SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board?s review found that more than one-third of the region?s active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✓ Library of Congress
- ✓ University Publications of America
- ✓ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Andersen Environmental (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Department of Toxic Substances Control

Matthew Rodriquez
Secretary for
Environmental Protection

Barbara A. Lee, Director
9211 Oakdale Avenue
Chatsworth, California 91311

Edmund G. Brown Jr.
Governor

September 8, 2016

Mr. Noli Valera
EFI Global, Inc.
5261 West Imperial Highway
Los Angeles, CA 90045

VARIOUS SITES
PR3-090716-08

Dear Mr. Valera:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the sites/facilities referenced below.

- 14820, 14830, 14838, and 14850 Carmenita Drive, Norwalk, CA 90650
- 13555 Excelsior Drive, Norwalk, CA 90650

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: http://www.envirostor.dtsc.ca.gov/public. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

If you have any questions or would like further information regarding your request, please contact me at (818) 717-6522.

Sincerely,

Glenn Castillo/cs
Regional Records Coordinator

YARD AGREEMENT
(Required yards contained within a single lot)
Building Code, Section 505.4

The increase in building area permitted by Section 505 shall not be allowed unless the owner of any privately owned yard used as the basis of such increase has filed the following agreement:

I/We the undersigned, as owner(s) of the property located at:

Street Address: 14830 Carmenita Road Norwalk, CA

Legal Description: APN: 8069-002-066

PARCEL 3 OF PARCEL MAP 145 BER BK 145 Pg 45-46

acknowledge that the area of 41,141 square feet for the proposed construction shown on Building application No.s 01-0103/00-0783 is approved by reason of yard spaces 30.67 feet in width adjoining three (3) sides of the building as shown on the dimension plot plan (below / on reverse / attached). I/We agree to maintain this space and refrain from further construction therein as long as such yard is required for this purpose by Section 505 of Building Code.

COUNTY OF LOS ANGELES — **BUILDING AND SAFETY**

INSPECTOR COPY

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.)

Policy No. _____ Company _____

☐ Certified copy is hereby furnished.

☐ Certified copy is filed with the county building inspection department.

Date _____ Applicant _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the work involved by the permit is for one hundred dollars ($100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws.

Date 5.15.00 Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

LICENSED CONTRACTORS DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Number _____ Lic. Class _____

Contractor _____ Date _____

☒ I am exempt from the licensing requirements as I am a licensed architect or a registered professional engineer acting in my professional capacity (Section 7051, Business and Professions Code).

Lic. or Reg. No C10842 Date 5.15.00

HOME OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Section 7031.5, Business and Professions Code):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work and the structure is not intended or offered for sale (Section 7044, Business and Professions Code).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Section 7044, Business and Professions Code).

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all County ordinances and State laws relating to building construction, and hereby authorize representatives of this County to enter upon the above-mentioned property for inspection purposes.

APPLICATION FOR ELECTRICAL PERMIT

1

City of NORWALK — DEPT. OF BUILDING AND SAFETY 12700 NORWALK BLVD., NORWALK, CA 90650 (562) 929-5733

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5 Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

☐ I am exempt under Section _____, B.&P.C. for this reason

Date _____ Signature of Owner _____

LICENSED CONTRACTOR DECLARATION

I hereby affirm under penalty perjury that I licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license in in full force and effect.

WORKERS, COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☒ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: STATE FUND

Policy No. 229-00

(this section need not be completed if the permit is for one hundred dollars ($100) or less.)

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

5-25-00 | Signature of Applicant
Date

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSANDS DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.)

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

1

City of NORWALK — DEPT. OF BUILDING AND SAFETY 12700 NORWALK BLVD., NORWALK, CA 90650 (562) 929-5733

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5 Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

☐ I am exempt under Section _____, B.&P.C. for this reason

BUILDING PERMIT APPLICATION

APPLICATION FOR BUILDING PERMIT 1

City of NORWALK

DEPT. OF BUILDING AND SAFETY 12700 NORWALK BLVD., NORWALK, CA 90650 (562) 929-5733

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Section _____, B.&P.C. for this reason

Date _____ Signature of Owner _____

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license in in full force and effect.

BUILDING PERMIT APPLICATION

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Section _____. B.&P.C. for this reason

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☑ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: SCIP

Policy No. 65d135

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

03.07.01 Date | Signature of Applicant

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSANDS DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

BUILDING PERMIT APPLICATION

APPLICATION FOR BUILDING PERMIT 1

City of NORWALK

DEPT. OF BUILDING AND SAFETY 12700 NORWALK BLVD., NORWALK, CA 90650 (562) 929-5733

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Section _____, B.&P.C. for this reason

Date _____ Signature of Owner _____

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license in in full force and effect.

License Class _____ License Number _____ Expiration Date _____

Date _____ Signature of Contractor _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: _____

Policy No. _____

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date _____ Signature of Applicant _____

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSANDS DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C).

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this City to enter upon the above-mentioned property for inspection purposes.

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Section _____, B.&P.C. for this reason

APPLICATION FOR ELECTRICAL PERMIT

City of NORWALK — DEPT. OF BUILDING AND SAFETY 12700 NORWALK BLVD., NORWALK, CA 90650 (562) 929-5733

1

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5 Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

☐ I am exempt under Section _____, B.&P.C. for this reason

Date _____ Signature of Owner _____

LICENSED CONTRACTOR DECLARATION

I hereby affirm under penalty perjury that I licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Section _____. B.&P.C. for this reason

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Section _____, B.&P.C. for this reason

BUILDING PERMIT APPLICATION

APPLICATION FOR BUILDING PERMIT 1

City of NORWALK

DEPT. OF BUILDING AND SAFETY 12700 NORWALK BLVD., NORWALK, CA 90650 (562) 929-5733

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Section _____. B.&P.C. for this reason

Date _____ Signature of Owner _____

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

5/28/02 Date _____ Signature of Contractor

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☑ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: AON RISK SERVICES. #

Policy No. RMWL 612407 RMWL 527583 (CM)

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

5/28/02 Date _____ Signature of Applicant

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C).

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of the City to enter upon the above-mentioned property for inspection purposes.

#10070176

DEPT. OF BUILDING & SAFETY 12700 NORWALK BLVD., NORWALK, CA 90650 (562) 929-5733

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professional Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or though his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professional Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Section _____, B.& P.C. for this reason

RE PROPERTY ADDRESS: 14820 Carmenita

Dear Property Owner

Our records indicate that your permit(s) for the job address listed above will or has expired. The permit(s) are as follows:

Building Permit# #3CL1491 – dated 3/25/02

Please call the Building & Safety Division at (562) 929-5733 for an inspection by **February 27, 2006** or a new permit(s) will be required to finalize work on this project.

VIOLATION: Administrative Section 108.4 of the California Building Code; Final inspection required.

Please give this matter your immediate attention. If you should have any questions, please contact the Building Department, Monday through Thursday, 8:00 a.m. to 9:00 a.m., at (562) 929-5733.

Thank you,

Community development Department
Building and Safety Division.

May 17, 2001

Mr. Tony Weimholt
Norwalk Building and Safety
Norwalk, California

This correspondence is to formally request all inspections relevant to Fuji Hunt Photographic Chemicals, Inc. obtaining a T.C.O. for 14820 Carmenita Road, Norwalk, California on May 18th, 2001. As follow up to our conversation dated May 16, the following details the requested use of the premise until a final Certificate of Occupancy is permitted.

The Fuji Hunt distribution center will be limited to non-public business. Only Fuji Hunt employees will enter and occupy the space until the final C.O. is issued. In addition, the occupancy usage will be limited to the two offices highlighted on the attached floor plan and the warehouse storage. The urgent need to occupy 14820 Carmenita Road, is specific to the storage and distribution of photographic material. Fuji Hunt is forced to leave their current warehouse by May 19th due to pending construction requirements for a future tenant. All open requirements indicated by Inspector Steve Trot will be completed to Norwalk Building & Safety satisfaction by inspection of May 18th.

Thank you for your continued cooperation.

Sincerely,

Gerald Bleth
Manager, Operations

solidated Contingency Plan provides businesses a format to comply with the emergency planning ents of the following three written hazardous materials emergency response plans required in California:

Hazardous Materials Business Plan (HSC Chapter 6.95 Section 25504 (b) and 19 CCR Sections 2729-273

Hazardous Waste Generator Contingency Plan (22 CCR Section 66264.52), and,

Underground Storage Tank Emergency Response Plan and Monitoring Program (23 CCR Sections 2632 nd 2641).

at is designed to reduce duplication in the preparation and use of emergency response plans at the same e the coordination between facility response personnel and local, state and federal emergency responder cy. Use the chart below to determine which sections of the Consolidated Contingency Plan need to be co ty. If you are unsure as to which programs your facility is subject to, refer to the Business Activities Page.

PROGRAMS	SECTION(S) TO BE COMPLETED
dous Materials Business Plan (HMBP)	Cover Page, Section I, and Site Map(s)
dous Waste Generator (HWG)	Cover Page, Section I, and Site Map(s)
ground Storage Tank (UST)	Cover Page, Sections I and II, and Site Map(s)
HWG, UST	Cover Page, Sections I and II, and Site Map(s)

the plan shall be submitted to your local CUPA and at least one copy of the plan shall be maintai use in the event of an emergency and for inspection by the local agency. Describe below where a ngency Plan, including the hazardous material inventories and Site Map(s), is located at your business:

III. EMERGENCY RESPONSE PLANS AND PROCEDURES

Notifications

siness is required by State Law to provide an immediate verbal report of any release or threatened release o us material to local fire emergency response personnel, this Unified Program Agency (CUPA or PA), and the Emergency Services. If you have a release or threatened release of hazardous materials, immediately call

FIRE/PARAMEDICS/POLICE/SHERIFF
PHONE: 911

he local emergency response personnel are notified, you shall then notify this Unified Program Agency and Emergency Services.

ified Program Agency:	( ) -
ice of Emergency Service:	(800) 852-7550 or (916) 262-1621
Response Center:	(800) 424-8802

Information to be provided during Notification:

- ► Your Name and the Telephone Number from where you are calling.
- ► Exact address of the release or threatened release.
- ► Date, time, cause, and type of incident (e.g. fire, air release, spill etc.)
- ► Material and quantity of the release, to the extent known
- ► Current condition of the facility
- ► Extent of injuries, if any
- ► Possible hazards to public health and/ or the environment outside of the facility.

mergency Medical Facility

st the local emergency medical facility that will be used by your business in the event of an accident or in used by a release or threatened release of hazardous material

Arrangements With Emergency Responders

ave made special (i.e. contractual) arrangements with any police department, fire department, hospital, co
e or local emergency response team to coordinate emergency services, describe those arrangements on

Evacuation Plan

following alarm signal(s) will be used to begin evacuation of the facility *(check all which apply)*:

al ☐ Telephone *(including cellular)* ☒ Alarm System ☐ Public Address System ☒ Intercom
ers ☒ Portable Radio ☐ Other *(specify)*:

acuation map is prominently displayed throughout the facility.

ividual(s) responsible for coordinating evacuation including spreading the alarm and confirming the bus
acuated: Robert Boynton

Earthquake Vulnerability

reas of the facility where releases could occur or would require immediate inspection or isolation beca
lity to earthquake related ground motion.

lazardous Waste/ Hazardous Materials Storage Areas ☐ Production Floor ☐ Proc
ench/ Lab ☐ Waste Treatment ☐ Other:

echanical systems where releases could occur or would require immediate inspection or isolation be
ability to earthquake related ground motion.

ilities ☐ Sprinkler Systems ☐ Cabinets ☐ She
acks ☐ Pressure Vessels ☒ Gas Cylinders ☒ Tan

Emergency Procedures

Briefly describe your business standard operating procedures in the event of a release or threatened hazardous materials:

PREVENTION (prevent the hazard) - Describe the kinds of hazards associated with the hazardous mat sent at your facility. What actions would your business take to prevent these hazards from occurring? You ude a discussion of safety and storage procedures.

opane - Tanks falling over, Spilling / Leaks, Explosions, ands and Face being burned
anks Not being used Are Chained up to Fence inside ilding, Outside TANK Away From building
loves and Face equipment used when filling propane

MITIGATION (reduce the hazard) - Describe what is done to lessen the harm or the damage to person perty, or the environment, and prevent what has occurred from getting worse or spreading. What is your im onse to a leak, spill, fire, explosion, or airborne release at your business?

lear employees from building
all Ted Johnson Propane Company
all Fire Department

ABATEMENT (remove the hazard) - Describe what you would do to stop and remove the hazard. Ho e the complete process of stopping a release, cleaning up, and disposing of released materials at your fa

ll Propane Company and follow Their instruct

plan and storage map must be included with your Contingency Plan. For relatively small facilities, these docu
e combined into one drawing. Since these drawings are intended for use in emergency response situations,
es *(generally those with complex and/or multiple buildings)* should provide an overall site plan and a se
e map for each building/storage area. A blank Facility Site Map has been provided on the reverse side of this
ay complete that page or attach any other drawing(s) which contain(s) the information required below.

Site Plan: This drawing shall contain, at a minimum, the following information:

Site Orientation (north, south, etc.);
Approximate scale *(e.g. "1 inch = 10 feet".)*;
Date the map was drawn;
Locations of all buildings and other structures;
Parking lots and internal roads;
Hazardous materials loading/unloading areas;
Outside hazardous materials storage or use areas;
Storm drain and sanitary sewer drain inlets;
Wells for monitoring of underground tank systems;
Primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas;
Adjacent property use;
Locations and names of adjacent streets and alleys;
Access and egress points and roads.

COMPLETED

Storage Map(s): The map(s) shall contain, at a minimum, the following information:

General purpose of each section/area within each building *(e.g. "Office Area", "Manufacturing Area", etc.)*;
Location of each hazardous material/waste storage, dispensing, use, or handling area *(e.g. in underground tanks, aboveground tanks, storage rooms, paint booths, etc.)*. Each area shall be identifi
unique location code number, letter, or name *(e.g. "1", "2", "3"; "A", "B", "C", etc.)*;
Entrances to and exits from each building and hazardous material/waste room/area;
Location of each utility emergency shut-off point *(i.e. gas, water, electric.)*;
Location of each monitoring system control panel *(e.g. underground tank monitoring, toxic gas monitoring*

Waste Code Matrix as a spreadsheet

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Report Generation Date: 09/07/2016

IT REQUIREMENT (HAZARDOUS MATERIALS REGULATED SUBSTANCE, HAZARDOU Correction Date 12/20

Obtain a Unified Program Facility Permit by submitting a completed consolidated permit application package (CPP) (LA Co Ord. Sec. 12.50.075, 12.50 & APPLICABLE UNIFIED PROGRAM FORMS. SUBMIT THIS AP WITHIN 3

HAZARDOUS MATERIALS MANAGEMENT PLAN PROGRAM
Hazardous Materials Release Response Plan (HMRRP)
California Accidental Release Prevention Plan (Cal ARP)

D KEEPING

Correction Date 12,20,01

Implement a business plan and submit a copy to the Los Angeles County CUPA (H&S 25504).

rnia Hazardous Materials Consolidated Contingency Plan plies with the regulatory compliance matrix may be used to with the business plan and contingency plan requirement &S Code Section 25504 and 22CCR66265.51 (a).

le the following information on the hazardous materials [H&S 25504]:

Listing of the chemical name and common name of all hazardous materials [(a)(1)(3)].

Category of waste handled [a(2)].

Maximum amount of each hazardous materials handled in one year [(a)(4)].

How & where hazardous materials are handled [(a)(5)].

SIC code [(a)(6)].

Name & phone number of Emergency Coordinator [(a)(7)].

E REPORTING

Correction Date 12,20,01

the following required elements on the Emergency Plan and Procedure [H&S 25504(b)]:

mmediate notification to the administering agency and to he appropriate local emergency rescue personnel (b)(1)].

Procedures for the mitigation of a release or threatened elease to minimize any potential harm or damage to ersons, property, or the environment [(b)(2)].

vacuation plans and procedures, including immediate otice for the business site [(b)(3)].

nclude a copy of your training plan for all new mployees. [H&S 25504(c)].

REGULATED SUBSTANCES (RS) REQUIREMENTS

Correction Date ___/__

212 ☐ Submit regulated substance registration forms 2735.6) for all regulated substances greater tha threshold planning quantities established by Cal-AR [9 CCR 2740.1(a)].

■ Update the RS registration form [19CCR 2740.1(d)]:

213 ☐ Before the date on which a new RS is first present a threshold quantity in an already covered process.

214 ☐ Before the date on which an RS is first present a threshold quantity in a new process.

215 ☐ Within 6 months of a process change that requires a hazard review or offsite consequence analysis or tha the program level.

RISK MANAGEMENT PROGRAM (RMP) REQUIREM

Correction Date ___/__

216 ☐ Submit an RMP for listed RSs under the Federa program [19CCR 2745.1(a)].

217 ☐ Submit an RMP for listed RSs under Cal-ARP under Fed ARP when required by the administering [19CCR 2745.1(b)].

■ Revise and update the RMP [19CCR 2745.10 (a)]:

218 ☐ Within 5 years of its initial submission or most recent

219 ☐ Before the date on which a new RS is first preser a threshold quantity in an already covered proces

220 ☐ Before the date on which an RS is first present threshold quantity in a new process.

221 ☐ Within 6 months of a process change that re revised hazard review or offsite consequence an that alters the Program level.

222 ☐ Maintain all Cal-ARP records for at least 5 yea 25534(f)].

Participating Agency to the City of Los Angeles and Santa Monica

Noli Valera

Senior Project Manager

5261 West Imperial Highway, Los Angeles, California 90045 *310-854-6300*

Noli_Valera@efiglobal.com

Years' Experience: 10

Professional Summary:

Noli Valera is an experienced environmental professional and has been in the environmental consulting industry since 2006. His due diligence experience has included preparation of Phase I and II Environmental Site Assessments and Transactions Screen Assessments, residential, commercial and industrial property audits, dry cleaning facility audits, and groundwater, soil, and soil vapor sampling. His industrial hygiene experience has included indoor air quality and microbial investigations, asbestos/lead/PCB surveys, and hazardous material abatement oversight. He has also provided client services for regulatory compliance projects, which have included development of SPCC plans, SWPPP assessments and inspections, hazardous material reports, and emergency response plans for various clients.

Licenses and Certifications:

OSHA 40-Hour Hazardous Waste Operations Certified
California Division of Occupational Safety & Health (DOSH) Certified Site Surveillance Technician (CA, #08-4415, 2008)
California Department of Public Health (DPH) Certified Lead Sampling Technician (CA, #21468)
California Engineer-in-Training (CA, #156159, 2015)

Project Experience:

Equity Residential and AvalonBay Communities, Throughout California
Phase I ESAs/Annual Environmental Inspections
Prepared Phase I ESAs, conducted asbestos/lead based-paint surveys, and conducted annual environmental inspections for over 100 residential communities throughout California.

Bank of the West, Throughout Southern California
Phase I ESAs
Served on team preparing Phase I ESAs for over 30 Chevron-brand gasoline station properties throughout California, several of which had ongoing groundwater monitoring investigations. Conducted inspections and regulatory agency file reviews, prepared and reviewed reports.

Bay Area Oil Refinery, Contra Costa County, California
Semi-Annual Groundwater Monitoring
Served as team leader for semi-annual groundwater monitoring events at a San Francisco Bay Area oil refinery – over 300 groundwater monitoring wells were

gauged/sampled during the sampling event. Collected samples, prepared reports, and trained junior staff.

Steel Production Facility, Contra Costa County, California
Spill Prevention Control and Countermeasure (SPCC) Plan Preparation
Prepared SPCC plan for 400-acre steel manufacturing facility, which utilized various petroleum and food-grade aboveground storage tanks in their operations. Provided continuous consulting, including tank testing and tank removal oversight.

