HILLMANN
CONSULTING

March 27, 2017

Mr. Craig Cristina
Richland Communities
3161 Michelson Drive, Suite 425
Irvine, CA 92612

RE: Phase I Environmental Site Assessment
Rio Vista
Rubidoux, CA 92509
Hillmann Project Number: C3-6794

Dear Mr. Cristina:

Hillmann Consulting, LLC, is pleased to provide the results of our Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in accordance with the scope and limitations of ASTM Practice E 1527-13, which is the latest version of the E1527 standard published by the ASTM, and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312.

This report is for the exclusive use of the entities named on the front cover, and no other party shall have any right to rely on any service provided by Hillmann Consulting, LLC, without prior written consent.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact the Project Manager at (714) 634-9500.

Sincerely,
Hillmann Consulting, LLC

Scott Alburn
Environmental Technician

Christopher W. Baker
Vice President of Operations

List of Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

ACM	– Asbestos Containing Material
AST	– Aboveground Storage Tank
ASTM	– American Standard for Testing Materials
CERCLA	– Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	– Comprehensive Environmental Response Compensation and Liability Information System
CESQG	– Conditionally Exempt Small Quantity Generator
CORRACTS	– Corrective Action Sites
CREC	– Controlled Recognized Environmental Condition
DNPL	– Delisted National Priority List
DTSC	– Department of Toxic Substances Control
ENG	– Engineering
ERNS	– Emergency Response Notification System
FOI	– Freedom of Information
FOIA	– Freedom of Information Act
FOIL	– Freedom of Information Letter
HVAC	– Heating Ventilation & Air Conditioning
HREC	– Historic Recognized Environmental Condition
IAQ	– Indoor Air Quality
INST	– Institutional
LBP	– Lead-Based Paint
LQG	– Large Quantity Generator
LUST	– Leaking Underground Storage Tank
MSDS	– Material Safety Data Sheet
NFA	– No Further Action
NFRAP	– No Further Remedial Actions Planned
NPDES	– National Pollutant Discharge Elimination System
NPL	– National Priority List
RCRA	– Resource Conservation and Recovery Act
RCRIS	– Resource Conservation and Recovery Information System
REC	– Recognized Environmental Condition
RWQCB	– Regional Water Quality Control Board
SCAQMD	– South Coast Air Quality Management District
SQG	– Small Quantity Generator
TSDF	– Treatment Storage and/or Disposal Facility
USEPA	– United States Environmental Protection Agency
UST	– Underground Storage Tank

1.0 EXECUTIVE SUMMARY

Hillmann Consulting, LLC (Hillmann), performed a Phase I Environmental Site Assessment (ESA) of Rio Vista in Rubidoux, California (the "Property"). This assessment has been conducted in accordance with the ASTM Standard Practice E 1527-13 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312.

1.1 Project Details Summary Table

A summary of the pertinent details of the project is provided below:

PROJECT SUMMARY TABLE					
Name of Client	Richland Communities				
Client Project No.:	N/A				
Client Contact:	Mr. Craig Cristina				
Description of Project	Phase I Environmental Site Assessment				
Project Name:	Rio Vista				
Street Address:	N/A				
City:	Rubidoux	**County:**	Riverside	**State:**	California
Tax ID/Parcel Number:	175-080-010; 175-090-001 through 175-090-005 175-100-003, 005, 006; 175-150-002; 175-160-001 175-160-005, 007; 177-030-012, 014; 177-040-002, 008				
Zoning Designation:	Vacant Agriculture				
Approx. Property Area:	930.85 Acres				
Approximate Building Area:	N/A				
Year Built:	N/A				
General Type of Usage:	Vacant land				
Property Owner:	Canadian Pacific Land				
Occupant(s):	Vacant				
Assessment Personnel:	Mr. Chris Baker, Mr. Ryan Terwilliger, Mr. Scott Alburn, Mr. Stephen Barlett				
Property Contact:	N/A				
Property Escort(s):	N/A				
Inspection Date:	March 7, 2017				
Weather Conditions:	Clear, 75 degrees F				

1.2 Findings Summary Table

The following table summarizes the key findings of this assessment. This table, alone, does not constitute the complete assessment. The report must be reviewed in its entirety.

Assessment Section	No Sig. Concern	Potential Env Concern	REC	Recommended Follow-up	Rep. Ref.
User Provided Info		Historical document identified that 6,000 pounds of "oily debris and soil" was removed by Double Barrel Environmental Services	Yes	Limited Subsurface Soil Investigation	3.0
Data Gaps	X				2.5
Regulatory Review	X				4.1
Historical Review	X				4.4
Site Use	X				5.2
Adjoining Properties	X				4.1.2 5.2.8
Hazardous Materials	X				5.3
Bulk Petroleum Storage	X				5.3
PCBs	X				5.3
Waste / Discharges		Waste materials observed dumped around the Property.	No	Proper disposal of items prior to redevelopment	5.3
Asbestos Containing Materials (ACM)	X				7.1
Lead Based Paint (LBP)	X				7.2
Radon	X				7.3
Mold	X				7.4
Wetlands	X				7.5

NA = Not Applicable, TBD = To Be Determined, UNK = Unknown

1.3 General Description, Current and Historic Property Use

The Property consists of seventeen irregularly shaped parcels to the north of Highway 60, between Rubidoux Boulevard and Armstrong Road. The Property is currently undeveloped land. The total Property area is approximately 930.85 acres. The Property is located in a suburban developed area characterized by a mix of single and multi-family homes, a quarry, manufacturing suppliers, and undeveloped land. The terrain of the Property appeared to be covered with hills and mountains. No natural surface bodies of water were observed.

The Property appears to have been undeveloped land since 1896, with no indication of building development.

1.4 Findings, Opinions, and Conclusions

1.4.1 Notable Findings

According to the Hillmann Consulting Project No. C3-5181, Phase I Environmental Site Assessment, Rio Vista, Rubidoux, California 92509 and dated March 13, 2012, a waste manifest was issued on February 2, 2012 indicating that 6,000 pounds of "oily debris and soil" was removed near the central portion of the Property by Double Barrel Environmental Services. Hillmann made no further recommendations for the Property, with the exception of performing a limited subsurface soil investigation in the area of the removed soil if that portion of the Property were going to be developed.

Approximately four (4) 15-gallon containers containing vinyl product that were dumped in a ravine at the Property. The containers were filled to various levels with one container being opened. Additionally, approximately two (2) 5-gallon gasoline containers were identified and noted as empty. Multiple areas of miscellaneous dumping of household and construction materials were observed throughout the Property.

De minimis soil staining was noted in the northeastern portion of the Property where illegally dumped vinyl product had leaked out of its container onto the ground. Additional *de minimis* soil staining was noted to the west of the dumped material where a fire had likely occurred within a homeless encampment where the top soil layer and surrounding vicinity appeared to be burned.

Within the former homeless encampment, a strong petroleum odor was noted which likely resulted from usage of petroleum product as a fire accelerant within the homeless encampment.

1.4.2 Non-ASTM Scope Considerations

Hillmann has also performed preliminary evaluations for ASTM "Non-Scope" items, such as asbestos-containing materials (ACM), lead-based paint, radon, mold and wetlands. Our observations and research did not identify any notable concerns.

1.4.3 Significant Data Gaps

No data gaps that significantly impacted Hillmann's ability to identify RECs in connection with the Property have been identified.

1.4.4 Recognized Environmental Conditions

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-13 of the Property as described in Section 2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except for the following:

Recognized Environmental Conditions (RECs):

- Based on the prior Phase I Environmental Site Assessment issued by Hillmann Consulting, Double Barrel Environmental Services removed 6,000 pounds of oil debris and soil from the Property located within the central portion of the Property. Soil remaining in the vicinity of the removed soil may likely contain elevated contaminants, which constitutes this as a *REC* in connection with the Property.

Controlled Recognized Environmental Conditions (CRECs):

- No evidence of any CRECs in connection with the Property was identified.

Historical Recognized Environmental Conditions (HRECs):

- No evidence of any HRECs in connection with the Property was identified.

1.5 Recommendations

1.5.1 Recognized Environmental Conditions

Based on the findings of the Phase I Environmental Site Assessment, Hillmann recommends a limited subsurface soil investigation in the area where the waste and stained soil was removed from the Property by Double Barrel Environmental Services if this portion of the Property is to be developed.

While not a *REC*, Hillmann recommends the proper disposal of dumped items observed throughout the Property.

1.5.2 Non-ASTM Considerations

No investigation into Non-ASTM considerations is warranted at this time.

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-13. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the "landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The primary goal of the processes established by ASTM E1527-13 is to identify *recognized environmental conditions* in connection with the Property.

The term *recognized environmental condition (REC)* is defined by the ASTM as the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The ASTM has also defined the terms *historical recognized environmental conditions* and *controlled recognized environmental conditions* as two additional types of RECs. The term *historical recognized environmental condition (HREC)* is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls or engineering controls).

The term *controlled recognized environmental condition (CREC)* is defined as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

Conditions determined to be *"de minimis conditions"* are not considered to be RECs nor CRECs. *De minimis condition* is defined by the ASTM as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

The chief components of this assessment are described as follows:

- A non-invasive visual reconnaissance of the Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Property.

- A review of standard physical record sources for available topographic, geologic and groundwater data.

- Review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Property from the present, back to the Property's first developed use, or back to 1940, whichever is earlier.

- Review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Property, adjoining properties and properties located within the surrounding area.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

2.1.1 Non-ASTM Scope Considerations

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental concerns that are outside of the requirements of the ASTM E1527-13 standard:

Asbestos-Containing Materials (ACM): A preliminary visual inspection for the presence of suspect ACM within the accessed areas of buildings on the Property.

Lead-Based Paint (LBP): A preliminary visual inspection of the condition of painted surfaces in the accessed areas of buildings on the Property.

USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the potential for elevated indoor levels of radon gas to occur in the area of the Property.

Mold: A preliminary visual inspection within the accessed areas of buildings on the Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors.

Wetlands: A preliminary review of data published by the US Fish and Wildlife Service regarding the presence or absence of mapped wetlands on the Property. The US Fish and Wildlife Service wetlands data is typically provided to Hillmann by Environmental Data Resources, Inc. (EDR).

2.2 Property Location/Legal Description

The Property is located at Rio Vista in Rubidoux, California. The legal designations of the Property are Assessor's Parcel Numbers (APNs) 175-080-010; 175-090-001 through 175-090-005 175-100-003, 005, 006; 175-150-002; 175-160-001, 175-160-005, 007; 177-030-012, 014; and 177-040-002, 008. The Property consists of seventeen irregularly shaped parcels to the north of Highway-60, between Rubidoux Boulevard and Armstrong Road. The latitude and longitude of the Property is approximately North 34.0277 degrees, and West 117.4106 degrees.

2.3 Significant Assumptions

The following significant assumptions are made:

- Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from EDR during the course of this assessment.

- Hillmann can neither warrant nor guarantee the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

- Hillmann has assumed that the site operations at the time of the site visit reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, Hillmann has also assumed that no areas of the Property with potential environmental concerns or RECs were concealed or otherwise not made known to us, intentionally or unknowingly, by the Property owners/occupants and/or site escort at the time of the site visit.

- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, Hillmann has assumed that the gradient of groundwater flow follows the surface topography of the Property and immediate surrounding area.

2.4 Limitations and Exceptions

2.4.1 Limiting Conditions

Hillmann was unaware of any significant limiting conditions at the time of the assessment. Note that illegally dumped garbage and construction debris piles were not disassembled or moved and may potentially hide additional concerns.

2.4.2 Other Exceptions or Deletions:

No exceptions or deletions from the ASTM Standard E 1527-13 are reported.

2.5 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions.

Data Gap:	Significant (Yes/No)?	Discussion
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.6 Special Terms and Conditions

Hillmann has prepared this Phase I Environmental Site Assessment using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Property. The methodology of this Phase I Environmental Site Assessment was consistent with the ASTM Standard Practice for E 1527-13. Findings within this report are based on information collected from observations made on the day of the site visit and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation or other construction purposes. Hillmann makes no representation or warranty that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on our visual observations of the Property, the research findings reasonably obtained, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Hillmann relies completely on the information, whether written, graphic or verbal, provided by the subject Property contact(s) or as shown on any documents reviewed or received from the subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. Although there may have been some degree of overlap in the information provided by these various sources, Hillmann did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this assessment.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report focuses on the Property and neighboring properties that could impact the Property. Neighboring properties listed in governmental environmental records are identified within specific search distances. The search distance varies depending upon the particular government record being checked. The regulatory research is designed to meet the requirements of ASTM Standard E 1527-13. The information provided in the regulatory database report is assumed to be correct and complete.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. "Reasonable efforts" are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

Unless otherwise specified in Section 2.1 of this report, an ASTM Vapor Encroachment Screening of the Property utilizing the information collected during the course of this assessment is excluded from the scope of service for this assessment.

Hillmann is not a professional title insurance firm and makes no guarantee, explicit or implied, that the records which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement between Richland Communities and Hillmann Consulting, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

3.1 Prior Environmental Reports/Documentation

Hillmann Consulting Project No. C3-5181, Phase I Environmental Site Assessment, Rio Vista, Rubidoux, California 92509 prepared by Hillmann Consulting LLC and dated March 13, 2012. The report references a previous Phase I Environmental Site Assessment, conducted by Community Development Associates, noting no recognized environmental conditions related to current and prior Property use. According to a waste manifest dated February 2, 2012, approximately 6,000 pounds of "Oily debris and soil" was removed at the coordinates 34° 01' 39"N and 117° 24' 18"W, which is approximately in the central portion of the Property, by Double Barrel Environmental Services. Hillmann made no further recommendations at the time, however Hillmann did recommend that a limited subsurface soil investigation be conducted where the soil was removed if that portion of the Property were going to be developed.

3.2 Title Records/Environmental Liens/Activity and Use Limitations

Review of title records is not included in the scope of work for this assessment project. No information regarding environmental liens or activity and use limitations was provided to Hillmann by the Client.

3.3 Specialized Knowledge or Experience

No indication of any specialized knowledge or experience regarding the Property was reported to Hillmann by the Client.

3.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or specialized knowledge of the Property was reported to Hillmann by the Client.

3.5 Property Value Reduction due to Environmental Conditions

No information was provided by the Client to Hillmann regarding a reduction of the Property value due to environmental problems or conditions.

3.6 Reason for Performing Phase I ESA

It is Hillmann's understanding that the Phase I ESA was being performed in consideration of a pending real estate transaction involving the Property.

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

An EDR Radius Map report was obtained from Environmental Data Resources of Shelton, CT. The EDR Radius Map Report provided a search of standard environmental record sources in general accordance with the requirements of the ASTM E1527-13. Hillmann has reviewed the EDR Radius Map report and a summary of findings is presented in the following tables and report sections. Hillmann also reviewed the list of unmapped sites (referred to by EDR as "Orphan List" sites). Unmapped sites identified as falling within an applicable specific search distance or warranting discussion in the report, if any, have been included in the information presented below. Detailed descriptions of the meaning and significance of the regulatory databases can be found in the EDR Radius Map Report in Appendix E.

Regulatory Database	Search Distance	Property Listed?	Adj. Properties Listed?	Total Listings Within Search Distance
Fed. NPL/Proposed NPL	1-mile	No	No	0
Fed. Delisted NPL	½-mile	No	No	0
Fed. CERCLIS (SEMS)	½-mile	No	No	1
Fed. CERC-NFRAP (SEMS Archive)	½-mile	No	No	0
Fed. RCRA CORRACTS	1-mile	No	No	0
Fed. RCRA TSD	½-mile	No	No	0

State/Tribal Voluntary Cleanup Sites	½-mile	No	No	0
State/Tribal Brownfields	½-mile	No	No	0
Supplemental Databases	Site & Adj.	No	Yes	

4.1.1 Property Listings

The Property addresses were not identified on any of the databases searched.

4.1.2 Adjoining Property Listings

HAZNET, RCRA-SQG, FINDS, ECHO – ECCO Equipment, located at 2195 Van Dell Road, adjoining to the east and at a lower elevation relative to the Property. The HAZNET listing indicates that other organic solids, non-reported waste, off-specification, aged or surplus organics, waste oil and mixed oil, aqueous solution with total organic residues less than 10 percent, and organic liquids with metals were disposed of between 2015 and 1998 at the address.

The RCRA-SQG listing indicates that the address is registered as a small-quantity generator for hazardous waste with no violations found. The FINDS listing indicates that the address is registered on the California Hazardous Waste Tracking System – Datamart and the RCRA database. The ECHO listing indicates that the address is on the RCRA program with no reported violations. Due to the lack of violations and no reported spills or releases, this site is not considered to be a REC in connection with the Property.

HAZNET – BFI Constructors, located at 2145 Van Dell Road, adjoining to the east and at a lower elevation relative to the Property. The HAZNET listing indicates that unspecified alkaline solution and off-specification, aged or surplus organics were disposed of at the Property in 1997. Due to the lack of spills or releases, this site is not considered to be a REC in connection with the Property.

MINES – Pacific Ridge Industrial Park, adjoining to the east-northeast and at a lower elevation relative to the Property. The MINES listing indicates that the address operates as an open pit mine with a mining operation status of "idle" and reclamation not started. Due to the lack of reported spills or releases and topographic relation, this site is not considered to be a REC in connection with the Property.

HAZNET – Rosario Torres, located at 5905 Paramount Drive, adjoining to the south-southwest and at a lower elevation relative to the Property. The HAZNET listing indicates that asbestos containing waste was disposed of at the address in 2011. Due to the lack of reported spills or releases, this site is not considered to be a REC in connection with the Property.

4.1.3 ASTM Search Distance Findings

The following is a summary of the findings of the regulatory database review with regard to sites identified as located within the ASTM specified search distance surrounding the Property. In order to keep this report informative and yet concise, Hillmann has provided a brief discussion of the listed site(s) for each database category that appears most likely to impact the Property based on distance, topography and/or case status. A copy of the full EDR Radius Map Report, including available details of all listed sites, is included in Appendix E.

Note that listings for the following databases, if identified, would be discussed above in Sections 4.1.1 and 4.1.2: Registered Storage Tanks, Federal RCRA Generators, Federal and State INST and ENG Controls, ERNS.

Federal NPL: No NPL listings were identified within a one-mile radius of the Property.

Federal Delisted NPL: No DNPL listings were identified within a ½-mile radius of the Property.

Federal CERCLIS: One (1) CERCLIS listings was identified within a ½-mile radius of the Property. The listing is described as Riverside Cement Co. Crestmore PLT at 1500 Rubidoux Boulevard. The site is approximately 2,130 feet east from the Property border and at a lower elevation relative to the Property. The listing indicates that the site does not qualify for the National Priorities list (NPL), with a status of "Other Cleanup Activity: State-Lead Cleanup". In

addition, a discovery date of 04/25/1983 is noted and a No Further Action letter was issued by the Department of Toxic Substances Control on 04/11/1995. Due to the status and No Further Action issuance, this site is not considered to be a REC in connection with the Property.

Federal CERCLIS-NFRAP: No CERC-NFRAP listings were identified within a ½-mile radius of the Property.

Federal RCRA-CORRACTS: No CORRACTS listings were identified within a one-mile radius of the Property.

Federal RCRA-TSD: No TSD listings were identified within a ½-mile radius of the Property.

