1500 Warburton Avenue
Santa Clara, CA 95050

Subject: Chips & Technologies, 3050 Zanker Rd., San Jose, CA
TEI Project No.17271/TEI Client No. EQU375

Gentlemen:

This is to certify that in accordance with Section 306 (a) and (b) of the Uniform Building Code, we have provided intermittent special inspection of reinforcing steel placement and concrete placement, concrete sampling, and compression testing and shop and field welding inspection on the subject project.

These inspections were performed by personnel under my supervision. Based upon our written reports, it is our judgement that the inspected work was performed, to the best of our knowledge, in accordance with plans and specifications, the requirements of the Uniform Building Code and change order sketches from the Engineer of Record.

Very truly yours,

Important Note:

- This permit application or approved permit will expire after 180 days of inactivity.
- Plans submitted with this application must be approved by the Fire Department before work can begin.
- A final inspection approving the project must be conducted before the system may be placed into service, or considered closed.
- Call the Hazardous Materials Division at least 48 hours in advance to schedule an inspection.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State license Law as contained in the business and Professions Code, Division 3, Chapter 9. If there is any change, which would materially affect the above information or plans submitted, I will notify the Bureau of Fire Prevention.

Regarding: Repipe of Two (2) Existing Solvent Pumping Systems

Scope of Work

1. The work can generally be described as removing the existing piping of two solvent piping systems: one at 3050 Zanker Road and the other at 2880 Junction Avenue, then repiping them with double-contained SS and test for City of San Jose.
2. The pumping systems are existing and in service. Therefore, the repiping, testing and inspection shall be strategically scheduled.

Michael Randolph
Hazardous Materials Inspector

San Jose Fire Department
170 W. San Carlos Street
San Jose, CA, 95113-2005

Dear Mr. Randolph,

Attached you will find 2 pages (copies). One is our weekly inspection log sheet and the other is the spill clean up report. Both regard the small spill within the second containment area of our chemical storage area in Building #1 (3050 Zanker).

The enclosed items are to help answer the comments from your inspection report earlier this year (February 1st 2005; both appear on page 3; comments 1 & 3).

I look forward to any questions or comments,

Charles Wurm
EHS Engineer

Randolph, Mike

To: Charles Wurm
Subject: RE: Seismic Bracing

Good Morning Charles;

I apologize for the delay in responding to your request. My reply to your questions is:

1) Seismic bracing is required under the fire code for equipment that utilizes hazardous materials. Thus, sinks and other tools that use hazardous materials need to have seismic bracing. If you are not clear if a material is a hazardous material please contact me.

2) Yes, it would definitely be acceptable to contact the Building Division to get their approval for the seismic bracing. Mention that they already inspected these tools and give them the Project Number (eg 03-000000).

3)If you speak to an engineer or inspector in the Building Division and that person states that they are not interested in reviewing plans and/or inspecting the installation, document the name, date, and what was stated. Then call me.

4) While technically you should provide seismic bracing immediately, I operate in the real world and want to work with businesses. Hence, if these tools will be relocated by mid August 2005, then it is fine with me to wait to brace them then. You should contact the Building Division to inform them of this change and if they need to see plans (I am almost certain they would.).

Please contact me if you have any other questions.

Respectfully,

Michael Randolph
Hazardous Materials Inspector

Sent: Monday, June 13, 2005 1:38 PM
To: mike.randolph@sanjoseca.gov
Cc: Doug Smith
Subject: Seismic Bracing
Importance: High

** High Priority **

Hello Mr. Randolph -

I have been discussing the seismic bracing project with your friend Doug Smith. We want to be sure that we properly understand your requests prior to starting work.

1) Seismic braces should be installed on the sinks and the tools in the Building 2 process/application lab (in your inspection report you call these LSA tools but they are not actually in the LSA area of this building).

2) We should ask the building department, who originally approved these installations, if they want to inspect the seismic bracing designs prior to their installation.

3) If the building department does not, then it will be completely a fire department inspections activty (your inspections).

Does this sound correct?

In Addition:

Some of the present tools will be moving soon (within 2 months). Can we have seismic bracing installed on the new tools when they are installed and not the old tools that will be leaving?

Sincerely,

Charlie Wurm

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

RECEIVED
FEB 08 2011
FIRE PREVENTION BUREAU

To: Agency Name: **San Jose Fire Department Hazardous Materials Section**
Agency Mailing Address: **170 West San Carlos Street, 2nd Floor**
San Jose, CA 95113

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: **Ultratech, Inc.**

Facility Street Address: **3050 Zanker Road** City: **San Jose**

Date of Current HMBP: **8/28/2009**

I certify that: *(Check the appropriate box.)*

☒ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. *(See bottom of page for details.)* If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

☐ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions has been electronically submitted or is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

DRAFT

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP. to the best of my knowledge and belief. BRW

Name of Owner/Operator *(Print)*: **Bruce R. Wright** Title: **Chief Financial Officer**

Phone: **None** Signature: Bruce R. Wright Date: 2/3/11

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; **and**
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; **and**
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; **and**
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; **and**
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

DRAFT

PLAN CHECK STATUS – APPROVED

Plans are approved with the following requirements:

NOTE: The permit expires 6 months from the date of plan review approval above. A permit is finaled once all inspections have occurred, meeting all plan check directive requirements below. A finaled permit will have the "Final Inspection" dated and signed by the inspector. Should an extension of the permit be required, the applicant may request an extension in writing to this department.

1. Follow approved facility closure plan – *Facility Closure Report – Veeco Process Equipment Inc. 2/1/2023*. Once all hazardous materials have been removed from the facility, all signs and labels associated with the storage and use of the hazardous materials shall be removed. (2022 CFC 5001.6.3)

2. Follow approved sampling plan – *Sampling Plan For VEECO – Facility Closure* 5/1/2023.

3. **Construction Documents -** A copy of the plan check directive, permit(s), and approved plans (closure and sampling plan) must be onsite available for inspection. (2022 CFC 106.4)

4. Submit all sampling plans *at least 30 days before* anticipated sampling events for review. Sampling plans are subject to approval. Note that other parameters not included in sampling plan may be required at the discretion of the Inspector in relation to the materials stored and used on site. (SJFD Policy)
Sampling plan has been submitted and approved.

5. **Inspections are required** during the following events - Ensure to schedule adequate time appropriate to accommodate the inspection (SJFD Policy):

   a. Prior to commencing closure activities – Initial walkthrough.

   b. After equipment, tanks, and piping, storing, or using or conveying hazardous materials are decontaminated and are ready for transport.

      Prior to being removed from the site, equipment must have certification forms stating those items have been decontaminated. The form shall list the name of the equipment, what hazardous materials were used or stored, how the materials were decontaminated, final pH, and a signature of the persons involved in the decontamination process.

      Note: The facility shall have available a list of all decontaminated equipment under review for the given inspection. This list will be added to the file at the end of the inspection as evidence that the equipment was reviewed and inspected.

   c. Sampling Events – upon the discretion of the Inspector, an inspection may be required to witness sampling events, including wipe and soil sampling. **Notify Inspector of each sampling event and schedule inspections ahead of time accordingly.**

   d. Final walkthrough once all closure activities have been completed. If, upon inspection, it is determined that an unauthorized release has occurred, the person, firm or corporation responsible for the unauthorized release shall institute and complete all actions necessary to remedy the effects of such unauthorized release, whether sudden or gradual, at no cost to the jurisdiction. When deemed necessary by the fire code official, cleanup may be initiated by the department or by an authorized individual or firm. Cost associated with such clean up shall be borne by the owner, operator, or other person responsible for the unauthorized release. (2022 CFC 5003.3.1.4)

6. Schedule inspections under the correct SJFD Haz Mat Permits:
****Note: Failure to schedule inspections under the correct permit will result in Inspector walking away from inspection.**

7. At the completion of all closure activities, submit a post-closure report. The report shall be reviewed and certified by an industry professional qualified to do so. The plan shall also demonstrate that hazardous materials once stored, dispensed, handled, and used at the facility has been treated and/or disposed in a manner that has eliminated the need for further maintenance and no longer poses a threat to public health and safety. Ensure to include all supporting documentation, such as bill of lading and hazardous waste manifests, sampling plans, correspondence, sampling results, etc. **Allow up to 30 days after receipt of the post-closure report for review. The permit will final once the report has been approved.** (2022 CFC 5001.6.3) ****Submit post closure report via SJePlans/PDOX by scheduling a virtual appointment.**

Inspector will sign off on UN-033 once closure inspection(s) are complete and closure report has been approved.

DRAFT

Inspection Scheduling: To schedule an inspection, please call 408-535-3555 and the next available operator will take your inspection request. Please be prepared to provide the following information in order to effectively complete the process:

1. Provide the Permit Number (above) for the inspections on this permit.
2. Indicate the date you would like the inspection to occur, regardless of when the next best is available.
3. Provide a reasonable time estimate for the inspection to be conducted. Additional time may be needed and purchased to schedule for a complete inspection
4. Request a Final Inspection only when all other listed permit inspections have been scheduled/passed.
5. If this permit is the last open Hazardous Materials System Permit of the related Building Permit, and you are requesting a Final Inspection, then schedule that Haz Mat FDIC Final at the same time

ATTENTION APPLICANT:

This permit is valid for 180 days from the date of issue or last activity. This permit is being issued pursuant to the requirements specified on the attached San Jose Fire Department Plan Check. It is your responsibility to post this document conspicuously at the job site. You are to have an approved set of plans and San Jose Fire Department Plan Check Directive available for review at the job site. **Inspections may be scheduled by calling (408) 535-3555.**

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State License Law as contained in the Business & Professions Code, Division 3, Chapter 9. If there is any change, which would materially affect the above information or plans submitted, I will notify the Bureau of Fire Prevention.

CLOSURE APPLICATION FOR ABOVEGROUND HAZARDOUS MATERIALS STORAGE FACILITIES

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction

Please complete and submit this form prior to the closure of any aboveground hazardous materials storage system or facility. Based on the information submitted below, and the complexity of the closure, a written Closure Plan may be required (see guidelines).

1. Facility Information: *(Note: Print or type all information.)*

Facility Name: Veeco Process Equipment Inc Facility Phone: (408) 321-8835

Site Address: 3050 Zanker Road

City: San Jose State: CA Zip: 95134

Contact Name: Shoua Lo Contact Phone: (408) 325-6049

Forwarding Address: 355 E Trimble Road

City: San Jose State: CA Zip: 95131 Phone No.: (408) 325-6049

Property Owner Name: MCPP Montague Pointe, LLC c/o Cushman & Wakefield

Property Owner Mailing Address: One Almaden Blvd., Suite 630
If different from site address

City: San Jose State: CA Zip: 95113 Phone No.: (408) 889-1369

2. Closure Information:

☒ Full Facility Closure ☐ Partial Facility Closure/Remodel | Proposed Date of Closure: 9 / 1 / 2022

Briefly describe the proposed closure activity. Indicate the previous use(s) of the area(s) intended to be closed and the types of chemicals used or stored in the area(s) (i.e. by submitting a copy of the Inventory Statements from your Hazardous Materials Business Plan, etc.). Include equipment, tanks, piping, exhaust and treatment systems, and the proposed final disposition of any hazardous materials and/or wastes. Attach additional pages if necessary.

See attached.

Applicant/Agent's Name *(Print)*: Shoua Lo Title: Sr. EHS Engineer

Signature of Applicant/Agent: Date: 08 / 02 / 22 .

HAZARDOUS MATERIALS
APPROVED
Zachary Wu
5/19/2023

3050 Zanker Road, San Jose – Closure April 2022

Project Overview

Veeco is moving their operations from 3050 Zanker to 355 E Trimble. The build out of 355 E Trimble will be accomplished in multiple phases. Some of the equipment from the existing facility will be transferred to the new facility during these build-out phases. Any equipment that uses hazardous materials will be remediated prior to transfer to the new facility. The final closure of the Zanker facility is intended to be completed in second quarter 2022.

Site Background

Veeco's operations are primarily assembly and testing of laser and lithography equipment. There have not been any significant chemical spills or releases on the property while Veeco has occupied the facility.

Assessment & Remediation

General laboratory furniture such as tables and lab benches that will be transferred to the new facility will be wiped down with all-purpose cleaner prior to transport. Most of the equipment in use at Veeco is not used with hazardous materials other than volatile organic compounds (VOCs) such as acetone and isopropanol or inert gas blends and therefore not anticipated to be contaminated. There are two primary rooms inside the building where hazardous materials are used that may require remediation.

Litho Process Lab & Chase

One of the two primary locations for use of hazardous materials is the Litho Process Lab. The equipment in this lab includes spin coaters and wet benches. The spin coaters primarily used RER 800 which is a combustible liquid. There is evidence of spills and staining on the tiles in front of the spin coating process area.

The wet benches hold caustic solutions and rinse tanks. The spent baths are pumped out of the wet benches using lift stations in the adjacent chase. There is evidence of chemical contamination under the wet bench.

Other equipment in this lab includes ovens and rinse chambers (SRD) which are intended for final removal of residual hazardous materials that are not removed in the rinse tank of the wet bench. The SRD can be run while empty to do a final rinse of the cleaning chamber.

Metrology Lab – Debonding Closet

The debonding closet in the metrology lab is used for removing coatings from bad lenses using methylene chloride. There is blue residue on the floor in the closet.

After the contaminated equipment is removed the floors in each room will be cleaned with all-purpose cleaner. If there is evidence that chemical contamination may be underneath the tiles, they will be removed, and the floor underneath will be cleaned. Walls will be cleaned behind and around equipment where chemical splashes may have occurred.

After cleaning, surfaces where chemical residue was observed will be tested to ensure residual levels are below acceptable wipe sampling limitations. Where acidic or caustic solutions were used an onsite pH test will be performed to confirm cleanliness. Where solvent residue may be present,

DRAFT

a wipe sample will be performed and sent for analysis by a certified laboratory. Surfaces that are not able to be sufficiently cleaned will be removed and repaired.

Process piping and chemical drainpipes will be removed and disposed of as hazardous waste.

Additionally, the exterior mechanical pad has an industrial wastewater treatment system. This system will be in use until all other equipment has been cleaned and removed as stated in this plan. The system will then be drained and removed as hazardous waste.

Closure Schedule

The equipment that Veeco intends to move to the new facility will be remediated and packed for shipment first. Equipment that is being disposed of as hazardous waste will be left in place until Veeco is ready to finalize closure of the building. Final closure will be completed during fourth quarter 2022 after Veeco is occupying the Trimble facility.

Attachment 1 - Move Out Documentation **7**

Attachment 2 - Waste Documentation **8**

DRAFT

1. Summary

- This report describes practices and procedures to reduce levels of removable chemical contamination in those areas to acceptably low levels to allow for safe work activities and to meet regulatory requirements.
- This Closure Report has been structured to be consistent with the guideline in ANSI standard Z9.11-2008, Laboratory Decommissioning as well as applicable regulatory requirements.
- All decontamination work, chemical packaging, transport, and disposal was performed by ACTenviro (ACT), a licensed California Hazardous Materials Contractor or by sub-contractors with appropriate permits and/or licenses.
- All wastes were disposed of in accordance with applicable laws and regulations.
- Appropriate documentation of closure activities is included in this Closure Report.
- ACT did not find any evidence of contamination requiring any further cleaning or investigation.

2. Property Description

- Veeco's operations are primarily assembly and testing of laser and lithography equipment. There were no significant chemical spills or releases on the property while Veeco occupied the building.
- Veeco facility at 3050 Zanker Road, San Jose, CA has been vacated and has been returned to the building owner. This building housed laboratory, office, and administrative spaces.
- General description of property:
    - The company occupied the entire building.
    - No pits, sumps, underground tanks, or other underground structures were identified during the site walk-through

2.1. Project Overview

- Veeco moved their operations from 3050 Zanker to 355 E Trimble. Some of the equipment from the existing facility have been transferred to the new facility. Laboratory and lab support areas were primarily used for Photo resist. Typical hazardous chemicals include laboratory solvents, acids, and bases, and compressed gases. No highly hazardous materials were used.
- All equipment that used hazardous materials were remediated prior to transfer to the new facility.
- Veeco ended all business activities on 12/30/2022 and vacated the facility by 01/27/2023.
- The remaining hazardous waste were shipped on 01/27/23.

DRAFT

- See Attachment 2 for Waste Documentation

- The equipment and chemical relocation to their new facility was conducted on 01/27/23.
    - See Attachment 1 for Move Out Documentation

3. Project Scope

3.1. Areas included in Facility Closure

- In general, Veeco laboratory areas were clean and well maintained. There was little visible contamination, although some floor and bench top areas had some staining or discoloration associated with normal laboratory use.
- Chemicals used in Chemistry areas and support areas include solvents and corrosives as well as other potentially hazardous chemicals.
    - No metals, high potency APIs or other high-hazard chemicals were used.

3.2. Areas Excluded from Facility Closure

- Veeco maintained strict policies for chemical handling and use, and no hazardous materials were handled in office and administrative areas. Based on this, there is no significant likelihood that those areas of the facility will be contaminated or will have measurable levels of potentially hazardous materials.
- No pits, sumps, underground tanks, or other underground structures are included in the scope of this project.

4. Cleaning/Decontamination Procedures

- This section contains general procedures and work practices for facility decontamination.

4.1. General Room/Equipment Decontamination Procedures

- All accessible surfaces, floors, walls, and sinks were wiped, scrubbed and/or mopped with dilute detergent such as simple green and water.
- Equipment to be reused by the company, or sold, were decontaminated using 10% bleach, simple green, or similar cleaning agents. Alternatively, equipment was discarded if no longer useful.
- Any gas cylinders were returned to the vendor(s).
- Decontamination of analytical labs, hazardous materials storage areas, countertops, floors, drawers (interior and exterior), cabinets (interior and exterior), sinks, and drains were done utilizing Simple Green, 10% Bleach and De-Lead using physical agitation on surfaces.
    - All accessible surfaces were first agitated with cleaning solution applied through mopping or physically agitating contaminated surfaces with clean cotton cloth.

DRAFT

- A second physical wiping and mopping was performed with cleaning agent Simple Green, 10% Bleach and De-Lead.
- Finally, the same surfaces were wiped and mopped with clean water.

- Laboratory sink p-traps were not removed as part of the scope of this project. All laboratories sink p-traps were left in place as-is.
- Following decontamination, ACT applied a Cleaning Certificate to equipment and lab/ hallway spaces.

4.2. Fume Hood Decontamination Procedures

- Fume Hoods were removed by the client before decontamination activities began.
- The Fume Hoods were not part of the scope of decontamination by ACT.

4.3. Decontamination of Mechanical Systems

- Unless other arrangement were made, decontamination of the following items was strictly limited to the cleaning of accessible exterior surfaces of the following items, as described above:
  - HVAC Air Handlers, Fans and Ducts (supply)
  - Other Air Conditioning Components

4.4. Decontamination of Acid Waste Neutralization System, ST-22 Solvent Wet Bench and Developer Wet Bench

- The Acid Waste Neutralization System (AWN) was decommissioned with all wastewaters treated and pH adjustment prior to the system was decommissioned from use. On 01/27/2023 the system wastewater pH was recorded at a pH of 6. All wastewater was discharged into the city Publicly Owned Treatment Works. All piping from the solvent wet bench were removed for disposal as hazardous waste. All piping and lift station from the developer sink were removed as part of the removal for the AWN and placed into a 40 ft bin for hazardous waste disposal.
- Both ST-22 and Developer Wet bench were drained of any water and chemical prior work being done.
- Wet benches were disconnected from piping (water, chemical and drain lines).
- All piping from Developer wet bench were removed and disposed into bin for disposal with AWN pipes and tanks.
- The developer lift stations, all piping that leads to the AWN, AWN tank, secondary containment tank and both the treatment chemical tanks, pumps, and lines were all removed.
- AWN tank was cut up into smaller parts for removal.
- All materials from AWN system were disposed as Hazardous waste.
  - See Attachment 2 for Waste Documentation.

DRAFT

- All hazardous waste was transported off site to TSDF by ACT (Advanced Chemical Transport).
- All remaining chemical (acid and caustic) were pumped into 55-gallons container and transported to Trimble for use.

4.5. Decontamination of Diesel Generator

- Diesel fuel was removed from the generator and placed into 55-gallon drums.
- Diesel generator was unbolted from pad.
- A crane was used to place the diesel generator onto the truck for removal.
- Diesel generator is being refurbished and reused as emergency generator.
- Diesel fuel is being reused as diesel fuel for the generator.

5. Evaluation of Effectiveness of Decontamination

5.1. Visual Evaluation

- For all areas, visual evaluation and physical cleanliness were the primary method used to evaluate facility decontamination. If surfaces were physically clean and free of visual dirt, dust, and debris, it is unlikely that hazardous levels of contaminants identified above were present.
- Physical cleanliness will be verified by a physical inspection with facility owner and external regulators (as applicable) prior to project completion.
- As an extra precaution, areas on the floor and HVAC ducts were sampled with pH strips after decontamination activities were finalized and confirmed a neutral result throughout.

6. Work Practices for Site Decontamination

- All decontamination supplies and equipment were staged in a designated area, outside of work area(s).
- Access to site was controlled, as described in Section 7. Site Safety below.
- As necessary (and as directed by the account) any chemicals, equipment, or other items to be retained by account for use at different sites or facilities were packaged and transported by ACT.
    - All transportation of hazardous materials were in accordance with applicable DOT regulations
- Decontamination activities were conducted, as described in Section 4.
- Countertops, tables, and floors were left in place following decontamination. Some tiles in the Chemistry areas that were heavily stained were removed.

7. Site Safety

- ACT prepared a Health and Safety Plan (HASP) specific to the project site.

DRAFT

- In general, Level D PPE was utilized by trained personal in the building closure process.

- Once decontamination and waste removal activities were initiated, site access was restricted to ACT personnel and company personnel familiar with the work being performed.
  - ACT personnel entered and exited through a designated area.
  - Non-ACT personnel were instructed on applicable safety measures.
- As the project progressed, ACT delineated all cleaned areas of the building with cleaning/decontamination certifications detailing that the room has been cleaned including the date and name of personnel performing the cleaning.
- Decontamination certificates were attached to appropriate equipment, and storage rooms.

8. Waste Management and Documentation

- ACT collected all contaminated wipes, rinse waters, contaminated detergent, and PPE into appropriate containers and evaluate with respect to applicable hazardous waste state/federal hazardous waste definitions.
- Any chemicals identified as hazardous waste were properly segregated, packaged, labeled, and profiled by ACT for disposal.
- Remaining hazardous wastes were transported for disposal as a Hazardous Waste to a licensed TSDF on a Hazardous Waste Manifest.
- Veeco is considered the generator of any hazardous waste.
  - See Attachment 2 for Waste Documentation.

9. Regulatory Review

- County of San Jose Fire Department have been notified of this facility closure.
- This report will be provided to regulatory agencies as needed and can be retained to provide documentation of closure activities.
- When all hazardous materials and wastes have been removed from the facility, and all hazardous waste pick-ups are finalized, the following regulatory permits will be handled by Veeco:
  - The CERS account (10094788) and their EPA ID (CAD983648098) will be deactivated.

Re: Decontamination Report & Certification

To whom it may concern:

This report states that ACTenviro, Inc. (ACT) chemically cleaned the Veeco Process Equipment Inc facility located at 3050 Zanker Road, San Jose, CA, 95134.

The decontamination work started on 12/30/2022 and ended on 01/27/2023. ACT employed various cleaning techniques including 10% Bleach, Simple Green solution, and De lead.

The cleaning was limited to the exposed portions of the doors, countertops, cabinets, tables, and shelves.

If there are any questions regarding the cleaning methods used by ACT, please call me at 707-854-8944.

Sampling Plan for VEECO - Facility Closure

DRAFT

Sub Surface Sampling

- Sub surface sampling will be conducted per the San Jose Fire Department's Haz Mat System Permit Review from Zachary Wu (Hazardous Materials Specialist) on April 12, 2023. Prior to any sub surface sampling being conducted, ACT will reach out to an underground utility company to clear the areas prior to the pad being drilled at each location.
- ACT will propose sample locations with the SJFD Haz Mat Specialist who is also the Certified Unified Program Agency (CUPA) and to ensure that the utilities can be cleared, and the concrete pad can be cut prior to sample day.

Sampling and Analysis

- ACTenviro (ACT) will conduct soil samples within the presence of a San Jose Haz Mat Specialist to determine if hazardous materials infiltration has occurred. At each location (see the Surface Sampling Locations and Contaminant Description Section for sampling locations*)* a sub-surface soil sample will be taken by drilling through the concrete pad using an auger and a slide hammer. Each sample will be placed into a brass sleeve and will be analyzed by a laboratory state-certified (McCampbell Analytical) for the required analysis. Sampling equipment will be cleaned using alconox solution before and after each use. Each soil sample will be taken at a sub-surface soil depth of 12"-24". The sampler will use clean nitrile gloves for each sample taken.
- All samples will be labeled with:
    - Name of sampler,
    - Date and time the sample was taken,
    - Unique sample ID number,
    - The information above will be transferred to the Chain of Custody (COC).

- Labeled samples will be placed into a cooler with blue ice and will be delivered to McCampbell Analytical.

Sub Surface pH Sampling

- Sub surface sampling for pH levels will be sent to McCampbell Analytical for analysis.

Sub Surface Sampling for Volatile Organic Compounds (VOCs)

- Sub surface sampling for VOC levels will be sent to McCampbell Analytical for analysis.

Sub Surface Sampling for TPH

- Sub surface sampling for TPH levels will be sent to McCampbell Analytical for analysis.

Surface Sampling Locations and Contaminant Description

Location	Number of Samples	Type of Analysis
Litho Process Lab and Chase	2	VOC's
Meteorology Lab-Debonding Closet	1	VOC's
AWN areas	1	pH
Diesel Generator Area	1	TPH

DRAFT

Sample Documentation

- All sample locations will be mapped and/or photographed to identify sample locations within the building and each room (See attachment B).
- All samples will be recorded on a COC.
- A report will be generated based on the analytical results from the four areas sampled.

Sincerely,

Kyle McManus

ATTENTION APPLICANT:

This permit is valid for 180 days from the date of issue or last activity. This permit is being issued pursuant to the requirements specified on the attached San Jose Fire Department Plan Check. It is your responsibility to post this document conspicuously at the job site. You are to have an approved set of plans and San Jose Fire Department Plan Check Directive available for review at the job site. **Inspections may be scheduled by calling (408) 535-3555.**

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State License Law as contained in the Business & Professions Code, Division 3, Chapter 9. If there is any change, which would materially affect the above information or plans submitted, I will notify the Bureau of Fire Prevention.

DRAFT

PLAN CHECK STATUS – APPROVED

Plans are approved with the following requirements:

Note – *The permit expires 6 months from the date on this Plan Check Directive.*
A HZ permit is closed/finalized once all plan check requirements and inspections have occurred. An approved permit will have the "Final Inspection" dated and signed by a SJFD Hazardous Materials Inspector (Form No. 240-143 (Rev. 1.10.08)). Should an extension of the permit be required, the applicant must submit the extension request in writing to SJFD Bureau of Fire Prevention.

RECORDS/DOCUMENTS:

1. A copy of this plan check directive, permit, and approved plan(s)/scope of work must be onsite available for inspection. (SJFD Policy; 2022 CFC § 106.4)

2. Follow approved facility closure plan – *Facility Closure Report – Veeco Process Equipment Inc. 2/1/2023*. Once all hazardous materials have been removed from the facility, all signs and labels associated with the storage and use of the hazardous materials shall be removed. (2022 CFC 5001.6.3)

3. Follow approved sampling plan – *Sampling Plan For VEECO – Facility Closure* 5/1/2023.

REMOVAL:

Removal of above ground and underground tanks shall be accordance with all of the following (2022 CFC § 5704.2.14)

a. Flammable and combustible liquids shall be removed from the tank and connected piping.
b. Piping of tank openings that is not to be used further shall be disconnected
c. Piping shall be removed from the ground
d. Tank opening shall be capped or plugged, leaving a 1/8-inch to ¼-inch diameter opening for pressure equalization.
e. Tanks shall be purged of vapor and inerted prior to removal (and transport).
f. All exterior above grade fill and vent piping shall be permanently removed.
**If tanks are cleaned on site, provide UN-066 form for "Tank cleaning On-site application" form at the time of inspection.

INSPECTION:

1. Schedule inspection once the tank has met the above requirements and is ready for transport.
2. Portable fire extinguisher shall be provided for the storage, use, dispensing, mixing, handling, and on-site transportation of flammable and combustible liquids in accordance with Chapter 9 (2022 CFC § 5703.2.1)
3. Inspector must verify the LEL and Oxygen measurements prior to removal. (SJFD Policy)
4. Soil surface surrounding the tanks original placement will be subject to visual inspection to verify the tank has not leaked.

DOCUMENTATION:

1. Tank and generated waste or product shall be disposed of and handled in accordance with the federal, state, and local regulations.
2. Provide bill of laden and hazardous waste manifests for the tank disposal, tank rinseate, and removal of waste oil/diesel/gasoline. (2022 CFC § 5001.6.3 and 2019 CFC § 5704.2.14.2)
3. Provide a post closure report. Report shall demonstrate that the tank and its contents were transported, disposed of or used in a manner that eliminates the need for further maintenance and any threat to the public health and safety. Post closure report is required to close the permit. Permit will not be closed until a Post-Closure/Removal report is received and approved.

Inspector will sign off on UN-033 once closure inspection(s) are complete and closure report has been approved.

Inspection Scheduling: To schedule an inspection, please call 408-535-3555 and the next available operator will take your inspection request. Please be prepared to provide the following information in order to effectively complete the process:

1. Provide the Permit Number (above) for the inspections on this permit.
2. Indicate the date you would like the inspection to occur, regardless of when the next best is available.
3. Provide a reasonable time estimate for the inspection to be conducted. Additional time may be needed and purchased to schedule for a complete inspection
4. Request a Final Inspection only when all other listed permit inspections have been scheduled/passed.
5. If this permit is the last open Hazardous Materials System Permit of the related Building Permit, and you are requesting a Final Inspection, then schedule that Haz Mat FDIC Final at the same time

CLOSURE APPLICATION FOR ABOVEGROUND HAZARDOUS MATERIALS STORAGE FACILITIES

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction

Please complete and submit this form prior to the closure of any aboveground hazardous materials storage system or facility. Based on the information submitted below, and the complexity of the closure, a written Closure Plan may be required (see guidelines).

1. Facility Information: *(Note: Print or type all information.)*

Facility Name: Veeco Process Equipment Inc Facility Phone: (408) 321-8835

Site Address: 3050 Zanker Road

City: San Jose State: CA Zip: 95134

Contact Name: Shoua Lo Contact Phone: (408) 325-6049

Forwarding Address: 355 E Trimble Road

City: San Jose State: CA Zip: 95131 Phone No.: (408) 325-6049

Property Owner Name: MCPP Montague Pointe, LLC c/o Cushman & Wakefield

Property Owner Mailing Address: One Almaden Blvd., Suite 630
If different from site address

City: San Jose State: CA Zip: 95113 Phone No.: (408) 889-1369

2. Closure Information:

☒ Full Facility Closure ☐ Partial Facility Closure/Remodel | Proposed Date of Closure: 9 / 1 / 2022

Briefly describe the proposed closure activity. Indicate the previous use(s) of the area(s) intended to be closed and the types of chemicals used or stored in the area(s) (i.e. by submitting a copy of the Inventory Statements from your Hazardous Materials Business Plan, etc.). Include equipment, tanks, piping, exhaust and treatment systems, and the proposed final disposition of any hazardous materials and/or wastes. Attach additional pages if necessary.

See attached.

DRAFT

3050 Zanker Road, San Jose – Closure April 2022

Project Overview

Veeco is moving their operations from 3050 Zanker to 355 E Trimble. The build out of 355 E Trimble will be accomplished in multiple phases. Some of the equipment from the existing facility will be transferred to the new facility during these build-out phases. Any equipment that uses hazardous materials will be remediated prior to transfer to the new facility. The final closure of the Zanker facility is intended to be completed in second quarter 2022.

Site Background

Veeco's operations are primarily assembly and testing of laser and lithography equipment. There have not been any significant chemical spills or releases on the property while Veeco has occupied the facility.

Assessment & Remediation

General laboratory furniture such as tables and lab benches that will be transferred to the new facility will be wiped down with all-purpose cleaner prior to transport. Most of the equipment in use at Veeco is not used with hazardous materials other than volatile organic compounds (VOCs) such as acetone and isopropanol or inert gas blends and therefore not anticipated to be contaminated. There are two primary rooms inside the building where hazardous materials are used that may require remediation.

Litho Process Lab & Chase

One of the two primary locations for use of hazardous materials is the Litho Process Lab. The equipment in this lab includes spin coaters and wet benches. The spin coaters primarily used RER 800 which is a combustible liquid. There is evidence of spills and staining on the tiles in front of the spin coating process area.

The wet benches hold caustic solutions and rinse tanks. The spent baths are pumped out of the wet benches using lift stations in the adjacent chase. There is evidence of chemical contamination under the wet bench.

Other equipment in this lab includes ovens and rinse chambers (SRD) which are intended for final removal of residual hazardous materials that are not removed in the rinse tank of the wet bench. The SRD can be run while empty to do a final rinse of the cleaning chamber.

Metrology Lab – Debonding Closet

The debonding closet in the metrology lab is used for removing coatings from bad lenses using methylene chloride. There is blue residue on the floor in the closet.

After the contaminated equipment is removed the floors in each room will be cleaned with all-purpose cleaner. If there is evidence that chemical contamination may be underneath the tiles, they will be removed, and the floor underneath will be cleaned. Walls will be cleaned behind and around equipment where chemical splashes may have occurred.

After cleaning, surfaces where chemical residue was observed will be tested to ensure residual levels are below acceptable wipe sampling limitations. Where acidic or caustic solutions were used an onsite pH test will be performed to confirm cleanliness. Where solvent residue may be present,

DRAFT

a wipe sample will be performed and sent for analysis by a certified laboratory. Surfaces that are not able to be sufficiently cleaned will be removed and repaired.

Process piping and chemical drainpipes will be removed and disposed of as hazardous waste.

Additionally, the exterior mechanical pad has an industrial wastewater treatment system. This system will be in use until all other equipment has been cleaned and removed as stated in this plan. The system will then be drained and removed as hazardous waste.

Closure Schedule

The equipment that Veeco intends to move to the new facility will be remediated and packed for shipment first. Equipment that is being disposed of as hazardous waste will be left in place until Veeco is ready to finalize closure of the building. Final closure will be completed during fourth quarter 2022 after Veeco is occupying the Trimble facility.

Attachment 1 - Move Out Documentation **7**

Attachment 2 - Waste Documentation **8**

DRAFT

1. Summary

- This report describes practices and procedures to reduce levels of removable chemical contamination in those areas to acceptably low levels to allow for safe work activities and to meet regulatory requirements.
- This Closure Report has been structured to be consistent with the guideline in ANSI standard Z9.11-2008, Laboratory Decommissioning as well as applicable regulatory requirements.
- All decontamination work, chemical packaging, transport, and disposal was performed by ACTenviro (ACT), a licensed California Hazardous Materials Contractor or by sub-contractors with appropriate permits and/or licenses.
- All wastes were disposed of in accordance with applicable laws and regulations.
- Appropriate documentation of closure activities is included in this Closure Report.
- ACT did not find any evidence of contamination requiring any further cleaning or investigation.

2. Property Description

- Veeco's operations are primarily assembly and testing of laser and lithography equipment. There were no significant chemical spills or releases on the property while Veeco occupied the building.
- Veeco facility at 3050 Zanker Road, San Jose, CA has been vacated and has been returned to the building owner. This building housed laboratory, office, and administrative spaces.
- General description of property:
    - The company occupied the entire building.
    - No pits, sumps, underground tanks, or other underground structures were identified during the site walk-through

2.1. Project Overview

- Veeco moved their operations from 3050 Zanker to 355 E Trimble. Some of the equipment from the existing facility have been transferred to the new facility. Laboratory and lab support areas were primarily used for Photo resist. Typical hazardous chemicals include laboratory solvents, acids, and bases, and compressed gases. No highly hazardous materials were used.
- All equipment that used hazardous materials were remediated prior to transfer to the new facility.
- Veeco ended all business activities on 12/30/2022 and vacated the facility by 01/27/2023.
- The remaining hazardous waste were shipped on 01/27/23.

DRAFT

- See Attachment 2 for Waste Documentation

- The equipment and chemical relocation to their new facility was conducted on 01/27/23.
    - See Attachment 1 for Move Out Documentation

3. Project Scope

3.1. Areas included in Facility Closure

- In general, Veeco laboratory areas were clean and well maintained. There was little visible contamination, although some floor and bench top areas had some staining or discoloration associated with normal laboratory use.
- Chemicals used in Chemistry areas and support areas include solvents and corrosives as well as other potentially hazardous chemicals.
    - No metals, high potency APIs or other high-hazard chemicals were used.

3.2. Areas Excluded from Facility Closure

- Veeco maintained strict policies for chemical handling and use, and no hazardous materials were handled in office and administrative areas. Based on this, there is no significant likelihood that those areas of the facility will be contaminated or will have measurable levels of potentially hazardous materials.
- No pits, sumps, underground tanks, or other underground structures are included in the scope of this project.

4. Cleaning/Decontamination Procedures

- This section contains general procedures and work practices for facility decontamination.

4.1. General Room/Equipment Decontamination Procedures

- All accessible surfaces, floors, walls, and sinks were wiped, scrubbed and/or mopped with dilute detergent such as simple green and water.
- Equipment to be reused by the company, or sold, were decontaminated using 10% bleach, simple green, or similar cleaning agents. Alternatively, equipment was discarded if no longer useful.
- Any gas cylinders were returned to the vendor(s).
- Decontamination of analytical labs, hazardous materials storage areas, countertops, floors, drawers (interior and exterior), cabinets (interior and exterior), sinks, and drains were done utilizing Simple Green, 10% Bleach and De-Lead using physical agitation on surfaces.
    - All accessible surfaces were first agitated with cleaning solution applied through mopping or physically agitating contaminated surfaces with clean cotton cloth.

DRAFT

- A second physical wiping and mopping was performed with cleaning agent Simple Green, 10% Bleach and De-Lead.
- Finally, the same surfaces were wiped and mopped with clean water.

- Laboratory sink p-traps were not removed as part of the scope of this project. All laboratories sink p-traps were left in place as-is.
- Following decontamination, ACT applied a Cleaning Certificate to equipment and lab/ hallway spaces.

4.2. Fume Hood Decontamination Procedures

- Fume Hoods were removed by the client before decontamination activities began.
- The Fume Hoods were not part of the scope of decontamination by ACT.

4.3. Decontamination of Mechanical Systems

- Unless other arrangement were made, decontamination of the following items was strictly limited to the cleaning of accessible exterior surfaces of the following items, as described above:
  - HVAC Air Handlers, Fans and Ducts (supply)
  - Other Air Conditioning Components

4.4. Decontamination of Acid Waste Neutralization System, ST-22 Solvent Wet Bench and Developer Wet Bench

- The Acid Waste Neutralization System (AWN) was decommissioned with all wastewaters treated and pH adjustment prior to the system was decommissioned from use. On 01/27/2023 the system wastewater pH was recorded at a pH of 6. All wastewater was discharged into the city Publicly Owned Treatment Works. All piping from the solvent wet bench were removed for disposal as hazardous waste. All piping and lift station from the developer sink were removed as part of the removal for the AWN and placed into a 40 ft bin for hazardous waste disposal.
- Both ST-22 and Developer Wet bench were drained of any water and chemical prior work being done.
- Wet benches were disconnected from piping (water, chemical and drain lines).
- All piping from Developer wet bench were removed and disposed into bin for disposal with AWN pipes and tanks.
- The developer lift stations, all piping that leads to the AWN, AWN tank, secondary containment tank and both the treatment chemical tanks, pumps, and lines were all removed.
- AWN tank was cut up into smaller parts for removal.
- All materials from AWN system were disposed as Hazardous waste.
  - See Attachment 2 for Waste Documentation.

DRAFT

- All hazardous waste was transported off site to TSDF by ACT (Advanced Chemical Transport).
- All remaining chemical (acid and caustic) were pumped into 55-gallons container and transported to Trimble for use.

4.5. Decontamination of Diesel Generator

- Diesel fuel was removed from the generator and placed into 55-gallon drums.
- Diesel generator was unbolted from pad.
- A crane was used to place the diesel generator onto the truck for removal.
- Diesel generator is being refurbished and reused as emergency generator.
- Diesel fuel is being reused as diesel fuel for the generator.

5. Evaluation of Effectiveness of Decontamination

5.1. Visual Evaluation

- For all areas, visual evaluation and physical cleanliness were the primary method used to evaluate facility decontamination. If surfaces were physically clean and free of visual dirt, dust, and debris, it is unlikely that hazardous levels of contaminants identified above were present.
- Physical cleanliness will be verified by a physical inspection with facility owner and external regulators (as applicable) prior to project completion.
- As an extra precaution, areas on the floor and HVAC ducts were sampled with pH strips after decontamination activities were finalized and confirmed a neutral result throughout.

6. Work Practices for Site Decontamination

- All decontamination supplies and equipment were staged in a designated area, outside of work area(s).
- Access to site was controlled, as described in Section 7. Site Safety below.
- As necessary (and as directed by the account) any chemicals, equipment, or other items to be retained by account for use at different sites or facilities were packaged and transported by ACT.
    - All transportation of hazardous materials were in accordance with applicable DOT regulations
- Decontamination activities were conducted, as described in Section 4.
- Countertops, tables, and floors were left in place following decontamination. Some tiles in the Chemistry areas that were heavily stained were removed.

7. Site Safety

- ACT prepared a Health and Safety Plan (HASP) specific to the project site.

DRAFT

- In general, Level D PPE was utilized by trained personal in the building closure process.

- Once decontamination and waste removal activities were initiated, site access was restricted to ACT personnel and company personnel familiar with the work being performed.
  - ACT personnel entered and exited through a designated area.
  - Non-ACT personnel were instructed on applicable safety measures.
- As the project progressed, ACT delineated all cleaned areas of the building with cleaning/decontamination certifications detailing that the room has been cleaned including the date and name of personnel performing the cleaning.
- Decontamination certificates were attached to appropriate equipment, and storage rooms.

8. Waste Management and Documentation

- ACT collected all contaminated wipes, rinse waters, contaminated detergent, and PPE into appropriate containers and evaluate with respect to applicable hazardous waste state/federal hazardous waste definitions.
- Any chemicals identified as hazardous waste were properly segregated, packaged, labeled, and profiled by ACT for disposal.
- Remaining hazardous wastes were transported for disposal as a Hazardous Waste to a licensed TSDF on a Hazardous Waste Manifest.
- Veeco is considered the generator of any hazardous waste.
  - See Attachment 2 for Waste Documentation.

9. Regulatory Review

- County of San Jose Fire Department have been notified of this facility closure.
- This report will be provided to regulatory agencies as needed and can be retained to provide documentation of closure activities.
- When all hazardous materials and wastes have been removed from the facility, and all hazardous waste pick-ups are finalized, the following regulatory permits will be handled by Veeco:
  - The CERS account (10094788) and their EPA ID (CAD983648098) will be deactivated.

San Jose, CA

Re: Decontamination Report & Certification

To whom it may concern:

This report states that ACTenviro, Inc. (ACT) chemically cleaned the Veeco Process Equipment Inc facility located at 3050 Zanker Road, San Jose, CA, 95134.

The decontamination work started on 12/30/2022 and ended on 01/27/2023. ACT employed various cleaning techniques including 10% Bleach, Simple Green solution, and De lead.

The cleaning was limited to the exposed portions of the doors, countertops, cabinets, tables, and shelves.

If there are any questions regarding the cleaning methods used by ACT, please call me at 707-854-8944.

Rafael Salas — 2/2/2023

Sampling Plan for VEECO - Facility Closure

DRAFT

Sub Surface Sampling

- Sub surface sampling will be conducted per the San Jose Fire Department's Haz Mat System Permit Review from Zachary Wu (Hazardous Materials Specialist) on April 12, 2023. Prior to any sub surface sampling being conducted, ACT will reach out to an underground utility company to clear the areas prior to the pad being drilled at each location.
- ACT will propose sample locations with the SJFD Haz Mat Specialist who is also the Certified Unified Program Agency (CUPA) and to ensure that the utilities can be cleared, and the concrete pad can be cut prior to sample day.

Sampling and Analysis

- ACTenviro (ACT) will conduct soil samples within the presence of a San Jose Haz Mat Specialist to determine if hazardous materials infiltration has occurred. At each location (see the Surface Sampling Locations and Contaminant Description Section for sampling locations) a sub-surface soil sample will be taken by drilling through the concrete pad using an auger and a slide hammer. Each sample will be placed into a brass sleeve and will be analyzed by a laboratory state-certified (McCampbell Analytical) for the required analysis. Sampling equipment will be cleaned using alconox solution before and after each use. Each soil sample will be taken at a sub-surface soil depth of 12"-24". The sampler will use clean nitrile gloves for each sample taken.
- All samples will be labeled with:
    - Name of sampler,
    - Date and time the sample was taken,
    - Unique sample ID number,
    - The information above will be transferred to the Chain of Custody (COC).

- Labeled samples will be placed into a cooler with blue ice and will be delivered to McCampbell Analytical.

Sub Surface pH Sampling

- Sub surface sampling for pH levels will be sent to McCampbell Analytical for analysis.

Sub Surface Sampling for Volatile Organic Compounds (VOCs)

- Sub surface sampling for VOC levels will be sent to McCampbell Analytical for analysis.

Sub Surface Sampling for TPH

- Sub surface sampling for TPH levels will be sent to McCampbell Analytical for analysis.

Surface Sampling Locations and Contaminant Description

Location	Number of Samples	Type of Analysis
Litho Process Lab and Chase	2	VOC's
Meteorology Lab-Debonding Closet	1	VOC's
AWN areas	1	pH
Diesel Generator Area	1	TPH

DRAFT

Sample Documentation

- All sample locations will be mapped and/or photographed to identify sample locations within the building and each room (See attachment B).
- All samples will be recorded on a COC.
- A report will be generated based on the analytical results from the four areas sampled.

Sincerely,

Kyle McManus

759: Haz Mat Permit Final* Complete Pass: Partial Pass: X Failed: Cancelled: Not Necessary:

AWN, Generator, and all equipment at Veeco were removed from site prior to submittal of HMSSP for AWN Removal and Generator removal. ACTEnviro has been cited for removal of AWN and Generator. Generator Removal under separate HMSSP, 23-082818 HZ

Core samples taken at Litho Process Chase Lab, Meteorology Lab, AWN Area, and Diesel Generator enclosure.
pH wipe samples taken from various portions of facility. Most wipe samples indicated neutral pH except for Litho Process Lab, Litho Chase, and 1 ft of flooring beyond Litho Chase in Clean Room. pH came back 10 or higher. Veeco must decon these areas or remove the floor tiles as hazardous waste.
In order to final:
Signage must be removed from Haz Waste Bunker.
Sample results/ Post Closure Report must be submitted to SJFD in order to final.
Veeco must decon areas in facility with pH >10.

753: Facility Closure* Complete Pass: Partial Pass: X Failed: Cancelled: Not Necessary:

Litho Process Chase Lab - observed 2 samples taken for VOCs.

Meteorology Lab- Debonding Closet - observed 1 sample taken for VOCs.

AWN area - 1 sample taken for pH.

Diesel Gen - 1 sample taken for TPH.

pH wipe samples taken from Meteorology Lab - Debonding Closet, AWN, Haz Waste Bunker came back neutral.

pH wipe samples from Litho Process Chase Lab, Litho Chase, and 1 ft of flooring beyond Litho Chase in Clean Room came back as 10. Veeco shall decontaminate or dispose of floor tiles as hazardous waste in these areas.

DRAFT

PLAN CHECK STATUS – APPROVED

Plans are approved with the following requirements:

NOTE: The permit expires 6 months from the date of plan review approval above. A permit is finaled once all inspections have occurred, meeting all plan check directive requirements below. A finaled permit will have the "Final Inspection" dated and signed by the inspector. Should an extension of the permit be required, the applicant may request an extension in writing to this department.

1. Follow approved facility closure plan – *Facility Closure Report – Veeco Process Equipment Inc. 2/1/2023*. Once all hazardous materials have been removed from the facility, all signs and labels associated with the storage and use of the hazardous materials shall be removed. (2022 CFC 5001.6.3)

2. Follow approved sampling plan – *Sampling Plan For VEECO – Facility Closure* 5/1/2023.

3. **Construction Documents -** A copy of the plan check directive, permit(s), and approved plans (closure and sampling plan) must be onsite available for inspection. (2022 CFC 106.4)

4. Submit all sampling plans *at least 30 days before* anticipated sampling events for review. Sampling plans are subject to approval. Note that other parameters not included in sampling plan may be required at the

discretion of the Inspector in relation to the materials stored and used on site. (SJFD Policy)
Sampling plan has been submitted and approved.

5. **Inspections are required** during the following events - Ensure to schedule adequate time appropriate to accommodate the inspection (SJFD Policy):
a. Prior to commencing closure activities – Initial walkthrough.
b. After equipment, tanks, and piping, storing, or using or conveying hazardous materials are decontaminated and are ready for transport.
Prior to being removed from the site, equipment must have certification forms stating those items have been decontaminated. The form shall list the name of the equipment, what hazardous materials were used or stored, how the materials were decontaminated, final pH, and a signature of the persons involved in the decontamination process.
Note: The facility shall have available a list of all decontaminated equipment under review for the given inspection. This list will be added to the file at the end of the inspection as evidence that the equipment was reviewed and inspected.
c. Sampling Events – upon the discretion of the Inspector, an inspection may be required to witness sampling events, including wipe and soil sampling. **Notify Inspector of each sampling event and schedule inspections ahead of time accordingly.**
d. Final walkthrough once all closure activities have been completed. If, upon inspection, it is determined that an unauthorized release has occurred, the person, firm or corporation responsible for the unauthorized release shall institute and complete all actions necessary to remedy the effects of such unauthorized release, whether sudden or gradual, at no cost to the jurisdiction. When deemed necessary by the fire code official, cleanup may be initiated by the department or by an authorized individual or firm. Cost associated with such clean up shall be borne by the owner, operator, or other person responsible for the unauthorized release. (2022 CFC 5003.3.1.4)

6. Schedule inspections under the correct SJFD Haz Mat Permits: ****Note: Failure to schedule inspections under the correct permit will result in Inspector walking away from inspection.**

7. At the completion of all closure activities, submit a post-closure report. The report shall be reviewed and certified by an industry professional qualified to do so. The plan shall also demonstrate that hazardous materials once stored, dispensed, handled, and used at the facility has been treated and/or disposed in a manner that has eliminated the need for further maintenance and no longer poses a threat to public health and safety. Ensure to include all supporting documentation, such as bill of lading and hazardous waste manifests, sampling plans, correspondence, sampling results, etc. **Allow up to 30 days after receipt of the post-closure report for review. The permit will final once the report has been approved.** (2022 CFC 5001.6.3) **Submit post closure report via SJePlans/PDOX by scheduling a virtual appointment.

Inspector will sign off on UN-033 once closure inspection(s) are complete and closure report has been approved.

Inspection Scheduling: To schedule an inspection, please call 408-535-3555 and the next available operator will take your inspection request. Please be prepared to provide the following information in order to effectively complete the process:

1. Provide the Permit Number (above) for the inspections on this permit.
2. Indicate the date you would like the inspection to occur, regardless of when the next best is available.
3. Provide a reasonable time estimate for the inspection to be conducted. Additional time may be needed and purchased to schedule for a complete inspection.
4. Request a Final Inspection only when all other listed permit inspections have been scheduled/passed.
5. If this permit is the last open Hazardous Materials System Permit of the related Building Permit, and you are requesting a Final Inspection, then schedule that Haz Mat FDIC Final at the same time.

DRAFT

1. Summary

- The report was revised on July 21, 2023. Attachment 3 is ACTenviro's (ACT) response to a request for additional sampling analytical issued by the San Jose Fire Department on April 12, 2023, from Veeco's Closure Report submitted on February 2, 2023.
- This report describes practices and procedures to reduce levels of removable chemical contamination in those areas to acceptably low levels to allow for safe work activities and to meet regulatory requirements.
- This Closure Report has been structured to be consistent with the guideline in ANSI standard Z9.11-2008, Laboratory Decommissioning as well as applicable regulatory requirements.
- All decontamination work, chemical packaging, transport, and disposal was performed by ACT, a licensed California Hazardous Materials Contractor or by sub-contractors with appropriate permits and/or licenses.
- All wastes were disposed of in accordance with applicable laws and regulations.
- Appropriate documentation of closure activities is included in this Closure Report.
- ACT did not find any evidence of contamination requiring any further cleaning or investigation.

2. Property Description

- Veeco's operations are primarily assembly and testing of laser and lithography equipment. There were no significant chemical spills or releases on the property while Veeco occupied the building.
- Veeco facility at 3050 Zanker Road, San Jose, CA has been vacated and has been returned to the building owner. This building housed laboratory, office, and administrative spaces.
- General description of property:
    - The company occupied the entire building.
    - No pits, sumps, underground tanks, or other underground structures were identified during the site walk-through.

2.1. Project Overview

- Veeco moved their operations from 3050 Zanker to 355 E Trimble. Some of the equipment from the existing facility have been transferred to the new facility. Laboratory and lab support areas were primarily used for Photo resist. Typical hazardous chemicals include laboratory solvents, acids, and bases, and compressed gases. No highly hazardous materials were used.
- All equipment that used hazardous materials were remediated prior to transfer to the new facility.

DRAFT

- Veeco ended all business activities on 12/30/2022 and vacated the facility by 01/27/2023.
- The remaining hazardous waste were shipped on 01/27/23.
    - See Attachment 2 for Waste Documentation
- The equipment and chemical relocation to their new facility was conducted on 01/27/23.
    - See Attachment 1 for Move Out Documentation

3. Project Scope

3.1. Areas included in Facility Closure

- In general, Veeco laboratory areas were clean and well maintained. There was little visible contamination, although some floor and bench top areas had some staining or discoloration associated with normal laboratory use.
- Chemicals used in Chemistry areas and support areas include solvents and corrosives as well as other potentially hazardous chemicals.
    - No metals, high potency APIs or other high-hazard chemicals were used.

3.2. Areas Excluded from Facility Closure

- Veeco maintained strict policies for chemical handling and use, and no hazardous materials were handled in office and administrative areas. Based on this, there is no significant likelihood that those areas of the facility will be contaminated or will have measurable levels of potentially hazardous materials.
- No pits, sumps, underground tanks, or other underground structures are included in the scope of this project.

4. Cleaning/Decontamination Procedures

- This section contains general procedures and work practices for facility decontamination.

4.1. General Room/Equipment Decontamination Procedures

- All accessible surfaces, floors, walls, and sinks were wiped, scrubbed and/or mopped with dilute detergent such as simple green and water.
- Equipment to be reused by the company, or sold, were decontaminated using 10% bleach, simple green, or similar cleaning agents. Alternatively, equipment was discarded if no longer useful.
- Any gas cylinders were returned to the vendor(s).
- Decontamination of analytical labs, hazardous materials storage areas, countertops, floors, drawers (interior and exterior), cabinets (interior and

DRAFT

exterior), sinks, and drains were done utilizing Simple Green, 10% Bleach and De-Lead using physical agitation on surfaces.

  - All accessible surfaces were first agitated with cleaning solution applied through mopping or physically agitating contaminated surfaces with clean cotton cloth.
  - A second physical wiping and mopping was performed with cleaning agent Simple Green, 10% Bleach and De-Lead.
  - Finally, the same surfaces were wiped and mopped with clean water.

- Laboratory sink p-traps were not removed as part of the scope of this project. All laboratories sink p-traps were left in place as-is.
- Following decontamination, ACT applied a Cleaning Certificate to equipment and lab/ hallway spaces.

4.2. Fume Hood Decontamination Procedures

- Fume Hoods were removed by the client before decontamination activities began.
- The Fume Hoods were not part of the scope of decontamination by ACT.

4.3. Decontamination of Mechanical Systems

- Unless other arrangement were made, decontamination of the following items was strictly limited to the cleaning of accessible exterior surfaces of the following items, as described above:
  - HVAC Air Handlers, Fans and Ducts (supply)
  - Other Air Conditioning Components

4.4. Decontamination of Acid Waste Neutralization System, ST-22 Solvent Wet Bench and Developer Wet Bench

- The Acid Waste Neutralization System (AWN) was decommissioned with all wastewaters treated and pH adjustment prior to the system was decommissioned from use. On 01/27/2023 the system wastewater pH was recorded at a pH of 6. All wastewater was discharged into the city Publicly Owned Treatment Works. All piping from the solvent wet bench were removed for disposal as hazardous waste. All piping and lift station from the developer sink were removed as part of the removal for the AWN and placed into a 40 ft bin for hazardous waste disposal.
- Both ST-22 and Developer Wet bench were drained of any water and chemical prior work being done.
- Wet benches were disconnected from piping (water, chemical and drain lines).
- All piping from Developer wet bench were removed and disposed into bin for disposal with AWN pipes and tanks.

DRAFT

- The developer lift stations, all piping that leads to the AWN, AWN tank, secondary containment tank and both the treatment chemical tanks, pumps, and lines were all removed.
- AWN tank was cut up into smaller parts for removal.
- All materials from AWN system were disposed as Hazardous waste.
    - See Attachment 2 for Waste Documentation.
- All hazardous waste was transported off site to TSDF by ACT (Advanced Chemical Transport).
- All remaining chemical (acid and caustic) were pumped into 55-gallons container and transported to Trimble for use.
- Refer to Attachment 3 for post-closure activities.

4.5. Decontamination of Diesel Generator

- Diesel fuel was removed from the generator and placed into 55-gallon drums.
- Diesel generator was unbolted from pad.
- A crane was used to place the diesel generator onto the truck for removal.
- Diesel generator is in ACTenviro possession at 967 Mabury Rd San Jose CA. ACTenviro is currently seeking a buyer for the generator.
- Refer to Attachment 3 for post-closure activities.

4.6. All Clean Decon Activities

- June 30, 2023, All Clean removed the remaining hazardous waste on Manifest #016600006FLE from Veeco's facility.
- July 13, 2023, at 1pm final inspection with Zach WU completed the Final Inspection.
- See attachment 4 – Supporting documentation for Decon Activities

5. Evaluation of Effectiveness of Decontamination

5.1. Visual Evaluation

- For all areas, visual evaluation and physical cleanliness were the primary method used to evaluate facility decontamination. If surfaces were physically clean and free of visual dirt, dust, and debris, it is unlikely that hazardous levels of contaminants identified above were present.
- Physical cleanliness will be verified by a physical inspection with facility owner and external regulators (as applicable) prior to project completion.
- As an extra precaution, areas on the floor and HVAC ducts were sampled with pH strips after decontamination activities were finalized and confirmed a neutral result throughout.

DRAFT

6. Work Practices for Site Decontamination

- All decontamination supplies and equipment were staged in a designated area, outside of work area(s).
- Access to site was controlled, as described in Section 7. **Error! Not a valid bookmark self-reference.** below.
- As necessary (and as directed by the account) any chemicals, equipment, or other items to be retained by account for use at different sites or facilities were packaged and transported by ACT.
    - All transportation of hazardous materials were in accordance with applicable DOT regulations.
- Decontamination activities were conducted, as described in Section 4.
- Countertops, tables, and floors were left in place following decontamination. Some tiles in the Chemistry areas that were heavily stained were removed.

7. Site Safety

- ACT prepared a Health and Safety Plan (HASP) specific to the project site.
    - In general, Level D PPE was utilized by trained personal in the building closure process.
- Once decontamination and waste removal activities were initiated, site access was restricted to ACT personnel and company personnel familiar with the work being performed.
    - ACT personnel entered and exited through a designated area.
    - Non-ACT personnel were instructed on applicable safety measures.
- As the project progressed, ACT delineated all cleaned areas of the building with cleaning/decontamination certifications detailing that the room has been cleaned including the date and name of personnel performing the cleaning.
- Decontamination certificates were attached to appropriate equipment, and storage rooms.

8. Waste Management and Documentation

- ACT collected all contaminated wipes, rinse waters, contaminated detergent, and PPE into appropriate containers and evaluate with respect to applicable hazardous waste state/federal hazardous waste definitions.
- Any chemicals identified as hazardous waste were properly segregated, packaged, labeled, and profiled by ACT for disposal.
- Remaining hazardous wastes were transported for disposal as a Hazardous Waste to a licensed TSDF on a Hazardous Waste Manifest.
- Veeco is considered the generator of any hazardous waste.
    - See Attachment 2 for Waste Documentation.

DRAFT

9. Regulatory Review

- County of San Jose Fire Department have been notified of this facility closure.
- This report will be provided to regulatory agencies as needed and can be retained to provide documentation of closure activities.
- When all hazardous materials and wastes have been removed from the facility, and all hazardous waste pick-ups are finalized, the following regulatory permits will be handled by Veeco:
    - The CERS account (10094788) and their EPA ID (CAD983648098) will be deactivated.
- The ownership statement from Verily on the Savannah Tool and the hazardous waste manifest for the removal of the ALD ampules.
    - See the last two pages at the end of Attachment 3 - Post Closure activities.
    - It is noted that for the tool decontamination, the tool was purged with N2 of the system to remove any contamination within the lines prior to disassembling the tool for relocation/shipment to Verily's facility.

DRAFT

Veeco Process Equipment Inc
3050 Zanker Road
San Jose, CA

Re: Decontamination Report & Certification

To whom it may concern:

This report states that ACTenviro, Inc. (ACT) chemically cleaned the Veeco Process Equipment Inc facility located at 3050 Zanker Road, San Jose, CA, 95134.

The decontamination work started on 12/30/2022 and ended on 01/27/2023. ACT employed various cleaning techniques including 10% Bleach, Simple Green solution, and De lead.

The cleaning was limited to the exposed portions of the doors, countertops, cabinets, tables, and shelves.

If there are any questions regarding the cleaning methods used by ACT, please call me at 707-854-8944.

DRAFT

30 June 2023

RE: Requested Sampling of VEECO Facility Closure

To Whom it May Concern,

This letter and the following documents are provided in response to the San Jose Fire Department's request for sampling to verify that hazardous materials infiltration did not occur where hazardous materials systems were located. Sub surface sampling was conducted per Zachary Wu (Hazardous Materials Specialist) on June 20th, 2023. Prior to any sub surface sampling being conducted, ACTenviro (ACT) reached out to an underground utility company to clear the areas prior to the pad being drilled at each location.

At the proposed sample locations, ACT conducted soil samples within the presence of a San Jose Haz Mat Specialist to determine if hazardous materials infiltration had occurred. At each location, a sub-surface soil sample was taken by drilling through the concrete pad using an auger and a slide hammer. Each sample was placed into a brass sleeve and analyzed by a state-certified laboratory, McCampbell Analytical, Inc., for the requested analyses. Review of the analytical results showed that all analytes were either non-detected, (VOCs and TPH) or within tolerance- (pH)). The required quality control was run with the samples per the method, and spike recoveries and blank values were within specified acceptable ranges. Sampling equipment was cleaned using an "Alconox" solution before and after each use. Each soil sample was taken at a sub-surface soil depth of 12"-24". The sampler used clean nitrile gloves for each sample taken.

- All samples were labeled with:
    - Name of sampler,
    - Date and time the sample was taken,
    - Unique sample ID number,
    - The information above was transferred to the Chain of Custody (COC).
- Labeled samples were placed into a cooler with "Blue Ice"
- Sub surface sampling was provided to McCampbell Analytical, Inc. for typical analysis including:
    - pH
    - VOCs
    - TPH

- All sample locations were mapped and/or photographed to identify sample locations within the building and each room. This is included in the separate, pre-approved sampling plan (See Attachment 2).

Sincerely,

Kyle McManus

Glossary of Terms & Qualifier Definitions

Client: ACT Enviro **WorkOrder:** 2306E89

Project: 442350; VEECO Facility Closure

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
CPT	Consumer Product Testing not NELAP Accredited
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LQL	Lowest Quantitation Level
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit [1]
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
NA	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting limit [2]
RPD	Relative Percent Difference
RRT	Relative Retention Time
RSD	Relative Standard Deviation
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure

[1] MDL is the minimum measured concentration of a substance that can be reported with 99% confidence that the measured concentration is distinguishable from method blank results. Definition and Procedure for the Determination of the Method Detection Limit, Revision 2, 40CFR, Part 136, Appendix B, EPA 821-R-16-006, December 2016.

