Subject: **Phase I Environmental Site Assessment**
Montague Point
3050 Zanker Road, 2840, 2860, 2880 Junction Avenue and 411 East Plumeria Drive
San Jose, California 95134
AEI Project No. 505832

DRAFT

Dear Alexis Roworth:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (732) 414-2720 or gbelli@aeiconsultants.com.

Sincerely,

Footnotes

Recognized Environmental Condition	None identified.
Controlled Recognized Environmental Condition	None identified.
Historical Recognized Environmental Condition	None identified.
Other Environmental Consideration (Non-ASTM Scope)	Asbestos - Based on the age of the building(s), asbestos may be present in the building material. Given the good condition of the suspect ACM, these materials can be effectively managed as part of an Asbestos O&M Plan until such time as renovation or demolition activities necessitate their removal. The objective of an O&M Plan is to implement a practical management approach to controlling identified ACM within the subject property. The O&M Plan is designed to clean up existing contamination, minimize future fiber release by controlling disturbance of ACM, and monitor the condition of the ACM until it is removed. An O&M Plan was not in place at the subject property. AEI observed evidence of seepage of water from the subsurface into a portion of the 2860 Junction Avenue building. Water-damaged carpet tiles were observed in the vacant office areas. No mold was observed in the areas of water intrusion. The source(s) of the water into the 2860 Junction Avenue building should be investigated by a licensed professional. Repairs should be made as necessary
Significant Data Gaps	None identified.

DRAFT

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by MetLife Investment Management LLC to conduct a Phase I Environmental Site Assessment (Phase I ESA) in accordance with AEI's proposal and in conformance with the scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 3050 Zanker Road, 2840, 2860, 2880 Junction Avenue and 411 East Plumeria Drive, San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Property Information	
Site Address(es)	3050 Zanker Road, 2840, 2860, 2880 Junction Avenue and 411 East Plumeria Drive, San Jose, Santa Clara County, California 95134
Property ID (APN or Block/Lot)	101-31-001 (3050 Zanker Road), 101-31-002 (2880 Junction Avenue),101- 31-003 (2860 Junction Avenue), 101-31-004 (2840 Junction Avenue), and 101-31-005 (411 East Plumeria Drive)
Location	Northeastern and northwestern sides of Junction Avenue, northeastern side of Zanker Road, northwestern side of East Plumeria Drive, and the southwestern and southeastern sides of Montague Expressway
Property Type	Industrial/Manufacturing
Site and Building Information	
Approximate Site Acreage/Source	23.63/Assessor
Number of Buildings	Five
Building Construction Date(s)/Source	1985/Client provided
Building Square Footage (SF)/Source	422,636/Client provided
Net Rentable Square Footage (SF)/Source	422,636/Rent Roll
Number of Floors/Stories	2
Basement or Subgrade Area(s)	None identified
Number of Units	7
Additional Improvements	Asphalt-paved parking areas, concrete-paved walkways, equipment and dumpster enclosures and associated landscaping
On-site Occupant(s)	Media Tek and Rich Tek (2840 Junction Avenue)
Current On-site Operations/Use	Office and research and development (R&D) of technical hardware
Current Use of Hazardous Substances	Yes; refer to Section 7.1
Regulatory Information	
Regulatory Database Listing(s)	Multiple

Based on a review of historical sources, the subject property was identified to consist of unimproved land and/or agricultural land from at least 1889 to 1899; agricultural land and roads from at least 1939 to 1982; and developed with the existing improvements in 1985.

The immediately surrounding properties consist of the following:

DRAFT

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), incorporating procedures specified in ASTM Standard

Practice E1527-21 of 3050 Zanker Road, 2840, 2860, 2880 Junction Avenue and 411 East Plumeria Drive, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

Other Environmental Considerations include, but are not limited to, de minimis conditions and/ or business environmental risks such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in the ASTM Standard. These may also affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

This assessment has revealed no evidence of related conditions of concern in connection with the subject property, except for the following:

- Asbestos - Based on the age of the buildings, asbestos may be present in the building material. Given the good condition of the suspect ACM, these materials can be effectively managed as part of an Asbestos O&M Plan until such time as renovation or demolition activities necessitate their removal. The objective of an O&M Plan is to implement a practical management approach to controlling identified ACM within the subject property. The O&M Plan is designed to cleanup existing contamination, minimize future fiber release by controlling disturbance of ACM, and monitor the condition of the ACM until it is removed. An O&M Plan was not in place at the subject property.
- AEI observed evidence of seepage of water from the subsurface into a portion of the 2860 Junction Avenue building. Water damaged carpet tiles was observed in the vacant office areas. No mold was observed in the areas of water intrusion.

DRAFT

RECOMMENDATIONS

Based on this assessment, AEI recommends the following:

- Asbestos - Based the good condition of the suspect ACM, these materials can be effectively managed in place as part of an Asbestos O&M Plan. An Asbestos O&M Plan should be developed and implemented at the property.
- The source(s) of seepage of water into the 2860 Junction Avenue building should be investigated by a licensed professional. Repairs should be made as necessary.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in accordance with AEI's proposal and in conformance with the scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 3050 Zanker Road, 2840, 2860, 2880 Junction Avenue and 411 East Plumeria Drive, San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-21, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

This report uses the following definitions, as defined by ASTM Standard E1527-21:

Recognized Environmental Condition (REC) - (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

Controlled Recognized Environmental Condition (CREC) - a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

Historical Recognized Environmental Condition (HREC) - a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

De Minimis Conditions - a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.

DRAFT

Business Environmental Risk (BER) - a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice.

While not a defined term in ASTM, de minimis conditions and BERs are combined and reported as Other Environmental Considerations:

Other Environmental Considerations (OEC) - include, but are not limited to, de minimis conditions and/or business environmental risks (BERs) such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in the ASTM Standard. These may also affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-21. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 Limitations

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made

DRAFT

are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-21.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-21 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-21.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample

DRAFT

analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including the key site manager, this limiting condition is not expected to alter the overall findings of this assessment.

1.6 Data Failure and Data Gaps

In conformance with ASTM E1527-21, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-21, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. In conformance with ASTM E1527-21, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-21, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	As noted in Section 3.0, the earliest historical resource obtained during this assessment indicated that the subject property was unimproved land and/or developed agriculturally. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for agricultural purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, historical topographic maps, agency records, previous reports

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

DRAFT

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of MetLife Investment Management LLC, MetLife Real Estate Lending LLC and their respective affiliates, successors and assigns. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors, or assigns.

Reliance is provided in accordance with AEI's Proposal executed on February 12, 2025 and the Terms and Conditions for Professional Consulting Services between AEI and Metlife dated April 3, 2009. The limitation of liability defined in the Terms and Conditions for Professional Consulting Services is the aggregate limit of AEI's liability to the client and all relying parties.

DRAFT

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

The subject property is located on the northeastern and northwestern sides of Junction Avenue, the northeastern side of Zanker Road, the northwestern side of East Plumeria Drive, and the southwestern and southeastern sides of Montague Expressway in a mixed commercial, industrial, and residential area of San Jose, California. The property totals approximately 23.63 acres and is improved with Five 2-story buildings totaling approximately 422,636 square feet. The subject property is currently occupied by Media Tek and Rich Tek (2840 Junction Avenue). The 411 East Plumeria Drive, 2860 Junction Avenue, 2880 Junction Avenue, and 3050 Zanker Road buildings were vacant on the date of the onsite reconnaissance. On-site operations consist of office and research and development (R&D) of technical hardware. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas, concrete-paved walkways, equipment and dumpster enclosures, and associated landscaping.

Property Information	
Site Address(es)	3050 Zanker Road, 2840, 2860, 2880 Junction Avenue and 411 East Plumeria Drive, San Jose, Santa Clara County, California 95134
Property ID (APN or Block/Lot)	101-31-001 (3050 Zanker Road), 101-31-002 (2880 Junction Avenue),101- 31-003 (2860 Junction Avenue), 101-31-004 (2840 Junction Avenue), and 101-31-005 (411 East Plumeria Drive)
Location	Northeastern and northwestern sides of Junction Avenue, northeastern side of Zanker Road, northwestern side of East Plumeria Drive, and the southwestern and southeastern sides of Montague Expressway

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit	Marine sedimentary and alluvial deposits of the Cenozoic era Source: USGS and United States Department of the Interior
Soil Series	Urban Land Clear Lake Complex: Poorly drained silty clay with a depth of 66 inches; parent material described as alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics; 65% urban land and 35% Clear Lake and minor components Urban Land Campbell Complex: Moderately well-drained silt loam, silty clay loam and silty clay with a depth of 79 inches; parent material described as alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics; 70% urban land and 30% Campbell and minor components Urban Land: this designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures; due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property/USDA Soil Survey Source: USDA Soil Survey
USGS Topographic Map	Milpitas, California Quadrangle
Nearest surface water to subject property	Guadalupe River and Coyote Creek/approximately 2,000-feet west and east of the subject property, respectively
Flood Zone	Zone X Source: FEMA Map 06085C0068J, dated 02/19/2014
Wetlands	No Source: National Wetlands Inventory
Additional notes	None

Groundwater Flow Direction	West Source: SCCEHD's May 8, 2014 Voluntary Cleanup Program Case Closure for Lockheed Marting – 3100 Zanker Road (located adjoining to the north of the subject property)
Estimated Depth to Groundwater	8.42-12.99 feet bgs

DRAFT

	Source: SCCEHD's May 8, 2014 Voluntary Cleanup Program Case Closure for Lockheed Martin – 3100 Zanker Road (located adjoining to the north of the subject property)

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL SUMMARY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-21 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, historical topographic maps, and agency records, is as follows:

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
Prior to 1889	Unknown use/Data failure; refer to Section 1.6.1	Topographic maps, aerial photographs, Sanborn maps, city directories, agency records
1889-1899	Unimproved land and/or agricultural land	Topographic maps
1939-1982	Agricultural land and roads	Aerial photographs, topographic maps
1985	Current buildings constructed for office, manufacturing and R&D purposes	Agency records
1985-Present	Current commercial buildings/Office, R&D, manufacturing	Aerial photographs, city directories, agency records, prior reports, interviews, site observations

Based on a review of historical sources, the subject property was identified to consist of unimproved land and/or agricultural land from at least 1889 to 1899; agricultural land and roads from at least 1939 to 1982; and developed with the existing improvements in 1985.

