Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: San Jacinto High School Athletic Fields Lighting Project

Lead Agency: San Jacinto Unified School District

Contact Name: Mary Elder

Email: mary.elder@sanjacinto.k12.ca.us Phone Number: 951.929.7700 ext. 4696

Project Location: San Jacinto (*City*) Riverside (*County*)

Project Description (Proposed actions, location, and/or consequences).

The proposed project would be implemented on the existing track and football field, practice field, baseball fields, softball fields, and tennis courts of the San Jacinto High School campus. The proposed project includes the installation of 32 new Musco competition lighting poles, with a total of 186 new lighting fixtures, surrounding the practice field, baseball fields, softball fields, and tennis courts. Additionally, the proposed project includes retrofitting the track and football field's six existing lighting poles with 56 new lighting fixtures. The proposed project would not increase the student capacity or enrollment at San Jacinto High School.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The environmental assessment presented in the Initial Study/Mitigated Negative Declaration (IS/MND) identified environmental impacts that would be potentially significant unless mitigation measures (MM) are incorporated into the project for Cultural Resources and Geology and Soils. Cultural Resources MM would would include a qualified archaeologist on call during ground disturbing activities that would occur beneath artificial fill. They would also include specific guidelines if cultural resources were discovered which would reduce the impact to less than significant. Geology and Soils MM would reduce impacts related to paleontology to less than significant. The IS/MND analysis determined that all impacts from the proposed project would less than significant after mitigation.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Prior to preparation of the IS/MND, the District issued a Notice of Intent (NOI) on October 20, 2025. The CEQA-mandated public review period for this IS/MND was between October 20, 2025 and November 18, 2025, during which interested agencies and the public could submit comments about the potential environmental impacts of the proposed project. During this time, the District received comment letters from XXX.

Project implementation would potentially cause controversy regarding the topic of aesthetics.

Provide a list of the responsible or trustee agencies for the project.

The following agencies would have ministerial review and approvals over the proposed project:
• Division of the State Architect (Approval of Construction Drawings)