[2] RL is the lowest level that can be reliably determined within specified limits of precision and accuracy during routine laboratory operating conditions. (The RL cannot be lower than the lowest calibration standard used in the initial calibration of the instrument and must be greater than the MDL.)

NOTES: * STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- Organic extracts are held for 40 days before disposal; Inorganic extract are held for 30 days.

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

U = An unpreserved container was received for a method that suggests a preservation in order to extend hold time for analysis.**

Removal of Diesel Generator from VEECO Facility Closure

To Whom it May Concern,

This letter is to confirm the status of the Emergency Diesel Generator removed from the VEECO Facility. The Generator was removed and picked up by ACTenviro. It is currently in the process of finding a buyer to remove it from ACTenviro possession.

Sincerely,

Kyle McManus

DRAFT

From: Kyle Mcmanus <kmcmanus@actenviro.com>
Sent: Thursday, July 13, 2023 3:04 PM
To: Shoua Lo <Slo@veeco.com>; Ameen Kunbargi <akunbargi@actenviro.com>
Cc: Doug Smith <dsmith@veeco.com>; Charles Howlett <CHowlett@veeco.com>; Alicia Filippone <AFilippone@ACTEnviro.com>; Krista Harsono <KHarsono@ACTEnviro.com>; Marissa Lopez <MLopez@ACTEnviro.com>; Adam Brandin <ABrandin@ACTEnviro.com>
Subject: RE: Veeco - Sampling Plan

Hi Shoua,

I want to make sure we are all on the same page.

ACT will write up a statement in our closure report to respond to Zachary Wu's comment "Please provide a written statement indicating ACT will take ownership and will eventually be sold to ….?"

ACT will not include the following in our closure report as ACT will not be conducting the work:

1. Decon or remove floor tiles (and dispose as hazardous waste) with pH >10 from Litho Process Lab, Litho Chase, and 1 ft of flooring beyond Litho Chase in Clean Room. – Decon has been completed by All Clean and was re-inspected by Zach today and is within neutral pH range.
2. Remove NFPA placards from Haz Waste Bunker. – Placard has been removed and Zach has verified both have been removed during today's re-inspection.
3. Submit Post Closure Report that includes sample results that Ameen sent. The Post Closure

Report shall indicate what was done with the equipment and all hazardous waste manifests or bill of ladings. You can use the report that was submitted during the HMSSP application process but I need to know where the equipment went or where it was sold to. The report indicates that a haz waste manifest for the awn system is attached but I went through all the attachments and do not see one. I also need to know where the generator is. I saw that ACTenviro removed it. Is ACTenviro taking ownership of it now to be sold to another party? – ACT will revised the closure report that was previous submitted. The revision is to include the soil sample results which was conducted by ACT/ third party contracted thru ACT. ACT also write a written statement about the emergency generator which was removed by ACT and will be sold to ….. (We both agreed to on the ownership of the generator but need a statement for Zach to close out the permit for the generator.)

Thank you, Shoua,

Kyle McManus | EHS Program Supervisor

Subject: {EXTERNAL} RE: Veeco - Sampling Plan
Importance: High

This Message is sent from external source.

Ameen,

Do we have an ETA on the revised closure report? I need to the report to finalize the closure of our permits.

- Please attached a letter stating that ACT has assumed full responsibility of the emergency generator that was removed from Zanker. What ACT decides to do with it is up to ACT's decision.
- Update the soil sample results to the closure plan.

Dear Shoua Lo,

This letter is to confirm that Verily has in its possession the Savannah 200 ADL Reactor received from Veeco in March 2017. The reactor is currently located at 249 E. Grand Ave, South San Francisco, CA 94080.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Jarek Gaylon

EHS Manager, Verily

7. Site Safety **5**

8. Waste Management and Documentation **6**

9. Regulatory Review **6**

Attachment 1 - Move Out Documentation **7**

Attachment 2 - Waste Documentation **8**

DRAFT

1. Summary

- This report describes practices and procedures to reduce levels of removable chemical contamination in those areas to acceptably low levels to allow for safe work activities and to meet regulatory requirements.
- This Closure Report has been structured to be consistent with the guideline in ANSI standard Z9.11-2008, Laboratory Decommissioning as well as applicable regulatory requirements.
- All decontamination work, chemical packaging, transport, and disposal was performed by ACTenviro (ACT), a licensed California Hazardous Materials Contractor or by sub-contractors with appropriate permits and/or licenses.
- All wastes were disposed of in accordance with applicable laws and regulations.
- Appropriate documentation of closure activities is included in this Closure Report.
- ACT did not find any evidence of contamination requiring any further cleaning or investigation.

2. Property Description

- Veeco's operations are primarily assembly and testing of laser and lithography equipment. There were no significant chemical spills or releases on the property while Veeco occupied the building.
- Veeco facility at 3050 Zanker Road, San Jose, CA has been vacated and has been returned to the building owner. This building housed laboratory, office, and administrative spaces.
- General description of property:
    - The company occupied the entire building.
    - No pits, sumps, underground tanks, or other underground structures were identified during the site walk-through

2.1. Project Overview

- Veeco moved their operations from 3050 Zanker to 355 E Trimble. Some of the equipment from the existing facility have been transferred to the new facility. Laboratory and lab support areas were primarily used for Photo resist. Typical hazardous chemicals include laboratory solvents, acids, and bases, and compressed gases. No highly hazardous materials were used.
- All equipment that used hazardous materials were remediated prior to transfer to the new facility.
- Veeco ended all business activities on 12/30/2022 and vacated the facility by 01/27/2023.
- The remaining hazardous waste were shipped on 01/27/23.

DRAFT

- See Attachment 2 for Waste Documentation

- The equipment and chemical relocation to their new facility was conducted on 01/27/23.
    - See Attachment 1 for Move Out Documentation

3. Project Scope

3.1. Areas included in Facility Closure

- In general, Veeco laboratory areas were clean and well maintained. There was little visible contamination, although some floor and bench top areas had some staining or discoloration associated with normal laboratory use.
- Chemicals used in Chemistry areas and support areas include solvents and corrosives as well as other potentially hazardous chemicals.
    - No metals, high potency APIs or other high-hazard chemicals were used.

3.2. Areas Excluded from Facility Closure

- Veeco maintained strict policies for chemical handling and use, and no hazardous materials were handled in office and administrative areas. Based on this, there is no significant likelihood that those areas of the facility will be contaminated or will have measurable levels of potentially hazardous materials.
- No pits, sumps, underground tanks, or other underground structures are included in the scope of this project.

4. Cleaning/Decontamination Procedures

- This section contains general procedures and work practices for facility decontamination.

4.1. General Room/Equipment Decontamination Procedures

- All accessible surfaces, floors, walls, and sinks were wiped, scrubbed and/or mopped with dilute detergent such as simple green and water.
- Equipment to be reused by the company, or sold, were decontaminated using 10% bleach, simple green, or similar cleaning agents. Alternatively, equipment was discarded if no longer useful.
- Any gas cylinders were returned to the vendor(s).
- Decontamination of analytical labs, hazardous materials storage areas, countertops, floors, drawers (interior and exterior), cabinets (interior and exterior), sinks, and drains were done utilizing Simple Green, 10% Bleach and De-Lead using physical agitation on surfaces.
    - All accessible surfaces were first agitated with cleaning solution applied through mopping or physically agitating contaminated surfaces with clean cotton cloth.

DRAFT

- A second physical wiping and mopping was performed with cleaning agent Simple Green, 10% Bleach and De-Lead.
- Finally, the same surfaces were wiped and mopped with clean water.

- Laboratory sink p-traps were not removed as part of the scope of this project. All laboratories sink p-traps were left in place as-is.
- Following decontamination, ACT applied a Cleaning Certificate to equipment and lab/ hallway spaces.

4.2. Fume Hood Decontamination Procedures

- Fume Hoods were removed by the client before decontamination activities began.
- The Fume Hoods were not part of the scope of decontamination by ACT.

4.3. Decontamination of Mechanical Systems

- Unless other arrangement were made, decontamination of the following items was strictly limited to the cleaning of accessible exterior surfaces of the following items, as described above:
  - HVAC Air Handlers, Fans and Ducts (supply)
  - Other Air Conditioning Components

4.4. Decontamination of Acid Waste Neutralization System, ST-22 Solvent Wet Bench and Developer Wet Bench

- The Acid Waste Neutralization System (AWN) was decommissioned with all wastewaters treated and pH adjustment prior to the system was decommissioned from use. On 01/27/2023 the system wastewater pH was recorded at a pH of 6. All wastewater was discharged into the city Publicly Owned Treatment Works. All piping from the solvent wet bench were removed for disposal as hazardous waste. All piping and lift station from the developer sink were removed as part of the removal for the AWN and placed into a 40 ft bin for hazardous waste disposal.
- Both ST-22 and Developer Wet bench were drained of any water and chemical prior work being done.
- Wet benches were disconnected from piping (water, chemical and drain lines).
- All piping from Developer wet bench were removed and disposed into bin for disposal with AWN pipes and tanks.
- The developer lift stations, all piping that leads to the AWN, AWN tank, secondary containment tank and both the treatment chemical tanks, pumps, and lines were all removed.
- AWN tank was cut up into smaller parts for removal.
- All materials from AWN system were disposed as Hazardous waste.
  - See Attachment 2 for Waste Documentation.

DRAFT

- All hazardous waste was transported off site to TSDF by ACT (Advanced Chemical Transport).
- All remaining chemical (acid and caustic) were pumped into 55-gallons container and transported to Trimble for use.

4.5. Decontamination of Diesel Generator

- Diesel fuel was removed from the generator and placed into 55-gallon drums.
- Diesel generator was unbolted from pad.
- A crane was used to place the diesel generator onto the truck for removal.
- Diesel generator is being refurbished and reused as emergency generator.
- Diesel fuel is being reused as diesel fuel for the generator.

5. Evaluation of Effectiveness of Decontamination

5.1. Visual Evaluation

- For all areas, visual evaluation and physical cleanliness were the primary method used to evaluate facility decontamination. If surfaces were physically clean and free of visual dirt, dust, and debris, it is unlikely that hazardous levels of contaminants identified above were present.
- Physical cleanliness will be verified by a physical inspection with facility owner and external regulators (as applicable) prior to project completion.
- As an extra precaution, areas on the floor and HVAC ducts were sampled with pH strips after decontamination activities were finalized and confirmed a neutral result throughout.

6. Work Practices for Site Decontamination

- All decontamination supplies and equipment were staged in a designated area, outside of work area(s).
- Access to site was controlled, as described in Section 7. Site Safety below.
- As necessary (and as directed by the account) any chemicals, equipment, or other items to be retained by account for use at different sites or facilities were packaged and transported by ACT.
    - All transportation of hazardous materials were in accordance with applicable DOT regulations
- Decontamination activities were conducted, as described in Section 4.
- Countertops, tables, and floors were left in place following decontamination. Some tiles in the Chemistry areas that were heavily stained were removed.

7. Site Safety

- ACT prepared a Health and Safety Plan (HASP) specific to the project site.

DRAFT

- In general, Level D PPE was utilized by trained personal in the building closure process.

- Once decontamination and waste removal activities were initiated, site access was restricted to ACT personnel and company personnel familiar with the work being performed.
  - ACT personnel entered and exited through a designated area.
  - Non-ACT personnel were instructed on applicable safety measures.
- As the project progressed, ACT delineated all cleaned areas of the building with cleaning/decontamination certifications detailing that the room has been cleaned including the date and name of personnel performing the cleaning.
- Decontamination certificates were attached to appropriate equipment, and storage rooms.

8. Waste Management and Documentation

- ACT collected all contaminated wipes, rinse waters, contaminated detergent, and PPE into appropriate containers and evaluate with respect to applicable hazardous waste state/federal hazardous waste definitions.
- Any chemicals identified as hazardous waste were properly segregated, packaged, labeled, and profiled by ACT for disposal.
- Remaining hazardous wastes were transported for disposal as a Hazardous Waste to a licensed TSDF on a Hazardous Waste Manifest.
- Veeco is considered the generator of any hazardous waste.
  - See Attachment 2 for Waste Documentation.

9. Regulatory Review

- County of San Jose Fire Department have been notified of this facility closure.
- This report will be provided to regulatory agencies as needed and can be retained to provide documentation of closure activities.
- When all hazardous materials and wastes have been removed from the facility, and all hazardous waste pick-ups are finalized, the following regulatory permits will be handled by Veeco:
  - The CERS account (10094788) and their EPA ID (CAD983648098) will be deactivated.

San Jose, CA

Re: Decontamination Report & Certification

To whom it may concern:

This report states that ACTenviro, Inc. (ACT) chemically cleaned the Veeco Process Equipment Inc facility located at 3050 Zanker Road, San Jose, CA, 95134.

The decontamination work started on 12/30/2022 and ended on 01/27/2023. ACT employed various cleaning techniques including 10% Bleach, Simple Green solution, and De lead.

The cleaning was limited to the exposed portions of the doors, countertops, cabinets, tables, and shelves.

If there are any questions regarding the cleaning methods used by ACT, please call me at 707-854-8944.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Business License: 38501 CA License: 120696 Class: C20

Termite Operator No.: _____ Registered Company No.: _____

X Contractor's Signature: Ricardo M. Uanto Date: 7-6-94

OWNER-BUILDER DECLARATION

Section 7031.5 I hereby affirm that I am exempt from the Contractors License Laws for the following reason (Sec. 703).5. Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500.).

☐ Section 7044 I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he/she did not build or improve for the purpose of sale).

☐ Section 7044 I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law):

☐ I am exempt under Sec. _____, Business and Professions Code for this reason:

_____

Owner: _____ Date: _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Labor Code).

Application for Permits

WHEN THE PERMIT ON THE BACK SIDE IS PROPERLY FILLED OUT AND SIGNED THIS WILL BE YOUR APPLICATION FOR A PERMIT

APPLICANT MUST ACKNOWLEDGE READING BY SIGNING BELOW.
THIS PERMIT WILL EXPIRE IF WORK IS NOT STARTED IN 180 DAYS FROM THE DATE OF ISSUANCE AND IF SUBSTANTIAL PROGRESS HAS NOT BEEN MADE AND VERIFIED BY AN INSPECTION EVERY 180 DAYS. DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED AND WRITTEN APPROVAL HAS BEEN DOCUMENTED ON THE APPLICANT'S COPY OF THIS PERMIT. THE ISSUANCE OF A PERMIT SHALL NOT CONSTITUTE AN APPROVAL OF ANY VIOLATION OF THE CODES OR FEDERAL, STATE AND CITY LAWS AND ORDINANCES. ANY PERMIT PRESUMING TO GIVE AUTHORITY TO VIOLATIONS OF THE CODES OR FEDERAL, STATE AND CITY LAWS AND ORDINANCES WILL BE INVALID. CITY CODES DO NOT EXEMPT YOU FROM COMPLIANCE WITH ANY DEED RESTRICTIONS OR RESTRICTIONS OF YOUR HOMEOWNERS ASSOCIATION. THESE RESTRICTIONS MAY LIMIT OR PROHIBIT WHAT YOU MAY WISH TO DO ON YOUR PROPERTY.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Business License: 053683 CA License: 152175 Class: C-10

Termite Operator No.: _____ Registered Company No.: _____

Contractor's Signature: _____ Date: 8-1-94

OWNER-BUILDER DECLARATION

Section 7031.5 I hereby affirm that I am exempt from the Contractors License Laws for the following reason (Sec. 703)5. Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundered dollars ($500).):

☐ Section 7044: I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he/she did not build or improve for the purpose of sale).

☐ Section 7044 I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law):

☐ I am exempt under Sec. _____, Business and Professions Code for this reason:

Owner: _____ Date: _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec 3800, Labor Code).

Policy No.: WC 9457965901 Company: FREMONT COMP

☐ Certified copy is hereby furnished
☑ Certified copy is filed with the City building inspection department.

Applicant: _____ Date: 8-1-94

CERTIFICATE OF EXEMPTION FROM WORKER'S COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars ($100) or Less). I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Applicant: _____ Date: _____

NOTICE TO APPLICANT If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name: _____

Lender's Address: _____

CERTIFICATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

SUTTER HILL

July 31, 1985

City of San Jose Building Department
Chief Building Official
801 North First Street
San Jose, California 95110

Attn: Frank Brown

Re: Sutter Hill Montague Park, Buildings B & D
2880 & 2840 Junction Avenue, San Jose
P.C. No. 28652

Dear Mr. Brown:

It is our understanding that the building permits for buildings B & D of the Sutter Hill Montague Project shall expire August 8, 1985 due to inactivity as recorded in your files on the original permit issued February 8, 1985. We are forwarding information indicating construction activity authorized by permit on the buildings to prevent the suspension of the permits.

Attached, please find copies of the Soils Engineers' Certificate of Compaction for the buildings B & D pads. The copies of the city inspections of the underground work for the entire site have been included. Since there has been activity on buildings B & D, we request that you allow the permits to remain in action.

Thank you for your attention to this matter.

Very truly yours,

SHL MONTAGUE, INC.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities which handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities which generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). If you already have a plan which meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials which could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all which apply)*:

☐ Bells; ☐ Horns/Sirens; ☐ Verbal *(i.e. shouting)*; X Other *(specify)* *PA System*

b. X Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing which shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance ..... Phone No. **911**

State Office of Emergency Services ..... Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

Fire Department Hazardous Materials Program ..... Phone No.: **(408) 277-8746**

Santa Clara County Hazardous Materials Compliance Division ..... Phone No. **(408) 299-6930**

California EPA Department of Toxic Substances Control ..... Phone No. **(510) 540-3739**

Cal-OSHA Division of Occupational Safety and Health ..... Phone No. **(415) 557-1677**

Bay Area Air Quality Management District ..... Phone No. **(415) 771-6000**

Regional Water Quality Control Board ..... Phone No. **(510) 286-1255**

** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.*

c. Emergency Resources:

Poison Control Center ..... Phone No. **(800) 876-4766**

Nearest Hospital: Name: Columbia San Jose Medical Center — Phone No.: (408) 998-3212

Address: 675 E. Santa Clara Street — City: San Jose

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

N/A

DRAFT

6. Emergency Equipment:

22 CCR, Section 66265.52(e) [as referenced by Section 66262.34(a)(3)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective, Equipment, Safety Equipment, And First Aid Equipment	☐ Cartridge Respirators

	☐ Other *(describe)*		
Additional Equipment *(Use Additional*			

DRAFT

Pages if Needed.)			

* *Use the Location Codes (LC) from the Storage Map(s) prepared earlier for your HMBP.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(c); 22 CCR, Section 66265.16

All facilities which handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. If you already have a training plan, you are not required to complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

Check all boxes which apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

X	Internal alarm/notification *
X	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☐	Location(s) and contents of Emergency Response/Contingency Plan
☐	Facility evacuation drills, which are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☐	Safe methods for handling and storage of hazardous materials *
☐	Location(s) and proper use of fire and spill control equipment
☐	Spill procedures/emergency procedures
☐	Proper use of personal protective equipment *
☐	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☐	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

X	Personnel rescue procedures		
☐	Shutdown of operations		
X	Liaison with responding agencies		
☐	Use, maintenance, and replacement of emergency response equipment		
X	Refresher training, which is provided at least annually *		
X	Emergency response drills, which are conducted at least *(specify)*	Annually	*(e.g. "Quarterly", etc.)*

DRAFT

Recordkeeping

(Hazardous Materials Business Plan Module)

All facilities which handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. If you already have a brief written description of your hazardous materials recordkeeping systems which addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.

Check all boxes which apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

X	Current employees' training records *(to be retained until closure of the facility)* *
X	Former employees' training records *(to be retained at least three years after termination of employment)* *
X	Training Program(s) *(i.e. written description of introductory and continuing training)* *
X	Current copy of this Emergency Response/Contingency Plan *
X	Record of recordable/reportable hazardous material/waste releases *
X	Record of hazardous material/waste storage area inspections *
☐	Record of hazardous waste tank daily inspections *
X	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form which you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

DRAFT

Check the appropriate box:

X	We will use the "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☐	We will use our own documents to record inspections. *(A blank copy of each document used must be attached to this HMBP.)*

Date: December 17, 1988

The Following Corrections Shall Be Made:

SHEET	CODE/SECTION	NO.	
	T19/99.1	3	Provide 2-A:10-B:C rated fire extinguisher(s) mounted within 75 feet of travel of all areas of building or tenant space.
	SJFC 10.301(g) SJFC 10.30	4	Alter sprinkler system as necessitated by new partitions, floors and ceilings. Design SJFC shall be adequate for intended use and must conform to the most recent NFPA Pamphlet 13. Alteration of sprinkler system plans are to be submitted by the installing contractor to this office for approval and permit. Alteration to existing systems that raise the total number of automatic sprinkler heads to 100 or more requires the system to be supervised by a remote station alarm. No final or permit will be issued until all systems are tested and operational. Appointments will be made by automatic sprinkler company ONLY. A separate fire alarm installation permit is required for installation of fire alarm to monitor sprinkler system. Design, installation and maintenance of alarm system must conform with NFPA 72C.
	UBC/3312(a)	5	Exits shall be illuminated at any time the building is occupied with a light having an intensity of not less than one foot candle at floor level.
	UBC/3312(b)	6	Exit signs shall be posted above each required exit doorway and wherever otherwise required to clearly indicate the direction of egress.
	UBC/3312(c)	7	Electrically Illuminated Signs. Exit and exit directional signs which are required to be electrically illuminated shall be lighted with two electric lamps of not less than 15 watts.

Compliance Statement

General: The proposed building represented in this set of compliance documentation is consistent with the other compliance forms and worksheets, with the plans and specifications and with any other calculations or computer runs submitted with this permit application.
Performance Approach, (when applicable) The energy performance estimate presented on this form was calculated using the approved calculation method indicated above and with the CEC established hard and restricted engineering inputs for the applicable climate zone and occupancy type.
Prescriptive Approach, (when applicable) The proposed building has been designed to meet the requirements of the Alternative Component Package indicated above for the appropriate occupancy type and climate zone.

Both parts one and two of this Certificate of Compliance must be included with each building permit application for the above-noted building and appear on the plans submitted for approval. The building features and requirements represented on the Certificate of Compliance are adequate to achieve compliance with the second generation residential energy standards for the building referenced above. The building features and requirements are also adequate for any subsequent alterations, modifications or additions to the building.

Compliance Statement

General. The proposed building represented in this set of compliance documentation is consistent with the other compliance forms and worksheets, with the plans and specifications and with any other calculations or computer runs submitted with this permit application. Performance Approach. (when applicable) The energy performance estimate presented on this form was calculated using the approved calculation method indicated above and with the CEC established fixed and restricted engineering inputs for the applicable climate zone and occupancy.

Multiple Orientation Approach. (when applicable) The proposed building has been designed to meet the requirements of the Alternative Component Package method for the appropriate occupancy type and climate zone.

GENERAL NOTES

A. AUTOMATIC FIRE SPRINKLERS SHALL BE PROVIDED PER APPLICABLE NATIONAL, STATE, LOCAL CODES BY A DESIGN-BUILD FIRE SPRINKLER CONTRACTOR. DRAWINGS AND CALCULATIONS WILL BE SUBMITTED TO THE CITY OR COUNTY FIRE DEPARTMENT FOR REVIEW, APPROVAL, AND PERMIT PRIOR TO INSTALLATION.

B. PLUMBING SHALL BE PROVIDED PER APPLICABLE NATIONAL, STATE AND LOCAL CODES BY A DESIGN-BUILD CONTRACTOR.

C. PROVIDE 100% HVAC PER APPLICABLE NATIONAL, STATE, AND LOCAL CODES BY DESIGN-BUILD CONTRACTOR

D. ALL ELECTRICAL WORK SHALL BE PROVIDED PER APPLICABLE NATIONAL, STATE AND LOCAL CODES INCLUDING LIGHTING, EMERGENCY LIGHTING AND EXIT ILLUMINATION BY DESIGN-BUILD CONTRACTOR

E. ALL DIMENSIONS SHALL BE FIELD VERIFIED AND THE ARCHITECT SHALL BE NOTIFIED OF ANY DISCREPANCY PRIOR TO CONSTRUCTION. 2A 10 BC FIRE EXTINGUISHERS IN SEMI-RECESSED CABINETS SHALL BE PROVIDED PER APPLICABLE NATIONAL, STATE AND LOCAL CODES.

F. USE 3 5/8" METAL STUDS IN ALL GYP. BD. PARTITIONS SHOWN UNLESS OTHERWISE NOTED.

G. BUILDING STANDARDS SHALL BE MAINTAINED WHEREVER POSSIBLE.

H. EXITS:

1. EXIT DOORS AND HARDWARE SHALL CONFORM TO CALIFORNIA TITLE 24 REQUIREMENTS FOR THE PHYSICALLY HANDICAPPED PART 2 SECTION 62-3303.

2. TYPE OF LOCK OR LATCH: EXIT DOORS SHALL BE OPERABLE FROM THE INSIDE WITHOUT THE USE OF A KEY, OR ANY SPECIAL KNOWLEDGE OR EFFORT.

EXCEPTION:

2.1 THIS REQUIREMENT SHALL NOT APPLY TO EXTERIOR EXIT DOORS IN A GROUP B OCCUPANCY IF THERE IS A READILY VISIBLE, DURABLE SIGN ON OR ADJACENT TO THE DOOR STATING "THIS DOOR TO REMAIN UNLOCKED DURING BUSINESS HOURS." THE SIGN SHALL BE IN LETTERS NOT LESS THAN 1 INCH HIGH ON A CONTRASTING BACKGROUND. THE LOCKING DEVICE MUST BE OF A TYPE THAT WILL BE READILY DISTINGUISHABLE AS LOCKED. THE USE OF THIS EXCEPTION MAY BE REVOKED BY THE BUILDING OFFICIAL FOR DUE CAUSE.

2.2 EXIT DOORS FROM BUILDINGS OR ROOMS HAVING AN OCCUPANT LOAD OF 10 OR LESS MAY BE PROVIDED WITH A NIGHT LATCH, DEAD BOLT OR SECURITY CHAINS, PROVIDED SUCH DEVICES ARE OPERABLE FROM THE INSIDE WITHOUT THE USE OF A KEY, SPECIAL KNOWLEDGE OR EFFORT AND MOUNTED AT A HEIGHT NOT TO EXCEED 48 INCHES ABOVE THE FINISHED FLOOR.

3. EXIT DOORS SERVING AN OCCUPANT LOAD OF 50 OR MORE SHALL SWING IN THE DIRECTION OF EGRESS.

4. EXITS SHALL BE ILLUMINATED AT ANY TIME THE BUILDING IS OCCUPIED WITH A LIGHT HAVING AN INTENSITY OF NOT LESS THAN ONE FOOT CANDLE AT FLOOR LEVEL.

5. EXIT SIGNS SHALL BE POSTED ABOVE EACH REQUIRED EXIT DOORWAY AND WHEREVER OTHERWISE REQUIRED TO CLEARLY INDICATE THE DIRECTION OF EGRESS, OR PER FIRE MARSHALLS REQUEST.

6. EXIT SIGNS AND EXIT ILLUMINATION SHALL BE SUPPLIED BY TWO SEPARATE CIRCUITS. ONE SHALL BE SEPARATED FROM ALL OTHER CIRCUITS IN THE BUILDING AND INDEPENDENTLY CONTROLLED OR SHALL BE PROVIDED WITH SELF-ILLUMINATING EXIT SIGNS APPROVED BY RECOGNIZED AGENCY.

J. USE 6" METAL STUDS ON ALL SINGLE PLUMBING WALLS.

K. AT THOSE LOCATIONS WHERE ITEMS OF EQUIPMENT EXCEEDING A TOTAL WEIGHT OF 200 POUNDS, AND NOT A PART OF THE WORK OF THESE CONTRACT DOCUMENTS, WILL BE REQUIRED TO BE PLACED ON THE ROOF OF THIS PROJECT, THE CONTRACTOR SHALL SECURE STRUCTURAL CALCULATIONS, SIGNED BY A STRUCTURAL ENGINEER LICENSED IN THE STATE OF CALIFORNIA. THE CALCULATIONS SHALL EITHER ATTEST TO THE ABILITY OF THE EXISTING STRUCTURE TO ACCEPT THE LOAD, OR SHALL INDICATE THE MODIFICATIONS REQUIRED FOR THE STRUCTURE TO SAFELY RECEIVE THE LOADS IMPOSED BY THE EQUIPMENT. IN THE EVENT THOSE CALCULATIONS WILL REQUIRE STRUCTURAL MODIFICATIONS TO THE EXISTING BUILDING STRUCTURE, THE CONTRACTOR SHALL NOTIFY THE OWNER, IN WRITING, OF THE ANTICIPATED COSTS FOR SUCH MODIFICATIONS BEFORE STARTING WORK ON THOSE MODIFICATIONS.

L. AT THOSE LOCATIONS WHERE ITEMS OF EQUIPMENT TO BE INSTALLED WILL REQUIRE NEW ROOF PENETRATIONS, AND THOSE ITEMS ARE NOT A PART OF THE WORK OF THESE CONTRACT DOCUMENTS, THE CONTRACTOR SHALL PROVIDE, COORDINATE AND IMPLEMENT THE INSTALLATION DETAILS TO BE USED TO PRODUCE A WATER-TIGHT INSTALLATION, PER SMACNA/NRCA STANDARDS WITH ALL APPLICABLE TRADES. AFTER COMPLETION OF THE INSTALLATION, FLOOD THE AREA OF THE PENETRATION WITH WATER AND REPAIR ALL SOURCES OF LEAKAGE.

M. **AUTOMATIC HVAC SHUTOFFS IN LIEU OF 1-HR F.R. CORRIDOR / EGRESS CONSTRUCTION PER SEC 1009'82 UMC**

PROVIDE HVAC UNITS WITH AUTOMATIC SHUTOFFS THAT SHALL SHUT DOWN THE AIR-MOVING EQUIPMENT WHEN SMOKE IS DETECTED IN A CIRCULATING AIRSTREAM OR AS AN ALTERNATE WHEN SMOKE IS DETECTED IN ROOMS SERVED BY THE SYSTEM. SMOKE DETECTION SHALL BE BY A SMOKE DETECTOR INSTALLED IN THE MAIN CIRCULATING AIR DUCT AHEAD OF ANY FRESH-AIR INLET OR INSTALLED IN EACH ROOM OR SPACE SERVED BY THE RETURN AIR DUCT. ACTIVATION OF ANY DETECTOR SHALL CAUSE THE AIR MOVING EQUIPMENT TO AUTOMATICALLY SHUT-DOWN.

Ⓣ Thermostats and Light Switches shall be located a maximum of 4'-0" and a minimum of 3'-0" above finished floor.

Ⓒ Wall outlets shall be located a minimum of 1'-0" above finished floor except at relocatable partitions, and window walls.

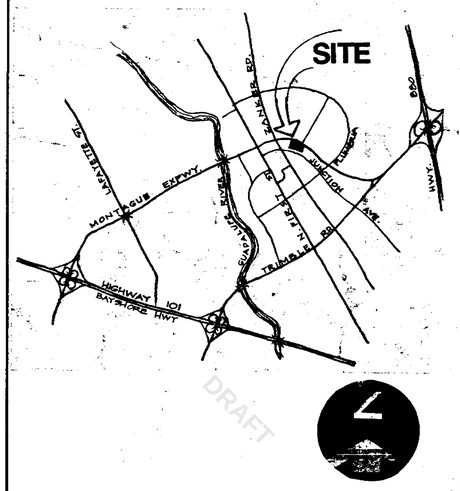
Ⓕ Where lighted exit signs are used, they shall flash in an emergency.

S. PLUMBING CONTRACTOR SHALL VERIFY THAT EXISTING WATER SERVICE SIZE IS SUFFICIENT TO PROVIDE THE WATER NEEDS OF THIS BUILDING, PROVIDE NEW WATER SERVICE, METER AND PLUMBING IF REQUIRED.

REFERENCE NOTES

1. EXISTING EXTERIOR GLASS DOOR TO REMAIN.
2. EXISTING STOREFRONT OR WINDOW SYSTEM TO REMAIN.
3. EXISTING CONC. TILT-UP WALL TO REMAIN - AT EXPOSED INTERIOR FACE, PATCH, TEXTURE AND PAINT.
4. USE FULL HT. 6" METAL STUDS TO UNDERSIDE OF ROOF STRUCTURE W/ FULL HT. 5/8" TYPE 'X' GYP. BD. BOTH SIDES.
5. PROVIDE 5/8" GYP. BD. FURRING OVER METAL STUDS (2 1/2" MIN.) AT CONC. WALLS & COLS. FIRE RATING REQUIRES GYP. BD. BOTH SIDES. PERIMETER COLS AT R/MS 203, 212, 227, 228, 229, 230, 101, 106, 107, 112. NO EXTERIOR WALL FURRING IS REQUIRED.
6. PROVIDE PLASTIC LAMINATE COUNTER, SPLASH, RISER, CASED OPEN SHELVING. PROVIDE FULL-MOSE FRONT AND EXPOSED SIDE EDGES. SINKS SHALL BE:
   1) 22"X25" 18 GA SINGLE COMPARTMENT SINK W/ 3 HOLES AND SELF RIMMING SINGLE LEVER FAUCET AND WITH GARBAGE DISPOSAL. COFFEE ROOM #2318.
   2) 15"X15" 18 GA SINGLE COMPARTMENT SINK W/ GOOSENECK FAUCET. COFFEE ROOM #1306.5 & #2311.
7. PROVIDE BACKING PLATES/WOOD BLOCKING AT STUD WALLS FOR THE FASTENING OF SUCH ITEMS AS CABINETS, COUNTERS, TOILET ACCESSORIES AND PLUMBING FIXTURES.
8. PROVIDE CASED OPENING FOR CONVEYOR. CONTRACTOR SHALL VERIFY SIZE.
9. EXISTING ROLL-UP DOOR TO REMAIN.
10. EXISTING LOADING DOCK TO REMAIN.
11. REMOVE PORTION OF EXISTING CONC. SLAB/LOADING DOCK AND PROVIDE SERCO 6'-0"X8'-0" #FC825B LOADING DOCK LEVELOR OR APPROVED EQUAL. SEE STRUCTURAL DRAWINGS.
12. PROVIDE AKRON SERVICE SINK #7695.018 WITH HERITAGE SERVICE: SINK FAUCET #2385.049.
13. PROVIDE FULL HT. 6" WD. STUDS, 3 1/2 " SOUND ATTENUATION BATT INSULATION AND 5/8" TYPE 'X' GYP. BD. AT NEW ELEVATOR. SEE STRUCTURAL DRAWING FOR FRAMING, PIT DETAILS AND RAIL SUPPORT.
14. PROVIDE 5/8" FOIL FACED GYP. BD. OVER 6" METAL STUDS WITH R-19 BATT INSULATION AT PARTITIONS AND 10'-0" HIGH CEILING. PROVIDE IN RM. #1312 ONLY.
15. PROVIDE 5/8" GYP. BD. FURRING OVER METAL STUDS AT EXISTING COLUMNS.
16. MODIFY EXISTING EXTERIOR DOOR HARDWARE AND ITS INTERIOR DOOR HARDWARE FOR TENANT SUPPLIED SCHLAGE CARD KEY ACCESS SYSTEM - TYP. SEVEN DOORS.
17. PROVIDE 8" HIGH RAISED 2'-0"X2'-0" COMPUTER ACCESS FLOORING AND RAMP. SLOPE 1:15 OR
18. SAW-CUT AND REMOVE EXISTING FLOORING FOR NEW DUCT SPACE. SEE STRUCTURAL DRAWINGS.
19. REMOVE AND RELOCATE EXISTING ROOF ACCESS LADDER AND ACCESS HATCH. PROVIDE NEW FLOORING AS REQUIRED.
20. REMOVE PORTION OF EXISTING STOREFRONT SYSTEM AS REQUIRED FOR NEW TEMP GLASS AND ALUMINUM DOOR. STYLE, FINISH AND HARDWARE SHALL MATCH EXISTING.
21. LOCATION OF RELOCATED ROOF ACCESS LADDER AND ROOF HATCH. PROVIDE FLASHING AT ROOF HATCH PER NRCA STANDARDS.
22. PROVIDE 12" WIDE PLAS LAM SHELF AND 6'-0"X6'-0" ROLL-UP DOOR. PROVIDE WOOD STUD/BEAM SUPPORT AS REQUIRED.
23. 8'-0"X3'-0" PASS-THRU WITH PAIR OF 2'-6"X3'-0" POCKET DOORS WITH PLAS LAMINATE FINISH.
24. PROVIDE 1-LAYER OF 1/2" SOUND BOARD AND 3 1/2" SOUND ATTENUATION BATT INSULATION ALL ROUND MECHANICAL OPENINGS.
25. PROVIDE 8'-0"X8'-0"X3/8" THK. PLYWOOD BACKBOARD FOR PHONE EQUIPMENT AND PROVIDE PAINT FINISH.
26. ~~PROVIDE HIGH TEMPERATURE SPRINKLER HEADS IN COMPUTER ROOM AND ACCESS FLOOR SPACE. PROVIDE 20-THERMOSPRINKLER HEADS AT ATTIC SPACE DIRECTLY ABOVE COMPUTER ROOM.~~ ⚠
27. PROVIDE 12"X12" FLOOR SINK AS AN INDIRECT WATER DRAIN FOR VEGETABLE TRAY, ICE MAKER, AND SALAD BAR.
28. PROVIDE ROUGH PLUMBING FOR SALAD HANDLING SINK BY OTHERS. (H.V., C.D.W., AND S.S.).
29. COUNTERS, SALAD BAR, SANDWICH TRAY, ETC., BY OTHERS SHOWN DASHED.
30. PROVIDE TWO-TUB SCULLERY SINK WITH DRAIN BOARDS, AND FAUCET WITH C.D.W. & H.W. (OR AS SIZED PER FUTURE PERMIT LATER VIEW BY COUNTY HEALTH DEPT.
31. PROVIDE 12"X8" ACCESS DOORS AT 8'-0" O.C. FOR DATA CABLE ACCESS.
32. PROVIDE FLEXIBLE COPPER C.D.W. TUBING AND VALVE FOR ICE MAKER BY OTHERS.
33. PROVIDE GAS LINE AND VALVE FOR FUTURE RANGE (NOT IN M.C.) ⚠ ROUGH
34. PROVIDE 6" METAL STUD FRAMING FOR RECESSED ELECTRICAL PANELS. COORDINATE WITH ELECTRICIAN FOR EXACT LOCATIONS OF PANELS.
35. PROVIDE MIN-BLINDS AT ALL PERIMETER WINDOWS EXCEPT AT NORTH WALL WINDOWS ⚠

VICINITY MAP



CLARIFICATION

CONTRACTOR SHALL CLARIFY WITH V.C. WONG AND ASSOCIATES OF ANY ERROR, INCONSISTENCY OR OMISSION IN NO CASE SHALL CONTRACTOR PROCEEDS WITH WORK IN UNCERTAINTY.

GENERALLY:

1. WRITTEN DIMENSIONS SHALL TAKE PRECEDENCE OVER SCALED DIMENSIONS.
2. LARGE SCALED DRAWINGS SHALL TAKE PRECEDENCE OVER SMALL SCALED DRAWING.
3. THE SPECIFICATIONS SHALL TAKE PRECEDENCE OVER THE DRAWING.
4. THE STRUCTURAL DRAWINGS SHALL TAKE PRECEDENCE OVER STRUCTURAL COMPONENTS SHOWN ON THE ARCHITECTURAL DRAWINGS.
5. ALL LOCATIONS AND AND DIMENSIONS OF OPENINGS SHOWN ON THE ARCHITECTURAL DRAWINGS SHALL TAKE PRECEDENCE OVER THE STRUCTURAL DRAWINGS.

SYMBOLS

MANDATORY MEASURES Section 2.1

2.1 Envelope Measures

2.1.1. Insulating Materials

Section 2-5311 of the standards specifies the mandatory requirements for building insulation; these include:

Certification. Building insulation must be certified by the manufacturer to meet the California Quality Standards for Insulating Material. The following products are among the materials that are required to be certified:

- Aluminum foil
- Cellular glass in board form
- Cellulose fiber, either loose fill or sprayed applied
- Mineral aggregate in board form
- Mineral fiber in any form
- Perlite loose fill
- Polystyrene in board, molded or extruded form
- Polyurethane in board form or field applied
- Polyisocyanurate in board form or field applied
- Urea formaldehyde foam field applied
- Vermiculite loose fill

Fire Safety. All insulating materials must be installed in compliance with the flame spread and smoke density requirements of Sections 1712 and 1713 of the 1982 edition of the Uniform Building Code.

Urea Formaldehyde. Urea formaldehyde foam insulation may only be installed on the exterior sidewalls of buildings and a continuous, four mil polyethylene plastic sheet must be provided to separate the insulation from the therior space.

2.1.2. Doors and Windows

Section 2-5317 requires that all exterior doors and windows be designed to limit air leakage. The requirement applies to doors and windows that lead directly to the out-of-doors as well as those that lead to unconditioned spaces such as garages and mechanical rooms.

Manufactured windows and doors must be certified by the manufacturer to meet minimum infiltration requirements. Labels from the Architectural Aluminum Manufacturer's Association (AAMA) or the National Woodwork Manufacturer's Association (NWMA) are evidence that manufactured windows meet the state standards. For operable windows, infiltration is limited to 0.50 cubic feet per minute (cfm) per foot of movable sash crack. For single swinging doors (one leaf), infiltration is limited to 0.30 cfm per square foot of door surface. For double swinging doors (two leafs) the limit is 1.0 cfm per square foot. These infiltration limits are certified under the pressure conditions of an approximate 25 mph wind. The designer and building official should verify that products specified for the building meet the requirements and have been properly certified by the manufacturer.

Site-constructed doors and windows must be caulked, gasketed, weatherstripped or sealed such that all observable sources of air leakage are treated.

The requirements for both manufactured and site-built products do not apply to fire rated doors and windows, unframed glass doors, and doors or windows that separate elevator shafts from the out-of-doors.

Dampers in elevator shafts are required in certain circumstances. It should be noted that the first generation standards required elevator shaft dampers in all cases. The second generation nonresidential energy standards only require dampers if the elevator shaft is treated as conditioned space. In this event, the walls that separate the elevator shaft from the conditioned space would be treated as exterior walls. This has the following implications.

- If the prescriptive approach is used, the walls would have to meet the insulation requirements for exterior walls. They would also result in a larger exterior wall area to enable more glazing.
- If the performance approach is used, the conditioned floor area of the building will be reduced, possibly resulting in a larger estimated energy use.

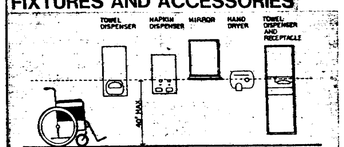
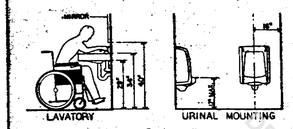
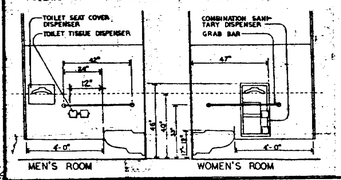
FIXTURES AND ACCESSORIES

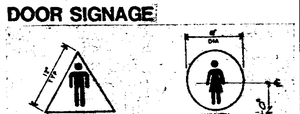




NOTE:
INSULATE HOT WATER AND DRAIN PIPES UNDER LAVATORY

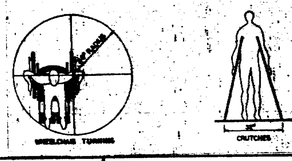


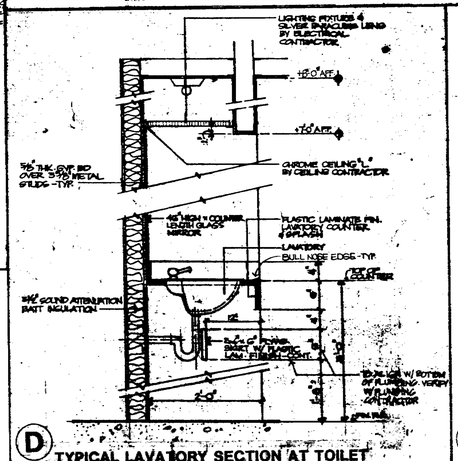
DOOR SIGNAGE

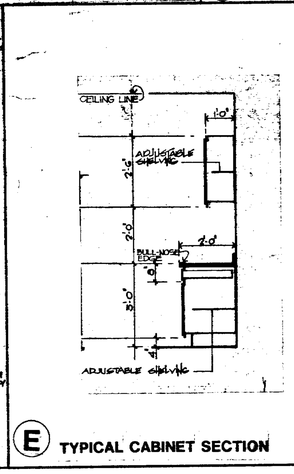


PROVIDE 1/4" THICK SYMBOLS AT TOILET ROOM DOORS AS SHOWN. SIGNS ARE DISTINCTLY DIFFERENT FROM THE DOOR IN COLOR AND CONTRAST.

PHYSICAL REQUIREMENTS







TITLE 24 REQUIREMENTS.

THE WATER CLOSET AT THE HANDICAPPED COMPARTMENT IS REQUIRED TO BE MINIMUM OF 17" AND A MAXIMUM OF 19" FROM FINISHED FLOOR TO THE TOP OF THE SEAT.

AT LEAST ONE URINAL PER MENS ROOM IS REQUIRED TO BE A MINIMUM OF 17" HIGH AT THE RIM. Handicapped Approved

FAUCET CONTROLS AND OPERATING MECHANISMS ARE REQ'D TO BE OPERABLE WITH ONE HAND AND CAN NOT REQUIRE GRASPING, PINCHING OR TWISTING OF THE WRIST. THE FORCE REQUIRED TO ACTIVATE CONTROLS IS NOT TO EXCEED 5 LBF.

FLUSH CONTROLS FOR WATER CLOSETS AND LAVATORIES ARE TO BE OPERABLE BY AN OSCILLATING HANDLE WITH A MAXIMUM OPERATING FORCE OF 3 LBF.

IF ANY OF THE ITEMS SPECIFIED HEREIN ARE IN CONFLICT WITH THE REQUIREMENTS LISTED ABOVE, THE CONTRACTOR SHALL SUBMIT AN ALTERNATE TO THE ARCHITECT FOR HIS REVIEW AND ACCEPTANCE.

SHOWER NOTES:
1. WIDTH : 3'-6"
2. DEPTH : 4'-0"

12	Lights		kBtu/yr-sf
13	Miscellaneous Equipment		kBtu/yr-sf
14	Total		kBtu/yr-sf
15	Adj. Total Energy Use (line 9 + line 14)		kBtu/yr-sf

Compliance Statement

General. The proposed building improvement in this set of compliance documentation is consistent with the other compliance, forms and worksheets, with the plans and specifications and with any detail calculations or computer runs submitted with this permit application.

Performance Approach. (when applicable) The energy performance estimate presented on this form was calculated using the approved calculation method indicated above and with the CEC established fixed and restricted engineering inputs for this applicable climate zone and occupancy type.

Prescriptive Approach. (when applicable) The proposed building has been designed to meet the requirements of the Alternative Component Package - Lighting Systems for the appropriate occupancy type and climate zone.

Both parts one and two of this Certificate of Compliance must be included with each building permit application for the above noted building and appear on the plans submitted for approval. The building features and requirements represented on the Certificate of Compliance are adequate to achieve compliance with the second generation nonresidential energy standards for the building referenced above. The building features and requirements are also adequate for any subsequent alterations, modifications or additions to the building.

FINISH SCHEDULE

FLOORCOVERING

A — Bentley, Carnaby Lab 1011, 28 ounce special weight: 28 ounce, Random textured level loop #CN326-3205 "Crown Jewels", Gauge: 1/8", Yarn Content: Yarn dyed Dupont Antron Precedent Nylon, Primary backing: Polypropylene, Secondary backing: Action Bac, Width: 12', Flame resistance: Passes methenamine Pill Test, DOC-FFI-70.
Installation: Direct glue down
Base: Roppe #95 LT. Gray, 2-1/2" carpet base

B — Intertile, Marble MT-11, White Carrara, polished, Size: 12" x 12", 3/8" thick.
Installation: THIN SET
Base: 4" White Carrara marble, polished edge.
Grout: AMERICAN CLEAN AO WHITE. 1/8" MAX.

C — Intertile, Granite G209F, Swedish Red Mahogany (flamed), Size: 12" x 12", 3/8" thick
Installation: THIN SET
Grout: CUSTOM-MIX COLORED, #105 DELOREAN GRAY. 1/8" MAX.

D — Bentley Kings Road II, #422-748 "Grotto", dense cut pile plush, Machine gauge: 1/8", Pile height: .312, Stitches per inch: 11.25, Yarn ply: Heat Set, 2-ply, Yarn weight/tufted: 42 oz., Yarn Content: Dupont Antron III nylon, Primary backing: Polypropylene, Secondary backing: Action Bac, Width: 12', flame resistance passes methenamine pill test DOC-FFI-70.
Installation: Over pad, Hartex 32os. contract carpet cushion.

E — VCT: Armstrong Imperial Excelon Tile, 1/8" gauge, No.51836 "Shelter White", Size: 12" x 12".
Installation: According to manufacturers instructions.
Base: Roppe #95 Lt. Gray, 4" top set.

F — Ceramic Field Tile - Crown/Tileshop, Aurora Series AA-208A abrasive finish, Size: 2" x 2", mounted on mesh, Color: Light Gray.
Installation: Thin set.
Grout: Custom's Colored #180 Sandstone.

G — Ceramic Tile Accent - Crown/Tileshop, Aurora Series, AA-254, Size: 2" x 2",
Color: Dark Grey
Installation: Thin set.
Grout: Custom's Colored #180 Sandstone.

H — Ceramic Tile Accent - Crown/Tileshop, Aurora Series, AA-255, Size: 2" x 2"
Color: Turquoise
Installation: Thin set.
Grout: Custom's Colored #180 Sandstone.

J — Designweave Sabre #736-86 Merriment dense tufted cut pile, Fiber: Anso X Nylon. 2-ply continuous heatset, 38 oz. per square yard, Pile height: .250 inches, Gauge: 1/10 inches.
Installation: Over pad, Hartex 32 oz. contract carpet cushion.

K — Bentley, Camden Hill CH380-893 Night Shade, dense cut pile, Gauge: 1/10 inch, Pile Height: .281 inches, Yarn ply: Heat set, 2-ply, Yarn weight: 38 oz., Yarn content: Dupont nylon, Primary backing: Polypropylene, Secondary backing: Action Bac.
Installation: Over pad, Hartex, 32 oz. contract carpet cushion.
Base: Burke #564-P, 2-1/2" carpet bse.

L — Bentley, Kings Road II #422-155 Rose Pearl, dense cut pile. Same specifications as D above.
Installation: Over pad, Hartex 32 oz. contract carpet cushion.
Base: Burke #564-P, 2-1/2" carpet base.

M — Harbinger, Confetti #3776, "Independence Day Parade", 100% Antron XL, heat set, continuous filament nylon, skein dyed, cut and loop texture, 3/31 inch gauge, Pile height: 5/16" inch, Primary backing: 5 oz., polypropylene, Secondary backing: Datawoven backing, Adhesive: 37 oz./sq.yd. latex.
Installation: Direct glue down
Base: Ceramic tile, 6" coved base, glazed edge.

N — Heath Ceramics, Inc. ceramic tile, Persian Pink #3, medium grit, Size: 6" x 6".
Installation: Thin set.
Base: Same material, 6" coved base, glazed edge.
Grout: Customs Colored #155 Coral.

O — Raised Computer Floor -
Nevamar laminated floor tile, MR-6-1, "Gray Matrix". Size: 24" x 24".

P — Bentley Sussex, SX-400-887, Ebbtide, Dense cut pile, pattern, Machine gauge: 1/10", Pile height: .281, Yarn weight: 40 oz., Total weight: 84 oz., Yarn Content: Monsanto Ultron 3D nylon, Primary backing: Polypropylene, Secondary backing: Action Bac, Width: 12', Flame resistance: Passes methenamine pill test DOC-FFI-70.
Installation: Over pad, Hartex 32 oz., contract carpet cushion.
Base: Roppe #95, Lt. Gray, 2-1/2" carpet base.

Q — ~~Exercise Floor~~ - Sentinel, Insta-Mat, interlocking exercise mat, Panel Sizes: 4' x 6' x 7/8" height.
Order From: Centurion Sales Company
Mountain View, CA

TOILET PARTITIONS

Nevamar, ARP surface, ARTISAN PURPLE, 6-3, SAT, TEXTURED

COUNTERS

A — Formica #923, Surf, matte finish. Counter Tops, typical coffee bars. Counter tops and overhead cabinets, Room 2318.
B — Nevamar #S-2-51T, textured, "Rose Brown". TO BE USED AT RESTROOMS.
C — Laminart #829-T, textured, "Teal". COFFEE BARS - UPPERS & FACE OF LOWERS
D — Formica #879 Dusty Jade, matte finish. Trash receptacles TOPS & BASES RM# 2201
E — Formica #880 Thistle, matte finish. Break room counter tops and cabinet faces. ROOM# 2301
F — Formica #859 Rose Ash, matte finish. Lower cabinet faces, Room 2318
Executive Coffee Room.
G — LAMINART #3107, TEXTURED, COLOR: PEARL WHITE SEE RECEPTION DESK.
H — WILSONART # D 316-60, MATTE FINISH, COLOR: RAINCLOUD, AT MAIL CENTER.

DOORS AND FRAMES

Door Finish: Plastic laminate, Formica #923 Surf, matte finish.
Hardware Finish: TO BE POLISHED CHROME
Door frame and interior glass frame finish: TO RECEIVE ENAMEL PAINT. COLOR: GLIDDEN # 79-05

WINDOWCOVERING

Levolor, Riviera, one inch horisontal blinds, #114 Oriental Pearl.
Location: All exterior windows, BLINDS AT NORTH FACING WINDOWS DELETED.

TRASH RECEPTACLES

A — Formica #879 Dusty Jade, matte finish.
See Detail (5/A4) & (4/A4)

NOTES

1. CARPET TO BE DIRECT GLUE DOWN INSTALLATION IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS FOR ADHESIVE AND DIRECT GLUE TECHNIQUES, U.O.N.
2. FOR BORDERED AND SPECIALTY INSTALLATIONS, SEAMING DIAGRAM IS TO BE APPROVED BY DESIGNER PRIOR TO START OF WORK.
3. CARPET ON STAIRS TO BE INSTALLED OVER HARPER MANUFACTURING COMPANY HARTEX "CONTRACT" 32 OZ., 100% CARPET FIBER PAD OR EQUAL.
4. ALL PARTITIONS, COLUMNS, AND EXTERIOR WALLS TO RECEIVE BUILDING STANDARD RUBBER BASE UNLESS OTHERWISE NOTED.
5. PRIOR TO APPLICAITON OF PAINT, ALL SURFACES ARE TO BE PROPERLY PREPARED, TAPED AND SMOOTHED.
6. PAINT ALL ACCESS PLATES, PANEL BOXES, ETC. TO MATCH ADJACENT PAINTED SURFACE.
7. CONTRACTOR TO PROVIDE (2) 8-1/2" X 11" BRUSH-OUTS OF EACH PAINT COLOR TO AMBIANCE ASSOCIATES FOR APPROVAL 2 WEEKS PRIOR TO COMMENCEMENT OF WORK AND PRIOR TO PURCHASE OF PAINT.
8. PAINT FINISH SCHEDULE:
   FLAT LATEX: TWO COATS FLAT LATEX TO COVER.
   LATEX EGGSHELL ENAMEL: ONE COAT PVA SEALER, LATEX EGGSHELL ENAMEL TO COVER.
   STIPPLE ENAMEL: ONE COAT PVA SEALER, ONE COAT SEMI-GLOSS TO COVER, STIPPLE FINISH.
9. ALL TRANSITIONS BETWEEN MATERIALS TO BE SMOOTH.
10. MAXIMUM HEIGHT DIFFERENCE BETWEEN FLOORCOVERING SURFACES TO BE 1/4".
11. ALL WALLS DESIGNATED FOR WALLCOVERING ARE TO BE TAPED, SMOOTHED AND PREPARED PRIOR TO INSTALLATION.
12. WALLCOVERINGS ARE TO BE INSTALLED ACCORDING TO MANUFACTURER'S INSTRUCTIONS.
    COVER SWITCHPLATES AND COVERPLATES WITH ADJACENT WALLCOVERING.
13. ELEVATOR WALL PANELS TO BE COVERED WITH FABRIC WALLCOVERING - (H)
14. WOOD TOP CAP AT MAIN STAIRS TO BE PREMIUM GRADE HONDURAN MAHOGANY SATIN FINISH. SEE ARCHITECTURAL DRAWINGS FOR DETAILS. NOTE: PROVIDE STAIN SAMPLE TO AMBIANCE ASSOC. FOR APPROVAL PRIOR TO APPLICATION.
15. PROVIDE AND INSTALL CONTRASTING COLOR CARPET STRIP ON STAIRS, 1" FROM NOSING OF FIRST STEP, LANDING AND TOP STEP. WIDTH: 2" AT MAIN STAIRS, MARK CONTRASTING TO BE: BENTLEY KINGS ROAD II # 422-700 COLOR/SHADE AT ELEVATOR CARPET A CONTRAST STRIP TO BE: BENTLEY CARPET #2401-802 "PATINA"
16. HARDWARE FOR ALL COFFEE BARS AND KITCHEN COUNTERS TO BE (4) WIRE PULLS, POLISHED CHROME FINISH.
17. PROVIDE SHOP DRAWINGS FOR BANQUETTE SEATS AND TRASH RECEPTACLES TO DESIGNER FOR APPROVAL PRIOR TO FABRICATION.
18. INSTALL TILE AT RESTROOMS, FULL HT. AT PLUMBING WALLS.
19. WHERE MARBLE MEETS CARPET (A) AT LOBBY & MAIN CORRIDOR, PRIOR TO INSTALLATION OF FLOORCOVERINGS PLANE EXISTING CONCRETE, FLOORCOVERINGS WILL THEN HAVE MINIMUM HEIGHT DIFFERENCE AS SPECIFIED

CEILINGS

Mens and Womens Restrooms/Showers: Paint: Semi gloss OVER EPOXY STIPPLE ENAMEL
Color: Glidden #79-05.

Lunch Room: GRAPHIC TILE & GYPBD Zolatone finish (8).

Lobby: Paint: Smooth flat latex, First floor ceiling color: Sinclair CM8450,
Second floor ceiling color: Pittsburgh 3639 "Sea Fog"

Janitors Closet/Equipment Rooms: Eggshell stipple enamel,
Color: Glidden #79-05.

RECEPTION DESK FINISHES N.I.C.

Transaction Counter Top - White Carrara marble, polished, 3/4" thick, beveled edge.
Counter Face, sides and interior vertical surfaces: Premium grade HONDURAN MAHOGANY
Desk top and drawer faces and interiors: TO BE: PLASTIC LAMINATE (G) LAMINART #5107 COLOR: PEARL WHITE
Toekick: Recessed white Carrara marble 4" height.

ELEVATOR FINISHES

DOOR FINISH TO BE: BAKED ENAMEL, COLOR: SINCLAIR CM8450.
INTERIOR CAB WALLS TO BE: (H) DESIGNTEX STONEWALL II, #6274-801
INTERIOR EXPOSED HAND RAIL TO BE: SATIN CHROME

NOTES (cont.)

20. PAINT TEXTURE AT LOBBY AND BREAK ROOM TO BE SMOOTH, ALL OTHER AREAS SEE ARCHITECTURAL DRAWINGS FOR SPECIFICATIONS. PROVIDE TEXTURE SAMPLE TO AMBIANCE ASSOC. FOR APPROVAL.
21. WALLS AT ALL AREAS DESIGNATED TO RECEIVE WALLCOVERING TO BE PLIPPED.
22. PROVIDE SAMPLE OF ALL FINISH MATERIALS TO AMBIANCE ASSOC. FOR APPROVAL PRIOR TO PLACEMENT OF ORDERS.
23. CABINETS N.I.C. IN ROOM 2201 TO RECEIVE PLASTIC LAMINATE AS SPECIFIED ON FINISH DWGS.
24. PROVIDE VINYL TRANSITION STRIP WHERE CARPET MEETS VCT. COLOR TO BE: CHARCOAL OR BLACK SUBMIT SAMPLE FOR APPROVAL.
25. ALL SWITCHPLATES & DUPLEX RECEPPACLES TO BE: COLOR: WHITE

San Jose, CA 95110

ATTN: Warren Trester
REF: COMPRESSION LABS, INC. 86-74
SUBJ: Building Permit

Gentlemen:

This will confirm our agreement concerning issuance of building permit at 2860 Junction Ave. for the Compression Labs, Inc. interior improvements. It is understood that San Jose Construction will not proceed on any work requiring Planning Department approval for this project, and that forthcoming planning comments will be complied with and completed as part of the building permit.

We appreciate your cooperation.

Very truly yours,

Re: Interior Improvements For
Compression Labs, Inc.
Junction Ave.
VCW&A Job #861215

The following is a response to your plan check comment regarding health department clearance for the food service area at the second floor lunch room.

The tenant, Compression Labs, Inc. has not yet contracted with an independent food service company to supply the necessary equipment and personnel to provide this service.

Since the equipment is a part of the health department review and clearance process, we request that the health department clearance not be a part of this building permit.

This office has informed Compression Labs that their food service vendor will have to obtain the required clearances and permits prior to the operation of the food service area at the lunch room.

SHOP DRAWING REVIEW

☒ NO EXCEPTION TAKEN ☐ MAKE CORRECTIONS NOTED

☐ REJECTED ☐ SUBMIT

Corrections or comments made on the shop drawings during this review do not relieve [illegible] from compliance with requirements of the drawings and specifications. This review is only for conformance with the design concept of the project and general compliance with the information given in the Contract Documents. The contractor is responsible for dimensions, quantities and dimensions; data to be confirmed at the site; fabrication processes and techniques of construction; coordination of his work with that of all other trades; and performing his work in a safe and satisfactory manner.

The Following Corrections Shall Be Made:

SHEET	CODE/SECTION	NO.	
	SJFC/ 10.301(g) SJFC 10.309	4	Alter sprinkler system as necessitated by new partitions, floors and ceilings. Design SJFC shall be adequate for intended use and must conform to the most recent NFPA Pamphlet 13. Alteration of sprinkler system plans are to be submitted by the installing contractor to this office for approval and permit. Alteration to existing systems that raise the total number of automatic sprinkler heads to 100 or more requires the system to be supervised by a remote station alarm. No final or permit will be issued until all systems are tested and operational. Appointments will be made by automatic sprinkler company ONLY.
			REQUIREMENTS FOR COMPUTER CENTER RAISED FLOOR:
	NFPA 13 4-4.4	5	Structural floor supports must be noncombustible, any wood for deck assembly must be pressure impregnated, flame retardant treated to produce a flame spread of 25 feet or less.
	NFPA 13 4-4.4	6	Maintain sprinkler system in computer room.
	NFPA 13 4-4.4	7	If rated or teflon jacketed cables used in conjunction with noncombustible construction - no protection required. If cables are not rated or telfon jacketed, and concealed space is higher than 6", extend sprinkler system to area beneath floor.
	UBC/3312(a)	8	Exits shall be illuminated at any time the building is occupied with a light having an intensity of not less than one foot candle at floor level.
	UBC/3312(b)	9	Exit signs shall be posted above each required exit doorway and wherever otherwise required to clearly indicate the direction of egress.
	UBC/3312(c)	10	Exit signs and exit illumination shall be supplied by two separate circuits, one of which shall be separated from all other circuits in the building and independently controlled, or provide self-illuminating exit signs approved by a recognized agency.
	UBC/3312(c)	11	Electrically Illuminated Signs. Exit and exit directional signs which are required to be electrically illuminated shall be lighted with two electric lamps of not less than 15 watts.

