Completed Date: 06/20/1991
Comments: From EPA CERCLA PA fit report. Site is located in three lots. 1) 218 N. Juanita Avenue: the site currently leased by Lynde-Ordnay Co., Inc. Carroll Trust has owned since 1940s and LOC leased it since then. 1990 geophysical surveys located three underground tanks on the property. 2) 220 N. Juanita Avenue: it is currently a vacant lot. The Parker Judge owned in 1938. Paint Engineers owned and operated in 1946. Carroll Trust since 1953. 3) 222 N. Juanita Avenue: Hansen's Juices leased it since 1989. The Los Angeles unified school district conducted Phase I & II investigations to purchase the property. Revealed petroleum contamination in the soil. Stoddard solvent was detected in the soil. The highest level was 4500 mg/kg volatile organics and chlorinated hydrocarbons were also detected in the soil. Contamina- tion has also been detected in the groundwater. FIT recommended NFA for EPA. Medium priority PEA required.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

USGS TOPOGRAPHIC MAP

Target Property Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

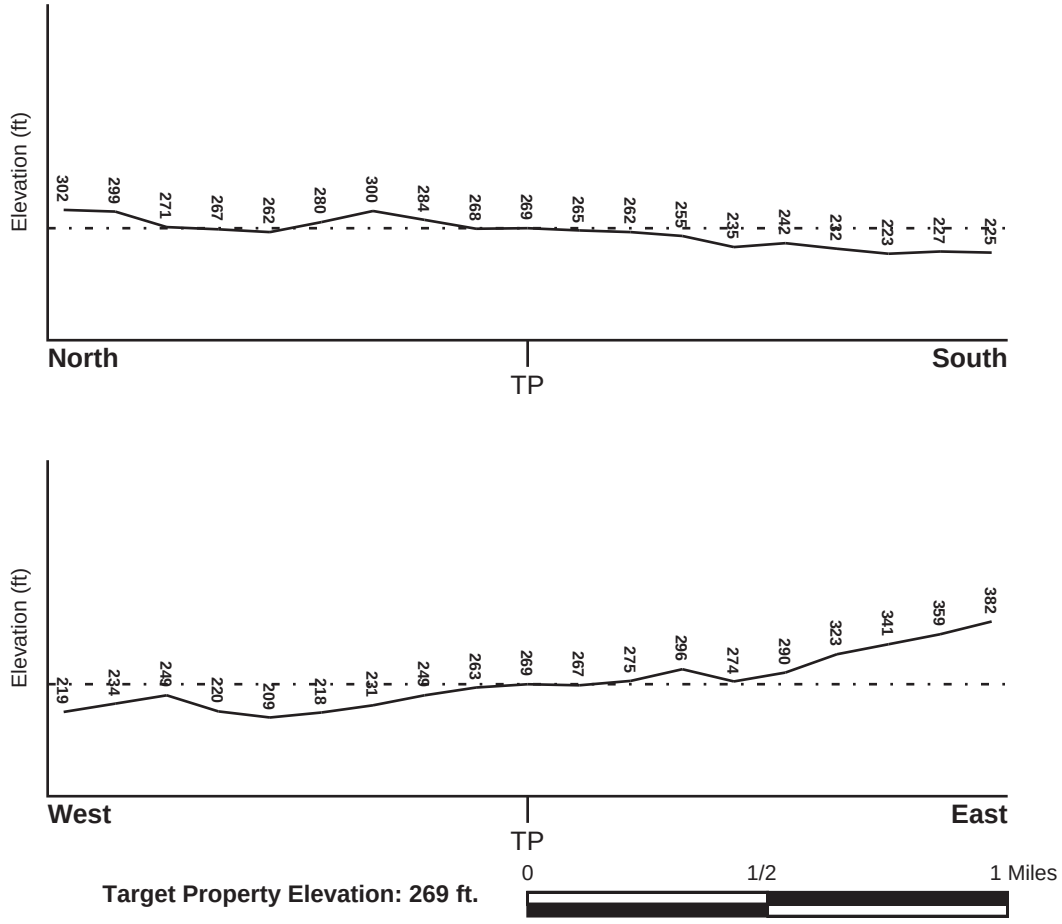
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1610F	FEMA FIRM Flood data

06037C1620F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/4 - 1/2 Mile NW	SW

7G	1/2 - 1 Mile WSW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Miocene
Code:	Tm *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Asbestos Reports and Memorandums

Certified Asbestos Management Consultants
9525 Slauson Avenue, Pico Rivera, CA 90660 (213)942-8668

REPORT TO : Calif. Association of Realtors
525 S. Virgil Ave.
Los Angeles, CA 90020

ATTENTION : Nylia Burke

SUBJECT : ASBESTOS INSPECTION

SITE: 525 S. Virgil Ave.

DATE : Friday, January 20, 1989

On September 9, 1988, I inspected the building at the above location for friable asbestos containing materials. Sixteen samples of suspected asbestos containing material were taken and submitted to the laboratory for analysis. The analyses were performed using the polarized-light microscopy technique described in the EPA *Interim Method of the Determination of Asbestos in Bulk Insulation Samples* (40 CFR Part 763, Appendix A). The results of the analysis are enclosed.

The primary purpose of the inspection was to determine whether asbestos containing materials were present in the first floor area which was to be remodeled. A quick inspection of the rest of the building was also performed, but not every space in the rest of the building was inspected.

Building materials suspected of containing asbestos were grouped into sampling areas. A sampling area consists of all of the material in the building which appears to be of the same type. Representative samples were taken from each sampling area. The type of material, locations, sample results, and other information for each sampling area is summarized in the accompanying data sheets.

Five sampling areas were found to contain asbestos. Two of these materials are present in the area to be remodeled. The acoustical ceiling in the first floor corridor and the pipe elbow insulation should be removed prior to remodeling.

The fireproofing in the penthouse mechanical rooms is in moderately deteriorated condition. The main fan intakes are in close proximity to this material, and the material has been eroded visibly by the intake airstream. This situation presents a significant hazard of low-level asbestos exposure in the building. There is also a possibility that higher level intermittent exposures may occur if the material is disturbed by impact or vibration. Removal of this material should be considered.

The acoustical ceiling in the fourth floor stairwell #1 is in fairly good

condition. Care should be taken to avoid damage to this material during light bulb changes, etc.

The insulation on the standpipe in stairwell #2 is in good condition and the covering is intact. This material presents little hazard unless the covering is damaged.

Actual exposure levels are dependent on disturbance of the material, air currents, proximity of persons to the site of disturbance, etc. The health risk associated with low-level exposure is not well understood, but it is generally accepted that any exposure carries some added risk of disease, and that asbestos exposure should be reduced as much as practical. Current federal regulations require elimination of asbestos hazards from schools, but there are no regulations requiring abatement of asbestos in residences or any other buildings except when demolition or renovation takes place.

State law requires that asbestos removal be carried out only by contractors licensed and certified by the State Contractors License Board for asbestos abatement and currently registered by the State Division of Occupational Safety and Health (Cal-OSHA). If you choose to have this material removed, I strongly suggest that you hire a consultant or laboratory to monitor the job, make sure that it is being carried out according to state and federal regulations, and conduct a visual inspection and air sampling after the job to ensure that no asbestos contamination remains. Continuous observation of the abatement process and a thorough final visual inspection are the best way of ensuring a clean job.

Roofing and flooring materials were not sampled. Some of these materials may contain asbestos but they should present no hazard unless severely damaged or demolished. If these materials are to be removed or damaged by remodeling I suggest that they be analysed.

I appreciate the opportunity to be of service to you. If you have any questions please call me at (213) 942-8668.

Respectfully submitted,

MICHAEL R. TIFFANY
Accredited Consultant

SUBJECT: ASBESTOS REMOVAL

Asbestos Removal

Some of you have expressed concern relative to the recent removal of asbestos from the premises so we believe an explanation and update is appropriate.

As part of our construction task, we have had the first floor of the building tested by a duly licensed asbestos inspection firm. Their inspection revealed the fact of asbestos having been used in the original construction of the building. Asbestos was detected in the first floor corridor ceiling, the coating on fire standpipes in the north stairwell, and on elbows of certain water lines. The asbestos on the first floor corridor ceiling was removed just before the holidays.

After beginning the demolition work on the first floor, we discovered the first floor had been covered with vinyl tile. Since the mastic (glue) used with some vinyl tiles often contains asbestos, we had it tested. Even though the tests proved an asbestos level well within EPA standards, we immediately had all the mastic and tile removed along with ten fire rated doors on the first floor which we discovered also contained asbestos.

