Historical Fire Insurance Map Search Result:

The review of collections and indexes has determined that no historical fire insurance maps are available within these collections and indexes for the referenced site; therefore they are not available and are considered not "reasonably ascertainable" according to ASTM standards. Environmental Record Search (ERS) certifies that a thorough search of our holdings, various other collections and indexes has been completed.

Note: There was coverage for Fontana but it did not extend out far enough to reach the subject site.

Thank you for selecting ERS.

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency/source. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Potential air dispersion plumes are depicted to graphically show the direction contaminates may travel based on prevailing wind data and provide a visual screening tool only. Actual direction will vary especially by season. Depending on the actual contaminate, amount released, and other variables, the distance from the source the contaminate may travel can and will vary. Interpretation and review of all the actual relevant data by an environmental professional is recommended before making any decisions, conclusions or otherwise based on the map depictions, air data, and potential air dispersion plumes.

(Y/N): No Evaluation General Type: Case Development Inspection Evaluation Type: Industrial Storm Water Enforcement Follow-up Evaluation Note(s): Site's Notice of Non-Compliance for the non-submission of 2013-2014 annual report certified mail letter came back. I visited the business site, and the site was still in operation. Spoke to the manager, and he could not understand why the certified mail didn't go through. I've contacted Mr. Tabibnia via email about the outstanding annual report. Evaluation Division: Water Boards Evaluation Program: INDSTW Evaluation Source: SMARTS Evaluation Date: 2/10/2011 Violations Found? (Y/N): No Evaluation General Type: Case Development Inspection Evaluation Type: Industrial Storm Water Enforcement Follow-up Evaluation Note(s): Staff performed a follow-up inspection of the two piles illegally dumped in the past, either by one of the site's old employee or the contractor that was hired to haul off the waste materials. In either case, the two piles were completely removed, and the Edison corridor had been cleaned. Program Description: Industrial Facility Storm Water

Evaluation Information
Evaluation Date: 7/15/2014
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Industrial Storm Water Compliance Evaluation
Evaluation Note(s): Facility personnel requested staff to inspect the site for light industrial/no exposure exemption. On arrival, I observed all activities, including compacting/bailing, and sorting done all indoor. No shredding of plastic done outdoor, beside loading and unloading. Site's recording for training and storm water was exemplary. Housekeeping was top notch, maintaining site's exterior cleanliness like a bare parking lot. Light storage of metal framed containers outdoor temporarily before being hauled off at week's end by recycling company. All incoming and outgoing loading/unloading activities done under roofed bay to the east of the facility. The facility would be expanding its roofed structure to accommodate two to three lanes of trucking lanes to prevent storm water exposure to material handling during wet seasons. Currently, site does not have enough sampling evaluation for exemption, and construction of expansion roof structure will be within the 2014-2015 reporting year. I refrain from granting approval until the new permit goes into full effects.

DISCLAIMER, LIMITS AND LIABILITIES

All of the data presented in this report was garnered from public information maintained by governmental agencies. ***Environmental Record Search (ERS)*** cannot ensure that the data, which has been entered and maintained by others, is complete and/or accurate. Any, and all omissions, errors, negligence, accidentally or otherwise within the data received by ***ERS*** is assumed to be caused by others and ***ERS*** cannot and does not assume, take, or acknowledge any liability whatsoever for their respective data. The extrapolation of the mapped locations is based solely on the accuracy of the data provided by others. Prior to relying completely on any mapped location within this report, its accuracy should be verified using other means such as further documentation or a field visit. ***ERS*** makes no representation, warranty or guaranty, express or implied regarding the accuracy of the data entered and maintained by others or the suitability of the data received from others in this report for a certain task or interpretation.

The data presented in this report should only be interpreted by an experienced environmental professional, as per EPA definition, that completely understands the potential inaccuracy of the data derived from others, the possible existence of contaminated occurrences that have not been listed, and the possibility that the governmental database misrepresents the actual status of an occurrence or listing. Prior to relying completely on any of the data within this report, an environmental professional should verify the accuracy of the information presented unless one of ERS's Environmental Professionals has interpreted the data and/or report.