Date: March 30, 1987

The Following Corrections Shall Be Made:

SHEET	CODE/SECTION	NO.	
	SJFC/ 10.301(g) SJFC 10.309	6	Alter sprinkler system as necessitated by new partitions, floors and ceilings. Design SJFC shall be adequate for intended use and must conform to the most recent NFPA Pamphlet 13. Alteration of sprinkler system plans are to be submitted by the installing contractor to this office for approval and permit. Alteration to existing systems that raise the total number of automatic sprinkler heads to 100 or more requires the system to be supervised by a remote station alarm. No final or permit will be issued until all systems are tested and operational. Appointments will be made by automatic sprinkler company ONLY.
	NOTE:	7	This building is approved for a Group B-2 type occupancy ONLY. Use or storage of hazardous materials, liquids, gases and/or chemicals is not approved. See Table 9A of UBC for exempt amounts subject to regulations of Fire Prevention Code. Submit names and amounts of any hazardous material mentioned above to this office for approval. If amounts exceed the amounts noted in Table 9A additional requirements shall be applicable.
	UBC/4204	8	The maximum flame-spread classification of finish materials used on interior walls and ceilings shall not exceed that set forth in Table No. 42-B.
	UBC/1002	9	Wiring in plenums shall comply with the Electrical Code.

Architect/Engineer: Banducci Associates License No.:

Mailing Address: 2160 Landy Ave, San Jose Ca 95131

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Business License: 019944 CA License: 493386 Class: B-1

Termite Operator No.: Registered Company No.:

Contractor's Signature: Date: 1-7-98

OWNER-BUILDER DECLARATION

Section 7031.5 I hereby affirm under penalty of perjury that I am exempt from the Contractors License Laws for the following reason (Sec. 7031.5). Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).).

☐ Section 7044 I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he/she did not build or improve for the purpose of sale).

☐ Section 7044 I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor License Law):

[redacted] I am exempt under Sec. _____, Business and Professions Code for this reason:

[redacted]

WORKER'S COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a Certificate of Consent to self-insure for Worker's Compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain Worker's Compensation Insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My Worker's Compensation Insurance carrier and Policy number are:

Carrier SIGNA [redacted] Policy No. WC/G2943523

(THIS SECTION NEED NOT BE COMPLETED IF THE PERMIT IS FOR ONE HUNDRED DOLLARS ($100) OR LESS)

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California, and agree that if I should become subject to the Worker's Compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

[redacted]

NOTE: WARNING: FAILURE TO SECURE WORKER'S COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name:

Lender's Address:

CERTIFICATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Business License: 108235 CA License: 6867423 Class: C-10

Termite Operator No.: _____ Registered Company No.: _____

Contractor's Signature: Michael Cole Date: 3/26/98

OWNER-BUILDER DECLARATION

Section 7031.5 I hereby affirm under penalty of perjury that I am exempt from the Contractors License Laws for the following reason (Sec. 7031.5), Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundered dollars ($500).).

☐ Section 7044 I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he/she did not build or improve for the purpose of sale).

☐ Section 7044 I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or umproves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor License Law):

☐ I am exempt under Sec. _____, Business and Professions Code for this reason:

_____

Owner: _____ Date: _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a Certificate of Consent to self-insure for Worker's Compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☒ I have and will maintain Worker's Compensation Insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My Worker's Compensation Insurance carrier and Policy number are:

Carrier: Farmers Policy No.: 4191139803

(THIS SECTION NEED NOT BE COMPLETED IF THE PERMIT IS FOR ONE HUNDRED DOLLARS ($100) OR LESS)

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California, and agree that if I should become subject to the Worker's Compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: _____ Applicant: _____

NOTE: WARNING: FAILURE TO SECURE WORKER'S COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,00), IN ADDTION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name: _____

Lender's Address: _____

CERTIFICATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

Application for Permits

WHEN THE PERMIT ON THE BACK SIDE IS PROPERLY FILLED OUT AND SIGNED THIS WILL BE YOUR APPLICATION FOR A PERMIT.

APPLICANT MUST ACKNOWLEDGE READING BY SIGNING BELOW. THIS PERMIT WILL EXPIRE IF WORK IS NOT STARTED IN 180 DAYS FROM THE DATE OF ISSUANCE AND IF SUBSTANTIAL PROGRESS HAS NOT BEEN MADE AND VERIFIED BY AN INSPECTION EVERY 180 DAYS. DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED AND WRITTEN APPROVAL HAS BEEN DOCUMENTED ON THE APPLICANT'S COPY OF THIS PERMIT. THE ISSUANCE OF A PERMIT SHALL NOT CONSTITUTE AN APPROVAL OF ANY VIOLATION OF THE CODES OR FEDERAL, STATE AND CITY LAWS AND ORDINANCES. ANY PERMIT PRESUMING TO GIVE AUTHORITY TO VIOLATIONS OF THE CODES OR FEDERAL, STATE AND CITY LAWS AND ORDINANCES WILL BE INVALID. CITY CODES DO NOT EXEMPT YOU FROM COMPLIANCE WITH ANY DEED RESTRICTIONS OR RESTRICTIONS OF YOUR HOMEOWNERS ASSOCIATION. THESE RESTRICTIONS MAY LIMIT OR PROHIBIT WHAT YOU MAY WISH TO DO ON YOUR PROPERTY.

Application for Permits

WHEN THE PERMIT ON THE BACK SIDE IS PROPERLY FILLED OUT AND SIGNED THIS WILL BE YOUR APPLICATION FOR A PERMIT

APPLICANT MUST ACKNOWLEDGE READING BY SIGNING BELOW.
THIS PERMIT WILL EXPIRE IF WORK IS NOT STARTED IN 180 DAYS FROM THE DATE OF ISSUANCE AND IF SUBSTANTIAL PROGRESS HAS NOT BEEN MADE AND VERIFIED BY AN INSPECTION EVERY 180 DAYS. DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED AND WRITTEN APPROVAL HAS BEEN DOCUMENTED ON THE APPLICANT'S COPY OF THIS PERMIT. THE ISSUANCE OF A PERMIT SHALL NOT CONSTITUTE AN APPROVAL OF ANY VIOLATION OF THE CODES OR FEDERAL, STATE AND CITY LAWS AND ORDINANCES. ANY PERMIT PRESUMING TO GIVE AUTHORITY TO VIOLATIONS OF THE CODES OR FEDERAL, STATE AND CITY LAWS AND ORDINANCES WILL BE INVALID. CITY CODES DO NOT EXEMPT YOU FROM COMPLIANCE WITH ANY DEED RESTRICTIONS OR RESTRICTIONS OF YOUR HOMEOWNERS ASSOCIATION. THESE RESTRICTIONS MAY LIMIT OR PROHIBIT WHAT YOU MAY WISH TO DO ON YOUR PROPERTY.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Business License: 493386 CA License: 493386 Class: B

Termite Operator No.: _____ Registered Company No.: _____

Contractor's Signature: Michael McCollum Date: 3-31-97

OWNER-BUILDER DECLARATION

Section 7031.5 I hereby affirm under penalty of perjury that I am exempt from the Contractors License Laws for the following reason (Sec. 7031.5). Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).).

☐ Section 7044 I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he/she did not build or improve for the purpose of sale).

☐ Section 7044 I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor License Law).

☐ I am exempt under Sec. _____, Business and Professions Code for this reason:

Owner: _____ Date: _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a Certificate of Consent to self-insure for Worker's Compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☑ I have and will maintain Worker's Compensation Insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My Worker's Compensation Insurance carrier and Policy number are:

Carrier: STATE FUND Policy No.: 04G 97 UNIT 0006 998

1/1/98

(THIS SECTION NEED NOT BE COMPLETED IF THE PERMIT IS FOR ONE HUNDRED DOLLARS ($100) OR LESS)

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California, and agree that if I should become subject to the Worker's Compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: _____ Applicant: _____

NOTE: WARNING: FAILURE TO SECURE WORKER'S COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name: _____

Lender's Address: _____

CERTIFICATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

Message: Mike,

The only change since the 10/99 updated is the general dyesheet which I faxed in January '00. I am faxing the general dyesheet now also. There will be several changes to the inventory in the next 2 months & I will update the HMMP in it's entirety & resend it at that time. Thanks. for all your help. Cheri Able

Important Note:

- This permit application or approved permit will expire after 180 days of inactivity.
- Plans submitted with this application must be approved by the Fire Department before work can begin.
- A final inspection approving the project must be conducted before the system may be placed into service, or considered closed.
- Call the Hazardous Materials Division at least 48 hours in advance to schedule an inspection.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State license Law as contained in the business and Professions Code, Division 3, Chapter 9. If there is any change, which would materially affect the above information or plans submitted, I will notify the Bureau of Fire Prevention.

Regarding: Repipe of Two (2) Existing Solvent Pumping Systems

Scope of Work

1. The work can generally be described as removing the existing piping of two solvent piping systems: one at 3050 Zanker Road and the other at 2880 Junction Avenue, then repiping them with double-contained SS and test for City of San Jose.
2. The pumping systems are existing and in service. Therefore, the repiping, testing and inspection shall be strategically scheduled.

Physical Address	2880 Junction Avenue San Jose, CA 95134
Mailing Address	3050 Zanker Road San Jose, CA 95134

Site Description

DRAFT

The Ultratech facility located at 2880 Junction Avenue, San Jose is a two-story, approximately 79,800 square foot structure built in 1985. A location map and an aerial of the building are attached. Ultratech leases the first floor, which includes office and meeting spaces, a training facility, development and testing labs, a demonstration lab, and an employee cafeteria. Two drawings attached showing the layout of the first floor and the section of the building containing the labs and chemical storage areas. Chemicals are stored in a secured hazardous materials storage room. The covered outdoor facilities equipment pad houses support equipment for the building including: house chillers, de-ionized water production, bulk liquid nitrogen storage, and the Industrial Waste Neutralization System (IWN). A detailed drawing of this area is attached.

Closure Activities

Meade Construction will be the general contractor overseeing the closure activities. Decontamination activities will be performed by AllChem.

Meade Construction Group, Inc.
645 River Oaks Parkway

Vice President - Aaron Phillips
Operation Manager - Mark Navratil

Offices Meeting Rooms and Training Facilities

No chemicals were allowed in offices or meeting rooms. Isopropyl alcohol was used in the Training Area for occasional cleaning of sensitive equipment. Isopropyl alcohol was dispensed in 16 oz. plastic laboratory squeeze bottles, stored in either laboratory secondary containment or approved flammable storage cabinets. Isopropyl Alcohol is very volatile and leaves no residue. No other hazardous materials were used in this area so there is no need for decontamination or testing.

Applications Lab

The majority of the hazardous materials use occurred in the Applications Lab. Chemicals included the periodic use of photo resists, photo developers, photo resist strippers, isopropyl alcohol, and acetone (see attached Hazardous Materials Business Plan). All photo processing chemicals were used under laboratory hoods or within ventilated process equipment exhausted through ducts to the rooftop. The exhaust system ductwork will be removed, consolidated and packaged as hazardous waste. The exhaust fan(s) will be dismantled with the squirrel cage or parts exposed to exhaust consolidated, packaged and disposed of as hazardous waste. The remaining debris may be handled as recycled metals.

Waste photo resist and photo resist strippers drained to a collection system located in a chase area adjacent to the Applications Lab. Waste photo developer drained to the IWN for pH neutralization prior to discharge to the sanitary sewer. Approximately 100 lineal feet of the secondarily contained caustic waste water line will be removed and disposed of as hazardous waste. The wastewater line is comprised of a 3-inch diameter primary inner line with a 5-inch diameter outer secondary containment line. The demolished debris will be collected into a UN/DOT rated container.

DRAFT

Demonstration Lab

Isopropyl alcohol was used in the Demonstration Lab for the occasional cleaning of sensitive equipment. Isopropyl alcohol was dispensed in 16 oz. plastic laboratory squeeze bottles and stored in either laboratory secondary containment or approved flammable storage cabinets. Isopropyl Alcohol is very volatile and leaves no residue. No other hazardous materials were used in this area so there is no need for decontamination or testing.

Chemical Storage Room

All hazardous wastes not sent to the IWN were collected in the facility's indoor Chemical Storage Room or the Applications Lab Chase Area. All hazardous materials were relocated to Ultratech's adjacent facility at 3050 Zanker Road, San Jose for storage in the outdoor chemical storage bunker or use in various process areas. All hazardous wastes were manifested and disposed of at an approved waste disposal site.

Laser Development Lab

No chemicals were used in this area so there is no need for decontamination or testing.

Facilities Equipment Pad

There are several facility related pieces of equipment that will be removed as part of the closure. A detailed drawing of this area is attached.

Industrial Waste Neutralization (IWN) System

The system consists of a two-phase plastic mixing chamber and a final pH balancing chamber. There are two primary supply tanks containing water treatment chemicals, a 30 gallon 50% sulfuric acid tank and a 55 gallon 30% sodium hydroxide tank. Any remaining reagent chemicals will be pumped into UN/DOT rated containers to be manifested and disposed of as hazardous waste. The four reagent pumps will be flushed and the water sent to the sanitary sewer if it meets permit requirements. Any liquid remaining in the IWN treatment chambers will be flushed to the sanitary sewer. The IWN will be dismantled and the debris placed in UN/DOT rated containers. All UN/DOT containers containing chemicals and contaminated debris will be properly labeled, manifested and disposed of as hazardous waste. All non-hazardous debris will be left onsite for disposal by Meade Construction Group.

Liquid Nitrogen Tank

The 1000-pound liquid nitrogen tank is leased from Air Gas. The vendor will remove the tank. The associated facility piping will remain in place for use by a future tenant.

De-ionized (DI) Water System

The DI water system is leased and will be removed by the vendor.

DRAFT

Sampling Activities

Chemical usage and storage in Building 2 was limited. The chemicals used did not contain metals or fluorides. The only residual issue associated with the facility might be pH. Facility decontamination will be verified using field pH sampling. If the pH in a given area is less than 5 or greater than 10 the area will be decontaminated again until a pH of between 5 and 10 is achieved.

Chemicals were used under laboratory hoods in the Applications Lab. Chemicals and some of the wastes not treated in the IWN system were stored in the chase area adjacent to the lab. A minimum of five floor field samples will be taken in the Applications Lab. Three floor field samples will be taken in the chase adjacent to the lab.

The chemical storage room also contained all chemicals and some of the hazardous wastes not sent to the IWN. This is a small space so a minimum of five floor field samples will be taken.

The IWN containment area may have been exposed to acidic or caustic chemicals. The surface of the secondary containment will be examined for cracks or other indications of compromised integrity after the treatment equipment is removed. A minimum of five field pH samples will be taken within the containment area. If the pH is less than 5 or greater than 10 the area will be decontaminated again until a pH of between 5 and 10 is achieved.

Waste Disposal

Both hazardous and non-hazardous wastes may be generated during the course of this closure. Ultratech intends to use the following hazardous waste transporter:

All Chemical Disposal
21 Great Oaks Boulevard
San Jose, CA 95119
Hazardous Waste Transporter Registration # 2914
Hazardous Materials Certificate of Registration # 061002011 003KM
DMV Motor Carrier Permit # 0073998
Hazardous Materials Transportation License # 124235
(408) 363-1660

DRAFT

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☒ Horns/Sirens; ☐ Verbal *(i.e., shouting)*; ☐ Other *(specify* _____

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance ..... Phone No.: **911**

State Office of Emergency Services ..... Phone No.: **(800) 852-7550**

b. Post-Incident Contacts*:

Certified Unified Program Agency (CUPA) ..... Phone No.: **(408) 277-4659**

Local Hazardous Materials Program ..... Phone No.: **(408) 918-3400**

California EPA Department of Toxic Substances Control ..... Phone No.: **(510) 540-3739**

Cal-OSHA Division of Occupational Safety and Health ..... Phone No.: **(408) 452-7288**

Air Quality Management District ..... Phone No.: **(415) 771-6000**

Regional Water Quality Control Board ..... Phone No.: **(510) 622-2300**

*** Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.**

c. Emergency Resources:

Poison Control Center* ..... Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **O'Conner Hospital** Phone No.: **(408) 947-2500**

Address: **2105 Forrest Avenue** City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

Emergency chemical spill response through A.C.T., (408) 548-5050

DRAFT

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the State Office of Emergency Services at 1-800-852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

DRAFT

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(c)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats		
	☒ Chemical Protective Boots	13	Several sets of heavy duty boots
	☒ Chemical Protective Gloves	13	Several types of chemical gloves
	☐ Chemical Protective Suits *(describe)*

Additional Equipment *(Use Additional Pages if Needed.)*	☐		
	☐		
	☐		
	☐		
	☐		
	☐		

* *Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

DRAFT

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☒	Emergency incident reporting
☒	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Plan
☒	Facility evacuation drills, that are conducted at least *(specify)*: Annually *(e.g., "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

DRAFT

☐	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e., inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

☐	Personnel rescue procedures
☒	Shutdown of operations
☒	Liaison with responding agencies
☒	Use, maintenance, and replacement of emergency response equipment
☒	Refresher training, which is provided at least annually *
☒	Emergency response drills, which are conducted at least *(specify)*: Annually *(e.g., "Quarterly", etc.)*

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e., written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☐	Record of hazardous waste tank daily inspections *
☒	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

DRAFT

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *[Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at* **www.unidocs.org***), you do not need to attach a copy.]*

Check the appropriate box:

☐	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☒	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

DRAFT

Type of Work: Aboveground Tank/Piping System Removal

PLAN CHECK STATUS – APPROVED

Plans are approved with the following requirements:

1. **For the closure or removal of an Aboveground Tank and associated piping that contained a hazardous material/hazardous waste:**

    a) **Schedule a final tank/piping closure inspection to verify that all hazardous materials/wastes have been removed from the tank and piping and to determine whether any sampling will need to be performed.**
    b) **Submit copies of hazardous waste manifests which demonstrate the final deposition of the Industrial Waste Neutralization system.**
    c) **Contact the Santa Clara County Health Department's Hazardous Compliance Division at (408) 918-3400 regarding the closure of the Industrial Waste Treatment system.**

Inspection Scheduling: To schedule an inspection, please call 408-535-3555. When you hear the pre-recorded message, press "0" and the next available operator will take your inspection request. Please be prepared to provide the following information in order to effectively complete the process:

1. Provide the Permit Number (above) for the inspections on this permit.
2. Indicate the date you would like the inspection to occur, regardless of when the next best is available.
3. Provide a reasonable time estimate for the inspection to be conducted. Additional time may be needed and purchased to schedule for a complete inspection
4. Request a Final Inspection only when all other listed permit inspections have been scheduled/passed.
5. If this permit is the last open Hazardous Materials System Permit of the related Building Permit, and you are requesting a Final Inspection, then schedule that Haz Mat FDIC Final at the same time

Site Description

DRAFT

The Ultratech facility located at 2880 Junction Avenue, San Jose is a two-story, approximately 79,800 square foot structure built in 1985. A location map and an aerial of the building are attached. Ultratech leases the first floor, which includes office and meeting spaces, a training facility, development and testing labs, a demonstration lab, and an employee cafeteria. Two drawings attached showing the layout of the first floor and the section of the building containing the labs and chemical storage areas. Chemicals are stored in a secured hazardous materials storage room. The covered outdoor facilities equipment pad houses support equipment for the building including: house chillers, de-ionized water production, bulk liquid nitrogen storage, and the Industrial Waste Neutralization System (IWN). A detailed drawing of this area is attached.

Closure Activities

Meade Construction will be the general contractor overseeing the closure activities. Decontamination activities will be performed by AllChem.

Offices Meeting Rooms and Training Facilities

No chemicals were allowed in offices or meeting rooms. Isopropyl alcohol was used in the Training Area for occasional cleaning of sensitive equipment. Isopropyl alcohol was dispensed in 16 oz. plastic laboratory squeeze bottles, stored in either laboratory secondary containment or approved flammable storage cabinets. Isopropyl Alcohol is very volatile and leaves no residue. No other hazardous materials were used in this area so there is no need for decontamination or testing.

Applications Lab

The majority of the hazardous materials use occurred in the Applications Lab. Chemicals included the periodic use of photo resists, photo developers, photo resist strippers, isopropyl alcohol, and acetone (see attached Hazardous Materials Business Plan). All photo processing chemicals were used under laboratory hoods or within ventilated process equipment exhausted through ducts to the rooftop. The exhaust system ductwork will be removed, consolidated and packaged as hazardous waste. The exhaust fan(s) will be dismantled with the squirrel cage or parts exposed to exhaust consolidated, packaged and disposed of as hazardous waste. The remaining debris may be handled as recycled metals.

Waste photo resist and photo resist strippers drained to a collection system located in a chase area adjacent to the Applications Lab. Waste photo developer drained to the IWN for pH neutralization prior to discharge to the sanitary sewer. Approximately 100 lineal feet of the secondarily contained caustic waste water line will be removed and disposed of as hazardous waste. The wastewater line is comprised of a 3-inch diameter primary inner line with a 5-inch diameter outer secondary containment line. The demolished debris will be collected into a UN/DOT rated container.

DRAFT

Demonstration Lab

Isopropyl alcohol was used in the Demonstration Lab for the occasional cleaning of sensitive equipment. Isopropyl alcohol was dispensed in 16 oz. plastic laboratory squeeze bottles and stored in either laboratory secondary containment or approved flammable storage cabinets. Isopropyl Alcohol is very volatile and leaves no residue. No other hazardous materials were used in this area so there is no need for decontamination or testing.

Chemical Storage Room

All hazardous wastes not sent to the IWN were collected in the facility's indoor Chemical Storage Room or the Applications Lab Chase Area. All hazardous materials were relocated to Ultratech's adjacent facility at 3050 Zanker Road, San Jose for storage in the outdoor chemical storage bunker or use in various process areas. All hazardous wastes were manifested and disposed of at an approved waste disposal site.

Laser Development Lab

No chemicals were used in this area so there is no need for decontamination or testing.

Facilities Equipment Pad

There are several facility related pieces of equipment that will be removed as part of the closure. A detailed drawing of this area is attached.

Industrial Waste Neutralization (IWN) System

The system consists of a two-phase plastic mixing chamber and a final pH balancing chamber. There are two primary supply tanks containing water treatment chemicals, a 30 gallon 50% sulfuric acid tank and a 55 gallon 30% sodium hydroxide tank. Any remaining reagent chemicals will be pumped into UN/DOT rated containers to be manifested and disposed of as hazardous waste. The four reagent pumps will be flushed and the water sent to the sanitary sewer if it meets permit requirements. Any liquid remaining in the IWN treatment chambers will be flushed to the sanitary sewer. The IWN will be dismantled and the debris placed in UN/DOT rated containers. All UN/DOT containers containing chemicals and contaminated debris will be properly labeled, manifested and disposed of as hazardous waste. All non-hazardous debris will be left onsite for disposal by Meade Construction Group.

Liquid Nitrogen Tank

The 1000-pound liquid nitrogen tank is leased from Air Gas. The vendor will remove the tank. The associated facility piping will remain in place for use by a future tenant.

De-ionized (DI) Water System

The DI water system is leased and will be removed by the vendor.

DRAFT

Sampling Activities

Chemical usage and storage in Building 2 was limited. The chemicals used did not contain metals or fluorides. The only residual issue associated with the facility might be pH. Facility decontamination will be verified using field pH sampling. If the pH in a given area is less than 5 or greater than 10 the area will be decontaminated again until a pH of between 5 and 10 is achieved.

Chemicals were used under laboratory hoods in the Applications Lab. Chemicals and some of the wastes not treated in the IWN system were stored in the chase area adjacent to the lab. A minimum of five floor field samples will be taken in the Applications Lab. Three floor field samples will be taken in the chase adjacent to the lab.

The chemical storage room also contained all chemicals and some of the hazardous wastes not sent to the IWN. This is a small space so a minimum of five floor field samples will be taken.

The IWN containment area may have been exposed to acidic or caustic chemicals. The surface of the secondary containment will be examined for cracks or other indications of compromised integrity after the treatment equipment is removed. A minimum of five field pH samples will be taken within the containment area. If the pH is less than 5 or greater than 10 the area will be decontaminated again until a pH of between 5 and 10 is achieved.

Waste Disposal

Both hazardous and non-hazardous wastes may be generated during the course of this closure. Ultratech intends to use the following hazardous waste transporter:

All Chemical Disposal
21 Great Oaks Boulevard
San Jose, CA 95119
Hazardous Waste Transporter Registration # 2914
Hazardous Materials Certificate of Registration # 061002011 003KM
DMV Motor Carrier Permit # 0073998

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☒ Horns/Sirens; ☐ Verbal *(i.e., shouting)*; ☐ Other *(specify)* _____

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance ..... Phone No.: **911**

State Office of Emergency Services ..... Phone No.: **(800) 852-7550**

b. Post-Incident Contacts*:

Certified Unified Program Agency (CUPA) ..... Phone No.: **(408) 277-4659**

Local Hazardous Materials Program ..... Phone No.: **(408) 918-3400**

California EPA Department of Toxic Substances Control ..... Phone No.: **(510) 540-3739**

Cal-OSHA Division of Occupational Safety and Health ..... Phone No.: **(408) 452-7288**

Air Quality Management District ..... Phone No.: **(415) 771-6000**

Regional Water Quality Control Board ..... Phone No.: **(510) 622-2300**

*** Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.**

c. Emergency Resources:

Poison Control Center* ..... Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **O'Conner Hospital** Phone No.: **(408) 947-2500**

Address: **2105 Forrest Avenue** City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

Emergency chemical spill response through A.C.T., (408) 548-5050

DRAFT

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the State Office of Emergency Services at 1-800-852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

DRAFT

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(c)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. Personnel are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☒	Emergency incident reporting
☒	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Plan
☒	Facility evacuation drills, that are conducted at least *(specify)*: Annually *(e.g., "Quarterly", etc.)*

2. Chemical Handlers are additionally trained in the following:

☐	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e., inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

DRAFT

3. Emergency Response Team Members are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

☐	Personnel rescue procedures
☒	Shutdown of operations
☒	Liaison with responding agencies
☒	Use, maintenance, and replacement of emergency response equipment
☒	Refresher training, which is provided at least annually *
☒	Emergency response drills, which are conducted at least *(specify)*: Annually *(e.g., "Quarterly", etc.)*

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e., written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☐	Record of hazardous waste tank daily inspections *
☒	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

DRAFT

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *[Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at* **www.unidocs.org***), you do not need to attach a copy.]*

Check the appropriate box:

☐	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☒	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

RE: Closure Permit Application
Ultratech Inc.
2880 Junction Avenue, San Jose, CA

Dear Mr. Randolph:

Ultratech will be closing their facility located at 2880 Junction Avenue, San Jose. The closure permit applications, plan and fees in the amount of $848.40 are enclosed. Meade Construction Group, Inc. is the general contractor overseeing the closure. Closure activities are expected to begin in late December or early January. We will let you know once activities begin.

DRAFT

If you need additional information or have any questions on this Closure Plan please contact me at (650) 868-7120 or by email at EddieP@meadegroup.biz.

Sincerely,

Eddie Parenti

2. Closure Information:

☑ Full Facility Closure ☐ Partial Facility Closure/Remodel Proposed Date of Closure: 12 / 31 / 2009.

Briefly describe the proposed closure activity. Indicate the previous use(s) of the area(s) intended to be closed and the types of chemicals used or stored in the area(s) (i.e. by submitting a copy of the Inventory Statements from your Hazardous Materials Business Plan, etc.). Include equipment, tanks, piping, exhaust and treatment systems, and the proposed final disposition of any hazardous materials and/or wastes. Attach additional pages if necessary.

See attached Closure Plan

ATTENTION APPLICANT:

This permit is valid for 180 days from the date of issue or last activity. This permit is being issued pursuant to the requirements specified on the attached San Jose Fire Department Plan Check. It is your responsibility to post this document conspicuously at the job site. You are to have an approved set of plans and San Jose Fire Department Plan Check Directive available for review at the job site. **Inspections may be scheduled by calling (408) 535-3555.**

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State License Law as contained in the Business & Professions Code, Division 3, Chapter 9. If there is any change, which would materially affect the above information or plans submitted, I will notify the Bureau of Fire Prevention.

Subject: Ultratech Building 2 Closure - Plan Checker questions

Hi Mike,
Listed below are your questions and responses.
Thanks,
Eddie

1. You recall that there was SS piping with flammable gases/liquids into the Bldg 2 Apps Lab Chase. The only SS piping was stripper waste pipping and pump assembly which was relocated to B1.
2. You recall there was waste acetone piping in the same area. Same piping as item 1
3. You would like to know the corrosive liquid concentration for the caustic waste piping in the Apps Lab. It is the same as what we submitted for Building 1 construction so I would have to look that up

Site Description

DRAFT

The Ultratech facility located at 2880 Junction Avenue, San Jose is a two-story, approximately 79,800 square foot structure built in 1985. A location map and an aerial of the building are attached. Ultratech leases the first floor, which includes office and meeting spaces, a training facility, development and testing labs, a demonstration lab, and an employee cafeteria. Two drawings attached showing the layout of the first floor and the section of the building containing the labs and chemical storage areas. Chemicals are stored in a secured hazardous materials storage room. The covered outdoor facilities equipment pad houses support equipment for the building including: house chillers, de-ionized water production, bulk liquid nitrogen storage, and the Industrial Waste Neutralization System (IWN). A detailed drawing of this area is attached.

Closure Activities

Meade Construction will be the general contractor overseeing the closure activities. Decontamination activities will be performed by AllChem.

Meade Construction Group, Inc.

Fax (408) 363-3587
Vice President - Aaron Phillips
Operation Manager - Mark Navratil

Offices Meeting Rooms and Training Facilities

No chemicals were allowed in offices or meeting rooms. Isopropyl alcohol was used in the Training Area for occasional cleaning of sensitive equipment. Isopropyl alcohol was dispensed in 16 oz. plastic laboratory squeeze bottles, stored in either laboratory secondary containment or approved flammable storage cabinets. Isopropyl Alcohol is very volatile and leaves no residue. No other hazardous materials were used in this area so there is no need for decontamination or testing.

Applications Lab

The majority of the hazardous materials use occurred in the Applications Lab. Chemicals included the periodic use of photo resists, photo developers, photo resist strippers, isopropyl alcohol, and acetone (see attached Hazardous Materials Business Plan). All photo processing chemicals were used under laboratory hoods or within ventilated process equipment exhausted through ducts to the rooftop. The exhaust system ductwork will be removed, consolidated and packaged as hazardous waste. The exhaust fan(s) will be dismantled with the squirrel cage or parts exposed to exhaust consolidated, packaged and disposed of as hazardous waste. The remaining debris may be handled as recycled metals.

Waste photo resist and photo resist strippers drained to a collection system located in a chase area adjacent to the Applications Lab. Waste photo developer drained to the IWN for pH neutralization prior to discharge to the sanitary sewer. Approximately 100 lineal feet of the secondarily contained caustic waste water line will be removed and disposed of as hazardous waste. The wastewater line is comprised of a 3-inch diameter primary inner line with a 5-inch diameter outer secondary containment line. The demolished debris will be collected into a UN/DOT rated container.

DRAFT

Demonstration Lab

Isopropyl alcohol was used in the Demonstration Lab for the occasional cleaning of sensitive equipment. Isopropyl alcohol was dispensed in 16 oz. plastic laboratory squeeze bottles and stored in either laboratory secondary containment or approved flammable storage cabinets. Isopropyl Alcohol is very volatile and leaves no residue. No other hazardous materials were used in this area so there is no need for decontamination or testing.

Chemical Storage Room

All hazardous wastes not sent to the IWN were collected in the facility's indoor Chemical Storage Room or the Applications Lab Chase Area. All hazardous materials were relocated to Ultratech's adjacent facility at 3050 Zanker Road, San Jose for storage in the outdoor chemical storage bunker or use in various process areas. All hazardous wastes were manifested and disposed of at an approved waste disposal site.

Laser Development Lab

No chemicals were used in this area so there is no need for decontamination or testing.

Facilities Equipment Pad

There are several facility related pieces of equipment that will be removed as part of the closure. A detailed drawing of this area is attached.

Industrial Waste Neutralization (IWN) System

The system consists of a two-phase plastic mixing chamber and a final pH balancing chamber. There are two primary supply tanks containing water treatment chemicals, a 30 gallon 50% sulfuric acid tank and a 55 gallon 30% sodium hydroxide tank. Any remaining reagent chemicals will be pumped into UN/DOT rated containers to be manifested and disposed of as hazardous waste. The four reagent pumps will be flushed and the water sent to the sanitary sewer if it meets permit requirements. Any liquid remaining in the IWN treatment chambers will be flushed to the sanitary sewer. The IWN will be dismantled and the debris placed in UN/DOT rated containers. All UN/DOT containers containing chemicals and contaminated debris will be properly labeled, manifested and disposed of as hazardous waste. All non-hazardous debris will be left onsite for disposal by Meade Construction Group.

Liquid Nitrogen Tank

The 1000-pound liquid nitrogen tank is leased from Air Gas. The vendor will remove the tank. The associated facility piping will remain in place for use by a future tenant.

De-ionized (DI) Water System

The DI water system is leased and will be removed by the vendor.

DRAFT

Sampling Activities

Chemical usage and storage in Building 2 was limited. The chemicals used did not contain metals or fluorides. The only residual issue associated with the facility might be pH. Facility decontamination will be verified using field pH sampling. If the pH in a given area is less than 5 or greater than 10 the area will be decontaminated again until a pH of between 5 and 10 is achieved.

Chemicals were used under laboratory hoods in the Applications Lab. Chemicals and some of the wastes not treated in the IWN system were stored in the chase area adjacent to the lab. A minimum of five floor field samples will be taken in the Applications Lab. Three floor field samples will be taken in the chase adjacent to the lab.

The chemical storage room also contained all chemicals and some of the hazardous wastes not sent to the IWN. This is a small space so a minimum of five floor field samples will be taken.

The IWN containment area may have been exposed to acidic or caustic chemicals. The surface of the secondary containment will be examined for cracks or other indications of compromised integrity after the treatment equipment is removed. A minimum of five field pH samples will be taken within the containment area. If the pH is less than 5 or greater than 10 the area will be decontaminated again until a pH of between 5 and 10 is achieved.

Waste Disposal

Both hazardous and non-hazardous wastes may be generated during the course of this closure. Ultratech intends to use the following hazardous waste transporter:

All Chemical Disposal
21 Great Oaks Boulevard
San Jose, CA 95119
Hazardous Waste Transporter Registration # 2914
Hazardous Materials Certificate of Registration # 061002011 003KM
DMV Motor Carrier Permit # 0073998
Hazardous Materials Transportation License # 124235
(408) 363-1660

Unidocs

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☒ Horns/Sirens; ☐ Verbal *(i.e., shouting)*; ☐ Other *(specify* _____

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance ..... Phone No.: **911**

State Office of Emergency Services ..... Phone No.: **(800) 852-7550**

b. Post-Incident Contacts*:

Certified Unified Program Agency (CUPA) ..... Phone No.: **(408) 277-4659**

Local Hazardous Materials Program ..... Phone No.: **(408) 918-3400**

California EPA Department of Toxic Substances Control ..... Phone No.: **(510) 540-3739**

Cal-OSHA Division of Occupational Safety and Health ..... Phone No.: **(408) 452-7288**

Air Quality Management District ..... Phone No.: **(415) 771-6000**

Regional Water Quality Control Board ..... Phone No.: **(510) 622-2300**

*** Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.**

c. Emergency Resources:

Poison Control Center* ..... Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **O'Conner Hospital** Phone No.: **(408) 947-2500**

Address: **2105 Forrest Avenue** City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

Emergency chemical spill response through A.C.T., (408) 548-5050

DRAFT

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the State Office of Emergency Services at 1-800-852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

DRAFT

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(c)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. Personnel are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☒	Emergency incident reporting
☒	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Plan
☒	Facility evacuation drills, that are conducted at least *(specify)*: Annually *(e.g., "Quarterly", etc.)*

2. Chemical Handlers are additionally trained in the following:

☐	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e., inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

DRAFT

3. Emergency Response Team Members are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

☐	Personnel rescue procedures
☒	Shutdown of operations
☒	Liaison with responding agencies
☒	Use, maintenance, and replacement of emergency response equipment
☒	Refresher training, which is provided at least annually *
☒	Emergency response drills, which are conducted at least *(specify)*: Annually *(e.g., "Quarterly", etc.)*

Record Keeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e., written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☐	Record of hazardous waste tank daily inspections *
☒	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

DRAFT

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *[Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at* **www.unidocs.org***), you do not need to attach a copy.]*

Check the appropriate box:

☐	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☒	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

Ultratech

Post-Closure Report for Hazardous Materials Storage and Waste Treatment Operations 2880 Junction Avenue, San Jose, CA

DRAFT

Prepared for
Meade Construction Group, Inc.
645 River Oaks Parkway
San Jose, CA 95134

By
TGO Solutions
March 29, 2010

EXECUTIVE SUMMARY

Ultratech ceased all testing, demonstrations, and hazardous materials storage and use operations at its facility located at 2880 Junction Avenue in San Jose. Operations at the facility included customer and employee training, a laser development lab, an Applications Lab to test customer photolithography process requirements, and a Demonstration Lab for to demonstrate Laser Spike Annealing ("LSA") tools. A closure plan was submitted to the City of San Jose in December 2009 and closure activities began in early March 2010.

The initial phase addressed the relocation of the tools and lab equipment, removal or relocation of virgin chemicals and disposal of all 90-day hazardous waste generated prior to ceasing operations. After the equipment was relocated to the adjacent Ultratech facility at 350 Zanker Road (Building 1), the building surfaces, including floors were cleaned/decontaminated (as appropriate). Approximately 100 lineal feet of secondarily contained caustic waste water line was removed. All chemical exhaust formerly servicing wet benches, tools and chemical storage cabinets were removed along with the associated exhaust fans.

The tools and equipment were cleaned, as necessary, to allow relocation to Building 1. Hazardous wastewater generated up until the cessation of decontamination operations was treated and disposed of through the wastewater treatment system. All other waste generated was disposed of as hazardous waste by All Chemical Disposal, Inc. within the 90 day time limit. The final facility closure activities resulted in the decontamination of remaining surfaces (as necessary) so that no residual contamination remained on surfaces of the facility. There should be nothing present at the facility to cause a health risk to potentially exposed persons.

DRAFT

The facility is ready for return to the Landlord.

Ultratech, Inc.
Building 2 Post Closure Report

1.0 INTRODUCTION

Ultratech, Inc. retained Meade Construction Group, Inc. (Meade) as the general contractor to oversee the closure activities for their Building at 2880 Junction Avenue in San Jose (Building 2). Operations at the facility included customer and employee training, a laser development lab, an Applications Lab to test customer photolithography process requirements, and a Demonstration Lab to demonstrate Laser Spike Annealing ("LSA") tools. Meade retained TGO Solutions to provide environmental assistance with the closure activities and to prepare a Closure Plan and Post Closure Report.

A closure plan was submitted to the City of San Jose in December 2009 (Attachment A) and closure activities began in early March 2010. The closure plan addressed the removal of the exhaust ductwork, waste water lines and the Industrial Waste Neutralization System (IWN) in preparation for a full Facility Closure. Ultratech will ultimately vacate the facility and return it to the Landlord.

The closure scope of work included the following:

- The relocation of virgin chemicals for use in Building 1
- The relocation of laboratory equipment from Building 2 to Building 1. Copies of the permits for this phase of the closure are located in Attachment J.
- Removal of all chemical exhaust, including exhaust fans and ductwork, formerly servicing the laboratory
- Removal of the caustic water line and along with the Acid Waste Neutralization skid/equipment
- Return of the Liquid Nitrogen Tank (N_2) to the vendor and purge the gas lines back to the source then leave them in place.
- Removal of hazardous waste generated during decontamination activities

DRAFT

This Post Closure Report complies with all requirements of the Hazardous Materials Management Ordinance of the City of San Jose Municipal Code (Title 17, Building and Construction – Chapter 17.12 - City of San Jose Fire Code, Chapter 17.68 - Hazardous Materials Storage Permit) and those detailed in the Unidocs document UN032 Closure Guidelines For Aboveground Hazardous Materials Storage Facilities (5/17/00).

1.1 DOCUMENTATION

This Report documents the following Closure elements:

1.1.1 Facility Closure Facility - Full Closure

The facility closure plan (Attachment A) shall demonstrate that the hazardous materials which are stored, dispensed, handled or used in the facility will be transported, disposed, of or reused in a manner that eliminates the need for further maintenance and any threat to public health and safety. (SJFC 2701.5 and 2701.6.3)

a) State the capacity of the former vessels/receptacles which received, via piping, flammable/combustible wastes and waste acetone (Attachment B).

b) A pre-facility closure inspection must be performed to determine whether any other permits are required and to identify any possible problems or concerns including possible sampling (Attachment C).

c) A final facility closure inspection must be performed after all closure activities have been performed to verify that all hazardous materials/wastes have been removed from the site and to determine whether any sampling will need to be performed (Attachment D).

d) Submit a post facility closure report which includes copies of documentation (such as bills of lading, hazardous waste manifests, etc.) which demonstrate the final deposition of all hazardous materials and hazardous wastes previously stored or used at this site (Attachment E).

e) Contact the Santa Clara County Health Department's Hazardous Compliance Division at (408) 918-3400 regarding the closure of the Waste Treatment system (Attachment F).

1.1.2. Aboveground Tank/Piping System Removal

DRAFT

For the closure or removal of an Aboveground Tank and associated piping that contained a hazardous material:

a) Schedule a final tank/piping closure inspection should be performed to verify that all hazardous materials/wastes have been removed from the tank and piping and to determine whether any sampling will need to be performed (Attachment C).

b) Submit copies of hazardous waste manifests which demonstrate the final deposition of the Industrial Waste Neutralization system (Attachment E).

c) Contact the Santa Clara County Health Department's Hazardous Compliance Division at (408) 918-3400 regarding the closure of the Industrial Waste Treatment system (Attachment F).

Please note that there was no prior record of soil or groundwater contamination. Ultratech's chemical activities took place inside the building so no contamination was suspected. Therefore, this document is not required to be submitted to the Regional Water Quality Control Board or the Santa Clara Valley Water District.

In addition, this Post Closure report contains the following information to assist the San Jose Bureau of Fire Prevention, San Jose Fire Department Hazardous Materials Compliance Division in its review:

- A map showing the relative location of the facility;
- The site plan showing the overall building and areas involved in closure activities;
- A description of the sampling program including sample locations, constituents for which analysis was performed, and test methods employed.

1.2 PURPOSE

The purpose of this closure was to terminate the handling of hazardous materials and hazardous waste by Ultratech in the specified areas and systems at its Building 2 facility in a manner that:

1. Demonstrates that hazardous materials stored in the storage facilities were removed, disposed of, or neutralized in an appropriate manner; and
2. The facility is not contaminated as a result of the storage of hazardous materials.

This Post-Closure Report contains the names and addresses of the parties responsible for the closure application and closure plan. The responsible parties shall notify the fire marshal of any address change which occurs within one year of the effective date of the facility closure.

Due to the nature of the operations at Building 2, and the hazardous waste storage and treatment operations conducted in the closure area, the primary contaminants of concern were corrosives (with a pH of less than pH=5 or greater than pH=10).

To meet the facility closure requirements, this Post-Closure Report is being submitted to the San Jose San Jose Fire Department Hazardous Materials Compliance Division at the completion of the closure activities as detailed in the Closure Plan. This report meets the following requirements:

DRAFT

- Document confirming compliance with all items in the approved Closure Plan.
- Provide details of any modifications to the approved Closure Plan.
- Provide copies of all analytical reports, including:
  1. Laboratory tests performed with the test methods used or field sampling results;
  2. Completed sample chains-of-custody.
  3. A site plan showing sample locations and, if applicable, depths;
  4. A written description of sample collection and handling procedures;
- Confirm disposition of all hazardous materials, including virgin and waste products by providing copies of manifests, bills of sale, bills-of-lading and receipts, etc.

The determination of contaminants of concern for this Facility Closure was discussed in the Closure Plan.

2.0 CONFIRMATION OF COMPLIANCE WITH CLOSURE PLAN

The following subsections detail how Ultratech has complied with the procedures and goals of the Closure Plan.

2.1 SIZE AND TYPE OF FACILITY TO BE CLOSED

Ultratech Building 2 includes the building and a mechanical pad containing house chillers, de-ionized water production, bulk liquid nitrogen storage, and the Industrial Waste Neutralization System (IWN). The overall size of the two-story structure is approximately 79,800 square feet. A location map (Figure 1) and an aerial of the building (Figure 2) are attached.

Ultratech leased both floors of Building 2. Operations at the facility included customer and employee training facilities, a laser development lab, an Applications Lab to test customer photolithography process requirements, and a Demonstration Lab for demonstration of Laser Spike Annealing ("LSA") tools and an employee cafeteria. Chemical used in the building was restricted to specific areas of the first floor. Figure 3 shows the layout of the first floor. The section of the building containing the labs and chemical storage areas is shown in Figure 4. A drawing of the second floor is shown in Figure 5. Chemicals are stored in a secured hazardous materials storage room. The covered outdoor facilities equipment pad and the Industrial Waste Neutralization System (IWN) are shown in Figure 6.

DRAFT

2.2 CHEMICAL INVENTORY

The facility's Hazardous Materials Inventory Statement (HMIS), current at the beginning of closure activities, is provided in Attachment B.

2.3 CLOSURE CONTRACTORS

Meade was the general contractor to oversee the closure activities for Building 2. They provided oversight for the building decontamination and removal of general office and support equipment.

Meade Construction Group, Inc.
645 River Oaks Parkway
San Jose, CA 95134
Cell: (650) 868-7120
Work: (408) 321-6450
Fax: (408) 321-6455
Project Manager - Eddie Parenti

Decontamination and Hazardous Waste Disposal Contractor

All Chemical Disposal, Inc. provided decontamination services for the cleanrooms and the equipment in them. They also provided hazardous waste transportation and disposal. Their final decontamination activity report is in Attachment G. A manifest for the 25 cubic yard bin is in Attachment E.

All Chemical Disposal, Inc.
21 Great Oaks Blvd.

San Jose, CA 95119
Phone (408) 363-1660
Fax (408) 363-3587
Project Manager - Paul Dommert
Hazardous Waste Transporter Registration # 2914
Hazardous Materials Certificate of Registration # 061002011 003KM
DMV Motor Carrier Permit # 0073998
Hazardous Materials Transportation License # 124235

Metal Recycler

All Chemical Disposal removed the recyclable metal duct work from the Applications Lab . Meade transported the recyclable metals to Recycling Specialist Inc. The copy of their bills-of-sale is in Attachment E.

Recycling Specialist Inc.
1720 Old Bayshore Hwy
San Jose, CA 95112

RC - 3368

DRAFT

Liquid Nitrogen Tank

The 1000-pound liquid nitrogen tank was removed by Air Gas. The associated facility piping will remain in place for use by a future tenant.

Air Gas
441 Hobson Street,
San Jose, CA 95110
(408) 998-6390

2.4 DECONTAMINATION PROCEDURES BY AREA

The decontamination procedures for each area are discussed in this section. Table 1 lists the sample locations, sample identifications and sampling results. Photo documentation is provided in Attachment H.

Offices Meeting Rooms and Training Facilities

Chemicals of Concern – None

No chemicals were allowed in offices or meeting rooms. Isopropyl alcohol used in the Training Area was dispensed from 16 oz. plastic laboratory squeeze bottles, which were relocated to Building 1 for future use. No other hazardous materials were used in this area so there was no need for decontamination or testing.

Applications Lab

Chemicals of Concern – Corrosives

All photo processing chemicals were used under ventilated laboratory hoods exhausted through ducts to the rooftop. A drawing of the exhaust ducting is shown in Figure 7. The exhaust system ductwork was removed and field pH tested. The pH was within the acceptable of between pH=5 and pH=10.

Wipe sample were collected using ghost wipes from a 100 cm^2 surface. The samples were analyzed for VOC's by EPA method SW8260B. The wipe test results were all non-detect. The test results are shown in Attachment I. The stainless steel exhaust system ductwork and fans were sent to Recycling Specialist Inc. as recycled metals. The Bill-of-Sale is located in Attachment E.

Approximately 100 lineal feet of overhead, secondarily contained caustic waste water line was removed. The debris was collected in a 25 yard UN/DOT rated container, manifested and disposed of as hazardous waste. The manifest is located in Attachment E.

Demonstration Lab

Chemicals of Concern – None

Isopropyl alcohol used in the Demonstration Lab was dispensed from 16 oz. plastic laboratory squeeze bottles, which were relocated to Building 1 for future use. No other hazardous materials were used in this area so there was no need for decontamination or testing.

Chemical Storage Room

Chemicals of Concern – Corrosives and Flammables

All hazardous materials were relocated to Ultratech's adjacent Building1 by Ultratech's trained and qualified personnel. The hazardous wastes were consolidated with the Building 1 wastes, manifested and disposed of before the closure activities began.

The chemical storage cabinets were wiped down and moved to Building 1 for reuse. The janitorial department mopped the floors after they were decontaminated.

Laser Development Lab

Chemicals of Concern – None

No chemicals were used in this area so there is no need for decontamination or testing.

2.5 FACILITIES EQUIPMENT CLOSURES

Facility support equipment (e.g., CDA compressors, DI Water, etc.) will remain onsite. All equipment were visually inspected and did not require decontamination. There were two (2) facility related pieces of equipment removed as part of the closure. A drawing of this area is shown on Figure 5.

Industrial Waste Neutralization (IWN) System

Wastewaters generated during cleaning and any residual liquids in the piping or tanks, were pumped to the IWN unit for subsequent treatment on-site prior to discharge to the sanitary sewer under Ultratech's

DRAFT

discharge permit. The unused wastewater treatment chemicals were relocated to the IWN at Building 1 prior to removal of the Building 2 IWN system.

The two reagent chemical supply tanks were removed and disposed of as hazardous waste. The IWN system consisted of a two-phase plastic mixing chamber and a final pH balancing chamber. The IWN was drained and dismantled. The debris was disposed of as hazardous waste.. The contaminated debris was collected in a 25 yard UN/DOT container which was properly labeled, manifested and disposed of as hazardous waste. The manifest is located in Attachment E.

The surface of the secondary containment was examined for cracks or other indications of compromised integrity after the treatment equipment is removed. The surface of the secondary containment was found to be in tact with no indication the surface integrity was compromised.

Liquid Nitrogen Tank

The 1000-pound liquid nitrogen tank was removed by Air Gas. The associated facility piping was left in place for use by a future tenant.

De-ionized (DI) Water System

The DI water system was leased and was removed by the vendor.

3.0 DETAILS OF MODIFICATIONS TO APPROVED CLOSURE PLAN

DRAFT

There were two modifications to the Closure Plan. During the post closure inspection, the San Jose Fire Department Hazardous Materials Inspector waved the need to sample three areas; the Applications Lab, the adjacent chase area and the former Chemical Storage Room. Decontamination verification sampling for the former IWN secondary containment was reduced to two (2) samples.

The stainless steel exhaust ducting was wipe sampled for volatile organics and found to be non-detect. The ducting was not disposed of as hazardous waste but was recycled instead.

The inspector visually verified the removal of the overhead caustic wastewater lines and the exhaust ducting and fans. Observations were made at two (2) locations above the Applications Lab and above the adjacent chase area. Photographs of these locations are shown in Attachment H. Fan removal was verified during the roof inspection.

4.0 RESULTS OF CONFIRMATION SAMPLING

Two field pH samples were collected in the former IWN containment area in the presence of the inspector. Both samples were within the acceptable range. The results are shown in Table 1. Attachment H contains photographs of the area.

Three wipe samples were collected from the exhaust duct above the Applications lab. The analytical results are shown in Attachment I

TABLE 1
Post Decontamination Confirmation Sampling
Ultratech Building 2 IWN Containment
2880 Junction Avenue San Jose

Area	Sample Location	Sample Number	pH*	Adjusted pH
Former IWN Containment	Floor	IWN East	5	6
	Floor	IWN West	4.5	5.5

* pH of the city tap water used was pH = 6

5.0 DOCUMENTATION OF DISPOSITION

Decontamination debris generated during the closure activities were disposed of as RCRA hazardous waste. All the debris was collected in a single properly labeled 25 yard UN/DOT container, manifested, and disposed of as hazardous waste at the Kettleman Landfill. The stainless steel exhaust ducting was dismantled and recycled at Recycling Specialist Inc. Copies of manifests, bills-of-lading, receipts, and/or other disposal documentation are provided in Attachment E.

DRAFT

6.0 CONCLUSIONS

Based on the results discussed above, the following conclusions can be drawn:

- The post closure inspection indicates that the building poses no significant risk to persons occupying these areas or the environment, and are acceptable to remain in-place post-closure.

- The field test results for residual corrosivity demonstrate that the secondary containment structure for the former IWN system, which Ultratech intends to leave in place, poses no significant risk to persons or the environment, and is acceptable to remain in-place post-closure, with no further action or maintenance activities required.

Site Description

DRAFT

The Ultratech facility located at 2880 Junction Avenue, San Jose is a two-story, approximately 79,800 square foot structure built in 1985. A location map and an aerial of the building are attached. Ultratech leases the first floor, which includes office and meeting spaces, a training facility, development and testing labs, a demonstration lab, and an employee cafeteria. Two drawings attached showing the layout of the first floor and the section of the building containing the labs and chemical storage areas. Chemicals are stored in a secured hazardous materials storage room. The covered outdoor facilities equipment pad houses support equipment for the building including: house chillers, de-ionized water production, bulk liquid nitrogen storage, and the Industrial Waste Neutralization System (IWN). A detailed drawing of this area is attached.

Closure Activities

Meade Construction will be the general contractor overseeing the closure activities. Decontamination activities will be performed by AllChem.

Meade Construction Group, Inc.
645 River Oaks Parkway
San Jose, CA 95134

Operation Manager - Mark Navratil

Offices Meeting Rooms and Training Facilities

No chemicals were allowed in offices or meeting rooms. Isopropyl alcohol was used in the Training Area for occasional cleaning of sensitive equipment. Isopropyl alcohol was dispensed in 16 oz. plastic laboratory squeeze bottles, stored in either laboratory secondary containment or approved flammable storage cabinets. Isopropyl Alcohol is very volatile and leaves no residue. No other hazardous materials were used in this area so there is no need for decontamination or testing.

Applications Lab

The majority of the hazardous materials use occurred in the Applications Lab. Chemicals included the periodic use of photo resists, photo developers, photo resist strippers, isopropyl alcohol, and acetone (see attached Hazardous Materials Business Plan). All photo processing chemicals were used under laboratory hoods or within ventilated process equipment exhausted through ducts to the rooftop. The exhaust system ductwork will be removed, consolidated and packaged as hazardous waste. The exhaust fan(s) will be dismantled with the squirrel cage or parts exposed to exhaust consolidated, packaged and disposed of as hazardous waste. The remaining debris may be handled as recycled metals.

Waste photo resist and photo resist strippers drained to a collection system located in a chase area adjacent to the Applications Lab. Waste photo developer drained to the IWN for pH neutralization prior to discharge to the sanitary sewer. Approximately 100 lineal feet of the secondarily contained caustic waste water line will be removed and disposed of as hazardous waste. The wastewater line is comprised of a 3-inch diameter primary inner line with a 5-inch diameter outer secondary containment line. The demolished debris will be collected into a UN/DOT rated container.

DRAFT

Demonstration Lab

Isopropyl alcohol was used in the Demonstration Lab for the occasional cleaning of sensitive equipment. Isopropyl alcohol was dispensed in 16 oz. plastic laboratory squeeze bottles and stored in either laboratory secondary containment or approved flammable storage cabinets. Isopropyl Alcohol is very volatile and leaves no residue. No other hazardous materials were used in this area so there is no need for decontamination or testing.

Chemical Storage Room

All hazardous wastes not sent to the IWN were collected in the facility's indoor Chemical Storage Room or the Applications Lab Chase Area. All hazardous materials were relocated to Ultratech's adjacent facility at 3050 Zanker Road, San Jose for storage in the outdoor chemical storage bunker or use in various process areas. All hazardous wastes were manifested and disposed of at an approved waste disposal site.

Laser Development Lab

No chemicals were used in this area so there is no need for decontamination or testing.

Facilities Equipment Pad

There are several facility related pieces of equipment that will be removed as part of the closure. A detailed drawing of this area is attached.

Industrial Waste Neutralization (IWN) System

The system consists of a two-phase plastic mixing chamber and a final pH balancing chamber. There are two primary supply tanks containing water treatment chemicals, a 30 gallon 50% sulfuric acid tank and a 55 gallon 30% sodium hydroxide tank. Any remaining reagent chemicals will be pumped into UN/DOT rated containers to be manifested and disposed of as hazardous waste. The four reagent pumps will be flushed and the water sent to the sanitary sewer if it meets permit requirements. Any liquid remaining in the IWN treatment chambers will be flushed to the sanitary sewer. The IWN will be dismantled and the debris placed in UN/DOT rated containers. All UN/DOT containers containing chemicals and contaminated debris will be properly labeled, manifested and disposed of as hazardous waste. All non-hazardous debris will be left onsite for disposal by Meade Construction Group.

Liquid Nitrogen Tank

The 1000-pound liquid nitrogen tank is leased from Air Gas. The vendor will remove the tank. The associated facility piping will remain in place for use by a future tenant.

De-ionized (DI) Water System

The DI water system is leased and will be removed by the vendor.

DRAFT

Sampling Activities

Chemical usage and storage in Building 2 was limited. The chemicals used did not contain metals or fluorides. The only residual issue associated with the facility might be pH. Facility decontamination will be verified using field pH sampling. If the pH in a given area is less than 5 or greater than 10 the area will be decontaminated again until a pH of between 5 and 10 is achieved.

Chemicals were used under laboratory hoods in the Applications Lab. Chemicals and some of the wastes not treated in the IWN system were stored in the chase area adjacent to the lab. A minimum of five floor field samples will be taken in the Applications Lab. Three floor field samples will be taken in the chase adjacent to the lab.

The chemical storage room also contained all chemicals and some of the hazardous wastes not sent to the IWN. This is a small space so a minimum of five floor field samples will be taken.

The IWN containment area may have been exposed to acidic or caustic chemicals. The surface of the secondary containment will be examined for cracks or other indications of compromised integrity after the treatment equipment is removed. A minimum of five field pH samples will be taken within the containment area. If the pH is less than 5 or greater than 10 the area will be decontaminated again until a pH of between 5 and 10 is achieved.

Waste Disposal

Both hazardous and non-hazardous wastes may be generated during the course of this closure. Ultratech intends to use the following hazardous waste transporter:

All Chemical Disposal

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☒ Horns/Sirens; ☐ Verbal *(i.e., shouting)*; ☐ Other *(specify* _____

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance ..... Phone No.: **911**

State Office of Emergency Services ..... Phone No.: **(800) 852-7550**

b. Post-Incident Contacts*:

Certified Unified Program Agency (CUPA) ..... Phone No.: **(408) 277-4659**

Local Hazardous Materials Program ..... Phone No.: **(408) 918-3400**

California EPA Department of Toxic Substances Control ..... Phone No.: **(510) 540-3739**

Cal-OSHA Division of Occupational Safety and Health ..... Phone No.: **(408) 452-7288**

Air Quality Management District ..... Phone No.: **(415) 771-6000**

Regional Water Quality Control Board ..... Phone No.: **(510) 622-2300**

*** Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.**

c. Emergency Resources:

Poison Control Center* ..... Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **O'Conner Hospital** Phone No.: **(408) 947-2500**

Address: **2105 Forrest Avenue** City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

Emergency chemical spill response through A.C.T., (408) 548-5050

DRAFT

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the State Office of Emergency Services at 1-800-852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

DRAFT

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(c)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats		
	☒ Chemical Protective Boots	13	Several sets of heavy duty boots
	☒ Chemical Protective Gloves	13	Several types of chemical gloves
	☐ Chemical Protective Suits *(describe)*		
	☒ Face Shields	13	Clear face shields
	☐ First Aid Kits/Stations *(describe)*		
	☒ Hard Hats	13	Hard hats
	☒ Plumbed Eye Wash Stations	Inside Bldg.	Lab areas and outdoor facilities pad

	☐		
	☐		
	☐		
	☐		

* *Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

DRAFT

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☒	Emergency incident reporting
☒	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Plan
☒	Facility evacuation drills, that are conducted at least *(specify)*: Annually *(e.g., "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☐	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e., inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

DRAFT

3. **Emergency Response Team Members** are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

☐	Personnel rescue procedures
☒	Shutdown of operations
☒	Liaison with responding agencies
☒	Use, maintenance, and replacement of emergency response equipment
☒	Refresher training, which is provided at least annually *
☒	Emergency response drills, which are conducted at least *(specify)*: Annually *(e.g., "Quarterly", etc.)*

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e., written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☐	Record of hazardous waste tank daily inspections *
☒	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

DRAFT

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *[Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at* **www.unidocs.org***), you do not need to attach a copy.]*

Check the appropriate box:

☐	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☒	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

:
Type of Work: Facility Closure Facility - Full Closure

PLAN CHECK STATUS – APPROVED

Plans are approved with the following requirements:

1. **The facility closure plan shall demonstrate that the hazardous materials which are stored, dispensed, handled or used in the facility will be transported, disposed, of or reused in a manner that eliminates the need for further maintenance and any threat to public health and safety. (SJFC 2701.5 and 2701.6.3)**
   a) **State the capacity of the former vessels/receptacles which received, via piping, flammable/combustible wastes and waste acetone (such as a 5 gallon container, a 55 gallon drum, a 70 gallon tank, etc).**
   b) **A pre-facility closure inspection must be performed to determine whether any other permits are required and to identify any possible problems or concerns including possible sampling.**
   c) **A final facility closure inspection must be performed after all closure activities have been performed to verify that all hazardous materials/wastes have been removed from the site and to determine whether any sampling will need to be performed.**
   d) **Submit a post facility closure report which includes copies of documentation (such as bills of lading, hazardous waste manifests, etc.) which demonstrate the final deposition of all hazardous materials and hazardous wastes previously stored or used at this site.**

e) **Contact the Santa Clara County Health Department's Hazardous Compliance Division at (408) 918-3400 regarding the closure of the Waste Treatment system.**

Inspection Scheduling: To schedule an inspection, please call 408-535-3555. When you hear the pre-recorded message, press "0" and the next available operator will take your inspection request. Please be prepared to provide the following information in order to effectively complete the process:

1. Provide the Permit Number (above) for the inspections on this permit.
2. Indicate the date you would like the inspection to occur, regardless of when the next best is available.
3. Provide a reasonable time estimate for the inspection to be conducted. Additional time may be needed and purchased to schedule for a complete inspection
4. Request a Final Inspection only when all other listed permit inspections have been scheduled/passed.
5. If this permit is the last open Hazardous Materials System Permit of the related Building Permit, and you are requesting a Final Inspection, then schedule that Haz Mat FDIC Final at the same time

Subj: **Post Closure Walkthrough of Ultratech Building 2 in San Jose**
Date: 3/25/2010 4:30:45 P.M. Pacific Daylight Time
From: lanaspenc@aol.com
To: ruben.williams@deh.sccgov.org
CC: EddieP@meadegroup.biz, MKierig@ultratech.com, DSmith@ultratech.com

Dear Mr. Williams,

The post closure walkthrough of the Ultratech Building 2 at 2880 Junction Avenue in San Jose is scheduled for tomorrow with Mike Randolph, City of San Jose Hazardous Materials Inspector. The final Post-Closure report will be submitted to him on Tuesday.

Is there any follow-up we need to complete the closure process for the County of Santa Clara?

Sincerely,
Lana Spencer MS, PG
510-540-5303

CONDITIONALLY AUTHORIZED TREATMENT CLOSURE NOTIFICATION AND SUBMITTAL REQUIREMENTS TO CUPA

For Use Within the County of Santa Clara and Cities under the jurisdiction of the CUPA
Authority Cited: California Health And Safety Code (H&SC) 25200.3 (g)

Your facility is subject to the operating standards of your treatment authorization tier and subject to permit fees until all criteria noted below is met. A courtesy call notifying our Department that your onsite treatment system will be closing is appreciated.

☐ Upon completion of closure, the facility must send written notification to the County of Santa Clara Hazardous Materials Compliance Division, your Certified Unified Program Agency (CUPA) and Department of Toxic Substances Control (DTSC).

☐ Prior issuance of Tiered Permit closure letter from CUPA the following documents are required to be submitted for review:

1. Post Closure Report, along with applicable supporting documentation. The report is to include documentation confirming compliance with all items in the approved local fire department Closure Plan. Confirmation of disposition of all hazardous materials/wastes, treatment records, bills of lading, shipping documents and laboratory test results with completed chain of custody.