State/Tribal Hazardous Waste Sites: Five (5) SHWS listings were identified within a one-mile radius of the Property on the EnviroStor database. The closest listing is described as Certainteed Corp. at 2100 Avalon Street. This site is approximately 2,188 feet east of the Property border, and at a lower elevation relative to the Property. The listing indicates an "Inactive" status as of 01/01/2008. The site type is noted as Corrective Action. A Considering distance and topographic relation, this site is not considered to be a REC in connection with the Property. Due to status, distance, and topographic relation, none of the other four listings represent a REC, either.

One (1) SHWS listing was identified within a one-mile radius of the Property on the RESPONSE database. The closest listing is described as Certainteed Corp. at 2100 Avalon Street. This site is approximately 2,188 feet east of the Property border, and at a lower elevation relative to the Property. The listing indicates that soil was contaminated by asbestos containing materials. The status is listed as "Certified" as of 02/01/1984 with "NO" restricted use. Considering the distance, topographic relation, and media affected, this listing is not considered to be a REC in connection with the Property.

State/Tribal Landfill/Solid Waste Disposal Sites: No SWF/LF listings were identified within a ½-mile radius of the Property.

State/Tribal leaking Storage Tanks: Twenty-seven (27) LUST listings were identified within a ½-mile radius of the Property. The closest listing is described as Certainteed Corp. at 2100 Avalon Street. This site is approximately 2,188 feet east of the Property border, and at a lower elevation relative to the Property. The listing indicates a status of "Case Closed" as of 10/22/1992. Soil was potentially affected from diesel at the address. A leak was first discovered during a tank closure procedure on 07/01/1991. Considering the status, distance, and only soil media was impacted, this listing is not considered to be a REC in connection with the Property. Due to distance, status, hydraulic gradient or other reasons, none of the other twenty-six listed facilities represent a REC to the Property.

Four (4) SLIC listings were identified within a ½-mile radius of the Property. The closest listing is described as Ryder Truck Rental at 5880 20th Street. The site is approximately 3,370 feet east of the Property border, and at a lower elevation relative to the Property. The listing indicates a facility status of "Completed – Case Closed" as of 11/21/1995 when a No Further Action letter was issued. Considering the status and distance, this listing is not considered to be a REC in

connection with the Property. Due to distance, status, hydraulic gradient or other reasons, none of the other three listed facilities represent a REC to the Property.

State/Tribal Voluntary Cleanup Sites: No VCP listings were identified within a ½-mile radius of the Property.

State/Tribal Brownfields: No BROWNFIELDS listings were identified within a ½-mile radius of the Property.

Review of the sites identified within the ASTM search parameters did not identify any nearby or surrounding area sites that are considered to be a REC in connection with the Property, unless as discussed otherwise previously in this section.

4.2 Additional Environmental Record Sources

4.2.1 Supplemental Database Listings

Hillmann reviewed the EDR Radius Map report for listings on supplemental databases that were searched in addition to the Standard Environmental Record Sources. Any property or adjoining property listings on such databases, if identified, would be discussed in Section 4.1.1 and 4.1.2. None of the other supplemental database listings identified by the EDR Radius Map report are considered to be a REC in connection with the Property.

4.2.2 Local Agency & Internet Research

Hillmann performed a search of available local and municipal agencies for pertinent information pertaining to the Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Hillmann also conducted a cursory internet search of the Property address for information indicative of a REC. The following table summarizes the findings of the research:

Source:	Inquiry Made?	Type:	Outcome:
Environmental Protection Agency (EPA)	Yes	FOIA Request	Response indicated that no records for the Property addresses were found.
Riverside County Department of Environmental Health (CUPA)	Yes	FOIA Request	Response indicated that no records for the Property addresses were found.
Department of Toxic Substances Control (DTSC)	Yes	FOIA Request	Response indicated that no records for the Property addresses were found.
Regional Water Quality Control Board (RWQCB) – Santa Ana Region (8)	Yes	FOIA Request	Response indicated that APNs are unable to be searched by their search database. No APN records found.
Riverside County Geographical Information System (GIS)	Yes	On-line search	No information indicative of a REC was identified.

CA DTSC EnviroStor database http://www.envirostor.dtsc.ca.gov/public/	Yes	Internet	The Property address was searched. No results for the Property were found.
CA GeoTracker database http://geotracker.waterboards.ca.gov/	Yes	Internet	The Property address was searched. No results for the Property were found.
USEPA Envirofacts search http://www.epa.gov/enviro/index.html	Yes	Internet	The Property address was searched. No results for the Property were found.
www.google.com	Yes	On-line search	The Property address search returns results as undeveloped land.
www.realquest.com	Yes	On-line search	Basic Property information such as parcel number, date of construction, and building square footages were collected. Pertinent information, where obtained, is referenced in the appropriate sections of this report.
Other:	NA		

4.3 Physical Setting Sources

4.3.1 USGS 7.5 Minute Topographic Map

The USGS 7.5 minute series topographic maps covering the Property (Fontana, CA 2012, San Bernardino South, CA 2012, Riverside East, CA 2012 & Riverside West, CA 2012) were reviewed. The maps indicated an approximate elevation at the Property of 1,372 feet above mean sea level. The topography indicated by the map appeared to be sloping downward to the north-northwest. The closest down gradient body of water appeared to be an unnamed pond, approximately 8.35 miles north-northwest.

4.3.2 Soils

Based on USDA Soil Conservation Service (SCS) data summarized by the EDR Geocheck-Physical Setting Source Addendum, the soil type at the Property is classified as “Cieneba.” The “Cieneba” designation is described as somewhat excessively drained drained, sandy loam with slow infiltration rates.

4.3.3 Geology

Based on geologic data summarized by the EDR Geocheck - Physical Setting Source Addendum, the geologic formation in the vicinity of the Property is described as eugeosynclinal deposits of the Paleozoic Era, Pennsylvanian System, Upper Paleozoic Series.

4.3.4 Hydrology

No site specific hydro-geologic data was available for the Property. Based on the drainage/topography of the Property and surrounding area, the inferred direction of groundwater flow appears to be towards the north-northwest. A detailed subsurface investigation of the

Property would be needed to accurately determine site specific groundwater data such as depth, gradient and flow direction.

4.4 Historical Use – Property and Adjoining Properties

Hillmann has conducted research in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Property. Standard historical sources have been sought in an attempt to document the past uses of the Property as far back as it can be shown that the Property contained structures; or from the time the Property was first used for residential, agricultural, commercial, industrial or governmental purposes.

4.4.1 Fire Insurance Maps

A search of Sanborn Fire Insurance Maps for the Property and surrounding area was conducted by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. EDR provided a Sanborn report that stated fire insurance maps covering the target property were not found.

4.4.2 City Directories

Hillman obtained an EDR City Directory Abstract report to obtain data of historic city directory listings for the Property. No listings for the Property or adjoining properties were identified.

4.4.3 Historical Topographic Map Review

Hillmann obtained and reviewed an "EDR Historical Topographic Map Report" from EDR containing historic aerial photography of the Property and adjoining properties. The following interpretation of land usage was made by review of the maps:

YEAR(S)	DESCRIPTION	
1896, 1898, 1901	**Property**	The Property is depicted as undeveloped land.
	Adjacent Properties	The adjoining properties are depicted as undeveloped land.
1942/1943	**Property**	The Property is depicted as undeveloped land.
	Adjacent Properties	The adjoining properties to the north are depicted as undeveloped land. The adjoining properties to the east and west are depicted with various structures. The adjoining property to the southwest is depicted with a quarry.
1953, 1954	**Property**	The Property is depicted as undeveloped land.
	Adjacent Properties	The adjoining properties to the north are depicted as undeveloped land. The adjoining properties to the east are depicted with various structures and orchards. The adjoining property to the southwest is depicted with a quarry. The adjoining properties to the west are depicted with agricultural land.
1967, 1973	**Property**	The Property is depicted as undeveloped land with agricultural land towards the northern portion of the Property.
	Adjacent Properties	The adjoining property to the north is depicted with agricultural land. The adjoining properties to the east are depicted with structures and undeveloped land. The adjoining properties to the south are depicted with various structures and a quarry. The adjoining properties to the west are depicted with various structures and agricultural land.

1975	**Property**	The Property is depicted as undeveloped land.
	Adjacent Properties	The adjoining properties to the north are depicted as undeveloped land. The adjoining properties to the east are depicted with undeveloped land. The adjoining properties to the south are depicted with a quarry and shaded to denote general urban development. The adjoining properties to the west are depicted with various structures, agricultural land, and undeveloped land.
1980	**Property**	The Property is depicted as undeveloped land.
	Adjacent Properties	The adjoining properties to the north are depicted as undeveloped land. The adjoining properties to the east are depicted with undeveloped land. The adjoining properties to the south are depicted with a quarry and various structures. The adjoining properties to the west are depicted with various structures, agricultural land, and undeveloped land.
2012	**Property**	No building development is depicted on the Topographic Map.
	Adjacent Properties	No building development is depicted on the Topographic Map.

4.4.4 Aerial Photograph Review

Hillmann obtained and reviewed an "EDR Aerial Photo Decade Package Report" from EDR containing historic aerial photography of the Property and adjoining properties. In addition, Hillmann reviewed historic aerial photographs of the Property online at www.historicaerials.com. The following interpretation of land usage was made by review of the aerial photographs:

YEAR(S)	DESCRIPTION	
1938	**Property**	The Property appears to be undeveloped land.
	Adjacent Properties	The adjoining properties to the north are depicted as undeveloped land with one water tank. The adjoining properties to the east appear to be developed with small structures and undeveloped land. The adjoining properties to the south appear with undeveloped land and a quarry. The adjoining properties to the west appear as undeveloped land.
1948	**Property**	The Property appears to be undeveloped land.
	Adjacent Properties	The adjoining properties to the north are depicted as undeveloped land with one water tank. The adjoining properties to the east appear to be developed with small structures and undeveloped land. The adjoining properties to the south appear with undeveloped land and a quarry. The adjoining properties to the west appear as agricultural land.
1959, 1966, 1967	**Property**	The Property appears to be undeveloped land.
	Adjacent Properties	The adjoining properties to the north are depicted as undeveloped land with one water tank. The adjoining properties to the east appear to be developed with small structures and undeveloped land. The adjoining properties to the south appear with residential homes and a quarry. The adjoining properties to the west appear as agricultural land.
1980, 1994	**Property**	The Property appears to be undeveloped land.
	Adjacent Properties	The adjoining properties to the north are depicted as undeveloped land with one water tank. The adjoining properties to the east are depicted with small structures and undeveloped land. The adjoining properties to the south appear with residential homes and a quarry. The adjoining properties to the west appear with residential homes and agricultural land.

2002, 2005, 2009, 2010	**Property**	The Property appears to be undeveloped land.
	Adjacent Properties	The adjoining properties to the north are depicted as undeveloped land with one water tank. The adjoining properties to the east are depicted with light industrial yards and undeveloped land. The adjoining properties to the south appear with residential homes and a quarry. The adjoining properties to the west appear with residential homes.

4.4.5 Petroleum/Natural Gas Well Review

Hillmann reviewed historical record sources for evidence of historic petroleum and/or natural gas wells at the Property. In addition, Hillmann conducted a search of the property location on the Division of Oil, Gas & Geothermal Resources Well Finder database (http://maps.conservation.ca.gov/doggr/index.html). No record of any historical petroleum/natural gas wells at the Property was identified.

4.4.6 Historical Records Data Failure

Historic land use data prior to 1896 was not readily available at the time of the assessment. The Property was determined by this assessment to have been undeveloped land with no building development. It is Hillmann's opinion that no significant data gaps were encountered.

4.4.7 Summary of Historic Use Research

The Property appears to have been undeveloped land since 1896, with no indication of building development.

The adjoining properties to the north appear to have been undeveloped land until 1994, when a large water tank was present on the adjoining property. By 2005, residential homes were developed on the eastern portion of the northern adjoining property. The eastern adjoining properties appear to have first been developed with structures on the northern portion of the site. Additionally, one structure and agricultural land appeared to be utilized towards the southern portion of the eastern adjoining properties in 1948. In 1966, the agricultural land was removed and by 1994, light industrial facilities were being developed towards the southern portion of the eastern adjoining properties. The adjoining properties to the south appear to have first been utilized as agricultural land in 1948, until the land was converted to residential homes and undeveloped land in 1959. The adjoining properties to the west appear to have been undeveloped land until 1938, when a quarry was present. By 1948, agricultural land was utilized on the western adjoining property to the north of the quarry. Circa 1980, a portion of the agricultural land was converted to residential homes until 1994, when the remainder of the agricultural land was converted to residential homes.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of the Property and improvements, adjoining properties as viewed from the Property boundaries and the surrounding area based on visual observations from adjacent public thoroughfares. Building exteriors were observed at ground level, unless otherwise indicated. Where applicable, Hillmann accessed and observed representative areas of building interiors to the extent they were made safely accessible with the cooperation of the site escort.

The site reconnaissance was conducted by Mr. Ryan Terwilliger, Mr. Chris Baker, Mr. Scott Alburn, and Mr. Stephen Bartlett on March 7, 2017. Weather conditions at the time of the assessment included a temperature of approximately 75 degrees F and clear skies. Hillmann was unescorted.

5.1.1 Significant Inaccessible Areas

No significant areas were excluded from Hillmann's visual inspection.

5.2 General Site Setting

5.2.1 Site and Vicinity Characteristics

The Property consists of seventeen irregularly shaped parcels to the north of Highway 60, between Rubidoux Boulevard and Armstrong Road. The Property is currently undeveloped land. The total Property area is approximately 930.85 acres. The Property is located in a suburban developed area characterized by a mix of single and multi-family homes, a quarry, manufacturing suppliers, and undeveloped land.

5.2.2 Topographic Characteristics

The terrain of the Property appeared to be covered with hills and mountains. No natural surface bodies of water were observed, though multiple water run-off ravines were identified.

5.2.3 General Description of Structures

The Property is undeveloped land with no building development. Dirt roads and paths criss-cross the Property.

5.2.4 Sources of Heating and Cooling

No heating or cooling systems were present at the Property at the time of the assessment.

5.2.5 Potable Water Source/Sewage Disposal System

The Property is currently not serviced by any municipal water and sewer system services.

5.2.6 Current Use(s) of the Property

The Property is currently undeveloped land.

5.2.7 Past Use(s) of the Property

No obvious indication of past Property usage likely to have involved the use, treatment, storage, disposal or generation of hazardous substances or petroleum products was observed at the time of the site visit. However according to a prior report, 6,000 pounds of oily soil was removed from the Property. At the time of the site visit no indication of soil excavation was noted.

5.2.8 Current Use(s) of the Adjoining Properties

The following describes adjacent and abutting properties:

Dir	Street Address	Description
N	Not listed	Undeveloped land
E	6170 20th Street, 2195 Van Dell Road	Alpha Materials Ecco Equipment Corporation
S	Paramount Drive	Residences
W	Loveland Drive Not Listed	Residences Abandoned Quarry

No visual observations indicative of a potential environmental concern were noted on the adjoining properties.

5.2.9 Past Use(s) of the Adjoining Properties

No indication of past uses of the adjoining properties was noted at the time of the site visit. Please refer to Section 4.4 for the findings of historical site use research.

5.2.10 Current/Past Uses of Surrounding Area

The Property is located in suburban area of Rubidoux, California. The vicinity of the Property consists of a mix of single and multi-family homes, a quarry, manufacturing suppliers, and undeveloped land. No indications of past Property uses that differ substantially from current conditions were observed at the time of the site visit.

5.3 Interior & Exterior Observations

5.3.1 Storage/Usage of Hazardous Substances and Petroleum Products

Approximately four (4) 15-gallon containers containing vinyl product that were dumped in a ravine at the Property. The containers were filled to various levels with one container being opened. Additionally, approximately two (2) 5-gallon gasoline containers were identified and noted as empty.

5.3.2 Drums

No drums were noted on the Property at the time of the site visit.

5.3.3 Other Hazardous Substances/Petroleum Products

No other containers of hazardous substances or petroleum products were noted on the Property at the time of the site visit.

5.3.4 Unidentified Substance Containers

No unidentified substance containers were noted on the Property at the time of the site visit.

5.3.5 Storage Tanks

No evidence of any past or present underground storage tanks (USTs) or aboveground storage tanks (ASTs) was identified on the subject Property at the time of the site visit.

5.3.6 Polychlorinated Biphenyls (PCBs)

No PCB-containing hydraulic or electrical equipment was noted on the Property at the time of the site visit.

5.3.7 Odors

A strong petroleum odor was noted to the west of the dumped material located on the northeastern portion of the Property. The petroleum odor was noted within a former homeless encampment where a top layer of soil and surrounding vicinity appeared to be burned from a prior fire within the encampment. It is likely that the prior fire was fueled with a petroleum product accelerant which resulted in the strong odor.

5.3.8 Pools of Liquid

No pools of liquid were noted at the Property at the time of the site visit.

5.3.9 Interior Stains or Corrosion

No interior stains or corrosion were noted at the Property at the time of the site visit.

5.3.10 Interior Drains/Sumps

No floor drains or sump pits were noted at the Property at the time of the site visit.

5.3.11 Exterior Pits/Ponds/Lagoons

No evidence of exterior pits, ponds or lagoons was identified on the Property in connection with waste treatment or disposal at the time of the site visit.

5.3.12 Stained Soil, Pavement/Stressed Vegetation

De minimis soil staining was noted where illegally dumped vinyl product had leaked out of its container onto the ground. Additional *de minimis* soil staining was noted to the west of the dumped material where a fire had likely occurred within a homeless encampment where the top soil layer appeared to be burned.

5.3.13 On-Site Solid Waste Dumping/Fill Material

General refuse and roofing materials were noted in various locations throughout the Property as a result of illegal dumping.

5.3.14 Wastewater

No wastewater discharge was noted on the Property at the time of the site visit.

5.3.15 Septic Systems

No indication of septic systems was noted on the Property at the time of the site visit.

5.3.16 Wells

No evidence of wells was noted at the Property at the time of the site visit.

6.0 INTERVIEWS

6.1 Interviews with Past and Present Owners and Occupants

Type	Name; Affiliation/Title	Summary
Property Owner	Mr. Craig Cristina, Richland Communities	Mr. Craig Cristina was provided an environmental questionnaire regarding the uses and conditions of the Property relative to this assessment and compliance with ASTM E1527-13. Pertinent information, where obtained, is referenced in the appropriate sections of the report.
Property Occupants	Not applicable	Hillmann was not able to interview individual building occupants due to the Property being undeveloped land.
Past Owners, Occupants, Operators	Not applicable	Past owners/occupants of the Property were not available for interview at the time of the assessment due to the Property being undeveloped land.
Owners/Occupants of Adjacent or Nearby Properties	Not applicable	Owners/occupants of adjacent or nearby properties were not available for interview at the time of the assessment.

6.2 Interviews with State and/or Local Government Officials

Written and on-line requests for environmental records of the Property from State and Local governmental agencies are detailed in Section 4.2.2.

7.0 NON-ASTM SCOPE CONCERNS

In accordance with our contract agreement, Hillmann has conducted preliminary evaluations of the following "Non-ASTM Scope Considerations" that are outside of the requirements of the ASTM E1527-13 standard:

7.1 Asbestos-Containing Material (ACM)

There are no permanent buildings on the Property. Therefore, a screening for asbestos is not applicable to this assessment.

