a licensed engineer for structural damage, cracks, and mortar depletion and repaired as per recommendations in *NPS Brief 2: Repointing Mortar joints in Historic Masonry Buildings*. The wall should be retained and preserved.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
				
7. Overall Building	Brick Pattern (4 to 1 Common Bond)		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ non-Contributing ☒ Original/Early Feature ☐ non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☒ High ☐ Medium ☐ Low	The brick pattern should be retained. Any future brickwork should replicate the pattern.
8. Overall Building	Low-pitched, cross-gabled roof clad in terracotta barrel tiles; open eaves with shallow exposed rafter tails.		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ non-Contributing ☒ Original/Early Feature ☐ non-Original Feature ☐ Compatible ☐ Incompatible	The original materials and features of the roof in terms of the cross gable, pitch, clay tiles, rafters should be retained and preserved in place. The materials and features should be repaired and replaced in kind following the *National Parks Preservation Brief 30: The Preservation and Repair of Historic Clay Tile Roofs* as a reference.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
			**PRIORITY** ☐ High ☒ Medium ☐ Low	
9. Overall Building; Gabled end of wings.	Semicircular arched openings composed of two courses of rowlocks; projecting rowlock sills and louvered wood vents.	 	SIGNIFICANCE ☒ Primary ☐ Contributing ☐ non-Contributing ☒ Original/Early Feature ☐ non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	The brick arched gable vents with brick sills should be retained and preserved in place. The brick masonry should be repaired as per recommendations in NPS Brief 2: Repointing Mortar joints in Historic Masonry Buildings.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
10. Overall Building (East Wing: north, east and west elevations; West Wing: second floor, north and east elevations)	Open brick course perforation screens interspersed with window openings at the north, east and west elevations of the east wing and at the second floor of the north and east elevations of the west wing		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☐ Medium ☒ Low	The open brick course perforation screens should be retained and preserved in place. The brick masonry should be repaired as per recommendations in *NPS Brief 2: Repointing Mortar joints in Historic Masonry Buildings*.
11. Overall building	Window openings, individually and in pairs		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☒ High ☐ Medium ☐ Low	All the window openings should be retained and preserved in place.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
12. Overall building	Six-over-six double-hung wood windows with rowlock, brick sills. The majority of the openings have been boarded over but appear to retain their original windows.	 	SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☒ High ☐ Medium ☐ Low	Retain original window openings and repair the existing wood frames or if deteriorated beyond repair, replace them in kind. Retain and repair wood muntins, window glass and glazing or replace in kind to match original. Please see *National Parks Preservation Brief 9: The Repair of Historic Wooden Windows*.
13. Pimary (north) façade of building, both East and West Wings.	False louvered metal shutters on either sides of windows	 	SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	The false metal shutters should be retained and preserved in place. Following steps should be followed to clean up metal shutters: 1) removal of light rust, flaking and excessive paint; 2) priming of exposed metal with a rust-inhibiting primer
East Wing (one-story)				

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
14. East wing (North end of East Elevation)	Entry porch/landing with two steps, composed of brick in herringbone pattern. Regency-style metal canopy with stylized wrought iron supports at the east elevation. Original French door likely under boards; single wood panel on bottom of each leaf with six lites at top.	 	SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	The metal canopy with wrought iron supports should be preserved in place. Following steps should be followed to clean up the metal: 1) removal of light rust, flaking and excessive paint; 2) priming of exposed metal with a rust-inhibiting primer. The brick landing should be preserved in place. The brick masonry should be repaired as per recommendations in *NPS Brief 2: Repointing Mortar joints in Historic Masonry Buildings*.
15. East wing (South end of West Elevation)	Entry porch at south end of western elevation of East wing. The floor is brick in a herringbone pattern; the shed roof is an extension of the main roofline and clad in clay tiles, supported by thin square wood columns. Metal incinerator is inset into a brick fireplace with a mantle. Tall brick chimney with cap pierces roof.		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	The wood beam and columns should be retained and preserved in place. The repair should follow the recommendations in the *NPS Brief 45: Preserving Historic Wood Porches for conformance with the Secretary of Interior Standards.*The brick landing should be preserved in place. The brick masonry should be repaired as per recommendations in *NPS Brief 2: Repointing Mortar joints in Historic Masonry Buildings*.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
16. East wing	Single-leaf door opening in the eastern corner of interior south elevation. Unknown step/stoop/landing in front is covered up and therefore unknown and non-contributing feature.		SIGNIFICANCE ☐Primary ☒ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐High ☐ Medium ☒ Low	
West Wing (two-story)				
17. West wing (North elevation)	Covered porch/gallery cantilevered off building at the second level. Roof is an extension of the main roofline, clad in clay tiles and supported by slender wood columns with a wood balustrade between.		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☒ High ☐ Medium ☐ Low	The wood cantilevered balcony should be preserved in place. The wood beam and columns should be retained and preserved. The repair should follow the recommendations in the *NPS Brief 45: Preserving Historic Wood Porches.*

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
18. West wing (North elevation)	Floor-to-ceiling openings at second level of north elevation. Based on historic photos, they contain(ed) wood French doors with a single wood panel at bottom and six lites at top.		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	All the window openings should be retained and preserved in place.
19. West Wing (North Elevation)	Main entry on primary (north) elevation: recessed and width of double-leaf door. Partial-length patio with brick in herringbone pattern and low wood wall on west end with lamp on top of post. Carved stone dedication panel immediately to the east of the entry on the front (north) elevation.		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☒ High ☐ Medium ☐ Low	Door opening should be retained and preserved in place. The brick landing should be preserved in place. The brick masonry should be repaired as per recommendations in *NPS Brief 2: Repointing Mortar joints in Historic Masonry Buildings*.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
				
20. West wing (Internal south elevation)	Double-leaf entry with brick segmental arch above.		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☐ Medium ☒ Low	The brick arched opening should be retained and preserved in place. The arch should be assessed by a licensed engineer for structural damage, cracks, and mortar depletion and repaired as per recommendations in *NPS Brief 2: Repointing Mortar Joints in Historic Masonry Buildings*.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
21. West wing (West and south elevations)	Attached wood landing and staircase supported by slender wood columns, forming an entry porch at the second level of the gabled ends. Porch/staircase on the west gabled end has a railing with square chamfered posts and slender wood balusters; brick patio underneath at the first level. Porch/staircase on the south gabled end has simple square posts and slender wood balusters. Both second-floor entrances appear to be double-leaf in size. Concrete ramp for handicap access on south elevation is not a contributing feature.		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☒ High ☐ Medium ☐ Low	The wood beam, columns and staircase should be retained and preserved in place. The repair should follow the recommendations in the *NPS Brief 45: Preserving Historic Wood Porches* for conformance with the Secretary of Interior Standards. The brick landing should be preserved in place. The brick masonry should be repaired as per recommendations in *NPS Brief 2: Repointing Mortar joints in Historic Masonry Buildings*.
22. West wing (Internal west elevation)	Single-leaf entry with Colonial Revival Style surround with Doric pilasters supporting an open pediment. Small landing/stair of brick in a herringbone pattern.		SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☐ Medium ☒ Low	The Colonial Revival Style surround with Doric pilaster should be retained and preserved in place. The brick landing should be preserved in place. The brick masonry should be repaired as per recommendations in *NPS Brief 2: Repointing Mortar joints in Historic Masonry Buildings*.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
Interior				
23. Overall Building	Interior planning with L- shaped corridors with offices/exam rooms on either side	 Source: Los Angeles County	SIGNIFICANCE ☐ Primary ☒ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	Re-design of interior is allowable to comply with current codes and support new use. Minimize changes to the extent feasible. Retain original plan and layout as far as feasible. Record and document with photographs and plans in a HABS report prior to removal/demolition of feature.
24. Overall Building	Wood window surrounds on interior	 Source: Los Angeles County	SIGNIFICANCE ☐ Primary ☒ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	The wood window surrounds are original and should be retained and preserved in place. Any repair should be done in-kind material, size, design, and style. If deteriorated beyond repair, should be replaced in-kind.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
25. Overall Building	Exposed wood beams in ceiling	 Source: Los Angeles County	SIGNIFICANCE ☐ Primary ☒ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	The wood beams are original and should be retained and preserved in place. Any repair should be done in-kind material, size, design, and style. If deteriorated beyond repair, should be replaced in-kind.
26. Overall Building	Vertical Wood paneled interior	 Source: Los Angeles County	SIGNIFICANCE ☐ Primary ☐ Contributing ☒ Non-Contributing ☐ Original/Early Feature ☒ Non-Original Feature ☒ Compatible ☐ Incompatible **PRIORITY** ☐ High ☐ Medium ☒ Low	Re-design of interior is allowable to comply with current codes and support new use. Minimize changes to the extent feasible. Retain original plan and layout as far as feasible. Record and document with photographs and plans in a HABS report prior to removal/demolition of feature.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
27. Overall Building	Plastered interior walls	 Source: Los Angeles County	SIGNIFICANCE ☐ Primary ☒ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	Re-design of interior is allowable to comply with current codes and support new use. Minimize changes to the extent feasible. Retain original plan and layout as far as feasible. Record and document with photographs and plans in a HABS report prior to removal/demolition of feature.
28. Overall Building	Tile Mosaics on wall	 Source: Los Angeles County	SIGNIFICANCE ☒ Primary ☐ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☒ High ☐ Medium ☐ Low	Mosaics should be preserved in place if possible or moved within the building. Record and document with photographs in a HABS report prior to removal/demolition of feature.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
29. West Wing	Wood cabinet for building directory.	 Source: Los Angeles County	SIGNIFICANCE ☐ Primary ☒ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	Cabinet should be preserved in place if possible or moved within the building. Record and document with photographs in a HABS report prior to removal/demolition of feature.
30. West Wing	Central staircase with wood risers and wood balustrade at the center of the L-shaped corridor in the West Wing.	 Source: Los Angeles County	SIGNIFICANCE ☐ Primary ☒ Contributing ☐ Non-Contributing ☐ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	The central wood staircase is original and should be retained and preserved in place. Any repair should be done in-kind material, size, design, and style. If deteriorated beyond repair, should be replaced in-kind.

Feature No and Location	Feature	Image	Significance & Condition	Recommendation
31. Interior entrance from West Wing to East Wing	Arched entrance to L-shaped corridors	 Source: Los Angeles County	SIGNIFICANCE ☐ Primary ☒ Contributing ☐ Non-Contributing ☒ Original/Early Feature ☐ Non-Original Feature ☐ Compatible ☐ Incompatible **PRIORITY** ☐ High ☒ Medium ☐ Low	Re-design of interior is allowable to comply with current codes and support new use. Minimize changes to the extent feasible. Retain original plan and layout as far as feasible. Record and document with photographs and plans in a HABS report prior to removal/demolition of feature.
32. Southwest corner of the parcel	Paved parking lot at the southwest corner of the parcel		SIGNIFICANCE ☐ Primary ☐ Contributing ☒ Non-Contributing ☐ Original/Early Feature ☒ Non-Original Feature ☒ Compatible ☐ Incompatible **PRIORITY** ☐ High ☐ Medium ☒ Low	The parking lot is a non-contributing feature and does not need to be retained.

Appendix H
DPR 523 Forms

ESA

612 W. Shorb Street, also known as The Alhambra Health Center, was surveyed by ESA Staff on September 1, 2023 as a part of a Historic Resource Assessment (Environmental Science Associates, *Alhambra Health Center, 612 West Shorb Street Historic Resource Assessment*, Prepared for Michael Macias, Director of Parks and Recreation, City of Alhambra, July 2024).

The subject property at 612 West Shorb Street has been identified as a historical resource in two previous surveys, once in 1984 and once in 1994. The *Alhambra Historic and Cultural Resources Survey, 1984-1985*, was a part of the State Historic Survey Program, wherein the City of Alhambra received a grant from the California Office of Historic Preservation to conduct a historic resources survey. The 1984-1985 survey recognized the Alhambra Health Center at 612 West Shorb Street as an important civic institution, along with the neighboring fire station, Alhambra Fire Department Station No 2. Both buildings were evaluated for eligibility in the National Register of Historic Places and given the status code of "3", denoting that a property "Appears eligible for individual listing."[1] The California OHP updated the status codes in August of 2003, after which the Alhambra Health Center was given an updated status code of "3S," meaning the property "appears eligible for National Register individually through survey evaluation." [2] The 1994-1995 survey was conducted by Historic Resources Group, where the Alhambra Health Center at 612 West Shorb Street was given the status "2S2," stating it was "individually determined eligible for NR by consensus through Section 106 process."

During the preparation of this HRA, Historic Resources Group, in conjunction with the City of Alhambra, released the "City of Alhambra Historic Resources Survey Report," the first comprehensive citywide survey of the built environment of Alhambra. The draft DPR 523 forms prepared by HRG recommend 612 W. Shorb Street as eligible for the NR under Criterion 1/A under the following contexts:

- City Expansion and Industrial Growth (1920-1940)
- Civic and Institutional Development (1920-1940)

In addition, 612 W. Shorb Street was recommended eligible for the NR under Criterion 3/C "as an excellent example of Monterey Colonial Revival style architecture in Alhambra.

*P3a. Description:

Setting

The Subject Property is located at 612 West Shorb Street, an L-shaped parcel bordered by West Shorb Street to the north, South 7th Street to the west, South 8th Street to the east, and Alhambra High School sports fields to the north (AIN 53501-007-900). An alleyway sits to the south of the parcel, and the Alhambra Fire Department Station No. 2 sits to the southeast. The surrounding neighborhood is characterized by a series of recreational fields to the north, low-scale churches and commercial buildings to the west, and a one-story residential development to the east. A low-scale commercial

[1] Johnson Heumann Research Associates, "Alhambra Historic and Cultural Resources Survey," prepared for the Office of Historic Preservation, State of California, 1984-1985, 114, 146.

[2] California Office of Historic Preservation, "Status Code Conversion List," August 2003, http://zimas.lacity.org/documents/StatusCodeConversionList.pdf (accessed October 5,2023)

development with associated parking lots sits to the south of the subject property along Valley Boulevard, which is the main thoroughfare in the area.

The Project Site is improved with one structure with ample landscaped grass lawns surrounding the building. Mature trees and plantings are located primarily along the north, west, and east elevations (**Figure 1**). Surface parking lots toward the center of the property are accessible from South 6th Street and off a southern alleyway in the southwest corner of the property (**Figures 2-4**). The subject property slopes upward to the center of the lot, and two sets of steps extend from the sidewalk along W. Shorb Street towards the building (**Figure 5**). The eastern set of brick steps leads to brick pavers that extend toward the primary entrance and includes brick pony walls (**Figure 6**). The western set of concrete steps includes concrete pony walls with brick capping and metal handrails (**Figure 7**). A concrete wheelchair ramp with metal handrails leads from S. 7th Street to the southern parking lot.

Architectural Description

The subject property at 612 West Shorb Street is oriented north along West Shorb Street. Constructed in 1930 in the Monterey Style, the brick building's footprint is comprised of two L-shaped forms: a two-story volume at the west and a one-story volume at the east. The two volumes intersect along the building's northern facade, and both include wing extensions that project south. The brick exteriors are in a four-to-one common bond and were previously whitewashed in lime before being removed in a 2005 seismic update.

Two-Story Western Wing

The building's two-story western wing includes a cross-gabled, low-pitched roof clad in terracotta tile (**Figures 8 and 9**. Shallow exposed rafter tails extend beyond the building and terminate in metal rain gutters. Accessed by a brick porch with brick steps, the building's recessed primary entrance sits at the asymmetrical north facade (**Figure 10**). The facade is characterized by a full-width Monterey-style cantilevered balcony at the second story. The wood balcony includes square balustrades and columns that support a shed roof that slightly projects from the primary roofline.

The north entrance is flanked by a pair of windows with false metal shutters. The building's cornerstone sits adjacent to the entrance at the ground floor. Window openings continue at regularly spaced intervals along the first floor, while floor-to-ceiling window openings are located on the upper floor (**Figure 11**). The floor-to-ceiling openings are interspersed by perforated open-course brick configurations. It appears that the perforated open course brick configurations served as screens overglazing. The majority of the building's fenestration is enclosed with painted plywood, which is punctuated with air conditioning units at irregular intervals. Original glazing is visible in select locations and mostly consists of six-over-six double-hung wood windows.

Additional ground floor entrances with brick porches sit at the west and south gabled ends. These entrances include both surmounting wood decks supported by simple square columns and square balustrades, which are accessed by prominent exterior wood staircases (**Figures 12 and 13**). The staircases lead to second-floor wood decks and recessed double-door entrances (see **Figure 14**). Both gabled ends include brick arched gable vents with brick sills that sit centered above the second-floor entrances. Another vent is found on the two-story wing's east elevation.

The building's L shape forms a southeastern courtyard with mature trees and shrub plantings (**Figure 15**). Two ground-floor entrances sit within this area, including an arched brick entrance toward the crux of the "L" and another located toward the south of the extending wing (**Figure 16**). The southern entrance includes brick steps and a Colonial Revival-style surround with Doric pilasters supporting an open pediment (**Figure 17**).

One-Story Eastern Wing

The subject property's one-story eastern wing connects to the two-story portion along W. Shorb Street, centered below the east elevation gable (**Figures 18-20**). The one-story eastern wing similarly includes a cross-gabled, low-pitched roof clad in terracotta tile. Shallow exposed rafter tails extend beyond the building and terminate in metal rain gutters, with terracotta coping at the gabled ends. The one-story portion includes a south projecting wing that forms a "U" shape, enclosing another courtyard with a grass area and a parking lot (**Figure 21**). A southern brick porch sits at the wing's west elevation and includes simple square columns that support a terracotta-clad lean-to roof extension. Original glazing is visible in select locations at the one-story volume and includes six-over-six double-hung wood windows with brick sills. Windows are interspersed with perforated open course brick configurations of a similar size. A brick arched gable vent with a brick sill sits centered within the southern gabled end (**Figure 22**).

The one-story wing's east elevation terminates at W. Shorb Street with a lean-to roof that extends along its north elevation (**Figure 23**). Anchored at the building's northeast corner sits a brick porch with a flared Regency-style metal canopy with stylized wrought iron supports (**Figure 24**). The eastern steps along W. Shorb Street formerly led to this entrance; they are now covered with plant overgrowth (**Figure 25**). The one-story portion's north elevation steps back and includes pairs and single windows, some with false metal shutters and perforated open course brick configurations (**Figure 26**).

Interior

The interior layout of the Alhambra Health Center is linear, with an L-shaped central corridor with rooms on either side. The two-story wing has a central staircase for vertical circulation, as well as exterior staircases at the south and west elevations and a cantilevered balcony at the north elevation. The one-story wing housed examination rooms and x-ray rooms, whereas the two-story wing housed most of the offices. In some areas, the interior appears to have linoleum flooring, plastered walls, and wood paneling. The central staircase in the two-story wing has wood paneling and a decorative wood balustrade **(Figures 27-28)**.

*B6. Construction History

Building permits on file with the City of Alhambra Building Department (**Table 1**), Sanborn Maps, aerial photos and historic newspapers were used to create a construction history for the Subject Property, which was known as The Alhambra Health Center.

The Subject Property was constructed in 1930 at 612 West Shorb Street for a cost of approximately $180,000.[3] The building was designed by Los Angeles County Architect Karl Wilhelm Muck in the Monterey style with Andalusian influences. It featured a California padre tile roof, whitewashed brick exterior, and green shutters with wrought-iron fixtures (**Figure 28**).[4] According to the earliest Sanborn map showing the Subject Property in 1931, the building was a split-level unreinforced brick masonry

[3] "New Health Center to be Dedicated," *Los Angeles Times,* August 15, 1930.
[4] "New Health Center to be Dedicated," *Los Angeles Times,* August 15, 1930.

structure with a double-L-shaped footprint. A hospital operated in the one-story wing, and welfare offices were housed in the two-story wing.

While there are only two available permits for the Subject Property on file, both for minor repair work (**see Table 1**), a review of Sanborn Maps, aerial photos, and historic newspapers revealed that the building remained intact and mostly unaltered from its original construction until 1990, when the unreinforced masonry (URM) structure was deemed seismically unsafe in the event of a moderate to severe earthquake.[5] Various ideas were weighed to address the issue, including the closure of the Alhambra Health Center and a search for a new facility or relocation of the current facility to El Monte or Monrovia; significant protests from the local community kept the center open. Eventually, in 1994, the County of Los Angeles put out a bid for work on the Alhambra Health Center to "seismically upgrade the facility while being sensitive to the existing exterior character of the building and to implement a major interior renovation of the building, including rehabilitation or replacement of the building systems (i.e., HVAC, electrical, and plumbing)."[6] The Alhambra Health Center was granted $4,000,000 under a Community Development Block Grant (CDBG) provided by the U.S. Department of Housing and Urban Development for earthquake relief activity following the 1994 Northridge earthquake.[7]

Per a newspaper article on September 14, 2002, the Center was "refurbished in 2000 with new floors, new light fixtures and paint."[8] The building underwent further seismic upgrades in 2005 (**Figures 29-30**). A review of the available as-built drawings from this seismic upgrade confirmed that the work was carried out in conformance with the Secretary of Interior Standards. The drawings were prepared by Caldwell Architects and their structural consultants KPFF. Per the drawings, the building underwent seismic and accessibility upgrades, wherein Unreinforced Masonry (URM) shear tests were conducted, and interior code-compliant shear walls were constructed along the corridors. Other work conducted at the time included the repair of cracks in the masonry wall by injection of compatible strengthening material and the addition of ramps at the exterior. The existing historic roof was completely removed with the intent of waterproofing the roof and abating any asbestos in the roofing material. The drawings note that the roof tiles should be removed carefully and reused. All the downspouts, vents, and gutters were retained in place. Any plaster and flooring removed for the structural work and shear tests were repaired in kind. The building also underwent an Americans with Disabilities Act (ADA) accessibility upgrade with the addition of ADA-compliant ramps at the exterior, ADA-accessible bathrooms, and door hardware. Additional structural posts were added to the east elevation of the two-story wing. The traditional roof trusses at the two-story wing had additional joists and horizontal diaphragms constructed, possibly to anchor the roof securely to the walls and floors.[9] Based on photos, it is also likely that the exterior whitewash finish of the center was removed during the retrofit.

The Alhambra Health Center housed all the offices in the two-story wing and all the examination rooms, and medical services in the one-story wing. The building has been vacant since the 1990s, with all the windows and doors boarded.[10] The footprint of the building appears to remain unchanged since its original construction in 1930.