2. Final closure clearance/sign off from local fire department.

DRAFT

CUPA Agency Use Only:

☐ Received written closure notification by facility.

☐ Review Post Closure report.

☐ Review local fire department final Inspection Closure report

☐ Issue CA Closure letter to facility and DTSC.

☐ Complete paperwork releasing facility from Financial Assurance Liability

SCOPE OF WORK CONDUCTED AT ULTRATECH BLDG 2

Decon / Demo – Building Two (Treatment System/Apps Lab Chemical Exhaust System Removal)

The following tasks were conducted by All Chemical Disposal, Inc. at the Ultra Tech facility Bldg Two, Apps Lab, AWNS Pad and Roof.

Apps Lab

- Removed and consolidated approximately 100 lineal feet of secondarily contained caustic waste water line. The line is s 3" diameter primary with a 5" diameter secondary. The demolished debris was collected into a UN/DOT rated container (bin).
- Removed and consolidated all chemical exhaust formerly servicing wet benches, tools and chemical storage cabinets to the roof mounted exhaust fans.
    - All solvent exhaust was consolidated and set aside for testing.
    - All corrosive exhaust was consolidated and placed in a UN/DOT rated bin for hazardous disposal at a class one landfill.
- The (2) exhaust fans associated with the abatement exhaust duct were dismantled, separating the squirrel cage (portion exposed to exhaust fumes)from the motor and support frame.
    - As with the exhaust duct, all solvent contaminated debris was set aside for testing, while the corrosive contaminated debris was placed in the landfill bin.
    - All non hazardous debris was sent for metals recycle by Meade Construction.

DRAFT

AWNS Pad

- Small amounts of residual chemical from the reagent tanks, pumps and feed tubes were absorbed with rags.
- The remaining liquid in the neutralization chamber where checked to verify a neutral pH and pumped into the industrial waste water discharge line.
- All tanks, pumps and other part of the AWNS exposed to chemical residues where consolidated and placed in the UN/DOT rated hazardous waste bin.
- The bermed secondary containment was mopped with a mild detergent solution followed by a water rinse applied with a mop. The surface was checked with pH sticks to verify a neutral pH.
- Properly labeled the UN/DOT container for disposal.
- All Non Hazardous debris (monitoring box, metal skid, mixers) were left onsite for disposal by Meade Construction Group

SAMPLING

- The interior surfaces of the stainless steel solvent duct were wipe sampled in two places, being the surface of a section of small diameter initial input duct, the surface of large main trunk duct and the squirrel cage fin on the roof mounted solvent exhaust fan.
- Each sample was collected using ghost wipes from a 100 cm^2 surface. The samples were analyzed for VOC's by EPA method SW8260B.
- The results indicated a non detect for all solvents tested for.

Sample Receipt Checklist

Client Name: **All Chemical Disposal**
Date and Time Received: **3/12/2010 10:40:31 PM**

Project Name: **Ultra Tech Duct**
Checklist completed and reviewed by: Samantha Arbuckle

WorkOrder N°: **1003402** Matrix Wipe
Carrier: Derik Cartan (MAI Courier)

Chain of Custody (COC) Information

Chain of custody present?	Yes ☑	No ☐
Chain of custody signed when relinquished and received?	Yes ☑	No ☐
Chain of custody agrees with sample labels?	Yes ☑	No ☐
Sample IDs noted by Client on COC?	Yes ☑	No ☐
Date and Time of collection noted by Client on COC?	Yes ☑	No ☐
Sampler's name noted on COC?	Yes ☑	No ☐

Sample Receipt Information

Custody seals intact on shipping container/cooler?	Yes ☐	No ☐	NA ☑
Shipping container/cooler in good condition?	Yes ☑	No ☐	
Samples in proper containers/bottles?	Yes ☑	No ☐	
Sample containers intact?	Yes ☑	No ☐	
Sufficient sample volume for indicated test?	Yes ☑	No ☐	

Sample Preservation and Hold Time (HT) Information

All samples received within holding time?	Yes ☑	No ☐	
Container/Temp Blank temperature	Cooler Temp: 10.11°		NA ☐
Water - VOA vials have zero headspace / no bubbles?	Yes ☐	No ☐	No VOA vials submitted ☑
Sample labels checked for correct preservation?	Yes ☑	No ☐	
Metal - pH acceptable upon receipt (pH<2)?	Yes ☐	No ☐	NA ☑
Samples Received on Ice?	Yes ☑	No ☐	

(Ice Type: WET ICE)

** NOTE: If the "No" box is checked, see comments below.*

All target compounds in the Method Blank of this extraction batch were ND less than the method RL with the following exceptions:
NONE

DRAFT

BATCH 49263 SUMMARY

Lab ID	Date Sampled	Date Extracted	Date Analyzed	Lab ID	Date Sampled	Date Extracted	Date Analyzed
1003402-001A	03/12/10 10:50 AM	03/15/10	03/15/10 2:36 PM	1003402-002A	03/12/10 10:55 AM	03/15/10	03/15/10 3:19 PM
1003402-003A	03/12/10 11:00 AM	03/15/10	03/15/10 2:11 PM				

MS = Matrix Spike; MSD = Matrix Spike Duplicate; LCS = Laboratory Control Sample; LCSD = Laboratory Control Sample Duplicate; RPD = Relative Percent Deviation.

% Recovery = 100 * (MS-Sample) / (Amount Spiked); RPD = 100 * (MS - MSD) / ((MS + MSD) / 2).

* MS and / or MSD spike recoveries may not be near 100% or the RPDs near 0% if: a) the sample is inhomogenous AND contains significant concentrations of analyte relative to the amount spiked, or b) if that specific sample matrix interferes with spike recovery.

N/A = not enough sample to perform matrix spike and matrix spike duplicate.
NR = analyte concentration in sample exceeds spike amount for soil matrix or exceeds 2x spike amount for water matrix or sample diluted due to high matrix or analyte content.

Laboratory extraction solvents such as methylene chloride and acetone may occasionally appear in the method blank at low levels.

DHS ELAP Certification 1644

Building Permits for Building 1 Modifications and Equipment Relocation

DRAFT

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Permit Record

Permit #: 2009-014933-CI
Project Location: 3050 · ZANKER RD

Permit Date: Apr 24, 2009	Inspection Area: 2C	Folder: CI-Manufacturing-Tenant Improvement
Permit Approvals Granted:	Building: 4. Complete; Electrical: 4. Complete; Mechanical: 4. Complete	
Associated Permits: 2009-014575-HZ; Building, Electrical, Mechanical		
APPLICANT: MEADE CONSTRUCTION GRO RSN675061	APPLICANT: STUDIO: G ARCHITECTS, RSN763575	
OWNER: LASALLE MONTAGUE INC RSN809691	CONTRACTOR: MEADE CONSTRUCTION GR RSN675061	
Permit Tech: Evelyn Rodriguez	Bldg Plan approved by: Parviz Ezzatyar	
Elec Plan approved by: Dan Rodriguez	Electrical plans in field	
Mech Plan approved by: Tim Farrant	Mechanical plans in field	

Description: TOTAL BUILDING SQUARE FOOTAGE: 97,910 SQ FT
AREA OF WORK: 9,500 SQ FT
SCOPE OF WORK: RECONFIGURE EXISTING OPERATIONS AREAS. NEW HARD WALLS, CLEAN ROOM WALL AND MINOR CEILING INSTALLATIONS. MECHANICAL, PLUMBING AND ELECTRICAL WILL BE CONFIGURED TO SUPPORT RELOCATED EQUIPMENT.

Technical Description: # Of Stories: 2; Conditioned?: Yes; Use 1: Manufacturing; Use 1 Sq Ft: 9500; Use 1 Construction Type: III-B; Use 1 Occupancy: F-1;

Design Conditions: Smoke Control System: N / A; Flood Zone: AO-1;

Applicable Codes: 2007 CBC, CMC, CPC; 2007 NEC; 2005 Energy; 2007 Access;

Zoning: IP; Planning Permit #: 0

Conditions: THE EQUIPMENT, FIT-UP AND SEISMIC BRACING OF EQUIPMENT WILL BE SUBMITTED UNDER A SEPARATE DEFERRED SUBMITTAL AS WELL AS FIRE SPRINKLERS AND ALARMS.

Issue Certificate of Occupancy: No

Final Inspection Record

958	Fire Final	9-18-09	

See other side for interim inspection record

You have a maximum of 18 Building inspection hours and 2.68 Fire inspection hours allocated for this permit. Inspection time will be determined using the requested inspection time or the actual expended inspection time, whichever is greater. Please note that inspection time includes 10 minutes of travel time per stop. Once the allocated inspection time is exceeded additional fees will be assessed for additional services. Cancellation or rescheduling of a scheduled inspection must be received by 2:00 p.m. the business day prior to the inspection; otherwise, the inspection time requested will be debited from the allotted hours.
Field coordinator name: Michael Hsieh, phone #: 408 535-7783. To Schedule An Inspection Call (408)535-3555.

A permittee is entitled to reimbursement of unused permit fees if the City of San Jose fails to conduct an inspection of the permitted work
within 60 days of receiving a written notice the work is complete and ready for inspection. Please see on line web-survey at http://www.sanjoseca.gov/building/

:
Type of Work: Facility Closure Facility - Full Closure

PLAN CHECK STATUS – APPROVED

Plans are approved with the following requirements:

1. **The facility closure plan shall demonstrate that the hazardous materials which are stored, dispensed, handled or used in the facility will be transported, disposed, of or reused in a manner that eliminates the need for further maintenance and any threat to public health and safety. (SJFC 2701.5 and 2701.6.3)**
    a) **State the capacity of the former vessels/receptacles which received, via piping, flammable/combustible wastes and waste acetone (such as a 5 gallon container, a 55 gallon drum, a 70 gallon tank, etc).**
    b) **A pre-facility closure inspection must be performed to determine whether any other permits are required and to identify any possible problems or concerns including possible sampling.**
    c) **A final facility closure inspection must be performed after all closure activities have been performed to verify that all hazardous materials/wastes have been removed from the site and to determine whether any sampling will need to be performed.**
    d) **Submit a post facility closure report which includes copies of documentation (such as bills of lading, hazardous waste manifests, etc.) which demonstrate the final deposition of all hazardous materials and hazardous wastes previously stored or used at this site.**

e) **Contact the Santa Clara County Health Department's Hazardous Compliance Division at (408) 918-3400 regarding the closure of the Waste Treatment system.**

Inspection Scheduling: To schedule an inspection, please call 408-535-3555. When you hear the pre-recorded message, press "0" and the next available operator will take your inspection request. Please be prepared to provide the following information in order to effectively complete the process:

1. Provide the Permit Number (above) for the inspections on this permit.
2. Indicate the date you would like the inspection to occur, regardless of when the next best is available.
3. Provide a reasonable time estimate for the inspection to be conducted. Additional time may be needed and purchased to schedule for a complete inspection
4. Request a Final Inspection only when all other listed permit inspections have been scheduled/passed.
5. If this permit is the last open Hazardous Materials System Permit of the related Building Permit, and you are requesting a Final Inspection, then schedule that Haz Mat FDIC Final at the same time

DRAFT

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g., pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.
Note to medical facilities: Do not list medical (i.e,. red bag) wastes on this form.

WASTE INVENTORY FORM

Please complete the following information :

Identify **all** waste streams generated by your facility. For each waste stream, identify the California Waste Code, annual quantities produced and the current method of disposal for all waste manifested off site (i.e. Recycle is (01), Incineration is (07), etc.). See the attached table for reference in selecting proper numerical codes for waste streams and disposal methods.

Two common examples are provided.

Waste Stream	CA Waste Code	Annual Quantity Generated	Current Disposal Method
Example: Paint Waste	*461*	*300 Gallons*	*01*
Example 2 : Waste Motor Oil	*221*	*110 Gallons*	*01*
Waste Mercury Compound	725	less than 100 lbs	01
Waste Acid Liquid	791	less than 110 gallons	01
Waste Alkaline Liquid	123	less than 110 gallons	01
Unspecified Solvent Mix.	214	less than 110 gallons	07
		1192 Kg

Instructions for Completing the Certification Of Financial Assurance for Permit by Rule and Conditionally Authorized Onsite Treaters (Formerly DTSC Form 1232)

This form must be completed by the owner or operator of a Fixed Treatment Unit (FTU) operating under Permit by Rule (PBR), or a hazardous waste generator operating pursuant to a grant of Conditional Authorization (CA). If this is a new facility, this certification should be attached to the Onsite Hazardous Waste Treatment Notification - Facility page. If this is an existing facility and you have previously submitted a Notification, this certification and your financial assurance mechanism may be submitted without another Notification. Refer to 22 CCR §67450.13 for financial assurance requirements.

PBR and CA operations must provide evidence of financial assurance to cover closure costs. However, you are eligible for an exemption from financial assurance requirements if closure cost estimates are not more than $10,000. You must complete this form even if you qualify for an exemption.

An adjustment to the closure cost estimate for inflation is required to be completed by March 1 of each year. See H&SC §67450.13(a)(2) for instructions on calculating the adjustment. This updated closure cost estimate must be maintained at the facility. Please number all pages of your submittal. (Note: Numbering of these instructions follows the UPCF data element numbers on the form.)

1. FACILITY ID NUMBER - This number is for agency use only. Leave this space blank.
2. EPA ID NUMBER - Enter the EPA ID Number for the facility.
3. BUSINESS NAME - Enter the complete Facility Name.
700. CERTIFICATION STATUS - Check the appropriate box to identify the type of certification.
701. TYPE OF OPERATION - Check the type of operation. If type of operation is not listed, check "Other" and indicate type in the space provided.
702. ESTIMATED CLOSURE COSTS - Enter the total estimated cost of closing each treatment unit and attach a written estimate of the closure costs. The estimated closure cost may be either the actual cost or the estimated cost when using your own staff and/or equipment. The closure cost estimate may take into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. The following is a model closure cost estimate (NOTE: For PBR only, if you have operated under PBR for less than 30 days in any calendar year, you qualify for an exemption. If eligible for this exemption, enter "EXEMPT" on the form in place of a dollar amount):

ACTIVITY	COST
a. Removal, treatment (on-site or off-site), or disposal of waste inventories	$ 2300
b. Removal and disposal of soil	$
c. Decontamination of equipment and structure	$ 3400
d. Demolition and removal of containment system components or structure	$ 2400
e. Transportation	$ 1200
f. Sampling and analysis of waste, soil, equipment, and structure	$
g. Certification or other demonstration of closure ("clean" closure or specified level of decontamination)	$ 500
h. Other expenses (specify)	$
i. Less Assets (salvage value of waste, equipment or property)	$
TOTAL COST OF CLOSURE	$ 9,800

703. EXEMPTION FROM FINANCIAL ASSURANCE - Check this box to claim the exemption from the financial assurance requirements for total closure cost estimate less than or equal to $10,000. A model letter using the required certifications must be submitted to claim this exemption.
704. EXEMPTION FROM FINANCIAL ASSURANCE - OTHER - Check to claim "Other" reason for exemption from financial assurance requirements. Describe the reason for the exemption in the space provided. Reference the applicable statute or regulation granting the exemption.
705. EXEMPTION FROM FINANCIAL ASSURANCE - <30 DAYS PER YEAR - Check to claim the exemption from financial assurance requirements if owner or operator under PBR only and operating no more than thirty days in any calendar year.
706. REQUIREMENT FOR FINANCIAL ASSURANCE - Check to indicate that the financial assurance mechanism is attached.
707. DATE OF CLOSURE ASSURANCE MECHANISM - Enter the effective date of the financial assurance mechanism.
708. MECHANISM ID NUMBER - If applicable, enter an identifying number for the closure assurance mechanism (e.g. insurance policy number).
709. CLOSURE ASSURANCE MECHANISM - Check to indicate the type of financial mechanism used to provide the closure cost assurance. Eligible types are:
    a. A closure trust fund, as provided in 22 CCR §66265.143(a) [NOTE: You must also complete DTSC Form 1154];
    b. A surety bond guaranteeing payment into a closure trust fund, as described in 22 CCR §66265.143(b) [NOTE: You must also complete either DTSC Form 1155 or 1156 with DTSC Form 1154];
    c. A closure letter of credit, as described in 22 CCR §66265.143(c) [NOTE: Also complete DTSC Form 1157];
    d. Closure insurance, as described in 22 CCR §66265.143(d) [NOTE: Also complete DTSC Form 1158];
    e. A financial test and corporate guarantee for closure, as described in 22 CCR §66265.143(e) [NOTE: Also complete either DTSC Form 1159 or 1173];
    f. An alternative mechanism for closure costs, as described in 22 CCR §67450.13(c);
    g. Use of multiple financial mechanisms for closure costs, as described in 22 CCR §66265.143(g);
    h. A certificate of deposit, as described in section 3-104(2)(c) of the Uniform Commercial Code;
    i. A savings account, as described in section 4-104(a) of the Uniform Commercial Code.

    These mechanisms require use of the additional DTSC Financial Assurance forms referenced above. These forms are available from your Certified Unified Program Agency (CUPA) or the DTSC Regional Office. When using these forms, verify that the beneficiary is the CUPA, rather than DTSC.
710. FINANCIAL INSTITUTION OR SURETY NAME -
711. FINANCIAL INSTITUTION OR SURETY ADDRESS -
712. FINANCIAL INSTITUTION OR SURETY CITY -
713. FINANCIAL INSTITUTION OR SURETY STATE -
714 FINANCIAL INSTITUTION OR SURETY ZIP CODE -

    For items 710-714, enter the name and address of the financial institution, insurance company, surety company, or other appropriate organization used to establish the closure financial assurance. Indicate your company if you are using a corporate guarantee and financial test.
715. SIGNER OF CERTIFICATION - Check the appropriate box to indicate whether the person certifying is the owner or the operator of the facility.
    SIGNATURE - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided. Certification must be completed as specified in Title 22, CCR, section 66270.11. The title should indicate that an appropriate authorized person is signing for the company. In most companies, this is not the environmental compliance or technical staff. Original signatures are required on all documents submitted.
716. DATE CERTIFIED - Enter the date that the document was signed
717. OWNER/ OPERATOR NAME - Enter the full printed name of the person signing the page.
718. OWNER/ OPERATOR TITLE - Enter the title of the person signing the page.

DRAFT

RE: Estimate for Closure of one(1) Waste Water Treatment Systems

Dear Mr. Kierig:

On behalf of Advanced Chemical Transport, Inc. (ACT) I am pleased to provide you with this estimate to clean, and decommission one (1) Waste Water Treatment Systems. The estimate is based on the information provided.

ACT will:

- Flush associated piping from unit
- Piping will be cut, capped to the tanks
- Field verification of pH will be conducted to verify corrosive materials have been neutralized
- The tanks will be cut up with electric saws and placed into bins for disposal
- The secondary containment will be decontaminated and ph Tested
- All waste generated from the project will be transported and disposed of as a hazardous waste.

Water and electrical to be provided by Ultratech in the work area. All electrical to be physically disconnected by others prior to our arrival. Unistrut/Supports to be left in place. The secondary containment will be left in place once cleaned.
All work as proposed is based on being performed Monday-Friday 8am-5pm excluding weekend, holiday, or overtime hours.

Terms are 30 days. Proposal and pricing is valid for 45 days.

ULTRATECH SAN JOSE
BUILDING 1 NEUTRALIZATION SYSTEM
SECONDARY CONTAINMENT
ASSESSMENT OF STRUCTURAL INTEGRITY
November 2008

Section 66264.192(i)(1) of Title 22 of the California Code of Regulations (22 CCR) requires that above-ground storage tanks containing hazardous waste be assessed at the time of installation and every five years during the service life of the tank.

This assessment is for the Secondary Containment System of the approximately 1,050 gallon neutralization system located at the Ultratech Building 1 at 3050 Zanker Road in San Jose, California.

DRAFT

INSPECTION RESULTS

The treatment system consists of two connected neutralization tanks with a combined capacity of approximately 1,050 gallons. The secondary containment has a capacity of approximately 1,200 gallons. The treatment system is located in an enclosed building and receives waste water with elevated pH generated from process operations at Building 1.

The tank was inspected on November 6, 2008. The information required for the assessment under 22 CCR 66264.192(l) (1) through (l) (8) is included on the attached inspection form. The inspection found none of the following to be in evidence:

- leakage;
- punctures, cracks, or significant corrosion;
- significant scrapes or damage to protective coatings;
- structural inadequacies or installation defects.

However the inspection identified the following deficiencies regarding the secondary containment of the two connected neutralization tanks and the tanks:

Secondary Containment Leak Detection System:
Section 66264.193(c)(3) of the Title 22 of the California Code of Regulations (22CCR) requires that the secondary containment "*be provided with a leak-detection system that is designed and operated so that it will detect the failure of either the primary or secondary containment structure or the presence of any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the owner or operator can demonstrate to the Department that existing detection technologies or site conditions will not allow detection of a release within 24 hours*".

During our visit we did not observe the presence of such a system. Ultratech has been made aware of the deficiency and is planning to address this deficiency.

SES
STRATEGIC ENGINEERING & SCIENCE

Strategic Engineering and Science, Inc.
110 11th Street – 2nd Floor
Oakland, California 94607

Overfill Protection System:
Section 66265.194 as referenced by HSC 25200.3(c)(4) also requires that the treatment system be equipped with overfill prevention controls (e.g. level sensing devices, high level alarms, automatic feet cutoff, bypass to a standby tank, etc.).

The automatic feed cutoff and bypass to a secondary tank were not observed.

RECOMMENDATIONS AND CONCLUSION

As required by 22 CCR 66264.192(l) (11), and based on the findings of this assessment as described above, I estimate that the tank has at least five years of remaining service life under current conditions. In accordance with 22 CCR 66264.192(i)(1), the assessment of tank system lifecycle is valid for a period of five years and the tank system should be reassessed at that time by Strategic Engineering & Science, Inc. to obtain a new estimate of remaining service life. In addition after ULTRATECH addresses the deficiencies observed, a new assessment will be made by Strategic Engineering and Science, and a certificate of compliance issued.

CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to be the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Subject: Post Closure Walkthrough of Ultratech Building 2 in San Jose

Dear Mr. Williams,

The post closure walkthrough of the Ultratech Building 2 at 2880 Junction Avenue in San Jose is scheduled for tomorrow with Mike Randolph, City of San Jose Hazardous Materials Inspector. The final Post-Closure report will be submitted to him on Tuesday.

Is there any follow-up we need to complete the closure process for the County of Santa Clara?

Sincerely,
Lana Spencer MS, PG

RE: Sipex Corporation [illegible]/aste Tank System Certification

Dear Mr. Binning:

Integrated Engineering [illegible]ervices (IES) has evaluated the acid waste neutralization and HF waste tank system in accordance w[illegible]h Title 22, California Code of Regulations (22CCR) Article 10, Section 66265.192 and Section [illegible]6265.193.

Based on our review of [illegible]ie information made available to us and our inspections conducted on March 4th and 11th of 2005– I attes[illegible] that the vault and tank system located on the waste pad are suitably designed; have sufficient structura[illegible] integrity; and are acceptable for the transferring and storing of hazardous waste in compliance with the r[illegible]levant portions of the above referenced sections.

However, there was evi[illegible]ence of epoxy coating deterioration and blistering on the sidewalls within the first 6" above the bottom of t[illegible]e secondary containment trench, containing Acid Waste and HF Waste drain pipes. This was evident [illegible]t several locations on the waste treatment pad and in the fab. Sipex was notified of our observati[illegible]n and are currently taking action to correct the situation.

I certify under penalty o[illegible]aw that this document and attachments prepared by IES were done so under my direction or supervis[illegible]ons in accordance with a system designed to assure that qualified personnel properly gather and eva[illegible]uate the information submitted. Based on my inquiry of the person or persons who manage the systen[illegible] or those persons directly responsible for gathering the information submitted is, to the best of my knowle[illegible]dge and belief, true, accurate, and complete. I am aware that there are significant penalties for [illegible]ubmitting false information, including the possibility of fine and imprisonment for knowing violations.

If you have any questi[illegible] concerning this matter, please contact me at (408) 261-3500.

Sincerely,

[illegible]. M029438

RE: Closure Permit Application
Ultratech Inc.
2880 Junction Avenue, San Jose, CA

Dear Mr. Randolph:

Ultratech will be closing their facility located at 2880 Junction Avenue, San Jose. The closure permit applications, plan and fees in the amount of $848.40 are enclosed. Meade Construction Group, Inc. is the general contractor overseeing the closure. Closure activities are expected to begin in late December or early January. We will let you know once activities begin.

If you need additional information or have any questions on this Closure Plan please contact me at (650) 868-7120 or by email at EddieP@meadegroup.biz.

Sincerely,

Eddie Parenti

DISCLAIMER STATEMENT

The operation and maintenance manual is intended to be used with the information provided in the vendor literature manual. These manuals should provide complete and accurate information to meet your operating and/or service requirements based on the information available at the time of publication. However, USFilter assumes no responsibility for the technical content of the vendor literature manual.

The information in these manuals may not cover all operating details or variations or provide for all conditions in connection with installation, operation and maintenance. Should questions arise which are not answered specifically in this manual, contact the USFilter Service Department.

USFilter reserves the right to make engineering refinements that may not be reflected in these manuals. The material in these manuals is for informational purposes and is subject to change without notice.

DRAFT

PROPRIETARY RIGHTS STATMENT

This manual discloses information in which USFilter has proprietary rights. Neither receipt nor possession of this manual confers or transfers any right to the client, and by its retention hereof, the client acknowledges that it will not reproduce or cause to be reproduced, in whole or in part, any such information except by written permission from USFilter. The client shall have the right to use and disclose to its employees the information contained herein for the purpose of operating and maintaining the USFilter equipment, and for no other purpose.

In the event the content of this manual is altered or section/items are omitted during a reproduction, in whole or in part, and instructions or definitions within the reproduction, result in personal injury to those who follow the altered instructions, the burden of responsibility for personal injury falls solely on the party who affects the reproduction.

4.0 PROCESS CONTROLS

The purpose of this section is to outline general process control for NS operation.

The USFilter Process Control System operates the treatment process. A Programmable Logic Controller (PLC) is used to monitor digital and analog inputs from system control instruments and automatically activate pumps, valves, alarms etc. The reagent feed is programmed to provide proportional addition of reagent chemical, which assures that the effluent water quality remains within specification, as long as the influent waste concentrations remain within the parameters listed above. If a failure occurs, an audible alarm and warning light will alert the operator.

The programmable logic controller within the system control panel includes an operator access screen. This screen will allow the operator to modify the system control setpoints (ie. pH addition, alarms, etc.).

Also included within the system control panel is a remote access link, via a modem, to the PLC. This remote link allows the USFilter office to access and monitor the waste treatment system to provide troubleshooting assistance and programming updates as requested.

The treatment process control program is stored in the memory of the PLC's Central Processing Unit (CPU) and remains resident as long as there is power to the system and/or a backup battery is in place and active. Field experience has shown that the battery needs to be replaced roughly twice a year, and must only be replaced while there is power to the PLC. By replacing the battery every six months, the chance of losing the program due to a power surge or power outage is virtually eliminated.

DRAFT

4.1 MAIN CONTROL PANEL

All electrical operations are controlled from the main electrical control panel, which contains a series of selector switches and push buttons. Equipment controls and system indication are summarized below.

Control Summary

Equipment Control	Device
System Process Controller	On/Off
Alarm Acknowledge	Push Button
Emergency Stop	Push Button
Reaction Chamber 1 Mixer	On/Off
Reaction Chamber 2 Mixer	On/Off
Reaction Chamber 1 Acid Metering Pump	On/Off/Auto
Reaction Chamber 2 Acid Metering Pump	On/Off/Auto

Selector Switches

- Hand/Off/Auto – These selector switches provide system process control. In the HAND position, the associated equipment is energized regardless of instrumentation signals. In the OFF position, the associated equipment will not be energized regardless of instrumentation signals. In the AUTO position, the associated equipment's activation is determined by the PLC.

- Hand/Off - These selector switches provide manual system control. In the HAND position, the associated equipment is energized. In the OFF position, the associated equipment will be de-energized.

Push Buttons

- Alarm Acknowledge – This momentary push button silences the audible portion of an alarm. Respond to any alarms immediately.

- Emergency Stop – This maintained push button shuts down the entire treatment system. The operator must pull the Emergency Stop switch out to restart the system.

Other system operations may require the operator to manually position or align system valves or make-up process chemicals. The operator should also refer to Section 5.0, System Operation, which provides detailed instruction on how to start-up the system for online operation.

Indication Summary

Control Function	Device
Reaction Chamber 1 Online pH Fail	Alarm Indicating Light
Reaction Chamber 2 Online pH Fail	Alarm Indicating Light
Acid Storage Tank Low Level	Alarm Indicating Light
Caustic Storage Tank Low Level	Alarm Indicating Light
Control Power On	Power Indication Light
Reaction Chamber 1 Mixer	Equipment Operation Light
Reaction Chamber 2 Mixer	Equipment Operation Light
Reaction Chamber 1 Fine Acid Metering Pump	Equipment Operation Light
Reaction Chamber 2 Fine Acid Metering Pump	Equipment Operation Light
Reaction Chamber 1 pH-1	Operating Value
Reaction Chamber 2 pH-1	Operating Value
Effluent Chamber pH-1	Operating Value

Indication Lights

Indication lights in this system are located on the front of the electrical control panel. All lights are hard-wired to the process. The types of lights are described below.

- Equipment Operation – These lights are an integral part of each hand switch and are equipped with green lenses. Illumination indicates that the associated piece of equipment is energized.

- Alarm Indication – These lights are equipped with red lenses. Illumination indicates that an alarm condition exists in the associated piece of equipment.

4.2 SYSTEM ALARMS

System Alarm List

1. Reaction Chamber 1 pH Fail (High or Low)

DRAFT

2. Reaction Chamber 2 pH Fail (High or Low)
3. Effluent Clearwell Chamber pH Fail (High or Low)

DRAFT

5.0 SYSTEM OPERATION

This section is intended to familiarize the operator with general procedures for operating the treatment system. The operator should read and understand Section 4.0, Process Control, of this manual before attempting to start-up and operate the treatment system.

5.1 PRELIMINARY START-UP

This subsection is intended as a general preliminary start-up checklist prior to initiating system operations. It is recommended that all operators review and perform these steps as outlined.

Note This subsection is intended as an equipment general preliminary start-up checklist for operating the system for the first time or after a prolonged shutdown. It is recommended that all operators review and perform these steps as outlined.

1. All system equipment should be completely installed and tested prior to start-up (mechanically and electrically). Testing should include leak testing all tanks, verification of proper pump & valve operation, proper installation of process piping (including routing), and proper operation of the system controls.

2. Using the USFilter project drawings, such as the Piping & Instrumentation Diagrams, the operator should identify the normal process flow and associated equipment – tanks, valves, pumps, and panel controls. This should be done when the operator walks through the system to enable the operator to connect each procedure or task to the associated piece of equipment.

3. The operator should review Section 2.0, Safety Precautions, to ensure a safe and productive start-up sequence.

4. Ensure that there is power at the system electrical control panel (208Y VAC, 3Φ, 30 Amp, 60Hz) and the system PLC is on.

5. Verify that the NS reaction chamber mixer mounts are tight, and the agitator impellers have at least 4" clearance from the chamber walls.

6. Fill the NS with city or industrial water (not waste) until all chambers are full (approximately 3" from tank lip). This is done to ensure that the initial waste stream is properly treated.

7. Install the system pH probes in reaction chambers 1 (T101), 2 (T102), and the effluent clearwell (T103) as required. Calibrate each of these transmitters per the owner's instructions (GF Signet) located in the Section 10.0, Equipment Literature. Verify that the reading on the transmitter (ie. pH = 7) corresponds to the reading at the system control panel for each transmitter. Verify that the wetted ends of the probes (once installed in the probe holder) are beneath the liquid level.

8. Verify that the chemical storage tanks (T200 and T300) are at least 25% full of reagent.

DRAFT

9. Turn on the reaction tank mixers (M101 & M102) at the system control panel. Verify that the reaction chamber mixers are rotating in the proper direction (CCW) and the chamber contents are mixing. If any of the mixers are rotating in the incorrect direction, refer to the mixer motor junction box plate on switching phase leads. Have a licensed electrician perform this work if needed.

10. Turn the chemical metering pumps (P201 and P202) to the automatic mode at the system control panel.

This preliminary checklist will allow the operator to start the system and begin the treatment process. Refer to the Operations Section below for daily operating procedures.

5.2 SYSTEM OPERATION

The following items listed below are conditions that will arise during normal operation that the operator will need to address and remedy and/or respond to.

1. Sulfuric Acid Addition
Sulfuric Acid (H_2SO_4) is supplied to the NS reaction chambers via electrically operated metering pumps (P201 and P202). The flow rate of the electrically operated metering pump can be manually adjusted using the stroke and speed knobs on the pump (refer to the LMI Maintenance Manual).

While the system is under operation and influent waste is being transferred to the reaction chambers, the fine H_2SO_4 addition pumps (P201, P202) should be cycling on and off to lower the chamber pH level to ~ 8.5. If after the metering pump adds reagent to the reaction chamber and the pH level consistently lowers below pH = 6.0 for greater than 30 seconds, decrease the feed pump speed setting by 5%. Repeat as required.

If the metering pump is continually adding reagent to the reaction chamber and the pH level does not lower below pH = 9.0 for greater than 30 seconds, increase the feed pump speed setting by 5%. Repeat as required.

5.3 SYSTEM SHUTDOWN

USFilter recommends that the pH Neutralization System devices and controls remain in the automatic mode during any facility shutdown. This will enable the NS unit to successfully treat any wastewater that inadvertently flows to the system and onto the drain,

5.4 SYSTEM ALARM RESPONSE GUIDE

The following procedures are to be used as guidelines in the case of system alarms. These guidelines will not cover all possibilities for the cause of the alarm, but provide a starting point for responding to the alarm condition.

NS C1 pH (Online) Alarm (T101)-

DRAFT

This alarm will be triggered when the pH level in the first reaction chamber is out of range for longer than a specified period of time. Verify the proper calibration of the reaction tank pH sensor/transmitter.

Verify that the H_2SO_4 Feed Pump (P201) are operating and pumping reagent to the reaction chamber. If the pump is not operating properly (but is receiving power), refer to the LMI manual for repairing and troubleshooting this problem. If the pump is operating properly:

- And the pH level has failed on the high side, refer to Section 5.1.1 to increase the H_2SO_4 feed rate to the reaction chamber.
- And the pH level has failed on the low side, refer to Section 5.1.1 to decrease the H_2SO_4 feed rate to the reaction chamber.

NS C2 pH (Online) Alarm (T102)-

This alarm will be triggered when the pH level in the second reaction chamber is out of range for longer than a specified period of time. Verify the proper calibration of the reaction tank pH sensor/transmitter.

Verify that the H_2SO_4 Feed Pump (P202) is operating and pumping reagent to the reaction chamber. If the pump is not operating properly (but is receiving power), refer to the LMI Pump manual for repairing and troubleshooting this problem. If the pump is operating properly:

- And the pH level has failed on the high side, refer to Section 5.1.1 to increase the H_2SO_4 feed rate to the reaction chamber.
- And the pH level has failed on the low side, refer to Section 5.1.1 to decrease the H_2SO_4 feed rate to the reaction chamber.

NS Effluent Clearwell Chamber (Online) pH Alarm (T103)-

This alarm will be triggered when the pH level in the clearwell chamber is out of range for longer than a specified period of time. Verify the proper calibration of the chamber pH sensor/transmitter. Verify that pH in the first and second reaction chambers are within proper operating levels.

Acid Storage Tank Low Level (T200) -

This alarm can be triggered by the low level switch in the storage tank. Verify that there is a low liquid level in the Acid Storage Tank (T200). If not, verify that the backup level switch is not stuck in the up position. Operator should then refill the storage tank with the proper reagent.

DRAFT

5.5 SYSTEM METERING PUMP SETTINGS

The metering pump SPEED and STROKE dial settings are used to fine tune the reagent requirements by adjusting the pumps transfer rate. The transfer rate of the pump can be calculated by taking the maximum rate of the pump and multiplying it by the SPEED and STROKE percentages (ie: a SPEED setting of 80 = 80% = .8). Thus, the instantaneous flow rate = Max Flow x SPEED x STROKE (ie: 108 GPD x .5 x .5 = 27 GPD).

Date Changed									
C1 NaOH	Speed								
Fine Pump	Stroke								
C1 NaOH	Speed								
Gross Pump	Stroke								
C1 H_2SO_4	Speed								
Fine Pump	Stroke								
C1 H_2SO_4	Speed								
Gross Pump	Stroke								
C2 NaOH	Speed								
Fine Pump	Stroke								
C2 H_2SO_4	Speed								
Fine Pump	Stroke								

DRAFT

6.0 MAINTENANCE & TROUBLESHOOTING

This section presents the recommended maintenance activities and frequencies for the treatment system. As with an equipment item or system, good maintenance helps maintain the operational efficiency and prolong the life of the equipment. Equipment maintenance is the responsibility of the treatment system operator.

This section is not intended to be all-inclusive, but it does include the major maintenance requirements for the treatment system.

6.1 GENERAL MAINTENANCE GUIDELINES

Provided that the installation and mechanical testing as well as the start-up and continuation of production operations of the treatment system all were successfully accomplished, routine maintenance of the equipment should be minimal.

An effective preventative maintenance program coupled with an alert awareness on the part of operating and maintenance personnel as to how the equipment is functioning, both chemically and mechanically, is most important from the standpoint of avoiding unscheduled shutdowns and costly repairs.

Operating and maintenance personnel should be familiar with the Process Controls, Section 4.0 and System Operation, Section 5.0 as well as being present for the equipment installation and initial operations. Operating and maintenance personnel should also be familiar with the available spare parts inventory and audit this inventory on a regular basis.

The operator is required to record all treatment information to enable development of a performance and operational history for the treatment system. The required information includes, but is not limited to such parameters as; chemical dosing concentrations, duration of chemical dosing, influent pH, effluent pH, etc. An operator should develop a Data Log Form with key operating parameters to track system operations.

Vendor Literature should be referenced for:

- Specific instruction on equipment disassembly procedures
- Recommended cleaning procedures
- Precautions to take during equipment disassembly
- Recommended lubricants and oils

It is strongly recommended that the operator record the date, equipment item, the part replaced, and the reason the part was replaced whenever a part replacement is made. A Recommended Spare Parts List has been provided in Section 7.0 of this manual and should be reviewed by operator and maintenance personnel. Additional information is often desired to ensure that complete history is available on equipment replacement parts. At the end of this section, USFilter has provided a typical Parts Replacement Summary Sheet that can be used for a complete history.

DRAFT

A Preventative Maintenance Program should be set up and implemented for periodic equipment inspection and equipment service. It is far better to periodically inspect and service equipment on a scheduled basis than to have equipment failures occur at random times, forcing operation of the equipment and perhaps the entire facility to come to a stop. The important thing to remember is that every item requiring inspection and servicing is attended to on a regular basis and is not overlooked.

Once the operator is familiar with maintenance and the operational history of the treatment system, the frequency of certain inspections may be decreased. The operator or maintenance personnel should record any changes to maintenance procedures or frequency immediately. This will ensure that maintenance instructions are correct, complete, and current.

6.2 TYPICAL MAINTENANCE

DRAFT

Typical maintenance that should be performed on a **daily** basis should include the following:

General Housekeeping

- hose down treatment system area
- check operation of available eyewash/safety showers

System Tanks
- inspect for leakage
- inspect for unusual discoloration or wet-spotting
- replenish the reagent supply vessels as required

Pumps
- listen for unusual noises (for example, which may indicate cavitation or air in the line)
- check for leakage
- check for unusual operation (for example, sudden loss of pressure or capacity)
- check for loose or frayed wires or conduits
- check for motor overheating or high amperage draw

Instrumentation
- inspect for unusual operation (for example, reading is zero when it should indicate some value)
- check for loose or frayed wires or conduits
- check for cracked viewing glass
- clean all pH probes

Piping/Valves
- inspect for leaks
- inspect for unusual noised (for example, which may indicate air in the line or valve)

Typical maintenance that should be performed on a **weekly** basis should include the following:

- clean and calibrate all pH probes
- verify that all agitator mounts are sufficiently tight
- verify that the PLC "BAT LO" lamp is OFF. If the lamp is RED, immediately replace the battery. Refer to Allen-Bradley manual for specifics

Typical maintenance that should be performed on a **yearly** basis should include the following:

- lubricate any pump or motor bearings as specified in the individual pump and motor manuals

DRAFT

6.3 TROUBLESHOOTING

The following table is provided to help quickly determine the source of any problems and correct them. To use the table, locate your problem in the left hand column, determine which cause is most likely responsible, and then select the solution that will correct the problem.

Problem	Possible Cause	Potential Solutions
pH fluctuates widely	Probe / Transmitter failure	Check reading against redundant probe Check probe/transmitter connection Clean and calibrate pH probe Replace pH probe Replace transmitter
	Metering Pump Settings	Check SPEED / STROKE settings against manual Adjust settings as necessary
	Program Errors	Check program logic Check pH control setpoints Check reagent addition timer values
	Wastewater fluctuations	Test the incoming waste stream
System does not operate automatically	Panel controls not set properly	Place PLC switch into the ON position Ensure all 3-position switches in AUTO
	PLC failure	Verify power to the PLC Make sure PLC is in the RUN mode Check for program faults
Mixer failure	Mixer is not receiving power	Reset circuit breaker for mixer Put control switch in the ON position Check wiring Replace protection fuses Repair / replace power relay coil
	Mixer won't run	Check for obstruction of the mixer prop Tighten mixer mounting Adjust shaft pitch
	Mixer operating correctly	Check current transducer
No flow	Line obstructed Flow Switch	Clean out line Open any valves Test flow by watching tank level drop (see instruction for centrifugal pump failure)

DRAFT

Problem	Possible Cause	Potential Solutions
Metering pump failure	Pump is not receiving power	Toggle pump from HAND to OFF to verify relay operation Check power at fuse Reset circuit breaker for pump Put control switch in the HAND position Check wiring Replace protection fuses Repair/replace power relay coil Check control program
	Liquid is not transferring adequately	Check for prime Check for 'weep' holes in the pump head Clean the injector Clear obstructions from suction line Adjust the SPEED and STROKE dial

DRAFT

Waste Minimization - I certify that I have a program in place to reduce the volume, quantity and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment.

Tiered Permitting Certification - I certify that the unit or units described in these documents meet the eligibility and operating requirements of state statutes and regulations for the indicated permitting tier, including generator and secondary containment requirements. I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete.

I am aware that there are substantial penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

- ☐ 3. Notification of property owner, if different from business owner

DRAFT

Onsite Hazardous Waste Treatment Notification – Facility Form Instructions
(Formerly DTSC Form 1772)

Complete this form if your facility performs onsite treatment of hazardous waste(s) generated onsite and the facility is eligible under the Conditional Exemption (CE), Conditional Authorization (CA), or Fixed Treatment Unit (FTU) Permit by Rule (PBR) tiers.

Submit one Onsite Hazardous Waste Treatment Notification - Facility page per facility, regardless of the number of treatment units located at the site. Attach separate Onsite Hazardous Waste Treatment Notification - Unit and Waste and Treatment Process Combinations pages for each treatment unit at the facility. Please number all pages of your submittal. (Note: Numbering of these instructions follows the UPCF data element numbers on the form.)

1. FACILITY ID NUMBER - This space is for agency use only.
3. BUSINESS NAME - Enter the complete Facility Name.
600. NOTIFICATION STATUS - Check whether this notification is your initial notification under the Tiered Permitting system; an amended notification; or, for PBR only, a renewal notification.
601. PERMIT STATUS - If this facility has a state-issued hazardous waste permit or grant of authorization, check the appropriate box to indicate the permit status.
602. NUMBER OF UNITS - Enter the number of units you operate at this facility in each permit tier or category.

SIGNATURE OF OWNER/OPERATOR - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided. In most companies, this is not the environmental compliance or technical staff. Original signatures are required.

603. DATE CERTIFIED - Enter the date the form was signed.
604. OWNER/ OPERATOR NAME - Print or type the full name of the person signing the page.
605. OWNER/ OPERATOR TITLE - Enter the title of the person signing the page.

REQUEST FOR SHORTENED REVIEW PERIOD - Generators operating under the PBR tier are not authorized until they are notified by their Certified Unified Program Agency (CUPA). Generators operating under CA and CE are legally authorized 60 days after submitting a complete notification. The time period between notification and authorization may be shortened if the owner or operator shows good cause. Check the appropriate box to indicate whether or not you are requesting to be authorized sooner than the standard 60-day period. If you check "Yes," state the reason(s) for your request (attach additional sheets if needed). Authorization will be automatically effective on the date the completed notification is received by your CUPA.

ATTACHMENTS - Check the appropriate boxes to indicate that all required document submittals are attached to this form. (*Note: Commercial Laundries are <u>not</u> required to provide attachments.*)

<u>ALL FACILITIES</u>:
1. Complete an Onsite Hazardous Waste Treatment Notification - Unit form and Waste and a Treatment Process Combinations form for each unit covered by this notification.
2. Provide a plot plan or map detailing the location(s) of the unit(s) at this facility. Clearly indicate the facility boundaries and major features. The Storage Map prepared for your Hazardous Materials Business Plan may be used as long as the unit numbers for the units covered by this notification are shown.

<u>PBR and CA ONLY</u>:*
1. Complete and attach the Certification of Financial Assurance for Closure (UPCF form HWF 1232). Check the appropriate box to indicate whether you have Self-Certified (closure costs must be less than $10,000) or are submitting a financial mechanism.
2. Prior Enforcement History information is required only if your facility was the subject of any convictions, judgments, settlements or final orders resulting from an action by any local, state, or federal environmental, hazardous waste, or public health enforcement agency. If applicable, attach a statement or summary that lists the cases for the last three years and provide a copy of the cover sheet from each document (conviction, settlement, etc.). The summary should include case and docket number, name and address of the agency, date, brief explanation, type of case (criminal, civil, administrative) and final resolution (including fines and penalties).

<u>PBR ONLY</u>:
1. 22 CCR §67450.2(b)(3)(G) requires that tank and/or containment system certifications be submitted, when applicable. Specific standards are in 22 CCR §66264.175(c) (containers) and 22 CCR §66265.191(a) and 66265.192(a) (tanks).
2. Notification of local agencies. Attach documentation of the other local agencies notified of your operation. (e.g. sewer agency).
3. Notification of property owner. If the property owner is different than the operator, provide documentation that the facility operator has notified the property owner of the operation of this hazardous waste treatment unit under PBR.

* For PBR and CA, a Phase I environmental assessment must be submitted to DTSC, not to your CUPA. The assessment checklist and instructions are available from DTSC. Call (916) 324-2423 or write to the DTSC-Unified Program Section at 400 P Street, 4th Floor, P.O. Box 806, Sacramento, CA 95182-0806. Completed Phase I assessments should be submitted to the same address.

DRAFT

Instructions for Completing the Certification Of Financial Assurance for Permit by Rule and Conditionally Authorized Onsite Treaters (Formerly DTSC Form 1232)

This form must be completed by the owner or operator of a Fixed Treatment Unit (FTU) operating under Permit by Rule (PBR), or a hazardous waste generator operating pursuant to a grant of Conditional Authorization (CA). If this is a new facility, this certification should be attached to the Onsite Hazardous Waste Treatment Notification - Facility page. If this is an existing facility and you have previously submitted a Notification, this certification and your financial assurance mechanism may be submitted without another Notification. Refer to 22 CCR §67450.13 for financial assurance requirements.

PBR and CA operations must provide evidence of financial assurance to cover closure costs. However, you are eligible for an exemption from financial assurance requirements if closure cost estimates are not more than $10,000. You must complete this form even if you qualify for an exemption.

An adjustment to the closure cost estimate for inflation is required to be completed by March 1 of each year. See H&SC §67450.13(a)(2) for instructions on calculating the adjustment. This updated closure cost estimate must be maintained at the facility. Please number all pages of your submittal. (Note: Numbering of these instructions follows the UPCF data element numbers on the form.)

1. FACILITY ID NUMBER - This number is for agency use only. Leave this space blank.
2. EPA ID NUMBER - Enter the EPA ID Number for the facility.
3. BUSINESS NAME - Enter the complete Facility Name.
700. CERTIFICATION STATUS - Check the appropriate box to identify the type of certification.
701. TYPE OF OPERATION - Check the type of operation. If type of operation is not listed, check "Other" and indicate type in the space provided.
702. ESTIMATED CLOSURE COSTS - Enter the total estimated cost of closing each treatment unit and attach a written estimate of the closure costs. The estimated closure cost may be either the actual cost or the estimated cost when using your own staff and/or equipment. The closure cost estimate may take into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. The following is a model closure cost estimate (NOTE: For PBR only, if you have operated under PBR for less than 30 days in any calendar year, you qualify for an exemption. If eligible for this exemption, enter "EXEMPT" on the form in place of a dollar amount):

ACTIVITY	COST
a. Removal, treatment (on-site or off-site), or disposal of waste inventories	$ 2300
b. Removal and disposal of soil	$
c. Decontamination of equipment and structure	$ 3400
d. Demolition and removal of containment system components or structure	$ 2400
e. Transportation	$ 1200
f. Sampling and analysis of waste, soil, equipment, and structure	$
g. Certification or other demonstration of closure ("clean" closure or specified level of decontamination)	$ 500
h. Other expenses (specify)	$
i. Less Assets (salvage value of waste, equipment or property)	$
TOTAL COST OF CLOSURE	$ 9,800

703. EXEMPTION FROM FINANCIAL ASSURANCE - Check this box to claim the exemption from the financial assurance requirements for total closure cost estimate less than or equal to $10,000. A model letter using the required certifications must be submitted to claim this exemption.
704. EXEMPTION FROM FINANCIAL ASSURANCE - OTHER - Check to claim "Other" reason for exemption from financial assurance requirements. Describe the reason for the exemption in the space provided. Reference the applicable statute or regulation granting the exemption.
705. EXEMPTION FROM FINANCIAL ASSURANCE - <30 DAYS PER YEAR - Check to claim the exemption from financial assurance requirements if owner or operator under PBR only and operating no more than thirty days in any calendar year.
706. REQUIREMENT FOR FINANCIAL ASSURANCE - Check to indicate that the financial assurance mechanism is attached.
707. DATE OF CLOSURE ASSURANCE MECHANISM - Enter the effective date of the financial assurance mechanism.
708. MECHANISM ID NUMBER - If applicable, enter an identifying number for the closure assurance mechanism (e.g. insurance policy number).
709. CLOSURE ASSURANCE MECHANISM - Check to indicate the type of financial mechanism used to provide the closure cost assurance. Eligible types are:
    a. A closure trust fund, as provided in 22 CCR §66265.143(a) [NOTE: You must also complete DTSC Form 1154];
    b. A surety bond guaranteeing payment into a closure trust fund, as described in 22 CCR §66265.143(b) [NOTE: You must also complete either DTSC Form 1155 or 1156 with DTSC Form 1154];
    c. A closure letter of credit, as described in 22 CCR §66265.143(c) [NOTE: Also complete DTSC Form 1157];
    d. Closure insurance, as described in 22 CCR §66265.143(d) [NOTE: Also complete DTSC Form 1158];
    e. A financial test and corporate guarantee for closure, as described in 22 CCR §66265.143(e) [NOTE: Also complete either DTSC Form 1159 or 1173];
    f. An alternative mechanism for closure costs, as described in 22 CCR §67450.13(c);
    g. Use of multiple financial mechanisms for closure costs, as described in 22 CCR §66265.143(g);
    h. A certificate of deposit, as described in section 3-104(2)(c) of the Uniform Commercial Code;
    i. A savings account, as described in section 4-104(a) of the Uniform Commercial Code.

    These mechanisms require use of the additional DTSC Financial Assurance forms referenced above. These forms are available from your Certified Unified Program Agency (CUPA) or the DTSC Regional Office. When using these forms, verify that the beneficiary is the CUPA, rather than DTSC.
710. FINANCIAL INSTITUTION OR SURETY NAME -
711. FINANCIAL INSTITUTION OR SURETY ADDRESS -
712. FINANCIAL INSTITUTION OR SURETY CITY -
713. FINANCIAL INSTITUTION OR SURETY STATE -
714 FINANCIAL INSTITUTION OR SURETY ZIP CODE -

    For items 710-714, enter the name and address of the financial institution, insurance company, surety company, or other appropriate organization used to establish the closure financial assurance. Indicate your company if you are using a corporate guarantee and financial test.
715. SIGNER OF CERTIFICATION - Check the appropriate box to indicate whether the person certifying is the owner or the operator of the facility.
    SIGNATURE - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided. Certification must be completed as specified in Title 22, CCR, section 66270.11. The title should indicate that an appropriate authorized person is signing for the company. In most companies, this is not the environmental compliance or technical staff. Original signatures are required on all documents submitted.
716. DATE CERTIFIED - Enter the date that the document was signed
717. OWNER/ OPERATOR NAME - Enter the full printed name of the person signing the page.
718. OWNER/ OPERATOR TITLE - Enter the title of the person signing the page.

ACT

December 10, 2009

Mr. Michael Kierig

proposal #ultra121009-001

Ultratech
3050 Zanker Road
San Jose, CA

RE: Estimate for Closure of one(1) Waste Water Treatment Systems

Dear Mr. Kierig:

On behalf of Advanced Chemical Transport, Inc. (ACT) I am pleased to provide you with this estimate to clean, and decommission one (1) Waste Water Treatment Systems. The estimate is based on the information provided.

ACT will:

- Flush associated piping from unit
- Piping will be cut, capped to the tanks
- Field verification of pH will be conducted to verify corrosive materials have been neutralized
- The tanks will be cut up with electric saws and placed into bins for disposal
- The secondary containment will be decontaminated and ph Tested
- All waste generated from the project will be transported and disposed of as a hazardous waste.

Water and electrical to be provided by Ultratech in the work area. All electrical to be physically disconnected by others prior to our arrival. Unistrut/Supports to be left in place. The secondary containment will be left in place once cleaned.
All work as proposed is based on being performed Monday-Friday 8am-5pm excluding weekend, holiday, or overtime hours.

Terms are 30 days. Proposal and pricing is valid for 45 days.

UPCF Business Owner/Operator Identification Page Instructions

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all hazardous materials inventory submissions. For the inventory to be considered complete this page must be signed by the appropriate individual. [Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information.] Please number all pages of your submittal. This helps the Unified Program Agency (UPA) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.
3. BUSINESS NAME - Enter the doing business as name.
100. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)
101. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
102a. BUSINESS FAX – Enter the business fax number, area code first.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at **www.dnb.com**.
107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.
107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.
108. COUNTY - Enter the county in which the business site is located.
108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.
108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.
108c. STATE - Enter the two character abbreviation of the state for the business mailing address.
108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.
112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.
115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
119a. CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.
SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.
137. TITLE OF SIGNER - Enter the title of the person signing the page.

Ultratech
3050 Zanker Road
San Jose, CA

DRAFT

RE: Estimate for Closure of one(1) Waste Water Treatment Systems

Dear Mr. Kierig:

On behalf of Advanced Chemical Transport, Inc. (ACT) I am pleased to provide you with this estimate to clean, and decommission one (1) Waste Water Treatment Systems. The estimate is based on the information provided.

ACT will:

- Flush associated piping from unit
- Piping will be cut, capped to the tanks
- Field verification of pH will be conducted to verify corrosive materials have been neutralized
- The tanks will be cut up with electric saws and placed into bins for disposal
- The secondary containment will be decontaminated and ph Tested
- All waste generated from the project will be transported and disposed of as a hazardous waste.

Water and electrical to be provided by Ultratech in the work area. All electrical to be physically disconnected by others prior to our arrival. Unistrut/Supports to be left in place. The secondary containment will be left in place once cleaned.
All work as proposed is based on being performed Monday-Friday 8am-5pm excluding weekend, holiday, or overtime hours.

Terms are 30 days. Proposal and pricing is valid for 45 days.

COST ESTIMATE

FEES	
Estimated permit Fees	$ 500.00
LABOR	
20 hrs x 3 person crew (PM, 2 Techs) @ $ 180.00/hr	$ 3600.00
Closure Plan and Report	$ 1000.00
MATERIALS	
Saws, electrical, ladders, etc @ $ 500.00/project	$ 500.00
Gear Truck 3 days @ $ 100.00/day	$ 300.00
PPE per project @ $ 200.00/project	$ 200.00
Drums @ $ 200.00/job	$ 200.00
DISPOSAL	
20 yard bin NON RCRA HAZARDOUS WASTE SOLID @ $1800.00/bin	$ 1800.00
Drums of acid/base/rinse water @ $ 500.00/project	$ 500.00
TRANSPORTATION	
20 yard bin delivery /pickup/liner/rental 10 days	$ 1100.00
Misc drums @ $ 100.00/job	$ 100.00
TOTAL PROJECT ESTIMATE	$9800.00

DRAFT

To order the project please sign at the space indicated and fax back to my attention at (408) 548-5053. Please also contact me at (408) 548-5001 to answer any questions you may have or to set the schedule to complete the work.

Thank you for extending this opportunity to ACT. I look forward to working with you on this project.

Sincerely;
Advanced Chemical Transport

UPCF Business Owner/Operator Identification Page Instructions

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all hazardous materials inventory submissions. For the inventory to be considered complete this page must be signed by the appropriate individual. [Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information.] Please number all pages of your submittal. This helps the Unified Program Agency (UPA) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.
3. BUSINESS NAME - Enter the doing business as name.
100. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)
101. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
102a. BUSINESS FAX – Enter the business fax number, area code first.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at **www.dnb.com**.
107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.
107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.
108. COUNTY - Enter the county in which the business site is located.
108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.
108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.
108c. STATE - Enter the two character abbreviation of the state for the business mailing address.
108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.
112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.
115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
119a. CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.
SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.
137. TITLE OF SIGNER - Enter the title of the person signing the page.

PBR ONLY
- ☐ 1. Tank and container certifications, if required
- ☐ 2. Notification of local agency or agencies
- ☐ 3. Notification of property owner, if different from business owner

DRAFT

Onsite Hazardous Waste Treatment Notification – Facility Form Instructions
(Formerly DTSC Form 1772)

Complete this form if your facility performs onsite treatment of hazardous waste(s) generated onsite and the facility is eligible under the Conditional Exemption (CE), Conditional Authorization (CA), or Fixed Treatment Unit (FTU) Permit by Rule (PBR) tiers.

Submit one Onsite Hazardous Waste Treatment Notification - Facility page per facility, regardless of the number of treatment units located at the site. Attach separate Onsite Hazardous Waste Treatment Notification - Unit and Waste and Treatment Process Combinations pages for each treatment unit at the facility. Please number all pages of your submittal. (Note: Numbering of these instructions follows the UPCF data element numbers on the form.)

1. FACILITY ID NUMBER - This space is for agency use only.
3. BUSINESS NAME - Enter the complete Facility Name.
600. NOTIFICATION STATUS - Check whether this notification is your initial notification under the Tiered Permitting system; an amended notification; or, for PBR only, a renewal notification.
601. PERMIT STATUS - If this facility has a state-issued hazardous waste permit or grant of authorization, check the appropriate box to indicate the permit status.
602. NUMBER OF UNITS - Enter the number of units you operate at this facility in each permit tier or category.

SIGNATURE OF OWNER/OPERATOR - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided. In most companies, this is not the environmental compliance or technical staff. Original signatures are required.

603. DATE CERTIFIED - Enter the date the form was signed.
604. OWNER/ OPERATOR NAME - Print or type the full name of the person signing the page.
605. OWNER/ OPERATOR TITLE - Enter the title of the person signing the page.

REQUEST FOR SHORTENED REVIEW PERIOD - Generators operating under the PBR tier are not authorized until they are notified by their Certified Unified Program Agency (CUPA). Generators operating under CA and CE are legally authorized 60 days after submitting a complete notification. The time period between notification and authorization may be shortened if the owner or operator shows good cause. Check the appropriate box to indicate whether or not you are requesting to be authorized sooner than the standard 60-day period. If you check "Yes," state the reason(s) for your request (attach additional sheets if needed). Authorization will be automatically effective on the date the completed notification is received by your CUPA.

ATTACHMENTS - Check the appropriate boxes to indicate that all required document submittals are attached to this form. (*Note: Commercial Laundries are <u>not</u> required to provide attachments.*)

<u>ALL FACILITIES</u>:

1. Complete an Onsite Hazardous Waste Treatment Notification - Unit form and Waste and a Treatment Process Combinations form for each unit covered by this notification.
2. Provide a plot plan or map detailing the location(s) of the unit(s) at this facility. Clearly indicate the facility boundaries and major features. The Storage Map prepared for your Hazardous Materials Business Plan may be used as long as the unit numbers for the units covered by this notification are shown.

<u>PBR and CA ONLY</u>:*

1. Complete and attach the Certification of Financial Assurance for Closure (UPCF form HWF 1232). Check the appropriate box to indicate whether you have Self-Certified (closure costs must be less than $10,000) or are submitting a financial mechanism.
2. Prior Enforcement History information is required only if your facility was the subject of any convictions, judgments, settlements or final orders resulting from an action by any local, state, or federal environmental, hazardous waste, or public health enforcement agency. If applicable, attach a statement or summary that lists the cases for the last three years and provide a copy of the cover sheet from each document (conviction, settlement, etc.). The summary should include case and docket number, name and address of the agency, date, brief explanation, type of case (criminal, civil, administrative) and final resolution (including fines and penalties).

<u>PBR ONLY</u>:

1. 22 CCR §67450.2(b)(3)(G) requires that tank and/or containment system certifications be submitted, when applicable. Specific standards are in 22 CCR §66264.175(c) (containers) and 22 CCR §66265.191(a) and 66265.192(a) (tanks).
2. Notification of local agencies. Attach documentation of the other local agencies notified of your operation. (e.g. sewer agency).
3. Notification of property owner. If the property owner is different than the operator, provide documentation that the facility operator has notified the property owner of the operation of this hazardous waste treatment unit under PBR.

* For PBR and CA, a Phase I environmental assessment must be submitted to DTSC, not to your CUPA. The assessment checklist and instructions are available from DTSC. Call (916) 324-2423 or write to the DTSC-Unified Program Section at 400 P Street, 4th Floor, P.O. Box 806, Sacramento, CA 95182-0806. Completed Phase I assessments should be submitted to the same address.

I. FACILITY IDENTIFICATION

BUSINESS NAME (Same as FACILITY NAME or DBA - Doing Business As) 3.
Ultratech, Inc

FACILITY ID# 0 2 0 8 6 4 7 1.

II. STATUS

NOTIFICATION STATUS 600.
- ☒ a. Amended
- ☐ b. Initial
- ☐ c. Renewal (PBR Only)

PERMIT STATUS (Check all that apply) 601.
- ☒ a. Facility Permit
- ☐ b. Interim Status
- ☐ c. Standardized Permit
- ☐ d. Variance
- ☐ e. Consent Agreement

III. NUMBER OF UNITS AT FACILITY

(Indicate the number of units you operate in each tier. Attach one unit notification page for each unit except CE-CL)

602.

A. _____ Conditionally Exempt – Small Quantity Treatment (CESQT) (May not function under any other tier.)
B. _____ Conditionally Exempt Specified Wastestream (CESW)
C. 2 Conditionally Authorized (CA)
D. _____ Permit by Rule (PBR)
E. _____ Conditionally Exempt – Limited (CEL)
F. _____ Conditionally Exempt Commercial Laundry (CE-CL) (No unit page is required for laundries.)
G. _____ TOTAL UNITS (Must equal the number of unit notification pages attached plus the number of CE-CL units.)

IV. CERTIFICATION AND SIGNATURE

Waste Minimization - I certify that I have a program in place to reduce the volume, quantity and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment.

Tiered Permitting Certification - I certify that the unit or units described in these documents meet the eligibility and operating requirements of state statutes and regulations for the indicated permitting tier, including generator and secondary containment requirements. I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete.