AEI did not identify potential environmental concerns in association with the current or historical use of the subject property.

If available, copies of historical sources are provided in the report appendices.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1939-2020, non-inclusive):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939	Agricultural land and roads	NORTHWEST: Agricultural land and roads NORTHEAST: Agricultural land and roads SOUTHEAST: Agricultural land and roads SOUTHWEST: Agricultural land and roads
1948, 1950, 1956, 1963, 1968	No significant changes	NORTHWEST: No significant changes NORTHEAST: No significant changes SOUTHEAST: No significant changes SOUTHWEST: No significant changes

DRAFT

Year(s)	Subject Property Description	Adjoining Site Descriptions
1974, 1979	No significant changes	NORTHWEST: Roadway followed by agricultural land NORTHEAST: Roadway followed by agricultural land SOUTHEAST: No significant changes SOUTHWEST: No significant changes
1982	No significant changes	NORTHWEST: No significant changes NORTHEAST: Roadway followed by agricultural land and a commercial-type building SOUTHEAST: Roads followed by a commercial-type building and vacant land SOUTHWEST: Roads followed by vacant land
1998	Developed with the existing structures and paved parking/drive areas	NORTHWEST: Well installations and roadway followed by commercial-type buildings NORTHEAST: Well installations and roadway followed by residential and commercial development SOUTHEAST: Well installations and roads followed by commercial-type buildings SOUTHWEST: Well installations and roads followed by commercial-type buildings and vacant land
2006, 2009, 2012, 2016, 2020	No significant changes	NORTHWEST: No significant changes NORTHEAST: No significant changes SOUTHEAST: No significant changes SOUTHWEST: Well installations and roads followed by commercial-type buildings

DRAFT

Subject property:

- No potential environmental concerns identified

Adjoining Site(s):

- No potential environmental concerns identified

If available, copies of historical aerial photographs are provided in the report appendices.

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 City Directories

A search of historical city directories was conducted for the subject property utilizing EDR. Directories were reviewed in approximate five-year increments from February 13, 2025. Refer to the appendices for a complete list of historical subject property tenants identified by EDR.

The first listing for the subject property address of 3050 Zanker Road appeared in 1991. Additional subject property street address listings are pending; however, the pending information is not considered a significant concern based on other historical research and information available through prior reports. No potential tenants of concern were identified based on AEI's review of the available historical city directories.

The following table summarizes the results of the city directory search for the subject property.

Subject Property

Year(s)	Address - Occupant Listed
1991	3050 Zanker Road – Grumman Systems Support Corporation
1992	3050 Zanker Road – Chips & Technologies and Grumman Systems Support
1995	3050 Zanker Road – Joy Weston
1996	3050 Zanker Road – Outsource, Inc. and Ultratech Stepper
2000	3050 Zanker Road – Ultratech Stepper
2005, 2010, 2014, 2017	3050 Zanker Road – Ultratech
2020	3050 Zanker Road – David Flesberg and Ultratech Electronics Advanced

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

The table below summarizes the search of historical city directories conducted for the adjoining sites. Refer to the appendices for a complete list of historical adjoining occupants identified during the review of city directories obtained from EDR.

Adjoining Sites

Direction	Address(es)	Potential Listings of Concern
Northwest	3137 & 3151 Zanker Road and 260 & 270 Innovation Drive	No Listings provided
Northeast	330, 350 and 370 Elan Village Lane, 670 and 690 River Oaks Parkway and 695 River Oaks Parkway	No Listings provided
Southeast	350 & 408 East Plumeria Drive and 2880 & 2950 Zanker Road	No Listings provided
Southwest	2833 & 2851 Junction Avenue and 3061 & 3081 Zanker Road	No listings provided

Subject property:

- No potential environmental concerns identified

Adjoining Site(s):

- No potential environmental concerns identified

DRAFT

3.4 Historical Topographic Maps

AEI reviewed historical topographic maps of the subject property and surrounding area. A search was made of the EDR collection of topographic maps. Historical topographic maps were reviewed for the following years (1889-2021, non-inclusive):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1889, 1897, 1899	Unimproved land and/or agricultural land	NORTHEAST: Unimproved land and/or agricultural land SOUTHEAST: Unimproved land and/or agricultural land SOUTHWEST: Unimproved land and/or agricultural land NORTHWEST: Unimproved land and/or agricultural land
1953, 1961, 1968, 1973	Agricultural land and roadway	NORTHEAST: Agricultural land and roads SOUTHEAST: Agricultural land and roads SOUTHWEST: Agricultural land and roads NORTHWEST: Agricultural land and roads
1980	Vacant land	NORTHEAST: Roadway followed by vacant land SOUTHEAST: Vacant land SOUTHWEST: Vacant land NORTHWEST: Roadway followed by vacant land
2012, 2015, 2018, 2021	Developed urban area	Developed urban area

Subject property:

- No potential environmental concerns identified

Adjoining Site(s):

- No potential environmental concerns identified

If available, copies of historical topographic maps are provided in the report appendices.

3.5 Chain of Title

In accordance with our approved scope of services, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

On February 13, 2025, AEI contacted the Santa Clara County Environmental Health Department (SCCEHD) via website, email for information on the subject property. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems.

According to Ms. Tanaya Farahani, the following information was on file for the subject property:

UltraTech (3050 Zanker Road/2880 Junction Avenue)

SCCEHD records indicated that Ultratech, Inc. (3050 Zanker Road/2880 Junction Avenue) was a permitted Hazardous Material Business Plan (HMBP), hazardous waste generator, and hazardous waste treatment facility. Ultratech was a manufacturer of semiconductor equipment that generated waste stripper/photoresist, mixed solvents, lab debris/wipes, caustic liquid, waste oil, non-RCRA hazardous liquids (antifreeze, biocide, paint, and adhesives,) and waste aerosol cans. The file included the original Hazardous Waste Generator Permit Application for Ultratech Stepper, Inc., dated December 20, 1993, which indicated that this business was a manufacturer of semiconductor photolithographic steppers. SCCEHD records included multiple correspondences, waste inventories, permits, inspections, and HMBPs. Ultratech was a hazardous material storage, a hazardous waste generator, and a hazardous waste treatment facility (Permit by Rule and Conditional Authorization) facility. The Permit by Rule documentation indicated that one waste water treatment system was closed as of January 2011. File documentation included decommissioning activities for the system closure. The system was described as a Neutralization System that consisted of two connected neutralization tanks with a combined capacity of approximately 1,050 gallons. The secondary containment had a capacity of 1,200 gallons. The treatment system was in an enclosed building and received waste water with elevated pH generated from process operations. An inspection of the tank was conducted in 2008, which did not identify leaks, punctures, cracks, corrosion, damage, structural inadequacies, or installation defects. Deficiencies were identified in connection with the secondary containment leak detection system and overfill protection system. The file included an O&M Plan for the pH Neutralization System.

The file indicated that Ultratech planned to close the facility at 2880 Junction Avenue in November 2009. The file included various hazardous waste manifest records, which confirmed the waste removal activities from the subject property. The file included a Tiered Permitting Phase I Environmental Assessment Checklist, dated November 14, 2008, which concluded that no further investigation was necessary to determine the existence, nature, and/or extent of contamination at the subject property.

DRAFT

The file included a letter from the City of San Jose to Veeco Process Equipment, Inc., dated July 27, 2023, which indicated that the Pre-Treatment Program of the San Jose-Santa Clara Regional Wastewater Facility had ceased all manufacturing operations and all industrial process wastewater discharges. The inspection conducted on June 13, 2023, verified that Veeco Process Equipment, Inc. had ceased operations, disconnected all process and wastewater treatment equipment, and no longer discharges any industrial process wastewater. Based on this information, Industrial Wastewater Discharge Permit Number SJ-688B is no longer valid and was revoked on the date of this letter. Veeco Process Equipment, Inc. is no longer permitted to discharge any industrial process wastewater from this facility at 3050 Zanker Rd. San Jose, CA 95134. A new permit will be required if Veeco Process Equipment, Inc. wishes to restart process operations.

NXP Semiconductors USA Inc. (411 E. Plumeria Drive)

The file included CERS documentation for NXP, which indicated that this business maintained an HMBP as of 2012. The facility was identified as a hazardous waste generator with no hazardous materials, USTs or ASTs. The non-waste hazardous material inventory statement included isopropyl alcohol. The hazardous waste inventory included spent solvents (solder flux and isopropanol), absorbents, and lab waste. An inspection of the facility in March 2016 identified containers of solder waste, used batteries, and oil filters.

On February 13, 2025, AEI contacted the State Water Resources Control Board (SWRCB) via website for information on the subject property. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems.

AEI reviewed records on GeoTracker, which indicated that evidence of current or prior use or storage of hazardous substances was not on file for the subject property with the SWRCB.

4.2 Fire Department

On February 13, 2025, AEI contacted the City of San Jose Fire Department (SJFD) via website for information on the subject property to identify any evidence of previous or current hazardous substance usage and/or for any historical information available for the subject property.

According to online permit records, the following information was on file for the subject property:

2840 Junction Avenue

The file included a Hazardous Material Business Plan for Lifeguard, Inc., dated April 2002, which the facility stored diesel fuel in a 450-gallon AST that was located adjacent to the building.

2860 Junction Avenue

The file included 1984-1985 and 1987 permits for construction of a manufacturing facility at the subject property. The file included fire prevention inspections and structural calculations.