Architect: Karl W. Muck

Karl Wilhelm Muck was born in Los Angeles, California on April 21st, 1892, to Peter Muck and Annie Baker. Muck began his career in 1913, working as an "uncertified" architect with an office located in the building of Venice Realty and Investment Company at the corner of Lorelei Avenue and Trolleyway in Venice, California.[11] Very early in his career, Muck served as the managing architect for companies such as Southern California Home Builders and the Western Building and Investment Company. He was involved in designing hotel buildings on the Ocean Front in Venice, California, while residing with his parents at the Beverly Apartments at 20 Westminster Avenue.[12] He married Cecil Lovett in 1915 and by 1917, he was residing in El Dorado, Kansas, with his wife and child, continuing to work as an

[11] "Reliable Realty Advertisement," *Evening Vanguard*, November 25, 1913
[12] "Classic Architecture of Venice Object of Admiration," *Evening Vanguard*, November 29, 1913

architect.[13] While in Kansas, Muck designed various types of buildings, including residences, retail stores, offices, and a Gothic church in the town of Potwin. He extensively utilized brick as construction material in his designs.[14] Although Muck found El Dorado a "lively and progressive city," by January 1920, Muck had moved back to Los Angeles with his wife, Ceciel and daughter, Frances.[15] Newspaper reports indicate that by 1927, he was serving as the County Architect for Los Angeles County, working on the construction of the County Health Center in Pomona.[16]

As the County Architect, Muck designed various civic and institutional buildings such as fire stations, health centers, sanatoriums, hospitals, administration buildings, and residences (**Figure 31**). The sketches and renderings of these buildings were featured in the Architects Building Material Exhibit, an exhibition held by the Office of Los Angeles County Architects in 1930.[17] Muck utilized "the Spanish and early Californian style of architecture because of the fireproof character of the construction type and its suitability to Southern California."[18] His well-known projects include a one-story frame and stucco addition to the Olive View Sanatorium in Van Nuys, the Los Angeles General Hospital, county fair structures at Pomona, the Alhambra Health Center, and various buildings of the Rancho Los Amigos Hospital Campus including the iconic Harriman Building on the North Campus (**Figure 32**).[19]

By 1931, Muck was making $7,200 a year as County Architect and managed a staff of 45 employees.[20] However, budget cuts during that year led to the abolishment of the Office of County Architect, with the *Pomona Progress Bulletin* noting that "there was no criticism of Muck" and the closure of the office was "taken in the interest of economy in an effort to keep the county budget at a low enough rate so that no tax rate increase need[ed] to be made."[21]

He then opened a private architectural practice and by 1935 had offices located at 7510 Sunset Boulevard.[22] In his 24 years of architectural practice in Southern California, Muck became an advocate of the Monterey Style because of its functional designs and economic advantage (**Figure 26**).[23] With its linear arrangement, the Monterey Style allows a smooth interconnection of all the spaces in a residence. Mixed with modest construction materials, it proves to be an economically functional style of architecture. However, in 1936, Muck died by suicide at the age of 43 for reasons unknown.[24]

*B10. Significance:

Historic Contexts

Context: Public and Private Health and Medicine in Los Angeles County, 1850–1980

The Los Angeles County hospital system was built under changing and often conflicting social policies governing public health and the welfare of the poor. The county's health care system began in 1856, when six members of the Daughters of Charity of St. Vincent DePaul traveled to Los Angeles from Emmitsburg, Maryland, to open an eight-bed hospital.[25] Between then and now, the operation of public hospitals in Los Angeles has shifted from a state-mandated responsibility to part of the county's broader public health mission. Los Angeles County hospitals have also transitioned from a county-financed system to one with significant participation of state and federal government sources.[26]

The Daughters of Charity's facility, the Los Angeles Infirmary, now known as St. Vincent's Hospital, was originally located in a Sonoratown adobe owned by then-Mayor of Los Angeles, Don Cristobal Aguilar. After incorporating as a charity in 1869, nuns sold medical services for indigent patients to the County for $1.22 a day.[27] The same year, builders laid the cornerstone for the permanent French Hospital at College and Hill Streets, which became the first non-partisan hospital in Los Angeles. The French Hospital was financed through funds raised by members of the French Benevolent Society.[28] Shortly after, the cost of caring for the indigent became an issue in Los Angeles, and in 1878, the county opened its own 100-bed Los Angeles County Hospital as a way of lowering costs. In 1885, Good Samaritan Hospital, affiliated with the Episcopalian Church, was opened by Sister Mary Wood. Shortly afterward, California Hospital Medical Center was opened by Dr. Walter Lindley in 1887, where the first X-rays taken in Los Angeles were performed a few years later.[29]

By the early 1900s, California had one of the most extensive public hospital systems in the nation, and a 1925 Department of Public Welfare survey identified 69 county hospitals spread across all but four California counties. County hospitals provided a broad range of inpatient and outpatient services to individuals who met indigent requirements. The major responsibility for supporting county hospitals rested on the counties themselves, financed primarily through property taxes, with minor contributions from other sources.[30] Privately owned hospitals continued to flourish in Los Angeles as well. In 1902, Los Angeles businessman Kaspare Cohn donated a two-story Victorian home in Angeleno Heights for a 12-bed hospital called the Kaspare Cohn Hospital, now known as Cedars-Sinai. Hollywood Hospital opened in 1924 and merges with Clara Barton Hospital a few years later, becoming Hollywood Clara Barton Hospital.

The County of Los Angeles began to take an active role as a national leader in providing medical care through dispersed facilities for its citizens, under the direction of J.L. Pomeroy, M.D. In 1929, in an article published in the *Journal*, Pomeroy, a County Health Officer, advocated for the need to create a dispersed network of county-run medical clinics that would be able to meet the needs of the growing population of Los Angeles County. Later, in 1935, Pomeroy spoke of the local health center as a key component of successful health stories throughout Los Angeles County. The County health department, at this time, was concerned with the spread of communicable diseases such as syphilis and tuberculosis and often tied the spread of these diseases to general sanitation and hygiene concerns.[31]

Private physicians opposed the County Clinics, thinking it would draw business away from their practices. This, along with budget pressures during the Great Depression, led to the reduction in the network of County Health services in the late 1930, even while a new Los Angeles County General Hospital was opened in 1933.[32]

Beginning in the 1930s and continuing through the post-World War II era, employers began to voluntarily provide health insurance for their workers. Employer demand for workers coverage options prompted the development of private insurance programs such as Blue Cross and Blue Shield, and prepaid delivery systems, such as Kaiser Permanente.[33] This, combined with the post-war population boom and a shift from prevention of infectious diseases to a more general health care model, resulted in Los Angeles County's patient population becoming largely poor and lower class.

To serve this growing population, Los Angeles County General Hospital expanded to 3,800 beds in 1942 and two additional properties, former military hospitals in Long Beach and Torrance, were acquired in 1945.[34] A psychiatric hospital was constructed next to County General in 1955.[35]

Newly available funding for private hospitals through government insurance programs like Medi-Cal, Medicare, and employer-sponsored health plans reduced demand for county hospitals. Of the 66 county hospitals operating in 1965, fifteen were closed, sold, or leased by 1973, and an additional ten

hospitals were closed by 1978.[36] As employment-related, private health insurance expanded and private hospitals were built to serve growing middle-class suburban communities, health care for the poor became the prominent domain of the Los Angeles County General Hospital, which was renamed the Los Angeles County University of Southern California Medical Center.[37]

As new medical technology was developed, hospital costs increased. Patient care costs grew to $450.00 per day in 1978, a growth of over 11,150% from $4.00 in 1937. Many other jurisdictions opted to close their hospitals as costs rose, but Los Angeles County turned to higher levels of government for help, beginning a shift from a largely county-financed system of care to one with the participation of state and federal governments.[38]

Lines between health care and public health began to blur in the 1960s with the merger of the Los Angeles City Health Department into the County Health Department. In 1972, in further efforts to consolidate and integrate services, the county departments of hospitals, public health, and mental health and the County Veterinarian's Office were merged into the Department of Health Services.[39] Integration promised a rational health planning system whereby the deployment of health services would be based on demographic data or health status.[40]

Throughout California, the success of Medi-Cal and Medicare in improving access to private care, along with Proposition 13, accelerated the closure or sale of many county hospitals. By 1985, fewer than half of the counties in California operated public hospitals. Similar trends were noted nationally. Los Angeles County's policy efforts turned increasingly to institutional survival, as its health budget was strained by dwindling revenue and an unprecedented expansion in the demand for hospital care. By increasing financial dependence on the state, county health systems became increasingly sensitive to changes in state policy and politics.[41]

Sub-Context: Los Angeles County Public Health Clinics, 1900-1930

The first three decades of the 20th Century saw a population boom in Los Angeles County, facilitated by cheaper rail travel and the need for workers to support the growing metropolis. From 1900 to 1920, the population of Los Angeles grew from 170,298 in 1900 to nearly one million in 1920, an increase of 550%. Los Angeles County's population would be over two million in 1930.[42] A large portion of this population growth was Mexican and Filipino immigrants, who primarily worked as laborers in the unincorporated areas of the county in agriculture[43]. Building on irrigation systems used by Spanish and Mexican ranchos and further benefitting from the completion of the Los Angeles Aqueduct in 1913, the San Fernando and San Gabriel Valleys were the center of Los Angeles agriculture during this period.

[43] Emily K. Abel, "From Exclusion to Expulsion: Mexicans and Tuberculosis Control in Los Angeles, 1914-1940," *Bulletin of the History of Medicine*, Vol 77 (2003), 823-849.

The result was Los Angeles becoming the nation's most productive agricultural county from 1909 to 1950.[44]

When Dr. John L. Pomeroy was appointed the first health officer of Los Angeles County in 1915, he prioritized public health efforts, focusing on the immigrant families of the agricultural areas. In addition to addressing sanitation, sewage treatment, and inspection of public eating places, Pomeroy concentrated on preventative care throughout the county.[45] The result was the construction of a network of County Health Clinics throughout Los Angeles County, which would address public health from a holistic point of view. In a 1931 article in *California and Western Medicine* (now known as the *Western Journal of Medicine)*, Pomeroy explained the rationale behind the creation of county health clinics as such:

> The conception of the Health Center in Los Angeles County is based on definite provision for persons in all three of these agencies [physicians, health officers, and social workers] to work together in the same building, keeping accurate records of each of their part in the program, and to adjust the difficulties by frequent discussion as the problems arise. These Health Centers which are maintained by Los Angeles County are an application of modern business principles in public work and the adoption of group action in dealing with problems as closely inter-related as medical economics.[46]

Pomeroy continued by describing the rationale behind the selection of predominately immigrant, rural areas:

> In many large cities we find literally hundreds of agencies (in Los Angeles 127) engaged in some form of health or medical work. On the contrary, in rural districts and small cities these functions are relatively undeveloped. Thus comes about a failure in proper distribution of services – a tremendous concentration in a few institutions, while the small towns and rural districts remain undeveloped.[47]

When the Subject Property was constructed in 1930, it was the sixth in the network of County Health Clinics developed by Pomeroy. The first to be built was in San Fernando in 1926, at 604 S. Maclay Avenue, "in a building formerly used by the San Fernando Baptist Church"[48]. The next year, in 1927, a new clinic was constructed in Compton. Pomeroy said that this building, located at the intersection of Wilmington and Orange Streets, was "the first building of its kind in the country."[49] The same year, a clinic in Pomona opened in a central location "adjacent to the various municipal buildings" such as City Hall.[50] Of the Pomona Clinic, Pomeroy was quoted as saying:

[46] J.L. Pomeroy, "The Public Health Center," *California and Western Medicine*, Vol 35 (3), September 1931, 163-164.

[47] Pomeroy, "The Public Health Center."

[48] "San Fernando to get first county clinic," *Daily News (Los Angeles)*, March 15, 1925.

[49] "Health Clinic at Compton Planned," *Long Beach Press-Telegram*, December 24, 1926. Note: Both streets referenced by Pomeroy subsequently changed names. Orange Street was changed to Rosecrans Avenue and Mona Boulevard was changed to Willowbrook Avenue, as indicated on the "Walton Villa Tract Map" (MB 7-144) as obtained from the Los Angeles County Assessor's Office.

[50] "Newest addition to list of local public buildings," *Pomona Progress Bulletin*, December 8, 1927.,

I believe that this health center [Pomona] is really the first of its kind that I know of in the United States and far superior to the other two which the country health department has built, and eventually will be recognized as a model from which others throughout the county may be patterned.[51]

A clinic at 1525 Euclid Street in Santa Monica was next in 1928, the fourth in Pomeroy's plans to "decentralize the functions of the county health department.[52] This was followed in 1929 by the East Side Health and Welfare Center, one of the first planned subdivisions in Los Angeles County.[53] The Subject Property, known as the Alhambra Health and Welfare Center, the sixth health center constructed under Pomeroy's plan, opened in 1930 to serve the needs of residents in the San Gabriel Valley.[54]

As of 2024, only three of these original six health clinics remain extant. The San Fernando Clinic was destroyed in the 1994 Northridge Earthquake. Aerial photographs of the Belvedere Gardens neighborhood in East Los Angeles show the East Side Health Center was demolished circa 1980-1987. The Pomona Clinic was likely demolished circa 1973, along with the original city hall, and replaced by a 25-acre civic center designed by Welton Becket and Associates.[55] The Compton Health Center, the Santa Monica Health Center, and the Alhambra Health Center (Subject Property) remain extant. Like the Subject Property, the Compton location remains vacant. The Santa Monica Location is now home to the LA Spanish School, operated in conjunction with the City of Santa Monica.[56] It is designed in a Spanish Colonial Revival style somewhat similar to the Subject Property.

Significance Evaluation

The property history, architectural description, and historic contexts included in this report provide the background necessary to evaluate the historic and architectural significance of the Subject Property, including the history of its construction and alternations. In order to be eligible as a historical resource, a property must possess both significance and integrity.

ESA evaluated the Subject Property against the criteria for listing in the National Register and the California Register, under the contexts *Public and Private Health and Medicine in Los Angeles (1850-1980)* and the sub-context *Los Angeles County Health Centers (1900-1930)*, both developed by ESA.

ESA also evaluated the Subject Property against the criteria for listing in the National Register and the California Register, under the contexts *Development of the Built Environment in Alhambra, 1920-1940, Theme: Civic and Institutional Development, 1920-1940*, and *Monterey Style (1925-1955),* developed by Historic Resources Group as part of the City of Alhambra Historic Context Statement.

Broad Patterns of History

With regard to broad patterns of history, the following are the relevant criteria:

---

[51] "Without Equal in U.S., Claim," *Pomona Progress Bulletin*, December 8, 1927.

[52] "Santa Monica Health Center to Open Doors," *Los Angeles Evening Express*, August 6, 1928.

- **National Register Criterion A:** Is associated with events that have made a significant contribution to the broad patterns of our history.

- **California Register Criterion 1:** Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.

The Alhambra Health Center was constructed at 612 West Shorb Street in Alhambra, California in 1930 and was one of the most modern and well-equipped health centers in Southern California at the time of its opening. Originally named the Alhambra Health and Wellness Center, the center was established as part of a Los Angeles County program dedicated to making healthcare and hygiene services more accessible to the public in the more outlying areas of the county. The facility served as a comprehensive medical complex for the growing communities of the San Gabriel Valley, and housed multiple clinics, laboratories, an emergency hospital, a women's ward, administrative offices, a nursing section, and district sanitation offices. The mission of the Los Angeles County-planned health center program was to ensure a high level of "efficiency in community medical and promotion of hygienic safeguards" along with the foresight to design each center as an "architectural asset to the place in which it is located."[57] The Alhambra Center was constructed in downtown Alhambra with these goals in mind and was among the largest and most well-appointed health centers to be established in Los Angeles County in the 1930s, serving approximately 130,000 visitors in its first year alone. Out of the six original health clinics constructed by Los Angeles County, the Subject Property is one of three that remain extant. The Center remained in full-time service to the general public until its closure in 2002. **The Alhambra Health Center is significant at a local level under criterion A/1 for being one of the earliest and largest county-owned medical centers in the public healthcare system of Los Angeles County, offering a wide variety of healthcare services at one location for over 70 years.**

The Alhambra Health Center is also significant for its association with the early civic and institutional development of the City of Alhambra. Often known as "the gateway to the San Gabriel Valley," Alhambra was one of the foremost cities that was established after the Southern Pacific Railroad was extended through the valley in 1873. What had previously been a strictly rural and agricultural area with loose associations to the nearby San Gabriel Mission, the area saw rapid development in the land boom of the 1880s, with further growth incentivized by one of the first iron pipe water systems in Los Angeles. Residential, civic, and institutional development remained steady after the city's incorporation in 1903, peaking between 1920 and 1929 when 3,761 land parcels were developed in Alhambra. Built to serve the burgeoning population of the east San Gabriel Valley, the Alhambra Health Clinic at 612 West Shorb Street was the first public medical institution built in the city of Alhambra, and it continued to serve the population for over 70 years.

Therefore, the Alhambra Health Center at 612 West Shorb Street is significant under National Register Criterion A at the local level of significance, as well as California Register Criterion 1, for its association with the Los Angeles County public health and medical system. The period of significance for the subject property runs from its original construction in 1930 through 1978, which is the end of the historic era as defined by CEQA.

In addition, the Alhambra Health Center at 612 West Shorb Street is significant under National Register Criterion A at the local level of significance and California Register Criterion 1 for its association with the early civic and institutional development of the city of Alhambra. The

57 Record Unit Health Program Under way, Los Angeles Times, October 27, 1929

period of significance for the subject property runs from its original construction in 1930 through 1940.

Significant Persons

With regard to associations with important persons, the following are the relevant criteria:

- **National Register Criterion B:** Is associated with the lives of persons significant in our past.
- **California Register Criterion 2:** Is associated with the lives of persons important in our past.

The Alhambra Health Center at 612 West Shorb Street is not identified with historic personages in national or state local and is not associated with significant individual owners or occupants. Research did not indicate that a significant individual was associated with the property during the 71-year period the building was in use as a hospital and medical clinic.

Therefore, the Alhambra Health Center at 612 W. Shorb Street does not appear to be significant under National Register Criterion B or California Register Criterion 2.

Architecture

With regard to architecture, design, or construction, the following are the relevant criteria:

- **National Register Criterion C:** Embodies the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction.
- **California Register Criterion 3:** Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.

The Alhambra Health Center was designed by Los Angeles County architect Karl Wilhelm Muck and constructed in 1930. Muck designed several health centers in his role as a Los Angeles County architect, and while he is not a notable practitioner, the building itself is an excellent example of the Monterey Revival style, exhibiting typical massing, fenestration, materials, and details. Spanish influences are evident in its double-L shaped footprint with a small courtyard/lawn between the east and west wings and the low-pitched gable roof of red mission-style tiles, while American Colonial Revival details include brick construction and 6/6 wood sash windows with rowlock sills, many with green wood shutters and wrought-iron fixtures. Distinctive to the Monterey Revival style, a wood balcony with slender columns and a simple balustrade, all painted white, is cantilevered off the second floor of the north elevation. The Alhambra Health Center remains in its original location in downtown Alhambra, setback from the northeast corner of West Shorb Street and South Sixth Street, with grassy lawns between the complex and the streets and a surface parking lot directly southwest of the building. While Alhambra has grown significantly since the building's original construction in 1930, the city remains an urban center of the eastern San Gabriel Valley, and the neighborhood immediately surrounding the Center remains a suburban residential environment. The building retains nearly all of its original design, materials, and craftsmanship and is remarkably intact for its age. The removal of an original lime whitewash on the brick exteriors is the only known significant alteration.

Monterey Revival is one of the few architectural styles native to California, and the Alhambra Health Center is an excellent and remarkably intact example of the style. Combined with the immediately adjacent Fire Station No. 2, the building serves as a historic centerpiece of downtown Alhambra and an exemplary representation of institutional architecture in public medicine.

Therefore, the Alhambra Health Center at 612 West Shorb Street is significant under National Register Criterion C at the local level of significance and California Register Criterion 1, as an excellent example of the Monterey Revival style. The period of significance for the subject property is 1930, the date of its original construction.

Data

- **National Register Criterion D:** It yields, or may be likely to yield, information important in prehistory or history.

- **California Register Criterion 4:** Has yielded, or may be likely to yield, information important in prehistory or history.

While most often applied to archaeological districts and sites, Criterion D/4 can also apply to buildings, structures, and objects that contain important information. In order for these types of properties to be eligible under Criterion D/4, they themselves must be or must have been, the principal source of the important information. None of the buildings on the subject property appear to yield significant information that would expand our current knowledge or theories of design, methods of construction, operation, or other information that is not already known about the period in which they were constructed, their method of construction, or their design. The building reflects common building practices and materials of the early twentieth century, which have already been well documented.

Therefore, Alhambra Health Center at 612 West Shorb Street, does not meet the eligibility requirements under National Register Criterion D and California Register Criterion 4.

Integrity Analysis

The National Register and California Register recognizes a property's integrity through seven aspects or qualities: location, setting, design, materials, workmanship, feeling, and association. Eligible properties should retain several, if not most, of these aspects. Both registers require that a resource retain sufficient integrity to convey its significance, and the property must retain the essential physical features that enable it to convey its historical identity. Integrity is based on significance and understanding why a property is important. *National Register Bulletin 15* states that "only after significance is fully established can you proceed to the issue of integrity."[58]

Location – The property has not moved from its original location; therefore, **it retains the integrity of location.**

Setting – The Project Site is located in central Alhambra, in a historic neighborhood with mixed uses, including residential development to the east and northwest, with commercial development to the south along Valley Boulevard and institutional development to its immediate north and west. The immediate surroundings of the Subject Property have not undergone major changes since its original construction in 1930 and have remained largely intact, excepting the expansion of the adjacent church and further

[58]U.S. Department of the Interior, 2002.

development along the commercial strip of Valley Boulevard. While Alhambra has grown in size and population since the building's original construction in 1930, the neighborhood of the Subject Property remains a center of business and service-related activity in the eastern San Gabriel Valley. The building's location has not changed, nor has its historical association with the surrounding landscape, neighborhood, or city. **Therefore, the property retains integrity of setting**.

Design – The subject property was originally designed and constructed as a split-level brick structure in the Monterey Style. The building has undergone only minor alterations since 1930 and retains the majority of its character-defining features, including the original double L-shaped footprint that divides the building into two wings, the brick exterior in a 4/1 common bond, the window and door openings, the wood shutters with metal ties, and the cantilevered wood balcony at the second floor on the north elevation. Apart from the structural upgrades in 2005 (done mostly on the interior) and removal of the exterior whitewash, the building remains intact as an example of the Monterey Style as applied to a public medical facility. **Therefore, the property retains the integrity of design.**

Workmanship – The property's original workmanship from 1930, including the wall assembly, wood frame cantilever balconies, brick and mortar work, and coursed red clay tile roof remain intact. A seismic update in 2005 added interior shear walls and roof diaphragms and removed exterior limewash, but otherwise there have been few, if any alterations to the building. **Therefore, the property retains integrity of workmanship.**

Materials –The property retains the majority of its original exterior materials, including brick in a 4/1 common bond, 6/6 wood sash windows with wood shutters, wood balconies and staircases, and mission-style clay tile roofing. The most significant alterations appear to be the removal of a whitewashed lime finish on the building and the replacement in kind of the original red clay tile roofing. **Therefore, the property retains the integrity of materials.**

Feeling – Despite the removal of the exterior whitewash finish of the building, all other characteristics specific to the Monterey style of architecture have been retained and preserved. The building retains its original design, materials, workmanship, and setting and continues to relay the feeling of an institutional building in the first half of the 20th century. While its specific use as a medical clinic is not discernable from the exterior, it is easily recognizable as a historic building of civic importance from the early days of Alhambra's existence. **Therefore, the property still conveys the historic character of the Monterey Style Alhambra Health Center and retains the integrity of feeling**

Association – The building was originally designed as a health and medical center and remained in use as such for over 70 years. It is an intact representation of an institutional building designed to be an "architectural asset to the place in which it is located," during a period of significant development in the outlying, now suburban areas of Los Angeles County.[59] Although the San Gabriel Valley and Alhambra specifically have grown substantially since the building's original construction, they remain part of the broader metropolitan area of the City of Los Angeles, with a large population numbers requiring services While most medical centers constructed today are not designed in a manner as high-style as the Alhambra Health Center, it is a rare remnant from a period where institutional architecture was designed to inspire the residents of the surrounding community. **Therefore, the property still retains its integrity of association**.

Setting: Hillside; Set back
Height: 1-story; 2-story
Plan: U-shaped
Form & Massing: Simple massing
Façade Composition: Asymmetrical
Wall Cladding: Brick
Architectural Details: Balcony, Exterior stair

Roof:
Roof Form: Gable, cross, Shed
Roof Cladding: Clay barrel tile
Roof Details: Clay tile coping, Exterior chimney, brick

Window(s):
Fenestration 1: Wood; Double-hung; Divided light; Shutter holders 'S'; Shutters; Surround, simple
Fenestration 2: Metal; Casement, single, Hopper, Picture window; Tripartite; Security bars

Entrance(s):
Primary Entrance: Canopy; Porch, partial-width; Projecting; metal detailing
Primary Door: Unknown/Not visible; Unknown/Not visible
Secondary Door: Unknown/Not visible; Unknown/Not visible; Transom

Other Features:
Related Features: Flagpole; Surface parking lot
Landscape Features: Courtyard; Lawn; Steps, brick; Steps, concrete; Steps, wood

B1. Historic Name: Alhambra Health Center **B2. Common Name:**
B3. Original Use: Institutional **B4. Present Use:** Institutional
***B5. Architectural Style:** Monterey Colonial Revival
***B6. Construction History:** The Alhambra Health Center was built in 1930. The site was purchased in 1929 after the county health department district headquarters were outgrown and a new location was desired for expansion of services. The building was designed by architect Karl W. Muck and construction was completed at a cost of $180,000. Dedication ceremonies were held in August of 1930. At the time of its dedication, "health authorities considered it one of the finest and best equipped institutions of its kind in the country."