I am aware that there are substantial penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

SIGNATURE OF OWNER/OPERATOR Bruce R. Wright

DATE 603. November 14, 2008

NAME OF OWNER/OPERATOR 604.
Bruce Wright

TITLE OF OWNER/OPERATOR 605.
Chief Financial Officer

REQUEST FOR SHORTENED REVIEW PERIOD (CE and CA only) ☐ Yes ☐ No

State Reason for Request: Developer waste discharge is hazardous with pH 13.5

V. ATTACHMENTS (Check if attached)

ALL tiers except CE-CL (Laundries) must submit:
- ☐ 1. One unit specific notification page and one treatment process page per unit
- ☐ 2. Plot Plan (or other grid/map)

PBR & CA ONLY:
- ☐ 1. Closure Financial Assurance (formerly DTSC form 1232)
  - ☐ Self Certified (< $10,000) ☐ Other mechanism
- ☐ 2. Prior Enforcement History, if applicable

PBR ONLY
- ☐ 1. Tank and container certifications, if required
- ☐ 2. Notification of local agency or agencies
- ☐ 3. Notification of property owner, if different from business owner

DRAFT

Onsite Hazardous Waste Treatment Notification – Facility Form Instructions
(Formerly DTSC Form 1772)

Complete this form if your facility performs onsite treatment of hazardous waste(s) generated onsite and the facility is eligible under the Conditional Exemption (CE), Conditional Authorization (CA), or Fixed Treatment Unit (FTU) Permit by Rule (PBR) tiers.

Submit one Onsite Hazardous Waste Treatment Notification - Facility page per facility, regardless of the number of treatment units located at the site. Attach separate Onsite Hazardous Waste Treatment Notification - Unit and Waste and Treatment Process Combinations pages for each treatment unit at the facility. Please number all pages of your submittal. (Note: Numbering of these instructions follows the UPCF data element numbers on the form.)

1. FACILITY ID NUMBER - This space is for agency use only.
3. BUSINESS NAME - Enter the complete Facility Name.
600. NOTIFICATION STATUS - Check whether this notification is your initial notification under the Tiered Permitting system; an amended notification; or, for PBR only, a renewal notification.
601. PERMIT STATUS - If this facility has a state-issued hazardous waste permit or grant of authorization, check the appropriate box to indicate the permit status.
602. NUMBER OF UNITS - Enter the number of units you operate at this facility in each permit tier or category.

SIGNATURE OF OWNER/OPERATOR - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided. In most companies, this is not the environmental compliance or technical staff. Original signatures are required.

603. DATE CERTIFIED - Enter the date the form was signed.
604. OWNER/ OPERATOR NAME - Print or type the full name of the person signing the page.
605. OWNER/ OPERATOR TITLE - Enter the title of the person signing the page.

REQUEST FOR SHORTENED REVIEW PERIOD - Generators operating under the PBR tier are not authorized until they are notified by their Certified Unified Program Agency (CUPA). Generators operating under CA and CE are legally authorized 60 days after submitting a complete notification. The time period between notification and authorization may be shortened if the owner or operator shows good cause. Check the appropriate box to indicate whether or not you are requesting to be authorized sooner than the standard 60-day period. If you check "Yes," state the reason(s) for your request (attach additional sheets if needed). Authorization will be automatically effective on the date the completed notification is received by your CUPA.

ATTACHMENTS - Check the appropriate boxes to indicate that all required document submittals are attached to this form. (*Note: Commercial Laundries are <u>not</u> required to provide attachments.*)

<u>ALL FACILITIES</u>:

1. Complete an Onsite Hazardous Waste Treatment Notification - Unit form and Waste and a Treatment Process Combinations form for each unit covered by this notification.
2. Provide a plot plan or map detailing the location(s) of the unit(s) at this facility. Clearly indicate the facility boundaries and major features. The Storage Map prepared for your Hazardous Materials Business Plan may be used as long as the unit numbers for the units covered by this notification are shown.

<u>PBR and CA ONLY</u>:*

1. Complete and attach the Certification of Financial Assurance for Closure (UPCF form HWF 1232). Check the appropriate box to indicate whether you have Self-Certified (closure costs must be less than $10,000) or are submitting a financial mechanism.
2. Prior Enforcement History information is required only if your facility was the subject of any convictions, judgments, settlements or final orders resulting from an action by any local, state, or federal environmental, hazardous waste, or public health enforcement agency. If applicable, attach a statement or summary that lists the cases for the last three years and provide a copy of the cover sheet from each document (conviction, settlement, etc.). The summary should include case and docket number, name and address of the agency, date, brief explanation, type of case (criminal, civil, administrative) and final resolution (including fines and penalties).

<u>PBR ONLY</u>:

1. 22 CCR §67450.2(b)(3)(G) requires that tank and/or containment system certifications be submitted, when applicable. Specific standards are in 22 CCR §66264.175(c) (containers) and 22 CCR §66265.191(a) and 66265.192(a) (tanks).
2. Notification of local agencies. Attach documentation of the other local agencies notified of your operation. (e.g. sewer agency).
3. Notification of property owner. If the property owner is different than the operator, provide documentation that the facility operator has notified the property owner of the operation of this hazardous waste treatment unit under PBR.

* For PBR and CA, a Phase I environmental assessment must be submitted to DTSC, not to your CUPA. The assessment checklist and instructions are available from DTSC. Call (916) 324-2423 or write to the DTSC-Unified Program Section at 400 P Street, 4th Floor, P.O. Box 806, Sacramento, CA 95182-0806. Completed Phase I assessments should be submitted to the same address.

BUSINESS SITE CITY San Jose	104.	CA ZIP CODE 95134 105.

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility…	If Yes, please complete these pages of the UPCF…	
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4.	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. CalARP REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release Prevention Program (CalARP)?	☐ YES ☒ NO 4a.	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES ☒ NO 5.	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers?	☐ YES ☒ NO 8.	No form required to CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES ☐ NO 9.	EPA ID NUMBER – provide at top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC §25143.2)?	☐ YES ☒ NO 10.	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste onsite?	☐ YES ☒ NO 11.	ONSITE HAZARDOUS WASTE TREATMENT – FACILITY ONSITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Perform treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☒ YES ☐ NO 12.	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13.	REMOTE WASTE CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14.	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more then 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste?	☐ YES ☒ NO 14a.	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Serve as a Household Hazardous Waste (HHW) Collection site?	☐ YES ☒ NO 14b.	See CUPA for required forms.

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

SECTION I: FACILITY INFORMATION

Instructions: Complete the following descriptive information about your facility. This information accurately describes the location of your facility and establishes mailing and phone contacts. If facility location and mailing address are identical, you may put "same" into facility mailing address spaces.

Type of Permit: Permit by Rule _____ Conditional Authorization X

1. CURRENT FACILITY NAME: Ultratech, Inc.

   PAST NAMES (Attach additional pages if necessary):

2. EPA I.D. NUMBER: CAD982517096

3. NAME OF FACILITY OWNER (see definition of owner): Ultratech, Inc.

4. NAME OF FACILITY OPERATOR: Ultratech, Inc.

5. NAME OF PROPERTY OWNER: Jones Lang LaSalle, Inc.

6. FACILITY LOCATION ADDRESS:

   STREET: 3050 Zanker Road & 2880 Junction Avenue

   CITY: San Jose

   COUNTY: Santa Clara

   STATE: CA ZIP CODE: 95134

7. FACILITY MAILING ADDRESS (if different from FACILITY LOCATION ADDRESS):

   STREET: 3050 Zanker Road

   CITY: San Jose

   STATE: CA ZIP CODE: 95134

8. FACILITY TELEPHONE NUMBER: (408) 321-8835

9. FACILITY FAX NUMBER: (408) 577-3582

10. NAME OF FACILITY CONTACT PERSON: Tom Tran

11. TITLE OF FACILITY CONTACT PERSON: EH&S Engineer

12. PHONE NUMBER OF FACILITY CONTACT PERSON: (408) 577-3101

DRAFT

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

13. ADDRESS OF FACILITY CONTACT PERSON:

STREET: 3050 Zanker Road

CITY: San Jose

STATE: CA ZIP CODE: 95134

SECTION II: FACILITY HISTORY

Instructions: Complete this section regarding facility history based on reasonably available knowledge of the facility. This section will determine if past operating practices and significant historical events that occurred at the facility indicate potential areas of contamination. Current and past employees who know about the facility's past operating practices can be an asset in completing this section of the checklist. Yes answers to these questions mean that careful attention must be paid to these areas and considerations when completing the facility walk-through inspection.

		YES	NO
1.	Has an environmental assessment and/or a site investigation report ever been completed for the facility? If this assessment meets the criteria for substituting for this checklist (see Instructions), use the Signature and Certification Page to record this exemption. You need not release confidential assessments. However, if these reports indicate existing or potential contamination, you must use the information relied on by the confidential report to help reach a conclusion in this assessment.		X
2.	To your knowledge, have areas of the facility that contain hazardous materials ever been flooded?		X
3.	To your knowledge, has the facility ever been damaged by an earthquake that could cause contamination?		X
4.	To your knowledge, has the location for the facility ever been used for industrial purposes prior to its current use? If YES, then consider potential contamination from the type of industry that the location was formerly used for.		X
5.	To your knowledge, has there been any disposing of hazardous chemicals or hazardous wastes in, on, or under the property?		X
6.	To your knowledge, has the facility ever had electrical transformers, capacitors, or hydraulic equipment including, but not limited to elevators and auto lifts, at the facility which may have released PCBs or oil to the environment? (Not including small quantities of fluorescent light ballasts and capacitors if these materials were not disposed of or dismantled at the facility) If YES, was the equipment ever tested for the presence of PCBs?		X
7.	To your knowledge, has testing of any groundwater wells on the property ever revealed possible contamination?		X
8.	Do you have in your possession, or do you know of the existence of any photographs, geophysical reports, analytical test data, and/or air sampling data that indicates the possible presence of hazardous materials and/or waste in unwarranted or unexpected areas of the facility?		X
9.	To your knowledge, has the facility ever had liquid/sludge containment area(s), surface impoundment(s), collection pond(s), and/or lagoon(s)?		X

DRAFT

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

10.	To your knowledge, have land-farming or bioremediation been used at the facility?		X
11.	To your knowledge, has the facility ever burned hazardous wastes, unidentified waste materials, tires, or automotive batteries at the facility?		X
12.	To your knowledge, have ash and/or combustion residuals been disposed of at the facility?		X
13.	To your knowledge, have any underground storage tank(s) been removed, abandoned, or taken out of service from the facility? Tanks removed, abandoned, or taken out of service under the oversight of a responsible agency need not be considered if the agency addressed potential contamination at the tank location.		X
14.	To your knowledge, has any contaminated soil been discovered and/or remediated at the facility without oversight by an appropriate regulatory agency?		X
15.	To your knowledge, have there been fires and/or explosions at the facility which may have caused a release of hazardous waste or materials?		X
16.	To your knowledge, has the facility ever received complaints from any employees, neighbors, or the public about the facility's practices for managing hazardous wastes, or any actual or potential releases to air, water, or soil, or other environmental issues?		X
17.	To your knowledge, have nearby residents complained to a governmental agency of any type of illnesses or unusual illnesses as having been caused or suspectedly caused by or related to activities at the facility? (Note: this item does not require questioning the facility's neighbors) If YES, indicate below the person and/or agency who recorded the complaint. _____ If YES, to your knowledge, has any evidence been submitted to a physician to substantiate the claim?		X
18.	To your knowledge, are there any areas at the facility which were formerly used for hazardous waste or hazardous materials transfer (e.g. tank loading areas, drum transfer areas)?	X	
19.	To your knowledge, are there, or have there been lawsuits or administrative proceedings concerning an actual, alleged, or threatened release of any hazardous substance against the facility by another party? Only actions concluded by settlement or litigation need be considered.		X

DRAFT

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

SECTION IV: FACILITY WALK-THROUGH INSPECTION - OTHER AREAS

Instructions: This section of the checklist requires the owner and/or operator of the facility to conduct a walk-through inspection of the those portions of the facility not addressed in Section III in order to identify possible environmental problems, environmental warning signs or potential exposure to people, animals, or plants. Some of the problems that may be discovered during this inspection include abandoned storage tanks, spill areas, surface impoundments, etc. Some of the environmental warning signs include stains, discolored vegetation, and/or unnatural terrain. During the inspection, were any of the following present:

		YES	NO
1.	Does the facility have vent pipes, fill pipes, and/or access routes that may indicate the presence of an underground storage tank?		X
2.	Does the facility have stains and/or discolorations of the soil, flooring, drains and/or walls at the facility which may indicate a release to the environment that has not or is not being addressed under the oversight of an appropriate agency?		X
3.	Does the facility have areas of soil at the facility that appear disturbed and which may indicate onsite disposal or land treatment of hazardous materials or remediation of releases without oversight by an appropriate agency?		X
4.	Does the facility have areas at the facility where the terrain appears unnatural, such as unexplained mounds or depressions?		X
5.	Does the facility have unusual smells or odors emanating from the soil, floor, drains, and/or walls at the facility?		X
6.	Does the facility have dead, abnormal, or distressed-looking vegetation or conspicuous absence of vegetation at the facility that is not directly explainable by a deliberate action and/or lack of water at the site?		X

7. Where does rain and/or washwater drain to at the facility? (circle all that apply) Note: slightly contaminated storm or washwater can seriously contaminate evaporation or settling areas (with no drainage) over a period of time.

(a. Storm Drain) (b. Sewer)
c. Drainage Ditch
d. Open Land
e. Areas of pooling, settling, or evaporation
f. Other _____

AREA OF CONCERN DATASHEET

Instructions: Complete the following questions in detail for EACH release or suspected release identified in Section III FACILITY WALK-THROUGH INSPECTION - SPECIFIC AREAS or SECTION IV FACILITY WALK-THROUGH INSPECTION - OTHER AREAS and any other known or suspected releases. Do not include areas that have been or are being remediated under the oversight of an appropriate agency.
If answers to questions are not known, then state "unknown".

1. Facility name:

2. This sheet is being completed for a:

   Known release _____ Suspected release _____

3. How was this release or suspected release discovered?

   During the walk-through inspection? _____ Previously known release? _____

   What checklist question(s) are related to this release (section/question)_____

4. When did the release occur?

5. What was released and how much?

6. What caused the release?

7. Indicate the approximate area of the release (e.g. 3 feet in diameter, 5 feet X 4 feet.)

8. Was the release remediated? If YES, explain how. (Note: A datasheet need not be completed for releases remediated or being remediated under the oversight of an appropriate agency.

9. Were samples collected? If yes, what were the results?

10. List any environmental reports or studies performed on the area of concern and attach copies or summaries of the reports not submitted to the Department.

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

SECTION III: FACILITY WALK-THROUGH INSPECTION - SPECIFIC AREAS

Instructions: List each area of the facility where hazardous materials are present. The listing area is divided into functional divisions for convenience. Individual units may be grouped on the chart, but must be individually inspected. Carefully examine each of these areas during the walk-through inspection to determine the presence of releases or possible releases and record the results in the appropriate column, date and initial the entry. Complete a Release Information Data Sheet for each actual and possible release found. Using your best judgement, decide if any actual or suspected releases found require further investigation and record the results on the Release Information Data Sheet and in the appropriate column on this chart. If uou need additional space, photocopy this sheet.

HAZARDOUS MATERIAL AREA	INSPECTED (Yes or No)	ACTUAL OR SUSPECTED RELEASE (Yes or No)	REQUIRES FURTHER INVESTIGATION (Yes or No)

SIGNATURE AND CERTIFICATION FOR PERMIT-BY-RULE AND CONDITIONAL AUTHORIZATION

Instructions: Carefully read the certification below. If you feel uncomfortable signing this certification, review the instructions and the information developed in the preparation of the checklist and correct any deficiencies you have found. Be sure that you check one of the boxes below to record your decision regarding further investigation. If you are claiming exemption from completing a Phase I Environmental Assessment, complete that section below.

Either the owner, operator, or independent professional engineer, geologist, or an environmental assessor who is registered in the State of California, shall certify to the following statement by signing on the appropriate lines below:

___ Yes, further investigation is needed to determine the existence, nature, and/or extent of contamination at the facility; or

_X_ No, further investigation is not necessary to determine the existence, nature, and/or extent of contamination at the facility.

___ I am exempt from completing the checklist and/or from resulting followup work. [Please state reason for exemption below and supply documentary evidence (see instructions)]. Explanation:

_____

_____

"Under penalty of perjury, I certify that I have personally examined and am familiar with the information submitted in this document and all attachments, and based on my inquiry of those individuals immediately responsible for obtaining it, the information is true, accurate, and complete to the best of my knowledge. Thus informed, I certify to my best judgement that the conclusion recorded above regarding further investigation or exemption from completion of the Phase I Environmental Assessment is correct."

DRAFT

RE: Estimate for Closure of one(1) Waste Water Treatment Systems

Dear Mr. Kierig:

On behalf of Advanced Chemical Transport, Inc. (ACT) I am pleased to provide you with this estimate to clean, and decommission one (1) Waste Water Treatment Systems. The estimate is based on the information provided.

ACT will:

- Flush associated piping from unit
- Piping will be cut, capped to the tanks
- Field verification of pH will be conducted to verify corrosive materials have been neutralized
- The tanks will be cut up with electric saws and placed into bins for disposal
- The secondary containment will be decontaminated and ph Tested
- All waste generated from the project will be transported and disposed of as a hazardous waste.

Water and electrical to be provided by Ultratech in the work area. All electrical to be physically disconnected by others prior to our arrival. Unistrut/Supports to be left in place. The secondary containment will be left in place once cleaned.
All work as proposed is based on being performed Monday-Friday 8am-5pm excluding weekend, holiday, or overtime hours.

Terms are 30 days. Proposal and pricing is valid for 45 days.

COST ESTIMATE

FEES	
Estimated permit Fees	$ 500.00
LABOR	
20 hrs x 3 person crew (PM, 2 Techs) @ $ 180.00/hr	$ 3600.00
Closure Plan and Report	$ 1000.00

Instructions for Completing the Certification Of Financial Assurance for Permit by Rule and Conditionally Authorized Onsite Treaters (Formerly DTSC Form 1232)

This form must be completed by the owner or operator of a Fixed Treatment Unit (FTU) operating under Permit by Rule (PBR), or a hazardous waste generator operating pursuant to a grant of Conditional Authorization (CA). If this is a new facility, this certification should be attached to the Onsite Hazardous Waste Treatment Notification - Facility page. If this is an existing facility and you have previously submitted a Notification, this certification and your financial assurance mechanism may be submitted without another Notification. Refer to 22 CCR §67450.13 for financial assurance requirements.

PBR and CA operations must provide evidence of financial assurance to cover closure costs. However, you are eligible for an exemption from financial assurance requirements if closure cost estimates are not more than $10,000. You must complete this form even if you qualify for an exemption.

An adjustment to the closure cost estimate for inflation is required to be completed by March 1 of each year. See H&SC §67450.13(a)(2) for instructions on calculating the adjustment. This updated closure cost estimate must be maintained at the facility. Please number all pages of your submittal. (Note: Numbering of these instructions follows the UPCF data element numbers on the form.)

1. FACILITY ID NUMBER - This number is for agency use only. Leave this space blank.
2. EPA ID NUMBER - Enter the EPA ID Number for the facility.
3. BUSINESS NAME - Enter the complete Facility Name.
700. CERTIFICATION STATUS - Check the appropriate box to identify the type of certification.
701. TYPE OF OPERATION - Check the type of operation. If type of operation is not listed, check "Other" and indicate type in the space provided.
702. ESTIMATED CLOSURE COSTS - Enter the total estimated cost of closing each treatment unit and attach a written estimate of the closure costs. The estimated closure cost may be either the actual cost or the estimated cost when using your own staff and/or equipment. The closure cost estimate may take into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. The following is a model closure cost estimate (NOTE: For PBR only, if you have operated under PBR for less than 30 days in any calendar year, you qualify for an exemption. If eligible for this exemption, enter "EXEMPT" on the form in place of a dollar amount):

ACTIVITY	COST
a. Removal, treatment (on-site or off-site), or disposal of waste inventories	$ 2300
b. Removal and disposal of soil	$
c. Decontamination of equipment and structure	$ 3400
d. Demolition and removal of containment system components or structure	$ 2400
e. Transportation	$ 1200
f. Sampling and analysis of waste, soil, equipment, and structure	$
g. Certification or other demonstration of closure ("clean" closure or specified level of decontamination)	$ 500
h. Other expenses (specify)	$
i. Less Assets (salvage value of waste, equipment or property)	$
TOTAL COST OF CLOSURE	$ 9,800

703. EXEMPTION FROM FINANCIAL ASSURANCE - Check this box to claim the exemption from the financial assurance requirements for total closure cost estimate less than or equal to $10,000. A model letter using the required certifications must be submitted to claim this exemption.
704. EXEMPTION FROM FINANCIAL ASSURANCE - OTHER - Check to claim "Other" reason for exemption from financial assurance requirements. Describe the reason for the exemption in the space provided. Reference the applicable statute or regulation granting the exemption.
705. EXEMPTION FROM FINANCIAL ASSURANCE - <30 DAYS PER YEAR - Check to claim the exemption from financial assurance requirements if owner or operator under PBR only and operating no more than thirty days in any calendar year.
706. REQUIREMENT FOR FINANCIAL ASSURANCE - Check to indicate that the financial assurance mechanism is attached.
707. DATE OF CLOSURE ASSURANCE MECHANISM - Enter the effective date of the financial assurance mechanism.
708. MECHANISM ID NUMBER - If applicable, enter an identifying number for the closure assurance mechanism (e.g. insurance policy number).
709. CLOSURE ASSURANCE MECHANISM - Check to indicate the type of financial mechanism used to provide the closure cost assurance. Eligible types are:
    a. A closure trust fund, as provided in 22 CCR §66265.143(a) [NOTE: You must also complete DTSC Form 1154];
    b. A surety bond guaranteeing payment into a closure trust fund, as described in 22 CCR §66265.143(b) [NOTE: You must also complete either DTSC Form 1155 or 1156 with DTSC Form 1154];
    c. A closure letter of credit, as described in 22 CCR §66265.143(c) [NOTE: Also complete DTSC Form 1157];
    d. Closure insurance, as described in 22 CCR §66265.143(d) [NOTE: Also complete DTSC Form 1158];
    e. A financial test and corporate guarantee for closure, as described in 22 CCR §66265.143(e) [NOTE: Also complete either DTSC Form 1159 or 1173];
    f. An alternative mechanism for closure costs, as described in 22 CCR §67450.13(c);
    g. Use of multiple financial mechanisms for closure costs, as described in 22 CCR §66265.143(g);
    h. A certificate of deposit, as described in section 3-104(2)(c) of the Uniform Commercial Code;
    i. A savings account, as described in section 4-104(a) of the Uniform Commercial Code.

    These mechanisms require use of the additional DTSC Financial Assurance forms referenced above. These forms are available from your Certified Unified Program Agency (CUPA) or the DTSC Regional Office. When using these forms, verify that the beneficiary is the CUPA, rather than DTSC.
710. FINANCIAL INSTITUTION OR SURETY NAME -
711. FINANCIAL INSTITUTION OR SURETY ADDRESS -
712. FINANCIAL INSTITUTION OR SURETY CITY -
713. FINANCIAL INSTITUTION OR SURETY STATE -
714 FINANCIAL INSTITUTION OR SURETY ZIP CODE -

    For items 710-714, enter the name and address of the financial institution, insurance company, surety company, or other appropriate organization used to establish the closure financial assurance. Indicate your company if you are using a corporate guarantee and financial test.
715. SIGNER OF CERTIFICATION - Check the appropriate box to indicate whether the person certifying is the owner or the operator of the facility.
    SIGNATURE - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided. Certification must be completed as specified in Title 22, CCR, section 66270.11. The title should indicate that an appropriate authorized person is signing for the company. In most companies, this is not the environmental compliance or technical staff. Original signatures are required on all documents submitted.
716. DATE CERTIFIED - Enter the date that the document was signed
717. OWNER/ OPERATOR NAME - Enter the full printed name of the person signing the page.
718. OWNER/ OPERATOR TITLE - Enter the title of the person signing the page.

San Jose, CA

DRAFT

RE: Estimate for Closure of one(1) Waste Water Treatment Systems

Dear Mr. Kierig:

On behalf of Advanced Chemical Transport, Inc. (ACT) I am pleased to provide you with this estimate to clean, and decommission one (1) Waste Water Treatment Systems. The estimate is based on the information provided.

ACT will:

- Flush associated piping from unit
- Piping will be cut, capped to the tanks
- Field verification of pH will be conducted to verify corrosive materials have been neutralized
- The tanks will be cut up with electric saws and placed into bins for disposal
- The secondary containment will be decontaminated and ph Tested
- All waste generated from the project will be transported and disposed of as a hazardous waste.

Water and electrical to be provided by Ultratech in the work area. All electrical to be physically disconnected by others prior to our arrival. Unistrut/Supports to be left in place. The secondary containment will be left in place once cleaned.
All work as proposed is based on being performed Monday-Friday 8am-5pm excluding weekend, holiday, or overtime hours.

Terms are 30 days. Proposal and pricing is valid for 45 days.

COST ESTIMATE

FEES	
Estimated permit Fees	$ 500.00
LABOR	
20 hrs x 3 person crew (PM, 2 Techs) @ $ 180.00/hr	$ 3600.00
Closure Plan and Report	$ 1000.00
MATERIALS	
Saws, electrical, ladders, etc @ $ 500.00/project	$ 500.00
Gear Truck 3 days @ $ 100.00/day	$ 300.00
PPE per project @ $ 200.00/project	$ 200.00
Drums @ $ 200.00/job	$ 200.00
DISPOSAL	
20 yard bin NON RCRA HAZARDOUS WASTE SOLID @ $1800.00/bin	$ 1800.00
Drums of acid/base/rinse water @ $ 500.00/project	$ 500.00
TRANSPORTATION	
20 yard bin delivery /pickup/liner/rental 10 days	$ 1100.00
Misc drums @ $ 100.00/job	$ 100.00
TOTAL PROJECT ESTIMATE	$9800.00

Instructions for Completing the Certification Of Financial Assurance for Permit by Rule and Conditionally Authorized Onsite Treaters (Formerly DTSC Form 1232)

This form must be completed by the owner or operator of a Fixed Treatment Unit (FTU) operating under Permit by Rule (PBR), or a hazardous waste generator operating pursuant to a grant of Conditional Authorization (CA). If this is a new facility, this certification should be attached to the Onsite Hazardous Waste Treatment Notification - Facility page. If this is an existing facility and you have previously submitted a Notification, this certification and your financial assurance mechanism may be submitted without another Notification. Refer to 22 CCR §67450.13 for financial assurance requirements.

PBR and CA operations must provide evidence of financial assurance to cover closure costs. However, you are eligible for an exemption from financial assurance requirements if closure cost estimates are not more than $10,000. You must complete this form even if you qualify for an exemption.

An adjustment to the closure cost estimate for inflation is required to be completed by March 1 of each year. See H&SC §67450.13(a)(2) for instructions on calculating the adjustment. This updated closure cost estimate must be maintained at the facility. Please number all pages of your submittal. (Note: Numbering of these instructions follows the UPCF data element numbers on the form.)

1. FACILITY ID NUMBER - This number is for agency use only. Leave this space blank.
2. EPA ID NUMBER - Enter the EPA ID Number for the facility.
3. BUSINESS NAME - Enter the complete Facility Name.

700. CERTIFICATION STATUS - Check the appropriate box to identify the type of certification.

701. TYPE OF OPERATION - Check the type of operation. If type of operation is not listed, check "Other" and indicate type in the space provided.

702. ESTIMATED CLOSURE COSTS - Enter the total estimated cost of closing each treatment unit and attach a written estimate of the closure costs. The estimated closure cost may be either the actual cost or the estimated cost when using your own staff and/or equipment. The closure cost estimate may take into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. The following is a model closure cost estimate (NOTE: For PBR only, if you have operated under PBR for less than 30 days in any calendar year, you qualify for an exemption. If eligible for this exemption, enter "EXEMPT" on the form in place of a dollar amount):

ACTIVITY	COST
a. Removal, treatment (on-site or off-site), or disposal of waste inventories	$ _____
b. Removal and disposal of soil	$ _____
c. Decontamination of equipment and structure	$ _____
d. Demolition and removal of containment system components or structure	$ _____
e. Transportation	$ _____
f. Sampling and analysis of waste, soil, equipment, and structure	$ _____
g. Certification or other demonstration of closure ("clean" closure or specified level of decontamination)	$ _____
h. Other expenses (specify)	$ _____
i. Less Assets (salvage value of waste, equipment or property)	$ _____
TOTAL COST OF CLOSURE	$ _____

703. EXEMPTION FROM FINANCIAL ASSURANCE - Check this box to claim the exemption from the financial assurance requirements for total closure cost estimate less than or equal to $10,000. A model letter using the required certifications must be submitted to claim this exemption.

704. EXEMPTION FROM FINANCIAL ASSURANCE - OTHER - Check to claim "Other" reason for exemption from financial assurance requirements. Describe the reason for the exemption in the space provided. Reference the applicable statute or regulation granting the exemption.

705. EXEMPTION FROM FINANCIAL ASSURANCE - <30 DAYS PER YEAR - Check to claim the exemption from financial assurance requirements if owner or operator under PBR only and operating no more than thirty days in any calendar year.

706. REQUIREMENT FOR FINANCIAL ASSURANCE - Check to indicate that the financial assurance mechanism is attached.

707. DATE OF CLOSURE ASSURANCE MECHANISM - Enter the effective date of the financial assurance mechanism.

708. MECHANISM ID NUMBER - If applicable, enter an identifying number for the closure assurance mechanism (e.g. insurance policy number).

709. CLOSURE ASSURANCE MECHANISM - Check to indicate the type of financial mechanism used to provide the closure cost assurance. Eligible types are:
   a. A closure trust fund, as provided in 22 CCR §66265.143(a) [NOTE: You must also complete DTSC Form 1154];
   b. A surety bond guaranteeing payment into a closure trust fund, as described in 22 CCR §66265.143(b) [NOTE: You must also complete either DTSC Form 1155 or 1156 with DTSC Form 1154];
   c. A closure letter of credit, as described in 22 CCR §66265.143(c) [NOTE: Also complete DTSC Form 1157];
   d. Closure insurance, as described in 22 CCR §66265.143(d) [NOTE: Also complete DTSC Form 1158];
   e. A financial test and corporate guarantee for closure, as described in 22 CCR §66265.143(e) [NOTE: Also complete either DTSC Form 1159 or 1173];
   f. An alternative mechanism for closure costs, as described in 22 CCR §67450.13(c);
   g. Use of multiple financial mechanisms for closure costs, as described in 22 CCR §66265.143(g);
   h. A certificate of deposit, as described in section 3-104(2)(c) of the Uniform Commercial Code;
   i. A savings account, as described in section 4-104(a) of the Uniform Commercial Code.

   These mechanisms require use of the additional DTSC Financial Assurance forms referenced above. These forms are available from your Certified Unified Program Agency (CUPA) or the DTSC Regional Office. When using these forms, verify that the beneficiary is the CUPA, rather than DTSC.

710. FINANCIAL INSTITUTION OR SURETY NAME -
711. FINANCIAL INSTITUTION OR SURETY ADDRESS -
712. FINANCIAL INSTITUTION OR SURETY CITY -
713. FINANCIAL INSTITUTION OR SURETY STATE -
714 FINANCIAL INSTITUTION OR SURETY ZIP CODE -

For items 710-714, enter the name and address of the financial institution, insurance company, surety company, or other appropriate organization used to establish the closure financial assurance. Indicate your company if you are using a corporate guarantee and financial test.

715. SIGNER OF CERTIFICATION - Check the appropriate box to indicate whether the person certifying is the owner or the operator of the facility.
   SIGNATURE - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided. Certification must be completed as specified in Title 22, CCR, section 66270.11. The title should indicate that an appropriate authorized person is signing for the company. In most companies, this is not the environmental compliance or technical staff. Original signatures are required on all documents submitted.

DRAFT

Certification Of Financial Assurance

This page is to be completed by the owner or operator of a Fixed Treatment Unit operating under Permit by Rule (PBR), or a generator operating pursuant to a grant of Conditional Authorization (CA). If this is a new facility, this certification should be attached to the Onsite Hazardous Waste Treatment Notification - Facility page. If this is an existing facility and you have previously submitted a Notification, the certification and the financial assurance mechanism may be submitted without another notification.

Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (22 CCR §67450.13(b) and HSC §25245.4). However, you are eligible for an exemption from financial assurance requirements if closure cost estimates are not more than $10,000 (22 CCR §67450.13(d)). PBR operations that operated less than thirty (30) days in any calendar year are also eligible for an exemption (22 CCR §67450.13(e)). Complete the page even if you qualify for an exemption.

An adjustment to the closure cost estimate for inflation is required to be completed by March 1 of each year. See 22 CCR §67450.13(a)(2) for instructions on calculating the adjustment. This updated closure cost estimate must be maintained at the facility. If your cost estimate now exceeds $10,000 for the first time, you must submit this Certification and a closure cost estimate within 30 days to your CUPA or authorized agency. If the cost estimate adjustment results in an increase and requires a change in your financial mechanism, submit this certification and revised mechanism **within 60 days** (§66265.143). Any change in information affecting the closure cost estimate or mechanism must be submitted within 30 days to your CUPA or authorized agency. Refer to 22 CCR §67450.13 for financial assurance requirements.

(Note: the numbering of the instructions follows the data element numbers that are on the UPCF pages. These data element numbers are used for electronic submission and are the same as the numbering used in 27 CCR, Appendix C, the Business Section of the Unified Program Data Dictionary.)
Please number all pages of your submittal. This helps the Department of Toxic Substances Control (DTSC) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by DTSC. This is the unique number which identifies your facility.
2. EPA ID NUMBER - Enter the EPA ID number for the facility.
3. BUSINESS NAME - Enter the full legal name of the business.

700. CERTIFICATION STATUS - Check the reason the certification is being completed.

701. TYPE OF OPERATION - Check the type of operation. If type of operation is not listed, check "other" and indicate type in the space provided.

702. ESTIMATED CLOSURE COSTS - Enter the total estimated cost of closing each treatment unit and attach a written estimate of the closure costs. The estimated closure cost may be either the actual cost or the estimated cost when using your own staff and/or equipment. The closure cost estimate may take into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. Following is a model closure cost estimate:

ACTIVITY	COST
1. Removal, treatment (on-site or off-site), or disposal of waste inventories	**$3300**
2. Removal and disposal of soil	
3. Decontamination of equipment and structure	**$6685**
4. Demolition and removal of containment system components or structure	**$5685**
5. Transportation	**$2800**
6. Sampling and analysis of waste, soil, equipment, and structure	
7. Certification or other demonstration of closure ("clean" closure or specified level of decontamination)	**$500**
8. Other expenses (specify) **Consultant**	**$500**
9. Less Assets (salvage value of waste, equipment or property)	
TOTAL COST OF CLOSURE	**$19,470 (2) or $9735 per unit**

NOTE: For PBR only, if you have operated under PBR for less than 30 days in any calendar year, you qualify for an exemption. If eligible for the exemption, enter "EXEMPT" in this space.

703. EXEMPTION FROM FINANCIAL ASSURANCE - Check to claim the exemption from the financial assurance requirements for total closure cost estimate less than or equal to $10,000. A model letter using the required certifications must be submitted to claim this exemption.

704. EXEMPTION FROM FINANCIAL ASSURANCE - OTHER - Check to claim "other" reason for exemption from financial assurance requirements. Describe the reason for the exemption in the space provided. Reference the applicable statute or regulation granting the exemption.

705. EXEMPTION FROM FINANCIAL ASSURANCE - <30 DAYS PER YEAR - Check to claim the exemption from financial assurance requirements for owner or operator under PBR only and operating no more than thirty days in any calendar year.

706. REQUIREMENT FOR FINANCIAL ASSURANCE - Check to indicate whether the financial assurance mechanism is attached.

707. DATE OF CLOSURE ASSURANCE MECHANISM - Enter the effective date of the closure financial assurance mechanism.

708. MECHANISM ID NUMBER - If applicable, enter the number of the closure assurance mechanism, for example, the insurance policy number.

709. CLOSURE ASSURANCE MECHANISM - Check to indicate the type of financial mechanism established to provide the closure cost assurance. Eligible types are contained in 22 CCR §67450.13(a)(5). They are:
1. A closure trust fund, as provided in 22 CCR 66265.143(a); DTSC Form 1154
2. A surety bond guaranteeing payment into a closure trust fund, as described in 22 CCR 66265.143(b); either DTSC Form 1155 or 1156 with DTSC Form 1154
3. A closure letter of credit, as described in 22 CCR 66265.143(c); DTSC Form 1157
4. Closure insurance, as described in 22 CCR 66265.143(d); DTSC Form 1158
5. A financial test and corporate guarantee for closure, as described in 22 CCR 66265.143(e); either DTSC Form 1159 or 1173
6. An alternative mechanism for closure costs, as described in 22 CCR 67450.13(c); (no form)
7. Use of multiple financial mechanisms for closure costs, as described in 22 CCR 66265.143(g); (no form)
8. A certificate of deposit, as described in section 3-104(2)(c) of the Uniform Commercial Code; (no form) or,
9. A savings account, as described in section 4-104(a) of the Uniform Commercial Code; (no form).

These mechanisms require use of the additional DTSC Financial Assurance forms referenced above. These forms are available from the CUPA or the DTSC Regional Office. When using these forms, verify that the beneficiary is the CUPA, rather than DTSC.

710. FINANCIAL INSTITUTION OR SURETY NAME 711. FINANCIAL INSTITUTION OR SURETY ADDRESS 712. FINANCIAL INSTITUTION OR SURETY CITY 713. FINANCIAL INSTITUTION OR SURETY STATE 714. FINANCIAL INSTITUTION OR SURETY ZIP CODE	For items **710 - 714**, enter the name and address of the financial institution, insurance company, surety company, or other appropriate organization used to establish the closure financial assurance. Indicate your company if you are using a corporate guarantee and financial test.

715. SIGNER OF CERTIFICATION - Check to indicate whether the person certifying is the owner or the operator of the facility.
SIGNATURE - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided. The authorized signatory must be completed as specified in Title 22, CCR, section 66270.11. In most companies, this is not the environmental compliance or technical staff. The title should indicate that an appropriate authorized person is signing for the company. Original signatures are required on all documents submitted.

716. DATE CERTIFIED - Enter the date that the document was signed
717. OWNER/ OPERATOR NAME - Enter the full printed name of the person signing the page.
718. OWNER/ OPERATOR TITLE - Enter the title of the person signing the page.

ACT

Advanced Chemical Transport

September 24, 2008

Mr. Tom Tran

proposal #ultra092408-001

Ultratech
3050 Zanker Road
San Jose, CA

RE: Estimate for Closure of two (2) Waste Water Treatment Systems

Dear Mr. Tran:

On behalf of Advanced Chemical Transport, Inc. (ACT) I am pleased to provide you with this estimate to clean, and decommission two (2) Waste Water Treatment Systems. The estimate is based on the information provided.

ACT will:

- Flush associated piping from each unit
- Piping will be cut, capped to the tanks
- Field verification of pH will be conducted to verify corrosive materials have been neutralized
- The tanks will be cut up with electric saws and placed into bins for disposal
- The secondary containment will be decontaminated and ph Tested
- All waste generated from the project will be transported and disposed of as a hazardous waste.

Water and electrical to be provided by Ultratech in the work area. All electrical to be physically disconnected by others prior to our arrival. Unistrut/Supports to be left in place. The secondary containment will be left in place once cleaned.
All work as proposed is based on being performed Monday-Friday 8am-5pm excluding weekend, holiday, or overtime hours.

Terms are 30 days. Proposal and pricing is valid for 45 days.

VIOLATIONS: Codes noted below in the "Violation Codes" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies.
This facility may be subject to reinspection at any time. Consent to Inspect Given By: _____

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
	Hazardous Waste inspection conducted at the above facility. No Hazardous Waste violations observed. Facility submitted On-site Hazardous Waste Treatment Notification for 3050 Zanker Rd. facility.	
-	Observed waste water from Cooling Water Tank disposed as Non-Hazardous Waste. Submit a current waste determination for this waste stream and submit to this department within 30 days to verify proper handling and disposal of the waste.	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25404.1.2(c)(1) of California Health and Safety Code (HSC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to HMCD within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. ***(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)***

Received by: _____ Inspected by: _____ Entered by: _____

Certification: I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator: _____ Title: _____ Date: ___/___/___

FACILITY SENDS YELLOW COPY TO AGENCY, KEEPS PINK COPY.

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), *a false statement that compliance has been achieved is a misdemeanor.***
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

Dear Conditionally Authorized Facility:

ACKNOWLEDGEMENT OF UNIT OPERATING UNDER CONDITIONAL AUTHORIZATION

Santa Clara County Hazardous Materials Compliance Division has received your facility specific **initial** notification and forms for your Conditional Authorization (CA) treatment unit (1). Your notifications are administratively complete, but have not been reviewed for technical adequacy. A technical review of your notifications will be conducted when an inspection is performed. At any time, you may be inspected and could be subject to penalty if violations of laws or regulations are found. A copy of a Tiered Permit Audit Checklist for CA can be obtained from website: www.EHinfo.org.

This office acknowledges receipt of your completed notification for the treatment unit(s) listed on the last page of this letter. The unit (T-1) operating under Conditional Authorization (CA) is authorized by California law without additional action, pursuant to Health and Safety Code sections 25201.5, 25144.6, 25201.14 and 25201.4.1. ANNUAL RENEWAL IS NOT REQUIRED FOR THE UNITS OPERATING UNDER THIS PERMITTING TIER. Your authorization to operate continues until you notify our office that you have stopped treating waste and have fully closed the unit(s). The annual permit fee for CA Tier is $1,290.00. The San Jose Fire Department will be invoicing you for this fee at a later date.

You must notify this office 60 days before first treating hazardous wastes in any new unit. You must also notify this office whenever any of the information you provided in these notifications changes and when the units have been closed. To revise information, mail a cover letter to the above address explaining the changes, attach only the pages of your notification package that have changed, and re-sign and date at the signature space on the Facility page of the Unified Program Consolidated Form (UPCF). Forms are available on the website: www.EHinfo.org.

Board of Supervisors: Donald F. Gage, George Shirakawa, Dave Cortese, Ken Yeager, Liz Kniss
County Executive: Jeffrey V. Smith

EPA ID: CAD982517096

Your status to operate under Conditional Authorization Tier is contingent upon the accuracy of information submitted by you in the notifications mentioned above, and your compliance with all applicable requirements in the Health and Safety Code. You are required to properly close any treatment unit. Additional guidance on closure will be issued from this office upon request.

Since your facility is operating pursuant to Conditional Authorization, you are responsible for complying with Section 25200.14 of the Health and Safety Code by completing a preliminary site assessment (Phase I Environmental Assessment).. Form DTSC 1151 (Phase I Assessment checklist) is required to be submitted to the Department of Toxic Substances Control at the address noted on the form. The form is available on website:www.dtsc.ca.gov. Submittal must be completed within one year from receipt of this letter. We are requesting that you also submit a copy of the completed Phase I Assessment checklist to this office.

In addition you must annually certify that you have established and maintain a waste minimization program to reduce the volume or quantity and toxicity of the hazardous waste you generate pursuant to Health and Safety Code Section 25202.9.

If you have any questions regarding this letter, or have questions on operating requirements for your facility, please contact me at 408-918-1985.

Sincerely,

Ruben Williams

Certification Of Financial Assurance

This page is to be completed by the owner or operator of a Fixed Treatment Unit operating under Permit by Rule (PBR), or a generator operating pursuant to a grant of Conditional Authorization (CA). If this is a new facility, this certification should be attached to the Onsite Hazardous Waste Treatment Notification - Facility page. If this is an existing facility and you have previously submitted a Notification, the certification and the financial assurance mechanism may be submitted without another notification.

Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (22 CCR §67450.13(b) and HSC §25245.4). However, you are eligible for an exemption from financial assurance requirements if closure cost estimates are not more than $10,000 (22 CCR §67450.13(d)). PBR operations that operated less than thirty (30) days in any calendar year are also eligible for an exemption (22 CCR §67450.13(e)). Complete the page even if you qualify for an exemption.

An adjustment to the closure cost estimate for inflation is required to be completed by March 1 of each year. See 22 CCR §67450.13(a)(2) for instructions on calculating the adjustment. This updated closure cost estimate must be maintained at the facility. If your cost estimate now exceeds $10,000 for the first time, you must submit this Certification and a closure cost estimate within 30 days to your CUPA or authorized agency. If the cost estimate adjustment results in an increase and requires a change in your financial mechanism, submit this certification and revised mechanism **within 60 days** (§66265.143). Any change in information affecting the closure cost estimate or mechanism must be submitted within 30 days to your CUPA or authorized agency. Refer to 22 CCR §67450.13 for financial assurance requirements.

(Note: the numbering of the instructions follows the data element numbers that are on the UPCF pages. These data element numbers are used for electronic submission and are the same as the numbering used in 27 CCR, Appendix C, the Business Section of the Unified Program Data Dictionary.)
Please number all pages of your submittal. This helps the Department of Toxic Substances Control (DTSC) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by DTSC. This is the unique number which identifies your facility.
2. EPA ID NUMBER - Enter the EPA ID number for the facility.
3. BUSINESS NAME - Enter the full legal name of the business.

700. CERTIFICATION STATUS - Check the reason the certification is being completed.

701. TYPE OF OPERATION - Check the type of operation. If type of operation is not listed, check "other" and indicate type in the space provided.

702. ESTIMATED CLOSURE COSTS - Enter the total estimated cost of closing each treatment unit and attach a written estimate of the closure costs. The estimated closure cost may be either the actual cost or the estimated cost when using your own staff and/or equipment. The closure cost estimate may take into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. Following is a model closure cost estimate:

ACTIVITY	COST
1. Removal, treatment (on-site or off-site), or disposal of waste inventories	$3300
2. Removal and disposal of soil	
3. Decontamination of equipment and structure	$6685
4. Demolition and removal of containment system components or structure	$5685
5. Transportation	$2800
6. Sampling and analysis of waste, soil, equipment, and structure	
7. Certification or other demonstration of closure ("clean" closure or specified level of decontamination)	$500
8. Other expenses (specify) **Consultant**	$500
9. Less Assets (salvage value of waste, equipment or property)	
TOTAL COST OF CLOSURE	**$19,470 (2) or $9735 per unit**

NOTE: For PBR only, if you have operated under PBR for less than 30 days in any calendar year, you qualify for an exemption. If eligible for the exemption, enter "EXEMPT" in this space.

703. EXEMPTION FROM FINANCIAL ASSURANCE - Check to claim the exemption from the financial assurance requirements for total closure cost estimate less than or equal to $10,000. A model letter using the required certifications must be submitted to claim this exemption.

704. EXEMPTION FROM FINANCIAL ASSURANCE - OTHER - Check to claim "other" reason for exemption from financial assurance requirements. Describe the reason for the exemption in the space provided. Reference the applicable statute or regulation granting the exemption.

705. EXEMPTION FROM FINANCIAL ASSURANCE - <30 DAYS PER YEAR - Check to claim the exemption from financial assurance requirements for owner or operator under PBR only and operating no more than thirty days in any calendar year.

706. REQUIREMENT FOR FINANCIAL ASSURANCE - Check to indicate whether the financial assurance mechanism is attached.

707. DATE OF CLOSURE ASSURANCE MECHANISM - Enter the effective date of the closure financial assurance mechanism.

708. MECHANISM ID NUMBER - If applicable, enter the number of the closure assurance mechanism, for example, the insurance policy number.

709. CLOSURE ASSURANCE MECHANISM - Check to indicate the type of financial mechanism established to provide the closure cost assurance. Eligible types are contained in 22 CCR §67450.13(a)(5). They are:
1. A closure trust fund, as provided in 22 CCR 66265.143(a); DTSC Form 1154
2. A surety bond guaranteeing payment into a closure trust fund, as described in 22 CCR 66265.143(b); either DTSC Form 1155 or 1156 with DTSC Form 1154
3. A closure letter of credit, as described in 22 CCR 66265.143(c); DTSC Form 1157
4. Closure insurance, as described in 22 CCR 66265.143(d); DTSC Form 1158
5. A financial test and corporate guarantee for closure, as described in 22 CCR 66265.143(e); either DTSC Form 1159 or 1173
6. An alternative mechanism for closure costs, as described in 22 CCR 67450.13(c); (no form)
7. Use of multiple financial mechanisms for closure costs, as described in 22 CCR 66265.143(g); (no form)
8. A certificate of deposit, as described in section 3-104(2)(c) of the Uniform Commercial Code; (no form) or,
9. A savings account, as described in section 4-104(a) of the Uniform Commercial Code; (no form).

These mechanisms require use of the additional DTSC Financial Assurance forms referenced above. These forms are available from the CUPA or the DTSC Regional Office. When using these forms, verify that the beneficiary is the CUPA, rather than DTSC.

710. FINANCIAL INSTITUTION OR SURETY NAME 711. FINANCIAL INSTITUTION OR SURETY ADDRESS 712. FINANCIAL INSTITUTION OR SURETY CITY 713. FINANCIAL INSTITUTION OR SURETY STATE 714. FINANCIAL INSTITUTION OR SURETY ZIP CODE	For items **710 - 714**, enter the name and address of the financial institution, insurance company, surety company, or other appropriate organization used to establish the closure financial assurance. Indicate your company if you are using a corporate guarantee and financial test.

715. SIGNER OF CERTIFICATION - Check to indicate whether the person certifying is the owner or the operator of the facility.
SIGNATURE - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided. The authorized signatory must be completed as specified in Title 22, CCR, section 66270.11. In most companies, this is not the environmental compliance or technical staff. The title should indicate that an appropriate authorized person is signing for the company. Original signatures are required on all documents submitted.

716. DATE CERTIFIED - Enter the date that the document was signed
717. OWNER/ OPERATOR NAME - Enter the full printed name of the person signing the page.
718. OWNER/ OPERATOR TITLE - Enter the title of the person signing the page.

San Jose, CA

DRAFT

RE: Estimate for Closure of two (2) Waste Water Treatment Systems

Dear Mr. Tran:

On behalf of Advanced Chemical Transport, Inc. (ACT) I am pleased to provide you with this estimate to clean, and decommission two (2) Waste Water Treatment Systems. The estimate is based on the information provided.

ACT will:

- Flush associated piping from each unit
- Piping will be cut, capped to the tanks
- Field verification of pH will be conducted to verify corrosive materials have been neutralized
- The tanks will be cut up with electric saws and placed into bins for disposal
- The secondary containment will be decontaminated and ph Tested
- All waste generated from the project will be transported and disposed of as a hazardous waste.

Water and electrical to be provided by Ultratech in the work area. All electrical to be physically disconnected by others prior to our arrival. Unistrut/Supports to be left in place. The secondary containment will be left in place once cleaned.
All work as proposed is based on being performed Monday-Friday 8am-5pm excluding weekend, holiday, or overtime hours.

Terms are 30 days. Proposal and pricing is valid for 45 days.

COST ESTIMATE

LABOR	
40hrs x 3 person crew (PM, 2 Techs) @ $ 180.00/hr	$ 7200.00
Closure Plan and Report	$ 2000.00
MATERIALS	
Saws, electrical, ladders, etc @ $ 1000.00/project	$ 1000.00
Gear Truck 5 days @ $ 100.00/day	$ 500.00
PPE per project @ $ 500.00/project	$ 500.00
Drums @ $ 400.00/job	$ 400.00
DISPOSAL	
20 yard bin NON RCRA HAZARDOUS WASTE SOLID @ $1800.00/bin	$ 1800.00
Drums of acid/base/rinse water @ $ 1500.00/project	$1500.00
TRANSPORTATION	
20 yard bin delivery /pickup/liner/rental 10 days	$ 2500.00
Misc drums @ $ 300.00/job	$ 300.00
10% fuel and energy surcharge	$1770.00
TOTAL PROJECT ESTIMATE	$19470.00

DRAFT

To order the project please sign at the space indicated and fax back to my attention at (408) 548-5053. Please also contact me at (408) 548-5001 to answer any questions you may have or to set the schedule to complete the work.

Thank you for extending this opportunity to ACT. I look forward to working with you on this project.

Sincerely;
Advanced Chemical Transport

Adam Brandin

SECTION I: FACILITY INFORMATION

Instructions: Complete the following descriptive information about your facility. This information accurately describes the location of your facility and establishes mailing and phone contacts. If facility location and mailing address are identical, you may put "same" into facility mailing address spaces.

Type of Permit: Permit by Rule _____ Conditional Authorization X

1. CURRENT FACILITY NAME: Ultratech, Inc.

   PAST NAMES (Attach additional pages if necessary):

2. EPA I.D. NUMBER: CAD982517096

3. NAME OF FACILITY OWNER (see definition of owner): Ultratech, Inc.

4. NAME OF FACILITY OPERATOR: Ultratech, Inc.

5. NAME OF PROPERTY OWNER: Jones Lang LaSalle, Inc.

6. FACILITY LOCATION ADDRESS:

   STREET: 3050 Zanker Road & 2880 Junction Avenue

   CITY: San Jose

   COUNTY: Santa Clara

   STATE: CA ZIP CODE: 95134

7. FACILITY MAILING ADDRESS (if different from FACILITY LOCATION ADDRESS):

   STREET: 3050 Zanker Road

   CITY: San Jose

   STATE: CA ZIP CODE: 95134

8. FACILITY TELEPHONE NUMBER: (408) 321-8835

9. FACILITY FAX NUMBER: (408) 577-3582

10. NAME OF FACILITY CONTACT PERSON: Tom Tran

11. TITLE OF FACILITY CONTACT PERSON: EH&S Engineer

12. PHONE NUMBER OF FACILITY CONTACT PERSON: (408) 577-3101

DRAFT

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

13. ADDRESS OF FACILITY CONTACT PERSON:

STREET: 3050 Zanker Road

CITY: San Jose

STATE: CA ZIP CODE: 95134

SECTION II: FACILITY HISTORY

Instructions: Complete this section regarding facility history based on reasonably available knowledge of the facility. This section will determine if past operating practices and significant historical events that occurred at the facility indicate potential areas of contamination. Current and past employees who know about the facility's past operating practices can be an asset in completing this section of the checklist. Yes answers to these questions mean that careful attention must be paid to these areas and considerations when completing the facility walk-through inspection.

		YES	NO
1.	Has an environmental assessment and/or a site investigation report ever been completed for the facility? If this assessment meets the criteria for substituting for this checklist (see Instructions), use the Signature and Certification Page to record this exemption. You need not release confidential assessments. However, if these reports indicate existing or potential contamination, you must use the information relied on by the confidential report to help reach a conclusion in this assessment.		X
2.	To your knowledge, have areas of the facility that contain hazardous materials ever been flooded?		X
3.	To your knowledge, has the facility ever been damaged by an earthquake that could cause contamination?		X
4.	To your knowledge, has the location for the facility ever been used for industrial purposes prior to its current use? If YES, then consider potential contamination from the type of industry that the location was formerly used for.		X
5.	To your knowledge, has there been any disposing of hazardous chemicals or hazardous wastes in, on, or under the property?		X
6.	To your knowledge, has the facility ever had electrical transformers, capacitors, or hydraulic equipment including, but not limited to elevators and auto lifts, at the facility which may have released PCBs or oil to the environment? (Not including small quantities of fluorescent light ballasts and capacitors if these materials were not disposed of or dismantled at the facility) If YES, was the equipment ever tested for the presence of PCBs?		X
7.	To your knowledge, has testing of any groundwater wells on the property ever revealed possible contamination?		X
8.	Do you have in your possession, or do you know of the existence of any photographs, geophysical reports, analytical test data, and/or air sampling data that indicates the possible presence of hazardous materials and/or waste in unwarranted or unexpected areas of the facility?		X
9.	To your knowledge, has the facility ever had liquid/sludge containment area(s), surface impoundment(s), collection pond(s), and/or lagoon(s)?		X

DRAFT

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

10.	To your knowledge, have land-farming or bioremediation been used at the facility?		X
11.	To your knowledge, has the facility ever burned hazardous wastes, unidentified waste materials, tires, or automotive batteries at the facility?		X
12.	To your knowledge, have ash and/or combustion residuals been disposed of at the facility?		X
13.	To your knowledge, have any underground storage tank(s) been removed, abandoned, or taken out of service from the facility? Tanks removed, abandoned, or taken out of service under the oversight of a responsible agency need not be considered if the agency addressed potential contamination at the tank location.		X
14.	To your knowledge, has any contaminated soil been discovered and/or remediated at the facility without oversight by an appropriate regulatory agency?		X
15.	To your knowledge, have there been fires and/or explosions at the facility which may have caused a release of hazardous waste or materials?		X
16.	To your knowledge, has the facility ever received complaints from any employees, neighbors, or the public about the facility's practices for managing hazardous wastes, or any actual or potential releases to air, water, or soil, or other environmental issues?		X
17.	To your knowledge, have nearby residents complained to a governmental agency of any type of illnesses or unusual illnesses as having been caused or suspectedly caused by or related to activities at the facility? (Note: this item does not require questioning the facility's neighbors) If YES, indicate below the person and/or agency who recorded the complaint. _____ If YES, to your knowledge, has any evidence been submitted to a physician to substantiate the claim?		X
18.	To your knowledge, are there any areas at the facility which were formerly used for hazardous waste or hazardous materials transfer (e.g. tank loading areas, drum transfer areas)?	X	
19.	To your knowledge, are there, or have there been lawsuits or administrative proceedings concerning an actual, alleged, or threatened release of any hazardous substance against the facility by another party? Only actions concluded by settlement or litigation need be considered.		X

DRAFT

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

SECTION IV: FACILITY WALK-THROUGH INSPECTION - OTHER AREAS

Instructions: This section of the checklist requires the owner and/or operator of the facility to conduct a walk-through inspection of the those portions of the facility not addressed in Section III in order to identify possible environmental problems, environmental warning signs or potential exposure to people, animals, or plants. Some of the problems that may be discovered during this inspection include abandoned storage tanks, spill areas, surface impoundments, etc. Some of the environmental warning signs include stains, discolored vegetation, and/or unnatural terrain. During the inspection, were any of the following present:

		YES	NO
1.	Does the facility have vent pipes, fill pipes, and/or access routes that may indicate the presence of an underground storage tank?		X
2.	Does the facility have stains and/or discolorations of the soil, flooring, drains and/or walls at the facility which may indicate a release to the environment that has not or is not being addressed under the oversight of an appropriate agency?		X
3.	Does the facility have areas of soil at the facility that appear disturbed and which may indicate onsite disposal or land treatment of hazardous materials or remediation of releases without oversight by an appropriate agency?		X
4.	Does the facility have areas at the facility where the terrain appears unnatural, such as unexplained mounds or depressions?		X
5.	Does the facility have unusual smells or odors emanating from the soil, floor, drains, and/or walls at the facility?		X
6.	Does the facility have dead, abnormal, or distressed-looking vegetation or conspicuous absence of vegetation at the facility that is not directly explainable by a deliberate action and/or lack of water at the site?		X

7. Where does rain and/or washwater drain to at the facility? (circle all that apply) Note: slightly contaminated storm or washwater can seriously contaminate evaporation or settling areas (with no drainage) over a period of time.

(a. Storm Drain) (b. Sewer)
c. Drainage Ditch
d. Open Land
e. Areas of pooling, settling, or evaporation
f. Other _____

DRAFT

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

AREA OF CONCERN DATASHEET

Instructions: Complete the following questions in detail for EACH release or suspected release identified in Section III FACILITY WALK-THROUGH INSPECTION - SPECIFIC AREAS or SECTION IV FACILITY WALK-THROUGH INSPECTION - OTHER AREAS and any other known or suspected releases. Do not include areas that have been or are being remediated under the oversight of an appropriate agency.
If answers to questions are not known, then state "unknown".

1. Facility name:

2. This sheet is being completed for a:

   Known release _____ Suspected release _____

3. How was this release or suspected release discovered?

   During the walk-through inspection? _____ Previously known release? _____

   What checklist question(s) are related to this release (section/question)_____

4. When did the release occur?

5. What was released and how much?

6. What caused the release?

7. Indicate the approximate area of the release (e.g. 3 feet in diameter, 5 feet X 4 feet.)

8. Was the release remediated? If YES, explain how. (Note: A datasheet need not be completed for releases remediated or being remediated under the oversight of an appropriate agency.

9. Were samples collected? If yes, what were the results?

10. List any environmental reports or studies performed on the area of concern and attach copies or summaries of the reports not submitted to the Department.

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

SECTION III: FACILITY WALK-THROUGH INSPECTION - SPECIFIC AREAS

Instructions: List each area of the facility where hazardous materials are present. The listing area is divided into functional divisions for convenience. Individual units may be grouped on the chart, but must be individually inspected. Carefully examine each of these areas during the walk-through inspection to determine the presence of releases or possible releases and record the results in the appropriate column, date and initial the entry. Complete a Release Information Data Sheet for each actual and possible release found. Using your best judgement, decide if any actual or suspected releases found require further investigation and record the results on the Release Information Data Sheet and in the appropriate column on this chart. If uou need additional space, photocopy this sheet.

HAZARDOUS MATERIAL AREA	INSPECTED (Yes or No)	ACTUAL OR SUSPECTED RELEASE (Yes or No)	REQUIRES FURTHER INVESTIGATION (Yes or No)
LOADING/UNLOADING AREAS			
Parts Storage Area	Yes	No	No
Shipping Area	Yes	No	No
HAZARDOUS MATERIALS USE AREAS

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

SIGNATURE AND CERTIFICATION FOR PERMIT-BY-RULE AND CONDITIONAL AUTHORIZATION

Instructions: Carefully read the certification below. If you feel uncomfortable signing this certification, review the instructions and the information developed in the preparation of the checklist and correct any deficiencies you have found. Be sure that you check one of the boxes below to record your decision regarding further investigation. If you are claiming exemption from completing a Phase I Environmental Assessment, complete that section below.

Either the owner, operator, or independent professional engineer, geologist, or an environmental assessor who is registered in the State of California, shall certify to the following statement by signing on the appropriate lines below:

___ Yes, further investigation is needed to determine the existence, nature, and/or extent of contamination at the facility; or

X No, further investigation is not necessary to determine the existence, nature, and/or extent of contamination at the facility.

___ I am exempt from completing the checklist and/or from resulting followup work. [Please state reason for exemption below and supply documentary evidence (see instructions)]. Explanation:

_____

_____

"Under penalty of perjury, I certify that I have personally examined and am familiar with the information submitted in this document and all attachments, and based on my inquiry of those individuals immediately responsible for obtaining it, the information is true, accurate, and complete to the best of my knowledge. Thus informed, I certify to my best judgement that the conclusion recorded above regarding further investigation or exemption from completion of the Phase I Environmental Assessment is correct."

DRAFT

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g., pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.
Note to medical facilities: Do not list medical (i.e,. red bag) wastes on this form.

RE: FINANCIAL ASSURANCE ANNUAL CERTIFICATION

Dear Sir or Madam:

This information package is provided by your Certified Unified Program Agency (CUPA), the County of Santa Clara, Department of Environmental Health. The intent is to help facilitate your Annual Certification for Financial Assurance which is required for the operation of an onsite fixed treatment unit under Conditional Authorization (CA).

The required Unified Program Consolidated Forms (UPCF) pertaining to your onsite treatment unit(s) have been submitted by your facility. You are requested to submit the (UPCF) forms with signature to our office by March 1, 2011:

1. Business Activities Page (Unified Program Consolidated Form).
2. Business Owner/Operator Identification Page (Facility Information).
3. Certification of Financial Assurance (Annual Certification).

The requested UPCF forms can be located at the following website www.unidocs.org. If changes related to your onsite treatment unit(s) occurred last year, in addition to the above noted form, please submit the UPCF forms to reflect those changes.

As a reminder, facilities are required to adjust their closure cost estimates for inflation by March 1st of each year. It is advisable that you use last year's inflation factor of 1.04 per cent since the Bureau of Economic Affairs doesn't publish the Implicit Price Deflator for the last quarter of year 2010 until April of 2011.

You are requested to submit a copy of your updated closure cost estimate to this office only if you previously self certified that the closure cost was less than $10,000.00 and now, due to updating, it exceeds that amount. In addition, all facilities that claim salvage value for resale of equipment under the closure cost estimate, please send documentation supporting the true market value of the salvage/reclaimed equipment.