This task was accomplished by a licensed asbestos removal company according to accepted standards for asbestos removal. The removal was scheduled at night on Wednesday and Thursday, January 11-12 and was stopped by the open of business Thursday and Friday. The firm assured us the removal process presented no health risk to employees on the second, third and fourth levels. We understand some of you experienced discomfort due to the fumes that remained from the removal process. We assure you that we would have made alternative arrangements for removal at a different time if we had been aware of the potential problems of the fumes. The asbestos removal firm informs us that the fumes were due to the deodorizer used to counteract the smell of the removal solvents and were not due to the asbestos. We have been assured by the removal company that there was no health risk, but if any of you have problems, please report them to Human Resources. We will also be happy to

provide you with a list of the chemicals used and the results of the asbestos tests.

The water pipes and fire standpipes in the stairwell also contain or are coated with asbestos. In the 1960's and 1970's, many materials contained asbestos as a fire retardant. There are no present plans to replace the pipes. We will keep you posted in the event of any change in these plans, however.

Although it has not been tested, we suspect that the adhesive used in the tiles in the north stairwell also contains asbestos. Therefore, in an abundance of caution, we are planning to have this removed this weekend along with some tile remaining on a small 6' x 10' area on the first floor. The work will commence Friday evening, January 20, 1989 at 8:30 p.m. The same licensed asbestos removal firm, CCC Environmental, will be handling the removal of these materials. The building will be closed to all staff for the weekend. We anticipate that the fumes will be dissipated by Monday.

To the best of our knowledge, all asbestos was removed from the second, third and fourth floors in conjunction with the remodeling of these floors prior to our moving into the building in 1981. Therefore, after this weekend's removal, the only remaining asbestos of which we are aware is located in the water pipes and fire standpipes in the stairwell and the ceiling of the "penthouse." It is important these objects not be disturbed. Moving, drilling, boring or otherwise disturbing the asbestos-containing construction materials can present a health risk and consequently, should not be attempted by an unqualified employee. Since C.A.R. lacks knowledge regarding the handling instructions necessary to prevent and minimize the release of and exposure to asbestos, no C.A.R. employee should handle or disturb these areas in any manner. If you become aware that these asbestos-containing areas are deteriorating, contact Nylia Burch <u>immediately</u> at extension 300.

Potential health risks that may result from exposure to asbestos include asbestosis, lung cancer, mesothelioma and other types of cancer. In general, airborne and "friable" (materials that may be crumbled by hand pressure) asbestos create the most risk. Asbestos fibers in solid asbestos that remain undisturbed are not released into the air as easily and therefore present less risk. Human Resources has a brochure available for your reading that explains asbestos. Employees are encouraged to contact state or local public health agencies to obtain more information. We are continuing to follow up with tests to assure that we have taken all necessary precautions.

From: Gordon Johnston

Subject: Asbestos

In the process of preparing a construction budget, we had the building inspected for asbestos. This was in late September 1989. Discussions at that time indicated there was asbestos in the building in several areas including the ceiling area over the ground floor corridor, on elbows of certain hot water pipes, on the standpipe in the north stairwell, and ceilings of the six rooms in the penthouse housing the electrical equipment, boiler, pumps, elevator cables etc..

Indications were given that the only areas we need be concerned with were those in which we planned construction work on the first floor and that the other areas posed no threat unless they were disturbed by earthquake or contact by someone working in the area.

Based on that, we included $20,000 in the construction budget for removal of asbestos on the ground floor. Inspection cost was $760.00. Costs for the removal of asbestos on the first floor ceiling and elbows was $ 7817.50.

During demolition of the ground floor offices, we discovered asphalt tile on the floor under the carpeting. Since the new floor materials would not adhere to asphalt and needed to be installed over concrete, it was determined the tile must be removed. We had the tile inspected for asbestos at a cost of $680.00 and the result was that it too had to be removed due to asbestos. This was accomplished at a cost of $49,490.00. Costs to date are $58,747.50 as opposed to a budget of $20,000.00.

Relative to the new law effective January 1989 requiring informing employees and others about asbestos, Bill Pfeiffer, June Barlow, Pam Billington, Nylia Burch and I met to discuss the overall situation. Pam had expressed concerns related to her about staff becoming ill after the asbestos was removed from the floor tiling during the week we were in San Francisco. This put more urgency on the matter.

After receiving the written report of the September inspection just last week, we asked the asbestos removal firm for a quotation to remove all asbestos from the building. This estimate came to day quoting a cost of $115,000 for removal of all currently known asbestos in the building. Removal involves scraping the penthouse ceilings down to bare metal in all six rooms. This will require the work being accomplished over three weekends for the critical areas where the elevators, boiler, and electrical equipment must be shut down. Other parts may be accomplished during normal working hours. Of course, all asbestos has to be properly double sealed in bags and disposed. Total elapsed time will require 32 days after the contract is signed and approval obtained (approvals generally take 10 days). Additionally, a fire retardant material will have to be sprayed on the same surfaces. No bid is currently available; however it is guesstimated at $15,000.00.

REPORT TO : Calif. Association of Realtors
525 S. Virgil Ave.
Los Angeles, CA 90020

ATTENTION : Nylia Burke

SUBJECT : FLOOR TILE SAMPLING

SITE: 525 S. Virgil Ave.

DATE : Friday, January 20, 1989

At your request, twenty samples of floor tile, mastic, and other suspected asbestos containing material were taken and submitted to the laboratory for analysis. The analyses were performed using the polarized-light microscopy technique described in the EPA *Interim Method of the Determination of Asbestos in Bulk Insulation Samples* (40 CFR Part 763, Appendix A). The results of the analysis are enclosed.

One sample was taken of each size and color of floor tile present in the southeast portion of the large room on the first floor. A sample of mastic was taken at the location of each floor tile sample. At each location, either the tile, the mastic, or both was found to contain asbestos. The entire area of flooring should therefore be treated as asbestos containing material and removed by a qualified contractor prior to remodeling.

A sample of insulation was taken from one of the damaged fire doors. This sample was found to contain about 55% asbestos. The damaged doors present a hazard of asbestos exposure and should be removed. Intact asbestos-insulated doors present little hazard, but damage to them should be avoided.

One sample was taken of the overspray material above the corridor ceiling. No asbestos was detected in this sample. This material appears to be overspray from the wall plaster rather than the acoustic ceiling.

I appreciate the opportunity to be of service to you. If you have any questions please call me at (213) 942-8668.

Respectfully submitted,

Subject: Phase II Testing, Commercial Property, APN 5077-004-030, 518 & 526 South Westmoreland Avenue, 515, 517, 525 & 531 South Virgil Avenue, Los Angeles, California 90020.

Reference: California Environmental, *Environmental Site Assessment – Phase I, Commercial Property, APN 5077-004-030, 518 & 526 South Westmoreland Avenue, 515, 517, 525 & 531 South Virgil Avenue, Los Angeles, California 90020, April 2018.*

Introduction

California Environmental (CE) is pleased to present the results of the screening subsurface assessment conducted for the subject property. This assessment was implemented following recommendations made by CE in a Phase I Environmental Site Assessment prepared for the subject property in April 2018. CE's subsurface evaluation included soil gas sampling to assess for volatile organic compounds (VOCs) and soil sampling to assess for VOCs and total petroleum hydrocarbons (TPH).

The subject property consists of one (1) rectangular-shaped parcel of land that encompasses approximately 42,160 square feet. The property is currently developed with one (1) three-story structure situated along South Virgil Avenue. The structure was constructed in 1965 and is currently occupied by California Association of Realtors. The remainder of the property consists of an asphalt paved parking lot accessed from South Westmoreland Avenue. It is proposed to redevelop the property with a new mixed-use structure with subterranean parking levels.