National Banking Institution, Throughout Northern and Central California
ACM Surveys and Abatement Oversight
Conducted over 75 ACM surveys and abatement oversight projects for branch offices of a national banking institution.

Former Stevedoring Facility, Los Angeles, California
Phase I/II ESA
Prepared Phase I and Phase II report for former ship repair facility near the Port of Los Angeles. Conducted soil and soil vapor assessment for former underground storage tanks (USTs) for anticipated reconstruction of property.

Dry Cleaner Facility, Burbank, California
Phase I/II ESA
Prepared Phase I/II report for shopping center, which included an active dry cleaner facility (since 1950s). The assessment, which was conducted on behalf of a potential buyer, discovered the presence of perchloroethylene (PCE) in local soils, warranting further remediation work.

Wiseburn High School, El Segundo, California
SWPPP Inspections
Conducted weekly SWPPP inspections for the Wiseburn High School construction project and administered best management practices per stormwater discharge requirements

Heather_Nilson@efiglobal.com

Years' Experience: 9

Professional Summary:

Heather Nilson has been in the environmental business since 2006 and meets the definition of an Environmental Professional (EP) as defined in the EPA All Appropriate Inquiry (AAI) regulations. Ms. Nilson is an experienced environmental professional with experience working both for regulatory agencies and in the private sector. Ms. Nilson has worked directly with clients and regulatory bodies to assess environmental conditions and has assisted in the development of plans by which to resolve such conditions. Ms. Nilson's experience includes all stages of environmental projects including Phase I environmental site assessments, soil vapor surveys (Phase II), Property Condition Assessments, Seismic Risk Assessments, and project management of ALTA Surveys.

- Phase I Environment Site Assessment
- Property Condition Assessment
- Seismic Risk Assessment
- ALTA Surveys

Licenses and Certifications:

OSHA 40-Hour Hazardous Waste Operations Certified
OSHA 8-Hour HAZWOPER Annual Refresher

Project Experience:

Firestone Boulevard - Southgate, California
Due diligence performed at a property which revealed a fill port during site inspection. In the 1940's and 1950's, the site had been identified as a historical "gas station" and "service station." Based on the observation of the fill port and historical data, a geophysical survey and soil sampling program was initiated at the site. As no contamination was encountered at the site after extensive testing, the bank loan was funded and a reserve account was establish to remove the UST post closing.

Affordable Housing Projects - California
Phase I Environmental Site Assessment Reports were conducted for various properties throughout the state of California for public agencies and private entities as potential sites for affordable housing projects. Special challenges involved with specific projects included soil sampling and pesticide testing for properties that were historically utilized for agricultural purposes.

Management of Phase I Process
Conducted numerous Phase I Environmental Site Assessments throughout California and in several states across the US. Managed local historical and regulatory research

through communications with local agencies by email and telephone. Additionally, communication is kept with sub consultants when the subject site is out of our locality in order to create smooth process for all involved.

Non-profit Housing and Education Center Assessment – Culver City, California
Due diligence performed at multiple properties of a non-profit group specializing in the education of special need children and adults. Assessments were conducted of residential and educational properties. Special concerns during inspections included the privacy of those onsite.

Los Cerritos Wetlands – Long Beach, California
Metals analysis conducted of soils within the wetlands in order to create baseline study for future comparisons of further research conducted by CSU, Long Beach. Challenges included tidal influence and various soil conditions encountered during hand auguring. Testing was completed using EPA 6000/7000 in a lab on campus and analyzed through tables utilizing Microsoft Excel.

Area 3 San Gabriel Valley, Los Angeles County, California
Analysis and maintenance of records database for Los Angeles Regional Water Quality Control Board SLIC2 unit. Tasks included visitation of sites, visual observations, communication with tenants, and mailings to owners. Management of files was conducted in storage and for consultants review. Communication was maintained with consultants in order to provide information needed with respect to sites under investigation.

APPENDIX I: ILLUSTRATIONS

APPENDIX II: RADIUS MAP REPORT

APPENDIX III: SUPPORTING DOCUMENTATION

EXECUTIVE SUMMARY

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for Sydney Development Company (Client) for a commercial property located at 14830 Carmenita Road, in Los Angeles County and the City of Norwalk, California, Assessor's Parcel Number: 8069-002-066. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) E 1527-13 scope of work.

Site Description

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 14830 and 14850 Carmenita Road, Norwalk, California. The subject property is located approximately 60 feet east of Carmenita Road and 200 feet south of Pumice Street. The subject property is approximately 3.35 acres and is occupied by an industrial structure, which is approximately 42,000 square feet in size. GCR Tires and Service Inc., a tire distribution and refurbishment facility, currently occupies the subject property. The remaining portions of the subject property consist of asphalt and concrete paved areas utilized for parking, driveway, and exterior storage. The surrounding area is used for commercial and industrial purposes. Groundwater is estimated to be approximately 30 to 33 feet below ground surface in the area of the site and is assumed to flow to the east-southeast.

- The onsite operations include rim repair, tire retreading, and general tire repair. Used tires are inspected and retreaded (utilizing water-based tire coating) for reuse. An overhead conveyor system is utilized to move tires throughout the various repair areas. A flammables cabinet containing five-gallon containers of heptane is located near the northeastern corner of the property building. No spills or releases were observed in the vicinity of the cabinet or heptane containers.

No recognized environmental conditions were observed at the site. Those interviewed, as persons familiar with the site were not aware of any negative environmental conditions associated with the property.

Historical Land Use

According to EFI Global Inc's interpretation of the historical research data, the subject property was undeveloped prior to 1928 until at least 1947. By 1956, the subject property was utilized for agricultural purposes until sometime prior to 1968. The subject property remained vacant land until 1973, when the property was developed with the current industrial structure. Historical occupants have included: Silvercrest Industries (1973-1980), Western Piping Division (1981-1982), Johnson Controls (1981-1987), C & M Associates (1982), Custom Crating (1986), Sydney Development Corp (1984-current), Calwestern RV Sales and Service (1987-1997), Wesfac (1995-2000), and GCR Tire Centers/Commercial Tire Network (2000-current).

- According to building permits, Silvercrest Industries, a trailer manufacturer, operated a spray booth in circa 1973. This spray booth operated during a time that preceded stringent regulatory oversight; therefore, records of the type of paints and solvents utilized are not available. Chlorinated solvents were readily used in spray booth operations. These solvents, even when properly stored and handled, can readily migrate into the subsurface as a result of small releases associated with onsite operations. Chlorinated solvents are highly mobile chemicals that can easily accumulate in the subsurface and

present a public health risk. Based on this, the former onsite spray booth represents a recognized environmental condition.

- Hazardous materials usage associated with Wesfac and GCR Tire Centers are further discussed in the Environmental Data Search section below.
- No regulatory agency records were available for Western Piping Division, Johnson Control, C&M Associates, Custom Crating, and Calwestern RV Sales and Service, which are not expected to represent a significant environmental concern for the subject property.

Environmental Data Search

- **Bridgestone Firestone North American Tire, LLC / GCR Tire CT (14830 Carmenita Road)** - The subject property is listed on the Registered Waste Tire Haulers Listing (HAULERS) database as a registered waste tire hauler. Based on observations made during EFI Global's site reconnaissance of the subject property, the property stores and refurbishes tires. No other information or violations were reported. Regulatory agency records for this facility are discussed below.

- There are no properties within 100-feet of the subject property where a release is considered likely or a known release has occurred.

- In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

- The Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), South Coast Air Quality Management District (SCAQMD), Los Angeles County Department of Public Health, Public Health Investigation (LACDPH PHI), Los Angeles County Department of Public Works, Environmental Programs Division (LACDPW EPD), and the Los Angeles County Sanitation District (LACSD) were contacted regarding hazardous materials, underground storage tank, industrial wastewater, and air emissions equipment files for the subject property. Additionally, the State Water Resources Control Board's GeoTracker database, the DTSC's Hazardous Waste Tracking System (HWTS) and EnviroStor databases, and the SCAQMD's Facility Information Detail (FIND) database were reviewed for the subject property. According to responses to our requests and review of the above databases, there are no files for the subject property with the exception of the following:
  - Files from the SCAQMD include various equipment permits, permit applications, and Notices of Violations (NOVs) for the current tire retreading operations by Commercial Tire Network, LLC/ GCR Tire Centers. This facility has been onsite since at least 2001 and has been permitted for tire buffers, an air pollution control system, powder coating spray booth, abrasive blasting equipment, baghouse, and wheel and rim refinishing system. NOVs were issued in 2000 and 2004 for failing to operate without proper equipment permits; all NOVs have been abated.
  - Files from the LACDPH PHI includes various inspection reports, correspondences, permits, and hazardous material inventories for Wesfac, Inc. (1995-2000), and Commercial Tire Network/GCR Tires & Service (2000-current). Wesfac Inc., a manufacturer of cabinets for food storage and processing, utilized the following hazardous materials onsite: welding gases, hydraulic/gear oil for

machining operations, lacquer thinner (petroleum-based), inorganic cleaners, resins, foam, and propane (for forklifts). No violations or releases were identified for this former occupant. GCR Tires & Service, a tire retreading facility, utilizes the following hazardous materials onsite: dripless tire paint, welding gases, propane, foam, and lacquer thinner (petroleum-based). No outstanding violations or releases were identified for this facility. Based on this and the observed conditions at the time of the site reconnaissance, the current operations at the subject property do not represent a significant environmental concern at this time.

- The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the subject property. No oil wells were identified within 500 feet of the subject property.
- The user did not provide EFI Global Inc. any information either verbally or in writing (i.e. Title Report) regarding environmental cleanup liens or activity and use limitations encumbering the subject property. An environmental lien search was not requested by the user; however, based on our review of the Department of Toxic Substances Control (DTSC) EnviroStor Database, no environmental liens enforced by the DTSC were identified.

Additional Issues

- Based on the age of the onsite structure, there is a potential for asbestos containing building materials at the site, however, no testing was completed as part of this report. Suspect materials (drywall, ceiling tile, flooring) appeared to be in good condition at the time of the site reconnaissance.
- Based on the age of the onsite structure, there is a potential for lead based paint at the site. Painted surfaces appeared to be in good condition at the time of the site reconnaissance.
- Based on our research, the radon risk is expected to be low.
- EFI Global, Inc. did not observe visible or olfactory indications of the presence of mold, nor did EFI Global, Inc. observe obvious indications of significant water damage. No sampling was conducted as part of this assessment.
- The Los Angeles County Department of Public Works, Solid Waste Information System was reviewed to determine if the property is within 1,000 feet of a landfill or 300 feet of an oil well. According to the information reviewed, the subject property is not located within 1,000 feet of a landfill or 300 feet of an oil well. Therefore, the presence of methane beneath the property is considered low.

CONCLUSIONS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-13, at 14830 Carmenita Road, Norwalk, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property except for the following:

Recognized Environmental Conditions (REC)

The potential for chlorinated solvents to have impacted the subsurface at the subject property from former onsite spray booth operations is considered a recognized environmental condition.

Historical Recognized Environmental Conditions (HREC)

In our opinion, no HRECs were revealed during the course of our assessment.

Controlled Recognized Environmental Conditions (CREC)

In our opinion, no CRECs were revealed during the course of our assessment.

RECOMMENDATIONS

Based upon the foregoing a Phase II Environmental Site Assessment is recommended.

1.0 INTRODUCTION

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for the property located at 14830 Carmenita Road, in Los Angeles County and the City of Norwalk, California (Subject Property). This report has been prepared for the sole use of Sydney Development Company (Client).

The research conducted for this study and the report prepared are in general conformance with the EPA "All Appropriate Inquiries" standard and the ASTM 1527-13 "Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process". The primary purpose for performing a Phase I ESA is to "…permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations (commonly known as landowner liability protections) on Comprehensive Emergency Response Compensation and Liability Act (CERCLA) liability." (ASTM, 2013) An environmental site assessment meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition is presumed to be valid under this standard. In order to maintain landowner liability protections, the user also has a "continuing obligation to not interfere with activity and use limitations associated with the property," must take "reasonable steps to prevent releases" and must "comply with legal release reporting obligations." (ASTM, 2013) Further, it is the goal of this study to identify business risks related to the property associated with environmental conditions. This investigation is not an environmental compliance audit and is not designed to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations.

The goal of this process is to identify any (1) recognized environmental conditions (RECs), (2) historic recognized environmental conditions (HRECs), and/or (3) controlled recognized environmental conditions (CRECs) associated with the subject property.

- A **recognized environmental condition** is defined as "…the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." This definition does not include de minimis conditions defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies" (ASTM, 2013).
- A **historical recognized environmental condition** is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." (ASTM, 2013). The HREC designation requires the comparison of residual contamination concentrations, if any, to currently regulatory standards.
- A **controlled recognized environmental condition** is defined as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)" (ASTM, 2013).

In order to identify environmental conditions at the site, the Phase I ESA includes a site inspection, interviews with parties familiar with the property, historical research into the past uses of the property, and an environmental records search with regard to the subject property, adjoining and immediately surrounding properties, and the surrounding area. In addition, EFI Global, Inc. provides an opinion regarding the potential for asbestos containing materials, lead-based paints, mold, radon, oil and gas exploration, and methane as they relate to the subject property. Reviewing those documents that are publicly available, reasonably ascertainable, and practically reviewable controls the completeness of this assessment. The inability to review documents which do not exist or are not publicly available, reasonably ascertainable, or practically reviewable may result in a data gap.

1.1 Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the property may have occurred which could not be identified. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

1.2 Limitations and Exceptions

This report has been prepared in accordance with generally accepted environmental methodologies referred to in ASTM 1527-2013, and contains all of the limitations inherent in these methodologies. No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report. The conclusions of this report are based in part, on the information provided by others. The possibility remains that unexpected environmental conditions may be encountered at the site in locations not specifically investigated. The services performed and outlined in this report were based, in part, upon visual observations of the site and attendant structures. Our opinion cannot be extended to portions of the site that were unavailable for direct observation, reasonably beyond the control of EFI Global, Inc. The objective of this report was to assess environmental conditions at the site, within the context of our contract and existing environmental regulations within the applicable jurisdiction. Evaluating compliance of past or future owners with applicable local, provincial, and federal government laws and regulations was not included in our contract for services. Our observations relating to the condition of environmental media at the site are described in this report. It should be noted that compounds or materials other than those described could be present in the site environment.

1.3 Reliance

This report has been prepared for the sole use of the Sydney Development Company. The contents should not be relied upon by any other parties without the express written consent of the Sydney Development Company and EFI Global, Inc.

1.4 User Responsibilities

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM E 1527-13 Phase I Standards require that the user conduct independent research and consider certain information before purchasing a property:

- Obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations (AULs) with regard to the subject property. If environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property are identified, the user should provide that information to the Environmental Professional (EFI Global, Inc.). If the user has actual knowledge of environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property, the user should provide that information to the Environmental Professional (EFI Global, Inc.).
- The user should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the user has with regard to recognized environmental conditions in connection with the property.
- If the user is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the user should provide the information to the Environmental Professional (EFI Global, Inc.).
- If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the user to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the user should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

2.0 SITE DESCRIPTION

EFI Global, Inc. has performed a Phase I for a commercial property located at 14830 Carmenita Road, in Los Angeles County and the City of Norwalk, California. The subject property is located approximately 60 feet east of Carmenita Road and 200 feet south of Pumice Street. The subject property is approximately 3.35 acres and is occupied by an industrial structure, which is approximately 42,000 square feet in size. GCR Tires and Service Inc., a tire distribution and refurbishment facility, currently occupies the subject property. The remaining portions of the subject property consist of asphalt and concrete paved areas utilized for parking, driveway, and exterior storage. The surrounding area is used for commercial and industrial purposes.

Natural gas and electrical services are provided to the subject property by the Southern California Gas Company and Southern California Edison, respectively. Potable water and sewer services are provided by the City of Norwalk.

2.1 Current and Historical Addresses

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 14830 and 14850 Carmenita Road, Norwalk,California.

2.2 Legal Description

According to the Los Angeles County Assessor's Office, the subject property is located in the City of Norwalk, and is described by the Assessor's Parcel Number: 8069-002-066.

2.3 Physical Setting

The elevation of the subject property is approximately 80 feet above sea level (USGS Whittier, California 7.5 minute topographic quadrangle). Based on our review of the GeoCheck Section of the EDR Radius report, the subject property is not situated within a 100-year FEMA Flood Zone. No wetlands were identified at the property or adjoining/immediately surrounding properties. Based on our review of groundwater data presented in the State Water Resources Control Board (SWRCB) GeoTracker website, groundwater was detected at a leaking underground storage tank site (13531 Excelsior Drive) adjacent to the south of the subject property at approximately 30 to 33 feet below ground surface. However, perched and semi-perched aquifers may be present beneath the site. Based on regional groundwater data, regional groundwater flow direction is estimated to be towards the east-southeast; however local groundwater flow direction may vary.

3.0 SITE RECONNAISSANCE/INTERVIEWS

3.1 Site Reconnaissance

On September 14, 2016, Noli Valera conducted a site reconnaissance of the subject property. The site inspection was conducted to attempt to identify current site use(s), current hazardous materials storage, and evidence of past site uses and hazardous material storage and to identify evidence of other recognized environmental conditions. The following table summarizes our Site Reconnaissance observations:

Yes	No	Observed Feature(s)
	✔	Hazardous Substances and Petroleum Products Containers
	✔	Underground and/or Aboveground Storage Tanks
✔		Drains/Sumps/Clarifiers/Sewer Interceptors/Septic Systems
	✔	Stained or Corroded Surfaces/Stained Soil or Stressed Vegetation
	✔	Pits/Ponds/Lagoons/Wetlands
✔		Electrical Equipment with the Potential to contain Fluids
	✔	Production or Monitoring Wells
	✔	Evidence of Solid Waste Disposal/Dumping/Fill Areas

3.1.1 Exterior Observations

The subject property is developed with a primarily single-story industrial warehouse structure. The exterior portions of the subject property consist of concrete and asphalt-paved parking, driveway, and exterior storage areas. The northern and western portions of the subject (including the canopied areas on the western portion) consist of automobile tire storage. North of the property building are a propane tank, the air pollution control system, and the air compressors. Throughout the northern portion of the property, the paved surfaces were covered with rubber dust particles. These particles are not considered an environmental concern at this time; however, improved housekeeping practices are recommended to prevent any significant releases into the stormwater system. A pad-mounted transformer was located onsite with no observable leaks or spills. A truck well is located beneath the westernmost canopy. No storm drains were observed in this area.

No recognized environmental conditions were observed in this portion of the site.

3.1.2 Interior Observations

The subject property is developed with a single-story, concrete tilt-up industrial warehouse structure, approximately 42,000 square feet in size. GCR Tires and Service Inc., an automotive tire distributor and retreading company, currently occupies the subject property. Interior finishes include ceramic, vinyl, carpet and concrete floors; drywall and concrete walls; and acoustical tile and open ceilings. The southern portion of the subject property consists of offices and storage areas. The remaining portions of the property building consists of warehouse storage and tire production facility. The onsite operations include rim repair, tire retreading, and general tire repair. Used tires are inspected and heated/re-surfaced (utilizing water-based tire coating) for reuse. An overhead conveyor system is utilized to move tires throughout the various repair areas. A flammables cabinet containing five-gallon containers of heptane is located near the northeastern corner of the property building. No spills or releases were observed in the vicinity of the cabinet or heptane containers. HVAC systems are reportedly roof-mounted and the building is connected to municipal sewer and water supplies.

No significant hazardous material storage or recognized environmental conditions were observed in the interior portions of the site.

