13 APPENDIX 13-1

1 EXECUTIVE SUMMARY

ADR Environmental Group, Inc. (ADR) was retained by Rexford Industrial Realty, L.P. to perform a Phase I Environmental Site Assessment (ESA) for the site located at 14820 and 14830 South Carmenita Road and 13555 East Excelsior Drive in Norwalk, California (subject Property). At the time of the site inspection, the subject Property consisted of four contiguous irregular-shaped parcels of land totaling approximately 12 acres that are developed with three single-story light industrial buildings. The buildings total approximately 198,000 square feet. The subject Property is occupied by WAI Global and Valeo, both distributors of auto parts located at 14820 South Carmenita Road (Suites A & B, respectively); Bridgestone Tire, a tire distribution and refurbishment facility at 14830 South Carmenita Road; and Rabsio RV Storage, a RV/bus/automobile storage facility at 13555 East Excelsior Drive. The remaining portions of the subject Property consist of asphalt- and concrete-paved parking areas and drives, concrete walkways and landscaped areas. The subject Property appeared to be in good condition and well maintained. Vehicle access onto the subject Property is provided by two drives off South Carmenita Road to the west and one drive off East Excelsior Drive to the south. The subject Property is located in an industrial and commercial of Norwalk.

This ESA was performed in conformance with the scope and limitations of ASTM International (ASTM) Standard Practice E 1527-13 and the scope of services identified in the July 30, 2014 Master Environmental Consulting Services Agreement (MSA) between Rexford Industrial Realty, L.P. and ADR. This ESA has identified no evidence of *recognized environmental conditions* as defined by ASTM in connection with the subject Property, with the exception of:

- In July 2012 a *Limited Subsurface Investigation Report* was prepared by Bureau Veritas North America, Inc. (BV) for the subject Property. The investigation was conducted to investigate the lengthy use, storage and/or generation of hazardous materials, hazardous waste and petroleum products associated with petroleum distillate- or chlorinated hydrocarbon-based solvent parts washers, paint booths, outdoor spray painting, powder coating, a clarifier, concrete floor patches (possible former in-ground drainage and/or hydraulic equipment), a long concrete-lined trench covered with steel plates, and a former fuel UST reportedly removed in 1982 with no apparent investigation. The investigation also addressed the lack of methyl-tert butyl ether (MTBE) analytical data associated with the former onsite 10,000-gasoline UST, the presence of fill of unknown origin and historical onsite agricultural use; and, the potential for onsite migration of petroleum and/or chlorinated solvents from up-gradient facilities. Concentrations of petroleum constituents or volatile organic compounds (VOCs) were not detected in the analyzed soil samples. In addition, organochlorine pesticides were not detected in the four soil samples analyzed for these compounds and the metals detected in the soil samples appear to be representative of background conditions. Benzene was detected in groundwater at concentrations of 66 and 145 micrograms per liter (µg/L) in borings BV-10 and BV-11, respectively, and MTBE was detected at a concentration of 9.2 µg/L in BV-1. Only the detected benzene concentrations exceed the groundwater Maximum Contaminant Levels (MCLs). Based on the location of borings BV-1, BV-10 and BV-11 on the up-gradient margins of the subject Property, it appears that the groundwater detections were associated with reported up-gradient releases of petroleum hydrocarbons from adjoining or nearby properties. PCE was detected in three soil vapor samples (BV-3, BV-6 and BV-7) collected from the former paint booth area at 14830 South Carmenita Road (BV-3) and the former auto

repair garage area of 13555 East Excelsior Drive (BV-6 and BV-7). The PCE concentrations do not exceed current regulatory guidelines. Toluene was also detected in two soil vapor samples collected from 14830 Carmenita (BV-2 and BV-3), but at concentrations well below the current regulatory guidelines. Based on these findings, BV concluded that the potential vapor intrusion risk for PCE appears to be *de minimis*. Although the origin of the PCE in soil vapor beneath the subject Property is unclear, BV concluded that additional investigation or evaluation did not appear warranted. ADR generally agrees with the conclusions of the investigation based on the work performed by BV, however it is ADR's opinion that insufficient investigation was performed at two areas of the subject Property, the clarifier and the long concrete-lined trench covered with steel plates (one soil sample near each feature and no soil vapor sampling). Clarifiers and trenches can be a source of environmental impact due to cracks in the bodies and/or at piping connections caused by settling or improper installation. The limited sampling, to go along with the detection of PCE from an unknown source in soil vapor samples collected at other portions of the site is a concern as is the factor that the soil sample in the vicinity of the clarifier was collected at 4.5-5 feet below surface, which is potentially not below the bottom of the clarifier. As a result, ADR concludes these features represent an environmental concern to the subject Property. ADR recommends additional investigation related to the potential environmental impacts of these features.

In addition, the following *historic recognized environmental condition* was identified:

- In September 1993, one 10,000-gallon gasoline underground storage tank (UST); one 10,000-gallon diesel UST; and associated dispenser and piping were removed from the southeast corner of 13555 Excelsior Drive portion the subject Property. These USTs were installed at the facility in late-1981/early 1982. The USTs were removed under the supervision of the Los Angeles County Department of Public Works (LACDPW). Soil samples collected identified petroleum constituents under the west end of the diesel UST. As a result, additional samples were collected in the vicinity of identified impacts to a depth of approximately 18 feet below ground surface (bgs). The analytical analysis confirmed the petroleum constituents were below detection limits. The soil in the area of the impacted samples was over-excavated and removed from property. Based on the results and over-excavation activities conducted in the tank-hold of the former USTs, it was determined that additional investigation did not appear warranted. On January 13, 1994 the LACDPW issued a letter indicating no further action was required. Based on the findings presented in the report reviewed and the regulatory status, no further action is warranted with respect to these former subject Property USTs.

Lastly, the following non-ASTM scope environmental concerns were identified:

- At the time of the site inspection, the following suspect asbestos-containing building materials were observed on the subject Property: gypsum drywall tape joint compound and texture, vinyl floor tile, sheet vinyl, spray-on ceiling texture, and roofing materials. No significant damage to these materials was observed. Asbestos sampling should be performed to investigate suspect asbestos-containing. In addition, ADR recommends a written Asbestos Operations and Maintenance program be implemented to manage any known or suspect ACMs in place.

2 INTRODUCTION

2.1 Purpose

The purpose of this ESA is to identify recognized environmental conditions in connection with the subject Property. The term *recognized environmental conditions*, as defined in *ASTM Standard Practice for Environmental Assessments: Phase I Environmental Site Assessment Process (*ASTM Standard Practice E 1527-13) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions. In addition, this ESA will identify *historical recognized environmental conditions, controlled recognized environmental conditions* and *business environmental risks.* A *historical recognized environmental condition* is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. A *controlled recognized environmental condition* is defined as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. A *business environmental risk* is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate but is not considered a *recognized environmental condition.*

This ESA was performed in a manner that complies with the Scope and Limitations of the ASTM Standard Practice E 1527-13, and ADR's contractual obligations to the Client, identified in the Master Environmental Consulting Services Agreement (MSA) dated July 30, 2014.

The procedure for this ESA was to perform in practical and reasonable steps an investigation to ascertain the possibility, presence, or absence of recognized environmental conditions as delineated by the Scope of Work. This was accomplished by employing currently available technology, existing regulations, and generally acceptable engineering practices.

2.2 Significant Assumptions

The following assumptions are made by ADR in this report. ADR relied on information derived from secondary sources including government agencies, the client, designated representatives of the client, property contacts, property owner, property owner's representatives, computer databases, and/or personal interviews. Although ADR has evaluated the thoroughness and reliability of the provided information (consistent with the requirements of 40 CFR 312.20(f)(2)), ADR can neither warrant nor guarantee the thoroughness and reliability of information derived from secondary sources including the government agencies, the client, designated representatives of the client, property contacts,

property owner, property owner's representatives, computer databases, and/or personal interviews. Groundwater flow and depth to groundwater, unless otherwise specified by on-property well data or off-site subsurface investigation, are assumed based on contours depicted on the United States Geological Survey topographic maps. ADR assumes the subject Property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and/or property owner's representative.

2.3 Limitations and Exceptions

The findings and conclusions contain all of the limitations inherent in the methodologies referred to in ASTM Standard Practice E 1527-13 that are intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property. Other specific limitations and exceptions (also known as Data Gaps) to the ESA are more specifically set forth below:

- None

2.4 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard Practice E 1527-13 and the *MSA* document. ADR warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

2.5 Environmental Assessment Report Special Terms and Conditions

This ESA was performed in accordance with the Scope of Services set forth in the contract document. No other warranty or guarantee, expressed or implied, is made or offered.

The conclusions and recommendations (if applicable) stated in this ESA are based upon observations made by employees of ADR and also upon information obtained by ADR. While reasonable attempts have been made to verify this information, we cannot guarantee its accuracy.

The observations contained within this ESA are based upon site conditions readily visible and present at the time of our site inspection. These site observations are unable to specifically address conditions of subsurface soil, groundwater, or underground storage tanks, if applicable, unless specifically mentioned.

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the master services agreement between Rexford Industrial Realty, L.P. and ADR (the "MSA), the MSA shall control.

2.6 User Reliance

The enclosed ESA has been performed for the exclusive use of Rexford Industrial Realty, L.P., and/or its subsidiaries, as their interest may appear, for the transaction at issue concerning the subject Property located at 14820 and 14830 South Carmenita Road and 13555 East Excelsior Drive in Norwalk, California.

2.7 General Information

Mr. Mark Harvey, CEO with Sydney Development Corp. (owner) and familiar with the subject Property since 1992, was identified as the "Key Site Manager." The Key Site Manager is that person having the most reliable knowledge as to the previous uses and current conditions of the subject Property, and in a position to provide reasonably accurate information for the Environmental Site Assessment Questionnaire (Questionnaire). Mr. Harvey completed the Questionnaire subsequent to the ADR site inspection. A copy of the completed Questionnaire is included in the appendix.

Mr. Richard McCondichie, Environmental Assessor with ADR, conducted the on-site inspection on May 4, 2017. Mr. Eric Raby with Rexford Industrial Realty, L.P., and others accompanied the ADR Assessor during the site visit. Weather conditions for the site inspections consisted of clear skies with temperatures in the 70s.

The following individuals were interviewed to obtain information relevant to the historical development and/or issues associated with possible recognized environmental conditions associated with the subject Property.

Name	Title or Position/Employer
Mr. Eric Raby	Senior Associate/Rexford Industrial Realty, L.P.
Mr. Glenn Castillo	Regional Records Coordinator/Department of Toxic Substances Control
Ms. Laura Gallardo	Associate Analyst/Regional Water Quality Control Board-Los Angeles Region
Ms. Fong Phan	Los Angeles County Public Health Investigations
Ms. Maria Allen	Public Records Coordinator/Southern California Air Quality Management District
Mr. Ali Haiphan	Environmental Programs/Los Angeles County Department of Public Works

3 USER PROVIDED INFORMATION

Mr. Patrick Schlehuber, Director of Acquisitions with Rexford Industrial Realty, L.P., was identified as the best candidate to complete the User Questionnaire. The User Questionnaire consists of inquiries as to specific knowledge regarding the purchase of a site as specified by ASTM Standard Practice E 1527-13. This knowledge consists of environmental liens against the subject Property, purchase price, limitations at a site, and spills. A copy of this Questionnaire is included in the appendix.

3.1 Title Records

A copy of an April 26, 2017 "Preliminary Report" prepared by Chicago Title Insurance Company was provided to ADR. A review of this document did not identify any environmental issues. A copy of this document is included in the appendix.

3.2 Environmental Liens or Activity and Use Limitations (AUL)

Mr. Schlehuber is unaware of any environmental liens or AULs such as engineering controls, land use restrictions, or institutional controls associated with the subject Property.

3.3 Specialized Knowledge

Mr. Schlehuber has no specialized knowledge of the operations associated with the subject Property.

3.4 Commonly Known or Reasonably Ascertainable Information

Mr. Schlehuber is unaware of any commonly known or reasonably ascertainable information of any environmental issues associated with the subject Property.

3.5 Valuation Reduction for Environmental Issues

Mr. Schlehuber indicated that the price to be paid for the subject Property is based on fair market value and its value was not reduced due to environmental issues.

3.6 Owner, Property Manager, and Occupant Information

The following information regarding the Owner, Property Manager and Occupants was provided by the User and Key Site Manager.

Property Owner:	Sydney Development Corp.
Property Manager:	Not identified
Occupants:	Refer to section 4.5

3.7 Reason for Performing ESA

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard Practice E-1527-13) in connection with the subject Property. This ESA was also performed to permit the

User to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard Practice E-1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property"* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35) (B).

ADR understands that the findings of this study will be used by Rexford Industrial Realty, L.P., to evaluate a pending financial transaction in connection with the subject Property.

4 GENERAL SITE CHARACTERISTICS

4.1 Location and Legal Description

The subject Property is located at the following addresses: 14820 and 14830 South Carmenita Road and 13555 East Excelsior Drive in Norwalk, California and its location is shown on maps included in the appendix of this ESA. In addition, an aerial site plan of the subject Property is included in the appendix.

For further geographic reference, the subject Property is located to the east of South Carmenita Road approximately 300 feet north of the intersection of South Carmenita Road and East Excelsior Drive as identified on the Los Angeles County Assessor's Parcel Map. A copy of this map is included in the appendix of this ESA.

Legal Description:

A copy of the legal description is contained in the appendix.

4.2 Site and Vicinity Characteristics

At the time of the site visit, the area immediately surrounding the subject Property was occupied by industrial and commercial properties. No gas stations, dry cleaners, major manufacturing or heavy industrial facilities were located in the immediate vicinity of the site. No pits, ponds, lagoons, or wetlands were observed on the subject Property or in the general vicinity.

4.3 Site Description and Current Site Uses/Operations

At the time of the site inspection, the subject Property consisted of four contiguous irregular-shaped parcels of land totaling approximately 12 acres that are developed with three single-story light industrial buildings. The buildings total approximately 198,000 square feet. The subject Property is occupied by WAI Global and Valeo, both distributors of auto parts located at 14820 South Carmenita Road (Suites A & B, respectively); Bridgestone Tire, a tire distribution and refurbishment facility at 14830 South Carmenita Road; and Rabsio RV Storage, a RV/bus/automobile storage facility at 13555 East Excelsior Drive. The remaining portions of the subject Property consist of asphalt- and concrete-paved parking areas and drives, concrete walkways and landscaped areas. The subject Property appeared to be in good condition and well maintained. Vehicle access onto the subject Property is provided by two drives off South Carmenita Road to the west and one drive off East Excelsior Drive to the south.

4.3.1 Surface Characteristics

The subject Property consists of approximately 99 percent relatively impermeable surfaces including the buildings and the asphalt- and concrete-paved areas. The remaining portion of the subject Property's surface consists of landscaped areas. No significant surface staining was observed on the subject Property during the site inspection. The overall topography of the subject Property appears to gently slope to the south.

4.3.2 Structure Construction

The exterior walls of the buildings are concrete tilt-up panels set on concrete footings with concrete slab-on-grade floors. The buildings have flat roofs that are covered with built-up roofing. The warehouse areas are unfinished with the exception of framed demising walls covered with gypsum board. Ceilings are suspended acoustic ceiling tile and finished gypsum wallboard. Floor coverings consist of carpet, vinyl floor tile, porcelain tile and/or sheet vinyl. Fluorescent fixtures provide lighting in the finished areas and in the warehouse areas.

4.3.3 Interior Configuration

The three subject Property buildings consist of four tenant spaces. Each space consists of warehouse areas, offices, break rooms and restrooms.

4.3.4 Potable Water Supply, Sewer, and Other Utilities

At the time of the site inspection, the City of Norwalk provided the subject Property sewer service and potable water. During the course of the on-site inspection, no evidence of active or abandoned water supply wells was observed. No septic systems were observed on the subject Property. Southern California Edison provided electricity, and Southern California Gas provided natural gas to the subject Property.

Since the subject Property is serviced by a municipally operated, public water system, it is regulated by the Safe Drinking Water Act of 1974. This Act requires that public water supplies be tested for the presence of various metals, microbiological bacteria and organic chemicals. Information supplied by the City of Norwalk states that the water quality delivered to the subject Property complies with applicable regulatory requirements and the water is routinely tested.

4.4 Environmental Liens

A specific search for environmental liens and activity and use limitations was not included in the scope of work for this ESA. However, based on information obtained from the Key Site Manager, User and the Environmental Data Resources (EDR) Radius Map Report, no evidence of environmental liens recorded against the subject Property was found. In addition, according to the EDR-provided information for the subject Property, no evidence of institutional controls, land use restrictions and/or engineering control requirements recorded against the subject Property were reported.

4.5 Current Site Uses

According to the City of Norwalk Planning Department, the subject Property is zoned for heavy manufacturing usage (M2). At the time of the site inspection, the subject Property was occupied by WAI Global and Valeo, both distributors of auto parts located at 14820 South Carmenita Road (Suites A & B, respectively); Bridgestone Tire, a tire distribution and refurbishment facility at 14830 South Carmenita Road; and Rabsio RV Storage, a RV/bus/automobile storage facility at 13555 East Excelsior Drive.

4.6 Physical Setting Sources

The subject Property's physical location was researched employing the current United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad Map) section relevant to the subject Property. The Quad Map has an approximate scale of 1 inch to 2,000 feet, and shows physical features such as wetlands, water bodies, roadways, mines, and buildings. A portion of this map showing the subject Property is included in the appendix of this ESA.

The Whittier, CA Quad Map (photorevised 1981) shows the following features: the subject Property is developed with two large structures located on the eastern portion of the property; the south adjoining property is developed with several medium-sized structures; the easternmost south adjoining property is developed with a medium-sized structure; the east adjoining property is developed with several various-sized structures; South Carmenita Road is identified as a heavy-duty road adjoining to the west of the subject Property; East Excelsior Drive is identified as a light-duty road adjoining to the south of the subject Property; the Santa Ana Freeway (Highway 5) is located approximately 650 feet to the southwest of the subject Property; La Canada Verde Creek is approximately 1,200 feet northeast of the subject Property; and the present-day roadway system is identified. There are no mines, wetlands, pipelines or other environmentally sensitive features present in the general vicinity of the subject Property. The elevation of the subject Property is approximately 79 feet above mean sea level with a gentle topographic gradient to the south.

4.6.1 Soil Conditions

A July 23, 2012, *Limited Subsurface Investigation Report*, prepared by Bureau Veritas North America, Inc. (BV) at the subject Property, indicated soil types generally consisting of uniform, unconsolidated fine grained sand to silty sand and sandy silt to depths of up to 15 feet below ground surface (bgs). An interval of fine to medium sand was encountered at a depth of 8 feet bgs in boring BV-1. A copy of the BV report is contained in the appendix.

4.6.2 Geologic Conditions

According to 1969 California Department of Conservation – Geologic Map of California, Los Angeles Sheet, the property is underlain by Quaternary alluvium. The alluvium deposits consist mainly of unconsolidated stream and river channel deposit of silt, sand, and gravel.

4.6.3 Groundwater Conditions

According to the July 23, 2012, *Limited Subsurface Investigation Report*, prepared by BV at the subject Property, the depth to groundwater was reported to be approximately 35 feet bgs in 2012. In addition, according to the State Water Resources Control Board's *Geotracker* website information related to an investigation at 14960 South Carmenita Road, approximately 300 feet southeast of the subject Property, and last measured on April 2015, groundwater flow direction was determined to flow toward the northeast.

It should be noted that estimated groundwater levels may vary due to fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

5 HISTORICAL USE INFORMATION

From a review of available historical information, it can be concluded that the subject Property was undeveloped or agricultural land from at least 1928 until at least 1963. In 1970, the present-day easternmost building (13555 East Excelsior Drive) was constructed on the subject Property and by 1972, what appeared to be a smaller structure was located on the south-central portion of the subject Property. The western portion of the subject Property remained as undeveloped land. In 1973, the present-day central building (14830 South Carmenita Road) was constructed on the subject Property. The subject Property was utilized as a trailer manufacturing facility. Several truck trailers were stored on the western portion of the subject Property at that time. By 1983, several storage-type structures were located on the western portion of the subject Property and utilized in conjunction with the trailer manufacturing facility. By 2002, the present-day westernmost building (14820 South Carmenita Road) was constructed on the subject Property. From at least 1928 until 1954, the north and west adjoining properties were structurally undeveloped agricultural land and south and east adjoining properties were undeveloped fallow land. By 1963, commercial and light industrial development began to the east and south of the subject Property. An increase in commercial and light industrial development continued in the vicinity of the subject Property and by 1983 all present-day buildings had been developed on the adjoining properties.

5.1 Aerial Photographs

Aerial photographs were reviewed to determine information on past land use patterns of the subject Property. These photographs date back to 1928, and were supplied by EDR Aerial Photography. From this search, the following information was gathered:

1928: The subject Property appears to be undeveloped or agricultural land. The north adjoining property is structurally undeveloped agricultural land. Undeveloped land is observed to the east of the subject Property. Undeveloped land followed by rural residential is observed to the south of the subject Property. What appear to be rural residences and agricultural land on the west adjoining property. South Carmenita Road adjoins the subject Property to the west and East Excelsior Drive adjoins the subject Property to the south.

1938: The subject Property and the adjoining and neighboring properties are similar to their appearances in the 1928 aerial photograph.

1952: The subject Property and the adjoining and neighboring properties are similar to their appearances in the 1938 aerial photograph with the exception that there is more structural development in the general area.

1954: The subject Property and the adjoining and neighboring properties are similar to their appearances in the 1952 aerial photograph.

1963: The subject Property and the adjoining properties to the north, east and west are similar to their appearances in the 1954 aerial photograph with the exception that there appears to be commercial/light industrial development further east of the subject Property. Several commercial and light industrial properties are observed on the south adjoining properties. South Carmenita Road and East Excelsior Drive appear to have been widened.

1972: The subject Property is developed with the easternmost building (13555 East Excelsior Drive) observed during the site inspection, along with what appear to be several truck trailers. Additionally, what appears to be a smaller structure is observed on the south-central portion of the subject Property. The adjoining properties to the north, south and west are similar to their appearances in the 1963 aerial photograph with the exception that there is an increase in the commercial and light industrial development to the south of the subject Property, including what appear to be gasoline service stations on the northeast and northwest corners of East Excelsior Drive and South Carmenita Road. What appear to be the current light industrial/commercial structures are observed adjoining to the east of the subject Property.

1977: The subject Property is developed with the central building (14830 South Carmenita Road) and easternmost building (13555 East Excelsior Drive) observed during the site inspection, along with what appear to be several truck trailers. The adjoining and neighboring properties are similar to their appearances in the 1972 aerial photograph. There is moderately more structural development in the general area.

1983: The subject Property and the adjoining properties to the east, south and west are similar to their appearances in the 1977 aerial photograph, with the exception of what appears to be four out-buildings located on the central portion and two structures (possibly storage buildings) located along the western boundary of the subject Property. The north adjoining property appears to be developed with the current commercial and light industrial structures observed during the site inspection.

1989: The subject Property and the adjoining and neighboring properties are similar to their appearances in the 1983 aerial photograph with the exception that the western portion of the subject Property appears to have been developed with two new structures.

1994: The subject Property and the adjoining and neighboring properties are similar to their appearances in the 1989 aerial photograph.

2002: The subject Property is developed with the three warehouse structures observed during the site inspection. No additional structures are observed on the subject Property. The adjoining properties to the north, east and south are similar to their appearances in the 1994 aerial photograph. What appears to be the current commercial structure is observed adjoining to the west of the subject Property. The gasoline service station is no longer visible on the northwest corner of South Carmenita Road and East Excelsior Drive.