Board of Supervisors: Mike Wasserman, George Shirakawa, Dave Cortese, Ken Yeager, Liz Kniss
County Executive: Jeffrey V. Smith

After updating your closure cost estimate, we recommend that you evaluate the financial mechanism and verify that it is adequate to cover the current closure cost estimate. For facilities that have filed under the mechanism of Financial Test and Corporate Guarantee, in order to maintain eligibility for this closure assurance mechanism, annual updated information must be submitted to this department within ninety days of the close of the firm's fiscal year.

Do not send an annual notification fee with this renewal form. You will be receiving an invoice either from our Department or from your local fire department for the annual permit to operate your treatment unit(s).

Once you have completed and submitted the Certificate of Financial Assurance Form, you will have complied with the 2011 annual certification requirements as noted in the California Code of Regulations, Title 22, Section 67450.13.

If you have any questions regarding this letter, please contact me at (408) (408) 918-1985 or e-mail: ruben.williams@deh.sccgov.org.

Sincerely,

Ruben Williams

Dear Conditionally Authorized Facility:

ACKNOWLEDGEMENT OF UNIT OPERATING UNDER CONDITIONAL AUTHORIZATION

Santa Clara County Hazardous Materials Compliance Division has received your facility specific **initial** notification and forms for your Conditional Authorization (CA) treatment unit (1). Your notifications are administratively complete, but have not been reviewed for technical adequacy. A technical review of your notifications will be conducted when an inspection is performed. At any time, you may be inspected and could be subject to penalty if violations of laws or regulations are found. A copy of a Tiered Permit Audit Checklist for CA can be obtained from website: www.EHinfo.org.

This office acknowledges receipt of your completed notification for the treatment unit(s) listed on the last page of this letter. The unit (T-1) operating under Conditional Authorization (CA) is authorized by California law without additional action, pursuant to Health and Safety Code sections 25201.5, 25144.6, 25201.14 and 25201.4.1. ANNUAL RENEWAL IS NOT REQUIRED FOR THE UNITS OPERATING UNDER THIS PERMITTING TIER. Your authorization to operate continues until you notify our office that you have stopped treating waste and have fully closed the unit(s). The annual permit fee for CA Tier is $1,290.00. The San Jose Fire Department will be invoicing you for this fee at a later date.

You must notify this office 60 days before first treating hazardous wastes in any new unit. You must also notify this office whenever any of the information you provided in these notifications changes and when the units have been closed. To revise information, mail a cover letter to the above address explaining the changes, attach only the pages of your notification package that have changed, and re-sign and date at the signature space on the Facility page of the Unified Program Consolidated Form (UPCF). Forms are available on the website: www.EHinfo.org.

Board of Supervisors: Donald F. Gage, George Shirakawa, Dave Cortese, Ken Yeager, Liz Kniss
County Executive: Jeffrey V. Smith

FILE

EPA ID: CAD982517096

Your status to operate under Conditional Authorization Tier is contingent upon the accuracy of information submitted by you in the notifications mentioned above, and your compliance with all applicable requirements in the Health and Safety Code. You are required to properly close any treatment unit. Additional guidance on closure will be issued from this office upon request.

Since your facility is operating pursuant to Conditional Authorization, you are responsible for complying with Section 25200.14 of the Health and Safety Code by completing a preliminary site assessment (Phase I Environmental Assessment).. Form DTSC 1151 (Phase I Assessment checklist) is required to be submitted to the Department of Toxic Substances Control at the address noted on the form. The form is available on website:www.dtsc.ca.gov. Submittal must be completed within one year from receipt of this letter. We are requesting that you also submit a copy of the completed Phase I Assessment checklist to this office.

In addition you must annually certify that you have established and maintain a waste minimization program to reduce the volume or quantity and toxicity of the hazardous waste you generate pursuant to Health and Safety Code Section 25202.9.

If you have any questions regarding this letter, or have questions on operating requirements for your facility, please contact me at 408-918-1985.

Sincerely,

Ruben Williams

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

Attn: Charles Wurm

Dear Mr. Wurm,

Thank you for the time you gave ROMIC Environmental Technologies and I during our meeting. We know that you will be extremely satisfied with the quality service that we have been providing to our customers for over 39 years. We have various processes for recycling/disposal which include LABPACKING & FIELD SERVICES, RECYCLING & WATER TREATMENT, NEUTRALIZATION, ALTERNATIVE FUELS & LIQUEFACTION RECYCLING and THERMAL TREATMENT by incineration. This letter will confirm the various capabilities of ROMIC Environmental.

During our meeting we discussed the closure of your Wastewater treatment system located at two of your San Jose, CA. facilities. Please review the brief scope of work and pricing:

SCOPE OF WORK

Romic will mobilize personnel to decommission the wastewater treatment system(s) located at the two adjacent facilities in the San Jose, CA. A tailgate safety meeting will take place to review the potential hazards. The unit(s) will be "isolated" from any electrical source prior to arrival, this is be performed by Ultra Tech. The associated piping will be flushed, cut and capped to the tanks. All appropriate field pH testing will be conducted during these activities. The tanks will be decontaminated and cut in place with the debris disposed of as Hazardous waste. The secondary containment will be decontaminated with field pH tested conducted. The waste generated (spent PPE, rags, etc.) from cleaning activities will be labeled, contained and manifested to Romic.

Estimate for Decontamination
Labor, Equipment and Materials
(Includes Disposal)

$18,200.00 / $9100.00 EA
FOR 2 SYSTEMS
1 EA B1 & B2

DRAFT

4 OF 4

Contingencies:

- Others will disconnect electrical source. The unistrut/supports will be left in place.
- The secondary containment will be left in place after pH Testing is verified.
- Water source will be made available on site.
- The transportation and disposal of waste is included.
- Based on weekday work, straight time.

The above pricing outlines the transportation, documentation and disposal/recycling. We look forward to the opportunity to establishing a long-term relationship with Ultra Tech and we hope this information will facilitate us getting started. If you have any questions please contact me at **800-335-1638 (Ext. #2422)**.

Best Regards,

Kurt Soto-Gambini

RE: FINANCIAL ASSURANCE ANNUAL CERTIFICATION

Dear Sir or Madam:

This information package is provided by your Certified Unified Program Agency (CUPA), the County of Santa Clara, Department of Environmental Health. The intent is to help facilitate your Annual Certification for Financial Assurance which is required for the operation of an onsite fixed treatment unit under Conditional Authorization (CA).

The required Unified Program Consolidated Forms (UPCF) pertaining to your onsite treatment unit(s) have been submitted by your facility. **You are requested to submit the (UPCF) form "Certificate of Financial Assurance" with signature to our office by May 15, 2005:**

The requested UPCF form is enclosed in this package. If changes related to your onsite treatment unit(s) occurred last year, in addition to the above noted form, please submit the UPCF forms to reflect those changes. Templates for all UPCF forms are available on the following website: www.unidocs.org.

As a reminder, facilities are required to adjust their closure cost estimates for inflation by March 1st of each year. It is advisable that you use last year's inflation factor of 1.016 per cent since the Bureau of Economic Affairs doesn't publish the Implicit Price Deflator for the last quarter of year 2004 until April of 2005.

You are requested to submit a copy of your updated closure cost estimate to this office only if you previously self certified that the closure cost was less than $10,000.00 and now, due to updating, it exceeds that amount. In addition, all facilities that claim salvage value for resale of equipment under the closure cost estimate, please send documentation supporting the true market value of the salvage/reclaimed equipment.

DRAFT

Board of Supervisors: Donald F. Gage, Blanca Alvarado, Pete McHugh, James T. Beall, Jr., Liz Kniss
County Executive: Peter Kutras, Jr.

8-006

After updating your closure cost estimate, we recommend that you evaluate the financial mechanism and verify that it is adequate to cover the current closure cost estimate. For facilities that have filed under the mechanism of Financial Test and Corporate Guarantee, in order to maintain eligibility for this closure assurance mechanism, annual updated information must be submitted to this department within ninety days of the close of the firm's fiscal year.

Do not send an annual notification fee with this renewal form. You will be receiving an invoice either from our Department or from your local fire department for the annual permit to operate your treatment unit(s).

Once you have completed and submitted the Certificate of Financial Assurance Form, you will have complied with the 2005 annual certification requirements as noted in the California Code of Regulations, Title 22, Section 67450.13.

If you have any questions regarding this letter, please contact Ruben Williams at (408) (408) 918-1985.

Sincerely,

Nicole Pullman

Dear Ms. Pullman,

Early this year a similar request was made by the Santa Clara County, Environmental Resources Agency, Department of Environmental Health, Hazardous Materials Compliance Division.

1) Enclosed is a copy of a current closure cost estimate made by Romic Environmental and the Certification of Financial Assurance form you requested. I hope you will find these meet your requirements.

2) Please update you information for the name of our company, Ultratech Stepper no longer exists, and the contact person, Cheri Able no longer works at Ultratech, Inc.

   A copy of your letter with these changes is also attached.

If you have any questions or comments please contact me.

Sincerely,

Charles Wurm, MS, CHMM, REA

D

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P.O. Box 28070, San Jose, CA 95159-8070.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

Hazardous Waste Violations

- **Per H&SC, Section 25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.**
- **Per H&SC, Section 25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per H&SC, Section 25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

Hazardous Waste Violations

- **Per H&SC, Section 25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.**
- **Per H&SC, Section 25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per H&SC, Section 25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

Mr. Ric Gatdula, Jr.
Hazardous Materials Specialist
Hazardous Materials Program
County of Santa Clara
Department of Environmental Health
2220 Moorpark Avenue,
Room 204, East Wing
San Jose, California, 95128-2690

Dear Mr. Gatdula:

The following is in response to your inspection, which was conducted on January 13, 1999, at our facility located at 3050 Zanker Road, San Jose:

1. The 3.5 gallon pail of waste oil with the improper accumulation start date has been disposed of via Laidlaw/Safety-Kleen on 2/12/99. A copy of the manifest is available upon request.

2. The 3.5 gallon pail of waste water & rust without an accumulation start date has been disposed of via Laidlaw/Safety-Kleen on 2/12/99. A copy of the manifest is available upon request.

3. The mercury lamps stored in the red metal container in the clean room are now labeled as hazardous waste and have an accumulation start date as emptied daily per your suggestion.

4. Attached please find our in-house training record for the employees in the lab who handle the waste. Also please find attached my registration confirmation for the Hazardous Waste Management Training given by the Dept. of Environmental Health on November 4, 1998 which I attended and have not as yet received a certificate for. I did however speak to Stephanie Christenberry on 1/26/99 and she said she would notify you as to my attendance in the class.

5. I am also enrolled in the 40 Hour Hazwoper training, March 1-5, 1999 at UCSC extension. See attached enrollment confirmation form and number.

We re still planning to visit MTI, the mercury recycler in Hayward and I will let you know when the date has been set. Please let me know if you have any questions.

Sincerely,

Cheri Able

Contact Person(s):	Cheri Able	Employee No.:	4677
Inspection Type:	☐ Hazardous Materials ☑ Hazardous Waste ☐ Toxic Gas ☐ Cal-Accidental Release Prevention Program ☐ Medical Waste Storage/Treatment ☐ Medical Waste Generator	Samples Taken? ☐ Yes; ☑ No. Photographs Taken? ☐ Yes; ☑ No.	

VIOLATIONS: Codes noted below in the "Violation Code" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time.

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
2206	One 3½ gal. container of Waste Oil with accumulation start date of 1/29/97 indicating that waste was stored on-site for over 1 year (stored in satellite accumulation).	
-	One 3½ gal container of Waste labeled as Water (H_2O) Rusted with accumulation start date not marked.	
-	Mercury Waste lamps stored in a Red metal container inside the clean room must be labeled as Hazardous Waste to include all information required under title 22.	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25187.8 of the State Health and Safety Code (H&SC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to this Department within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. *(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)*

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P.O. Box 28070, San Jose, CA 95159-8070.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

Summary of Violations & Notice to Comply

Program: PR0315460 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G020	M	**MARKING OF HAZARDOUS WASTE** Facility failed to properly mark a hazardous waste tank and/or container. ***OBSERVED SEVERAL HAZARDOUS WASTE STEP CANS LOCATED THROUGHOUT THE FACILITY MARKED WITH AN ACCUMULATION START DATE AS "EMPTY MONTHLY". CONTAINERS THAT ARE EMPTIED DAILY MAY USE THE PHASE "EMPTY DAILY" IN LIEU OF MARKING WITH AN ACCUMULATION START DATE.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	
G023	M	**CONTAINER OPEN** Facility failed to keep a hazardous waste container closed at a time when it was not necessary to add or remove waste. ***OBSERVED THE FOLLOWING HAZARDOUS WASTE CONTAINERS WITHOUT LIDS:*** ***- LSA PASS THROUGH: FIVE GALLON CONTAINER OF WASTE ANTIFREEZE.*** ***- APPLICATIONS LAB CHASE: 55-GALLON DRUM OF WASTE PHOTO RESIST.*** Tightly close all hazardous waste containers. Ensure that they remain closed, except when it is necessary to add or remove waste. Containers are considered closed when all lids, gaskets, and locking rings are in place and secured. [CCR 66265.173(a), CFR 265.173(a)]	
G030	M	**POINT OF GENERATION ACCUMULATION** A hazardous waste container managed under point of generation accumulation rules was not at or near the point of generation and/or under the control of the operator. ***APPLICATIONS LAB CHASE: THE 55-GALLON DRUM OF FLAMMABLE SOLID WASTE IS BEING MANAGED UNDER POINT OF GENERATION ACCUMULATION RULES HOWEVER THE WASTES ARE BEING COLLECTED THROUGHOUT THE FACILITY AND ADDED TO THE DRUM.*** Move the container(s) to a location that is at or near the point of generation and ensure that the waste is under the control of the operator that is generating the waste. If the above conditions cannot be met, begin managing the waste in accordance with standard hazardous waste accumulation requirements. [CCR 66262.34(e)(1)(A)]

Inspection Date: 09/26/2014

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G110	M	**MAINTENANCE AND OPERATION OF FACILITY** Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment. ***- SEM ROOM: OBSERVED A RED STEP CAN CONTAINING USED SOLVENT WIPES THAT WAS OVERFLOWING.*** ***- CHEMICAL BUNKER: OBSERVED AN UNKNOWN CLEAR LIQUID ON TOP OF A 55-GALLON DRUM THAT WAS DISSOLVING THE COATING ON THE DRUM.*** Maintain and operate the facility in a manner that minimizes potential emergencies and unplanned releases. [CCR 66265.31, CFR 265.31]	
G300	II	**ACCUMULATION TIME** Facility accumulated hazardous waste on-site for longer than the allowed time limit. ***THE FOLLOWING HAZARDOUS WASTE CONTAINERS HAVE BEEN ONSITE LONGER THAN THE ALLOWED TIME LIMIT:*** ***- LSA PASS THROUGH: FIVE GALLON CONTAINER OF WASTE ANTIFREEZE MARKED WITH A START DATE OF 3-27-13.*** ***- APPLICATIONS LAB CHASE: 55-GALLON DRUM OF SOLID FLAMMABLE WASTE WITH A START DATE OF 12-3-13.*** ***- TRAINING ROOM: ONE GALLON CONTAINER OF WASTE LEAD SOLDER MARKED WITH A START DATE OF 3-31-14.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not accumulated on-site for longer than 90 days. [CCR 66262.34(a)]	
G320	M	**TRAINING** Personnel are not adequately trained on managing hazardous waste. ***TWO EMPLOYEES (SUSAN CREIGHTON AND MIKE TAMURA) HAVE RECEIVED TRAINING ON HAZARDOUS WASTE MANAGEMENT PROCEDURES HOWEVER THERE ARE OTHER EMPLOYEES THAT HAVE HAZARDOUS WASTE MANAGEMENT RESPONSIBILITIES THAT HAVE NOT RECEIVED TRAINING.*** Provide a program of instruction that: 1) is directed by a person trained in hazardous waste management procedures; 2) teaches waste management procedures relevant to the position of each employee; and 3) ensures facility personnel are able to respond effectively to emergencies. Provide this training within 6 months of hire, and annually thereafter. [CCR 66265.16]	
G321	M	**RECORDS: HAZARDOUS WASTE TRAINING** Hazardous waste training records are incomplete or are not being kept as required. ***THE HAZARDOUS WASTE TRAINING RECORDS DO NOT ADEQUATELY DOCUMENT THE REQUIRED ELEMENTS: THE NAME AND JOB TITLE OF EACH PERSON IN A POSITION THAT HAS HAZARDOUS MANAGEMENT RESPONSIBILITY; A WRITTEN JOB DESCRIPTION THAT INCLUDED THE DUTIES, SKILLS, EDUCATION, OR OTHER QUALIFICATIONS REQUIRED FOR EACH POSITION; A DESCRIPTION OF THE TYPE AND AMOUNT OF INTRODUCTORY AND CONTINUING TRAINING THAT WILL BE GIVEN TO EACH POSITION; DOCUMENTATION THAT THE TRAINING WAS COMPLETED BY FACILITY PERSONNEL.*** Maintain training records that include: 1) the name and job title of each person in a position that has hazardous waste management responsibility; 2) a written job description that includes the duties, skills, education, or other qualifications required for each position described above; 3) a description of the type and amount of introductory and continuing training that will be given for each position; and 4) documentation that this training was completed by facility personnel. Keep current employee training records until facility closure. Keep records on former employee for at least 3 years from the date the employee last worked at the facility. [CCR 66265.16(e)]

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0208647
Facility Name: ULTRATECH STEPPER INC
Site Address: 3050 ZANKER RD, SAN JOSE, CA 95134
Inspection Date: 09/26/2014

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G400	II	**MANAGEMENT OF CONTAMINATED CONTAINERS** Facility improperly treated, managed, or disposed of a hazardous materials container that was not empty because it still contained a pourable or scrapeable quantity of hazardous material. ***APPLICATIONS LAB: OBSERVED A ONE GALLON IPA CONTAINER INSIDE A 55-GALLON DRUM MARKED FOR EMPTY CONTAINERS THAT STILL HAD A POURABLE AMOUNT OF IPA INSIDE.*** Thoroughly empty hazardous material/waste containers prior to treating, managing, or disposing of them, when allowed under empty container management standards. If a container cannot be emptied, manage it per standard hazardous waste requirements. [CCR 66261.7(b)]	

Comments: This inspection began on 9-18-2014 and concluded today.

Request for additional information:
- Applications Lab Chase: Is the Chemical Distribution System unit still in use? There are two containers of RER flammable liquid that are stored inside the unit. If the unit is no longer in use the chemicals stored inside need to be properly managed.
- Chemical bunker: Observed a bin of aerosol cans marked as "in use". When asked if the aerosol cans are actually still in use Sue Creighton was not sure. Please confirm if the aerosol cans are still being used or if they are waste.

AP Manufacturing: Observed a 5-gallon container with a small amount of water inside that had a blank hazardous waste label on it. If this is not a hazardous waste then label should be removed.

AWN: The secondary containment container used for sodium hydroxide is constructed of metal and is located adjacent to a drum of sulfuric acid. Recommend changing the container to a material that is compatible with both the sodium hydroxide and sulfuric acid.

Hazardous Waste Training log was reviewed for Sue Creighton and Mike Tamura.

Program: PR0391378 - TIERED PERMIT-CONDITIONAL AUTHORIZATION - 2262
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G340	II	**TANK SYSTEM ASSESSMENT** Facility failed to obtain or keep on file a current and complete written hazardous waste tank system assessment. ***THE LAST TANK SYSTEM ASSESSMENT COMPLETED ON 11-14-2008 IS NO LONGER CURRENT. THE TANK SYSTEM MUST BE REASSESSED EVERY FIVE YEARS BY A PROFESSIONAL ENGINEER.*** Make arrangements to have the tank system assessed by an appropriate Professional Engineer (PE) who is knowledgeable of hazardous waste tank system requirements. Provide a specific date by which the assessment is expected to be completed. Upon completion of the assessment, submit a copy of the final report to HMCD. [CCR 66265.191(a), 66265.192(h)]	
G343	M	**TANK INSPECTIONS** Facility could not demonstrate that hazardous waste tanks are being inspected daily as required. ***FACILITY DOES NOT HAVE DOCUMENTATION SHOWING THAT THE TANKS ARE BEING INSPECTED DAILY AS REQUIRED.*** Perform and document hazardous waste tank inspections daily. Inspections must cover: 1) overfill/spill control equipment; 2) aboveground portions of the tank system; 3) data gathered from monitoring and leak detection equipment; 4) construction materials and the area immediately surrounding the tank system; and 5) the level of waste in the tank, for uncovered tanks. [CCR 66265.195]

---

Joanne,
I have bundled up our responses on the inspection findings. The summery is the first attachment. I have responded to all except the Financial assurance. We are required to do this, but I am still figuring out the best way to do the assurance method. I hope to have it resolved by next Friday, but it may take time to put a bond in place, so I targeted 11/21.
If you'd like to talk and go over all the responses,
please let me know.
Best Regards,
Sue

Ultratech CUPA Inspection Response

November 7, 2014

Item #	Violation	Planned Corrective Action	Completion Date
1 - G020	Observed several hazardous waste step cans located throughout the facility marked with an accumulation start date as "empty monthly". Containers that are emptied daily may use the phrase "empty daily" in lieu of marking with an accumulation start date	For the solvent wipe can: 1) All solvent wipe cans in the AP Manufacturing area have been labeled as satellite waste 2) A procedure including a map of can locations has been developed for all satellite wastes 3) Training for personnel who dispose of hazardous waste, and personnel who handle hazardous waste containers is complete 4) EHS will continue to monitor status of satellite waste cans monthly	1) 10/1/14 2) 10/24/14 3) 11/7/14 4) 10/24/14
2- G - 023	Observed the following hazardous waste containers without lids: -LSA pass-through: Five gallon container of waste anti-freeze. - Applications Lab Chase: 55 Gallon drum of waste photo-resist	1) Re-training of employes occured on 10/29/14 2) Monthly EHS inspections have been increased to bi-weekly for a period of three months to monitor closure of containers. Feedback to area owners will be provided the same day. 3) The insepctions and feedback cycle will continue if improvements are not noted in the three-month period.	1) 11/7/14 2) 10/15/14 3) 1/5/15
3 - G030	Applications Lab Chase: The 55 gallon drum of flammable solid waste is being managed under point-of-generation accumulation rules, however, the wastes are being collected throughout the facility and added to the drum	1) All solvent wipe cans in the AP Manufacturing area have been labeled as satellite waste 2) A procedure including a map of can locations has been developed for all satellite wastes 3) Training for personnel who dispose of hazardous waste, and personnel who handle hazardous waste containers is complete 4) EHS will continue to monitor status of satellite waste cans monthly	1) 10/1/14 2) 10/24/14 3) 11/7/14 4) 10/24/14

Item #	Violation	Planned Corrective Action	Completion Date
4 - G110	SEM Room: Observed a red step can containing used solvent wipes that was overflowing Chemical Bunker: Observed an unknown clear liquid on top of a 55 gallon drum that was dissolving the coating on the drum	For the solvent wipe can: 1) All solvent wipe cans in the AP Manufacturing area have been labeled as satellite waste 2) A procedure including a map of can locations have been developed for all satellite wastes 3) Training for personnel who dispose of hazardous waste, and personnel who handle hazardous waste containers occured on 10/29/2014 4) EHS will continue to monitor status of satellite waste cans monthly For the unknown liquid on the drum lid: 5) An investigation was conducted to determine the source of the unknown liquid and a clean-up was performed. The liquid was dynasolv 185, a solvent used to dissolve adhesives. The MSDS was obtained, the spill was contained, the clean-up materials were place in with the solid solvent wipes, and corrective actions were implemented to prevent recurrence. 6) The event has been documented and filed.	1) 10/1/14 2) 10/24/14 3) 11/7/14 4)10/24/14 5) 10/7/14 6) 10/13/14
5 - G300	The following hazardous waste containers have been onsite longer than the allowed time limit: - LSA Pass Through: Five gallon container of waste anti-freeze marked with a start date of 3/27/13 - Applications Lab Chase: 55 gallon drum of solid flammable waste with a start date of 12/3/14 - Training Room: One gallon container of waste solder marked with a start date of 3/31/14	Ultratech reviewed current practices with the generation of cooling waste and antifreeze waste to determine which are hazardous and which are non-hazardous waste. From this, we did the following: 1) The waste antifeeze was removed by the waste hauler 2) The solvent wipe waste was removed by the waste hauler 3) The 1 gallon continer of lead solder waste is a satellite waste container. It is now labelled as satellite waste (note the container was empty)	1) 10/13/14 2) 10/13/14 3) 10/24/14

Ultratech CUPA Inspection Response

November 7, 2014

Item #	Violation	Planned Corrective Action	Completion Date
6 - G320	Two employees have received training on hazardous waste management procedures, however there are other employees that have hazardous waste management responsibilities that have not received training	Employees who generate and who handle hazardous waste were trained on 10/29/14	11/7/2014
7 - G321	The hazardous waste training records do not adequately document the required element: The name and job title of each person in a position that has hazardous management responsibility; a written job description that included the duties, skills, education or other qualifications required for each position; a description of the type and amount of introductory and continuing training that will be given to each position; documentation that the training was completed by facility personnel	Ultratech has trained EHS and the Hazardous Waste Coordinator as part of the 10/29/14 training	10/31/2014
8 - G400	Applications Lab: Observed a one gallon IPA container inside a 55-gallon wheelie bin marked for empty containers that still had a pourable amount of IPA inside	1) Re-training of employees occured on 10/29/14 and emphasized the need to keep waste containers covered 2) Monthly EHS inspections have been increased to bi-weekly for a period of three months to monitor closure of containers. Feedback to area owners will be provided the same day. 3) The insepctions and feedback cycle will continue if improvements are not noted in the three-month period.	1) 11/7/14 2) 10/15/14 3) 1/5/15
9 - G340	The last tank system assessment completed on 11-14-2008 is no longer current. The tank system must be re-assessed every 5 years by a Professional Engineer	AEI consultants were retained and performed the Tank Assessment on 10/15/14. The report is given in the email response to the county	10/29/2014

Ultratech CUPA Inspection Response

November 7, 2014

Item #	Violation	Planned Corrective Action	Completion Date
10 - G343	Facility does not have documentation showing that the tanks are being inspected daily as required	Ultratech has modified the daily inspections to include water level checks. All other check items are on the current daily log.	10/17/2014
11 - T205	Facility does not have a written inspection schedule as required	Ultratech has included the inspection schedule as part of the new hazardous waste procedures	10/24/2014
12 - T206	Facility does not have the following written documents: - Written Operating Instructions - Record of the dates, concentrations, amounts and types of hazarous waste treated	1) Ultratech has worked with the vendor who provides tha calibration, repair and maintenance of our AWN to develop Operating Instructions 2) Hazardous waste composition is included on the daily log and inspection sheet	1) 10/31/14 2) 10/31/14
13 - T303	The closure cost estimate does not include the adjustment for inflation	Ultratech has determined the closure cost adjusted for inflation is $10,168. We are currently discussing a surety bond or policy with our insurance broker	11/21/2014
14	Applications Lab Chase: Is the Chemical Distribution System still in use?	Ultratech uses the track system daily that the chemical distribution system feeds	10/9/2014
15	Chemical Bunker: Observed a bin of aerosol cans marked "in-use" Please confirm if the aerosol cans are being used or if they are waste	Ultratech does use the aerosol cans that are in the bunker. They are stored there because we keep flammable liquids and cans there	10/9/2014
16	AP Manufacturing: Observed a 5 gallon container with a small amount of water inside that has a blank hazardous waste label on it. If it is not hazardous waste, the label should be removed.	The container waste placed in the lab in anticipation of an upcoming process that generated hazardous waste. Ultratech has: 1) determined the liquid was rinse water that was not fully emptied 2) documented the procedure for obtaining an empty and dry waste containers 3) trained employees performing the operation on waste generation requirements	1) 10/9/14 2) 10/24/14 3) 11/7/14

Re: Inactivation of Veeco Process Equipment, Inc., San José-Santa Clara Regional Wastewater Facility Industrial Wastewater Discharge Permit Number SJ-688B.

Dear Mr. Lo,

We received your letter dated June 9, 2023, notifying the Pretreatment Program of the San José-Santa Clara Regional Wastewater Facility that Veeco Process Equipment, Inc., located at 3050 Zanker Rd. San Jose, CA 95134, has ceased all manufacturing operations and all industrial process wastewater discharge at this facility.

An inspection conducted on June 13, 2023 verified that Veeco Process Equipment, Inc. has ceased operations, disconnected all process and wastewater treatment equipment, and no longer discharges any industrial process wastewater**.** Based on this information, Industrial Wastewater Discharge Permit Number SJ-688B is no longer valid and revoked on the date of this letter. Veeco Process Equipment, Inc. is no longer permitted to discharge any industrial process wastewater from this facility at 3050 Zanker Rd. San Jose, CA 95134. A new permit will be required if Veeco Process Equipment, Inc. wishes to restart process operations.

Should you have any questions, please feel free to call the Pretreatment Program at (408) 945-3000.

Sincerely,

Seena Eghtedar-Shenas
Environmental Inspector

CLOSURE APPLICATION FOR ABOVEGROUND HAZARDOUS MATERIALS STORAGE FACILITIES

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction

Please complete and submit this form prior to the closure of any aboveground hazardous materials storage system or facility. Based on the information submitted below, and the complexity of the closure, a written Closure Plan may be required (see guidelines).

1. Facility Information: *(Note: Print or type all information.)*

Facility Name: Veeco Process Equipment Inc Facility Phone: (408) 321-8835

Site Address: 3050 Zanker Road

City: San Jose State: CA Zip: 95134

Contact Name: Shoua Lo Contact Phone: (408) 325-6049

Forwarding Address: 355 E Trimble Road

City: San Jose State: CA Zip: 95131 Phone No.: (408) 325-6049

Property Owner Name: MCPP Montague Pointe, LLC c/o Cushman & Wakefield

Property Owner Mailing Address: One Almaden Blvd., Suite 630
If different from site address

City: San Jose State: CA Zip: 95113 Phone No.: (408) 889-1369

2. Closure Information:

☒ Full Facility Closure ☐ Partial Facility Closure/Remodel Proposed Date of Closure: 9 / 1 / 2022

Briefly describe the proposed closure activity. Indicate the previous use(s) of the area(s) intended to be closed and the types of chemicals used or stored in the area(s) (i.e. by submitting a copy of the Inventory Statements from your Hazardous Materials Business Plan, etc.). Include equipment, tanks, piping, exhaust and treatment systems, and the proposed final disposition of any hazardous materials and/or wastes. Attach additional pages if necessary.

See attached.

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.1(c)

RECEIVED
SANTA CLARA COUNTY
DEPT. OF ENV. HEALTH
2012 FEB -8 PM 12: 28

To: Agency Name: **County of Santa Clara Department of Environmental Health**
Agency Mailing Address: **1555 Berger Drive, Suite 300**
San Jose, CA 95112-2716

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: **Ultratech, Inc.**

Facility Street Address: **3050 Zanker Road** City: **San Jose**

Date of Current HMBP: **8/28/2009**

I certify that: *(Check the appropriate box.)*

☒ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. *(See bottom of page for details.)* If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

☐ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions has been electronically submitted or is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator *(Print)*: **Bruce R. Wright** Title: **Chief Financial Officer**

Phone: **None** Signature: Bruce R. Wright Date: 2/6/12

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; **and**
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; **and**
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; **and**
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; **and**
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

HW Generator Type:
Consent to Inspect Granted By: SUSAN CREIGHTON, EHS MANAGER

☐ **RCRA LQG**
☐ **Pictures Taken**
☐ **Samples Taken**

Summary of Violations & Notice to Comply

Program: PR0315460 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G020	M	**MARKING OF HAZARDOUS WASTE** Facility failed to properly mark a hazardous waste tank and/or container. ***OBSERVED SEVERAL HAZARDOUS WASTE STEP CANS LOCATED THROUGHOUT THE FACILITY MARKED WITH AN ACCUMULATION START DATE AS "EMPTY MONTHLY". CONTAINERS THAT ARE EMPTIED DAILY MAY USE THE PHASE "EMPTY DAILY" IN LIEU OF MARKING WITH AN ACCUMULATION START DATE.*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	
G023	M	**CONTAINER OPEN** Facility failed to keep a hazardous waste container closed at a time when it was not necessary to add or remove waste. ***OBSERVED THE FOLLOWING HAZARDOUS WASTE CONTAINERS WITHOUT LIDS:*** ***- LSA PASS THROUGH: FIVE GALLON CONTAINER OF WASTE ANTIFREEZE.*** ***- APPLICATIONS LAB CHASE: 55-GALLON DRUM OF WASTE PHOTO RESIST.*** Tightly close all hazardous waste containers. Ensure that they remain closed, except when it is necessary to add or remove waste. Containers are considered closed when all lids, gaskets, and locking rings are in place and secured. [CCR 66265.173(a), CFR 265.173(a)]	
G030	M	**POINT OF GENERATION ACCUMULATION** A hazardous waste container managed under point of generation accumulation rules was not at or near the point of generation and/or under the control of the operator. ***APPLICATIONS LAB CHASE: THE 55-GALLON DRUM OF FLAMMABLE SOLID WASTE IS BEING MANAGED UNDER POINT OF GENERATION ACCUMULATION RULES HOWEVER THE WASTES ARE BEING COLLECTED THROUGHOUT THE FACILITY AND ADDED TO THE DRUM.*** Move the container(s) to a location that is at or near the point of generation and ensure that the waste is under the control of the operator that is generating the waste. If the above conditions cannot be met, begin managing the waste in accordance with standard hazardous waste accumulation requirements. [CCR 66262.34(e)(1)(A)]	

DRAFT

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0208647 **Inspection Date:** 09/26/2014
Facility Name: ULTRATECH STEPPER INC
Site Address: 3050 ZANKER RD, SAN JOSE, CA 95134

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G110	M	**MAINTENANCE AND OPERATION OF FACILITY** Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment. ***- SEM ROOM: OBSERVED A RED STEP CAN CONTAINING USED SOLVENT WIPES THAT WAS OVERFLOWING.*** ***- CHEMICAL BUNKER: OBSERVED AN UNKNOWN CLEAR LIQUID ON TOP OF A 55-GALLON DRUM THAT WAS DISSOLVING THE COATING ON THE DRUM.*** Maintain and operate the facility in a manner that minimizes potential emergencies and unplanned releases. [CCR 66265.31, CFR 265.31]	
G300	II	**ACCUMULATION TIME** Facility accumulated hazardous waste on-site for longer than the allowed time limit. ***THE FOLLOWING HAZARDOUS WASTE CONTAINERS HAVE BEEN ONSITE LONGER THAN THE ALLOWED TIME LIMIT:*** ***- LSA PASS THROUGH: FIVE GALLON CONTAINER OF WASTE ANTIFREEZE MARKED WITH A START DATE OF 3-27-13.*** ***- APPLICATIONS LAB CHASE: 55-GALLON DRUM OF SOLID FLAMMABLE WASTE WITH A START DATE OF 12-3-13.*** ***- TRAINING ROOM: ONE GALLON CONTAINER OF WASTE LEAD SOLDER MARKED WITH A START DATE OF 3-31-14.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not accumulated on-site for longer than 90 days. [CCR 66262.34(a)]	
G320	M	**TRAINING** Personnel are not adequately trained on managing hazardous waste. ***TWO EMPLOYEES (SUSAN CREIGHTON AND MIKE TAMURA) HAVE RECEIVED TRAINING ON HAZARDOUS WASTE MANAGEMENT PROCEDURES HOWEVER THERE ARE OTHER EMPLOYEES THAT HAVE HAZARDOUS WASTE MANAGEMENT RESPONSIBILITIES THAT HAVE NOT RECEIVED TRAINING.*** Provide a program of instruction that: 1) is directed by a person trained in hazardous waste management procedures; 2) teaches waste management procedures relevant to the position of each employee; and 3) ensures facility personnel are able to respond effectively to emergencies. Provide this training within 6 months of hire, and annually thereafter. [CCR 66265.16]	
G321	M	**RECORDS: HAZARDOUS WASTE TRAINING** Hazardous waste training records are incomplete or are not being kept as required. ***THE HAZARDOUS WASTE TRAINING RECORDS DO NOT ADEQUATELY DOCUMENT THE REQUIRED ELEMENTS: THE NAME AND JOB TITLE OF EACH PERSON IN A POSITION THAT HAS HAZARDOUS MANAGEMENT RESPONSIBILITY; A WRITTEN JOB DESCRIPTION THAT INCLUDED THE DUTIES, SKILLS, EDUCATION, OR OTHER QUALIFICATIONS REQUIRED FOR EACH POSITION; A DESCRIPTION OF THE TYPE AND AMOUNT OF INTRODUCTORY AND CONTINUING TRAINING THAT WILL BE GIVEN TO EACH POSITION; DOCUMENTATION THAT THE TRAINING WAS COMPLETED BY FACILITY PERSONNEL.*** Maintain training records that include: 1) the name and job title of each person in a position that has hazardous waste management responsibility; 2) a written job description that includes the duties, skills, education, or other qualifications required for each position described above; 3) a description of the type and amount of introductory and continuing training that will be given for each position; and 4) documentation that this training was completed by facility personnel. Keep current employee training records until facility closure. Keep records on former employee for at least 3 years from the date the employee last worked at the facility. [CCR 66265.16(e)]

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0208647 **Inspection Date:** 09/26/2014
Facility Name: ULTRATECH STEPPER INC
Site Address: 3050 ZANKER RD, SAN JOSE, CA 95134

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G400	II	**MANAGEMENT OF CONTAMINATED CONTAINERS** Facility improperly treated, managed, or disposed of a hazardous materials container that was not empty because it still contained a pourable or scrapeable quantity of hazardous material. ***APPLICATIONS LAB: OBSERVED A ONE GALLON IPA CONTAINER INSIDE A 55-GALLON DRUM MARKED FOR EMPTY CONTAINERS THAT STILL HAD A POURABLE AMOUNT OF IPA INSIDE.*** Thoroughly empty hazardous material/waste containers prior to treating, managing, or disposing of them, when allowed under empty container management standards. If a container cannot be emptied, manage it per standard hazardous waste requirements. [CCR 66261.7(b)]	

Comments: This inspection began on 9-18-2014 and concluded today.

Request for additional information:
- Applications Lab Chase: Is the Chemical Distribution System unit still in use? There are two containers of RER flammable liquid that are stored inside the unit. If the unit is no longer in use the chemicals stored inside need to be properly managed.
- Chemical bunker: Observed a bin of aerosol cans marked as "in use". When asked if the aerosol cans are actually still in use Sue Creighton was not sure. Please confirm if the aerosol cans are still being used or if they are waste.

AP Manufacturing: Observed a 5-gallon container with a small amount of water inside that had a blank hazardous waste label on it. If this is not a hazardous waste then label should be removed.

AWN: The secondary containment container used for sodium hydroxide is constructed of metal and is located adjacent to a drum of sulfuric acid. Recommend changing the container to a material that is compatible with both the sodium hydroxide and sulfuric acid.

Hazardous Waste Training log was reviewed for Sue Creighton and Mike Tamura.

Program: PR0391378 - TIERED PERMIT-CONDITIONAL AUTHORIZATION - 2262
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
G340	II	**TANK SYSTEM ASSESSMENT** Facility failed to obtain or keep on file a current and complete written hazardous waste tank system assessment. ***THE LAST TANK SYSTEM ASSESSMENT COMPLETED ON 11-14-2008 IS NO LONGER CURRENT. THE TANK SYSTEM MUST BE REASSESSED EVERY FIVE YEARS BY A PROFESSIONAL ENGINEER.*** Make arrangements to have the tank system assessed by an appropriate Professional Engineer (PE) who is knowledgeable of hazardous waste tank system requirements. Provide a specific date by which the assessment is expected to be completed. Upon completion of the assessment, submit a copy of the final report to HMCD. [CCR 66265.191(a), 66265.192(h)]	
G343	M	**TANK INSPECTIONS** Facility could not demonstrate that hazardous waste tanks are being inspected daily as required. ***FACILITY DOES NOT HAVE DOCUMENTATION SHOWING THAT THE TANKS ARE BEING INSPECTED DAILY AS REQUIRED.*** Perform and document hazardous waste tank inspections daily. Inspections must cover: 1) overfill/spill control equipment; 2) aboveground portions of the tank system; 3) data gathered from monitoring and leak detection equipment; 4) construction materials and the area immediately surrounding the tank system; and 5) the level of waste in the tank, for uncovered tanks. [CCR 66265.195]

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
T205		**INSPECTION SCHEDULE AND LOG: CA** Facility failed to prepare or maintain on-site a written inspection schedule for their Conditionally Authorized hazardous waste treatment unit and/or a log of inspections conducted. ***FACILITY DOES NOT HAVE A WRITTEN INSPECTION SCHEDULE AS REQUIRED.*** Prepare and maintain on-site a written schedule for inspecting the treatment unit. Inspect the unit per the schedule, recording all inspection activities in a log. Keep inspection records on-site for at least 5 years from the date of inspection. [HSC 25200.3(c)(5), 25200.3(c)(7)]	
T206		**OPERATING INSTRUCTIONS AND RECORD: CA** Facility failed to prepare or maintain on-site written operating instructions for a Conditionally Authorized hazardous waste treatment unit and/or records of hazardous wastes treated in that unit. ***FACILITY DOES NOT HAVE THE FOLLOWING REQUIRED DOCUMENTS:*** ***- WRITTEN OPERATING INSTRUCTIONS*** ***- RECORD OF THE DATES, CONCENTRATIONS, AMOUNTS, AND TYPES OF HAZARDOUS WASTE TREATED*** Prepare and maintain on-site written operating instructions that include directions on: 1) how to operate the treatment unit; 2) how to recognize and respond to potential and actual process upsets; 3) when to implement the facility's contingency plan; 4) how to determine if the treatment has been effective; and 5) how to manage waste treatment residuals. Also maintain a record of the dates, concentrations, amounts, and types of hazardous waste treated. Keep the treatment records on-site for at least 5 years from the date of treatment. [HSC 25200.3(c)(6)-(7)]	
T303		**CLOSURE COST ESTIMATE: CA/PBR** Facility failed to prepare a written estimate of all costs that would be incurred to close their Permit by Rule or Conditionally Authorized hazardous waste treatment unit(s), and/or failed to revise the estimate when required. ***THE CLOSURE COST ESTIMATE DOES NOT INCLUDE THE ADJUSTMENT FOR INFLATION.*** Prepare and submit to HMCD a written estimate of all costs that would be incurred to close your hazardous waste treatment unit(s) . Adjust the estimate for inflation annually by March 1 and whenever there is a change that increases the cost of closure. Keep the written closure cost estimate and latest adjusted estimate on-site during the operating life of the facility. [CCR 67450.13(a)(1)-(4)]

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, c actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at Berger Drive, Suite 300, San Jose, CA 95112-2716 or via e-mail to the inspector noted on the "Inspected By" line of the report.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Inspection Type: LIMITED INSPECTION

VC	Class	Violation	Corrective Actions Taken
T208	II	**CLOSURE: CA [3250001]** Facility failed to properly close a Conditionally Authorized hazardous waste treatment unit. ***FACILITY CEASED TREATMENT ACTIVITIES AND IS IN THE PROCESS OF VACATING THE BUILDING BUT FAILED TO NOTIFY HAZARDOUS MATERIALS COMPLIANCE DIVISION (HMCD) OF THE CLOSURE.*** Close the treatment unit by removing all waste residues, and decontaminating all containment system components, soils, structures and equipment that are contaminated with hazardous waste from the unit. Upon completion of closure activities, submit written notification of closure to HMCD in person or by certified mail, with return receipt requested. [HSC 25200.3(g)]	

Comments: FACILITY IS CLOSING OPERATIONS AND RELOCATING TO 355 E TRIMBLE, SAN JOSE CA.

PER MR. MIKE TAMARA, SAN JOSE FIRE DEPARTMENT IS CONDUCTING THE FACILITY CLOSURE.

****PROVIDE A COPY OF THE SAN JOSE FIRE DEPARTMENT'S FINAL INSPECTION REPORT.***

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 06/25/2023, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, c actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at Berger Drive, Suite 300, San Jose, CA 95112-2716 or via e-mail to the inspector noted on the "Inspected By" line of the report.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

---

Joanne,
I have bundled up our responses on the inspection findings. The summery is the first attachment. I have responded to all except the Financial assurance. We are required to do this, but I am still figuring out the best way to do the assurance method. I hope to have it resolved by next Friday, but it may take time to put a bond in place, so I targeted 11/21.
If you'd like to talk and go over all the responses,
please let me know.
Best Regards,
Sue

Ultratech CUPA Inspection Response

November 7, 2014

Item #	Violation	Planned Corrective Action	Completion Date
1 - G020	Observed several hazardous waste step cans located throughout the facility marked with an accumulation start date as "empty monthly". Containers that are emptied daily may use the phrase "empty daily" in lieu of marking with an accumulation start date	For the solvent wipe can: 1) All solvent wipe cans in the AP Manufacturing area have been labeled as satellite waste 2) A procedure including a map of can locations has been developed for all satellite wastes 3) Training for personnel who dispose of hazardous waste, and personnel who handle hazardous waste containers is complete 4) EHS will continue to monitor status of satellite waste cans monthly	1) 10/1/14 2) 10/24/14 3) 11/7/14 4) 10/24/14
2- G - 023	Observed the following hazardous waste containers without lids: -LSA pass-through: Five gallon container of waste anti-freeze. - Applications Lab Chase: 55 Gallon drum of waste photo-resist	1) Re-training of employes occured on 10/29/14 2) Monthly EHS inspections have been increased to bi-weekly for a period of three months to monitor closure of containers. Feedback to area owners will be provided the same day. 3) The insepctions and feedback cycle will continue if improvements are not noted in the three-month period.	1) 11/7/14 2) 10/15/14 3) 1/5/15
3 - G030	Applications Lab Chase: The 55 gallon drum of flammable solid waste is being managed under point-of-generation accumulation rules, however, the wastes are being collected throughout the facility and added to the drum	1) All solvent wipe cans in the AP Manufacturing area have been labeled as satellite waste 2) A procedure including a map of can locations has been developed for all satellite wastes 3) Training for personnel who dispose of hazardous waste, and personnel who handle hazardous waste containers is complete 4) EHS will continue to monitor status of satellite waste cans monthly	1) 10/1/14 2) 10/24/14 3) 11/7/14 4) 10/24/14

DRAFT

Ultratech CUPA Inspection Response

November 7, 2014

Item #	Violation	Planned Corrective Action	Completion Date
4 - G110	SEM Room: Observed a red step can containing used solvent wipes that was overflowing Chemical Bunker: Observed an unknown clear liquid on top of a 55 gallon drum that was dissolving the coating on the drum	For the solvent wipe can: 1) All solvent wipe cans in the AP Manufacturing area have been labeled as satellite waste 2) A procedure including a map of can locations have been developed for all satellite wastes 3) Training for personnel who dispose of hazardous waste, and personnel who handle hazardous waste containers occured on 10/29/2014 4) EHS will continue to monitor status of satellite waste cans monthly For the unknown liquid on the drum lid: 5) An investigation was conducted to determine the source of the unknown liquid and a clean-up was performed. The liquid was dynasolv 185, a solvent used to dissolve adhesives. The MSDS was obtained, the spill was contained, the clean-up materials were place in with the solid solvent wipes, and corrective actions were implemented to prevent recurrence. 6) The event has been documented and filed.	1) 10/1/14 2) 10/24/14 3) 11/7/14 4)10/24/14 5) 10/7/14 6) 10/13/14
5 - G300	The following hazardous waste containers have been onsite longer than the allowed time limit: - LSA Pass Through: Five gallon container of waste anti-freeze marked with a start date of 3/27/13 - Applications Lab Chase: 55 gallon drum of solid flammable waste with a start date of 12/3/14 - Training Room: One gallon container of waste solder marked with a start date of 3/31/14	Ultratech reviewed current practices with the generation of cooling waste and antifreeze waste to determine which are hazardous and which are non-hazardous waste. From this, we did the following: 1) The waste antifeeze was removed by the waste hauler 2) The solvent wipe waste was removed by the waste hauler 3) The 1 gallon continer of lead solder waste is a satellite waste container. It is now labelled as satellite waste (note the container was empty)	1) 10/13/14 2) 10/13/14 3) 10/24/14

DRAFT

Ultratech CUPA Inspection Response

November 7, 2014

Item #	Violation	Planned Corrective Action	Completion Date
6 - G320	Two employees have received training on hazardous waste management procedures, however there are other employees that have hazardous waste management responsibilities that have not received training	Employees who generate and who handle hazardous waste were trained on 10/29/14	11/7/2014
7 - G321	The hazardous waste training records do not adequately document the required element: The name and job title of each person in a position that has hazardous management responsibility; a written job description that included the duties, skills, education or other qualifications required for each position; a description of the type and amount of introductory and continuing training that will be given to each position; documentation that the training was completed by facility personnel	Ultratech has trained EHS and the Hazardous Waste Coordinator as part of the 10/29/14 training	10/31/2014
8 - G400	Applications Lab: Observed a one gallon IPA container inside a 55-gallon wheelie bin marked for empty containers that still had a pourable amount of IPA inside	1) Re-training of employees occured on 10/29/14 and emphasized the need to keep waste containers covered 2) Monthly EHS inspections have been increased to bi-weekly for a period of three months to monitor closure of containers. Feedback to area owners will be provided the same day. 3) The insepctions and feedback cycle will continue if improvements are not noted in the three-month period.	1) 11/7/14 2) 10/15/14 3) 1/5/15
9 - G340	The last tank system assessment completed on 11-14-2008 is no longer current. The tank system must be re-assessed every 5 years by a Professional Engineer	AEI consultants were retained and performed the Tank Assessment on 10/15/14. The report is given in the email response to the county	10/29/2014

DRAFT

Ultratech CUPA Inspection Response

November 7, 2014

Item #	Violation	Planned Corrective Action	Completion Date
10 - G343	Facility does not have documentation showing that the tanks are being inspected daily as required	Ultratech has modified the daily inspections to include water level checks. All other check items are on the current daily log.	10/17/2014
11 - T205	Facility does not have a written inspection schedule as required	Ultratech has included the inspection schedule as part of the new hazardous waste procedures	10/24/2014
12 - T206	Facility does not have the following written documents: - Written Operating Instructions - Record of the dates, concentrations, amounts and types of hazarous waste treated	1) Ultratech has worked with the vendor who provides tha calibration, repair and maintenance of our AWN to develop Operating Instructions 2) Hazardous waste composition is included on the daily log and inspection sheet	1) 10/31/14 2) 10/31/14
13 - T303	The closure cost estimate does not include the adjustment for inflation	Ultratech has determined the closure cost adjusted for inflation is $10,168. We are currently discussing a surety bond or policy with our insurance broker	11/21/2014
14	Applications Lab Chase: Is the Chemical Distribution System still in use?	Ultratech uses the track system daily that the chemical distribution system feeds	10/9/2014
15	Chemical Bunker: Observed a bin of aerosol cans marked "in-use" Please confirm if the aerosol cans are being used or if they are waste	Ultratech does use the aerosol cans that are in the bunker. They are stored there because we keep flammable liquids and cans there	10/9/2014
16	AP Manufacturing: Observed a 5 gallon container with a small amount of water inside that has a blank hazardous waste label on it. If it is not hazardous waste, the label should be removed.	The container waste placed in the lab in anticipation of an upcoming process that generated hazardous waste. Ultratech has: 1) determined the liquid was rinse water that was not fully emptied 2) documented the procedure for obtaining an empty and dry waste containers 3) trained employees performing the operation on waste generation requirements	1) 10/9/14 2) 10/24/14 3) 11/7/14

	Request for Additional Information	Planned Corrective Action	Completion Date
17	AWN: The secondary containment container used for sodium hydroxide is constructed of metal and is located adjacent to a drum of sulfuric acid. Recommend changing the container to a material that is compatible with both the sodium hydroxide and sulfuric acid.	Ultratech discussed this with the PE who noted a leak detector was needed in the secondary containment. The leak detector has been installed and has been signed off by the PE (See Tank Assessment report)	11/7/2014

Summary of Violations & Notice to Comply

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0208647
Facility Name: ULTRATECH A DIVISION OF VEECO
Site Address: 3050 ZANKER RD, SAN JOSE, CA 95134

Inspection Date: 01/09/2020

Program: PR0315460 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G020	M	**MARKING OF HAZARDOUS WASTE [3030007]** Facility failed to properly mark a hazardous waste tank and/or container. ***PROCESS LAB*** ***-55 GALLON CONTAINER OF PHOTO RESIST WAS MISSING ALL REQUIRED MARKINGS*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	- Container has been labeled with appropriate "**Hazardous Waste**" label identifying the content, hazardous property, physical state, and accumulation start date. - See Photo. 

DRAFT

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0208647 **Inspection Date:** 01/09/2020

Facility Name: ULTRATECH A DIVISION OF VEECO **Site**
Address: 3050 ZANKER RD, SAN JOSE, CA 95134

Summary of Violations & Notice to Comply

G034	M	**POINT OF GENERATION ACCUMULATION [3030057]** A hazardous waste container managed under point of generation accumulation rules was not at or near the point of generation and/or under the control of the operator. ***OBSERVED CONTAINERS MARKED AS POINT OF GENERATION BUT FAILED TO MEET POINT OF GENERATION REQUIREMENTS, THE WASTE IS COLLECTED IN 5 GALLON STEP CANS IN THE PROCESS LAB, SEM LAB, DEMO LAB, BONDING LAB AND TRANSFERRED TO 55 GALLON DRUMS WITH A DIFFERENT ACCUMULATION START DATE.*** ***THE WASTES NOT MEETING POINT OF GENERATION IS THE FLAMMABLE SOLID WASTE, EPOXY WASTE AND PHOTO RESIST SOLVENT WASTE.*** Move the container(s) to a location that is at or near the point of generation and ensure that the waste is under the control of the operator that is generating the waste. If the above conditions cannot be met, begin managing the waste in accordance with standard hazardous waste accumulation requirements. [CCR 66262.34(e)(1)(A)]	- All POG containers has been relabeled as "Empty Daily". - All POG and accumulation containers are marked accordingly to hazardous waste stream. - Containers at the POG are accumulation containers only and the 55-gal container is accumulation container with appropriate Hazardous Waste label and accumulation date. 
G320	M	**TRAINING [3020002]** Personnel are not adequately trained on managing hazardous waste. ***DOUG SMITH, HANDLES HAZARDOUS WASTE AND SIGNS MANIFEST BUT HAS NOT RECEIVED ANNUAL HAZARDOUS WASTE TRAINING.*** Provide a program of instruction that: 1) is directed by a person trained in hazardous waste management procedures; 2) teaches waste management procedures relevant to the position of each employee; and 3) ensures facility personnel are able to respond effectively to emergencies. Provide this training within 6 months of hire, and annually thereafter. [CCR 66265.16]	- Since 2018, Doug Smith has stopped handling hazardous waste and has not any signed manifest since 2017. Doug is no longer involve in the handling of hazardous waste which is why he is not required to complete the annual hazardous waste management training curriculum. - Employees are assigned the appropriate training through our online learning system based on each employee's job title and job function.

Comments: INSPECTION COMMENCED ON JANUARY 8, 2019 AND CONCLUDED TODAY.

FACILITY WALK THROUGH WAS CONDUCTED WITH SHOUA LO.

FACILITY DESIGNS, MANUFACTURES AND MARKETS THIN FILM PROCESS EQUIPMENT.

FACILITY GENERATES THE FOLLOWING HAZARDOUS WASTES THAT INCLUDE BUT ARE NOT LIMITED TO:
-SOLVENT RESIST
-FLAMMABLE SOLID
-FLAMMABLE LIQUID
-WASTE EPOXY RESIN
-CORROSIVE LIQUID-DEVELOPER
-ST-22 RESIDUE REMOVER

Facility Name: ULTRATECH A DIVISION OF VEECO **Site**
Address: 3050 ZANKER RD, SAN JOSE, CA 95134

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
T205	M	**INSPECTION SCHEDULE AND LOG: CA [3230011]** Facility failed to prepare or maintain on-site a written inspection schedule for their Conditionally Authorized hazardous waste treatment unit and/or a log of inspections conducted. ***FACILITY FAILED TO PREPARE A WRITTEN INSPECTION SCHEDULE OF THE CONDITIONALLY AUTHORIZED WASTE TREATMENT UNIT AND LOG OF INSPECTIONS CONDUCTED.*** Prepare and maintain on-site a written schedule for inspecting the treatment unit. Inspect the unit per the schedule, recording all inspection activities in a log. Keep inspection records on-site for at least 5 years from the date of inspection. [HSC 25200.3(c)(5), 25200.3(c)(7)]	- Log book has been created along with written inspection schedule.
T206	M	**OPERATING INSTRUCTIONS AND RECORD: CA [3210037]** Facility failed to prepare or maintain on-site written operating instructions for a Conditionally Authorized hazardous waste treatment unit and/or records of hazardous wastes treated in that unit. ***THE WRITTEN OPERATING PLAN FAILED TO ADDRESS THE FOLLOWING:*** ***-HOW TO DETERMINE IF THE TREATMENT WAS EFFECTIVE*** ***-FULL DESCRIPTION OF THE TREATMENT UNIT*** ***-HOW TO MANAGE RESIDUAL THAT ACCUMULATE OF THE BOTTOM*** ***OF THE TREATMENT TANK*** ***-RECORDS OF DATES, CONCENTRATION, AMOUNTS OF TYPES OF WASTES TREATED.*** ***-PROCESS FOR OFF SPEC BATCHES.*** Prepare and maintain on-site written operating instructions that include directions on: 1) how to operate the treatment unit; 2) how to recognize and respond to potential and actual process upsets; 3) when to implement the facility's contingency plan; 4) how to determine if the treatment has been effective; and 5) how to manage waste treatment residuals. Also maintain a record of the dates, concentrations, amounts, and types of hazardous waste treated. Keep the treatment records on-site for at least 5 years from the date of treatment. [HSC 25200.3(c)(6)-(7)]	- Written operating instruction has been updated to include: how to determine if treatment was effective, full description of the treatment unit, how to manage residual, and record of waste treated, and how to process off-spec bathes.
T301	M	**SECURITY: CA [3230088]** Facility operates a Permit by Rule or Conditionally Authorized hazardous waste treatment unit, but failed to provide adequate measures to prevent unknowing or unauthorized entry into the active portions of the facility. ***FACILITY FAILED TO POST SIGNS STATING, "DANGER HAZARDOUS WASTE AREA-UNAUTHORIZED PERSONNEL KEEP OUT". SIGNS SHALL BE POSTED IN ENGLISH, SPANISH AND ANY OTHER PREDOMINANT LANGUAGE.*** Where unknowing or unauthorized entry could cause injury or a violation, provide a 24-hour surveillance system that monitors and controls entry onto the facility, or a barrier with a means to control entry onto the facility (e.g., a fence in good repair). Post signs stating, "DANGER HAZARDOUS WASTE AREA - UNAUTHORIZED PERSONNEL KEEP OUT" or equivalent in English, Spanish and any	- Sign has been posted (1/15/20). See photo. 

DRAFT

Summary of Violations & Notice to Comply

		other language predominant in the area surrounding the facility. [CCR 66265.14]	

VC	Class	Violation	Corrective Actions Taken
T306	II	**FINANCIAL ASSURANCE: CA [3210]** Facility failed to establish or maintain a viable financial mechanism to cover the estimated costs of closure. ***ESTIMATED CLOSING COST DOES NOT MATCH CURRENT CLOSURE COST TOTAL.*** Obtain financial assurance for closure of the treatment unit by one of the following mechanisms: 1) closure trust fund; 2) surety bond guaranteeing payment into a closure trust fund; 3) closure letter of credit; 4) closure insurance; 5) financial test and corporate guarantee for closure; 6) use of multiple or alternative financial mechanisms as described in 22 CCR 66265.143 or 67450.13; or 7) self-certification, if the closure cost estimate is less than $10,000. Ensure that Santa Clara County Department of Environmental Health is listed as the beneficiary of the financial assurance mechanism(s) and that the mechanism is worded exactly as is noted in CCR. Submit a copy of the mechanism(s) to HMCD. [CCR 67450.13(a)(5)-(8)]	- Surety bond has been updated on CERS along with 2020 closure estimate cost. - Completed and submitted on 2/6/20 into CERS. Change of ownership makes current mechanism invalid.

Comments: TETRAMETHYL AMMONIUM HYDROXIDE IS GENERATED IN THE PROCESS LAB USE TO DEVELOP WAFERS, RINSE WATERS ARE COLLECTED IN A LIFT STATION BEHIND THE LAB. THE LIFT STATION COLLECTS TETRAMETHYL AMMONIUM HYDROXIDE UP TO A SET LEVEL, ONCE THE LEVEL IS TRIGGERED THE WASTE IS PUMPED THROUGH VIA THE PIPES TO THE WASTE TREATMENT SYSTEM WHERE THE PH IS ADJUSTED TO MEET POTW STANDARDS.

TREATMENT IS CONDUCTED IN A TWO PART COMPARTMENT TANK, THE PH IS ADJUSTED VIA SULFURIC ACID AND SODIUM HYDROXIDE.

OFFICIAL NOTICE OF INSPECTION- SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, c actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at Berger Drive, Suite 300, San Jose, CA 95112-2716 or via e-mail to the inspector noted on the "Inspected By" line of the report.

What if there are violations that cannot be corrected within30 days?

For each violation that cannot be corrected within 30days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI , you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date .Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

Aco-locatedsamplewillbe giventoyouuponrequestifadequatesamplevolumeisavailable.Photographsandsampleanalyticalresultswillnotgenerallybe availableuntilafter theinspectionhasbeen concluded.Acopyofphotographs and/oranalyticalresultswillbe provided toyouuponwrittenrequest.Photographsandsampleanalyticalresultsmaybe withheld in the event of a criminal investigation or other ongoing investigation.