3.1.3 Reconnaissance Limitations

The warehouse and exterior storage areas were mostly full of tire storage; therefore, EFI Global, Inc. was not able to observe the concrete/asphalt surfaces in these areas.

3.2 Adjoining and Immediately Surrounding Properties

The adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) were visually and physically observed from public right-of ways and the subject property in an attempt to identify recognized environmental conditions. Our observations are summarized in the following table:

Location	Address(es)	Uses/Observations
North	13474-13518 Pumice Street	Paradise Printing Inc. (13474), Full Factory (13502), and industrial (13518)
East	13555 Excelsior Drive	Rabsio RV Storage
Southeast	13531 Excelsior Drive	Top King Inc.
South	13457 Excelsior Drive	Industrial
Southwest	13455 and 13449 Excelsior Drive	Standard Fasteners Inc. (13455) and Irrigation Express (13449)
West	14280 Carmenita Road, Unit B	Lasco Fittings Inc.

Several adjoining/immediately surrounding properties were listed on the regulatory database report and are further discussed in Section 5.2 below.

3.3 Surrounding Area Observations

3.3.1 Surrounding Property Uses

The surrounding area is developed with commercial and industrial structures.

3.3.2 Surrounding Geography

The surrounding area is mostly flat with a slight topographic slope to the east. No nearby hills or bedrock outcroppings were observed in the area of the site. No lakes, ponds, rivers or streams were observed in the surrounding area.

3.4 Interviews

3.4.1 Property Owner

Mr. Tim Cronin of Lee & Associates (agent for the property owner) was provided an environmental questionnaire for the subject property. At the writing of this report, a completed questionnaire has not been completed.

3.4.2 Key Site Manager

The key site manager was not available for interview at the writing of this report.

3.4.3 Property Occupants

A representative (name withheld) from GCR Tires and Service Inc. was interviewed at the time of the site reconnaissance. The representative was not aware of any significant environmental concerns with respect to the subject property.

3.4.4 Past Owners, Operators and Occupants

Past owners, operators and occupants were not able to be identified for an interview for this report.

3.4.5 Prospective Purchaser

A prospective purchaser was not available for interview at the writing of this report.

3.4.6 Neighboring Property Owners/Tenants

Per ASTM, an attempt to interview neighboring property owners/tenants should be conducted when the subject property is vacant and unsecured land.

As the subject property is currently developed and utilized for commercial use, no neighboring property owners/tenants were interviewed during this assessment.

3.5 User Provided Information

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM 1527-13 Phase I Standards require that the Report User conduct independent research and consider certain information before purchasing a property. EFI Global, Inc. recommends that the User documents completion of the following items:

3.5.1 Lien Search

The User is required to obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations with regard to the subject property. If environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (EFI Global, Inc.). If the User has actual knowledge of environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (EFI Global, Inc.).

- The user did not provide EFI Global Inc. any information either verbally or in writing (i.e. Title Report) regarding environmental cleanup liens or activity and use limitations encumbering the subject property. An environmental lien search was not requested by the user; however, based on our review of the Department of Toxic Substances Control (DTSC) EnviroStor Database, no environmental liens enforced by the DTSC were identified.

3.5.2 Specialized Knowledge

The User should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.

- The User has no specialized knowledge with respect to recognized environmental conditions in connection with the property.

3.5.3 Commonly Known or Reasonably Ascertainable Information

If the User is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the User should provide the information to the Environmental Professional (EFI Global, Inc.).

- The User is not aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions.

3.5.4 Property Valuation

If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

- As the user of this report is the owner of the property performing due diligence on the subject property in contemplation of a future sale or refinance, there is no prospective purchaser included in the transaction.

3.5.5 Purpose of Performing Phase I ESA

According to the user, the user is the owner of the property performing due diligence on the subject property in contemplation of a future transaction.

3.6 User Provided Documents

No documents were provided to EFI Global, Inc. by the Report User.

4.0 HISTORICAL LAND USE

A review of historical data derived from standard historical resources is provided in this section. The objective of consulting historical sources is to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the property. During our historical review, acute attention is paid to the subject property. Data relating to the adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) and the surrounding area is reviewed to the extent that it is revealed in the course of researching the property itself.

4.1 Aerial Photography Review

Aerial Photography of many portions of the United States dates back to the 1920's. Items searched for in each photograph included, but were not limited to: evidence of tanks, gas stations, industrial site usage, water drainage pathways, areas which show evidence of drums or excessive debris, discolored or stained soils, areas of distressed vegetation, et cetera.

Aerial Photograph Coverage was available from Environmental Data Resources (EDR) for the years: 1928, 1938, 1947, 1956, 1968, 1976, 1989, 1994, and 2005. A summary of our observations is presented in the following table.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1928, 1938, and 1947	Appears to be undeveloped rural land	Agricultural and undeveloped	Undeveloped, agricultural, and residential
1956	Appears to be agricultural land	Agricultural	Undeveloped, agricultural, and residential
1968	Appears to be vacant land	Agricultural, commercial, vacant, and residential	Undeveloped, commercial, light industrial, and residential
1976, 1989, and 1994	Appears to be developed with the current warehouse and canopy	Agricultural, commercial, and light industrial	Commercial, light industrial, and residential
2005	Appears to be developed with the current warehouse and canopy	Commercial and light industrial	Commercial, light industrial, and residential

- The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used onsite. Agricultural chemicals tend to accumulate in the near surface soils. As the property has been redeveloped, which typically involves grading (soil mixing) of the first few feet of soil; it is likely the agricultural chemicals, if any were present have been diluted to below regulated levels. Furthermore, the entire area of the subject property is either paved or covered by improvements that makes direct contact with remaining concentrations of agricultural chemicals in the soil, if any, unlikely. Lastly, the subject property is developed and used for commercial purposes. Based on the foregoing, it is our opinion that a risk to human health or the environment based on the

historical agricultural use of the site is unlikely, and thus no further action related to the former agricultural use of the subject property is recommended at this time.

4.2 Building Department Records Review

The addresses identified as current and historical addresses for the subject property were researched at the City of Norwalk Building Department. Items considered in the course of the building permit review are previous site usage, previous ownership, and the construction or demolition of any structures that may have had a negative environmental impact on the property. The following table summarizes relevant building permits obtained and reviewed:

14830 Carmenita Road		
Date	**Owner/Occupant**	**Purpose**
02/05/1974	Silvercrest	Footings for future second story office
02/05/1974	Silvercrest	Construct new second story partitions
02/05/1974	Silvercrest	Install 1 spray booth
02/05/1974	Howard Sherman	Install double faced sign and two posts
02/21/1974	Silvercrest	Foundation for existing craneway
12/19/1974	Silvercrest	Add automatic sprinklers to second floor office
01/30/1981	Western Piping Division	Concrete footings for equipment only
01/30/1981	Western Piping Division	Build rooms for ruds and bond. Install walls for offices
03/26/1981	Western Piping Division	Construct monorail for 1 ton crane system
03/26/1981	Western Piping Division	Floor supported bridge crane runway superstructure
11/30/1981	Johnson Controls	Install wood monument sign
07/11/1986	Custom Crating	Install 499 gallon liquid pressurized tank
10/13/1992	Sydney Development Corp	Reroof with 3-ply
04/02/1994	Sydney Development Corp	Add depressed truck loading dock
05/31/2012	Sydney Development Corp	Re-roof flat roof with single ply torch down system

14850 Carmenita Road		
Date	**Owner/Occupant**	**Purpose**
03/30/1982	C & M Associates	Application for sewer connection to modular office
04/29/1982	Silvercrest	Install modular office building foundation
05/16/1984	Sydney Development Corp	Construct 3 sided steel garage
06/28/1984	Sydney Development Corp	Propane tank station

14850 Carmenita Road		
Date	**Owner/Occupant**	**Purpose**
02/05/1985	Sydney Development Corp	Add 4 modular buildings to back of existing store

4.3 City Directory Review

City directories have been published since the 1800's and provide detailed occupant information for the property and its surrounding area at five-year intervals. The purpose of the City Directory research is to attempt to determine the businesses that historically occupied the subject property. Historical City Directories provided by EDR and reviewed by EFI Global, Inc. are listed below.

14830 Carmenita Road	
Date	**Listing**
1975	Silvercrest Industry
1982	Western Piping Division
1987	Johnson Controls
1997	Wesfac

14850 Carmenita Road	
Date	**Listing**
1987 and 1997	Calwestern RV Sales and Service

Listings for adjoining and immediately surrounding properties reviewed during the course of researching the subject property did not reveal any uses of concern.

4.4 Sanborn Map Review

Originally compiled by the Sanborn Map Company of Pelham, New York for fire insurance companies to assess fire risks related to building materials and hazardous materials storage, today Sanborn Maps are an invaluable tool for Environmental Professionals in determining historical site use and the potential for environmental conditions. Sanborn Map Coverage is available from as early as 1867 in some cities. Although Sanborn maps were created for approximately twelve thousand cities and towns in the United States, Canada, and Mexico, Sanborn Map Coverage is not available in newer and more rural communities.

- Sanborn Map Coverage was not available for the subject property. The remaining Historical Land Use data in our opinion is sufficient to accurately ascertain the historical site use.

4.5 Historical Summary

4.5.1 Subject Property

According to EFI Global Inc's interpretation of the historical research data, the subject property was undeveloped prior to 1928 until at least 1947. By 1956, the subject property was utilized for agricultural purposes until sometime prior to 1968. The subject property remained vacant land until 1973, when the property was developed with the current industrial structure. Historical occupants have included: Silvercrest Industries (1973-1980), Western Piping Division (1981-1982), Johnson Controls (1981-1987), C & M Associates (1982), Custom Crating (1986), Sydney Development Corp

(1984-current), Calwestern RV Sales and Service (1987-1997), Wesfac (1995-2000), and GCR Tire Centers/Commercial Tire Network (2000-current).

- According to building permits, Silvercrest Industries, a trailer manufacturer, operated a spray booth in circa 1973. This spray booth operated during a time that preceded stringent regulatory oversight; therefore, records of the type of paints and solvents utilized are not available. Chlorinated solvents were readily used in spray booth operations. These solvents, even when properly stored and handled, can readily migrate into the subsurface as a result of small releases associated with onsite operations. Chlorinated solvents are highly mobile chemicals that can easily accumulate in the subsurface and present a public health risk. Based on this, the former onsite spray booth represents a recognized environmental condition.
- Hazardous materials usage associated with Wesfac and GCR Tire Centers are further discussed in Section 6.0.
- No regulatory agency records were available for Western Piping Division, Johnson Control, C&M Associates, Custom Crating, and Calwestern RV Sales and Service, which are not expected to represent a significant environmental concern for the subject property.

4.5.2 Adjoining and Immediately Surrounding Properties

According to EFI Global, Inc.'s interpretation of the historical research data, the adjoining and immediately surrounding properties were developed as agricultural land until at least 1947. By 1956, the adjoining and immediately surrounding properties had been partially graded. Since at least 1976, the adjoining properties have been developed for commercial/industrial purposes.

4.5.3 Surrounding Area

According to EFI Global, Inc.'s interpretation of the historical research data, the surrounding area was primarily developed for agricultural purposes in 1928. Over time, residential and commercial development increased, reflecting the present configuration.

4.6 Historical Data Gaps

Based on our review of the historical data, no significant data gaps were encountered during our research.

5.0 REGULATORY DATABASE REPORT

A radial database search was conducted in accordance with the specifications defined in ASTM E 1527-13 which sets the radial search distances for each regulatory database. The radial database search was conducted by EDR on September 7, 2016. A copy of the database report is presented in Appendix II of this report. The following table summarizes required databases reviewed, the approximate search distances, and indicates if the subject site, adjoining/immediately surrounding properties or surrounding sites are listed on the respective database.

Following the table are summaries of the information found in the relevant database listings and our opinion regarding the potential for the subject property to be impacted. Our opinion is based on the information found in the database listings, through other historical and regulatory resources, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E2600-10), and assumed groundwater flow direction. As discussed in Section 2.3, Groundwater is estimated to be approximately 30 to 33 feet below ground surface in the area of the site and is assumed to flow towards the east-southeast.

DATABASE	Search Distance (Miles)	Subject Site (Yes/ No)	Adjacent Site (Yes/ No)	Total Listings (#)
Federal National Priorities List (NPL)	1.0	No	No	0
Federal De-listed NPL	1.0	No	No	0
Federal CERCLIS	0.5	No	No	2
Federal CERCLIS NFRAP	0.5	No	No	3
Federal RCRA CORRACTS	1.0	No	No	3
Federal RCRA non-CORRACTS TSD	0.5	No	No	1
Federal RCRA Generators	0.25	No	Yes	28
Federal Institutional/Engineering Controls	0.5	No	No	0
Federal ERNS	Property	No	No	0
State/Tribal Equivalent NPL	1.0	No	No	1
State/Tribal Equivalent CERCLIS	1.0	No	No	25
State/Tribal Landfill	0.5	No	No	1
State/Tribal Underground Storage Tank (UST)	0.25	No	Yes	19
State/Tribal Leaking Underground Storage Tank (LUST/SLIC)	0.5	No	Yes	42
State/Tribal Institutional/Engineering Controls	0.5	No	No	0
State/Tribal Voluntary Clean-up Sites	0.5	No	No	7
State/Tribal Brownfield Sites	0.5	No	No	0

5.1 Subject Property

Bridgestone Firestone North American Tire, LLC / GCR Tire CT (14830 Carmenita Road) - The subject property is listed on the Registered Waste Tire Haulers Listing (HAULERS) database as a registered waste tire hauler. Based on observations made during EFI Global's site reconnaissance of the subject property, the property stores and refurbishes tires. No other information or violations were reported. Regulatory agency records for this facility are discussed in Section 6.0 below.

5.2 Adjoining and Immediately Surrounding Properties

Fuji Hunt Photographic Chemicals (14820 Carmenita Road Unit B) - The west adjacent property (hydrologically up-gradient) is listed on the Facility and Manifest Data (HAZNET), Facility Index System/ Facility Registry System (FINDS), Enforcement and Compliance History Online (ECHO), and Resource Conservation and Recovery Act - Small Quantity Generator (RCRA-SQG) databases. The facility was listed a small-quantity hazardous waste generator from at least 2001 through 2006 and a large quantity hazardous waste generator in 2006. Waste codes listed for this facility code include ignitable waste, corrosive waste, benzene, methyl ethyl ketone, and various halogenated solvents. No violations were listed. Hazardous waste manifests from 2004 for this facility identify the following hazardous wastes: off-specification, aged or surplus organics (disposed via treatment, incineration, recycling). Based on the absence of any reported releases or violations, and the proper disposal of hazardous wastes, the above listings do not represent a significant environmental concern for the subject property at this time.

Performance Tean (14820 Carmenita Road) - The west adjacent property (hydrologically up-gradient) is listed on the HAZNET database. Hazardous waste manifests from 2008 for this facility identify the following hazardous wastes: unspecified oil-containing waste and other organic solids (disposed via storage, bulking, transfer offsite). Based on the absence of any reported releases or violations, and the proper disposal of hazardous wastes, the above listings do not represent a significant environmental concern for the subject property at this time.

Hatch and Kirk (13474 Pumice Street) – The northwest adjacent property (hydrologically up- to cross-gradient) is listed on the RCRA-SQG, FINDS, ECHO, and HAZNET databases. According to the listings, the site was a small quantity generator of hazardous materials from at least 2000 until 2002. Hazardous materials generated onsite include alkaline solution without metals and aqueous solution with total organic residues less than 10 percent. The disposal method was not specified, and no violations were listed. Based on the proper disposal of all hazardous wastes, the lack of any violations, and the lack of any indication that spill or release has occurred onsite, the above listings are not expected to represent a significant environmental concern at this time.

Haynes Fuel Injsection Corp. (13474 Pumice Street) - The northwest adjacent property (hydrologically up- to cross-gradient) is listed on the EDR Historical Auto Stations database in 2005. No other information was available for this site. Based on the absence of any reported releases or violations, this listing is not expected to contribute to a significant environmental concern for the subject property at this time.

Norm Reeves Honda Superstore (13555 Excelsior Drive) – The adjacent property to the east (hydrologically down-gradient) is listed on the HAZNET, FINDS, Los Angeles County Hazardous Materials System (Los Angeles Co. HMS), and Hazardous Substance Storage Container Database (HIST UST) databases. According to the information, the property was a small quantity generator of hazardous materials that were disposed of properly. Hazardous materials generated onsite included unspecified aqueous solution (disposed via sewer discharge). According to the UST databases, two USTs were installed at the subject property in 1982 consisting of one 10,000 gallon gasoline and one 10,000 gallon diesel UST. The USTs were installed at the property by Pearson Trucking and Rigging. Based on the absence of any reported releases or violations, the above listing does not represent a significant environmental concern at this time.

GE Co Norwalk Tool Facility (13555 Excelsior Drive) – The adjacent property to the east (hydrologically down-gradient) is listed on the HAZNET database. In 1993, the facility generated the following hazardous wastes: unspecified solvent mixture, and polymeric resin waste (disposed via transfer station). No

additional information was available. Based on the absence of any reported releases or violations, the above listing does not represent a significant environmental concern at this time.

Recon Dynamics (13555 Excelsior Drive) – The west adjacent property (hydrologically down-gradient) is listed on the HAZNET database. In 2002, the facility generated the following hazardous wastes: waste oil and mixed oil, other empty containers 30 gallons or more and unspecified solvent mixture (disposed via recycler and/or transfer station). No violations were listed. Based on the absence of any reported releases or violations, this listing is not expected to contribute to a significant environmental concern for the subject property.

Young Estate Property (13531 Excelsior) – The adjacent property to the southeast (hydrologically down-gradient) is listed on the leaking underground storage tank (LUST) database. According to the regulatory database report, an unauthorized release of gasoline that impacted the soil and groundwater was discovered at the site in December 1987. The leak was discovered during tank closure activities. The responsible party, Ms. Donna Young, has been identified. This site has been undergoing further investigation and remediation activities since 1995. According to information obtained from the State Water Resources Control Board's GeoTracker database, groundwater at the site was last sampled in July of 2016. The closest monitoring well to the subject property (MW-14) is located approximately 150 feet to the southeast of the subject property building. The analyses of groundwater samples from this well were non-detect for all volatile organic compounds and fuel oxygenates with the exception of diisopropylether (DIPE) at 16.4 micrograms per liter (µg/L). The total petroleum hydrocarbon (TPH) and benzene plumes have been delineated and are limited to an area of this site that is over 200 feet from the subject property. Based on the assumed groundwater gradient, distance of the contamination from the subject property, and continued oversight by the Los Angeles Regional Water Quality Control Board, the release investigation at this site does not represent a significant environmental concern for the subject property at this time.

No other adjoining/immediately surrounding properties (within 100-feet) were listed on any of the regulatory databases researched or the listings were not associated with the storage or disposal of hazardous wastes including aboveground or underground storage tanks, did not indicate a known chemical release, and did not indicate a property use where the use of hazardous chemicals would be expected.

5.3 Surrounding Area

Tosco - 76 Station #6093 (14960 South Carmenita Road) - The property located approximately 500 feet to the southwest (hydrologically cross-gradient) is listed on the Leaking Underground Storage Tank (LUST) database. According to information available on the State Water Resources Control Board's GeoTracker database, this site formerly operated as a service station as early as 1968 with an unauthorized release first reported in 1999 during the removal of five underground storage tanks (USTs): two 8,000-gallon gasoline USTs, a 5,000-gallon gasoline UST, a 5,000-gallon diesel UST, and a 550-gallon waste oil UST. Remedial actions have include groundwater monitoring, soil excavation, groundwater pump and vapor extraction testing, air sparging, and operation of a dual-phase extraction system. In 2011, the site was obtained by the California Department of Transportation (Caltrans) as part of an expansion of the Interstate 5/Carmenita Road interchange. Currently, six monitoring wells are located at this site, which have been monitored on a quarterly basis. The total petroleum hydrocarbon as gasoline (TPHg), benzene, tert-butyl alcohol (TBA), and methyl tert-butyl ether (MTBE) contamination appears to be limited within the former gasoline station equipment, which is over 200 feet from any subject property building. Given the distance from the subject property, the assumed groundwater gradient, and continued regulatory oversight by the

Los Angeles Regional Water Quality Control Board (LARWQCB), the gasoline station release investigation for this site does not represent a significant environmental concern for the subject property at this time.