2005: The subject Property and the adjoining and neighboring properties are similar to their appearances in the 2002 photograph.

2009: The subject Property and the adjoining and neighboring properties are similar to their appearances in the 2005 photograph, with the exception of what appears to be several trucks or RVs observed around the easternmost building on the subject Property.

2010: The subject Property and the adjoining and neighboring properties are similar to their appearances in the 2009 photograph.

2012: The subject Property and the adjoining and neighboring properties are similar to their appearances in the 2010 photograph, with the exception of the absence of the gasoline service station on the northeast corner of South Carmenita Road and East Excelsior Drive.

5.2 Building Permits

In an attempt to determine the prior uses and date of initial development of the subject Property, the ADR Assessor reviewed permit information on file with the City of Norwalk Building Department (NBD). From this search, the following pertinent information was obtained:

Date	Permit No.	Issued To	Description
3/26/1970	7160	Howard Sherman	Construct a new 48,000 sq. ft. warehouse manufacturing building at 13555 Excelsior Drive.
5/8/1970	7531	Silvercrest Trailers	Sewer connection at 13555 Excelsior Drive.
11/25/1970	9403	Howard Sherman	Add a 9,130 sq. ft. protective cover for outdoor finishing.
2/2/1982	2742	Pearson Trucking	Install two 10,000-gallon underground storage tanks and pumps at the storage building at 13555 Excelsior Drive.
2/2/1982	2835	Not listed	Tank removal at 13555 Excelsior Drive.
8/16/1993	Illegible	Sydney Development	Pull underground fuel tanks at 13555 Excelsior Drive.
7/29/1998	Illegible	Norm Reeves	Smog dyno installation for auto repair at 13555 Excelsior Drive.
8/15/1994	Illegible	Sydney Development	Install one 1,500 gallon clarifier at 13555 Excelsior Drive.
9/18/1974	0202	Silvercrest	Construct a new 48,000 sq. ft. warehouse manufacturing building at 14830 Carmenita Road.
2/5/1974	1526	Silvercrest	Interior footings for future 2nd story office at 14830 Carmenita Road.
6/25/1973	1596	Silvercrest Trailers	Sewer connection at 14830 Carmenita Road.
8/6/1973	2249	Silvercrest	New 2nd story partitions at 14830 Carmenita Road.
2/5/1974	2276	Silvercrest Trailer Mfg.	Install one spray booth at 14830 Carmenita Road.
2/21/1974	4663	Silvercrest	Foundation for existing craneway at 14830 Carmenita Road.
7/11/1986	2276	Custom Crating	Install one 499 gallon LPG tank at 14830 Carmenita Road.
8/7/2000	Illegible	Sydney Development	New warehouse & distribution center at 14820 Carmenita Road.
8/11/2000	Illegible	Sydney Development	Sewer connection at 14820 Carmenita Road.
10/24/2001	Illegible	Sydney Development	11,400 sq. ft. T.I.: office, showroom & lunchroom at 14820 Carmenita Road.

In addition to the above listed permits, electrical and plumbing permits were reviewed; however, these permits did not contain information regarding potential environmental impacts to the subject Property. Copies of the permits obtained from the NBD are included in the appendix of this ESA.

5.3 Fire Insurance Information

The ADR Assessor attempted to review Sanborn Maps for the area of the subject Property. Sanborn Maps are detailed drawings that show the location and use of structures on a given property during specific years. These maps were originally utilized by insurance companies to assess fire risk, but are now utilized as a valuable source of historical and environmental risk information. However, no Sanborn Maps were available that covered the subject Property. A copy of the "Certified Sanborn Map Report" provided by EDR indicating that the subject Property is an "unmapped property" is included in the appendix.

5.4 City Street Directories

To determine the prior uses and occupants of the subject Property, the ADR Assessor reviewed city directory information provided by EDR which is compiled in *The EDR-City Directory Abstract*. City street directories list property occupants by address, allowing an historical search of tenants on the subject Property and neighboring properties. Selected directories from the years between 1971 and 2013 (in approximate 5-year intervals) were researched and identified the following information:

Address	Year	Listing
13555 East Excelsior Drive (subject Property)	1971 – 1980	Address not listed
	1985 – 1992	Pearson Trucking
	1995	Address not listed
	1999	Hamers Incorporated
	2003	Occupant Unknown
	2008	Address not listed
	2013	Rabsio Storage
14820 South Carmenita Road (subject Property)	1971–1999	Address not listed
	2003	Hunt Fuji
	2008 – 2013	Goodmark Industries
14830 South Carmenita Road (subject Property)	1971	Address not listed
	1975 – 1981	Silvercrest Industries
	1985	Western Piping
	1992	Johnson Controls
	1995	Custom Crating
	1999	Partlow & Putnam Incorporated
	2003	Commercial Tire Network, LLC
	2008	BFS Retail & Commercial Operations/GCR Tire Center
	2013	GCR Tire Center
14840 South Carmenita Road (Historic subject Property address)	1971 – 1981	Address not listed
	1985 - 1995	Progressive Shoring Systems
	1999	Progressive Shoring Inc. and SGB Construction Services Inc.
	2003 - 2013	Address not listed
14850 South Carmenita Road (Historic subject Property address)	1971 – 1981	Address not listed
	1985 - 1999	Cal Western RV Sales & Service
	2003 - 2013	Address not listed

A copy of *The EDR-City Directory Abstract* is contained in the appendix.

5.5 Interviews

According to Mr. Mark Harvey, CEO of Sydney Development Corp. (owner) and familiar with the subject Property since 1992, the subject Property structures were constructed in 1970 and 2001. Mr. Harvey indicated that the subject Property has been occupied by various tenants including an auto parts distributor, photo developing facility, vehicle storage, tire distribution and warehousing. Mr. Harvey is unaware of adverse environmental conditions

associated with the subject Property. Mr. Harvey stated that there are previous environmental surveys that have been conducted at the subject Property.

5.6 Assessors Tax Records

To determine the prior uses of the subject Property, the ADR Assessor reviewed available records from the Los Angeles County Assessor's Office (LACAO) website. Tax assessment records typically identify adjustments in property tax, which possibly indicate property development, or contain records of building permits or other useful information regarding a property. According to LACAO records, the subject Property totals 12.01± acres and is developed with a 104,136 square foot building constructed in 2001, a 41,880 square foot structure constructed in 1973, a 48,000 square foot structure constructed in 1970, and 130,000 square foot of structure (likely the four additional former structures) constructed in 1970. Copies of the Parcel Detail print-out for the subject Property obtained from the LACAO website are included in the appendix.

5.7 Recorded Land Title Records

Recorded land titles are records usually maintained by the municipal clerk or county recorder of deeds which detail ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against the subject Property in the local jurisdiction having control for or reporting responsibility to the subject Property. Due to state land trust regulations and laws, land title records will often only provide trust names, bank trust numbers, owner's names, or easement holders, and not information concerning previous uses or occupants of the subject Property. For these reasons, this ESA has relied upon other standard historical information sources assumed to be either more accurate or informative than recorded land titles.

6 INFORMATION FROM SITE RECONNAISSANCE AND INTERVIEWS

6.1 Hazardous Materials Handling and Storage

At the time of the site inspection, several 55-gallon containers of packing foam and old engine parts were observed in the warehouse area of the WAI Global space (Suite A - 14820 Carmenita Road). No staining or leaks were observed in the vicinity of these materials at the time of the site investigation. Additionally, several 55-gallon drums of tire paint (water-based) were observed in the tire storage yard at the Bridgestone Tire facility (14830 Carmenita Road). No staining or leaks were observed in the vicinity of these materials. However, these drums were not located within secondary containment. Although these materials are not considered hazardous, they should be stored within secondary containment.

In addition, small amounts of routine cleaning and office supplies including toner for printers were observed in various areas at the subject Property. These materials are utilized and/or stored in *de minimis* quantities unlikely to environmentally impact the subject Property. At the time of the site inspection, the subject Property appeared relatively free of significant staining or evidence of poor material handling procedures.

6.2 Wastestream Processing and Disposal

No improper wastestream processing or disposal practices were observed on the subject Property. No unidentified suspect containers that might be used for the storage or disposal of hazardous materials or regulated substances were observed. No signs of improper material disposal were observed at the subject Property.

6.3 Wastewater and Stormwater Discharges

Interior wastewater at the site is limited to effluent from the restroom fixtures and floor drains, and fixtures in the break room at the subject Property. This wastewater flows into the municipal sanitary sewer system. At the time of the site visit, no spills or staining were observed in the restroom areas. In addition, no floor drains were observed in the structure. No signs of improper material disposal were observed at the subject Property.

One 1,500-gallon three stage clarifier was observed under the canopy area located to the southwest of the 13555 East Excelsior Drive building. The clarifier is utilized to clarify the runoff from the car-washing activities conducted on-site prior to discharge to the sanitary sewer. Reportedly, an off-site contractor services the clarifier on an as-needed basis. A domestic sewage disposal station was also observed adjacent to the building. The domestic sewage generated from the RVs and buses on-site are emptied into the sewage disposal station. The sewage disposal system is connected to the domestic sewer line on the subject Property.

Additionally, during the site inspection, several exterior surface drains were observed throughout the subject Property. The concrete pavement where these drains are located was designed to direct surface water run-off into the drains. These drains were inspected and appeared to be in good visible condition, with no staining observed around their perimeter or interior.

6.4 Local/State Waste Disposal Compliance

At the time of the site visit, the subject Property appeared to comply with local and state waste disposal regulations.

6.5 Storage Tanks

6.5.1 Aboveground Storage Tanks (ASTs)

One approximately 499-gallon metal AST containing propane was observed adjacent to the north of the Bridgestone Tire warehouse. No staining or other evidence of improper materials handling was observed in the area where this AST is stored. No other ASTs or evidence of past ASTs was observed on the subject Property at the time of the site inspection.

6.5.2 Underground Storage Tanks (USTs)

No visual or physical evidence of a UST was discovered during the site investigation. In particular, the Assessor looked for fill caps, vent pipes, fuel oil lines, and concrete pads. In addition, the ADR Assessor contacted the Los Angeles County Department of Public Works (LACDPW) and the Regional Water Quality Control Board (RWQCB-Los Angeles Region) in an effort to determine if USTs have been reported at the subject Property address. The RWQCB had no UST records for the subject Property and the LACDPW had no records for current USTs. However, according to the LACDPW records, two 10,000-gallon gasoline USTs were removed from the subject Property near the Rabsio RV Storage building (13555 East Excelsior Drive) under the oversight of the LACDPW in September 1993. Refer to the LACDPW subsection of Section 8.1.3 for additional information.

6.6 Indications of Polychlorinated Biphenyls (PCBs)

6.6.1 PCB-Containing Exterior Electrical Transformers

At the time of the site inspection, several pad-mounted transformers were observed on the subject Property. These transformers appeared to be in good condition, showing no signs of damage or past leakage, and are owned by SCE, the provider of electrical power to the subject Property. Based on the age of construction of the structures on the subject Property (pre-1978), these transformers may contain PCBs. Historically, SCE has assumed responsibility for the cleanup of contamination that has arisen from a leak or release of the dielectric fluid from their equipment.

6.6.2 PCB-Containing Fluorescent Light Fixture Ballasts

Fluorescent light fixtures were observed on the subject Property. Based upon the age of the structures observed on the subject Property (pre-1978), it is possible that the ballasts inside the light fixtures contained PCBs. If these ballasts were found to be leaking, require replacement, or are subject to disposal, it would be prudent to identify their chemical content.

6.6.3 PCB-Containing Interior Capacitors, Equipment, or Electrical Transformers

During the on-site inspection, no evidence was observed of items that could possibly contain PCB-contaminated fluid.

6.7 Solid Waste Disposal

At the time of the inspection, several municipal waste dumpsters were observed at the subject Property. The dumpsters were roll-off units constructed of metal. According to stenciling on these units, CR&R owns and services the dumpsters.

At the time of the site inspection, the waste dumpsters were filled with municipal trash and/or recyclable materials, and appeared to comply with local and state solid waste disposal regulations. The waste dumpsters appeared to be in good condition with no obvious signs of spills or improper disposal. At the time of the inspection, an inspection of the ground surface around the units was conducted to search for evidence of chemical or liquid waste staining or improper disposal; however, none was observed.

6.8 Other Conditions of Potential Concern

6.8.1 Suspect Asbestos-Containing Building Materials (ACMs) Observations

At the time of the site inspection, the following suspect asbestos-containing building materials were observed on the subject Property: gypsum drywall tape joint compound and texture, vinyl floor tile, sheet vinyl, spray-on ceiling texture, and roofing materials. No significant damage to these materials was observed. Asbestos sampling should be performed to investigate suspect asbestos-containing materials. In addition, ADR recommends a written Asbestos Operations and Maintenance program be implemented to manage any known or suspect ACMs in place.

6.8.2 Lead Based Paint

Based upon the age of the buildings observed on the subject Property (pre-1978), it is possible that painted building surfaces contain lead-based paint. No peeling, chipping, flaking or other failure or damage to these materials was observed during the site inspection. Pursuant to federal and state regulations, all suspect lead-based paint should either be presumed to contain lead or adequate rebuttal sampling should be conducted prior to renovation, including maintenance, or demolition if these activities will cause a disturbance of any suspect lead-based paint or otherwise create a lead hazard.

6.8.3 Air Quality: Indoor and Visible Emissions

No unusual smells, noxious odors, or visual emissions were observed during the inspection of the subject Property.

6.8.4 Radon

According to the USEPA, the county in which the site is located has a Radon Zone Level of 2, which has a predicted average indoor screening level of between 2.0 picocuries per liter (pCi/L) and 4.0 pCi/L. This level is below the EPA response level of 4.0 pCi/L. The

subject Property exhibited an unlikely potential for radon contamination based upon the geological characteristics of the area and subject building construction (concrete slab-on-grade floor).

6.8.5 Limited Mold Evaluation

During on-site observations, a limited mold evaluation was conducted to identify mold growth in the building on the subject Property. This evaluation concentrated on the identification of readily visible mold growth and areas of water intrusion that may present optimal conditions for mold growth. No areas of significant water intrusion were observed in the office or warehouse areas. Based on these observations no suspect mold growth was observed in the structures on the subject Property.

6.8.6 Railroad Right-of-Way

No railroad right-of-way, spurs, or other railroad-related features were observed or identified on the subject Property during the site inspection.

6.8.7 Underground Pipelines

No indicators or evidence of underground petroleum pipelines were observed on the subject Property during the site inspection.

6.8.8 Wetlands

Wetlands are lands where saturation with water is the dominant factor determining the nature of soil development and the types of plants and animal communities living in the soil and on its surface. Wetlands can be further defined through classification according to the length of time that an area is inundated or saturated by water, and the type of plants and animals an area supports. There are five major wetland classifications: marine, estuarine, lacustrine, riverine, and palustrine. Marine and estuarine wetlands are associated with the ocean and include coastal wetlands, such as tidal marshes. Lacustrine wetlands are associated with lakes, while riverine wetlands are found along rivers and streams. Palustrine wetlands may be isolated or connected wet areas and include marshes, swamps, vernal pools, and bogs. At the time of the site inspection, no visual or physical indicators of wetlands were observed on the subject Property.

7 CURRENT USES OF ADJOINING PROPERTIES

For the scope of this ESA, properties are defined and categorized based upon their physical proximity to the subject Property. An adjoining property is any real property whose border is contiguous or partially contiguous with the subject Property or that would be if the properties were not separated by a roadway, street, public thoroughfare, river, or stream. A neighboring property is any real property located within 0.25 mile of the subject Property's border.

7.1 Adjoining and Neighboring Properties - General Description

At the time of the site inspection, the general area surrounding the subject Property was occupied by industrial, commercial and residential properties. The subject Property is bordered by the following:

North: immediately by, from east to west, Carmenita Pumice Industrial Center (13538-13562 Pumice Street), Master Research & Manufacturing, Inc. (13528 Pumice Street), an industrial facility (13518 Pumice Street) that had no signage, Full Factory (13502 Pumice Street), Paradise Printing (13747 Pumice Street), a commercial office building (14714 South Carmenita Road) and further by Pumice Street and additional commercial and light industrial development.

East: immediately by, from north to south, Precision Tube Bending (13626 Talc Street) and a commercial/light industrial building (13615 East Excelsior Drive) that had no signage and further by additional commercial and light industrial development.

South: immediately by, from east to west, Lab/Hunt Packing Systems (13545/13547 Excelsior Drive), SMT Salas Machine Tools (13537 East Excelsior Drive), Top King, Inc. (13531 East Excelsior Drive), a commercial/light industrial building (13457 East Excelsior Drive) that had no signage, Standard Fasteners (13455 Excelsior Drive), Davis Industrial Pipe Supply (13449 East Excelsior Drive), a commercial/light industrial building (13433-13447 East Excelsior Drive) that had no signage and LCDT Kitchen & Bath (14910 Carmenita Road), and further by Excelsior Drive and additional commercial and light industrial development.

West: immediately by Carmenita Road, and further by Lowes Home Improvement (14873 South Carmenita Road).

7.2 Adjoining and Neighboring Properties Materials Storage

No unusual or suspicious materials handling storage practices were observed on the publicly accessible portions of the adjoining and neighboring properties. The remaining adjoining and neighboring properties are unlikely to utilize/store hazardous materials in noteworthy quantities, although the adjoining properties appear to store routine office and cleaning materials in quantities that are unlikely to represent an environmental concern to the subject Property.

Based on cursory observations of materials storage and handling practices and the environmental database review, the current use of the adjoining and neighboring properties are unlikely to represent an environmental concern to the subject Property.

7.3 Adjoining and Neighboring Properties Wastestream Disposal

No unusual or suspicious wastestream disposal activities were observed on the remaining adjoining and neighboring properties. A cursory inspection of the remaining adjoining properties did not reveal any improper disposal practices at the sites.

7.4 Railroad Right-of-Way

At the time of the site inspection, no railroad right-of-way, spurs or other railroad related track or equipment was observed in the vicinity of the subject Property.

8 RECORDS REVIEW

8.1 Standard Environmental Records Sources

ADR states that all databases reviewed as part of this ESA were determined to be sufficiently complete and sufficiently current to serve as the basis for ADR's opinions expressed. The subject Property is listed on the RCRA-SQG (listed twice), HIST UST (listed twice), HAZNET (listed six times), FINDS (listed twice), ECHO (listed twice), CHMIRS, HAULERS and Los Angeles Co. HMS (listed twice) databases provided by EDR. Refer to the respective subsection of Section 8.1.1, 8.1.2 and 8.1.3 for information regarding these listings. A detailed listing and a map showing all sites supplied by EDR are included in the appendix.

8.1.1 Review of Federally Reported Environmental Data

Results of the federal regulatory records search follow. Each section begins with a description of the database searched and the agency that compiles it.

National Priorities List (NPL) of Superfund Sites:

The NPL is the EPA's database of over 1,200 hazardous waste sites currently identified and targeted for priority cleanup action under the Superfund Program. A search of the 2016 National Priorities List identified no Superfund sites within 1.0 mile of the subject Property.

Superfund Enterprise Management System (SEMS):

The SEMS list tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities in support of the EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed SEMS by the EPA in 2016. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 1003 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the NPL and the sites which are in the screening and assessment phase for possible inclusion on the NPL. A search of the 2016 SEMS database identified two (2) sites within the 0.5 mile database search range. It is unlikely that these sites represent an environmental concern to the subject Property due to distance (>100 feet), cross-gradient location with respect to groundwater flow direction and/or regulatory status (no site assessment work needed).

Superfund Enterprise Management Systems Archive (SEMS-Archive):

SEMS-Archive tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS-Archive by the EPA in 2016. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the NPL unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not

necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site. A search of the 2016 SEMS-Archive database identified three (3) sites within the 0.5 mile database search range. It is unlikely that these sites represent an environmental concern to the subject Property due to distance (>1,300 feet), downgradient location with respect to groundwater flow direction and/or regulatory status.

Emergency Response Notification System (ERNS):

The ERNS database is the historical record of all reported releases of oil and other hazardous substances. A search of the 2016 ERNS database did not identify a release on the subject Property.

Resource Conservation and Recovery Act (RCRA) Treatment, Storage and Disposals (TSD) Facilities:

The RCRA program identifies and tracks hazardous waste from generation source to the point of ultimate disposal. The RCRA-TSD facilities database is the composite of reporting facilities that store, transport, treat, or dispose of controlled or hazardous waste. Identification on this list does not indicate that a site has impacted the environment. A search of the 2016 RCRA-TSD facilities database identified one (1) site within the 0.5 mile database search range. It is unlikely that this site represents an environmental concern to the subject Property due to its distance (>1,300 feet), downgradient location with respect to groundwater flow direction and regulatory status.

Resource Conservation and Recovery Act (RCRA) Facilities:

The RCRA program identifies and tracks hazardous waste from generation source to the point of ultimate disposal. The RCRA facilities database is the composite of reporting facilities that generate hazardous waste. Identification on this list does not indicate that a site has impacted the environment. A search of the 2016 RCRA facilities database identified five (5) large quantity generator sites including the east adjoining property (Precision Tube Bending at 13626 Talc Street), twenty-three (23) small quantity generator sites including the subject Property (Fuji Hunt Photograph at 14820 Carmenita Road and Norm Reeves Honda at 13555 Excelsior Drive) and three adjoining properties (Kirkhill TA at 14910 Carmenita Road; Hatch & Kirk at 13474 Pumice Street; and Spaulding LTG, Inc. at 13615 Excelsior Drive), no conditionally exempt small quantity generator sites and one (1) former generator site within the 0.25 mile database search range. According to information provided by EDR, no violations have been reported for the former tenants at the subject Property. Refer to the HAZNET subsection of Section 8.1.2 for additional information regarding waste generated from the subject Property.

Based on their regulatory status (no violations or not listed on a database that indicates a release to the environment), it is unlikely that the adjoining properties represent an environmental concern to the subject Property. It is unlikely that the remaining sites represent an environmental concern to the subject Property due to their distance (>150 feet) from the subject Property, their regulatory status (no violations and/or not identified on a database that indicates an adverse impact to the environment and/or no longer generating hazardous waste) and/or their cross- or down-gradient location with respect to groundwater flow direction.

RCRA Corrective Action (RCRA-CA) Sites:

The RCRA-CA (CORRACTS database) report contains information pertaining to facilities that have conducted, or are currently conducting, corrective actions as regulated by the Resource Conservation and Recovery Act. A search of the 2016 RCRA-CA list identified three (3) sites within the 1.0 mile database search range. It is unlikely that these sites represent an environmental concern to the subject Property due to distance (>1,300 feet), cross-gradient location with respect to groundwater flow direction and/or regulatory status.

Facility Index System (FINDS) Report:

The FINDS Report is a computerized inventory of all facilities that are regulated or tracked by the U.S. Environmental Protection Agency. These facilities are assigned a unique identification number that serves as a cross-reference for databases in the EPA's program system. A search of the 2016 FINDS database identified the subject Property (Fuji Hunt Photograph at 14820 Carmenita Road and Norm Reeves Honda at 13555 Excelsior Drive). The FINDS listing is related to the RCRA listings discussed above. Identification on this database does not indicate that a site has impacted the environment.

Enforcement and Compliance History Information Database (ECHO):

The EPA's ECHO system incorporates data from the Facility Registry Service (FRS) to link records representing data about the same facility across different programmatic database systems. ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide. Identification on this database does not indicate that a site has impacted the environment. A search of the 2016 ECHO database identified the subject Property (Fuji Hunt Photograph at 14820 Carmenita Road and Norm Reeves Honda at 13555 Excelsior Drive). The ECHO listing is related to the RCRA listings discussed above. Identification on this database does not indicate that a site has impacted the environment.

