Site Assessor: David Kaufman – Staff Scientist

EP Certification: I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR 312.10 (**Resume, Appendix A**).

Bernard A. Sentianin, PG
Senior Geologist

AAI Certification: We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Bernard A. Sentianin, PG
Senior Geologist

EXECUTIVE SUMMARY

At the request and authorization of the Client (Pacific Square San Gabriel, LLC), EEI conducted a Phase I Environmental Site Assessment (ESA) and Limited Soil Investigation (LSI) for the property generally located southeast of the intersection of South San Gabriel Boulevard and East El Monte Street, in the eastern portion of the City of San Gabriel, County of Los Angeles, California (i.e. "subject property"). The purpose of this Phase I ESA was to assess the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment (i.e., *recognized environmental condition* as delineated in ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, Designation E1527-13 [ASTM E1527-13]).

The following bulleted items summarize the information obtained during the preparation of this ESA:

- The subject property is located to the southeast of the intersection of South San Gabriel Boulevard and East El Monte Street, on the west side of South Gladys Avenue, in the eastern portion of the City of San Gabriel, California. The rectangular-shaped subject property is comprised of 49 parcels, identified by Assessor's Parcel Numbers (APNs): 5373-029-001 through 5373-029-022, 5373-030-001 through 5373-030-006 and 5373-030-009 through 5373-030-028, encompassing a total of 5.86-acres. The San Gabriel Nursery and Florist formerly occupied the subject property from at least 1950 until approximately 2017. According to the Client, a mixed commercial (first floor) / residential (upper floors) development with two (2) levels of subterranean parking is proposed for the subject property.

- The subject property formerly served as the growing area of the San Gabriel Nursery and Florist and is assigned the addresses 710, 718, 822 and 836 South San Gabriel Boulevard, and 705, 815, 817, 821, 823 and 827 South Gladys Avenue. Two (2) residences were formerly located within the southeastern portion of the subject property along South Gladys Avenue and are addressed 827 and 839 South Gladys Avenue.

- The subject property is bound to the north by East El Monte Street, followed by the retail shop and associated parking areas of the former San Gabriel Nursery and Florist, with Rosemead Gardens (600 South San Gabriel Avenue), and a public storage facility beyond. To the south, the subject property is bound by East Grand Avenue, followed by multi-family residential structures. To the east, the subject property is bound South Gladys Avenue, followed by a mix of single-family and multi-family residential development. To the west, the subject property is bound by South San Gabriel Boulevard, followed by a mix of commercial and retail development. The City of San Gabriel Planning Department Zoning Map indicated that the subject property is zoned for Commercial uses (C-1).

- Based on historical records such as aerial photographs and topographic maps, the subject property was occupied by structures and agricultural use from at least 1928. By 1938, nursery operations were apparent onsite, and by 1948, a commercial structure appeared associated with the subject property north of East El Monte Street. The subject property remained occupied by a nursery, with various configurations of structures and greenhouses, as well as residences on the southeast portion through a 2016 photograph. The adjacent and surrounding properties appeared as a mix of undeveloped agricultural land, and residential property, from at least 1928 through the 1950's. By 1964, an increase in commercial/industrial development was visible on the adjacent properties as well as in the immediate site vicinity.

- EEI contacted the Los Angeles County Department of Health Services - Public Health Investigation Office (LADHS-PHI), Los Angeles County Department of Public Works - Environmental Programs Division (LACDPW-EPD), State Water Resources Control Boards (SWRCB), California Department of Toxic Substance Control (DTSC) and reviewed other state and federal databases to determine if the subject property, or any adjacent properties, were listed as hazardous waste generators, underground storage tank (UST) releases, or as having other environmental concerns (i.e., spill, leak, or aboveground tank [AST]). The subject property, identified as the **San Gabriel Nursery** (632 South San Gabriel Boulevard) was listed under the Historical Underground Storage Tank (UST), Statewide Environmental Evaluation and Planning System (SWEEPS), Underground Storage Tank (UST) and Los Angeles Co. Industrial Waste and Underground Storage Tank (HMS) databases. These listings are related to the removal of former USTs from the subject property in 1988 and 2015. The San Gabriel Nursery and Florist was also listed under the HAZNET database for the reporting year 2016, identified by Envid: U001570611, with a waste category of "Off-specification, aged or surplus organics". The disposal method was identified as "Storage, Bulking and/or Transfer offsite – no treatment/recovery" for 0.231 tons of waste. These listings are not generally rationale for environmental concern, unless a site/facility has a dual listing, such as a reported release. The subject property is not associated with a documented release; therefore, these listings are not considered to be an environmental concern for the subject property. Several nearby sites were also identified under the database listings. Based on available information, current regulatory status and/or distance from the subject property, these sites are not considered to be a source of environmental concern to the subject property.

- Previous site investigation reports have been prepared for the subject property and were provided to EEI by the Client for review. In 1988, Petroleum Industry Consultants, Inc., (PIC) prepared a Tank Removal Geologic Report (PIC, 1988). According to the report, the property owners (i.e. San Gabriel Nursery and Florists) had contacted PIC to remove four (4) USTs from the facility identified as Tanks 1 and 2, located south of El Monte Street within the growing portion of the site, and Tanks 3 and 4, located north of El Monte Street east of the retail building. PIC was contracted to conduct a visual inspection of lithology; recover specified soil samples; and oversee subsequent laboratory testing of soil samples; and prepare a geologic report of tank removal operations. Tank removal operations were completed on December 29, 1987, in accordance with tank removal permit #3675B, issued by the LACDPW-EPD, Engineering Division.

Upon excavation, Tanks 1 and 2, one (1) 10,000-gallon diesel tank and one (1) 2,000-gallon diesel tank, and Tanks 3 and 4, one (1) 6,000-gallon leaded gasoline tank, and one (1) 550-gallon unleaded gasoline tank were removed from the tank pits. In addition, a pump dispenser was removed from a location south of Tank 4. In accordance with tank removal permit #3675B, issued by the LACDPW-EPD, six (6) soil samples were recovered from under the tanks at a depth of two feet below the tank bottom, at approximately 15 feet below ground surface (bgs) and one (1) sample from beneath the adjacent pump dispenser at a depth of one-foot bgs. Soil samples were analyzed for total petroleum hydrocarbons as gasoline (TPH) and for organic lead by EPA Method 7421. Sample analysis indicated TPH and lead concentration measured non-detectable in all samples except in sample P2 which exhibited TPH at a concentration of 50 parts per million (ppm). On March 16, 1988, based on a review of this information, the LACDPW-EPD found the tank closure was final and no further action was required.

Also, in September and November 2015, American Integrated Services, Inc. (AIS), was tasked with the permitting and documenting closure of removal of four (4) additional USTs from the subject property under the oversight of the LACDPW-EPD and San Gabriel FD (AIS, 2015). Reportedly, the nursery owners initially encountered a dispenser island for two (2) of the 550-gallon gasoline steel USTs during the process of reorganizing the nursery plants at the southwest corner of the property (northeast corner of S. San Gabriel Boulevard and N. Grand Avenue). The tanks were located using GPR (Ground Penetrating Radar). On September 1, 2015 the island and hardcover of both tanks was removed and the tanks were excavated. During this excavation two (2) additional 550-gallon gasoline USTs were discovered on the east side of the island. These were uncovered and an additional permit was applied for their removal.

On September 2, 2015, following the LADPW-EPD permit conditions, AIS removed the four (4) 550-gallon gasoline USTs. Additionally, AIS collected and submitted for analytical testing four (4) soil samples from approximately two (2) feet beneath the former location of four (4) 550-gallon gasoline USTs at a total depth of nine (9) feet bgs. Confirmation soil samples collected form the former tank locations detected trace concentrations of Benzene and Toluene above the laboratory method detection limits. Based on field observations and the analytical results of the confirmation soil samples, AIS requested closure under Closure Application No. 809481.

Subsequent response letters from LACDPW-EPD dated both December 3, 2015 and January 28, 2016, regarding the Closure Application stated that in order to better evaluate the report, additional information was requested via an Additional Closure Requirements sheet (due by January 4, 2016). The Additional Closure Requirements sheet requested TPH as Diesel Range Organics (DRO) and Total Recoverable Petroleum Hydrocarbons (TRPH) lab analysis results were required by the closure permit. Therefore, Alpha Scientific Corporation (ASC) prepared an analytical report for samples received on February 26, 2016 and analyzed for TPH-DRO and TRPH (Samples 1B through 4B). According to the report, analytical results indicated that concentrations of both TPH-DRO and TRPH were not detected in any of the samples analyzed (ASC, 2016).

The LACDPW-EPD responded on March 15, 2016 indicated that the office had reviewed the UST removal report dated November 12, 2015, and due to concerns regarding soil and groundwater impacts, and pursuant to the California Health and Safety Code, Chapter 6.7, Section 25297 (b), the LACDPW-EPD was referring the matter to the LARWQCB UST Program.

On March 25, 2016, the LARWQCB (Regional Board), indicated they were in receipt of the above referenced reports related to the property (i.e. AIS, 2015, and ASC, 2016). The LARWQCB stated that residual concentrations of fuel constituent posed a low threat to human health, and soil and groundwater quality beneath the site. Therefore, the LARWQCB stated that no further action was required to pursue any further soil and/or groundwater investigation at the site, and the Regional Board did not open a case for the site at that time.

On May 12, 2016, EEI prepared a Phase I ESA for the subject property and the adjacent property to the north across El Monte Street. EEI noted evidence of the following *RECs* in connection with the *subject property*:

- The subject property is the site of six (6) total former USTs which were removed from the property in 1988 and 2015. Although the USTs were granted regulatory closure and/or concurrence, no soil vapor sampling has been conducted to evaluate the former fueling areas for potential vapor intrusion concerns. Furthermore, given the absence of any soil vapor sampling performed at the former onsite UST locations and low levels of residual petroleum-hydrocarbons detected during tank removals, a pVEC cannot be ruled out for the subject property. Therefore, EEI recommended further investigation.

- Additional USTs, fuel dispending piping and/or vent lines, and related equipment may or still exist beneath portions of the subject property. If former fueling piping or stained or suspicious soil is encountered during future grading operations, these items and material should be evaluated and if deemed necessary, characterized for proper disposal.

- The subject property has been occupied with a nursery operation since 1950. As a result, there is a potential for restricted agricultural chemical residues to exist within near-surface soils onsite. EEI recommended that shallow soils be investigated for restricted agricultural chemical residues.

Although not considered a REC, the following non-scope considerations were identified:

- According to the information reviewed, structures on the subject property were built prior to 1978. Therefore, the presence of asbestos-containing materials (ACMs) and lead-based paint (LBP) within building materials is likely. EEI recommended a pre-demolition hazardous materials survey be performed on the site structures and related building materials, prior to any proposed future site improvements or demolition activities.

- Based on the subject property's historical agricultural activities, it is possible that buried/concealed/hidden agricultural by-products, irrigation and fuel piping, and/or storage tanks, both below and above ground may have existed or exists on the subject property. Any buried trash/debris, undocumented USTs or other waste encountered during future subject property development or improvements should be evaluated by an experienced environmental consultant prior to removal. If stained or suspicious soil is encountered during future grading operations, the material should be evaluated and if deemed necessary, characterized for proper disposal.

In May 2016, EEI conducted as Limited Phase II ESA for the subject property. The investigation included conducting a geophysical survey within select portions of the subject property that had been reported to formerly contain diesel and gasoline USTs, installation and sampling of six (6) temporary soil vapor probes, each set to approximately 5-feet bgs and specifically targeting the locations of three (3) former UST fields, and the collection and analysis of 38 soil samples from 19 representative locations throughout the subject property.

EEI provided the following findings and recommendations:

- The results of the geophysical survey did not reveal evidence of the presence of USTs or associated subsurface product piping within the areas surveyed, however, a possible excavation feature and/or trench was detected with GPR in one (1) area of the property suspected to formerly contain a UST(s).

- Detectable concentrations of Volatile Organic Compounds (VOCs) were reported in each of the soil vapor samples analyzed. However, none of the reported soil vapor concentrations exceeded their respective commercial California Office of Environmental Health Hazard Assessment (OEHHA) values.

- Concentrations of arsenic, lead and pesticides were detected within the shallow soil (upper 2 feet bgs) beneath the subject property. Based on soil analytical results, with the exception of shallow soil located within a 10 feet radius of sample locations EEI-S-16, EEI-S-9, and EEI-S-14, the balance of soil underlying the property can be reused for commercial purposes.

- Results of the STLC lead analysis indicated that a 10-feet radius to a depth of 2-feet, the equivalent of approximately 30 cubic yards (yd^3), or approximately 44 tons of soil, surrounding sample location EEI-S-16 would require disposal as Non-RCRA (California) hazardous waste, while the balance of soil underlying the subject property would qualify as non-hazardous waste.

- Based on concentrations of Dieldrin in soil exceeding the OEHHA commercial screening level of 130 µg/kg in samples collected from or within a 10-feet radius of sample points EEI-S-9 and EEI-S-14, excavations measuring approximately 20'x20' to depths of approximately 2 feet surrounding sample locations EEI-S-9 and EEI-S-14 are recommended. Excavations would generate approximately 30 yd^3, or 44 tons of soil per area, total approximately 60 yd^3, or approximately 88 tons. The excavated soil would qualify as non-hazardous waste.

- If suspected contaminated soil is encountered during normal grading and construction activities, EEI recommended that the soil be excavated and segregated/sampled under the supervision of an environmental professional. Upon verification, any contaminated soil should be properly characterized and disposed of offsite.

- Based on the subject property's historical agricultural activities, it is possible that buried/concealed/hidden agricultural by-products, irrigation and fuel piping, and/or additional storage tanks, both below and above ground may have existed or exists on the subject property.

- Any buried trash/debris, undocumented USTs or other waste encountered during future subject property development or improvements should be evaluated by an experienced environmental consultant prior to removal. If stained or suspicious soil is encountered during future grading operations, the material should be evaluated and if deemed necessary, characterized for proper disposal.

Ambient Environmental, Inc. (AEI) conducted an Asbestos Building Materials Survey for the property located at 700-800 South San Gabriel Boulevard on June 6, 2017. At the time of AEI's survey, the property consisted of a nursery with greenhouses and a single-story boiler room. AEI reported ACM to be present in roof mastic (5 ft^2) within an electric room roof located across from the boiler room, and within transite panels (200 ft_2) within the boiler room ceiling.

In a Certificate of Completion, dated December 13, 2017, Fresh Air Environmental Services, Inc. (FAES) certified that they removed and disposed of ACMs as per contract agreement dated November 27, 2017, and as per AEI's survey report dated October 2017.

- On June 20, 2018, EEI personnel conducted a reconnaissance of the subject property to physically observe the property and adjoining properties for conditions indicating a potential environmental concern. Concerns would include any evidence of contamination, distressed vegetation, petroleum-hydrocarbon staining, waste drums, illegal dumping, or improper waste storage and/or handling. No evidence of environmental concerns was noted on the subject property during our site reconnaissance.

- On July 31, 2018, EEI conducted a Limited Soil Investigation at the subject property, which included the collection of five (5) shallow soil samples from within north-central portion of the subject property which had recently been affected by fire and the collection of three (3) soil samples from within the southeastern portion of the property which formerly contained residential structures. The five (5) northern samples were analyzed for TPH, Title 22 Metals, VOCs, Polyaromatic Hydrocarbons (PAHs), Organochlorine Pesticides (OCPs), and for Asbestos, while the three southeastern samples were analyzed for Total Lead.

- Concentrations of Petroleum Hydrocarbons, PAHs and OCPs were detected in select soil samples at concentrations below their respective screening levels for commercial use soil, while Arsenic was detected in each sample analyzed at concentrations exceeding screening levels for a commercial use scenario (3.0 milligrams per kilogram [mg/kg]) and exceeding the California Department of Toxic Substances Control (DTSC) School Evaluation Screening Value (12 mg/kg).

  Although the Arsenic concentrations, ranging between 27 mg/kg to 37 mg/kg, detected in site soils slightly exceeds the school site evaluation value of 12 mg/kg, given the future mass grading (i.e., mixing and redistributing of site soil), the detected Arsenic value is not considered to be a significant environmental concern for the subject property, and no further investigation is warranted at this time.

- As part of the Phase I ESA, EEI performed a Vapor Encroachment Screen (VES) for the subject property, in accordance with ASTM E2600-15. The purpose was to evaluate whether sites (e.g., gas stations, dry cleaners, or other listings of environmental concern) that store or dispose of potential chemicals of concern or have documented releases, may migrate as vapors onto the property, as a result of contaminated soil and/or groundwater which may be present on or near the property (i.e., a potential Vapor Encroachment Condition or pVEC).

  Based on EEI's Tier 1 Screening evaluation, onsite historical fueling uses are considered to pose a pVEC at the subject property. This included the four (4) former USTs removed in 1988, and the four (4) former USTs removed in 2015 from the subject property. EEI conducted a Tier 2 Screening, consisting of a review of existing data regarding the UST removals and subsequent investigation which was detailed above. Based on the results of a Tier 1 and Tier 2 VES, EEI concluded that given the results of EEI's soil vapor sampling at the former onsite UST locations, a pVEC can be ruled out for the subject property.

Findings and Opinions:

Based on the information obtained in this ESA, EEI has the following findings and opinions:

- *Known or suspected RECs* – are defined by the ASTM E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

  This assessment has revealed no evidence of *known or suspected RECs* in connection with the subject property.

- *Controlled RECs (CRECs)* – are defined by the ASTM E1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a No Further Action "NFA" letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls)

  This assessment has revealed no evidence of *CRECs* in connection with the subject property.

- *Historical RECs (HRECs)* – are defined by the ASTM E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).

  This assessment has revealed no evidence of *HREC's* in connection with the subject property.

- *De Minimis* Conditions – include environmental concerns identified which may warrant discussion but do not qualify as RECs, as defined by the ASTM E1527-13.

  The following *de minimis* condition *was revealed* in connection with the subject property.

  - The results of our LSI detected low levels of potential chemicals of concern, including Total Arsenic and Lead, OCPs, PAHs and TPH as DRO/MORO in soil. No concentrations of potential chemicals of concern were detected above generally accepted screening levels for a commercial land use scenario, except for Total Arsenic. Total Arsenic was detected in samples analyzed ranging between 27 mg/kg (SB-1-0.5' and SB-5-0.5') to 37 mg/kg (SB-4-0.5'), which exceeds the commercial screening level of 0.36 mg/kg.

    Arsenic is a naturally occurring element in soil. Arsenic is unique by the fact that background concentrations typically exceed the commercial screening value of 0.36 mg/kg by a factor of 20 (DTSC, 2008). To augment the commercial screening level, a 2008 study by DTSC was referenced which examined proposed school sites in southern California. The DTSC Schools Program evaluated arsenic-containing soil data from a large number of school sites across California. The data evaluation indicated that 12 mg/kg maybe a useful screening number for the Schools Program when evaluating arsenic as a chemical of potential concern.

    The Arsenic concentrations (ranging between 27 mg/kg to 37 mg/kg) detected in site soils slightly exceeds the school site evaluation value of 12 mg/kg. According to the Client, the proposed future development will include mass grading and soil removals in excess of 20-feet bgs, which likely reduce the Arsenic detected. Based on the proposed mass grading, the detected Arsenic value is not considered to be a significant environmental concern for the subject property, and no further investigation is warranted at this time.

- Although not considered to be RECs, the following non-scope considerations were identified:

  - Based on the subject property's historical agricultural activities, it is possible that buried/concealed/hidden agricultural by-products, irrigation and fuel piping, and/or storage tanks, both below and above ground may have existed or exists on the subject property. Any buried trash/debris, undocumented USTs or other waste encountered during future subject property development or improvements should be evaluated by an experienced environmental consultant prior to removal. If stained or suspicious soil is encountered during future grading operations, the material should be evaluated and if deemed necessary, characterized for proper disposal.

  - If suspected contaminated soil is encountered during normal grading and construction activities, EEI recommends that the soil be excavated and segregated/sampled under the supervision of an environmental professional. Upon verification, any contaminated soil should be properly characterized and disposed of offsite.

Conclusions and Recommendations

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E1527-13 of APNs 5373-029-001 through -022, 5373-030-001 through -006 and -009 through -028, the *subject property*. Any exceptions to, or deletions from, this practice are described in Section 7.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the *subject property*.

1.0 INTRODUCTION

1.1 Purpose

The purpose of this Phase I Environmental Site Assessment (ESA) and Limited Soil Investigation (LSI) was to assess the possible presence of *recognized environmental conditions* for the property generally located southeast of the intersection of South San Gabriel Boulevard and East El Monte Street, in the eastern portion of the City of San Gabriel, County of Los Angeles, California (i.e. "subject property") **(Figure 1**). *Recognized environmental conditions (RECs)* include property uses that may indicate the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term *REC* is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that would not be subject to enforcement action by a regulatory agency.

This ESA was performed in general conformance with the ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, Designation E1527-13 (ASTM E1527-13).

1.2 Scope of Services

The following scope of services was conducted by EEI:

- A review of readily available documents which included topographic, geologic, and hydrogeologic conditions associated with the subject property.
- A review of readily available maps, aerial photographs, and other documents relative to historical subject property usage and development.
- A review of previous environmental reports and regulatory file information pertaining to both existing and historic property conditions.
- A review of readily available federal, state, county, and city documents and database files concerning hazardous material storage, generation and disposal, active and inactive landfills, existing environmental concerns, and associated permits related to the subject property and/or immediately adjacent sites.
- A site reconnaissance to ascertain current conditions on the subject property.
- Interviews with person(s) knowledgeable of the subject property.
- The collecting and testing of soil samples as part of a LSI.
- The preparation of this report which presents our findings, conclusions, and recommendations.

1.3 Reliance

This ESA has been prepared for the sole use of Pacific Square San Gabriel, LLC (Client), Pacific Plaza Premier Development Group, City of San Gabriel and Environmental Science Associates. This assessment should not be relied upon by other parties without the express written consent of EEI, the Client, Pacific Plaza Premier Development Group, City of San Gabriel and Environmental Science Associates. Any use or reliance upon this assessment by a party other than the Client, Pacific Plaza Premier Development Group, City of San Gabriel and Environmental Science Associates; therefore, shall be solely at the risk of such third party and without legal recourse against EEI, its employees, officers, or directors, regardless of whether the action in which recovery of damages is brought or based upon contract, tort, statute or otherwise.

This assessment should not be interpreted as a statistical evaluation of the subject property, but rather is intended to provide a preliminary indication of onsite impacts from previous property usage and/or the release of hazardous materials. If no significant indicators of the presence of hazardous materials and/or petroleum contamination are encountered during this search, this does not preclude their presence. The findings in this report are based upon published geologic and hydrogeologic information, information (both documentary and oral) provided by the Client, City of San Gabriel, County of Los Angeles, Environmental Data Resource® (i.e., agency database search), various state and federal agencies, and EEI's field observations. Some of these data are subject to change over time. Some of these data are based on information not currently observable or measurable but recorded by documents or orally reported by individuals.