In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

5.4 Orphan Sites

Orphan sites are unmappable sites which appear in a list form in the Radius Map Report rather than on the standard Radius Map. Twelve (12) orphan sites were identified in the Radius Map Report prepared for this site. The sites were manually mapped to determine the location of the site relative to the subject property and groundwater gradient. The following conclusions were made:

In our opinion, none of the orphan sites listed pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

6.0 AGENCY FILE REVIEWS

6.1 State Agencies

The regional offices of the Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), and South Coast Air Quality Management District (SCAQMD) were contacted regarding permits and site investigation files for the subject property. Additionally, the State Water Resources Control Board's GeoTracker database, the DTSC's Hazardous Waste Tracking System (HWTS) and EnviroStor databases, and the SCAQMD's Facility Information Detail (FIND) database were reviewed for the subject property.

- According to responses from the LARWQCB and DTSC, and review of the GeoTracker and EnviroStor databases, there are no files for the subject property.
- Files from the SCAQMD include various equipment permits, permit applications, and Notices of Violations (NOVs) for the current tire retreading operations by Commercial Tire Network, LLC/GCR Tire Centers. This facility has been onsite since at least 2001 and has been permitted for tire buffers, an air pollution control system, powder coating spray booth, abrasive blasting equipment, baghouse, and wheel and rim refinishing system. NOVs were issued in 2000 and 2004 for failing to operate without proper equipment permits; all NOVs have been abated. Los Angeles County Fire Department records for this facility are discussed in Section 6.2 below.
- According to the HWTS database, GCR Tires and Service has been granted an EPA Identification Number; however, no hazardous waste manifests have been generated by this facility.

The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the subject property.

- No oil wells were identified within 500 feet of the subject property.

6.2 City/County Agencies

The Los Angeles County Department of Public Health, Public Health Investigation (LACDPH PHI), Los Angeles County Department of Public Works, Environmental Programs Division (LACDPW EPD), and the Los Angeles County Sanitation District (LACSD) were contacted regarding hazardous materials, underground storage tank, and industrial waste discharge records for the subject property.

- According to responses from the LACSD and LACDPW EPD, there are no files for the subject property.
- Files from the LACDPH PHI includes various inspection reports, correspondences, permits, and hazardous material inventories for Wesfac, Inc. (1995-2000), and Commercial Tire Network/GCR Tires & Service (2000-current). Wesfac Inc., a manufacturer of cabinets for food storage and processing, utilized the following hazardous materials onsite: welding gases, hydraulic/gear oil for machining operations, lacquer thinner (petroleum-based), inorganic cleaners, resins, foam, and propane (for forklifts). No violations or releases were identified for this former occupant. GCR Tires & Service, a tire retreading facility, utilizes the following hazardous materials onsite: dripless tire paint, welding gases, propane, foam, and lacquer thinner (petroleum-based). No outstanding violations or releases were identified for this facility. Based on this and the observed conditions at the time of the site reconnaissance, the current operations at the subject property do not represent a significant environmental concern at this time.

6.3 Agency File Review Limitations

No significant data gaps were encountered during our agency file reviews.

7.0 NON-SCOPE ENVIRONMENTAL RISKS

ASTM Standard E1527-13 identifies additional conditions which, should they exist at the subject property, may create a human health risk to the occupants of the site. These risks may also create additional costs to the property owner in the form of identification, operations & maintenance, and cleanup or remediation.

7.1 Asbestos Containing Building Materials

Asbestos is a group of naturally occurring minerals used in many products, including building materials vehicle brakes, insulation and other products that require resistance to heat and corrosion. Asbestos includes: chrysotile, amosite, crocidolite, tremolite asbestos, anthophyllite asbestos, actinolite asbestos, and any of these materials that have been chemically treated and/or altered.

The inhalation of asbestos fibers by workers can cause cancer and other serious diseases of the lungs and other organs that may not appear until years after the exposure has occurred. For instance, asbestosis can cause a buildup of scar-like tissue in the lungs and result in loss of lung function. Asbestos fibers associated with these health risks are too small to be seen with the naked eye, and smokers are at higher risk of developing some asbestos-related diseases.

Asbestos-containing materials (ACM) do not always pose a hazard to occupants and workers in buildings that contain these materials. Intact, undisturbed ACMs generally do not pose a health risk. ACMs may become hazardous and pose an inhalation risk when they are damaged, disturbed in some manner, or deteriorate over time and asbestos fibers are released into building air.

ACM can be found in a multitude of building products which include decorative and acoustical plaster texture, fire-proofing (Monokote), joint compound, attic and wall insulation, resilient floor covering, mastic, recessed lighting fixtures, wiring, elevator brakes, fire doors, pipe insulation, pipe gaskets, duct insulation, duct tape, siding and roofing materials (tar/shingles), textured paint, stucco, concrete, asphalt underlayment (Petromat) and plaster.

Local jurisdictions have specific laws and regulations regarding asbestos and actions including building renovations and building demolition.

- Based on the age of the onsite structure, there is a potential for asbestos containing building materials at the site, however, no testing was completed as part of this report. Suspect materials (drywall, ceiling tile, flooring) appeared to be in good condition at the time of the site reconnaissance.

7.2 Lead-Based Paint

Although the use of lead-based paint in residential structures has been prohibited since 1978, it may still be used in commercial and industrial buildings. It is approximated that 80 percent of buildings built prior to 1978 contain lead paint. Even at low levels, lead poisoning can cause IQ deficiencies, reading and learning disabilities, impaired hearing, reduced attention spans, hyperactivity and other behavior problems with children under 6 years old being most at risk.

Lead is a highly toxic metal that was used for many years in products found in and around our homes and commercial buildings. Lead can be found in dust from friction surfaces of windows and doors that are painted with lead-based paint and from building components coated with lead-based paint that has begun peeling, flaking and chalking. There is also the potential for soil to have elevated lead levels due to leaching

from lead based paint on nearby structures and deposition of airborne lead when leaded fuel was in use prior to the 1976 ban and phase out.

Since the 1980's, lead has been phased out in gasoline, reduced in drinking water, reduced in industrial air pollution, and banned or has been limited in use in consumer products.

Between the local, State and Federal agencies, including the Environmental Protection Agency (EPA), Department of Housing and Urban Development (HUD), Occupational Safety & Health Administration (OSHA) and the California Department of Public Health (CDPH), each state has various action limits that have been enacted with the intent to prevent human exposure and contamination of the surrounding environment.

- Based on the age of the onsite structure, there is a potential for lead based paint at the site. Painted surfaces appeared to be in good condition at the time of the site reconnaissance.

7.3 Radon

Radon is a radioactive gas that has been found in structures all over the United States. Radon is produced from the natural breakdown of uranium in soil, rock, and water. Radon typically moves up through the ground and into structures through cracks and other holes in the foundation. Movement of radon through the earth is strongly influenced by moisture content and permeability of soil, porosity, and degree of fracturing in rocks, as well as surface meteorological conditions. High levels of radon have been discovered in every state.

Radon cannot be seen, smelled, or tasted. Breathing air-containing radon may increase the risk of getting lung cancer. The Surgeon General of the United States has warned that radon is the second leading cause of lung cancer in the United States today after smoking.

Testing for the presence of radon is fairly inexpensive, simple and is the only way to be certain of the on-site concentrations. Various types of sampling methods exist to determine the concentration. On-site radon sampling was not performed during the completion of this assessment.

- Based on research by the United States Environmental Protection Agency (USEPA), the average radon concentrations for Los Angeles County are between 2.0 picocuries per liter (pCi/L) and 4.0 pCi/L, below the 4.0 pCi/L action level set by the USEPA; however, site specific radon levels vary greatly within the EPA radon zones and on-site radon measurements would need to be collected in order to determine the radon levels at the subject property.

7.4 Wetlands

According to the Clean Water Act, a wetland is “those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions.” Wetland areas have been identified as ecologically diverse and sensitive areas and are generally subject to more stringent development, re-development, and building regulations.

- The U.S. Fish and Wildlife Service National Wetlands Inventory was reviewed to determine if the subject property is situated within an identified wetland. According to the USFWS, the subject property is not located within a wetland area.

7.5 Mold

Mold and mildew are simple, microscopic organisms in the Fungi kingdom that can grow virtually anywhere if they have adequate moisture, nutrients, air and appropriate temperatures. Depending on the particular mold or fungus, growing colonies can be almost any color. Most household molds and fungi (mildews) are white, black, grey, or brown colored. Spores of dozens of kinds of mold and fungus (mildew) are present at all times in indoor and outdoor air. These spores can settle, germinate and grow wherever good growth conditions are found. They can grow on soil, plants, dead plant materials, foods, fabrics, paper, wood and many other materials found within buildings. Many molds are not harmful and actually have a beneficial role in the environment and in living systems. In soil, molds play a crucial part in decomposition of organic matter and in making nutrients available to plants.

When mold and fungi (mildews) growth occurs in buildings, it can be very destructive to the materials on which they grow and cause high levels of airborne mold spores and volatile organic compounds associated with the characteristic musty / moldy odor. They cause staining, decomposition (rotting of materials) and objectionable, musty odors. Where colonies are extensive they can also produce enough spores, and by-products to be harmful to health. Many of the by-products of mold and fungus (mildew) are irritating to skin, eyes and respiratory tracts. Some molds produce true allergic sensitization and allergic reactions in susceptible people. Some molds produce toxic by-products that could be harmful to skin, and poisonous if ingested or inhaled in quantity. Persons with compromised immune systems may even experience systemic fungal infections of the respiratory tract.

EFI Global, Inc. observed a limited amount of interior areas of the subject building(s) in order to identify the significant, visible presence of mold. This activity was not intended to discover all areas which may be affected by mold growth at the subject property. Potential areas of mold not observed as part of this limited assessment, include but are not limited to, pipe chases, HVAC systems and within enclosed wall and ceiling cavities that may be present in the subject property. A complete mold assessment, which may include various types of sampling, would be required to determine if mold levels within the subject building(s) are at levels acceptable by industry standards.

- EFI Global, Inc. did not observe visible or olfactory indications of the presence of mold, nor did EFI Global, Inc. observe obvious indications of significant water damage. No sampling was conducted as part of this assessment.

7.6 Methane Gas

In response to growing concern regarding methane intrusion into buildings and to the potential for methane build-up underneath buildings, certain municipalities have established methane requirements for structures based on the proximity to oil wells and landfills. If a subject property is located in the proximity of active or abandoned oil wells or landfills, methane mitigation devices installed prior to construction activities at a subject property may be necessary.

- The Los Angeles County Department of Public Works, Solid Waste Information System was reviewed to determine if the property is within 1,000 feet of a landfill or 300 feet of an oil well. According to the information reviewed, the subject property is not located within 1,000 feet of a landfill or 300 feet of an oil well. Therefore, the presence of methane beneath the property is considered low.

8.0 FINDINGS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for Sydney Development Company (Client) for a commercial property located at 14830 Carmenita Road, in Los Angeles County and the City of Norwalk, California, Assessor's Parcel Number: 8069-002-066. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) E 1527-13 scope of work.

8.1 CONCLUSIONS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-13, at 14830 Carmenita Road, Norwalk, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property except for the following:

Recognized Environmental Condition (REC)

The potential for chlorinated solvents to have impacted the subsurface at the subject property from former onsite spray booth operations is considered a recognized environmental condition.

Historical Recognized Environmental Condition (HREC)

In our opinion, no HRECs were revealed during the course of our assessment.

Controlled Recognized Environmental Condition (CREC)

In our opinion, no CRECs were revealed during the course of our assessment.

8.2 RECOMMENDATIONS

Based upon the foregoing a Phase II Environmental Site Assessment is recommended.

9.0 SIGNATURES

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/07/2016 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
LA COUNTY NITROUS OX	13556 PUMICE STREET	NE 0 - 1/8 (0.064 mi.)	I34	73
ORANGE COUNTY CHEMIC	13744 EXCELSIOR DRIV	ESE 1/8 - 1/4 (0.185 mi.)	R72	161

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/07/2016 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/27/2016 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
UNITED STATES PRINTI	*13710 BORATE STREET*	*NE 1/4 - 1/2 (0.263 mi.)*	*V87*	*196*

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 5

RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 22 RCRA-SQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within

approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/02/2016 has revealed that there are 25 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/21/2016 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Registry ID: 110012191877

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 161.7

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 1616.2

Waste code: D039
Waste name: TETRACHLOROETHYLENE
Amount (Lbs): 5230

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 5175

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

PRECISION TUBE BENDING, INC. (Continued) **1007199499**

METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Amount (Lbs): 55

Facility Has Received Notices of Violations:
- Regulation violated: Not reported

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

TSCA SUBMITTER

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: RCRA Facility Assessment Report
Completed Date: 03/25/2010
Comments: The facility obtained a Hazardous Waste Facility Permit for the sole purpose of storing hazardous waste for longer than 90 days. The facility held the permit for 5 years, and then requested to be removed from the permitted status; the facility is currently operating under generator status. The facility clean closed the hazardous waste storage area in accordance with a DTSC approved closure plan. The DTSC performed a PR of readily available agency and facility records, and a VSI to evaluate past and potential releases of hazardous constituents from the SWMUs and AOCs identified. No evidence of any release of hazardous materials considered a threat to human health or the environment as a result of recent or past on-site activities. Based on a review of files associated with this facility, and the VSI, no further action is recommended.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site History:	There is a State Water Board closure Order for this case issued 4/30/2015. The State Water Board needs confirmation that the corrective action wells and wastes have been removed from the site in order to close the case. Once confirmation has been received State Water Board can issue a Uniform Closure Letter and close the case. Attempts to reach the RP have failed. gwl 4/14/2016.

Local Agency:	Not reported
RB Case Number:	1225
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Arsenic, Diesel, Gasoline, Heating Oil / Fuel Oil
Site History:	The property has been used for light industrial purposes by two parties: Philip Carey Company from approximately 1971 thru 1980; and Frigid Coil from approximately 1980 thru July of 2007. The recognized environmental conditions identified in the Phase I Site Investigation included: Frigid Coils operations consist of the assembly of air handlers and other custom heating, ventilation, and air conditioning (HVAC) units. Principal materials in use at the facility consist of stainless steel, copper coil, welding gases, and hydraulic oils. The Frigid Coil facility consists of approximately 82,000 square feet of building space on an approximately 4.9-acre property. The eastern portion of the building was used as a shop for maintenance activities and the western portion of the building was used as office space. Frigid Coil has operated at the 13711 Freeway Drive location since 1971. The building was reportedly constructed in 1966. Prior to 1966, the subject property was agricultural land.

Environmental Interest/Information System
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Contaminants of Concern:	Not reported
Site History:	The Alondra Industrial Park (AIP) site has been occupied since the early 1970's by several industries involved in metal recycling, sheet metal fabrication, manufacturing of aluminum products, and precious metal recycling. Currently, only precious metal recycling activities are conducted at the AIP site. Site investigations started in the early 1990's. In 1997, soil impacted with volatile organic compounds (VOCs) was excavated and disposed of off-site. Since 2003, a soil vapor extraction (SVE) system operates at the site and removes VOCs from the soils beneath. Groundwater is impacted with VOCs. Groundwater monitoring activities are conducted on a semiannual basis. A dual-phase extraction/groundwater extraction system operated from 2010 to 2014. A dual-phase extraction/soil vapor extraction system operated from 2010 to 2014. VOCs-impacted groundwater was treated onsite and discharged under Los Angeles County Sanitation District (LACSD) industrial wastewater discharge permit. VOCs-impacted soil vapor was treated onsite and discharged to the atmosphere under Air Quality Management District (AQMD) permit. A sub-slab depressurizarion system is in place to mitigate the effects of soil vapor intrusion into indoor air at the site's buildings. To further treat VOCs in groundwater, enrollment under Waste Discharge Requirments Order No. R4-2014-0187 was granted to conduct injection of sodium lactate and bioaugmentation organisms. Injection activites were conducted in January 2015, under Monitoring and Reporting Program No. CI-10066. Injection results are being evaluated for performance.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	07/08/1998
Comments:	DTSC recommends delineating the lateral and vertical extent of VOC, petroleum hydrocarbons, PAHs and metals contamination at the site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	07/16/2007
Comments:	The review of the 1998 PEA indicated that additional soil and soil vapor sampling is still necessary.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Workplan
Completed Date:	12/11/2007
Comments:	Workplan describes soil gas and soil sampling to address data gaps.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Fieldwork
Completed Date:	12/17/2007
Comments:	Soil gas, soil sampling work.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	02/24/2010
Comments:	Based on soil and soil gas data, there is no further action needed at the site.

SERTA MATTRESS (Continued) **1000379496**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 09/09/2009
Comments: Additional soil gas sampling has been completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: No Further Action Letter
Completed Date: 02/24/2010
Comments: DTSC issued a No Further Action letter based on results from the PEA sampling activities and risk assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 05/14/1997
Comments: DTSC and Diesel ReCon Company executed a Voluntary Cleanup Agreement for a Preliminary Endangerment Assessment on the formerly leased property.

RB Case Number:	0227A
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Arsenic, Lead, Aviation, Benzene, Crude Oil, Diesel, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History:	The site was a former tank farm/refinery built in the 1930s. Golden West Refining Company (GWRC) purchased the refinery in 1983 and operated the refinery unit until February 1992, when crude oil processing operations were suspended. Only fuel transport operations were conducted by GRWC at the Refinery Property from February 1992 to August 1997. The site has now been redeveloped into a light industrial/commercial business complex. Before site redevelopment

GOLDEN WEST REFINERY (Continued) **S101480698**

soil impacted with petroleum hydrocarbons was excavated to ~ 10 - foot depth. The soil beneath the site is impacted with petroleum hydrocarbons including gasoline, diesel and aviation fuel. The first groundwater in Semi Perched Aquifer occurs ~22 feet depth. The second Artesia Aquifer occurs ~ 75 foot depth. Free phase petroleum hydrocarbon (gasoline, diesel and aviation fuel are present on groundwater in both aquifers. The plume extends offsite. In Semi-Perched Aquifer the plume extends ~3000 feet in a southwesterly direction to Rosecrans Avenue. Free phase hydrocarbons are being recovered by Golden West refinery form wells located on and off site. Golden West is also operating 6 soil vapor extraction systems to treat the vapors. Additional work is needed for groundwater assessment , monitoring and cleanup; particularly offsite. Soil vapor survey is also needed offsite.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/07/2016
Date Data Arrived at EDR: 04/05/2016

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016
Date Data Arrived at EDR: 04/05/2016

Next Scheduled EDR Contact: 10/17/2016
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/13/2015

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board?s review found that more than one-third of the region?s active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✓ Library of Congress
- ✓ University Publications of America
- ✓ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Andersen Environmental (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

or Operator: 14830 CARMENITA RD LLC/GCR TIRE CTRS
14830 CARMENITA RD
NORWALK, CA 90650

Equipment Location: 14830 CARMENITA RD, NORWALK, CA 90650

Equipment Description :

POWDER COATING SPRAY BOOTH, NORDSON, MODEL ECONO COAT II, 5'-3"W. X 9'-1"L. X 6'-11"H., WITH A 1/4 H.P. EXHAUST FAN AND TWO CARTRIDGE EXHAUST FILTERS, EACH 1'-0"W. X 3'-0"L. X 1'-0"D.