7.2 Lead-Based Paint

There are no permanent buildings on the Property. Therefore, a screening for lead-based paint is not applicable to this assessment.

7.3 Radon

According to data compiled by the USEPA, as summarized by the EDR Radius Map Report with GeoCheck, the Property is located in an area with a moderate potential for radon concentrations that exceed current USEPA action guidelines. The County of Riverside is classified as a Zone 2 or 'moderate risk' area for radon. Accordingly, radon is unlikely to represent an environmental concern to the Property.

7.4 Mold

There are no permanent buildings on the Property. Therefore, a screening for mold is not applicable to this assessment.

7.5 Wetlands

Based on a review of the EDR Radius Map Report with GeoCheck, no NWI mapped wetlands were indicated at the Property.

It is emphasized that the absence of NWI mapped wetland areas indicated by the EDR report does not necessarily rule out the potential presence of regulated wetland areas on or immediately adjoining the Property. A wetland delineation should be sought from a qualified firm if a more comprehensive determination regarding the presence or absence of wetlands on or adjacent to the Property is warranted.

8.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the subject *property*. Hillmann has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Instructions: Please answer each question. Check "D/K" if you don't know, or otherwise lack sufficient knowledge of the Property to answer the question.

	PREVIOUS INVESTIGATIONS	
1.	Have any previous environmental investigations (e.g.- Phase I Environmental Site Assessment, soil/groundwater testing, radon testing, asbestos survey, tank closure/removal reports, etc.) been performed at the Property?	☒ Yes ☐ No ☐ D/K
2.	If yes, what concerns were indicated or recommendations made? *(please provide a copy of all previous environmental reports)* SEE ATTACHED REPORT	
	PROPERTY USAGE	
3.	To the best of your knowledge, is the Property or any adjoining property currently occupied or formerly occupied for industrial purposes? If yes, please elaborate: ADJOINING CONCRETE BATCH PLANT	Property: ☐ Yes ☒ No ☐ D/K Adj. Property: ☒ Yes ☐ No ☐ D/K
4.	Is the property or any adjoining property currently used, or have they ever been used, as a gasoline filling station, dry cleaning facility, automotive service/repair shop, auto body repair shop, commercial printing facility, photo development laboratory shop, junkyard, landfill, or as a waste treatment, storage disposal, recycling or processing facility? If yes, please elaborate:	Property: ☐ Yes ☐ No ☒ D/K Adj. Property: ☐ Yes ☐ No ☐ D/K
5.	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries,, or any other waste materials been dumped above grade, buried and/or burned on the property?	☒ Yes ☐ No
	BULK STORAGE TANKS	
6.	Are there currently, or have there been previously, any registered or unregistered above ground or underground storage tanks located at the Property? *If YES, please provide number, size, age of tanks, permits, closure reports, regulatory agency correspondence, and related information.*	Current Tanks: ☐ Yes ☒ No D/K Previous Tanks: ☐ Yes ☐ No ☒ D/K
7.	Are there currently, or have there been previously, any vent pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Current: ☐ Yes ☒ No ☐ D/K Previous: ☐ Yes ☒ No ☐ D/K
8.	Are there currently, or have there been previously, any leakage of hazardous substances or petroleum products from above ground or underground storage tank systems at the Property?	Current: ☐ Yes ☒ No ☐ D/K Previous: ☐ Yes ☒ No ☐ D/K

HILLMANN
CONSULTING

	SPILLS, RELEASES, WASTES	
9.	Are there currently, or have there been previously, any waste discharges on or adjacent to the property, other than storm water or into a municipal sanitary sewer system? If yes, please elaborate:	Current: ☐ Yes ☒ No ☐ D/K Previous: ☐ Yes ☒ No ☐ D/K
10.	Are there currently, or have there been previous, any septic systems, dry wells or leach fields on the property? If yes, please elaborate:	Current: ☐ Yes ☒ No ☐ D/K Previous: ☐ Yes ☐ No ☒ D/K
11.	Are there currently, or have there been previously, any flooring, drains or walls located within the facility that are, or have been, stained by substances (or, in the case of drains, used for) other than water or are emanating foul odors? If yes, please elaborate:	Current: ☐ Yes ☒ No ☐ D/K Previous: ☐ Yes ☒ No ☐ D/K
12.	Are there currently, or have there been previously, any spills or releases of hazardous substances or petroleum products within the building(s) or on the exterior of the Property?	Current: ☐ Yes ☒ No ☐ D/K Previous: ☐ Yes ☒ No ☐ D/K
13.	Has any non-native and/or contaminated fill material been deposited on the Property?	☐ Yes ☐ No ☒ D/K
14.	Have any current or former property occupants generated hazardous wastes or other wastes (such as waste oil, or medical wastes) that required non-conventional storage, handling and/or disposal methods? *If YES, please indicate type of waste and the name of the waste handling contractor:* _____	☐ Yes ☒ No ☐ D/K
	TRANSFORMERS/HYDRAULIC EQUIPMENT	
15.	Are any power transformers, capacitors or hydraulic equipment present at the Property? If yes, please elaborate: COULD BE ON ABOVE GROUND POLES	☐ Yes ☐ No ☒ D/K
16.	If power transformers are present, who owns them? SCE	☐ Yes ☐ No ☒ D/K
17.	If hydraulic equipment is present, indicate age of equipment and name/telephone # of service contactor:	☐ Yes ☒ No ☐ D/K
	REGULATORY DISCLOSURE	
18.	Have there been any environmental liens or governmental notification or involvement relating to past or current use or disposal of hazardous substances with respect to the property of any facility or structure located on the property?	☐ Yes ☒ No ☐ D/K

HILLMANN
CONSULTING

19.	If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system, or has the well been designated as contaminated by any government environmental/health agency? *(if not applicable, please check* NO*)*	☐ Yes ☒ No ☐ D/K
20.	Is there any environmental litigation, administrative action or cleanup action involving the property related to a release or threatened release of any hazardous substance or petroleum product?	☐ Yes ☒ No ☐ D/K
21.	Are you aware of testing of any environmental media (soil, groundwater, surface water, etc.) at the property which identified levels of contaminants in excess of regulatory standards and/or cleanup guidelines?	☐ Yes ☒ No ☐ D/K
	ENVIRONMENTAL/BUILDING CONDITIONS	
22.	Has asbestos testing ever been conducted at the Property? *If YES, please forward a copy of test results and/or survey reports:*	☐ Yes ☒ No ☐ D/K
23.	Are any asbestos containing materials present at the Property? If yes, please elaborate:	☐ Yes ☒ No ☐ D/K
24.	Has lead paint testing ever been conducted at the Property? *If YES, please forward a copy of test results.*	☐ Yes ☒ No ☐ D/K
25.	Is lead-based paint present at the Property? If yes, please elaborate:	☐ Yes ☒ No ☐ D/K
26.	Has radon testing ever been conducted at the Property? *If YES, please forward a copy of test results.*	☐ Yes ☒ No ☐ D/K
27.	Are there any problems with water intrusion, water damaged surfaces or excessive mold growth within the buildings? If yes, please elaborate:	☐ Yes ☒ No ☐ D/K

ENVIRONMENTAL DUE DILIGENCE – USER QUESTIONNAIRE

For Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the *report user* must provide the following information (if available) to the environmental professional. As per the Brownfields Amendments, failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Please complete the following questionnaire and provide any of the referenced information (if available) to Hillmann.

Respondent Name:	CRAIG CRISTINA
Company/Affiliation:	RICHLAND
Address:	3161 MICHELSON DR., SUITE 425, IRVINE
Response Date:	3/13/17

1. Environmental Cleanup Liens
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

Yes ☐ *No* ☒

2. Activity and Land Use Limitations
Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Yes ☐ *No* ☒

3. Specialized Knowledge or Experience
Do you have any specialized knowledge or experiences related to the property, nearby properties, or are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes ☒ *No* ☐

4. Purchase Price vs. Fair Market Value
Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

Yes ☐ *No* ☐ N/A - NOT BEING SOLD

5. Commonly Known or Reasonably Ascertainable Information
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

Yes ☒ *No* □

5a. Do you know the past uses of the property?

Yes ☒ *No* □

5b. Do you know of specific chemicals that are present or were once were present at the property?

Yes □ *No* ☒

5c. Do you know of spills or other chemical releases that have taken place at the property?

Yes □ *No* ☒

5d. Do you know of any environmental cleanups that have taken place at the property?

Yes □ *No* ☒

6. Obviousness of the Presence or Likely Presence of Contamination
As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Yes □ *No* ☒

1.0 EXECUTIVE SUMMARY

At the request of Richland Communities, Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of thirteen (13) parcels of land consisting of approximately 822 acres of land located near Rubidoux, CA (the Property). This assessment has been conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-05 for Phase I Environmental Site Assessments.

1.1 Property Summary Table

A summary of the pertinent details of the project is provided below:

PROJECT SUMMARY TABLE					
Name of Client	Richland Communities				
Client Project No.:	C3-5181				
Client Contact:	Mr. Mike Byers				
Description of Project	Phase I Environmental Site Assessment				
Property Name:	822 acres of undeveloped land				
Property Address:	Near Rubidoux, CA				
City:	Rubidoux	**County:**	Riverside	**State:**	CA 92509
Tax Map designation:	**APN:**	175-080-010; 175-090-001, 002, 003, 004, 005; 175-060-001, 005, 007; 177-030-012, 014; 177-040-002, 008.			
Property Area:	Approximately 822 acres				
Building Area:	Vacant land				
Assessor Designated Site Use:	Vacant land				
Year Built:	Vacant land				
Property Owner:					
Assessment Personnel:	Mr. Kenneth A. Thornburgh				
Accompanied/Escorted By:	Unescorted				
Property Contact:	Mr. Mike Byers				
Inspection Date:	March 6, 2012				
Weather Conditions:	Sunny, cool (65-68 F), mild wind				

1.2 Summary of Findings

The following table summarizes the individual sections of this assessment. This table, alone, does not constitute the complete assessment. The report must be reviewed in its entirety.

FINDINGS SUMMARY					
ASSESSMENT SECTION	ACCEPTABLE	O&M RECOM'D	REC	FURTHER ACTION/ PHASE II RECOM'D	REF. SECTION
Historical Review				x	5.0
Regulatory Review	X				8.0
Site Use	X				3.3/6.2
Hazardous Materials	X				6.3
USTs	X				6.6
ASTs	X				6.6
PCBs	X				6.7
Waste / Discharges	X				6.4/6.5
ACM	X				7.1
Lead Paint	X				7.2
Drinking Water	X				6.11
Radon	X				7.3
Mold	X				7.4
Adjoining/Surrounding Area	X				3.6/3.7/8.2

1.3 Conclusions

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-05 of the Property as described in Section 2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except for the following:

- The Property consists of approximately 822 acres of undeveloped vacant land. The Property has no observable hazardous wastes on site.

- A Phase I titled Phase I Environmental Assessment APN's: # 175-080-010; 175-090-001, 002, 003, 004, 005; 175-100-003, 005, 006; 175-150-001, 002; 175-060-001, 005, 007; 177-030-012, 014; 177-040-002, 008, prepared by Community Development Associates, dated June 20, 2005. The report concluded the following:

"Based upon a site inspection, interviews, and review of available agency records and a database search and follow-up with appropriate agency personnel, Community Development Associates found no indication of an environmental impairment resulting from past or present uses of the subject property. There were no recognized environmental conditions on or adjacent to the subject property." No further investigation was recommended.

- According to a waste manifest dated February 2, 2012, photos and other documentation Double Barrel Environmental Services removed approximately 6,000 pounds of "Oily Debris and Soil" from the coordinates Lat: 34° 01' 39"N, Long: 117° 24' 18"W on the Property. It appears from the photographs that all waste and stained soil was removed from the Property.

Hillmann did not perform a cursory evaluation for ASTM "Non-Scope" items, such as asbestos-containing materials (ACM), lead-based paint, radon and mold due to the fact that the Property consists of undeveloped land with no structures on-site. Our observations and research did not identify any potential concerns.

1.4 Recommendations

Based on information collected from the site investigation, record reviews, interviews and site reconnaissance, the following actions are recommended at this time:

- Hillmann makes no further recommendations at this time.

- Hillmann recommends a limited subsurface soil investigation in the area where the waste and stained soil was removed from the property by Double Barrel Environmental Services if this portion of the property is going to be developed.

- If additional documentation is found that proves the soil that remains in the area of the removal by Double Barrel Environmental Services has been tested and shown to be clean, then Hillmann can remove the recommendation for further subsurface soil sampling.

2.0 PURPOSE AND LIMITATIONS

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-05. The ASTM describes these methodologies as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

The term *recognized environmental conditions (RECs)* is defined by the ASTM as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *REC*s.

The chief components of this assessment are described as follows:

- Review and discussion of current Property conditions regarding the presence or absence of hazardous chemicals/petroleum products; generation, treatment, storage or disposal of hazardous, regulated or medical wastes; electrical equipment that utilizes oils which potentially contain PCBs; and bulk storage tanks (above or below ground).

- Review and discussion of the usage of adjacent and nearby properties to identify the potential for contamination (if present and/or suspected) to migrate onto the Property.

- Summary of physical characteristics of the Property through a review of available topographic, geologic and groundwater data.

- Research of the historic uses of the Property through a review of reasonably ascertainable standard sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews.

- A regulatory review of federal and state environmental databases, and other local environmental records, within specific search distances defined by the ASTM.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

A cursory evaluation for the following “Non-ASTM” concerns, such as the following:

- USEPA Designated Radon Potential

2.2 Inaccessible Locations

No notable areas of the Property were excluded from our visual inspection. However due to the size and terrain limitations, a vehicle was used to traverse and inspect the majority of the Property.

2.3 Limitations and Exceptions

Historic research data gaps are detailed in Section 5, if applicable. No other exceptions or deletions from the ASTM Standard E 1527-05 are reported.

2.4 Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

ACM – Asbestos-containing Material
AST – Aboveground Storage Tank
ASTM – American Standard for Testing Materials
FOIA – Freedom of Information Act
HVAC – Heating Ventilation & Air Conditioning
HREC – Historic Recognized Environmental Condition
IAQ – Indoor Air Quality
LBP – Lead-based Paint
LUST – Leaking Underground Storage Tank
MSDS – Material Safety Data Sheet
REC – Recognized Environmental Condition
UST – Underground Storage Tank

2.5 Special Terms and Conditions

Hillmann has prepared this Phase I Environmental Site Assessment using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Property. The methodology of this Phase I Environmental Site Assessment was consistent with the ASTM Standard Practice for E 1527-05. Findings within this report are based on information collected from observations made on the day of the site investigation and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation or other construction purposes. Hillmann makes no representation or warranty that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on our visual observations of the Property, the municipal research findings reasonably obtained, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Hillmann relies completely on the information, whether written, graphic or verbal, provided by the subject Property contact(s) or as shown on any documents reviewed or received from the subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. Although there may have been some degree of overlap in the information provided by these various sources, Hillmann did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this assessment.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report focuses on the Property and neighboring properties that could impact the Property. Neighboring properties listed in governmental environmental records are identified within specific search distances. The search distance varies depending upon the particular government record being checked. The regulatory research is designed to meet the requirements of ASTM Standard E 1527-05. The information provided in the regulatory database report is assumed to be correct and complete.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. “Reasonable efforts” are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

Hillmann is not a professional title insurance firm and makes no guarantee, explicit or implied, that the records which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

3.0 PROPERTY DESCRIPTION

3.1 Property Location

The Property is located near Rubidoux, CA. The legal designation of the Property is APN 175-080-010; 175-090-001, 002, 003, 004, 005; 175-100-003, 005, 006; 175-150-001, 002; 175-160-001, 005, 007; 177-030-012, 014; 177-040-002, 008. The latitude and longitude of the Property is approximately north 34.0203 degrees and west 117.4071 degrees.

3.2 Site and Vicinity Characteristics

The Property consists of thirteen (13) assessor's parcels totaling approximately 822 acres. These parcels form one (1) roughly rectangular shaped plot of land, located within Tentative Tract Map Numbers 35418, 35419, & 35421 in Unincorporated Riverside County, California. The Site is near Rubidoux, CA. The Site consists of undeveloped vacant land. The Property is located in a rural/suburban area characterized by undeveloped land mixed with housing sub divisions.

3.3 Current Use of the Property

The Property is undeveloped vacant land.

3.4 Description of Property Improvements

The subject Property consists on undeveloped land with rolling hills in the central portion of the site, rugged hills in the southern portion, and some steep slopes in the northern area.

3.5 Utilities/Source of Heating

According to information provided by the real estate broker, no utility providers currently service the subject Property. No heating systems were present at the property.

3.6 Current Uses of the Adjoining Properties

The following describes adjacent and abutting properties:

DIRECTION	DESCRIPTION
Northeast	City of Rialto – some housing sub divisions and commercial development
North/northwest	Steeply sloped hills immediately north of Site. City of Bloomington further north, with housing sub divisions. City of Fontana to the northwest – mostly vacant land
East	Rubidoux Blvd. – housing sub divisions
South	Interstate 60 and housing sub divisions
West	Armstrong Blvd. – housing sub divisions

No visual evidence of any impacts from the adjoining properties was observed.

3.7 Surrounding Area

The vicinity of the Property in Unincorporated Riverside County, California near Rubidoux, California is characterized by a mix of housing sub divisions, some commercial/retail buildings, and some open, undeveloped land.

3.8 Physical Setting

3.8.1 Topography

Based on a review of the United States Geological Survey (USGS) 7.5-Minute Series Topographic Map, Fontana, CA Quadrangle (1980), the elevation of the property ranges from approximately 900 feet at the southern corner to 1739 feet in the central area of the property. Terrain is moderate to steeply sloping in variable directions depending on the location. Copies of the topographic maps are included in Appendix C.

3.8.2 Soils

Based on the United States Department of Agriculture - Soil Conservation Service data, soils at the Property are classified as consisting mainly of Cieneba Series sandy loam up to 50 to 800 feet of the surface. The depth to bedrock ranges from several dozens to hundreds of feet thick.

3.8.3 Geology

According to the EDR Geo-Check report, the bedrock geologic formation in the area within the vicinity of the Property is identified to be Stratified Sequence of the Cenozoic Era.

3.8.4 Hydrology

The central area of the property is a topography high point. Based on the drainage/topography, groundwater is estimated to flow in varying direction depending on the location, but in general, following down sloping surface gradients. Groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, and underground structures or dewatering operations.

According to the EDR Radius Map Report, there are no NWI mapped wetland areas located at the Property. Based on the urban setting of the Property, wetlands are not suspected to be present.

According to the EDR Radius Map Report, the Property is located outside of the 100 and 500 year flood zones.

4.0 USER PROVIDED INFORMATION

4.1 Title Records/Environmental Liens/Activity and Use Limitations

Review of title records is not included in the scope of work for this assessment project. No information regarding environmental liens or activity and use limitations was provided to Hillmann by the Client.

4.2 Specialized Knowledge or Experience

No indication of any specialized knowledge or experience regarding the Property was reported to Hillmann by the Client.

4.3 Commonly Known or Reasonably Ascertainable Information

No commonly known or specialized knowledge of the Property was reported to Hillmann by the Client.

4.4 Property Value Reduction due to Environmental Conditions

No information was provided by the Client to Hillmann regarding a reduction of the Property value due to environmental problems or conditions.