2.0 PHYSIOGRAPHIC SETTING

2.1 Subject Property Description

The subject property is located to the southeast of the intersection of South San Gabriel Boulevard and East El Monte Street, on the west side of South Gladys Avenue, in the eastern portion of the City of San Gabriel, California (**Figure 2**). The rectangular-shaped subject property is comprised of 49 parcels, identified by Assessor's Parcel Numbers (APNs): 5373-029-001 through 5373-029-022, 5373-030-001 through 5373-030-006 and 5373-030-009 through 5373-030-028, encompassing a total of 5.86-acres (**Appendix B**). The San Gabriel Nursery and Florist formerly occupied the subject property from at least 1950 until approximately 2017. According to the Client, a mixed commercial (first floor) / residential (upper floors) development with two (2) levels of subterranean parking is proposed for the subject property.

The subject property formerly served as the growing area of the San Gabriel Nursery and Florist and is assigned the addresses 710, 718, 822 and 836 South San Gabriel Boulevard, and 705, 815, 817, 821, 823 and 827 South Gladys Avenue. Two (2) residences were formerly located within the southeastern portion of the subject property along South Gladys Avenue and are addressed 827 and 839 South Gladys Avenue.

The subject property is bound to the north by East El Monte Street, followed by the retail shop and associated parking areas of the former San Gabriel Nursery and Florist, with Rosemead Gardens (600 South San Gabriel Avenue), and a public storage facility beyond. To the south, the subject property is bound by East Grand Avenue, followed by multi-family residential structures. To the east, the subject property is bound South Gladys Avenue, followed by a mix of single-family and multi-family residential development. To the west, the subject property is bound by South San Gabriel Boulevard, followed by a

mix of commercial and retail development. The City of San Gabriel Planning Department Zoning Map indicated that the subject property is zoned for Commercial uses (C-1).

2.2 Topography

The subject property is located on the United States Geological Survey (USGS) 7.5 Minute, El Monte, California Quadrangle map (USGS, 2012). The subject property is located in the eastern San Gabriel Valley, on a gently sloping alluvial fan, at an elevation of approximately 370 feet above mean sea level (amsl) along the southwest portions to roughly 380 feet amsl at the northern portions. Regionally, the topography slopes to the southwest away from the San Gabriel Mountains at approximately 50 feet per mile. The property consists of land with relatively low topographical relief which gently slopes to the south-southwest parallel to the nearby Rubio Wash and toward Rio Hondo. Surface drainage appears to flow to the south-southwest.

2.3 Regional and Local Geology

The subject property is situated in the northern San Gabriel Valley. This portion of the valley is located near the base of the San Gabriel Mountains; a rugged range dominated by Mesozoic igneous (i.e., granitic) rocks. The steep sides of the San Gabriel Mountains resulted from rapid uplift which has shaped the range into a deeply dissected horst block. The San Gabriel Mountains form the northern margin of the northeastern block of the Los Angeles Basin, an east-west trending synclinal basin filled with a thick (>10,000 feet) sequence of sedimentary deposits. These deposits range in age from late Cretaceous to early Quaternary and represent deep to shallow-water marine and nonmarine depositional environments. Recent alluvium, derived primarily from the erosion of igneous and older sedimentary rocks in the San Gabriel Mountains, fills the basin. This alluvium generally consists of gravelly sands and silts, and is well-drained, offering little or no vertical barrier to migration of contaminants into the water table (CDMG, 2000).

The Los Angeles Basin is located at the boundary between the Transverse Ranges geomorphic province, to the north, and the Peninsular Ranges geomorphic province, to the south. Structural deformation along the northern margin of the basin is related to the Sierra Madre Fault Zone. Motion along the Sierra Madre Fault Zone is primarily vertical (i.e., reverse faulting), although a right-lateral component may also be present. The Sierra Madre Fault Zone is considered active, with major ruptures occurring over intervals of several thousand years at magnitudes of between 6.0-7.0 (SCEC, 1997). Other major faults in the vicinity of the site include the San Gabriel Fault Zone (north of the site), the Raymond Hill Fault (southwest of the site) and the Clamshell-Sawpit Canyon Fault (northwest of the site).

Soil in the vicinity of the subject property has been identified by the United States Department of Agriculture - Natural Resource Conservation Service (USDA-NRCS) online Web Soil Survey database as Urban Land-Palmview-Tujunga complex with 0 to 5 percent slopes, and as Urban Land-Azuvina-Montebello complex with 0 to 5 percent slopes (USDA, 2018). Urban Land-Palmview-Tujunga complex soils are found on alluvial fans and are derived from discontinuous human-transported material over alluvium derived from granite. These soils are well drained, have very low runoff and have moderately high to high permeability. Urban Land-Azuvina-Montebello complex soils are found on fan remnants and are derived from discontinuous human-transported material over old alluvium derived from granite. These soils are well drained, have medium runoff and have moderately high permeability (USDA, 2018).

2.4 Regional and Local Hydrogeology

According to the California Regional Water Quality Control Board - Los Angeles Region (CRWQCB-LAR, 1994), the site lies in the western area of the Main San Gabriel Groundwater Basin. In general, groundwater in this basin has been designated as beneficial for domestic/municipal, agricultural, and industrial uses. The major drainage systems within this basin include the San Gabriel River, Sawpit Wash, and Santa Anita Wash.

Groundwater in the Main San Gabriel Groundwater Basin has been designated as beneficial for domestic/municipal, agricultural, processing, and industrial uses (CRWQCB-LAR, 1994). The groundwater gradient (i.e., direction of flow) in the vicinity of the site is generally to the southwest towards the Los Angeles River.

Based on surface topography, EEI would anticipate groundwater to flow to the southwest in the immediate vicinity of the subject property. According to a 1988 Tank Removal Report for the subject property (PIC, 1988), groundwater flow was reported to be towards the west-southwest, and the first principle aquifer beneath the subject property at approximately 210 feet below ground surface (bgs); while semi-perched zones likely occur at shallower depths.

For additional information regarding groundwater, EEI reviewed the State Water Resources Control Board (SWRCB) GeoTracker Website, for data related to nearby leaking underground storage tank (LUST) investigations. The nearest site with readily available groundwater data was identified as the **Al-Sal Oil Site** (911 San Gabriel Boulevard, 0.05 miles southwest. According to a case closure summary, depth to groundwater at the site was reported to be between 177 feet bgs to 209 feet bgs. The groundwater flow direction was reported to be towards the north.

2.5 Hydrologic Flood Plain Information

EEI reviewed the Federal Emergency Management Agency (FEMA) Flood Hazard Map online to determine if the subject property was located within an area designated as a Flood Hazard Zone. According to the information reviewed on the Flood Insurance Rate Map (FIRM), Map No. 06037C1675F, the subject property is located within an area outside of a flood zone (FEMA, 2018). A copy of the FIRM is included in **Appendix B**.

3.0 SUBJECT PROPERTY BACKGROUND

3.1 Subject Property Ownership

Information regarding the ownership of the subject property was obtained from a Preliminary Title Report (PTR), prepared by First American Title Company, dated December 1, 2017. According to the PTR, the current owner of the subject property is listed as “Pacific Square San Gabriel, LLC, a California limited liability company”. A copy of the PTR with detailed parcel and legal descriptions is included in **Appendix B**.

3.2 Subject Property History

EEI reviewed readily available information sources to evaluate historic land use in and around the subject site. These information sources include aerial photographs, United States Geological Survey (USGS) maps, and city records. The information sources are reviewed in the following sections.

3.2.1 Historical Aerial Photograph and Topographic Map Review

Historical aerial photographs and topographic maps were reviewed to identify historical land development and any surface conditions which may have impacted the subject property. Photographs and historical topographic maps dating between 1894 and 2016 were obtained and reviewed from EDR®, an environmental information/database retrieval service. An aerial photograph dated December 3, 2017, was obtained from Google Earth®, a copy of which is included herein (**Figure 2**). **Table 1** summarizes the results of the aerial photograph and historical topographic map review. Copies of the aerial photographs and historical topographic maps provided by EDR® are included in **Appendix C**.

TABLE 1 – Summary of Historical Aerial Photograph and Topographic Map Review

Year	Source and Scale	Comments
1894 to 1900	Topographic Map 1:62,500	Site vicinity seen as south of a major railway, in a developed area labeled as San Gabriel.
1923 to 1928	Topographic Map 1:24,000	Increased development appeared in the site vicinity. Rubio Canyon Wash was seen in the immediate vicinity to the east.
1928	Aerial Photograph 1:500	Subject property appeared with residential structures within the southeastern portion. Surrounding area appeared as a mix of residential and agricultural land. Rubio Canyon wash was visible to the east.
1938	Aerial Photograph 1:500	Nursery crops and greenhouses were apparent onsite. Surrounding area appeared as a mix of residential and agricultural land. Rubio Canyon wash appeared channelized.
1940/1941	Topographic Map 1:24,000	No coverage of subject property and adjacent property.
1948	Topographic Map 1:24,000	Subject property appeared with buildings along the northern, eastern and western boundaries. Structures appeared on the adjacent property to the north and east.
1948/ 1952	Aerial Photograph 1:500	Additional large greenhouses appeared within the northern portion of the property. Central portion appeared with open fields, and southern portion with structures and agriculture. Commercial type buildings seen on the adjacent property to the north.
1953	Topographic Map 1:24,000	The entire site vicinity was shaded pink, indicating urban development. The boundary between the City of San Gabriel and the City of Rosemead was visible in the immediate site vicinity to the east.
1964	Aerial Photograph 1:500	Nursery operations and greenhouses remained on the subject property. Increased development was visible including a large commercial building on the adjacent property to the northeast, and in the site vicinity.
1966/ 1972	Topographic Map 1:24000	No changes were noted on the subject property since the 1953 map, with the addition of a structure immediately to the east in 1972. Rubio Canyon Wash appeared within an improved channel and now labeled as San Gabriel Wash.
1970/ 1977	Aerial Photograph 1:500	Increased greenhouse development within the northern portion of the subject property. A commercial structure and associated parking appeared on the northern adjacent property. Increased commercial and residential development within the surrounding area.

TABLE 1 – Summary of Historical Aerial Photograph and Topographic Map Review		
Year	**Source and Scale**	**Comments**
1981 to 1994	Topographic Map 1:24,000	No apparent changes were noted on the subject property since the 1972 map.
1981 to 2016	Aerial Photograph 1:500	Additional greenhouse structures appeared within the southwestern portion of the subject property. No apparent changes were noted on the adjacent property since the 1977 photograph.
2012	Topographic Map 1:24000	The subject property and adjacent and surrounding property appeared with urban development.
December 2017	Aerial Photograph Google Earth®	Subject property appeared with a nursery operation throughout. The adjacent and surrounding area appeared with a mix of commercial and residential development.

3.2.2 City/County Directories

Directory listings associated with the subject property and street addresses located adjacent to and surrounding the subject property was obtained from EDR®, an environmental information/database retrieval service. According to the information reviewed, the subject property has historically been associated with 632 South San Gabriel Boulevard, which is the physical address assigned to the northern adjacent property and was most recently occupied by the San Gabriel Nursery and Florist since 1950. No other subject addresses between 710 to 836 South San Gabriel Boulevard were listed in directories searched, with the exception of 822 South San Gabriel Boulevard, which was listed in 1950 with a cabinet shop, and 720 South San Gabriel Boulevard which was listed with International Exponents in 1985.

Subject addresses 621, 835, 821, and 839 South Gladys Avenue, were listed in various years dating from 1950 through 2014, with residential occupants. Subject addresses 645 and 649 South Gladys Avenue were listed with business occupants F&A Enterprises and Early California Wholesale in 1980, and 1986, respectively. Addresses within the 800 block of East El Monte Street were also listed with residential occupants in various directories dating between 1950 and 1970. No occupants of concern were noted as occupants of the adjacent and surrounding street addresses in the directories searched.

A summary of the listings associated with the subject property address is summarized below in **Table 2**. Information for the target addresses (in bold) as well as the nearest listed addresses to the west (left column) and nearest listed addresses to the east (right column). A copy of the City Directory Report is provided in **Appendix C**.

TABLE 2 – Summary of City Directory Search		
West Adjacent Addresses	**Subject Addresses**	**South Adjacent Addresses**
2006 to 2014

End Of Search due to: A) earlier directory or street listing not found*; B) listing out of range, listings re-numbered, or no numeric listings*		

3.2.3 Sanborn Fire Insurance Maps

EEI researched available Sanborn Fire Insurance Maps of the subject property. Sanborn Maps provide detailed information on site structures, uses, and occupancies and were typically utilized by insurance companies to evaluate potential fire risk. EEI requested a Sanborn map search from EDR®, an environmental information/database retrieval service. EDR provided Sanborn Maps with coverage of the subject property from 1925, 1932 and 1938.

Copies of the Sanborn maps reviewed by EEI are included in **Appendix C**. **Table 3** is a summary of the information obtained by EEI.

TABLE 3 – Summary of Sanborn Map Review

Sanborn Map Year	Site Description
1925 and 1932	Current street configuration was shown in the maps, with the exception of current day East El Monte Street was labeled as Spring Street. The northern adjacent property (600-620 S. San Gabriel Blvd.) was occupied by a chicken ranch indicated by buildings labeled as "hen houses," "hatchery," and "grain storage." The subject property was bisected by Pearl Street. The area south of north of Pearl Street was occupied with sparse structural development labeled as a dwelling and garage (710, 716, 724 S. San Gabriel Blvd.). The area south of Pearl Street (800-828 S. San Gabriel Blvd.) was occupied by a grocery store (826/828).
1938	The northern adjacent property, located north of Spring Street, was now occupied by a small restaurant fronting San Gabriel Boulevard (610), and a dwelling at the southwest side (632). The portion of the subject property between Spring Street and Pearl Street was occupied by Mission Nursery, including greenhouses (710-724 S. San Gabriel Blvd.). A dwelling was at the southwest side of the greenhouse along with a flower stand (716). To the south of Pearl Street (800 block of S. San Gabriel Boulevard) was a cabinet shop (826), another shop (836), and to the east, an offsite dwelling (855 Gladys Avenue).

3.2.4 City of San Gabriel Building and Safety Department

Information regarding City of San Gabriel Building Department existing building records, as they related to the development of the subject property, was requested by EEI at the city offices. Building department staff conducted a search of the street addresses associated with the subject property, which revealed several records dating back to 1943. Copies of the permits were provided to EEI and are summarized below.

<u>817 South Gladys Avenue</u>
June 27, 1946 – Plumbing permit for a bathroom; Owner, H. Yoshimura
July 8, 1946 – Sewer Connection; Owner, H. Yoshimura
January 7, 1952 – Electric permit; Owner, Tilwanaya

<u>821 South Gladys Avenue</u>
October 25, 1943 – Sign permit; Owner, Huntzinger
August 24, 1945 – Plumbing permit for cesspools; Owner, Fred Yoshimura
August 24, 1945 – Plumbing permit water heater; wash tubs, gas piping; Owner, Fred Yoshimura
October 22, 1945 – Building permit for dwelling; Owner H. Yoshimura
May 12, 1948 – Plumbing permit for new cesspool; Owner, H Yoshimura

January 31, 1952 – Electric permit; Owner, San Gabriel Nursery

823 South Gladys Avenue
April 29, 1948 – Building permit for a bathroom addition to existing dwelling; Owner, H. Yoshimura
June 25, 1948 – Sewer; plumbing and electrical; Owner, H Yoshimura
July 2, 1948 – Plumbing permit; Owner, Fred Yoshimura
July 9, 1948 – Electrical permit; Owner, Fred Yoshimura

821-823/825 South Gladys Avenue
July 24, 1975 – Plumbing permit; sewer cap; Owner, San Gabriel Nursery
July 16, 1975 – Demolish two residences only on cesspools; Owner, San Gabriel Nursery

827 South Gladys Avenue
October 17, 1956 – Building permit; 3-bedroom dwelling with garage; Owner, R. Yoshimura
October 30, 1956 – Plumbing and heating permit; water heater; Owner, R. Yoshimura
November 13, 1956 – Permit for a furnace; Owner, Miller Meyers
March 8, 1957 – Electrical permit; Owner, R. Yoshimura
April 29, 1957 – Plumbing permit for a bathroom; Owner, R. Yoshimura
October 7, 1975 – Permit for a swimming pool; Owner, R. Yoshimura
November 13, 1975 – Electrical permit; Owner, R. Yoshimura
September 1, 1983 – Building permit for a reroof of house and garage; Owner, R. Yoshimura

839 South Gladys Avenue
June 11, 1952 – Permit for alterations to existing dwelling; Owner, R. Yoshimura
June 23, 1952 – Plumbing permit; Owner, R. Yoshimura
June 24, 1952 – Electrical permit; Owner, R. Yoshimura
September 2, 1952 – Electrical permit; Owner, R. Yoshimura
August 13, 1952 – Permit to remodel existing dwelling; Owner, R. Yoshimura
October 14, 1952 – Building permit for erection of buildings; Owner, R. Yoshimura
June 24, 1952 – Electrical permit; Owner, R. Yoshimura
September 2, 1954 – Electrical permit at dwelling; Owner, R. Yoshimura

632 South San Gabriel Boulevard (Historically associated with subject property)
March 9, 1954 – 44 Horse Power Heating Boiler; Owner, San Gabriel Nursery
December 20, 1954 – Fuel Oil Tank 80 installation; Owner, San Gabriel Nursery
August 20, 1979 – Install extra 6,000-gallon gas tank; San Gabriel Nursery

3.2.5 Summary of Property History

Based on historical records such as aerial photographs and topographic maps, the subject property was occupied by structures and agricultural use from at least 1928. By 1938, nursery operations were apparent onsite, and by 1948, a commercial structure appeared associated with the subject property north of East El Monte Street. The subject property remained occupied by a nursery, with various configurations of structures and greenhouses, as well as residences on the southeast portion through a 2016 photograph.

The adjacent and surrounding properties appeared as a mix of undeveloped agricultural land, and residential property, from at least 1928 through the 1950's. By 1964, an increase in commercial/industrial development was visible on the adjacent properties as well as in the immediate site vicinity.

3.3 Regulatory Database Search

EEI reviewed known electronic database listings for possible hazardous waste generating establishments near the subject property, as well as adjacent sites with known environmental concerns. Facilities were identified by county, state, or federal agencies that generate, store, or dispose of hazardous materials. Most of information in this section was obtained from EDR®, an environmental information/database retrieval service. A copy of the EDR® report is provided in **Appendix D,** along with a description of the individual databases.

The EDR® database search report lists sites identified as "orphans" if the database is unable to confirm the physical locations of these sites relative to the subject property or to assess whether they were located within the designated search radii.

Based on a review of the EDR Radius Report, the following **Table 4** summarizes the facilities within the selected search radii and whether the subject property or a facility that was interpreted to be adjacent to the subject property was listed on each database.

Table 4 - Summary of Regulatory Database Search

Federal or State Government Database	Search Radius	Number of Reported Facilities	Subject Property	Adjacent Sites
Federal National Priorities List (NPL) site list	1.00 mile	1	No	No
Federal Delisted NPL site list	1.00 mile	0	No	No

Federal or State Government Database	Search Radius	Number of Reported Facilities	Subject Property	Adjacent Sites
WIP	0.25 mile	15	No	Yes
EDR Historic Auto	0.125 mile	4	No	No
EDR Historic Cleaner	0.125 mile	3	No	No
EDR Recovered Government Archives	Site only	0	No	N/A
Orphan sites	N/A	0	No	No
N/A = Not applicable; TP = Target Property.				

3.3.1 Subject Property

The subject property is the location of a former growing area which most recently supported the San Gabriel Nursery and Florist (632 South San Gabriel Boulevard, northern adjacent property). The San Gabriel Nursery and Florist was listed under the Historical Underground Storage Tank (UST), Statewide Environmental Evaluation and Planning System (SWEEPS), Underground Storage Tank (UST) and Los Angeles Co. Industrial Waste and Underground Storage Tank (HMS) databases. These listings appear to be related to the removal of former USTs from the subject property in 1988 and 2015. The San Gabriel Nursery and Florist was also listed under the HAZNET database for the reporting year 2016, identified by Envid: U001570611, with a waste category of "Off-specification, aged or surplus organics". The disposal method was identified as "Storage, Bulking and/or Transfer offsite – no treatment/recovery" for 0.231 tons of waste. These listings are not generally rationale for environmental concern, unless a site/facility has a dual listing, such as a reported release. The subject property is not associated with a documented release; therefore, these listings are not considered to be an environmental concern for the subject property.

The EDR® report also incorrectly identified **Shell Oil Company** (712 North San Gabriel Boulevard) as the target property, whereas this address is located approximately 0.95-mile to the north of the subject property. Based on its proximity to the subject property, this listing is not considered an environmental concern for the subject property.

3.3.2 Adjacent Properties

Sherwin Williams Co (811 South San Gabriel Boulevard, 0.013-mile west), was identified as a RCRA Small Quantity Generator (SQG) and within the FINDS and ECHO databases. Generator permits are not generally cause for environmental concern unless a release has occurred at the site. This listing has not documented a release and is situated hydrologically cross-gradient from the subject property. Based this information, this site is not considered an environmental concern for the subject property.

JH Hedrick and Co. (900 San Gabriel Boulevard, 0.026-mile south), was identified within the LUST, Historic Cortese, Los Angeles County HMS, Well Investigation Program (WIP) databases, and was reported as the site of an aviation release in 1990, which reportedly impacted soil only. The case is listed as closed by the regulatory agency on December 18, 1990. No additional pertinent details were provided within either of the database listings. Based on the regulatory closure, and soil only impact, this site is not considered an environmental concern for the subject property.

Hughes Enterprises, also listed as **Magteec** (801 South San Gabriel Boulevard, 0.032-mile west-southwest), was identified within the CPS-SLIC database with an "Open-Inactive" facility status, dated December 15, 2015. The case type was identified as "Cleanup Program Site". No other pertinent details were provided within the listing. Based on the regulatory oversight and location (cross-gradient in regards to groundwater flow direction), this site is not considered an environmental concern for the subject property.

3.3.3 Surrounding Area

EEI evaluated each of the off-site facilities, located greater than 100-feet from the subject property and listed in the EDR Radius Report as to their potential to impact the subject property, based on the following factors:

- Reported distance of the facility from the subject property
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes
- Reported case type (e.g., soil only, failed UST test only)
- Reported substance released (e.g., chlorinated solvents, gasoline, metals)
- Reported regulatory agency status (e.g., case closed, "no further action")
- Location of the facility with respect to the reported groundwater flow direction (discussed in the "Hydrogeology" of this Report)

Based on one or more of the factors listed above, the off-site facilities listed in the EDR Radius Report are unlikely to represent an environmental concern for the subject property, and EEI recommends no further investigation regarding any of the facilities.

3.3.4 Orphan Sites

No orphan sites were listed in the EDR Radius Report.