Alterations based on visual observation: No major alterations; Window opening(s) enclosed/infilled

612 W Shorb Street has been formally determined eligible for listing in the National Register of Historic Places; therefore, it is automatically listed in the California Register of Historical Resources. The property appears eligible for listing at the local level.

The property is significant as an example of 1930s institutional development in Alhambra. During the late 1920s and early 1930s, the County of Los Angeles expanded health care facilities to include satellite clinics located outside of major hospitals. These health clinics were intended to provide basic health care to the local communities. The Alhambra Health Center was established in 1930 to provide basic care to a territory of approximately 130,000 residents. The establishment of the Shorb Clinic in 1930 reflects the city's growing population as well as new municipal health provisions.

B10. Statement of Significance (continued)
Integrity: Retains sufficient integrity to convey its significance

The property is also significant as an excellent example of Monterey Colonial Revival style architecture in Alhambra. The building was designed by County architect Karl W. Muck and at the time of its dedication, was described as "constructed along the Monterey type of architecture showing Andalusian and colonial California influence." It exhibits high quality of design and distinctive characteristics that are associated with the style with the style as expressed by its form, massing, composition, and architectural details, including its brick construction, complex roof, and balcony. The Monterey Colonial Revival style developed in and around Monterey and combined vernacular adobe construction with elements of American Federal and Greek Revival architecture, including multi-light sliding sash windows, louvered shutters, paneled doors, and Classical details executed in wood. The style's most distinguishing characteristic is a second-floor covered wood balcony, often cantilevered, extending the length of the primary façade, and sometimes wrapping one or two sides.

1 PRESERVATION BRIEFS

Assessing Cleaning and Water-Repellent Treatments for Historic Masonry Buildings

Robert C. Mack, AIA
Anne Grimmer

U.S. Department of the Interior
National Park Service
Cultural Resources
Heritage Preservation Services

Inappropriate cleaning and coating treatments are a major cause of damage to historic masonry buildings. While either or both treatments may be appropriate in some cases, they can be very destructive to historic masonry if they are not selected carefully. Historic masonry, as considered here, includes stone, brick, architectural terra cotta, cast stone, concrete and concrete block. It is frequently cleaned because cleaning is equated with improvement. Cleaning may sometimes be followed by the application of a water-repellent coating. However, unless these procedures are carried out under the guidance and supervision of an architectural conservator, they may result in irrevocable damage to the historic resource.

The purpose of this Brief is to provide information on the variety of cleaning methods and materials that are available for use on the *exterior* of historic masonry buildings, and to provide guidance in selecting the most appropriate method or combination of methods. The difference between water-repellent coatings and waterproof coatings is explained, and the purpose of each, the suitability of their application to historic masonry buildings, and the possible consequences of their inappropriate use are discussed.

The Brief is intended to help develop sensitivity to the qualities of historic masonry that makes it so special, and to assist historic building owners and property managers in working cooperatively with architects, architectural conservators and contractors (Fig. 1). Although specifically intended for historic buildings, the information is applicable to all masonry buildings. This publication updates and expands *Preservation Brief 1: The Cleaning and Waterproof Coating of Masonry Buildings*. The Brief is not meant to be a cleaning manual or a guide for preparing specifications. Rather, it provides general information to raise awareness of the many factors involved in selecting cleaning and water-repellent treatments for historic masonry buildings.

Figure 1. Low-to medium-pressure steam (hot-pressurized water washing), is being used to clean the exterior of the U.S. Tariff Commission Building, the first marble building constructed in Washington, D.C., in 1839. This method was selected by an architecural conservator as the "gentlest means possible" to clean the marble. Steam can soften heavy soiling deposits such as those on the cornice and column capitals, and facilitate easy removal. Note how these deposits have been removed from the right side of the cornice which has already been cleaned.

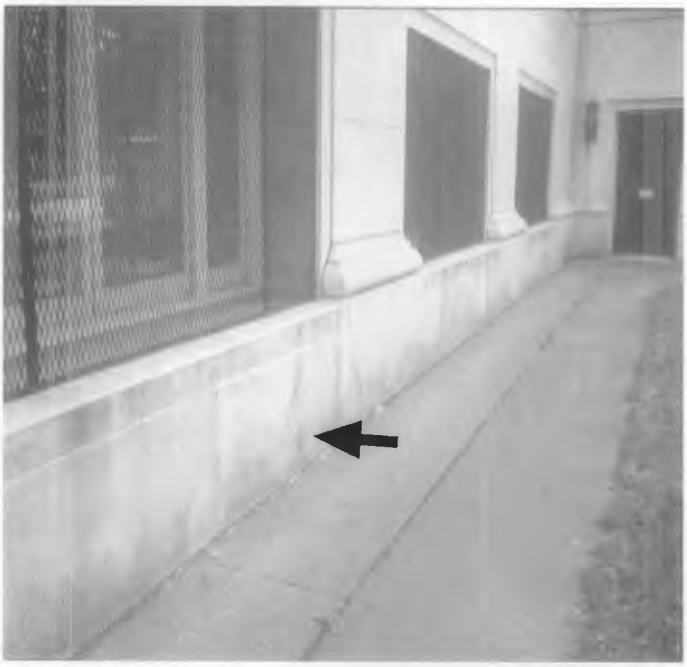

Figure 2. Biological growth as shown on this marble foundation can usually be removed using a low-pressure water wash, possibly with a non-ionic detergent added to it, and scrubbing with a natural or synthetic bristle brush.

Figure 3. This small test area has revealed a red brick patch that does not match the original beige brick. This may explain why the building was painted, and may suggest to the owner that it may be preferable to keep it painted.

Preparing for a Cleaning Project

Reasons for cleaning. First, it is important to determine whether it is appropriate to clean the masonry. The objective of cleaning a historic masonry building must be considered carefully before arriving at a decision to clean. There are several major reasons for cleaning a historic masonry building: **improve the appearance of the building** by removing unattractive dirt or soiling materials, or non-historic paint from the masonry; **retard deterioration** by removing soiling materials that may be damaging the masonry; or **provide a clean surface** to accurately match repointing mortars or patching compounds, or to conduct a condition survey of the masonry.

Identify what is to be removed. The general nature and source of dirt or soiling material on a building must be identified to remove it in the *gentlest means possible* — that is, in the most effective, yet least harmful, manner. Soot and smoke, for example, require a different cleaning agent to remove than oil stains or metallic stains. Other common cleaning problems include biological growth such as mold or mildew, and organic matter such as the tendrils left on masonry after removal of ivy (Fig. 2).

Consider the historic appearance of the building. If the proposed cleaning is to remove paint, it is important in each case to learn whether or not unpainted masonry is historically appropriate. And, it is necessary to consider why the building was painted (Fig. 3). Was it to cover bad repointing or unmatched repairs? Was the building painted to protect soft brick or to conceal deteriorating stone? Or, was painted masonry simply a fashionable treatment in a particular historic period? Many buildings were painted at the time of construction or shortly thereafter; retention of the paint, therefore, may be more appropriate historically than removing it. And, if the building appears to have been painted for a long time, it is also important to think about whether the paint is part of the character of the historic building and if it has acquired significance over time.

Consider the practicalities of cleaning or paint removal. Some gypsum or sulfate crusts may have become integral with the stone and, if cleaning could result in removing some of the stone surface, it may be preferable not to clean. Even where unpainted masonry is appropriate, the retention of the paint may be more practical than removal in terms of long range preservation of the masonry. In some cases, however, removal of the paint may be desirable. For example, the old paint layers may have built up to such an extent that removal is necessary to ensure a sound surface to which the new paint will adhere.

Study the masonry. Although not always necessary, in some instances it can be beneficial to have the coating or paint type, color, and layering on the masonry researched before attempting its removal. Analysis of the nature of the soiling or of the paint to be removed from the masonry, as well as guidance on the appropriate cleaning method, may be provided by professional consultants, including architectural conservators, conservation scientists and preservation architects. The State Historic Preservation Office (SHPO), local historic district commissions, architectural review boards and preservation-oriented websites may also be able to supply useful information on masonry cleaning techniques.

Understanding the Building Materials

The construction of the building must be considered when developing a cleaning program because inappropriate cleaning can have a deleterious effect on the masonry as well as on other building materials. The masonry material or materials must be correctly identified. It is sometimes difficult to distinguish one type of stone from another; for example, certain sandstones can be easily confused with limestones. Or, what appears to be natural stone may not be stone at all, but cast stone or concrete. Historically, cast stone and architectural terra cotta were frequently used in combination with natural stone, especially for trim elements or on upper stories of a building where, from a distance, these substitute materials looked like real stone (Fig. 4). Other features on historic buildings that appear to be stone, such as decorative cornices, entablatures and window hoods, may not even be masonry, but metal.

Identify prior treatments. Previous treatments of the building and its surroundings should be researched and building maintenance records should be obtained, if available. Sometimes if streaked or spotty areas do not seem to get cleaner following an initial cleaning, closer inspection and analysis may be warranted. The discoloration may turn out not to be dirt but the remnant of a water-repellent coating applied long ago which has darkened the surface of the masonry over time (Fig. 5). Successful removal may require testing several cleaning agents to find something that will dissolve and remove the coating. Complete removal may not always be possible. Repairs may have been stained to match a dirty building, and cleaning may make these differences apparent. De-icing salts used near the building that have dissolved can migrate into the masonry. Cleaning may draw the salts to the surface, where they will appear as efflorescence (a powdery, white substance), which may require a second treatment to be removed. Allowances for dealing with such unknown factors, any of which can be a potential problem, should be included when investigating cleaning methods and materials. Just as more than one kind of masonry on a historic building may necessitate multiple cleaning approaches, unknown conditions that are encountered may also require additional cleaning treatments.

Figure 4. The foundation of this brick building is limestone, but the decorative trim above is architectural terra cotta intended to simulate stone.

Figure 5. Repeated water washing did not remove the staining inside this limestone porte cochere. Upon closer examination, it was determined to be a water-repellent coating that had been applied many years earlier. An alkaline cleaner may be effective in removing it.

Choose the appropriate cleaner. The importance of testing cleaning methods and materials cannot be over emphasized. Applying the wrong cleaning agents to historic masonry can have disastrous results. Acidic cleaners can be extremely damaging to acid-sensitive stones, such as marble and limestone, resulting in etching and dissolution of these stones. Other kinds of masonry can also be damaged by incompatible cleaning agents, or even by cleaning agents that are usually compatible. There are also numerous kinds of sandstone, each with a considerably different geological composition. While an acid-based cleaner may be safely used on some sandstones, others are acid-sensitive and can be severely etched or dissolved by an acid cleaner. Some sandstones contain water-soluble minerals and can be eroded by water cleaning. And, even if the stone type is correctly identified, stones, as well as some bricks, may contain unexpected impurities, such as iron particles, that may react negatively with a particular cleaning agent and result in staining. Thorough understanding of the physical and chemical properties of the masonry will help avoid the inadvertent selection of damaging cleaning agents.

Figure 6. Timed water soaking can be very effective for cleaning limestone and marble as shown here at the Marble Collegiate Church in New York City. In this case, a twelve-hour water soak using a multi-nozzle manifold was followed by a final water rinse. Photo: Diane S. Kaese, Wiss, Janney, Elstner Associates, Inc., N.Y., N.Y.

Other building materials also may be affected by the cleaning process. Some chemicals, for example, may have a corrosive effect on paint or glass. The portions of building elements most vulnerable to deterioration may not be visible, such as embedded ends of iron window bars. Other totally unseen items, such as iron cramps or ties which hold the masonry to the structural frame, also may be subject to corrosion from the use of chemicals or even from plain water. The only way to prevent problems in these cases is to study the building construction in detail and evaluate proposed cleaning methods with this information in mind. However, due to the very likely possibility of encountering unknown factors, any cleaning project involving historic masonry should be viewed as unique to that particular building.

Cleaning Methods and Materials

Masonry cleaning methods generally are divided into three major groups: water, chemical, and abrasive. *Water methods* soften the dirt or soiling material and rinse the deposits from the masonry surface. *Chemical cleaners* react with dirt, soiling material or paint to effect their removal, after which the cleaning effluent is rinsed off the masonry surface with water. *Abrasive methods* include blasting with grit, and the use of grinders and sanding discs, all of which mechanically remove the dirt, soiling material or paint (and, usually, some of the masonry surface). Abrasive cleaning is also often followed with a water rinse. *Laser cleaning*, although not discussed here in detail, is another technique that is used sometimes by conservators to clean small areas of historic masonry. It can be quite effective for cleaning limited areas, but it is expensive and generally not practical for most historic masonry cleaning projects.

Although it may seem contrary to common sense, masonry cleaning projects should be carried out starting at the bottom and proceeding to the top of the building always keeping all surfaces wet below the area being cleaned. The rationale for this approach is based on the principle that dirty water or cleaning effluent dripping from cleaning in progress above will leave streaks on a dirty surface but will not streak a clean surface as long as it is kept wet and rinsed frequently.

Water Cleaning

Water cleaning methods are generally the *gentlest means possible*, and they can be used safely to remove dirt from all types of historic masonry.* There are essentially four kinds of water-based methods: soaking; pressure water washing; water washing supplemented with non-ionic detergent; and steam, or hot-pressurized water cleaning. Once water cleaning has been completed, it is often necessary to follow up with a water rinse to wash off the loosened soiling material from the masonry.

Soaking. Prolonged spraying or misting with water is particularly effective for cleaning limestone and marble. It is also a good method for removing heavy accumulations of soot, sulfate crusts or gypsum crusts that tend to form in protected areas of a building not regularly washed by rain. Water is distributed to lengths of punctured hose or pipe with non-ferrous fittings hung from moveable scaffolding or a swing stage that continuously mists the surface of the masonry with a very fine spray (Fig. 6). A timed on-off spray is another approach to using this cleaning technique. After one area has been cleaned, the apparatus is moved on to another. Soaking is often used in combination with water washing and is also followed by a final water rinse. Soaking is a very slow method – it may take several days or a week—but it is a very gentle method to use on historic masonry.

Water Washing. Washing with low-pressure or medium-pressure water is probably one of the most commonly used methods for removing dirt or other pollutant soiling from historic masonry buildings (Fig. 7). Starting with a very low pressure (100 psi or below), even using a garden hose, and progressing as needed to slightly higher pressure —generally no higher than 300-400 psi—is always the recommended way to begin. Scrubbing with natural bristle or synthetic bristle brushes—never metal which can abrade the surface and leave metal particles that can stain the masonry—can help in cleaning areas of the masonry that are especially dirty.

Water Washing with Detergents. Non-ionic detergents –which are not the same as soaps –are synthetic organic compounds that are especially effective in removing oily soil. (Examples of some of the numerous proprietary non-ionic detergents include Igepal by GAF, Tergitol by Union Carbide and Triton by Rohm & Haas.) Thus, the addition of a non-ionic detergent, or surfactant, to a low- or medium-pressure water wash can be a useful aid in the cleaning

*Water cleaning methods may not be appropriate to use on some badly deteriorated masonry because water may exacerbate the deterioration, or on gypsum or alabaster which are very soluble in water.

process. (A non-ionic detergent, unlike most household detergents, does not leave a solid, visible residue on the masonry.) Adding a non-ionic detergent and scrubbing with a natural bristle or synthetic bristle brush can facilitate cleaning textured or intricately carved masonry. This should be followed with a final water rinse.

Steam/Hot-Pressurized Water Cleaning. Steam cleaning is actually low-pressure hot water washing because the steam condenses almost immediately upon leaving the hose. This is a gentle and effective method for cleaning stone and particularly for acid-sensitive stones. Steam can be especially useful in removing built-up soiling deposits and dried-up plant materials, such as ivy disks and tendrils. It can also be an efficient means of cleaning carved stone details and, because it does not generate a lot of liquid water, it can sometimes be appropriate to use for cleaning interior masonry (Figs. 8-9).

Potential hazards of water cleaning. Despite the fact that water-based methods are generally the most gentle, even they can be damaging to historic masonry. Before beginning a water cleaning project, it is important to make sure that all mortar joints are sound and that the building is watertight. Otherwise water can seep through the walls to the interior, resulting in rusting metal anchors and stained and ruined plaster.

Some water supplies may contain traces of iron and copper which may cause masonry to discolor. Adding a chelating or complexing agent to the water, such as EDTA (ethylene diamine tetra-acetic acid), which inactivates other metallic ions, as well as softens minerals and water hardness, will help prevent staining on light-colored masonry.

Any cleaning method involving water should never be done in cold weather or if there is any likelihood of frost or freezing because water within the masonry can freeze, causing spalling and cracking. Since a masonry wall may take over a week to dry after cleaning, no water cleaning should be permitted for several days prior to the first average frost date, or even earlier if local forecasts predict cold weather.

Most essential of all, it is important to be aware that using water at too high a pressure, a practice common to "power washing" and "water blasting", is very abrasive and can easily etch marble and other soft stones, as well as some types of brick (Figs. 10-11). In addition, the distance of the nozzle from the masonry surface and the type of nozzle, as well as gallons per minute (gpm), are also important variables in a water cleaning process that can have a significant impact on the outcome of the project. This is why it is imperative that the cleaning be closely monitored to ensure that the cleaning operators do not raise the pressure or bring the nozzle too close to the masonry in an effort to "speed up" the process. The appearance of grains of stone or sand in the cleaning effluent on the ground is an indication that the water pressure may be too high.

Figure 7. Glazed architectural terra cotta often may be cleaned successfully with a low-pressure water wash and hand scrubbing supplemented, if necessary, with a non-ionic detergent. Photo: National Park Service Files.

Chemical Cleaning

Chemical cleaners, generally in the form of proprietary products, are another material frequently used to clean historic masonry. They can remove dirt, as well as paint and other coatings, metallic and plant stains, and graffiti. Chemical cleaners used to remove dirt and soiling include **acids, alkalies** and **organic compounds.** Acidic cleaners, of course, should not be used on masonry that is acid sensitive. Paint removers are **alkaline**, based on **organic solvents** or other chemicals.

Chemical Cleaners to Remove Dirt

Both alkaline and acidic cleaning treatments include the use of water. Both cleaners are also likely to contain surfactants (wetting agents), that facilitate the chemical reaction that removes the dirt. Generally, the masonry is wet first for both types of cleaners, then the chemical cleaner is sprayed on at very low pressure or brushed onto the surface. The cleaner is left to dwell on the masonry for an amount of time recommended by the product manufacturer or, preferably, determined by testing, and rinsed off with a low- or moderate-pressure cold, or sometimes hot, water wash. More than one application of the cleaner may be necessary, and it is always a good practice to test the product manufacturer's recommendations concerning dilution rates and dwell times. Because each cleaning situation is unique, dilution rates and dwell times can vary considerably. The masonry surface may be scrubbed lightly with natural or synthetic bristle brushes prior to rinsing. After rinsing, pH strips should be applied to the surface to ensure that the masonry has been neutralized completely.

Figure 8. (Left) Low-pressure (under 100 psi) steam cleaning (hot-pressurized water washing), is part of the regular maintenance program at the Jefferson Memorial, Washington, D.C. The white marble interior of this open structure is subject to constant soiling by birds, insects and visitors. (Right) This portable steam cleaner enables prompt cleanup when necessary. Photos: National Park Service Files.

Acidic Cleaners. Acid-based cleaning products may be used on **non-acid sensitive** masonry, which generally includes: granite, most sandstones, slate, unglazed brick and unglazed architectural terra cotta, cast stone and concrete (Fig. 12). Most commercial acidic cleaners are composed primarily of hydrofluoric acid, and often include some phosphoric acid to prevent rust-like stains from developing on the masonry after the cleaning. Acid cleaners are applied to the pre-wet masonry which should be kept wet while the acid is allowed to "work", and then removed with a water wash.

Alkaline Cleaners. Alkaline cleaners should be used on **acid-sensitive** masonry, including: limestone, polished and unpolished marble, calcareous sandstone, glazed brick and glazed architectural terra cotta, and polished granite. (Alkaline cleaners may also be used sometimes on masonry materials that are not acid sensitive—after testing, of course—but they may not be as effective as they are on acid-sensitive masonry.) Alkaline cleaning products consist primarily of two ingredients: a non-ionic detergent or surfactant; and an alkali, such as potassium hydroxide or ammonium hydroxide. Like acidic cleaners, alkaline products are usually applied to pre-wet masonry, allowed to dwell, and then rinsed off with water. (Longer dwell times may be necessary with alkaline cleaners than with acidic cleaners.) Two additional steps are required to remove alkaline cleaners after the initial rinse. First the masonry is given a slightly acidic wash—often with acetic acid–to neutralize it, and then it is rinsed again with water.

Chemical Cleaners to Remove Paint and Other Coatings, Stains and Graffiti

Removing paint and some other coatings, stains and graffiti can best be accomplished with alkaline paint removers, organic solvent paint removers, or other cleaning compounds. The removal of layers of paint from a masonry surface usually involves applying the remover either by brush, roller or spraying, followed by a thorough water wash. As with any chemical cleaning, the manufacturer's recommendations regarding application procedures should always be tested before beginning work.

Alkaline Paint Removers. These are usually of much the same composition as other alkaline cleaners, containing potassium or ammonium hydroxide, or trisodium phosphate. They are used to remove oil, latex and acrylic paints, and are effective for removing multiple layers of paint. Alkaline cleaners may also remove some acrylic, water-repellent coatings. As with other alkaline cleaners, both an acidic neutralizing wash and a final water rinse are generally required following the use of alkaline paint removers.

Organic Solvent Paint Removers. The formulation of organic solvent paint removers varies and may include a combination of solvents, including methylene chloride, methanol, acetone, xylene and toluene.

Figure 9. (Left) This small steam cleaner—the size of a vacuum cleaner—offers a very controlled and gentle means of cleaning limited, or hard-to-reach areas or carved stone details. (Right) It is particularly useful for interiors where it is important to keep moisture to a minumum, such as inside the Washington Monument, Washington, D.C., where it was used to clean the commemorative stones. Photos: Audrey T. Tepper.

Figure 10. High-pressure water washing too close to the surface has abraded and, consequently, marred the limestone on this early-20th century building.

Other Paint Removers and Cleaners. Other cleaning compounds that can be used to remove paint and some painted graffiti from historic masonry include paint removers based on N-methyl-2-pyrrolidone (NMP), or on petroleum-based compounds. Removing stains, whether they are industrial (smoke, soot, grease or tar), metallic (iron or copper), or biological (plant and fungal) in origin, depends on carefully matching the type of remover to the type of stain (Fig. 13). Successful removal of stains from historic masonry often requires the application of a number of different removers before the right one is found. The removal of layers of paint from a masonry surface is usually accomplished by applying the remover either by brush, roller or spraying, followed by a thorough water wash (Fig. 14).

Potential hazards of chemical cleaning. Since most chemical cleaning methods involve water, they have many of the potential problems of plain water cleaning. Like water methods, they should not be used in cold weather because of the possibility of freezing. Chemical cleaning should never be undertaken in temperatures below 40 degrees F (4 degrees C), and generally not below 50 degrees F. In addition, many chemical cleaners simply do not work in cold temperatures. Both acidic and alkaline cleaners can be dangerous to cleaning operators and, clearly, there are environmental concerns associated with the use of chemical cleaners.

Figure 11. Rinsing with high-pressure water following chemical cleaning has left a horizontal line of abrasion across the bricks on this late-19th century row house.