Conditions :

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA THAT IS AT LEAST 2 INCHES THICK.
4. A GAUGE SHALL BE INSTALLED AND MAINTAINED TO INDICATE, IN INCHES WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCHES WATER.
5. THIS EQUIPMENT SHALL BE OPERATED IN COMPLIANCE WITH RULES 1107 AND 1171.
6. MATERIAL SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILTY SHALL BE KEPT CURRENT AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
7. WET COATING SHALL NOT BE APPLIED IN THIS EQUIPMENT.
8. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).

FILE COPY

9. IN ADDITION TO THE REQUIREMENTS OF RULE 109, THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS FACILITY TO VERIFY CALENDAR MONTHLY VOLATILE ORGANIC COMPOUNDS (VOC) EMISSIONS IN POUNDS AND VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). ALL RECORDS SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT.

10. THE VOC EMISSIONS FROM THE USE OF ANY POWDER COATINGS SHALL BE CALCULATED USING AN EMISSION FACTOR OF 0.01 POUND OF VOC PER POUND OF POWDER COATING SPRAYED.

11. THE TOTAL QUANTITY OF POWDER COATINGS USED IN THIS EQUIPMENT SHALL NOT EXCEED 10 POUNDS IN ANY ONE DAY.

12. THE TOTAL QUANTITY OF VOC EMISSIONS FROM PERMITTED EQUIPMENT AND ASSOCIATED OPERATIONS AT THIS FACILITY SHALL NOT EXCEED 667 POUNDS IN ANY ONE CALENDAR MONTH. ASSOCIATED OPERATIONSINCLUDE, BUT ARE NOT LIMITED TO, SURFACE PREPARATION, EQUIPMENT CLEAN-UP, AND THE APPLICATION OF ANY OTHER MATERIALS TO PARTS THAT ARE SUBSEQUENTLY PROCESSED IN THE PERMITTED EQUIPMENT.

13. WIITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

14. THE OPERATOR SHALL RETAIN FOR 36 MONTHS ALL PURCHASE INVOICES FOR ALL VOC CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC CONTAING MATERIAL REMOVED FROM THE FACILITY.

15. THE OPERATOR SHALL MAINTAIN A SINGLE LIST THAT INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

16. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMINANTS IDENTIFIED IN RULE 1401, TABLE I, WITH AN EFFECTIVE DATE LISTING OF SEPTEMBER 10, 2010.

17. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR 36 MONTHS, AND SHALL BE MADE AVAILABLE TO ANY DISTRICT PERSONNEL UPON REQUEST.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

SUBJECT: LOT DIVISION CASE NO. 186 (R)
PRECISE DEVELOPMENT PLAN NO. 1200(R)
ENVIRONMENTAL ASSESSMENT
LOCATION: 14830 Carmenita
APPLICANT: Silvercrest Industries
ZONE: M-2
REQUEST: To divide two parcels into four parcels for lease purposes; and to construct three "pre-fab" offices, 504 sq. ft. in size each, and one metal storage building, 1500 sq. ft. in size.

BACKGROUND:
The original request was for three lots; lot no. 1 will be divided into two lots for a total of 4 lots on the property.

CONDITIONS OF APPROVAL:
The following conditions are recommended:

A. Compliance with conditions of the City Engineer and Building Department.
B. Compliance with all provisions of the Norwalk Municipal Code pertaining to Lot Divisions, including recordation of a parcel map in substantial conformance with the submitted tentative Parcel Map No. 14169.
C. The development shall be in substantial conformance with submitted plans including elevations indicating a mansard roof and wood siding on all sides of the proposed structure.
   1. The proposed offices shall be placed on permanent foundations.
D. Parking shall be as shown and in conformance with the Planning Commission Policy Statement No. 19.
   1. A minimum of one handicapped stall shall be provided for each parcel.
      a. A "Barrier Free" sign shall be provided, and the stalls shall be cross-striped.
   2. Wheelstops shall be provided adjacent to any building wall or fence.
   3. All striping shall be completed prior to approval of the final map.
   4. Any reduction in approved parking is strictly prohibited without prior Planning Director approval.
E. Landscape planters shall be as shown on submitted plans.
   1. Weeds and debris shall be removed from the existing planters and shall be refurbished.
   2. A landscape plan indicating the size, spacing, and type of plant materials proposed shall be submitted to the Planning Department for review and approval prior to installation of any plant materials.
F. Fencing shall be as shown on submitted plans, screening along the west and north perimeter of parcels #1 and #2 shall be provided; type of screening shall be submitted for review and approval by the Planning Director.
G. The existing guard house (trailer) shall be removed from the property.
H. No parcels, except Parcel No. 3 shall be leased prior to approval of the final map.
I. A 30 ft. wide easement providing access from Carmenita Rd. to Parcel Nos. 2 and 3 shall be recorded with this Lot Division.
J. No signs shall be established without prior Sign Permit approval.
K. Any outdoor lighting shall be energy efficient, and reviewed and approved by the Planning Director; low pressure sodium lighting

CONDITIONS OF APPROVAL: (cont'd)

M. All outdoor storage shall be stacked as shown on plans, and shall be maintained in a neat, and organized manner including trailers and mobile facilities.

N. Six (6) copies of site plans and two (2) elevations and floor plans for the proposed offices and storage building shall be submitted to the Planning Department for processing prior to obtaining building permits, or approval of the final map.

O. An "Acceptance of Conditions" form shall be properly executed and returned to the Planning Department prior to further processing of this Lot Division application.

P. Compliance with all conditions shall be made prior to release of any new utilities and/or a Certificate of Occupancy.

Q. This Precise Development Plan shall become null and void unless exercised within one yar of the date of final approval, or such extension of time as may be granted by the Planning Director and/or Board of Administrative Review pursuant to a written request prior to the expiration date, and shall not become effective until the 10 day appeal period has elapsed.

ENVIRONMENTAL ASSESSMENT:

An environmental assessment has been prepared, and no significant impact has been discovered. A Negative Declaration was recommended by the Board of Administrative Review at their meeting of March 5, 1981.

APPROVED AND ADOPTED BY THE NORWALK BOARD OF ADMINISTRATIVE REVIEW ON THIS 30th DAY OF JULY, 1981.

TO: BOARD OF ADMINISTRATIVE REVIEW

FROM: CITY ENGINEER

SUBJECT: LOT DIVISION NO. 186 (R) & PRECISE DEVELOPMENT PLAN 1200(R)
14830 CARMENITA ROAD

REVISED ENGINEER'S REPORT NO. 81-130

Public Works reviewed the area in question, and the following deficiencies in land development as they pertained to public rights-of-way were noted. If the Board of Administrative Review approves this Lot Division, these deficiencies should be corrected by constructing the required improvements in accordance with Norwalk Municipal Code, Article VIII, Chapter 4, and Article IX, Chapter I, Part 7.

1) The tentative Parcel Map No. 14169 shall meet all the provisions of the Norwalk Municipal Code relating to parcel maps and the latest Subdivision Map Act.

2) The final lot division map shall:

   a) Be prepared in accordance with City of Norwalk Form No. 70.112.

   b) Give reference to all monuments found or set.

   c) Include latest title report parcel map guarantee of property.

   d) Include traverse calculations of the parcels indicating closure within 1:10,000.

   e) Have a final map checking fee of $1105.50.

   f) Be recorded by the Los Angeles County Recorder.

3) All existing and/or proposed easements shall be shown on the final map.

4) Two inch I.P. monuments (24 inch minimum length) shall be set at all parcel corners, except where sidewalks are to be constructed or existing. The surveyor shall set L. and T. in the sidewalk at these locations.

5) There are no pertinent traffic factors at this time.

6) Prior to the approval of any development plans, the applicant will be required to contact the Fire Department and obtain the fire flow requirements for this development. The applicant will also be required to contact the local water company to determine the existing fire flow rate in the area of this development. If the existing fire flow capabilities are below the required minimum values, the applicant will be required to provide the necessary means for obtaining the required fire flows.

7) All buildings will be required to have separate sewer laterals to the public sewer, two or more buildings will not be allowed to share the same lateral. If the sewer laterals from one building encroaches upon the parcel area of another building (in other words, it crosses another parcel line on the way to the public sewer) appropriate easements will have to be shown on the tract map.

LEGAL DESCRIPTION

Those portions of the South half of the Southwest quarter of the Northwest quarter of Section 21, Township 3 South, Range 11 West, in the Rancho Los Coyotes, City of Norwalk, County of Los Angeles, State of California, as per map recorded in Book 41819 Page 141 et seq. of Official Records, in the office of the Recorder of said County, described as follows:

PARCEL 1:

The Westerly 409.86 feet of the Easterly 523.29 feet of the North half of said South half of the Southwest quarter of the Northwest quarter, of said Section 21.

PARCEL 2:

The Westerly 473.29 feet of the Easterly 523.29 feet of the Northerly 140 feet (measured along the Westerly line) of the South half of said South half of the Southwest quarter of the Northwest quarter of said Section 21; together with the Easterly 50 feet of said South half of the South half of the Southwest quarter of the Northwest quarter of said Section 21.

EXCEPT from said Easterly 50 feet, the Southerly 15 feet thereof.

PARCEL 3:

A non-exclusive easement for railroad purposes over the Southerly 20 feet of the Easterly 113.43 feet, of the North half of the South half, of the Southwest quarter of the Northwest quarter of said Section 21.

EXHIBIT "A"

EXHIBIT A

Parcel No. 1:

That portion of Parcel No. 1 of Parcel Map No. 1428, in the City of Norwalk, County of Los Angeles, State of California, as shown on map filed in book 24, page 79 of Parcel Maps, in the office of theCounty Recorder of said County, lying easterly and southerly of a line described as follows:

Beginning at a point in the northerly line of said Parcel No. 1, distant thereon south 89° 25' 53" west, 180.25 feet from the northeast corner of said Parcel; thence parallel with the easterly line of said Parcel, south 0° 13' 53" east, 330.31 feet to the easterly prolongation of the most northerly southerly line of said Parcel No. 1; thence along said prolongation, south 89° 25' 53" west, 225.87 feet to an angle point in the boundary line of said Parcel No. 1.

Reserving therefrom an easement for utility, drainage, santiary sewer and incidental purposes; together with the right to grant same to others over that portion of said land included within the following described property:

Parcel "A": The westerly 20 feet of the northerly 125 feet of the southerly 160 feet of the easterly 180.75 feet of Parcel No. 1 of Parcel Map No. 1428, City of Norwalk, County of Los Angeles, State of California, as per map recorded in book 24, page 79 of Parcel Maps in the office of the County Recorder of said County.

2.68 ACRES

Parcel "B": The southerly 20 feet of the northerly 105 feet of the westerly 160.75 feet of the easterly 684.04 feet, of the northerly 140 feet (measured along the westerly line) of the south 1/2 of the south 1/2 of the southwest 1/4 of the northwest 1/4 of Section 21, township 3 south, range 11 west, in the Rancho Los Coyotes, City of Norwalk, County of Los Angeles, State of California, as per map recorded in book 41819, page 141 et seq. of Official Records in the office of the County Recorder of said County.

Parcel No. 2:

An easement for ingress and egress over the northerly 24 feet, measured along the westerly line of the south 1/2 of the south 1/2 of the southwest 1/4 of the northwest 1/4 of Section 21, township 3 south, range 11 west, in the Rancho Los Coyotes, in the City of Norwalk, County of Los Angeles, State of California, in book 41819, page 141 et seq of Official Records in the office of the County Recorder.

Except the westerly 30.00 feet of said land.

ALSO EXCEPT any portion of said land lying within the lines of Parcel No. 1 above described.

ZONE: M-2 & P

REQUEST: TO CONSTRUCT 60,000 SQ. FT. INDUSTRIAL BUILDING TO PERMIT EXPANSION OF MOBILE HOME MANUFACTURING FACILITY

APPROVED PLANS DATE STAMPED "CITY OF NORWALK PLANNING COMMISSION APRIL 2, 1973".

The requirements checked (✓) below apply to the approved plans for the subject development and must be completed prior to occupancy. Please call the Planning Department, 868-3254, Ext. 255, for inspection of the applicable Planning Requirements prior to occupancy.

PLANNING REQUIREMENTS:

✓ 1. That a total of 237 off-street parking spaces be provided as shown on the approved plans, at the following ratio:

___ General Commercial - one space for each 250 sq. ft. of the _____ sq. ft. of gross floor area of the building.

✓ Industrial - one space for each vehicle used in conjunction with the property use —, PLUS either one space for each 500 sq. ft. of the 118,500 s/f gross floor area of the building 237; or one for each two employees on the maximum work shift, —, whichever is the greater.

___ One and a half parking per apartment.

___ Restaurant, Coffee Shops - one space for each of the 100 sq. ft. of the _____ sq. ft. of gross floor area of the building.

___ Bars, Cocktail Lounges - one space for each 80 sq. ft. of the _____ sq. ft. of gross floor area of the building.

___ Other uses

✓ 2. All parking stalls must be striped as shown on approved plans and provided with concrete wheel stops 30" from front of stall where indicated, except as noted in #3 below. The minimum parking stall size is 9' x 18' with a 26' turning radius for 90° parking. (For all parking stalls adjacent to walls, fences, buildings, or other obstructions a minimum 10' to 11' width is required as shown on approved plans.)

✓ 3. That landscaped planter areas, enclosed with 6" concrete curbing, and including hose bibs and/or sprinkler water system, be provided as shown on approved plans.

___ width planters, to permit 2-1/2 ft. of automobile front overhang and eliminate the need for concrete wheel stops, shall be provided in the locations shown on the approved plan.

___ 4. Minimum total open space requirement of _____ at the ratio of:

___ 200 sq. ft. per apartment, exclusive of required front and side yards, and exclusive of parking areas, drives, or turn-around areas, as shown on approved plans. Open area to be utilized solely for recreation, patio, outdoor living areas, swimming pools, landscaping and laundry drying yards.

___ Other uses, convalescent homes, etc.

✓ 5. That a 6' high ~~block wall~~ CHAIN LINK fence, measured at finished grade level, be provided as shown on approved plan. ~~as~~

___ Open storage and open work areas are required to be screened from public visibility by a 6' high block wall and in accordance with Norwalk Municipal Code requirements.

___ Driveways, open parking areas and maneuvering areas are required to be separated from residentially zoned property or permitted ground floor residential uses by a solid masonry wall 6 ft. in height, except that height of required wall shall decrease to 42" within the required front setback.

___ 6. That all pump islands be a minimum 14 ft. from the required planters adjacent to property line.

✓ 7. That A minimum 5' x 7' paved trash storage area(s) be provided, screened from public visibility and easily accessible, as shown on approved plans.

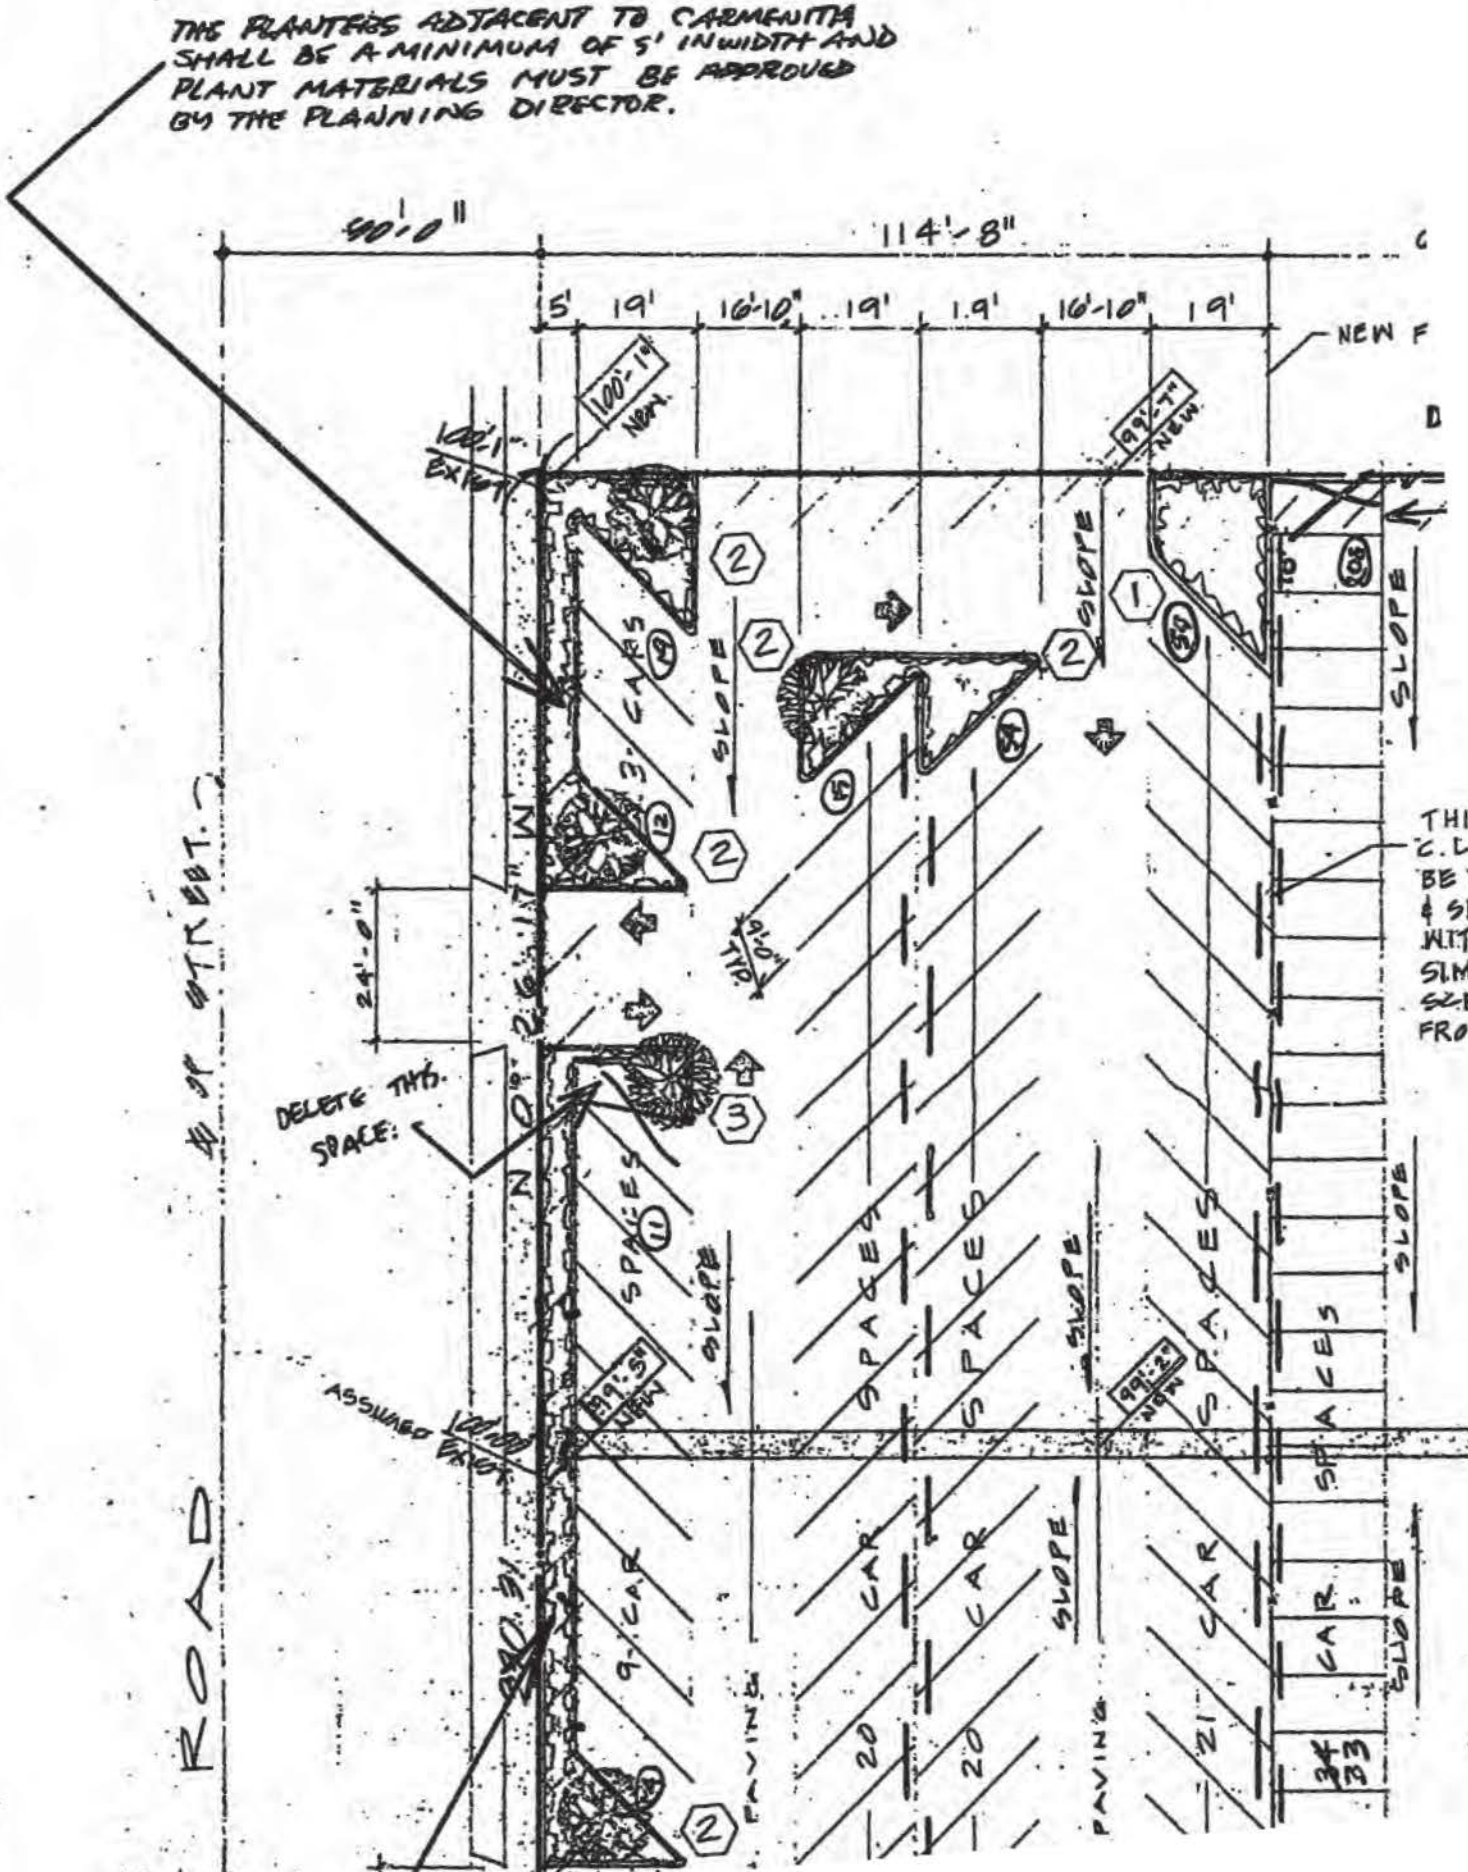
✓ 8. That all parking spaces, driveways, and maneuvering areas be free of any encroachments such as utility poles, gas meters, or any other appurtenances.