3.4 Regulatory Agency Review

3.4.1 Los Angeles County Department of Health Services-Public Health Investigation Office

On June 14, 2018, EEI contacted the Los Angeles County Department of Health Services - Public Health Investigation Office (PHI) regarding any record of USTs, hazardous waste storage, hazardous materials responses, leaks or spills on the subject property. At the time of this report, EEI had not received a reply for the PHI. EEI does not anticipate any environmental concerns to be identified by the PHI; however, if such issues are presented, EEI will prepare an addendum to address any issues and additional recommendations at that time.

3.4.2 Los Angeles County Department of Public Works – Environmental Programs Division

EEI contacted the Los Angeles County Department of Public Works - Environmental Programs Division (LACDPW-EPD), to determine if any permits have been issued for any installation or removal of any Underground Storage Tanks (USTs). According to Mr. David Coscia, Program Manager II, the LACDPW-EPD does not have any records for the subject property identified by addresses 710 through 836 South San Gabriel Boulevard and 705 through 839 South Gladys Avenue. However, the following records pertaining to the subject property associated with the address of the retail facility of the former San Gabriel Nursery and Florist (632 South San Gabriel Boulevard) were identified.

<u>1988</u>

- March 16, 1988 – Hazardous Materials Underground Storage; Closure Permit No. 3675B; EPD stated that based on the soil and groundwater assessment report submitted on February 2, 1988 required as a part of the subject closure procedure, the agency found the closure was final and no further action was required. The number of tanks removed was listed as four (4) and were described as one (1) 1,000 gallon; one (1) 2,000 gallon; one (1) 6,000 gallon, and one (1) 10,000 gallon; capacity tanks, at a total weight of 9.02 tons.

  It should be noted that a Tank Removal Geologic Report prepared by Petroleum Industry Consultants, Inc., dated January 22, 1988, specified one (1) 550-gallon unleaded gasoline; one (1) 2,000-gallon diesel; one (1) 6,000-gallon leaded gasoline; and one (1) 10,000-gallon diesel UST were removed from the site. Furthermore, the 1,000-gallon (550-gallon) unleaded gasoline and 6,000-gallon leaded gasoline USTs were identified as located offsite within the northern adjacent property (632 South San Gabriel Boulevard), which historically served as the retail portion of the former San Gabriel Nursery and Florist, while the remaining two (2) USTs were located within the northwestern portion of the subject property. A receipt for the disposal of the tanks, dated December 29, 1987 was attached. A copy of this LACDPW-EPD Closure Letter is included in **Appendix E**.

<u>2015</u>

- July 20, 2015 – Closure Authorization for Hazardous Material USTs; CERS ID#10615318; Permanent UST Removal and Closure for two (2) 500-gallon USTs (632 South San Gabriel Boulevard). Attached was a letter from San Gabriel Nursery and Florist giving American

Integrated Services, Inc. (AIS) authorization to remove USTs at 632 S. San Gabriel Boulevard. Note, while the two (2) USTs were officially associated with the northern adjacent property (632 South San Gabriel Boulevard), both USTs were physically located within the southwestern portion of the subject property, which formerly served as the growing area for the former San Gabriel Nursery and Florist.

- September 2, 2015 – Hazardous Materials UST Closure Inspection Report; Two (2) additional USTs were discovered underneath island. Four (4) 500-gallon USTs in total were removed from the southwestern region of the subject property. One (1) tank was reported to have a hole the size of a quarter. One (1) soil sample was collected from beneath each tank and associated product piping. Soil samples were collected from two to four feet below the tank invert. An updated copy of the Closure Authorization for Hazardous Material USTs; CERS ID# 10615318; Permanent UST Removal and Closure for four (4) 500-gallon USTs in included in **Appendix E**.

- September 9, 2015 – New Construction/Addendum of two (2) newly discovered 500-gallon USTs with unknown contents encountered while removing previously discovered USTs at the subject property. Document detailed: two (2) existing USTs; two (2) discovered USTs; total of four (4) USTs to be removed. A copy of the New Construction/Addendum is included in **Appendix E**.

- December 3, 2015 – LACDPW-EPD, Hazardous Material Underground Storage; Site Investigation Proposal; Closure Application No. 809481. The EPD had reviewed the closure report dated November 12, 2015 prepared by AIS and stated that additional information was requested. An Additional Closure Requirements sheet (due by January 4, 2016) requested Total Petroleum Hydrocarbons as Diesel Range Organics (TPH-DRO) and Total Recoverable Petroleum Hydrocarbons (TRPH) lab analysis as required by the closure permit.

- December 17, 2015 – AIS Letter addressed to the LACDPW-EPD regarding Hazardous Material Underground Storage Site, Closure Application 809481 (Additional Closure Requirement; File #EP-1013590-060766). AIS stated San Gabriel Nursery was not aware that there were any USTs on the property until the recent discovery. AIS excavated the tanks and found them to contain gasoline, which was confirmed by LACDPW-EPD Inspector Donna Germann. The tanks were degassed according to South Coast Air Quality Management District (SCAQMD) regulation. AIS indicated that only the laboratory analyses for Gasoline would be required. This excluded 418.1 (TRPH) and 8015M (TPH-DRO).

2016

- January 28, 2016 – LACDPW-EPD, Hazardous Substances Underground Storage; Closure Report; Closure Application No. 809481. EPD had reviewed the tank closure report dated November 12, 2015, and AIS letter dated December 17, 2015 (see above). However, EPD again indicated that TPH-DRO and TRPH lab analysis results were required.

- February 29, 2016 – Alpha Scientific Corporation (A602122) Analytical report for samples received on February 26, 2016 and analyzed for TPH-DRO and TRPH (Samples 1B through 4B). According to the report, analytical results indicated that concentrations of both TPH-DRO and TRPH were not detected in any of the samples analyzed.

- LACDPW-EPD March 15, 2016 – Hazardous Substances Underground Storage; Closure/Site Assessment Report; Closure Application No. 809481. The office reviewed the UST removal report dated November 12, 2015, and pursuant to the California Health and Safety Code, Chapter 6.7, Section 25297 (b), the LACDPW-EPD was referring the matter to the CRWQCB-LAR.

- March 25, 2016 – CRWQCB-LAR, UST Program, Case Referral Response, Case Number R-60766. The letter indicated the LACDPW-EPD transmitted this case to their agency due to concerns regarding soil and groundwater impacts from the subject property. The CRWQCB-LAR indicated they were in receipt of the following reports related to the property: UST Closure Report, dated September 20, 2015, prepared by American Integrated Services, Inc. (AIS); UST Closure Report, dated November 12, 2015, prepared by AIS; and A602122 for analytical testing, dated February 29, 2016, prepared by Alpha Scientific Corporation.

  Based on the information reviewed, the CRWQCB-LAR stated that residual concentrations of fuel constituent posed a low threat to human health, and soil and groundwater quality beneath the site. Therefore, no further action was required to pursue any further soil and/or groundwater investigation at the subject property, and at time, the Regional Board was not opening a case for the subject property. A copy of this CRWQCB-LAR letter is included in **Appendix E**.

3.4.3 California Department of Toxic Substances Control

EEI reviewed the online database EnviroStor, which provides records on: Federal Superfund sites (National Priority List); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites, which are maintained by the Department of Toxic Substances Control (DTSC, 2018). Neither the subject property nor adjacent property was listed on any of the other databases researched.

However, a listing for the **San Gabriel Valley Area 3** (600001335), a National Priority List (NPL) site was reported on the database as located within one-half mile from the subject property. Past uses in the area such as aerospace manufacturing/maintenance, chemical, electronic industrial machinery and metal manufacturing caused contamination. Oversight agencies include the RWQCB, the DTSC, and the United States Environmental Protection Agency (USEPA).

The San Gabriel Valley Area 3 is one of 8 Operable Units (OUs) identified by USEPA for the San Gabriel Valley Superfund Site. Covering 19 square miles in the western portion of the San Gabriel Valley, Area 3 is located west of Rosemead Boulevard, north of I-10, and south of the Raymond Fault (which separates the main San Gabriel Basin from the Raymond Basin to the northwest). Area 3 includes all of the City of San Gabriel, and portions of Alhambra, Rosemead, Temple City, San Marino and South Pasadena.

Discovery of contamination in water purveyor production wells led USEPA to designate Area 3 as an NPL site in 1984. The Area 3 groundwater is contaminated with volatile organic compounds (VOCs) (most commonly tetrachloroethene and trichloroethene), perchlorate, and nitrate at concentrations exceeding state and federal water quality standards.

The USEPA issued a Remediation Investigation (RI) Report in June 2009 which indicated that groundwater contamination was present in the western bedrock aquifer, western alluvial aquifer, and eastern alluvial aquifer (shallow, intermediate, and deep zones), and that groundwater production in the eastern portion of Area 3 impacted contaminant migration. To identify the sources of the groundwater contamination, the USEPA has directed investigations of more than 20 current and former industrial facilities. USEPA supplemented these investigations with 10 new ground water monitoring wells and soil testing at four industrial facilities identified as possible sources of groundwater contamination. USEPA is using the data generated by these investigations to identify and evaluate groundwater cleanup options.

The USEPA expects to complete a feasibility study by November 30, 2018 and develop a proposed soil and groundwater cleanup plan by 2020. Based on the regulatory oversight, this listing is not considered to be a source of environmental concern at the subject property.

3.4.4 State Water Resources Control Board

EEI reviewed the State Water Quality Control Board (SWRCB, 2018) online database GeoTracker, which provides records on LUSTs and Cleanup Program (CPS) (formerly known as SLIC) sites. The subject property, listed as San Gabriel Nursery and Florist, Inc. (632 S. San Gabriel Boulevard) was identified as formerly containing four (4) USTs, which were removed from the property between September and November 2015. Discussion of the UST removals is included under **Section 3.7.2** of this report.

Several adjacent properties were identified within databases contained within GeoTracker, including:

- **Hughes Enterprises** (801 S. San Gabriel Boulevard, 0.032-mile west-southwest), was identified as and "Open-Inactive" Regional Water Quality Control Board (RWQCB) case, assigned case no. R-53003. The site was also identified within the SLIC database and is discussed above under **Section 3.3.2**.

- **J H Hedrick & Co.**, also listed as **Magteec** (900 S. San Gabriel Boulevard, 0.026-mile south), was identified as a closed LUST cleanup site and is discussed above under **Section 3.3.2**.

Several nearby sites were listed as open LUST cases and are discussed above under the LUST database in **Section 3.3.2**.

3.4.5 Review of Division of Oil, Gas and Geothermal Resources Files

Oil and gas wells were not observed at the subject property during our site reconnaissance. A review of the California Division of Oil, Gas, and Geothermal Resources Website for oil and gas fields in California and Alaska (CDOGGR, 2018) did not indicate the presence of oil and gas wells on or adjacent to the subject property (Township 01 South, Range 12 West, and Section 12).

3.4.6 National Pipeline Mapping System

EEI reviewed the National Pipeline Mapping System (NPMS, 2018) public viewer website for gas transmission pipelines and hazardous liquid trunk lines on or close to the subject property. According to the website, no pipelines are located on or adjacent to the subject property (Township 01 South, Range 12 West, and Section 12).

3.5 Interview with Current Property Owner

The current owner of the subject property is Pacific Square San Gabriel, LLC. Pacific Square San Gabriel, LLC is also the entity on whose behalf the Phase I ESA and LSI is being prepared. Pertinent information provided by Mr. Ken Lee of Pacific Square San Gabriel, LLC, regarding the subject property is documented below in Section 3.6 User Provided Information. With the exception of reference to results of a2016 Limited Phase II ESA prepared by EEI, no indications of environmental concern were noted by Mr. Lee (see below).

3.6 User Provided Information

Pursuant to ASTM E1527-13, EEI provided a Phase I ESA User Specific Questionnaire to the "user" (the person on whose behalf the Phase I ESA is being conducted), Mr. Ken Lee, representing Pacific Square San Gabriel, LLC. The User Specific Information provided by Mr. Lee is documented in the following sections. A list of the user specific questions (per ASTM E1527-13) with associated responses is included in **Appendix F**.

3.6.1 Environmental Liens or Activity and Use Limitations

Mr. Lee stated that he is unaware of any environmental liens or activity and use limitations (AULs) in association with the subject property. To supplement this information, the Client provided EEI with a PTR prepared by First American Title, dated December 1, 2017. Review of the PTR confirmed the absence of any environmental liens or AULs associated with the subject property.

3.6.2 Specialized Knowledge

Mr. Lee stated that he has no specialized knowledge or experience related to the subject property or nearby properties (i.e., knowledge of the chemicals or processes used by a type of business). However, Mr. Lee stated that the former occupant of the subject property was the San Gabriel Nursery & Florist, whose current retail store is located north of the subject property.

3.6.3 Valuation Reduction for Environmental Issues

Mr. Lee stated that the purchase price reasonably reflects the value of the property.

3.6.4 Presence or Likely Presence of Contamination

With the exception of noting the results of a Limited Phase II ESA prepared by EEI for the subject property in 2016, which identified limited concentrations of Arsenic, Lead and pesticides within the shallow (upper 2-feet bgs) beneath the subject property, Mr. Lee stated that he was not aware of the presence or likely presence of contamination at the subject property.

3.6.5 Other

Mr. Lee stated that the Phase I ESA is required as part of the environmental review process under California Environmental Quality Act (CEQA) for the proposed entitlements to construct a mixed-use commercial-residential development project.

3.7 Previous Assessments

Based on the information provided by the property owner representative, and the Client, previous site investigation activities have been conducted on the subject property, including two (2) performed by EEI. The following section summarizes the information EEI reviewed and is arranged by address.

3.7.1 Petroleum Industry Consultants, Inc. (PIC), Tank Removal Geologic Report for San Gabriel Nursery, 632 San Gabriel Boulevard, San Gabriel, California, dated January 22, 1988.

The former San Gabriel Nursery and Florist contacted PIC to remove four (4) USTs from the facility, identified as Tanks 1 and 2, located within the northwestern portion of the subject property, and Tanks 3 and 4, located north of El Monte Street and east of the nursery's form retail building located within the northern adjacent property (632 S. San Gabriel Boulevard). The locations of Tanks 1 through 4 are depicted in **Figure 3**. PIC was contracted to conduct a visual inspection of lithology; recover specified soil samples; and oversee subsequent laboratory testing of soil samples; and prepare a geologic report of tank removal operations. Tank removal operations were completed on December 29, 1987, in accordance with tank removal permit #3675B, issued by the LACDPW-EPD.

Upon excavation of Tank 1 (10,000-gallon diesel), Tank 2 (2,000-gallon diesel), Tank 3 (6,000-gallon leaded gasoline) and Tank 4 (550-gallon unleaded gasoline), each UST was removed from their respect tank pits for offsite disposal. In addition, a product pump dispenser was removed from the northern adjacent property, located south of Tank 4 and north of East El Monte Street. In accordance with tank removal permit #3675B, issued by the LACDPW-EPD, Engineering Division, six (6) soil samples were recovered from under the tanks at a depth of two (2) feet below the tank bottoms, at approximately 15 feet bgs and one (1) sample from beneath the adjacent pump dispenser at a depth of approximately one-foot bgs. Soil samples were analyzed for TPH and for organic lead by USEPA Test Method 7421. Sample analysis indicated TPH and lead concentration measured non-detectable in all samples except in sample P2 which exhibited TPH at a concentration of 50 parts per million (ppm). On March 16, 1988, based on a review of this information, the LACDPW-EPD found the tank closure was final and no further action was required.

PIC stated that the elevation of the tank pit was approximately 385 feet amsl, and the surrounding topography sloped southwest parallel to the nearby Rubio Wash and toward Rio Hondo. The groundwater contour map showed the most likely direction of groundwater flow to be west-southwest. Depth to the first principle aquifer beneath the site was reported to be approximately 210 feet below surface, with semi-perched zones reported to likely occur at shallower depths.

3.7.2 American Integrated Services, Inc. (AIS), Underground Storage Tank Closure Report, San Gabriel Nursery and Florist, 632 S. San Gabriel Boulevard, San Gabriel, CA 91776, HMUSP #: P.809480; CERS #: 10615318; Site File #: 13590-60766; APP #: A.809481, dated November 12, 2015.

In September and November 2015, AIS, was tasked with the permitting and documenting closure and removal of two (2) USTs located within the southwestern region of the subject property (**Figure 4)** under the oversight of the LACDPW-EPD and San Gabriel FD (AIS, 2015). Reportedly, the former San Gabriel Nursery and Florist initially encountered a dispenser island for two (2) 500-gallon gasoline steel USTs during the process of reorganizing the nursery plants. The presence of the tanks was confirmed using GPR (Ground Penetrating Radar). On September 1, 2015 the island and hardcover of both tanks was removed and both tanks were subsequently excavated. During this excavation, two (2) additional 500-gallon gasoline steel tanks were discovered on the east side of the island. Both tanks were uncovered and an additional permit was submitted for their removal.

The excavated soil was stockpiled next to the tank excavation and was placed on visqueen. On September 2, 2015, following the LADPW-EPD permit conditions, AIS washed the tanks interiors by pressure washing (through existing access ports and openings) until clean and satisfactory lower explosive limits (LEL) and total oxygen concentrations were achieved. Approximately 350-gallons of tank rinsate was recovered with a vacuum truck. The tank's rinsate was transported to DeMenno Kerdoon's facility in Compton, California for disposal. Each of the four (4) 500-gallon tanks were certified as safe for removal by Nancy G. Carraway, a Certified Industrial Hygienist (CIH).

On the same day, under the direction of onsite LA County DPW-EPD Inspector Donna Germann and Art Stafford of the San Gabriel Fire Department, AIS removed the four (4) tanks. Each of the tanks were in fairly good condition except for the tank located in the Southeast section of the excavation, which was reported to have a small hole on its lower north side. Each of the tanks were transported to SA Recycling's facility in Carson, California for disposal.

AIS collected and submitted 4) soil samples, identified as 1A through 4A, for analytical testing. Each of the soil samples were collected from approximately 2-feet beneath the former location of four (4) 500-gallon gasoline USTs, at a total depth of approximately 9-feet bgs. Confirmation soil samples collected form the former tank locations detected trace value of Benzene and Toluene above the laboratory method detection limits.

Soil samples were analyzed for TPH as Gasoline Range Organics (GRO) by modified USEPA Test Method 8015; VOCs including benzene, toluene, ethylbenzene, total xylenes (BTEX), by USEPA Test Method 8260B; and for organic lead by USEPA Test Method 8015B. Laboratory results for all soil samples indicated trace amounts of benzene and toluene were detected above laboratory

method detection limits at 0.0014 milligrams per kilogram (mg/kg) (2A) and 0.0045 mg/kg (2A), respectively. Groundwater was not encountered at the subject property during soil sampling activities.

Based on field observations and the analytical results of the confirmation soil samples, AIS requested closure under Closure Application No. 809481.

3.7.3 Environmental Equalizers, Inc. (EEI), Phase I Environmental Site Assessment, San Gabriel Nursery Property, Multiple Parcels – 7.7 Acres, 610-836 South San Gabriel Boulevard, 621, 705-839 Gladys Avenue, City of San Gabriel, Los Angeles County, California 91776, dated May 12, 2016.

EEI conducted a Phase I ESA of the approximate 7.7-acre property, referred to as the San Gabriel Nursery Property, which consisted of the subject property and the approximate 1.9-acre northern adjacent property which operated as the retail shop of the Nursery. At the time of EEI's report, the subject property was mainly operated as the growing area of the San Gabriel Nursery and Florist and was primarily occupied a combination of greenhouse structures, small sheds, outbuildings, and tables and benches that support various plants during cultivation. A large former chilled storage unit, half of which was utilized as a chemical storage area, while the other half was utilized as a tool storage area, was secured with pad locks and is located within the northern portion of the subject property. Also reported within the northern portion of the subject property was a structure housing a boiler unit, which was reported by the property owner as no longer used. Two (2) residences were also located within the southern portion of the subject property.

According to EEI, the subject property was occupied by structures and agricultural use, including a chicken ranch, from at least 1928. A 1938 Sanborn map indicated the Mission Nursery occupied the central portion of the property, and by 1950, the San Gabriel Nursery and Florist occupied the subject property. The subject property had remained occupied by the San Gabriel Nursery and Florist, with various configurations of structures and greenhouses, as well as residences on the southeast portion through the issuance of EEI's report.

EEI noted evidence of the following *RECs* in connection with the *subject property*:

- The subject property is the site of six (6) total former USTs which were removed from the property in 1988 and 2015. Although the USTs were granted regulatory closure and/or concurrence, no soil vapor sampling has been conducted to evaluate the former fueling areas for potential vapor intrusion concerns. Furthermore, given the absence of any soil vapor sampling performed at the former onsite UST locations and low levels of residual petroleum-hydrocarbons detected during tank removals, a pVEC cannot be ruled out for the subject property. Therefore, EEI recommended further investigation.

- Additional USTs, fuel dispending piping and/or vent lines, and related equipment may or still exist beneath portions of the subject property. If former fueling piping or stained or suspicious soil is encountered during future grading operations, these items and material should be evaluated and if deemed necessary, characterized for proper disposal.

- The subject property has been occupied with a nursery operation since 1950. As a result, there is a potential for restricted agricultural chemical residues to exist within near-surface soils onsite. EEI recommended that shallow soils be investigated for restricted agricultural chemical residues.

Although not considered a REC, the following non-scope considerations were identified:

- According to the information reviewed, structures on the subject property were built prior to 1978. Therefore, the presence of asbestos-containing materials (ACMs) and lead-based paint (LBP) within building materials is likely. EEI recommended a pre-demolition hazardous materials survey be performed on the site structures and related building materials, prior to any proposed future site improvements or demolition activities.

- Based on the subject property's historical agricultural activities, it is possible that buried/concealed/hidden agricultural by-products, irrigation and fuel piping, and/or storage tanks, both below and above ground may have existed or exists on the subject property. Any buried trash/debris, undocumented USTs or other waste encountered during future subject property development or improvements should be evaluated by an experienced environmental consultant prior to removal. If stained or suspicious soil is encountered during future grading operations, the material should be evaluated and if deemed necessary, characterized for proper disposal.

3.7.4 EEI, Results of Limited Phase II Environmental Site Assessment, Proposed Commercial and Residential Development, 700-800 South San Gabriel Boulevard, San Gabriel, California 91776, EEI Project No. AAA-72359.2, dated June 28, 2016.

Based on results of their Phase I ESA, dated May 12, 2016, on May 31, 2016, EEI performed a Limited Phase II Site Assessment at the approximate 5.8-acre property occupied by the San Gabriel Nursery and Florist. The investigation included conducting a geophysical survey within select portions of the subject property that had been reported to formerly contain diesel and gasoline USTs, installation and sampling of six (6) temporary soil vapor probes, each set to approximately 5-feet bgs and specifically targeting the locations of three (3) former UST fields, and the collection and analysis of 38 soil samples from 19 representative locations throughout the subject property.

The results of the geophysical survey did not reveal evidence of the presence of USTs or associated subsurface product piping within the areas surveyed, however, a possible excavation feature and/or trench was detected with GPR in one (1) area of the property suspected to formerly contain a UST(s).