4.5 Reason for Performing Phase I ESA

It is Hillmann's understanding that the Phase I ESA was being performed in conjunction with a pending real estate or bank financing transaction involving the Property.

5.0 HISTORICAL USE RESEARCH

5.1 Sanborn Fire Insurance Maps

Fire insurance maps were created for insurance underwriters and often contain information regarding the uses of individual structures, and the locations of fuel and/or chemical storage tanks that may have been on a particular property. These maps were generally prepared for urban areas beginning in the middle to late 1880s and continuing generally into the 2000s.

A search of Sanborn Fire Insurance Maps for the Property and surrounding area was conducted by Environmental Data Resources, Inc. (EDR) of Milford, Connecticut. EDR provided a letter stating that no maps of the Property were found.

5.2 Historic City Directories

A search of City Directories for the Property and surrounding area was conducted by EDR. The City Directory Abstract report provided data from directories dated 1921 through 2002 in approximately six to twelve year intervals. No pertinent details were obtained from review of the city directories listings for the target Property or for adjoining properties.

5.3 Historical Topographic Map Review

A search of historical topographic maps for the Property was conducted by EDR. Topographic maps of the Property and vicinity for the years 1901, 1942, 1943, 1954, 1967, 1967, 1973, 1975 and 1980 were provided for review. The following pertinent details were obtained from review of the topographic maps:

YEAR(S)	DESCRIPTION	
1901	**Property**	No obvious improvements or development are identified.
	Adjacent Properties	No obvious improvements or development are identified.
1942, 1943	**Property**	No obvious improvements or development are identified.
	Adjacent Properties	The adjacent properties are depicted with roads and a few structures on them. A quarry is depicted to the southwest of the Property.
1954	**Property**	No obvious improvements or development are identified
	Adjacent Properties	The adjacent properties are shaded to denote general suburban /urban development. A quarry is depicted to the southwest of the Property.
1967, 1967, 1973, 1975, 1980	**Property**	No obvious improvements or development are identified
	Adjacent Properties	Surrounding areas show suburban/urban development northwest, northeast, south, and west of the subject Property. Quarries are depicted to the southwest and industrial waste ponds are depicted to the east of the Property.

5.4 Aerial Photograph Review

A search of Aerial Photographs for the Property and surrounding area was conducted by EDR. EDR provided an Aerial Photography report of several historic photographs of the Property

area from the years 1931, 1938, 1948, 1953, 1967, 1977, 1990, 1994 and 2005. The following pertinent details were obtained from review of the report:

YEAR(S)	DESCRIPTION	
1931, 1938, 1948, 1952, 1967, 1977	**Property**	The Property appears to be undeveloped land.
	Adjacent Properties	Adjacent properties appear to be developed with agricultural land and residential properties or undeveloped land. A quarry is visible to the southwest of the Property.
1990,	**Property**	The Property appears to be undeveloped land.
	Adjacent Properties	Adjacent properties to the east appear to be developed with agricultural land and residential properties or undeveloped land. Adjacent properties to the north, south, and west are not visible.
1994, 2005	**Property**	The Property appears to be developed with the current office building.
	Adjacent Properties	Adjacent properties to the east appear to be undeveloped land and a industrial facility. Adjacent properties to the north, south, and west are not visible.

5.5 Prior Investigation Reports

The following prior investigation reports for the Property were reviewed:

Phase I Environmental Assessment APN's: # 175-080-010; 175-090-001, 002, 003, 004, 005; 175-100-003, 005, 006; 175-150-001, 002; 175-060-001, 005, 007; 177-030-012, 014; 177-040-002, 008, prepared by Community Development Associates, dated June 20, 2005. The report concluded the following:

- "Based upon a site inspection, interviews, and review of available agency records and a database search and follow-up with appropriate agency personnel, Community Development Associates found no indication of an environmental impairment resulting from past or present uses of the subject property. There were no recognized environmental conditions on or adjacent to the subject property."

- No further investigation was recommended.

According to a waste manifest dated February 2, 2012, photos and other documentation Double Barrel Environmental Services removed approximately 6,000 pounds of "Oily Debris and Soil" from the coordinates Lat: 34° 01' 39"N, Long: 117° 24' 18"W on the Property. It appears from the photographs that all waste and stained soil was removed from the Property.

5.6 Interviews

Hillmann interviewed Mr. Mike Byers, broker, over the phone. Mr. Byers is the agent handling the real estate transaction. He stated that he is unaware of any potential environmental issues associated with the site. To date Mr. Byers has not returned an environmental questionnaire that was provided to him from Hillmann.

5.7 Summary and Conclusion of Historic Use Research

The Property consists of undeveloped land. No evidence of any prior development has been identified.

5.8 Data Gaps

Historic land use data prior to 1901 was not readily available at the time of the assessment. However, the Property appears to always have consisted of undeveloped land. Therefore, it is Hillmann's opinion that no significant data gaps were encountered during the historical records review portion of the assessment.

6.0 SITE RECONNAISSANCE/INTERVIEWS

6.1 Interviews

Hillmann was unaccompanied by during the site reconnaissance. Any pertinent information obtained is referenced in the appropriate sections of this report.

6.2 Property Use

The Property is occupied by approximately 822 acres of undeveloped land.

6.3 Hazardous Substance/Petroleum Products Storage/Handling

No storage of hazardous substances or petroleum products was identified on the Property. No evidence of any spills or releases was observed during the site reconnaissance.

6.4 Waste Generation, Storage and Disposal

No evidence of improper or illegal waste disposal was observed visually during the site reconnaissance. No evidence of hazardous waste generation or disposal was identified at the Property.

6.5 Waste Discharges

No residential, industrial or process waste discharges were identified at the Property.

6.6 Underground/Above Ground Storage Tanks

No evidence of any active or inactive underground ground storage tanks (USTs) was noted at the Property. The Property was not listed on the LUST regulatory databases.

6.7 Polychlorinated Biphenyls (PCBs)

No evidence of any Polychlorinated Biphenyls (PCB's) was identified at the Property.

6.8 Drains/Sumps

No drains or sumps were noted at the Property.

6.9 Exterior Pits/Ponds/Lagoons

No evidence of exterior pits, ponds or lagoons was identified on the Property in connection with waste treatment or disposal.

6.10 Stained Soil, Pavement/Stressed Vegetation

No evidence of stained soils or stressed vegetation was identified on the Property.

6.11 Drinking Water/Wells/Septic Systems

No evidence of a domestic water supply system wells or septic systems were identified at the Property.

7.0 NON-ASTM SCOPE CONCERNS

7.1 Asbestos-Containing Material (ACM)

The Property consists of undeveloped land; therefore, asbestos-containing materials are not likely to be prevalent at the Property. ACM does not appear to be a significant environmental concern.

7.2 Lead-Based Paint

The Property consists of undeveloped land; therefore, Lead Based Paint (LBP) and/or lead containing materials are not likely to be prevalent at the Property. LBP does not appear to be a significant environmental concern.

7.3 Radon

Radon is a naturally occurring, colorless, odorless gas that is a byproduct of the decay of radioactive materials potentially present in bedrock and soil. Radon gas may enter the lowest level of a building through floor cracks, structural joints or plumbing conduits. The United States Environmental Protection Agency (USEPA) guidance level for annual residential exposure to radon is 4.0 picocuries per liter of air (pCi/L). The guidance level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

Based on information obtained from data obtained by the USEPA, the Property is located in an area with a moderate potential for radon concentrations that exceed current USEPA action guidelines. The County of Riverside is classified as a Zone 2 or 'moderate risk' area for radon. Considering the moderate risk and non-residential use of the Property, radon is not considered a significant concern.

7.4 Mold

The Property consists of undeveloped land; therefore, mold and/or microbial growth does not appear to be a significant environmental concern.

8.0 REGULATORY RECORD REVIEWS

A search of environmental regulatory databases, by service from Environmental Data Resources of Milford, CT, was conducted in accordance with the requirements of the ASTM. Hillmann also reviewed the "unmappable" listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that cannot be plotted with confidence, but are identified as being located within the general area of the Property based on the partial street address, city name or zip code. In general, a listing cannot be mapped due to inaccurate or incomplete address information in the database that was supplied by the corresponding regulatory agency. Any listings from the unmappable summary that were identified by Hillmann as a result of the area reconnaissance and/or cross-referencing to mapped listings are included in the corresponding database discussion within this section.

REGULATORY DATABASE	SEARCH DISTANCE	ON-SITE LISTINGS	ADJ. PROPERTY LISTINGS	TOTAL WITHIN SEARCH DISTANCE
Fed. NPL	2-mile	0	0	0
Fed. Delisted NPL	2-mile	0	0	0

Spills	Site	0		

- *The results of the review for each database are discussed below. The locations for the facilities discussed in this section are shown on the figures in the EDR report, included as Appendix E.*

- *According to the EPA Policy Toward Owners of Property Containing Contaminated Aquifers, dated July 3, 1995, the EPA will not take enforcement action against a property owner who owns property under which is an aquifer contaminated by subsurface migration from an off-site source or sources. Therefore, the Subject Property owner would not be liable for any contamination of the underlying aquifer that was attributed to an off-site source.*

8.1 On-Site Database Listings

The Property was not identified on the databases searched.

8.2 Adjoining Property Database Listings

Two (2) adjoining property listings were identified on the regulatory databases searched:

- ECCO Equipment at 2195 Van Dell Road was listed on the HAZNET, RCRA-SQG, FINDS databases. This site adjoins the Property to the east and appears to be down-gradient based on area topography. The HAZNET listing indicates the various amounts of hazardous materials that it disposed of over various years. The RCRA-SQG listing indicates the site generates more than 100 and less than 1000 kg of hazardous waste in any calendar month and less than 6000 kg of waste per year. Considering no violations reported and topographical relation to the Property, this site is not considered to be a REC in connection with the Property.

- BFI Constructors at 2145 Van Dell Road was listed on the HAZNET database. This site adjoins the Property to the east and appears to be down-gradient based on area topography. The HAZNET listing indicates the various amounts of hazardous materials that it disposed of over various years. Considering no violations reported and topographical relation to the Property, this site is not considered to be a REC in connection with the Property.

8.3 Federal Agency Record Review

EPA - The National Priorities List (NPL), also known as the Superfund list, is the United States Environmental Protection Agency (EPA) listing of uncontrolled or abandoned hazardous waste sites. These sites are targeted for possible long-term remedial action under the Superfund Act of 1980. The list is primarily based on the EPA's Hazardous Ranking System.

♦ No NPL listings were identified within a 2-mile radius of the Property.

EPA – Delisted NPL Site List (DNPL) provides a list of sites formerly listed on the NPL that have since been "de-listed" after the EPA has determined that no further response is appropriate.

♦ No DNPL listings were identified within a 2-mile radius of the Property.

EPA - The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) is the EPA database of known or suspected uncontrolled or abandoned hazardous waste sites. These sites have either been investigated, or are currently under investigation by the EPA for the release or threatened release of hazardous substances.

♦ One (1) CERCLIS listing was identified within a 1 ½ mile radius of the subject property. The site is listed as Riverside Cement Company, Crestmore, located at 1500 Rubidoux Blvd. approximately 2,500 feet to the east and down gradient from the Property based on

area topography. This listing states that the site is either on, or is proposed to be on, the National Priorities List (NPL) for screening and assessment for possible inclusion on the NPL. Based on the distance and the topographical relation to the Property, this site is not considered to be a recognized environmental condition in connection with the Property.

EPA – CERCLIS-NFRAP (No Further Remedial Action Planned) is the EPA database of archived sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that the EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

- No CERCLIS-NFRAP listings were identified within a 1 ½ mile radius of the Property.

EPA - The Resource Conservation and Recovery Information System (RCRIS) is a database of facilities, which generate or treat, store or dispose of EPA regulated hazardous waste, or meet other applicable requirements of the Resource Conservation and Recovery Act (RCRA). Inclusion on this database does not imply that mishandling or a release of hazardous waste has occurred at the facility. RCRIS categories are as follows:

Corrective Action (CORRACTS) list is a list of hazardous waste treatment, storage or disposal facilities and other RCRIS facilities (due to past interim status or storage of hazardous waste beyond 90 days) that have been notified by the US EPA to undertake corrective action under RCRA.

- No CORRACTS listings were identified within the 2 mile search radius of the Property.

Treatment, Storage, and Disposal Facilities (TSD). Facilities listed under TSD are sites that treat, store, and/or dispose of EPA regulated hazardous waste.

- No TSD listings were identified within a 1 ½-mile radius of the Property.

Large Quantity Generators (LQG). Facilities listed under LQG either generate more than 1000 Kilograms (kg) of EPA regulated hazardous waste per month, or meet other applicable requirements of RCRA.

- No adjoining properties were identified on the LQG database.

Small Quantity Generators (SQG). Facilities listed under SQG either generate from 100 kilograms (kg) to 1000 kg of EPA regulated hazardous waste per month, or meet other applicable requirements of RCRA.

- One (1) adjoining property was identified on the SQG database and discussed above in section 8.2

EPA - The Emergency Response Notification System (ERNS) is a national database used to store information concerning the sudden and/or accidental release of hazardous substances, including petroleum in quantities greater than the reportable quantity, as maintained at the National Response Center. The database contains preliminary information from spill reports made to various federal departments including the EPA.

- No listings were identified for the Property.

8.4 State Agency Record Review

State Hazardous Waste Sites (SHWS) database contains potential or confirmed hazardous substance release properties.

State Response Sites (RESPONSE) identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

- One (1) RESPONSE listing was identified within a ½ to 1 mile radius of the subject Property. The closest site was listed as Certainteed Corporation, located at 2100 Avalon St., 1,300 feet east and down-gradient of the subject Property. This listing states that the site received a completed notice in 1984. Considering the distance and status this site is not considered to be a recognized environmental condition in connection with the Property.

EnviroStor Database (ENVIROSTOR) identifies sites that have known contamination or sites for which there may be reasons to investigate further.

- Five (5) ENVIROSTOR listings were identified within a ½ to 2 mile radius of the subject property. The sites include the following: (1) Certainteed Corporation, located at 2100 Avalon St., 1,300 feet east of the subject Property (2) Brine Fac and Stp, located at 1500 Rubidoux Blvd, 2,500 feet east/northeast of the subject Property, (3) Valley Trails Elementary School, located at corner of Armstrong Road and Locust Street, 750 feet north of the subject Property, (4) Proposed K-8, #1, located at 2950 Wallace Street, 4,888 feet southeast of the subject Property, and (5) Sierra Aluminum Company, located at 2345 Fleetwood Drive, 5,900 feet east/southeast of the subject Property. Based on the distance and the topographical relation to the Property, these sites are not considered to be a recognized environmental condition in connection with the Property.

Solid Waste Facility/Landfill (SWF/LF) list provides information on the location of registered state landfills and associated transfer facilities.

- Four (4) SWF/LF listings were identified within a 1/4 to 2 mile radius of the subject property. These sites are listed as (1) R.A. Nelson MRF/TS Pilot Food, located at 1830 Agua Mansa road, 5, 400 feet east of the subject Property, (2) Robert A Nelson Transfer Station, located at 1830 Agua Mansa Road 5,400 feet east of the subject Property, (3) West Riverside Sanitary landfill, located north of Highway 60 1,300 feet southeast of the subject Property, and (4) Belltown, located north of Highway 60 on Hall 3,871 feet southeast of the subject Property. These listings state that the sites are active as solid waste facilities.

Considering the distance and the topographical relation to the Property, these sites are not considered to be recognized environmental conditions in connection with the Property.

Leaking Underground Storage Tank's (LUST) is a comprehensive listing of all reported active and inactive leaking storage tank sites.

- Twenty-seven (27) LUST listings were identified within a ½-2 mile radius of the Property. The closest site was listed as Sierra Pacific Electric located at 2542 in Riverside, approximately2,400 feet east/southeast of the subject Property. The status was reported as completed: case closed. Considering the distance, status and the topographical relation to the Property, this site, and the others listed, are not considered to be recognized environmental conditions in connection with the Property.

Registered Storage Tank Database is the listing of registered storage tank sites. This includes the UST database.

- The Property or adjacent properties were not identified on the UST databases.

Engineering Controls Site Listing (ENG Controls) list provides information on the location of remediation sites using engineering controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

- No ENG Controls listing were identified within a 1 ½ mile radius of the subject Property.

Institutional Controls Site Listing (INST Controls) list provides information on the location of remediation sites using institutional controls as part of the response action. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions and post remediation care requirements intended to prevent exposure to contaminants remaining on-site. Deed restrictions are generally required as part of the institutional controls.

- No INST Controls listings were identified within a 1 ½-mile radius of the Property.

Voluntary Cleanup Program (VCP) and **Independent Cleanup Report (ICR)** lists provide information on the location of sites involved in a Voluntary Cleanup or similar program. Under a Voluntary Cleanup Program, a property owner will voluntarily enter into an agreement with a state or local environmental regulatory agency to conduct an investigation and remediation for specific area(s) of concern.

- No VCP or ICR sites were identified within a 1 ½ mile radius of the Property.

Brownfields (BF) list provides information on the location of sites involved in a state or local Brownfields program.

- No Brownfield listings were identified within a 1 ½-mile radius of the Property.

Review of the remaining sites identified within the ASTM search parameters did not identify any site that is considered to be a REC in connection with the Property.

8.5 Local Government Agencies

Building Permits

The subject Property consists of undeveloped vacant land, therefore, no building permits have been issued for these parcels of land.

County of Riverside

Tax Assessor's Office

Property information was researched at the Riverside County Tax Assessor's Office in Riverside, California during the site assessment. The current Assessor's Parcel Numbers (APN's) for the Property are APN 175-080-010; 175-090-001, 002, 003, 004, 005; 175-060-001, 005, 007; 177-030-012, 014; 177-040-002, 008. A copy of the parcel map is contained in Appendix D.

County of Riverside Department of Environmental Health

Hillmann contacted the County of Riverside Department of Environmental Health, in order to determine if any records were on file for the Property's APN numbers. On March 8, 2012 Hillmann received a phone call from Suzanne. Suzanne stated that they were unable to complete our request as they would need an address for the site. A photocopy of the public records request to the Riverside County Department of Environmental Health is located in Appendix D.

County of Riverside Fire Department

Hillmann contacted the County of Riverside Fire Department in order to determine if any records of underground storage tanks (USTs) or hazardous wastes/materials were on file for the property. No records indicating any spills or releases were identified. To date, Hillmann has not received any response from the Riverside County Fire Department A photocopy of the public records request to the County of Riverside Fire Department is located in Appendix D.

State of California

South Coast Air Quality Management District (SCAQMD)

Hillmann contacted the South Coast Air Quality management District (SCAQMD) in order to determine if there are any records of applications, permits to operate, equipment list reports, notices of violations, notices to comply, complaints, site inspection reports, emissions summaries, source test reports, air monitoring data, asbestos notifications, facility potential to

emit, facility positive balance or toxic health risk assessments were on file for the Property's APN numbers. To date, Hillmann has not received any response from the South Coast Air Quality Management District (SCAQMD).

Department of Toxic Substances Control – Cypress Office

Hillmann contacted the State of California Department of Toxic Substances Control (DTSC) in order to determine if any records were on file for the property's APN numbers. To date, Hillmann has not received any response from the DTSC.