✓ 9. That this approved parking plan shall become null and void if not exercised within 1 year of approval date or by FEBRUARY 26, 1974.

10. ALL UTILITIES SHALL BE PLACED UNDERGROUND UNLESS WAIVED BY THE CITY ENGINEER.

11. DEVELOPMENT SHALL SUBSTANTIALLY CONFORM WITH PLANS DATED APRIL 2, 1973 AND ELEVATIONS DATED FEBRUARY 7, 1973 AND SHALL COMPLY WITH CONDITIONS A THROUGH E OF THE PLANNING COMMISSION REPORT DATED FEBRUARY 21, 1973 AS FINALLY APPROVED WITH AN ENVIRONMENTAL IMPACT STATEMENT BY THE CITY COUNCIL ON FEBRUARY 26, 1973, INCLUDING:

A. EXTERIOR BUILDING MATERIALS, INCLUDING COLORS PROPOSED, SHALL BE AS INDICATED ON PLANS SUBMITTED.
B. PROVISION FOR 237 PARKING SPACES IN CONFORMANCE WITH PLANNING COMMISSION POLICY STATEMENT NO. 19 - OFF STREET PARKING SHALL BE MADE AS INDICATED ON REVISED PARKING PLAN DATED APRIL 2, 1973.
C. ALL LANDSCAPED PLANTER AREAS SHALL BE PROVIDED WITH A WATERING SYSTEM AND MAINTAINED IN A NEAT AND CLEAN MANNER.
   1. PLANTERS ADJACENT TO CARMENITA SHALL BE A MINIMUM OF 5' IN WIDTH AND ALL PLANT MATERIALS PROPOSED SHALL BE APPROVED BY THE PLANNING DIRECTOR.
   2. THE 12'±13' PLANTERS ADJACENT TO EXCELSIOR DRIVE ENTRY



THE PLANTERS ADJACENT TO CARMENITA SHALL BE A MINIMUM OF 5' IN WIDTH AND PLANT MATERIALS MUST BE APPROVED BY THE PLANNING DIRECTOR.

TO City of Norwalk, Building Department | AT 12700 Norwalk Blvd.

SUBJECT Attn: Brian Hopper: | DATE November 12, 1973

The welding on the original crane system, that was removed from the Signature Plant, and relocated at the new Silvercrest Building, was done by Brownyard Structural Steel, City of Los Angeles License No. #534.

Brownyard Structural Steel, 18060 Mt. Washington, Fountain Valley, Calif.

Very Truly Yours,

PLEASE REPLY TO ⇒ SIGNED John L. Mc Morris,

Arrow Cranehoist Corp.

For our approval of the welding, please have Brownyard Structural Steel submit a letter stating that the welding on this particular crane was done by them, under their City of Los Angeles Fabricator's number. / Clamps should be signed by Engineer and keyed to crane plans submitted for our review (coordinate with Mr Papayans).

APPLICATION FOR ELECTRICAL PERMIT

COUNTY OF LOS ANGELES — BUILDING AND SAFETY

1

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.)

Policy No. C15220259 Company INA

☐ Certified copy is hereby furnished.

☑ Certified copy is filed with the county building inspection department.

Date 9-15-80 Applicant [signature]

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the work involved by the permit is for one hundred dollars ($100) or less.)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws.

Date _____ Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

LICENSED CONTRACTORS DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Number 360610 Lic. Class C-10

Contractor [signature] Date 9-15-80

HOME OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Section 7031.5, Business and Professions Code):

☐ I, as owner of the property, will do the work and the structure is not intended or offered for sale (Section 7044, Business and Professions Code).

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all County ordinances and State laws regulating Electrical wiring, and hereby authorize representatives of this County to enter upon the above-mentioned property for inspection purposes.

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason *(Section 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:*

☐ I, as owner of the property will do the work, and the structure is not intended or offered for sale.

(Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I am exempt under Sec. _____,

Your application for a permit, together with plans and specifications, has been examined and you are advised that the issuance of a permit is withheld for the reasons hereinafter set forth.
The approval of plans and specifications does not permit the violation of any section of the Building Code, or other County Ordinance or State Law.

USE OF STRUCTURE	TYPE	GROUP	STY.	USE ZONE
Crane Structure				Z.E.C. NO.
VALUATION $ 50,000	AREA SQ. FT.	VALUATION PER SQ. FT. $		P.P. NO.

1. The WF 16x64 dimensions used on the calculations do not appear to match those in the AISC manual. Therefore the stresses calc'd may not be adequate Also since the span exceeds the 19.4' max unsupported compression flange requirement a reduced allowable stress per L.A.C. Bldg Code Sec 2702 a-4 Formula 2-7 is required.
2. Combined stresses of vert & hor. loads appear to be too large
3. Clarify WF 16x67 shown on plans with WF shown on calc's W 16x64 (?)
4. Show on the plan M 4434-401 the max column height.

INDICATE IN THIS SPACE ON WHAT SHEET OR PAGE CORRECTIONS ARE MADE.

RETURN THIS SHEET WITH ALL ORIGINAL AND REVISED PLANS AND SPECIFICATIONS WHEN CORRECTIONS HAVE BEEN MADE.

NOTES

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason *(Section 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:*

I, as owner of the property will do the work, and the structure is not intended or offered for sale.

(Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I am exempt under Sec. .....

GROUND FAULT SYSTEM TEST REPORT

CLIENT: LEMKE-JEWELL
1641 W. COLLINS
ORANGE, CALIF.

JANUARY 26, 1981

ETI REFERENCE: 2081039

LOCATION: WESTERN PIPING DIV.
14830 CARMENITA RD.
NORWALK, CALIF.

1.0 PURPOSE

PERFORMANCE TESTS ON GROUND FAULT PROTECTION SYSTEMS UPON INSTALLATION ARE REQUIRED BY THE NATIONAL ELECTRICAL CODE (230-95C). THE GROUND FAULT PROTECTION OPERATES TO CAUSE THE CIRCUIT INTERRUPTING DEVICE TO OPEN ALL UNGROUNDED CONDUCTORS OF THE FAULTED CIRCUIT. PERFORMANCE TESTS ASSURE PROPER SYSTEM INSTALLATION AND OPERATION.

2.0 SUMMARY

THE SYSTEM IS ACCEPTABLE.

NO INSTALLATION OR EQUIPMENT DEFICIENCIES WERE FOUND.

3.0 CURRENT PICKUP LEVEL AND TIME DELAY SETTING

RELAY SETTINGS WERE TEMPORARILY MADE FOR SERVICE ENERGIZATION. THE DESIGN ENGINEER SHOULD BE CONSULTED FOR THE FINAL SETTINGS.

4.0 PROCEDURES

4.1 VISUAL INSPECTION

.1 INSPECTED COMPONENTS FOR PHYSICAL DAMAGE.

.2 DETERMINED GROUND SENSOR WAS LOCATED PROPERLY AROUND BUS OR CABLE OF CIRCUIT TO BE PROTECTED.

° VERIFIED ON ZERO SEQUENCE SYSTEMS THAT ALL PHASE AND NEUTRAL CONDUCTORS PASS THROUGH THE CORE WINDOW ONCE, IN THE SAME DIRECTION, AND THAT THE GROUNDING CONDUCTOR DID NOT.

.3 INSPECTED MAIN BONDING JUMPER TO ASSURE:

° PROPER SIZE

° TERMINATION ON LINE-SIDE OF NEUTRAL DISCONNECT LINK.

° TERMINATION ON LINE-SIDE OF SENSOR ON ZERO SEQUENCE SYSTEMS.

.4 INSPECTED GROUNDING ELECTRODE CONDUCTOR TO ASSURE:

° PROPER SIZE

° CORRECT SWITCHBOARD TERMINATION

.5 INSPECTED GROUND FAULT CONTROL POWER TRANSFORMER FOR PROPER INSTALLATION AND SIZE.

° WHEN CONTROL TRANSFORMER IS SUPPLIED FROM LINE-SIDE OF GROUND FAULT PROTECTION CIRCUIT INTERRUPTING DEVICE, OVERCURRENT PROTECTION AND A CIRCUIT DISCONNECTING MEANS MUST BE PROVIDED.

.6 VISUALLY INSPECTED NEUTRAL DOWNSTREAM OF NEUTRAL DISCONNECT LINK TO VERIFY ABSENCE OF GROUNDS.

4.2 ELECTRICAL TESTS

.1 GROUND FAULT SYSTEM PERFORMANCE INCLUDING CORRECT RESPONSE OF THE CIRCUIT INTERRUPTING DEVICE WAS CONFIRMED BY PRIMARY GROUND SENSOR CURRENT INJECTION.

° RELAY PICKUP CURRENT WAS MEASURED;

° RELAY TIME DELAY WAS MEASURED AT TWO VALUES ABOVE PICKUP.

.2 TESTED SYSTEM OPERATION AT FIFTY-SEVEN PERCENT (57%) RATED VOLTAGE.

5.0 TEST PARAMETERS

5.1 SYSTEM NEUTRAL INSULATION RESISTANCE SHOULD BE ABOVE 100 OHMS, AND PREFERRABLY 1 MEGOHM OR GREATER.

5.2 THE MAXIMUM PICKUP SETTING OF THE GROUND FAULT PROTECTION SHALL BE 1200 AMPERES, AND THE MAXIMUM TIME DELAY SHALL BE ONE SECOND FOR GROUND FAULT CURRENTS EQUAL TO OR GREATER THAN 3000 AMPERES (NEC 230-95A).

5.3 THE RELAY PICKUP CURRENT SHOULD BE WITHIN TEN PERCENT (10%) OF THE MANUFACTURER'S CALIBRATION MARKS OR FIXED SETTING.

5.4 RELAY TIMING SHOULD BE IN ACCORDANCE WITH THE MANUFACTURER'S PUBLISHED TIME-CURRENT CHARACTERISTIC CURVES.

6.0 RESULTS

THE GROUND FAULT SENSOR HAS BEEN CORRECTLY INSTALLED AND OPERATES PROPERLY.

INSPECTOR'S NOTES

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason. (Sec. 7031.5) *Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9) (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):*

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044) *Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).*

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044) *Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).*

☐ I am exempt under Sec._____, B.&P.C. for this reason _____

INSPECTOR'S NOTES

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason. (Sec. 7031.5) *Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9) (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):*

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044) *Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).*

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044) *Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).*

BUILDING PERMIT APPLICATION

10100214

City of NORWALK

DEPT. OF BUILDING & SAFETY 12700 NORWALK BLVD., NORWALK, CA 90650 (562) 929-5733

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (SEC. 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professional Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or though his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professional Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Section _____, B.& P.C. for this reason

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: State Fund

Policy No. 6492-0003212-09

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

10/22/10 _____

Noli Valera

Senior Project Manager

5261 West Imperial Highway, Los Angeles, California 90045 *310-854-6300*
Noli_Valera@efiglobal.com

Years' Experience: 10

Professional Summary:

Noli Valera is an experienced environmental professional and has been in the environmental consulting industry since 2006. His due diligence experience has included preparation of Phase I and II Environmental Site Assessments and Transactions Screen Assessments, residential, commercial and industrial property audits, dry cleaning facility audits, and groundwater, soil, and soil vapor sampling. His industrial hygiene experience has included indoor air quality and microbial investigations, asbestos/lead/PCB surveys, and hazardous material abatement oversight. He has also provided client services for regulatory compliance projects, which have included development of SPCC plans, SWPPP assessments and inspections, hazardous material reports, and emergency response plans for various clients.

Licenses and Certifications:

OSHA 40-Hour Hazardous Waste Operations Certified
California Division of Occupational Safety & Health (DOSH) Certified Site Surveillance Technician (CA, #08-4415, 2008)
California Department of Public Health (DPH) Certified Lead Sampling Technician (CA, #21468)
California Engineer-in-Training (CA, #156159, 2015)

Project Experience:

Equity Residential and AvalonBay Communities, Throughout California
Phase I ESAs/Annual Environmental Inspections
Prepared Phase I ESAs, conducted asbestos/lead based-paint surveys, and conducted annual environmental inspections for over 100 residential communities throughout California.

Bank of the West, Throughout Southern California
Phase I ESAs
Served on team preparing Phase I ESAs for over 30 Chevron-brand gasoline station properties throughout California, several of which had ongoing groundwater monitoring investigations. Conducted inspections and regulatory agency file reviews, prepared and reviewed reports.

Bay Area Oil Refinery, Contra Costa County, California
Semi-Annual Groundwater Monitoring
Served as team leader for semi-annual groundwater monitoring events at a San Francisco Bay Area oil refinery – over 300 groundwater monitoring wells were

gauged/sampled during the sampling event. Collected samples, prepared reports, and trained junior staff.

Steel Production Facility, Contra Costa County, California
Spill Prevention Control and Countermeasure (SPCC) Plan Preparation
Prepared SPCC plan for 400-acre steel manufacturing facility, which utilized various petroleum and food-grade aboveground storage tanks in their operations. Provided continuous consulting, including tank testing and tank removal oversight.

National Banking Institution, Throughout Northern and Central California
ACM Surveys and Abatement Oversight
Conducted over 75 ACM surveys and abatement oversight projects for branch offices of a national banking institution.

Former Stevedoring Facility, Los Angeles, California
Phase I/II ESA
Prepared Phase I and Phase II report for former ship repair facility near the Port of Los Angeles. Conducted soil and soil vapor assessment for former underground storage tanks (USTs) for anticipated reconstruction of property.

Dry Cleaner Facility, Burbank, California
Phase I/II ESA
Prepared Phase I/II report for shopping center, which included an active dry cleaner facility (since 1950s). The assessment, which was conducted on behalf of a potential buyer, discovered the presence of perchloroethylene (PCE) in local soils, warranting further remediation work.

Wiseburn High School, El Segundo, California
SWPPP Inspections
Conducted weekly SWPPP inspections for the Wiseburn High School construction project and administered best management practices per stormwater discharge requirements

Professional Experience:

Years' Experience: 9

Professional Summary:

Heather Nilson has been in the environmental business since 2006 and meets the definition of an Environmental Professional (EP) as defined in the EPA All Appropriate Inquiry (AAI) regulations. Ms. Nilson is an experienced environmental professional with experience working both for regulatory agencies and in the private sector. Ms. Nilson has worked directly with clients and regulatory bodies to assess environmental conditions and has assisted in the development of plans by which to resolve such conditions. Ms. Nilson's experience includes all stages of environmental projects including Phase I environmental site assessments, soil vapor surveys (Phase II), Property Condition Assessments, Seismic Risk Assessments, and project management of ALTA Surveys.

- Phase I Environment Site Assessment
- Property Condition Assessment
- Seismic Risk Assessment
- ALTA Surveys

Licenses and Certifications:

OSHA 40-Hour Hazardous Waste Operations Certified
OSHA 8-Hour HAZWOPER Annual Refresher

Project Experience:

Firestone Boulevard - Southgate, California
Due diligence performed at a property which revealed a fill port during site inspection. In the 1940's and 1950's, the site had been identified as a historical "gas station" and "service station." Based on the observation of the fill port and historical data, a geophysical survey and soil sampling program was initiated at the site. As no contamination was encountered at the site after extensive testing, the bank loan was funded and a reserve account was establish to remove the UST post closing.

Affordable Housing Projects - California
Phase I Environmental Site Assessment Reports were conducted for various properties throughout the state of California for public agencies and private entities as potential sites for affordable housing projects. Special challenges involved with specific projects included soil sampling and pesticide testing for properties that were historically utilized for agricultural purposes.

Management of Phase I Process
Conducted numerous Phase I Environmental Site Assessments throughout California and in several states across the US. Managed local historical and regulatory research

through communications with local agencies by email and telephone. Additionally, communication is kept with sub consultants when the subject site is out of our locality in order to create smooth process for all involved.