Each soil vapor sample was analyzed for VOCs by USEPA Test Method TO-15. Detectable concentrations of VOCs were reported in each of the soil vapor samples analyzed. However, none of the reported soil vapor concentrations exceeded their respective commercial California Office of Environmental Health Hazard Assessment (OEHHA) values.

A total of 38 discrete soil samples were collected and submitted for laboratory analytical testing. EEI instructed the laboratory to analyze only the 19 shallow (0.5 feet below grade) samples for Total Arsenic and Lead by USEPA Test Method 6010B and Organochlorine Pesticides (OCPs) by USEPA Test Method 8081A, while holding the deep (2 feet below grade) samples pending the shallow samples' analytical results.

Based on elevated concentrations of pesticides and/or lead detected in soil samples EEI-S-9-0.5', EEI-S-14-0.5', EEI-S-16-0.5', and EEI-S-17-0.5', and at the request of the Client, on June 14, 2016, EEI returned to the subject property and collected soil samples at 10-foot step-outs to the north, northeast, east, southeast, south, southwest, west, and northwest of the four (4) referenced sample locations. A total of 36 locations were sampled, including eight (8) surrounding each of four referenced sample locations and by collecting one (1) 3-foot bgs sample from each of the four (4) referenced sample locations.

Detectable concentrations of Total Arsenic were reported in multiple samples analyzed from both sample events, with a maximum concentration of 23 mg/kg detected in sample EEI-S-9S-0.5'. While each sample containing detectable concentrations of Total Arsenic exceeded the OEHHA commercial screening level of 0.24 mg/kg, five (5) samples exhibited concentrations that were equal to or greater than the DTSC School Evaluation Screening Value of 12 mg/kg, while the remaining samples exhibited concentrations below the DTSC screening value.

Detectable concentrations of Total Lead were reported within multiple samples analyzed from both sample events, with a maximum concentration of 140 mg/kg (EEI-S-16-0.5'). While none of the detectable concentrations of Total Lead exceeded commercial screening levels, four (4) of the samples with elevated concentrations were reanalyzed using soluble threshold limit concentration (STLC) for waste characterization purposes. Results of Total Lead by STLC analysis ranged between 1.8 milligrams per liter (mg/l) to 8.1 mg/l.

Dieldrin was detected in samples EEI-S-9NE-0.5' (260 micrograms per kilogram [µg/kg]), EEI-S-9E-0.5' (190 µg/kg), EEI-S-9SE-.05' (170 µg/kg), EEI-S-9S-0.5' (260 µg/kg), and EEI-S-14-.05' (260 µg/kg), each exceeding the OEHHA commercial screening level of 130 µg/kg. All remaining detectable concentrations Dieldrin and other pesticides in soil were below their respective commercial screening levels.

EEI provided the following recommendations:

- Concentrations of arsenic, lead and pesticides were detected within the shallow soil (upper 2 feet bgs) beneath the subject property. Based on soil analytical results, with the exception of shallow soil located within a 10 feet radius of sample locations EEI-S-16, EEI-S-9, and EEI-S-14, the balance of soil underlying the property can be reused for commercial purposes.

- Results of the STLC lead analysis indicated that a 10-feet radius to a depth of 2-feet, the equivalent of approximately 30 cubic yards (yd^3), or approximately 44 tons of soil, surrounding sample location EEI-S-16 would require disposal as Non-RCRA (California) hazardous waste, while the balance of soil underlying the subject property would qualify as non-hazardous waste.

- Based on concentrations of Dieldrin in soil exceeding the OEHHA commercial screening level of 130 µg/kg in samples collected from or within a 10-feet radius of sample points EEI-S-9 and EEI-S-14, excavations measuring approximately 20'x20' to depths of approximately 2 feet surrounding sample locations EEI-S-9 and EEI-S-14 are recommended. Excavations would generate approximately 30 yd^3, or 44 tons of soil per area, total approximately 60 yd^3, or approximately 88 tons. The excavated soil would qualify as non-hazardous waste.

- If suspected contaminated soil is encountered during normal grading and construction activities, EEI recommended that the soil be excavated and segregated/sampled under the supervision of an environmental professional. Upon verification, any contaminated soil should be properly characterized and disposed of offsite.

- Based on the subject property's historical agricultural activities, it is possible that buried/concealed/hidden agricultural by-products, irrigation and fuel piping, and/or additional storage tanks, both below and above ground may have existed or exists on the subject property.

- Any buried trash/debris, undocumented USTs or other waste encountered during future subject property development or improvements should be evaluated by an experienced environmental consultant prior to removal. If stained or suspicious soil is encountered during future grading operations, the material should be evaluated and if deemed necessary, characterized for proper disposal.

3.7.5 Ambient Environmental, Inc. (AEI), Asbestos Building Material Survey, For the Property Located at: 700-800 San Gabriel Blvd., San Gabriel, California, dated October 2017.

AEI performed an asbestos building materials survey for the property located at 700-800 South San Gabriel Boulevard on June 6, 2017. At the time of AEI's survey, the property consisted of a nursery with greenhouses and a single-story boiler room. AEI reported ACM to be present in roof mastic (5 ft^2) within an electric room roof located across from the boiler room, and within transite panels (200 ft_2) within the boiler room ceiling.

3.7.6 Fresh Air Environmental Services, Inc. (FAES), Certificate of Completion, 710 San Gabriel Boulevard, Rosemead, CA 91770, dated December 13, 2017.

FAES certified that they removed and disposed of ACMs as per contract agreement dated November 27, 2017, and as per AEI's survey report dated October 2017.

3.8 Other Environmental Issues

3.8.1 Asbestos-Containing Materials

Asbestos, a natural fiber used in the manufacturing of several different building materials, has been identified as a human carcinogen. Most friable (i.e., easily broken or crushed) Asbestos-Containing Material (ACM) was banned in building materials by 1978. By 1989, most major manufacturers had voluntarily removed non-friable ACM (i.e., flooring, roofing, and mastics/sealants) from the market. These materials, however, were not banned completely.

In October 1995, the Federal Occupational Safety and Health Administration (OSHA) redefined how building materials are classified in regard to asbestos and the also the way these materials are to be handled. Under this ruling, "thermal system insulation and sprayed-on or troweled on or otherwise applied surfacing materials" applied before 1980 are considered presumed Asbestos-Containing Materials (PACM). Other building materials such as "floor or ceiling tiles, siding, roofing, transite panels" (i.e., non-friable) are also considered PACM unless tested.

An ACM survey was not conducted at the subject property as part of this Phase I ESA. At the time of EEI's June 20, 2018 site reconnaissance, demolition activities of all site structures were underway, which were subsequently completed by July 13, 2016. Therefore, the subject property currently consists of vacant land. Based on this information, the presence of asbestos-containing materials is not considered likely.

3.8.2 Lead-Based Paint

Lead-Based Paint (LBP) is identified by OSHA, the Environmental Protection Agency (EPA) and the Department Housing and Urban Development Department (HUD) as being a potential health risk to humans, particularly children, based upon its effects to the central nervous system, kidneys, and bloodstream. The risk of Lead-Based Paint has been classified by HUD based upon the age and condition of the painted surface. This classification includes the following:

- maximum risk is from paint applied before 1950;
- a severe risk is present from paint applied before 1960;
- a moderate risk is present from paint applied before 1970;
- a slight risk is present from paint applied before 1977; and
- paint applied after 1977 is not expected to contain lead.

At the time of EEI's June 20, 2018 site reconnaissance, demolition activities of all site structures were underway, which were subsequently completed by July 13, 2016. Therefore, the subject property currently consists of vacant land. Based on this information, the presence of lead-based paint is not considered likely.

3.8.3 Radon

Radon is a radioactive gas which has been identified as a human carcinogen. Radon gas is typically associated with fine-grained rock and soil, and results from the radioactive decay of radium. The U.S. EPA recommends that homeowners in areas with radon screening levels greater than 4 Picocurries per liter (pCi/L) conduct mitigation of radon gas to reduce exposure.
Sections 307 and 309 of the Indoor Radon Abatement Act of 1988 (IRAA) directed the U.S. EPA to list and identify areas of the U.S. with the potential for elevated indoor radon levels. U.S. EPA's Map of Radon Zones (EPA-402-R-93-071) assigns each of the 3,141 counties in the U.S. to one of three zones based on radon potential:

- Zone 1 counties have a predicted average indoor radon screening level greater than 4 pCi/L.
- Zone 2 counties have a predicted average indoor radon screening level between 2 and 4 pCi/L.
- Zone 3 counties have a predicted average indoor radon screening level less than 2 pCi/L.

Based on such factors as indoor radon measurements, geology, aerial radioactivity, and soil permeability; the U.S. EPA has identified the Los Angeles County as Zone 2 (i.e., a predicted average indoor radon screening level between 2 and 4 pCi/L). Based on this information, EEI does not consider radon as a significant environmental concern at this time.

4.0 SITE RECONNAISSANCE

4.1 Purpose

The purpose of our site reconnaissance was to visually and physically observe the subject property, any onsite structures, and adjoining properties for conditions indicating an existing release, past release, or threatened release of any hazardous materials/substances or petroleum products into structures on the subject property, or into soil and/or groundwater beneath the property. This would include any evidence of contamination, distressed vegetation, petroleum-hydrocarbon surface staining, waste drums, ASTs/USTs, illegal dumping, or improper waste storage/handling. Detailed information is provided in the following text.

4.2 Subject Property

On June 20, 2018, EEI personnel conducted a site reconnaissance to visually observe the subject property and adjoining properties for conditions indicating a potential environmental concern. EEI was unescorted during the site reconnaissance. Visual conditions present during the site reconnaissance are documented in the Photographic Log (**Appendix G**) and summarized in **Table 5**.

The subject property is located southeast of the intersection of South San Gabriel Boulevard and East El Monte Street, in the eastern portion of the City of San Gabriel, California and most recently served as the growing area for the former San Gabriel Nursery and Florist (623 South San Gabriel Boulevard). The rectangular-shaped subject property is comprised of 49 parcels, encompassing approximately 5.86-acres and is assigned the addresses 710, 718, 822 and 836 South San Gabriel Boulevard, and 705, 815, 817, 821 and 823 South Gladys Avenue. Two (2) former residences (addressed 827 and 839 South Gladys Avenue) which were demolished in 2018 were previously located within the southeastern portion of the subject property.

The subject property is surrounded with either chain-link or steel fencing. EEI accessed the subject property near the northeast corner by foot through a gap in the locked gate located along South Gladys Street.

The ground surface of the subject property was primarily covered by a combination of dirt, gravel, plus scattered and partially pulverized demolished materials from the structures and facilities formerly onsite. Various building material stock piles including concrete, cinder block, wood and steel were observed throughout the subject property, but particularly in the southern and central portions of the property. Much of the material on the ground in the northern portion of the property is apparently the result of fire burning down grow operation-related facilities, and the burnt materials along with foundation remnants comprise much of the groundcover cover in the northern portion of the property. Based solely on topography, surface runoff generated on the subject property would flow towards the lowest elevations at the south-southwest; eventually ending up in a local storm drain system.

Staff noted overhead power lines traversing portions of the eastern perimeter of the property, and along East El Monte Street that bounds the subject property to the north. Overhead power lines were also observed traversing the southern and western perimeters of the property. The power lines located along South San Gabriel Boulevard, East Grand Avenue and East El Monte Street contained multiple pole-mounted electrical transformers. The transformers appeared in good working condition, with no evidence of fluid leaks or spills.

The subject property was previously occupied by a combination of greenhouse structures, small sheds, outbuildings, and tables and benches that supported various plants during cultivation. Remnants of a large former chilled storage unit, half of which was utilized as a chemical storage area, while the other half was utilized as a tool storage area, was located within the northern portion of the site and was recently affected by fire. Foundation remnants of a structure formerly housing a boiler unit was also located within the northern portion of the site. All structures at the subject property have been demolished, with the exception of a small nursery staging/storage structure located in the northeast portion of the property, and an open-walled storage shed located against the eastern perimeter fence in the northern portion of the property. None of the observed structures contained evidence of staining or emitted noxious odors. The nursery staging structure in the northeastern portion of the subject property contained a sealed container of a common household cleaning agent and a sealed 5-gallon container of Valvoline oil. The containers and the immediate vicinity showed no indication of potential leakage.

Several empty 55-gallon poly drums with residual potting soil were observed scattered across the property. No staining, noxious odors or indication of chemical storage/spills were observed associated with or in the immediate vicinity of the drums.

The two (2) former residential structures (827 and 839 South Gladys Avenue) have been completely demolished and the building materials likely contribute to the localized debris piles in the southern portion of the property and also likely contribute to building material debris piles observed elsewhere on the subject property. An inground pool associated with one of the former residences had been removed and the hole filled in with material that did not seem uncharacteristic from the rest of the subject property, which may had been internally derived.

EEI personnel observed minor amounts of trash and windblown debris located along the subject property's perimeter. Trash and windblown debris consisted of household items and do not appear to represent any environmental concern to the subject property. No illegal dumping or fuel storage was noted in this area.

No evidence of contamination, distressed vegetation, petroleum-hydrocarbon surface staining, waste drums, USTs, ASTs, illegal dumping, or improper waste storage/handling was noted during our site reconnaissance.

Table 5 - Summary of Site Reconnaissance

Item	Concerns	Comments
General Housekeeping	No	Staff noted small amounts of trash; including discarded furniture, shopping carts and plastic pots for plants, along with windblown debris scattered along subject property's perimeter.
Surface Spills	No	No concerns observed.

Table 5 - Summary of Site Reconnaissance		
Item	**Concerns**	**Comments**
Stained Surfaces	No	No concerns observed.
Fill Materials	No	A swimming pool associated with one of the former residences had been removed and the hole filled-in with material that did not seem uncharacteristic of the rest of the subject property and may have been internally derived.
Pits/Ponds/Lagoons	No	No concerns observed.
Surface Impoundments	No	No concerns observed.
ASTs/USTs	No	No concerns observed.
Distressed Vegetation	No	No concerns observed.
Wetlands	No	No concerns observed.
Electrical Substations	No	No concerns observed.
Areas of Dumping	No	No concerns observed.
Transformers	No	Multiple electrical transformers in good condition bordering the subject property along East Grand Avenue, South San Gabriel Boulevard and East El Monte Street.
Waste/Scrap Storage	No	Multiple piles of debris generated from recent onsite demolition activities were observed throughout the property.
Chemical Use/Storage	No	No concerns observed.

4.3 Adjacent Properties

EEI conducted a visual and auto reconnaissance of the adjoining properties (to the extent practical) to evaluate the potential for offsite impacts that may affect the subject property. These would include evidence of chemical storage or usage, surface staining or leakage, distressed vegetation, or evidence of illegal dumping. The following bullet items summarize our observations:

- North – retail facility and associated parking for former San Gabriel Nursery and Florist;
- South – multi-family residential development;
- East – single and multi-family residential development;
- West – mix of commercial and retail development.

Adjacent properties identified as having environmental related issues in the databases researched are discussed under **Section 3.3.2**. No service stations, dry cleaners, or industrial properties were in the immediate vicinity.

5.0 VAPOR ENCROACHMENT SCREEN

ASTM Standard E2600-15 Standard Guide for Vapor Encroachment Screening (VES) on Property Involved in Real Estate Transactions was used as guidance for conducting a VES for the subject property. The purpose of the screening is to determine whether a Vapor Encroachment Condition (VEC) exists from chemicals of concern (COC) that may migrate as vapors onto a property because of contaminated soil and groundwater on or near the subject property. The screening involves a two-tiered approach to assessing VEC risk as described herein. The VES process includes a review of site conditions (e.g., aerial photographs, city directories, and environmental database information), which is information typically collected during a Phase I ESA, user provided information, and in some instances the use of a third-party vapor encroachment application. The following sections describe the VES performed on the property.

5.1 Site Conditions

The subject property is located on the USGS 7.5 Minute, El Monte, California Quadrangle map (USGS, 2012). The property elevation is approximately 370 feet amsl along the southwest portions to roughly 380 feet amsl at the northern portions. Regionally, the topography slopes to the southwest away from the San Gabriel Mountains at approximately 50 feet per mile. The property consists of land with relatively low topographical relief which gently slopes to the south-southwest parallel to the nearby Rubio Wash and toward Rio Hondo. Surface drainage appears to flow to the south-southwest.

Soil near the subject property has been identified by the USDA-NRCS online Web Soil Survey database as Urban Land-Palmview-Tujunga complex with 0 to 5 percent slopes, and as Urban Land-Azuvina-Montebello complex with 0 to 5 percent slopes (USDA, 2018).

5.2 User Provided Information

To assist EEI in the completion of the VES, Mr. Ken Lee, representative for Pacific Square San Gabriel, LLC completed a Vapor Encroachment Screen - User Questionnaire (**Appendix H**). The questionnaire provided basic information regarding the use, condition, and proposed development of the subject property.

According to Mr. Lee, the subject property will be developed with mixed commercial/residential use structures, including a proposed subterranean parking garage. According to Mr. Lee, with the exception of limited contamination from pervious nursery operations identified in EEI's 2016 Limited Phase II ESA, he is not unaware of any reported instances of gas stations, cleaners, storage tanks, odors, or health concerns reported on the property.

5.3 Tier 1 Screening – Search Distance Test/Chemicals of Concern

A Tier 1 Screening includes the search distance test that involves a review of the regulatory database report and available historical records obtained during the Phase I ESA process to decide if any known or suspect potentially contaminated properties exist within the Area of Concern (AOC). High risk sites are typically current and former gas stations, former and current dry cleaners, manufactured gas plants, and industrial sites (Brownfields). The AOC is defined as any up-gradient sites within the ASTM E1527-13 standard search distances and any cross or down gradient sites within one-third (0.3) mile for solvents and petroleum products.

If the contamination at the known or potentially contaminated sites within the AOC consists of Chemicals of Concern (COCs), then a potential Vapor Encroachment Condition (pVEC) exists, and a Tier 2 Screening evaluation is recommended. If no known or potentially contaminated sites with COCs exist within the AOC, no further inquiry is necessary.

Based on EEI's Tier 1 Screening evaluation, onsite historical uses considered to pose a pVEC at the subject property. A summary of the historical uses is provided below.

1. Four (4) USTs (diesel and gasoline fuel) were removed from a portion of the subject property in 1988. The tank removal received closure by the Los Angeles County Public Works EPD on March 16, 1988. Four (4) additional USTs (gasoline) were identified and removed from another portion of the subject property in 2015. The LACDPW-EPD referred the issue to the LARWQCB, who determined that opening a case was not warranted, and no further action was required.

   The presence of the above referenced former USTs at the subject property is considered to be a pVEC.

5.4 Tier 2 Screening – Review of Existing Data

Based on the results of our Tier 1 Screening evaluation, a Tier 2 Screening, consisting of a review of existing data was conducted. EEI reviewed previous investigation reports related to the USTs removed from the subject property. A detailed review of the data was provided in previous sections of this report (i.e. Sections 3.4 Regulatory Agency Review, and Section 3.7 Previous Reports).

5.5 Findings

Based on the results of a Tier 1 and Tier 2 VES, EEI concluded that given the results of EEI's soil vapor sampling at the former onsite UST locations, a pVEC can be ruled out for the subject property.

6.0 LIMITED SOIL INVESTIGATION

6.1 Investigation

EEI performed a limited soil investigation (LSI) to evaluate the subject property soils for potential chemicals of concern associated with historical agricultural land use that was affected by fire and historic residential land use that may had supported structures containing lead-based paint. The following sections discuss the soil sampling performed. **Figure 3** illustrates our sample locations. Complete laboratory analytical reports and chain-of-custody documentation is provided in **Appendix I.**

On July 31, 2018, EEI collected soil samples from five (5) locations, identified as SB-1-0.5' through SB-5-0.5', within the north-central portion of the subject property, an area of the property in which a recent fire damaged portions of a chiller unit and its contents, in addition to several greenhouse structures. EEI also collected soil samples from three (3) locations, identified as SB-6-0.5' through SB-8-0.5', within the southeastern portion of the subject property which was historically occupied by single-family residential structures. The Client's demolition contractor removed each of the aforementioned structures prior to EEI's investigation. A total of eight (8) discrete soil samples were collected throughout the subject

property and at a depth of approximately 0.5 feet below ground surface (bgs). **Figure 3** illustrates the sample locations.

Soil samples were collected at each location using a hand auger equipped with 3-inch diameter bucket. Sample material was extracted using a gloved hand and placed in a laboratory supplied an 8-ounce glass jar. After sample collection, the top of the jar was sealed with Teflon-lined plastic caps, and labeled with a unique number. The samples were stored in a chilled cooler, pending delivery, under Chain of Custody (COC) documentation, to SunStar Laboratories, Inc. in Lake Forest, California.

A total of five (5) discrete soil samples, identified as SB-1-0.5' through SB-5-0.5', were collected and submitted for laboratory analytical testing of Total Petroleum Hydrocarbons (TPH) – Carbon Chain Identification (CCID) by United States Environmental Protection Agency (USEPA) Test Method 8015M; Title 22 Metals by USEPA Test Methods 6010B/7470/7471; Volatile Organic Compounds (VOCs) by USEPA Test Method 8260B; Polyaromatic Hydrocarbons (PAHs) – Selective Ion Monitoring (SIM) by USEPA Test Method 8270; Organochlorine Pesticides (OCPs) by USEPA Test Method 8081A, and for Asbestos by Polarized Light Microscopy (PLM).

A total of three (3) discrete soil samples, identified as SB-6-0.5' through SB-8-0.5', were collected and submitted for laboratory analytical testing of Total Lead by USEPA Test Method 6010B.

6.2 Laboratory Analytical Results

The following sections discuss laboratory analytical results for soil matrix samples collected during this investigation. **Table 6**, included as an attachment to this document, summarize the results, while complete laboratory analytical reports with chain of custody documentation are included in **Appendix I.**

The Client has indicated that the subject property will be redeveloped into ground level commercial and multi-story residential. Furthermore, the property will be excavated to approximately two (2) levels of below ground parking. Based on the proposed use of the site, EEI compared the detectable concentrations of chemicals of concern in soil samples collected and analyzed during this investigation to the USEPA Regional Screening Levels (RSLs), Commercial Soil, Total Petroleum Hydrocarbons (Aromatic – Low, Medium and High), May 2018. A commercial land use scenario was chosen based on the proposed ground level use of the subject property. Client understands that areas, such as gardens, parks, or other sensitive use areas, should be evaluated according to residential land use standards. **Table 6** Summarizes the laboratory analytical results. The following bulleted items summarize notable findings:

- No concentrations of TPH as gasoline range organics (GRO) or VOCs were detected above the laboratory detection limit (i.e., "non-detect") in any of the samples analyzed.

- Asbestos was not detected in any of the samples analyzed.

- TPH as Diesel Range Organics (DRO) were detected in soil samples SB-3-0.5' (24 milligrams per kilogram [mg/kg]) and SB-5-0.5' (120 mg/kg), which is less than the USEPA RSLs soil screening number for a commercial land use scenario of 440 mg/kg. No other samples detected TPH-DRO above the laboratory reporting limit (i.e., "non-detect").