Certification Of Financial Assurance

This page is to be completed by the owner or operator of a Fixed Treatment Unit operating under Permit by Rule (PBR), or a generator operating pursuant to a grant of Conditional Authorization (CA) If this is a new facility, this certification should be attached to the Onsite Hazardous Waste Treatment Notification - Facility page If this is an existing facility and you have previously submitted a Notification, the certification and the financial assurance mechanism may be submitted without another notification

Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (22 CCR §67450 13(b) and HSC §25245 4) However, you are eligible for an exemption from financial assurance requirements if closure cost estimates are not more than $10,000 (22 CCR §67450 13(d)) PBR operations that operated less than thirty (30) days in any calendar year are also eligible for an exemption (22 CCR §67450 13(e)) Complete the page even if you qualify for an exemption

An adjustment to the closure cost estimate for inflation is required to be completed by March 1 of each year See 22 CCR §67450 13(a)(2) for instructions on calculating the adjustment This updated closure cost estimate must be maintained at the facility If your cost estimate now exceeds $10,000 for the first time, you must submit this Certification and a closure cost estimate within 30 days to your CUPA or authorized agency If the cost estimate adjustment results in an increase and requires a change in your financial mechanism, submit this certification and revised mechanism **within 60 days** (§66265 143) Any change in information affecting the closure cost estimate or mechanism must be submitted within 30 days to your CUPA or authorized agency Refer to 22 CCR §67450 13 for financial assurance requirements

(Note the numbering of the instructions follows the data element numbers that are on the UPCF pages These data element numbers are used for electronic submission and are the same as the numbering used in 27 CCR, Appendix C, the Business Section of the Unified Program Data Dictionary)
Please number all pages of your submittal This helps the Department of Toxic Substances Control (DTSC) identify whether the submittal is complete and if any pages are separated

1 FACILITY ID NUMBER - Leave this blank This number is assigned by DTSC This is the unique number which identifies your facility
2 EPA ID NUMBER - Enter the EPA ID number for the facility
3 BUSINESS NAME - Enter the full legal name of the business
700 CERTIFICATION STATUS - Check the reason the certification is being completed
701 TYPE OF OPERATION - Check the type of operation If type of operation is not listed, check "other" and indicate type in the space provided
702 ESTIMATED CLOSURE COSTS - Enter the total estimated cost of closing each treatment unit and attach a written estimate of the closure costs The estimated closure cost may be either the actual cost or the estimated cost when using your own staff and/or equipment The closure cost estimate may take into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets Following is a model closure cost estimate

ACTIVITY	COST
1 Removal, treatment (on-site or off-site), or disposal of waste inventories	**$3300**
2 Removal and disposal of soil	
3 Decontamination of equipment and structure	**$6685**
4 Demolition and removal of containment system components or structure	**$5685**
5 Transportation	**$2800**
6 Sampling and analysis of waste, soil, equipment, and structure	
7 Certification or other demonstration of closure ("clean" closure or specified level of decontamination)	**$500**
8 Other expenses (specify) **Consultant**	**$500**
9 Less Assets (salvage value of waste, equipment or property)	
TOTAL COST OF CLOSURE	**$19,470 (2) or $9735 per unit**

NOTE For PBR only, if you have operated under PBR for less than 30 days in any calendar year, you qualify for an exemption If eligible for the exemption, enter "EXEMPT" in this space

703 EXEMPTION FROM FINANCIAL ASSURANCE - Check to claim the exemption from the financial assurance requirements for total closure cost estimate less than or equal to $10,000 A model letter using the required certifications must be submitted to claim this exemption
704 EXEMPTION FROM FINANCIAL ASSURANCE - OTHER - Check to claim "other" reason for exemption from financial assurance requirements Describe the reason for the exemption in the space provided Reference the applicable statute or regulation granting the exemption
705 EXEMPTION FROM FINANCIAL ASSURANCE - <30 DAYS PER YEAR - Check to claim the exemption from financial assurance requirements for owner or operator under PBR only and operating no more than thirty days in any calendar year
706 REQUIREMENT FOR FINANCIAL ASSURANCE - Check to indicate whether the financial assurance mechanism is attached
707 DATE OF CLOSURE ASSURANCE MECHANISM - Enter the effective date of the closure financial assurance mechanism
708 MECHANISM ID NUMBER - If applicable, enter the number of the closure assurance mechanism, for example, the insurance policy number
709 CLOSURE ASSURANCE MECHANISM - Check to indicate the type of financial mechanism established to provide the closure cost assurance Eligible types are contained in 22 CCR §67450 13(a)(5) They are
1 A closure trust fund, as provided in 22 CCR 66265 143(a), DTSC Form 1154
2 A surety bond guaranteeing payment into a closure trust fund, as described in 22 CCR 66265 143(b), either DTSC Form 1155 or 1156 with DTSC Form 1154
3 A closure letter of credit, as described in 22 CCR 66265 143(c), DTSC Form 1157
4 Closure insurance, as described in 22 CCR 66265 143(d), DTSC Form 1158
5 A financial test and corporate guarantee for closure, as described in 22 CCR 66265 143(e), either DTSC Form 1159 or 1173
6 An alternative mechanism for closure costs, as described in 22 CCR 67450 13(c), (no form)
7 Use of multiple financial mechanisms for closure costs, as described in 22 CCR 66265 143(g), (no form)
8 A certificate of deposit, as described in section 3-104(2)(c) of the Uniform Commercial Code, (no form) or,
9 A savings account, as described in section 4-104(a) of the Uniform Commercial Code, (no form)

These mechanisms require use of the additional DTSC Financial Assurance forms referenced above These forms are available from the CUPA or the DTSC Regional Office When using these forms, verify that the beneficiary is the CUPA, rather than DTSC

710 FINANCIAL INSTITUTION OR SURETY NAME 711 FINANCIAL INSTITUTION OR SURETY ADDRESS 712 FINANCIAL INSTITUTION OR SURETY CITY 713 FINANCIAL INSTITUTION OR SURETY STATE 714 FINANCIAL INSTITUTION OR SURETY ZIP CODE	For items **710 - 714**, enter the name and address of the financial institution, insurance company, surety company, or other appropriate organization used to establish the closure financial assurance Indicate your company if you are using a corporate guarantee and financial test

715 SIGNER OF CERTIFICATION - Check to indicate whether the person certifying is the owner or the operator of the facility
SIGNATURE - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided The authorized signatory must be completed as specified in Title 22, CCR, section 66270 11 In most companies, this is not the environmental compliance or technical staff The title should indicate that an appropriate authorized person is signing for the company Original signatures are required on all documents submitted

716 DATE CERTIFIED - Enter the date that the document was signed
717 OWNER/ OPERATOR NAME - Enter the full printed name of the person signing the page
718 OWNER/ OPERATOR TITLE - Enter the title of the person signing the page

RE Estimate for Closure of two (2) Waste Water Treatment Systems

Dear Mr. Tran:

On behalf of Advanced Chemical Transport, Inc. (ACT) I am pleased to provide you with this estimate to clean, and decommission two (2) Waste Water Treatment Systems. The estimate is based on the information provided.

ACT will:

- Flush associated piping from each unit
- Piping will be cut, capped to the tanks
- Field verification of pH will be conducted to verify corrosive materials have been neutralized
- The tanks will be cut up with electric saws and placed into bins for disposal
- The secondary containment will be decontaminated and ph Tested
- All waste generated from the project will be transported and disposed of as a hazardous waste.

Water and electrical to be provided by Ultratech in the work area. All electrical to be physically disconnected by others prior to our arrival Unistrut/Supports to be left in place. The secondary containment will be left in place once cleaned.
All work as proposed is based on being performed Monday-Friday 8am-5pm excluding weekend, holiday, or overtime hours.

Terms are 30 days. Proposal and pricing is valid for 45 days.

RE: FINANCIAL ASSURANCE ANNUAL CERTIFICATION

Dear Sir or Madam:

This letter is provided by your Certified Unified Program Agency (CUPA), the County of Santa Clara, Department of Environmental Health. The intent is to help facilitate your Annual Certification for Financial Assurance which is required for the operation of an onsite fixed treatment unit under Conditional Authorization (CA).

The required Unified Program Consolidated Forms (UPCF) pertaining to your onsite treatment unit(s) have been submitted by your facility. **You are requested to submit the (UPCF) form "Certificate of Financial Assurance" with signature to our office by May 31, 2007.**

If changes related to your onsite treatment unit(s) occurred last year, in addition to the above noted form, please submit the UPCF forms to reflect those changes. Templates for all UPCF forms are available on the following website: www.EHinfo.org.

As a reminder, facilities are required to adjust their closure cost estimates for inflation by March 1st of each year. It is advisable that you use last year's inflation factor of 1.029 per cent since the Bureau of Economic Affairs doesn't publish the Implicit Price Deflator for the last quarter of year 2006 until April of 2007.

You are requested to submit a copy of your updated closure cost estimate to this office only if you previously self certified that the closure cost was less than $10,000.00 and now, due to updating, it exceeds that amount. In addition, all facilities that claim salvage value for resale of equipment under the closure cost estimate, please send documentation supporting the true market value of the salvage/reclaimed equipment.

UNIT NAME 610		**MONTHLY TREATMENT VOLUME 611**	**UNIT OF MEASURE 612**
Acid Waste Neutralization System (Continuous)		30,000	☐ a Pounds ☒ b Gallons

SPECIFIC WASTE TYPE TREATED (narrative) 613
Corrosive Developer waste & DI water from various RINSE operations in lab area (ie) Sodium Hydroxide 4%; Tetra-methylammonium Hydroxide (3%) potassium Hydroxide 2%)

TREATMENT PROCESS DESCRIPTION (narrative) 614
process waste waters are plumbed to the Neutralization system on the back Equipment pad at which point acid will be pumped in to adjust the pH and monitor the effluent acidity/alkalinity of the system. System is monitored by digital flow meters & continuous chart recorder.

(NOTE For each treatment unit, complete and attach the appropriate Waste and Treatment Process Combinations page)

II. BASIS FOR NOT NEEDING FEDERAL PERMIT (Check all that apply)

☐ a The treated waste is not a hazardous waste under federal law (California-only waste)

☒ b Treated in waste water treatment units (tanks) and discharged to a publicly owned treatment works (POTW)/sewering agency or under an NPDES permit

☒ c Treatment in elementary neutralization units

☐ d Treatment in a totally enclosed treatment facility

☐ e Federal conditionally exempt small quantity generator (generated 100 kg , approximately 27 gallons, or less of hazardous waste in a calendar month)

☐ f Treatment in an accumulation tank or container within 90 days for over 1,000 kg /month generators and 180 or 270 days for generators of 100 to 1,000 kg /month 615

☐ g Recyclable materials are reclaimed to recover silver or other precious metals

☐ h Empty container rinsing and/or treatment

☐ i Other (specify below)

III. RESIDUALS MANAGEMENT DESCRIPTION (Check all that apply)

☒ a Discharge non-hazardous aqueous waste to POTW or sewer

☐ b Discharge non-hazardous aqueous waste under a NPDES permit

☐ c Dispose of non-hazardous solid waste residues at an offsite location

Residual hazardous waste hauled offsite by a registered hauler 616

☐ d Offsite recycling
☐ e Thermal treatment
☐ f Disposal to land
☐ g Further treatment
☐ h Other method of disposal (describe below)

SECONDARY CONTAINMENT INSTALLATION DATE (If required) 617

CONDITIONALLY AUTHORIZED (CA) PAGE

WASTE AND TREATMENT PROCESS COMBINATIONS

(one page per treatment unit – check all that apply))

Unit ID# 606 Facility ID# 1 Page 5 of 16

1 Aqueous wastes, hazardous solely due to inorganic constituents, except asbestos, listed in Title 22, CCR, Section 66261 24(a)(1)(B) or (a)(2)(A) and which contain less than 1,400 ppm total of these constituents (There is no volume limit for this wastestream) Treatment using· 618

- ☐ a Phase separation, including precipitation, by filtration, centrifugation, or gravity settling, including the use of demulsifiers and flocculants
- ☐ b Ion exchange, including metallic replacement
- ☐ c Reverse osmosis
- ☐ d Adsorption
- ☐ e pH adjustment of aqueous waste with a pH of between 2 0 and 12 5
- ☐ f Electrowinning of solutions, unless those solutions contain hydrochloric acid
- ☐ g Reduction of solutions hazardous solely due to hexavalent chromium, to trivalent chromium with sodium bisulfite, sodium metabisulfite, sodium thiosulfate, ferrous chloride, ferrous sulfate, ferrous sulfide, or sulfur dioxide The solution contains less than 750 ppm of hexavalent chromium

2 Aqueous wastes, hazardous solely due to organic constituents listed in Title 22, CCR, Section 66261 24(a)(1)(B) or (2)(B) and which contain less than 750 ppm total of these constituents (There is no volume limit for this wastestream) Treatment using

- ☐ a Phase separation by filtration, centrifugation, or gravity settling, but excluding super critical fluid extraction
- ☐ b Adsorption

3 Sludges resulting from wastewater treatment, dusts, solid metal objects, and metal workings which are hazardous solely due to the presence of constituents, except asbestos, listed in Title 22, CCR, Section 66261.24(a)(1)(B) or (a)(2)(A) and which, for dusts only, contain less than 750 ppm total of these constituents The monthly volume treated in this unit does not exceed 5,000 gallons or 45,000 pounds Treatment using

- ☐ a Physical processes which constitute treatment only because they change the physical properties of the waste, such as filtration, centrifugation, gravity settling, grinding, shredding, crushing, or compacting
- ☐ b Drying to remove water
- ☐ c Separation based on differences in physical properties, such a size, magnetism, or density

4 Alum, gypsum, lime, sulfur, or phosphate sludges The monthly volume treated in this unit does not exceed 5,000 gallons or 45,000 pounds Treatment using.

- ☐ a Drying to remove water
- ☐ b Phase separation by filtration, centrifugation, or gravity settling

5 Special wastes listed in Title 22, CCR, Section 66261 120 that meet the criteria in Title 22, CCR, Section 66261 122 which is hazardous solely due to the constituents, except asbestos, listed in Title 22, CCR, Section 66261 24(a)(1)(B) or (a)(2)(A) and which contain less than 750 ppm total of these constituents. The monthly volume treated in this unit does not exceed 5,000 gallons or 45,000 pounds. Treatment using.

- ☐ a Drying to remove water
- ☐ b Phase separation by filtration, centrifugation, or gravity settling
- ☐ c Screening to separate components based on size
- ☐ d Separation based on differences in physical properties, such as size, magnetism, or density

6 Special wastes classified under Title 22, CCR, Section 66261 124 as special wastes, except asbestos, which is hazardous solely due to the constituents, except asbestos, listed in Title 22, CCR, Section 66261 24(a)(1)(B) or (a)(2)(A) and which contain less than 750 ppm total of these constituents The monthly volume treated in this unit does not exceed 5,000 gallons or 45,000 pounds Treatment using

- ☐ a Drying to remove water
- ☐ b Phase separation by filtration, centrifugation, or gravity settling
- ☐ c Magnetic separation

7 Soils contaminated with metals listed in Title 22, CCR, Section 66261 24(a)(2)(A). The monthly volume treated in this unit does not exceed 5,000 gallons or 45,000 pounds Treatment using

- ☐ a Screening to separate components based on size
- ☐ b Magnetic separation

8 Oil mixed with water and oil/water separation sludges (There is no volume limit for this wastestream) Treatment using (NOTE Some used oil/water separation is allowed under the CEL category)

- ☐ a Phase separation by filtration, centrifugation, or gravity settling, but excluding super critical fluid extraction, including the use of demulsifiers and flocculants Heat can be used, but must not exceed 160 degrees Fahrenheit
- ☐ b Separation based on differences in physical properties, such a size, magnetism, or density
- ☐ c Reverse osmosis

9 Neutralization of acidic or alkaline wastes, hazardous solely due to corrosivity, or toxic only from the acid or caustic material, in elementary neutralization units.(There is no volume limit for this wastestream)

- ☒ a The waste contains less than 10 percent acid or base constituents by weight There is no volume limit for this category
- ☐ b The waste contains 10 percent or more acid or base constituents by weight and is treated in batches that do not exceed 500 gallons at one time

10 Not in use/exempted—formerly recovery of silver from photofinishing

11 Not in use/sunsetted—formerly treatment of spent cleaners and conditioners which are hazardous solely due to copper or copper compounds Treatment of this wastestream is no longer allowed under Conditional Authorization as of January 1, 1998 Treatment of this wastestream now requires authorization under either Permit by Rule or, if the total volume treated is less than 55 gallons per month, under Conditionally Exempt Small Quantity Treatment

12 A wastestream technology combination certified by the Department pursuant to Section 25200 1 5 of the Health and Safety Code as appropriate for authorization under Conditional Authorization

☐ Certified Technology Number

Hazardous Waste Inventory Information:

The annual permit fee is determined by the total quantity of hazardous waste generated per year. Complete the table below for all hazardous waste inventory *(e.g used oil, used parts cleaning solvent, used oil filters, waste paint, spent fixer, etc.)*. Additional space is provided on the other side of this form. *[Note to medical facilities: Do not list medical (i e. red bag) wastes on this form.]*

Name of Hazardous Waste	Treatment/Disposal Method(s) *(Definitions provided on bottom of page 2)*	Annual Quantity Generated*
WASTE FLAMMABLE LIQUID PHOTORESIST/STRIPPER mix	☐ Recycled on-site ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal	660 ☒ gal ☐ lbs
WASTE FLAMMABLE LIQUID PHOTORESIST/ACETONE mix	☐ Recycled on-site ☐ Treated on-site ☒ Shipped off-site for recycling/treatment/disposal.	330 ☒ gal ☐ lbs.
WASTE ACETONE	☐ Recycled on-site ☐ Treated on-site ☒ Shipped off-site for recycling/treatment/disposal	5 ☒ gal ☐ lbs

* *Solids must be reported in pounds Liquids may be reported in either pounds or gallons*

The undersigned hereby applies for a hazardous waste generator permit from the County of Santa Clara. I hereby certify that the submitted information is true, accurate, and complete. I understand that a new application will be required if this facility changes ownership, moves, or begins generating hazardous wastes which are not listed on this application.

Signature of Owner/Operator. Bruce R Wright Title: CHIEF FINANCIAL OFFICER Date: 9/20/00

8340 lbs/yr = 4.2 Tons
2000

For the following questions, check the appropriate box·

1 Does this facility discharge process waste waters to sanitary sewer? ☐ Yes; ☒ No
2. Does this facility generate infectious/biomedical wastes? ☐ Yes, ☒ No

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g. pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF)

Note. Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply All applicable boxes in column 2 of the waste inventory table should be checked.

RE: Hazardous Waste Generator Permit Application

DRAFT

Nicole Pullman,

We are expanding our facilities and moving into an additional facility at 2880 Junction Road, San Jose, CA 95134

Per our phone conversation on 9/20/00 I have enclosed all of the required forms and documentation If you have any questions regarding this application please feel free to contact me directly at 408-577-3101

Thank you for your assistance

Sincerely,

Cheri Able

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

SIGNATURE AND CERTIFICATION FOR PERMIT-BY-RULE AND CONDITIONAL AUTHORIZATION

Instructions: Carefully read the certification below. If you feel uncomfortable signing this certification, review the instructions and the information developed in the preparation of the checklist and correct any deficiencies you have found. Be sure that you check one of the boxes below to record your decision regarding further investigation. If you are claiming exemption from completing a Phase I Environmental Assessment, complete that section below.

Either the owner, operator, or independent professional engineer, geologist, or an environmental assessor who is registered in the State of California, shall certify to the following statement by signing on the appropriate lines below:

___ Yes, further investigation is needed to determine the existence, nature, and/or extent of contamination at the facility; or

X No, further investigation is not necessary to determine the existence, nature, and/or extent of contamination at the facility.

___ I am exempt from completing the checklist and/or from resulting followup work. [Please state reason for exemption below and supply documentary evidence (see instructions)]. Explanation·

CERTIFIED MAIL

Ms Cheri Able
Ultratech Stepper, Inc.
2880 Junction Avenue
San Jose, California 95134-1922

EPA ID No. CAR00067992

Dear Ms Cheri:

The Department of Toxic Substances Control (DTSC) is sending this letter, as a reminder, to new facilities that have been authorized by DTSC and/or their local Certified Unified Program Agency (CUPA) to treat hazardous waste under the Permit By Rule (PBR) and Conditional Authorization (CA) tiers. Health & Safety Code, section 25200 14 (b)(1) requires PBR and CA facilities to complete and file a Phase I Environmental Assessment (Phase I) with DTSC not later than one year from the date that the facility or generator becomes authorized to operate. Based on your facility's date of authorization, the Phase I Checklist is due to DTSC no later than October 10, 2001.

As of January 1, 1998, DTSC transferred the responsibility for authorization of new CA facilities to CUPAs and this same responsibility for authorization of new PBR facilities was transferred to the CUPAs on January 8, 1999. At this time, the responsibility for the review and oversight of Phase I's and corrective actions, will not be managed the CUPAs, but is under the oversight of DTSC.

The Phase I Checklist and instructional guidance are enclosed for your convenience. If you have questions or need assistance please call me at (510) 540-3858

RE: FINANCIAL ASSURANCE ANNUAL CERTIFICATION

Dear Sir or Madam:

This information package is provided by your Certified Unified Program Agency (CUPA), the County of Santa Clara, Department of Environmental Health. The intent is to help facilitate your Annual Certification for Financial Assurance which is required for the operation of an onsite fixed treatment unit under Conditional Authorization (CA).

The required Unified Program Consolidated Forms (UPCF) pertaining to your onsite treatment unit(s) have been submitted by your facility. **You are requested to submit the (UPCF) form "Certificate of Financial Assurance" with signature to our office by May 15, 2005:**

The requested UPCF form is enclosed in this package. If changes related to your onsite treatment unit(s) occurred last year, in addition to the above noted form, please submit the UPCF forms to reflect those changes. Templates for all UPCF forms are available on the following website: www.unidocs.org.

As a reminder, facilities are required to adjust their closure cost estimates for inflation by March 1st of each year. It is advisable that you use last year's inflation factor of 1.016 per cent since the Bureau of Economic Affairs doesn't publish the Implicit Price Deflator for the last quarter of year 2004 until April of 2005.

You are requested to submit a copy of your updated closure cost estimate to this office only if you previously self certified that the closure cost was less than $10,000.00 and now, due to updating, it exceeds that amount. In addition, all facilities that claim salvage value for resale of equipment under the closure cost estimate, please send documentation supporting the true market value of the salvage/reclaimed equipment.

DRAFT

Board of Supervisors Donald F Gage, Blanca Alvarado, Pete McHugh, James T Beall, Jr , Liz Kniss
County Executive Peter Kutras, Jr

After updating your closure cost estimate, we recommend that you evaluate the financial mechanism and verify that it is adequate to cover the current closure cost estimate. For facilities that have filed under the mechanism of Financial Test and Corporate Guarantee, in order to maintain eligibility for this closure assurance mechanism, annual updated information must be submitted to this department within ninety days of the close of the firm's fiscal year.

Do not send an annual notification fee with this renewal form. You will be receiving an invoice either from our Department or from your local fire department for the annual permit to operate your treatment unit(s).

Once you have completed and submitted the Certificate of Financial Assurance Form, you will have complied with the 2005 annual certification requirements as noted in the California Code of Regulations, Title 22, Section 67450.13.

If you have any questions regarding this letter, please contact Ruben Williams at (408) (408) 918-1985.

Sincerely,

Nicole Pullman

Instructions . Completing the Certification Of Fi. ial Assurance for Permit by Rule and Conditionally Authorized Onsite Treaters (Formerly DTSC Form 1232)

This form must be completed by the owner or operator of a Fixed Treatment Unit (FTU) operating under Permit by Rule (PBR), or a hazardous waste generator operating pursuant to a grant of Conditional Authorization (CA) If this is a new facility, this certification should be attached to the Onsite Hazardous Waste Treatment Notification - Facility page If this is an existing facility and you have previously submitted a Notification, this certification and your financial assurance mechanism may be submitted without another Notification Refer to 22 CCR §67450 13 for financial assurance requirements

PBR and CA operations must provide evidence of financial assurance to cover closure costs However, you are eligible for an exemption from financial assurance requirements if closure cost estimates are not more than $10,000 You must complete this form even if you qualify for an exemption

An adjustment to the closure cost estimate for inflation is required to be completed by March 1 of each year See H&SC §67450 13(a)(2) for instructions on calculating the adjustment This updated closure cost estimate must be maintained at the facility Please number all pages of your submittal (Note Numbering of these instructions follows the UPCF data element numbers on the form)

1 FACILITY ID NUMBER - This number is for agency use only Leave this space blank
2 EPA ID NUMBER - Enter the EPA ID Number for the facility
3 BUSINESS NAME - Enter the complete Facility Name
700 CERTIFICATION STATUS - Check the appropriate box to identify the type of certification
701 TYPE OF OPERATION - Check the type of operation If type of operation is not listed, check "Other" and indicate type in the space provided
702 ESTIMATED CLOSURE COSTS - Enter the total estimated cost of closing each treatment unit and attach a written estimate of the closure costs The estimated closure cost may be either the actual cost or the estimated cost when using your own staff and/or equipment The closure cost estimate may take into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets The following is a model closure cost estimate (NOTE For PBR only, if you have operated under PBR for less than 30 days in any calendar year, you qualify for an exemption If eligible for this exemption, enter "EXEMPT" on the form in place of a dollar amount)

	ACTIVITY	COST
a	Removal, treatment (on-site or off-site), or disposal of waste inventories	$ 2,000.00
b	Removal and disposal of soil	$ —
c	Decontamination of equipment and structure	$ 1,500.00
d	Demolition and removal of containment system components or structure	$ —
e	Transportation	$ —
f	Sampling and analysis of waste, soil, equipment, and structure	$ 1,500.00
g	Certification or other demonstration of closure ("clean" closure or specified level of decontamination)	$ 2,000.00
h	Other expenses (specify) - consultant	$ 2,500 - 00
i	Less Assets (salvage value of waste, equipment or property)	$ unknown
	TOTAL COST OF CLOSURE	$ 9,500.00 x 1.024 = ~ $9750.00

703 EXEMPTION FROM FINANCIAL ASSURANCE - Check this box to claim the exemption from the financial assurance requirements for total closure cost estimate less than or equal to $10,000 A model letter using the required certifications must be submitted to claim this exemption
704 EXEMPTION FROM FINANCIAL ASSURANCE - OTHER - Check to claim "Other" reason for exemption from financial assurance requirements Describe the reason for the exemption in the space provided Reference the applicable statute or regulation granting the exemption
705 EXEMPTION FROM FINANCIAL ASSURANCE - <30 DAYS PER YEAR - Check to claim the exemption from financial assurance requirements if owner or operator under PBR only and operating no more than thirty days in any calendar year
706 REQUIREMENT FOR FINANCIAL ASSURANCE - Check to indicate that the financial assurance mechanism is attached
707 DATE OF CLOSURE ASSURANCE MECHANISM - Enter the effective date of the financial assurance mechanism
708 MECHANISM ID NUMBER - If applicable, enter an identifying number for the closure assurance mechanism (e g insurance policy number)
709 CLOSURE ASSURANCE MECHANISM - Check to indicate the type of financial mechanism used to provide the closure cost assurance Eligible types are
- a A closure trust fund, as provided in 22 CCR §66265 143(a) [NOTE You must also complete DTSC Form 1154],
- b A surety bond guaranteeing payment into a closure trust fund, as described in 22 CCR §66265 143(b) [NOTE You must also complete either DTSC Form 1155 or 1156 with DTSC Form 1154],
- c A closure letter of credit, as described in 22 CCR §66265 143(c) [NOTE Also complete DTSC Form 1157],
- d Closure insurance, as described in 22 CCR §66265 143(d) [NOTE Also complete DTSC Form 1158],
- e A financial test and corporate guarantee for closure, as described in 22 CCR §66265 143(e) [NOTE Also complete either DTSC Form 1159 or 1173],
- f An alternative mechanism for closure costs, as described in 22 CCR §67450 13(c),
- g Use of multiple financial mechanisms for closure costs, as described in 22 CCR §66265 143(g),
- h A certificate of deposit, as described in section 3-104(2)(c) of the Uniform Commercial Code,
- i A savings account, as described in section 4-104(a) of the Uniform Commercial Code

These mechanisms require use of the additional DTSC Financial Assurance forms referenced above These forms are available from your Certified Unified Program Agency (CUPA) or the DTSC Regional Office When using these forms, verify that the beneficiary is the CUPA, rather than DTSC

710 FINANCIAL INSTITUTION OR SURETY NAME -
711 FINANCIAL INSTITUTION OR SURETY ADDRESS -
712 FINANCIAL INSTITUTION OR SURETY CITY -
713 FINANCIAL INSTITUTION OR SURETY STATE -
714 FINANCIAL INSTITUTION OR SURETY ZIP CODE -

For items 710-714, enter the name and address of the financial institution, insurance company, surety company, or other appropriate organization used to establish the closure financial assurance Indicate your company if you are using a corporate guarantee and financial test

715 SIGNER OF CERTIFICATION - Check the appropriate box to indicate whether the person certifying is the owner or the operator of the facility
SIGNATURE - The business owner, or officer of the company who is authorized to make decisions for the facility and who has operational control, shall sign in the space provided Certification must be completed as specified in Title 22, CCR, section 66270 11 The title should indicate that an appropriate authorized person is signing for the company In most companies, this is not the environmental compliance or technical staff Original signatures are required on all documents submitted
716 DATE CERTIFIED - Enter the date that the document was signed
717 OWNER/ OPERATOR NAME - Enter the full printed name of the person signing the page
718 OWNER/ OPERATOR TITLE - Enter the title of the person signing the page

VIOLATIONS: Codes noted below in the "Violation Codes" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time. Consent to Inspect Given By TOM TRAN

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
G020	Observed several containers used for satellite accumulation of Hazardous waste improperly labeled. Hazardous waste labels were missing the generators name, address, physical state and hazardous properties of the waste.	
G111	Observed Eyewash and safety shower station in the metrology lab not being inspected monthly. Last inspection was recorded as 7/3/08. Implement a monthly inspection for all eyewash and safety shower stations as required in CAL OSHA.	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25404.1.2(c)(1) of California Health and Safety Code (HSC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to HMCD within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. ***(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)***

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716 The effective date of the certification that any violation has been corrected is the date that it is postmarked

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection Definitions of Violation Codes are listed on the attached Violation Codes document(s)

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected Additionally, the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected If more space is needed, attach additional pages

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date Address such notices to the attention of the inspector who cited the violation In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request Other pertinent information derived from the inspection is attached to this NOI Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

ULTRATECH SAN JOSE
BUILDING 1 NEUTRALIZATION SYSTEM
SECONDARY CONTAINMENT
ASSESSMENT OF STRUCTURAL INTEGRITY
November 2008

Section 66264.192(i)(1) of Title 22 of the California Code of Regulations (22 CCR) requires that above-ground storage tanks containing hazardous waste be assessed at the time of installation and every five years during the service life of the tank.

This assessment is for the Secondary Containment System of the approximately 1,050 gallon neutralization system located at the Ultratech Building 1 at 3050 Zanker Road in San Jose, California.

INSPECTION RESULTS

The treatment system consists of two connected neutralization tanks with a combined capacity of approximately 1,050 gallons The secondary containment has a capacity of approximately 1,200 gallons. The treatment system is located in an enclosed building and receives waste water with elevated pH generated from process operations at Building 1.

The tank was inspected on November 6, 2008 The information required for the assessment under 22 CCR 66264.192(l) (1) through (l) (8) is included on the attached inspection form. The inspection found none of the following to be in evidence·

- leakage;
- punctures, cracks, or significant corrosion,
- significant scrapes or damage to protective coatings,
- structural inadequacies or installation defects.

However the inspection identified the following deficiencies regarding the secondary containment of the two connected neutralization tanks and the tanks·

Secondary Containment Leak Detection System:
Section 66264 193(c)(3) of the Title 22 of the California Code of Regulations (22CCR) requires that the secondary containment "*be provided with a leak-detection system that is designed and operated so that it will detect the failure of either the primary or secondary containment structure or the presence of any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the owner or operator can demonstrate to the Department that existing detection technologies or site conditions will not allow detection of a release within 24 hours*"

During our visit we did not observe the presence of such a system Ultratech has been made aware of the deficiency and is planning to address this deficiency.

DRAFT

Strategic Engineering and Science, Inc.
110 11th Street – 2nd Floor
Oakland, California 94607

Overfill Protection System
Section 66265 194 as referenced by HSC 25200 3(c)(4) also requires that the treatment system be equipped with overfill prevention controls (e g level sensing devices, high level alarms, automatic feet cutoff, bypass to a standby tank, etc)

The automatic feed cutoff and bypass to a secondary tank were not observed.

RECOMMENDATIONS AND CONCLUSION

As required by 22 CCR 66264.192(l) (11), and based on the findings of this assessment as described above, I estimate that the tank has at least five years of remaining service life under current conditions. In accordance with 22 CCR 66264.192(1)(1), the assessment of tank system lifecycle is valid for a period of five years and the tank system should be reassessed at that time by Strategic Engineering & Science, Inc. to obtain a new estimate of remaining service life. In addition after ULTRATECH addresses the deficiencies observed, a new assessment will be made by Strategic Engineering and Science, and a certificate of compliance issued.

CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to be the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

ULTRATECH SAN JOSE
BUILDING 2 NEUTRALIZATION SYSTEM
SECONDARY CONTAINMENT
ASSESSMENT OF STRUCTURAL INTEGRITY
November 2008

Section 66264 192(i)(1) of Title 22 of the California Code of Regulations (22 CCR) requires that above-ground storage tanks containing hazardous waste be assessed at the time of installation and every five years during the service life of the tank.

This assessment is for the Secondary Containment System of the two connected neutralization tanks with a combined capacity of approximately 700 gallons, located at the Ultratech Building 2 at 2880 Junction Avenue in San Jose, California.

INSPECTION RESULTS

The treatment system consists of two connected neutralization tanks with a combined capacity of approximately 700 gallons The secondary containment system has a capacity of approximately 720 gallons The treatment system is located in an enclosed building and receives waste water with elevated pH generated from process operations at Building 2

The tank was inspected on November 6, 2008 The information required for the assessment under 22 CCR 66264 192(l) (1) through (l) (8) is included on the attached inspection form. As applicable, the inspection found none of the following to be in evidence

- leakage,
- punctures, cracks, or significant corrosion;
- significant scrapes or damage to protective coatings; or
- structural inadequacies or installation defects

However the inspection identified two deficiencies. The first deficiency is with respect to the secondary containment system of the two connected neutralization tanks while the second deficiency is with respect to the tank overfill protection system

Secondary Containment
Section 66264 193(c)(3) of the Title 22 of the California Code of Regulations (22CCR) requires that the secondary containment "*be provided with a leak-detection system that is designed and operated so that it will detect the failure of either the primary or secondary containment structure or the presence of any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the owner or operator can demonstrate to the Department that existing detection technologies or site conditions will not allow detection of a release within 24 hours*"

DRAFT

We did not observe the presence of a leak detection system in the secondary containment system of the two connected neutralization tanks. Ultratech has been made aware of the deficiency and is planning to modify the system

Overfill Protection.
Section 66265.194 (b) as referenced by HSC 25200 3(c)(4) also requires that the treatment system be equipped with overfill prevention controls (e g level sensing devices, high level alarms, automatic feet cutoff, bypass to a standby tank, etc.).

We did not observe the presence of an automatic feed cutoff and bypass to a secondary tank.

RECOMMENDATIONS AND CONCLUSION

As required by 22 CCR 66264 192(l) (11), based on the findings of this assessment as described above, I estimate that the tank has at least five years of remaining service life under current conditions. In accordance with 22 CCR 66264.192(1)(1), the assessment of tank system lifecycle is valid for a period of five years and the tank system should be reassessed at that time by Strategic Engineering & Science, Inc to obtain a new estimate of remaining service life. In addition after the deficiencies outlined in this assessment are addressed, an assessment will be made by Strategic Engineering and Science, and a certificate of compliance will be issued.

SECTION II: FACILITY HISTORY

Instructions Complete this section regarding facility history based on reasonably available knowledge of the facility This section will determine if past operating practices and significant historical events that occurred at the facility indicate potential areas of contamination Current and past employees who know about the facility's past operating practices can be an asset in completing this section of the checklist Yes answers to these questions mean that careful attention must be paid to these areas and considerations when completing the facility walk-through inspection

DRAFT

		YES	NO
1	Has an environmental assessment and/or a site investigation report ever been completed for the facility? If this assessment meets the criteria for substituting for this checklist (see Instructions), use the Signature and Certification Page to record this exemption You need not release confidential assessments However, if these reports indicate existing or potential contamination, you must use the information relied on by the confidential report to help reach a conclusion in this assessment		X
2	To your knowledge, have areas of the facility that contain hazardous materials ever been flooded?		X
3	To your knowledge, has the facility ever been damaged by an earthquake that could cause contamination?		X
4	To your knowledge, has the location for the facility ever been used for industrial purposes prior to its current use? If YES, then consider potential contamination from the type of industry that the location was formerly used for		X
5	To your knowledge, has there been any disposing of hazardous chemicals or hazardous wastes in, on, or under the property?		X
6	To your knowledge, has the facility ever had electrical transformers, capacitors, or hydraulic equipment including, but not limited to elevators and auto lifts, at the facility which may have released PCBs or oil to the environment? (Not including small quantities of fluorescent light ballasts and capacitors if these materials were not disposed of or dismantled at the facility) If YES, was the equipment ever tested for the presence of PCBs?		X
7	To your knowledge, has testing of any groundwater wells on the property ever revealed possible contamination?		X
8	Do you have in your possession, or do you know of the existence of any photographs, geophysical reports, analytical test data, and/or air sampling data that indicates the possible presence of hazardous materials and/or waste in unwarranted or unexpected areas of the facility?		X
9	To your knowledge, has the facility ever had liquid/sludge containment area(s), surface impoundment(s), collection pond(s), and/or lagoon(s)?		X

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

10	To your knowledge, have land-farming or bioremediation been used at the facility?		X
11	To your knowledge, has the facility ever burned hazardous wastes, unidentified waste materials, tires, or automotive batteries at the facility?		X
12	To your knowledge, have ash and/or combustion residuals been disposed of at the facility?		X
13	To your knowledge, have any underground storage tank(s) been removed, abandoned, or taken out of service from the facility? Tanks removed, abandoned, or taken out of service under the oversight of a responsible agency need not be considered if the agency addressed potential contamination at the tank location		X
14	To your knowledge, has any contaminated soil been discovered and/or remediated at the facility without oversight by an appropriate regulatory agency?		X
15	To your knowledge, have there been fires and/or explosions at the facility which may have caused a release of hazardous waste or materials?		X
16	To your knowledge, has the facility ever received complaints from any employees, neighbors, or the public about the facility's practices for managing hazardous wastes, or any actual or potential releases to air, water, or soil, or other environmental issues?		X
17	To your knowledge, have nearby residents complained to a governmental agency of any type of illnesses or unusual illnesses as having been caused or suspectedly caused by or related to activities at the facility? (Note this item does not require questioning the facility's neighbors) If YES, indicate below the person and/or agency who recorded the complaint _____ If YES, to your knowledge, has any evidence been submitted to a physician to substantiate the claim?		X
18	To your knowledge, are there any areas at the facility which were formerly used for hazardous waste or hazardous materials transfer (e g tank loading areas, drum transfer areas)?	X	
19	To your knowledge, are there, or have there been lawsuits or administrative proceedings concerning an actual, alleged, or threatened release of any hazardous substance against the facility by another party? Only actions concluded by settlement or litigation need be considered		X

DRAFT

TIERED PERMITTING PHASE I ENVIRONMENTAL ASSESSMENT CHECKLIST

SECTION IV: FACILITY WALK-THROUGH INSPECTION - OTHER AREAS

Instructions This section of the checklist requires the owner and/or operator of the facility to conduct a walk-through inspection of the those portions of the facility not addressed in Section III in order to identify possible environmental problems, environmental warning signs or potential exposure to people, animals, or plants Some of the problems that may be discovered during this inspection include abandoned storage tanks, spill areas, surface impoundments, etc Some of the environmental warning signs include stains, discolored vegetation, and/or unnatural terrain During the inspection, were any of the following present

		YES	NO
1	Does the facility have vent pipes, fill pipes, and/or access routes that may indicate the presence of an underground storage tank?		X
2	Does the facility have stains and/or discolorations of the soil, flooring, drains and/or walls at the facility which may indicate a release to the environment that has not or is not being addressed under the oversight of an appropriate agency?		X
3	Does the facility have areas of soil at the facility that appear disturbed and which may indicate onsite disposal or land treatment of hazardous materials or remediation of releases without oversight by an appropriate agency?		X
4	Does the facility have areas at the facility where the terrain appears unnatural, such as unexplained mounds or depressions?		X
5	Does the facility have unusual smells or odors emanating from the soil, floor, drains, and/or walls at the facility?		X
6	Does the facility have dead, abnormal, or distressed-looking vegetation or conspicuous absence of vegetation at the facility that is not directly explainable by a deliberate action and/or lack of water at the site?		X

7 Where does rain and/or washwater drain to at the facility? (circle all that apply) Note slightly contaminated storm or washwater can seriously contaminate evaporation or settling areas (with no drainage) over a period of time

(a Storm Drain) d Open Land

(b Sewer) e Areas of pooling, settling, or evaporation

c Drainage Ditch f Other _____

RE: Official Notice of Inspection 2-9-05

Dear Muhammad Janjua –

All the observations and corrective actions have been addressed and the 2 following pages include details of the Corrective Actions taken.

The influent water sample is currently being taken and the results will be sent to you as soon as they are received. With these results I will mail you a packet including:

1) Updated Financial Assurance form & bid
2) Test results for B2 Influent
3) Copy of the Operation Manual for B2 system
4) Copy of the Waste manifest (for the towels & wipes)

This should address all of the issues you discussed during your inspection. If you have any further questions or comments please feel free to contact me at 408 314-9377.

Thanks for taking the time to visit our facility.

Sincerely,

Charles Wurm, MS, CHMM, REA

THE OF 'IAL NOTICE OF INSPECTION 'LAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected Additionally, the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected If more space is needed, attach additional pages

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD The pink copy is for your records

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

****

Hazardous Waste Violations

- **Per H&SC §25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.**
- **Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per H&SC §25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

Acute Bioassay Results for Untreated Wastewater Effluent

DRAFT

Dear Mr. Janjua,

I'm sending this letter in response to my letter dated March 18, 2002, and the subject analysis performed

In response to our proposal, UTS performed a 24-hour composite sample of the effluent from the subject facility The purpose of this sampling was to determine whether the effluent met the criteria for hazardous waste classification UTS has received the analytical results for the Title 22 Acute Toxicity Method, for determination of hazardous waste (Fish Bioassay)

Discussion of Results:

The sample test was performed per the State approved method by an accredited laboratory The results are attached in the following pages The results indicate that there was an overall survival rate of greater than 92%. The State criteria for classification of "hazardous waste" by this method, is less than 40% survival at a concentration of 750ppm of waste constituent Therefore, the effluent is not characterized as a hazardous waste.

Since the wastewater is a "non-hazardous waste", UTS is not subject to SB14, and a Certification of Financial Assurance is not required.

Should you have any questions please call me at 408-577-3101 or on my cell phone at 408-314-9377

Subject Ultratech Stepper, Inc (UTS), 2880 Junction Ave
Hazardous Waste Inspection on March 11, 2002

DRAFT

Dear Mr Janjua,

I'm sending this letter in response to the subject inspection On the inspection two violations were noted on the attached Notice of Inspection (NOI)

UTS respectfully submits the attached corrective actions The corrective actions have been indicated on the attached yellow copy Additionally, there were two recommendations that UTS will address herein The two recommendations are as follows

1 Phase I checklist must be submitted within 10 days of this inspection
2 Waste Minimization (SB14) must be prepared and submitted to this department

The Phase I Environmental Assessment Checklist was submitted to DTSC on September 25, 2001 Please find a photocopy attached. Regarding the SB14 requirements Per our conversation on March 13, 2002, we discussed the applicability of SB14, as it has not been determined that the wastewater generated at the subject building has been characterized as "hazardous waste" UTS proposes to perform a composite sampling of the wastewater over a 24 hour period The sample will be analyzed by the Title 22 Acute Toxicity Method, for determination of hazardous waste (Fish Bioassay) UTS will proceed with this proposal upon written acceptance of this proposal UTS will, upon receipt of analytical results, characterize the wastewater, and determine the need for SB14 Additionally, should the characterization be "non-hazardous waste", it would negate the necessity for the Certification of Financial Assurance

Should you have any questions please call me at 408-577-3101 or on my cell phone at 408-314-9377

THE OFI .AL NOTICE OF INSPECTION E .AINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P.O. Box 28070, San Jose, CA 95159-8070.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

Hazardous Waste Violations

- **Per H&SC, Section 25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.**
- **Per H&SC, Section 25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per H&SC, Section 25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

THE C CIAL NOTICE OF INSPECTION PLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or - for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken, along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P.O. Box 28070, San Jose, CA 95159-8070.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1 The yellow copy of each page must be submitted to HMCD. The pink copy is for your records.

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection, you must submit a written Notice of Disagreement, within 35 days of the inspection date, to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this Notice of Inspection to dispute violations.

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this Notice of Inspection. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

****

Hazardous Waste Violations

- **Per H&SC, Section 25187.8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law.**
- **Per H&SC, Section 25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per H&SC, Section 25187.8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

Dear Conditionally Authorized facility:

ACKNOWLEDGEMENT OF UNIT OPERATING UNDER CONDITIONAL AUTHORIZATION

Santa Clara County Hazardous Materials Compliance Division has received your facility specific initial notification and forms for Conditional Authorization (CA) Tier Your notifications are administratively complete, but have not been reviewed for technical adequacy. A technical review of your notifications will be conducted when an inspection is performed. At any time, you may be inspected and could be subject to penalty if violations of laws or regulations are found. A copy of the checklist used by our office for CA Inspections is enclosed

This office acknowledges receipt of your completed notifications for the treatment unit listed on the last page of this letter. This unit operating under Conditional Authorization is authorized by California law without additional action, pursuant to Health and Safety Code sections 25200 3 and 25201.4 1 and 25201.5. ANNUAL RENEWAL IS NOT REQUIRED FOR THE UNITS OPERATING UNDER THESE PERMITTING TIERS. Your authorization to operate continues until you notify our office that you have stopped treating waste and have fully closed the unit. No annual fees are being charged at this time.

You must notify this office 60 days before first treating hazardous wastes in any new unit. You must also notify this office whenever any of the information you provided in these notifications changes and when the unit has been closed. To revise information, mail a cover letter to the above address explaining the changes, attach only the pages of your notification package that have changed, and re-sign and date at the signature space on the Facility page of the Unified Program Consolidated Form (UPCF) Forms are available on the website www unidocs org

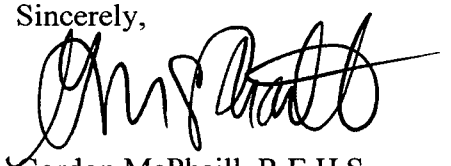
Your status to operate under Conditional Authorization is contingent upon the accuracy of information submitted by you in the notifications mentioned above, and your compliance with all applicable requirements in the Health and Safety Code. You are required to properly close any

Board of Supervisors Michael M Honda Blanca Alvarado Ron Gonzales James T Beall Jr Dianne McKenna
County Executive Richard Wittenberg

treatment unit. Additional guidance on closure will be issued from this office upon request.

If you have any questions regarding this letter, or have questions on operating requirements for your facility, please contact this office at the letterhead address or phone number.

Sincerely,



Gordon McPhaill, R.E.H.S.
Hazardous Materials Program Manager
Hazardous Materials Compliance Division

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

Mr. Richard Bryson / Inspector
San Jose Fire Department / Haz-Mat
200 E. Santa Clara St., 2nd Floor Tower
San Jose, CA 95113-1905

RE: NXP Semiconductors USA Inc. - HMBP – 411 E. Plumeria, San Jose:

Dear Mr. Bryson:

Please consider the attached document as NXP Semiconductors USA, Inc.'s Tier 2 filing of their Updated 2012 Hazardous Materials Business Plan for their new facility now located at 411 E. Plumeria Drive, San Jose, CA 95114. I am not certain what might have happened to their earlier filing in September of 2011 when they first occupied the site, as they had not heard anything from either your agency or the Santa Clara County Environmental Health Department in this matter for their new facility. However, they are filing this documentation with you and with Mr. Ruben Williams of the County agency for good measure at this time to be certain that they are entered into the permitting system.

Please let me know if you will need anything else to complete this filing of NXP Semiconductors USA, Inc.s' Hazardous Materials Business Plan permit application for their facility at 411 E. Plumeria Drive, SJ. You may call me on my cell phone at 408-568-9400 if you should have any questions in this matter.

C.H.A.S.E. and NXP's management appreciate your assistance in this matter.

Sincerely,

William L. Sanborn, R.E.A. # 02690
C.H.A.S.E. President

DRAFT

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☒ Horns/Sirens; ☒ Verbal *(i.e. shouting)*; ☒ Other *(specify)* _____

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance	Phone No. **911**
State Office of Emergency Services	Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

San Jose Fire Department Hazardous Materials Program	Phone No.: **(408) 277-8747**
Santa Clara County Hazardous Materials Compliance Division	Phone No.: **(408) 918-1900**
California EPA Department of Toxic Substances Control	Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health	Phone No.: **(408) 452-7288**
Bay Area Air Quality Management District	Phone No.: **(415) 771-6000**
Regional Water Quality Control Board	Phone No.: **(510) 622-2300**

** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.*

c. Emergency Resources:

Poison Control Center		Phone No. **(800) 876-4766**
Nearest Hospital:	Name: **REGIONAL MEDICAL CENTER of SAN JOSE**	Phone No.: **(408) 259-5000**
	Address: **225 N. Jackson Avenue**	City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

DRAFT

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:

   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.

   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g. the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.

   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.

   iv. Notify appropriate local authorities *(i.e. call 911)*.

   v. Notify the State Office of Emergency Services at 1-800-852-7550.

   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.

   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:

   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.

   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.

   iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:
On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g. fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

DRAFT

6. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written plan for employee training. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. If you already have a training plan, then you are not required to complete the blank plan below, but you must include a copy of your existing plan as part of your HMBP.

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☐	Location(s) and contents of Emergency Response/Contingency Plan
☒	Facility evacuation drills, that are conducted at least *(specify)* _ANNUALLY_ *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☒	Safe methods for handling and storage of hazardous materials *
☐	Location(s) and proper use of fire and spill control equipment
☐	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

☐	Personnel rescue procedures
☐	Shutdown of operations
☐	Liaison with responding agencies
☒	Use, maintenance, and replacement of emergency response equipment
☒	Refresher training, which is provided at least annually *
☒	Emergency response drills, which are conducted at least *(specify)* _ANNUALLY_ *(e.g. "Quarterly", etc.)*

DRAFT

Recordkeeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e. written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☐	Record of hazardous waste tank daily inspections * N/A
☐	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

☒	We will use the "Hazardous Materials/Waste Storage Area Inspection Form" (Document No. UN-023) to document inspections.
☐	We will use our own documents to record inspections. *(A blank copy of each document used must be attached to this HMBP.)*

[ ] 7. Maintenance Schedule - All monitoring equipment will be serviced (frequency) _____

Double Contained Tanks - Tank Facility ID **NONE**

1. Type of Secondary Containment: [ ] Double wall tank [ ] Vaulted tank
[ ] Other (Describe)_____

2. List method of monitoring annular space between primary and secondary containment: _____

3. Frequency: [ ] Continuous [ ] Daily [ ] Weekly [ ] Other (List): __

4. List type of secondary containment for piping: _____

5. List method and frequency of monitoring piping secondary containment:_____

6. Are there any incompatible materials within the same vault? If so, explain how separate secondary containment is provided._____

7. Maintenance Schedule - All monitoring equipment will be serviced (frequency):_____

All Tanks
[ ] Overfill Prevention installed, if not, give date system will be upgraded_____
[ ] Spill Protection installed, if not, give date system will be upgraded_____

DRAFT

SECTION VII. - RECORDKEEPING **SEPT. 2011 / REV. 0**

411 EAST PLUMERIA DRIVE : ALL DEPARTMENTS & CHEMICAL LOCATIONS:

MAILING ADRESS:
NXP SEMICONDUCTORS USA, INC.;
411 EAST PLUMERIA DRIVE
SAN JOSE, CA 95134

Inspection Program Description: Inspections of storage areas at NXP Semiconductors are conducted weekly by the supervisors (or their designees) responsible for each storage facility. The weekly inspection checklists are maintained by the supervisors. Checklist files are maintained for a minimum of three years in or near the storage facilities. These files are subject to periodic unannounced audits by NXPs' Environmental/Safety representatives.

You are required to keep inspection logs or check-sheets designed to be used in conjunction with routine inspections for all storage facilities or areas as well as for continuous monitoring systems for underground tanks. Sample forms are attached for your use. Check the appropriate box below.

[XXX] We will use the sample forms (UN-023) in our routine inspection program.

[ ] We will not use the sample forms. (If you choose not to use the sample forms, provide for review and approval copies of the forms you will be using.) See attached forms for review and approval.

The following personnel will be responsible for monitoring and/or maintaining equipment.

SEPT. 2011 / REV. 0

Name FRANK MARTINS Title FACILITIES OPNS & PLANNING MGR.

Name TIM REDDING Title SECURITY SUPERVISOR

Note: If you have continuous monitoring-equipment, you must maintain copies of results for all service and maintenance work. Such reports shall be available for review at the site and shall be submitted to the San Jose Fire Department upon request.

DRAFT

Hazardous Material/Waste Aboveground Storage Area Inspection Form

Area Inspected: _____

Date	Inspector's Initials	Storage area free of spills and leaks	Containers and storage area properly labeled	Containers within secondary containment	Fire extinguishers serviced and tagged	Hazardous waste labels complete and visible	Eye wash, safety shower, ER equipment functional	Containers sealed with tight-fitting lids/bungs	Incompatibles properly segregated	Waste not stored over allowable time	Comments

Explain any problems found and corrective actions taken in the "Comments" section.
THIS FORM DOES NOT APPLY TO UNDERGROUND TANKS - Maintain completed forms at Safety Station

Consent to Inspect Granted By: ADAM ALBRIGHT, ASSISTANT FACILITY MANAGER

☐ **RCRA LQG**
☐ **Pictures Taken**
☐ **Samples Taken**

Summary of Violations & Notice to Comply

Program: PR0401892 - HAZARDOUS WASTE GENERATOR - 2202
Inspection Type: ROUTINE INSPECTION-COMPLETED

VC	Class	Violation	Corrective Actions Taken
		No violations were observed during this inspection.	

Comments: On site to conduct a routine hazardous waste inspection. Inspection conducted with Socorro Guzman of HMCD. Inspection began on 3/8/16 and concluded today.
Facility does R&D with semiconductors.

Observed the following wastes on site:
3 x 1 gallon containers of solder waste
1 x 5 gallon container of used batteries
1 x e-Waste accumulation area
Oil filters from outdoor compressors

EPA ID# CAL000364580 is active
Fire extinguishers have had annual maintenance.
Manifests and bills of lading were reviewed.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 04/21/2016, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC § §25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i)].

Environmental Professional Statement:
I declare that, to the best of my professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in § 312.10 part of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Gabe Stivala, Senior Geologist
Environmental Professional / Senior Reviewer

Audrey Krompholz, Due Diligence Services Manager
Environmental Professional / Site Assessor

DRAFT

1.2 Findings and Conclusions Summary

ATC Associates Inc. (ATC) has performed this Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E 1527-05. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the property.

FINDINGS AND CONCLUSIONS SUMMARY

Report Section		Further Action?	De Minimis Condition	Recognized Environmental Condition (REC)	Historical REC	ASTM Non-Scope Condition	Description
4.0	User Provided Information	No				X	Refer to Sections 8.1 and 8.3, below.
5.1.1	Federal Database Findings	No					
5.1.2	State and Tribal Database Findings	No					
5.1.3	Local Environmental Record Sources	No					
5.3	Historical Records Sources	No					
6.2	Hazardous Substance Use, Storage and Disposal	No					
6.3	Underground Storage Tanks	No					
6.4	Aboveground Storage Tanks	No					
6.5	Other Petroleum Products	No					
6.6	Polychlorinated Biphenyls (PCBs)	No					
6.7	Unidentified Substance Containers	No					
6.8	Nonhazardous Solid Waste	No					
6.9	Wastewater	No					
6.10	Waste Pits, Ponds and Lagoons	No					
6.11	Sumps	No					
6.12	Septic Systems	No					
6.13	Stormwater Management System	No					
6.14	Wells	No					
7.0	Interviews	No					
8.1	Asbestos-Containing Material (ACM)	No				X	ACM was previously identified at the property and an asbestos O&M program is in place.
8.2	Radon	No					
8.3	Lead in Drinking Water COMPLETED OCTOBER 2012	No				X	Elevated lead levels were previously detected in two fixtures (faucet on the first floor of 411 East Plumeria Drive and a drinking fountain on the first floor of 3050 Zanker Road) sampled by ATC in 2007. The drinking fountain within 3050 Zanker Road has not been modified / replaced to date. COMPLETED OCT - 2012
8.4	Lead-Based Paint (LBP)	No

8.5	**Mold Screening**	No					
8.6	**Additional User Requested Conditions**	No					

1.3 Significant Data Gap Summary

The following is a summary of *significant data gaps* identified in this report.

SIGNIFICANT DATA GAP SUMMARY		
Report Section		Description
3.5	**Current Uses of Adjoining Properties**	No *significant data gap* identified.
4.2	**Environmental Liens or Activity and Use Limitations (AULs)**	No *significant data gap* identified.
5.1	**Standard Environmental Records**	No *significant data gap* identified.
5.2	**Physical Setting Sources**	No *significant data gap* identified.
5.3	**Historical Records Sources**	No *significant data gap* identified.
6.1	**Methodology and Limiting Conditions**	ATC was not granted access to clean rooms within research and development areas. However, based on reported operations within these areas, limited views from the exterior, and access to the remaining portions of the buildings, this limitation is not considered significant to the findings and conclusions of this assessment.
7.0	**Interviews**	No *significant data gap* identified.

1.4 Recommendations

Based on information collected from the Phase I ESA, ATC offers the following recommendations for further action:

- Installation of point-of-use filtration on a fixture (drinking fountain located on the first floor of 3050 Zanker Road) that was previously found to have elevated lead concentrations in water.

DRAFT

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I ESA was to identify *recognized environmental conditions* and certain potential environmental conditions outside the scope of ASTM Standard Practice E 1527-05 in connection with the property at the time of the site reconnaissance. This report documents the findings, opinions and conclusions of the Phase I ESA.

2.2 Scope

This Phase I ESA was conducted in general accordance with the ASTM Standard Practice E 1527-05, consistent with a level of care and skill ordinarily practiced by the environmental consulting profession currently providing similar services under similar circumstances. Significant additions, deletions or exceptions to ASTM Standard Practice E 1527-05 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports.

- Usage of the property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews.

- Observations and interviews regarding current property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, nonhazardous solid wastes and wastewater.

- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties on the property.

- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the property.

The scope of the assessment also included consideration of the following environmental issues or conditions that are beyond the scope of ASTM Standard Practice E 1527-05:

- Mold Screening to report the findings of a baseline survey of readily observable mold and conditions conducive to mold on the property identified by limited interview, document review and physical observation and to provide an opinion on whether an identified condition warrants further action. The scope of work for the Mold Screening was intended to be consistent with ASTM Standard Practice E 2418-06: S*tandard Guide for Readily Observable Mold and Conditions Conducive to Mold in Commercial Buildings: Baseline Survey Process*. The scope of work, including potential deviations from the Standard Guide, is described as follows. The interview was limited to one knowledgeable person from property management or engineering staff. The document review was limited to only those relevant documents made readily available to ATC in a timely manner. The physical observations were limited to certain Heating,

DRAFT

Ventilation and Air Conditioning (HVAC) system areas and other readily accessible building areas likely to become subject to water damage, plumbing leaks, and flooding. Unless noted otherwise herein, ATC observed the HVAC equipment room(s) and readily accessible mechanical rooms and, in buildings with package units in the ceiling, at least one unit per floor. Also, unless noted otherwise, ATC observed readily accessible areas of the basement (or lowest level), the top floor, the roof (including any penthouse areas) and at least one mid-level floor (if applicable). For multi-story buildings, the total number of floors observed (inclusive of those already mentioned) was intended to be up to 10% of the total number of floors (if readily accessible). For hotel and multi-family buildings, ATC targeted the lowest and highest levels and roof as described above and up to 10% of units, including one per floor if readily accessible. The Mold Screening did not include destructive methods of observation. No sampling or laboratory analyses were conducted. The Mold Screening service as described herein was limited in scope and by the time and cost considerations typically associated with performing a Phase I ESA. No method can guarantee that a hazard will be discovered if evidence of the hazard is not encountered within the performance of the Mold Screening as authorized and that opinions and conclusions must, out of necessity, be extrapolated from limited information and discrete, non-continuous data points. Unidentified mold or other microbial conditions may exist on the property.

- Visual observation of suspect asbestos-containing materials (ACM), consisting of providing an opinion on the condition of suspect ACM on the property based upon visual observation during the site reconnaissance.

- Radon document review, consisting of the review of published radon data with regard to the potential for elevated levels of radon gas in the surrounding area of the property.

- Lead in drinking water data review, consisting of contacting the water supplier for information regarding whether or not the potable water provided to the property meets or exceeds drinking water standards for lead.

- Visual observation of suspect lead-based paint (LBP), consisting of providing an opinion on the potential for LBP based on the construction date of buildings on the property and visual observation of the condition of suspect LBP.

- Wetlands document review, consisting of a review of a current National Wetlands Inventory map of the surrounding area to note if the property is identified as having a wetland.

- Flood plain document review, consisting of a review of a reasonably ascertainable flood plain map of the surrounding area to note if the property is identified as being located within a flood plain.

2.3 Significant Assumption

Any assumptions in this report were not considered as having significant impact on the determination of *recognized environmental conditions* associated with the property.

DRAFT

2.4 Limitations and Exceptions

ATC has prepared this Phase I ESA report using reasonable efforts to identify *recognized environmental conditions* associated with hazardous substances or petroleum products at the property. Findings contained within this report are based on information collected from observations made on the day(s) of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

The ASTM Standard Practice E 1527-05 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- *Uncertainty Not Eliminated* – A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any property.

- *Not Exhaustive* – A Phase I ESA is not an exhaustive investigation of the property and environmental conditions on such property.

- *Past Uses of the Property* – Phase I requirements only require review of standard historical sources at five year intervals. Therefore, past uses of property at less than five year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E 1527-05 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

ATC makes no representation or warranty that the past or current operations at the property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, ATC is not responsible for consequences or conditions arising from facts not fully disclosed to ATC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by ATC's observations or other credible referenced sources reviewed during the assessment. ATC shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

ATC used reasonable efforts to identify evidence of aboveground and underground storage tanks and ancillary equipment on the property during the assessment. "Reasonable efforts" were limited to

DRAFT

observation of accessible areas, review of referenced public records and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or quantities in this report are not intended to be used for financial disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley Act or any United States Securities and Exchange Commission reporting obligations, and may not be used for such purposes in any form without the express written permission of ATC.

ATC is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

The Environmental Professional Statement in Section 1.1 of this report does not "certify" the findings contained in this report and is not a legal opinion of such *Environmental Professional*. The *Environmental Professional* Statement is intended to document ATC's opinion that an individual meeting the qualifications of an Environmental Professional was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the *Environmental Professional* were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E 1527-05 and the scope of work for this assessment.

Per ASTM Standard Practice E 1527-05, Section 6, User Responsibilities, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of *recognized environmental conditions* in connection with the property. Failure by the User to fully comply with the requirements may impact their ability to use this report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). ATC makes no representations or warranties regarding a User's qualification for protection under any federal, state or local laws, rules or regulations.

In accordance with the ASTM Standard Practice E 1527-05, this report is presumed to be valid for a six month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge and (5) environmental liens search. Reports older than one year may not meet the ASTM Standard Practice 1527-05 and therefore, the entire report must be updated to reflect current conditions and property-specific information.

Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections.

DRAFT

2.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by, Spear Street Capital, and any of its affiliates, and third parties authorized in writing by Spear Street Capital and ATC, including the lender(s) in connection with a secured financing of the property, and their respective successors and assigns. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of ATC, is at the sole risk and expense of such third party.

ATC makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either expressed or implied. Unless otherwise agreed upon in writing by ATC and a third party, ATC's liability to any third party authorized to use or rely on this report with respect to any acts or omissions shall be limited to a total maximum amount of $100,000.

DRAFT

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The property addresses are 3050 Zanker Road, 2880 Junction Avenue, 2860 Junction Avenue, 2840 Junction Avenue, and 411 East Plumeria Drive, San Jose, Santa Clara County, California. Site Photographs are provided in Appendix C and a Site Vicinity Map is located in Appendix A. According to information obtained from the City of San Jose Planning Department (SJPD), the property is identified as Santa Clara County Assessor's Parcel Numbers (APNs) 101-31-001 (3050 Zanker Road), 101-31-002 (2880 Junction Avenue), 101-31-003 (2860 Junction Avenue), 101-31-004 (2840 Junction Avenue), and 101-31-005 (411 East Plumeria Drive). According to the SJPD, the property is currently zoned as IP, which is defined as Industrial Park.

3.2 Surrounding Area General Characteristics

The property is located in an area that is primarily characterized by commercial and multi-family residential use. Specific adjacent property uses are described in detail in Section 3.5. The topography in the property vicinity is generally flat with a gentle topographic gradient towards the west.

3.3 Current Use of the Property

The property is a multi-tenant commercial and research and development (R&D) complex known as Montague Park. The property consists of five, two-story buildings containing approximately 422,532 square feet of building area, situated on an approximately 23.62-arce lot. Buildings located at 3050 Zanker Road, 2860 Junction Avenue, and 411 East Plumeria Drive were constructed circa 1985, whereas buildings located at 2880 and 2840 Junction Avenue were constructed circa 1990. Asphalt-paved parking areas, concrete-paved sidewalks, and landscaping encompass the remainder of the property footprint.

Following is a table summarizing tenant use of the property. A Site Plan is located in Appendix B.

TENANT USE OF THE PROPERTY			
Tenant Name	**Location**	**Type of Use**	**Comments**
Ultratech	3050 Zanker Road	Commercial office and wafer production / R&D labs	See Section 6.0
Fusion-io	2880 Junction Avenue	Commercial office and R&D labs	None
MediaTek	2860 Junction Avenue	Commercial office and R&D labs	None
Oracle	2840 Junction Avenue	Commercial office and R&D labs	See Section 6.0
NXP	411 East Plumeria Drive	Commercial office and R&D labs	None
Vacant	2860 Junction Avenue (portion of the first floor) and 2840 Junction Avenue (portion of the first floor)	Commercial office	None

DRAFT

3.4 Description of Property Improvements

The following table provides general descriptions of the property improvements.