If not carefully chosen, chemical cleaners can react adversely with many types of masonry. Obviously, acidic cleaners should not be used on acid-sensitive materials; however, it is not always clear exactly what the composition is of any stone or other masonry material. For, this reason, testing the cleaner on an inconspicuous spot on the building is always necessary. While certain acid-based cleaners may be appropriate if used as directed on a particular type of masonry, if left too long or if not adequately rinsed from the masonry they can have a negative effect. For example, hydrofluoric acid can etch masonry leaving a hazy residue (whitish deposits of silica or calcium fluoride salts) on the surface. While this efflorescence may usually be removed by a second cleaning—although it is likely to be expensive and time-consuming—**hydrofluoric acid** can also leave calcium fluoride salts or a colloidal silica deposit on masonry which may be impossible to remove (Fig. 15). Other acids, particularly **hydrochloric (muriatic) acid**, which is very powerful, should not be used on historic masonry, because it can dissolve lime-based mortar, damage brick and some stones, and leave chloride deposits on the masonry.

Figure 12. A mild acidic cleaning agent is being used to clean this heavily soiled brick and granite building. Additional applications of the cleaner and hand-scrubbing, and even poulticing, may be necessary to remove the dark stains on the granite arches below. Photo: Sharon C. Park, FAIA.

Alkaline cleaners can stain sandstones that contain a ferrous compound. Before using an alkaline cleaner on sandstone it is always important to test it, since it may be difficult to know whether a particular sandstone may contain a ferrous compound. Some alkaline cleaners, such as **sodium hydroxide (caustic soda or lye)** and **ammonium bifluoride**, can also damage or leave disfiguring brownish-yellow stains and, in most cases, should not be used on historic masonry. Although alkaline cleaners will not etch a masonry surface as acids can, they are caustic and can burn the surface. In addition, alkaline cleaners can deposit potentially damaging salts in the masonry which can be difficult to rinse thoroughly.

Abrasive and Mechanical Cleaning

Generally, abrasive cleaning methods are not appropriate for use on historic masonry buildings. Abrasive cleaning methods are just that—abrasive. Grit blasters, grinders, and sanding discs all operate by *abrading* the dirt or paint off the surface of the masonry, rather than *reacting* with the dirt and the masonry which is how water and chemical methods work. Since the abrasives do not differentiate between the dirt and the masonry, they can also remove the outer surface of the masonry at the same time, and result in permanently damaging the masonry. Brick, architectural terra cotta, soft stone, detailed carvings, and polished surfaces are especially susceptible to physical and aesthetic damage by abrasive methods. Brick and architectural terra cotta are fired products which have a smooth, glazed surface which can be removed by abrasive blasting or grinding (Figs. 18-19). Abrasively-cleaned masonry is damaged aesthetically as well as physically, and it has a rough surface which tends to hold dirt and the roughness will make future cleaning more difficult. Abrasive cleaning processes can also increase the likelihood of subsurface cracking of the masonry. Abrasion of carved details causes a rounding of sharp corners and other loss of delicate features, while abrasion of polished surfaces removes the polished finish of stone.

Figure 13. Sometimes it may be preferable to paint over a thick asphaltic coating rather than try to remove it, because it can be difficult to remove completely. However, in this case, many layers of asphaltic coating were removed through multiple applications of a heavy duty chemical cleaner. Each application of the cleaner was left to dwell following the manufacturer's reccommendations, and then rinsed thoroughly. (As much as possible of the asphalt was first removed with wooden scrapers.) Although not all the asphalt was removed, this was determined to be an acceptable level of cleanliness for the project.

Figure 14. Chemical removal of paint from this brick building has revealed that the cornice and window hoods are metal rather than masonry.

Mortar joints, especially those with lime mortar, also can be eroded by abrasive or mechanical cleaning. In some cases, the damage may be visual, such as loss of joint detail or increased joint shadows. As mortar joints constitute a significant portion of the masonry surface (up to 20 per cent in a brick wall), this can result in the loss of a considerable amount of the historic fabric. Erosion of the mortar joints may also permit increased water penetration, which will likely necessitate repointing.

Figure 15. The whitish deposits left on the brick by a chemical paint remover may have resulted from inadequate rinsing or from the chemical being left on the surface too long and may be impossible to remove.

Poulticing to Remove Stains and Graffiti

a

b

c

d

Figure 16. (a) The limestone base was heavily stained by runoff from the bronze statue above. (b) A poultice consisting of copper stain remover and ammonia mixed with fuller's earth was applied to the stone base and covered with plastic sheeting to keep it from drying out too quickly. (c) As the poultice dried, it pulled the stain out of the stone. (d) The poultice residue was removed carefully from the stone surface with wooden scrapers and the stone was rinsed with water. Photos: John Dugger.

Graffiti and stains, which have penetrated into the masonry, often are best removed by using a poultice. A poultice consists of an absorbent material or clay powder (such as kaolin or fuller's earth, or even shredded paper or paper towels), mixed with a liquid (solvent or other remover) to form a paste which is applied to the stain (Figs. 16-17). As it dries, the paste absorbs the staining material so that it is not redeposited on the masonry surface. Some commercial cleaning products and paint removers are specially formulated as a paste or gel that will cling to a vertical surface and remain moist for a longer period of time in order to prolong the action of the chemical on the stain. Pre-mixed poultices are also available as a paste or in powder form needing only the addition of the appropriate liquid. The masonry must be pre-wet before applying an alkaline cleaning agent, but not when using a solvent. Once the stain has been removed, the masonry must be rinsed thoroughly.

Figure 17. A poultice is being used to remove salts from the brownstone statuary on the facade of this late-19th century stone church. Photo: National Park Service Files.

Figure 18. The glazed bricks in the center of the pier were covered by a signboard that protected them being damaged by the sandblasting which removed the glaze from the surrounding bricks.

Figure 19. A comparison of undamaged bricks surroundng the electrical conduit with the rest of the brick facade emphasizes the severity of the erosion caused by sandblasting.

Abrasive Blasting. Blasting with abrasive grit or another abrasive material is the most frequently used abrasive method. *Sandblasting* is most commonly associated with abrasive cleaning. Finely ground silica or glass powder, glass beads, ground garnet, powdered walnut and other ground nut shells, grain hulls, aluminum oxide, plastic particles and even tiny pieces of sponge, are just a few of the other materials that have also been used for abrasive cleaning. Although abrasive blasting is not an appropriate method of cleaning historic masonry, it can be safely used to clean some materials. Finely-powdered walnut shells are commonly used for cleaning monumental bronze sculpture, and skilled conservators clean delicate museum objects and finely detailed, carved stone features with very small, micro-abrasive units using aluminum oxide.

A number of current approaches to abrasive blasting rely on materials that are not usually thought of as abrasive, and not as commonly associated with traditional abrasive grit cleaning. Some patented abrasive cleaning processes—one dry, one wet —use finely-ground glass powder intended to "erase" or remove dirt and surface soiling only, but not paint or stains (Fig. 20). Cleaning with baking soda (sodium bicarbonate) is another patented process. Baking soda blasting is being used in some communities as a means of quick graffiti removal. However, it should not be used on historic masonry which it can easily abrade and can permanently "etch" the graffiti into the stone; it can also leave potentially damaging salts in the stone which cannot be removed. Most of these abrasive grits may be used either dry or wet, although dry grit tends to be used more frequently.

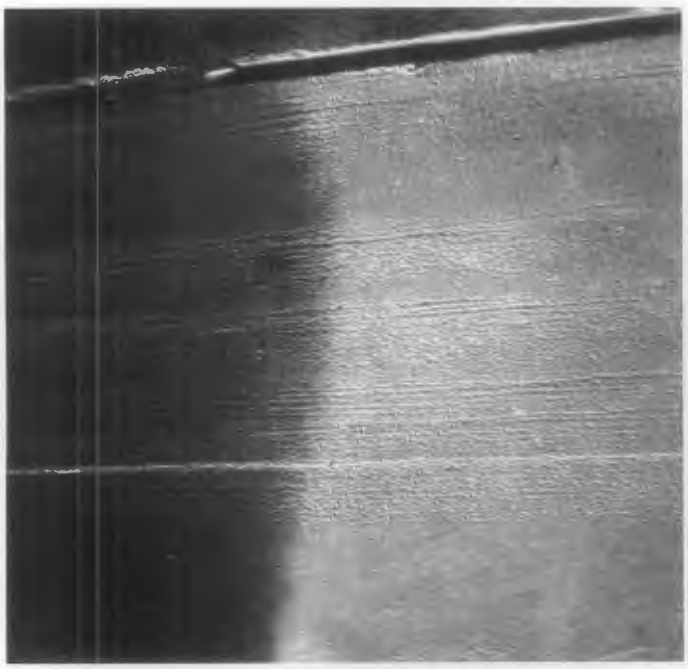

Figure 20. (Left) A comparison of the limestone surface of a 1920s office building before and after "cleaning" with a proprietary abrasive process using fine glass powder clearly shows the effectiveness of this method. But this is an abrasive technique and it has "cleaned" by removing part of the masonry surface with the dirt. Because it is abrasive, it is generally not recommended for large-scale cleaning of historic masonry, although it may be suitable to use in certain, very limited cases under controlled circumstances. (Right) A vacum chamber where the used glass powder is collected for environmentally safe disposal is a unique feature of this particular process. The specially-trained operators in the chamber wear protective clothing, masks and breathing equipment. Photos: Tom Keohan.

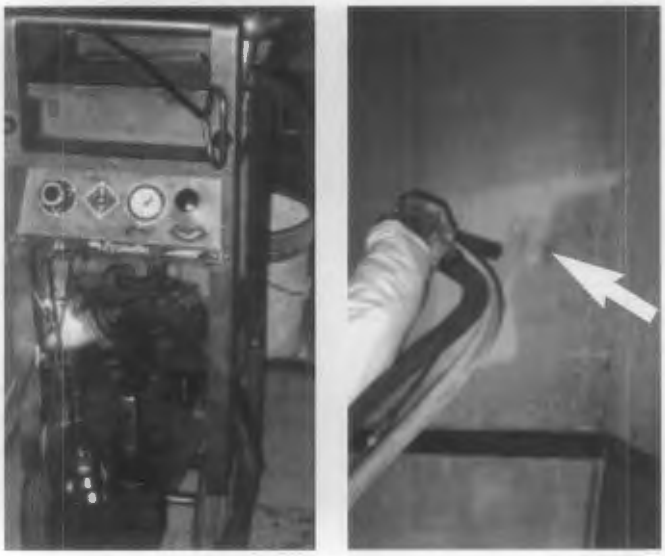

Figure 21. Low-pressure blasting with ice pellets or ice crystals (left) is an abrasive cleaning method that is sometimes recommended for use on interior masonry because it does not involve large amounts of water. However, like other abrasive materials, ice crystals "clean" by removing a portion of the masonry surface with the dirt, and may not remove some stains that have penetrated into the masonry without causing further abrasion (right). Photos: Audrey T. Tepper.

Ice particles, or pelletized dry ice (carbon dioxide or CO_2), are another medium used as an abrasive cleaner (Fig. 21). This is also too abrasive to be used on most historic masonry, but it may have practical application for removing mastics or asphaltic coatings from some substrates.

Some of these processes are promoted as being more environmentally safe and not damaging to historic masonry buildings. However, it must be remembered that they are abrasive and that they "clean" by removing a small portion of the masonry surface, even though it may be only a minuscule portion. The fact that they are essentially abrasive treatments must always be taken into consideration when planning a masonry cleaning project. *In general, abrasive methods should not be used to clean historic masonry buildings.* In some, very limited instances, highly-controlled, gentle abrasive cleaning may be appropriate on selected, hard-to-clean areas of a historic masonry building if carried out under the watchful supervision of a professional conservator. But, abrasive cleaning should never be used on an entire building.

Grinders and Sanding Disks. Grinding the masonry surface with mechanical grinders and sanding disks is another means of abrasive cleaning that should not be used on historic masonry. Like abrasive blasting, grinders and disks do not really clean masonry but instead grind away and abrasively remove and, thus, damage the masonry surface itself rather than remove just the soiling material.

Planning A Cleaning Project

Once the masonry and soiling material or paint have been identified, and the condition of the masonry has been evaluated, planning for the cleaning project can begin.

Testing cleaning methods. In order to determine the *gentlest means possible*, several cleaning methods or materials may have to be tested prior to selecting the best one to use on the building. Testing should always begin with the gentlest and least invasive method proceeding gradually, if necessary, to more complicated methods, or a combination of methods. All too often simple methods, such as low-pressure water wash, are not even considered, yet they frequently are effective, safe, and not expensive. Water of slightly higher pressure or with a non-ionic detergent additive also may be effective. It is worth repeating that these methods should always be tested prior to considering harsher methods; they are safer for the building and the environment, often safer for the applicator, and relatively inexpensive.

The level of cleanliness desired also should be determined prior to selection of a cleaning method. Obviously, the intent of cleaning is to remove most of the dirt, soiling material, stains, paint or other coating. A "brand new" appearance, however, may be inappropriate for an older building, and may require an overly harsh cleaning method to be achieved. When undertaking a cleaning project, it is important to be aware that some stains simply may not be removable. It may be wise, therefore, to agree upon a slightly lower level of cleanliness that will serve as the standard for the cleaning project. The precise amount of residual dirt considered acceptable may depend on the type of masonry, the type of soiling and difficulty of total removal, and local environmental conditions.

Cleaning tests should be carried out in an area of sufficient size to give a true indication of their effectiveness. It is preferable to conduct the test in an inconspicuous location on the building so that it will not be obvious if the test is not successful. A test area may be quite small to begin, sometimes as small as six square inches, and gradually may be increased in size as the most appropriate methods and cleaning agents are determined. Eventually the test area may be expanded to a square yard or more, and it should include several masonry units and mortar joints (Fig. 22). It should be remembered that a single building may have several types of masonry and that even similar materials may have different surface finishes. Each material and different finish should be tested separately. Cleaning tests should be evaluated only after the masonry has dried completely. *The results of the tests may indicate that several methods of cleaning should be used on a single building.*

When feasible, test areas should be allowed to weather for an extended period of time prior to final evaluation. A waiting period of a full year would be ideal in order to expose the test patch to a full range of seasons. If this is not possible, the test patch should weather for at least a month or two. For any building which is considered historically important, the delay is insignificant compared to the potential damage and disfigurement which may result from using an incompletely tested method. *The successfully cleaned test patch should be protected as it will serve as a standard against which the entire cleaning project will be measured.*

Environmental considerations. The potential effect of any method proposed for cleaning historic masonry should be evaluated carefully. Chemical cleaners and paint removers may damage trees, shrubs, grass, and plants. A plan must be provided for environmentally safe removal and disposal of the cleaning materials and the rinsing effluent before beginning the cleaning project. Authorities from the local regulatory agency—usually under the jurisdiction of the federal or state Environmental Protection Agency (EPA) should be consulted prior to beginning a cleaning project, especially if it involves anything more than plain water washing. This advance planning will ensure that the cleaning effluent or run-off, which is the combination of the cleaning agent and the substance removed from the masonry, is handled and disposed of in an environmentally sound and legal manner. Some alkaline and acidic cleaners can be neutralized so that they can be safely discharged into storm sewers. However, most solvent-based cleaners cannot be neutralized and are categorized as pollutants, and must be disposed of by a licensed transport, storage and disposal facility. Thus, it is always advisable to consult with the appropriate agencies before starting to clean to ensure that the project progresses smoothly and is not interrupted by a stop-work order because a required permit was not obtained in advance.

Vinyl guttering or polyethylene-lined troughs placed around the perimeter of the base of the building can serve to catch chemical cleaning waste as it is rinsed off the building. This will reduce the amount of chemicals entering and polluting the soil, and also will keep the cleaning waste contained until it can be removed safely. Some patented cleaning systems have developed special equipment to facilitate the containment and later disposal of cleaning waste.

Concern over the release of volatile organic compounds (VOCs) into the air has resulted in the manufacture of new, more environmentally responsible cleaners and paint removers, while some materials traditionally used in cleaning may no longer be available for these same reasons. Other health and safety concerns have created additional cleaning challenges, such as lead paint removal, which is likely to require special removal and disposal techniques.

Cleaning can also cause damage to non-masonry materials on a building, including glass, metal and wood. Thus, it is usually necessary to cover windows and doors, and other features that may be vulnerable to chemical cleaners. They should be covered with plastic or polyethylene, or a masking agent that is applied as a liquid which dries to form a thin protective film on glass, and is easily peeled off after the cleaning is finished. Wind drift, for example, can also damage other property by carrying cleaning chemicals onto nearby automobiles, resulting in etching of the glass or spotting of the paint finish. Similarly, airborne dust can enter surrounding buildings, and excess water can collect in nearby yards and basements.

Safety considerations. Possible health dangers of each method selected for the cleaning project must be considered before selecting a cleaning method to avoid harm to the

Figure 22. Cleaning test areas may be quite small at first and gradually increase in size as testing determines the "gentlest means possible". Photo: Frances Gale.

cleaning applicators, and the necessary precautions must be taken. The precautions listed in Material Safety Data Sheets (MSDS) that are provided with chemical products should always be followed. Protective clothing, respirators, hearing and face shields, and gloves must be provided to workers to be worn at all times. Acidic and alkaline chemical cleaners in both liquid and vapor forms can also cause serious injury to passers-by (Fig. 23). It may be necessary to schedule cleaning at night or weekends if the building is located in a busy urban area to reduce the potential danger of chemical overspray to pedestrians. Cleaning during non-business hours will allow HVAC systems to be turned off and vents to be covered to prevent dangerous chemical fumes from entering the building which will also ensure the safety of the building's occupants. Abrasive and mechanical methods produce dust which can pose a serious health hazard, particularly if the abrasive or the masonry contains silica.

Water-Repellent Coatings and Waterproof Coatings

To begin with, it is important to understand that waterproof coatings and water-repellent coatings are not the same. Although these terms are frequently interchanged and commonly confused with one another, they are completely different materials. **Water-repellent coatings** –often referred to incorrectly as "sealers", but which do not or should not seal– are intended to keep liquid water from penetrating the surface but to allow water vapor to enter and leave, or pass through, the surface of the masonry (Fig. 24). Water-repellent coatings are generally *transparent*, or clear, although once applied some may darken or discolor certain types of masonry while others may give it a glossy or shiny appearance. **Waterproof coatings** seal the surface from liquid water and from water vapor. They are usually *opaque*, or pigmented, and include bituminous coatings and some elastomeric paints and coatings.

Water-Repellent Coatings

Water-repellent coatings are formulated to be vapor permeable, or "breathable". They do not seal the surface completely to water vapor so it can enter the masonry wall as well as leave the wall. While the first water-repellent coatings to be developed were primarily acrylic or silicone resins in organic solvents, now most water-repellent coatings are water-based and formulated from modified siloxanes, silanes and other alkoxysilanes, or metallic stearates. While some of these products are shipped from the factory ready to use, other waterborne water repellents must be diluted at the job site. Unlike earlier water-repellent coatings which tended to form a "film" on the masonry surface, modern water-repellent coatings actually penetrate into the masonry substrate slightly and, generally, are almost invisible if properly applied to the masonry. They are also more vapor permeable than the old coatings, yet they still reduce the vapor permeability of the masonry. Once inside the wall, water vapor can condense at cold spots producing liquid water which, unlike water vapor, cannot escape through a water-repellent coating. The liquid water within the wall, whether from condensation, leaking gutters, or other sources, can cause considerable damage.

Water-repellent coatings are not consolidants. Although modern water repellents may penetrate slightly beneath the masonry surface, instead of just "sitting" on top of it, they do not perform the same function as a consolidant which is to "consolidate" and replace lost binder to strengthen deteriorating masonry. Even after many years of laboratory study and testing few consolidants have proven very effective. The composition of fired products such as brick and architectural terra cotta, as well as many types of building stone, does not lend itself to consolidation.

Some modern water-repellent coatings which contain a binder intended to replace the natural binders in stone that have been lost through weathering and natural erosion are described in product literature as both a water repellent and a consolidant. The fact that newer water-repellent coatings penetrate beneath the masonry surface instead of just forming a layer on top of the surface may indeed convey at least some consolidating properties to certain stones. However, a water-repellent coating cannot be considered a consolidant. In some instances, a water-repellent or "preservative" coating, if applied to already damaged or spalling stone, may form a surface crust which, if it fails, may exacerbate the deterioration by pulling off even more of the stone (Fig. 25).

Is a Water-Repellent Treatment Necessary?

Water-repellent coatings are frequently applied to historic masonry buildings for the wrong reason. They also are often applied without an understanding of what they are and what they are intended to do. And these coatings can be very difficult, if not impossible, to remove from the masonry if they fail or become discolored. Most importantly, the application of water-repellent coatings to historic masonry is usually unnecessary.

Figure 23. A tarpaulin protects and shields pedestrians from potentially harmful spray while chemical cleaning is underway on the granite exterior of the U.S. Treasury Building, Washington, D.C.

Most historic masonry buildings, unless they are painted, have survived for decades without a water-repellent coating and, thus, probably do not need one now. Water penetration to the interior of a masonry building is seldom due to porous masonry, but results from poor or deferred maintenance. Leaking roofs, clogged or deteriorated gutters and downspouts, missing mortar, or cracks and open joints around door and window openings are almost always the cause of moisture-related problems in a historic masonry building. **If historic masonry buildings are kept watertight and in good repair, water-repellent coatings should not be necessary.**

Rising damp (capillary moisture pulled up from the ground), or condensation can also be a source of excess moisture in masonry buildings. A water-repellent coating will not solve this problem either and, in fact, may be likely to exacerbate it. Furthermore, a water-repellent coating should never be applied to a damp wall. Moisture in the wall would reduce the ability of a coating to adhere to the masonry and to penetrate below the surface. But, if it did adhere, it would hold the moisture inside the masonry because, although a water-repellent coating is permeable to water vapor, liquid water cannot pass through it. In the case of rising damp, a coating may force the moisture to go even higher in the wall because it can slow down evaporation, and thereby retain the moisture in the wall.

Excessive moisture in masonry walls may carry waterborne soluble salts from the masonry units themselves or from the mortar through the walls. If the water is permitted to come to the surface, the salts may appear on the masonry surface as efflorescence (a whitish powder) upon evaporation. However, the salts can be potentially dangerous if they remain in the masonry and crystallize

Figure 24. Although the application of a water-repellent coating was probably not needed on either of these buildings, the coating on the brick building (above), is not visible and has not changed the character of the brick. But the coating on the brick column (below), has a high gloss that is incompatible with the historic character of the masonry.

beneath the surface as subflorescence. Subflorescence eventually may cause the surface of the masonry to spall, particularly if a water-repellent coating has been applied which tends to reduce the flow of moisture out from the subsurface of the masonry. Although many of the newer water-repellent products are more breathable than their predecessors, they can be especially damaging if applied to masonry that contains salts, because they limit the flow of moisture through masonry.

When a Water-Repellent Coating May be Appropriate

There are some instances when a water-repellent coating may be considered appropriate to use on a historic masonry building. Soft, incompletely fired brick from the 18th- and early-19th centuries may have become so porous that paint or some type of coating is needed to protect it from further deterioration or dissolution. When a masonry building has been neglected for a long period of time, necessary repairs may be required in order to make it watertight. If, following a reasonable period of time after the building has been made watertight and has dried out completely, moisture appears actually to be penetrating through the repointed and repaired masonry walls, then the application of a water-repellent coating may be considered *in selected areas only*. This decision should be made in consultation with an architectural conservator. And, if such a treatment is undertaken, it should not be applied to the entire exterior of the building.

Anti-graffiti or barrier coatings are another type of clear coating—although barrier coatings can also be pigmented—that may be applied to exterior masonry, but they are not formulated primarily as water repellents. The purpose of these coatings is to make it harder for graffiti to stick to a masonry surface and, thus, easier to clean. But, like water-repellent coatings, in most cases the application of anti-graffiti coatings is generally not recommended for historic masonry buildings. These coatings are often quite shiny which can greatly alter the appearance of a historic masonry surface, and they are not always effective (Fig. 26). Generally, other ways of discouraging graffiti, such as improved lighting, can be more effective than a coating. However, the application of anti-graffiti coatings may be appropriate in some instances on vulnerable areas of historic masonry buildings which are frequent targets of graffiti that are located in out-of-the-way places where constant surveillance is not possible.