- TPH as Motor Oil Range Organics (MORO) were detected in soil samples SB-1-0.5' (91 mg/kg), SB-3-0.5' (53 mg/kg) and SB-5-0.5' (130 mg/kg), which are less than the USEPA RSLs soil screening number for a commercial land use scenario of 3,500,000 mg/kg. No other samples detected TPH-MORO above the laboratory reporting limit (i.e., "non-detect").

- Various PAHs were detected in each of the soil samples analyzed, identified as B-1-0.5' through B-2-0.5'. The detectable concentrations of PAHs were below their respective USEPA RSLs soil screening numbers for a commercial land use scenario.

- Chlordane was detected in soil samples SB-1-0.5' (40.4 micrograms per kilogram [µg/kg]), SB-2-0.5' (17.2 µg/kg), SB-3-0.5' (18.7 µg/kg) and SB-5-0.5' (126 µg/kg), which are less than the USEPA RSLs soil screening number for a commercial land use scenario of 7,700 µg/kg. No other samples detected Chlordane above the laboratory reporting limit (i.e., "non-detect").

- DDE was detected in each of the soil samples analyzed, identified by SB-1-0.5' through SB-5-0.5', at concentrations ranging between 25 µg/kg (SB-4-0.5') to 150 µg/kg (SB-1-0.5'), which are less than the USEPA RSLs soil screening number for a commercial land use scenario of 9,300 µg/kg.

- DDT was detected in each of the soil samples analyzed, identified by SB-1-0.5' through SB-5-0.5', at concentrations ranging between 11 µg/kg (SB-4-0.5') to 220 µg/kg (SB-3-0.5'), which are less than the USEPA RSLs soil screening number for a commercial land use scenario of 8,500 µg/kg.

- DDD was detected in soil samples SB-1-0.5' (19 µg/kg), SB-2-0.5' (5.4 µg/kg) and SB-3-0.5' (29 µg/kg), which are less than the USEPA RSLs soil screening number for a commercial land use scenario of 9,600 µg/kg. No other samples detected DDD above the laboratory reporting limit (i.e., "non-detect").

- Dieldrin was detected in soil samples SB-1-0.5' (14 µg/kg), SB-2-0.5' (6.5 µg/kg), SB-3-0.5' (20 µg/kg) and SB-4-0.5' (6.3 µg/kg), which are less than the USEPA RSLs soil screening number for a commercial land use scenario of 34 µg/kg. No other samples detected Dieldrin above the laboratory reporting limit (i.e., "non-detect").

- Endrin was detected in soil sample SB-3-0.5' at 23 µg/kg, which is less than the USEPA RSLs soil screening number for a commercial land use scenario of 250,000 µg/kg. No other samples detected Endrin above the laboratory reporting limit (i.e., "non-detect").

- Several metals were detected in the soil samples collected as part of this investigation. With the exception of Arsenic detected in each of the samples analyzed between 27 mg/kg (SB-1-0.5' and SB-5-0.5') and 37 mg/kg (SB-4-0.5'), exceeding the USEPA RSLs soil screening number for commercial soil of 3.0 mg/kg, and the DTSC School Evaluation Screening Value of 12 mg/kg, no metals were detected at concentrations exceeding their respective USEPA RSLs soil screening number for commercial soil. The detected concentrations appear to be associated with background levels inherent to site soils.

Although the Arsenic concentrations, ranging between 27 mg/kg (SB-1-0.5' and SB-5-0.5') to 37 mg/kg (SB-4-0.5'), detected in site soils slightly exceeds the school site evaluation value of 12 mg/kg, given the future mass grading (i.e., mixing and redistributing of site soil), the detected Arsenic value is not considered to be a significant environmental concern for the subject property, and no further investigation is warranted at this time.

7.0 FINDINGS AND OPINIONS

Based on the information obtained in this ESA, EEI has the following findings and opinions:

- *Known or suspected RECs* – are defined by the ASTM Standard Practice E 1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

  This assessment has revealed no evidence of *known or suspected RECs* in connection with the subject property.

- *Controlled RECs (CRECs)* – are defined by the ASTM Standard Practice E 1527-13 as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls)

  This assessment has revealed no evidence of *CRECs* in connection with the subject property.

- *Historical Recognized Environmental Conditions (HRECs)* – are defined by the ASTM Standard Practice E 1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).

  The following *Historical REC* has been identified in connection with the subject property.

- *De Minimis* Conditions – include environmental concerns identified which may warrant discussion but do not qualify as RECs, as defined by the ASTM Standard Practice E 1527-13.

  The following *de minimis* condition *was revealed* in connection with the subject property:

- The results of our LSI detected low levels of potential chemicals of concern, including Total Arsenic and Lead, OCPs, PAHs and TPH as DRO/MORO in soil. No concentrations of potential chemicals of concern were detected above generally accepted screening levels for a commercial land use scenario, except for Total Arsenic. Total Arsenic was detected in samples analyzed ranging between 27 mg/kg (SB-1-0.5' and SB-5-0.5') to 37 mg/kg (SB-4-0.5'), which exceeds the commercial screening level of 0.36 mg/kg.

  Arsenic is a naturally occurring element in soil. Arsenic is unique by the fact that background concentrations typically exceed the commercial screening value of 0.36 mg/kg by a factor of 20 (DTSC, 2008). To augment the commercial screening level, a 2008 study by DTSC was referenced which examined proposed school sites in southern California. The DTSC Schools Program evaluated arsenic-containing soil data from a large number of school sites across California. The data evaluation indicated that 12 mg/kg maybe a useful screening number for the Schools Program when evaluating arsenic as a chemical of potential concern.

  The Arsenic concentrations (ranging between 27 mg/kg to 37 mg/kg) detected in site soils slightly exceeds the school site evaluation value of 12 mg/kg. According to the Client, the proposed future development will include mass grading and soil removals in excess of 20-feet bgs, which likely reduce the Arsenic detected. Based on the proposed mass grading, the detected Arsenic value is not considered to be a significant environmental concern for the subject property, and no further investigation is warranted at this time.

- Although not considered to be RECs, the following non-scope considerations were identified:

  - Based on the subject property's historical agricultural activities, it is possible that buried/concealed/hidden agricultural by-products, irrigation and fuel piping, and/or storage tanks, both below and above ground may have existed or exists on the subject property. Any buried trash/debris, undocumented USTs or other waste encountered during future subject property development or improvements should be evaluated by an experienced environmental consultant prior to removal. If stained or suspicious soil is encountered during future grading operations, the material should be evaluated and if deemed necessary, characterized for proper disposal.

  - If suspected contaminated soil is encountered during normal grading and construction activities, EEI recommends that the soil be excavated and segregated/sampled under the supervision of an environmental professional. Upon verification, any contaminated soil should be properly characterized and disposed of offsite.

8.0 DATA GAPS AND DEVIATIONS FROM ASTM PRACTICES

Section 3.2.21 (ASTM E1527-13) defines a data gap as "a lack or inability to obtain information required by the practice despite good faith efforts of the environmental professional to gather such information."

8.1 Historical Data Gaps

No historical data gaps were identified during our research efforts.

8.2 Regulatory Data Gaps

No regulatory data gaps were identified during our research efforts.

8.3 Onsite Data Gaps

No on-site data gaps were identified during our research efforts.

8.4 Deviations from ASTM Practices

Section 12.10 (ASTM E1527-13), states that all deletions and deviations from this practice shall be listed individually and in detail, including client-imposed constraints, and all additions should be listed.

EEI believes that there are no exceptions to, or deletions from, the ASTM E1527-13 Guidelines.

9.0 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E1527-13 of APNs 5373-029-001 through 5373-029-022, 5373-030-001 through 5373-030-006 and 5373-030-009 through 5373-030-028, the *subject property*. Any exceptions to, or deletions from, this practice are described in Section 8.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the *subject property*, except for those discussed in Section 7.0 Findings and Opinions.

APPENDIX A - RESUME OF ENVIORNMENTAL PROFESSIONAL

BERNARD A. SENTIANIN, PG

SENIOR GEOLOGIST

SUMMARY

As Senior Geologist of EEI since 1997, Mr. Sentianin provides consulting and technical services as a project manager, expert witness, and senior geologist for investigation and cleanup efforts at sites impacted by Petroleum Hydrocarbons, heavy metals, pesticides, and chlorinated solvents. As a senior project manager, he has hands on experience designing, installing, and managing large scale projects involving above ground and in-situ bioremediation, soil vapor extraction, sparging, and groundwater extraction/treatment. He has 28 years of environmental project management experience, and over 30 years professional geologic experience. Mr. Sentianin has extensive experience in planning, implementing and evaluating Phase I and Phase II environmental assessments in commercial real estate transactions.

EDUCATION

1985 Bachelor of Science, Geology, California State University, Bakersfield
1989 Master of Science, Geological Sciences, San Diego State University

REGISTRATIONS/CERTIFICATIONS

Professional Geologist No. 5530, State of California.

Prior WORK HISTORY

1991 TO 1997 Senior Geologist, Senior Project Manager
PW ENVIRONMENTAL

Established in-house engineering and consulting services for mid-sized environmental contractor. Established regulatory, vendor, and client contacts. Initiated policies governing technical report content and format and instituted in-house training program for new technical staff. Selected prioritized and procured required support equipment. Actively managed Phase I and Phase II investigation and remediation projects. Reviewed assessment data, prepared feasibility studies, and evaluated remedial alternatives while preparing Remedial Action Plans (RAP) for fuel, heavy metal, and solvent-impacted sites. Prepared health-based risk assessment on large cleanup site adjacent to health care facility. Permitted, implemented, and successfully completed the first in-situ groundwater bioremediation system in Ventura County. Reviewed and implemented numerous Phase I and Phase II environmental site assessments throughout Central and Southern California.

1989 TO 1991 STAFF/Project Geologist
NACHANT ENVIRONMENTAL, INC.
Planned, implemented, and managed environmental site investigations and remediation projects following appropriate regulatory and professional guidelines. Prepared and reviewed project cost proposals, correspondence, regulatory permits, assessment and investigation reports, and remedial action plans.

1987 TO 1989 TEACHING ASSISTANT
SAN DIEGO STATE UNIVERSITY – DEPARTMENT OF GEOLOGICAL SCIENCES AND DEPARTMENT OF ENGINEERING

REPRESENTATIVE PROJECTS

Globe Mills, Sacramento CA - Conducted Phase I and Phase II environmental site assessment, evaluated environmental concerns for adaptive reuse project on behalf of Sacramento Housing and Redevelopment Agency. Coordinated regulatory oversight of the project with Sacramento County Environmental Management Division.

K Street Corridor – Sacramento, CA. Evaluated and conducted Phase I environmental site assessments on three block area of downtown Sacramento, as well as a number of individual properties in other areas within the K Street Corridor, on behalf of the City of Sacramento Downtown Development Group.

Southside Garden and Fremont Mews, Sacramento, CA – Conducted Phase I and Phase II environmental site assessments and evaluated environmental concerns on two community garden projects on behalf of the Capitol Area Development Authority. Coordinated regulatory oversight with Sacramento County Environmental Management Division and the State Office of Environmental Health Hazard Assessment. Prepared and evaluated requests for proposals for cleanup contractors and provided remediation oversight and management. Prepared closure documentation and obtained regulatory signoff form both the Southside Garden and Fremont Mews projects.

Electronics Manufacturing Facility/Fueling Depot, Santa Monica, CA. Performed soil and groundwater investigation, feasibility testing and evaluation of fuel hydrocarbon and chlorinated solvent plumes. Prepared RAP with design criteria for soil vapor extraction. After approval of RAP by State regulators, implemented and successfully completed remediation at site, obtaining closure.

Former Aerospace Facility, Santa Ana, CA. Evaluated existing Phase I And Phase II assessments. Performed soil, soil vapor, and groundwater investigations of chlorinated solvent plumes at multiple locations on site. Modeled and evaluated potential plume source areas. Initiated site specific sampling protocol for chlorinated solvents. Liaison with lead regulatory agency regarding regional contamination issues and site closure requirements.

Major Land Owner/Developer, San Juan Capistrano, CA. Conducted Phase I and Phase II environmental site assessments at multiple sites in southern Orange County. Evaluated potential environmental concerns related to sand & gravel operations, fueling facilities, ordinance testing facilities, aerospace engineering labs, vehicle maintenance and repair facilities, agricultural operations, and illicit dump sites.

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 8/17/2018 at 12:28:40 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of December 01, 2017 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

PACIFIC SQUARE SAN GABRIEL, LLC, a California limited liability company

The estate or interest in the land hereinafter described or referred to covered by this Report is:

FEE

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2017-2018

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. THE RIGHT OF L.B. ROGERS TO REMOVE THE GAS STATION AND TIRE SHOP, FRAME HOUSE AND TWO FRAME SHEDS, TOGETHER WITH PUMPS AND EQUIPMENT PERTAINING THERETO, SAID L.B. ROGERS ALLEGING OWNERSHIP THEREOF.

4. An easement for AN ELECTRIC LINE, CONSISTING OF POLES, GUYS AND ANCHORS, CROSSARMS, WIRES AND OTHER FIXTURES AND APPLIANCES and incidental purposes in the document recorded JULY 14, 1958 as INSTRUMENT NO. 3568 IN BOOK D154 PAGE 211 of Official Records.

   (Affects LOTS 35, 36 AND 37)

5. The fact that the land lies within the boundaries of the SAN GABRIEL COMMERCIAL Redevelopment Project Area, as disclosed by the document recorded DECEMBER 23, 1993 as INSTRUMENT NO. 93-2503835 of Official Records.

6. Water rights, claims or title to water, whether or not shown by the public records.

7. Rights of parties in possession.

8. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/NSPS survey.

   Prior to the issuance of a 2006 ALTA Extended Owner's Policy of Title without Western Regional Exceptions, The Company will require:

9. With respect to PACIFIC SQUARE SAN GABRIEL LLC, a limited liability company:
   a. A copy of its operating agreement and any amendments thereto;
   b. If it is a California limited liability company, that a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) be recorded in the public records;
   c. If it is a foreign limited liability company, that a certified copy of its application for registration (LLC-5) be recorded in the public records;
   d. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, that such document or instrument be executed in accordance with one of the following, as appropriate:
   (i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such document must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
   (ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
   e. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require

10. An ALTA/NSPS survey of recent date which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

1. Supplemental taxes for the fiscal year 2016-2017 assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public, records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;

d. improvements on the Land;
e. land division; and
f. environmental protection.
This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 19:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 21:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$5,000

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

[Except as provided in Schedule B - Part II,[t[or T]his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

[PART I

[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:]

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.

4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:
[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.
7. [Variable exceptions such as taxes, easements, CC&R's, etc. shown here.]

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the

Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.

7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

Privacy Information

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

Information Obtained Through Our Web Site

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet.
In general, you can visit First American or its affiliates' Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site.
There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

Business Relationships

First American Financial Corporation's site and its affiliates' sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

Cookies

Some of First American's Web sites may make use of "cookie" technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive.
FirstAm.com uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

Fair Information Values

Fairness We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.
Public Record We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.
Use We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data.
Accuracy We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information. When, as with the public record, we cannot correct inaccurate information, we will take all reasonable steps to assist consumers in identifying the source of the erroneous data so that the consumer can secure the required corrections.
Education We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.
Security We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by EEI, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EEI, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SAN GABRIEL VALLEY (	***MAIN ST & GAFIELD AV***	***N 1/8 - 1/4 (0.143 mi.)***	***0***	***10***

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/09/2018 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SAN GABRIEL VALLEY (	***MAIN ST & GAFIELD AV***	***N 1/8 - 1/4 (0.143 mi.)***	***0***	***10***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1

RCRA-LQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SOUTHERN CALIFORNIA	***5016 EARLE AVE***	***E 1/8 - 1/4 (0.228 mi.)***	***L62***	***90***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2018 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SAN GABRIEL VALLEY (AREA 3) (Continued) **1000114962**

Substance ID: U228
Substance: TRICHLOROETHYLENE (TCE)
CAS #: 79-01-6
Pathway: GROUND WATER PATHWAY
Scoring: 4

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 3) is a ground water plume that runs along the axis of the west fork of the Alhambra Creek in the San Gabriel ground water basin in Alhambra, Los Angeles County, California. The plume is about 2 miles long and 1 mile wide. Ground water is contaminated with trichloroethylene TCE) and perchloroethylene PCE), according to analyses by State agencies and local water companies. Many public wells in the area exceedthe EPA Suggested No Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts billion ppb) of TCE, a level considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service.
Status June 1984): A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination.
The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of the contamination. This site, along with the three other San Gabriel Valley sites,was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

FINDS:

Registry ID: 110002620986

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

CAPITOL IMPORTS (Continued) **1004677139**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002848036

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110002419785

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Region: 09
Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No

SOUTHERN CALIFORNIA EDISON (Continued) **1007199577**

Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Environmental Interest/Information System
HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017
Date Data Arrived at EDR: 12/26/2017

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

700 - 800 S. SAN GABRIEL BOULEVARD
SAN GABRIEL, CA 91776

TARGET PROPERTY COORDINATES

Latitude (North):	34.093024 - 34° 5' 34.89''
Longitude (West):	118.090231 - 118° 5' 24.83''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	399424.9
UTM Y (Meters):	3772812.0
Elevation:	381 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630799 EL MONTE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

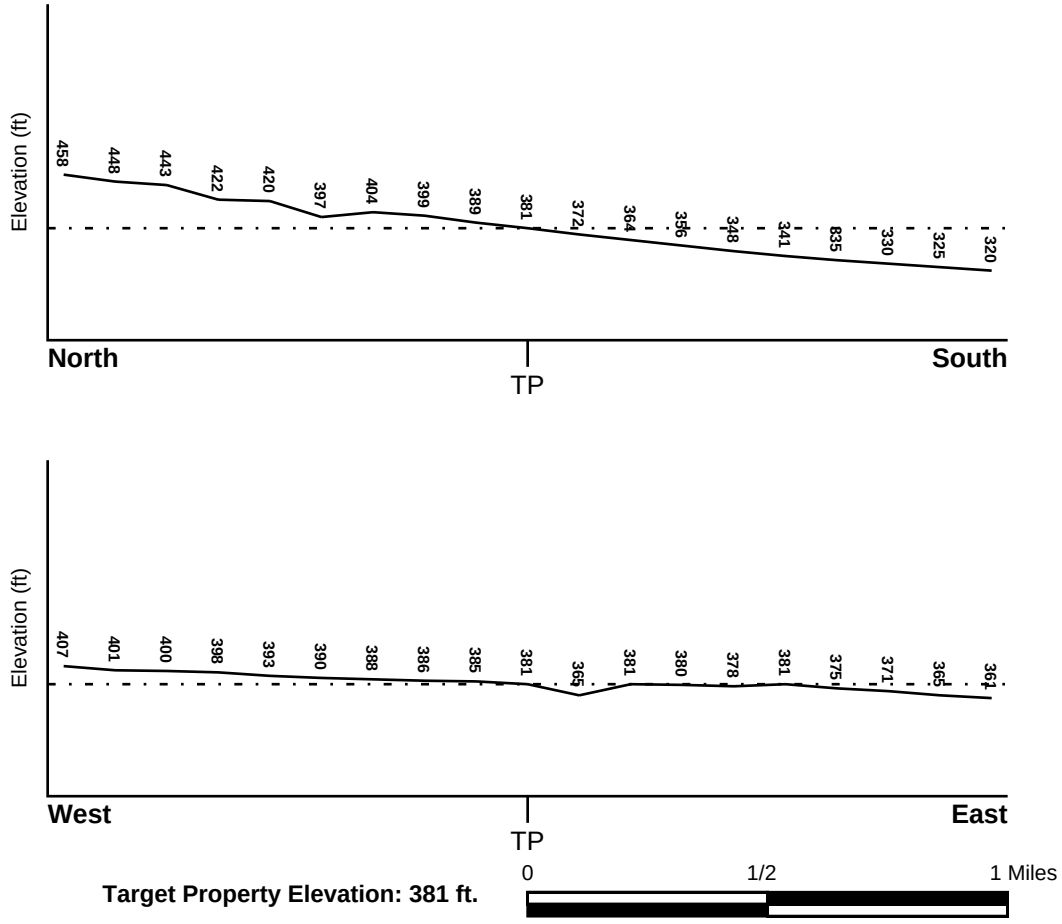

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1675F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EL MONTE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Sample Collected:	10-APR-13	Findings:	1600. MG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	08-SEP-15	Findings:	1.8 UG/L
Chemical:	TRICHLOROETHYLENE		

Sample Collected:	08-SEP-15	Findings:	220. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	08-SEP-15	Findings:	8.1 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	15-SEP-15	Findings:	10. UG/L
Chemical:	CHROMIUM, HEXAVALENT		
Sample Collected:	05-OCT-15	Findings:	0.7 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05-OCT-15	Findings:	2. UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	07-DEC-15	Findings:	0.99 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	07-DEC-15	Findings:	1.7 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	02-MAR-16	Findings:	0.74 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	02-MAR-16	Findings:	2.2 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	25-MAY-16	Findings:	10. UG/L
Chemical:	CHROMIUM, HEXAVALENT		
Sample Collected:	06-JUN-16	Findings:	1.53 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	06-JUN-16	Findings:	39. MG/L
Chemical:	CALCIUM		
Sample Collected:	06-MAY-13	Findings:	0.7 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06-MAY-13	Findings:	1.9 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	03-JUN-13	Findings:	0.6 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	03-JUN-13	Findings:	1.9 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06-JUN-13	Findings:	0.79 PCI/L
Chemical:	GROSS ALPHA COUNTING ERROR		
Sample Collected:	06-JUN-13	Findings:	2.8 PCI/L
Chemical:	URANIUM (PCI/L)		
Sample Collected:	06-JUN-13	Findings:	0.7 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06-JUN-13	Findings:	2. UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06-JUN-13	Findings:	1.18 PCI/L
Chemical:	GROSS ALPHA MDA95		
Sample Collected:	06-JUN-16	Findings:	11. MG/L
Chemical:	MAGNESIUM		

Sample Collected:	06-JUN-16	Findings:	24.1 MG/L
Chemical:	SODIUM		
Sample Collected:	06-JUN-16	Findings:	8.9 MG/L
Chemical:	CHLORIDE		
Sample Collected:	06-JUN-16	Findings:	18. MG/L
Chemical:	SULFATE		
Sample Collected:	06-JUN-16	Findings:	0.85 MG/L
Chemical:	FLUORIDE (F) (NATURAL-SOURCE)		
Sample Collected:	06-JUN-16	Findings:	28. MG/L
Chemical:	SILICA		
Sample Collected:	06-JUN-16	Findings:	168. UG/L
Chemical:	BORON		
Sample Collected:	06-JUN-16	Findings:	12. UG/L
Chemical:	CHROMIUM (TOTAL)		
Sample Collected:	06-JUN-16	Findings:	1. UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06-JUN-16	Findings:	2.3 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06-JUN-16	Findings:	1.5 MG/L
Chemical:	NITRATE + NITRITE (AS N)		
Sample Collected:	09-JUN-16	Findings:	6.9e-002 PCI/L
Chemical:	RADIUM 226 COUNTING ERROR		
Sample Collected:	09-JUN-16	Findings:	0.48 PCI/L
Chemical:	RADIUM 228 COUNTING ERROR		
Sample Collected:	09-JUN-16	Findings:	0.47 PCI/L
Chemical:	RADIUM 226 MDA95		
Sample Collected:	09-JUN-16	Findings:	0.253 PCI/L
Chemical:	RADIUM 228 MDA95		
Sample Collected:	09-JUN-16	Findings:	1.1 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	09-JUN-16	Findings:	2.6 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	15-JUN-16	Findings:	9.9e-002 PCI/L
Chemical:	RADIUM 226 COUNTING ERROR		
Sample Collected:	15-JUN-16	Findings:	0.28 PCI/L
Chemical:	RADIUM 226 MDA95		
Sample Collected:	15-JUN-16	Findings:	0.73 PCI/L
Chemical:	RADIUM 228 MDA95		
Sample Collected:	07-SEP-16	Findings:	1.9 MG/L
Chemical:	NITRATE (AS N)