2880 Junction Avenue

DRAFT

The file included Hazardous Material Business Plans, correspondences, inspections and hazardous material/waste inventory, and hazardous material storage system permits for Ultratech Stepper. The file included a November 20, 2009 Closure Plan for Hazardous Material Storage and Waste Treatment Operations that was prepared by TGO Solutions for Meade Construction Group, Inc. The document described the facility closure and decontamination activities in the labs, chemical storage room, industrial waste neutralization system and removal of a liquid nitrogen tank and deionized water system. The March 29, 2010, Post-Closure Report for Hazardous Material Storage and Waste Treatment Operations was prepared by TGO Solutions for Meade Construction Group, Inc. on March 29, 2010. The facility closure was approved as of December 2, 2009. The report discussed the removal of the above-noted equipment and hazardous materials and facility decontamination. The report concluded that the post-closure inspection indicated that the building posed no significant risk to persons occupying these areas or the environment and are acceptable to remain in place post-closure. The field test results for residual corrosivity demonstrated that the secondary containment structure for the former IWN system, which Ultratech intended to leave in place, posed no significant risk to persons or the environment and was acceptable to remain in place post closure with no further action or maintenance activities required. The file included wipe sampling documentation, facility photographs and inspection records.

3050 Zanker Road

The file included 1984-1985 permits for the construction of an industrial/R&D facility at the subject property. The file included Hazardous Material Storage System Permit Applications for Ultratech Stepper, which indicated that the facility generated solvent wastes. The file included hazardous material and waste inventories, Hazardous Material Business Plans and waste treatment system documentation, which were previously discussed in Section 4.1. The file included a May 19, 2023 Facility Closure for Veeco that included the removal of two acid-waste neutralization tanks, litho process lab and chase, meteorology lab, debonding closet and a diesel generator (separate permit). The file included the February 1, 2023 Facility Closure Report for Veeco Process Equipment that was prepared by ACT Enviro. The document indicated that Veeco was a laser and lithography assembly and testing facility. There were no significant chemical spills or releases on the property when Veeco occupied the building. The building has been vacated, and all equipment that used hazardous materials were remediated prior to transfer to the new facility. No hazardous wastes remained at the building. The AWN was decommissioned with all waste waters treated and pH adjustment prior to the system being decommissioned. The file included a Sampling Plan for the Veeco facility closure, dated May 1, 2023, which included soil sampling in multiple locations in the building. The file included a Revised Facility Closure Report that was prepared by ACT on August 16, 2023. The file referenced the June 30, 2023 sampling report, which indicated that all samples were either non-detect (VOCs and TPH) or within tolerance (pH). On June 20, 2023, ACT Enviro confirmed the removal of the former diesel fuel emergency generator from the facility.

4.3 Building Department

On February 13, 2025, AEI contacted the City of San Jose Building Department (SJBD) via website for information on the subject property in order to identify historical tenants, features of concern and property use.

The SJBD file included numerous construction permits for the existing office, warehouse and industrial/R&D buildings, interior and exterior site improvement permits, electrical, pluming and/or gas piping, mechanical and site development permits, fire sprinkler system permits,

DRAFT

sign permits and various correspondences, business plans and Certificates of Occupancy. Environmentally significant information in the SJ Permits file is discussed in the San Jose Fire Department section of this report.

4.4 Planning Department

On February 13, 2025, AEI contacted the City of San Jose Planning Department (SJPD) via website for information on the subject property in order to identify AULs associated with the subject property.

AEI spoke with a representative of the planning department, who indicated that evidence indicating the existence of AULs was not on file for the subject property with the City of San Jose Planning Department.

4.5 Assessor's Office

On February 13, 2025, AEI contacted the Santa Clara County assessor's office via website for information on the subject property in order to determine the earliest recorded date of development and use.

Please refer to the following table for information obtained:

Records Summary

APN	101-31-001 (3050 Zanker Road), 101-31-002 (2880 Junction Avenue),101- 31-003 (2860 Junction Avenue), 101-31-004 (2840 Junction Avenue), and 101-31-005 (411 East Plumeria Drive)
Acreage	23.63 acres
Construction Date	Not provided
Building Square Footage	Not provided
Current Owner	Not provided

4.6 Other Agencies Searched

HWTS

On February 13, 2025, AEI accessed the **California Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)** online database for information pertaining to hazardous waste disposal associated with the subject property. The HWTS generates reports on hazardous waste shipments for generators, transporters, and treatment, storage or disposal facilities (TSDFs).

HWTS included the following records for the subject property:

- Hama Tech USA, Inc. (3050 Zanker Road) is an inactive hazardous waste transporter facility as of November 24, 2008. Manifest records identified the removal and offsite disposal of approximately 0.13 tons of other organic solids in 2008.
- Ultra Tech A Division of Veeco (3050 Zanker Road) is an inactive hazardous waste transporter facility as of June 30, 2020, and June 30, 2023. Manifest records identified the removal and offsite disposal of alkaline solution wastes without metals, unspecified alkaline solution wastes, aqueous solution wastes, unspecified aqueous

DRAFT

solution wastes, off-specification, aged or surplus inorganic wastes, other inorganic solid wastes, hydrocarbon solvents, unspecified solvent mixture waste, waste oil & mixed oil, unspecified oil-containing wastes, off-specification, aged or surplus organic wastes, unspecified organic liquid mixture waste, other organic solids, other empty containers, laboratory waste chemicals, liquids with mercury, liquid with halogenated organic compounds and acidic liquid wastes between 1993 and 2023. Manifest records indicated that approximately 0.46 tons, 3.01 tons, 0.93 tons, 0.79 tons, 0.71 tons, 0.60 tons, and 0.21 tons of liquid with halogenated organic compounds were disposed of offsite in 1995, 1996, 1997, 1998, 1999, 2000, and 2001, respectively. The manifest listing for other empty containers identified 0.015 tons of containers in 2005.

- San Disk Corporation (2880 Junction Avenue) is an inactive hazardous waste transporter facility as of August 15, 2016. Manifest records identified the removal and offsite disposal of approximately 0.0025 tons of other inorganic solid wastes in 2016.
- Western Digital Technologies (2880 Junction Avenue) is an inactive hazardous waste transporter facility as of March 7, 2019. Manifest records identified the removal and offsite disposal of a total of approximately 0.007 tons of other inorganic solid wastes in 2016 and 2017.
- Ultra Tech (2880 Junction Avenue) is an inactive hazardous waste transporter facility as of June 30, 2004. Manifest records identified the removal and offsite disposal of unspecified organic liquid mixture wastes and other organic solids in 2002, 2003, and 2005.
- Metlife Market (2860 Junction Avenue) is an inactive hazardous waste transporter facility as of April 7, 2020. No manifest records were included in HWTS.
- General Instrument (2860 Junction Avenue) is an inactive hazardous waste transporter facility as of June 30, 1998. No manifest records were included in HWTS.
- MCPP Montague Pointe LLC, C/O Cushman & Wakefield (411 East Plumeria Drive) is an inactive hazardous waste transporter facility as of July 19, 2021. No manifest records were included in HWTS.
- Viking Freight System, Inc. (411 East Plumeria Drive) is an inactive hazardous waste transporter facility as of November 15, 1996. Manifest records identified the removal and offsite disposal of photochemical/photo processing wastes in 1993, 1995, and 1996.
- NXP USA (411 East Plumeria Drive) is an inactive hazardous waste transporter facility as of June 30, 2024. Manifest records identified the removal and offsite disposal of off-specification, aged, or surplus inorganic wastes, other inorganic solid wastes, unspecified oil-containing wastes, off-specification, aged, or surplus organic waste, other organic solids, and laboratory waste chemicals between 2013 and 2022.

EnviroStor

On February 13, 2025, AEI accessed the **California Department of Toxic Substances Control (DTSC) EnviroStor database**, which contains information on investigation, cleanup, permitting, and/or corrective actions that are planned, being conducted, or have been completed under DTSC oversight.

EnviroStor records indicated that Ultratech Stepper, Inc. (2880 Junction Avenue) was a tiered permit facility that needs evaluation. No additional information was included in EnviroStor. However, the SCCEHD file included a Tiered Permitting Phase I Environmental Assessment

DRAFT

Checklist, dated November 14, 2008, which concluded that no further investigation was necessary to determine the existence, nature, and/or extent of contamination at the subject property.

CalEPA

The CalEPA Regulated Site Portal indicated that Ultratech, A Division of Veeco (3050 Zanker Road) and Ultratech, Inc. (2880 Junction Avenue) were registered USEPA Air Emission Inventory System (EIS) facilities. No additional pertinent information was included in the CalEPA Regulated Site Portal.

SCVWD

SCVWD's Well Map identified four groundwater monitoring wells on the subject property. These wells (MW-1, MW-2, MW-3, and MW-4) were permitted in 1986 and reportedly destroyed as of 2000. No additional information about the monitoring wells was included in the SCVWD records. ATC's August 2, 2012 Phase I ESA included a review of prior Phase I ESAs, which indicated that the monitoring wells were originally installed in 1986 for an unknown purpose and properly decommissioned in 2000. In 2007, ATC spoke with Mr. Dave Higgins of the Santa Clara Valley Water District, who inspected well destruction activities at the subject property. Mr. Higgins indicated that if groundwater monitoring wells were installed for geotechnical investigations unrelated to potential threats to environmental health, the previous owners were not required to submit reports and/or sampling records to environmental agencies. Considering the prior destruction of the monitoring wells more than 24 years ago, the absence of any records of onsite LUST or Cleanup Program cases, and the current regulatory status, the former monitoring wells are not considered a REC.

4.7 Oil and Gas Wells

On February 13, 2025, AEI reviewed the California Geologic Energy Management Division (CalGEM) maps concerning the subject property and nearby properties. The maps contain information regarding oil and gas well development.

According to the CalGEM map, oil or gas wells are not located within 500 feet of the subject property. AEI did not identify evidence of environmental concerns during the map review.

4.8 Oil and Gas Pipelines

On February 13, 2025, AEI reviewed the National Pipeline Mapping System (NPMS) Public Map Viewer concerning the subject property and nearby properties. The maps contain information regarding oil and gas pipeline development.

According to the NPMS map, oil or gas pipelines are not located within 500 feet of the subject property. AEI did not identify evidence of environmental concerns during the map review.

4.9 State Environmental Superliens

On February 13, 2025, the NETR Online Environmental Lien and AUL State Statutes website was visited to determine if the State of California has an environmental superlien that would allow environmental authorities the right to place a first priority lien on the subject property.

DRAFT

According to the NETR Online Environmental Lien and AUL State Statutes website, the State of California does not allow environmental superliens.

4.10 State Property Transfer Laws

Aspects of a property's coverage generally fall under state disclosure laws which are considered legal issues, and as such legal counsel should be consulted.