Some water-repellent coatings are recommended by product manufacturers as a means of keeping dirt and pollutants or biological growth from collecting on the surface of masonry buildings and, thus, reducing the need for frequent cleaning. While this at times may be true, in some cases a coating may actually retain dirt more than uncoated masonry. Generally, the application of a water-repellent coating is not recommended on a historic masonry building as a means of preventing biological growth. Some water-repellent coatings may actually encourage biological growth on a masonry wall. Biological growth on masonry buildings has traditionally been kept at bay through regularly-scheduled cleaning as part of a maintenance plan. Simple cleaning of the masonry with low-pressure water using a natural- or synthetic-bristled scrub brush can be very effective if done on a regular basis. Commercial products are also available which can be sprayed on masonry to remove biological growth.

In most instances, a water-repellent coating is not necessary if a building is watertight. The application of a water-repellent coating is not a recommended treatment for historic masonry buildings unless there is a specific

Figure 25. The clear coating applied to this limestone molding has failed and is taking off some of the stone surface as it peels. Photo: Frances Gale.

problem which it may help solve. If the problem occurs on only part of the building, it is best to treat only that area rather than an entire building. Extreme exposures such as parapets, for example, or portions of the building subject to driving rain can be treated more effectively and less expensively than the entire building. Water-repellent coatings are not permanent and must be reapplied periodically although, if they are truly invisible, it can be difficult to know when they are no longer providing the intended protection.

Figure 26. The anti-graffiti or barrier coating on this column is very shiny and would not be appropriate to use on a historic masonry building. The coating has discolored as it has aged and whitish streaks reveal areas of bare concrete where the coating was incompletely applied.

Testing a water-repellent coating by applying it in one small area may not be helpful in determining its suitability for the building because a limited test area does not allow an adequate evaluation of such a treatment. Since water may enter and leave through the surrounding untreated areas, there is no way to tell if the coated test area is "breathable." But trying a coating in a small area may help to determine whether the coating is visible on the surface or if it will otherwise change the appearance of the masonry.

Waterproof Coatings

In theory, waterproof coatings usually do not cause problems as long as they exclude all water from the masonry. If water does enter the wall from the ground or from the inside of a building, the coating can intensify the damage because the water will not be able to escape. During cold weather this water in the wall can freeze causing serious mechanical disruption, such as spalling.

In addition, the water eventually will get out by the path of least resistance. If this path is toward the interior, damage to interior finishes can result; if it is toward the exterior, it can lead to damage to the masonry caused by built-up water pressure (Fig. 27).

In most instances, waterproof coatings should not be applied to historic masonry. The possible exception to this might be the application of a waterproof coating to below-grade exterior foundation walls as a last resort to stop water infiltration on interior basement walls. **Generally, however, waterproof coatings, which include *elastomeric paints*, should almost never be applied above grade to historic masonry buildings.**

Figure 27. Instead of correcting the roof drainage problems, an elastomeric coating was applied to the already saturated limestone cornice. An elastomeric coating holds moisture in the masonry because it does not "breathe" and does not allow liquid moisture to escape. If the water pressure builds up sufficiently it can cause the coating to break and pop off as shown in this example, often pulling pieces of the masonry with it. Photo: National Park Service Files.

Summary

A well-planned cleaning project is an essential step in preserving, rehabilitating or restoring a historic masonry building. Proper cleaning methods and coating treatments, when determined necessary for the preservation of the masonry, can enhance the aesthetic character as well as the structural stability of a historic building. Removing years of accumulated dirt, pollutant crusts, stains, graffiti or paint, if done with appropriate caution, can extend the life and longevity of the historic resource. Cleaning that is carelessly or insensitively prescribed or carried out by inexperienced workers can have the opposite of the intended effect. It may scar the masonry permanently, and may actually result in hastening deterioration by introducing harmful residual chemicals and salts into the masonry or causing surface loss. Using the wrong cleaning method or using the right method incorrectly, applying the wrong kind of coating or applying a coating that is not needed can result in serious damage, both physically and aesthetically, to a historic masonry building. Cleaning a historic masonry building should always be done using the *gentlest means possible* that will clean, but not damage the building. It should always be taken into consideration before applying a water-repellent coating or a waterproof coating to a historic masonry building whether it is really necessary and whether it is in the best interest of preserving the building.

2 PRESERVATION BRIEFS

Repointing Mortar Joints in Historic Masonry Buildings

Robert C. Mack, FAIA

Heritage Preservation Services

Figure 1. After removing deteriorated mortar, an experienced mason repoints a portion of this early-20th century limestone building. Photo: Robert C. Mack, FAIA.

Masonry — brick, stone, terra-cotta, and concrete block — is found on nearly every historic building. Structures with all-masonry exteriors come to mind immediately, but most other buildings at least have masonry foundations or chimneys. Although generally considered "permanent," masonry is subject to deterioration, especially at the mortar joints. Repointing, also known simply as "pointing"or—somewhat inaccurately—"tuck pointing"*, is the process of removing deteriorated mortar from the joints of a masonry wall and replacing it with new mortar (Fig. 1). Properly done, repointing restores the visual and physical integrity of the masonry. Improperly done, repointing not only detracts from the appearance of the building, but may also cause physical damage to the masonry units themselves.

The purpose of this Brief is to provide general guidance on appropriate materials and methods for repointing historic masonry buildings and it is intended to benefit building owners, architects, and contractors. The Brief should serve as a guide to prepare specifications for repointing historic masonry buildings. It should also help develop sensitivity to the particular needs of historic masonry, and to assist historic building owners in working cooperatively with architects, architectural conservators and historic preservation consultants, and contractors. Although specifically intended for historic buildings, the guidance is appropriate for other masonry buildings as well. This publication updates *Preservation Briefs 2: Repointing Mortar Joints in Historic Brick Buildings* to include all types of historic unit masonry. The scope of the earlier Brief has also been expanded to acknowledge that the many buildings constructed in the first half of the 20th century are now historic and eligible for listing in the National Register of Historic Places, and that they may have been originally constructed with portland cement mortar.

*Tuckpointing technically describes a primarily decorative application of a raised mortar joint or lime putty joint on top of flush mortar joints.

Historical Background

Mortar consisting primarily of lime and sand has been used as an integral part of masonry structures for thousands of years. Up until about the mid-19th century, lime or quicklime (sometimes called lump lime) was delivered to construction sites, where it had to be slaked, or combined with water. Mixing with water caused it to boil and resulted in a wet lime putty that was left to mature in a pit or wooden box for several weeks, up to a year. Traditional mortar was made from lime putty, or slaked lime, combined with local sand, generally in a ratio of 1 part lime putty to 3 parts sand by volume. Often other ingredients, such as crushed marine shells (another source of lime), brick dust, clay, natural cements, pigments, and even animal hair were also added to mortar, but the basic formulation for lime putty and sand mortar remained unchanged for centuries until the advent of portland cement or its forerunner, Roman cement, a natural, hydraulic cement.

Portland cement was patented in Great Britain in 1824. It was named after the stone from Portland in Dorset which it resembled when hard. This is a fast-curing, hydraulic cement which hardens under water. Portland cement was first manufactured in the United States in 1872, although it was imported before this date. But it was not in common use throughout the country until the early 20th century. Up until the turn of the century portland cement was considered primarily an additive, or "minor ingredient" to help accelerate mortar set time. By the 1930s, however, most masons used a mix of equal parts portland cement and lime putty. Thus, the mortar found in masonry structures built between 1873 and 1930 can range from pure lime and sand mixes to a wide variety of lime, portland cement, and sand combinations.

In the 1930s more new mortar products intended to hasten and simplify masons' work were introduced in the U.S. These included **masonry cement**, a premixed, bagged mortar which is a combination of portland cement and ground limestone, and **hydrated lime**, machine-slaked lime that eliminated the necessity of slaking quicklime into putty at the site.

Identifying the Problem Before Repointing

The decision to repoint is most often related to some obvious sign of deterioration, such as disintegrating mortar, cracks in mortar joints, loose bricks or stones, damp walls, or damaged plasterwork. It is, however, erroneous to assume that repointing alone will solve deficiencies that result from other problems (Fig. 2). The root cause of the deterioration—leaking roofs or gutters, differential settlement of the building, capillary action causing rising damp, or extreme weather exposure—should always be dealt with prior to beginning work. Without appropriate repairs to eliminate the source of the problem, mortar deterioration will continue and any repointing will have been a waste of time and money.

Use of Consultants. Because there are so many possible causes for deterioration in historic buildings, it may be desirable to retain a consultant, such as a historic architect or architectural conservator, to analyze the building. In addition to determining the most appropriate solutions to the problems, a consultant can prepare specifications which reflect the particular requirements of each job and can provide oversight of the work in progress. Referrals to preservation consultants frequently can be obtained from State Historic Preservation Offices, the American Institute for Conservation of Historic and Artistic Works (AIC), the Association for Preservation Technology (APT), and local chapters of the American Institute of Architects (AIA).

Figure 2. Much of the mortar on this building has been leached away by water from a leaking downspout. The downspout must be replaced and any other drainage problems repaired before repointing. Photo: Robert C. Mack, FAIA.

Finding an Appropriate Mortar Match

Preliminary research is necessary to ensure that the proposed repointing work is both physically and visually appropriate to the building. Analysis of unweathered portions of the historic mortar to which the new mortar will be matched can suggest appropriate mixes for the repointing mortar so that it will not damage the building because it is excessively strong or vapor impermeable. Examination and analysis of the masonry units—brick, stone or terra cotta—and the techniques used in the original construction will assist in maintaining the building's historic appearance (Figs. 3-4). A simple, non-technical, evaluation of the masonry units and mortar can provide information concerning the relative strength and permeability of each–critical factors in selecting the repointing mortar—while a visual analysis of the historic mortar can provide the information necessary for developing the new mortar mix and application techniques.

Although not crucial to a successful repointing project, for projects involving properties of special historic significance, a mortar analysis by a qualified laboratory can be useful by providing information on the original ingredients. However, there are limitations with such an analysis, and replacement mortar specifications should not be based solely on laboratory analysis. Analysis requires interpretation, and there are important factors which affect the condition and performance of the mortar that cannot be established through laboratory analysis. These may include: the original water content, rate of curing, weather conditions during original construction, the method of mixing and placing the mortar, and the cleanliness and condition of the sand. *The most useful information that can come out of laboratory analysis is the identification of sand by*

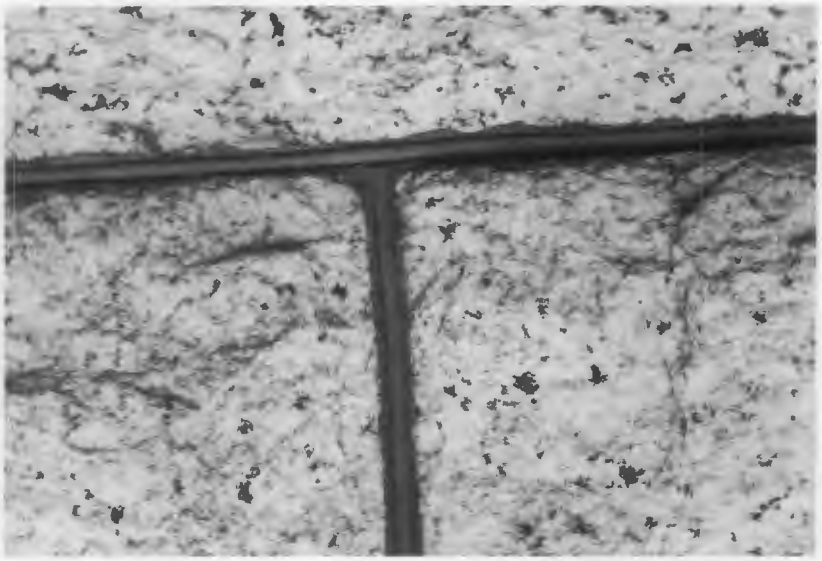

Figure 3. Good-quality repointing closely replicates the original in composition, texture, joint type and profile on this 19th century brick building (left), and on this late-19th century granite on H.H. Richardson's Glessner House in Chicago (right). Photos: Charles E. Fisher: Sharon C. Park, FAIA.

gradation and color. This allows the color and the texture of the mortar to be matched with some accuracy because sand is the largest ingredient by volume.

In creating a repointing mortar that is compatible with the masonry units, the objective is to achieve one that matches the historic mortar as closely as possible, so that the new material can coexist with the old in a sympathetic, supportive and, if necessary, sacrificial capacity. The exact physical and chemical properties of the historic mortar are not of major significance as long as the new mortar conforms to the following criteria:

- The new mortar must match the historic mortar in color, texture and tooling. (If a laboratory analysis is undertaken, it may be possible to match the binder components and their proportions with the historic mortar, if those materials are available.)
- The sand must match the sand in the historic mortar. (The color and texture of the new mortar will usually fall into place if the sand is matched successfully.)
- The new mortar must have **greater vapor permeability** and be **softer** (measured in compressive strength) than the masonry units.
- The new mortar must be **as vapor permeable** and **as soft or softer** (measured in compressive strength) than the historic mortar. (Softness or hardness is not necessarily an indication of permeability; old, hard lime mortars can still retain high permeability.)

Properties of Mortar

Mortars for repointing should be softer or more permeable than the masonry units and no harder or more impermeable than the historic mortar to prevent damage to the masonry units. It is a common error to assume that hardness or high strength is a measure of appropriateness, particularly for lime-based historic mortars. Stresses within a wall caused by expansion, contraction, moisture migration, or settlement must be accommodated in some manner; in a masonry wall these

Figure 4. (left) The poor quality of this repointing–it appears to have been "tooled" with the mason's finger–does not match the delicacy of the original beaded joint on this 19th-century brick wall. (right) It is obvious that the repointing on this "test patch" is not an appropriate replacement mortar joint for this early-19th century stone foundation. Photos: Lee H. Nelson, FAIA.

stresses should be relieved by the mortar rather than by the masonry units. A mortar that is stronger in compressive strength than the masonry units, will not "give," thus causing the stresses to be relieved through the masonry units—resulting in permanent damage to the masonry, such as cracking and spalling, that cannot be repaired easily (Fig. 5). While stresses can also break the bond between the mortar and the masonry units, permitting water to penetrate the resulting hairline cracks, this is easier to correct in the joint through repointing than if the break occurs in the masonry units.

Permeability, or rate of vapor transmission, is also critical. High lime mortars are more permeable than denser cement mortars. Historically, mortar acted as a bedding material–not unlike an expansion joint–rather than a "glue" for the masonry units, and moisture was able to migrate through the mortar joints rather than the masonry units. When moisture evaporates from the masonry it deposits any soluble salts either on the surface as *efflorescence* or below the surface as *subflorescence*. While salts deposited on the surface of masonry units are usually relatively harmless, salt crystallization within a masonry unit creates pressure that can cause parts of the outer surface to spall off or delaminate. If the mortar does not permit moisture or moisture vapor to migrate out of the wall and evaporate, the result will be damage to the masonry units.

Components of Mortar

Sand. Sand is the largest component of mortar and the material that gives mortar its distinctive color, texture and cohesiveness. Sand must be free of impurities, such as salts or clay. The three key characteristics of sand are: particle shape, gradation and void ratios.

Figure 5. The use of hard, portland-cement mortar that is less permeable than the soft bricks has resulted in severe damage to this brick wall. Moisture trapped in the wall was unable to evaporate through the mortar which is intended to be sacrificial, and thus protect the bricks. As a result the moisture remained in the walls until water pressure eventually popped the surface off the bricks. Photo: National Park Service Files.

When viewed under a magnifying glass or low-power microscope, particles of sand generally have either rounded edges, such as found in beach and river sand, or sharp, angular edges, found in crushed or manufactured sand. For repointing mortar, rounded or natural sand is preferred for two reasons. It is usually similar to the sand in the historic mortar and provides a better visual match. It also has better working qualities or plasticity and can thus be forced into the joint more easily, forming a good contact with the remaining historic mortar and the surface of the adjacent masonry units. Although manufactured sand is frequently more readily available, it is usually possible to locate a supply of rounded sand.

The gradation of the sand (particle size distribution) plays a very important role in the durability and cohesive properties of a mortar. Mortar must have a certain percentage of large to small particle sizes in order to deliver the optimum performance. Acceptable guidelines on particle size distribution may be found in ASTM C 144 (American Society for Testing and Materials). However, in actuality, since neither historic nor modern sands are always in compliance with ASTM C 144, matching the same particle appearance and gradation usually requires sieving the sand.

A scoop of sand contains many small voids between the individual grains. A mortar that performs well fills all these small voids with binder (cement/lime combination or mix) in a balanced manner. Well-graded sand generally has a 30 per cent void ratio by volume. Thus, 30 per cent binder by volume generally should be used, unless the historic mortar had a different binder: aggregate ratio. This represents the 1:3 binder to sand ratios often seen in mortar specifications.

For repointing, sand generally should conform to ASTM C 144 to assure proper gradation and freedom from impurities; some variation may be necessary to match the original size and gradation. Sand color and texture also should match the original as closely as possible to provide the proper color match without other additives.

Lime. Mortar formulations prior to the late-19th century used lime as the primary binding material. Lime is derived from heating limestone at high temperatures which burns off the carbon dioxide, and turns the limestone into quicklime. There are three types of limestone—calcium, magnesium, and dolomitic—differentiated by the different levels of magnesium carbonate they contain which impart specific qualities to mortar. Historically, calcium lime was used for mortar rather than the dolomitic lime (calcium magnesium carbonate) most often used today. But it is also important to keep in mind the fact that the historic limes, and other components of mortar, varied a great deal because they were natural, as opposed to modern lime which is manufactured and, therefore, standardized. Because some of the kinds of lime, as well as other components of mortar, that were used historically are no longer readily available, even when a conscious effort is made to replicate a "historic" mix, this may not be achievable due to the differences between modern and historic materials.

Lime, itself, when mixed with water into a paste is very plastic and creamy. It will remain workable and soft indefinitely, if stored in a sealed container. Lime (calcium hydroxide) hardens by carbonation absorbing carbon dioxide primarily from the air, converting itself to calcium carbonate. Once a lime and sand mortar is mixed and placed in a wall, it begins the process of carbonation. If lime mortar is left to dry too rapidly, carbonation of the mortar will be reduced, resulting in poor adhesion and poor durability. In addition, lime mortar is slightly water soluble and thus is able to re-seal any hairline cracks that may develop during the life of the mortar. Lime mortar is soft, porous, and changes little in volume during temperature fluctuations, thus making it a good choice for historic buildings. *Because of these qualities, high calcium lime mortar may be considered for many repointing projects, not just those involving historic buildings.*

For repointing, lime should conform to ASTM C 207, Type S, or Type SA, Hydrated Lime for Masonry Purposes. This machine-slaked lime is designed to assure high plasticity and water retention. The use of quicklime which must be slaked and soaked by hand may have advantages over hydrated lime in some restoration projects if time and money allow.

Lime putty. Lime putty is slaked lime that has a putty or paste-like consistency. It should conform to ASTM C 5. Mortar can be mixed using lime putty according to ASTM C 270 property or proportion specification.

Portland cement. More recent, 20th-century mortar has used portland cement as a primary binding material. A straight portland cement and sand mortar is extremely hard, resists the movement of water, shrinks upon setting, and undergoes relatively large thermal movements. When mixed with water, portland cement forms a harsh, stiff paste that is quite unworkable, becoming hard very quickly. (Unlike lime, portland cement will harden regardless of weather conditions and does not require wetting and drying cycles.) Some portland cement assists the workability and plasticity of the mortar without adversely affecting the finished project; it also provides early strength to the mortar and speeds setting. Thus, it may be appropriate to add some portland cement to an essentially lime-based mortar even when repointing relatively soft 18th or 19th century brick under some circumstances when a slightly harder mortar is required. The more portland cement that is added to a mortar formulation the harder it becomes—and the faster the initial set.

For repointing, portland cement should conform to ASTM C 150. White, non-staining portland cement may provide a better color match for some historic mortars than the more commonly available grey portland cement. But, it should not be assumed, however, that white portland cement is always appropriate for all historic buildings, since the original mortar may have been mixed with grey cement. The cement should not have more than 0.60 per cent alkali to help avoid efflorescence.

Masonry cement. Masonry cement is a preblended mortar mix commonly found at hardware and home repair stores. It is designed to produce mortars with a compressive strength of 750 psi or higher when mixed

MORTAR ANALYSIS

Methods for analyzing mortars can be divided into two broad categories: **wet chemical** and **instrumental**. Many laboratories that analyze historic mortars use a simple **wet-chemical** method called *acid digestion*, whereby a sample of the mortar is crushed and then mixed with a dilute acid. The acid dissolves all the carbonate-containing minerals not only in the binder, but also in the aggregate (such as oyster shells, coral sands, or other carbonate-based materials), as well as any other acid-soluble materials. The sand and fine-grained acid-insoluble material is left behind. There are several variations on the simple acid digestion test. One involves collecting the carbon dioxide gas given off as the carbonate is digested by the acid; based on the gas volume the carbonate content of the mortar can be accurately determined (Jedrzejewska, 1960). Simple acid digestion methods are rapid, inexpensive, and easy to perform, but the information they provide about the original composition of a mortar is limited to the color and texture of the sand. The gas collection method provides more information about the binder than a simple acid digestion test.

Instrumental analysis methods that have been used to evaluate mortars include polarized light or thin-section microscopy, scanning electron microscopy, atomic absorption spectroscopy, X-ray diffraction, and differential thermal analysis. All instrumental methods require not only expensive, specialized equipment, but also highly-trained experienced analysts. However, instrumental methods can provide much more information about a mortar. Thin-section microscopy is probably the most commonly used instrumental method. Examination of thin slices of a mortar in transmitted light is often used to supplement acid digestion methods, particularly to look for carbonate-based aggregate. For example, the new ASTM test method, ASTM C 1324-96 "Test Method for Examination and Analysis of Hardened Mortars" which was designed specifically for the analysis of modern lime-cement and masonry cement mortars, combines a complex series of wet chemical analyses with thin-section microscopy.

The drawback of most mortar analysis methods is that mortar samples of known composition have not been analyzed in order to evaluate the method. Historic mortars were not prepared to narrowly defined specifications from materials of uniform quality; they contain a wide array of locally derived materials combined at the discretion of the mason. While a particular method might be able to accurately determine the original proportions of a lime-cement-sand mortar prepared from modern materials, the usefulness of that method for evaluating historic mortars is questionable unless it has been tested against mortars prepared from materials more commonly used in the past.

with sand and water at the job site. It may contain hydrated lime, but it always contains a large amount of portland cement, as well as ground limestone and other workability agents, including air-entraining agents. Because masonry cements are not required to contain hydrated lime, and generally do not contain lime, they produce high strength mortars that can damage historic masonry. *For this reason, they generally are not recommended for use on historic masonry buildings.*

Lime mortar (pre-blended). Hydrated lime mortars, and pre-blended lime putty mortars with or without a matched sand are commercially available. Custom mortars are also available with color. In most instances, pre-blended lime mortars containing sand may not provide an exact match; however, if the project calls for total repointing, a pre-blended lime mortar may be worth considering as long as the mortar is compatible in strength with the masonry. If the project involves only selected, "spot" repointing, then it may be better to carry out a mortar analysis which can provide a custom pre-blended lime mortar with a matching sand. In either case, if a preblended lime mortar is to be used, it should contain Type S or SA hydrated lime conforming to ASTM C 207.

Water. Water should be potable—clean and free from acids, alkalis, or other dissolved organic materials.

Other Components

Historic components. In addition to the color of the sand, the texture of the mortar is of critical importance in duplicating historic mortar. Most mortars dating from the mid-19th century on—with some exceptions—have a fairly homogeneous texture and color. Some earlier mortars are not as uniformly textured and may contain lumps of partially burned lime or "dirty lime", shell (which often provided a source of lime, particularly in coastal areas), natural cements, pieces of clay, lampblack or other pigments, or even animal hair. The visual characteristics of these mortars can be duplicated through the use of similar materials in the repointing mortar.