Non-profit Housing and Education Center Assessment – Culver City, California
Due diligence performed at multiple properties of a non-profit group specializing in the education of special need children and adults. Assessments were conducted of residential and educational properties. Special concerns during inspections included the privacy of those onsite.

Los Cerritos Wetlands – Long Beach, California
Metals analysis conducted of soils within the wetlands in order to create baseline study for future comparisons of further research conducted by CSU, Long Beach. Challenges included tidal influence and various soil conditions encountered during hand auguring. Testing was completed using EPA 6000/7000 in a lab on campus and analyzed through tables utilizing Microsoft Excel.

Area 3 San Gabriel Valley, Los Angeles County, California
Analysis and maintenance of records database for Los Angeles Regional Water Quality Control Board SLIC2 unit. Tasks included visitation of sites, visual observations, communication with tenants, and mailings to owners. Management of files was conducted in storage and for consultants review. Communication was maintained with consultants in order to provide information needed with respect to sites under investigation.

Professional Experience:

Andersen Environmental an EFI Global Company, March 2015 to Present
Senior Project Manager, 2015-present

Andersen Environmental, Los Angeles, CA June 2007-March 2015
Senior Project Manager, 2012-present
Project Manager, 2008-2012
Environmental Specialist, 2007-2008

Los Angeles Regional Water uality Control Board, April 2006 to May 2007

Education:

BS, Environmental Science and Policy, California State University, Long Beach, California, 2007

1.0 INTRODUCTION

Bureau Veritas North America, Inc. (Bureau Veritas) has prepared this Report to document limited subsurface investigation (LSI) activities completed on behalf of Sydney Development. This LSI was completed at the property located at 14820 and 14830 South Carmenita Road and 13555 East Excelsior Drive in Norwalk, Los Angeles County, California (the Site, Figures 1 and 2). This LSI was performed for due diligence purposes to support a potential real estate transaction and was conducted in general accordance with Bureau Veritas' Proposal No. 3303.12.368, dated June 19, 2012. We understand that Comerica Bank may rely on the results of this Report. Information in this Report is based on our *Phase I Environmental Site Assessment* (Phase I ESA), dated June 14, 2012.

1.1 BACKGROUND

The approximate 12-acre Site consists of four parcels. The two westernmost parcels are occupied by a single concrete tilt-up warehouse building addressed as 14820-A and 14820-B Carmenita Road, with an asphalt-paved parking lot and concrete-paved loading dock on the south side of the building. Both units of this building are in use by freight distribution/warehousing tenants. The two eastern parcels of the Site are each developed with a single concrete tilt-up warehouse building and surrounding asphalt-paved storage areas and parking lots, and addressed from west to east as 14830 Carmenita Road and 13555 Excelsior Drive. These buildings are in use as a tire recapping facility and a recreational vehicle storage facility, respectively.

The Site was in agricultural use since at least 1928 until about 1968 and the current two warehouse buildings located on the eastern half of the property were constructed between 1970 and 1973. The remaining western half of the Site was developed as an outdoor storage yard and an employee parking lot at that time in association with these buildings. In 2001, the western half of the Site was developed with the current warehouse building. Additional details are presented in the Phase I ESA, which noted the following environmental concerns:

- The lengthy use, storage and/or generation of hazardous materials, hazardous waste and petroleum products associated with petroleum distillate- or chlorinated hydrocarbon-based, solvent parts washers, paint booths, outdoor spray painting, powder coating, a clarifier, concrete floor patches (possible former in-ground drainage and/or hydraulic equipment), a long concrete-lined trench covered with steel plates, and a former fuel underground storage tank (UST) reportedly removed in 1982 with no apparent investigation.

- The presence of fill of unknown origin and historical onsite agricultural use.

- Potential for onsite migration of petroleum and/or chlorinated solvents from upgradient facilities.

- The lack of methyl-tert butyl ether (MTBE) analytical data associated with the former onsite 10,000-gasoline UST.

Groundwater in the vicinity of the Site is encountered at depths ranging from approximately 35 to 40 feet below the ground surface (bgs) and flows to the east-northeast.

1.2 OBJECTIVE

Based on the information reviewed, Bureau Veritas recommended an LSI to assess the above environmental concerns.

2.0 SCOPE OF WORK

Bureau Veritas performed the following scope of work:

- Conducted pre-field activities that included preparing a site health and safety plan (SHSP) and cleared proposed boring locations of subsurface utilities or features.
- Advanced thirteen (13) soil borings using direct-push technology to investigate suspect areas
- Chemical analysis of collected soil, grab-groundwater and/or soil vapor samples.

2.1 PRE-FIELD ACTIVITIES

A drilling permit was required for four borings advanced to approximate depths of 35 to 40 feet below the ground surface (bgs), where groundwater was expected to be encountered. The drilling permit is included as Appendix A.

Bureau Veritas completed a Site Health and Safety Plan (SHSP) for the work proposed at the Site in accordance with the requirements of the State of California General Industry Safety Order (GISO) 5192 and Title 29 of the Code of Federal Regulations, Section 1910.120 (29 CFR 1910.120). A copy of the SHSP was kept onsite during field activities. The SHSP detailed the work to be performed, safety precautions, emergency response procedures, nearest hospital information, and onsite personnel responsible for managing emergency situations.

Bureau Veritas marked the proposed boring locations in white paint and notified Underground Service Alert (USA) at least 48 hours prior to drilling, as required by law. In addition, Pacific Coast Locators, a private utility locating service based in La Crescenta, California, cleared the proposed work area of potential underground utilities.

2.2 FIELD ACTIVITIES

The subsections below summarize the field activities completed for this subsurface investigation.

2.2.1 Soil Borings

On July 5 and 6, 2012, Bureau Veritas supervised the completion of 13 borings (BV-1 through BV-13) at the Site using truck-mounted and limited-access direct-push drilling rig operated by Kehoe Testing & Engineering (Kehoe), a California C-57 licensed drilling firm, located in Huntington Beach, California. The borings were advanced to a maximum depth of approximately 40 feet bgs. The completed borings locations are shown in Figure 2. The rationale for the selected locations was as follows:

- BV-1 in the southwestern portion of the Site where potential fill of unknown origin may be located and downgradient of the nearby gasoline service station (boring advanced to ~40 feet bgs)
- BV-2, BV-3 and BV-4 inside or outside the 14830 building in the vicinity of the powder-coating area, former paint booth, and filled-in floor feature, respectively (borings advanced to ~10 feet bgs)
- BV-5 inside the 14830 building along the linear trench feature (boring advanced to ~10 feet bgs)
- BV-6 and BV-7 inside the 13555 building where parts washers were historically used (borings advanced to ~10 feet bgs)
- BV-8 inside the 13555 building adjacent to the filled-in floor feature (boring advanced to ~10 feet bgs)
- BV-9 in the northeast portion of the Site in the vicinity of former outdoor painting area and representing the furthest downgradient location (boring advanced to ~40 feet bgs)
- BV-10 and BV-11 along the southern (upgradient) property boundary to evaluate the potential for onsite migration of petroleum and solvents in groundwater (borings advanced to ~40 feet bgs)
- BV-12 in the vicinity of the former USTs (boring advanced to ~15 feet bgs)
- BV-13 in the vicinity of the wash pad and clarifier (boring advanced to ~10 feet bgs)

2.2.2 Soil Logging and Sampling

With the exception of BV-10 and BV-11, soil cores were collected from each borehole for soil logging purposes using a 2-foot long core barrel sampler that contained an acetate liner to retain a relatively undisturbed soil core. Soil cores were examined for soil classification and described on boring logs in general conformance with the Unified Soil Classification System. Soil boring logs are presented in Appendix B.

Field screening of soil cores was performed using a photoionization detector (PID) to evaluate the potential presence of volatile organic compounds (VOCs) and assist in the selection of soil samples for chemical analysis. To initiate this procedure, soil samples were removed from plastic liners, placed into labeled plastic bags and sealed. After sufficient time had elapsed for vapor build-up inside the bags, the bags were punctured and the probe tip of the PID was inserted to allow measurement of ionizable substances in the headspace. Measurements of the headspace were obtained in the parts per million (ppm) range for total VOCs. The results of the headspace tests were recorded on the boring logs (Appendix B).

Soil samples were generally collected at approximate five-foot intervals and retained from soil cores for potential chemical analysis. Retrieved sample sleeves were cut from plastic liners, sealed with Teflon tape and plastic end caps, labeled with identifying information, and stored in a pre-chilled ice-chest awaiting transportation to the laboratory. Soil sample information including project information, sample time, sample date, sample identification and depth were recorded onto a chain-of-custody document that accompanied the soil samples in a pre-chilled ice chest for delivery to the analytical laboratory.

2.2.3 Grab-Groundwater Sampling

Bureau Veritas attempted to collect grab-groundwater samples from borings BV-1, BV-9, BV-10 and BV-11 by advancing the borings a few feet into saturated soils to first encountered groundwater using the direct-push equipment. At these locations, a temporary well casing was inserted into the open borehole, and one-inch-diameter schedule 40 PVC casing with 5 feet of slotted-screen was inserted approximately 2 to 4 feet below first encountered groundwater to facilitate groundwater sampling. New polyethylene tubing outfitted with a ball-check valve was used to purge groundwater from the screened casings at each location. A grab-groundwater sample could not be obtained at BV-9 due to insufficient water accumulation within the borehole. The collected grab-groundwater samples were sealed, labeled and placed in a pre-chilled ice chest for delivery to the laboratory. Chain-of-custody records were completed and accompanied the grab-groundwater samples to the laboratory.

2.2.4 Soil Vapor Sampling

Soil vapor (or soil gas) samples were collected at six boring locations (BV-1 to BV-4, BV-6 and BV-7) at depths of approximately 5 feet bgs to evaluate the soil vapor concentrations beneath the Site. A total of 10 soil vapor samples (6 samples, 1 duplicate sample, and 3 purge volume samples) were collected and analyzed from temporary “wells” constructed within the borings. In general, temporary soil vapor wells were constructed within the complete boreholes at approximately five feet bgs. A temporary soil vapor probe attached to an approximate 8-foot length of inert tubing containing a vapor inlet filter was installed at approximate depths of 5 feet bgs. After the tubing was set in place, approximately 6 inches of clean sand was added above and below the tip of the probe/tubing. The borehole annulus was then be filled with approximately one foot of dry granular bentonite and then filled with hydrated bentonite chips to grade.

The soil vapor probes were allowed to stabilize for a minimum of 30 minutes prior to sample collection. On July 6, 2012, Jones Environmental Laboratory (JEL) of Fullerton, California, performed soil vapor sampling of the soil vapor probes. JEL is a certified State of California laboratory and collected the soil vapor samples under the supervision of Bureau Veritas in accordance with the guidance provided in the California Department of Toxic Substances Control’s (DTSC) *Active Soil Gas Investigations* (DTSC, 2010) and DTSC’s *Guidance for the Evaluation and Mitigation of Subsurface Vapor Intrusion to Indoor Air* (DTSC, 2011).

Soil vapor samples were collected in glass gas-tight syringes equipped with Teflon plungers at an approximate rate of 200 cubic centimeters per minute (cc/min). The sample tubing placed in the ground for soil gas sampling was purged a minimum of three different times as recommended by DTSC. This purge test determined how many purges of the soil gas tubing were needed throughout the project. Consistent with DTSC’s sampling protocols, one purge (1P), three purge (3P) and seven purge (7P) volumes were collected and analyzed to make this determination at BV-2 and BV-4. The 3P volume was initially selected as an appropriate purge sample volume for the collection of the soil vapor samples from BV-1, BV-3 and BV-4. However, upon analyzing and measuring positive results for the 1P sample from BV-2, this purge volume was determined to be a more appropriate purge volume. The 1P sample was analyzed for the remaining samples.

During sampling, a tracer gas (n-propanol) was poured onto a paper towel, which was subsequently placed at the tubing/bentonite seal interface on the ground just prior to sampling. Subsequent soil vapor samples were analyzed for this compound to evaluate if there were surface leaks into the subsurface and/or tubing. A duplicate soil vapor sample was collected each day for laboratory quality control. A duplicate soil vapor sample was collected at BV-7. Collected soil vapor samples were recorded on a chain-of-custody document that accompanied the vapor samples from the point of collection to the on-site mobile analytical laboratory. After collection and analysis of the soil vapor samples, the sample tubing was withdrawn from the boreholes.

2.2.5 Decontamination, Grouting and Waste Generation

Drilling equipment and down-hole sampling equipment was washed in a solution of non-phosphate detergent, double-rinsed with potable water prior to each use, and allowed to dry. Upon collection of the samples, the boreholes were backfilled with Type II Portland cement grout in accordance with County guidelines. Soil drilling cuttings were removed from the Site by the drilling contractor for appropriate disposal.

3.0 LABORATORY ANALYSES

A total of 12 soil, three (3) grab-groundwater and 10 soil vapor samples were analyzed during this investigation. The samples were submitted to JEL of Fullerton, California and Curtis & Tompkins Analytical Laboratories Ltd. (CTL) of Berkeley, California. JEL and CTL are State of California certified laboratories and analyzed the samples for the following constituents using United States Environmental Protection Agency (USEPA)-approved methods:

- Total petroleum hydrocarbons (TPH) quantified as gasoline range organics (GRO/TPH-g) by Method 8260B – 11 soil (BV-1 to BV-9, BV-12 and BV-13), three grab-groundwater (BV-1, BV-10 and BV-11), and six soil vapor (BV-1 to BV-4, BV-6 and BV-7)
- TPH quantified as diesel range organics (DRO/TPH-d) and motor oil range organics (ORO/TPH-mo) by Method 8015M using silica gel cleanup – 11 soil (BV-1 to BV-9, BV-12 and BV-13) and two grab-groundwater (BV-1, BV-10)
- VOCs by Method 8260B – 11 soil (BV-1 to BV-9, BV-12 and BV-13), three grab-groundwater (BV-1, BV-10 and BV-11), and six soil vapor (BV-1 to BV-4, BV-6 and BV-7)
- California Assessment Manual (CAM) 17 total metals by Methods 6010/7471 – four soil samples (BV-1, BV-2, BV-6 and BV-8)
- Organochlorine pesticides (OCPs) by Method 8081 – four soil samples (BV-1, BV-2, BV-6 and BV-8)

4.0 INVESTIGATION FINDINGS

Bureau Veritas evaluated the data generated during this investigation. Our findings are summarized in the subsections below.

4.1 SOIL BORING OBSERVATIONS

Boring logs indicate soil types generally consisting of uniform, unconsolidated fine grained sand to silty sand and sandy silt to depths of up to 15 feet bgs. An interval of fine to medium sand was encountered at a depth of 8 feet bgs in boring BV-1. Bureau Veritas did not observe evidence of contaminated soil (*e.g.*, discoloration and/or petroleum odors). Elevated PID readings were recorded in boring BV-1s, BV-9 and BV-12. Groundwater was generally encountered at a depth of 35 feet bgs at borings advanced to that depth for the purpose of collecting groundwater samples, although at one location (BV-9) the groundwater recharge rate was insufficient to enable collection of groundwater samples for analysis. Similarly, groundwater sampling was partially completed at another location (BV-11).

4.2 SOIL ANALYTICAL RESULTS

A summary of the detected chemicals of concern in the soil samples is provided in Table 1. Copies of the soil analytical laboratory reports are presented in Appendix C. Chemical analytical results were compared to DTSC California Human Health Screening Levels (CHHSLs) and California Regional Water Quality Control Board (RWQCB) Maximum Soil Screening Levels (SSLs), where appropriate. The soil analytical results are summarized below

4.2.1 TPH

Concentrations of TPH were not detected in the soil samples submitted for this chemical analysis above laboratory reporting limits (which are below applicable screening levels).

4.2.2 VOCs

Concentrations of analyzed VOCs were not detected in the soil samples submitted for this chemical analysis above laboratory reporting limits (which are below applicable screening levels).

4.2.3 OCPs

Concentrations of analyzed OCPs were not detected in the soil samples submitted for this chemical analysis above laboratory reporting limits (which are below applicable screening levels).

4.2.4 Total Metals

Total arsenic was detected in the 4.5-5.0 foot bgs samples from borings BV-1, BV-2 BV-6 and BV-8 at concentrations ranging from 4.0 to 13 milligrams per kilogram (mg/kg). The detected concentrations exceed the commercial/industrial land use CHHSL of 0.024 mg/kg established for arsenic. Other total metals, including total antimony, barium, beryllium, chromium, cobalt, copper, lead, mercury, nickel, vanadium and zinc were detected the analyzed soil samples at concentrations below commercial/industrial land use CHHSLs. Remaining analyzed metals were not detected above the laboratory reporting limits, which were below applicable screening levels.

4.3 GRAB GROUNDWATER ANALYTICAL RESULTS

Analytical results of the grab-groundwater samples are summarized in Table 2. A copy of the laboratory report and chain-of-custody documentation is included in Appendix D. The grab-groundwater analytical results were compared to California EPA, Department of Health Services (DHS) Primary Maximum Contaminant Levels (MCLs), where appropriate. The following is a summary of the analytical findings:

- GRO was not detected in the analyzed grab-groundwater samples.
- DRO and ORO were not detected in the grab-groundwater samples (note: insufficient water was obtained in BV-11, which prevented DRO/ORO analysis at this location).
- Benzene was detected at BV-10 and BV-11 at concentrations of 66 and 145 micrograms per liter (µg/L), respectively. These concentrations exceed the MCL for benzene. In addition, MTBE was detected at a concentration of 9.2 µg in BV-1, which is below the MCL. No other VOCs were detected in the analyzed samples, except for a low concentration of tert-amyl methyl ether (TAME), a gasoline fuel constituent, which was detected in BV-11.

4.4 SOIL VAPOR ANALYTICAL RESULTS

Analytical results of the soil vapor samples are summarized in Table 3. A copy of the soil vapor laboratory report and chain-of-custody documentation is included in Appendix E. The soil vapor analytical results were compared to CHHSLs and/or ESLs, where appropriate. The following is a summary of the analytical findings:

- PCE was detected in three soil vapor samples at concentrations of 1.09 µg/L (BV-3), 0.304 µg/L (BV-6) and 1.36 µg/L (BV-7). The values for BV-3 and BV-7 exceed the commercial/industrial use CHHSL of 0.6 µg/L established for PCE.
- Toluene was detected in two soil vapor samples at concentrations of 0.795 µg/L (BV-2) and 0.026 µg/L (BV-3), which do not exceed the commercial/industrial use CHHSL of 380 µg/L.
- Remaining analytes were not detected above laboratory reporting limits in the analyzed soil vapor samples, which are below their applicable commercial/industrial land use CHHSLs, where established.

4.5 QUALITY ASSURANCE/QUALITY CONTROL

No obvious signs of leakage were observed during the soil vapor sampling activities. N-propanol (the leak check compound) was not detected in the soil vapor samples above the laboratory method reporting limit indicating that significant leakage did not occur in the collection of the samples. The duplicate soil vapor samples collected at BV-7 showed relatively good precision.

The analytical laboratory data was reviewed by Bureau Veritas to establish its validity and to ensure the laboratory data was complete and accurate. Bureau Veritas verified that holding times for each analytical method were achieved and that the laboratory achieved the specific data quality objectives for each selected analytical method. A review of the data validation process indicates that the laboratories

completed QA/QC activities required for the samples such as blanks, lab control samples, matrix spikes, and duplicates. Minor QA/QC issues commonly associated with these analyses are noted in the laboratory analytical reports. The QA/QC parameters for the samples were generally within acceptable limits and suggest that the data is useful for its intended purpose.