8.1.2 Review of California Reported Environmental Data

Results of the California regulatory records search follow. Each section begins with a description of the database searched and the state agency that compiles it.

Hist CalSites Database:

The Historic CalSites database contains potential or confirmed hazardous substance release properties and includes the former ASPIS (Abandoned Sites Program Information System) database. This database was created since the Department of Toxic Substances and Control (DTSC) no longer updates the CalSites database. A search of the 2005 Hist CalSites database identified one (1) site the within the 1.0 mile database search range. It is unlikely that the off-site facility has environmentally impacted the subject Property due to its distance from the subject Property, regulatory status, and estimated cross-gradient location with respect to groundwater flow.

Response Database (Response):

The Response database identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk sites. A search of the 2016 Response database identified one (1) site within the 1.0 mile database search range. It is unlikely that the off-site facility has environmentally impacted the subject Property due to its distance from the subject Property, regulatory status, and estimated cross-gradient location with respect to groundwater flow.

Envirostor Database:

The DTSC's Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including military facilities, and State Superfund; Voluntary Clean-up sites; and school sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to; identification of formerly contaminated properties that have been released for re-use, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. A search of the 2016 Envirostor Database identified twenty-seven (27) sites including the east adjoining property (Precision Tube Bending at 13626 Talc Street), within the 1.0 mile database search range. It is unlikely that the adjoining facility has environmentally impacted the subject Property due to its regulatory status (no release identified) and estimated downgradient location with respect to groundwater flow.

It is unlikely the remaining sites represent an environmental concern to the subject Property due to their distance (>0.3 mile) from the subject Property, their cross- or down-gradient location with respect to groundwater flow direction and/or their regulatory status (no further action).

California Bond Expenditure Plan (BEP):

The BEP database identifies sites for which a site-specific expenditure plan has been prepared as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. A search of the 1989 BEP database identified no sites within the 1.0 mile database search range.

Leaking Underground Storage Tanks (LUSTs):

The California Water Resources Control Board, in cooperation with the Office of Emergency Services, maintains an inventory of LUSTs in a statewide database. A search of the 2016 LUST database identified thirty (30) reported leaking underground tank sites within the 0.5 mile database search range. One of these sites (Tosco – 76 Station formerly located at 14960 Carmenita Road) is suspected as a potential source of impacted the groundwater at the subject Property. Refer to the Synopsis of Previous Environmental Investigations section in Section 8.2 below for further discussion of the identified impacts to the groundwater at the subject Property.

It is unlikely that the remaining sites represent an environmental concern to the subject Property due to their distance (>500 feet) from the subject Property, regulatory status (case closed), their down- or cross-gradient location with respect to groundwater flow, and/or their regulatory status (case closed).

Cortese Database:

The Cortese list contains hazardous waste and substance sites compiled pursuant to Assembly Bill 3750 (Cortese, Chapter 1048, Statutes of 1986). The information included in this list comes from the State Department of Health Services (public drinking water wells with detectable levels of contamination; hazardous substance sites selected for remedial action; historic Cortese sites; and sites with known toxic material identified through the abandoned site assessment program). This includes the State Water Resources Control Board (sites with known USTs having a reportable release), and the California Waste Management Board (solid waste disposal facilities from which there is a known migration). A search of the 2001 Historic Cortese database and the 2016 Cortese database identified twenty (20) sites including the Tosco – 76 Station formerly located at 14960 Carmenita Road within the 0.5 mile database search range. Refer to the Synopsis of Previous Environmental Investigations section in Section 8.2 below for further discussion of the identified impacts to the groundwater at the subject Property.

It is unlikely that the remaining sites represent an environmental concern to the subject Property due to their distance (>1,200 feet) from the subject Property, their down- or cross-gradient location with respect to groundwater flow, and/or their regulatory status (case closed).

Solid Waste Facilities/Landfill Database (SWF/LF):

Solid Waste Facilities/Landfill Database (SWF/LF) records comprise an inventory of solid waste disposal facilities or landfills. A search of the 2016 SWF/LF database identified one (1) site within the 0.5 mile database search range. It is unlikely that this site represents an environmental concern to the subject Property due to its distance (>300 feet) from the subject Property and its regulatory status (no violations and/or not identified on a database that indicates an adverse impact to the environment).

Solid Waste Assessment Test Database (SWAT):

The SWAT database comprises an inventory of landfills investigated for potential groundwater impacts. A search of the 2000 SWAT database identified one (1) site within the 0.5 mile database search range. It is unlikely that this site represents an environmental concern to the subject Property due to its distance (>2,400 feet) from the subject Property, its down-gradient location with respect to groundwater flow and its regulatory status (no violations and/or not identified on a database that indicates an adverse impact to the environment).

Underground Storage Tanks (USTs):

USTs are regulated under Subtitle I of the RCRA and must be registered with the state of California. These are registered USTs only, and identification on this list

does not indicate that the site has impacted the environment. A search of the 2016 California State Water Resources Control Board (SWRCB), the 1994 California Environmental Protection Agency UST, 1994 SWEEPS UST, and the 1990 SWRCB historical UST databases thirteen (13) sites including the subject Property and the Tosco – 76 Station formerly located at 14960 Carmenita Road within the 0.25 mile database search range. Several of these listings are redundant. Refer to the LACDPW section of section 8.1.3 for discussion of the subject Property. Refer to the Synopsis of Previous Environmental Investigations section in Section 8.2 below for further discussion of the identified impacts to the groundwater at the subject Property.

It is unlikely that the remaining sites represent an environmental concern to the subject Property due to their distance (>500 feet) from the subject Property, their cross- or down-gradient location with respect to groundwater flow direction and/or their regulatory status (UST removed and case closed, or no release reported).

Waste Discharger System (WDS) Report:

The WDS report contains information for all regulated wastewater and hazardous waste discharges to public waterways, groundwater or sewer systems in California. Identification on this list does not necessarily indicate that a site has impacted the environment. A search of the 2007 WDS database did not identify the subject Property.

California Spill, Leaks, Investigations and Cleanups (SLIC) Database:

The California Spill, Leaks, Investigations and Cleanups (SLIC) database contains information for all reported hazardous material/waste surface or groundwater contamination investigations in California. A search of the 2016 SLIC database identified thirteen (13) sites within the 0.5 mile database search range. It is unlikely that these facilities represent an environmental concern to the subject Property due to their distance (>1,000 feet) from the subject Property, their cross-or down-gradient location with respect to groundwater flow, and/or their regulatory status (case closed).

Hazardous Waste Information System:

The DTSC maintains a database of facilities that complete hazardous waste manifests. Inclusion on this list identifies a site as a likely generator of hazardous waste. However, identification on this list does not indicate that a site has impacted the environment. The subject Property is identified six times on the 2015 HAZNET database. ADR also reviewed the DTSC Hazardous Waste Tracking System (HWTS). Information obtained from the DTSC HWTS database is summarized in the table below.

Firm Name	Generator No.	Additional Information
Norm Reeves Honda Superstore 13555 Excelsior Dr.	CAD981684244	The generator number was entered into the HWTS in April 1987 and was inactivated by June 2003. Several waste manifests in the years 1993-2008 covering the disposal of various hazardous wastes including approximately 0.245 tons of unspecified solvent mixture, approximately 20.662 tons of oil/water separation sludge and approximately 0.687 tons of unspecified organic liquid mixture are associated with this generator number.
GE Co Norwalk Tool	CAP400478201	The generator number was entered into the HWTS in May

Firm Name	Generator No.	Additional Information
Facility 13555 Excelsior Dr.		1998 and was inactivated by December 2000. One 1993 waste manifest covering the disposal of approximately 0.97 tons of unspecified solvent mixture and approximately 0.21 tons of polymeric resin waste is associated with this generator number.
Recon Dynamics 13555 Excelsior Dr.	CAL000215422	The generator number was entered into the HWTS in December 1999 and was inactivated by June 2001. Three waste manifests in the years 2000-2002 covering the disposal of approximately 1.672 tons of unspecified solvent mixture, approximately 0.171 tons of waste oil and mixed oil and approximately 0.038 tons of other empty containers are associated with this generator number.
Fuji Hunt Photographic Chemical 14820 Carmenita Rd.	CAR000092031	The generator number was entered into the HWTS in April 2001 and was inactivated by April 2007. Two waste manifests in the years 2004 and 2006 covering the disposal of approximately 0.126 tons of aqueous solution, approximately 0.275 tons of off-spec, aged, or surplus inorganics, approximately 0.30 tons of other organic solids and approximately 0.0023 tons of other empty containers are associated with this generator number.
Performance Tean 14820 Carmenita Rd.	CAC002625803	The generator number was entered into the HWTS in January 2008 and was inactivated by July 2008. One 2008 waste manifest covering the disposal of approximately 2.085 tons of oil-containing waste and approximately 0.45 tons of other organic solid is associated with this generator number.
Rabsio 13555 Excelsior Dr.	CAC002631543	The generator number was entered into the HWTS in June 2008 and was inactivated by December 2008. One 2008 waste manifest covering the disposal of approximately 8.19 tons of unspecified aqueous solution is associated with this generator number.
GCR Tires & Service 14830 Carmenita Rd.	CAL000404897	The generator number was entered into the HWTS in March 2015 and is currently activated. No state or federal waste manifests are associated with this generator number.

Copies of the EPA ID Profile reports obtained from the DTSC HWTS database are included in the appendix.

Cleaners:

The Department of Toxic Substances Control maintains a list of dry cleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaning agents; linen supply; coin-operated laundries and cleaning; dry cleaning plants, except rugs; carpet and upholstery cleaning; industrial launderers; laundry and garment services. A search of the 2016 Cleaners database did not identify the subject Property.

California Hazardous Material Incident Reporting System (CHMIRS)

CHMIRS contains information on reported hazardous material incidents (accidental releases or spills). A search of the 2015 CHMIRS database did not identify the subject Property as a CHMIRS site.

Emissions Inventory (EMI):

The EMI database contains information for all reported air quality related emissions in California. A search of the 2014 EMI database did not identify the subject

Property.

California Department of Conservation - Division of Oil and Gas (DOG):

The Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR) prepares and publishes oil, gas, and geothermal maps for the State of California. The California Division of Oil, Gas and Geothermal Resources updates these comprehensive maps weekly with the most current well data and post the information on its website at http://maps.conservation.ca.gov/doms/index.html. According to the DOGGR website for the area of the subject Property, no active or abandoned wells are located on or in the vicinity of the subject Property.

8.1.3 County/Local Agency Records Search

Following is a discussion of records searches performed or personal/telephone contacts made with the appropriate local government agencies for environmental issues, relative to the subject Property.

Los Angeles County Department of Public Works (LACDPW):

The ADR Assessor reviewed the LACDPW files for the subject Property in an effort to determine whether hazardous material incidents or USTs have been reported at the subject Property addresses. From this review, the following information was obtained.

According to an October 20, 1993 "Tank Removal and Remedial Action/Final Closure Report" prepared by Atkins Environmental (AE), on September 9, 1993, one 10,000-gallon gasoline UST; one 10,000-gallon diesel UST; and associated dispenser and piping were removed from the southeast corner of the former Pearson Trucking & Rigging, Inc. warehouse at 13555 Excelsior Drive on the subject Property. Reportedly, these USTs were installed at the facility between December 1981 and February 1982. The USTs were removed under the supervision of the LACDPW. Four soil samples were collected (one under each end of both USTs) and submitted for laboratory analysis. The sample collected beneath the west end of the diesel UST (Sample 2A) which contained 8.805 milligrams per kilogram (mg/kg) of xylenes and 1,830 mg/kg of total petroleum hydrocarbons as diesel (TPH-d). As a result, a site assessment/remedial action workplan was developed. On September 14, 1993, four additional samples were collected in the vicinity of sample 2A to a depth of approximately 18 feet bgs. The analytical analysis confirmed the TPH-d and benzene, toluene, ethylbenzene and xylenes (BTEX) in the four samples were below detection limits. The soil in the area of sample 2A was over-excavated and removed from property. Based on the results and over-excavation activities conducted in the tank-hold of the former USTs, it was determined that additional investigation did not appear warranted. Therefore, on January 13, 1994 the LACDPW issued a letter indicating no further action was required.

Copies of pertinent records reviewed at the LACDPW are contained in the appendix. In addition, the subject Property listings on the Los Angeles County HMS database are related to the current and former USTs discussed above.

Los Angeles County Sanitation Department (LACSD):

The ADR Assessor contacted the LACSD to determine whether any permits involving the onsite treatment or processing of effluent from industrial waste were on file or had been reported at the subject Property. According to the LACSD files, a "permit for recreation a vehicle sanitary waste disposal station" is on file for the STC Storage facility at 13555 Excelsior Drive. The station was first issued an industrial wastewater discharge permit in 2008. No violations or unauthorized releases were identified. Based on this, the type of materials entering the system (domestic sewage) and the observed conditions at the time of the site reconnaissance, the trailer sewage disposal station is not expected to represent a significant environmental concern. Copies of pertinent records reviewed at the LACSD are contained in the appendix.

Los Angeles County Public Health Investigations (PHI):

The ADR Assessor contacted the PHI in an effort to determine whether any responses to incidents involving the spill or release of hazardous materials had been reported at the subject Property. A review of the PHI file for the subject Property is summarized below and copies of the pertinent records contained in the file are included in the appendix.

PHI records for 13555 Excelsior Drive included permits, inspection reports, waste manifests, and correspondence for Norm Reeves Honda (1989-2003) and Dynamic Services Inc./Recon Dynamics (2000-2001). Norm Reeves Honda conducted routine vehicle maintenance and repair operations and generated the following hazardous wastes: waste oil, waste antifreeze, parts washer liquid (Safety-Kleen), used battery cores, shop rags (in 55-gallon or less containers). Dynamic Services Inc./Recon Dynamics conducted body repair operations (i.e. spray booth operations) and utilized various petroleum-based paints and solvents (in 55-gallon drums). Chlorinated solvent usage was not identified for either facility. No outstanding violations or releases were reported for either facility.

PHI records for 14820 Carmenita Road consisted of inspection records, correspondences, permits, and hazardous material inventories for Fuji Hunt Photographic (Unit B), Goodmark Industries (Unit B), and Mulia Inc. (Unit A). Fuji Hunt Photographic Chemicals Inc. was a photographic, printing, and cleaning chemical warehouse and distribution center, which operated onsite from 2001 through 2007. No manufacturing reportedly was conducted onsite. Hazardous material storage, which included 200-300 gallon totes, 55-gallon drums, and 5-gallon drums, consisted of various inks, solvents (petroleum-based), photographic chemicals, printer washes and solutions. No chlorinated solvent usage or storage was identified among the hazardous materials stored onsite. Given the absence of any reported releases or violations, the former Fuji Hunt Photographic Chemicals facility does not represent a significant environmental concern. Goodmark Industries was a muscle car parts distributor, which operated onsite circa 2007. This facility reportedly did not maintain any hazardous materials onsite except for batteries (for forklifts) which are not expected to represent a significant environmental concern. Mulia Inc. was an importer/distributor of ceramic tile and glass block, which operated onsite from 2005 through 2009. The only hazardous material utilized onsite was propane for the onsite forklifts. Given the absence of any reported releases or violations, the former Mulia Inc. facility does not represent a significant environmental concern.

Regional Water Quality Control Board, Los Angeles Region (RWQCB):

The ADR Assessor contacted the RWQCB and searched the State Water Quality Control Board's online *GeoTracker* database in an effort to determine if USTs/LUSTs or hazardous material incidents have been reported at the subject Property address. The subject Property was not identified on the *GeoTracker* database and according to Ms. Rosie Villar with the RWQCB, the RWQCB has no UST files for the subject Property.

South Coast Air Quality Management District (AQMD):

The ADR Assessor contacted the AQMD and searched the FIND database in an effort to determine whether any permits involving air-pollution control technology had been reported at the subject Property. AQMD include various equipment permits, permit applications, and Notices of Violations (NOVs) for the current tire retreading operations by Commercial Tire Network, LLC/GCR Tire Centers at 14830 Carmenita Road. This facility has been onsite since at least 2001 and has been permitted for tire buffers, an air pollution control system, powder coating spray booth, abrasive blasting equipment, baghouse, and wheel and rim refinishing system. NOVs were issued in 2000 and 2004 for failing to operate without proper equipment permits; all NOVs have been abated.

AQMD permits were on file for Pearson Trucking & Rigging Inc. (trucking company), Norm Reeves Honda Superstore/Norm Reeves Inc. (used car dealership), and Quality Collision Center (body shop) formerly located at 13555 Excelsior Drive. Pearson Trucking & Rigging Inc. was permitted in 1982 for a gasoline storage and dispensing facility. Norm Reeves Honda Superstore was permitted in 1996 for a refrigerant recycle/recovery unit (from vehicle air conditioning systems). Quality Collision Center was permitted in 2001 for an automotive type spray booth, although it appears that this equipment was located in Bellflower and not in Norwalk. Based on this discrepancy, the record is not of an environmental concern for the subject property. Copies of the records obtained from the AQMD are contained in the appendix.

Department of Toxic Substances Control (DTSC):

The ADR Assessor reviewed the DTSC's Envirostor database in an effort to determine if USTs/LUSTs, spills, site cleanup, remediation or hazardous material incidents have been reported at the subject Property address. No records concerning USTs/LUSTs, spills, site cleanup, remediation or hazardous material incidents were available on the Envirostor website. In addition, according to Mr. Glenn Castillo with the DTSC, the DTSC has no records pertaining to the subject Property addresses.

8.2 Synopsis of Previous Environmental Investigations

The ADR Assessor was provided a copy of a July 23, 2012, *Limited Subsurface Investigation Report*, prepared by Bureau Veritas North America, Inc. (BV) and copies of three separate October 4, 2016, *Phase I Environmental Assessment* reports prepared for each subject Property address (14820 and 14830 Carmenita Road and 13555 Excelsior Drive) by EFI Global Inc. (EFI). These documents are summarized below and copies of the pertinent portions of these reports are included in the appendix.

- The BV, July 23, 2012 *Limited Subsurface Investigation Report*, was conducted at 14820 and 14830 South Carmenita Road and 13555 East Excelsior Drive. The limited subsurface investigation (LSI) was conducted to investigate the lengthy use, storage and/or generation of hazardous materials, hazardous waste and petroleum products associated with petroleum distillate- or chlorinated hydrocarbon-based, solvent parts washers, paint booths, outdoor spray painting, powder coating, a clarifier, concrete floor patches (possible former in-ground drainage and/or hydraulic equipment), a long concrete-lined trench covered with steel plates, and a former fuel underground storage tank (UST) reportedly removed in 1982 with no apparent investigation. In addition, the LSI investigated the presence of fill of unknown origin and historical onsite agricultural use; potential for onsite migration of petroleum and/or chlorinated solvents from up-gradient facilities; and the lack of methyl-tert butyl ether (MTBE) analytical data associated with the former onsite 10,000-gasoline UST. BV referenced a previous ESA report, although a copy was not provided.

  In July 2012, BV advanced 13 borings (BV-1 through BV-13) to a depth of 40 feet bgs in designated areas throughout the subject Property. BV-1 was located in the southwestern portion of the Site where potential fill of unknown origin may be located and downgradient of the nearby gasoline service station (boring advanced to ~40 feet bgs). BV-2, BV-3 and BV-4 were located inside or outside the 14830 building in the vicinity of the powder-coating area, former paint booth, and filled-in floor feature, respectively (borings advanced to ~10 feet bgs). BV-5 was located inside the 14830 building along the linear trench feature (boring advanced to ~10 feet bgs). BV-6 and BV-7 were located inside the 13555 building where parts washers were historically used (borings advanced to ~10 feet bgs). BV-8 was located inside the 13555 building adjacent to the filled-in floor feature (boring advanced to ~10 feet bgs). BV-9 was located in the northeast portion of the Site in the vicinity of former outdoor painting area and representing the furthest downgradient location (boring advanced to ~40 feet bgs). BV-10 and BV-11 were located along the southern (up-gradient) property boundary to evaluate the potential for onsite migration of petroleum and solvents in groundwater (borings advanced to ~40 feet bgs). BV-12 was located in the vicinity of the former USTs (boring advanced to ~15 feet bgs). BV-13 was located in the vicinity of the wash pad and clarifier (boring advanced to ~10 feet bgs). BV attempted to collect grab-groundwater samples from borings BV-1, BV-9, BV-10 and BV-11. However, a grab-groundwater sample could not be obtained at BV-9 due to insufficient water accumulation within the borehole. Additionally, soil vapor (or soil gas) samples were collected at six boring locations (BV-1 through BV-4, BV-6 and BV-7) at depths of approximately 5 feet bgs to evaluate the soil vapor concentrations beneath the subject Property.

- Concentrations of TPH or volatile organic compounds (VOCs) were not detected in the analyzed soil samples. In addition, organochlorine pesticides (OCPs) were not detected in the four soil samples analyzed for these compounds. Concentrations of TPH were not detected in the three collected groundwater samples. No VOCs were detected in the samples, except for benzene, which was detected at concentrations of 66 and 145 micrograms per liter (µg/L) in borings BV-10 and BV-11, respectively, and MTBE at a concentration of 9.2 µg/L in BV-1. Only the detected benzene concentrations exceed the groundwater Maximum Contaminant Levels (MCLs). Based on the location of borings BV-1, BV-10 and BV-11 on the up-gradient margins of the subject Property, it appears that the detections in samples taken above groundwater are associated with reported up-gradient releases of petroleum hydrocarbons from adjoining or nearby properties (former Tosco – 76 Station located at 14960 Carmenita Road). PCE was detected in three soil vapor samples (BV-3, BV-

6 and BV-7) collected from the former paint booth area at 14830 Carmenita (BV-3) and the former auto repair garage area of 13555 Excelsior (BV-6 and BV-7). The PCE detected in borings BV-3, BV-6 and BV-7 does not exceed the currently regulatory guidelines. Toluene was also detected in two soil vapor samples collected from 14830 Carmenita (BV-2 and BV-3), but at concentrations well below the commercial/industrial regulatory guidelines. Based on these findings, BV indicated that the potential vapor intrusion risk for PCE appears to be *de minimis*. Although the origin of the PCE in soil vapor beneath the subject Property is unclear, BV concluded that additional investigation or evaluation did not appear warranted.

- According to the EFI *Phase I Environmental Assessment*, for the subject Property address of 13555 Excelsior Drive, the subject Property was developed with a 178,000 square-foot warehouse structure occupied by Rabsio RV Storage. Onsite operations included vehicle washing located beneath the western canopy. Drains from the vehicle wash area empty to an onsite three-stage clarifier. Additionally, a trailer sewage disposal station located onsite (southwest of the property building). No significant hazardous material storage or recognized environmental conditions were observed at the site. According to EFI's interpretation of the historical research data, the subject Property was undeveloped prior to 1928 until at least 1947. By 1956, the subject Property was utilized for agricultural purposes until sometime prior to 1968 when the property was vacant land. In 1970, the property was developed with the current warehouse structure. Historical occupants have included: Howard Sherman (1971), Silvercrest Industries (1973-1975), Pearson Trucking & Rigging Inc. (1982-1994), General Electric Tips (1987), GE Co Norwalk Tool Facility (1993), Sydney Development Corp (1994-current), Norm Reeves Honda Superstore (1993-2008), Dynamics Services Inc./Recon Dynamics (2000-2001) and Rabsio RV Storage (2007-current). No recognized environmental conditions were found for the subject Property and no further investigation was recommended by EFI for the site.