Soil Gas Assessment

Soil-gas sampling was implemented on-site on August 21, 2018. D. Lewis Locators cleared utility conflicts for all the soil gas sampling locations using total field magnetics and GPR methods. An Underground Service Alert notification was also made. H&P Mobile Geochemistry conducted soil-gas probe placement and sampling under the direction of California Environmental. A direct-push Strataprobe rig and hand drill were utilized for the placement of the soil vapor probes. Eleven (11) soil gas probes were placed at 5 and 15 feet below ground surface in six (6) locations. Location CEB1 was located inside the structure in an area estimated to be the location of a buried oil well. The geophysical survey was not able to locate the buried well as reinforced concrete and electrical equipment produced high levels of interference. The soil gas probe locations are shown on the attached **FIGURE 1 – ASSESSMENT PLAN**. Eleven (11) soil-gas samples were collected from the probe locations including one replicate sample. A sample was not obtained from location CEB3 at 5-feet due to high vacuum levels caused by clayey-sand at the sample depth. Soil-gas samples were obtained and analyzed for volatile organic compounds (USEPA Method 8260B) in general accordance with the DTSC/RWQCB guidelines (CalEPA/DTSC/RWQCB Soil-gas Advisory, 2015) in an onsite state certified H&P mobile laboratory.

The soil-gas probes consisted of a sampling tip attached to inert nylon tubing. Each segment of tubing was pre-measured to ensure the correct depth. The sample point was set within a six-inch sand-sensing zone at the desired depth of each soil vapor point. Dry granular bentonite was placed above and/or below the sand-sensing zone and hydrated in order to seal the sand-sensing zone. The probes were completed to the surface with hydrated bentonite and capped with a gas-tight 2-way valve preventing degassing of the vapor point and interference from the surface. The soil-gas probes were allowed to equilibrate prior to the collection of the soil-gas samples. Three dead space purge volumes (3PV) were evacuated from each probe prior to sampling. 1,1-difluoroethane was utilized as the leak check compound. Vapor probe locations were sampled using the H&P Mobile Geochemistry SOP, which includes protocols for surface seals, purge volume tests, tracer compounds, sample flow rate, duplicate samples, and analytical instrument calibration.

Laboratory analysis of soil-gas found concentrations of TCE in samples CEB2 at 5 feet (0.74 µg/l) and CEB 4 at 15 feet (0.39 µg/l). Using the detected concentrations with the attenuation factor (AF) for a future commercial property (0.0005) results in predictive concentrations below the DTSC SL for TCE (3.0 µg/m^3) in future ambient air for a commercial property. This assumes the first-floor of the development will consists entirely of commercial units. The design of the proposed project has not been finalized, but a subterranean garage level may be included, further reducing the VI potential. The remaining samples were below the method-reporting limits for all other EPA Method 8260

compounds. The soil-gas laboratory report and chain of custody record are attached in **APPENDIX II**. The soil gas data is tabulated on **TABLE I, APPENDIX I**.

Soil Sampling

Soil sampling was conducted onsite on August 21, 2018 by H&P Mobile Geochemistry under the direction of California Environmental. Ten (10) soil samples were collected from borings CEB2, CEB3, CEB4, CEB5, and CEB6. The soil samples were obtained from depths of 5 and 15 feet below ground surface. The samples were retained in acetate sleeves, capped, labeled, placed on ice, and transferred to an offsite state certified laboratory for analysis. The samples were analyzed for VOCs (USEPA Method 8260B) and TPH (USEPA Method 8015M). VOCs or TPH were below the reporting limit for each respective compound. Logs of the borings are attached as **Plates 1-5**. The soil sample locations are depicted on **FIGURE 1 – ASSESSMENT PLAN**. The soil data is tabulated on **TABLE II, APPENDIX I**. The soil laboratory report and chain of custody record are attached in **APPENDIX II**.

Conclusions

Soil gas and soil sampling conducted at the subject site on August 21, 2018 by CE revealed no evidence of a significant release of TPH or VOCs. The low concentrations of TCE detected in soil gas were analyzed using the attenuation factor (AF) for a future commercial property (0.0005), which indicated a future vapor intrusion (VI) hazard is not present for the proposed mixed-use redevelopment at the site. The design of the proposed project has not been finalized, but a subterranean garage level may be included, further reducing the VI potential. The low concentrations of TCE detected in soil gas are considered *de minimus*, not requiring a remedial response or agency notification. A geophysical survey, to locate the buried oil well, and methane sampling (LADBS standards) will need to be conducted following demolition of the current onsite structure.

Re : 525 S.Virgil Ave. / 3511

A243919 / 8H21031

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 08/21/18 13:12 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Allen Aminian

QA/QC Manager

Mr. Greg Buensuceso
California Environmental
30423 Canwood Street, Suite 208
Agoura Hills, CA 91301

H&P Project: CE082218-11
Client Project: 3511 / 525 S. Virgil Ave

Dear Mr. Greg Buensuceso:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 21-Aug-18 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Janis La Roux
Laboratory Director

H&P Mobile Geochemistry, Inc. is certified under the California ELAP and the National Environmental Laboratory Accreditation Conference (NELAC). H&P is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP Program and ISO/IEC 17025:2005 programs, accreditation number 69070 for EPA Method TO-15, H&P Method TO-15, EPA Method 8260B and H&P 8260SV.

Notes and Definitions

LCC	Leak Check Compound
ND	Analyte NOT DETECTED at or above the reporting limit
MDL	Method Detection Limit
%REC	Percent Recovery
RPD	Relative Percent Difference

All soil results are reported in wet weight.

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP Program and ISO/IEC 17025:2005 programs through PJLA, accreditation number 69070 for EPA Method TO-15, H&P Method TO-15, EPA Method 8260B and H&P 8260SV.

H&P is approved by the State of Arizona as an Environmental Testing Laboratory and Mobile Laboratory, certification numbers AZM758 and AZ0779.

H&P is approved by the State of California as an Environmental Laboratory and Mobile Laboratory in conformance with the Environmental Laboratory Accreditation Program (ELAP) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste, certification numbers 2740, 2741, 2743, 2744, 2745, 2754 & 2930.

H&P is approved by the State of Florida Department of Health under the National Environmental Laboratory Accreditation Conference (NELAC) certification number E871100.

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpmg.com/about/certifications.

1.0 EXECUTIVE SUMMARY

An Environmental Site Assessment - Phase I was prepared for the subject property located at 518 and 526 South Westmoreland Avenue and 515, 517, 525 and 531 South Virgil Avenue, Los Angeles, California 90020. The scope of work for the Phase I meets ASTM E 1527-13 *Standard Practice for Environmental Site Assessments*. The purpose of the Phase I report is to provide information regarding the potential for hazardous material impacts to the soil and groundwater beneath the subject property. Such threats or material threats are identified in this report as Recognized Environmental Conditions (RECs). The presence of Historical Recognized Environmental Conditions (HRECs) and Controlled Recognized Environmental Conditions (CRECs) was also evaluated. The extent of this evaluation in conjunction with owner/client-supplied data is intended to satisfy the requirements of all appropriate inquiry into the previous ownership and uses of the property. The scope of the work included a site reconnaissance, research of land use records and other sources for preliminary indications of hazardous material use, storage, or disposal at the property and/or on contiguous parcels. It is proposed to redevelop the property with a new mixed-use structure with subterranean parking levels.

The subject property consists of one (1) rectangular-shaped parcel of land that encompasses approximately 42,160 square feet. The property is currently developed with one (1) three-story structure situated along South Virgil Avenue. The structure was constructed in 1965 and is currently occupied by California Association of Realtors. The remainder of the property consists of an asphalt paved parking lot accessed from South Westmoreland Avenue.

Historical site utilization research indicates that the subject property was undeveloped prior to 1911. Sanborn Fire Insurance Map research indicates the parcel was developed with residential dwellings from at least 1921 through 1961. A certificate of occupancy indicates that construction of the current onsite structure was completed by 1966.

The subject property is not identified on the standard environmental government sources researched in this report. However, the property is located within a Methane Hazard Zone as identified by the City of Los Angeles. Additionally, The DOGGR Well Finder database indicates a buried oil well, formerly operated by Wilson Oil Company, is located beneath the subject building. No additional information was available on the Well Finder database. Based on historical research the well was likely drilled and buried prior to 1911.

Certified Asbestos Management Consultants (CAMC) prepared asbestos inspection reports for the subject building dated January 20, 1989. Asbestos containing materials (ACM) were found in piping insulation, acoustical ceiling, floor tiles, and fireproofing material. On January 26, 1989, California Association of Realtors issued a memorandum indicating ACM was removed from the first floor; including floor tiles, ceiling tiles, and piping. The memo also indicates that removal of all ACM from the subject building was contemplated. However, no further documentation of ACM inspections or removal was provided to CE for review.