Regional Water Quality Control Board – (Region 4)

Hillmann contacted the State of California Regional Water Quality Control Board (RWQCB) via telephone in order to determine if any records of underground storage tanks (USTs) or groundwater contamination were on file for the Property's APN numbers. To date, Hillmann has not received any response from the RWQCB.

9.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the subject Property. Hillmann has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through 2002. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

Dear Mrs. Reese:

The Department of Toxic Substances Control has received your fax to review records under the Public Records Act.

After a thorough review of our files we have found that **no such records** exist at this office pertaining to the sites/facility referenced above.

If you have any questions, or would like further information regarding your request, please contact our Regional Records Coordinator at (714) 484-5336.

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: http://www.envirostor.dtsc.ca.gov/public. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

1.0 Summary

Community Development Associates was commissioned by the real property owner/developer, American Pacific Homes, to undertake a Phase I environmental assessment of approximately 909.4 acres, assembled, including 19 assessor's parcels in northwestern Rubidoux, unincorporated Riverside County. The purpose of the assessment was to evaluate the property's potential for the presence of hazardous materials, and/or possible soil or groundwater contamination related to the possible past use, storage, disposal or handling of hazardous materials on or around the site.

The evaluation was based on the results of a site reconnaissance, review of vicinity environmental reports, review of Comprehensive Environmental Response, Compensation & Liability Information System Database, interviews with appropriate agency personnel, review of agency records, interviews with knowledgeable business personnel, and analysis of land use maps and photographs.

The subject properties include 19 assessor's parcels totaling approximately 909.4 acres. The properties extend over one and one-half miles south to north from Just north of Freeway 60 to the San Bernardino County line. The parcels are part of a specific plan under the jurisdiction of Riverside County. The Rio Vista Specific Plan provides for a total of 1743 residential units allocated among various categories of density, ranging from Medium Density Residential (MDR) to Very High Density Residential (VHDR). The sites designated for development , which include a school site and parkland, are in the north and west portion. More than one-half of the site, including the large mountain on the southern portion of the property will remain vacant.

All of the parcels are vacant and undeveloped. None of the properties are currently developed for any uses and none have been previously developed or utilized for any known of uses, including agriculture. There are no improvements on any of the parcels, and as far as is known, the subject properties have not been previously assessed for environmental impairment.

All of the properties are open and accessible. Aerial photographs show (mostly) motorcycle trails on north and west areas of the site. To the west of the southern portion of the site was a marble and stone quarry dating back several decades. South and south east and northeast of the property are residential neighborhoods dating from the 1950's and earlier. The large residential neighborhood adjacent to the west boundary of the subject property began developing in the 1970's. Prior to these uses, the properties were undeveloped.

Important area features include freeway 60 and the Santa Ana River. The subject property and surrounding area has been a target for dumping of household waste, and occasionally some construction type wastes. No commercial or potentially hazardous wastes were observed dumped in this area.

All federal and state databases were searched for evidence of environmental impairment on or near the subject property. This included U.S. EPA National Priority List, Proposed National Priority List Sites, CERCLIS sites, CERC-NFRAP sites, CORRACTS sites, RCRIS-TSD, RCRIS-LQG and RCRIS-SQG sites and ERNS sites. State data bases included TOXIC PITS, WMUDS/SWAT sites, CA BOND EXP PLAN sites, UST sites, CA FID UST and HIST UST sites. Additionally, several Federal ASTM Supplemental databases and several State and Local ASTM Supplemental Data bases were searched. A complete listing can be viewed in Appendix C to this report.

All federal and state databases were searched at the appropriate 1/8 mile, ¼ mile, ½ mile, 1-mile, and 2-mile distances. The target properties were not listed on any of the databases searched.

Additional search results attempted to identify listed sites within the approximate two-mile radius of the target property. No sites of any kind were identified as being within the one-half mile radius of the subject property. However, dozens of sites were identified within the one-half mile to one-mile radius and within the one to two mile radius. Within the one-half mile to one-mile of the subject property no sites were identified at a higher elevation than the subject property.

Within the Federal ASTM Standard Search at the ½ mile to two-mile radius were the following: One (1) CERCLIS (Comprehensive Environmental Response, Comprehensive and Liability Information System) site (Riverside Cement); thirty-seven (37) RCRAInfo (EPA's comprehensive information system providing information supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments of 1984sites; and ten (10 ERNS (Emergency Response Notification System) site, four (4) RCRIS (Resource Conservation and Recovery Information System) sites were identified.

Within the State ASTM Standard search at the one-half (1/2) mile to two-mile radius: one (1) CAL-SITE (California Department of Toxic Substances Control database of known and potential hazardous substance sites); thirty-one (31) CHMRS (California Hazardous Material Incident Report System) sites; twenty-four (24) CORTESE sites (Impacted drinking wells); five (5) NOTIFY 65 (records about releases that could impact drinking water) sites; five (5) SWF/LF (Solid Waste Facilities/Landfill Sites) sites; four (4) WMUDS/SWAT (Waste Management Unit Database System for water Resources Control Board tracking of waste management units) sites; forty-five (45) LUST (Leaking Underground Storage Tank) sites; twenty-seven (27) UST (Underground Storage Tanks) sites; nineteen (19) CA FID (Facility Inventory Base of Underground Storage Tanks) sites; and twenty-five (25) HIST UST (Historical Underground Tanks).

Within the Federal ASTM Supplemental search: forty-five (45) FINDS (Facility Index System contains both facility information and "pointers" to other sources of information that contains more detail) sites; four (4) HNMIRS (Hazardous Material Incident Report System contains hazardous material spill incidents report to the D.O.T) sites; five (5)

TRIS (Toxic Chemical Release Inventory System) sites; two (2) SSTS (Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act requires all registered pesticide-producing establishments to report to the EPA) sites; and three (3) FTTS (tracks administrative cases and pesticide enforcement actions and compliance activities) sites.

Within the State and Local ASTM Supplemental search at the twp-mile radius, one (1) AST (Above Ground Storage Tanks) site; four (4) DRYCLEANERS sites; eighteen (18) WDS (California Water Resources Control Board-Waste Discharge System) sites; twenty-eight (28) Emissions Inventory Data (Toxics and criteria pollutant emissions data) sites; one (1) REF (referred from DTSC) site; two (2) CA SLIC (from California Regional Water Quality Control Board); one-hundred and eighty-nine (189) HAZNET (data extracted from waste hauler manifests) sites; and nine (9) DEHS Permit System (San Bernardino County Fire Department Hazardous Materials System) sites were identified.

Additionally, 38 "Orphan" or unmapped sites were listed in the databases. Electrical substations and transmission lines (unless damaged or impaired) are not identified on environmental databases.

Within the mapped sites, several of these sites are identified under multiple listings. As stated previously, no sites lie within a one-half (1/2) mile radius of the subject property. The majority of listed sites lie within a one-mile to two-mile radius of the subject property and none would appear to be a source of environmental impairment for the subject property.

Conclusions

There is no documentation of any uses on the subject property or on any immediately adjacent properties that would represent a source of potential environmental impairment for the subject property. The subject property has never had any known uses or improvements. There are no significant adjacent historical uses, other than quarrying. The property is located in an area has largely been rural residential and has been developing for more intensive residential uses. Riverside County Code Enforcement has records for Assessor's Parcel Number 175-100-003 showing cases of illegal dumping and vehicle abatement. However, these were for instances of household junk and vehicles and do not represent a condition of environmental impairment.

Based upon a site inspection, interviews and review of available agency records and a database search and follow-up with appropriate agency personnel, Community Development Associates found no indication of any environmental impairment resulting from past or present uses of the subject property. There is also no indication of any potential liabilities resulting from activities adjacent or "upstream properties".

Communications and follow-up interviews with State Regional Water Quality Control Board, the County Department of Environmental Health and the County Code Enforcement found no evidence of present environmental impairment, liability, or violation on or adjacent

to the subject property. There were no recognized environmental conditions on or adjacent to the subject property. There is no recommendation for further environmental assessment or evaluation.

Community Development Associates has found no evidence of potential liabilities and environmental impairment resulting from leaking underground storage tanks, release of hazardous materials and/or toxic contaminants on any properties within the immediate vicinity. Community Development Associates does not consider further environmental study of the subject property necessary.

2.0 Introduction

2.1 Purpose

Community Development Associates was commissioned by the real property owner/developer, American Pacific Homes, to undertake a Phase I environmental assessment of approximately 909.4 acres, assembled, including 19 assessor's parcels in northwestern Rubidoux, unincorporated Riverside County. The purpose of the assessment was to evaluate the property's potential for the presence of hazardous materials, and/or possible soil or groundwater contamination related to the possible past use, storage, disposal or handling of hazardous materials on or around the site.

The scope of Phase I assessment work performed in accordance with American Society for Testing and Materials (ASTM) Standard E-1527-00, *Standard Practice for Environmental Site Assessments*, has consisted of a site reconnaissance, review of vicinity environmental reports, review of Comprehensive Environmental Response, Compensation & Liability Information System Database, review of agency records, interviews with knowledgeable business personnel, and analysis of land use maps and photographs.

2.2 Special Terms and Conditions

There were no special terms or conditions identified for this assessment, other than as described in the following sections.

2.3 Limitations and Exceptions of Assessment

This environmental assessment did not sample for the presence of agricultural chemicals or pesticides, including historical instances of banned chemicals such as DDT and Toxaphene. The potential for any agricultural chemicals is discussed in the body of this report, and cannot be ascertained for complete certainty without soil sampling and testing. No soil sampling of any kind was undertaken as part of this Phase I environmental assessment. Additionally, no inspection, sampling or testing for Asbestos, lead or radon was performed. Any unknown or unreported materials buried on the subject property are beyond the scope of this study. Any instances of toxic or illegal activities, including application, distribution, transfer, storage, and disposal of any hazardous or petroleum materials known of by current and past owners and/or users of the subject property, but not disclosed or reported are beyond the scope of this study.

2.4 Limiting Conditions and Methodology Used

This environmental assessment is limited to conditions that are known of, reported, or observable, however, all reasonable methods of site reconnaissance, background and database analysis, records research and interviewing have been employed.

3.0 Site Description

3.1 Location and Legal Description

The subject property includes 19 separate assessor's parcels totaling approximately 909.4 acres. The parcels are located in the northwest area of Rubidoux, California and extend a over one and one-half miles just north of Freeway 60 to the San Bernardino County line. The subject parcels also lie between Rubidoux Boulevard on the east and Armstrong Road on the west.

The subject property can further be identified as:

Riverside County Assessor's Parcel No's:

175-080-010; 175-090-001, 002, 003, 004, 005;
175-100-003, 005, 006; 175-150-001, 002; 175-160-001, 005, 007;
177-030-012, 014; 177-040-002, 008;

3.2 Site and Vicinity Characteristics

The subject property lies within the mixed developed and undeveloped area of northwest Rubidoux in unincorporated Riverside County. The subject properties include a large mountain and associated flats in the center of a single-family residential, rural residential and mining extraction area that straddles the Riverside County and San Bernardino County line. The subject property of assembled 909.4 acres includes 19 separate assessors parcels, none of which have ever been developed for any known of uses. The property lies just north of Freeway 60 and a 45-50 year old residential subdivision. West of the subject site are residential streets dating from the 1950's and 60's, construction related activities and open space. The nearby residential neighborhood adjacent on the west was largely developed beginning in the 1970's.

The subject property though in the center of the Inland Empire is fairly removed from major development areas and is generally left alone, particularly the southern mountain area. Important area features include Freeway 60 and the Santa Ana River. The subject property and surrounding area has been a target for some minor dumping of household waste, and occasionally some construction type wastes. No commercial or potentially hazardous wastes were observed dumped in this area.

Surface and groundwater generally drain to the southeast. The water table is within 200 to 800 feet of the surface. Soils consist mainly of Cieneba Series sandy loam up to 50 percent slopes. The depth to bedrock ranges from several dozens to hundreds of feet. The property lies in the central area of the Inland Empire. The Valley is seismically active. The San Andreas Fault is active and lies approximately twenty miles to the north of the property.

The community of Rubidoux and surrounding area is devoted to rural residential and residential development, service commercial, aggregate mining and transportation.

3.3 Description of Improvements

There are no improvements of any kind on the subject parcels.

3.4 User Information

No user information was available or pertinent to the subject parcels. Any other information did not lead to any conclusions of environmental impairment.

3.5 Current Uses of the Property

All parcels are vacant and undeveloped for any uses.

3.6 Past Uses of the Property

No information has been uncovered that there has ever been any previous uses on the subject property.

3.7 Current and Past Uses of Adjoining Properties

The subject property is surrounded by residential, rural residential, and vacant parcels. The subject property lies adjacent to the San Bernardino County line. North of the County line are vacant and developing residential parcels. To the northeast is an older residential neighborhood. To the south is an older residential neighborhood and Freeway 60. To the east is rural residential and vacant land. Adjacent west of the subject is the largest residential neighborhood, dating from the 1970's. There are no known of uses on any of the adjoining properties other than residential and quarrying. In all cases, these are the original uses for the parcels.

4.0 Records Review

4.1 Standard Environmental Records, Federal and State

All federal and state databases were searched for evidence of environmental impairment on or near the subject property. This included U.S. EPA National Priority List, Proposed National Priority List Sites, CERCLIS sites, CERC-NFRAP sites, CORRACTS sites, RCRIS-TSD, RCRIS-LQG and RCRIS-SQG sites and ERNS sites. State databases included TOXIC PITS, WMUDS/SWAT sites, CA BOND EXP PLAN sites, UST sites, CA FID UST and HIST UST sites. Additionally, several Federal ASTM Supplemental databases and several State and Local ASTM Supplemental Data bases were searched. A complete listing can be viewed in Appendix C to this report.

All federal and state databases were searched at the appropriate 1/8 mile, ¼ mile, ½ mile, 1-mile, and 2-mile distances. The target properties were not listed on any of the databases searched.

Additional search results attempted to identify listed sites within the approximate two-mile radius of the target property. No sites of any kind were identified as being within the one-half mile radius of the subject property. However, dozens of sites were identified within the one-half mile to one-mile radius and within the one to two mile radius. Within the one-half mile to one-mile of the subject property no sites were identified at a higher elevation than the subject property.

Within the Federal ASTM Standard Search at the ½ mile to two-mile radius were the following: One (1) CERCLIS (Comprehensive Environmental Response, Comprehensive and Liability Information System) site (Riverside Cement); thirty-seven (37) RCRAInfo (EPA's comprehensive information system providing information supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments of 1984sites; and ten (10 ERNS (Emergency Response Notification System) site, four (4) RCRIS (Resource Conservation and Recovery Information System) sites were identified.

Within the State ASTM Standard search at the one-half (1/2) mile to two-mile radius: one (1) CAL-SITE (California Department of Toxic Substances Control database of known and potential hazardous substance sites); thirty-one (31) CHMRS (California Hazardous Material Incident Report System) sites; twenty-four (24) CORTESE sites (Impacted drinking wells); five (5) NOTIFY 65 (records about releases that could impact drinking water) sites; five (5) SWF/LF (Solid Waste Facilities/Landfill Sites) sites; four (4) WMUDS/SWAT (Waste Management Unit Database System for water Resources Control Board tracking of waste management units) sites; forty-five (45) LUST (Leaking Underground Storage Tank) sites; twenty-seven (27) UST (Underground Storage Tanks) sites; nineteen (19) CA FID (Facility Inventory Base of Underground Storage Tanks) sites; and twenty-five (25) HIST UST (Historical Underground Tanks).

Within the Federal ASTM Supplemental search: forty-five (45) FINDS (Facility Index System contains both facility information and "pointers" to other sources of information that contains more detail) sites; four (4) HNMIRS (Hazardous Material Incident Report System contains hazardous material spill incidents report to the D.O.T) sites; five (5) TRIS (Toxic Chemical Release Inventory System) sites; two (2) SSTS (Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act requires all registered pesticide-producing establishments to report to the EPA) sites; and three (3) FTTS (tracks administrative cases and pesticide enforcement actions and compliance activities) sites.

Within the State and Local ASTM Supplemental search at the twp-mile radius, one (1) AST (Above Ground Storage Tanks) site; four (4) DRYCLEANERS sites; eighteen (18) WDS (California Water Resources Control Board-Waste Discharge System) sites; twenty-eight (28) Emissions Inventory Data (Toxics and criteria pollutant emissions data) sites;

one (1) REF (referred from DTSC) site; two (2) CA SLIC (from California Regional Water Quality Control Board); one-hundred and eighty-nine (189) HAZNET (data extracted from waste hauler manifests) sites; and nine (9) DEHS Permit System (San Bernardino County Fire Department Hazardous Materials System) sites were identified. Additionally, 38 "Orphan" or unmapped sites were listed in the databases. Electrical substations and transmission lines (unless damaged or impaired) are not identified on environmental databases.

Within the mapped sites, several of these sites are identified under multiple listings. As stated previously, no sites lie within a one-half (1/2) mile radius of the subject property. The majority of listed sites lie within a one-mile to two-mile radius of the subject property and none would appear to be a source of environmental impairment for the subject property.

4.2 Physical Setting Sources

These included a review of the records of the State Regional Water Quality Control Board, State EPA, County Department of Environmental Health, (both Environmental Management and Hazardous Materials), County Department of Building and Safety, and County Code Enforcement. County Code Enforcement records several violations for APN 175-100-003 for vehicle abatement and illegal dumping. None of this activity has lead to a condition of environmental impairment. No other agencies have reported any records of violations or incidents on or around the subject property.

4.3 Historical Use Information

There are no records of any historical uses relative to the subject property, other than the uses previously identified.

4.4 Additional Record Sources

The following maps and aerial photographs were examined to study past site and surrounding land uses:

1956- U.S.G.S. Rubidoux Quad Sheet update.

1971- U.S.D.A. Aerial Photo Rubidoux Quadrangle

1980- U.S.G.S. Rubidoux Quad Sheet update.

1989- Thomas Brothers Map.

1993- Thomas Brothers Map

2002- USGS Aerial Photo.

5.0 Information from Site Reconnaissance and Interviews

5.1 Hazardous Substances in connection with Identified Uses

Site reconnaissance and interviews revealed no potential instances or conditions of environmental impairment, on or around the subject property.

5.2 Hazardous Substance Containers

No hazardous substance containers were found to exist on any of the subject parcels.

5.3 Storage Tanks

There are storage tanks on the subject property.

5.4 Indications of PCB's

There are no indications of PCB's or impaired transformers on the subject property.

5.5 Indications of Solid Waste Disposal

There is scattered solid waste on a few of the subject parcels, however, none of this solid waste was found to be significant.

5.6 Migrating Hazardous Substance Issues

Site reconnaissance and interviews found no instances of migrating substances issues.

5.7 Any Other Conditions of Concern

There are no other areas of concern relative to environmental impairment on the subject property.

6.0 Findings and Conclusions

There is no documentation of any uses on the subject property or on any immediately adjacent properties that would represent a source of potential environmental impairment for the subject property. The subject property has never had any known uses or improvements. There are no significant adjacent historical uses, other than quarrying. The property is located in an area has largely been rural residential and has been developing for more intensive residential uses. Riverside County Code Enforcement has records for Assessor's Parcel Number 175-100-003 showing cases of illegal dumping and vehicle abatement. However, these were for instances of household junk and vehicles and do not represent a condition of environmental impairment.