DRAFT

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-21 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix Cof this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion, if any, are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property Listed	Number of Listings within Search Distance	REC or OEC (Yes or No)
Federal NPL (Superfund) sites	1.0	No	0	
Federal Delisted NPL sites	0.5	No	0	
Federal CERCLA removals/orders sites	0.5	No	1	No; based upon the distance, inferred direction of groundwater flow and/or regulatory status, the listed sites are not considered evidence of a REC.
Federal CERCLA sites with NFRAP	0.5	No	2	No; based upon the distance, inferred direction of groundwater flow and/or regulatory status, the listed sites are not considered evidence of a REC.
Federal RCRA facilities undergoing Corrective Action	1.0	No	2	No; however, see below for further discussion of some of the identified listing(s).
Federal RCRA TSD facilities	0.5	No	0	
Federal RCRA generators (LQG, SQG, VSQG)	SP/ADJ	No	Multiple	No; however, see below for further discussion of some of the identified listing(s).

DRAFT

Database	Search Distance (Miles)	Subject Property Listed	Number of Listings within Search Distance	REC or OEC (Yes or No)
Federal RCRA NonGen/NLR sites	SP/ADJ	No	Multiple	No; however, see below for further discussion of some of the identified listing(s).
Federal IC/EC sites	SP	No	0	
Federal ERNS sites	SP	No	0	
State/Tribal "Superfund" equivalent sites	1.0	No	1	No; based upon the distance, inferred direction of groundwater flow and/or regulatory status, the listed site is not considered evidence of a REC.
State/Tribal hazardous waste facilities	0.5	No	41	No; however, see below for further discussion of some of the identified listing(s).
State/Tribal landfill and solid waste disposal facilities	0.5	No	0	
State/Tribal leaking storage tanks	0.5	No	13	No; based upon the distance, inferred direction of groundwater flow and/or regulatory status, the listed sites are not considered evidence of a REC
State/Tribal registered storage tanks	SP/ADJ	No	0	
State/Tribal voluntary cleanup sites	0.5	No	0	
State/Tribal IC/EC registries	SP	No	0	
State/Tribal brownfield sites	0.5	No	0	
Orphans	N/A	No	3	No; none of the identified orphan sites are located in the immediate vicinity (500-feet) of the subject property, and/or based upon the distance and relative gradient, the sites are not considered a REC.
Additional Environmental Record lists	SP/ADJ	No	See below	No; however, see below for further discussion of some of the identified listing(s).

Facility Name	Ultratech, Hama Tech USA, Veeco Process Equipment
Address	3050 Zanker Road
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	RCRA Non Gen/NLR(2), FINDS(3), CERS(2), HWTS(3), EMI(2), HAZNET(2), ECHO, E Manifest, CUPA Listings, NPDES, HAZMAT, CIWQS
Comments	The RCRA database indicated that this site was a registered non-generator of hazardous waste with no reported violations. No pertinent information was included in the FINDS, ECHO, and HAZMAT databases. The CERS and EMI listings indicated that this site was a permitted air emissions facility with BAAQMD from 1996 to 2021. Refer to Section 4.6 for a discussion of the HWTS, HAZNET, and E Manifest listings. The CUPA database indicated that Veeco was

DRAFT

	a registered HMBP, Conditionally Authorized and hazardous waste generator facility. The NPDES and CIWQS listings are associated with permitted industrial waste water and storm water discharges. There are no listings associated with any hazardous substance spill/release incidents or USTs at this site. Based on regulatory status, this site is not considered a REC. No additional action or investigation appears warranted at this time.

Facility Name	Western Digital Tech, San Disk, Ultra Tech Stepper
Address	2880 Junction Avenue
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	PFAS ECHO(2), HWTS(3), HAZNET(3), FINDS(4), ECHO(2), EMI, RCRA Non Gen/ NLR(2), EnviroStor, CUPA Listings, HAZMAT(2), CERS, NPDES(2), CIWQS(2)
Comments	The PFAS ECHO database indicated that Western Digital Tech is a business in the electronics industry with no violations identified. Refer to Section 4.6 for a discussion of the HWTS and HAZNET listings. No pertinent information was included in the FINDS, ECHO, and HAZMAT databases. The CERS and EMI listings indicated that this site was a permitted air emissions facility with BAAQMD from 2002 to 2009. The RCRA database indicated that this site was a registered non-generator of hazardous waste with no reported violations. The EnviroStor database indicated that this site is a Tiered Permit facility that is inactive and needs evaluation. No additional pertinent information was included in the EnviroStor database. However, the SCCEHD file included a Tiered Permitting Phase I Environmental Assessment Checklist, dated November 14, 2008, which concluded that no further investigation was necessary to determine the existence, nature, and/or extent of contamination at the subject property. The CUPA database indicated that this site is a registered HMBP and Conditionally Authorized facility. The NPDES and CIWQS listings are associated with permitted industrial waste water and storm water discharges. There are no listings associated with any hazardous substance spill/release incidents or USTs at this site. Based on regulatory status, this site is not considered a REC. No additional action or investigation appears warranted at this time.

Facility Name	Metlife Market, General Instrument
Address	2860 Junction Avenue
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	FINDS, RCRA Non Gen/NLR, ECHO, HWTS(2)
Comments	The RCRA database indicated that this site was a registered non-generator of hazardous waste with no reported violations. No pertinent information was included in the FINDS and ECHO databases. Refer to Section 4.6 for a discussion of the HWTS listings. There are no listings associated with any hazardous substance spill/release incidents or USTs at this site. Based on regulatory status, this site is not considered a REC. No additional action or investigation appears warranted at this time.

Facility Name	Mediatek USA, Inc., Metropolitan Life Insurance
Address	2840 Junction Avenue
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	EMI(3), FINDS

DRAFT

Comments	The EMI listings indicated that this site was a permitted air emissions facility with BAAQMD from 2013 to 2022. No pertinent information was included in the FINDS database. There are no listings associated with any hazardous substance spill/release incidents or USTs at this site. Based on regulatory status, this site is not considered a REC. No additional action or investigation appears warranted at this time.

Facility Name	MCPP Montague Pointe, Viking Freight Systems, NXP Semiconductors
Address	411 East Plumeria Drive
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	ECHO(2), HWTS(2), HAZNET(2), PRP, RCRA NonGen/NLR(2), FINDS, CERS HAZ Waste, CUPA Listings, HAZMAT, E Manifest
Comments	The PRP listing indicated that Viking Freight System was identified on the Superfund database. However, the location of the landfill and petrochemical recycling facilities was in Monterey Park, California, and Salt Lake City, Utah, and not the subject property. It appears likely that Viking Freight Systems had an office location in the 411 East Plumeria building. Based on this information, the Superfund listings are not associated with the subject property. No pertinent information was included in the ECHO, FINDS, and HAZMAT databases. Refer to Section 4.6 for a discussion of the HWTS, HAZNE,T and E Manifest listings. The RCRA database indicated that this site was a registered non-generator of hazardous waste with no reported violations. The CERS and CUPA databases indicated that NXP USA, Inc. is a registered hazardous waste generator with reported violations. There are no listings associated with any hazardous substance spill/release incidents or USTs at this site. Based on regulatory status, this site is not considered a REC. No additional action or investigation appears warranted at this time.

Facility Name	Zebra Technologies
Address	2833 Junction Avenue
Distance & Direction	Adjoining to the southwest
Hydrologic Position	Cross- to down-gradient
Databases Listed	RCRA Non Gen/NLR
Comments	The RCRA database indicated that this site was a registered non-generator of hazardous waste with no reported violations. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	MS Carita, Inc.
Address	404 East Plumeria Drive
Distance & Direction	Adjoining to the southeast
Hydrologic Position	Cross- to up-gradient
Databases Listed	PFAS ECHO, CUPA Listings
Comments	The PFAS ECHO database indicated that this site is a printing facility. No additional pertinent information was included in the database. The CUPA database indicated that this site is a registered hazardous waste generator with no reported violations. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	Multiple listings
Address	3061 and 3081 Zanker Road

DRAFT

Distance & Direction	Adjoining to the northwest
Hydrologic Position	Cross- to down-gradient
Databases Listed	RCRA NonGen/NLR, CERS HAZ Waste(2), CUPA Listings(4), HWTS(2), HAZNET(2), HAZMAT(2), CERS(2), RCRA-SQG(2), FINDS, ECHO, E Manifest
Comments	The RCRA database indicated that multiple tenants of this site are registered non-generators of hazardous waste and/or small-quantity generators of hazardous waste with no reported violations. The CERS and CUPA databases indicated that multiple tenants of this site are registered hazardous waste generators, HMBP, and chemical storage facilities with reported violations. The HWTS, HAZNET, and E Manifest listings are associated with the removal and offsite disposal of hazardous substances under manifest. No pertinent information was included in the HAZMAT, FINDS, and ECHO databases. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	Boston Properties, Lockheed Martin
Address	3100, 3110 and 3120 Zanker Road
Distance & Direction	Adjoining to the northwest
Hydrologic Position	Cross- to down-gradient
Databases Listed	CUPA Listings(3), EMI(3), HAZMAT, SLIC, Deed, HWTS, HAZNET, HAZMAT(2), CERS, RCRA Non Gen/NLR
Comments	The CUPA database indicated that this site is a registered HMBP facility. The EMI listings are associated with permitted air emissions with BAAQMD. No pertinent information was included in the HAZMAT database. The database indicated that the Cleanup Program case associated with oil contamination in groundwater was opened on March 16, 2010, and closed on May 8, 2014. The Voluntary Cleanup Program Case Closure Summary indicated that this case was associated with the release of hydraulic oil in an elevator shaft in the central portion of this adjacent building. Residual soil and groundwater contamination were located at this site. However, the groundwater gradient was identified as being towards the west, which is away from the subject property. A Deed Restriction with land use restrictions was recorded on November 25, 2013. The HWTS, HAZNET, and E Manifest listings are associated with the removal and offsite disposal of hazardous substances under manifest. No pertinent information was included in the HAZMAT database. The RCRA database indicated that this site is a registered non-generator of hazardous waste with no reported violations. Based on the Cleanup Program case closure and gradient, the review of additional regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	EH2, MCI Worldcom, MCI DBA Verizon Business, Electric Hydrogen
Address	2950 Zanker Road
Distance & Direction	Adjoining to the southeast
Hydrologic Position	Up-gradient
Databases Listed	CERS HAZ Waste, CUPA Listings, HWTS(2), HAZNET(2), CERS, AST(2), HAZMAT, RCRA Non Gen/NLR(2), PFAS ECHO, E Manifest
Comments	The CERS and CUPA databases indicated that this site is a registered hazardous waste generator and HMBP and APSA facility with no reported violations. The HWTS, HAZNET, and E Manifest listings are associated with the removal and offsite disposal of hazardous substances under manifest. The AST database identified a total of 12,000 gallons of aboveground storage of unspecified substances in one or more ASTs. No pertinent information was included in the HAZMAT database. The RCRA database indicated that tenants of this site are registered non-generators of hazardous waste with no reported violations. The