- According to the EFI *Phase I Environmental Assessment*, for the subject Property address of 14820 Carmenita Road, the subject Property was developed with a 104,000 square-foot warehouse structure occupied by WAI Global (Unit A, auto parts warehousing/distribution) and Lasco Fittings Inc. (Unit B, metal and plastic pipe fittings warehousing/distribution). No significant hazardous material storage or recognized environmental conditions were observed at the site. According to EFI's interpretation of the historical research data, the subject Property was undeveloped prior to 1928 until at least 1947. By 1956, the subject Property was utilized for agricultural purposes until sometime prior to 1968 when the property was vacant land. From at least 1976 until sometime after 1994, the property was utilized as a storage/rental facility for vehicles and trailers, with no apparent structures onsite. There is no indication that any vehicle manufacturing or repair ever occurred onsite. Sometime after 1994, the use of the property for vehicle storage/rental activities at the property ceased. In 2000/2001 the current light industrial structures were developed onsite for warehouse/ distribution purposes only. Historical occupants have included: Sydney Development Corp. (2000-current), TMX (2001), Fuji Hunt Photographic Chemicals (2001-2007), Mulia Inc. (2005-2009), Goodmark Industries (2007), Performance Tean (2008), WAI Global (2010-current) and Lasco Fittings Inc. (current). No recognized environmental conditions were found for the subject Property and no further investigation was recommended by EFI for this site.

- According to the EFI *Phase I Environmental Assessment*, for the subject Property address of 14830 Carmenita Road, the subject Property was developed with a 42,000 square-foot warehouse structure occupied by GCR Tires and Service Inc., a tire distribution and refurbishment facility. The onsite operations included rim repair, tire

retreading, and general tire repair. Used tires were inspected and retreaded (utilizing water-based tire coating) for reuse. An overhead conveyor system was utilized to move tires throughout the various repair areas. A flammables cabinet containing five-gallon containers of heptane was located near the northeastern corner of the property building. No spills or releases were observed in the vicinity of the cabinet or heptane containers. According to EFI's interpretation of the historical research data, the subject Property was undeveloped prior to 1928 until at least 1947. By 1956, the subject Property was utilized for agricultural purposes until sometime prior to 1968. The subject Property remained vacant land until 1973, when the property was developed with the current industrial structure. Historical occupants have included: Silvercrest Industries (1973-1980), Western Piping Division (1981-1982), Johnson Controls (1981-1987), C & M Associates (1982), Custom Crating (1986), Sydney Development Corp (1984-current), Calwestern RV Sales and Service (1987-1997), Wesfac (1995-2000) and GCR Tire Centers/Commercial Tire Network (2000-current). According to building permits, Silvercrest Industries, a trailer manufacturer, operated a spray booth in circa 1973. This spray booth operated during a time that preceded stringent regulatory oversight; therefore, records of the type of paints and solvents utilized are not available. Chlorinated solvents were readily used in spray booth operations. Based on this, EFI concluded that the former onsite spray booth represents a recognized environmental condition. (However, it is ADR's opinion that the July 23, 2012 *Limited Subsurface Investigation Report* conducted by BV addressed the potential for contamination from the former spray booth on the subject Property, as discussed above.)

9 FINDINGS, OPINIONS AND CONCLUSIONS

This section presents a summary of available information on known or suspected *recognized environmental conditions, historical recognized environmental conditions, controlled recognized environmental conditions, business environmental risks,* non-scope ASTM environmental concerns, environmental concerns not considered *recognized environmental conditions,* and *de minimis conditions* (if any) at the subject Property. It also includes ADR's opinion and rationale for concluding that a condition is, or is not, currently a *recognized environmental condition.*

Recognized environmental conditions:

- In July 2012 a *Limited Subsurface Investigation Report* was prepared by Bureau Veritas North America, Inc. (BV) for the subject Property. The investigation was conducted to investigate the lengthy use, storage and/or generation of hazardous materials, hazardous waste and petroleum products associated with petroleum distillate- or chlorinated hydrocarbon-based solvent parts washers, paint booths, outdoor spray painting, powder coating, a clarifier, concrete floor patches (possible former in-ground drainage and/or hydraulic equipment), a long concrete-lined trench covered with steel plates, and a former fuel UST reportedly removed in 1982 with no apparent investigation. The investigation also addressed the lack of methyl-tert butyl ether (MTBE) analytical data associated with the former onsite 10,000-gasoline UST, the presence of fill of unknown origin and historical onsite agricultural use; and, the potential for onsite migration of petroleum and/or chlorinated solvents from up-gradient facilities. Concentrations of petroleum constituents or volatile organic compounds (VOCs) were not detected in the analyzed soil samples. In addition, organochlorine pesticides were not detected in the four soil samples analyzed for these compounds and the metals detected in the soil samples appear to be representative of background conditions. Benzene was detected in groundwater at concentrations of 66 and 145 micrograms per liter (µg/L) in borings BV-10 and BV-11, respectively, and MTBE was detected at a concentration of 9.2 µg/L in BV-1. Only the detected benzene concentrations exceed the groundwater Maximum Contaminant Levels (MCLs). Based on the location of borings BV-1, BV-10 and BV-11 on the up-gradient margins of the subject Property, it appears that the groundwater detections were associated with reported up-gradient releases of petroleum hydrocarbons from adjoining or nearby properties. PCE was detected in three soil vapor samples (BV-3, BV-6 and BV-7) collected from the former paint booth area at 14830 South Carmenita Road (BV-3) and the former auto repair garage area of 13555 East Excelsior Drive (BV-6 and BV-7). The PCE concentrations do not exceed current regulatory guidelines. Toluene was also detected in two soil vapor samples collected from 14830 Carmenita (BV-2 and BV-3), but at concentrations well below the current regulatory guidelines. Based on these findings, BV concluded that the potential vapor intrusion risk for PCE appears to be *de minimis*. Although the origin of the PCE in soil vapor beneath the subject Property is unclear, BV concluded that additional investigation or evaluation did not appear warranted. ADR generally agrees with the conclusions of the investigation based on the work performed by BV, however it is ADR's opinion that insufficient investigation was performed at two areas of the subject Property, the clarifier and the long concrete-lined trench covered with steel plates (one soil sample near each feature and no soil vapor sampling). Clarifiers and trenches can be a source of environmental impact due to cracks in the bodies and/or at piping connections caused by settling or improper installation. The limited sampling, to go

along with the detection of PCE from an unknown source in soil vapor samples collected at other portions of the site is a concern as is the factor that the soil sample in the vicinity of the clarifier was collected at 4.5-5 feet below surface, which is potentially not below the bottom of the clarifier. As a result, ADR concludes these features represent an environmental concern to the subject Property.

Historical recognized environmental conditions:

- In September 1993, one 10,000-gallon gasoline underground storage tank (UST); one 10,000-gallon diesel UST; and associated dispenser and piping were removed from the southeast corner of 13555 Excelsior Drive portion the subject Property. These USTs were installed at the facility in late-1981/early 1982. The USTs were removed under the supervision of the Los Angeles County Department of Public Works (LACDPW). Soil samples collected identified petroleum constituents under the west end of the diesel UST. As a result, additional samples were collected in the vicinity of identified impacts to a depth of approximately 18 feet below ground surface (bgs). The analytical analysis confirmed the petroleum constituents were below detection limits. The soil in the area of the impacted samples was over-excavated and removed from property. Based on the results and over-excavation activities conducted in the tank-hold of the former USTs, it was determined that additional investigation did not appear warranted. On January 13, 1994 the LACDPW issued a letter indicating no further action was required. Based on the findings presented in the report reviewed and the regulatory status, no further action is warranted with respect to these former subject Property USTs.

Controlled recognized environmental conditions:

- None

Business environmental risks:

- None

Non ASTM scope environmental concerns:

- At the time of the site inspection, the following suspect asbestos-containing building materials were observed on the subject Property: gypsum drywall tape joint compound and texture, vinyl floor tile, sheet vinyl, spray-on ceiling texture, and roofing materials. No significant damage to these materials was observed.

ADR has performed an ESA on the site located at 14820 and 14830 South Carmenita Road and 13555 East Excelsior Drive in Norwalk, California. This ESA was performed in conformance with the scope and limitations of ASTM Standard Practice E 1527-13 and the scope of services identified in the July 30, 2014 Master Environmental Consulting Services Agreement (MSA) between Rexford Industrial Realty, L.P., and ADR. This ESA has identified no evidence of recognized environmental conditions as defined by ASTM in connection with the subject Property, with the exception of:

- In July 2012 a *Limited Subsurface Investigation Report* was prepared by Bureau Veritas North America, Inc. (BV) for the subject Property. The investigation was conducted to investigate the lengthy use, storage and/or generation of hazardous materials, hazardous waste and petroleum products

associated with petroleum distillate- or chlorinated hydrocarbon-based solvent parts washers, paint booths, outdoor spray painting, powder coating, a clarifier, concrete floor patches (possible former in-ground drainage and/or hydraulic equipment), a long concrete-lined trench covered with steel plates, and a former fuel UST reportedly removed in 1982 with no apparent investigation. The investigation also addressed the lack of methyl-tert butyl ether (MTBE) analytical data associated with the former onsite 10,000-gasoline UST, the presence of fill of unknown origin and historical onsite agricultural use; and, the potential for onsite migration of petroleum and/or chlorinated solvents from up-gradient facilities. Concentrations of petroleum constituents or volatile organic compounds (VOCs) were not detected in the analyzed soil samples. In addition, organochlorine pesticides were not detected in the four soil samples analyzed for these compounds and the metals detected in the soil samples appear to be representative of background conditions. Benzene was detected in groundwater at concentrations of 66 and 145 micrograms per liter (µg/L) in borings BV-10 and BV-11, respectively, and MTBE was detected at a concentration of 9.2 µg/L in BV-1. Only the detected benzene concentrations exceed the groundwater Maximum Contaminant Levels (MCLs). Based on the location of borings BV-1, BV-10 and BV-11 on the up-gradient margins of the subject Property, it appears that the groundwater detections were associated with reported up-gradient releases of petroleum hydrocarbons from adjoining or nearby properties. PCE was detected in three soil vapor samples (BV-3, BV-6 and BV-7) collected from the former paint booth area at 14830 South Carmenita Road (BV-3) and the former auto repair garage area of 13555 East Excelsior Drive (BV-6 and BV-7). The PCE concentrations do not exceed current regulatory guidelines. Toluene was also detected in two soil vapor samples collected from 14830 Carmenita (BV-2 and BV-3), but at concentrations well below the current regulatory guidelines. Based on these findings, BV concluded that the potential vapor intrusion risk for PCE appears to be *de minimis*. Although the origin of the PCE in soil vapor beneath the subject Property is unclear, BV concluded that additional investigation or evaluation did not appear warranted. ADR generally agrees with the conclusions of the investigation based on the work performed by BV, however it is ADR's opinion that insufficient investigation was performed at two areas of the subject Property, the clarifier and the long concrete-lined trench covered with steel plates (one soil sample near each feature and no soil vapor sampling). Clarifiers and trenches can be a source of environmental impact due to cracks in the bodies and/or at piping connections caused by settling or improper installation. The limited sampling, to go along with the detection of PCE from an unknown source in soil vapor samples collected at other portions of the site is a concern as is the factor that the soil sample in the vicinity of the clarifier was collected at 4.5-5 feet below surface, which is potentially not below the bottom of the clarifier. As a result, ADR concludes these features represent an environmental concern to the subject Property.

10 RECOMMENDATIONS

Based upon the conclusions of this ESA, ADR recommends no further investigation or additional action for the subject Property with the exception of:

- ADR recommends additional investigation related to the potential environmental impacts of the clarifier at 13555 East Excelsior Drive and the long concrete-lined trench covered with steel plates in the 14830 South Carmenita Road building.

- Asbestos sampling should be performed to investigate all suspect asbestos-containing materials. In addition, ADR recommends implementation of a written Asbestos Operations and Maintenance program to manage any known or suspect ACMs in place.

11 SIGNATURE PAGE

This ESA was prepared in accordance with generally accepted environmental practices and procedures, employing the degree of care and skill ordinarily exercised under similar circumstances by reputable environmental professionals practicing in this area, as of the date of this ESA.

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312 and the individuals conducting this ESA have the specific qualifications based on education, training, and experience to assess a *property* of nature, history, and setting of the subject Property. ADR has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXHIBIT "A"

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE CITY OF NORWALK, IN THE COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

PARCELS 1, 2, 3 AND 4 OF PARCEL MAP NO. 14169, BEING A PARCEL MAP FOR "LEASE PURPOSES", IN THE CITY OF NORWALK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 145, PAGES 44 AND 45 OF PARCEL MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

SAID LAND IS ALSO KNOWN AS PARCELS 1 AND 2 OF PARCEL MAP NO. 1428, IN THE CITY OF NORWALK, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS SHOWN ON MAP FILED IN BOOK 24, PAGE 79 OF PARCEL MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ADR Environmental Group, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2017 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Year	Target Street	Cross Street	Source

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/10/2016 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

ORANGE COUNTY CHEMIC	13744 EXCELSIOR DRIV	ESE 1/8 - 1/4 (0.185 mi.)	U133	245

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/10/2016 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/12/2016 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1

RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 23 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there are 27 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the SLIC list, as provided by EDR, has revealed that there are 13 SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

OES Incident Number: 7-4439				

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2015 has revealed that there are 60 HAZNET sites within approximately 0.125 miles of the target property.

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 20 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.25 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Contact email:	Not reported
EPA Region:	09
Classification:	Small Small Quantity Generator
Description:	Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:

Owner/operator name:	HATCH AND KIRK
Owner/operator address:	13474 PUMICE ST NORWALK, CA 90650
Owner/operator country:	Not reported
Owner/operator telephone:	(562) 926-8776
Legal status:	Private
Owner/Operator Type:	Owner
Owner/Op start date:	Not reported
Owner/Op end date:	Not reported

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002

HATCH AND KIRK (Continued) **1004675896**

. Waste name: CORROSIVE WASTE

Violation Status: No violations found

FINDS:

Registry ID: 110002940578

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110002788519

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	161.7
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	1616.2
Waste code:	D039
Waste name:	TETRACHLOROETHYLENE
Amount (Lbs):	5230
Waste code:	F001
Waste name:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs):	5175
Waste code:	F002
Waste name:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs):	55

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

TSCA SUBMITTER

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/10/2013
Comments: A PEAE report for a portion of the Site was reviewed by DTSC in 2009 under the Caltrans Project; DTSC issued a comfort letter to Caltrans that identified several contaminants of concern; further action is warranted. A 2003 and 2004 Phase 1s were reviewed to identify AOCs.

Agency City,St,Zip: 0
Agency Contact: Not reported
Agency Telephone: Not reported
Agency Type: Private
SIC Code: 3544
SIC Code 2: Not reported
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste: STORMS
Waste Type2: Not reported
Waste2: Stormwater Runoff

GALLHER LUMBER (Continued) **S102229638**

Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

FLINT INK CORP (Continued) **1000173879**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: RCRA Facility Assessment Report
Completed Date: 03/25/2010
Comments: The facility obtained a Hazardous Waste Facility Permit for the sole purpose of storing hazardous waste for longer than 90 days. The facility held the permit for 5 years, and then requested to be removed from the permitted status; the facility is currently operating under generator status. The facility clean closed the hazardous waste storage area in accordance with a DTSC approved closure plan. The DTSC performed a PR of readily available agency and facility records, and a VSI to evaluate past and potential releases of hazardous constituents from the SWMUs and AOCs identified. No evidence of any release of hazardous materials considered a threat to human health or the environment as a result of recent or past on-site activities. Based on a review of files associated with this facility, and the VSI, no further action is recommended.

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site History: There is a State Water Board closure Order for this case issued 4/30/2015. The State Water Board needs confirmation that the corrective action wells and wastes have been removed from the site in order to close the case. Once confirmation has been received State Water Board can issue a Uniform Closure Letter and close the case. Attempts to reach the RP have failed. gwl 4/14/2016.

Case Type:	Cleanup Program Site
Case Worker:	ACJ
Local Agency:	Not reported
RB Case Number:	1225
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Arsenic, Diesel, Gasoline, Heating Oil / Fuel Oil
Site History:	The property has been used for light industrial purposes by two parties: Philip Carey Company from approximately 1971 thru 1980; and Frigid Coil from approximately 1980 thru July of 2007. The recognized environmental conditions identified in the Phase I Site Investigation included: Frigid Coils operations consist of the assembly of air handlers and other custom heating, ventilation, and air conditioning (HVAC) units. Principal materials in use at the facility consist of stainless steel, copper coil, welding gases, and hydraulic oils. The Frigid Coil facility consists of approximately 82,000 square feet of building space on an approximately 4.9-acre property. The eastern

FRIGID COIL (Continued) **S108991991**

portion of the building was used as a shop for maintenance activities and the western portion of the building was used as office space. Frigid Coil has operated at the 13711 Freeway Drive location since 1971. The building was reportedly constructed in 1966. Prior to 1966, the subject property was agricultural land.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

FINDS:

Registry ID: 110002141192

Environmental Interest/Information System
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HERAEUS METAL PROCESSING LLC (Continued) **S107147543**

Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Not reported
Site History: The Alondra Industrial Park (AIP) site was occupied in the early 1970's by several industries involved in metal recycling, sheet metal fabrication, manufacturing of aluminum products, and precious metal recycling. Currently, only precious metal recycling activities are conducted at the AIP site. Site investigations started in the early 1990's. Site soil matrix, soil vapor and groundwater is impacted with volatile organic compounds (VOCs). In 1997, approximately 870 tons of VOCs-impacted soil was excavated and disposed to an off-site permitted facility. A soil vapor extraction (SVE) system, including four SVE wells has been operating at the site since 2003. To address VOCs in saturated soil and groundwater, a dual-phase extraction (DPE) system operated from 2010 to 2014. The DPE system included ten groundwater extraction wells and seven additional SVE wells. Extraction of impacted groundwater created drawdown of the water table to expose impacted soil to vapor extraction. Groundwater was treated and discharged under permit with the Los Angeles County Sanitation District. A sub-slab depressurizarion system is in place since 2010 to mitigate the effects of soil vapor intrusion into indoor air at the site's buildings, and an off-site commercial building. To further treat VOCs in groundwater, enrollment under Waste Discharge Requirments Order No. R4-2014-0187 was granted to conduct injection of sodium lactate and bioaugmentation organisms. Injection activites were conducted in January 2015, under Monitoring and Reporting Program No. CI-10066. Injection results are being evaluated for performance. As of July 2016, the remedial systems removed an approximate 890 pounds of VOCs. Para Informacion en Espanol, por favor contactar a Luis Changkuon al (213) 676-6667 o luis.changkuon@waterboards.ca.gov

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Date: 07/19/2010
Comments: On July 10 & 11th, Conestoga Rovers installed the 5 injection wells and the additionalmonitoring well at the Fredrick Ramond site described in the Treatability Study Work plan. DTSC approved initiation of fieldwork in email from Project manager, J. Spiszman on 4/13 2010. A formal approval letter was sent to Conestoga Rovers on 7/19/2010 approving the Treatability Study work plan. This letter formally documented authorizion of the field work as outlined in the work plan, and provided formal documentation of the approval to begin field work sent to Conestoga Rovers via the email dated 4/13/2010 On July 24 & 25th, 2010 Conestoga Rover will be adding the oxidants to the injection wells and 2 monitoring wells.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for

GMC WAREHOUSE & DISTRIBUTING DIV (Continued) **1000135994**

generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Voluntary Cleanup Agreement
Completed Date:	05/14/1997
Comments:	DTSC and Diesel ReCon Company executed a Voluntary Cleanup Agreement for a Preliminary Endangerment Assessment on the formerly leased property.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	No Further Action Letter
Completed Date:	02/24/2010
Comments:	DTSC issued a No Further Action letter based on results from the PEA sampling activities and risk assessment.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	07/08/1998
Comments:	DTSC recommends delineating the lateral and vertical extent of VOC, petroleum hydrocarbons, PAHs and metals contamination at the site.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	07/16/2007
Comments:	The review of the 1998 PEA indicated that additional soil and soil vapor sampling is still necessary.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Workplan
Completed Date:	12/11/2007
Comments:	Workplan describes soil gas and soil sampling to address data gaps.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	12/17/2007

SERTA MATTRESS (Continued) **1000379496**

Comments: Soil gas, soil sampling work.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/24/2010
Comments: Based on soil and soil gas data, there is no further action needed at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 09/09/2009
Comments: Additional soil gas sampling has been completed.

Corrective Action Summary:
Event date: 09/24/2015
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Region: STATE
Facility Status: **Open - Remediation**
Status Date: 03/03/2006
Global Id: SL373412444
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 33.9171171269795
Longitude: -118.054447174072
Case Type: Cleanup Program Site
Case Worker: AS
Local Agency: Not reported
RB Case Number: 0227A
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern: Arsenic, Lead, Aviation, Benzene, Crude Oil, Diesel, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History: The site was a former tank farm/refinery built in the 1930s. Golden

GOLDEN WEST REFINERY (Continued) **S101480698**

West Refining Company (GWRC) purchased the refinery in 1983 and operated the refinery unit until February 1992, when crude oil processing operations were suspended. Only fuel transport operations were conducted by GRWC at the Refinery Property from February 1992 to August 1997. The site has now been redeveloped into a light industrial/commercial business complex. Before site redevelopment soil impacted with petroleum hydrocarbons was excavated to ~ 10 - foot depth. The soil beneath the site is impacted with petroleum hydrocarbons including gasoline, diesel and aviation fuel. The first groundwater in Semi Perched Aquifer occurs ~22 feet depth. The second Artesia Aquifer occurs ~ 75 foot depth. Free phase petroleum hydrocarbon (gasoline, diesel and aviation fuel are present on groundwater in both aquifers. The plume extends offsite. In Semi-Perched Aquifer the plume extends ~3000 feet in a southwesterly direction to Rosecrans Avenue. Free phase hydrocarbons are being recovered by Golden West refinery form wells located on and off site. Golden West is also operating 6 soil vapor extraction systems to treat the vapors. Additional work is needed for groundwater assessment , monitoring and cleanup; particularly offsite. Soil vapor survey is also needed offsite.

Completed Info:
Completed Area Name: 2016 Athletic Fields & Field Buildings Project
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/29/2016
Comments: Annual Cost Estimate included in EOA.

Completed Area Name: 2007 Three Classrooms Area
Completed Sub Area Name: Not reported
Completed Document Type: Cost Recovery Closeout Memo
Completed Date: 03/05/2008
Comments: CRU Memo

Completed Area Name: 2007 Three Classrooms Area
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/11/2005
Comments: DTSC concurrs with PEA conclusion that further action is req'd for elevated arsenic (up to 46 ppm) and reccommends SSI for delineation. Additionally, OCP resamples are to be taken in SSI due to analysis discrepency (sample matrix interference resulted in dl raised 500 times).

Completed Area Name: 2007 Three Classrooms Area
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Workplan
Completed Date: 06/14/2004
Comments: Not reported

Completed Area Name: 2007 Three Classrooms Area
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Workplan
Completed Date: 09/27/2005
Comments: Approved SSI WP for implementation. Fieldwork scheduled 9/30/2005

Completed Area Name: 2007 Three Classrooms Area

JOHN GLENN HIGH SCHOOL (Continued) **S103979616**

Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 06/16/2006
Comments: DTSC conditionally approved the final SSI report for a Removal Action (with comments). The SSI final approval presents data collected at different times during the SSI investigation, aresnic was detected at elevated concentrations.

Completed Area Name: 2007 Three Classrooms Area
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/20/2006
Comments: Third round of step out sampling to delineate the area of arsenic contamination.