Replicating such unique or individual mortars will require writing new specifications for each project. If possible, suggested sources for special materials should be included. For example, crushed oyster shells can be obtained in a variety of sizes from poultry supply dealers.

Pigments. Some historic mortars, particularly in the late 19th century, were tinted to match or contrast with the brick or stone (Fig. 6). Red pigments, sometimes in the form of brick dust, as well as brown, and black pigments were commonly used. Modern pigments are available which can be added to the mortar at the job site, but they should not exceed 10 per cent by weight of the portland cement in the mix, and carbon black should be limited to 2 per cent. Only synthetic mineral oxides, which are alkali-proof and sun-fast, should be used to prevent bleaching and fading.

Modern components. Admixtures are used to create specific characteristics in mortar, and whether they should be used will depend upon the individual project. *Air-entraining agents*, for example, help the mortar to resist freeze-thaw damage in northern climates. *Accelerators* are used to reduce mortar freezing prior to setting while *retarders* help to extend the mortar life in hot climates. Selection of admixtures should be made by the architect or architectural conservator as part of the specifications, not something routinely added by the masons.

Generally, modern chemical additives are unnecessary and may, in fact, have detrimental effects in historic masonry projects. The use of antifreeze compounds is not recommended. They are not very effective with high lime mortars and may introduce salts, which may cause efflorescence later. A better practice is to warm the sand and water, and to protect the completed work from freezing. No definitive study has determined whether air-entraining additives should be used to resist frost action and enhance plasticity, but in areas of extreme exposure requiring high-strength mortars with lower permeability, air-entrainment of 10-16 percent may be desirable (see formula for "severe weather exposure" in **Mortar Type and Mix**). Bonding agents are not a substitute for proper joint preparation, and they should generally be avoided. If the joint is properly prepared, there will be a good bond between the new mortar and the adjacent surfaces. In addition, a bonding agent is difficult to remove if smeared on a masonry surface (Fig. 7).

Mortar Type and Mix

Mortars for repointing projects, especially those involving historic buildings, typically are custom mixed in order to ensure the proper physical and visual qualities. These materials can be combined in varying proportions to create a mortar with the desired performance and durability. The actual specification of a particular mortar type should take into consideration all of the factors affecting the life of the building including: current site conditions, present condition of the masonry, function of the new mortar, degree of weather exposure, and skill of the mason. Thus, no two repointing projects are exactly the same. Modern materials specified for use in repointing mortar should conform to specifications of the American Society for Testing and Materials (ASTM) or comparable federal specifications, and the resulting mortar should conform to ASTM C 270, Mortar for Unit Masonry.

Specifying the proportions for the repointing mortar for a specific job is not as difficult as it might seem. Five mortar types, each with a corresponding recommended mix, have been established by ASTM to distinguish high strength mortar from soft flexible mortars. The ASTM designated them in decreasing order of approximate general strength as Type M (2,500 psi), Type S (1,800 psi), Type N (750 psi), Type O (350 psi) and Type K (75 psi). (The letters identifying the types are from the words MASON WORK using every other letter.) Type K has the highest lime content of the mixes that contain portland cement, although it is seldom used today, except for some historic preservation projects. The designation "L" in the accompanying chart identifies a straight lime and sand mix. Specifying the appropriate ASTM mortar by proportion of ingredients, will ensure the desired physical properties. Unless specified otherwise, measurements or proportions for mortar mixes are always given in the following order: cement-lime-sand. Thus, a Type K mix, for example, would be referred to as 1-3-10, or 1 part cement to 3 parts lime to 10 parts sand. Other requirements to create the desired visual qualities should be included in the specifications.

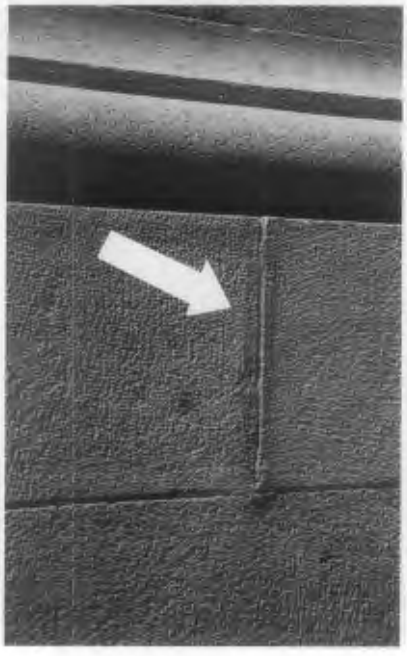

Figure 7. The dark stain on either side of the vertical joint on this sandstone watertable probably resulted from the use of a bonding agent that was not properly cleaned off the masonry after repointing. Photo: Anne Grimmer.

Figure 8. Due to inadequate joint preparation, the repointing mortar has not adhered properly and is falling out of the joint. Photo: Robert C. Mack, FAIA.

The strength of a mortar can vary. If mixed with higher amounts of portland cement, a harder mortar is obtained. The more lime that is added, the softer and more plastic the mortar becomes, increasing its workability. A mortar strong in compressive strength might be desirable for a hard stone (such as granite) pier holding up a bridge deck, whereas a softer, more permeable lime mortar would be preferable for a historic wall of soft brick. Masonry deterioration caused by salt deposition results when the mortar is less permeable that the masonry unit. A strong mortar is still more permeable than hard dense stone. However, in a wall constructed of soft bricks where the masonry unit itself has a relatively high permeability or vapor transmission rate, a soft, high lime mortar is necessary to retain sufficient permeability.

Budgeting and Scheduling

Repointing is both expensive and time consuming due to the extent of handwork and special materials required. It is preferable to repoint only those areas that require work rather than an entire wall, as is often specified. But, if 25 to 50 per cent or more of a wall needs to be repointed, repointing the entire wall may be more cost effective than spot repointing. Total repointing may also be more sensible when access is difficult, requiring the erection of expensive scaffolding (unless the majority of the mortar is sound and unlikely to require replacement in the foreseeable future). Each project requires judgement based on a variety of factors. Recognizing this at the outset will help to prevent many jobs from becoming prohibitively expensive.

In scheduling, seasonal aspects need to be considered first. Generally speaking, wall temperatures between 40 and 95 degrees F (8 and 38 degrees C) will prevent freezing or excessive evaporation of the water in the mortar. Ideally, repointing should be done in shade, away from strong sunlight in order to slow the drying process, especially during hot weather. If necessary, shade can be provided for large-scale projects with appropriate modifications to scaffolding.

The relationship of repointing to other work proposed on the building must also be recognized. For example, if paint removal or cleaning is anticipated, and if the mortar joints are basically sound and need only selective repointing, it is generally better to postpone repointing

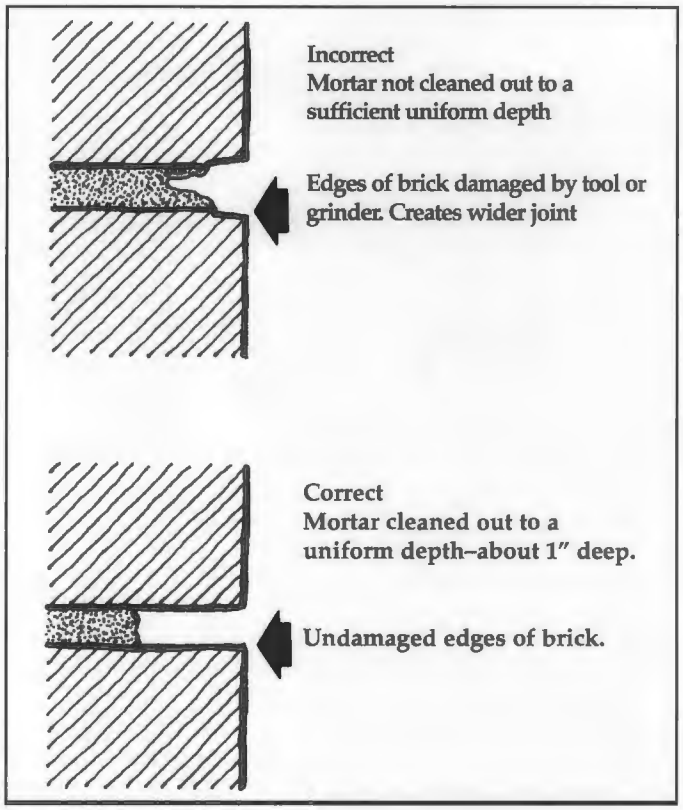

Figure 9. Comparison of incorrect and correct preparation of mortar joints for repointing. Drawing: Robert C. Mack, FAIA, and David W. Look, AIA.

until after completion of these activities. However, if the mortar has eroded badly, allowing moisture to penetrate deeply into the wall, repointing should be accomplished before cleaning. Related work, such as structural or roof repairs, should be scheduled so that they do not interfere with repointing and so that all work can take maximum advantage of erected scaffolding.

Building managers also must recognize the difficulties that a repointing project can create. The process is time consuming, and scaffolding may need to remain in place for an extended period of time. The joint preparation process can be quite noisy and can generate large quantities of dust which must be controlled, especially at air intakes to protect human health, and also where it might damage operating machinery. Entrances may be blocked from time to time making access difficult for both building tenants and visitors. Clearly, building managers will need to coordinate the repointing work with other events at the site.

Contractor Selection

The ideal way to select a contractor is to ask knowledgeable owners of recently repointed historic buildings for recommendations. Qualified contractors then can provide lists of other repointing projects for inspection. More commonly, however, the contractor for a repointing project is selected through a competitive bidding process over which the client or consultant has only limited control. In this situation it is important to ensure that the specifications stipulate that masons must have a minimum of five years' experience with repointing historic masonry buildings to be eligible to bid on the project. Contracts are awarded to the lowest *responsible* bidder, and bidders who have performed poorly on other projects usually can be eliminated from consideration on this basis, even if they have the lowest prices.

The contract documents should call for unit prices as well as a base bid. Unit pricing forces the contractor to determine in advance what the cost addition or reduction will be for work which varies from the scope of the base bid. If, for example, the contractor has fifty linear feet less of stone repointing than indicated on the contract documents but thirty linear feet more of brick repointing, it will be easy to determine the final price for the work. Note that each type of work—brick repointing, stone repointing, or similar items—will have its own unit price. The unit price also should reflect quantities; one linear foot of pointing in five different spots will be more expensive than five contiguous linear feet.

Execution of the Work

Test Panels. These panels are prepared by the contractor using the same techniques that will be used on the remainder of the project. Several panel locations—preferably not on the front or other highly visible location of the building—may be necessary to include all types of masonry, joint styles, mortar colors, and other problems likely to be encountered on the job. If cleaning tests, for

Figure 10. Using a hammer and masonry chisel is the least damaging and, thus, generally the preferred method of removing old mortar in preparation for repointing historic masonry. Photo: John P. Speweik.

Figure 11. The damage to the edges and corners of these historic bricks was caused by using a mechanical grinder to rake out the joints. Note the overcutting of the head joint and the damage to the arises (corners) of the bricks. Photo: Lee H. Nelson, FAIA.

example, are also to be undertaken, they should be carried out in the same location. Usually a 3 foot by 3 foot area is sufficient for brickwork, while a somewhat larger area may be required for stonework. These panels establish an acceptable standard of work and serve as a benchmark for evaluating and accepting subsequent work on the building.

Joint Preparation. Old mortar should be removed to a minimum depth of 2 to 2- $^1/_2$ times the width of the joint to ensure an adequate bond and to prevent mortar "popouts" (Fig. 8). For most brick joints, this will require removal of the mortar to a depth of approximately $^1/_2$ to 1 inch; for stone masonry with wide joints, mortar may need to be removed to a depth of several inches. Any loose or disintegrated mortar beyond this minimum depth also should be removed (Fig. 9).

Although some damage may be inevitable, careful joint preparation can help limit damage to masonry units. The traditional manner of removing old mortar is through the use of hand chisels and mash hammers (Fig. 10). Though labor-intensive, in most instances this method poses the least threat for damage to historic masonry units and produces the best final product.

The most common method of removing mortar, however, is through the use of power saws or grinders. The use of power tools by unskilled masons can be disastrous for historic masonry, particularly soft brick. Using power saws on walls with thin joints, such as most brick walls, almost always will result in damage to the masonry units by breaking the edges and by overcutting on the head, or vertical joints (Fig. 11).

However, small pneumatically-powered chisels generally can be used safely and effectively to remove mortar on historic buildings as long as the masons maintain appropriate control over the equipment.

Figure 12.. A power grinder, operated correctly by a skilled mason may be used in preparation for repointing to cut wide, horizontal mortar joints, typical of many early-20th century brick structures without causing damage to the brick. Note the use of protective safety equipment. Photo: Robert C. Mack, FAIA.

Under certain circumstances, thin diamond-bladed grinders may be used to cut out *horizontal* joints only on hard portland cement mortar common to most early-20th century masonry buildings (Fig. 12). Usually, automatic tools most successfully remove old mortar without damaging the masonry units when they are used in combination with hand tools in preparation for repointing. Where horizontal joints are uniform and fairly wide, it may be possible to use a power masonry saw to assist the removal of mortar, such as by cutting along the middle of the joint; final mortar removal from the sides of the joints still should be done with a hand chisel and hammer. Caulking cutters with diamond blades can sometimes be used successfully to cut out joints without damaging the masonry. Caulking cutters are slow; they do not rotate, but vibrate at very high speeds, thus minimizing the possibility of damage to masonry units (Fig. 13). Although mechanical tools may be used safely in limited circumstances to cut out horizontal joints in preparation for repointing, they should never be used on vertical joints because of the danger of slipping and cutting into the brick above or below the vertical joint. Using power tools to remove mortar without damaging the surrounding masonry units also necessitates highly skilled masons experienced in working on historic masonry buildings. Contractors

Figure 13. (left) In preparation for repointing, the mortar joints on these granite steps are first cut out mechanically (note the vacuum attached to the cutting tool in foreground to cut down on dust). (right) Final removal of the old mortar is done by hand to avoid damage to the edges of the joints. Mechanical preparation of horizontal joints by an experienced mason may sometimes be acceptable, especially where the joints are quite wide and the masonry is a very hard stone. Photos: Anne Grimmer.

should demonstrate proficiency with power tools before their use is approved.

Using any of these power tools may also be more acceptable on hard stone, such as quartzite or granite, than on terra cotta with its glass-like glaze, or on soft brick or stone. The test panel should determine the acceptability of power tools. If power tools are to be permitted, the contractor should establish a quality control program to account for worker fatigue and similar variables.

Mortar should be removed cleanly from the masonry units, leaving square corners at the back of the cut. Before filling, the joints should be rinsed with a jet of water to remove all loose particles and dust. At the time of filling, the joints should be damp, but with no standing water present. For masonry walls—limestone, sandstone and common brick—that are extremely absorbent, it is recommended that a continual mist of water be applied for a few hours before repointing begins.

Mortar Preparation. Mortar components should be measured and mixed carefully to assure the uniformity of visual and physical characteristics. Dry ingredients are measured by volume and thoroughly mixed before the addition of any water. Sand must be added in a damp, loose condition to avoid over sanding. Repointing mortar is typically pre-hydrated by adding water so it will just hold together, thus allowing it to stand for a period of time before the final water is added. Half the water should be added, followed by mixing for approximately 5 minutes. The remaining water should then be added in small portions until a mortar of the desired consistency is reached. The total volume of water necessary may vary from batch to batch, depending on weather conditions. It is important to keep the water to a minimum for two reasons: first, a drier mortar is cleaner to work with, and it can be compacted tightly into the joints; second, with no excess water to evaporate, the mortar cures without shrinkage cracks. Mortar should be used within approximately 30 minutes of final mixing, and "retempering," or adding more water, should not be permitted.

Using Lime Putty to Make Mortar. Mortar made with lime putty and sand, sometimes referred to as roughage or course stuff, should be measured by volume, and may require slightly different proportions from those used with hydrated lime (Fig. 14). No additional water is usually needed to achieve a workable consistency because enough water is already contained in the putty. Sand is proportioned first, followed by the lime putty, then mixed for five minutes or until all the sand is thoroughly coated with the lime putty. But mixing, in the familiar sense of turning over with a hoe, sometimes may not be sufficient if the best possible performance is to be obtained from a lime putty mortar. Although the old practice of chopping, beating and ramming the mortar has largely been forgotten, recent field work has confirmed that lime putty and sand rammed and beaten with a wooden mallet or ax handle, interspersed by chopping with a hoe, can significantly improve workability and performance. The intensity of this action increases the overall lime/sand contact and removes any surplus water by compacting the other ingredients. It may also be advantageous for larger projects to use a mortar pan mill for mixing. Mortar pan mills which have a long tradition in Europe produce a superior lime putty mortar not attainable with today's modern paddle and drum type mixers.

For larger repointing projects the lime putty and sand can be mixed together ahead of time and stored indefinitely, on or off site, which eliminates the need for piles of sand on the job site. This mixture, which resembles damp brown sugar, must be protected from the air in sealed containers with a wet piece of burlap over the top or sealed in a large plastic bag to prevent evaporation and premature carbonation. The lime putty and sand mixture can be recombined into a workable plastic state months later with no additional water.

If portland cement is specified in a lime putty and sand mortar—Type O (1:2:9) or Type K (1:3:11)—the portland cement should first be mixed into a slurry paste before adding it to the lime putty and sand. Not only will this ensure that the portland cement is evenly distributed throughout the mixture, but if dry portland cement is added to wet ingredients it tends to "ball up," jeopardizing dispersion. (Usually water must be added to the lime putty and sand anyway once the portland cement is introduced.) Any color pigments should be added at this stage and mixed for a full five minutes. The mortar should be used within 30 minutes to 1 ½ hours and it should not be retempered. Once portland cement has been added the mortar can no longer be stored.

Filling the Joint. Where existing mortar has been removed to a depth of greater than 1 inch, these deeper areas should be filled first, compacting the new mortar in several layers. The back of the entire joint should be filled successively by applying approximately ¼ inch of mortar, packing it well into the back corners. This

Figure 14. Mixing mortar using lime putty: (a) proportioning sand; (b) proportioning lime putty; (c) placing lime putty on top of sand; (d) mixing sand over lime putty; (e) hand mixing mortar; and, (f) sample of mortar after mixing. Photos: John P. Speweik.

application may extend along the wall for several feet. As soon as the mortar has reached thumb-print hardness, another ¼ inch layer of mortar—approximately the same thickness—may be applied. Several layers will be needed to fill the joint flush with the outer surface of the masonry. It is important to allow each layer time to harden before the next layer is applied; most of the mortar shrinkage occurs during the hardening process and layering thus minimizes overall shrinkage.

When the final layer of mortar is thumb-print hard, the joint should be tooled to match the historic joint (Fig. 15). Proper timing of the tooling is important for uniform color and appearance. If tooled when too soft, the color will be lighter than expected, and hairline cracks may occur; if tooled when too hard, there may be dark streaks called "tool burning," and good closure of the mortar against the masonry units will not be achieved.

If the old bricks or stones have worn, rounded edges, it is best to recess the final mortar slightly from the face of the masonry. This treatment will help avoid a joint which is visually wider than the actual joint; it also will avoid creation of a large, thin featheredge which is easily damaged, thus admitting water (Fig. 16). After tooling, excess mortar can be removed from the edge of the joint by brushing with a natural bristle or nylon brush. Metal bristle brushes should never be used on historic masonry.

Curing Conditions. The preliminary hardening of high-lime content mortars—those mortars that contain more lime by volume than portland cement, i.e., Type O (1:2:9), Type K (1:3:11), and straight lime/sand, Type "L"(0:1:3) —takes place fairly rapidly as water in the mix is lost to the porous surface of the masonry and through evaporation. A high lime mortar (especially Type "L") left to dry out too rapidly can result in chalking, poor adhesion, and poor durability. Periodic wetting of the repointed area after the mortar joints are thumb-print hard and have been finish tooled may significantly accelerate the carbonation process. When feasible, misting using a hand sprayer with a fine nozzle can be simple to do for a day or two after repointing. Local conditions will dictate the frequency of wetting, but initially it may be as often as every hour and gradually reduced to every three or four hours. Walls should be covered with burlap for the first three days after repointing. (Plastic may be used, but it should be tented out and not placed directly against the wall.) This helps keep the walls damp and protects them from direct sunlight. Once carbonation of the lime has begun, it will continue for many years and the lime will gain strength as it reverts back to calcium carbonate within the wall.

***Aging* the Mortar.** Even with the best efforts at matching the existing mortar color, texture, and materials, there will usually be a visible difference between the old and

Figure 15. The profile of the repointed joints on the left replicate the historic joints around the corner to the right on the front of this stone building in Leesburg, VA. The contractor's pride in the repointing work is evident by the signature in the vertical joint. Photo: Anne Grimmer.

new work, partly because the new mortar has been matched to the unweathered portions of the historic mortar. Another reason for a slight mismatch may be that the sand is more exposed in old mortar due to the slight erosion of the lime or cement. Although spot repointing is generally preferable and some color difference should be acceptable, if the difference between old and new mortar is too extreme, it may be advisable in some instances to repoint an entire area of a wall, or an entire feature such as a bay, to minimize the difference between the old and the new mortar. If the mortars have been properly matched, usually the best way to deal with surface color differences is to let the mortars age naturally. Other treatments to overcome these differences, including cleaning the non-repointed areas or staining the new mortar, should be carefully tested prior to implementation.

Staining the new mortar to achieve a better color match is generally not recommended, but it may be appropriate in some instances. Although staining may provide an initial match, the old and new mortars may weather at different rates, leading to visual differences after a few seasons. In addition, the mixtures used to stain the mortar may be harmful to the masonry; for example, they may introduce salts into the masonry which can lead to efflorescence.

Cleaning the Repointed Masonry. If repointing work is carefully executed, there will be little need for cleaning other than to remove the small amount of mortar from the edge of the joint following tooling. This can be done with a stiff natural bristle or nylon brush after the mortar has dried, but before it is initially set (1-2 hours). Mortar that has hardened can usually be removed with a wooden paddle or, if necessary, a chisel.

Further cleaning is best accomplished with plain water and natural bristle or nylon brushes. If chemicals must

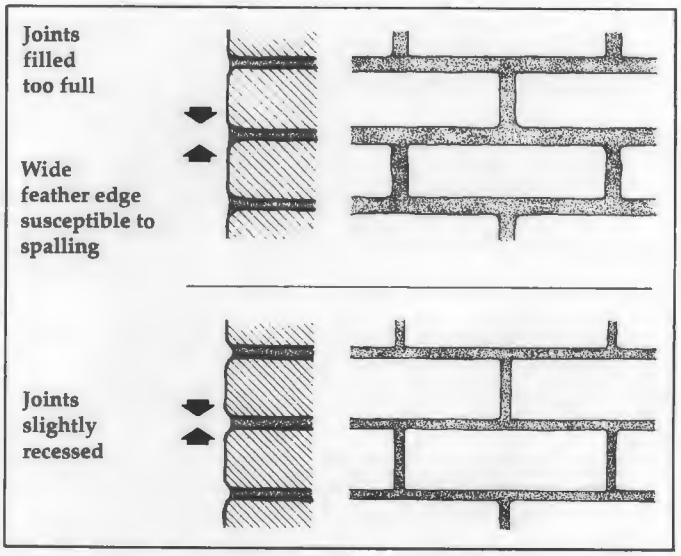

Figure 16. Comparison of visual effect of full mortar joints vs. slightly recessed joints. Filling joints too full hides the actual joint thickness and changes the character of the original brickwork. Drawing: Robert C. Mack, FAIA.

be used, they should be selected with extreme caution. Improper cleaning can lead to deterioration of the masonry units, deterioration of the mortar, mortar smear, and efflorescence. New mortar joints are especially susceptible to damage because they do not become fully cured for several months. Chemical cleaners, particularly acids, should never be used on dry masonry. The masonry should always be completely soaked once with water before chemicals are applied. After cleaning, the walls should be flushed again with plain water to remove all traces of the chemicals.