The nearest listed contaminated site to the subject property is located at 2951 West 6th Street approximately 330 feet to the southeast. This offsite property was formerly occupied by a Unocal service station. In 1989, one (1) 500-gallon waste-oil and three (3) 10,000-gallon gasoline USTs were removed from the site. Following removal of the tanks, ten (10) groundwater monitoring wells were installed and soil samples were collected from four (4) soil borings. Concentrations of TPH as gasoline were found up to 1,012 mg/kg. Follow-up investigations found concentrations of TPH as gasoline up to 3,915 mg/kg. Site remediation consisting of multi-

phase extraction and excavation took place between 2002 and 2003. This offsite property received case closed status from the RWQCB on April 11, 2011. Based on the distance from the subject site and a southern groundwater gradient, it is considered unlikely that this offsite release has impacted the subject property.

California Environmental has prepared an Environmental Site Assessment - Phase I in conformance with the scope and limitations of ASTM 1527-13 for the property located at 518 and 526 South Westmoreland Avenue and 515, 517, 525 and 531 South Virgil Avenue, Los Angeles, California 90020. One data failure was encountered during the preparation of this report. The RWQCB has not responded to the request for records. This data failure does not alter the conclusions or recommendations made in this report. A Preliminary Title Report prepared by Commonwealth Land Title Company dated February 7, 2018 for the subject property was reviewed by CE. No environmental liens or environmental activity use limitations (AULs) were identified in the document.

The property is located within a Methane Hazard Zone as identified by the City of Los Angeles and a buried oil well is located beneath the subject building, which constitute Recognized Environmental Conditions (RECs). CE recommends a soil gas screening survey to evaluate methane concentrations in the shallow subsurface. Additionally, the historical auto repair activities conducted on the adjacent property to the south (534 S. Westmoreland Avenue) is considered an environmental concern. CE recommends soil and soil vapor sampling along the property boundary nearest this offsite facility to assess possible impacts to the subject property subsurface. Due to the date of construction of the subject building in 1965, it is recommended that an asbestos and lead survey be conducted by a certified lead consultant prior to renovation or demolition of the subject building. Lastly, the DOGGR Well Finder database indicates a buried oil well, formerly operated by Wilson Oil Company, is located beneath the subject building. CE recommends a post-demolition geophysical survey to locate and determine the condition of the buried well. It is probable the old oil well will require abandonment to modern DOGGR standards. Construction over the abandoned oil well will require conformance to the current *DOGGR Construction Site Well Review Program*. No evidence of historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs) was identified in connection with the subject property.

2.0 INTRODUCTION

The following report presents the findings of the Environmental Site Assessment - Phase I prepared for the subject property located at 518 and 526 South Westmoreland Avenue and 515, 517, 525 and 531 South Virgil Avenue, Los Angeles, California 90020. The scope of the Phase I study meets ASTM E 1527-13 *Standard Practice for Environmental Site Assessments* and included research of available land use records and other sources for preliminary indications of hazardous material use, storage or disposal at the property. The findings of this study are intended to provide information to the client regarding potential hazardous material impacts to the soil and groundwater beneath the site.

The scope of the investigation was conducted in general accordance with ASTM Standard Practice for Environmental Site Assessments – Phase I, Environmental Site Assessment Process ASTM E 1527-13. The steps outlined in this process are intended to permit a user (client) to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide purchaser limitations on CERCLA liability. Specifically, this report along with certain obligations of the client, constitutes All Appropriate Inquiry (AAI) into the previous ownership and uses of the property consistent with the standard of care as practiced in this area by environmental professionals. A main component of the assessment is to identify recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions, as they may affect the subject property. As defined by ASTM E 1527-13, a recognized environmental condition (REC) means *"the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property."* A controlled recognized environmental condition (C-REC) is defined *as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required*

controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” An historical recognized environmental condition (HREC) is defined as *“a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”*

An important component of complying with the ASTM E 1527-13 Standard is information to be obtained or in the possession of the client and/or seller of the property. Such information includes obtaining and review of a recent title report, any specialized information regarding the site or surrounding area which may give rise to identification of a recognized environmental condition, and/or reasons given by the seller should the purchase price be significantly lower than what would be reasonably expected for a property of similar size and value. Often a real estate appraiser is commissioned to evaluate the purchase or sale price of a property. Such an appraisal is outside the scope of this Phase I Assessment report.

The independent conclusions represent California Environmental’s (CE) professional judgment based on the conditions that existed and the information and data available during the course of the study. Factual information regarding operations, conditions, and test data provided by the client, the owner or their representatives have been assumed to be correct and complete. This report includes **CONCLUSIONS AND RECOMMENDATIONS**, which together with the remainder of this report are subject to the **NOTICE** at the end of the report. **This report was prepared for the sole use and reliance by the client as identified on the title page of this report. Use of this report by other entities is expressly forbidden unless the client and CE grant permission.**

The scope of work included:

- A walkover of the site.
- Review of client/owner supplied information.
- Review of building and grading permits on file with the City of Los Angeles Department of Building and Safety.
- A review of underground storage tank files and industrial waste records maintained by the City of Los Angeles Fire Department Underground Storage Tank and Hazardous Materials Divisions.
- Review of historical USGS topographic maps and historical aerial photographs maintained by EDR Company.
- Research of historical Sanborn Fire Insurance Maps maintained by EDR Company.
- Contact with the California Environmental Protection Agency, Department of Toxic Substances Control to review their files.
- Contact with the California Environmental Protection Agency, Regional Water Quality Control Board to review their files.
- Contact with the Los Angeles County Fire Department to review their files.
- Contact with the South Coast Air Quality Management District to review their files.
- Review of oil well records maintained by the State of California Division of Oil, Gas, and Geothermal Resources.
- Review of the City of Los Angeles – Zone Information and Map Access System (ZIMAS) database.
- Review of Los Angeles County Landfill Maps.
- Review of the following lists and maps of suspect or known contaminated sites; a complete listing of these sources is contained within **APPENDIX V**.
    - California Regional Water Quality Control Board, (RWQCB) - *Computer Case Listing of Reported Underground Tank Leaks*, covering Los Angeles County.
    - California Department of Health Services - *Hazardous Waste and Substance Sites - Cortese List and Contaminated Wells List, which includes the Bond Expenditure Plan* (BEP) sites.
    - California Environmental Protection Agency, Facility and Manifest Data, HAZNET.

- Historical California Environmental Protection Agency, Department of Toxic Substances Control - *CalSites List*.
- California Department of Health Services, *Hazardous Waste Information System* (HWIS) and Tanner Report.
- California Integrated Waste Management Board, *Solid Waste Information System* - (SWIS) List.
- State Water Resources Control Board, *Toxic Pits Clean-up Act (Toxic Pits).*
- State Water Resources Control Board, *Hazardous Substance Storage Container Database* (UST, LUST, SLIC, and WDS).
- U.S. Environmental Protection Agency - *National Priorities List* (NPL).
- U.S. Environmental Protection Agency - *Comprehensive Environmental Response, Compensation, and Liability Information System* (CERCLIS).
- U.S. Environmental Protection Agency, *Toxic Release Inventory System* (TRIS).
- U.S. Environmental Protection Agency, *Resource Conservation and Recovery Information, System Treatment, Storage and Disposal Facilities*, (RCRA-TSDF).
- U.S. Environmental Protection Agency, *Resource Conservation and Recovery Information System, Large Quantity Generators*, (RCRA-LQG).
- U.S. Environmental Protection Agency, Resource *Conservation and Recovery Information System, Small Quantity Generators*, (RCRA-SQG).
- U.S. Environmental Protection Agency - *Superfund Amendment and Reauthorization Act, Title III*, (SARA Title III).
- U.S. Environmental Protection Agency, *Emergency Response Notification System* (ERNS).
- U.S. Environmental Protection Agency, *Facility Index System* (FINDS).
- U.S. Environmental Protection Agency, *Civil Enforcement Docket* (DOCKET).

- A review of government records databases of suspect or known contaminated sites and historical city directories research was performed by EDR Company. The results of the search are summarized in this report. The EDR reports are enclosed in **APPENDICES II** and **V**.
- Review of previous asbestos inspection reports prepared by Certified Asbestos Management Consultants.
- Preparation of this report.

3.0 SITE DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The subject property is located between the west side of South Virgil Avenue and the east side of South Westmoreland Avenue, in the City of Los Angeles, California, see **FIGURE 1 - VICINITY MAP**. The current street addresses for the property are 518 and 526 South Westmoreland Avenue and 515, 517, 525, and 531 South Virgil Avenue. According to the Los Angeles County Tax Assessor's office, the Number (APN) for the subject property is 5077-004-030.