Completed Area Name: 2007 Three Classrooms Area
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 01/19/2007
Comments: DTSC approved the RAW for implementation.

Completed Area Name: 2007 Three Classrooms Area
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 10/19/2007
Comments: Per District request, DTSC approved Area 1 for the school construction pending the submittal of the Removal Action Completion Report. Figures and lab data were submitted and discussed with the toxicologist and supervisor prior to preliminary approval.

Completed Info:

Completed Area Name:	2016 Athletic Fields & Field Buildings Project
Completed Sub Area Name:	Not reported
Completed Document Type:	Annual Oversight Cost Estimate
Completed Date:	09/29/2016
Comments:	Annual Cost Estimate included in EOA.
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Cost Recovery Closeout Memo
Completed Date:	03/05/2008
Comments:	CRU Memo
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	08/11/2005
Comments:	DTSC concurrs with PEA conclusion that further action is req'd for elevated arsenic (up to 46 ppm) and reccommends SSI for delineation. Additionally, OCP resamples are to be taken in SSI due to analysis discrepency (sample matrix interference resulted in dl raised 500 times).
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Workplan
Completed Date:	06/14/2004
Comments:	Not reported
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Supplemental Site Investigation Workplan
Completed Date:	09/27/2005
Comments:	Approved SSI WP for implementation. Fieldwork scheduled 9/30/2005
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Supplemental Site Investigation Report

JOHN GLENN HIGH SCHOOL (Continued) **S103979616**

Completed Date:	06/16/2006
Comments:	DTSC conditionally approved the final SSI report for a Removal Action (with comments). The SSI final approval presents data collected at different times during the SSI investigation, aresnic was detected at elevated concentrations.
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	03/20/2006
Comments:	Third round of step out sampling to delineate the area of arsenic contamination.
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	01/19/2007
Comments:	DTSC approved the RAW for implementation.
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	10/19/2007
Comments:	Per District request, DTSC approved Area 1 for the school construction pending the submittal of the Removal Action Completion Report. Figures and lab data were submitted and discussed with the toxicologist and supervisor prior to preliminary approval.
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	12/10/2007
Comments:	Not reported
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	4.15 Request
Completed Date:	04/17/2007
Comments:	DTSC signed and approved the 4.15 form, pdf copy forwarded to district along with original.
Completed Area Name:	2016 Athletic Fields & Field Buildings Project
Completed Sub Area Name:	Not reported
Completed Document Type:	Environmental Oversight Agreement Application
Completed Date:	09/06/2016
Comments:	District submitted EOP Application via email on 09/06/2016.
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	Environmental Oversight Agreement
Completed Date:	08/20/2003
Comments:	Not reported
Completed Area Name:	2007 Three Classrooms Area
Completed Sub Area Name:	Not reported
Completed Document Type:	CEQA - Notice of Exemption
Completed Date:	01/19/2007

JOHN GLENN HIGH SCHOOL (Continued) **S103979616**

Comments:	NOE final approval. For document review, see RAW final approval letter.
Completed Area Name:	2007 Three Classrooms Area

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/05/2016
Date Data Arrived at EDR: 01/05/2017

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/05/2016

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/05/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/10/2016
Date Data Arrived at EDR: 10/20/2016

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board?s review found that more than one-third of the region?s active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Target Property Map:	5633777 WHITTIER, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

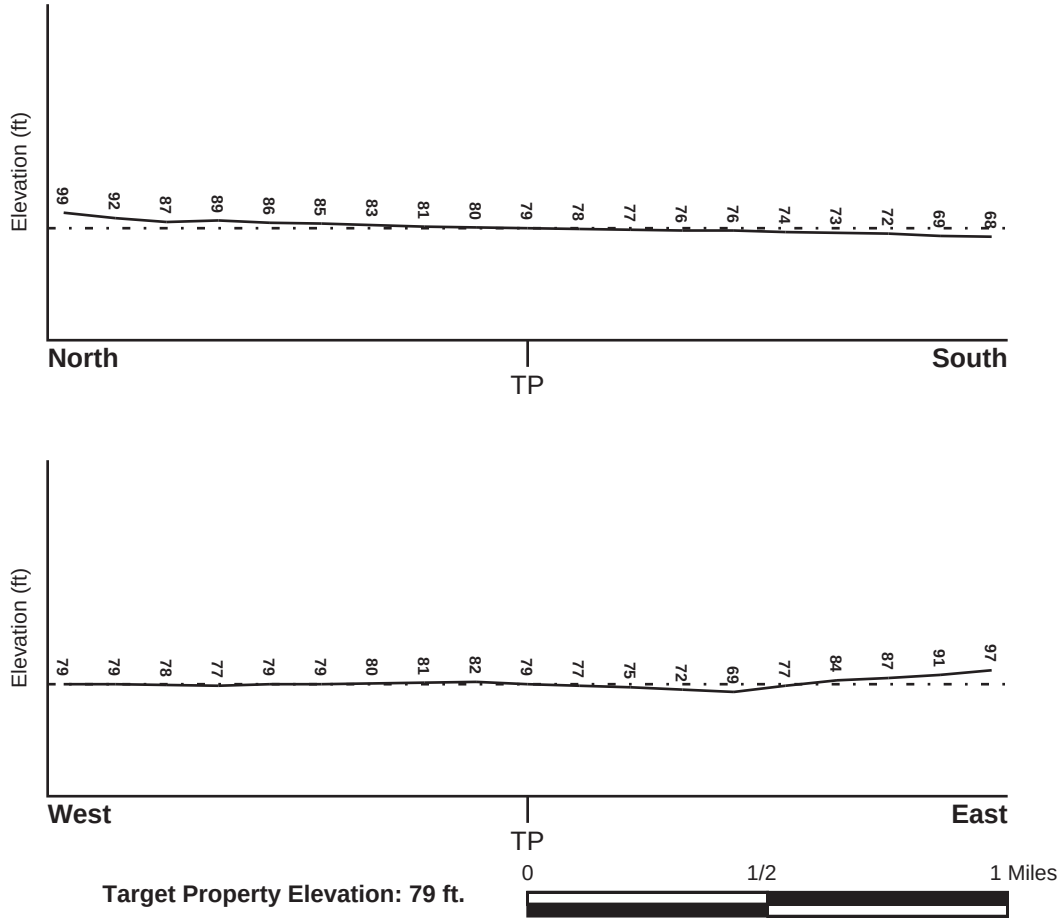
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 79 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1843F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1841F	FEMA FIRM Flood data
06037C1844F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
WHITTIER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NNE
Site Name:	BROWN PACIFIC WIRE
Site EPA ID Number:	CAD044052801
Groundwater Flow Direction:	VARIABLE IN THE NEAR-SURFACE SEMI-PERCHED AQUIFER AND NE IN THE ARTESIA AQUIFER AT A SITE LOCATED 1/8 MILE TO THE NORTHWEST.
Measured Depth to Water:	73 feet in the Artesia aquifer at a site located approximately 1/8-mile to the northwest.
Hydraulic Connection:	The site is underlain by the Bellflower aquiclude at a depth of approximately 20 to 40 feet above mean sea level.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Dear Mr. McCondichie:

We have received your Public Records Act Request for records from Department of Toxic Substances Control.

After a thorough review of our files we have found that, no such records exist at this office pertaining to the sites/facilities referenced below:

N/R: 14820 & 14830 Carmenita Road, Norwalk, CA 90650
13555 Excelsior Drive, Norwalk, CA 90650

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. Envirostor can be accessed at: http://www.envirostor.dtsc.ca.gov/public. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view Envirostor.

If you have any questions, would like further information regarding your request, please contact our Regional Records Coordinator at (714) 484-5336

Sincerely,

Jone Barrio

PUBLIC RECORDS REQUEST FORM

PRU Office Use Only
CONTROL NUMBER

ATTENTION REQUESTOR: To expedite your request for District records, please fill out this form completely, and identify specifically the type of records you are requesting. Please limit your request to one facility or one site address for each request form filed, and three requested items per form. Additional forms or pages can be used if requesting information for more than one facility or for records not identified on this form. Requests should reasonably describe identifiable records prepared, owned, used, or retained by the District. Public Records Unit staff is available to assist you in identifying those records in the District's possession. The District is not required by law to create a new record or list from an existing record.

PERMIT TO OPERATE

Permit No.
D96144
A/N 310974
Page 1

This initial permit shall be renewed ANNUALLY unless the equipment is moved, or changes ownership. If the billing for annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

Legal Owner Or Operator: ID 107273
NORM, REEVES HONDA SUPERSTORE, NORM REEVES, INC
ATTN: LEE STACY
PO BOX 3010
CERRITOS, CA 90703-3010

Equipment located at: 13555 EXCELSIOR DRIVE, NORWALK, CA 90605

Equipment Description:

REFRIGERANT RECYCLE/RECOVERY UNIT, MOTOR VEHICLE AIR CONDITIONING SYSTEM, ROBINAIR, MODEL NO. 174-00, SERIAL NO. 03763.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. RECORDS SHALL BE MAINTAINED TO INDICATE IN POUNDS PER CALENDAR YEAR THE REFRIGERANTS PURCHASED, USED, RECOVERED, RECYCLED, STORED, AND SOLD FOR USE IN THE DISTRICT; AND REFRIGERANT SHIPPED OFFSITE, IF RECYCLING IS NOT DONE ON THE PREMISE.

4. THIS EQUIPMENT SHALL BE TESTED FOR DETECTABLE LEAKS ONCE EVERY SIX (6) MONTHS USING AN ELECTRONIC HALOGEN DETECTOR IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS, MEASURED 1 CENTIMETER AWAY FROM JOINTS, COUPLINGS AND TUBING OF THE SYSTEM OR WITH ANY ALTERNATE METHOD APPROVED BY THE EXECUTIVE OFFICER.

5. ALL LEAKS IN THIS EQUIPMENT SHALL BE REPAIRED WITHIN TWO (2) BUSINESS DAYS AFTER THE LEAK IS DETECTED.

6. THIS EQUIPMENT SHALL NOT BE USED TO ADD REFRIGERANT TO A VEHICLE UNLESS THE VEHICLE'S AIR CONDITIONING SYSTEM HAS NO DETECTABLE LEAKS.

7. THIS EQUIPMENT SHALL NOT BE OPERATED UNLESS EACH INDIVIDUAL PERFORMING OR SUPERVISING WORK ON MOTOR VEHICLE AIR CONDITIONERS HAS A CERTIFICATE OF TRAINING FROM A DISTRICT APPROVED PROGRAM.

FILE COPY

CONTINUATION OF PERMIT TO OPERATE

8. RECORDS SHALL BE KEPT TO PROVE COMPLIANCE WITH CONDITIONS 3, 4, 5, AND 7. THE RECORDS SHALL BE KEPT IN A FORMAT APPROVED IN WRITING BY THE COMPLIANCE DIVISION DIRECTOR OF THE DISTRICT. THE RECORDS SHALL BE KEPT FOR AT LEAST TWO YEARS AND MADE AVAILABLE UPON REQUEST.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

SANTA FE SPRINGS CA 000090760

This initial permit must be renewed by 05-01-83 unless the equipment is moved, or changes ownership. If billing for annual renewal fee (Rule 301.f) not received by expiration date, contact office above.

This permit does not authorize the emission of air contaminants in excess of those allowed by Division 26 of the Health and Safety Code of the State of California or the Rules of the Air Quality Management District. This permit cannot be considered as permission to violate existing laws, ordinances, regulations or statutes of other government agencies.

Permit No.
F41389
A/N 387060

This initial permit must be renewed ANNUALLY unless the equipment is moved, or changes ownership.
If the billing for annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

LEGAL OWNER
OR OPERATOR: QUALITY COLLISION CENTER
17650 CLARK AVE
BELL FLOWER, CA 90706

ID 128820

Equipment Location: 13555 EXCELSIOR AVE, NORWALK, CA 90650

Equipment Description:

SPRAY BOOTH, SPRAY BOOTH TECHNOLOGIES, AUTOMOTIVE TYPE, 14'-0" W. X 24'-0" L. X 9'-0" H., WITH ONE 1,000,000 BTU PER HOUR NATURAL GAS FIRED HEATER, ONE 48" X 240" EXHAUST FILTER AND ONE 10-HP EXHAUST FAN.

Conditions:

1) OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2) THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3) THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA AT LEAST 2 INCHES THICK.

4) A GAUGE SHALL BE INSTALLED AND MAINTAINED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER.

5) THIS EQUIPMENT SHALL NOT USE MORE THAN 10,000 CUBIC FEET OF NATURAL GAS IN ANY ONE DAY.

6) A NON-RESETTABLE TOTALIZING FUEL METER SHALL BE INSTALLED AND MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 5. IN CASE THE FACILITY MAIN GAS METER IS USED TO VERIFY COMPLIANCE WITH CONDITION NO. 5, THEN THE TOTAL NATURAL GAS USAGE AT THE ENTIRE FACILITY SHALL NOT EXCEED 10,000 CUBIC FEET IN ANY ONE DAY.

7) THE OPERATOR SHALL MAINTAIN A FUEL USAGE LOG TO DEMONSTRATE COMPLIANCE WITH CONDITION NO. 5. THE LOG SHALL INCLUDE, AT MINIMUM, THE METER READING AND THE DAILY FUEL USAGE.

8) THIS EQUIPMENT SHALL BE OPERATED IN COMPLIANCE WITH RULES 1151 AND 1171.

FILE COPY

9) THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUNDS (VOC) EMISSIONS FROM THE USE OF COATINGS AND SOLVENTS FROM ALL PERMITTED EQUIPMENT AND ASSOCIATED OPERATIONS AT THIS FACILITY SHALL BE LESS THAN 667 POUNDS IN ANY ONE CALENDAR MONTH. ASSOCIATED OPERATIONS INCLUDE, BUT ARE NOT LIMITED TO, SURFACE PREPARATION, EQUIPMENT CLEAN-UP, AND THE APPLICATION OF ANY OTHER MATERIALS TO PARTS THAT ARE SUBSEQUENTLY PROCESSED IN THE PERMITTED EQUIPMENT.

I0) THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).

11) THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS FACILITY TO VERIFY CALENDAR MONTHLY VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH COATING AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). ALL RECORDS SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT.

12) WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

13) ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR 36 MONTHS, AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.

I4) THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY, FOR 36 MONTHS.

15) THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

I6) MATERIAL SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL BE KEPT CURRENT AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.

I7) MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC AIR CONTAMINANTS IDENTIFIED IN RULE 1401, TABLE 1, WITH AN EFFECTIVE DATE OF AUGUST 18, 2000 OR EARLIER.

18) THIS PERMIT SHALL EXPIRE IF CONSTRUCTION OF THIS EQUIPMENT IS NOT COMPLETE WITHIN ONE YEAR FROM THE DATE OF ISSUANCE OF THIS PERMIT UNLESS AN EXTENSION IS GRANTED BY THE EXECUTIVE OFFICER.

FILE COPY

PERMIT TO CONSTRUCT/OPERATE

CONTINUATION OF PERMIT TO CONSTRUCT/OPERATE

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

PERMIT TO OPERATE

Permit No.
G31999
A/N 545212

This initial permit must be renewed ANNUALLY unless the equipment is moved, or changes ownership.
If the billing for the annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

ID 142418

Legal Owner
or Operator: 14830 CARMENITA RD LLC/GCR TIRE CTRS
14830 CARMENITA RD
NORWALK, CA 90650

Equipment Location: 14830 CARMENITA RD, NORWALK, CA 90650

Equipment Description :

POWDER COATING SPRAY BOOTH, NORDSON, MODEL ECONO COAT II, 5'-3"W. X 9'-1"L. X 6'-11"H., WITH A 1/4 H.P. EXHAUST FAN AND TWO CARTRIDGE EXHAUST FILTERS, EACH 1'-0"W. X 3'-0"L. X 1'-0"D.

Conditions :

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA THAT IS AT LEAST 2 INCHES THICK.
4. A GAUGE SHALL BE INSTALLED AND MAINTAINED TO INDICATE, IN INCHES WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCHES WATER.
5. THIS EQUIPMENT SHALL BE OPERATED IN COMPLIANCE WITH RULES 1107 AND 1171.
6. MATERIAL SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILTY SHALL BE KEPT CURRENT AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
7. WET COATING SHALL NOT BE APPLIED IN THIS EQUIPMENT.
8. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).

FILE COPY

9. IN ADDITION TO THE REQUIREMENTS OF RULE 109, THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS FACILITY TO VERIFY CALENDAR MONTHLY VOLATILE ORGANIC COMPOUNDS (VOC) EMISSIONS IN POUNDS AND VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). ALL RECORDS SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT.

10. THE VOC EMISSIONS FROM THE USE OF ANY POWDER COATINGS SHALL BE CALCULATED USING AN EMISSION FACTOR OF 0.01 POUND OF VOC PER POUND OF POWDER COATING SPRAYED.

11. THE TOTAL QUANTITY OF POWDER COATINGS USED IN THIS EQUIPMENT SHALL NOT EXCEED 10 POUNDS IN ANY ONE DAY.

12. THE TOTAL QUANTITY OF VOC EMISSIONS FROM PERMITTED EQUIPMENT AND ASSOCIATED OPERATIONS AT THIS FACILITY SHALL NOT EXCEED 667 POUNDS IN ANY ONE CALENDAR MONTH. ASSOCIATED OPERATIONSINCLUDE, BUT ARE NOT LIMITED TO, SURFACE PREPARATION, EQUIPMENT CLEAN-UP, AND THE APPLICATION OF ANY OTHER MATERIALS TO PARTS THAT ARE SUBSEQUENTLY PROCESSED IN THE PERMITTED EQUIPMENT.

13. WIITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

14. THE OPERATOR SHALL RETAIN FOR 36 MONTHS ALL PURCHASE INVOICES FOR ALL VOC CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC CONTAING MATERIAL REMOVED FROM THE FACILITY.

15. THE OPERATOR SHALL MAINTAIN A SINGLE LIST THAT INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

16. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMINANTS IDENTIFIED IN RULE 1401, TABLE I, WITH AN EFFECTIVE DATE LISTING OF SEPTEMBER 10, 2010.

17. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR 36 MONTHS, AND SHALL BE MADE AVAILABLE TO ANY DISTRICT PERSONNEL UPON REQUEST.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

PERMIT TO OPERATE

Permit No.
F72694
A/N 436270

This initial permit must be renewed ANNUALLY unless the equipment is moved, or changes ownership.
If the billing for the annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

ID 142418

Legal Owner
or Operator: 14830 CARMENITA RD LLC/GCR TIRE CTRS
1200 FIRESTONE PKY
AKRON, OH 44317

Equipment Location: 14830 CARMENITA RD, NORWALK, CA 90650

Equipment Description :

WHEEL AND RIM REFINISHING SYSTEM CONSISTING OF:

1. SHOT BLAST MACHINE, IMI 2020 SB MODULE, WITH TWO 15 H.P. BLAST BLADES, AND A ¼ H.P. TUMBLER.
2. BUCKET ELEVATOR, 0'-7"W. X 1'-6"L. X 12'-0"H., 1 H.P.
3. AIR WASH SEPARATOR, ABRASIVE RETURN.

Conditions :

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
3. THIS EQUIPMENT SHALL NOT BE OPERATED UNLESS IT IS VENTED TO AIR POLLUTION CONTROL EQUIPMENT WHICH IS IN FULL USE AND WHICH HAS BEEN ISSUED A PERMIT TO OPERATE BY THE EXECUTIVE OFFICER.

FILE COPY

CONTINUATION OF PERMIT TO OPERATE

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUES OF OTHER GOVERNMENT AGENCIES.

Mr. Lee Stacy
Norm Reeves, Incorporated
P.O. Box 3010
Cerritos, CA 90703

Dear Mr. Stacy:

APPLICATION FOR INDUSTRIAL
WASTEWATER DISPOSAL PERMIT (A93366)
13555 EXCELSIOR DRIVE, NORWALK

The application/plans you have submitted have been reviewed by this office, and are NOT approved because additional information is required to allow proper evaluation of your operations and their possible effects on the sewerage system and environment. The plans are hereby returned less one reference copy for our file. Please revise your submittal in accordance with the items indicated below:

1. Show the connection to the public sewer on the plans.

2. Show the continuation of the waste line extending out from the west side of the building.

3. Show all floor drains, floor sinks, service sinks, and waste lines and facilities for handling industrial wastewater from the point of origin to the connection to the public sewer. All equipment or facilities generating industrial wastewater must be identified on plans.

4. Separate sanitary wastes originating from restrooms, lavatories, drinking fountains, etc., from industrial process wastewater until all industrial wastewater pretreatment or flow measuring steps are completed.

5. A gravity separation interceptor with sampling box is required (County Standard 2041-0, enclosed). Provide and show on plans. Per County Plumbing Code, Title 28, a trap, cleanout, and vent are required. The capacity of the interceptor should be designed for minimum of 30 minutes retention time for peak flow discharge rate or minimum of 510 gallons, whichever is larger.

6. Submit MSDS for all the chemicals used in the industrial process.

7. Provide and show on plans all storage areas for chemicals and/or waste materials stored at the subject facility, with a tank/drum schedule indicating storage capacities, container construction, and contents. Provision for spill containment is required where

such materials may potentially enter the sewer system or contaminate the soil. Spill containment should be designed for the volume of the largest tank or 10 percent of the drum total (whichever is greater), plus 6 inches of rainfall over the containment area (if outdoors). Submit a typical detail of the containment curb and specify the materials of construction.

8. Interior walls and floors within all spill containment areas shall be cleaned, repaired, and sealed with an epoxy type sealant which is compatible with materials located within said areas. Provide this office with manufacturer's literature of selected sealant and indicate on drawing areas to be sealed.

9. The contact joint for spill containment walls or dikes constructed on existing concrete, masonry, or asphalt shall be bonded to the existing surface. Provide this office with manufacturer's literature of the selected bonding agent and indicate on drawing areas to be bonded.

10. No floor drains shall be within spill containment areas.

11. Place the name and address of the company having the wastewater discharge on the lower right-hand corner of each sheet of the plans.

12. Please return four sets of plans and all supporting information to this office within 30 days from the date of this letter.

If you have any questions regarding this matter, please contact Mr. Orville L. Sabado of this office at (818) 458-3557, Monday through Thursday, 7:00 a.m. to 5:30 p.m.

Very truly yours,

INDUSTRIAL WASTE DISPOSAL PERMIT CONDITIONS AND LIMITATIONS

PART A: ON-SITE DISPOSAL - PUBLIC SEWER

1. Disposal of industrial wastewater to the public sanitary sewer shall be limited to the flow indicated on the industrial waste disposal permit.

2. Pretreatment, monitoring and control facilities required under this permit shall consist of the system(s) indicated on the approved plans.

3. Industrial Wastewater shall at all times meet the effluent quality, indicated on the attached Part D, if applicable prior to discharge to the sanitary sewer system.

4. If applicable, the permittee shall submit periodic compliance reports, as indicated on the attached Part E and/or any self-monitoring or industrial wastewater treatment surcharge reports which may be required by the County Sanitation Districts of Los Angeles County. **Note: Self monitoring reports required by the Sanitation Districts are to be submitted directly to the Sanitation Districts.**

5. All required industrial wastewater collection, pretreatment, monitoring, disposal and sampling facilities must be installed in accordance with approved plans prior to initiating any discharge to the sewer.

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
INDUSTRIAL WASTE DISPOSAL PERMIT

AP

PART A: ON-SITE DISPOSAL - PUBLIC SEWER (CONTINUED)

6. Discharge of any toxic, flammable, explosive, corrosive, radioactive or non-biodegradable substance to the sewer is prohibited except as provided in **Part A.3** above.