	PFAS ECHO listing indicated that Electric Hydrogen is a business in the industrial gas industry with no violations identified. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	Elan Village Apartments, Elan Apartments at River Oaks
Address	345 Elan Village Lane/Village Center Drive
Distance & Direction	Adjoining to the northeast
Hydrologic Position	Up- to cross-gradient
Databases Listed	HAZMAT(2), CUPA Listings, CERS, HWTS, HAZNET
Comments	The CUPA and CERS listings indicated that this site is a registered HMBP and chemical storage facility with reported violations. No pertinent information was included in the HAZMAT database. The HWTS and HAZNET listings are associated with the removal and offsite disposal of hazardous substances under manifest. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	River Oaks Chiropractic
Address	670 River Oaks Parkway
Distance & Direction	Adjoining to the northeast
Hydrologic Position	Up- to cross-gradient
Databases Listed	CUPA Listings
Comments	The CUPA database indicated that this site was a silver waste generator facility. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	Dry Clean USA
Address	670 River Oaks Parkway
Distance & Direction	Adjoining to the northeast
Hydrologic Position	Up- to cross-gradient
Databases Listed	EDR HIST Cleaner
Comments	The EDR HIST Cleaner identified Dry Clean USA as a tenant of this site from 1998 to 2014. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	Express 1 Hour Photo
Address	670 River Oaks Parkway
Distance & Direction	Adjoining to the northeast
Hydrologic Position	Up- to cross-gradient
Databases Listed	RCRA-SQG, FINDS, ECHO, HWTS, HAZNET, CUPA Listings
Comments	The RCRA database indicated that this site is a registered small quantity hazardous waste generator with no reported violations. No pertinent information was included in the FINDS and ECHO databases. The HWTS and HAZNET listings are associated with the removal and offsite disposal of hazardous substances under manifest. The CUPA database indicated that this site was a silver waste generator facility. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

DRAFT

Facility Name	Netgear, Priam Corporation, Griffin Essentials
Address	350 East Plumeria Drive
Distance & Direction	Adjoining to the southeast
Hydrologic Position	Up- to cross-gradient
Databases Listed	RCRA Non Gen/NLR, RCRA-SQG, EnviroStor, FINDS, ECHO, EMI(2), CERS HAZ Waste, CUPA Listings, HAZMAT, CERS
Comments	The RCRA database indicated that tenants of this site are registered non-generators of hazardous waste and/or small-quantity hazardous waste generators with no reported violations. The EnviroStor database indicated that this site is a Tiered Permit facility that is inactive and needs evaluation. No pertinent information was included in the FINDS, ECHO and HAZMAT databases. The EMI listings are associated with permitted air emissions with BAAQMD. The CERS and CUPA databases indicated that this site is a registered hazardous waste generator, Conditionally Exempt, Conditionally Authorized, HMBP and chemical storage facility with reported violations. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site does not represent a REC.

Facility Name	IT Corporation, Snider JR/RW Trucking, Insituform Technology
Address	3000 and 3010 Zanker Road
Distance & Direction	Approximately two miles north
Hydrologic Position	Cross-gradient
Databases Listed	HWTS(4), HAZNET(2), FINDS(3), ECHO(3), RCRA NonGen/NLR, CERS(2), EMI, RCRA-SQG(2), SEMS-Archive, CORRACTS, RCRA-TSDF, EnviroStor, HWP, TX Ind Haz Waste
Comments	EDR plotted multiple listings for IT Corporation, Snider JR/RW Trucking and Insituform Technology (3000 and 3010 Zanker Road) at the subject property. However, according to DTSC's April 2017 Site Screening Report, this site is actually located approximately 2 miles north of the subject property. Based on distance and gradient, this site does not represent a REC.

5.2 Vapor Migration

AEI conducted a limited screening for potential vapor encroachment conditions (VECs) that may affect the property. The VEC screening focused on the current and historical usage of the property and also utilized the aforementioned regulatory agency database report provided by EDR to evaluate identified Chemicals of Concern (COCs), including petroleum hydrocarbons. To identify the area of concern (AOC) for contaminated sites with non-petroleum hydrocarbon COCs, AEI utilized the approximate minimum search distance defined by ASTM E2600-22 of 1,760 feet (1/3 mile) from the property boundary for COC-contaminated sites. For sites contaminated with petroleum hydrocarbon COCs, AEI utilized the AOC approximate minimum search distance of 528 feet (1/10 mile). The AOC was adjusted accordingly based on review of physical setting characteristics, known release information, property and land features, groundwater flow direction, and soil type, et al.

ASTM's Vapor Encroachment guidance indicates that when groundwater flow direction can be estimated or determined, the cross-gradient or downgradient radius distances can be significantly reduced. AEI calculated the reduced AOC distances when considering groundwater flow direction by utilizing the following default distances, which were determined using the Buonicore Methodology: (non-petroleum hydrocarbon COCs) 1,760 feet in the upgradient direction; 365 feet in the cross-gradient direction; and 100 feet in the downgradient direction and (petroleum hydrocarbon COCs) 528 feet in the upgradient direction; 165 feet in the cross-gradient direction if Light, Non-Aqueous Phase Liquid, (LNAPL

DRAFT

i.e. floating product) is suspected; 95 feet in the cross-gradient direction if no LNAPL is suspected; 100 feet in the downgradient direction (LNAPL suspected); and 30 feet in the downgradient position (LNAPL not suspected).

AEI reviewed potential sources of COCs from the sites reported on the EDR database report and historical document review. Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the sites evaluated were determined to represent VECs at the property.

5.3 Per- and Polyfluoroalkyl Substances (PFAS)

As defined in Section 3.2.36 of the current ASTM Standard E1527, hazardous substance means "those substances defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts." Hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA are outside of the scope of the current ASTM Standard E1527.

On July 8, 2024, the Final EPA rule became effective that designates perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) as CERCLA hazardous substances. Per the current ASTM Standard E1527, once this rule went into effect, these substances are evaluated within the scope of this standard, and a release or likely release of PFOA and/or PFOS is considered a REC.

Other than PFOA/PFOS, compounds classified as PFAS are not currently classified as hazardous substances under CERCLA, and thus the potential presence of PFAS (other than PFOA/PFOS) is outside of the scope of the current ASTM Standard E1527, and does not constitute a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change.

AEI's research of potential PFAS contamination focuses on the release/likely release of PFOA/PFOS. However, if additional information pertaining to other PFAS is identified, AEI will also assess/discuss these compounds, as deemed applicable/appropriate within the scope of this investigation.

It should be noted that AEI's screening of PFOA/PFOS and other PFAS is based solely on review of the resources cited within this report. Identification, or lack thereof, is not a warranty that PFOA/PFOS or other PFAS contamination is present or absent at a site. Additionally, it should be noted that given the evolving nature of science and regulatory oversight of PFOA/PFOS and other PFAS, additional sources of contamination may exist at the subject property, adjoining sites and/or other nearby sites that were not identified by the limited data and screening tools cited within this report.

5.3.1 PFAS-Related Regulatory Database Listings

As an initial screening tool for potential PFAS contamination, AEI reviewed PFAS-related database listings from EDR.

Location	PFAS Database Listing Identified	PFAS Database Listing Not Identified	Comments
Subject Property	✔		Refer to Section 5.1 for further discussion

PRELIM

Location	PFAS Database Listing Identified	PFAS Database Listing Not Identified	Comments
Adjoining and/or Nearby Site(s)	✔		Refer to Section 5.1 for further discussion

5.3.2 Potential On-Site PFAS Sources/Concerns

AEI researched the standard historical and regulatory sources cited within this report to determine if a release or likely release of PFOA/PFOS has occurred at the subject property.

A voluntary industry phaseout of PFOA and PFOS was first implemented in the late 1990s and was fully implemented for PFOS by 2002 and PFOA by 2015. Although PFOA and PFOS have been generally phased out since 2015, studies have found that precursor PFAS in wastewater treatment systems may form PFOA and PFOS. As such, even after 2015, the presence of PFAS in wastewater discharges is considered a likely source of PFOA and PFOS contamination.

Potential Source	Yes	No
Past or present industrial operations that potentially included the use of PFAS (if "yes" see *Potential PFAS Sources from Industrial Uses* section/table below)		✔
The use or discharge of AFFF (if "yes" see *Potential Sources of AFFF* section/table below)		✔
Electroplating (1950s-present) NOTE: Electroplating (specifically hard chromium plating) is an industrial activity where PFAS-containing mist suppressants may have been used		✔
Agricultural uses, specifically 1970s-present that included application of biosolids/WWTP sludge that potentially contained PFAS		✔
Wastewater treatment plant (WWTP) (1960s-present		✔
Landfill operations / waste disposal areas (1960s-present)		✔
Mining / quarrying / oil production		✔
Commercial car wash (1989-2010)		✔
Dry cleaner and/or commercial laundry (1970s-2010)		✔

AEI identified a former acid waste neutralization (AWN) at the 3050 Zanker Road building. However, no evidence of any potential PFAS compounds was identified in connection with this operation. AEI did not identify any other obvious potential sources of PFAS contamination originating from on-site operations/sources.

DRAFT

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 Interviews

Pursuant to ASTM E1527-21, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 Interview with Owner

The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including the key site manager, this limiting condition is not expected to alter the overall findings of this assessment.