Based upon a site inspection, interviews and review of available agency records and a database search and follow-up with appropriate agency personnel, Community Development Associates found no indication of any environmental impairment resulting from past or present uses of the subject property. There is also no indication of any potential liabilities resulting from activities adjacent or "upstream properties".

Communications and follow-up interviews with State Regional Water Quality Control Board, the County Department of Environmental Health and the County Code Enforcement found no evidence of present environmental impairment, liability, or found no evidence of present environmental impairment, liability, or violation on or adjacent to the subject property. There were no recognized environmental conditions on or adjacent to the subject property, other than described above. There is no recommendation for further environmental assessment or evaluation.

Community Development Associates has found no evidence of potential liabilities and environmental impairment resulting from leaking underground storage tanks, release of hazardous materials and/or toxic contaminants on any properties within the immediate vicinity. Community Development Associates does not consider further environmental study of the subject property necessary.

7.0 Qualifications of Environmental Professional

Dan Fissori has been a land use and environmental planner in California since 1981, working for both agencies and private firms. He has been preparing Phase I Environmental Assessments since 1992. Specialties include Riverside County redevelopment properties, agricultural lands, manufacturing and dry cleaning operations. As an agency planner, Dan Fissori has prepared hundreds of environmental initial studies and has reviewed dozens of environmental impact reports. Education includes a B.A. in Geography and Rural Planning from California State University, M.P.A. in Public Administration from California State University; and graduate study in Environmental Planning and Auditing from the Universities of California at Riverside and Irvine. Dan Fissori is a Certified (AICP) land use planner, a State of California Registered Environmental Assessor (REA) and Certified Environmental Inspector (CEI) by the Environmental Assessment Association.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The report meets the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-00. Search distances are per ASTM standard or custom distances requested by the user.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

FEDERAL ASTM STANDARD

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).
CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/15/2005 has revealed that there is 1 CERCLIS site within approximately 2 miles of the target property.

Lower Elevation	Address	Dist / Dir	Map ID	Page
RIVERSIDE CEMENT CO CRESTMORE	***1500 RUBIDOUX BLVD***	***1/2 - 1 E***	***G44***	***51***

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/13/2005 has revealed that there are 7 RCRA-LQG sites within approximately 2 miles of the target property.

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store , treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous

waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/13/2005 has revealed that there are 30 RCRA-SQG sites within approximately 2 miles of the target property.

CORTESE: This database identifies public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration. The source is the California Environmental Protection Agency/Office of Emergency Information.

A review of the Cortese list, as provided by EDR, has revealed that there are 24 Cortese sites within approximately 2 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2002 has revealed that there are 190 HAZNET sites within approximately 2 miles of the target property.

Threat to Water Quality:
Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

BRINE FAC,CRESTMORE (Continued) **S103443354**

Prime Waste: Process Waste (Waste produced as part of the industrial/manufacturing process) - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.

Site Description: Site has been a cement production facility since 1906. Site activities have generated waste containing chromium. Chromium contamination has been found in area groundwater, but the hydrology in the area is complex and it is unclear whether the facility is the source of the contamination. Further federal assessment is warranted. EPA has demonstrated a release to GW, but no comprehensive GW investigation or cleanup has taken place. Nea

Comments:

Please find a list of parcels which are in Riverside County. These cover a specific plan which we are currently processing. Feel free to call and discuss this with me.

The site is currently vacant and has no historical use that we are aware of. An adjacent parcel was a marble and granite quarry. To the south, west and northeast are residential properties. To the east are commercial / industrial uses. More than half the site will remain vacant. As always, feel free to call and discuss.

Latitude and Longitude to Address

Find Address (input)

Latitude: 34 01 39n

Longitude: 117 24 18w

load

Selected Location (output)*

Address: 6250 Tarragona Dr, Riverside, CA 92509, USA
Latitude: 34.029804°
Longitude: -117.397393°
Accuracy: 8: Address level.
Status: 200: Successful geocode

Instructions

"**Find Address**" returns addresses through reverse geocoding latitude and longitude coordinates. Enter the known latitude and longitude coordinates into the fields and click the load button. Latitude and longitude fields will accept degrees decimal, degrees minutes decimal or degrees, minutes and seconds.

"**Selected Location**" displays the reverse geocoded location of the current latitude and longitude (approximation only).

To find the locations of several latitude-longitude coordinate pairs use the **Reverse Batch Geocode** page.

*Output is an approximation only. Results should be independently verified if accuracy is required.

LIBERTY SURPLUS INSURANCE CORPORATION

(A New Hampshire Stock Insurance Company, hereinafter the "Company")

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ADDITIONAL INSURED / PRIMARY COVERAGE ENDORSEMENT

Effective Date:	September 6, 2011	Expiration Date:	September 6, 2012
Policy Number:	UVE-DE-103260-111	Endorsement No. 3	
Issued To:	Double Barrel Environmental Services, Inc.	Premium:	$Included

In consideration of an additional premium of $Included, it is hereby agreed that the following is included as an Additional Insured as respects Coverage A, B and D but only as respects liability arising out of "your work" for the Additional Insured by or for you.

Additional Insured: Blanket where required by written contract.

This does not apply to "bodily injury", "property damage" or "environmental damage" arising out of the sole negligence or wilful misconduct of, or for defects in design furnished by, the Additional Insured.

As respects the coverage afforded the Additional Insured, this insurance is primary and non-contributory, and our obligations are not affected by any other insurance carried by such Additional Insured whether primary, excess, contingent, or on any other basis.

This endorsement does not increase the Company's limits of liability as specified in the Declarations of this policy.

All other terms, conditions and exclusions shall remain the same.

RIO VISTA

The information contained in this offering material ("Brochure") is confidential, furnished solely for the purpose of a review by prospective purchaser of any portion of Tentative Tract Map Nos. 35418, 35419, & 35421 in Unincorporated Riverside County, California ("Property") and is not to be used for any other purpose or made available to any other person without the express written consent of **Park Place Land Advisors** ("Park Place Land Advisors"). The material is based in part upon information supplied by **First City Concordia Investments, LLC et al** ("Seller") and in part upon information obtained by Park Place Land Advisors from sources it deems reasonably reliable. Summaries of any documents are not intended to be comprehensive or all inclusive but rather only an outline of some of the provisions contained therein. No warranty or representation, expressed or implied, is made by Seller, Park Place Land Advisors, or any of their respective affiliates, as to the accuracy or completeness of the information contained herein or as to engineering or environmental matters. Prospective purchasers should make their own projections and conclusions without reliance upon the materials contained herein and conduct their own independent due diligence, including engineering and environmental inspections, to determine the condition of the Property and the existence of any potentially hazardous material located at the site.

In this Brochure, certain documents and other materials are described in summary form. The summaries do not purport to be complete nor, necessarily, accurate descriptions of the full agreements involved, nor do they constitute a legal analysis of such documents. Interested parties are expected to independently review all documents.

This Brochure is subject to prior placement, errors, omissions, changes or withdrawal without notice and does not constitute a recommendation, endorsement or advice as to the value of the Property by Park Place Land Advisors or the Seller. Each prospective purchaser is to rely upon its own investigation, evaluation and judgment as to the advisability of purchasing the Property described herein.

Seller and Park Place Land Advisors expressly reserve the right, at their sole discretion, to reject any or all expressions of interest or offers to purchase the property and/or to terminate discussions with any party at any time with or without notice. Seller shall have no legal commitment or obligation to any purchaser reviewing this Brochure or making an offer to purchase the Property unless a written agreement for the purchase of the Property has been fully executed, delivered and approved by the Seller and any conditions to Seller's obligations there under have been satisfied or waived. Park Place Land Advisors is not authorized to make any representations or agreements on behalf of Seller.

This Brochure is the Property of Park Place Land Advisors and may be used only by parties approved by Park Place Land Advisors. The Property is privately offered and, by accepting this Brochure, the party in possession hereof agrees (i) to return it to Park Place Land Advisors immediately upon request of Park Place Land Advisors or Seller and (ii) that this Brochure and its contents are of a confidential nature and will be held and treated in the strictest confidence. No portion of this Brochure may be copied or otherwise reproduced or disclosed to anyone without the prior written authorization of Park Place Land Advisors and Seller.

Please be advised, Buyer acknowledges that Park Place Partners, Inc., d/b/a Park Place Land Advisors, may (1) act as an agent for more than one prospective Buyer on the subject property and/or (2) act as the agent for both the Buyer and Seller on the subject property. Any prospective Buyer requesting Park Place Land Advisors to submit an offer on its behalf acknowledges the foregoing disclosures and agrees to the described agency relationships with other prospective Buyers.

Please interact with the Seller before approaching any of the consultants, contractors, engineers, companies or contacts involved with this offering.

The terms and conditions set forth above apply to this Brochure in its entirety.

PARK PLACE Land Advisors

Project Name:	Rio Vista
Project Overview:	Rio Vista represents one of the few opportunities for a master planned development with a rural feel along the 60 corridor in western Riverside County. Given the wide variety of product types proposed, the site is ideally suited for an entry level and first time move up community.
Location:	The Rio Vista Specific Plan site is located approximately four miles northwest of the City of Riverside in the Jurupa Hills area. The site is situated north of the 60 freeway, south of Interstate 10, west of Cedar Avenue, and south / southwest of Armstrong Road.
Municipality:	Unincorporated Riverside County
Seller:	First City Concordia Investments, LLC et al
Acreage:	Approximately 822 acres
Zoning:	Rio Vista Specific Plan

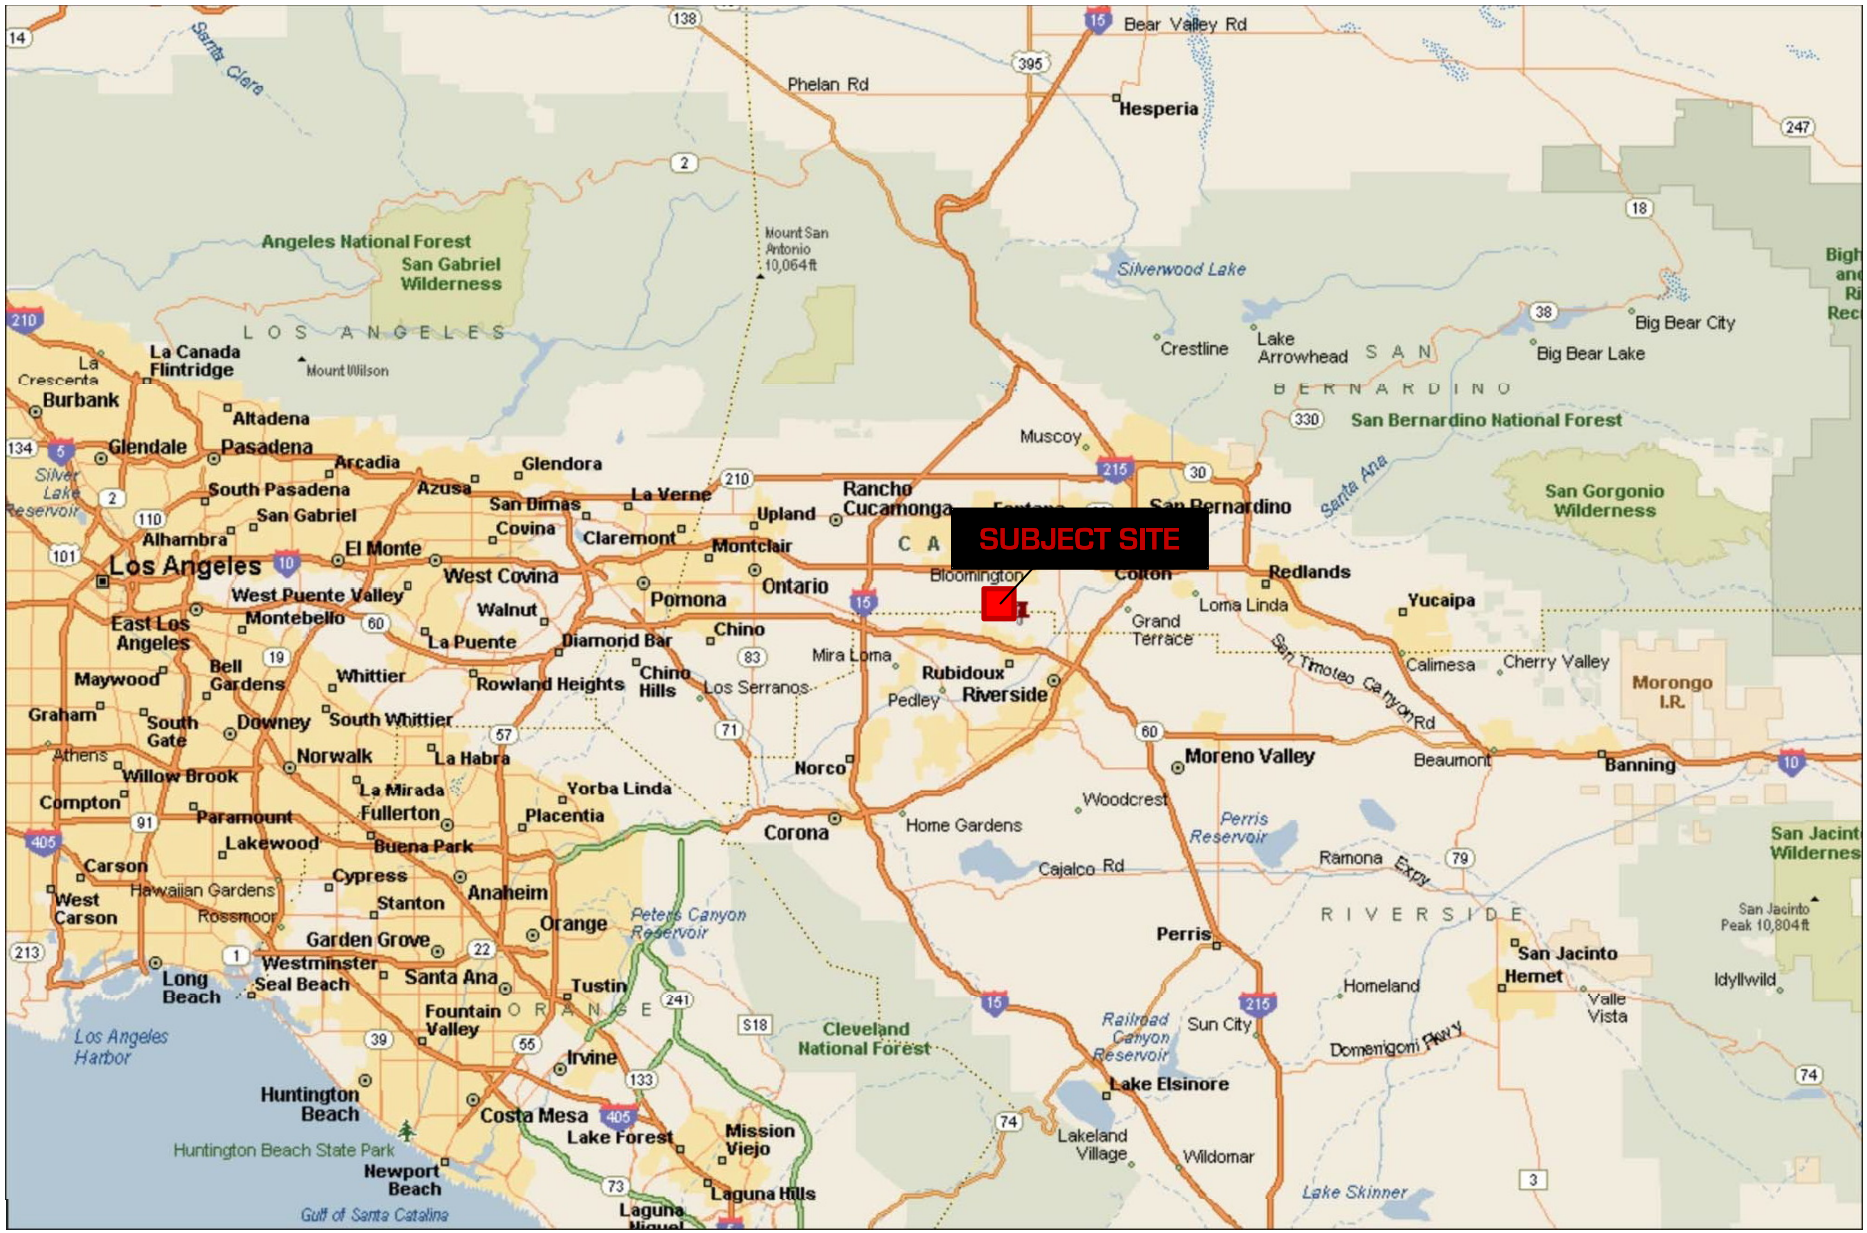

Lot Size / Count:

Density	Lot Size	Acres	DU's
Medium	4,000 – 7,200	194.5	764
High	Courts & Townhomes	44.2	483
Very High	Multi-Family	5.0	75
Residential Subtotals:		***243.7***	***1,322***
Non-Residential Subtotals:		***578.1***	***111***
TOTAL:		***821.8***	***1,433***

*for a complete breakdown of the lot sizes, please see the land use plan exhibit

Asking Price:	Submit offer
Topography:	The property generally consists of rolling hills in the central portion of the site, rugged hills in the southern portion, and some steep slopes in the northern area.
Property Condition:	The property is in an unimproved, raw condition, and will be delivered "as is".
Entitlement Status:	The Rio Vista Specific Plan was originally approved in 1998, however, it is currently being revised along with the EIR. The Specific Plan Amendment, EIR, Parcel Map 35417, and Tentative Tract Map Nos. 35418, 35419 and 35421 are being processed concurrently.
School District:	Jurupa Unified School District • Sunnyslope Elementary (K-6) State Rank: 6 API: 787 • Mission Middle School (7-8) State Rank: 2 API: 663 • Rubidoux High School (9-12) State Rank: 2 API: 638
Tax Information:	Currently, no Community Facilities District is planned for the property. Buyer may process a CFD subject to Seller's approval.
Homeowner' Dues::	Although not currently formed, a Home Owners' Association is planned for the property. At this time, an estimate of dues has not been configured.
Cost to Complete:	Seller will not be providing improvement cost estimates for the property. Buyer will be responsible for completing their own analysis with regards to improvement costs.
Brokerage Fee:	The Seller shall pay Park Place Land Advisors, Inc. a brokerage fee pursuant to a separate agreement. No cooperating brokerage fees will be offered.
Comments:	The goal of the Rio Vista Specific Plan is to create a residential community which supports a variety of lifestyles by providing a wide range of housing types, complemented by numerous recreational activities. The Rio Vista Specific Plan incorporates neighborhood enclaves with equestrian trails, a community park system, common open space areas, a commercial center, and two elementary school sites, all to create the ambiance reflective of a private, rural community.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/25/2011 has revealed that there is 1 CERCLIS site within approximately 1.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-LQG site within approximately 1.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 8 RCRA-SQG sites within approximately 1.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which

there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 02/07/2012 has revealed that there are 5 ENVIROSTOR sites within approximately 2 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there are 3 RCRA-NonGen sites within approximately 1.25 miles of the target property.

EXECUTIVE SUMMARY

TRIS: The Toxic Chemical Release Inventory System identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III, Section 313. The source of this database is the U.S. EPA.

A review of the TRIS list, as provided by EDR, and dated 12/31/2009 has revealed that there is 1 TRIS site within approximately 1 mile of the target property.