3.2 DESCRIPTION OF PROPERTY / PROPOSED PROJECT

The subject property consists of one (1) rectangular-shaped parcel of land that encompasses approximately 42,160 square feet. The property is currently developed with one (1) three-story structure situated along South Virgil Avenue. The structure was constructed in 1965 and is currently occupied by California Association of Realtors. The remainder of the property consists of an asphalt paved parking lot accessed from South Westmoreland Avenue. It is proposed to redevelop the property with a new mixed-use structure with subterranean parking levels.

3.3 GEOLOGY AND HYDROGEOLOGY

The subject property is located approximately 3 miles south of the Santa Monica Mountains and 3.5 miles southwest of the Elysian Hills within the La Brea Plain of the Los Angeles Basin. The La Brea Plain is bounded by the Newport-Inglewood belt of hills to the west and the Elysian Hills to the east. The La Brea Plain consists of alluvial sediments from the Santa Monica Mountains and Elysian Hills.

The site is located within the Central Subbasin of the Coastal Plain of Los Angeles Groundwater Basin. The Central Groundwater Basin is bounded on the north by the La Brea high, on the northeast and east by the Elysian, Repetto, Merced and Puente Hills, on the southeast roughly by Coyote Creek, and on the west by the Newport-Inglewood Fault and the Baldwin, Rosecrans, and Dominguez Hills. Regional groundwater level data obtained from the RWQCB GeoTracker database suggest the depth to first groundwater in the vicinity of the subject property ranges from 10 to 30 feet below ground surface (bgs). A southerly groundwater flow direction was determined from the regional groundwater elevation data.

4.0 BACKGROUND INFORMATION

4.1 PREVIOUS WORK

Certified Asbestos Management Consultants (CAMC) prepared an asbestos inspection report for the subject property dated January 20, 1989. The primary purpose of the inspection was to determine whether asbestos containing materials (ACM) were present in the first floor area, which was to be remodeled. The inspection was carried out on September 9, 1988. CAMC also conducted a limited ACM survey of the rest of the structure. ACM was found in piping insulation, acoustical ceiling, and fireproofing material. Roofing and flooring materials were not sampled. CAMC recommended consultant oversight during ACM removal activities prior to the remodel.

Certified Asbestos Management Consultants prepared an asbestos inspection report of floor tiles for the subject property dated January 20, 1989. Twenty (20) samples of floor tile, mastic, and other suspected ACM were taken on January 6, 1988 from the first floor. ACM was found in floor tile, mastic, and insulation from a fire door.

On January 26, 1989, California Association of Realtors, the building tenant, issued a memorandum indicating ACM was removed from the first floor including floor tiles, ceiling tiles, and piping. The

memo also indicates that removal of all ACM from the subject building was contemplated. However, no further documentation of ACM inspections or removal was provided to CE for review.

4.2 SITE UTILIZATION HISTORY

4.2.1 Historical City Directories

EDR Company was contacted to research historical city directories for the subject property and adjacent sites. The city directories were reviewed at approximately five year intervals spanning from 1924-2014. A summary of city directories reviewed for the subject property is included in **TABLE I**. The EDR City Directory is attached in **APPENDIX II**.

4.2.2 Historical Aerial Photographs

Historical aerial photographs were reviewed as part of this study. The photographs are part of the aerial photograph collection maintained by the EDR Company. Sixteen (16) photographs were reviewed for the subject property. The photographs are summarized below in **TABLE II**. The aerial photographs are attached in **APPENDIX II** of this report.

TABLE II
Historical Aerial Photographs

Date	Source	Description
1923	FAIR	The subject property appears developed with multiple residential structures. The subject property appears located in an area of dense residential development.
1928	USGS	No significant changes have occurred to the subject property or neighboring properties. Multiple large structures have been developed to the north and south.
1938	USDA	No significant changes have occurred to the subject property or the surrounding area.
1948	USGS	No significant changes have occurred to the subject property or the surrounding area.
1952	USGS	No significant changes have occurred to the subject property. The properties to the south and southwest have been developed with commercial structures that include what appears to be a gas station to the southeast.
1954	USDA	No significant changes have occurred to the subject property or the surrounding area.
1964	USGA	The eastern portion of the subject property has been redeveloped as a parking lot. The subject property's western portion appears to have no significant changes. The neighboring properties to the north have been developed into their current configuration. The neighboring properties to the south appear to have no significant changes.
1970	EDR PBP	The subject property has been developed into its current configuration. No significant changes have occurred to the surrounding area.
1977	EDR PBP	No significant changes have occurred to the subject property or the surrounding area.
1983	EDR PBP	No significant changes have occurred to the subject property. The previous pump station to the south, southeast has been redeveloped into the current structure.
1989	USDA	No significant changes have occurred to the subject property or the surrounding area.
1994	USGS/DOQQ	No significant changes have occurred to the subject property or the surrounding area.
2002	USDA	No significant changes have occurred to the subject property or the surrounding area.
2005	USDA/NAIP	No significant changes have occurred to the subject property or the surrounding area.
2010	USDA/NAIP	No significant changes have occurred to the subject property or the surrounding area.
2012	USDA/NAIP	No significant changes have occurred to the subject property or the surrounding area.

4.2.3 Historical Fire Insurance Maps

The EDR Company was contacted to review historical fire insurance maps for the subject property. Maps covering the subject property for eight (8) time periods between 1907 and 1970 were found. The map descriptions are summarized below in **TABLE III.** Copies of the fire insurance maps are attached in **APPENDIX II** of this report.

TABLE III
Historical Fire Insurance Maps

Date	Description
1907	The subject property is undeveloped. The surrounding area is developed with dwellings.
1921	The subject property is developed with five (5) dwellings, each with an associated detached garage. The neighboring properties to the north and south have been developed with dwellings and flats.
1950	The subject property appears similar to the previous Sanborn map. An apartment has been developed directly to the north. Two gas stations and an auto repair garage can be seen directly to the south of the subject property.
1954	The subject property and surrounding area appear similar to the previous Sanborn Map.
1955	The subject property and surrounding area appear similar to the previous Sanborn Map.
1961	The eastern portion of the subject property has been redeveloped as a parking lot. The western portion of the subject property appears similar to the previous Sanborn Map.
1968	The subject property appears in its current configuration. On the adjacent property to the north, the current office structure has been developed. Directly to the south, the gas station has been reconfigured.
1970	The subject property and surrounding appear similar to the previous Sanborn Map.

4.2.4 Historical Topographic Maps

Historical USGS topographic maps were provided by EDR Company and from online database sources. Maps covering the subject property for fifteen (15) time periods were found. The topographic maps indicate that the subject property was in an area of sparse development from at least 1894 through 1902 and in an area of dense urban development since at least 1920.

4.3 RECORDS REVIEW INFORMATION

4.3.1 Building Information

The City of Los Angeles Department of Building and Safety was contacted for the purpose of researching building permits and Certificates of Occupancies for the property. Building permits for the construction of new residential structures were issued 1911, 1913, and 1948. A permit for the development of a parking lot was issued in 1957 and a permit for construction of the current onsite structure was issued in 1965. Certificates of Occupancies indicate 515 South Virgil Avenue was utilized

as a parking lot in 1958 and 525 South Virgil Avenue was utilized as an office building in 1966. Additional permits reviewed include mechanical, maintenance, electrical and building alteration permits. Copies of the permits are included in **APPENDIX III**.

4.3.2 Underground Storage Tank & Hazardous Materials Research

The City of Los Angeles Fire Department (LAFD) publishes lists of records for active and inactive underground storage tanks (USTs) and hazardous materials inventories within the city of Los Angeles. CE's review of the lists released by the LAFD indicates that no files are maintained for the subject property addresses.

4.3.3 State Regulatory Agency File Review

Inquiry letters were sent to the State of California Department of Toxic Substances Control (DTSC) and the California Regional Water Quality Control Board – Los Angeles Region (RWQCB). A response from the DTSC indicates that no files are maintained for the subject property addresses. The RWQCB has not yet responded to the request for records. The RWQCB response letter will be forwarded once received should a file exist for the property. The agency inquiries and DTSC response letter are included in **APPENDIX IV**. CalEPA DTSC and RWQCB online databases were also reviewed. The subject property is not listed on the databases researched for this report.