It is important that the reader and/or end user of this information realize that the data gathered has not been verified for its accuracy or completeness in any way by ***ERS***. With billions of records, this is an impossible task for any Company. As much as possible, the data is presented unchanged and unaltered to represent the actual data produced by these agencies. This insures the integrity of the data for the end user.

ERS does however stand behind its representation of the data, any manually plotted occurrences, any risk determinations and all other items directly under its control. This report does comply (as far as the data is reasonably ascertainable as outlined in both the following standards) with section 8.2.2 of ASTM 1527-21 – Standard Environmental Record Sources and EPA's 40 CFR Part 312, All Appropriate Inquiries. ***ERS*** does ensure that the data is accurately reproduced from the original source. ***ERS*** backs the reporting of the data with $3,000,000 of General and Environmental Professional Liability (errors and omissions) Insurance!

Evaluation Note(s): Site failed to submit the 2015-2016 annual report. Certified mails were successfully sent through. I visit the site to ensure sites existence. During visitation, Dennis Ito is out on vacation, with Aniceto Jimenez (Director of Production, aniceto@lynaminc.com, 951-727-7208) acts as second in command. Aniceto and Dennis (by voicemail and emails) have been briefed on whats required of the facility for 2015-2016 reporting period. In the meanwhile, I conduct a normal site inspection. Based on Anicetos information, site operates from Monday to Friday, 7:30AM to 12AM with two shifts, operating under a crew of 150 employees. Daily inbound and outbound traffics range between 8 to 10. Aniceto indicates there a weekly sweeping operation to ensure sites cleanliness. During the inspection, I observe trash bins lids are left opened during operational hours. There is unknown fluid pooling below the leaky bins. Light trash and debris are observed throughout the loading areas, including the loading dock. The descending loading dock has a drainage, with observable stains from activities. Anecito does not know the drainage path way. There is no filter nor known active sump pump. At the rear of the facility, there are plenty of boneyard materials, such as rusty racks, leftover construction materials, as well as old machinery no in use. Drainage of the rear of the facility flows into the dirt path, which happens to be an old railway. Anecito notes that railway is not in use by business.

Evaluation Type: Industrial Storm Water Enforcement Follow-up
Evaluation Note(s): Arrived at 1410: According to the City of Fontana NPDES coordinator, Richard Brooks, he and his staff have given the site Notices of Corrections to eliminate production wastes out of the San Sevaine39;s drainage path, requested Edison39;s lawyer to inform the facility owner of improper waste disposal on Edison39;s land, and made numerous attempts to inform the owner of the violations, the owner and his staff continues to dispose additional production wastes on the eastside of the facility. Staff observed heavy accumulation of production waste spread throughout the Edison39;s easement within the San Sevaine drainage areas. The old waste from 09/23/2008 inspection had been cleaned up, but now,more wastes had been disposed of into the areas once again. Some of the wastes are still fresh. Sending final NOV as a warning before executing ACL.

Program Description: Industrial Facility Storm Water

Evaluation Information
Evaluation Date: 7/15/2014
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Industrial Storm Water Compliance Evaluation
Evaluation Note(s): Facility personnel requested staff to inspect the site for light industrial/no exposure exemption. On arrival, I observed all activities, including compacting/bailing, and sorting done all indoor. No shredding of plastic done outdoor, beside loading and unloading. Sites recording for training and storm water was exemplary. Housekeeping was top notch, maintaining sites exterior cleanliness like a bare parking lot. Light storage of metal framed containers outdoor temporarily before being hauled off at weeks end by recycling company. All incoming and outgoing loading/unloading activities done under roofed bay to the east of the facility. The facility would be expanding its roofed structure to accommodate two to three lanes of trucking lanes to prevent storm water exposure to material handling during wet seasons. Currently, site does not have enough sampling evaluation for exemption, and construction of expansion roof structure will be within the 2014-2015 reporting year. I refrain from granting approval until the new permit goes into full effects.