RIVERSIDE PLANT 1	6120 20TH ST	E 1/2 - 1 (0.771 mi.)	B13	31

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 04/09/2009 has revealed that there is 1 FTTS site within approximately 1 mile of the target property.

CERTAINTEED CORPORATION	***2100 AVALON ST.***	***E 1/2 - 1 (0.890 mi.)***	***G37***	***59***

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there is 1 HIST FTTS site within approximately 1 mile of the target property.

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

A review of the SSTS list, as provided by EDR, and dated 12/31/2009 has revealed that there are 2 SSTS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 10/23/2011 has revealed that there are 11 FINDS sites within approximately 1 mile of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2010 has revealed that there are 45 HAZNET sites within approximately 1 mile of the target property.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
California Department of Toxic Substances Control EnviroStor System

CERTAINTEED CORPORATION (Continued) **1000395862**

(DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste name: 551

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: P108
Waste name: STRYCHNIDIN-10-ONE, & SALTS

Waste code: U249
Waste name: ZINC PHOSPHIDE ZN3P2, WHEN PRESENT AT CONCENTRATIONS OF 10% OR LESS

Waste code: U279
Waste name: CARBARYL (OR) 1-NAPHTHALENOL, METHYLCARBAMATE

Biennial Reports:

Last Biennial Reporting Year: 2011

LUST:

Region:	STATE
Global Id:	T0606500374
Latitude:	33.9996684
Longitude:	-117.4131699
Case Type:	LUST Cleanup Site
Status:	Open - Verification Monitoring
Status Date:	05/20/2007
Lead Agency:	RIVERSIDE COUNTY LOP
Case Worker:	YR
Local Agency:	RIVERSIDE COUNTY LOP
RB Case Number:	083302467T
LOC Case Number:	94384
File Location:	Local Agency
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	During product and vent line replacement activities performed in 1994, hydrocarbon-impacted soils were observed. Subsequent soil sampling activities confirmed petroleum hydrocarbons in soil beneath the former product lines. During tank integrity testing performed in 2003, the integrity of the middle UST was determined to be compromised. During UST removal/replacement activities, it was observed that the UST was strapped to concrete anchors. Due to the presence of the concrete anchors, sloughing pea gravel, and the threat to damage of the remaining USTs, soil samples were not collected below the former UST. Assessment/Dates: Assessment/Dates: May 1995 u Advanced eight soil borings (HP-1 and HP-2, GP-1 through GP-6) and collected hydropunch groundwater samples; October 1995 and June 1996 u Installed five groundwater monitoring wells (MW-1 through MW-5); December 1995 u Advanced 5 soil borings; February 2002u Installed well MW-6; November 2006 u Attempt to repair wells MW-1 and MW-4, the wells were destroyed and MW-4 was reinstalled within its original borehole; July 2008 u Drilled three off-site soil borings (B-4 through B-6); February 2009 u Advanced three temporary wells (TW-1 through TW-3) and three soil borings (B-7 through B-9); November 2009 u Advanced three temporary wells (TW-4 through TW-6). Remediation/Dates: A 30-day SVE test was performed between November 30 and December 30, 2006. At that time, groundwater was also extracted from well MW-5, with a total of 68,860 gallons of water beingextracted and disposed of. No other active remediation has been performed at the site. Groundwater Monitoring: The site has been regularly monitored and sampled since the fourth quarter 1995. Groundwater monitoring and sampling activities are currently being performed semi-annually. Verification conducted: Post-remedial groundwater monitoring has been performed since the conclusion of remedial activities performed in 2006. Discussion of Current Conditions, Changes, and Trends in Hydrogeologic Conditions: Petroleum hydrocarbons were not detected in any of the five existing wells (MW-2 through MW-6). All wells have been non-detect, or detected at trace concentrations (except for MTBE detected in wellMW-3) for the past several years. Plans for Remediation and/or Reaching Target Cleanup Goals: Stantec will prepare and submit a work plan to install two off-site monitoring wells. No additional remedial

CIRCLE K #5247 (STOP-N-GO) (Continued) **S108201650**

activities are required on-site; the initial analytical data collected from the two proposed off-site monitoring wells will be used to evaluate if off-site remedial actions are required.

Completed Document Type: Phase 1
Completed Date: 07/11/2006
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Workplan
Completed Date: 02/05/2007
Comments: DTSC PEA Workplan Approval letter sent out to District and their consultant. Approval was granted on the condition that the sampling figures and tables within the Workplan be revised to include the soil gas/groundwater sampling location MS-3 during the PEA investigation and prior to the submittal of the PEA Report. This sampling location was not included in the revised Workplan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/28/2007
Comments: The PEA Report was approved for further action. A Supplemental Site Assessment (SSI) will be conducted for the site and possibly a removal action.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Tech Memo
Completed Date: 11/15/2007
Comments: DTSC sent approval letter to the District and their consultant for the SSI Workplan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 10/06/2008
Comments: DTSC sent final SSI approval letter.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

PROPOSED K-8, #1 (Continued) **S107770284**

Completed Document Type: Supplemental Site Investigation Tech Memo
Completed Date: 03/04/2008
Comments: The Addendum was modified in accordance with DTSC comments on the draft version. DTSC reviewed the modifications and approved the Addendum.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 06/30/2006

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Phase 1

PROPOSED K-8, #1 (Continued) **S107770284**

Completed Date: 07/11/2006
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Workplan
Completed Date: 02/05/2007
Comments: DTSC PEA Workplan Approval letter sent out to District and their consultant. Approval was granted on the condition that the sampling figures and tables within the Workplan be revised to include the soil gas/groundwater sampling location MS-3 during the PEA investigation and prior to the submittal of the PEA Report. This sampling location was not included in the revised Workplan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/28/2007
Comments: The PEA Report was approved for further action. A Supplemental Site Assessment (SSI) will be conducted for the site and possibly a removal action.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Tech Memo
Completed Date: 11/15/2007
Comments: DTSC sent approval letter to the District and their consultant for the SSI Workplan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 10/06/2008
Comments: DTSC sent final SSI approval letter.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Tech Memo
Completed Date: 03/04/2008
Comments: The Addendum was modified in accordance with DTSC comments on the draft version. DTSC reviewed the modifications and approved the Addendum.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 06/30/2006
Comments: Not reported

PROPOSED K-8, #1 (Continued) **S107770284**

Completed Document Type:	Environmental Oversight Agreement
Completed Date:	09/26/2006
Comments:	Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Voluntary Cleanup Agreement
Completed Date:	09/12/2007
Comments:	Signed Agreement sent (FedEx) to District.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Inspections/Visit (Non LUR)
Completed Date:	07/26/2007
Comments:	Site walk was conducted to observe current site conditions. Following the site walk, a scoping meeting was held at the District office in order to discuss the details of a Supplemental Site Assessment that will be completed for the site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Cost Recovery Closeout Memo
Completed Date:	10/20/2008
Comments:	District reqiested that the project put on hold due to the developer delay in starting the development in the Site'e area. DTSC sent SSI approval for the site on 10/6/2008 for further action in the form of RAW.

Environmental Interest/Information System

SIERRA ALUMINUM COMPANY (Continued) **1001075507**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to replace EPA’s independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control

SIERRA ALUMINUM COMPANY (Continued) **1001075507**

Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/07/2011
Date Data Arrived at EDR: 10/12/2011
Date Made Active in Reports: 03/01/2012

Next Scheduled EDR Contact: 04/23/2012
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/07/2011

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011
Date Data Arrived at EDR: 03/01/2011

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2011

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/15/2011

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 10/07/2011
Date Data Arrived at EDR: 12/09/2011

Next Scheduled EDR Contact: 03/19/2012
Data Release Frequency: Quarterly

HIST CAL-SITES: Calsites Database
The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005
Date Data Arrived at EDR: 08/03/2006
Date Made Active in Reports: 08/24/2006
Number of Days to Update: 21

Source: Department of Toxic Substance Control
Telephone: 916-323-3400
Last EDR Contact: 02/23/2009
Next Scheduled EDR Contact: 05/25/2009
Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 02/07/2012
Date Data Arrived at EDR: 02/07/2012
Date Made Active in Reports: 02/22/2012

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 09/09/2011
Date Data Arrived at EDR: 09/16/2011

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database
The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 09/09/2010

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/21/2011
Date Data Arrived at EDR: 11/22/2011
Date Made Active in Reports: 12/22/2011

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

RIO VISTA
NEAR RUBIDOUX BLVD
RIVERSIDE, CA 92509

TARGET PROPERTY COORDINATES

Latitude (North):	34.0203 - 34° 1' 13.08''
Longitude (West):	117.4071 - 117° 24' 25.56''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	462413.2
UTM Y (Meters):	3764287.0
Elevation:	1372 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	34117-A4 FONTANA, CA
Most Recent Revision:	1980

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

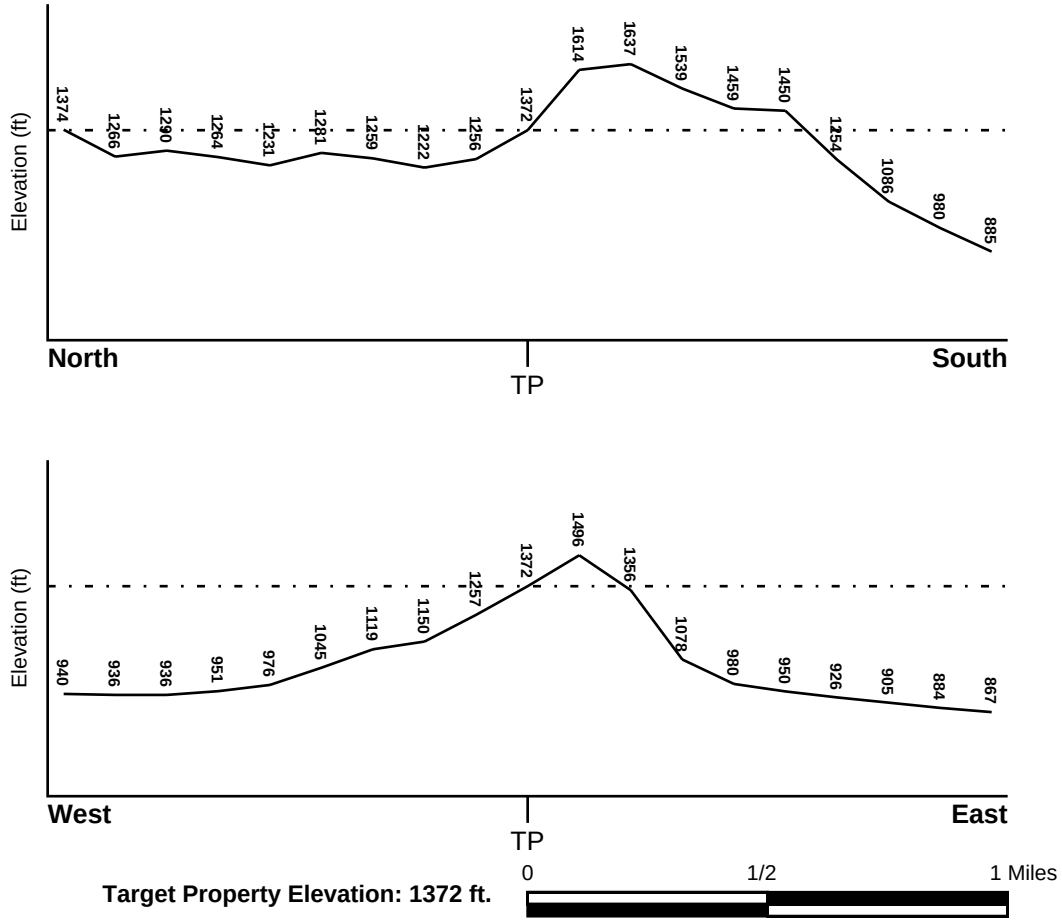

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
RIVERSIDE, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06065C - FEMA DFIRM Flood data

Additional Panels in search area: 06071C - FEMA DFIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
FONTANA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles ENE
Site Name:	Riverside Cement Co Crestmore Plt
Site EPA ID Number:	CAD063844443
Groundwater Flow Direction:	SW ON A REGIONAL BASIS.
Measured Depth to Water:	not available, but a well 2,000 feet east of the site had a water level of 800 feet above mean sea level.
Hydraulic Connection:	Information is not available about the hydraulic connection between aquifer(s) underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Cieneba

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	14 inches	22 inches	weathered bedrock	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: CIENEBA

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessively drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Inquiry # 4872323.3	Contact: Kristine Savona

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Federal Delisted NPL site list

Delisted NPL ---------- National Priority List Deletions

Federal CERCLIS list

FEDERAL FACILITY ---------- Federal Facility Site Information listing

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Federal RCRA CORRACTS facilities list

CORRACTS ---------- Corrective Action Report

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROL ---------- Sites with Institutional Controls

Federal ERNS list

ERNS ---------- Emergency Response Notification System

State and tribal leaking storage tank lists

INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

FEMA UST ---- Underground Storage Tank Listing
INDIAN UST ---- Underground Storage Tanks on Indian Land

State and tribal voluntary cleanup sites

VCP ---- Voluntary Cleanup Program Properties
INDIAN VCP ---- Voluntary Cleanup Priority Listing

State and tribal Brownfields sites

BROWNFIELDS ---- Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS ---- A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

INDIAN ODI ---- Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9 ---- Torres Martinez Reservation Illegal Dump Site Locations
ODI ---- Open Dump Inventory
IHS OPEN DUMPS ---- Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ---- Delisted National Clandestine Laboratory Register
Toxic Pits ---- Toxic Pits Cleanup Act Sites
US CDL ---- National Clandestine Laboratory Register

Local Land Records

LIENS ---- Environmental Liens Listing
LIENS 2 ---- CERCLA Lien Information
DEED ---- Deed Restriction Listing

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System
MCS ---- Military Cleanup Sites Listing
SPILLS 90 ---- SPILLS 90 data from FirstSearch

Other Ascertainable Records

FUDS ---- Formerly Used Defense Sites
DOD ---- Department of Defense Sites
SCRD DRYCLEANERS ---- State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR ---- Financial Assurance Information
EPA WATCH LIST ---- EPA WATCH LIST
2020 COR ACTION ---- 2020 Corrective Action Program List

TSCA ---- Toxic Substances Control Act
ROD ---- Records Of Decision
RMP ---- Risk Management Plans
RAATS ---- RCRA Administrative Action Tracking System
PRP ---- Potentially Responsible Parties
PADS ---- PCB Activity Database System
ICIS ---- Integrated Compliance Information System
MLTS ---- Material Licensing Tracking System

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/10/2016 has revealed that there is 1 SEMS site within approximately 1.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-LQG site within approximately 1.25 miles of the target property.

AGUA MANSA MRF, LLC	***1830 AGUA MANSA ROAD***	***E 1 - 2 (1.237 mi.)***	***AO196***	***300***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are

10 RCRA-SQG sites within approximately 1.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-CESQG site within approximately 1.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information

that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there are 5 ENVIROSTOR sites within approximately 2 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 4 SWF/LF sites within approximately 1.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 7 UST sites within approximately 1.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 7 SWEEPS UST sites within approximately 1.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 1.25 miles of the target property.

CERTAINTEED CORP	***2100 AVALON ST.***	***E 1/2 - 1 (0.766 mi.)***	***H36***	***51***
Database: FTTS INSP, Date of Government Version: 04/09/2009				

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, has revealed that there is 1 HIST FTTS site within approximately 1 mile of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2015 has revealed that there are 65 HAZNET sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 22 EDR Hist Auto sites within approximately 1.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 1.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 5 RGA LUST sites within approximately 1 mile of the target property.

Environmental Interest/Information System

ECCO EQUIPMENT (Continued) **1004677778**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

FLEETWOOD TRAVEL TRAILERS OF CA INC. #15-2 (Continued) **1016176029**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110002144581

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The

CERTAINTEED CORP (Continued) **1000395862**

EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

SIERRA PACIFIC (Continued) **1001967537**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RYDER TRUCK RENTAL (Continued) **1000211843**

Registry ID: 110002687263

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Historical Generators:

Date form received by agency:	04/23/1990
Site name:	ADVANCE COLLISION

ADVANCE COLLISION (Continued) **1000151445**

Classification: Large Quantity Generator

Facility Has Received Notices of Violations:
Regulation violated: FR - 262.10-12.A
Area of violation: Generators - General
Date violation determined: 10/06/1992
Date achieved compliance: 10/06/1997
Violation lead agency: State
Enforcement action: Not reported
Enforcement action date: Not reported
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: Not reported
Proposed penalty amount: Not reported
Final penalty amount: Not reported
Paid penalty amount: Not reported

Evaluation Action Summary:
Evaluation date: 10/06/1992
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Generators - General
Date achieved compliance: 10/06/1997
Evaluation lead agency: State Contractor/Grantee

FINDS:

Registry ID: 110002827790

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site History: ***EDF Data prior to 2005 not uploaded to GeoTracker*** Site Information This site is currently an operating Circle K gas station and convenience store in Rubidoux, California. The above-ground structures at the site consist of a single-story, convenience store building, two product dispenser islands with four dispensers, and a canopy covering the dispenser island area. Three 10,000-gallon

CIRCLE K #5247 (STOP-N-GO) (Continued) **S108201650**

double-walled fiberglass underground storage tanks (USTs) are located east of the building, each containing unleaded gasoline. Site History/Release Information April 1994 - Total petroleum hydrocarbons (TPHg) and associated volatile organic compounds (benzene, toluene, ethylbenzene, total xylenes (BTEX)) were identified in the soils during removal and replacement of the product and vent lines. Ten soil samples were collected below the piping trenches. All samples were non-detect (ND) for TPH and BTEX with the exception of two samples, Pl3-7' (3900 ppm TPH, 110 ppm benzene, 430 ppm toluene, 95 ppm ethylbenzene, 550 ppm total xylenes) and PL4-6' (52000 ppm TPHg, 50 ppm benzene, 410 ppm toluene, 140 ppm ethylbenzene, 830 ppm total xylenes). The site was placed into the Local Oversight Program. May 2003 - The results of tank integrity testing conducted in early 2003 indicated that the middle 10,000-gallon UST was compromised. The middle UST was removed and replaced. Soil samples were not collected below the UST due to the presence of concrete anchors below the former UST, sloughing pea gravel and threat of damage to the remaining USTs on either side of the removed UST. Soil and Groundwater Assessment: December 1994 - Five soil borings (VW-1, VW-2, and B-1 through B-3) were drilled to depths from 31 to 41.5 feet below ground surface (ft bgs). VW-1 and VW-2 were converted to vapor extraction wells due to elevated levels of Volatile Organic Compounds (VOCs) as detected by the PID. Groundwater (GW) was encountered during the soil assessment at 40 ft bgs. May 1995 Two direct-push borings (HP-1 and HP-2) were advanced to depths of 42.5 ft south and northeast of the current USTs to assess if GW had been impacted. GW grab samples were collected from both borings using Hydropunch equipment. The GW sample collected from HP-1 was ND for TPHg and BTEX, however, the GW sample from HP-2 detected 20,000 "g/L TPHg, 3400 "g/L B, 830 "g/L T, 600 "g/L E, and 4800 "g/L X. June 1995 - Based GW concentrations in HP-2, six additional direct-push borings (GP-1 through GP-6) with Hydropunch GW sampling were conducted to further evaluate the extent of GW impacts and determine appropriate locations to install GW monitoring wells. GW was encountered at 45 ft bgs. With the exception of a benzene concentration reported at 1.8 "g/L in sample GP-3, TPHg and BTEX were not reported at or above laboratory reporting limits in samples GP-1 through GP-6. October 1995 and June 1996 Five GW monitoring wells (MW-1 through MW-5) were installed around the exterior of the site (north, south and east) and adjacent to HP-2 between the USTs and dispensers. GW was encountered at approximately 40 ft bgs. Wells MW-1, MW-2, MW-5 were not impacted, however, 1800 "g/L TPHg, 87 "g/L B, 190 "g/L T, and 360 "g/L MTBE (June 1996) were detected in MW-3 and 93 "g/L MTBE was detected in MW-4. Subsurface Soil types: predominantly fine- to coarse-grained sands interbedded with gravel, silt, and clay layers to the total depth explored of 61.5 feet bgs. February 2002 - Downgradient well MW-6 was installed to 50 ft bgs. GW was encountered at approximately 43 feet bgs during drilling. With the exception of xylenes (0.71 "g/L), TPH-g and VOCs were not detected in the GW sample collected from well MW-6. TPH-g and VOCs were not reported at or above laboratory reporting limits in the soil sample analyzed from boring MW-6. Aug 2002 Due to shift in the GW flow direction from a generally southerly to a southwesterly direction, further GW assessment was required. Due to difficulties obtaining off-site access, assessment was not able to be conducted until 2008. November 2006 GW wells MW-1 and MW-4 were observed to have obstructed casings and an attempt to repair the wells failed. The wells were properly destroyed and MW-4