7. Discharge of uncontaminated cooling water, groundwater, storm water or surface drainage water to the sanitary sewer is prohibited except as specifically authorized by this permit.

8. Discharge of industrial wastewater to the sanitary sewer with temperatures exceeding 140° F is prohibited.

9. This permit is subject to additional Conditions and Limitations attached:
Part B -- Wastes Not Authorized for Discharge or Deposits in **Part A**
Part C -- General Conditions and Limitations

10. Other: **PRIOR TO INITIATING ANY DISCHARGE TO THE SANITARY SEWER, THE APPLICANT SHALL SUBMIT A NEW APPLICATION FOR AN INDUSTRIAL WASTE DISPOSAL PERMIT (IWDP) AND SHALL SECURE SUCH IWDP. ALL PRETREATMENT SYSTEMS SHALL BE MAINTAINED IN A DRY AND SANITARY CONDITION AT ALL TIMES.**

NTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
USTRIAL WASTE DISPOSAL PERMIT

B1

PART B: WASTES NOT AUTHORIZED FOR DISCHARGE OR DEPOSIT IN PART A

1. Industrial wastes not specifically authorized for on-site pretreatment, storage, deposit, discharge or disposal in Part A of this permit shall be stored in leakproof containers within an area designated on plans approved by the Department of Public Works pending transport to a legal point of disposal.

2. The Permittee shall determine if industrial wastes stored pursuant to Part B.1 above are hazardous wastes as defined in the California Health and Safety Code, Chapter 6.5 and as determined by California Administrative Code, Title 22, Division 4, Chapter 30 and shall manage such wastes as prescribed therein.

3. Hazardous wastes shall only be removed from the premises under a Uniform Hazardous Waste Manifest unless a variance from such documentation has been granted by the California EPA Department of Toxic Substances Control (Cal EPA). Generator copies of the Uniform Hazardous Waste Manifest shall be maintained by the Permittee for not less than 180 days or as directed by Cal EPA.

4. The Permittee shall maintain records of the sources, quantity, name and address of hauler, date hauled, and point of legal disposal for nonhazardous industrial wastes and wastes granted a Cal EPA variance as described in Part B.3 above. Such records shall be kept a minimum of 180 days. A legal point of disposal is defined as one for which waste discharge requirements have been prescribed by a California Regional Water Quality Control Board and which is in full compliance therewith or a facility authorized to receive such wastes by the jurisdiction(s) regulating the facility and is in full compliance with all permits, regulations and requirements.

5. Discharge of industrial wastewater to a channel, stormdrain, stream, river, lake, ocean or other surface waters is prohibited unless authorized by a National Pollutant Discharge Elimination System (NPDES) permit issued by a California Regional Water Quality Control Board or the U.S. Environmental Protection Agency (EPA).

6. The Permittee shall immediately notify the County of Los Angeles Department of Public Works (LACDPW) at (626) 458-3517 and the Publicly Owned Treatment Works (POTW) of all discharges that could cause problems to the POTW including slug loading, spills, bypasses, upsets, etc.

7. The Permittee shall conform to the discharge prohibitions outlined in 40CFR 403.5 (a) (1) and 40CFR 403.5 (b).

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
INDUSTRIAL WASTE DISPOSAL PERMIT

C5

PART C: GENERAL CONDITIONS AND LIMITATIONS, NON-USE

1. The owner or operator of an existing industrial waste pretreatment facility who desires to maintain the facility for future reuse shall submit to the County of Los Angeles, Department of Public Works (DPW), Environmental Programs Division an application for revised Industrial Waste Disposal permit and fee pursuant to the Los Angeles County Code, Title 20, or appropriate City Code/Ordinance.

2. This application for maintain only with zero discharge is applicable to only pretreatment facilities which meet current County standards/Policies. Any pretreatment facility not in use which does not meet current County Standards/Policies must be formally closed.

3. All accumulated industrial and hazardous wastes shall be removed from the pretreatment facility to a legal point of disposal.

4. Furnish DPW with evidence of legal disposal for all wastes removed for disposal in the form of completed hazardous waste manifests or other appropriate documents.

5. Outlets associated with the pretreatment facility and which are the last open connection shall have a water tight plug or equivalent approved device installed.

6. All inlets and plumbing receptors (floor sink, floor drains, trenches, etc.) associated with and/or tributary to a pretreatment facility shall have a water tight plug or equivalent approved device installed.

7. Any severing, capping, or plugging of outlet and inlet discharge lines shall be carried out such that all applicable plumbing code regulations are complied with.

8. Any rain diversion devices shall be removed and all operations tributary to a rain diversion system shall cease.

PART C: GENERAL CONDITIONS AND LIMITATIONS, NON-USE (CONTINUED)

9. An adequate treatment system subject to this office's approval shall be installed for any discharge tributary a storm drain system.

10. Upon completion of Item Nos. 2-9 above, an inspection shall be scheduled with a DPW Waste Control Engineering Inspector. Copies of any documentation pertaining to Items 3 and 7 shall be made available to the Inspector at the time of inspection.

11. Compliance with Items 2-10 shall take place within 90 days of the issue date of this permit.

12. Pretreatment facilities capped for future use shall be kept free of dirt, debris, water, wastewater, explosive or toxic gases, and shall not be used for the temporary or permanent storage of any materials without authorization by DPW.

13. The permittee shall inform DPW in writing within five days of any change in facts required to be stated on the application for a permit.

14. The permittee shall obtain approval from DPW prior to effecting any of the following waste discharge conditions:

    A. Change in method of disposal;
    B. Change in disposal point;
    C. Change in discharge volume effecting treatment or storage facilities; or
    D. Change in character of the waste discharge.

15. Prior to this office permitting a pretreatment facility to be reactivated said facility must conform to current County Standards/Policies.

CLOSURE CERTIFICATION
FACILITY LOCATION: 13555 Excelsior Drive
CLOSURE APPLICATION NUMBER 70295

This office has reviewed the final closure report dated October 20, 1993 required as a part of the subject closure permit. Based on the information submitted, we find that all closure requirements have been completed. With the provision that the information provided to this agency was accurate and representative of existing conditions, it is our position that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at this site. Nor does it relieve you of the responsibility to clean up existing, additional, or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this agency of any changes in report content, future contamination findings, or site usage.

If you have any questions regarding this matter, please contact Tan Phan of this office at (818) 458-3513, Monday through Thursday, 7:00 a.m. to 5:30 p.m.

Very truly yours,

T. A. TIDEMANSON

WASTE MANAGEMENT DIVISION

Re: Industrial Waste Disposal Permit
13555 Excelsior Drive
Norwalk, CA 90650

Dear Mr. Esfandi:

This letter is in reference to our application for an Industrial Waste Disposal Permit at the above offsite location. The plans and accompanying cover letter were hand delivered to your office on April 21, 1994.

I understand that there is a backlog of applications and you are processing them as quickly as possible. But is there any possibility that our application could be expedited?

We at Norm Reeves Honda have found ourselves in a particularly awkward position. We are in the mist of major construction and remodeling at our main facility. It has become increasingly difficult to rise to the demand of providing washed and detailed new and used cars at this facility.

Our intent was to be operational at the Excelsior offsite by now thus eliminating this present condition.

It seems that no matter how well a company attempts to plan for possible scenarios, there are inevitably unforseen circumstances that occur relative to contractors, bids, completion dates, time-frames, etc.

As the contractors and subcontractors at our main facility proceed with their schedules, the workable space for our car washing and detailing activities continue to diminish. Our operations are approaching a gridlock.

NORM REEVES HONDA SUPERSTORE • CERRITOS AUTO SQUARE
P.O. Box 3010, Cerritos, CA 90703-3010 • 18500 Studebaker Road, Cerritos, CA 90701-5398 • (310) 402-3844 (714) 761-2558

Norm Reeves Honda is in no way attempting to solicit special consideration or place itself above other business applicants. We are requesting, however, that if there is a way for your office to assist us in the predicament we find ourselves in, it will be greatly appreciated.

Thank you for your consideration.

Sincerely,

Lee Stacy

County of Los Angeles
Department of Public Works
P.O. Box 1460
Alhambra, Ca. 91802-1460

Gentlemen:

Norm Reeves Honda Superstore is opening a off-site location to Distribute Parts,Repair Used Cars, Pre-deliver New Cars, wash and detail new and used cars. The process of washing cars is why we are applying for a Industrial Waste Disposal Permit. We will be installing a wash area and a Clarifier to intercept grease and dirt. Our plan is to wash cars with soap and water and the run off will go into the Clarifier. We would use approximately 1 gallon of soap per day. We will also be washing the engines of our used cars and that requires engine degreaser to remove the dirt. We would use about .5 gallons of degreaser per day. Our Clarifier will be checked every six months for build up of sludge and will be pumped out when necessary.

If anyone has any questions don't hesitate to give me a call at (310)402-3844 ext.432.

Sincerely,

Lee Stacy
System and Operation Manager

Complete Certification of Compliance with Los Angeles County Lobbyist Ordinance on back

IWDP-DPW.1 Rev 3/02

CERTIFICATION OF COMPLIANCE WITH LOS ANGELES COUNTY LOBBYIST ORDINANCE

This is to certify that I, as permit applicant, for the project located at 13555 EXPLORER DR, NORWALK CA
LOCATION ADDRESS

am familiar with the requirements of Los Angeles County Code Chapter 2.160 et seq., (relating to the Los Angeles County Lobbyist Ordinance) and that all persons acting on behalf of myself have complied and will continue to comply therewith through the application process.

COMPANY NAME (If employed by an entity/agency)	DATE

INFORMATION REGARDING LOS ANGELES COUNTY CODE CHAPTER 2.160

The purpose of this handout is to provide a simplified explanation of Los Angeles County Code Chapter 2.160 so that individuals may become familiar with the County's Lobbyist Policy. This document is only intended to be used as a supplement to the County Ordinance.

Q. What is the purpose of the County Lobbyist Ordinance?

A. Prior to August 28,1992, the County did not regulate the activities of persons who lobby county officials. The Ordinance does not prohibit lobbying activities, but instead seeks to define a County Lobbyist and requires such individuals to register as such with the Board of Supervisors.

Q. Who does this Ordinance apply to?

A. This Ordinance applies to all persons applying for permits, licenses, contracts, franchises or grants from the County.

Q. What does this Ordinance require?

A. This Ordinance requires County Lobbyists to register with the Executive Officer of the Board of Supervisors. The initial registration must be filed within 20 days of first becoming a County Lobbyist. Renewals are to be filed within 20 days of the end of each calendar quarter. All applicants for a County permit, license, franchise or grant must certify that they are familiar with the requirements of Los Angeles County Code Chapter 2.160

Q. What constitutes a "County Lobbyist"?

A. County Lobbyist means any individual who is employed, contracts or otherwise receives compensation for influencing official action.

Q. What defines influencing "official action"?

A. Official action means the drafting, introduction, consideration, modification, enactment or defeat of any County Ordinance or Board of Supervisors motion or resolution, or the granting or denial of any County contract, permit, grant or license.

Q. Where can I find more information regarding this Ordinance?

A. A complete copy of the Ordinance is available for public review at all public counters in the Department of Public Works. Further information can be obtained by contacting:

Executive Office of the Board of Supervisors
500 West Temple Street
Los Angeles, CA 90012

Waste Management Division
P.O. Box 1460
Alhambra, CA 91802-1460

Permit No. 95935
File No. 021691-1K
Date MAY 2 6 1994

INDUSTRIAL WASTE DISPOSAL PERMIT CONDITIONS AND LIMITATIONS

Part A ON-SITE DISPOSAL – PUBLIC SANITARY SEWER

1. Disposal of industrial wastewater to the public sanitary sewer system shall be limited to the flow rate indicated below:

   ☒ a. Local Sewer. The maximum permitted peak flow rate to the sewer shall be 7.5 gallons per minute (gpm).

   ☐ b. Trunk Sewer. Maximum permitted daily flow to the sewer shall be no greater than 25% in excess of the value on line 16 of the attached Permit for Industrial Wastewater Discharge.

2. Pretreatment, monitoring and control facilities required under this permit shall consist of the system(s) indicated below:

   ☒ a. Sampling point prior to combining industrial wastewater flow with domestic wastewater.
   ☒ b. Final gravity separator (clarifier) 1500 gallon capacity, 3 stage.
   ☐ c. pH measurement and recording system.
   ☐ d. Automatic pH control.
   ☐ e. Flow measurement.
   ☐ f. Automatic rainwater diversion system with alarm capable of diverting storm flow in excess of the first 0.10 inch of rain from the sanitary sewer system.
   ☐ g. _____

3. Industrial wastewater shall at all times meet the following effluent quality limitations prior to discharge to the sanitary sewer system:

   ☒ a. As specified in **Part D** -- Effluent Quality Limitations.
   ☐ b. Additional quality limitations: _____

4. The permitee shall submit the following periodic reports:

   ☐ a. Self-monitoring and/or industrial wastewater treatment surcharge reports as may be required by the Sanitation Districts of Los Angeles County. ***NOTE: These reports are to be submitted directly to the Sanitation Districts.***
   ☐ b. Self-monitoring compliance reports as described in **Part E** of this permit.

5. All required industrial wastewater collection, pretreatment, monitoring, disposal and sampling facilities must be installed in accordance with approved plans and prior to initiating any discharge to the sewer system.

Conditions and Limitations (continued)

5. Discharge of any toxic, flammable, explosive, corrosive, radioactive or nonbiodegradable substance to the sanitary sewer is prohibited except as provided in **Part A.3** above.

7. Discharge of uncontaminated cooling water, groundwater, stormwater or surface drainage water to the sanitary sewer is prohibited except as specifically authorized by this permit.

8. Discharge of industrial wastewater to the sanitary sewer with temperatures exceeding 140°F is prohibited.

9. This permit is subject to additional Conditions and Limitations attached:
   Part B -- Wastes Not Authorized for Discharge or Deposits in **Part A**
   Part C -- General Conditions and Limitations
   Part D -- Effluent Quality Limitations
   Part E -- Self-monitoring and Reporting (only if designated in **Part A.4.b**)

10. Other:

County of Los Angeles, Department of Public Works
Industrial Waste Disposal Permit

Part B - WASTES NOT AUTHORIZED FOR DISCHARGE OR DEPOSIT IN PART A

1. Industrial wastes not specifically authorized for on-site pretreatment, storage, deposit, discharge or disposal in Part A of this permit shall be stored in leakproof containers within an area designated on plans approved by the Department of Public Works pending transport to a legal point of disposal.

2. The permittee shall determine if industrial wastes stored pursuant to Part B.1 above are hazardous wastes as defined in the California Health and Safety Code, Chapter 6.5 and as determined by California Administrative Code, Title 22, Division 4, Chapter 30 and shall manage such wastes as prescribed therein.

3. Hazardous wastes shall only be removed from the premises under a Uniform Hazardous Waste Manifest unless a variance from such documentation has been granted by the California Department of Health Services (DOHS). Generator copies of the Uniform Hazardous Waste Manifest shall be maintained by the permittee for not less than 180 days or as directed by DOHS.

4. A copy of the generator's Uniform Hazardous Waste Manifest shall be provided to the Department of Public Works, Waste Management Division, Solid Waste Management Unit, P.O. Box 1460, Alhambra, CA 91802-1460, within 30 days from removal of such wastes from the permittee's premises. NOTE: This requirement is in addition to any Self-Monitoring requirement in Part E of this permit when so designated in Part A.

5. The permittee shall maintain records of the sources, quantity, name and address of hauler, date hauled, and point of legal disposal for nonhazardous industrial wastes and wastes granted a DOHS variance as described in Part B.3 above. Such records shall be kept a minimum of 180 days. A legal point of disposal is defined as one for which waste discharge requirements have been prescribed by a California Regional Waste Quality Control Board and which is in full compliance therewith or a facility authorized to receive such wastes by the jurisdiction(s) regulating the facility and is in full compliance with all permits, regulations and requirements.

6. Discharge of industrial wastewater to a channel, stormdrain, stream, river, lake, ocean or other surface waters is prohibited unless authorized by a National Pollutant Discharge Elimination System (NPDES) permit issued by a California Regional Water Quality Control Board or the U.S. Environmental Protection Agency (EPA).

Part C - GENERAL CONDITIONS AND LIMITATIONS

1. A Copy of this permit shall be maintained on the premises where it will be available at all times to operating personnel.

2. Industrial waste pretreatment, storage and disposal operations shall be conducted in such a manner that no nuisances are created.

3. The permittee shall allow representatives of interested governmental agencies concerned with the disposal of industrial waste access at any reasonable time to take samples, inspect operations and review any records required by this permit.

4. The permittee shall secure written approval from this Department before making any additions or modifications which may affect the quantity, quality, or method of disposal of industrial waste materials. Requests or plans for additions or modifications to industrial waste treatment facilities or method of disposal shall be submitted for approval to the Department of Public Works, Waste Management Division, P.O. Box 1460, Alhambra, CA 91802-1460.

5. This permit is subject to suspension or revocation if conditions exist which would justify denial of a permit, if permittee fails to correct unsatisfactory conditions, if any of the Conditions and Limitations of this permit have been violated or if Annual Industrial Waste Inspection Fees, where required, are not paid within 90 days from date of notification.

6. The Director of Public Works may modify this permit by addition, revision, or elimination of conditions and limitations as may be necessary to accomplish the purpose of ordinances and laws covering disposal of waste materials.

7. The permit is valid only for the facility and location named thereon and is not transferable. In the event of any change of ownership, name or control of the industrial waste facilities subject to this permit, the permittee shall notify the Director of Public Works prior to the effective date of such change. Permittee shall also notify the succeeding owner or operator of the existence of this permit by letter, a copy of which shall be forwarded to the Director of Public Works. A new owner shall make application for an Industrial Waste Disposal Permit within 30 days from the date of assuming control of any facility subject to this permit.

8. Facilities subject to this permit shall not be abandoned. Cancellation of this permit may only be authorized pursuant to Los Angeles County Code Section 20.36.220.

PURSUANT TO SECTION 11.80.070B, LOS ANGELES COUNTY CODE, PERMISSION IS HEREBY GRANTED TO PROCEED WITH THE CLOSURE DESCRIBED ABOVE SUBJECT TO THE ATTACHED CONDITIONS AND LIMITATIONS [X]. THIS PERMIT EXPIRES 180 DAYS FROM THE DATE BELOW.

T.A. TIDEMANSON
Director of Public Works

CLOSURE -- UNDERGROUND STORAGE TANKS

CONDITIONS A -- GENERAL

1. Closures shall be carried out such that all applicable regulations from the following agencies are complied with: Los Angeles County, Department of County Engineer - Facilities; Los Angeles County Fire Department, Fire Prevention Division or the appropriate City Fire Department; South Coast Air Quality Management District; and Los Angeles County Department of Health Services.

2. The County Engineer and Fire Departments shall be notified in advance of any closure in accordance with the following:

   a. Removal of tank shall require a three (3) business day advance notification.

   b. Permanent closure of a tank in place or a temporary closure shall require a 30 day written notification.

3. Consult current fee schedule for costs.

4. All abandoned wells shall be destroyed in such a way that they will not produce water or act as a channel for interchange of water, when such interchange may result in deterioration of the quality of water in any or all water bearing formations penetrated, or present a hazard to the safety and well-being of people and animals.

5. A well destruction permit issued by the Los Angeles Department of Health Services shall be required for all wells requiring a permit for their initial construction.

6. Well destruction shall be accomplished according to methods described in the latest "Water Well Standards: State of California" by the Department of Water Resources, contained in Bulletin 74-81, December 1981, or any other methods that will provide equivalent or better protection.

7. Plans for the decontamination of a facility shall be submitted to the County Engineer for approval no later than 30 days before the commencement of such operations. Other agencies having jurisdiction shall also be notified. These agencies include the California Regional Water Quality Board, the Los Angeles County Department of Health Services, and the South Coast Air Quality Management District.

8. Decontamination shall require the following, as a minimum:

   a. Cleaning operation shall be done under the supervision of persons who understand the hazardous potential of the original liquid stored and its components.

   b. The personnel shall be sufficiently skilled to safely carry out such operation.

   c. Contaminated materials removed from such facility shall be disposed of at legal point of discharge.

   d. The operation shall be carried out in a manner that will not endanger the health of the public and the environment.

CONDITIONS B -- TEMPORARY

1. All temporary closures shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A -- Inspection Guide #6, "Abandonment or Removal of Underground Tanks," Part A and any other applicable Parts.

2. A temporary closure shall not exceed [redacted] days.
180

CONDITIONS C -- PERMANENT TANK(S) REMOVAL

1. All tank removals shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A -- Inspection Guide #6, Part D and any other applicable Parts.

2. Owners/operators shall notify the Building Department having jurisdiction at the place of removal if a grading permit is necessary.

3. Removed tanks shall not be transported away from the site until an inspection to establish site integrity is carried by the County Engineer.

4. If an appointment has been arranged with a County Engineer Inspector to inspect the removal of a tank, the inspector will only wait at the site a reasonable amount of time (approximately one hour) after arriving for the removal to commence. Another closure fee may be charged if the inspector has to return to the site.

5. After inspection, tanks shall be transported to a legal disposal point.

6. If the tank has stored materials other than motor fuel, fuel oil or waste oil, site integrity shall be demonstrated using the soil sampling and analysis procedures described in CONDITIONS D below.

7. The site shall be backfilled and recompacted to a relative compaction of 90%.

CONDITIONS D -- PERMANENT

1. All permanent closures of tanks in place shall comply with Los Angeles County Fire Department, Fire Prevention Division, Supplement #A -- Inspection Guide #6, Parts B or C, and any other applicable Parts.

2. Owners/operators shall demonstrate part site integrity as follows:

   a. Test borings shall be slant drilled to intercept a point beneath the center of the tank, if possible. If slant drilling is not feasible, the test borings may be drilled vertically and the reason stated in the report in 2.h. below.

   b. For single tanks, a minimum of two test borings will be required, each located on opposite sides of the tank along the major axis of the tank.

   c. For multiple tanks, as a minimum, borings shall be placed at 20 foot intervals around the tank cluster. The actual number and location of borings shall be evaluated on a case-by-case basis. Tanks separated by 20 feet or more shall be considered single tanks for the purposes of test location and placement.

   d. Soil samples shall be taken at depths of 5, 10, 20, 30 and 40 feet below grade level.

   e. A Shalby Tube or a Modified California Sampler shall be utilized for taking all soil samples.

   f. Soil samples shall be capped immediately with teflon or aluminum.

   g. Soil samples shall not be extruded in the field but are to be immediately placed in a refrigerated ice chest and transported to a state certified laboratory for analysis, using suitable methods.

   h. A report containing the results of the above analysis shall be submitted to the County Engineer.

3. If the soil analysis in 2. above indicates the presence of contaminants, the County Engineer shall require a site investigation as described in Chapter V of the County's "Underground Storage of Hazardous Materials -- Guidelines."

4. A report shall be submitted to the County Engineer containing the results of the site investigation.

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
WASTE MANAGEMENT DIVISION

CLOSURE REPORT REQUIREMENTS

A closure report shall be submitted to the County of Los Angeles Department of Public Works, Waste Management Division, P.O. Box 1460, Alhambra, California 91802-1460, containing:

1. File number of facility and closure permit number.
2. Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets, and north arrow.
3. Description of methods for obtaining, handling, and transporting samples.
4. Time and date samples were obtained.
5. Soil sampling certification (including but not limited to soils classification, boring logs, sample procedures, sample locations, initiating chain-of-custody, and groundwater location) for UST closure shall be certified by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils. The certification must clearly state that all work was performed under the supervision of the person signing.
6. Chain-of-custody documentation initiated by person obtaining sample through person at CAL/EPA Department of Toxic Substance Control certified laboratory.
7. Disposal destination of tanks and evidence of legal disposal.
8. Analysis results by a State certified laboratory submitted on laboratory letterhead showing analysis date, methods of extraction, and methods of analysis.
9. Documentation as to depth of groundwater at facility.
10. Manifests to document hazardous waste disposal of any removed soil and tank rinseate.
11. Any observations of site contamination.
12. Remedial action plan to mitigate contamination.
13. Report to be signed by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils.