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Water System Information:

Prime Station Code:	01S/11W-07N01 S	User ID:	4TH
FRDS Number:	1910139014	County:	Los Angeles
District Number:	07	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340500.0 1180500.0	Precision:	Undefined
Source Name:	ROSEMEAD (1957)		
System Number:	1910139		
System Name:	CAL. AMERICAN WATER CO.-SAN MARINO		
Organization That Operates System:			
	2020 HUNTINGTON DRIVE SAN MARINO, CA 91108		
Pop Served:	49353	Connections:	13902
Area Served:	SAN MARINO		
Sample Collected:	05-SEP-12	Findings:	1.6 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	05-SEP-12	Findings:	2.4 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	18-SEP-12	Findings:	2.6 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	18-SEP-12	Findings:	2.8 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	18-SEP-12	Findings:	290. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	18-SEP-12	Findings:	28. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06-JAN-14	Findings:	2.3 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06-JAN-14	Findings:	2.1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06-JAN-14	Findings:	1.5 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06-JAN-14	Findings:	2.1 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05-MAY-14	Findings:	4. UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	26-SEP-12	Findings:	51. MG/L
Chemical:	CALCIUM		
Sample Collected:	26-SEP-12	Findings:	17. MG/L
Chemical:	MAGNESIUM		
Sample Collected:	26-SEP-12	Findings:	24.6 MG/L
Chemical:	SODIUM		
Sample Collected:	26-SEP-12	Findings:	15.7 MG/L
Chemical:	CHLORIDE		
Sample Collected:	26-SEP-12	Findings:	23.3 MG/L
Chemical:	SULFATE		

Sample Collected:	26-SEP-12	Findings:	0.99 MG/L
Chemical:	FLUORIDE (F) (NATURAL-SOURCE)		
Sample Collected:	26-SEP-12	Findings:	32. MG/L
Chemical:	SILICA		
Sample Collected:	26-SEP-12	Findings:	161. UG/L
Chemical:	BORON		
Sample Collected:	26-SEP-12	Findings:	2.9 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	26-SEP-12	Findings:	2.7 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	26-SEP-12	Findings:	26.29 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	01-OCT-12	Findings:	2.7 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	01-OCT-12	Findings:	2.7 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05-MAY-14	Findings:	4.2 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	05-MAY-14	Findings:	3.8 UG/L
Chemical:	TETRACHLOROETHYLENE

CA WELLS **1442**

Water System Information:

Prime Station Code:	01S/12W-01E02 S	User ID:	4TH
FRDS Number:	1910001003	County:	Los Angeles
District Number:	07	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340600.0 1180600.0	Precision:	Undefined
Source Name:	LONGDON WELL 02		
System Number:	1910001		
System Name:	ALHAMBRA-CITY, WATER DEPT.		
Organization That Operates System:			
	111 SOUTH FIRST STREET		
	ALHAMBRA, CA 91801		
Pop Served:	86300	Connections:	15956
Area Served:	ALHAMBRA		
Sample Collected:	06-OCT-15	Findings:	26. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	08-OCT-15	Findings:	280. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	13-OCT-15	Findings:	5.1 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	20-OCT-15	Findings:	5.3 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	03-NOV-15	Findings:	6.4 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	17-NOV-15	Findings:	5.9 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	01-DEC-15	Findings:	5.6 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	08-DEC-15	Findings:	5.4 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	15-DEC-15	Findings:	5.5 MG/L
Chemical:	NITRATE (AS N)		

Sample Collected:	22-DEC-15	Findings:	6.6 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	05-JAN-16	Findings:	6.2 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	12-JAN-16	Findings:	5.6 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	19-JAN-16	Findings:	5.7 MG/L
Chemical:	NITRATE (AS N)		
Sample Collected:	03-FEB-16	Findings:	5.1 MG/L
Chemical:	NITRATE (AS N)

Water System Information:

Prime Station Code:	01S/12W-01E01 S	User ID:	4TH
FRDS Number:	1910001002	County:	Los Angeles
District Number:	07	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340600.0 1180600.0	Precision:	Undefined
Source Name:	LONGDON WELL 01		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

System Number: 1910001
System Name: ALHAMBRA-CITY, WATER DEPT.
Organization That Operates System:
111 SOUTH FIRST STREET
ALHAMBRA, CA 91801
Pop Served: 86300 Connections: 15956
Area Served: ALHAMBRA

CA WELLS **1446**

Water System Information:

Prime Station Code:	01S/12W-02Q03 S	User ID:	4TH
FRDS Number:	1910154005	County:	Los Angeles
District Number:	07	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340600.0 1180600.0	Precision:	Undefined
Source Name:	WILSON WELL 03		
System Number:	1910154		
System Name:	CITY OF SOUTH PASADENA		
Organization That Operates System:			
	825 MISSION ST		
	SOUTH PASADENA 91030		
Pop Served:	24000	Connections:	5912
Area Served:	SOUTH PASADENA		

Sample Collected:	07-FEB-12	Findings:	1. UG/L
Chemical:	TOTAL TRIHALOMETHANES		
Sample Collected:	06-MAR-12	Findings:	2.6 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	06-MAR-12	Findings:	1.5 UG/L
Chemical:	TRICHLOROETHYLENE		
Sample Collected:	06-MAR-12	Findings:	25. MG/L

Water System Information:

Prime Station Code:	01S/12W-12C01 S	User ID:	4TH
FRDS Number:	1910144007	County:	Los Angeles
District Number:	07	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Untreated
Source Lat/Long:	340500.0 1180600.0	Precision:	Undefined
Source Name:	WELL 09		
System Number:	1910144		
System Name:	SAN GABRIEL CWD		
Organization That Operates System:	P.O. BOX 2227 ROSEMEAD, CA 91770		
Pop Served:	45000	Connections:	8559
Area Served:	SAN GABRIEL		
Sample Collected:	04-JAN-12	Findings:	23. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	10-JAN-12	Findings:	22. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	17-JAN-12	Findings:	1.4 UG/L
Chemical:	TETRACHLOROETHYLENE		
Sample Collected:	17-JAN-12	Findings:	23. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	17-JAN-12	Findings:	22. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	24-JAN-12	Findings:	23. MG/L
Chemical:	NITRATE (AS NO3)

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

HAZARDOUS MATERIALS UNDERGROUND STORAGE
CLOSURE PERMIT NO. 3675B
FACILITY LOCATION: 632 SAN GABRIEL BLVD.

This office has reviewed the soil/groundwater assessment report submitted on February 2, 1988 required as a part of the subject closure procedure. Based on the information submitted, we find that:

[X] The closure is final and no further action is required.

[ ] The soils removed during the tank excavation are unrestricted and may be used as backfill material. The closure is final and no further action is required.

[ ] Excavated soils may be a hazardous waste and are not suitable for fill material or disposal on-site. Contaminated soils must be manifested, transported and disposed of pursuant to Chapter 6.5, California Health and Safety Code, unless evidence is presented indicating that disposal is proper at a less restricted facility. Copies of completed manifests or other appropriate evidence indicating legal disposal shall be submitted to this office before this project can be considered closed.

[ ] The permanent closure of the tank(s) in place shall comply with requirements set by the local Fire Department. Verification must be submitted to this office indicating proper closure and completion of all work.

If you have any questions concerning this matter, please contact Mr. Oscar Enriquez at (818) 458-3513.

Very truly yours,

T. A. TIDEMANSON

CLOSURE APPLICATION SUPPLEMENT **PART 1 OF 3**
HAZARDOUS MATERIALS UNDERGROUND STORAGE
LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
ENVIRONMENTAL PROGRAMS DIVISION
900 S. FREMONT AVENUE
ALHAMBRA, CA 91803

DPW USE ONLY:
SITE-FILE NO. 13590 - 60766
APPLICATION NO. A. 809481

To satisfy the permanent closure requirements for underground storage tanks storing hazardous materials, site integrity must be demonstrated by the analysis of soil samples and, if applicable, groundwater samples as outlined below. These requirements are in addition to the conditions listed on the Application for Closure or contained in an approved Closure Plan.

***** Soil sampling will be required for Vent and Vapor Recovery piping for UST systems installed after July 1, 2003. *****

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

SP	Depth(s)	Compounds	Analysis Method
1A, 2A	2-4 feet below tank invert	TPHg & TPHd	→ 8015 (m)
		TRPH	→ 418.1
		BTEX, MTBE	→ 8260B
		Fuel Oxygenates	
		Ethanol	
		*Organic Lead	→ DOHS Method
1 sample	2-4 feet below each UDC	Same as above	Same as above
1 sample	2-4 feet below piping every 20 feet, starting from UDC's	Same as above	Same as above

Apply EPA Method 5035 for soil sample collection, preparation and preservation.

* Test for organic lead if past UST contents were leaded, or if it is unknown whether past contents were leaded.

INSTRUCTIONS

Hazardous Materials Underground Storage Permit (HMUSP)
New Construction Plan Clearance, Permit Addendum, or Piping Replacement Review

Do not use this form for closure, transfer, or renewal of an existing HMUSP (Operating Permit) or Unified Program (UP) Permit.

This form is for authorization to construct or modify hazardous materials Underground Storage Tank (UST) facilities only. A separate HMUSP or UP Permit, is required to operate the approved system. This authorization will not be approved unless a valid HMUSP or UP Permit application is on file with the Department of Public Works.

A The UST Owner/Operator, Facility name, and facility address on this form must correspond with the information provided in California Environmental Reporting System (CERS) for the UST Facility Operating Permit Application.

B This form must be submitted for new construction (installation of new USTs) plan clearance, piping replacement, or for an addendum to an existing HMUSP. Specify the number of USTs to be installed and the total number of USTs after installation. Existing facilities with a valid operational HMUSP or UP Permit need not make a separate HMUSP application to add or modify USTs. Work must commence within 180 days from the date of issuance of plan approval or the approval will be voided. An extension of up to 180 days may be granted at one-half the initial new construction plan clearance fee. If construction work has not commenced within 360 days from the date of plan approval issuance, such plan approval shall be null and void.

C Plans and specifications submitted for a new construction plan clearance must conform to the Los Angeles County Code, Title 11, Division 4, and shall be to the satisfaction of the Director of Department of Public Works. Other clearances such as local fire department, building and safety, planning, and/or Air Quality Management District, etc. may also be required.

In addition to the plan clearance fee, an operating permit application fee will be required when applying to construct a new facility. No refund of current year HMUSP fees due will be allowed for a net decrease in the number of USTs. State surcharge or service fees paid on existing or renewed USTs are not transferable to new USTs.

D Specify the type of modification or change to existing USTs. Types of modifications and changes requiring an addendum include: repair of USTs, replacements of piping, change or addition of hazardous materials stored, change in monitoring equipment, change of overfill protection devices, or additions or modifications to dispenser containment devices.

E A fee of **$600** must be submitted for each addendum. Where a previously unregistered UST is added to an existing HMUSP, an additional application fee including maintenance fee will be charged.

F This form, the Application Supplement forms, and the CERS data must be signed by one of the following:

1. The tank owner, operator, or Unified Program facility permit owner or operator.
2. A principal executive officer at the level of vice-president or by an authorized representative responsible for the overall operation of the facility where the tank(s) are located.
3. A general partner proprietor.
4. A principal executive officer, ranking elected official, or authorized representative of a public agency.
5. An authorized representative, including an architect or contractor responsible for the installation of the new tanks or any modifications or changes to existing tanks.

All post construction requirements such as primary containment testing, secondary containment testing, monitoring system certification, soil sampling closure reports, and the uploaded CERS UST INSTALLATION information must be submitted within 30 days of completion.

INCOMPLETE FORMS WILL NOT BE PROCESSED.

CERTIFICATION OF COMPLIANCE WITH
LOS ANGELES COUNTY LOBBYIST ORDINANCE

This is to certify that I, as permit applicant for the project located at 632 S. San Gabriel Blvd, San Gabriel
LOCATION ADDRESS

am familiar with the requirements of Los Angeles County Code Chapter 2.160 et seq., (relating to the Los Angeles County Lobbyist Ordinance) and all persons acting on behalf of myself have complied and will continue to comply therewith through the application process.

March 25, 2016

Mr. Saburo Ishihara
San Gabriel Nursery & Florist, Inc.
632 South San Gabriel Boulevard
San Gabriel, CA 91776-2722

UNDERGROUND STORAGE TANK PROGRAM – CASE REFERRAL RESPONSE
SAN GABRIEL NURSERY & FLORIST INC.
632 SOUTH SAN GABRIEL BOULEVARD, SAN GABRIEL (CASE NUMBER: R-60766)

Dear Mr. Ishihara:

On March 15, 2016, the County of Los Angeles Department of Public Works transmitted this case to our agency due to concerns regarding soil and groundwater impacts from the subject site (Site). The California Regional Water Quality Control Board, Los Angeles Region (Regional Board), is the public agency with primary responsibility for the protection of ground and surface water quality for all beneficial uses within the Los Angeles and Ventura counties. As such, we are the lead regulatory agency for overseeing corrective actions (assessment and/or monitoring activities) and cleanup of releases from leaking underground storage tank (UST) systems at the Site.

We have received the following documents for the Site:

- "Underground Storage Tank Closure Report" dated September 20, 2015, prepared by American Integrated Services Inc. (AIS)
- "Underground Storage Tank Closure Report" dated November 12, 2015, prepared by AIS
- "A602122" for additional analytical testing, dated February 29, 2016, prepared by Alpha Scientific Corporation

Based on our review of the submitted documents, we have the following comments:

- On September 2, 2015, AIS collected and submitted for analytical testing four soil samples from approximately two feet beneath the former location of four (4) 550-gallon gasoline USTs. On February 26, 2016, AIS collected an additional four soil samples from approximately ten feet beneath the former USTs for further analytical testing. According to the report, upon visual inspection, all tanks were in fairly good condition with the exception to Tank 2A, which had a small hole on the lower north side. Soil staining and petroleum odor were not detected at any of the sample locations.

- Soil samples were analyzed for total petroleum hydrocarbons as gasoline (TPHg) and diesel (TPHd) by modified EPA Method 8015; total recoverable petroleum hydrocarbons (TRPH) by EPA Method 418.1; volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, xylenes (BTEX), and fuel oxygenates (di-isopropyl ether, ethyl tertiary butyl ether, methyl tertiary butyl ether, tertiary amyl methyl ether, ethanol, tertiary butyl alcohol) by EPA Method 8260B; and for organic lead by Hazardous Material Unit (HMU) 900.

- Laboratory results for all soil samples indicated no detections of TPHg, TPHd, TRPH, ethylbenzene, xylenes, organic lead, VOCs or fuel oxygenates above the reporting limit. The maximum benzene and toluene were detected at 0.0014J mg/kg (2A) and 0.0045 mg/kg (2A), respectively.

- Groundwater was not encountered at the Site during soil sampling activities.

Based on the information available to us, Regional Board staff determined that residual concentrations of fuel constituents pose a low threat to human health, and soil and groundwater quality beneath the Site. Therefore, no further action is required to pursue any further soil and/or groundwater investigation at the Site. At this time, the Regional Board is not opening a case for the Site.

If you have any questions, please contact Mr. Gregg Kwey at (213) 576-6702 or email him at gkwey@waterboards.ca.gov.

Sincerely,

Yue Rong, Ph. D.
Program Manager
Underground Storage Tank Program

APPENDIX F - USER PROVIDED INFORMATION

ASTM E1527-13
USER SPECIFIC QUESTIONNAIRE

Project Number / Name: AAA-72359.1/ San Gabriel Nursery Property; 5.86-acres; 49 APNs

Project Address: 710, 718, 822 and 836 South San Gabriel Boulevard
705, 815, 817, 821, 823, 827 and 839 Gladys Avenue
City of San Gabriel, Los Angeles County, California 91770

In order to comply with the ASTM E1527-13 Standard and qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete. Please provide the following information (if available). Your answers will be incorporated into the final Phase I ESA under the section "User-supplied Information."

(1.) Environmental cleanup liens that are filed or recorded against the property (40 CFR 312.25).
Did a search of *recorded land title records* (or judicial records where appropriate, see NOTE below) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law? (NOTE - In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

Not to my knowledge. Our review of the preliminary title report for the property at the time of purchase did not identify any environmental liens.

(2.) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
Did a search of *recorded land title records* (or judicial records where appropriate, see NOTE above) identify any AULs, such as *engineering controls*, land use restrictions, or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?

Not to my knowledge. Our review of the preliminary title report for the property at the time of purchase did not identify any engineering controls, land use restrictions, or institutional controls.

(3.) Specialized knowledge or experience of the person seeking to qualify for the Landowner Liability Protections (LLP - 40 CFR 312.28).
As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? (self-explanatory)

No. The former occupant was the San Gabriel Nursery & Florist, whose current retail store is located north of the subject property. Our development company purchased the property to redevelop it as a mixed-use commercial-residential project.

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).
Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

Yes, the purchase price reasonably reflected the fair market value of the property and was not discounted due to any known contamination on the property.

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).
Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

(a.) Do you know the past uses of the *property*?

Yes – former wholesale cultivation operations of the San Gabriel Nursery & Florist.

(b.) Do you know of specific chemicals that are present or once were present at the *property*?

The prior Phase II limited soil investigation performed by EEI identified limited concentrations of arsenic, lead, and pesticides within the shallow soil (upper 2 feet bgs) beneath the subject property.

(c.) Do you know of spills or other chemical releases that have taken place at the *property*?

No.

(d.) Do you know of any environmental cleanups that have taken place at the *property*?

No.

(6.) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

No.

In addition, certain information should be collected, if available, and provided to the e*nvironmental professional* selected to conduct the Phase I. This information is intended to assist the *environmental professional* but is not necessarily required to qualify for one of the *LLPs*. The information includes:

(a) the reason why the Phase I is required,

The Phase I is required as part of the environmental review process under CEQA for the proposed entitlements to construct a mixed-use commercial-residential development project. The prior Phase I prepared by EEI is stale.

(b) the type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.,

Development of a mixed-use commercial-residential project with one level of subterranean parking.

(c) the complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful),

49 parcels located at:
710, 718, 822 and 836 South San Gabriel Boulevard
705, 815, 817, 821, 823, 827 and 839 Gladys Avenue
City of San Gabriel, Los Angeles County, California 91770

(d) the scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered),

Standard scope that satisfies the environmental review process under CEQA.

(e) identification of all parties who will rely on the Phase I *report*,

City of San Gabriel, Environmental Science Associates (ESA – City/Owner's CEQA Consultant)

(f) identification of the site contact and how the contact can be reached,

Ken Lee, Vice President of Development
Pacific Square San Gabriel, LLC
ken@pacificplazapremier.com
562-972-4033

(g) any special terms and conditions which must be agreed upon by the *environmental professional*, and

No.

(h) any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental condition).

Prior ESAs were prepared by EEI.

APPENDIX G - PHOTOGRAPHIC LOG

Photograph 1 – View of the northeastern portion of the subject property looking west. View is from just the northernmost vehicle access gate off of South Gladys Avenue.

Photograph 2 – View of the subject property looking south. View is from just inside the northernmost vehicle access gate off of South Gladys Avenue.

Photograph 3 – View of the subject property looking north. View shows building materials debris piles located in the northern portion of the property.

Photograph 4 – Debris typical of the northern portion of the subject property. Burnt building materials including wood, cinder blocks and corrugated steel.

Photograph 5 – View of the subject property looking north. View is of one of many wood and debris piles located subject property.

Photograph 6 – View of a pallet stock pile located on the southern portion of the subject property.

Photograph 7 – View of one of several 55-gallon poly drums scattered throughout the subject property. The drums were empty but appeared to have been used for potting soil. No RECs were observed associated with the drums.

Photograph 8 – View of an empty compressed air tank and drywall debris in the northern portion of the subject property.

Photograph 9 – View of the subject property looking west. View shows some of the heavy equipment located on the property.

Photograph 10 – View of the subject property looking northwest. View is of one of two structures still standing on the property. This structure butts up against the western fence in the northern portion of the property.

Photograph 11 – View of the subject property looking west. View shows some of the remaining building footings and foundations located in the northwestern portion of the property.

Photograph 12 – View of one of two structures still standing on the property. View shows remnant items and debris associated with a nursery staging structure located in the northeast corner of the property.

Photograph 13 – View of a 5-gallon Valvoline container located inside the nursery staging structure. On the property. No indication of leakage was observed.

Photograph 14 – Multiple electrical transformers were noted to be in good condition bordering the subject property along East Grand Avenue, South San Gabriel Boulevard and East El Monte Street.

APPENDIX H - VAPOR ENCROACHMENT SCREEN USER QUESTIONNAIRE

ASTM E2600-15
VAPOR ENCROACHMENT SCREENING – USER QUESTIONNAIRE

Project Number / Name: AAA-72359.1/ San Gabriel Nursery Property; 5.86-acres; 49 APNs

Project Address: 710, 718, 822 and 836 South San Gabriel Boulevard
705, 815, 817, 821, 823, 827 and 839 Gladys Avenue
City of San Gabriel, Los Angeles County, California 91770

1. Property type: [ ] Commercial [ ] Industrial [ ] Multi-Tenant [**X**] Vacant Land

2. Are there any buildings/ structures on the property? [ ] Yes [X] No [ ] Unknown

If yes, type construction_____

3. Will buildings/structures be constructed on the property in the future? [X] Yes [ ] No [ ] Unknown

If yes, type construction_____

4. If buildings exist or are proposed, do/will they have elevators? [X] Yes [ ] No

5. Type of level below grade (existing or proposed)? [ ] Full Basement [ ] Crawl Space [ ] Slab on grade
[X] Parking Garage [ ] Multi-level

6. Ventilation in level below grade? [X] Yes [ ] No [ ] Unknown

7. Sump pumps, floor drains, or trenches (existing or proposed)? [X] Yes [ ] No [ ] Unknown

8. Radon or methane mitigation system installed? [ ] Yes [X] No [ ] Unknown

9. Heating system type (existing or proposed)? (CHECK ALL THAT APPLY)
[X] Hot Air Circulation [ ] Electric Baseboard [ ] Hot Air Radiation [ ] Heat Pump [ ] Hot Water Radiation
[ ] Wood Stove [ ] Kerosene Heater [ ] Steam Radiation [ ] Fireplace [ ] Coal Furnace [ ] Radiant Floor Heat
[X] Hot Water Circulation [ ] Fuel Oil Furnace [**X**] Gas Furnace [ ] Other

10. Type of fuel energy (existing or proposed)? (CHECK ALL THAT APPLY)
[**X**] Natural Gas [X] Electric [ ] Propane [ ] Fuel Oil [ ] Kerosene [ ] Wood [ ] Coal [ ] Solar [ ] Other

11. Have there ever been any environmental problems at the property? [X] Yes [ ] No [ ] Unknown

If yes, describe) Prior Phase II conducted by EEI identified limited contamination from previous nursery operations.