Several precautions should be taken if a freshly repointed masonry wall is to be cleaned. First, the mortar should be fully hardened before cleaning. Thirty days is usually sufficient, depending on weather and exposure; as mentioned previously, the mortar will continue to cure even after it has hardened. Test panels should be prepared to evaluate the effects of different cleaning

Figure 17. This photograph shows the significant visual change to the character of this historic brick building that has resulted from improper repointing procedures and a noticeably increased thickness of the mortar joints. Photo: Lee H. Nelson, FAIA.

Mortar Types			
(Measured by volume)			
Designation	Cement	Hydrated Lime or Lime Putty	Sand
M	1	1/4	3 - 3 3/4
S	1	1/2	4 - 4 1/2
N	1	1	5 - 6
O	1	2	8 - 9
K	1	3	10 - 12
"L"	0	1	2 1/4 - 3

Suggested Mortar Types for Different Exposures			
	Exposure		
Masonry Material	Sheltered	Moderate	Severe
Very Durable: granite, hard-cored brick, etc.	O	N	S
Moderately Durable: limestone, durable stone, molded brick	K	O	N
Minimally Durable: soft hand-made brick	"L"	K	O

methods. Generally, on newly repointed masonry walls, only very low pressure (100 psi) water washing supplemented by stiff natural bristle or nylon brushes should be used, except on glazed or polished surfaces, where only soft cloths should be used.**

New construction "bloom" or efflorescence occasionally appears within the first few months of repointing and usually disappears through the normal process of weathering. If the efflorescence is not removed by natural processes, the safest way to remove it is by dry brushing with stiff natural or nylon bristle brushes followed by wet brushing. Hydrochloric (muriatic) acid, is generally ineffective, and it should not be used to remove efflorescence. It may liberate additional salts, which, in turn, can lead to more efflorescence.

Surface Grouting is sometimes suggested as an alternative to repointing brick buildings, in particular. This process involves the application of a thin coat of cement-based grout to the mortar joints and the mortar/brick interface. To be effective the grout must extend slightly onto the face of the masonry units, thus widening the joint visually. The change in the joint appearance can alter the historic character of the structure to an unacceptable degree. In addition, although masking of the bricks is intended to keep the grout off the remainder of the face of the bricks, some level of residue, called "veiling," will inevitably remain. Surface grouting cannot substitute for the more extensive work of repointing, and it is not a recommended treatment for historic masonry.

**Additional information on masonry cleaning is presented in *Preservation Briefs 1: The Cleaning and Waterproof Coating of Masonry Buildings*, Robert C. Mack, AIA, Washington, D.C.: Technical Preservation Services, National Park Service, U.S. Department of the Interior, 1975; and *Keeping it Clean: Removing Exterior Dirt, Paint, Stains & Graffiti from Historic Masonry Buildings*, Anne E. Grimmer, Washington, D.C.: Technical Preservation Services, National Park Service, U.S. Department of the Interior, 1988.

Summary

For the Owner/Administrator. The owner or administrator of a historic building should remember that repointing is likely to be a lengthy and expensive process. First, there must be adequate time for evaluation of the building and investigation into the cause of problems. Then, there will be time needed for preparation of the contract documents. The work itself is precise, time-consuming and noisy, and scaffolding may cover the face of the building for some time. Therefore, the owner must carefully plan the work to avoid problems. Schedules for both repointing and other activities will thus require careful coordination to avoid unanticipated conflicts. The owner must avoid the tendency to rush the work or cut corners if the historic building is to retain its visual integrity and the job is to be durable.

For the Architect/Consultant. Because the primary role of the consultant is to ensure the life of the building, a knowledge of historic construction techniques and the special problems found in older buildings is essential. The consultant must assist the owner in planning for logistical problems relating to research and construction. It is the consultant's responsibility to determine the *cause* of the mortar deterioration and ensure that it is corrected before the masonry is repointed. The consultant must also be prepared to spend more time in project inspections than is customary in modern construction.

For the Masons. Successful repointing depends on the masons themselves. Experienced masons understand the special requirements for work on historic buildings and the added time and expense they require. The entire masonry crew must be willing and able to perform the work in conformance with the specifications, even when the specifications may not be in conformance with standard practice. At the same time, the masons should not hesitate to question the specifications if it appears that the work specified would damage the building.

Visually Examining the Mortar and the Masonry Units

A simple in-situ comparison will help determine the hardness and condition of the mortar and the masonry units. Begin by scraping the mortar with a screwdriver, and gradually tapping harder with a cold chisel and mason's hammer. Masonry units can be tested in the same way beginning, even more gently, by scraping with a fingernail. This relative analysis which is derived from the 10-point hardness scale used to describe minerals, provides a good starting point for selection of an appropriate mortar. It is described more fully in "The Russack System for Brick & Mortar Description" referenced in **Selected Reading** at the end of this Brief.

Mortar samples should be chosen carefully, and picked from a variety of locations on the building to find unweathered mortar, if possible. Portions of the building may have been repointed in the past while other areas may be subject to conditions causing unusual deterioration. There may be several colors of mortar dating from different construction periods or sand used from different sources during the initial construction. Any of these situations can give false readings to the visual or physical characteristics required for the new mortar. Variations should be noted which may require developing more than one mix.

1) Remove with a chisel and hammer three or four unweathered samples of the mortar to be matched from several locations on the building. (Set the largest sample aside—this will be used later for comparison with the repointing mortar). Removing a full representation of samples will allow selection of a "mean" or average mortar sample.

2) Mash the remaining samples with a wooden mallet, or hammer if necessary, until they are separated into their constituent parts. There should be a good handful of the material.

3) Examine the powdered portion—the lime and/or cement matrix of the mortar. Most particularly, note the color. There is a tendency to think of historic mortars as having white binders, but grey portland cement was available by the last quarter of the 19th century, and traditional limes were also sometimes grey. Thus, in some instances, the natural color of the historic binder may be grey, rather than white. The mortar may also have been tinted to create a colored mortar, and this color should be identified at this point.

4) Carefully blow away the powdery material (the lime and/or cement matrix which bound the mortar together).

5) With a low power (10 power) magnifying glass, examine the remaining sand and other materials such as lumps of lime or shell.

6) Note and record the wide range of color as well as the varying sizes of the individual grains of sand, impurities, or other materials.

Other Factors to Consider

Color. Regardless of the color of the binder or colored additives, the sand is the primary material that gives mortar its color. A surprising variety of colors of sand may be found in a single sample of historic mortar, and the different sizes of the grains of sand or other materials, such as incompletely ground lime or cement, play an important role in the texture of the repointing mortar. Therefore, when specifying sand for repointing mortar, it may be necessary to obtain sand from several sources and to combine or screen them in order to approximate the range of sand colors and grain sizes in the historic mortar sample.

Figure 19. Mortar joints of 18th century brick buildings were often as much as 1/2 inch wide, cut flush and struck with a grapevine joint, but for window and door surrounds where a finer quality rubbed brick was used, mortar joints were very thin. Photo: National Park Service Files.

Pointing Style. Close examination of the historic masonry wall and the techniques used in the original construction will assist in maintaining the visual qualities of the building (Fig. 18). Pointing styles and the methods of producing them should be examined. It is important to look at both the horizontal and the vertical joints to determine the order in which they were tooled and whether they were the same style. Some late-19th and early-20th century buildings, for example, have horizontal joints that were raked back while the vertical joints were finished flush and stained to match the bricks, thus creating the illusion of horizontal bands. Pointing styles may also differ from one facade to another; front walls often received greater attention to mortar detailing than side and rear walls (Fig. 19). **Tuckpointing** is not true repointing but the

application of a raised joint or lime putty joint on top of flush mortar joints (Fig. 20). **Penciling** is a purely decorative, painted surface treatment over a mortar joint, often in a contrasting color.

Masonry Units. The masonry units should also be examined so that any replacement units will match the historic masonry. Within a wall there may be a wide range of colors, textures, and sizes, particularly with hand-made brick or rough-cut, locally-quarried stone. Replacement units should blend in with the full range of masonry units rather than a single brick or stone.

Matching Color and Texture of the Repointing Mortar

New mortar should match the unweathered interior portions of the historic mortar. The simplest way to check the match is to make a small sample of the proposed mix and allow it to cure at a temperature of approximately 70 degrees F for about a week, or it can be baked in an oven to speed up the curing; this sample is then broken open and the surface is compared with the surface of the largest "saved" sample of historic mortar.

If a proper color match cannot be achieved through the use of natural sand or colored aggregates like crushed marble or brick dust, it may be necessary to use a modern mortar pigment.

During the early stages of the project, it should be determined how closely the new mortar should match the historic mortar. Will "quite close" be sufficient, or is "exactly" expected? The specifications should state this clearly so that the contractor has a reasonable idea how much time and expense will be required to develop an acceptable match.

The same judgment will be necessary in matching replacement terra cotta, stone or brick. If there is a known source for replacements, this should be included in the specifications. If a source cannot be determined prior to the bidding process, the specifications should include an estimated price for the replacement materials with the final price based on the actual cost to the contractor.

Conclusion

A good repointing job is meant to last, at least 30 years, and preferably 50-100 years. Shortcuts and poor craftsmanship result not only in diminishing the historic character of a building, but also in a job that looks bad, and will require future repointing sooner than if the work had been done correctly (Fig. 17). The mortar joint in a historic masonry building has often been called a wall's "first line of defense." Good repointing practices guarantee the long life of the mortar joint, the wall, and the historic structure. Although careful maintenance will help preserve the freshly repointed mortar joints, it is important to remember that mortar joints are intended to be sacrificial and will probably require repointing some time in the future. Nevertheless, if the historic mortar joints proved durable for many years, then careful repointing should have an equally long life, ultimately contributing to the preservation of the entire building.

The Repair of Historic Wooden Windows

John H. Myers

The windows on many historic buildings are an important aspect of the architectural character of those buildings. Their design, craftsmanship, or other qualities may make them worthy of preservation. This is self-evident for ornamental windows, but it can be equally true for warehouses or factories where the windows may be the most dominant visual element of an otherwise plain building (see figure 1). Evaluating the significance of these windows and planning for their repair or replacement can be a complex process involving both objective and subjective considerations. The *Secretary of the Interior's Standards for Rehabilitation*, and the accompanying guidelines, call for respecting the significance of original materials and features, repairing and retaining them wherever possible, and when necessary, replacing them in kind. This **Brief** is based on the issues of significance and repair which are implicit in the standards, but the primary emphasis is on the technical issues of planning for the repair of windows including evaluation of their physical condition, techniques of repair, and design considerations when replacement is necessary.

Figure 1. *Windows are frequently important visual focal points, especially on simple facades such as this mill building. Replacement of the multi-pane windows here with larger panes could dramatically change the appearance of the building. The areas of missing windows convey the impression of such a change. Photo: John T. Lowe*

Much of the technical section presents repair techniques as an instructional guide for the do-it-yourselfer. The information will be useful, however, for the architect, contractor, or developer on large-scale projects. It presents a methodology for approaching the evaluation and repair of existing windows, and considerations for replacement, from which the professional can develop alternatives and specify appropriate materials and procedures.

Architectural or Historical Significance

Evaluating the architectural or historical significance of windows is the first step in planning for window treatments, and a general understanding of the function and history of windows is vital to making a proper evaluation. As a part of this evaluation, one must consider four basic window functions: admitting light to the interior spaces, providing fresh air and ventilation to the interior, providing a visual link to the outside world, and enhancing the appearance of a building. No single factor can be disregarded when planning window treatments; for example, attempting to conserve energy by closing up or reducing the size of window openings may result in the use of *more* energy by increasing electric lighting loads and decreasing passive solar heat gains.

Historically, the first windows in early American houses were casement windows; that is, they were hinged at the side and opened outward. In the beginning of the eighteenth century single- and double-hung windows were introduced. Subsequently many styles of these vertical sliding sash windows have come to be associated with specific building periods or architectural styles, and this is an important consideration in determining the significance of windows, especially on a local or regional basis. Site-specific, regionally oriented architectural comparisons should be made to determine the significance of windows in question. Although such comparisons may focus on specific window types and their details, the ultimate determination of significance should be made within the context of the whole building, wherein the windows are one architectural element (see figure 2).

After all of the factors have been evaluated, *windows should be considered significant to a building if they:* 1) are original, 2) reflect the original design intent for the building, 3) reflect period or regional styles or building practices, 4) reflect changes to the building resulting from major periods or events, or 5) are examples of exceptional craftsmanship or design. Once this evaluation of significance has been completed, it is possible to pro-

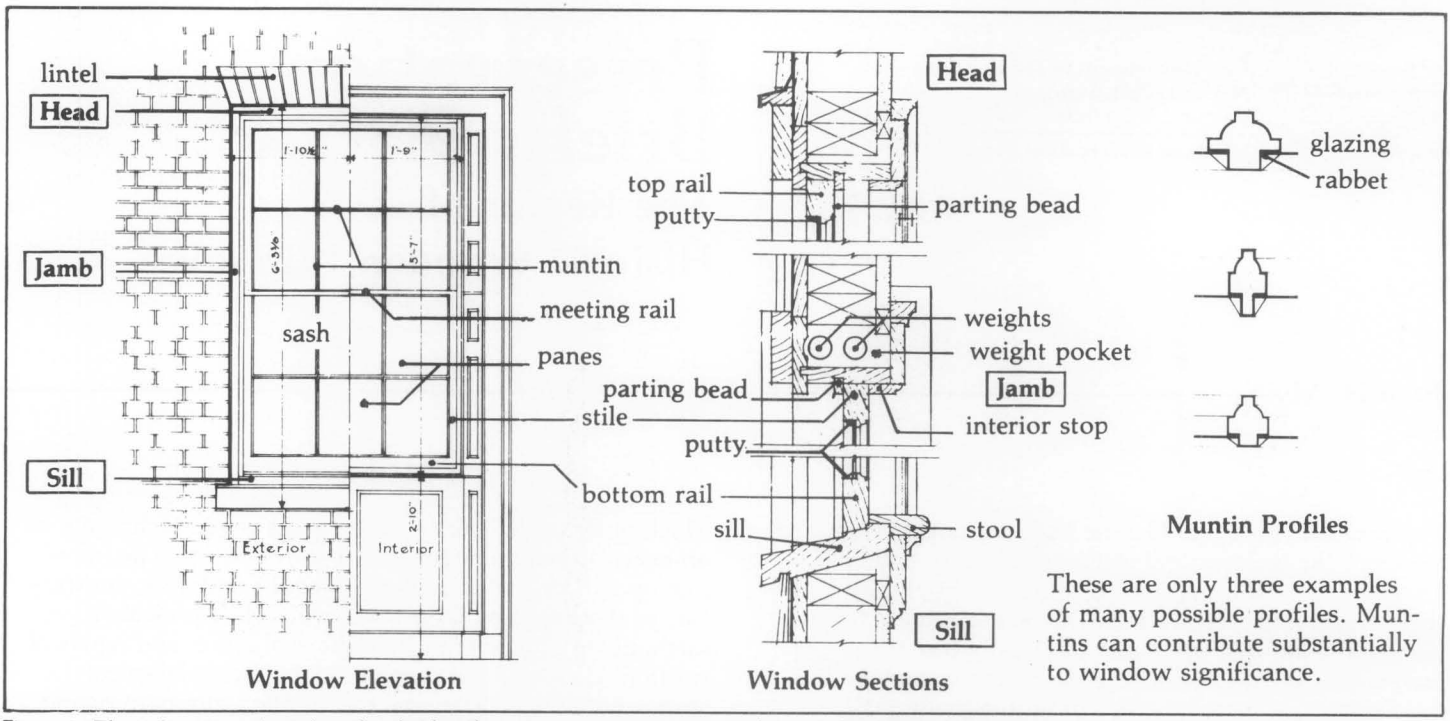

Figure 2. *These drawings of window details identify major components, terminology, and installation details for a wooden double-hung window.*

ceed with planning appropriate treatments, beginning with an investigation of the physical condition of the windows.

Physical Evaluation

The key to successful planning for window treatments is a careful evaluation of existing physical conditions on a unit-by-unit basis. A graphic or photographic system may be devised to record existing conditions and illustrate the scope of any necessary repairs. Another effective tool is a window schedule which lists all of the parts of each window unit. Spaces by each part allow notes on existing conditions and repair instructions. When such a schedule is completed, it indicates the precise tasks to be performed in the repair of each unit and becomes a part of the specifications. In any evaluation, one should note at a minimum, 1) window location, 2) condition of the paint, 3) condition of the frame and sill, 4) condition of the sash (rails, stiles and muntins), 5) glazing problems, 6) hardware, and 7) the overall condition of the window (excellent, fair, poor, and so forth).

Many factors such as poor design, moisture, vandalism, insect attack, and lack of maintenance can contribute to window deterioration, but moisture is the primary contributing factor in wooden window decay. All window units should be inspected to see if water is entering around the edges of the frame and, if so, the joints or seams should be caulked to eliminate this danger. The glazing putty should be checked for cracked, loose, or missing sections which allow water to saturate the wood, especially at the joints. The back putty on the interior side of the pane should also be inspected, because it creates a seal which prevents condensation from running down into the joinery. The sill should be examined to insure that it slopes downward away from the building and allows water to drain off. In addition, it may be advisable to cut a dripline along the underside of the sill. This almost invisible treatment will insure proper water run-off, particularly if the bottom of the sill is flat. Any conditions, including poor original design, which permit water to come in contact with the wood or to puddle on the sill must be corrected as they contribute to deterioration of the window.

One clue to the location of areas of excessive moisture is the condition of the paint; therefore, each window should be examined for areas of paint failure. Since excessive moisture is detrimental to the paint bond, areas of paint blistering, cracking, flaking, and peeling usually identify points of water penetration, moisture saturation, and potential deterioration. Failure of the paint should not, however, be mistakenly interpreted as a sign that the wood is in poor condition and hence, irreparable. Wood is frequently in sound physical condition beneath unsightly paint. After noting areas of paint failure, the next step is to inspect the condition of the wood, particularly at the points identified during the paint examination.

Each window should be examined for operational soundness beginning with the lower portions of the frame and sash. Exterior rainwater and interior condensation can flow downward along the window, entering and collecting at points where the flow is blocked. The sill, joints between the sill and jamb, corners of the bottom rails and muntin joints are typical points where water collects and deterioration begins (see figure 3). The operation of the window (continuous opening and closing over the years and seasonal temperature changes) weakens the joints, causing movement and slight separation. This process makes the joints more vulnerable to water which is readily absorbed into the end-grain of the wood. If severe deterioration exists in these areas, it will usually be apparent on visual inspection, but other less severely deteriorated areas of the wood may be tested by two traditional methods using a small ice pick.

An ice pick or an awl may be used to test wood for soundness. The technique is simply to jab the pick into a wetted wood surface at an angle and pry up a small sec-

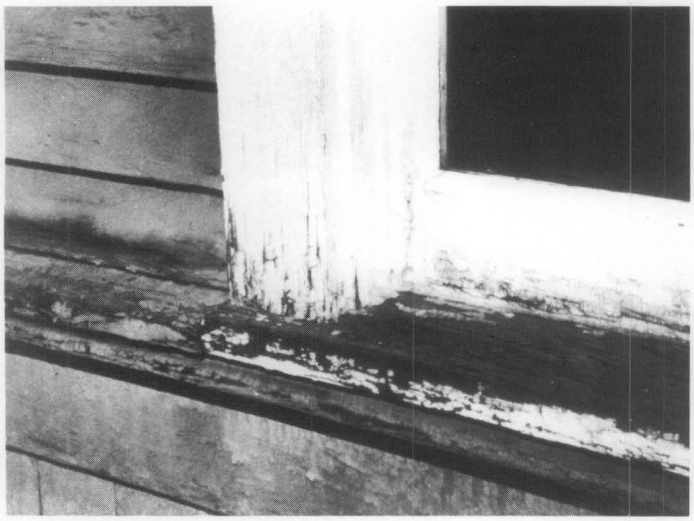

Figure 3. *Deterioration of poorly maintained windows usually begins on horizontal surfaces and at joints where water can collect and saturate the wood. The problem areas are clearly indicated by paint failure due to moisture. Photo: Baird M. Smith, AIA*

tion of the wood. Sound wood will separate in long fibrous splinters, but decayed wood will lift up in short irregular pieces due to the breakdown of fiber strength.

Another method of testing for soundness consists of pushing a sharp object into the wood, perpendicular to the surface. If deterioration has begun from the hidden side of a member and the core is badly decayed, the visible surface may appear to be sound wood. Pressure on the probe can force it through an apparently sound skin to penetrate deeply into decayed wood. This technique is especially useful for checking sills where visual access to the underside is restricted.

Following the inspection and analysis of the results, the scope of the necessary repairs will be evident and a plan for the rehabilitation can be formulated. Generally the actions necessary to return a window to "like new" condition will fall into three broad categories: 1) routine maintenance procedures, 2) structural stabilization, and 3) parts replacement. These categories will be discussed in the following sections and will be referred to respectively as Repair Class I, Repair Class II, and Repair Class III. Each successive repair class represents an increasing level of difficulty, expense, and work time. Note that most of the points mentioned in Repair Class I are routine maintenance items and should be provided in a regular maintenance program for any building. The neglect of these routine items can contribute to many common window problems.

Before undertaking any of the repairs mentioned in the following sections all sources of moisture penetration should be identified and eliminated, and all existing decay fungi destroyed in order to arrest the deterioration process. Many commercially available fungicides and wood preservatives are toxic, so it is extremely important to follow the manufacturer's recommendations for application, and store all chemical materials away from children and animals. After fungicidal and preservative treatment the windows may be stabilized, retained, and restored with every expectation for a long service life.

Repair Class I: Routine Maintenance

Repairs to wooden windows are usually labor intensive and relatively uncomplicated. On small scale projects this allows the do-it-yourselfer to save money by repairing all or part of the windows. On larger projects it presents the opportunity for time and money which might otherwise be spent on the removal and replacement of existing windows, to be spent on repairs, subsequently saving all or part of the material cost of new window units. Regardless of the actual costs, or who performs the work, the evaluation process described earlier will provide the knowledge from which to specify an appropriate work program, establish the work element priorities, and identify the level of skill needed by the labor force.

The routine maintenance required to upgrade a window to "like new" condition normally includes the following steps: 1) some degree of interior and exterior paint removal, 2) removal and repair of sash (including reglazing where necessary), 3) repairs to the frame, 4) weatherstripping and reinstallation of the sash, and 5) repainting. These operations are illustrated for a typical double-hung wooden window (see figures 4a-f), but they may be adapted to other window types and styles as applicable.

Historic windows have usually acquired many layers of paint over time. Removal of excess layers or peeling and flaking paint will facilitate operation of the window and restore the clarity of the original detailing. Some degree of paint removal is also necessary as a first step in the proper surface preparation for subsequent refinishing (if paint color analysis is desired, it should be conducted prior to the onset of the paint removal). There are several safe and effective techniques for removing paint from wood, depending on the amount of paint to be removed. Several techniques such as scraping, chemical stripping, and the use of a hot air gun are discussed in "Preservation Briefs: 10 Paint Removal from Historic Woodwork" (see Additional Reading section at end).

Paint removal should begin on the interior frames, being careful to remove the paint from the interior stop and the parting bead, particularly along the seam where these stops meet the jamb. This can be accomplished by running a utility knife along the length of the seam, breaking the paint bond. It will then be much easier to remove the stop, the parting bead and the sash. The interior stop may be initially loosened from the sash side to avoid visible scarring of the wood and then gradually pried loose using a pair of putty knives, working up and down the stop in small increments (see figure 4b). With the stop removed, the lower or interior sash may be withdrawn. The sash cords should be detached from the sides of the sash and their ends may be pinned with a nail or tied in a knot to prevent them from falling into the weight pocket.

Removal of the upper sash on double-hung units is similar but the parting bead which holds it in place is set into a groove in the center of the stile and is thinner and more delicate than the interior stop. After removing any paint along the seam, the parting bead should be carefully pried out and worked free in the same manner as the interior stop. The upper sash can be removed in the same manner as the lower one and both sash taken to a convenient work area (in order to remove the sash the interior stop and parting bead need only be removed from one side of the window). Window openings can be covered with polyethylene sheets or plywood sheathing while the sash are out for repair.