DEPARTMENT OF PUBLIC WORKS
CLOSURE PERMIT
SOIL SAMPLING REQUIREMENTS FOR TANK REMOVALS
VOLATILE, SEMI-VOLATILE AND EXTREMELY HAZARDOUS MATERIALS

These requirements are in addition to those specified on the Closure Permit or supplemental forms.

Site integrity shall be demonstrated as indicated below prior to tank removals where the tank presently or previously contained either 1) a volatile or semi-volatile priority pollutant as defined by the Federal Register, Vol. 44, No. 233, December 3, 1979, (Revised 1981), or 2) any material which, as a waste, would be considered an extremely hazardous waste as defined by Title 22, California Administrative Code, Section 66680.

It is the Owners/operators responsibility to insure tanks are not excavated until site integrity has been determined and that all applicable safety measures are taken to protect all personnel at the removal site from exposure to hazardous materials. Owners/operators shall demonstrate site integrity as follows:

1. Test borings shall be slant drilled to intercept a point beneath the center of the tank, if possible. If slant drilling is not feasible, the test borings may be drilled vertically and the reason stated in the closure report.

2. For single tanks, a minimum of two test borings will be required, each located on opposite sides of both the major and the minor axis of the tank. The borings shall be as close as practicable to the tank.

3. For multiple tanks, as a minimum, borings shall be placed at 20 foot intervals around the tank cluster. The actual number and location of borings shall be evaluated on a case-by-case basis. Tanks separated by 20 feet or more shall be considered single tanks for the purpose of boring location and placement.

4. Samples shall be obtained under the direct supervision of a California Certified Engineering Geologist, California Registered Geologist or California Registered Civil Engineer with sufficient experience in soils.

5. Soil samples shall be obtained at depths of 5, 10, 20, 30 and 40 feet below grade level.

6. A Shelby Tube or a Modified California Sampler shall be utilized for obtaining all soil samples.

7. Soil samples shall be capped immediately with teflon or aluminum foil.

8. Soil samples shall not be extruded in the field but are to be immediately placed in a refrigerated ice chest and transported to a State certified laboratory for analysis, using suitable methods.

9. If groundwater is encountered during sampling, a groundwater monitoring well shall be established at the most downgradient sampling point. The well shall be properly developed and a groundwater sample shall be obtained. and analyzed.

10. All soil samples obtained shall be discrete, undisturbed, sealed and unexposed prior to analysis. The method used to obtain the samples and the date of sampling shall be included in the final report. Samples submitted for laboratory analysis are not to be used for field screening.

NOTICE TO CLOSURE PERMIT APPLICANTS

The South Coast Air Quality Management District (SCAQMD) has adopted Rule 1166 regulating emissions of Volatile Organic Compounds (VOC) from decontamination of soil effective **August 6, 1988.**

In addition to the requirements of your Closure Permit, persons excavating any underground storage tank that previously contained VOC's must:

- Notify the SCAQMD Executive Officer by telephone at (310) 403-6000 24 hours prior to tank excavation. 1166(c)(1)(A)
- Monitor the excavated material during the excavation for VOC contamination. 1166(c)(1)(B)
- When VOC contamination is detected:
  * Cease excavation
  * Cover the contaminated soil until implementation of approved mitigation measures. 1166(c)(1)(C)
  * Notify the SCAQMD Executive Officer at (714) 396-2000 within 24 hours of detection of VOC contaminated soil. 1166(c)(2)(A)
- A person shall not engage in or allow any on-site or off-site spreading of VOC contaminated soil which results in uncontrolled evaporation of VOC to the atmosphere. 1166(c)(3)

Exemptions

- Treatment of less than one (1) cubic yard of contaminated soil. 1166(d)(1)(A)
- Decontamination of soil containing organic compounds that have initial boiling point of 302°F or greater, Reid Vapor Pressure less than 80mm Hg or Absolute Vapor Pressure less than 36mm Hg at 20°C. 1166(d)(1)(B),(F)
- Removal of soil for sampling purposes pursuant to EPA methods. 1166(d)(1)(C)
- Accidental spillage of five (5) gallons or less of VOC. 1166(d)(1)(D)
- Documentation of soil which is contaminated through natural seepage of VOC from oil and gas wells or other natural sources. 1166(d)(1)(E)

SPECIFIC QUESTIONS ON RULE 1166 SHOULD BE REFERRED TO THE SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT (909) 396-2000

ATTENTION CONTRACTOR

NOTIFICATION/PERMIT REQUIREMENTS

This Closure Authorization is issued subject to compliance with all applicable laws and regulations relating to the performance of work including, but not limited to, business license requirements, Building Codes, Fire Codes, Air Quality regulations, Health and Safety Codes, Water Codes, and Transportation regulations.

Pursuant to Los Angeles County Code, Section 11.78.045, and the Conditions and Limitations of the attached Hazardous Materials Underground Storage Closure Authorization, you are required to complete **ALL** of the agency notifications indicated below within the time period specified prior to commencement of work on this closure.

[X] 72 HOURS - DEPARTMENT OF PUBLIC WORKS INDUSTRIAL WASTE ENGINEERING INSPECTOR:

DEPARTMENT OF PUBLIC WORKS
WASTE MANAGEMENT DIVISION
900 S. FREMONT AVENUE
ALHAMBRA, CA 91803

Closure Permit No.: _____ B
File No.
I- _____

PART 1 OF 2

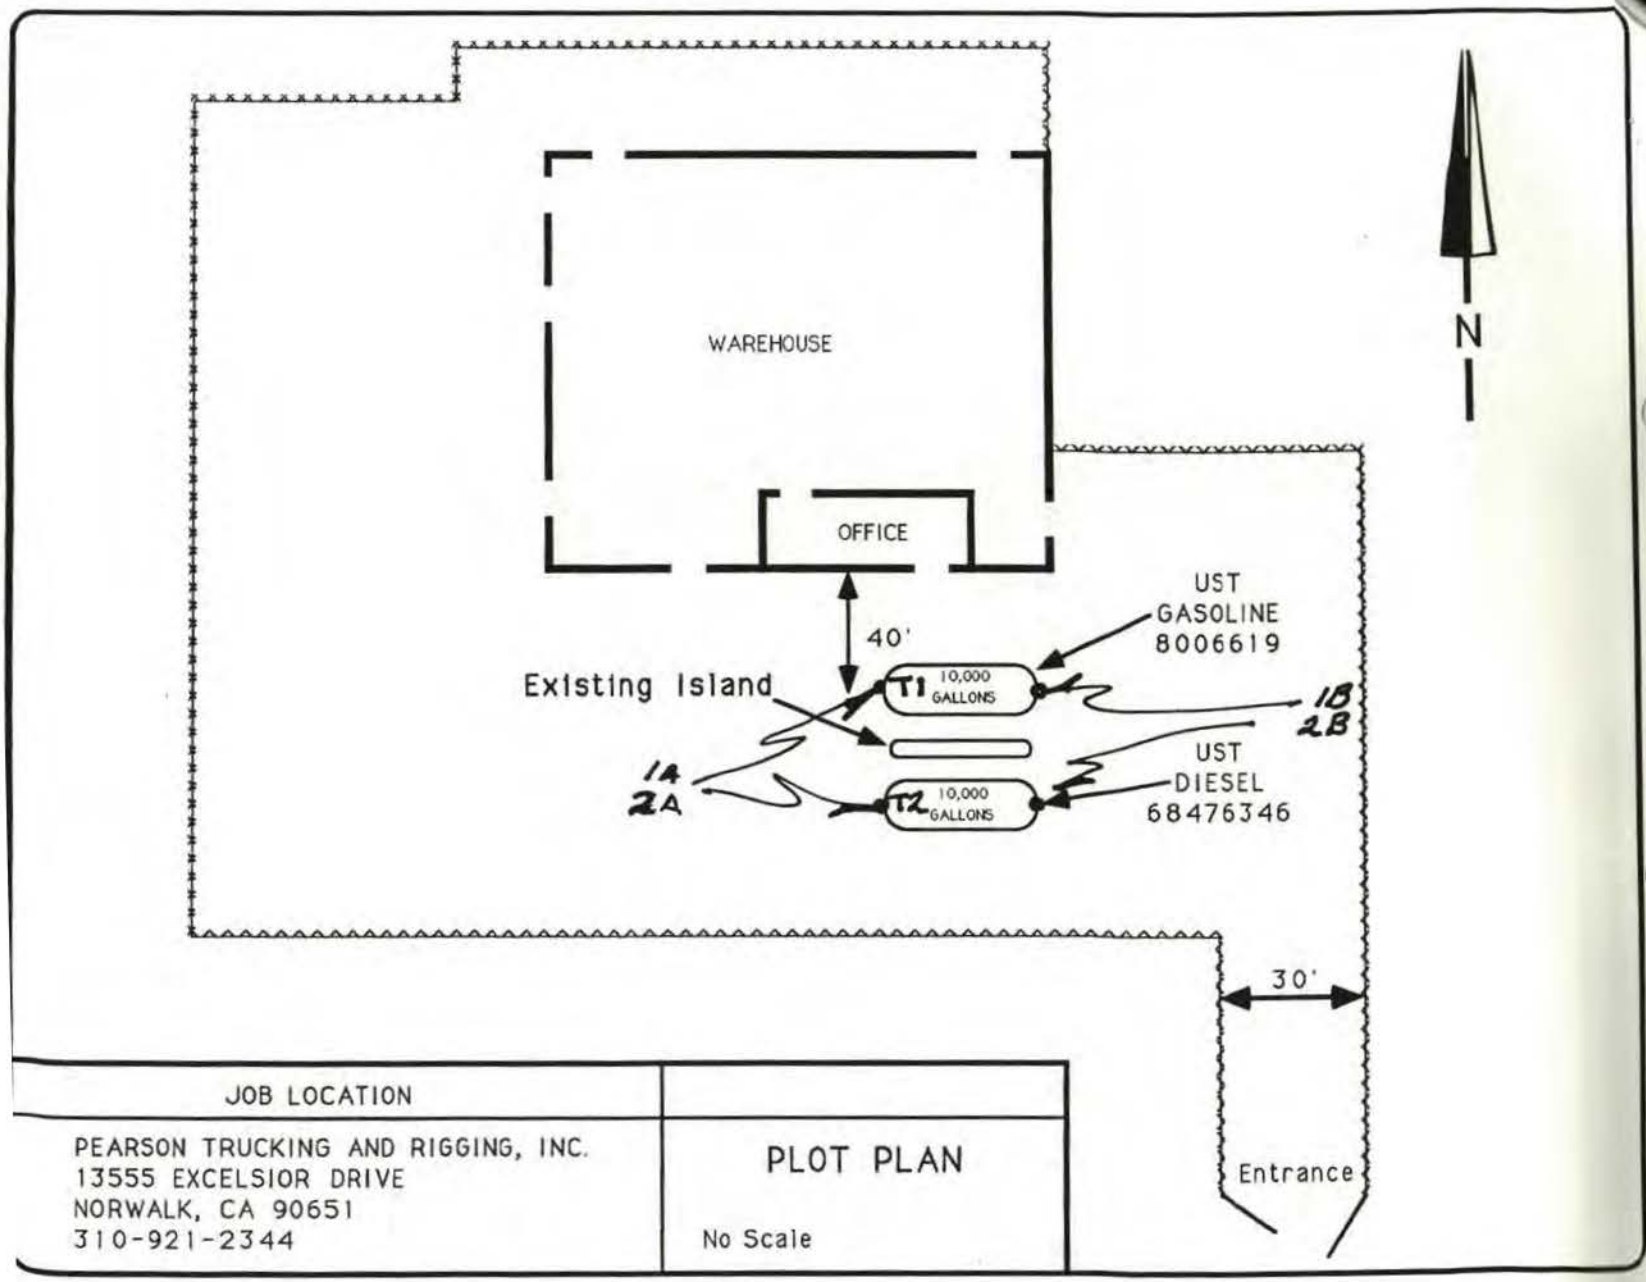
To satisfy the permanent closure requirements for underground storage tanks previously storing hazardous materials, site integrity must be demonstrated by the analysis of soil samples and, if applicable, groundwater samples as outlined below. These requirements are in addition to the conditions listed on the Application for Closure or contained in an approved Closure Plan.

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

SP	Depth(s)	Compounds	Analysis Method
			EPA METHODS
1A 1B	2-4' BELOW TANK INVERT	TPH & BTEX	8015(m) GAS
			8020
2A 2B	2-4' BELOW TANK INVERT	TPH & BTEX	8015(m) DIESELS
			8020
SAMPLE 2-4' BELOW ALL PRODUCT PIPING EVERY 20' IN LENGTH BEGIN AT THE DISPENSERS		TPH & BTEX	8015(m) GAS OR DIESEL AS IS APPLICAT

Cont'd on Page 2



JOB LOCATION	
PEARSON TRUCKING AND RIGGING, INC. 13555 EXCELSIOR DRIVE NORWALK, CA 90651 310-921-2344	PLOT PLAN No Scale

3. All soil samples obtained shall be discrete, undisturbed and unexposed prior to analysis. The method used to obtain the samples and the date of sampling shall be included in the final report.

4. If groundwater is encountered during sampling, a groundwater monitoring well shall be established at the most downgradient sampling point. The well shall be developed by removing a minimum of four well volumes and a groundwater sample shall be obtained and analyzed.

5. The analytical results for all soil samples shall be expressed milligrams per kilogram (mg/kg), or micrograms per kilogram (ug/kg) as appropriate. Practical quantitation limits of 5-10 ug/kg (ppb) for volatile organics and 1 mg/kg (ppm) for the petroleum hydrocarbons must be achieved by the laboratory. Analytical results for groundwater samples shall be expressed in ug/l (ppb) and practical quantitation limits of .5-5 ug/l (ppb) for volatile organics, and 1 mg/l (ppm) for petroleum hydrocarbons must be achieved by the laboratory.

6. Analytical results shall be reported on laboratory letterhead and shall include the following information: a) The date the analysis was conducted; b) The method of extraction (if applicable); c) Detection limits for each analytical procedure and determiantion; d) The method of analysis; e) Signature of chemist certifying results.

7. All soil/groundwater samples obtained shall be handled and transported to laboratory in strict accordance with applicable EPA regulations utilizing chain-of-custody procedures. Chain-of-custody documentation shall be included in the final report.

8. If the soil/groundwater analysis indicates undefined contamination at the facility, additional sampling shall be required to define the vertical and lateral extent present.

9. A final report that contains all of the above required information shall be submitted to the office above within one (1) month from the sampling date or 180 days from the date of this permit, whichever is earlier.

Tank Information

The two atmospheric underground storage tanks were located in front of this building near the southwest corner in the driveway leading to the offices. Both tanks were carbon steel and 10,000 gallons in size. The tank nearest the building was an unleaded fuel tank and the tank furthest away was a diesel tank. The dispenser island was situated above and between the two tanks. The fill end of the tanks was to the east and the turbine pump end of the tanks with supply to the dispenser was to the west. (See attached site map.)

The plans for the installation of the tanks were approved on December 11, 1981 and the installation date was on or about February 1, 1982, which made them eleven years and seven months old as of September 1993. Both tanks were in very good condition upon removal, with no apparent leaks or serious corrosion. These tanks were removed at about 9:00 a.m. on September 9, 1993. Soil sampling from beneath this tank location followed immediately at 10:00 a.m. The disposal documents (signed through receiving facility) can be found later in this report (see Section K).

D. Tank Preparation

The 10,000 gallon diesel tank was cleaned first, followed by the unleaded tank. The process included triple rinsing and removal of rinseate followed by testing for the lower explosive limit (LEL). Although already safed, this procedure was followed by placement of dry ice in the tank (minimum 15 lbs/1000 gallons capacity) as an added safety precaution. The LEL was then measured again, confirmed safe by the inspector, and a cold chisel used to put a square hole in the top of the tank from which a high pressure washer could be used to triple rinse again. The rinseate was evacuated into the same vacuum truck and hauled by Cal-Vac Environmental, Inc. to Crosby & Overton, Inc. in Long Beach, California. (See Nonhazardous Waste Data From No. 805296, attached.)

Both tanks were sampled using this same monitoring instrument prior to triple rinsing. The results showed that the organic vapor concentration within each tank was below 700 ppm (measured as methane) so degassing under SCAQMD Rule 1149 was not required.

E. Tank Removal

The tanks, once clean, were inspected by a Certified Industrial Hygienist, Mr. Dan Napier, Certificate No. 2267. Each tank was certified clean and organic vapor free on September 8, 1993. The tanks were removed following on-site inspection and approval by the County of Los Angeles Fire Department. The on-site witness from the Fire Department was Mr. John Mazzocco. The tanks were removed from the excavation site using an appropriately sized crane and lifted onto flatbed trailers. They were then transported to B&D Salvage in El Monte for disposal on September 10, 1993. Attached is a copy of the Certificate of Disposal/ Destruction, and the shipping documents associated with the tanks' arrival at B&D Salvage.

The excavated soil was sampled every 15 minutes using an organic vapor analyzer or equivalent instrument pursuant to SCAQMD Rule 1166. All of these samples resulted in readings indicating that organic vapors were not detected.

Certified Industrial Hygienist Certificate

Survey Requested by: Cal-Van

Owner of UST: Pearson Trucking + Rigging

Date of survey: 9/8/93

Tank Description: 2 Steel

Capacity: 2 @ 10,000 Gallons

Last known Contents: Diesel Gasoline

Location of Tank: 13555 Excelsior Dr Norwalk, CA

Test Method: direct instrument reading
Calibration
Date 9/8/93 Inst# HNU

Time Survey Completed: 1800

Instructions: Remove tank and immediately place on the transport vehicle. Immediately transport to site of demolition.

The above tank or tanks have been triple rinsed, or the equivalent, pressure wash with minimum 3000-psi water pressure. The Environmental Protection Agency's cleaning criteria for empty containers (40 CFR 261.7 Residues of Hazardous Waste in Empty Containers) was used by Dan Napier & Associates as an appropriate means of ascertaining the cleanliness of the equipment. According to 40 CFR 261.7:

> A container or inner liner removed from a container that has held an acute hazardous waste listed in EPA 261.31,32,33E (EPA HW No F, K, P, U) is empty if it has been triple rinsed using a solvent capable of removing the commercial chemical product or it has been cleaned by another method that has been shown in the scientific literature to achieve equivalent removal.

The above tank(s) has (have) been tested and the Lower Explosion Level (LEL) is equal to or less than 0% (zero percent).

"The undersigned acknowledges receipt of this Certificate under Section 2-3 of NFPA 306-1980 and understands conditions and limitations under which it was issued."

Signed Richard L. Bubb/yo 9-8-93
Company Date

This Certificate is based on conditions existing at the time the inspection herein set forth was completed and is issued subject to compliance with all qualification and instructions.

This letter is to certify that on September 10, 1993, TWO 10,000 gallons underground tanks was removed from above mentioned and transported by truck to our facility and destroyed on our property.

B&D AUTO

Craig Samples
Manager

Soil Sampling

Following the removal of the underground storage tanks, two soil samples were collected below the end of each tank. One soil sample was collected [illegible] feet below the tank invert. Samples were collected in previously undisturbed and unexposed natural soil and collected by excavating with a backhoe. The samples collected below the tank invert were designated as 1A, !B, 2A and 2B. These samples were obtained on September 9, 1993. The attached site sampling map indicates the location of the soil samples collected. The soil samples collected were placed in clean brass 1¼ inch sleeves, each 6 inches long. No head space was allowed in these sleeves. The ends of the samples were immediately wrapped with teflon film and sealed with plastic caps. The soil samples were then immediately refrigerated for transport. The samples were transported to Mobile Labs, Inc., a state certified laboratory, using appropriate chain-of-custody procedures. (Chain of Custody forms are attached - see Section G.) Sample 2A indicated concentrations above 1,000 ppm TPH by EPA Method 8015 modified for diesel. As a result, a site assessment/remedial action workplan was developed.

In correspondence completed on September 10, 1993, Mr. B. J. Atkins presented Mr. J. Ofo of the Waste Management Division a workplan for assessment and remediation of the site. This workplan included excavation and removal of the diesel contaminated soil to Gibson Environmental in Bakersfield, California, to be used in their asphalt recycling process. Mr. Ofo agreed that this workplan was expected to be effective and cost-efficient. Mr. Atkins is 40-hour HAZWOPER certified as an On-Scene Incident Commander and supervised this assessment/remediation following a site-specific health and safety plan.

On September 14, 1993 at 8:45 a.m. four samples were taken from the southwest corner of the excavation around and below the point where sample 2A was taken. 2A-18 was sampled at the center of the remediation, 18 feet below the surface or about 2 feet below the original sample 2A. Sample 2A-S-14 was sampled on the southern side wall of the excavation at 14 feet. Sample 2A-NE-16 was taken from the northeast portion of the remediation (near the center of the excavation, directly below where the dispenser was located) at a depth of 16 feet. Sample 2A-W-14 was sampled at the west sidewall at a depth of 14 feet. The soil samples confirmed that total petroleum hydrocarbons and diesel were found to be below the analytical detection limits.

Laboratory Analysis of Samples

All samples were analyzed according to the requirements in the Closure Permit.

Samples 1A and 1B were analyzed for total petroleum hydrocarbons and benzene, toluene, ethylbenzene and xylene using EPA Method 8015 modified for gasoline and EPA Method 8020. Samples 2A and 2B were also tested for total petroleum hydrocarbons and benzene, toluene, ethylbenzene and xylene using EPA Method 8015 modified for diesel and EPA Method 8020. Because the dispenser island was located between and above the two tanks which were approximately 3 feet from one another, the piping run was much less than 20 feet, and a dispenser island sample was deemed not applicable. Further, significant contamination would have been evident in the samples taken below the tanks (i.e., sample 2A-NE-16 showed non detect).

Samples 1A, 1B and 2B were all found to be below the analytical detection limits. Sample 2A indicated 8 ppm xylene and 1830 ppm total hydrocarbons measured as diesel. The laboratory analytical reports are attached for your review. Because sample 2A was above the threshold for remediation and the excavation was able to be sealed off from public access, the hole was left open and a larger extend-a-hoe was brought in to establish the extent of migration of contaminants.

Geology

Since all excavation was performed by a backhoe and organic vapor analysis showed no exposure was taking place during tank excavation, no geologic logs were completed. No unique site features were encountered. Sampling points can be found on the Site Map in Section A of this report.

Soil lithology included clayey sand with some cobbles for the first 8-10 feet below ground surface. From 10-18 feet the soil can best be described as sandy clay with few cobbles.

Hydrogeology

No groundwater was encountered during the site excavation. The subject site is characterized as having relatively deep groundwater. Information obtained from the Department of Public Works, Hydraulic and Water Conservation Division - Records Unit indicates that depth to groundwater in this vicinity is 85.5 feet below ground surface with a site elevation of 73.8 feet above sea level. The depth to groundwater was established at the nearest well, No. 1051.W located at the fire station at the intersection of Carmenita and Alondra.