4.3.3 LACFD-HHMD and SCAQMD File Review

An online request for records was made with the Los Angeles County Fire Department – Health Hazardous Materials Division (LACFD-HHMD) for any information they may have regarding soil, water or air contamination at the subject property. Responses from the LACFD-HHMD indicate that no files are maintained for the subject property addresses. The agency responses are included in **APPENDIX IV.**

The SCAQMD online FIND database was researched for any active or inactive records related to the subject property. A review of the SCAQMD Facility Information Detail (FIND) database indicates that 525 South Virgil Avenue, occupied by California Association of Realtors, is listed as an active facility.

However, there is no equipment listed or facility details. No violations or notices to comply are noted on the database.

4.4 SITE DRIVE-BY

A drive-by of the area within one-quarter mile of the property was conducted to help identify nearby sites that possibly use, store, or generate hazardous materials. The area surrounding the subject property consists of residential and commercial properties. No service stations are located on the properties adjacent to the subject property. A list of selected environmental risk sites identified within a one-quarter mile radius of the subject property is included in the **STANDARD ENVIRONMENTAL RECORDS SOURCES** section of this report.

5.0 SITE RECONNAISSANCE

The site conditions were observed during a reconnaissance conducted by Ryan Bzoskie of California Environmental on March 28, 2018. California Environmental completed a Field Reconnaissance Checklist during the site reconnaissance. An Environmental Owner Questionnaire was completed by Rick Shumacher of California Association of Realtors, who answered in good faith and to the extent of his knowledge. An Environmental User Questionnaire was completed by Wendy Sov of Thomas Safran and Associates, who answered in good faith and to the extent of her knowledge. The Environmental Field Reconnaissance Checklist and Environmental Owner and User Questionnaires are included in **APPENDIX I**. The features described below are shown on the enclosed **FIGURE 2 - PLOT PLAN**. Photographs of the subject property are attached in the **ILLUSTRATIONS** section of this report.

5.1 DESCRIPTION OF PROPERTY/PROPOSED PROJECT

The subject property consists of one (1) rectangular-shaped parcel of land that encompasses approximately 42,160 square feet. The property is currently developed with one (1) three-story structure situated along South Virgil Avenue. The structure was constructed in 1965 and is currently occupied by California Association of Realtors. The remainder of the property consists of an asphalt paved parking lot accessed from South Westmoreland Avenue. It is proposed to redevelop the property with a new mixed-use structure with subterranean parking levels.

5.2 ADJACENT PROPERTIES

The subject property is bound to the north by a commercial property utilized as medical offices and a multi-family residential property, to the east by South Virgil Avenue with commercial properties beyond, to the south by a Carl's Jr and an asphalt paved lot associated with an auto repair facility, and to the west by South Westmoreland Avenue with multi-family residential properties beyond.

5.3 TOPOGRAPHY AND DRAINAGE

The subject property has a gentle slope towards the south. The topographic elevation of the subject property is approximately 270 feet above mean sea level. Drainage from the site is by sheetflow towards the adjacent city streets and a concrete swale to a surface drain near the southern end of the subject building. No evidence of catch basins, sumps, or standing water was observed on the subject property at the time of the site reconnaissance.

5.4 PAST USES OF THE PROPERTY

No evidence of the past use, treatment, storage, disposal or generation of hazardous substances was observed on the subject property at the time of the site reconnaissance.

5.5 USE OF HAZARDOUS SUBSTANCES

No evidence of significant hazardous substance use was observed on the subject property at the time of the site reconnaissance.

5.6 STORAGE TANKS

No evidence of existing aboveground or underground storage tanks, clarifiers, sumps, or grease interceptors was observed on the subject property at the time of the site reconnaissance.

5.7 CONTAINERS OF HAZARDOUS OR UNIDENTIFIED SUBSTANCES

Standard cleaning supplies were observed in closet space and in a maintenance room. No other evidence of containers of hazardous or unidentified substances was observed on the subject property at the time of the site reconnaissance.

5.8 SOILID WASTE DISPOSAL

Three (3) trash bins were observed near the northern end of the subject building. No evidence of spills or staining was observed on the pavement beneath the bins.

5.9 POLY-CHLORINATED BIPHENYL'S (PCBs)

No evidence of PCB containing transformers or equipment was observed on the subject property at the time of the site reconnaissance. Older (pre-1970s) hydraulic systems such as elevator fluids and dielectric fluids in older transformers may contain PCBs.

5.10 HEATING/COOLING EQUIPMENT

Heating and cooling equipment was observed on the roof of the structure at the time of the site reconnaissance. Gas and electricity are the power sources for the heating and cooling equipment.

5.11 ASBESTOS CONTAINING MATERIALS (ACM)

Sampling of suspect ACM was not included in the scope of work for this study. Certified Asbestos Management Consultants (CAMC) prepared asbestos inspection reports for the subject property dated January 20, 1989 (see **SECTION 4.1 – PREVIOUS WORK** for a summary of the asbestos inspections). On January 26, 1989, California Association of Realtors issued a memorandum indicating ACM was removed from the first floor including floor tiles, ceiling tiles, and piping. The memo also indicates that removal of all ACM from the subject building was contemplated. However, no further documentation of ACM inspections or removal was provided to CE for review. Therefore, it is recommended that an asbestos survey be conducted by a certified asbestos consultant prior to renovation or demolition of the subject building.

5.12 WASTEWATER TREATMENT AND DISPOSAL SYSTEMS

No evidence of wastewater treatment or disposal systems was observed on the subject property at the time of the site reconnaissance.

5.13 RADON

Radon hazard assessment was not included in the scope of this study. However, the EDR research report indicates the levels of radon at zero (0) of sixteen (16) sites located within the 90020 zip code in Los Angeles County exceeded four picoCurie per Liter (4 pCi/L), the Federal Action level.

5.14 LEAD

Sampling of suspect lead in paint was not included in the scope of work for this project. Lead content in paint was significantly reduced in 1977. Due to the date of construction of the subject building in 1965, it is likely that lead based paint was utilized onsite. The paint coating of the structure appeared in good condition at the time of the site reconnaissance. It is recommended that a lead survey be conducted by a certified lead consultant prior to renovation or demolition of the subject building.

5.15 WELLS

No evidence of dry wells, irrigation wells, injection wells, abandoned wells, monitoring wells or other wells was observed on the subject property at the time of the site reconnaissance.

5.16 ODOR

No evidence of strong, pungent or noxious odors was noted on the subject property at the time of the site reconnaissance.

5.17 STRESSED VEGETATION

No evidence of stressed vegetation was observed on the subject property at the time of the site reconnaissance.

5.18 STAINING OR RESIDUE

No evidence of significant staining or residue was observed on the subject property at the time of the site reconnaissance.

5.19 PITS, PONDS, OR LAGOONS

No evidence of pits, ponds, and/or lagoons was observed on the subject property at the time of the site reconnaissance.

5.20 POTABLE WATER SUPPLY

Water is supplied to the subject property by City of Los Angeles Department of Water and Power.

5.21 SEWAGE DISPOSAL SYSTEM

The subject property is connected to the public sewage disposal system.

5.22 OTHER CONDITIONS OF CONCERN

No other conditions of environmental concern regarding potential sources for soil and groundwater contamination were observed on the subject property at the time of the site reconnaissance.

6.0 NEARBY CONTAMINATED SITES

6.1 LANDFILLS

The Major Waste System maps for Los Angeles County, the Solid Waste Information Systems (SWIS), and the Waste Management Unit Database (WMUD) were reviewed to identify landfills and transfer stations located near the property. Map no. 114-197 and the EDR database report indicate that there are no landfills or transfer stations located within a 2,000-foot radius of the subject property. No active hazardous waste landfills are located within Los Angeles County.

6.2 OIL FIELD MAPS/METHANE HAZARD ZONES

The State of California Division of Oil, Gas and Geothermal Resources (DOGGR) online mapping system (DOGGR Well Finder) was researched to determine if oil production occurred on or near the subject property. The DOGGR Well Finder database indicates the subject property is located within the Los Angeles City Oil Field. The database also indicates a buried well formerly operated by Wilson Oil Company is located beneath the subject building. No additional information was available on the Well Finder database. However, based on historical research the old oil well was likely drilled and buried

prior to 1911. The approximate location of the well is shown on the attached **PLOT PLAN**. Numerous wells are located within a 2,000-foot radius of the subject property. CE has requested DOGGR provide well records for the property. Re-abandonment of the onsite well will be required during site re-development.