CIRCLE K #5247 (STOP-N-GO) (Continued) **S108201650**

was reinstalled in the same borehole to 62 ft bgs. July 2008 Three off-site soil borings (B-4, B-5, and B-6) were drilled southwest of the property line (and southwest/downgradient of the USTs) to further delineate the dissolved plume. Soil and GW grab samples were collected from each boring, however, the GW sample from B-6 was not analyzed due to damage to the sample container. All constituents of concern in the soil and GW samples were ND with the exception of 2.5 ppm total lead in the soil sample from B-4. February 2009 Three temporary wells (TW-1, TW-2, and TW-3) were advanced behind the station building to further assess the dissolved GW plume. Soil samples were collected at 5 ft intervals to 40 in all three temporary wells. Except for total lead, (2.5 to 4.5 mg/kg), all analytes were reported as ND in the soil samples. Grab GW sample concentrations from TW-2 were: 64 ppb TPPH, 120 ppb MTBE, and 68 ppb TBA. GW concentrations from TW-3 were: 51 ppb MTBE, and 31 ppb TBA. GW concentrations for TW-1 were ND for all constituents. Laboratory notes report that TPPH is entirely due to MTBE. Based on the soil and GW analytical data collected, it appeared that residual dissolved-phase MTBE and TBA was located behind the Circle K building. November 2009 Three additional temporary wells (TW-4, TW-5, and TW-6) were advanced off-site further southwest of the station building. Due to lack of PID detections, soil samples were not collected above the capillary fringe. Soil samples at the capillary fringe were ND for all constituents analyzed. GW samples from all three wells were ND for all constituents tested, except TW-5 which detected 180 a%g/L MTBE and 59 a%g/L TPPH. December 2011 Two off-site GW monitoring wells (MW-7 and MW-8) were installed to verify GW conditions southwest of the site. All soil samples were ND for all constituents analyzed except for TPPH (0.22 mg/kg) and tetrachloroethene (0.075 mg/kg) detected in the soil sample collected at 35 ft bgs from MW-8. GW samples from both wells were collected on December 30, 2011 were ND for all analytes tested (TPPH, BTEX, fuel oxygenates MTBE, TBA, DIPE, ETBE, TAME, and ethanol, lead scavengers 1,2-DCA and EDB, and full-scan VOCs, by EPA Method 8260B). Two additional sampling events in 2012 were also ND for all constituents tested (TPPH, BTXE, & oxygenates). Groundwater Monitoring: Water levels have fluctuated from 38.06 to 50.60 ft bgs with flow directions consistently to the west and southwest. GW elevations have declined approximately 5 feet over the past 15 years. The site wells have been regularly monitored since the fourth quarter 1995. Initially, concentrations up to 20000 a%g/L TPHg, 3400 a%g/L benzene, 100 a%g/L Toluene, 6500 a%g/L MTBE, 4800 a%g/L Xylene and 150 a%g/L TBA were detected in the GW, however, all GW samples from all wells since 2007 have been ND for all constituents except MTBE which has been consistently <25 a%g/L. During the second quarter 2012 GW monitoring event (performed on June 8, 2012), no analytes were detected at concentrations exceeding their detection limits in any of the GW samples collected. GW beneath the site was most recently observed at depths ranging from 42.62 to 50.41 feet bgs. Remediation and Verification: Vapor & Groundwater 2006: A 30-day soil vapor extraction (SVE)/ GW pumping event (Dual-phase extraction) mass removal event pulling from VW-1, VW-2 and MV-5 was performed between November 28 and December 29, 2006. VW-2 was taken offline due to low influent concentrations after 12 days. Vapor concentrations were reduced from maximum concentrations of 440 ppmvTPHg to 8 ppmv; 5 ppmv benzene to non-detectable levels of less than 0.002 ppmv; and combined maximum concentrations of MTBE were reduced from 5.1 ppmv to

CIRCLE K #5247 (STOP-N-GO) (Continued) **S108201650**

0.23 ppmv. Approximately 168 pounds of hydrocarbons were removed from SVE extraction wells VW-1 and VW-2 and 68,860 gallons GW were removed on MW-5. Soil: February 2009 - Three confirmation soil borings (B-7 through B-9) were advanced to 40 ft bgs. Soil samples were collected at 5 ft intervals. All Soil samples taken from borings showed ND for TPPH, Benzene, Toluene, Ethylbenzene, Xylenes, and MTBE. Lead was detected a < 5.0 mg/kg at all borings. Other Info: Residual Mass in soil: ATC Assoc. estimates 3,734 pounds TPHg; 66 pounds Benzene; 345 pounds Toluene; 566 pounds Xylenes; 38 pounds Ethylbenzene remain in-situ. Sensitive GW Receptors: Two water wells within ~1/2 mile of site. Wells abandoned and waste removed August 2013 Case closed Sept 30 2013

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments:	Not reported
Description:	RP states that a pump seal failed causing the release of cooling tower water to a drainage swale. The storm drain system would discharge into the Santa Ana River. However, the water has not been detected any further than 100' into the drainage swale. The estimated amount of the release is in excess of 10,000 gallons.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/05/2016

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/05/2016

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/05/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/10/2016

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Data Release Frequency: Quarterly

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database
The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 10/05/2016

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

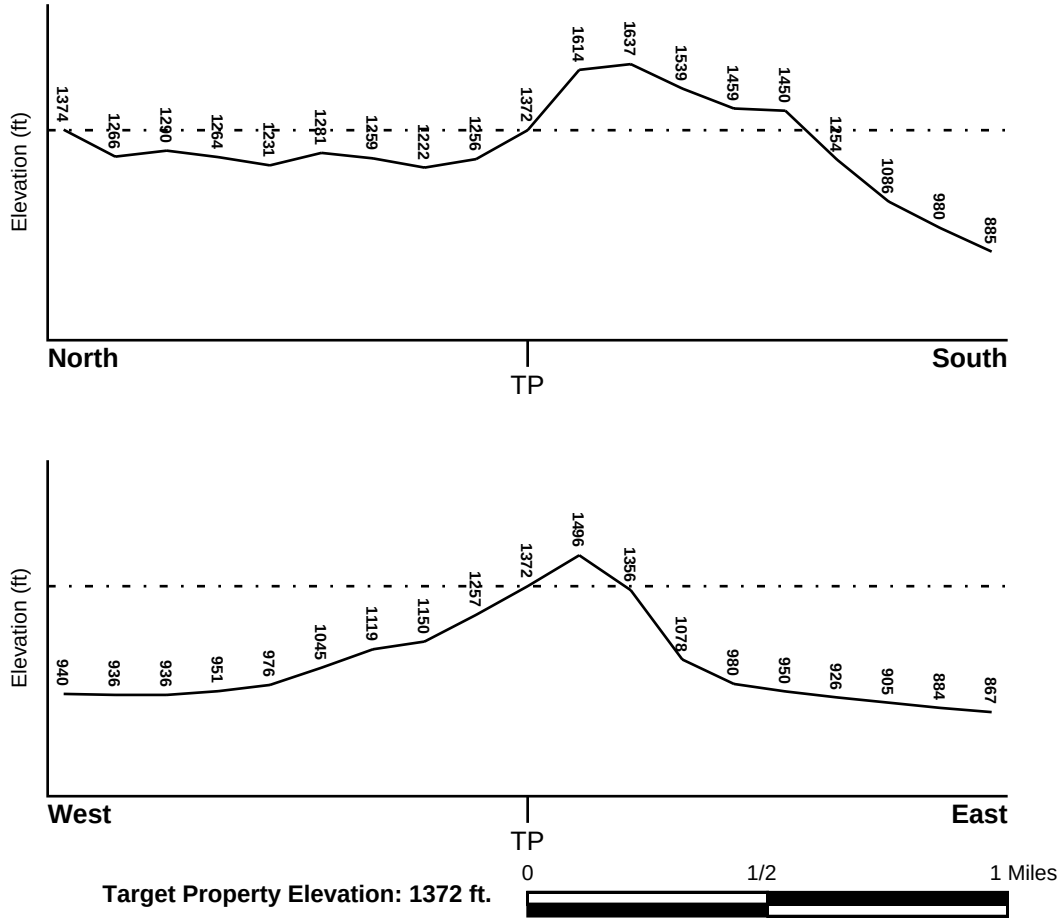

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C0043G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06065C0045G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
FONTANA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Cieneba

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 5.1
2	14 inches	22 inches	weathered bedrock	Not reported	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: CIENEBA

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessively drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Re: Freedom of Information Act Request EPA-R9-2017-004647

Dear Kristine Savona:

This is in response to your Freedom of Information Act request regarding:

> APNs: 175-080-010; 175-090-001 through 175-090-005 175-100-003, 005, 006; 175-150-002; 175-160-001 175-160-005, 007; 177-030-012, 014; 177-040-002, 8 in Rubidoux, California

I wish to advise you that Region 9 has no records responsive to your request.

All FOIA related documents, including this letter (invoice if applicable), have been uploaded to EPA's FOIAOnline system found at https://foiaonline.regulations.gov/foia/action/public/home. Please be sure to reference your FOIA request as EPA-R9-2017-004647 to access this record.

This letter concludes our response to your request. You may appeal this response by email at hq.foia@epa.gov, or by mail to the National Freedom of Information Office, U.S. EPA, 1200 Pennsylvania Avenue, N.W. (2822T), Washington, DC 20460 (U.S. Postal Service Only). Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, N.W. If you are submitting your appeal via hand delivery, courier service, or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, N.W., Room 6416J, Washington, DC 20001. Your appeal must be made in writing, and it must be received no later than 90 calendar days from the date of this letter. The Agency will not consider appeals received after the 90 calendar day limit. Appeals received after 5:00 pm EST will be considered received the next business day. The appeal letter should include the FOIA tracking number listed above. For quickest possible handling, the subject line of your email, the appeal letter, and its envelope, if applicable, should be marked "Freedom of Information Act Appeal." Additionally, you may seek assistance from EPA's FOIA Public Liaison at hq.foia@epa.gov or (202)566-1667, or from the Office of Government Information Services (OGIS). You may contact OGIS in any of the following ways: by mail, Office of Government Information Services, National Archives and Records Administration, Room 2510, 8610 Adelphi Road, College Park, MD 20740-6001; e-mail, ogis@nara.gov; telephone, (301) 837-1996 or (877) 684-6448 or fax, (301) 837-0348.

The Land Division's RCRA Records Center is maintained by Toeroek Associates Inc., under contract to EPA Region 9. If you have any questions, please contact Ward Danner of Toeroek Associates Incorporated at 415-947-4596.

Sincerely,

Jeff Scott, Director

Dear Ms. Savona:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the sites/facilities referenced above.

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: http://www.envirostor.dtsc.ca.gov/public. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

If you have any questions, would like further information regarding your request or would like an appointment to visit Sacramento's Central Files, please contact me at (916) 255-3758.

Sincerely,

Jan Papararo
Regional Records Coordinator

EPA Trained in IAQ Evaluation and Remediation

Radiation Safety Trained

Scitec XRF Operator's License

Trained/certified in accordance with 29 CFR 1910.146 permit-required confined spaces.

YEARS OF EXPERIENCE:

With Hillmann: 27 years

Total: 27 years

PROFESSIONAL EXPERIENCE:

Mr. Baker is the Vice President of Operations at Hillmann, responsible for business operations, fiscal management and field staff management throughout the company. Mr. Baker is responsible for the performance and management of industrial hygiene services, IAQ Investigations, Mold & Moisture Investigations, Asbestos and Lead Paint Investigations on 20,000,000+ square feet in commercial, office, retail, government, school and multi-family residential settings. He responds and coordinates restoration response following disasters, fires, pipe breaks, etc. Mr. Baker is an ASTM Qualified Environmental Professional for the performance of Phase I and Phase II Environmental Site Assessments. He writes remedial specifications and Operation & Maintenance (O&M) Programs for commercial and residential buildings and co-wrote Standard Operating Procedure for heavy construction contractors working in naturally occurring asbestos.

He also acts as a primary point of contact for multiple high-profile, nationwide clients and is frequently requested to help solve difficult situations and regulatory issues.

As a LEED AP, Mr. Baker provides green building services toward LEED accreditation in the Sustainable Sites, Water Efficiency, Energy & Atmosphere, Materials & Resources, Indoor Environmental Quality and Innovation & Design categories. He prepares sustainable strategies to enhance indoor environments including moisture management, hazardous materials compliance, indoor air quality management, pollutant source control and ventilation effectiveness. Mr. Baker also implements systems maintenance practices, water conservation programs and energy efficient building operation plans to reduce environmental impacts.

Representative experience includes:

Tishman Speyer Properties, Various locations nationwide: Hillmann has been providing the complete environmental program for Tishman Speyer's properties since 1987. Our services include phase I environmental site assessments, subsurface investigations, site remediation oversight, asbestos surveys, air monitoring, bid administration, O&M programs, employee training, industrial hygiene and indoor air quality programs. The estimated contract value is $1,000,000 annually. Mr. Baker functions as a Project Principal, Project Manager and Environmental Assessor. This project is ongoing.

Citigroup – Complete Environmental Program, Various locations nationwide: Mr. Baker is the Project Principal, Project Manager and Environmental Assessor for this contract on which Hillmann has been providing complete environmental program including Phase I environmental site assessments, Phase II environmental site assessments, asbestos and lead surveys, air monitoring, bid administration and O&M programs, industrial hygiene and indoor air quality programs, geology services, radon testing and hazardous materials assessments. Estimated cost to date: $8,250,000. This project is ongoing.

J.C. Penney Company, Inc., Various locations nationwide: Since 1994, Hillmann has been providing complete environmental consulting for J.C. Penney including: Phase I & II ESA's, IAQ, Mold, Asbestos, Lead, Water testing, from identification through testing through remediation. Mr. Baker's role included Project Manager and Environmental Assessor responsibilities. Estimated cost to date: $4,000,000. This project is ongoing.

Verizon Environmental Services, Various locations nationwide: Since 1996, Hillmann has been providing Verizon with asbestos and lead investigations, abatement design, air monitoring and mold and water sampling and emergency response services including IAQ, noise, confined space, characterization, and ventilation evaluation. Mr. Baker functions as Project Manager on this contract. Estimated cost to date: $12,600,000. This project is ongoing.

Mill Creek Realty Trust, Various nationwide locations: Mr. Baker is the Project Principal and Project Manager for this Client since 2002 as Hillmann provides expertise and guidance on moisture intrusion and microbial issues encountered during construction projects and within their occupied multi-family residential buildings. Assisted in the development of MCRT's moisture protection program, conduct pro-active inspections, conduct incident response investigations and oversee restoration. Additionally conduct hazardous material inspections for demolition purposes. Cost $500,000 to date. These projects are ongoing.

General Growth Properties, Various nationwide facilities: National service agreement for phase I site assessments and hazardous materials surveys, including asbestos surveys and investigations, project monitoring, mold work, bulk sampling and analysis. Mr. Baker is the Project Principal and Project Manager on the contract. This project is ongoing. Cost: $750,000.

Wexford Development, LLC, Various locations nationwide: Hillmann provides complete environmental consulting for this client including Phase I & II ESA's, UST removal, IAQ, mold, asbestos, lead, and water testing. Mr. Baker functions as a Project Principal, Project Manager and Environmental Assessor in its execution. Cost: $254,000. This project is ongoing.

Clark Construction, Various locations Metro Washington DC: Mr. Baker is the Project Principal and Project Manager for this Client as Hillmann provides expertise and guidance on moisture intrusion and microbial issues encountered during construction projects. Assisted in the development of Clark's moisture protection program, conduct pro-active inspections, conduct employee training, conduct incident response investigations and oversee restoration. Cost $150,000 to date. These projects are ongoing.

Tyson's Corner Center, McLean, VA: Hillmann is providing asbestos and lead surveys and remediation oversight, UST services, IAQ and mold services, and Phase I environmental site assessments for this ongoing contract. Mr. Baker functions as the Project Principal, Project Manager and Field Technician. Cost: $600,000. This project is

HILLMANN
CONSULTING

ongoing.

Diocese of Arlington, Fairfax & Arlington Counties, VA: Mr. Baker is the Project Principal and Project Manager overseeing asbestos, IAQ, lead and mold consulting services. Over 250 projects have been completed in 53 different buildings. The Diocese is a continuous client since 1989. Cost: $500,000

Fairfax County Public Schools, Fairfax County, VA: As Project Principal and Project Manager for this contract, Mr. Baker provided oversight and management for this asbestos, lead and mold consulting as well as various Indoor Air Quality projects. A total of 236 projects were completed in over 50 different school/center/office buildings without incident. Cost: $125,000 annually.

St. Anselm's Abbey and School, Washington, DC: Mr. Baker is responsible for Project Management and Field Technician Services on this ongoing asbestos and lead investigation contract, and 3 year AHERA re-inspections. Cost: $15,000.

Tishman Speyer Properties: Subsurface Investigation and Soil Segregation on a City Block, Washington, DC: Hillmann was retained to perform subsurface investigations and soil segregation on a city block slated for construction. Several Phase II subsurface investigations were conducted on the site to determine environmental impacts to soil and groundwater. Subsurface investigations were conducted with both direct push and hollow stem auger technology. Analytical results indicated soil and groundwater contamination from metals and PAH compounds. Hillmann performed the process of advancing borings within the footprint of the planned excavation to pre-classify soils for regulatory disposal. Our team was then responsible for complete oversight of the segregation and disposal of impacted soil. Based on semi-volatile compounds identified in the soil from past use, Hillmann designed an injection program whereby a reagent was introduced into the excavation footprint. The injection program was 100% successful in removing all compounds above regulatory criteria. Metals were successfully removed and all residual PAH compounds remediated with a no further action letter received from the regulating agency. Mr. Baker serves as Project Principal, Project Manager and Environmental Assessor for this project, which completed in 2009. Cost $147,000.