12. Does/will a gas station or dry cleaner operate anywhere on the property? [ ] Yes [X] No [ ] Unknown

13. Do any tenants use hazardous chemicals in relatively large quantities on the property? [ ] Yes [X] No

[ ] Unknown

If yes, describe_____

14. Have any tenants ever complained about odors in the building or experienced health-related problems that may have been associated with the building? [ ] Yes [X] No [ ] Unknown

15. Are the operations (or proposed operations to be performed) on the property OSHA regulated? [X] Yes [ ] No [ ] Unknown

16. Are there any existing or proposed underground storage tanks (USTs) or above ground storage tanks (ASTs)? [ ] Yes [X] No [ ] Unknown

17. Are there any sensitive receptors (for example, children, elderly, people in poor health, and so forth) that occupy or will occupy the property? [X] Yes [ ] No [ ] Unknown

Assessor Parcel Numbers (APNs): **49 APNs**

Notes and Definitions

R-07	Reporting limit for this compound(s) has been raised to account for dilution necessary due to high levels of interfering compound(s) and/or matrix affect.
QR-04	The pecent recovery and/or RPD was outside acceptance criteria. Results accepted based upon percent recovery results in duplicate QC sample and the CCV and CCB results.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to possible matrix interference. The LCS was within acceptance criteria. The data is acceptable as no negative impact on data is expected.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

LA Testing recommends that soil samples reported as "ND" be tested by the EPA Screening Method/Qualitative. The above report relates only to the items tested. This report may not be reproduced, except in full, without written approval by LA Testing, Inc. The above test must not be used by the client to claim product endorsement by NVLAP nor any agency of the United States Government.Samples received in good condition unless otherwise noted.

C/o Mr. Christopher Atkinson via email

Subject: **Results of Limited Phase II Environmental Site Assessment**
Proposed Commercial and Residential Development
700-800 South San Gabriel Boulevard, San Gabriel, California 91776
EEI Project No. AAA-72359.2

Dear Mr. Chou:

EEI has prepared the following Results of Limited Phase II Environmental Site Assessment (ESA) for the subsurface investigation completed at the subject property identified above (**Figure 1**). This report summarizes the results of a geophysical survey, soil vapor sampling, and soil matrix sampling conducted onsite, in an effort to identify potential subsurface contamination that may impact future redevelopment.

BACKGROUND

The subject property is located to the southeast of the intersection of South San Gabriel Boulevard and East El Monte Street, on the west side of South Gladys Avenue, in the eastern portion of the City of San Gabriel, California (**Figure 2**). The rectangular-shaped property is comprised of 48 Assessor's Parcel Numbers (APNs); encompassing a total of approximately 5.8 acres. A growing area for the San Gabriel Nursery and Florist is currently in operation on the property, and has been since at least 1950. The property is assigned the addresses 710, 718, 822 and 836 South San Gabriel Boulevard, and 705, 815, 817, 821 and 823 South Gladys Avenue. Two residences are also located within the southeastern portion of the property along South Gladys Avenue, and are addressed 827 and 839 South Gladys Avenue.

The subject property consists of a combination of greenhouse structures, small sheds, outbuildings, and tables and benches that support various plants during cultivation.

A large former chilled storage unit, half of which is utilized as a chemical storage area, while the other half is utilized as a tool storage area, was secured with pad locks and is located within the northern portion of the subject property. A structure housing a boiler unit was also located within the northern portion of the property. According the property owner, while no longer used, the boiler unit is still functional and formerly was operated to heat the various greenhouses, until then being utilized to sanitize soil prior to planting. Additionally, pesticides and herbicides were historically and continue to be used onsite.

EEI understands that the subject property is to be redeveloped for mixed commercial and residential use, with commercial space occupying the ground level and residential above. Additionally, EEI understands the property's entire footprint is to be excavated and include two levels of subgrade parking within the development.

EEI completed a Phase I Environmental Site Assessment on the subject property in June 2016. The following environmental concerns were identified:

- The subject property is the site of two (2) former diesel USTs and four (4) former gasoline USTSs, which were removed from the property in 1988 and 2015, respectively. Although the USTs were granted regulatory closure and/or concurrence, no soil vapor sampling had been conducted to evaluate the former fueling areas for potential vapor intrusion concerns. Furthermore, given the absence of any soil vapor sampling performed at the former onsite UST locations and low levels of residual petroleum-hydrocarbons detected during tank removals, a pVEC could not be ruled out for the subject property. Therefore, EEI recommended further investigation.

- Additional USTs, fuel dispending piping, and/or vent lines, and related equipment may still exist beneath portions of the subject property. If former fueling piping or stained or suspicious soil is encountered during future grading operations, these items and materials should be evaluated, and if deemed necessary, characterized for proper disposal.

- The subject property has been occupied with a nursery operation since 1950. As a result, there is a potential for restricted agricultural chemical residues to exist within near-surface soils onsite. EEI recommended that shallow soils be investigated for restricted agricultural chemical residues.

Although not considered a recognized environmental condition (REC), the following non-scope considerations were identified:

- According to the information reviewed, structures on the subject property were built prior to 1978. Therefore, the presence of asbestos-containing materials (ACMs) and lead based paint (LBP) within building materials is likely. EEI recommended a pre-demolition hazardous materials survey be performed on the site structures and related building materials, prior to any proposed future site improvements or demolition activities.

Based on the environmental concerns summarized herein, EEI performed a Limited Phase II ESA. The following report documents our investigation efforts.

FIELD ACTIVITIES

Prior to conducting field activities, EEI staff coordinated site access with the property owner contact, and mobilized to the subject property for orientation and boring mark out. Geophysical survey services were provided by Southwest Geophysics, Inc., vapor probe installation (i.e., drilling), soil vapor sampling and laboratory analytical services for the soil vapor samples was provided by H&P Mobile Geochemistry, Inc. (H&P). Soil samples were obtained by EEI staff utilizing a hand auger, and soil samples were submitted to SunStar Laboratories, Inc. for analytical services.

Geophysical Survey

On May 24, 2016, EEI observed a geophysical survey conducted by Southwest Geophysics, Inc. in and around the locations of six (6) reported former petroleum underground storage tank (UST) locations, including six (6) proposed soil vapor sample locations, which are depicted on the attached **Figures 3, 4 and 5**. The purpose of the geophysical survey was to confirm the removal of the reported former USTs, insofar as possible, and locate and identify any underground utilities that may exist in the vicinity of EEI's proposed soil vapor boring locations.

A combination of a Geonics EM-61 MK2 time domain instrument (metal detector), a Fisher M-Scope TW6 pipe and cable locator, a RD8000 utility line tracer, a Schonstedt GA-52 magnetic gradiometer, and a GSSI SIR 3000 ground penetrating radar (GPR) unit using a millihertz (MHz) transducer was used during the survey.

The results of the survey did not reveal evidence of the presence of live utility lines in close proximity to the sample locations. A possible excavation feature and/or trench was detected with GPR in one area of the property suspected to formerly contain a UST(s). However, GPR images did not reveal additional excavations and/or trench like features in the other surveyed areas of the property that were reported to formerly house UST(s). No USTs or associated subsurface product piping was identified within the areas surveyed. A copy of the complete geophysical survey report, prepared by Southwest Geophysics, Inc. is provided as an **Appendix A**.

Soil Vapor Sampling

On May 31, 2016, EEI supervised the installation and sampling of six (6) soil vapor probes (EEI-SV-1 through EEI-SV-6) beneath the subject property to a depth of 5 feet below ground surface (bgs). H&P utilized a rotary hammer to install the soil vapor probes. Soil vapor probes were distributed in a manner to provide a representative sampling of current subsurface conditions, specifically targeting the locations of the three (3) former UST fields (**Figures 3 and 4**). **Figure 5** illustrates soil vapor probe locations.

After advancing the boring to 5 feet bgs, small diameter (¼-inch diameter) Nylaflo™ tubing was fitted with a sample tip (to assist in recovering a representative soil gas sample) and placed down the boring. A 1-foot sand pack, consisting of #3 Monterey™ sand was placed into the borehole, followed by hydrated bentonite chips to the surface. Probe surface completion consisted of a two-way gas tight sample valve. Note: soil gas probe installation generally followed the Department of Toxic Substances Control (DTSC)/California Regional Water Quality Control Board - Los Angeles Region "Advisory - Active Soil Gas Investigations" guidance, dated April 2012.

Prior to sample collection, the probes were left in the ground for a minimum of 120 minutes to allow for subsurface conditions to equilibrate. The sample tubing was then purged of three volumes of ambient air using a hand pump. A 400-milliliter Summa™ canister, provided by H&P was then attached to the gas tight sample valve, where negative pressure was used to extract soil gas from the subsurface. Immediately after sample collection the Summa™ canister was labeled with a number unique to the sample, and delivered, under proper Chain-of-Custody (COC) documentation, to H&P's fixed laboratory in Carlsbad, California for volatile organic compounds (VOCs) analysis by EPA Test Method TO-15.

The Client has indicated that the subject property will be redeveloped into ground level commercial and multi-story residential. Furthermore, the property will be excavated to approximately two levels of below ground parking. Based on the proposed use of the site, EEI compared the detectable concentrations of chemicals of concern in soil vapor samples collected and analyzed during this investigation to the California Office of Environmental Health Hazard Assessment (OEHHA, 2010), Table 3 Soil-Gas-Screening Numbers for Volatile Chemicals below Buildings Constructed without Engineered Fill below Sub-slab Gravel. A commercial land use scenario was chosen based on the proposed ground level use of the property. Client understands that areas, such as gardens, parks, or other sensitive use areas, should be evaluated according to residential land use standards. The following bulleted items summarize the soil gas sample results:

- Benzene was detected in samples EEI-SV-4 (0.0046 micrograms per liter [µg/l]), and EEI-SV-6 (0.0069 µg/l). The benzene concentrations detected are less than the Office of Environmental Health Hazard Assessment (OEHHA) commercial soil screening level of 0.12 µg/l. No other soil gas samples analyzed detected benzene above the laboratory reporting limit (i.e., "non-detect").

- Toluene was detected in each sample collected, with concentrations ranging between 0.0012 µg/l (EEI-SV-1) to 0.072 µg/l (EEI-SV-4). The toluene concentrations detected are less than the OEHHA commercial soil screening level of 380 µg/l.

- Ethylbenzene was detected in samples EEI-SV-3 (0.0084 µg/l), EEI-SV-4 (0.0079 µg/l) and EEI-SV-6 (0.0049 µg/l). The ethylbenzene concentrations detected are less than the OEHHA commercial soil screening level of 1.4 µg/l. No other soil gas samples analyzed detected ethylbenzene above the laboratory reporting limit (i.e., "non-detect").

- Total xylenes were detected in each sample collected, with concentrations ranging between 0.0190 µg/l (EEI-SV-5) to 0.041 µg/l (EEI-SV-4). The total xylenes concentrations detected are less than the OEHHA commercial soil screening level of 880 µg/l.

- Tetrachloroethene (PCE) was detected in each sample collected, with concentrations ranging between 0.015 µg/l (EEI-SV-3) to 0.026 µg/l (EEI-SV-5). The PCE concentrations detected are less than the OEHHA commercial soil screening level of 0.6 µg/l.

Table 1 summarizes soil gas sample results, while **Appendix B** contains complete laboratory analytical results and Chain-of-Custody (COC) documentation.

Limited Soil Investigation

EEI performed a limited soil investigation to evaluate the subject property soils for agricultural chemical residues and obtain a general understanding of current soil conditions.

The following sections discuss the soil sampling performed. **Figure 5** illustrates our sample locations, and **Table 2** summarizes the laboratory analytical data. Complete laboratory analytical reports and COC documentation is provided in **Appendix B.**

There is no specific guidance regarding the testing and analysis of residual pesticides in near-surface soils at proposed residential development sites in Los Angeles County. Therefore, EEI relied principally on the DTSC August 2008 "Interim Guidance For Sampling Agricultural Properties", combined with our experience gathered over the last two decades. The DTSC document provides guidance for sampling of former agricultural properties (undisturbed) where pesticides and/or fertilizers were presumably applied uniformly, for agricultural purposes, consistent with normal application practices.

The DTSC document was initially prepared for use in evaluating soil at proposed new school sites and existing schools undergoing expansion projects where the property was currently or previously used for agricultural activities, but has been expanded to provide a uniform and streamlined approach for evaluating agricultural properties.

The Client has indicated that the subject property will be redeveloped into ground level commercial and multi-story residential. Furthermore, the property will be excavated to approximately two levels of below ground parking. Based on the proposed use of the site, EEI compared the detectable concentrations of chemicals of concern in soil samples collected and analyzed during this investigation to the California Office of Environmental Health Hazard Assessment (OEHHA, 2010), Table 1 Soil-Screening Numbers for a Commercial Scenario. A commercial land use scenario was chosen based on the proposed ground level use of the subject property. Client understands that areas, such as gardens, parks, or other sensitive use areas, should be evaluated according to residential land use standards.

On May 31, 2016, EEI collected soil samples at representative locations throughout the subject property. A total of 19 locations (identified as EEI-S-1 through EEI-S-19) were sampled (**Figure 5**). Soil samples were collected at each location using a hand auger equipped with a 3-inch diameter bucket at depths of 0.5 and 2 feet bgs. Sample material was extracted using a gloved hand and placed in a laboratory supplied 4-ounce glass jar. After sample collection, the top of the jars were sealed with Teflon-lined plastic caps, and labeled with a unique number. The samples were stored in a chilled cooler, pending delivery, under Chain of Custody documentation, to SunStar Laboratories, Inc. in Lake Forest, California.

A total of 38 discrete soil samples were collected and submitted for laboratory analytical testing. EEI instructed the laboratory to analyze only the 19 shallow (0.5 feet below grade) samples for Total Arsenic and Lead by EPA Test Method 6010B and Organochlorine Pesticides by EPA Test Method 8081A, while holding the deep (2 feet below grade) samples pending the shallow samples' analytical results. The following bulleted item summarizes the chemicals of concern detected:

- Total Arsenic was detected at a maximum concentration of 10 milligrams per kilogram (mg/kg) in sample EEI-S-8-0.5'. The reported Total Arsenic concentrations exceed the OEHHA commercial screening level of 0.24 mg/kg. Arsenic is naturally occurring in soil throughout southern California, and concentrations typical exceed screening level values. Based upon statistical analysis, the DTSC established a regional background arsenic concentration of 12 mg/kg (DTSC, undated). None of the detected arsenic concentrations exceed the 12 mg/kg screening level.

- With the exception of sample EEI-S-18-0.5', which was reported as not exceeding laboratory detection limits, Total Lead was detected in each sample collected, with concentrations ranging between 18 mg/kg (EEI-S-9-0.5') to 140 mg/kg (EEI-S-16-0.5'). The reported Total Lead concentrations are less than the OEHHA commercial screening level of 320 mg/kg.

- Dieldrin was detected at a maximum concentration of 260 micrograms per kilogram (µg/kg) in sample EEI-S-14-0.5', exceeding the OEHHA commercial screening level of 130 µg/kg. The reported Dieldrin concentrations for the remaining samples were below the OEHHA commercial screening level of 130 µg/kg.

- DDE was detected at a maximum concentration of 530 µg/kg in sample EEI-S-16-0.5'. The reported DDE concentrations were below the OEHHA commercial screening level of 6,300 µg/kg.

- DDD was detected at a maximum concentration of 89 µg/kg in sample EEI-S-16-0.5'. The reported DDD concentrations were below the OEHHA commercial screening level of 9,000 µg/kg.

- DDT was detected at a maximum concentration of 35 µg/kg in sample EEI-S-11-0.5'. The reported DDT concentrations were below the OEHHA commercial screening level of 6,300 µg/kg.

- Total Chlordane was detected at a maximum concentration of 530 µg/kg in sample EEI-S-16-0.5'. The reported Total Chlordane concentrations were below the OEHHA commercial screening level of 1,700 µg/kg.

- Heptachlor Epoxide was detected at 6.8 µg/kg in sample EEI-S-16-0.5' and at 8.1 µg/kg in sample EEI-S-11-0.5'. The reported Heptachlor Epoxide concentrations were below the OEHHA commercial screening level of 520 µg/kg.

- Endrin was detected at a maximum concentration of 11 µg/kg in sample EEI-S-5-0.5'. The reported Endrin concentrations were below the OEHHA commercial screening level of 230,000 µg/kg.

Table 2 summarizes the soil sample results obtained from the May 31, 2016 sample event, while **Appendix B** contains complete laboratory analytical results.

Based on elevated concentrations of pesticides and/or lead detected in soil samples EEI-S-9-0.5', EEI-S-14-0.5', EEI-S-16-0.5', and EEI-S-17-0.5', and at the request of the Client, on June 14, 2016, EEI returned to the subject property and collected soil samples at 10-foot step-outs to the north, northeast, east, southeast, south, southwest, west, and northwest of the four referenced sample locations. A total of 36 locations were sampled, including eight (8) surrounding each of four referenced sample locations (**Figure 5**), and by collecting one 3 feet bgs sample from each of the four referenced sample locations. All samples were identified by including the respective direction and depth to the original sample identification number (i.e. EEI-S-9N-3').

Soil samples were collected at each step-out location using a hand auger equipped with a 3-inch diameter bucket at depths of 0.5, 2 and 3 feet bgs, in addition to collecting one (1) three foot sample using the hand auger from the original sample location. Note, due to difficulties reaching depth at one sample location, a 3 feet bgs samples was not collected at locations EEI-S-14NE and EEI-S-17NW.

At each location, sample material was extracted using a gloved hand and placed in a laboratory supplied 4-ounce glass jar. After sample collection, the top of the jars were sealed with Teflon-lined plastic caps, and labeled with a unique number. The samples were stored in a chilled cooler, pending delivery, under COC documentation, to SunStar Laboratories, Inc. in Lake Forest, California.

A total of 98 discrete soil samples were collected and submitted for laboratory analytical testing. EEI instructed the laboratory to analyze only the 64 shallow and mid (0.5 and 2 feet below grade) samples for Total Arsenic and Lead by EPA Test Method 6010B and Organochlorine Pesticides by EPA Test Method 8081A, while holding the deep (3 feet below grade) samples pending the shallow and mid samples' analytical results. The following bulleted item summarizes the chemicals of concern detected:

- Total Arsenic was detected at a maximum concentration of 23 mg/kg in sample EEI-S-9S-0.5'. While each sample containing detectable concentrations of Total Arsenic exceeded the OEHHA commercial screening level of 0.24 mg/kg, five (5) samples exhibited concentrations that were equal to or greater than the DTSC School Evaluation Screening Value of 12 mg/kg.

- Total Lead was detected with a maximum concentration of 110 mg/kg in samples EEI-S-16S-0.5' and EEI-S-16SW-0.5'). The reported Total Lead concentrations are less than the OEHHA commercial screening level of 320 mg/kg.

- Dieldrin was detected at a maximum concentration of 260 µg/kg in samples EEI-S-9NE-0.5' and EEI-S-9S-0.5', and at concentrations of 190 µg/kg (EEI-S-9E-0.5') and 170 µg/kg (EEI-S-9SE-0.5'), each exceeding the OEHHA commercial screening level of 130 µg/kg. The reported Dieldrin concentrations for the remaining samples were below the OEHHA commercial screening level of 130 µg/kg.

- DDE was detected at a maximum concentration of 190 µg/kg in sample EEI-S-14NE-0.5'. The reported DDE concentrations were below the OEHHA commercial screening level of 6,300 µg/kg.

- DDD was detected at a maximum concentration of 81 µg/kg in sample EEI-S-16S-0.5'. The reported DDD concentrations were below the OEHHA commercial screening level of 9,000 µg/kg.

- DDT was detected at a maximum concentration of 240 µg/kg in sample EEI-S-9NE-0.5'. The reported DDT concentrations were below the OEHHA commercial screening level of 6,300 µg/kg.

- Total Chlordane was detected at a maximum concentration of 1,460 µg/kg in sample EEI-S-14SW-0.5'. The reported Total Chlordane concentrations were below the OEHHA commercial screening level of 1,700 µg/kg.

- Heptachlor Epoxide was detected at 8.5 µg/kg in sample EEI-S-14NE-0.5', 22 µg/kg in sample EEI-S-14SW-0.5', and at 5.2 µg/kg in sample EEI-S-17SW-0.5'. The reported Heptachlor Epoxide concentrations were below the OEHHA commercial screening level of 520 µg/kg.

- Methoxychlor was detected at a maximum concentration of 34 µg/kg in sample EEI-S-17SW-0.5'. The reported Methoxychlor concentrations were below the OEHHA commercial screening level of 3,800,000 µg/kg.

- Endrin was detected at a maximum concentration of 64 µg/kg in sample EEI-S-9NE-0.5'. The reported Endrin concentrations were below the OEHHA commercial screening level of 230,000 µg/kg.

Table 2 summarizes the soil sample results obtained from the June 14, 2016 sample event, while **Appendix B** contains complete laboratory analytical results.

FINDINGS

Geophysical surveying was conducted within select portions of the subject property that had been reported to formerly contain diesel and gasoline USTs. The results of the survey did not reveal evidence of the presence of live utility lines in close proximity to the sample locations. A possible excavation feature and/or trench was detected with GPR in one area of the property suspected to formerly contain a UST(s). However, GPR images did not reveal additional excavations and/or trench like features in the other surveyed areas of the property that were reported to formerly contain UST(s). No USTs or associated subsurface product piping was identified within the areas surveyed.

EEI performed a limited subsurface investigation at the subject property, which included the collecting and analyzing of 6 soil vapor samples at a depth of 5 feet bgs, and 87 soil matrix samples at depths of 0.5 and 3 feet bgs. Detectable concentrations of VOCs were reported in each of the soil vapor samples analyzed. However, none of the reported soil vapor concentrations exceeded their respective commercial OEHHA values.

Detectable concentrations of Total Arsenic were reported in multiple samples analyzed from both sample events, with a maximum concentration of 23 mg/kg detected in sample EEI-S-9S-0.5'. While each sample containing detectable concentrations of Total Arsenic exceeded the OEHHA commercial screening level of 0.24 mg/kg, five (5) samples exhibited concentrations that were equal to or greater than the DTSC School Evaluation Screening Value of 12 mg/kg, while the remaining samples exhibited concentrations below the DTSC screening value.