The property is located within a Methane Hazard Zone as identified on the City of Los Angeles website (ZIMAS – Zone Information and Map Access System). Methane testing and implementation of methane mitigation measures will be required upon redevelopment of the property.

6.3 STANDARD ENVIRONMENTAL RECORD SOURCES

In addition to the above records, agency database lists were reviewed for known or suspected contaminated sites and for sites, which store, generate or use hazardous materials near the subject property. The subject property is not identified on the standard environmental government sources researched in this report.

The nearest listed contaminated site to the subject property is located at 2951 West 6th Street approximately 330 feet to the southeast. This offsite property was formerly occupied by a Unocal service station. In 1989, one (1) 500-gallon waste-oil and three (3) 10,000-gallon gasoline USTs were removed from the site. Following removal of the tanks, ten (10) groundwater monitoring wells were installed and soil samples were collected from four (4) soil borings. Concentrations of TPH as gasoline were found up to 1,012 mg/kg. Follow-up investigations found concentrations of TPH as gasoline up to 3,915 mg/kg. Site remediation consisting of multi-phase extraction and excavation took place between 2002 and 2003. This offsite property received case closed status from the RWQCB on April 11, 2011. Based on the distance from the subject site and a southern groundwater gradient, it is considered unlikely that this offsite release has impacted the subject property.

The number of environmental sites listed on the databases researched for this report located within a one-half mile radius of the subject property are presented in **TABLE IV**.

TABLE IV

Note: A search of public information databases may omit some nearby contaminated sites due to missing or inaccurate information in the public record.

Selected environmental risk sites found to exist within one-quarter mile radius of the property are listed below:

- **Olympic Auto Body Shop** (Historical Auto Repair) – 534 S. Westmoreland Avenue (Adjacent SW) Listed on EDR Hist Auto database. This offsite property has operated as an automotive repair or

automotive body shop since at least 1929. No known releases have occurred at this offsite property. However, based on the close proximity to the subject site and extended use as an automotive repair and/or body shop, this offsite property is considered an environmental concern.

- **Carpenters Pension Trust Building** – 2951 W. 6th Street (330 feet SE)
  Listed on CA SWEEPS UST, CA FID UST, and GeoTracker databases. This offsite property was formerly occupied by a Unocal service station. In 1989, one (1) 500-gallon waste-oil and three (3) 10,000-gallon gasoline USTs were removed from the site. Following removal of the tanks, ten (10) groundwater monitoring wells were installed and soil samples were collected from four (4) soil borings. Concentrations of TPH as gasoline were found up to 1,012 mg/kg. Follow-up investigations found concentrations of TPH as gasoline up to 3,915 mg/kg. Site remediation consisting of multi-phase extraction and excavation took place between 2002 and 2003. This offsite property received case closed status from the RWQCB on April 11, 2011. Based on the distance from the subject site and a southern groundwater gradient, it is considered unlikely that this offsite release has impacted the subject property.

- **Shatto Investment Company** – 3151 W. 6th Street (630 feet SW)
  Listed on CA SWEEPS UST, CA FID UST, and GeoTracker databases. This offsite property is occupied by an automobile repair shop. In 1989, three (3) USTs of unknown size and contents were removed from the site. There are no records of soil sampling following removal of the USTs. Between 1990 and 1997, subsurface investigations found concentrations of TPH as gasoline, benzene, and MTBE up to 5,400 mg/kg. Dual phase extraction was implemented at this offsite property between December 2001 and May 2002. In April 2006, six (6) ozone sparge wells were installed, which were utilized through April 2007. This offsite property received case closed status from the RWQCB on April 24, 2009. Based on the distance from the subject site and a southern groundwater gradient, it is considered unlikely that this offsite release has impacted the subject property.

6.4 POTENTIAL VAPOR ENCROACHMENT CONDITION (p-VEC)

The State of California has adopted Indoor Air Quality Guidelines (CHHSLs) issued by CALEPA in 2005/2010. Potential sources for vapor intrusion to indoor air include degassing of solvents and other compounds from contaminated soil and contaminated groundwater. The property is located within a Methane Hazard Zone as identified on the City of Los Angeles website (ZIMAS – Zone Information and Map Access System). CE recommends a soil gas screening survey to evaluate methane/VOC concentrations in the subsurface.

7.0 APPARENT PROBLEM

- The property is located within a Methane Hazard Zone as identified by the City of Los Angeles and an old oil well is located beneath the current structure, these constitute a Recognized Environmental Condition (REC). CE recommends a soil gas screening survey to evaluate methane concentrations in the subsurface. The condition of the oil well will dictate future costs for abandonment which could range from $75,000.00-$150,000.00 or more.

- The historical auto repair activities conducted on the adjacent property to the south (534 S. Westmoreland Avenue) is considered an environmental concern. This offsite property has operated as an automotive repair or automotive body shop since at least 1929. No known releases have occurred at this offsite property. However, based on the proximity to the subject site and the extended use as an automotive repair/body shop, CE recommends soil and soil vapor sampling along the property boundary nearest this offsite facility to assess possible impacts to the subject property subsurface.

- The DOGGR Well Finder database indicates a buried oil well, formerly operated by Wilson Oil Company, is located beneath the subject building. No additional information was available on the Well Finder database. However, based on historical research the well was likely drilled and buried prior to 1911. CE recommends a post-demolition geophysical survey and excavation work to locate, expose and determine the condition of the buried well.

- On January 26, 1989, California Association of Realtors issued a memorandum indicating ACM was removed from the first floor including floor tiles, ceiling tiles, and piping. The memo also indicates that removal of all ACM from the subject building was contemplated. However, no further documentation of ACM inspections or removal was provided to CE for review. Therefore, it is recommended that an asbestos survey be conducted by a certified asbestos consultant prior to renovation or demolition of the subject building.

- Due to the date of construction of the subject building in 1965, it is likely that lead based paint was utilized onsite. The paint coating of the structure appeared in good condition at the time of the site reconnaissance. It is recommended that a lead survey be conducted by a certified lead consultant prior to renovation or demolition of the subject building.

8.0 CONCLUSIONS AND RECOMMENDATIONS

California Environmental has prepared an Environmental Site Assessment - Phase I in conformance with the scope and limitations of ASTM 1527-13 for the property located at 518 and 526 South Westmoreland Avenue and 515, 517, 525 and 531 South Virgil Avenue, Los Angeles, California 90020. One data failure was encountered during the preparation of this report. The RWQCB has not responded to the request for records. This data failure does not alter the conclusions or recommendations made in this report. A Preliminary Title Report prepared by Commonwealth Land Title Company dated February 7, 2018 for the subject property was reviewed by CE. No environmental liens or environmental activity use limitations (AULs) were identified in the document.

The property is located within a Methane Hazard Zone as identified by the City of Los Angeles, which constitutes a Recognized Environmental Condition (REC). CE recommends a soil gas screening survey to evaluate methane concentrations in the shallow subsurface. Additionally, the historical auto repair activities conducted on the adjacent property to the south (534 S. Westmoreland Avenue) is considered an environmental concern. CE recommends soil and soil vapor sampling along the property boundary nearest this offsite facility to assess possible impacts to the subject property subsurface. Due to the date of construction of the subject building in 1965, it is recommended that an asbestos and lead survey be conducted by a certified lead consultant prior to renovation or demolition of the subject building. Lastly, the DOGGR Well Finder database indicates a buried oil well, formerly operated by Wilson Oil Company, is located beneath the subject building. CE recommends a post-demolition geophysical survey to locate and determine the condition of the buried well. It is probable the old oil

well will require abandonment to modern DOGGR standards. Construction over the abandoned oil well will require conformance to the current *DOGGR Construction Site Well Review Program*. No evidence of historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs) was identified in connection with the subject property.

This report is subject to the following **NOTICE**:

9.0 OPINION OF ENVIRONMENTAL PROFESSIONAL

All properties are subject to some element of environmental risk and the risk cannot be eliminated. Industrial and commercial properties developed prior to modern environmental laws are especially risk prone to environmental hazards which include, but are not limited to, wastes which may be toxic, ignitable, corrosive or reactive. The potential for these environmental hazards to impact the use of the property can be reduced by the identification and mitigation of the hazards prior to development or redevelopment of the property. Due to the difficulty in locating underground wastes, in some cases it is not always possible to ascertain that hazardous wastes are present on the property prior to development.