6.1.2 Interview with Key Site Manager

The key site manager, Mr. Reggie Synegal of Cushman Wakefield, was contacted in person on March 4, 2025. Mr. Reggie Synegal has been associated with the subject property since approximately 2019. Mr. Reggie Synegal stated that all the subject property buildings except for 2840 were vacant. Mr. Reggie Synegal was asked if they were aware of any of the following:

	Yes	No
Any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features.		✔
Any knowledge of previous environmental investigations conducted on site.		✔
Any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products.		✔
Any known plans for site redevelopment or change in site use.		✔
Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.		✔
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.		✔
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.		✔
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.		✔

6.1.3 Past Owners, Operators, and Occupants

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.4 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. In conformance with ASTM E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched

DRAFT

by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

6.2.1 Environmental Liens

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

6.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI by the client during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment (3050 Zanker Road, 2840, 2860 and 2880 Junction Avenue and 411 East Plumeria Drive, San Jose, California), prepared by ATC Associates, Inc. (August 2, 2012)

At the time of the prior assessment, the subject property was developed with the existing 2-story commercial buildings that contained a total of 422,532 square feet on a total of 23.62 acres. The 3050 Zanker Road, 2860 Junction Avenue and 411 East Plumeria Drive buildings were constructed circa 1985, and the 2840 and 2880 Junction Avenue buildings were constructed circa 1990. The subject property buildings were occupied by Ultra Tech (3050) for commercial offices, wafer production and R&D labs; and Fusion-io (2880), MediaTek (2860), Oracle (2840) and NXP (411) for commercial office and R&D lab purposes. The 2860 Junction Avenue building and a portion of the 2840 Junction Avenue building were vacant on the date of the onsite reconnaissance.

ATC indicated that the Ultratech unit included the generation of neutralized developer waste during typical Ultratech laboratory operations. The waste travelled via gravity from clean room sinks to two onsite treatment systems. Representatives of Ultratech indicated that the treatment system unit is comprised of three tanks in which two reagents (sulfuric acid and sodium hydroxide) are added in order to neutralize developer waste. The nonhazardous discharge (effluent) is subsequently discharged via the sanitary sewer, per City of San Jose Environmental Services Department Watershed Protection requirements. No violations or releases are reported for the treatment system.

Prior to the construction of the existing improvements, the subject property consisted of agricultural land.

ATC reviewed three prior Phase I ESAs that were prepared between May 2005 and December 2007, which did not identify any evidence of RECs or HRECs. No further investigation was recommended by the prior consultants. The prior Phase I ESAs indicated that four former onsite monitoring wells (originally installed in 1986 for an unknown purpose) were properly decommissioned in 2000. In 2007, ATC spoke with Mr. Dave Higgins of the Santa Clara Valley Water District, who inspected well destruction activities at the property. Mr. Higgins indicated that if groundwater monitoring wells were installed for geotechnical investigations, unrelated

DRAFT

to potential threats to environmental health, the previous owners are not required to submit reports and/or sampling records to environmental agencies. Given that the former onsite groundwater monitoring wells did not appear to have been associated with on- or offsite releases, were not considered to represent RECs to the property in prior reports, and were properly decommissioned in 2000, ATC did not consider the former presence of groundwater monitoring wells to represent an environmental concern.

ATC did not identify any evidence of RECs or HRECs in connection with the subject property. ATC indicated that ACM and elevated lead levels were previously identified at the subject property. An O&M Program to manage asbestos was reportedly in place. A drinking fountain at 3050 Zanker reportedly had elevated levels of lead but was reportedly modified/replaced in October 2012.

Phase I Environmental Site Assessment (3050 Zanker Road, 2840, 2860 and 2880 Junction Avenue and 411 East Plumeria Drive, San Jose, California), prepared by URS (November 14, 2014)

At the time of the prior assessment, the subject property was developed with the existing 2-story commercial buildings that contained a total of 417,532 square feet on a total of 23.63 acres. The 3050 Zanker Road, 2860 Junction Avenue, and 411 East Plumeria Drive buildings were constructed circa 1985, and the 2840 and 2880 Junction Avenue buildings were constructed circa 1990. The subject property buildings were occupied by Ultra Tech (3050), SanDisk/Fusion-io (2860 and 2880), and NXP Semiconductors (411). The 2840 Junction Avenue building was vacant on the date of the onsite reconnaissance.

URS indicated that there was no evidence of underground storage tanks (USTs). Two integrated diesel belly tanks were observed onsite at 3050 Zanker Road and 2840 Junction Avenue, associated with tenant-owned and maintained emergency generators. The emergency generator associated with the 3050 Zanker Road building was installed in 2001 and has a belly tank with a capacity of approximately 180 gallons. The emergency generator associated with the 2840 Junction Avenue building was installed in 1999 and has a capacity of approximately 450 gallons. The 2840 Junction Avenue building is currently vacant, and therefore, the emergency generator is not currently in use. No staining or other evidence of leaks or spills was observed in the areas of the emergency generators.

URS indicated that Ultratech reportedly operated a pH waste neutralization system for wastewater containing developer that is generated in the R&D laboratory areas onsite. According to a review of a prior report prepared by ATC in 2012, the treatment system is comprised of three tanks in which two reagents are added (sodium hydroxide and sulfuric acid) to neutralize the developer waste. The nonhazardous effluent is discharged into the sanitary sewer system. This area was not accessible to URS at the time of the site visit. No violations or releases were reported associated with the treatment system in the prior report.

URS indicated that the subject property was originally developed for agricultural use sometime before 1939. The subject property appears to have been fallow agricultural land by 1979 and was cleared by 1982. The subject property was then redeveloped with the current onsite buildings beginning in 1985. All five buildings were completed by 1989. Since construction, the buildings have been occupied by various office tenants.

DRAFT

URS did not identify any evidence of RECs or HRECs in connection with the subject property. URS indicated that one potential business environmental risk associated with ACMs was identified. It was URS's opinion that these materials may be managed in place under an Asbestos O&M Plan. The existing O&M Plan for the subject property dated August 9, 2005 should be updated to reflect current site conditions.

Copies of the reports are included in the appendices.

Note: As the above documentation was not prepared by AEI, the information obtained was not verified for accuracy and a critique of the information contained therein is beyond the scope of this assessment.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	March 4, 2025
AEI Site Assessor(s)	Christopher Olsen
Property Escort(s)/ Relationship(s) to Property	Mr. Reggie Synegal, Chief Engineer
Units/Areas Observed	AEI accessed all interior and exterior areas of the subject property.
Area(s) not accessed and reason(s)	None
Other Physical Constraints	None

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

Feature	Observed on Subject Property
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use (including drums, totes, and intermediate bulk containers)	✔
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)	✔
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use	
Unidentified Substance Containers	
Electrical or Mechanical Equipment Likely to Contain Fluids	✔
Interior Stains or Corrosion	
Strong, Pungent, or Noxious Odors	
Pools of Liquid

DRAFT

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 REGULATED HAZARDOUS SUBSTANCES/WASTES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE (INCLUDING DRUMS, TOTES, AND INTERMEDIATE BULK CONTAINERS)

Substance/Waste (size/ quantity)	Location	Operations Associated with Material	Disposal Method/ Frequency	Secondary Containment	Staining/Spills
Diesel (450-gallon AST)	Enclosure adjacent to 2840 Junction	Emergency generator	N/A	Yes	None observed

AEI did not observe any evidence of surface staining or spillage of hazardous substances at the subject property.

7.1.2 Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

Aboveground Hazardous Substance or Petroleum Product Storage Tanks (ASTs)

AST(s)

Size (gallons)	Contents	Installation Date	AST Condition	Location	Construction/ Secondary Containment	Product Piping	Staining/ Spills
450	Diesel	Not determined	Good	Enclosure adjacent to 2840 Junction	Double-walled	None	None

AEI did not observe any evidence of surface staining or spillage of diesel fuel at the subject property.

7.1.3 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/ No)	Non-PCB Label (Yes/ No)
Pad-Mounted	8	PG&E	1985	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing, while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Elevators

DRAFT

The subject property is equipped with five hydraulic elevators. Based on the age of the buildings (post-1978), it is unlikely that the hydraulic fluid within the equipment contains PCBs. The equipment for the elevators is located in ground-floor equipment rooms in each building. No evidence of stains or leaks was observed at the base of the equipment during the site reconnaissance. The elevators are reportedly maintained by San Francisco Elevator. Based on the good condition and regular maintenance of the elevators, they are not a REC.

Compressors

Multiple air compressors were located in the 3050 Zanker building. The air compressors contain small amounts of hydraulic oil. No spills, staining or leaks were observed on or around the compressors. Based on the good condition of the equipment, the compressors are not a REC.

Trash Compactor

One hydraulic trash compactor was observed on the northwestern side of the subject property. No evidence of a significant release was observed around this unit. Based on the age of the compactor, it is unlikely that this unit contains PCBs. Based on the lack of significant staining or other evidence of a release, the presence of this equipment is not a REC.

7.1.4 Drains, Sumps, and Clarifiers

Multiple storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.1.5 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not considered evidence of a REC.

7.1.6 Other

Cleaning supplies and detergents are stored in storage rooms. All chemicals were packaged in consumer quantities. Based on the nature of these materials, the presence of cleaning supplies at the subject property is not considered evidence of a REC.

7.2 Adjoining Property Reconnaissance Findings

Feature	Observed on Adjoining Property
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use (including drums, totes, and intermediate bulk containers)	
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)	
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use	
Unidentified Substance Containers	
Electrical or Mechanical Equipment Likely to Contain Fluids	✔

DRAFT

Feature	Observed on Adjoining Property
Interior Stains or Corrosion	
Strong, Pungent, or Noxious Odors	
Pools of Liquid	
Drains, Sumps, and Clarifiers	✔
Pits, Ponds, and Lagoons	
Stained Soil or Pavement	✔
Stressed Vegetation	
Solid Waste Disposal or Evidence of Fill Materials	
Waste Water Discharges	
Wells	✔
Septic Systems	
Biomedical Wastes	
Dry Cleaners	
Other	

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Transformer(s)

Multiple pad-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not a REC.