Detectable concentrations of Total Lead were reported within multiple samples analyzed from both sample events, with a maximum concentration of 140 mg/kg (EEI-S-16-0.5'). While none of the detectable concentrations of Total Lead exceeded commercial screening levels, four (4) of the samples with elevated concentrations were reanalyzed using soluble threshold limit concentration (STLC) for waste characterization purposes.

Dieldrin was detected in samples EEI-S-9NE-0.5' (260 µg/kg), EEI-S-9E-0.5' (190 µg/kg), EEI-S-9SE-.05' (170 µg/kg), EEI-S-9S-0.5' (260 µg/kg), and EEI-S-14-.05' (260 µg/kg), each exceeding the OEHHA commercial screening level of 130 µg/kg. All remaining detectable concentrations Dieldrin and other pesticides in soil were below their respective commercial screening levels.

CONCLUSIONS and RECOMMENDATIONS

Based on the information in this report, EEI provides the following conclusions and recommendations:

- EEI conducted a geophysical survey to evaluate subsurface conditions for evidence of USTs, backfilled excavations, or underground utilities that could be in conflict with our borings. While one backfilled excavation feature was detected within one of the three areas surveyed, no evidence of existing USTs or piping was identified in any of the surveyed areas.

- Based on the results of our investigation activities, low concentrations of VOCs were detected in soil vapor beneath the subject property. However, none of the reported concentrations exceeded their respective OEHHA commercial screening levels.

- Concentrations of arsenic, lead and pesticides were detected within the shallow soil (upper 2 feet bgs) beneath the subject property. Based on soil analytical results, with the exception of shallow soil located within a 10 feet radius of sample locations EEI-S-16, EEI-S-9, and EEI-S-14, the balance of soil underlying the property can be reused for commercial purposes.

    - Results of the STLC lead analysis indicated that a 10-feet radius to a depth of 2-feet, the equivalent of approximately 30 cubic yards (yd^3), or approximately 44 tons of soil, surrounding sample location EEI-S-16 would require disposal as Non-RCRA (California) hazardous waste, while the balance of soil underlying the subject property would qualify as non-hazardous waste.

    - Based on concentrations of Dieldrin in soil exceeding the OEHHA commercial screening level of 130 µg/kg in samples collected from or within a 10-feet radius of sample points EEI-S-9 and EEI-S-14, excavations measuring approximately 20'x20' to depths of approximately 2 feet surrounding sample locations EEI-S-9 and EEI-S-14 are recommended. Excavations would generate approximately 30 yd^3, or 44 tons of soil per area, total approximately 60 yd^3, or approximately 88 tons. The excavated soil would qualify as non-hazardous waste.

- If suspected contaminated soil is encountered during normal grading and construction activities, EEI recommends that the soil be excavated and segregated/sampled under the supervision of an environmental professional. Upon verification, any contaminated soil should be properly characterized and disposed of offsite.

- Based on the subject property's historical agricultural activities, it is possible that buried/concealed/hidden agricultural by-products, irrigation and fuel piping, and/or additional storage tanks, both below and above ground may have existed or exists on the subject property.

Any buried trash/debris, undocumented USTs or other waste encountered during future subject property development or improvements should be evaluated by an experienced environmental consultant prior to removal. If stained or suspicious soil is encountered during future grading operations, the material should be evaluated and if deemed necessary, characterized for proper disposal.

LIMITATIONS

Findings provided herein have been derived in accordance with current standards of practice, and no warranty is expressed or implied. Standards of practice are subject to change with time. This report has been prepared for the sole use of Pacific Square San Gabriel LLC (Client), dated June 28, 2016, within a reasonable time from its authorization. Site conditions, land use (both onsite and offsite), or other factors may change as a result of manmade influences, and additional work may be required with the passage of time.

This evaluation should not be relied upon by other parties without the express written consent of EEI or the Client; therefore, any use or reliance upon this environmental evaluation by a party other than the Client, shall be solely at the risk of such third party and without legal recourse against EEI, its employees, officers, or directors, regardless of whether the action in which recovery of damages is brought or based upon contract, tort, statue, or otherwise.

The Client has the responsibility to see that all parties to the project, including the designer, contractor, subcontractor, and building official, etc. are aware of this report in its complete form. This report contains information which may be used in the preparation of contract specifications; however, the report is not designed as a specification document, and may not contain sufficient information for use without additional assessment. EEI assumes no responsibility or liability for work or testing performed by others.

EEI appreciates the opportunity to provide services associated with this project site. If you have any questions or comments, please contact the undersigned at (760) 431-3747.

Sincerely,

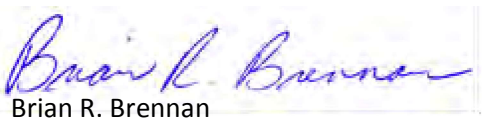

EEI

LEGEND

EEI-SV-6	Soil vapor sample location
EEI-S-19	Soil sample location – Indicates a soil sample with either no detectable concentrations of chemicals of concern, or chemicals of concern detected below commercial screening levels.
EEI-S-9	Soil sample location – Indicates a 0.5 foot below ground surface (bgs) soil sample with detectable concentrations of chemicals of concern above commercial screening levels.
EEI-S-9NW	Soil sample location – Indicates 0.5 and 2 feet bgs soil samples with detectable concentrations of chemicals of concern above commercial screening levels.

Scale: 1" = 200'

APPENDIX A
GEOPHYSICAL SURVEY REPORT

SOUTHWEST GEOPHYSICS, INC.
YOUR SUBSURFACE SOLUTION

June 4, 2016
Project No. 116245

Mr. Ryan T. Merkey
Environmental Equalizers, Inc.
2195 Faraday Avenue, Suite K
Carlsbad, CA 92008

Subject: Geophysical Evaluation
632 South San Gabriel Boulevard
San Gabriel, California

Dear Mr. Merkey:

In accordance with your authorization, we have performed a geophysical survey pertaining to the property located at 632 South San Gabriel Boulevard in San Gabriel, California (Figure 1). The purpose of our survey was to assess the presence of detectable underground utilities and possible excavation features related to former UST's through the collection of geophysical data in three areas designated by you and your office. Our survey was conducted on May 24, 2016. This report presents our survey methodology, equipment utilized, analysis, and findings.

Our scope of services for the project included performance of a geophysical survey, analysis of the data obtained, and preparation of this letter-report presenting our findings. The geophysical evaluation included the use of a GSSI SIR 3000 ground penetrating radar (GPR) unit using a 400 MHz transducer, Schonstedt GA-52 magnetic gradiometer, Geonics EM61 MK2 time domain instrument, Fisher M-Scope TW6 pipe and cable locator, and RD8000 line tracer.

Interpretation of the collected data took place in real time as the survey progressed. The results of our survey were marked on the ground surface with paint (see Figure 2) and reported to you at the time of our survey. A possible excavation feature and/or trench was detected with GPR in Area 2; however, GPR images did not reveal additional excavation and/or trench like features in Areas 1 or 3. Several underground lines were detected during our survey in each of the three areas including electric, water, gas, and unidentified lines.

It should be noted that the presence of existing structures and surface objects potentially limited the survey. Where obstructions were present subsurface data could not be collected. Moreover,

EM/magnetic responses produced by metal surface objects such as reinforced concrete, and building elements can potentially obscure subsurface features. Additionally, radar penetration was on the order of 2 to 3 feet below the ground surface; therefore, objects below this depth would not have been detected with radar.

The field evaluation and geophysical analyses presented in this report have been conducted in general accordance with current practice and the standard of care exercised by consultants performing similar tasks in the project area. No warranty, express or implied, is made regarding the conclusions presented in this report. There is no evaluation detailed enough to reveal every subsurface condition. Variations may exist and conditions not observed or described in this report may be present. Uncertainties relative to subsurface conditions can be reduced through additional subsurface exploration. Please note that our evaluation was limited to the assessment of detectable underground utilities in the area of the proposed sample/test locations. Underground Service Alert (USA) or "Dig Alert" should also be contacted prior to conducting subsurface exploration activities. In addition, we recommend that available utility plans/drawings for the project site be reviewed as appropriate.

Southwest Geophysics, Inc. should be contacted if the reader requires additional information or has questions regarding the content, interpretations presented, or completeness of this document. This report is intended exclusively for use by the client. Any use or reuse of this report by parties other than the client is undertaken at said parties' sole risk.

We appreciate the opportunity to be of service on this project. Should you have any questions related to this report, please contact the undersigned at your convenience.

Respectfully submitted,
SOUTHWEST GEOPHYSICS, INC.

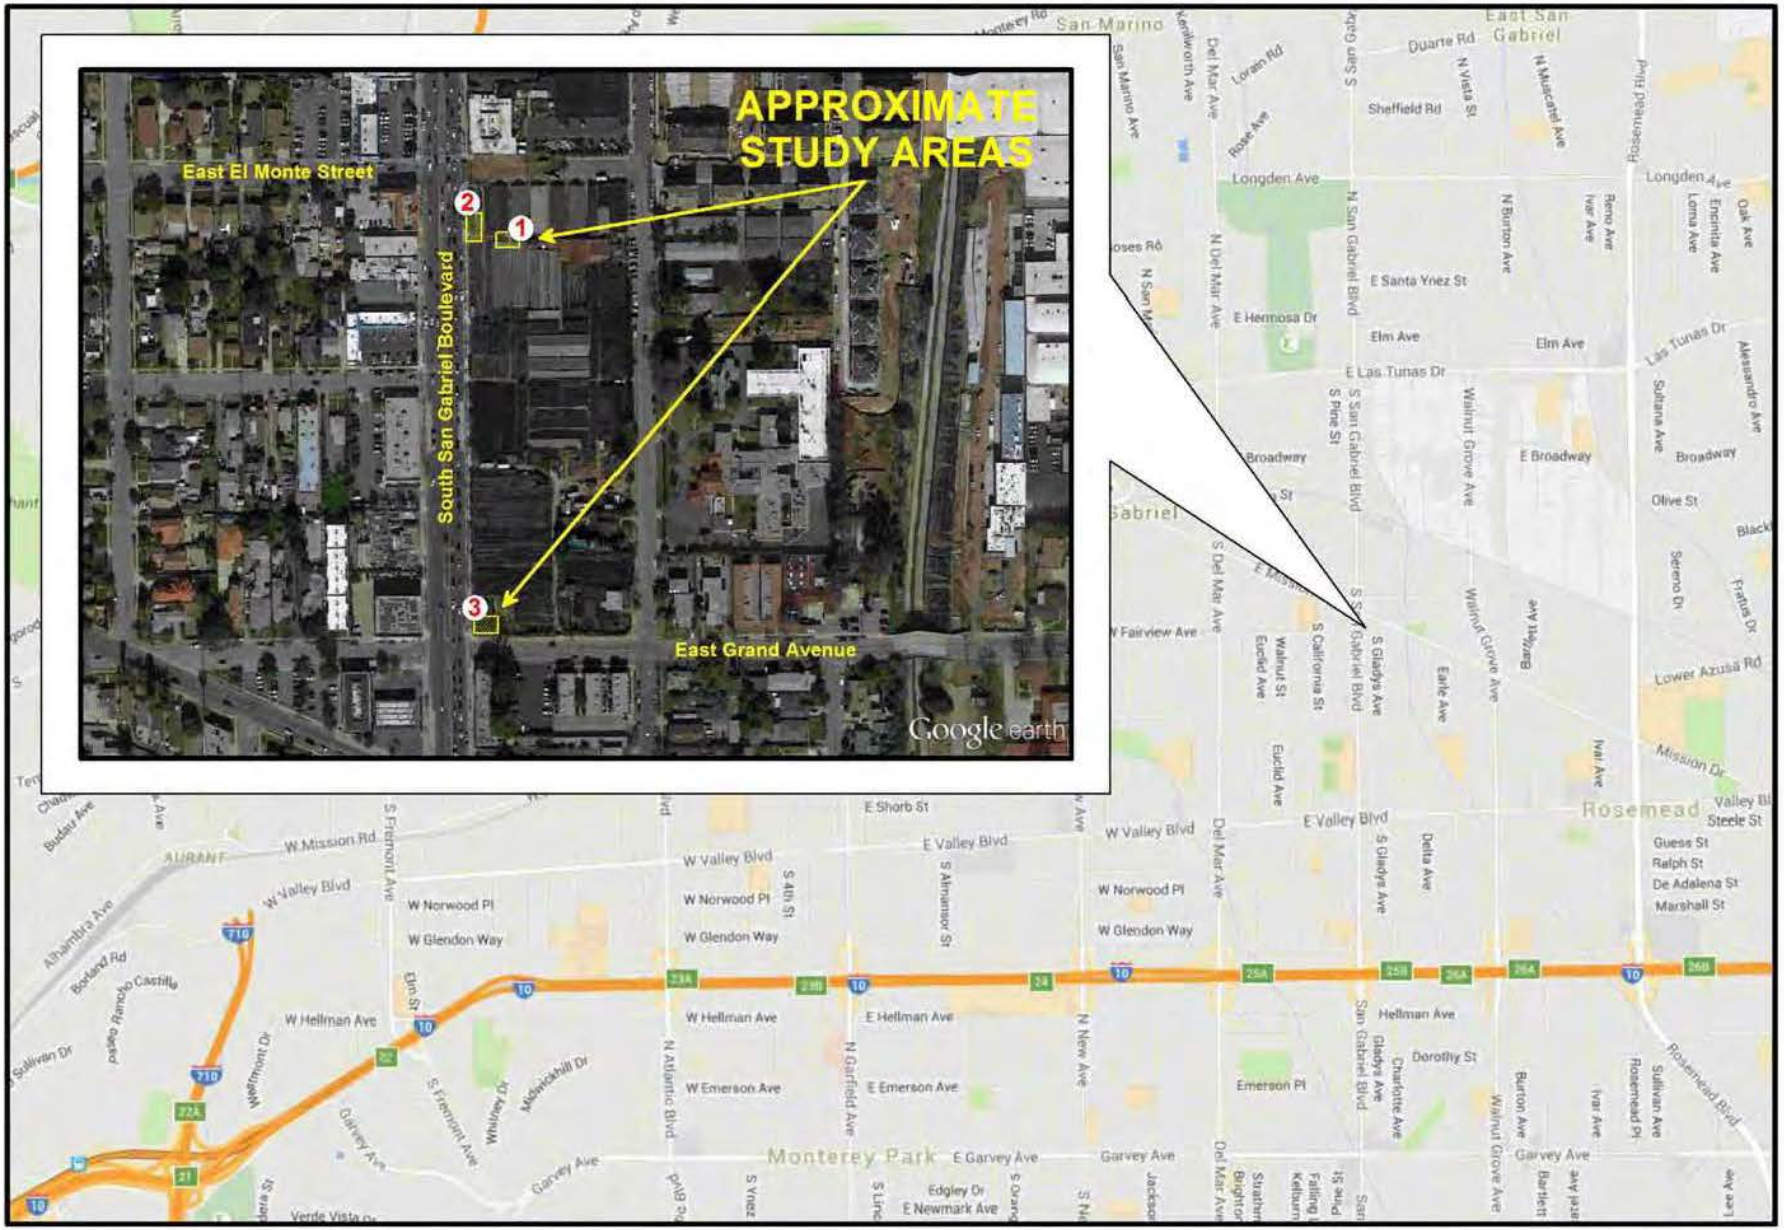

Aaron T. Puente.

APPENDIX B
LABORATORY ANALYTICAL RESULTS AND CHAIN-OF-CUSTODY (COC) DOCUMENTATION

Mobile
Geochemistry Inc.

08 June 2016

Mr. Ryan Merkey
EEI
2195 Faraday Ave. Ste K
Carlsbad, CA 92008

H&P Project: EEI060116-10
Client Project: AAA-72359.2 / 632 S San Gabriel Blvd.

Dear Mr. Ryan Merkey:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 31-May-16 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Janis Villarreal

Janis Villarreal
Laboratory Director

H&P Mobile Geochemistry, Inc. is certified under the California ELAP, the National Environmental Laboratory Accreditation Conference (NELAC) and the Department of Defense Accreditation Programs.

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP and the ISO 17025 programs, certification number L11-175.

H&P is approved by the State of Arizona as an Environmental Testing Laboratory and Mobile Laboratory, certification numbers AZM758 and AZ0779.

H&P is approved by the State of California as an Environmental Laboratory and Mobile Laboratory in conformance with the Environmental Laboratory Accreditation Program (ELAP) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste, certification numbers 2740, 2741, 2743, 2744, 2745, 2754 & 2930.

H&P is approved by the State of Florida Department of Health under the National Environmental Laboratory Accreditation Conference (NELAC) certification number E871100.

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpmg.com/about/certifications.

Notes and Definitions

S-GC	Surrogate recovery outside of established control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
QR-04	The pecent recovery and/or RPD was outside acceptance criteria. Results accepted based upon percent recovery results in duplicate QC sample and the CCV and CCB results.
QM-07	The spike recovery and or RPD was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

SAMPLE RECEIVING REVIEW SHEET

Batch/Work Order #: 7161154

Client Name: EEI - CARLSBAD Project: SAN GABRIEL NURSERY

Delivered by: ☐ Client ☒ SunStar Courier ☐ GSO ☐ FedEx ☐ Other

If Courier, Received by: KYLER Date/Time Courier Received: 6.1.16 / 9:15

Lab Received by: SUNNY Date/Time Lab Received: 6.1.16 / 10:29

Total number of coolers received: 1

Temperature: Cooler #1 5.4	°C +/- the CF (- 0.2°C) = 5.2	°C corrected temperature	
Temperature: Cooler #2	°C +/- the CF (- 0.2°C) =	°C corrected temperature	
Temperature: Cooler #3	°C +/- the CF (- 0.2°C) =	°C corrected temperature	
Temperature criteria = ≤ 6°C (no frozen containers)	Within criteria?	☒ **Yes**	☐ **No**
If NO:			
Samples received on ice?	☐ Yes	☐ **No → Complete Non-Conformance Sheet**	
If on ice, samples received same day collected?	☐ Yes → Acceptable	☐ **No → Complete Non-Conformance Sheet**	

Custody seals intact on cooler/sample	☐ Yes	☐ No*	☒ N/A
Sample containers intact	☒ Yes	☐ No*	
Sample labels match Chain of Custody IDs	☒ Yes	☐ No*	
Total number of containers received match COC	☒ Yes	☐ No*	
Proper containers received for analyses requested on COC	☒ Yes	☐ No*	
Proper preservative indicated on COC/containers for analyses requested	☐ Yes	☐ No*	☒ N/A
Complete shipment received in good condition with correct temperatures, containers, labels, volumes preservatives and within method specified holding times	☒ **Yes**	☐ **No***	

* Complete Non-Conformance Receiving Sheet if checked

Cooler/Sample Review - Initials and date: SL 6.1.16

Notes and Definitions

S-GC	Surrogate recovery outside of established control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
QR-04	The pecent recovery and/or RPD was outside acceptance criteria. Results accepted based upon percent recovery results in duplicate QC sample and the CCV and CCB results.
QM-07	The spike recovery and or RPD was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to possible matrix interference. The LCS was within acceptance criteria. The data is acceptable as no negative impact on data is expected.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Notes and Definitions

S-GC	Surrogate recovery outside of established control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
QR-04	The pecent recovery and/or RPD was outside acceptance criteria. Results accepted based upon percent recovery results in duplicate QC sample and the CCV and CCB results.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to possible matrix interference. The LCS was within acceptance criteria. The data is acceptable as no negative impact on data is expected.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

SAMPLE RECEIVING REVIEW SHEET

Batch/Work Order #: T161278

Client Name: EEI - CARLSBAD Project: SAN GABRIEL NURSERY

Delivered by: ☒ Client ☐ SunStar Courier ☐ GSO ☐ FedEx ☐ Other

If Courier, Received by: _____ Date/Time Courier Received: _____

Lab Received by: SUNNY Date/Time Lab Received: 6.15.16 / 11:00

Total number of coolers received: 0

Temperature:	Cooler #1 12.8	°C +/- the CF (- 0.2°C) = 12.6	°C corrected temperature
Temperature:	Cooler #2	°C +/- the CF (- 0.2°C) =	°C corrected temperature
Temperature:	Cooler #3	°C +/- the CF (- 0.2°C) =	°C corrected temperature

Temperature criteria = ≤ 6°C (no frozen containers)	Within criteria?	☐ **Yes** ☒ **No**
If NO:		
Samples received on ice?	☒ Yes	☐ **No → Complete Non-Conformance Sheet**
If on ice, samples received same day collected?	☐ Yes → Acceptable	☒ **No → Complete Non-Conformance Sheet**

Custody seals intact on cooler/sample	☐ Yes	☐ No*	☒ N/A
Sample containers intact	☒ Yes	☐ No*	
Sample labels match Chain of Custody IDs	☒ Yes	☐ No*	
Total number of containers received match COC	☒ Yes	☐ No*	
Proper containers received for analyses requested on COC	☒ Yes	☐ No*	
Proper preservative indicated on COC/containers for analyses requested	☐ Yes	☐ No*	☒ N/A
Complete shipment received in good condition with correct temperatures, containers, labels, volumes preservatives and within method specified holding times	☐ **Yes**	☒ **No***	

* Complete Non-Conformance Receiving Sheet if checked

Cooler/Sample Review - Initials and date: SR 6.15.16

SAMPLE NON-CONFORMANCE SHEET

Batch/Work Order # T161278

- **COOLERS**
  - ☐ Not Received (received COC only)
  - ☐ Leaking/Damaged
  - ☐ Other:
- **CUSTODY SEALS**
  - ☐ None
  - ☐ Not Intact
- **TEMPERATURE (Temp criteria = ≤ 6°C)**
  - ☒ Cooler/Sample Temp(s)
  - ☐ Temperature Blank(s)
- **CHAIN OF CUSTODY (COC)**
  - ☐ Not relinquished by client; No date/time relinquished
  - ☐ Incomplete information provided
  - ☐ COC not received – notify PM
- **CONTAINERS**
  - ☐ Leaking ☐ Broken
  - ☐ Extra ☐ Missing
- **LABELS**
  - ☐ Not the same sample ID / info as on the COC
  - ☐ Incomplete Information
  - ☐ Markings/Info illegible
- **SAMPLES**
  - ☐ Samples **NOT RECEIVED** but listed on COC
  - ☐ Samples received but **NOT LISTED** on COC
  - ☐ Logged based on Label Information and not COC
  - ☐ Logged according to Work Plan and not COC
  - ☐ Logged in, **ON HOLD** until further notice
  - ☐ Insufficient quantities for analysis
  - ☐ Improper container used
  - ☐ Mislabeled as to tests, preservatives, etc.
  - ☐ Holding time expired – list sample ID and test
  - ☐ Not preserved/Improper preservative used
  - ☐ Without Labels, no information on containers
  - ☐ Other

Comments: SAMPLES DID NOT MEET TEMPERATURE CRITERIA.

Sample fractioning only if broken container compromises other samples or if out of temp reading impacts more than one cooler

Fraction													Preser.