PROPERTY IMPROVEMENTS	
Size of Property (approximate)	Approximately 23.62 acres
General Topography of Property	The topography in the property vicinity is generally flat with a gentle topographic gradient towards the west.
Adjoining and/or Access/Egress Roads	The property is accessed via Zanker Road to the west, Junction Avenue to the south, and East Plumeria Drive to the east.
Paved or Concrete Areas (including parking)	Asphalt-paved parking and drive areas and concrete pedestrian walkways.
Unimproved Areas	None
Landscaped Areas	Landscaped road frontages, parking medians, and building perimeters.
Surface Water	None
Potable Water Source	San Jose Municipal Water Company (Muni Water)
Sanitary Sewer Utility	City of San Jose
Storm Sewer Utility	City of San Jose
Electrical Utility	Pacific Gas & Electric Company (PG&E)
Natural Gas Utility	PG&E
Current Occupancy Status	The property buildings are approximately 90% occupied.
Unoccupied Buildings/Spaces/Structures	411 East Plumeria Drive (portion of the first floor) and 2860 Junction Avenue (southern portion of the first floor).
Number of Occupied Buildings	Five
General Building Description	Five two-story commercial office and R&D buildings.
Number of Floors	Two stories per building
Total Square Feet of Space (approximate)	Approximately 422,532 square feet
Construction Completion Date (year)	Buildings located at 3050 Zanker Road, 2860 Junction Avenue, and 411 East Plumeria Drive were constructed circa 1985. Buildings located at 2880 and 2840 Junction Avenue were constructed circa 1990.
Construction Type	Concrete tilt-up structures built on slab-on-grade foundation. The original built-up roofing systems were recently overlaid with a sprayed polyurethane foam with an acrylic coating. A shipping/receiving dock area was observed at the rear of each building.
Interior Finishes Description	The five property buildings have interior finishes that include carpet, resilient floor tile, ceramic floor/wall tile, wallboard (and associated joint compound), and acoustic ceiling tiles.
Exterior Finishes Description	The five property buildings have exterior finishes that include painted concrete tilt-up panels. Exterior windows include window wall and aluminum and glass continuous ribbon window assemblies along the building fronts.
Cooling System Type	Cooling is generally provided to each of the five buildings by roof-mounted package units. A portion of the tenants have additional cooling systems (e.g., chillers and a cooling tower at 3050 Zanker Road) to support specific operations.

DRAFT

PROPERTY IMPROVEMENTS	
Heating System Type	Heating is generally provided to each of the five buildings by roof-mounted package units.
Emergency Power	Two tenant-owned/maintained emergency generators, powered by diesel (aboveground storage tanks [ASTs] with 180-gallon and 450-gallon capacities), are located at 3050 Zanker Road and 2840 Junction Avenue (see Section 6.4). Tenant-owned uninterruptible power supply (UPS) battery systems are present within the property buildings.

3.5 Current Uses of Adjoining Properties

Current uses of the adjoining properties were observed to be as follows:

Direction from Property	Address	Occupant(s) Name	Current Use	Potential Environmental Conditions
North (beyond Montague Expressway)	3151 Zanker Road (northwest, beyond the intersection of Montague Expressway and Zanker Road)	Broadcom	Commercial office	Refer to Section 5.1.1
	3100-3200 Zanker Road	Lockheed Martin Corporation	Commercial office, technology research	Refer to Section 5.1.1
	345 Village Center Drive	Elan at River Oaks Apartments	Multi-family residential apartments	None
	680 P River Oaks Parkway	Hobee's Restaurant	Restaurant	None
	690 River Oaks Parkway, to the northeast	Chase	Banking center	None
South (beyond Junction Avenue)	2950 Zanker Road	Commercial office building	Vacant commercial office	Refer to Section 5.1.2
	2851 Junction Avenue	County of Santa Clara Department of Child Support Services and Social Services Agency	Commercial office	None
	2841 Junction Avenue	Central Park Plaza, commercial office building	Commercial office	None
	2833 Junction Avenue	Central Park Plaza, commercial office building	Commercial office	None
	350 East Plumeria Drive (beyond the intersection of Junction Avenue and East Plumeria Drive)	Netgear	Commercial office	Refer to Section 5.1.1

DRAFT

Direction from Property	Address	Occupant(s) Name	Current Use	Potential Environmental Conditions
East (beyond East Plumeria Drive)	408 and 410 East Plumeria Drive	SpiderCloud Wireless (408) and AltiGen Communications (410)	Commercial office building	None
	677 River Oaks Parkway	Montague Oaks Business Park, vacant commercial office building	Commercial office	Refer to Section 5.1.2
	679 River Oaks Parkway	Montague Oaks Business Park, vacant commercial office building	Commercial office	None
	697 River Oaks Parkway	Montague Oaks Business Park, vacant commercial office building	Commercial office	None
West (beyond Zanker Road)	3081 Zanker Road	Semi	Commercial office	None
	3061 Zanker Road	Valli Construction	Commercial office	Refer to Section 5.1.1

The potential for these adjacent properties to have an adverse environmental impact to the property is discussed in Sections 5.1.1 and 5.1.2.

DRAFT

4.0 USER PROVIDED INFORMATION

The following section summarizes information (if any) provided by Spear Street Capital (User) with regard to the Phase I ESA. The User completed a User Questionnaire in which no environmental concerns were identified. Documentation may be found in Appendix D or where referenced in this report.

4.1 Title Records

User provided no title records information.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

User provided no information regarding property environmental liens or activity and use limitations (AULs). ATC contracted Environmental Data Resources, Inc. (EDR) to provide the environmental lien search report. There were no environmental liens or other AULs identified in connection with the property. Title to the property is vested in LaSalle Montague Inc. via a deed dated January 16, 2008 and recorded January 22, 2008. The title was received from WB Montague Park Owner LLC. A copy of the environmental lien search report is included in Appendix L.

4.3 Specialized Knowledge

User provided no specialized knowledge regarding *recognized environmental conditions* associated with the property.

4.4 Significant Valuation Reduction for Environmental Issues

User provided no information regarding a significant valuation reduction for environmental issues associated with the property.

4.5 Owner, Property Manager and Occupant Information

User provided specific information identifying the property manager as Ms. Abigail San Juan of Jones Lang LaSalle Americas, Inc.

4.6 Reason for Performing Phase I ESA

User indicated that this Phase I ESA was requested in connection with a potential acquisition involving the property.

4.7 Other User Provided Documents

Per the ASTM Standard Practice E 1527-05 ATC obtained the document listed below from User. Further discussion may be found in relevant sections of this report.

DRAFT

OTHER USER PROVIDED DOCUMENTS		
Title	**Date (if known)**	**Author and/or Source (if known)**
Phase I Environmental Site Assessment of Montague Park, 3050 Zanker Road, 2880 Junction Avenue, 2860 Junction Avenue, 2840 Junction Avenue, and 411 East Plumeria Drive, San Jose, California 95134	December 19, 2007	ATC

5.0 RECORDS REVIEW

5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by EDR of Milford, Connecticut, was reviewed for information regarding reported releases of hazardous substances and petroleum products on or near the property. ATC also reviewed the "unmappable" (also referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the property based on the partial street address, city, or zip code. Any unmappable site that was identified by ATC as a being within the approximate minimum search distance from the property based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section. The complete regulatory agency database report may be found in Appendix E.

The following is a summary of the findings of the database review.

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	**Approx. Minimum Search Distance**	**Property Listed?**	**# Sites Listed**
Federal National Priorities List (NPL)	1 mile	No	0
Federal Delisted NPL	½ mile	No	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list	½ mile	No	2
Federal CERCLIS No Further Remedial Action Planned (NFRAP)	½ mile	No	3
Federal Resource Conservation and Recovery Act (RCRA), Corrective Action facilities (CORRACTS)	1 mile	No	3
Federal RCRIS non- CORRACTS Treatment, Storage, and Disposal Facilities (TSD)	½ mile	No	2
Federal RCRA Generators	Property & Adjoining	**Yes**	6
Federal Institutional Control/Engineering Control Registry	Property	No	0
Federal Emergency Response Notification System (ERNS) list	Property	No	0
Federal Formerly Used Defense Sites (FUDS)	1 mile	No	0
State and Tribal NPL [RESPONSE and Bond Expenditure Plan (BEP)]	1 mile	No	3
State and Tribal CERCLIS (EnviroStor)	½ mile	No	39
State and/or Tribal Landfill or Solid Waste Disposal Sites	½ mile	No	0
State and Tribal Leaking Underground Storage Tanks (LUST)	½ mile	No	8
California Spills, Leaks, and Incident Clean-Up (CA SLIC)	½ mile	No	8
State and Tribal Registered Underground Storage Tanks (UST) Historical UST (HIST UST) list; California Facility Inventory Database (CA FID UST); and Statewide Environmental Evaluation and	Property & Adjoining	No	0

San Jose HAZMAT Facilities (San Jose HAZMAT)	¼ mile	**Yes**	24

5.1.1 Federal Agency Database Findings

The property was identified on federal databases, as discussed below. State database listings associated with the property are also discussed below along with corresponding federal database listings.

Ultratech Inc.
3050 Zanker Road
Databases: RCRA-LQG, FINDS, HAZNET, San Jose HAZMAT, and EMI
Approximate Distance from the Property: N/A (property)
Assumed Groundwater Gradient: N/A (property)
Regulatory Data Summary: The facility is listed as a large-quantity generator with no violations found. The FINDS listing, associated with other listings, indicates that the site is tracked by the Resource Conservation and Recovery Act (RCRA), California Hazardous Waste Tracking System - Datamart, National Emissions Inventory (NEI), Hazardous Waste Biennial Reporter, and Criteria and Hazardous Air Pollutant Inventory databases. The HAZNET database indicates that the facility disposed of other organic solids, aqueous solution with total organic residues 10 percent or more, unspecified solvent mixture, unspecified organic liquid mixture, and other materials, via incineration or offsite disposal methods. The San Jose HAZMAT listing classifies the facility as having miscellaneous complex firms and labs. The facility has been tracked by EMI since approximately 1996 and emissions are reported in listings dated 2004 through 2007. No violations or releases were reported for the property.
Discussion: Based on the absence of reported violations or releases and current observations made during the site reconnaissance, these listings are not considered to represent an environmental concern to the property.

Ultratech Stepper Inc. (former occupant)
2880 Junction Avenue
Databases: RCRA-NonGen, FINDS, and HAZNET
Approximate Distance from the Property: N/A (property)
Assumed Groundwater Gradient: N/A (property)
Regulatory Data Summary: The facility is listed as a non-generator of hazardous waste, with no violations found. The FINDS database listing, associated with other listings, confirms that the site is tracked by the RCRA, California Hazardous Waste Tracking System – Datamart, and NEI databases. The HAZNET database indicates that the facility disposed of other organic solids and unspecified organic liquid mixture via offsite disposal methods. No violations or materials releases were reported.

DRAFT

Discussion: Based on the absence of reported violations or releases and former occupant status, these listings are not considered to represent an environmental concern to the property.

The following listings with a known or significant potential for release and impact on the property were identified in the federal agency databases searched. State database listings associated with selected nearby offsite facilities are discussed below along with corresponding federal database listings.

Lockheed Martin / Boston Properties / Lockheed Martin IS&S
3100 Zanker Road / 3100 Zanker Road, Suite 240 / 3110 Zanker Road / 3120 Zanker Road, Suite 280 / 3130 Zanker Road
Databases: RCRA-SQG, FINDS, MANIFEST, SLIC, San Jose HAZMAT, HAZNET, and EMI
Approximate Distance from the Property: Adjacent to the north, beyond Montague Expressway
Assumed Groundwater Gradient: Cross-gradient
Regulatory Data Summary: The facility is listed as a small-quantity generator with no violations found. The FINDS listing, associated with other listings, indicates that the site is tracked by the RCRA database. The MANIFEST database indicates that non-listed ignitable wastes were transferred from the facility in 1999. A SLIC listing indicates that a waste oil release impacted other groundwater (uses other than drinking water) and the verification monitoring remains underway. The San Jose HAZMAT listing indicates that the facility is classified as an auto wrecking or miscellaneous simple facility. According to the HAZNET database, the facility disposed of laboratory waste chemicals, off-specification, aged, or surplus organics, other inorganic solid waste, and other materials via offsite disposal methods. The EMI listing reports various emissions from the facility between 2006 and 2007.

ATC reviewed available information for this facility on the Regional Water Quality Control Board (RWQCB) GeoTracker (http://geotracker.swrcb.ca.gov.) database. GeoTracker records confirm that other groundwater was impacted by waste oil and verification monitoring remains underway (as of January 13, 2011). ATC reviewed a Site Characterization Report, prepared by Cameron-Cole, and dated January 2011. During routine elevator service operations conducted in August 2009, when it was noted that hydraulic fluid had been released into the ram casing and surrounding soil within elevator shaft number 1. Following the release, Lockheed Martin removed approximately 6,500 gallons of fluids, comprised of a mixture of hydraulic fluid and groundwater from the ram casing. Three monitoring wells were installed at the site on October 27, 2010. Groundwater was encountered at depths ranging between 13 and 17 feet below ground surface (bgs), with a western flow direction. Groundwater samples collected from the monitoring wells did not contain detectable concentrations of hydraulic oil, indicating that previous releases of hydraulic oil have not migrated significantly from elevator shaft number 1. Groundwater was scheduled to continue to be performed semi-annually. Elevator shaft number 1 is located within the central portion of the building and the three monitoring wells were installed outside of the building. A Semi-Annual Groundwater Monitoring Report was prepared by Cameron-Cole for July through December 2011. Groundwater was sampled in December 2011; groundwater was measured at depths ranging between 9.84 and 12.99 feet bgs, with a western flow direction. Groundwater samples collected from the monitoring wells did not contain detectable concentrations of hydraulic oil, indicating that previous releases of hydraulic oil have not migrated significantly from elevator shaft number 1.
Discussion: Based on the cross-gradient hydrologic position with respect to the property, and groundwater monitoring results indicating that previous releases of hydraulic oil have not

DRAFT

migrated significantly from the release area, these listings are not considered to represent an environmental concern to the property, at this time.

Priam Corporation
350 East Plumeria Drive
Databases: RCRA-SQG, FINDS, EnviroStor, and EMI
Approximate Distance from the Property: Adjacent to the south, beyond the intersection of Junction Avenue and East Plumeria Drive
Assumed Groundwater Gradient: Cross-gradient
Regulatory Data Summary: The facility is listed as a small-quantity generator with no violations found. The FINDS listing, associated with other listings, indicates that the site is tracked by the RCRA database. The EnviroStor database indicates that the site has a tiered permit system. The EMI listing reports emissions from the facility dated 1987.
Discussion: Based on the absence of reported violations or releases, these listings are not considered to represent an environmental concern to the property.

Seagate Technology Inc.
3061 Zanker Road
Databases: RCRA-SQG and FINDS
Approximate Distance from the Property: Adjacent to the west, beyond Zanker Road
Assumed Groundwater Gradient: Downgradient
Regulatory Data Summary: The facility is listed as a small-quantity generator with no violations found. The FINDS listing, associated with other listings, indicates that the site is tracked by the RCRA and US EPA Toxics Release Inventory System (TRIS) databases. No violations or releases were reported.
Discussion: Based on the absence of reported violations or releases, these listings are not considered to represent an environmental concern to the property.

Lockheed Martin "Tact Def Sys Eagan"
3151 Zanker Road
Databases: RCRA-NonGen and FINDS
Approximate Distance from the Property: Adjacent to the west, beyond the intersection of Montague Expressway and Zanker Road
Assumed Groundwater Gradient: Downgradient
Regulatory Data Summary: The facility is listed as a non-generator with no violations found. The FINDS listing, associated with other listings, indicates that the site is tracked by the RCRA database. No violations or releases were reported.
Discussion: Based on the absence of reported violations or releases, these listings are not considered to represent an environmental concern to the property.

IT Corp San Jose Transfer Facility / Snider JR/RW Trucking / International Technology Inc.
3010 Zanker Road / 3000 Zanker Road
Databases: CERC-NFRAP, CORRACTS, RCRA-TSDF, RCRA-SQG, RCRA-NonGen, FINDS, EnviroStor, HWP, and HAZNET
Approximate Distance from the Property: EDR plots the facility in two locations, 22 feet to the west-southwest and 868 feet to the west. Records maintained at the Department of Toxic

DRAFT

Substances Control (DTSC) indicate that the facility was located greater than 5,000 feet to the north of the property.
Assumed Groundwater Gradient: Cross-gradient
Regulatory Data Summary: The facility is listed on various databases as a transfer facility. RCRA violations have achieved compliance. The CERCLIS-NFRAP assessment history indicates that a discovery was made in 1990, a preliminary assessment was completed in 1991, and the site was archived in 1996. The EnviroStor listing indicates that removal action (54 cubic yards of hazardous soil and 1,830 cubic yards of non-hazardous soil were excavated, removed, and disposed offsite) was completed in 1991.

ATC reviewed available information for the facility from the DTSC EnviroStor website (http://www.envirostor.dtsc.ca.gov/public/). EnviroStor information indicates that the non-operating hazardous waste transfer facility is listed as historical/inactive with acceptable clean closure dated December 10, 1991. EnviroStor plots the facility at the southwest corner of the intersection of Zanker Road and Innovation Drive, which roughly corresponds to the current northwestern-adjacent Broadcom facility (3151 Zanker Road). To verify, ATC additionally performed a file review at the DTSC in 2007; available topographic maps of the facility indicate that IT Corp was located generally north of the property by at least 5,000 feet. DTSC records also confirm that facility closure and corrective active have been completed.
Discussion: Based on the actual distance from the property (greater than 5,000 feet to the north) and current regulatory status (corrective action complete), these listings are not considered to represent an environmental concern to the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the other sites listed in the federal agency databases are considered to represent a likely past, present or material threat of release on the property.

5.1.2 State and Tribal Database Findings

The property was identified in several state databases, as discussed below. Other state database listings associated with the property were previously discussed in Section 5.1.1.

NXP Semiconductors USA, Inc.
411 East Plumeria Drive
Databases: San Jose HAZMAT and HAZNET
Approximate Distance from the Property: N/A (property)
Assumed Groundwater Gradient: N/A (property)
Regulatory Data Summary: The San Jose HAZMAT listing indicates that the facility is classified as an auto wrecking / miscellaneous facility. According to the HAZNET database listing, the facility disposed of photochemicals/photoprocessing waste via offsite disposal methods in 1995 and 1996. No material releases or violations were reported.
Discussion: Based on the absence of reported violations or releases, these listings are not considered to represent an environmental concern to the property.

State database listings associated with selected nearby offsite facilities were previously discussed above in Section 5.1.1 along with corresponding federal database listings. In addition to those discussed above,

DRAFT

the following listings with a known or significant potential for release and impact on the property were identified in the state and tribal databases searched:

Broadcom
3151 Zanker Road
Databases: San Jose HAZMAT, HAZNET, AST, and ENF
Approximate Distance from the Property: Adjacent to the west, beyond the intersection of Montague Expressway and Zanker Road
Assumed Groundwater Gradient: Downgradient
Regulatory Data Summary: The San Jose HAZMAT listing indicates that the facility is classified as an auto wrecking or miscellaneous simple facility. According to the HAZNET database, the facility disposed of latex waste, off-specification, aged or surplus organics, unspecified sludge waste, liquids with lead, photochemicals / photoprocessing waste, and other materials via offsite disposal methods. The AST listing indicates that the facility stores 2,200 total gallons of unspecified material within an AST(s). The ENF listing indicates that the facility has an active regulatory measure for ASTs; a historical enforcement (letter) notice of noncompliance was issued in 2002.
Discussion: Based on the absence of reported violations or releases, these listings are not considered to represent an environmental concern to the property.

MCI Worldcom / MCI DBA Verizon Business
2950 Zanker Road
Databases: San Jose HAZMAT, HAZNET, and AST
Approximate Distance from the Property: Adjacent to the south, beyond Junction Avenue
Assumed Groundwater Gradient: Cross-gradient
Regulatory Data Summary: The San Jose HAZMAT listing indicates that the facility is classified as having miscellaneous complex firms and labs. According to the HAZNET database, the facility disposed of liquids with pH less than or equal to 2, other organic solids, unspecified solvent mixture, alkaline solution without metals, aqueous solution with total organic residues less than 10 percent, and other materials via offsite disposal methods. The AST listing indicates that a total of 12,000 gallons of unspecified materials are stored in an AST(s) at the facility. No violations or releases were reported.
Discussion: Based on the absence of reported violations or releases, the listing is not considered to represent an environmental concern to the property.

EPowersoft
677 River Oaks Parkway
Databases: San Jose HAZMAT and HAZNET
Approximate Distance from the Property: Adjacent to the east, beyond the intersection of Montague Expressway and East Plumeria Drive
Assumed Groundwater Gradient: Upgradient
Regulatory Data Summary: The facility is listed on the San Jose HAZMAT database. According to the HAZNET database, the facility disposed of liquids with pH less than or equal to 2, oxygenated solvents, and photochemicals/photoprocessing waste via offsite disposal methods. No violations or releases were reported.
Discussion: Based on the absence of reported violations or releases, these listings are not considered to represent an environmental concern to the property.

DRAFT

U.S. Postal Service
2731 Junction Avenue
Databases: LUST, HIST CORTESE, HIST LUST, and HAZNET
Approximate Distance from the Property: Although the EDR database report indicates that the facility is located one foot away from the property, other mapping sources confirm that the U.S. Postal Service facility is located approximately 800 feet south of the property.
Assumed Groundwater Gradient: Cross- to downgradient
Regulatory Data Summary: Database listings indicate that a gasoline release affected groundwater (uses other than drinking water) and achieved regulatory case closure in October 2001. The HAZNET database indicates that unspecified organic liquid mixture, other organic solids, unspecified aqueous solution, and empty containers (30 gallons or more) were removed from the facility and disposed offsite.

ATC reviewed available information for this facility on the RWQCB GeoTracker (http://geotracker.swrcb.ca.gov.) database. GeoTracker records confirm that a gasoline release impacted groundwater (uses other than drinking water) and LUST case closure was granted on October 18, 2001. A closure letter contains site figures that confirm the location of the facility as being approximately 800 feet to the south of the property. Groundwater depth was estimated to range between 6.72 and 24.0 feet bgs and the flow direction was anticipated to be towards the south-southwest.
Discussion: Based on distance, cross- to downgradient hydrologic position with respect to the property, and closed LUST case status, these listings are not considered to represent an environmental concern to the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the other sites listed in the state and tribal databases are considered to represent a likely past, present or material threat of release on the property.

5.1.3 Local Environmental Records Sources

Local Health Department

ATC reviewed available records maintained at the Santa Clara County Department of Environmental Health (SCCDEH). Records were available for a portion of the property occupants.

Records on file, dated from 2000 to 2012, mainly pertain to Ultratech operations, and include hazardous material inventory statements, hazardous waste treatment notification, an operations and maintenance manual for Ultratech's pH neutralization system, influent analyses, wastewater treatment system closure proposal, and financial assurance annual certification. The hazardous waste treatment notification forms indicated the former onsite presence of a waste neutralization system (located at 2880 Junction Avenue) which processed approximately 30,000 gallons per month of waste water (corrosive developer waste and deionized water from various lab rinse operations) on a continuous interval; by at least 2011, Ultratech was no longer operating at 2880 Junction Avenue. A waste neutralization system is currently permitted at Ultratech's 3050 Zanker Road location. Non-hazardous aqueous waste is discharged to the municipal sewer system. No material releases or current violations were reported.

DRAFT

A Hazardous Materials Business Plan (HMBP), dated February 28, 2012, is on file for NXP Semiconductors USA, Inc. (411 East Plumeria Drive). The hazardous waste inventory statement lists spent solvents, solder and solvent contaminated debris, and miscellaneous lab pack materials. A San Jose Business Activity Document for NXP, dated March 2012, indicates that the facility is a hazardous waste generator of up to 294 pounds per year; the facility is considered a hazardous waste generator only and not an HMBP facility.

ATC's review of available SCCDEH records did not reveal the presence of *recognized environmental conditions* at the property.

Local Environmental Agency

ATC contacted the RWQCB to review available information regarding the property. According to Ms. Melinda Wong of the RWQCB (July 13, 2012 telephone conversation), no records are available for the property.

Furthermore, according to the RWQCB GeoTracker database (http://geotracker.swrcb.ca.gov.), the RWQCB has no records pertaining to the property.

Department of Toxic Substances Control

ATC contacted the DTSC to review available information regarding the property. According to Mr. Andre Alexander of the DTSC (July 16, 2012 written correspondence), no records are available for the property.

Furthermore, according to the DTSC EnviroStor database (http://www.envirostor.dtsc.ca.gov/public), the DTSC has no records pertaining to the property.

Bay Area Air Quality Management District

ATC reviewed available records maintained by the Bay Area Air Quality Management District (BAAQMD).

Available records provided by the BAAQMD pertained to operations performed at 3050 Zanker Road, 2880 Junction Avenue, and 2840 Junction Avenue.

Records for 3050 Zanker Road (Ultratech) reference photolithographic steppers, an emergency generator, solvent cleaning, a solvent cold cleaner, and R&D lab, and a wipe cleaning area. Emission sources include fuel combustion and organic solvent. Emissions were most recently approved on October 15, 2011. BAAQMD records for the tenant were dated between 1994 and 2012.

Records for 2880 Junction Avenue (Ultratech) reference a former R&D application lab. The facility ceased operation on January 31, 2009.

Records for 2880 Junction Avenue (Oracle) reference a stationary emergency generator. Permitted emission sources include fuel combustion.

DRAFT

No violations were reported. ATC's review of available BAAQMD records did not reveal the presence of *recognized environmental conditions* at the property.

Fire Department

ATC reviewed available records for the property maintained at the City of San Jose Fire Department (SJFD). Available records include fire suppression systems and hazardous material records.

Available records predominantly pertain to Ultratech operations and include hazardous waste inventory statements, hazardous material business plans, hazardous materials storage system permits (including AST/piping system liquid for liquid solvent waste, 3050 Zanker Road), and hazardous material plan checks. Alterations to the solvent and acid waste system were made in 2009.

A full facility closure of Ultratech's former facility, located at 2880 Junction Avenue, was completed in 2009. The SJFD approved a closure plan and performed final inspections. A former industrial waste neutralization (IWN) system consisted of a two-phase plastic mixing chamber and a final pH balancing chamber. There were two primary supply tanks containing water treatment chemicals, a 30-gallon 50% sulfuric acid tank, and a 55-gallon 30% sodium hydroxide tank.

In 2012, the installation of a battery system (battery room with 157 gallons) was approved for use by Fusion-io within 2880 Junction Avenue.

A hazardous materials inventory statement, dated 1992, references a diesel-powered emergency generator, with a 200-gallon diesel AST, formerly located at 411 East Plumeria Drive. The generator was associated with Viking Freight Systems, a former building occupant.

A hazardous materials storage system installation application confirms that a diesel-powered emergency generator, with a 450-gallon AST, was installed at 2840 Junction Avenue in 1999. The corresponding tenant, at the date of installation, was Lifeguard Healthcare.

A "Geotechnical Engineering Investigation, Proposed Mechanical Yard," prepared by Bay Area Geotechnical Group and dated August 6, 2004, was available for review. The geotechnical investigation was prepared prior to the construction of a mechanical yard along the western edge of the building located at 3050 Zanker Road. During the geotechnical investigation, groundwater was encountered at depths between 12.5 and 18.5 feet below ground surface. The report also typified soil conditions at the property as follows:

> *The subsurface soil conditions encountered at the boring locations are typical of alluvium, i.e., interlayered and interfingured deposits of gravels, sands, silts, clays and mixtures thereof. The near surface soils up to the depth of 19 feet below the ground surface (bgs) consist of stiff to very stiff lean clay. Increasing proportions of sands and silts were encountered at about 19 feet bgs. At about 21 feet, the soils encountered in the boreholes transitioned to medium dense silty sand. The silt content in the subsurface soils continued to decrease with depth and as a result the soil layer starting at 29 feet was logged as loose fine to medium sand with a trace of silt. The thickness of this layer was estimated to be about 6 feet. Medium stiff lean clay was encountered below the sand layer, to the maximum depth of drilling – 40.5 feet.*

DRAFT

No violations are reported. ATC's review of SJFD records did not reveal the presence of *recognized environmental conditions* at the property.

Department of Planning and Zoning

According to the SJPD, the property is zoned Industrial Park which is appropriate for the current use.

Building Department

ATC reviewed available building department records at the City of San Jose Building Department (SJBD). Available records are discussed in Section 5.3.7.

Electrical Utility Company

According to the SJPD, PG&E provides electricity to the property. Please refer to Section 6.6 for further information on the potential presence of suspect PCB-containing electrical equipment on the property.

Water Utility

According to the SJPD, potable water in the property vicinity is provided by Muni Water. ATC reviewed the 2011 Water Quality Report produced by Muni Water. Muni Water purchases a blend of Hetch Hetchy water and treated water from the San Francisco Public Utilities Commission (SFPUC). In 2011, the Hetch Hetchy Watershed provided most of the total SFPUC water supply, with the rest supplemented by local watersheds in Alameda and Santa Clara Counties. The major water source originates from spring snowmelt flowing down the Tuolumne River, and is stored in the Hetch Hetchy Reservoir. The Alameda Watershed spans more than 35,000 acres in Alameda and Santa Clara Counties. Surface water from rainfall and runoff is collected in the Calaveras and San Antonio Reservoirs. The property appears to be located in the North San Jose / Alviso Service Area. In 2011, Muni Water met all state and federal primary drinking water standards. No concerns were noted during the review of Muni Water data.

As part of ATC's 2007 ESA, ATC spoke with Mr. Mansour Nasser, representative of Muni Water (December 10, 2007 telephone communication), who indicated that an approximately 20,000-gallon AST, located north of the property buildings near 3050 Zanker Road, is owned by Muni Water. The "surge tank" is utilized to maintain system pressure when water is drawn from an adjacent well. Mr. Nasser stated that water was currently drawn from Hetch Hetchy, as opposed to local wells; therefore, the "surge tank" was inactive.

Sewer Utility

According to the SJPD, the City of San Jose provides municipal storm and sanitary utilities to the property vicinity.

Other Local Environmental Records Sources

No additional local environmental records sources were reviewed.

DRAFT

5.2 Physical Setting Sources

5.2.1 Topography

Based on the United States Geological Survey (USGS) 7.5-Minute Topographic Map Series, *Milpitas, California, Quadrangle* Topographic Map, 1961 (photorevised in 1980), the property is located approximately 25 feet above mean sea level (MSL) and has a sloping topography towards the west.

A copy of the topographic map is included in Appendix A.

5.2.2 Geology

Based on the California Department of Conservation, *California Geological Survey, Generalized Geologic Map of California Note 17*, dated April 2002, the property is primarily underlain by Quaternary sedimentary deposits. Sedimentary rocks form as accumulations of mineral material in oceans (marine) or on continents (continental). Quaternary sedimentary rocks include gravel, sand, silt, and clay deposited mostly in valleys and lowlands onshore.

5.2.3 Soils

According to ATC's review of the United States Department of Agriculture Soil Conservation Service *Web-Based Soil Survey*, the property is primarily underlain by Urbanland – Clear Lake complex, 0 to 2 percent slopes. The northwestern and southeastern portions of the property are underlain by Urbanland – Campbell complex, 0 to 2 percent slopes, protected. The series consist of moderately well drained soils formed on disturbed and human transported material (urban land) or alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics (Clear Lake and Campbell, protected). Slopes range from 0 to 2 percent. A copy of the soil map is included in Appendix L.

5.2.4 Hydrology

Considering the surface topography for the property area, as interpreted from the Milpitas Quadrangle map, local groundwater would be expected to flow towards the west. Therefore, in assessing potential off-site environmental impacts, facilities located directly east of the property are of primary concern. However, actual groundwater flow direction is often locally influenced by factors such as underground structures, seasonal fluctuations, soil and bedrock geology, production wells, and other factors beyond the scope of this study. The actual groundwater flow direction under the property can be accurately determined only by installing groundwater-monitoring wells, which was beyond the scope of this project.

ATC reviewed a "Geotechnical Engineering Investigation, Proposed Mechanical Yard," prepared by Bay Area Geotechnical Group and dated August 6, 2004. The geotechnical investigation was prepared prior to the construction of a mechanical yard along the western edge of the building located at 3050 Zanker Road. During the geotechnical investigation, groundwater was encountered at depths between 12.5 and 18.5 feet bgs.

DRAFT

5.2.5 Other Physical Setting Sources

Flood Plain Map

According to the Federal Emergency Management Agency (FEMA), the property is located in Flood Zone A, which is identified by FEMA as "areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood" (Map Number 06085C0068H, dated May 18, 2009).

A copy of the flood plain map is included in Appendix L.

Wetlands Map

Based on a review of the United States Department of the Interior, National Wetlands Inventory (NWI) Map (online Wetlands Mapper at http://www.nwi.fws.gov/), there are no jurisdictional wetlands on the property. Furthermore, ATC did not observe any areas suggestive of wetlands at the property.

A copy of the NWI map is included in Appendix L.

DRAFT

5.3 Historical Records Sources

The following table summarizes the findings of the research presented below pertaining to historical property and surrounding area uses.

HISTORICAL USE SUMMARY				
Period	**Identified Historical Uses**		**Source(s)**	**Intervals/Comments**
	Property	**Surrounding Area**		
Prior to 1940	Agricultural	Agricultural Residential	Aerial Photographs Topographic Maps	A 1939 aerial photograph was the earliest record found. No *significant data gaps*.
1940-1960	Agricultural	Agricultural Residential	Aerial Photographs Topographic Maps City Directories	No *significant data gaps*.
1961-1980	Agricultural	Agricultural Commercial	Aerial Photographs Topographic Maps City Directories	No *significant data gaps*.
1981 to present	Agricultural Undeveloped Commercial/R&D	Agricultural Undeveloped Residential Commercial	Aerial Photographs Topographic Maps City Directories Tax Records Building Records Zoning Records	The existing property buildings were constructed in approximately 1985 (3050, 2860, and 411) and 1990 (2880 and 2840).

5.3.1 Aerial Photographs

ATC obtained available aerial photographs of the property and surrounding areas from EDR. Available photographs ranged from 1939 to 2006. The following are descriptions and interpretations from the aerial photograph review.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Scale**	**Comments**
1939, 1948, 1956, and 1965	1 inch = 555 feet, 1 inch = 655 feet, 1 inch = 555 feet, and 1 inch = 333 feet, respectively	**Property**: Agricultural land. **Surrounding Area**: The adjacent properties to the north, east, south and west appear to be utilized as agricultural land. What appears to be a residence or farmhouse is located to the north of the property.
1974	1 inch = 550 feet	**Property**: Generally the same as the previous aerial photograph. **Surrounding Area**: Generally the same as the previous aerial photograph, with the exception of Montague Expressway depicted to the north and what appears to be commercial development located further to the south.
1982	1 inch = 690 feet	**Property**: Undeveloped land. **Surrounding Area**: The adjacent properties include Montague Expressway followed by undeveloped land to the north, East Plumeria Drive followed by commercial development to the east, Junction Avenue followed by undeveloped or graded land to the south, and Zanker Avenue followed by undeveloped or agricultural land to the west.
1993 and 1998	1 inch = 555 feet and 1 inch = 666 feet, respectively	**Property**: Appears to be developed with the current property building configuration. **Surrounding Area**: The adjacent properties include Montague Expressway followed by commercial and residential development to the north, East Plumeria Drive followed by commercial development to the east, Junction Avenue followed by commercial development and undeveloped land to the south, and Zanker Avenue followed by commercial development to the west.
2005 and 2006	1 inch = 500 feet	**Property**: Generally the same as the previous aerial photograph. **Surrounding Area**: Appears to be developed in its current configuration.

The review of aerial photographs did not specifically identify past uses indicating *recognized environmental conditions* at the property or surrounding area.

Historical use of the property has included agriculture. Agricultural uses may potentially represent an environmental concern, as the historical use of pesticides and herbicides on the property may result in residual pesticides and herbicides in surface soils. However, based on the grading and development of the property and the fact that it has been ATC's experience that pesticides and herbicides originally applied for agricultural purposes generally do not require remedial action, the historical use of agricultural chemicals on the property is not considered to represent an environmental concern.

Copies of reproducible aerial photographs are included in Appendix F.

5.3.2 Fire Insurance Maps

Sanborn Fire Insurance Maps were initially produced to provide information to the insurance industry on the fire risks associated with buildings and other structures located within urban areas. These maps may now be utilized as a resource to document land use and structural change over time.

A search for fire insurance maps for the property and surrounding area was conducted by EDR. No such maps for the property were available. A copy of the Unmapped Property letter is included in Appendix G.

5.3.3 Property Tax Files

ATC reviewed available tax files maintained at the Santa Clara County Assessor's Office for historical ownership information on the property. Documentation is included in Appendix G. The review of tax files did not identify past uses indicating *recognized environmental conditions* at the property.

TAX RECORDS OWNERSHIP SUMMARY	
Owner	**Date**
LaSalle Montague Incorporated	January 2008 to present

5.3.4 Recorded Land Title Records

The acquisition of recorded land title records was not required by the scope of work for the Phase I ESA.

5.3.5 Historical USGS Topographic Quadrangles

ATC reviewed available historical USGS Topographic Quadrangles for information regarding past uses of the property. EDR provided historical topographic maps dated 1899, 1953, 1961, 1961 (photorevised 1968), 1961 (photorevised 1973), and 1961 (photorevised 1980). Property structures are not depicted on any of the available historical topographic maps. The 1899 topographic map depicts the property and surrounding area as undeveloped land. Topographic maps dated 1953 through 1973 depict agricultural land in the property vicinity. The 1980 topographic map depicts undeveloped land in the property vicinity with what appears to be Montague Expressway to the north. Documentation is included in Appendix G. The review of historical USGS Topographic Quadrangles did not identify past uses indicating *recognized environmental conditions* at the property or surrounding area.

5.3.6 City Directories

A City Directory Abstract for the property and surrounding area was provided by EDR in order to evaluate information indicating past occupants/uses of the property. Directories were reviewed at approximately five-year intervals for the years 1922 through 2006. The following are descriptions and interpretations from ATC's historical city directory review. Documentation is included in Appendix G.

CITY DIRECTORY SUMMARY	
Year	**Comments**
1922 - 1962	**Property**: No listings **Surrounding Area**: No listings

DRAFT

CITY DIRECTORY SUMMARY	
Year	**Comments**
1963	**Property**: No listings **Surrounding Area**: 3000 Zanker Road: Soares Feed & Fuel Supply / Soares Trucking
1964 - 1974	**Property**: No listings **Surrounding Area**: No listings
1975	**Property**: No listings **Surrounding Area**: 3000 Zanker Road: Shockley D
1978	**Property**: No listings **Surrounding Area**: No listings

2001	**Property**: No listings **Surrounding Area**: No listings

DRAFT

CITY DIRECTORY SUMMARY	
Year	**Comments**
2006	**Property**: No listings **Surrounding Area**: 2833 Junction Avenue: Multi-tenant commercial building 2841 Junction Avenue: Multi-tenant commercial building 2851 Junction Avenue: Santa Clara County Department of Child Support 3061 Zanker Road: Neoforma Inc. and Spudnik Inc. 3081 Zanker Road: Equipment & Materials International / Semi / Semiconductor

The review of city directories identified various commercial / light industrial uses of the property and surrounding area. Database listings associated with the property and surrounding area, further discussed in Sections 5.1.1 and 5.1.2, are not considered to represent an environmental concern to the property.

5.3.7 Building Department Records

ATC reviewed available historical building department records maintained at the SJBD for information regarding past uses of the property. Available records included finalized building permits for each property building, dated 1984. Individual tenant suites have undergone periodic tenant improvements since the original construction. Although building permits for each property building were approved in 1984, additional historical and supporting documentation indicate that the property buildings were constructed in two phases; the first three buildings (3050 Zanker Road, 2860 Junction Avenue, and 411 East Plumeria Drive) were constructed in 1985 and the last two (2880 and 2840 Junction Avenue) were constructed in 1990. In 2009, operations areas of the 3050 Zanker Road building were reconfigured (to reportedly allow for the consolidation of Ultratech operations at a single facility). Significant tenant improvements, including demolition of non-bearing walls and interior improvements, were conducted at 2880 Junction Avenue since 2011 (reportedly remain ongoing). Significant tenant improvements, including new partition walls for conferences and labs, were conducted at 411 East Plumeria Drive in 2011. The review of building department records did not identify past uses indicating *recognized environmental conditions* at the property. Documentation is included in Appendix G.

5.3.8 Zoning/Land Use Records

According to the SJPD, the property is currently zoned as Industrial Park. The zoning designation is appropriate for the current use. No historical zoning/land use records regarding past uses of the property were readily available for review. The review of historical zoning/land use records did not identify past uses indicating *recognized environmental conditions* at the property or surrounding area. Documentation is included in Appendix G.

DRAFT

5.3.9 Prior Reports

The following provides a summary of information from prior reports made available to ATC for review. Several prior reports provided to ATC in 2007 are also discussed separately, below. Documentation is included in Appendix H.

PRIOR REPORT SUMMARY			
Consultant/ Report Title	**Date**	**Environmental Conditions**	**Conclusions & Recommendations**
SECOR International Incorporated (SECOR) / Phase I Environmental Site Assessment	5/27/05	• SECOR reviewed Hygientics Environmental Services, Inc. prior Phase I ESA, dated December 1996, in which no RECs were identified. Asbestos was detected in grey roofing sealant, transite roofing screens, beige 12"x12" vinyl floor tiles in the storage room of 2840 Junction Avenue, and in beige/black mastic in the roof access room. • SECOR reviewed Terracon prior Phase I ESA, dated December 1999, in which four onsite monitoring wells were considered to represent an REC. • SECOR reviewed Well Destruction Details (Lowney Associates, February 2000) which contained monitoring well destruction details of four onsite groundwater monitoring wells. • Two diesel-powered backup generators, with approximately 200-gallon diesel ASTs were observed on the property.	• The assessment revealed no evidence of RECs or HRECs in connection with the property. No further investigation was recommended.
Iris Environmental (Iris) / Phase I Environmental Site Assessment	9/22/06	• Two onsite diesel-powered emergency generators; one operated by Ultratech Inc. and one operated by Pillar Data Systems. • An emergency generator enclosure was installed at 411 East Plumeria Drive in 1988. • Iris observed a mechanical and processing yard on the southern side of 3050 Zanker Road which employs wastewater neutralization systems. • Iris observed a 1,050 pound stainless steel tank of tetrafluoroethane used as refrigerant in the clean room of 3050 Zanker	• No evidence of RECs or *de minimis* conditions in connection with the property or adjacent properties. No recommendations were offered.

DRAFT

PRIOR REPORT SUMMARY			
Consultant/ Report Title	**Date**	**Environmental Conditions**	**Conclusions & Recommendations**
		Road. • Four prior onsite monitoring wells were properly decommissioned in 2000. The wells were originally installed in November 1986 and groundwater was measured at depths ranging between 13 and 21 feet bgs.	
ATC / Phase I Environmental Site Assessment of Montague Park, 3050 Zanker Road, 2880 Junction Avenue, 2860 Junction Avenue, 2840 Junction Avenue, and 411 East Plumeria Drive, San Jose, California 95134	12/19/07	• Database listings for the property and surrounding area were not considered to represent an environmental concern. • Prior reports indicate that four former onsite monitoring wells (originally installed in 1986 for an unknown purpose) were properly decommissioned in 2000. In 2007, ATC spoke with Mr. Dave Higgins of the Santa Clara Valley Water District, who inspected well destruction activities at the property. Mr. Higgins indicated that if groundwater monitoring wells were installed for geotechnical investigations, unrelated to potential threats to environmental health, the previous owners are not required to submit reports and/or sampling records to environmental agencies. Given that the former onsite groundwater monitoring wells did not appear to have been associated with on- or offsite releases, were not considered to represent RECs to the property in prior reports, and were properly decommissioned in 2000, ATC did not consider the former presence of groundwater monitoring wells to represent an environmental concern. • Asbestos was previously identified in building materials located at the property. An asbestos Operations and Maintenance (O&M) Program, dated August 9, 2005, is in place. • Two diesel-powered backup generations, owned and operated by the corresponding building tenants, were observed at 3050 Zanker Road	• No evidence of RECs, HRECs, or *de minimis* conditions in connection with the property or adjacent properties. • ATC recommended that the existing asbestos O&M Program be updated with results of ATC's limited asbestos survey. • Elevated lead concentrations did not appear to be system wide and therefore ATC recommended installation of point-of-use filtration on fixtures resulting in lead concentrations above 15 ppb.

DRAFT

PRIOR REPORT SUMMARY			
Consultant/ Report Title	**Date**	**Environmental Conditions**	**Conclusions & Recommendations**
		and 2840 Junction Avenue. • No violations or releases were reported for the developer waste treatment systems utilized by Ultratech. • Mold growth was not observed at the property. Water-stained ceiling panels were observed in a portion of the tenant suites. • ATC collected a total of 57 samples of building materials from the property buildings; asbestos was not detected in any of the samples. • A total of 10 lead in drinking water samples were collected. Analytical results revealed two fixtures that resulting in lead concentrations exceeding the Environmental Protection Agency (EPA) Action Level (15 parts per billion [ppb]). Water from a faucet on the first floor of 411 East Plumeria Drive and a drinking fountain on the first floor of 3050 Zanker Road had lead concentrations of 43 ppb and 17 ppb, respectively.	

The review of prior reports did not identify past uses indicating *recognized environmental conditions* at the property or surrounding area. ATC generally concurs with the findings of the prior documentation.

5.3.10 Other Historical Sources

No other historical sources were reviewed.

DRAFT

6.0 SITE RECONNAISSANCE

The following is a summary of visual and/or physical observations of the property on the day of the site visit. Photographs can be found in Appendix C.

6.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of: the property and improvements; adjoining sites as viewed from the property; and, the surrounding area based on visual observations made during the trip to and from the property. Unimproved portions of the property were observed along the perimeter and in a general grid pattern in safely accessible areas. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Building interiors were observed as they were made safely accessible, unless described otherwise. At the time of the site reconnaissance, the weather was warm and sunny, with no visibility limitations due to weather conditions. ATC was provided access, to building interiors, by a designated representative(s) of each property building.

Due to safety considerations, the roofs of the subject property buildings were not accessed at the time of the property visit. ATC was not granted access to clean rooms within research and development areas which warranted additional personal protective equipment. Photographs were not allowed within Ultratech (3050 Zanker Road) or laboratory areas within a portion of the other tenant spaces. No other access restrictions were encountered.

6.2 Hazardous Substance Use, Storage, and Disposal

ATC observed the use, storage or disposal of hazardous substances on the property as summarized below.

ATC observed small quantities (typically five gallons or less, each) of commercial cleaning, maintenance, and laboratory (e.g., acetone and isopropyl alcohol) chemicals that were properly stored in original containers.

Various hazardous materials utilized / stored by Ultratech (3050 Zanker Road) include: liquid nitrogen, waste with developer (wipes), mixed solvent waste, cooling water (laser heat exchanger), waste stripper resist, laboratory trash, developer, stripper, photo resist, sulfuric acid, sodium hydroxide, compressed nitrogren, biohazardous waste, and flux remover. A portion of these materials (cooling water, waste stripper resist, and lab trash) are stored in plastic or metal drums.

UPS battery backup systems are present within server rooms of multiple tenants. Electric forklifts, with battery charging stations, are utilized in multiple tenant spaces.

Universal waste (e.g., batteries) is collected and stored onsite. Hazardous materials generated onsite are reportedly removed by contracted waste haulers on a routine basis.

ATC observed the use and storage of these materials at the property to be consistent with generally accepted practices and the containers and surrounding surfaces were generally in good condition with no observed leaks or spills. Secondary containment was observed to be associated with hazardous waste storage containers. Based on the observed conditions, the hazardous substance use, storage and disposal at the property is not considered to represent an environmental concern.

DRAFT

6.3 Underground Storage Tanks (USTs)

ATC did not observe evidence of USTs on the property.

6.4 Aboveground Storage Tanks (ASTs)

ATC observed evidence of ASTs on the property as summarized below.

AST SUMMARY TABLE							
Location	**Year Installed**	**Construction Materials**	**Contents**	**Capacity (gallons)**	**Use Status**	**Registration**	**Leak Detection & Prevention**
East of 3050, associated with an emergency generator	1996	Steel	Diesel	~180 gallons	Active	Yes	Yes
East of 2840, associated with an emergency generator	1999	Steel	Diesel	~450 gallons	Active	Yes	Yes
3050 equipment yard	Unknown	Plastic	Reverse osmosis deionized water	~1,000 gallons	Active	N/A	N/A

The ASTs, enclosed within emergency generators, contain diesel fuel to power emergency generators for 3050 Zanker Road and 2840 Junction Avenue. The generators are reportedly owned and operated by the corresponding building tenants. According to the site contacts, no known leaks or spills have occurred with respect to the ASTs. ATC noted the generators to be in good condition with no leaks or spills observed on the underlying concrete pads or surrounding area. BAAQMD permit records are further discussed in Section 5.1.3. Given the equipment age and observed condition, the ASTs are not considered to represent an environmental concern to the property.

ATC notes that a vacant generator enclosure was observed to the west of 411 East Plumeria Drive. SJFD records confirm that a diesel emergency generator was installed in 1992. The generator has since been removed and ATC observed the enclosure, and underlying concrete, to be in good condition with no visible evidence of leaks or spills. The enclosure is currently utilized by NXP for the operation of clean dry air systems and two compressor units.

DRAFT

6.5 Other Petroleum Products

ATC observed evidence of the use, storage or disposal of other petroleum products on the property as summarized below.

OTHER PETROLEUM PRODUCTS				
Type of Material	**Quantity & Container Type**	**Location**	**Use**	**Condition of Containers & Area**
Elevator hydraulic fluid	Within five passenger elevator equipment systems	Elevator equipment rooms in each building	Elevator operation	Good, no leaks, spills, or reported system failures
Dock leveler hydraulic fluid	Within two hydraulic dock levelers	2860 Junction Avenue (one) and 2880 Junction Avenue (one)	Dock leveler operation	Good, no leaks or spills observed or reported.
Compactor hydraulic fluid	Within one hydraulic compactor unit	3050 Zanker Road	Compactor operation	Good, no leaks or spills observed or reported.

Based on the installation date (between approximately 1985 and 1990), the hydraulic fluid contained within the hydraulic systems is unlikely to contain PCBs. Given the routine equipment maintenance, current inspection status, and absence of spills or releases, these hydraulic systems are not considered to represent an environmental concern to the property.

6.6 Polychlorinated Biphenyls (PCBs)

ATC observed evidence of the use, storage or disposal of PCB-containing equipment on the property as summarized below.

Based on the age of the hydraulic equipment, discussed in Section 6.5, it is unlikely that hydraulic fluids utilized within the equipment contain PCBs.

ATC observed several pad-mounted electrical transformers located throughout the property. No stains or spills were observed around the transformers. ATC notes that the transformers are reportedly owned and operated by PG&E, and as such, they accept responsibility for any cleanup from leakage or repair or replacement activities, provided the cause is not customer misuse. Given the utility ownership and observed conditions, the pad-mounted electrical transformers are not considered to represent a likely past, present or material threat of release, nor do they represent a *recognized environmental condition* to the property at this time. Furthermore, given the age of the property improvements, it is not considered likely that the transformer fluid contains PCBs.

Fluorescent light ballasts are a potential source of PCBs. An inspection of light ballasts was beyond the scope of work for this assessment. Based on the construction dates, the ballasts are not likely to contain PCBs. However, ATC recommends that if leaking ballasts are identified in the future or ballasts are removed during renovations, they should be inspected for labeling regarding the PCB-classification and disposed of in accordance with applicable regulations.

No other potential PCB-containing equipment was observed at the property.

DRAFT

6.7 Unidentified Substance Containers

ATC did not observe the presence of unidentified substance containers on the property.

6.8 Nonhazardous Solid Waste

ATC observed evidence of the generation, storage or disposal of nonhazardous solid waste on the property as summarized below.

NONHAZARDOUS SOLID WASTE SUMMARY TABLE

Type of Waste	Generation Process	Quantity	Type of Storage	Location	Disposal/Removal Method & Frequency	Evidence of Release?
Municipal trash / cardboard recycling	Routine operations	Various	Dumpsters or compactor	Typically near loading areas of the building perimeters	Contracted waste hauler / as needed basis	No

Waste disposal is generally the responsibility of the individual tenant and is therefore arranged separately by the tenants and performed on tenant-specific intervals. The generation and storage of nonhazardous solid waste on the property is not considered to represent an environmental concern.

6.9 Wastewater

ATC observed evidence of wastewater generated, treated or discharged (including sanitary sewage and stormwater) on the property or to adjoining properties as summarized below.

WASTEWATER SUMMARY TABLE

Type of Wastewater	Generation Process	Treatment System?	Discharged To?
Commercial sanitary sewage	Restrooms	N/A	Sanitary sewer
Stormwater	Storm water runoff	N/A	Storm sewer
Neutralized developer	Ultratech lab operations	Yes	Sanitary sewer

Developer waste generated, during typical Ultratech laboratory operations, travels via gravity from clean room sinks to two onsite treatment systems. Representatives of Ultratech indicated that the treatment system unit is comprised of three tanks in which two reagents (sulfuric acid and sodium hydroxide) are added in order to neutralize developer waste. The nonhazardous discharge (effluent) is subsequently discharged via the sanitary sewer, per City of San Jose Environmental Services Department Watershed Protection requirements. No violations or releases are reported for the treatment system.

The generation and discharge of wastewater at the property is not considered to represent an environmental concern.

6.10 Waste Pits, Ponds and Lagoons

ATC did not observe evidence of waste pits, ponds or lagoons on the property.

DRAFT

6.11 Sumps

ATC did not observe evidence of sumps on the property.

6.12 Septic Systems

ATC did not observe evidence of a septic system on the property.

6.13 Stormwater Management System

Surface stormwater runoff is intercepted by catch basins located within the paved parking and drive areas. The runoff water then flows into the municipal storm water system. Stormwater runoff from the roofs drains via roof drains to the surface level where it then travels via sheet flow and eventually drains into the catch basins.

6.14 Wells

ATC did not observe evidence of wells on the property.

Former onsite groundwater monitoring wells (refer to Section 5.3.9) were properly decommissioned in 2000 and are not considered to represent an environmental concern.

DRAFT

7.0 INTERVIEWS

The following persons were interviewed to obtain information regarding *recognized environmental conditions* in connection with the property:

INTERVIEW SUMMARY				
Role	**Name**	**Title/Company**	**Years Assoc. With Property**	**Interview Type**
Site Contact	Ms. Abigail San Juan	Senior Vice President / Jones Lang LaSalle Americas, Inc.	4	Telephone E-mail
Site Escort	Mr. Doug Smith	Facilities Manager / Ultratech	13	In person
Site Escort	Mr. Marlon Tabing	Facilities Engineer / Ultratech	6	In person
Site Escort	Mr. Jim Faler	Facilities Coordinator / Fusion-io	Less than 1 (6 months)	In person
Site Escort	Ms. Veronica Contreras	Human Resources Administrator / MediaTek	4	In person
Site Escort	Mr. Julio Castillo	Site Manager / Oracle	1	In person
Site Escort	Mr. Frank Martins	Facilities Manager Americas Region / NXP	1	In person

Not included in this listing are those governmental employees that were contacted solely for the purpose of retrieving public information pertaining to the property and who would not be expected to have first-hand knowledge of *recognized environmental conditions* at the property.

Pertinent information from the interviews is discussed in applicable sections of this report with details (including failed attempts to interview) documented on Record of Communication forms in Appendix J.

DRAFT

8.0 OTHER ENVIRONMENTAL CONDITIONS

8.1 Asbestos-Containing Material (ACM)

Based on the scope of work for this Phase I ESA, an ACM survey was not conducted. All suspect ACM should be properly assessed prior to disturbance from construction or maintenance activities. Observed building materials and finishes were noted to be in generally good condition at the time of the site visit. As discussed in Section 5.3.9, ACM was previously identified at the property and an asbestos O&M program, dated August 9, 2005, is reportedly in place. According to Ms. Abigail San Juan, Property Manager with Jones Lang LaSalle, the O&M program has not been updated to include ATC's sampling data. However, Jones Lang LaSalle distributed a notice to tenants in 2008 regarding the potential for ACM located within the property buildings.

8.2 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The EPA guidance action level for annual residential exposure to radon is 4.0 picoCuries per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

ATC's review of published radon data indicates that the property is located in an area of moderate propensity with regard to the potential for elevated levels of radon gas. Santa Clara County is listed as being within Zone 2, where average indoor levels are expected to be between 2.0 and 4.0 pCi/L. Additional EPA statistics for Santa Clara County report results for 70 short-term tests with an average radon concentration, from first floor living areas, as 1.363 pCi/L. Given the available statistics and the commercial usage of the property improvements, radon is not considered to represent a concern, and no additional investigations are recommended at this time.

8.3 Lead in Drinking Water

ATC confirmed with Muni Water that the municipally supplied water meets or exceeds all drinking water standards, including those for lead. Based on the fact that the water supplied to the property is from the municipality, lead in drinking water testing was not conducted for this Phase I ESA.

As discussed in Section 5.3.9, ATC conducted a lead in drinking water screening survey at the property in 2007. Water from a faucet on the first floor of 411 East Plumeria Drive and a drinking fountain on the first floor of 3050 Zanker Road had lead concentrations of 43 ppb and 17 ppb, respectively. Elevated lead concentrations did not appear to be system wide and therefore ATC recommended installation of point-of-use filtration on fixtures resulting in concentrations above 15 ppb. According to Ms. Abigail San Juan, Property Manager with Jones Lang LaSalle, the fixture within 411 East Plumeria Drive was likely replaced during significant renovations completed in 2011. Ms. San Juan indicated that the drinking fountain, located on the first floor of 3050 Zanker Road, has likely not been replaced per ATC's recommendations.

DRAFT

8.4 Lead-Based Paint (LBP)

Based on the commercial usage of the property, LBP was not addressed for this Phase I ESA and no additional investigation is recommended at this time.

8.5 Mold Screening

ATC conducted a screening survey for readily observable mold and conditions conducive to mold on the property. The screening consisted of limited interview, document review and physical observation.

Ms. Audrey Krompholz of ATC spoke with property tenant representatives regarding potential mold conditions at the property. No notable moisture intrusion or mold conditions were reported at the property. Ms. Contreras, representative of MediaTek (2860 Junction Avenue), identified a former roof leak from an air conditioning unit that was repaired a few years ago.

ATC requested documentation regarding current or historic mold conditions at the property. No documentation was provided to ATC for review, with the exception of summaries within prior report (refer to Section 5.3.9). ATC 2007 ESA indicates that minor roof penetrations were caused as a result of recent HVAC equipment installation at 2860 Junction Avenue; these resulted in water leaks which have since been repaired. No evidence of mold growth was observed during the site reconnaissance. Limited water stained ceiling tiles were observed in isolated areas of the tenant spaces. Approximately four square feet of moisture-impacted drywall was observed in the vicinity of a floor drain, located within a janitorial closet of 2840 Junction Avenue.

During the site reconnaissance, ATC conducted a physical observation of certain HVAC system areas and other representative building areas as described in Section 2.2. ATC was escorted by property tenant representatives (refer to Section 7.0) who provided access and answered questions. ATC observed moisture-stained ceiling panels in isolated areas of the tenant spaces. Minor moisture stains were observed beneath sinks in a portion of the tenant spaces. No notable suspect mold growth was observed.

Based on the results of the interview, document review and physical observation, ATC found no evidence indicating potential mold impact at the property.

8.6 Additional User Requested Conditions

No additional User requested conditions were included within the scope of this assessment.

APPENDIX D

USER PROVIDED DOCUMENTATION

ATTACHMENT
CLIENT QUESTIONNAIRE

Per ASTM Standard Practice E 1527-05, Section 6, User Responsibilities, the User of an ESA has specific obligations for performing tasks during the ESA that will help identify the possibility of *recognized environmental conditions* in connection with the Site. Failure by the User to fully comply with the requirements may result in a *data gap* being identified in the report and may impact their ability to use the report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). If this questionnaire is not returned to ATC prior to issuance of the draft report, then ATC assumes that the User does not have any information or actual knowledge pursuant to ASTM Standard Practice E 1527-05, Section 6, User Responsibilities. ATC makes no representations or warranties regarding a User's qualification for protection under any federal, state or local laws, rules or regulations.

Please complete the following and return immediately via email or fax to the attention of:
Audrey Krompholz; Fax: 925-463-2559; Email: audrey.krompholz@atcassociates.com
If other parties are intending to be the Users of the ESA report, then please forward a copy of this questionnaire for them to complete and return to ATC.

Site Name: Montague Park

Site Address: 3050 Zanker Road, 2880 Junction Avenue, 2860 Junction Avenue, 2840 Junction Avenue, and 411 East Plumeria Drive, San Jose, California 95134

ATC Project Number: TBD

Please provide the following information (if available) per the requirements of ASTM E 1527-05.

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25)

Are you aware of any environmental cleanup liens against the site that are filed or recorded under federal, tribal, state or local law? Yes ☐ or No ☒

If yes, please provide a description of the lien(s).

_____

_____

_____

2. Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26)

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes ☐ or No ☒ If yes, please provide.

_____

_____

_____

DRAFT

3. Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (40 CFR 312.28)

As the user of this ESA do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
Yes ☐ or No ☒ If yes, please explain.

4. Relationship of the purchase price to the fair market value of the site if it were not contaminated (40 CFR 312.29)

a. Does the purchase price being paid for this site reasonably reflect the fair market value of the site? Yes ☒ or No ☐

b. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the site? Yes ☐ or No ☐ If yes, please explain.

N/A

5. Commonly known or reasonably ascertainable information about the site (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user.

a. Do you know the past uses of the site? Yes ☒ or No ☐ If yes, please state.

Based on prior ATC Phase I

DRAFT

b. Do you know of specific chemicals that are present or once were present at the site?
Yes ☐ or No ☒ If yes, please state.

c. Do you know of spills or other chemical releases that have taken place at the site?
Yes ☐ or No ☒ If yes, please state.

6. Do you know of any environmental cleanups that have taken place at the site?
Yes ☐ or No ☒ If yes, please state.

7. The degree of obviousness of the presence or likely presence of contamination at the site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this ESA, based on your knowledge and experience related to the site are there any obvious indicators that point to the presence or likely presence of contamination at the site?
Yes ☐ or No ☒ If yes, please explain.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 12/27/2011 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/28/2011 has revealed that there are 3 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 08/19/2011 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/15/2012 has revealed that there are

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 17 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 06/13/2012 has revealed that there are 39 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there are 4 RCRA-NonGen sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR

DRAFT

ULTRATECH (Continued) **1000349751**

MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F020
Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- OR TETRACHLOROPHENOL, OR OF INTERMEDIATES USED TO PRODUCE THEIR PESTICIDE DERIVATIVES. (THIS LISTING DOES NOT INCLUDE WASTES FROM THE PRODUCTION OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL).

Violation Status: No violations found

Registry ID: 110002839304

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D009
Waste name: MERCURY

Waste code: F003

DRAFT

ULTRATECH STEPPER INC (Continued) **1001967352**

Case Type:	Cleanup Program Site
Case Worker:	LL
Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	006
File Location:	Stored electronically as an E-file
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Waste Oil / Motor / Hydraulic / Lubricating
Site History:	Hydraulic fluid was released from the ram casing for an elevator at the site. 6,500 gallons of hydraulic fluid and groundwater have been pumped out to date. Had proposed to install a recovery well with a passive skimmer as their interim cleanup, but encountered footings while drilling inside the building. Many site limitations due to location of release within the building. Wells installed outside of the building.

Environmental Interest/Information System
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

DRAFT

SEAGATE TECHNOLOGY INC (Continued) **1000313323**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 11/10/2004
Facility name: ATMI ECOSYS CORP
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

DRAFT

A T M I (Continued) **1000215878**

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Violation Status: No violations found

FINDS:

Registry ID: 110001160957

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