Groundwater was not encountered at depths sampled and no significant amounts of free product were observed. The soil samples collected were observed to be odorless and without discoloration with the exception of 2A which did have a slight diesel odor.

Well data from the Los Angeles County Flood Control District, Water Conservation Division, shows that the original depth of this well was 1,250 feet, and it is plugged back to 1,230 feet. The perforated interval is between 336 feet and 1,280 feet. The depth to groundwater noted above is the most current measurement dated April 30, 1992. The historic high groundwater level appears to be 50.5 feet below ground surface, measured on November 30, 1967. This well is the closest known groundwater well to the project site.

Conclusions and Recommendations

The area in which the former tanks were located will be used as driveway/parking area for now and in the foreseeable future. Based on the analytical results it appears that the release was limited to a localized area directly around the tank, probably due to a small chronic leak in the turbine pump piping near the surface.

The remedial action taken in response to hydrocarbons detected in Sample 2A, have resulted in no further significant hydrocarbon contamination in the soils below or around these 10,000 gallon tanks. With the exception of the 6-9 cubic yards of contaminated soil, which was disposed at Gibson Environmental, the balance of the excavated clean soil was used to backfill the excavation. The subject excavation was backfilled and recompacted to a minimum of 90% relative compaction.

Photographic documentation of the removed tanks and pit excavation are attached hereto.

It is the conclusion of the parties involved in the project that this site is closed as "clean." It is recommended that the Department of Public Works Waste Management Division review and concur with this finding and issue a closure letter for this property. No additional work (assessment or remediation) is deemed necessary for this site or project.

Please contact the undersigned if you require any further information on this project.

Respectfully submitted,

TO BE COMPLETED BY THE DEPARTMENT OF PUBLIC WORKS
NT TO SECTION 11.80.070B, LOS ANGELES COUNTY CODE, PERMISSION IS
D TO PROCEED WITH THE CLOSURE DESCRIBED ABOVE SUBJECT TO THE ATT
IONS AND LIMITATIONS [X]. THIS PERMIT EXPIRES 180 DAYS FROM TH

closure report shall be submitted to the County of Los Angeles epartment of Public Works, Waste Management Division, .O. Box 1460, Alhambra, California 91802-1460, containing:

1. File number of facility and closure permit number.

2. Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets, and north arrow.

3. Description of methods for obtaining, handling, and transporting samples.

4. Time and date samples were obtained.

5. Soil sampling certification (including but not limited to soils classification, boring logs, sample procedures, sample locations, initiating chain-of-custody, and groundwater location) for UST closure shall be certified by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils. The certification must clearly state that all work was performed under the supervision of the person signing.

. Chain-of-custody documentation initiated by person obtaining sample through person at CAL/EPA Department of Toxic Substance Control certified laboratory.

. Disposal destination of tanks and evidence of legal disposal.

. Analysis results by a State certified laboratory submitted on laboratory letterhead showing analysis date, methods of extraction, and methods of analysis.

. Documentation as to depth of groundwater at facility.

. Manifests to document hazardous waste disposal of any removed soil and tank rinseate.

Any observations of site contamination.

Remedial action plan to mitigate contamination.

Report to be signed by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils.

PART 1 OF 2

To satisfy the permanent closure requirements for underground storage tanks previously storing hazardous materials, site integrity must be demonstrated by the analysis of soil samples and, if applicable, groundwater samples as outlined below. These requirements are in addition to the conditions listed on the Application for Closure or contained in an approved Closure Plan.

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

Tank Information

The two atmospheric underground storage tanks were located in front of this building near the southwest corner in the driveway leading to the offices. Both tanks were carbon steel and 10,000 gallons in size. The tank nearest the building was an unleaded fuel tank and the tank furthest away was a diesel tank. The dispenser island was situated above and between the two tanks. The fill end of the tanks was to the east and the turbine pump end of the tanks with supply to the dispenser was to the west. (See attached site map.)

The plans for the installation of the tanks were approved on December 11, 1981 and the installation date was on or about February 1, 1982, which made them eleven years and seven months old as of September 1993. Both tanks were in very good condition upon removal, with no apparent leaks or serious corrosion. These tanks were removed at about 9:00 a.m. on September 9, 1993. Soil sampling from beneath this tank location followed immediately at 10:00 a.m. The disposal documents (signed through receiving facility) can be found later in this report (see Section K).

Tank Preparation

The 10,000 gallon diesel tank was cleaned first, followed by the unleaded tank. The process included triple rinsing and removal of rinseate followed by testing for the lower explosive limit (LEL). Although already safed, this procedure was followed by placement of dry ice in the tank (minimum 15 lbs/1000 gallons capacity) as an added safety precaution. The LEL was then measured again, confirmed safe by the inspector, and a cold chisel used to put a square hole in the top of the tank from which a high pressure washer could be used to triple rinse again. The rinseate was evacuated into the same vacuum truck and hauled by Cal-Vac Environmental, Inc. to Crosby & Overton, Inc. in Long Beach, California. (See Nonhazardous Waste Data From No. 805296, attached.)

Both tanks were sampled using this same monitoring instrument prior to triple rinsing. The results showed that the organic vapor concentration within each tank was below 700 ppm (measured as methane) so degassing under SCAQMD Rule 1149 was not required.

The tanks, once clean, were inspected by a Certified Industrial Hygienist, Mr. Dan Napier, Certificate No. 2267. Each tank was certified clean and organic vapor free on September 8, 1993. The tanks were removed following on-site inspection and approval by the County of Los Angeles Fire Department. The on-site witness from the Fire Department was Mr. John Mazzocco. The tanks were removed from the excavation site using an appropriately sized crane and lifted onto flatbed trailers. They were then transported to B&D Salvage in El Monte for disposal on September 10, 1993. Attached is a copy of the Certificate of Disposal/ Destruction, and the shipping documents associated with the tanks' arrival at B&D Salvage.

The excavated soil was sampled every 15 minutes using an organic vapor analyzer or equivalent instrument pursuant to SCAQMD Rule 1166. All of these samples resulted in readings indicating that organic vapors were <u>not detected</u>.

ructions: Remove tank and immediately place on the transport vehicle. Immediately transport te of demolition.

The above tank or tanks have been triple rinsed, or the equivalent, pressure wash with imum 3000-psi water pressure. The Environmental Protection Agency's cleaning criteria for ty containers (40 CFR 261.7 Residues of Hazardous Waste in Empty Containers) was used by Dan ier & Associates as an appropriate means of ascertaining the cleanliness of the equipment. ording to 40 CFR 261.7:

> A container or inner liner removed from a container that has held an acute hazardous waste listed in EPA 261.31,32,33E (EPA HW No F, K, P, U) is empty if it has been triple rinsed using a solvent capable of removing the commercial chemical product or it has been cleaned by another method that has been shown in the scientific literature to achieve equivalent removal.

The above tank(s) has (have) been tested and the Lower Explosion Level (LEL) is equal to or han 0% (zero percent).

ndersigned acknowledges receipt of this Certificate Section 2-3 of NFPA 306-1980 and understands ons and limitations under which it was issued."

Richard L. Bartlett 9-8-93

CONC = Spiking Concentration; ACP % = Acceptable Range of Percent; %RC = % Recovery

REQUIREMENTS

Provide details of corrective actions in any out of control events (e.g., re-calibration, blank contamination, etc.).

Analytical results are not to be blank adjusted.

Lowest concentration injected for initial calibration should not exceed three times of laboratory MDL.

Chemical standards for QC check samples and calibration should be obtained from different supply sources

HAZARDOUS MATERIALS UNDERGROUND STORAGE
CLOSURE CERTIFICATION
FACILITY LOCATION: 13555 Excelsior Drive
CLOSURE APPLICATION NUMBER 70295

This office has reviewed the final closure report dated October 20, 1993 required as a part of the subject closure permit. Based on the information submitted, we find that all closure requirements have been completed. With the provision that the information provided to this agency was accurate and representative of existing conditions, it is our position that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at this site. Nor does it relieve you of the responsibility to clean up existing, additional, or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this agency of any changes in report content, future contamination findings, or site usage.

If you have any questions regarding this matter, please contact Tan Phan of this office at (818) 458-3513, Monday through Thursday, 7:00 a.m. to 5:30 p.

Very truly yours,

T. A. TIDEMANSON
Director of Public Works

Carl W. Sjoberg
Chief, Industrial Waste Planning & Control
Waste Management Division

INDUSTRIAL WASTE DISPOSAL PERMIT CONDITIONS AND LIMITATIONS

ON-SITE DISPOSAL – PUBLIC SANITARY SEWER

posal of industrial wastewater to the public sanitary sewer system shall be limited to the flow rate indicated below:

] a. Local Sewer. The maximum permitted peak flow rate to the sewer shall be 7.5 gallons per minute (gpm).
] b. Trunk Sewer. Maximum permitted daily flow to the sewer shall be no greater than 25% in excess of the value on line 16 of the attached Permit for Industrial Wastewater Discharge.

treatment, monitoring and control facilities required under this permit shall consist of the system(s) indicated belo

] a. Sampling point prior to combining industrial wastewater flow with domestic wastewater.
] b. Final gravity separator (clarifier) 1500 gallon capacity, 3 stage.
] c. pH measurement and recording system.
] d. Automatic pH control.
] e. Flow measurement.
] f. Automatic rainwater diversion system with alarm capable of diverting storm flow in excess of the first 0.10 inch of rain from the sanitary sewer system.
] g. _____

strial wastewater shall at all times meet the following effluent quality limitations prior to discharge to the sanita
er system:

a. As specified in **Part D** -- Effluent Quality Limitations.
b. Additional quality limitations: _____

permitee shall submit the following periodic reports:

a. Self-monitoring and/or industrial wastewater treatment surcharge reports as may be required by the Sanitation Districts of Los Angeles County. ***NOTE: These reports are to be submitted directly to Sanitation Districts.***
b. Self-monitoring compliance reports as described in **Part E** of this permit.

quired industrial wastewater collection, pretreatment, monitoring, disposal and sampling facilities must be cordance with approved plans and prior to initiating any discharge to the sewer system.

Dear Mr. Stacy:

APPLICATION FOR INDUSTRIAL
WASTEWATER DISPOSAL PERMIT (A93366)
13555 EXCELSIOR DRIVE, NORWALK

The application/plans you have submitted have been reviewed by this office, and are NOT approved because additional information is required to allow proper evaluation of your operations and their possible effects on the sewerage system and environment. The plans are hereby returned less one reference copy for our file. Please revise your submittal in accordance with the items indicated below:

1. Show the connection to the public sewer on the plans.

2. Show the continuation of the waste line extending out from th west side of the building.

3. Show all floor drains, floor sinks, service sinks, and wast lines and facilities for handling industrial wastewater from th point of origin to the connection to the public sewer. A equipment or facilities generating industrial wastewater must identified on plans.

4. Separate sanitary wastes originating from restrooms, lavatorie drinking fountains, etc., from industrial process wastewat until all industrial wastewater pretreatment or flow measuri steps are completed.

5. A gravity separation interceptor with sampling box is requi (County Standard 2041-0, enclosed). Provide and show on pla Per County Plumbing Code, Title 28, a trap, cleanout, and v are required. The capacity of the interceptor should be desig for minimum of 30 minutes retention time for peak flow discha rate or minimum of 510 gallons, whichever is larger.

6. Submit MSDS for all the chemicals used in the industrial proc

7. Provide and show on plans all storage areas for chemicals an waste materials stored at the subject facility, with a tank/

such materials may potentially enter the sewer syst
contaminate the soil. Spill containment should be design
the volume of the largest tank or 10 percent of the drum
(whichever is greater), plus 6 inches of rainfall ov
containment area (if outdoors). Submit a typical detail
containment curb and specify the materials of constructio

8. Interior walls and floors within all spill containment
shall be cleaned, repaired, and sealed with an epoxy type
which is compatible with materials located within said
Provide this office with manufacturer's literature of s
sealant and indicate on drawing areas to be sealed.

9. The contact joint for spill containment walls or
constructed on existing concrete, masonry, or asphalt s
bonded to the existing surface. Provide this offic
manufacturer's literature of the selected bonding age
indicate on drawing areas to be bonded.

10. No floor drains shall be within spill containment areas.

11. Place the name and address of the company having the was
discharge on the lower right-hand corner of each sheet
plans.

12. Please return four sets of plans and all supporting info
to this office within 30 days from the date of this lett

If you have any questions regarding this matter, please
Mr. Orville L. Sabado of this office at (818) 458-3557, Monday
Thursday, 7:00 a.m. to 5:30 p.m.

Very truly yours,

DEPARTMENT OF PUBLIC W
WASTE MANAGEMENT DIV

Industrial Waste Disposal Permit
13555 Excelsior Drive
Norwalk, CA 90650

r Mr. Esfandi:

s letter is in reference to our application for an Industrial
te Disposal Permit at the above offsite location. The plans
accompanying cover letter were hand delivered to your office
April 21, 1994.

derstand that there is a backlog of applications and you are
cessing them as quickly as possible. But is there any
sibility that our application could be expedited?

t Norm Reeves Honda have found ourselves in a particularly
ard position. We are in the mist of major construction and
deling at our main facility. It has become increasingly
icult to rise to the demand of providing washed and detailed
and used cars at this facility.

intent was to be operational at the Excelsior offsite by no
eliminating this present condition.

eems that no matter how well a company attempts to plan for
ible scenarios, there are inevitably unforseen circumstance
occur relative to contractors, bids, completion dates, tim
es, etc.

he contractors and subcontractors at our main facility proc
their schedules, the workable space for our car washing ar
ling activities continue to diminish. Our operations are
aching a gridlock.

fice to assist us in the predicament we find ourselves in,
will be greatly appreciated.

ank you for your consideration.

ncerely,

e Stacy
stems & Operations Manager

County of Los Angeles
Department of Public Works
P.O. Box 1460
Alhambra, Ca. 91802-1460

Gentlemen:

Norm Reeves Honda Superstore is opening a off-site location to Distribute Parts,Repair Used Cars, Pre-deliver New Cars, wash and detail new and used cars. The process of washing cars is why we are applying for a Industrial Waste Disposal Permit. We will be installing a wash area and a Clarifier to intercept grease and dirt. Our plan is to wash cars with soap and water and the run off will go into the Clarifier. We would use approximately 1 gallon of soap per day. We will also be washing the engines of our used cars and that requires engine degreaser to remove the dirt. We would use about .5 gallons of degreaser per day. Our Clarifier will be checked every six months for build up of sludge and will be pumped out when necessary.

If anyone has any questions don't hesitate to give me a call at (310)402-3844 ext.432.

Sincerely,

Lee Stacy
System and Operation Manager

To Whom It May Concern:

Our firm is currently performing a Phase I Environmental Site Assessment on a site located in Los Angeles County. We are required to investigate current and past use of the property and adjacent properties to help determine if there have been any recognized environmental concerns that have impacted the following sites:

14838 & 14850 Carmenita Road, Norwalk, California 90650

If you have any information regarding septic systems, industrial wastes, hazardous wastes or permits for hazardous materials for the above-mentioned properties, please fax to 909-803-0403 or email richardm@highpointenv.com. If you have any questions or need additional information, please call me at 909-600-8827.

No records found 5/4/17

Sincerely,

Richard McCondichie, EP

Additional Comments:

Inspection Summary

Comments: This was the annual inspection for the recreational vehicle (RV) disposal station. Facility provides a variety of services to RV owners who rent spaces out, including inside/outside storage, window washing, tire pressure check/filling, and vehicle washing. The latter service includes an additional charge so is not utilized much according to the contact. Wash pad is covered so rainwater intrusion is not an issue. Situs has a single disposal station in a 2-foot by 2-foot elevated concrete berm of approximately two inches. Port is sunken into the pad to minimize sewage spills and the berms prevent rainwater intrusion. Wash hose appears to have a back flow preventer installed at the hose connection to the spigot. All signs prohibiting illegal dumping and drinking the water from the hose are posted.

Date of Inspection: 11/4/2016 12:02 pm to 1:01 pm Duration: Hr Inspection Type: General Task Type: General Inspection

Additional Comments:

Inspection Summary

Comments: RV Liquid waste disposal inspection
This facility goes under the DBA of RABSIO but is still STC Storage. This is a full service storage facility. Employees are the only ones authorized to discharge into the disposal drain. Additionally the facility is locked and video monitored after office hours. Signage is appropriate. Backflow preventer installed. Berm intact around RV drain. No issues noted at the RV dump station. There is a clarifier connected to the covered wash pad. This is a permit exempt connection.

CSDLAC warning sign delivered?	YES

Additional Comments:

Inspection Summary

Comments: This is a RV storage area operated by the same owner. According to the contact, the business has been very slow since last year so not alot of washing is done at the facility. The three stage clarifier and the sample box looked fine. Field result was: pH=7.4, Q=0 GPM, and colorless with black particulates. No issues were observed at the disposal area. Disposal site was well maintained; it was bermed all around and clean. No strong odor was observed from the disposal site.
Findings: RV inspection

Date of Inspection: 6/2/2011 1:57 pm to 1:57 pm Duration: 1.00 Hr Inspection Type: Annual Task Type: Recreational Vehicle Disposal Site Inspection

Findings: Inspection of RV Liquid waste disposal station. No issues noted

---

Date of Inspection: 6/8/2009 10:50 am to 10:50 am Duration: 1.00 Hr **Inspection Type:** General **Task Type:** General Inspection

Sample Location: 017096A Task ID: 1170800 Inspection ID: 235500

Inspector(s): Neil Tran **Contact(s):**

Additional Comments:

Inspection Summary
Comments: .
Findings: No one was here. Will f/up for an inspection

Date of Inspection: 8/26/2008 8:00 am to 9:00 am Duration: Hr **Inspection Type:** General **Task Type:** Recreational Vehicle Disposal Site Inspection

Sample Location: 017096A Task ID: 1129546 Inspection ID: 216084

Inspector(s): Georgia Blaszcak **Contact(s):** Judy Beutscher Owner

Additional Comments:

Inspection Summary
Comments: The new dump station has been installed and waitng for final approval from DPW. Everything looks OK for the sewer issue. They do not have a backflow device on the incoming water. Looking cap is not really needed since the area is manned and operated only by owner. (See attachment).

Date of Inspection: 6/6/2008 10:00 am to 11:30 am Duration: Hr **Inspection Type:** General **Task Type:** General Inspection

Sample Location: 017096A Task ID: 1122173 Inspection ID: 214289

Inspector(s): Georgia Blaszcak **Contact(s):**

Additional Comments:

Inspection Summary
Comments: Spoke to the manager, Jerry. Owner was not in. Advised him of referral from DPW inspector, Aziz, who said he saw fecal material in the sample box. Contact said he had scheduled pumping this week. Company will need to install separate washpad with backflow device. Company to comply. Advised Jerry to contact city building dept for appropiate permits.

Inspection Results Summary

Date of Inspection: 5/7/2008 - 5/1 11:00 am to 11:30 am Duration: Hr **Inspection Type:** Biennial **Task Type:** Recreational Vehicle Disposal Site Inspection

Sample Location: Task ID: 1108754 Inspection ID: 209850

Inspector(s): Georgia Blaszcak **Contact(s):** Judy Beutscher Owner

Inspection Results:

Recreational Vehicle wastewater dis|

Inspection Area	Result
Sewage Spill Containment?	NO
Backflow device installed?	NO
Cleanup water hose present?	YES
No drinking water warning sign posted?	NO
Disposal drain cap locked at close of business?	NO
Description of cap securing method	Personnel ONLY is allowed to dump
Disposal drain cap secured by other means?	YES
Adequate rainwater diversion control?	YES
CSDLAC warning sign installed?	YES
Permit issued and information package delivered?	NO
Reviewed permit requirements with contact?	YES
CSDLAC warning sign delivered?	YES

Enforcements/Violations:

Date	Violation	Ordinance Section	Substance	Limit	Result	Comments
5/14/08	Interceptor Loaded	412 Failure to Maintain Pretreatment Equipment				Clarifier needs pumping Violation Dismissed, violation date is before 10/1/2013 and has no related enforcement. DJS 07-09-2014

Additional Comments:

Inspection Summary

Comments: Site does not have a backflow device. Discussed with P.Lo who suggested that a referral be sent to the DHS. will submit.The clean-out after the sample box will be allowed as the dump area per B.Garrett.. Checked sample box and noted no evidence of any sewage in box. The personnel are the only people allowed to access the dump drain. There is no berm around the drain and there are no r/w intrusion issues. Recommended to contact to have a berm to keep any splashes of sewagecontained. CSD sign posted. Sample box full of sludge and needs pumping.

Date of Inspection: 6/21/2006 12:00 am to 12:00 am Duration: Hr **Inspection Type:** Historical **Task Type:** Historical Inspection

Sample Location: 017096A Task ID: 91813 Inspection ID: 91813

Inspector(s): Georgia Blaszcak **Contact(s):**

Task Comments:

INSPECTION REQUEST PER FRED CANNIZZARO WHO INDICTED RV PERMIT WAS NOT FILLED IN CORRECTLY. SUBMITTED PER REQUEST. GAVE YELLOW COPY TO CONTACT FOR FILES. CSD WARNING SIGN POSTED. DEPT OF HEALTH REFERRAL WAS TYPED UP AND MAILED.

solidated Contingency Plan provides businesses a format to comply with the emergency planning ents of the following three written hazardous materials emergency response plans required in California:

Hazardous Materials Business Plan (HSC Chapter 6.95 Section 25504 (b) and 19 CCR Sections 2729-273

Hazardous Waste Generator Contingency Plan (22 CCR Section 66264.52), and,

Underground Storage Tank Emergency Response Plan and Monitoring Program (23 CCR Sections 2632 nd 2641).

at is designed to reduce duplication in the preparation and use of emergency response plans at the same e the coordination between facility response personnel and local, state and federal emergency responder cy. Use the chart below to determine which sections of the Consolidated Contingency Plan need to be co ty. If you are unsure as to which programs your facility is subject to, refer to the Business Activities Page.

PROGRAMS	SECTION(S) TO BE COMPLETED
dous Materials Business Plan (HMBP)	Cover Page, Section I, and Site Map(s)
dous Waste Generator (HWG)	Cover Page, Section I, and Site Map(s)
ground Storage Tank (UST)	Cover Page, Sections I and II, and Site Map(s)
HWG, UST	Cover Page, Sections I and II, and Site Map(s)

the plan shall be submitted to your local CUPA and at least one copy of the plan shall be maintai use in the event of an emergency and for inspection by the local agency. Describe below where a ngency Plan, including the hazardous material inventories and Site Map(s), is located at your business:

III. EMERGENCY RESPONSE PLANS AND PROCEDURES

otifications

ness is required by State Law to provide an immediate verbal report of any release or threatened release material to local fire emergency response personnel, this Unified Program Agency (CUPA or PA), and th mergency Services. If you have a release or threatened release of hazardous materials, immediately ca

FIRE/PARAMEDICS/POLICE/SHERIFF
PHONE: 911

e local emergency response personnel are notified, you shall then notify this Unified Program Agency an mergency Services.

ed Program Agency:	(323) 890-4317
e of Emergency Service:	(800) 852-7550 or (916) 262-1621
esponse Center:	(800) 424-8802

Information to be provided during Notification:

- Your Name and the Telephone Number from where you are calling.
- Exact address of the release or threatened release.
- Date, time, cause, and type of incident (e.g. fire, air release, spill etc.)
- Material and quantity of the release, to the extent known.
- Current condition of the facility.
- Extent of injuries, if any.
- Possible hazards to public health and/ or the environment outside of the facility.

mergency Medical Facility

t the local emergency medical facility that will be used by your business in the event of an accident or used by a release or threatened release of hazardous material.