5.0 DISCUSSION OF RESULTS

Boring logs indicate the site is underlain by generally uniform, unconsolidated fine-grained sand to silty sand and sandy silt to depths of at least 15 feet bgs. Bureau Veritas did not observe evidence of contaminated soil (*e.g.*, discoloration and/or petroleum odors). Groundwater was generally encountered at a depth of 35 feet bgs at borings advanced to that depth for the purpose of collecting groundwater samples, although at one location (BV-9) the groundwater recharge rate was insufficient to enable collection of groundwater samples for analysis.

Total metals detected in the soil samples appear to be representative of background conditions. The California Office of Environmental Health Hazard Assessment (OEHHA) developed CHHSLs for chemicals in soil that are considered to be below thresholds of concern to human health. The OEHHA guidance document states that "naturally occurring background concentrations of arsenic, beryllium, cadmium, chromium and other metals in soils may exceed their respective CHHSLs." The California Environmental Protection Agency (Cal EPA) and other agencies within California typically do not require cleanup of naturally occurring chemicals to less than ambient concentrations. In addition, the detected concentrations of total metals in soil at the Site did not appear to show significant variation in concentration, indicating that the material composition is relatively homogenous. These observations strongly suggested that the metals concentrations in soils at the Site are naturally-occurring.

Concentrations of TPH or VOCs were not detected in the analyzed soil samples. In addition, OCPs were not detected in the four soil samples analyzed for these compounds.

Concentrations of TPH were not detected in the three collected groundwater samples. No VOCs were detected in the samples, except for benzene, which was detected at concentrations of 66 and 145 µg/L in borings BV-10 and BV-11, respectively, and MTBE at a concentration of 9.2 µg/L in BV-1. Only the detected benzene concentrations exceed the groundwater MCL. Based on the location of borings BV-1, BV-10 and BV-11 on the upgradient margins of the Site, it appears that the above groundwater detections are associated with reported upgradient releases of petroleum hydrocarbons from adjoining or nearby properties.

PCE was detected in three soil vapor samples (BV-3, BV-6 and BV-7) collected from the former paint booth area at 14830 Carmenita (BV-3) and the former auto repair garage area of 13555 Excelsior (BV-6 and BV-7). The PCE CHHSL was slightly exceeded in borings BV-3 and BV-7. Toluene was also detected in two soil vapor samples collected from 14830 Carmenita (BV-2 and BV-3), but at concentrations well below the commercial/industrial use CHHSLs for this compound. The buildings are large warehouses with high ceilings (at least 20 feet high) and equipped with exhaust ventilation systems and/or have doorways and large roll-up doors that are generally open during daytime operational hours,

which provide ambient air exchange. In addition, soil vapor sample results indicate that the areas where the PCE commercial use CHHSL that were slightly exceeded are localized in the northeastern and southern portions of the 14830 Carmenita and 13555 Excelsior buildings rather than being uniformly distributed below the entire footprint each building.

6.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the information presented in this LSI, Bureau Veritas concludes the following:

- Concentrations of metals in soil at the Site appear to be representative of background conditions. TPH and OCPs were not detected in the analyzed soil samples. Based on this information, no additional investigation of soil appears warranted at this time.
- VOCs including BTEX compounds, MTBE and PCE were not detected in the soil samples collected during this LSI throughout the 14830 Carmenita and 13555 Excelsior buildings and adjoining outdoor areas, where a gasoline UST was formerly located and petroleum distillate- and/or PCE-based solvent parts washers were formerly used. Based on this information, no additional investigation appears warranted at this time.
- Concentrations of toluene and PCE were detected in soil vapor. Two soil vapor samples (BV-3, BV-7) contained PCE slightly above the commercial/industrial use CHHSL of 0.6 µg/L. The buildings where concentrations of PCE above the commercial use CHHSL were detected are large warehouses with high ceilings (at least 20 feet high) equipped with exhaust ventilation systems and/or have doorways and large roll-up doors that are generally open during daytime operational hours, which provide ambient air exchange. In addition, the exceedences of the PCE CHHSL are localized in the northeastern and southern portions of the 14830 Carmenita and 13555 Excelsior buildings, respectively. Based on these findings, the potential vapor intrusion risk for PCE appears to be *de minimis*. Although the origin of the PCE in soil vapor beneath the Site is unclear, additional investigation or evaluation does not appear warranted at this time.

7.0 REPRESENTATIONS AND LIMITATIONS

This Report is based upon current Site conditions known by Bureau Veritas and current laws, policies, and regulations. The information and opinions rendered in this report are exclusively for use by Sydney Development Corporation and Comerica Bank. No other party shall rely on the information or opinions presented in this report. Bureau Veritas will not distribute or publish this report without consent except as required by law or court order. The information and opinions expressed in this report are given in response to a limited assignment and should be considered and implemented only in light of that assignment. The services provided by Bureau Veritas in completing this project were consistent with normal standards of the profession. No other warranty, expressed or implied, is made, except that Bureau Veritas warrants that the services, findings, and/or recommendations provided to Comerica Incorporated, its affiliates and subsidiaries, and their respective successors and assigns (individually and collectively “Comerica”), have been prepared, performed and rendered in accordance with procedures,

practices and standards generally accepted and customary for use in similar assignments. Bureau Veritas shall indemnify, save and hold harmless Comerica from and against any and all losses, costs, expenses and liabilities, including without limit reasonable attorney's fees, which are attributable to the breach of the above warranty, up to an aggregate amount of $1,000,000 (One Million Dollars), notwithstanding any limitation (expressed or implied) contained in any other agreement or document relating to the services, findings and/or recommendations provided by Bureau Veritas.

Notes:
Results reported in milligrams per kilogram (mg/kg)
<10 = not detected above analytical laboratory reporting limit
ND = not detected above analytical reporting limits
TPH = total petroleum hydrocarbons
VOCs = volatile organic compounds
DRO and ORO analyzed by USEPA Method 8015M
GRO and VOCs analyzed by USEPA Method 8260B
CAM 17 Metals analyzed using USEPA Method 6010/7471
CAM = California Assessment Manual
OCPs = Organochlorine Pesticides analyzed by USEPA Method 8081
bgs = below ground surface
NE = not established for this analyte
N/A = not applicable
-- = Not analyzed
GRO = TPH quantified as gasoline-range organics
DRO = TPH quantified as diesel-range organics
ORO = TPH quantified as motor oil-range organics
*For comparison of total chromium result to CHHSLs, the first value reflects trivalent chromium (Cr-III) and the second value, hexavalent chromium (Cr-VI) .
SSL - Values from Table 4-1 -- Maximum Soil Screening Levels (SSLs) for TPH and BTEX above Drinking Water Aquifers (groundwater <20 feet bgs, sand lithology), *Remediation Guidance for Petroleum and VOC Impacted Sites* , Regional Water Quality Control Board, Los Angeles Region (RWQCB, 1996).
Soil CHHSL - Values from Table 1 -- Soil Screening Numbers for Non-Volatile Chemicals Based on Total Exposure to Contaminated Soil (Inhalation, Ingestion and Dermal Absorption), *Use of California Health Screening Levels (CHHSLs) in Evaluation* of Contaminated Properties, California Environmental Protection Agency, Office of Environmental Health Hazard Assessment (DTSC, January 2005; revised October 2010).

TABLE 2

Groundwater Analytical Results

14820 and 14830 Carmenita Road
and 13555 Excelsior Drive
Norwalk, California
Bureau Veritas Project No. 33111-011255.02

Sample ID	Sample Date	TPH-g	TPH-d	TPH-mo	Benzene	Toluene	Ethylbenzene	Xylenes	MTBE	PCE	Other Analyzed VOCs
BV-1-W	7/6/2011	<200	<200	<200	<0.5	<0.5	<0.5	<0.5	**9.2**	<0.5	ND
BV-10-W	7/6/2011	<200	<200	<200	**66**	<0.5	<0.5	<0.5	<0.5	<0.5	ND
BV-11-W	7/6/2011	<200	NA	NA	**145**	<0.5	<0.5	<0.5	<0.5	<0.5	ND
DHS MCL		NE	NE	NE	1.0	150	300	1,750	13	5.0	Various

Notes:

Results are reported in micrograms per liter (µg/L)

Groundwater Samples were analyzed by Methods EPA 8015M (with silica gel cleanup) for TPH-d/mo, and 8260B for TPH-g and VOCs.

TPH-g = Total Petroleum Hydrocarbons as gasoline

TPH-d = Total Petroleum Hydrocarbons as diesel

TPH-mo = Total Petroleum Hydrocarbons as diesel

MTBE = Methyl tert-butyl ether

PCE = Tetrachloroethene

VOCs = Volatile organic compounds

<0.5 = not detected above the analytical laboratory reporting limit

DHS MCL = California Department of Health Services Primary Maximum Contaminant Levels (California DTSC, 2007)

ND = Not detected above analytical reporting limits. No other VOCs detected, except for 3.7 µg/L of tert-amyl methyl ether, detected in BV-11.

NE = Not Established

Bolded detections denote concentrations above laboratory reporting limit.

Bolded and shaded values indicate concentration exceed DHS MCL, where applicable.

Soil Vapor CHHSL - Commercial/Industrial			NE	0.12	1.4	380	880	13	0.6	1.8	44	0.045	Various

Notes:

ND = not detected above analytical laboratory reporting limits

NE = not established

Samples analyzed by EPA Method 8260

Samples reported in micrograms per cubic liter (µg/L)

bgs = below ground surface

<0.020 = not detected above analytical laboratory reporting limit

VOCs = Volatile organic compounds

PCE = Tetrachloroethene

TCE = Trichloroethene

DCE = Dichloroethene

MTBE = Methyl tert-butyl ether

DUP = Duplicate sample

Sample IDs with 1P term correspond to samples drawn after one well purge volume removed; similarly, 3p and 7P identify samples drawn after purging three and seven purge volumes.

Bolded detections denote concentrations above the laboratory method reporting limit.

Bolded and shaded values indicate concentration exceeds the commercial/industrial CHHSL for this analyte.

Soil Vapor CHHSL - Values from Table 3 -- Soil Gas Screening Numbers for Volatile Chemicals Below Buildings Constructed Without Engineered Fill Below Sub-Slab Gravel,*Use of California Health Screening Levels (CHHSLs) in Evaluation of Contaminated Properties*, California Environmental Protection Agency, Office of Environmental Health Hazard Assessment (DTSC, January 2005; revised October 2010).

Type and Amount of Sealant: N/A
Type of Perforator: N/A
Size of Perforations: N/A
Method of Upper Seal Pressure Application: N/A

CONSULTANT INFORMATION

Company: Bureau Veritas N. America
Address: 2430 Camino Ramon #122
City: San Ramon
State: CA
Zip Code: 94583
Project Manager: CRAIG PELLETIER
Telephone Number: 925.476.1607
Fax Number: 925.476.0106

ATTENTION: WORK PLAN MODIFICATIONS MAY BE REQUIRED IF WELL AND GEOLOGIC CONDITIONS ENCOUNTERED AT THE SITE INSPECTION ARE FOUND TO DIFFER FROM THE SCOPE OF WORK PRESENTED TO THIS DEPARTMENT.

I hereby agree to comply in every respect with all the regulations of the County Environmental Health Division and with all ordinances of the County of Los Angeles and the State of California pertaining to well construction, reconstruction, and decommissioning data deemed necessary by the County Environmental Health Division Of Los Angeles County.

Signature of Applicant: Craig Pelletier
Printed Name: Craig Pelletier

THIS PERMIT IS NOT COMPLETE UNTIL ALL OF THE FOLLOWING REQUIREMENTS ARE RECOMMENDED BY THE DEPUTY HEALTH OFFICER. WELL CONSTRUCTION OR DECOMMISSIONING CANNOT BE INITIATED WITHOUT A WORK PLAN APPROVAL FROM THIS DEPARTMENT.

**********(DEPARTMENT USE ONLY)**********

R.E.H.S. NO: 6330

WORK PLAN APPROVAL	REHS Juan Rodriguez	DATE 6/25/12
Conditions: Permit #892220 issued to advance 4 borings to groundwater. Observed work plan details submitted. Notify this office at 626-430-5386 48hrs prior to start drilling.	jurodriguez@dph.lacounty.gov	
FINAL INSPECTION	REHS	DATE
Date of Inspection: Well Construction Complies with Ordinance Requirements and Approved Variances: Yes / No / Not Applicable		

NOTICE

This well permit approval is limited to compliance with the California Well Standards and the Los Angeles County Code and does not grant any rights to construct, reconstruct, or decommission any well. The applicant is responsible for securing all other necessary permits such as: coastal commission, water rights, encroachment, utility lines detection, city public works division.

WELL PERMIT APPLICATION - NON PRODUCTION WELLS

Well Location (Include distances from road and major cross streets)	
* See attached site plan for approximate boring locations.	
Projected Start Date:	Projected End Date:
July 5 + 6, 2012	July 6, 2012

WELL LOCATION DIAGRAM
At site inspection, the well location must be staked and clearly marked with the owner's name

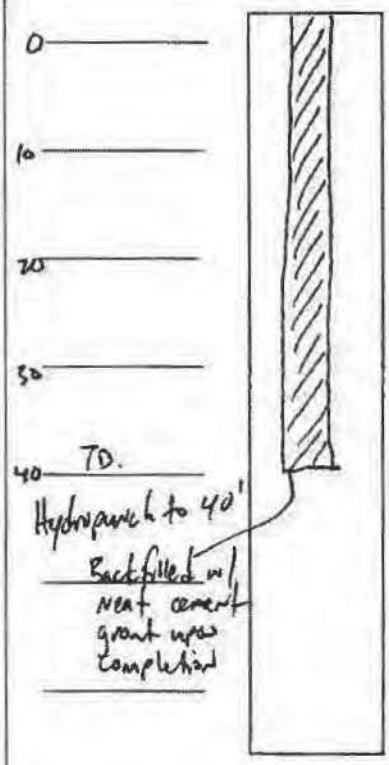
NORTH

* See attached site plan for boring locations.

WELL LOCATION

Provide a scaled drawing (1 inch = 50 feet) with labels and dimensions, indicating property lines, private sewage disposal systems and other possible sources of contamination within 200 feet of the well site. Attach all supporting documents.

WELL DECOMMISSIONING DIAGRAM



WORK PLAN DETAILS
(Construction or Decommissioning)

A total of 13 borings are planned to be advanced at the site. Four borings (BV-1, BV-9, BV-10 + BV-11) will be advanced to approximately 40' below grade to attempt to collect grab-groundwater samples. Upon completion of drilling + collection of samples, the borings will be grouted with neat cement grout to grade using the tremmie-pipe method.

CASE NARRATIVE

Laboratory number:	**237751**
Client:	**Bureau Veritas North America**
Project:	**33111-011255.02**
Request Date:	**07/09/12**
Samples Received:	**07/09/12**

This data package contains sample and QC results for four soil samples, requested for the above referenced project on 07/09/12. The samples were received cold and intact.

Pesticides (EPA 8081A):

All samples underwent sulfur cleanup using the copper option in EPA Method 3660B. All samples underwent florisil cleanup using EPA Method 3620C. Matrix spikes QC647243,QC647244 (batch 188356) were not reported because the parent sample required a dilution that would have diluted out the spikes. No other analytical problems were encountered.

Metals (EPA 6010B and EPA 7471A):

No analytical problems were encountered.

Date Opened 7/9/12 By (print) Eileen Leung (sign) Eileen
Date Logged in ↓ By (print) ↓ (sign)

1. Did cooler come with a shipping slip (airbill, etc) YES NO
   Shipping info
2A. Were custody seals present? .... ☐ YES (circle) on cooler on samples ☒ NO
   How many Name Date
2B. Were custody seals intact upon arrival? YES NO N/A
3. Were custody papers dry and intact when received? YES NO
4. Were custody papers filled out properly (ink, signed, etc)? YES NO
5. Is the project identifiable from custody papers? (If so fill out top of form) YES NO
6. Indicate the packing in cooler: (if other, describe)

☐ Bubble Wrap ☐ Foam blocks ☒ Bags ☐ None
☐ Cloth material ☐ Cardboard ☐ Styrofoam ☐ Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: ☒ Wet ☐ Blue/Gel ☐ None Temp(°C)

☒ Samples Received on ice & cold without a temperature blank; ~~temp. taken with IR gun~~

☐ Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? YES NO
   If YES, what time were they transferred to freezer?
9. Did all bottles arrive unbroken/unopened? YES NO
10. Are there any missing / extra samples? YES NO
11. Are samples in the appropriate containers for indicated tests? YES NO
12. Are sample labels present, in good condition and complete? YES NO
13. Do the sample labels agree with custody papers? YES NO
14. Was sufficient amount of sample sent for tests requested? YES NO
15. Are the samples appropriately preserved? YES NO N/A
16. Did you check preservatives for all bottles for each sample? YES NO N/A
17. Did you document your preservative check? YES NO N/A
18. Did you change the hold time in LIMS for unpreserved VOAs? YES NO N/A
19. Did you change the hold time in LIMS for preserved terracores? YES NO N/A
20. Are bubbles > 6mm absent in VOA samples? YES NO N/A
21. Was the client contacted concerning this sample delivery? YES NO
   If YES, Who was called? By Date:

ANALYSES REQUESTED

1. EPA 8260B - Volatile Organics by GC/MS + Oxygenates/Total Petroleum Hydrocarbons

Sampling – Soil Gas samples were collected in glass gas-tight syringes equipped with Teflon plungers. Tubing placed in the ground for soil gas sampling was purged three different times as recommended by DTSC/RWQCB regulations. This purge test determined how many purges of the soil gas tubing were needed throughout the project. One, three and seven purge volumes were analyzed to make this determination.

A tracer gas mixture of n-propanol and n-pentane were placed at the tubing-surface interface before sampling. These compounds were analyzed during the 8260B analytical run to determine if there were surface leaks into the subsurface due to improper installation of the probe. No n-propanol or n-pentane were found in any of the samples reported herein.

The sampling rate was approximately 200 cc/min except when noted differently on the chain of custody record using a gas tight syringe. 1 purge volume was used since this purging level gave the highest results for the compound(s) of greatest interest.

Prior to purging and sampling of soil gas at each point, a shut-in test was conducted to check for leaks in the above ground fittings. The shut-in test was performed on the above ground apparatus by evacuating the line to a vacuum of 100 inches of water, sealing the entire system and watching the vacuum for some length of time. A vacuum gauge attached in parallel to the apparatus measured the vacuum. If there was any observable loss of vacuum, the fittings were adjusted as needed until the vacuum did not change noticeably. The soil gas sample was then taken.

Analytical – Soil Gas samples were analyzed using EPA Method 8260 that includes extra compounds required by DTSC/RWQCB (such as Freon 113). Instrument Continuing Calibration Verification, QC Reference Standards, Instrument Blanks and Ambient Air Blanks were analyzed every 12 hours as prescribed by the method. In addition, Matrix Spike (MS) and Matrix Spike Duplicates (MSD) were analyzed with each batch of Soil Gas samples. A duplicate sample was analyzed each day of the sampling activity.

All samples were analyzed within 30 minutes of sampling.

Client: Bureau Veritas NA
Project Name:
Project Address: 13555 Excelsior Dr. Santa Fe Springs CA 90670
Project Contact: Craig Pelletier / Phil McLaughlin

Date: July 6 2012
Client Project #: 33111-011255.02

Turn Around Requested:
- ☐ Immediate Attention
- ☐ Rush 24-48 Hours
- ☐ Rush 72-96 Hours
- ☐ Normal
- ☒ Mobile Lab

SOIL GAS
Purge Number: ☒ 1P ☐ 3P ☐ 7P ☐ 10P
Tracer: A-Propane/N-Pentane
Purge Rate: 200 cc/min
Shut in Test (Y) N

JEL Project #: C-1939

Page 1 of 2

Lab Use Only
Sample Condition as Received:
Chilled ☐ yes ☒ no
Sealed ☒ yes ☐ no

Analysis Requested