The sash can be stripped of paint using appropriate techniques, but if any heat treatment is used (see figure 4c), the glass should be removed or protected from the sudden temperature change which can cause breakage. An

Figure 4a. *The following series of photographs of the repair of a historic double-hung window use a unit which is structurally sound but has many layers of paint, some cracked and missing putty, slight separation at the joints, broken sash cords, and one cracked pane. Photo: John H. Myers*

Figure 4b. *After removing paint from the seam between the interior stop and the jamb, the stop can be pried out and gradually worked loose using a pair of putty knives as shown. To avoid visible scarring of the wood, the sash can be raised and the stop pried loose initially from the outer side. Photo: John H. Myers*

Figure 4c. *Sash can be removed and repaired in a convenient work area. Paint is being removed from this sash with a hot air gun while an asbestos sheet protects the glass from sudden temperature change. Photo: John H. Myers*

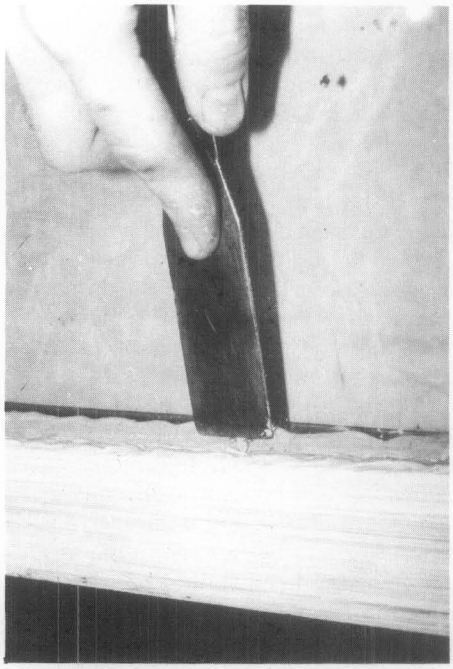

Figure 4d. *Reglazing or replacement of the putty requires that the existing putty be removed manually, the glazing points be extracted, the glass removed, and the back putty scraped out. To reglaze, a bed of putty is laid around the perimeter of the rabbet, the pane is pressed into place, glazing points are inserted to hold the pane (shown), and a final seal of putty is beveled around the edge of the glass. Photo: John H. Myers*

Figure 4e. *A common repair is the replacement of broken sash cords with new cords (shown) or with chains. The weight pocket is often accessible through a removable plate in the jamb, or by removing the interior trim. Photo: John H. Myers*

Figure 4f. *Following the relatively simple repairs, the window is weathertight, like new in appearance, and serviceable for many years to come. Both the historic material and the detailing and craftsmanship of this original window have been preserved. Photo: John H. Myers*

overlay of aluminum foil on gypsum board or asbestos can protect the glass from such rapid temperature change. It is important to protect the glass because it may be historic and often adds character to the window. Deteriorated putty should be removed manually, taking care not to damage the wood along the rabbet. If the glass is to be removed, the glazing points which hold the glass in place can be extracted and the panes numbered and removed for cleaning and reuse in the same openings. With the glass panes out, the remaining putty can be removed and the sash can be sanded, patched, and primed with a preservative primer. Hardened putty in the rabbets may be softened by heating with a soldering iron at the point of removal. Putty remaining on the glass may be softened by soaking the panes in linseed oil, and then removed with less risk of breaking the glass. Before reinstalling the glass, a bead of glazing compound or linseed oil putty should be laid around the rabbet to cushion and seal the glass. Glazing compound should only be used on wood which has been brushed with linseed oil and primed with an oil based primer or paint. The pane is then pressed into place and the glazing points are pushed into the wood around the perimeter of the pane (see figure 4d). The final glazing compound or putty is applied and beveled to complete the seal. The sash can be refinished as desired on the inside and painted on the outside as soon as a "skin" has formed on the putty, usually in 2 or 3 days. Exterior paint should cover the beveled glazing compound or putty and lap over onto the glass slightly to complete a weathertight seal. After the proper curing times have elapsed for paint and putty, the sash will be ready for reinstallation.

While the sash are out of the frame, the condition of the wood in the jamb and sill can be evaluated. Repair and refinishing of the frame may proceed concurrently with repairs to the sash, taking advantage of the curing times for the paints and putty used on the sash. One of the most common work items is the replacement of the sash cords with new rope cords or with chains (see figure 4e). The weight pocket is frequently accessible through a door on the face of the frame near the sill, but if no door exists, the trim on the interior face may be removed for access. Sash weights may be increased for easier window operation by elderly or handicapped persons. Additional repairs to the frame and sash may include consolidation or replacement of deteriorated wood. Techniques for these repairs are discussed in the following sections.

The operations just discussed summarize the efforts necessary to restore a window with minor deterioration to "like new" condition (see figure 4f). The techniques can be applied by an unskilled person with minimal training and experience. To demonstrate the practicality of this approach, and photograph it, a Technical Preservation Services staff member repaired a wooden double-hung, two over two window which had been in service over ninety years. The wood was structurally sound but the window had one broken pane, many layers of paint, broken sash cords and inadequate, worn-out weatherstripping. The staff member found that the frame could be stripped of paint and the sash removed quite easily. Paint, putty and glass removal required about one hour for each sash, and the reglazing of both sash was accomplished in about one hour. Weatherstripping of the sash and frame, replacement of the sash cords and reinstallation of the sash, parting bead, and stop required an hour and a half. These times refer only to individual operations; the entire process took several days due to the drying and curing times for putty, primer, and paint, however, work on other window units could have been in progress during these lag times.

Repair Class II: Stabilization

The preceding description of a window repair job focused on a unit which was operationally sound. Many windows will show some additional degree of physical deterioration, especially in the vulnerable areas mentioned earlier, but even badly damaged windows can be repaired using simple processes. Partially decayed wood can be waterproofed, patched, built-up, or consolidated and then painted to achieve a sound condition, good appearance, and greatly extended life. Three techniques for repairing partially decayed or weathered wood are discussed in this section, and all three can be accomplished using products available at most hardware stores.

One established technique for repairing wood which is split, checked or shows signs of rot, is to: 1) dry the wood, 2) treat decayed areas with a fungicide, 3) waterproof with two or three applications of boiled linseed oil (applications every 24 hours), 4) fill cracks and holes with putty, and 5) after a "skin" forms on the putty, paint the surface. Care should be taken with the use of fungicide which is toxic. Follow the manufacturers' directions and use only on areas which will be painted. When using any technique of building up or patching a flat surface, the finished surface should be sloped slightly to carry water away from the window and not allow it to puddle. Caulking of the joints between the sill and the jamb will help reduce further water penetration.

When sills or other members exhibit surface weathering they may also be built-up using wood putties or homemade mixtures such as sawdust and resorcinol glue, or whiting and varnish. These mixtures can be built up in successive layers, then sanded, primed, and painted. The same caution about proper slope for flat surfaces applies to this technique.

Wood may also be strengthened and stabilized by consolidation, using semi-rigid epoxies which saturate the porous decayed wood and then harden. The surface of the consolidated wood can then be filled with a semi-rigid epoxy patching compound, sanded and painted (see figure 5). Epoxy patching compounds can be used to build up

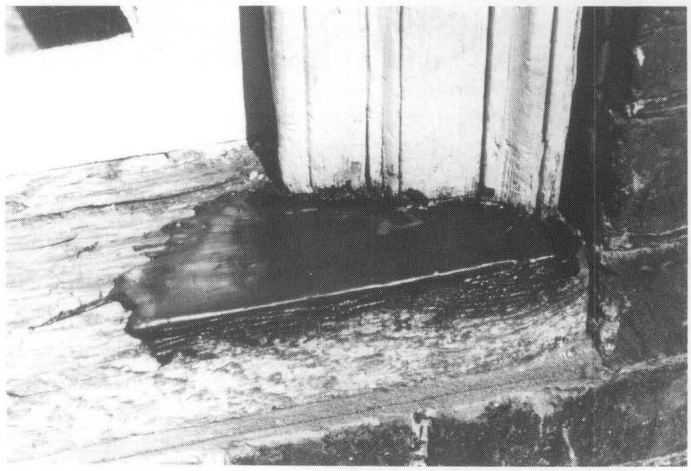

Figure 5. *This illustrates a two-part epoxy patching compound used to fill the surface of a weathered sill and rebuild the missing edge. When the epoxy cures, it can be sanded smooth and painted to achieve a durable and waterproof repair. Photo: John H. Myers*

missing sections or decayed ends of members. Profiles can be duplicated using hand molds, which are created by pressing a ball of patching compound over a sound section of the profile which has been rubbed with butcher's wax. This can be a very efficient technique where there are many typical repairs to be done. Technical Preservation Services has published *Epoxies for Wood Repairs in Historic Buildings* (see Additional Reading section at end), which discusses the theory and techniques of epoxy repairs. The process has been widely used and proven in marine applications; and proprietary products are available at hardware and marine supply stores. Although epoxy materials may be comparatively expensive, they hold the promise of being among the most durable and long lasting materials available for wood repair.

Any of the three techniques discussed can stabilize and restore the appearance of the window unit. There are times, however, when the degree of deterioration is so advanced that stabilization is impractical, and the only way to retain some of the original fabric is to replace damaged parts.

Repair Class III: Splices and Parts Replacement

When parts of the frame or sash are so badly deteriorated that they cannot be stabilized there are methods which permit the retention of some of the existing or original fabric. These methods involve replacing the deteriorated parts with new matching pieces, or splicing new wood into existing members. The techniques require more skill and are more expensive than any of the previously discussed alternatives. It is necessary to remove the sash and/or the affected parts of the frame and have a carpenter or woodworking mill reproduce the damaged or missing parts. Most millwork firms can duplicate parts, such as muntins, bottom rails, or sills, which can then be incorporated into the existing window, but it may be necessary to shop around because there are several factors controlling the practicality of this approach. Some woodworking mills do not like to repair old sash because nails or other foreign objects in the sash can damage expensive knives (which cost far more than their profits on small repair jobs); others do not have cutting knives to duplicate muntin profiles. Some firms prefer to concentrate on larger jobs with more profit potential, and some may not have a craftsman who can duplicate the parts. A little searching should locate a firm which will do the job, and at a reasonable price. If such a firm does not exist locally, there are firms which undertake this kind of repair and ship nationwide. It is possible, however, for the advanced do-it-yourselfer or craftsman with a table saw to duplicate moulding profiles using techniques discussed by Gordie Whittington in "Simplified Methods for Reproducing Wood Mouldings," *Bulletin* of the Association for Preservation Technology, Vol. III, No. 4, 1971, or illustrated more recently in *The Old House*, Time-Life Books, Alexandria, Virginia, 1979.

The repairs discussed in this section involve window frames which may be in very deteriorated condition, possibly requiring removal; therefore, caution is in order. The actual construction of wooden window frames and sash is not complicated. Pegged mortise and tenon units can be disassembled easily, *if* the units are out of the building. The installation or connection of some frames to the surrounding structure, especially masonry walls, can complicate the work immeasurably, and may even require dismantling of the wall. It may be useful, therefore, to take the following approach to frame repair: 1) conduct regular maintenance of sound frames to achieve the longest life possible, 2) make necessary repairs in place wherever possible, using stabilization and splicing techniques, and 3) if removal is necessary, thoroughly investigate the structural detailing and seek appropriate professional consultation.

Another alternative may be considered if parts replacement is required, and that is sash replacement. If extensive replacement of parts is necessary and the job becomes prohibitively expensive it may be more practical to purchase new sash which can be installed into the existing frames. Such sash are available as exact custom reproductions, reasonable facsimiles (custom windows with similar profiles), and contemporary wooden sash which are similar in appearance. There are companies which still manufacture high quality wooden sash which would duplicate most historic sash. A few calls to local building suppliers may provide a source of appropriate replacement sash, but if not, check with local historical associations, the state historic preservation office, or preservation related magazines and supply catalogs for information.

If a rehabilitation project has a large number of windows such as a commercial building or an industrial complex, there may be less of a problem arriving at a solution. Once the evaluation of the windows is completed and the scope of the work is known, there may be a potential economy of scale. Woodworking mills may be interested in the work from a large project; new sash in volume may be considerably less expensive per unit; crews can be assembled and trained on site to perform all of the window repairs; and a few extensive repairs can be absorbed (without undue burden) into the total budget for a large number of sound windows. While it may be expensive for the average historic home owner to pay seventy dollars or more for a mill to grind a custom knife to duplicate four or five bad muntins, that cost becomes negligible on large commercial projects which may have several hundred windows.

Most windows should not require the extensive repairs discussed in this section. The ones which do are usually in buildings which have been abandoned for long periods or have totally lacked maintenance for years. It is necessary to thoroughly investigate the alternatives for windows which do require extensive repairs to arrive at a solution which retains historic significance and is also economically feasible. Even for projects requiring repairs identified in this section, if the percentage of parts replacement per window is low, or the number of windows requiring repair is small, repair can still be a cost effective solution.

Weatherization

A window which is repaired should be made as energy efficient as possible by the use of appropriate weatherstripping to reduce air infiltration. A wide variety of products are available to assist in this task. Felt may be fastened to the top, bottom, and meeting rails, but may have the disadvantage of absorbing and holding moisture, particularly at the bottom rail. Rolled vinyl strips may also be tacked into place in appropriate locations to reduce infiltration. Metal strips or new plastic spring strips may be used on the rails and, if space permits, in

the channels between the sash and jamb. Weatherstripping is a historic treatment, but old weatherstripping (felt) is not likely to perform very satisfactorily. Appropriate contemporary weatherstripping should be considered an integral part of the repair process for windows. The use of sash locks installed on the meeting rail will insure that the sash are kept tightly closed so that the weatherstripping will function more effectively to reduce infiltration. Although such locks will not always be historically accurate, they will usually be viewed as an acceptable contemporary modification in the interest of improved thermal performance.

Many styles of storm windows are available to improve the thermal performance of existing windows. The use of exterior storm windows should be investigated whenever feasible because they are thermally efficient, cost-effective, reversible, and allow the retention of original windows (see "Preservation Briefs: 3"). Storm window frames may be made of wood, aluminum, vinyl, or plastic; however, the use of unfinished aluminum storms should be avoided. The visual impact of storms may be minimized by selecting colors which match existing trim color. Arched top storms are available for windows with special shapes. Although interior storm windows appear to offer an attractive option for achieving double glazing with minimal visual impact, the potential for damaging condensation problems must be addressed. Moisture which becomes trapped between the layers of glazing can condense on the colder, outer prime window, potentially leading to deterioration. The correct approach to using interior storms is to create a seal on the interior storm while allowing some ventilation around the prime window. In actual practice, the creation of such a durable, airtight seal is difficult.

Window Replacement

Although the retention of original or existing windows is always desirable and this **Brief** is intended to encourage that goal, there is a point when the condition of a window may clearly indicate replacement. The decision process for selecting replacement windows should *not* begin with a survey of contemporary window products which are available as replacements, but should begin with a look at the windows which are being replaced. Attempt to understand the contribution of the window(s) to the appearance of the facade including: 1) the pattern of the openings and their size; 2) proportions of the frame and sash; 3) configuration of window panes; 4) muntin profiles; 5) type of wood; 6) paint color; 7) characteristics of the glass; and 8) associated details such as arched tops, hoods, or other decorative elements. Develop an understanding of how the window reflects the period, style, or regional characteristics of the building, or represents technological development.

Armed with an awareness of the significance of the existing window, begin to search for a replacement which retains as much of the character of the historic window as possible. There are many sources of suitable new windows. Continue looking until an acceptable replacement can be found. Check building supply firms, local woodworking mills, carpenters, preservation oriented magazines, or catalogs or suppliers of old building materials, for product information. Local historical associations and state historic preservation offices may be good sources of information on products which have been used successfully in preservation projects.

Consider energy efficiency as one of the factors for replacements, but do not let it dominate the issue. Energy conservation is no excuse for the wholesale destruction of historic windows which can be made thermally efficient by historically and aesthetically acceptable means. In fact, a historic wooden window with a high quality storm window added should thermally outperform a new double-glazed metal window which does not have thermal breaks (insulation between the inner and outer frames intended to break the path of heat flow). This occurs because the wood has far better insulating value than the metal, and in addition many historic windows have high ratios of wood to glass, thus reducing the area of highest heat transfer. One measure of heat transfer is the U-value, the number of Btu's per hour transferred through a square foot of material. When comparing thermal performance, the lower the U-value the better the performance. According to *ASHRAE 1977 Fundamentals*, the U-values for single glazed wooden windows range from 0.88 to 0.99. The addition of a storm window should reduce these figures to a range of 0.44 to 0.49. A non-thermal break, double-glazed metal window has a U-value of about 0.6.

Conclusion

Technical Preservation Services recommends the retention and repair of original windows whenever possible. We believe that the repair and weatherization of existing wooden windows is more practical than most people realize, and that many windows are unfortunately replaced because of a lack of awareness of techniques for evaluation, repair, and weatherization. Wooden windows which are repaired and properly maintained will have greatly extended service lives while contributing to the historic character of the building. Thus, an important element of a building's significance will have been preserved for the future.

re: Paleontological resources for the Alhambra Community Center Project (D202300738.00)

Dear Fatima:

I have conducted a thorough search of our paleontology collection records for the locality and specimen data for proposed development at the Alhambra Community Center project area as outlined on the portion of the Los Angeles USGS topographic quadrangle map that you sent to me via e-mail on December 12, 2023. We do not have any fossil localities that lie directly within the proposed project area, but we do have fossil localities nearby from the same sedimentary deposits that may occur in the proposed project area, either at the surface or at depth.

The following table shows the closest known localities in the collection of the Natural History Museum of Los Angeles County (NHMLA).

Locality Number	Location	Formation	Taxa	Depth
LACM VP 1031	Emery Park Hill, SE of the train station at the intersection of Huntington & Main Sts; Alhambra	Modelo Formation (soft punky diatomaceous shale)	Great pipefish (*Syngnathus avus*); *Ellima elmodenae*; herring (*Clupea hadleyi*)	Unknown
LACM VP 1027	Valley Blvd. at Highbury St.; Los Angeles	Modelo Formation (diatomite)	Herring (*Xyne*)	Unknown
LACM VP 3363	W of Monterey Pass Road in Coyote Pass; E of the Long Beach Freeway & S of the N boundary of Section 32; Monterey Park	Unknown Formation (Pleistocene; sand and silt)	Horse (*Equus*)	Unknown
LACM VP 1023	Workman & Alhambra Sts	Unknown Formation (Pleistocene)	sabertooth cat (*Smilodon*), horse (*Equus*), deer (*Odocoileus*), Turkey (*Meleagris*)	Unknown (excavations for storm drains)
LACM VP 2032	Los Angeles Brickyard Mission Rd. & Daly St.	Unknown Formation (Pleistocene, silt & clay)	Mastodon (*Mammut*)	20-35 ft bgs

VP, Vertebrate Paleontology; IP, Invertebrate Paleontology; bgs, below ground surface

This records search covers only the records of the NHMLA. It is not intended as a paleontological assessment of the project area for the purposes of CEQA or NEPA. Potentially fossil-bearing units are present in the project area, either at the surface or in the subsurface. As such, NHMLA recommends that a full paleontological assessment of the project area be conducted by a paleontologist meeting Bureau of Land Management or Society of Vertebrate Paleontology standards.

Sincerely,

Alyssa Bell, Ph.D.
Natural History Museum of Los Angeles County

City of Alhambra

Gateway to the San Gabriel Valley

111 South First Street Alhambra California 91801

February 14, 2024

Charles Alvarez, Chairperson
Gabrielino-Tongva Tribe
23454 Vanowen Street
West Hills, CA 91307
Email: Chavez1956metro@gmail.com

Subject: **Alhambra Community Center Project**
Assembly Bill 52, Request for Consultation on Tribal Cultural Resources

Dear Chairperson Alvarez,

The City of Alhambra (City) is contacting you in compliance with the California Assembly Bill (AB) 52 (including the California Public Resources Code Section 21080.3.1) for the Alhambra Community Center Project (Project). Pursuant to the California Environmental Quality Act Review (CEQA), the City will serve as the Lead Agency for the environmental review of the Project. Please find below a description of the Project and the name of our Project point of contact. Figures showing the Project's location are attached. Also attached is a Sacred Lands File search through the Native American Heritage Commission, as requested by the City, that yielded negative results.

Project Description

The City proposes to develop the Project located at 612 W. Shorb Street within the City's limits. The Project Site is currently improved with an existing one- and two-story abandoned brick medical clinic building sited on the northern portion of the Project Site with associated surface parking found in the southern portion for the Project Site. The Project intends to demolish the existing building and develop a new partial two-story community center building.

Pursuant to California Public Resources Code Section 21080.3, you have 30 days from the receipt of this letter to request in writing, consultation with the City. Should the Gabrielino-Tongva Tribe request consultation, the City will begin the consultation process within 30 days of receiving your request.

To request consultation under AB 52 for the Project, please submit your request, in writing to:

Mike Macias
Director of Parks and Recreation
City of Alhambra
Parks & Recreation Department
111 South First Street
Alhambra, CA 91801
Email: mmacias@cityofalhambra.org

We understand that consultation is a private and ongoing process; we would appreciate any input the Gabrielino-Tongva Tribe may have on the Project.

Very Respectfully,

Mike Macias
Director of Parks and Recreation

Assembly Bill 52, Request for Consultation on Tribal Cultural Resources

Dear Chairperson Redner,

The City of Alhambra (City) is contacting you in compliance with the California Assembly Bill (AB) 52 (including the California Public Resources Code Section 21080.3.1) for the Alhambra Community Center Project (Project). Pursuant to the California Environmental Quality Act Review (CEQA), the City will serve as the Lead Agency for the environmental review of the Project. Please find below a description of the Project and the name of our Project point of contact. Figures showing the Project's location are attached. Also attached is a Sacred Lands File search through the Native American Heritage Commission, as requested by the City, that yielded negative results.

Project Description

The City proposes to develop the Project located at 612 W. Shorb Street within the City's limits. The Project Site is currently improved with an existing one- and two-story abandoned brick medical clinic building sited on the northern portion of the Project Site with associated surface parking found in the southern portion for the Project Site. The Project intends to demolish the existing building and develop a new partial two-story community center building.

Pursuant to California Public Resources Code Section 21080.3, you have 30 days from the receipt of this letter to request in writing, consultation with the City. Should the Santa Rosa Band of Cahuilla Indians request consultation, the City will begin the consultation process within 30 days of receiving your request.

To request consultation under AB 52 for the Project, please submit your request, in writing to:

Mike Macias
Director of Parks and Recreation
City of Alhambra
Parks & Recreation Department
111 South First Street
Alhambra, CA 91801
Email: mmacias@cityofalhambra.org

We understand that consultation is a private and ongoing process; we would appreciate any input the Gabrielino/Tongva Nation may have on the Project.

Very Respectfully,

Mike Macias
Director of Parks and Recreation

Re: Alhambra Community Center Project, Los Angeles County

Dear Ms. Clark:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

GABRIELENO BAND OF MISSION INDIANS - KIZH NATION
Historically known as The Gabrielino Tribal Council - San Gabriel Band of Mission Indians
recognized by the State of California as the aboriginal tribe of the Los Angeles basin

February 23,2024

Project Name: Alhambra Community Center Project, City of Alhambra

Dear Mike Macias,

Thank you for your letter dated February 14, 2024 regarding AB52 consultation. The above proposed project location is within our Ancestral Tribal Territory; therefore, our Tribal Government requests to schedule a consultation with you as the lead agency, to discuss the project and the surrounding location in further detail.

Please contact us at your earliest convenience. ***Please Note:AB 52, "consultation" shall have the same meaning as provided in SB 18 (Govt. Code Section 65352.4).***

Thank you for your time,

Andrew Salas, Chairman
Gabrieleno Band of Mission Indians – Kizh Nation