7.2.2 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2.3 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not considered evidence of a REC.

7.2.4 Wells

Two water production wells were observed adjacent to the subject property in enclosures along Montague Expressway. Based on the nature of use of the wells, the presence of the wells is not considered a REC.

DRAFT

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970's. Common ACMs include pipe-covering, insulating cement, insulating block, refactory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: *Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials* ("Green Book"). In 1973, NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989, the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most United States firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Based on the Green Book, the Ban and Phase-Down rule and the 1985 date of construction, building materials may contain asbestos. According to the EPA, while suspect or ACM may be managed in place under an operations and maintenance program, sampling would be required to document the presence or absence of asbestos containing material. A summary of suspect or presumed ACM is provided below.

Material	Location	Estimated Quantity	Friable (Yes/ No)	Physical Condition	Action
Drywall/joint compound	Office areas	Throughout	No	Good	O&M
Vinyl flooring/mastic	Office areas	Throughout	No	Good	O&M

DRAFT

Roofing materials	Roofs	Not determined	No	Good	O&M

Based on the age of the buildings, asbestos may be present in the building material. Observed building materials were in good condition and can be effectively managed as part of an asbestos O&M Plan until such time as renovation or demolition activities necessitate their removal. An O&M Plan was not in place at the subject property.

8.2 Lead-Based Paint

Lead-based Paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

LBP is defined as any paint with any detectable amount of lead present in it. It is important to note that LBP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LBP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the date of construction (post-1978), LBP is not likely to be present. Observed painted surfaces were in good condition with no chalking, peeling or flaking.

8.3 Radon

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all

DRAFT

three zones, and the EPA recommends site specific testing to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2.0 pCi/L and 4.0 pCi/L, equal to or below the action level of 4.0 pCi/L set forth by the US EPA.

8.4 Drinking Water Quality

The City of San Jose supplies potable water to the subject property. The most recent water quality report (2023) states that the 90th percentile value for lead levels in samples obtained from the area's water supply was less than 5 µg/L. No samples had lead levels exceeding the regulatory action level. Typical sources of lead in drinking water include corrosion of household plumbing systems. Overall, lead levels are well within standards established by the United States EPA.

8.5 Mold

Molds are simple microscopic organisms that can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth in places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed evidence of seepage of water from the subsurface into a portion of the 2860 Junction Avenue building. Water-damaged carpet tiles were observed in the vacant office areas. No mold was observed in the areas of water intrusion. The source(s) of the water into the 2860 Junction Avenue building should be investigated by a licensed professional.

DRAFT

9.0 FINDINGS, CONCLUSIONS, AND RECOMMENDATIONS

9.1 FINDINGS

9.1.1 RECOGNIZED ENVIRONMENTAL CONDITION

Recognized Environmental Condition (REC) is defined by the current ASTM Standard Practice E1527-21 as (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

This assessment has revealed no evidence of RECs in connection with the subject property.

9.1.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-21 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

This assessment has revealed no evidence of CRECs in connection with the subject property.

9.1.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-21 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

This assessment has revealed no evidence of HRECs in connection with the subject property.

9.1.4 OTHER ENVIRONMENTAL CONSIDERATIONS (NON-ASTM SCOPE)

Other Environmental Considerations (OEC) include, but are not limited to, de minimis conditions and/or business environmental risks (BERs) such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in the ASTM Standard. These may also affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

This assessment has revealed no related conditions of concern in connection with the subject property, except for the following:

DRAFT

- Asbestos - Based on the age of the building(s), asbestos may be present in the building material. Given the good condition of the suspect ACM, these materials can be effectively managed as part of an Asbestos O&M Plan until such time as renovation or demolition activities necessitate their removal. The objective of an O&M Plan is to implement a practical management approach to controlling identified ACM within the subject property. The O&M Plan is designed to clean up existing contamination, minimize future fiber release by controlling disturbance of ACM, and monitor the condition of the ACM until it is removed. An O&M Plan was not in place at the subject property.
- AEI observed evidence of seepage of water from the subsurface into a portion of the 2860 Junction Avenue building. Water-damaged carpet tiles were observed in the vacant office areas. No mold was observed in the areas of water intrusion. The source(s) of the water into the 2860 Junction Avenue building should be investigated by a licensed professional. Repairs should be made as necessary

9.1.5 Significant Data Gaps

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

9.2 Conclusions

AEI has performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), incorporating procedures specified in ASTM Standard Practice E1527-21 of 3050 Zanker Road, 2840, 2860, 2880 Junction Avenue and 411 East Plumeria Drive, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

Other Environmental Considerations include, but are not limited to, de minimis conditions and/or business environmental risks such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in the ASTM Standard. These may also affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

This assessment has revealed no evidence of related conditions of concern in connection with the subject property, except for the following:

- Asbestos - Based on the age of the buildings, asbestos may be present in the building material. Given the good condition of the suspect ACM, these materials can be effectively managed as part of an Asbestos O&M Plan until such time as renovation or demolition activities necessitate their removal. The objective of an O&M Plan is

DRAFT

to implement a practical management approach to controlling identified ACM within the subject property. The O&M Plan is designed to cleanup existing contamination, minimize future fiber release by controlling disturbance of ACM, and monitor the condition of the ACM until it is removed. An O&M Plan was not in place at the subject property.

- AEI observed evidence of seepage of water from the subsurface into a portion of the 2860 Junction Avenue building. Water damaged carpet tiles was observed in the vacant office areas. No mold was observed in the areas of water intrusion.

9.3 RECOMMENDATIONS

Based on this assessment, AEI recommends the following:

- Asbestos - Based the good condition of the suspect ACM, these materials can be effectively managed in place as part of an Asbestos O&M Plan. An Asbestos O&M Plan should be developed and implemented at the property.
- The source(s) of seepage of water into the 2860 Junction Avenue building should be investigated by a licensed professional. Repairs should be made as necessary.

DRAFT

10.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

3050 ZANKER ROAD
SAN JOSE, CA 95134

COORDINATES

Latitude (North):	37.3986130 - 37ˆ 23' 55.00''
Longitude (West):	121.9305370 - 121ˆ 55' 49.93''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	594661.4
UTM Y (Meters):	4139425.8
Elevation:	23 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes

DRAFT

available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/16/2024 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 20 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are 41 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 60 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS RCRA MANIFEST: To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

A review of the PFAS RCRA MANIFEST list, as provided by EDR, and dated 12/30/2024 has revealed that there is 1 PFAS RCRA MANIFEST site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there are 24 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 6 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 09/16/2024 has revealed that there are 35 E MANIFEST sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 74 CA CUPA Listings sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

File Num: 606654

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

CALIFORNIA GULF MARI	2880 ZANKER RD STE 2	SE 0 - 1/8 (0.114 mi.)	P111	446

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D026
Waste Description:	Cresol
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl

DRAFT

ULTRATECH, INC. A DIVISION OF VEECO (Continued) **1000349751**

Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F020
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tri- Or Tetrachlorophenol Or Of Intermediates Used To Produce Their Pesticide Derivatives. (This Listing Does Not Include Wastes From The Production Of Hexachlorophene From Highly Purified 2,4,5-Trichlorophenol.)

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

DRAFT

ULTRATECH, INC. A DIVISION OF VEECO (Continued) **1000349751**

types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CPS-SLIC:

Name:	LOCKHEED MARTIN
Address:	3100 ZANKER ROAD
City,State,Zip:	SAN JOSE, CA 95134
Region:	STATE
Facility Status:	**Completed - Case Closed**
Status Date:	05/08/2014
Global Id:	T10000001911
Lead Agency:	SANTA CLARA COUNTY LOP
Lead Agency Case Number:	06S1W24D01s
Latitude:	37.4001316479991
Longitude:	-121.930650473541
Case Type:	Cleanup Program Site
Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	006
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Waste Oil / Motor / Hydraulic / Lubricating
EPA Region:	9
Coordinate Source:	Google Map Move
Cuf Case:	NO
Quantity Released Gallons:	Not reported
Begin Date:	03/16/2010
Leak Reported Date:	03/16/2010
How Discovered:	Other Means
How Discovered Description:	elevator maintenance; date approximate
Discharge Source:	Other
Discharge Cause:	Unknown
Stop Method:	Remove Contents
Stop Description:	remove elevator from service
No Further Action Date:	05/08/2014
CA Water Watershed Name:	Santa Clara - Coyote Creek (205.30)
Dwr Groundwater Subbasin Name:	Santa Clara Valley - Santa Clara (2-009.02)
Disadvantaged Community:	Not reported
CA Enviroscreen 3 Score:	31-35%
CA Enviroscreen 4 Score:	35-40%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	THERE IS A SITE MANAGEMENT PLAN IN PLACE FOR THIS SITE. NOTIFICATION MUST BE MADE TO COUNTY OF SANTA CLARA PRIOR TO ANY SITE REDEVELOPMENT. THERE IS FREE PRODUCT PRESENT UNDER THE BUILDING. Hydraulic fluid was released from the ram casing for an elevator at the site. 6,500 gallons of hydraulic fluid and groundwater have been pumped out to date. Had proposed to install a recovery well with a passive skimmer as their interim cleanup, but encountered footings while drilling inside the building. Many site limitations due to location of release within the building. Wells installed outside of the building.

Violation Source: CERS,

Site ID: 398178
Site Name: NeoPhotonics Corporation
Violation Date: 02-16-2018
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174

Violation Description: Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.

Violation Notes: Returned to compliance on 03/22/2018. BASED ON THE TYPE VIOLATIONS IT APPEARS THAT WEEKLY INSPECTIONS ARE NOT BEING CONDUCTED WITH CONTAINER TRANSFERS.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 398178
Site Name: NeoPhotonics Corporation
Violation Date: 11-19-2014
Citation: 22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)

Violation Description: Failure to maintain, reproduce, and provide the following documents at the facility where the FTU is operating: 1) The waste analysis plan for the treatment operation; 2) The written inspection schedule; 3) All training documents; 4) The contingency plan; 5) A copy of the most recent treatment notification and a copy of the most recent acknowledgement received from the Department, CUPA or authorized agency; 6) A copy of any local Air District permit and other permits required for the operation of the FTU; 7) A copy of the closure plan; 8) A copy of documents related to the environmental investigation and any cleanup, abatement or other necessary remedial action taken; and 9) Documentation of any convictions, judgments, settlements, or orders resulting from any action by any local, State, or federal environmental or public health enforcement agency concerning the operation of the facility within the last three years, as the documents would be available under the California Public Records Act.

Violation Notes: Returned to compliance on 12/19/2014.

The current waste analysis plan has not been updated since 2003 to reflect the current operation of the treatment system. Update the waste analysis plan and include a copy in the response.

Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Type: Other, not routine, done by local agency
Eval Notes: On site with Ethan McDermott to conduct a hazardous waste permit investigation of Eugenus Inc. after they submitted an HMBP to CERS declaring hazardous waste generation. Facility is R&D for semiconductors equipment. Facility has been operating on site since September 2017. Facility walk through was conducted with Joel Custodio, EH&S Manager. Mr. Custodio stated that they have been accumulating hazardous waste since January 2018. Facility has had no hazardous waste pick-ups. The following hazardous waste streams were observed on site: IPA saturated wipes contaminated piping and valves - coming from chemical vapor deposition The facility will be permitted for hazardous waste generation based on these observations. Notes: EPA ID is active on time of visit. Facility treats waste water coming from wet bench where new wafers are being cleaned, and is later discharged into POTW. Treatment unit receives ammonia- hydrogen peroxide- water mixture or HF-water Expired [Truncated]

Eval Notes: INSPECTION COMMENCED ON 6/11/2018 AND CONCLUDED TODAY. ON SITE WITH JOEL CUSTODIO TO CONDUCT A LIMITED WALK THROUGH OF THE FACILITY AND NEUTRALIZATION UNIT. THE FACILITY OPERATES ONE WET BENCH WHERE WAFERS ARE CLEANED IN BATH MIXES OF 200:1 AND 100:1 HYDROGEN FLUORIDE. ONCE BATHS BECOME SPENT A VALVE BELOW THE WET BENCH IS OPENED TO ALLOW FLOW TO A LIFT STATION, SUBSEQUENT RINSES AUTOMATICALLY FLOW THE LIFT STATION AS WELL. ONCE THE LIFT STATION REACHES A SPECIFIC LIQUID LEVEL, THE LIQUID IS PUMPED VIA PIPE TO THE NEUTRALIZATION TANK. WASTE NEUTRALIZATION OCCURS ONCE LIQUID WASTE ENTERS THE TANK.

Eval Notes: PER MR. DO THE WASTE WATER TREATMENT SYSTEM TREATS SCRUBBER WATER THAT ENTER THE SYSTEM BETWEEN PH ABOVE 3 AND IS TREATED TO MEET DISCHARGE LIMITS. JULY 18, 2018 HYDROFLUORIC ACID RINSE BATHS (SPENT) WERE SAMPLED AND ANALYZED FOR PH AND FLUORIDE. THE FLUORIDE SAMPLES RESULTS EXCEEDED HAZARDOUS WASTE LIMITS FOR FLUORIDE. TANK 1, RESULTS WERE 2696.8 MG/L AND TANK#2 RESULTS WERE 4007.31 MG/L. THE SPENT BATH WAS DRAINED VIA THE SINK, PLUMED TO THE WASTE WATER TREATMENT SYSTEM WHERE THE PH WAS ADJUSTED PRIOR TO DISCHARGE TO THE POTW. ACCORDING TO MR.DO IT HAS BEEN AT LEAST ONE YEAR THAT HYDROFLUORIC ACID HAS BEEN GENERATED IN THE CLEAN ROOM. IN ADDITION, THE FACILITY PLANS TO CONTAIN ANY FUTURE SPENT HYDRUFLOURIC ACID GENERATED AND SHIP IT OFF SITE . THE CONTAINER WAS CONFIRMED TO BE PRESENT AND EMPTY AT THE TIME OF INSPECTION. ***THE WASTE WATER NEUTRALIZING TREATMENT SYSTEM WILL CONTINUE TO BE USED FOR THE SCRUBBER SYSTEM. BE AWARE THAT THE FACILITY IS SUBJECT TO [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY

DRAFT

FORMFACTOR INC (Continued) **1024728656**

INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-06-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility submitted inventory on CERS on 1/30/14 with CERS ID 10415653.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 02-09-2016
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Follow up inspection to 5/6/15 routine inspection. During 5/6/15 inspection, it was noted that Lockheed had incomplete HMBP emergency plan and training plans submitted on CERS. Additionally, the HMBP inventory submitted on 1/30/14 was found to be incomplete (missing storage of propane). Return to compliance dated 56/4/15 noted item to be addressed and uploaded to CERS by 6/1/15. Item has not been uploaded to CERS and site was notified via phone of this in December of 2015. As of date of inspection, no CERS submittals received since 1/30/14.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-06-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facilty generates small quantities of research waste and larger quantiteis of UW lamps and batteries. All wastes transferred to exterior storage lockers for storage and accumulation. Reviewed receipts and manifests for 2015, 2014 for disposal of all wastes. Emergency info posted in lockers. Spill kits, extinguishers, and eyewash/shower stations at each storage location.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 19938
Site Name: CITY OF SAN JOSE - FIRE STATION #29
Violation Date: 02-01-2022
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes: Facility confirmed that they did not have an emergency posting. A template was provided to the facility during the inspection. THIS IS A REPEAT VIOLATION FROM INSPECTION DATED 7/31/2019.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 19938
Site Name: CITY OF SAN JOSE - FIRE STATION #29
Violation Date: 07-22-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate training program in safety procedures in the event of a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 02/01/2022. Facility has not documented emergency response or hazardous materials handling training for relevant employees. The HMBP Employee Training template was provided to the facility. Ensure that training is conducted annually, documented and retained for future inspections. Provide the inspector documentation of training in accordance with the requirements found in this section.

Violation Date:	02-01-2022
Citation:	HSC 6.5 25163(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25163(a)
Violation Description:	Failure to use a DTSC registered hazardous waste transporter to transport hazardous waste.
Violation Notes:	Facility is collecting and transporting abandoned hazardous waste back to this station as a part of standard operations, but has failed to receive authorization from the Department of Toxic Substance Control (DTSC). Complete and submit "Transportation Regulartory Exemption Appplication Variance" (DTSC 1294) immediately in order to transport hazardous waste legally for emergency response purposes. DTSC 1294 and guidance was provided to the facility during the inspection. Send a copy of the DTSC approval letter to the inspector for verification. THIS IS A REPEAT VIOLATION FROM INSPECTION DATED 7/31/2019.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to implement one or more of the following security measures for the facility: 1. Secure and control access to the oil handling, processing, and storage areas. 2. Secure the master flow and drain valves. 3. Prevent unauthorized access to starter controls and oil pumps. 4. Secure out-of-service and loading/unloading connections of oil pipelines. 5. Address the appropriateness of security lighting to both prevent acts of vandalism and assist in the discovery of oil discharges.
Violation Notes:	The 500-gallon biodiesel dispensing tank is behind a 6 foot brick wall, but observed that none of the gates that give access to this area were locked and the gate facing the main building does not appear to have a way to be secured. While the building is typically occupied 24-hours a day, this area is not patrolled, under video monitor or protected by a physical barrier. Ensure that this tank is able to be properly secured from unauthorized access or vandalism.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas.
Violation Notes: Facility is not conducting any tank inspections. Advised the facility's on-duty captain and Randy Sommers that they are required to regularly inspect and test their applicable petroleum tanks in accordance with a bulk storage tank industry standard. Based on statements from Randy Sommers, this facility will be using the STI SP001 Inspection Standard. Additional guidance, including the STI SP001 Inspection Checklist, was provided. Ensure that anyone conducting the required inspections are familiar with the entire tank inspection standard. Note: The 500-gallon diesel dispensing tank is severely corroded and shows signs of rust and coating failure on the majority of the tank shell. Refer to STI SP001 Standard for shell inspection and maintenance requirements.

DRAFT

CITY OF SAN JOSE - FIRE STATION #29 (Continued) **S118585076**

Violation Notes:	Observed the 500-gallon diesel dispensing tank's liquid level sensors in alarm during the inspection. 2 liquid level sensors are set up on this tank and their status' are displayed on a local panel: (A1) Secondary Containment was in "Trouble"; and (B1) High Liquid Level was in "Alarm". The on-duty captain reset the panel, which cleared B1 and it returned to normal function; however, A1 was still blinking "Trouble" on the panel. When asked about this A1 sensor, the on-duty captain stated that it's been noted and reported for maintenance multiple times over the last 10 years, but no action to correct the faulty sensor has been taken. When I spoke with the on-duty crew, they stated they dip the tank on a weekly basis to get the fuel levels, but they do not ever check the interstitial space for liquid. As per STI SP001 Standards, it is an inspection requirement to check the secondary containment for leaks on a monthly basis. Immediately begin either dipping the space to [Truncated]

Violation Date: 09-14-2023
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 10/10/2023. LAB 344: -1 X 0.5 GALLON STEP CAN CONTAINER OF SOLDER DROSS MISSING THE GENERATOR INFORMATION, CONTENT, PHYSICAL AND HAZARD PROPERTIES.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 131069
Site Name: Broadcom Inc. Innovation Bldg E2
Violation Date: 09-14-2023
Citation: 22 CCR 23 66273.32(e) - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.32(e)
Violation Description: Failure of a universal waste handler of PV modules, electronic devices, CRTs, and/or CRT glass who might accept and accumulate, but not treat, any PV module, electronic device, CRT, and/or CRT glass from an offsite source to submit notification with all required information to DTSC no later than 30 calendar days prior to accepting any above noted waste.
Violation Notes: Returned to compliance on 10/10/2023. FACILITY CONDUCTS UNIVERSAL WASTE COLLECTION EVENTS FOR EMPLOYEES TO DROP OF ELECTRONIC DEVICES FROM HOME BUT FAILED TO NOTIFY DTSC USING FORM 1382.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 131069
Site Name: Broadcom Inc. Innovation Bldg E2
Violation Date: 01-21-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 02/20/2020. DIESEL FUEL QUANTITY WAS VERIFIED ON SITE TO BE 660 GALLON CAPACITY.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