A Phase I environmental site assessment does not utilize subsurface exploration to check for the presence of hazardous wastes on the property. The experience of the assessor, along with the research of available reports, aerial photographs and land use records are used to evaluate the potential for hazardous wastes to occur on the site. Based on the information gained from the historical research, subsurface exploration may be recommended to check for the presence of hazardous wastes. Preexisting environmental problems such as the presence of hazardous wastes in the soil or groundwater, can be concealed by grading activities and site improvements. If such wastes are present these wastes cannot be observed.

The undersigned, Charles I. Buckley declares that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312 and I have the specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20.

This report was prepared with the skill and competence as commonly used by environmental professionals in this area. No warranty, expressed or implied, of any kind is made or intended in connection with this report, or by the fact you are being furnished this report, or by any other oral or written statement.

Should you have any questions or desire any additional information, please contact the undersigned.

Introduction

California Environmental (CE) is pleased to present the results of the screening subsurface assessment conducted for the subject property. This assessment was implemented following recommendations made by CE in a Phase I Environmental Site Assessment prepared for the subject property in April 2018. CE's subsurface evaluation included soil gas sampling to assess for volatile organic compounds (VOCs) and soil sampling to assess for VOCs and total petroleum hydrocarbons (TPH).

The subject property consists of one (1) rectangular-shaped parcel of land that encompasses approximately 42,160 square feet. The property is currently developed with one (1) three-story structure situated along South Virgil Avenue. The structure was constructed in 1965 and is currently occupied by California Association of Realtors. The remainder of the property consists of an asphalt paved parking lot accessed from South Westmoreland Avenue. It is proposed to redevelop the property with a new mixed-use structure with subterranean parking levels.

Soil Gas Assessment

Soil-gas sampling was implemented on-site on August 21, 2018. D. Lewis Locators cleared utility conflicts for all the soil gas sampling locations using total field magnetics and GPR methods. An Underground Service Alert notification was also made. H&P Mobile Geochemistry conducted soil-gas probe placement and sampling under the direction of California Environmental. A direct-push Strataprobe rig and hand drill were utilized for the placement of the soil vapor probes. Eleven (11) soil gas probes were placed at 5 and 15 feet below ground surface in six (6) locations. Location CEB1 was located inside the structure in an area estimated to be the location of a buried oil well. The geophysical survey was not able to locate the buried well as reinforced concrete and electrical equipment produced high levels of interference. The soil gas probe locations are shown on the attached **FIGURE 1 – ASSESSMENT PLAN**. Eleven (11) soil-gas samples were collected from the probe locations including one replicate sample. A sample was not obtained from location CEB3 at 5-feet due to high vacuum levels caused by clayey-sand at the sample depth. Soil-gas samples were obtained and analyzed for volatile organic compounds (USEPA Method 8260B) in general accordance with the DTSC/RWQCB guidelines (CalEPA/DTSC/RWQCB Soil-gas Advisory, 2015) in an onsite state certified H&P mobile laboratory.

The soil-gas probes consisted of a sampling tip attached to inert nylon tubing. Each segment of tubing was pre-measured to ensure the correct depth. The sample point was set within a six-inch sand-sensing zone at the desired depth of each soil vapor point. Dry granular bentonite was placed above and/or below the sand-sensing zone and hydrated in order to seal the sand-sensing zone. The probes were completed to the surface with hydrated bentonite and capped with a gas-tight 2-way valve preventing degassing of the vapor point and interference from the surface. The soil-gas probes were allowed to equilibrate prior to the collection of the soil-gas samples. Three dead space purge volumes (3PV) were evacuated from each probe prior to sampling. 1,1-difluoroethane was utilized as the leak check compound. Vapor probe locations were sampled using the H&P Mobile Geochemistry SOP, which includes protocols for surface seals, purge volume tests, tracer compounds, sample flow rate, duplicate samples, and analytical instrument calibration.

Laboratory analysis of soil-gas found concentrations of TCE in samples CEB2 at 5 feet (0.74 µg/l) and CEB 4 at 15 feet (0.39 µg/l). Using the detected concentrations with the attenuation factor (AF) for a future commercial property (0.0005) results in predictive concentrations below the DTSC SL for TCE (3.0 µg/m^3) in future ambient air for a commercial property. This assumes the first-floor of the development will consists entirely of commercial units. The design of the proposed project has not been finalized, but a subterranean garage level may be included, further reducing the VI potential. The remaining samples were below the method-reporting limits for all other EPA Method 8260

compounds. The soil-gas laboratory report and chain of custody record are attached in **APPENDIX II**. The soil gas data is tabulated on **TABLE I**, **APPENDIX I**.

Soil Sampling

Soil sampling was conducted onsite on August 21, 2018 by H&P Mobile Geochemistry under the direction of California Environmental. Ten (10) soil samples were collected from borings CEB2, CEB3, CEB4, CEB5, and CEB6. The soil samples were obtained from depths of 5 and 15 feet below ground surface. The samples were retained in acetate sleeves, capped, labeled, placed on ice, and transferred to an offsite state certified laboratory for analysis. The samples were analyzed for VOCs (USEPA Method 8260B) and TPH (USEPA Method 8015M). VOCs or TPH were below the reporting limit for each respective compound. Logs of the borings are attached as **Plates 1-5**. The soil sample locations are depicted on **FIGURE 1 – ASSESSMENT PLAN**. The soil data is tabulated on **TABLE II**, **APPENDIX I**. The soil laboratory report and chain of custody record are attached in **APPENDIX II**.

Conclusions

Soil gas and soil sampling conducted at the subject site on August 21, 2018 by CE revealed no evidence of a significant release of TPH or VOCs. The low concentrations of TCE detected in soil gas were analyzed using the attenuation factor (AF) for a future commercial property (0.0005), which indicated a future vapor intrusion (VI) hazard is not present for the proposed mixed-use redevelopment at the site. The design of the proposed project has not been finalized, but a subterranean garage level may be included, further reducing the VI potential. The low concentrations of TCE detected in soil gas are considered *de minimus*, not requiring a remedial response or agency notification. A geophysical survey, to locate the buried oil well, and methane sampling (LADBS standards) will need to be conducted following demolition of the current onsite structure.

Staff Geologist

EXPLANATION

- Soil and soil gas location (5 & 15 feet bgs)
- Soil gas location (5 feet bgs)

Scale

0 50 100 ft.

1 inch = 100 feet

N W E S

Re : 525 S.Virgil Ave. / 3511

A243919 / 8H21031

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 08/21/18 13:12 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Allen Aminian

QA/QC Manager

H&P Mobile Geochemistry Inc.

31 August 2018

Mr. Greg Buensuceso
California Environmental
30423 Canwood Street, Suite 208
Agoura Hills, CA 91301

H&P Project: CE082218-11
Client Project: 3511 / 525 S. Virgil Ave

Dear Mr. Greg Buensuceso:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 21-Aug-18 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Janis La Roux
Laboratory Director

H&P Mobile Geochemistry, Inc. is certified under the California ELAP and the National Environmental Laboratory Accreditation Conference (NELAC). H&P is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP Program and ISO/IEC 17025:2005 programs, accreditation number 69070 for EPA Method TO-15, H&P Method TO-15, EPA Method 8260B and H&P 8260SV.

Notes and Definitions

LCC	Leak Check Compound
ND	Analyte NOT DETECTED at or above the reporting limit
MDL	Method Detection Limit
%REC	Percent Recovery
RPD	Relative Percent Difference

All soil results are reported in wet weight.

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP Program and ISO/IEC 17025:2005 programs through PJLA, accreditation number 69070 for EPA Method TO-15, H&P Method TO-15, EPA Method 8260B and H&P 8260SV.

H&P is approved by the State of Arizona as an Environmental Testing Laboratory and Mobile Laboratory, certification numbers AZM758 and AZ0779.

H&P is approved by the State of California as an Environmental Laboratory and Mobile Laboratory in conformance with the Environmental Laboratory Accreditation Program (ELAP) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste, certification numbers 2740, 2741, 2743, 2744, 2745, 2754 & 2930.

H&P is approved by the State of Florida Department of Health under the National Environmental Laboratory Accreditation Conference (NELAC) certification number E871100.

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpmg.com/about/certifications.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Citadel EHS were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

Building Engineer		
Other		

TITLE & JUDICIAL RECORDS

Per ASTM E 1527-13 Section 6.2, the User is required to provide and/or report to the environmental professional any title and/or judicial records so identified for the subject property.

Please provide any information on title and/or judicial records:

ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

Per ASTM E 1527-13 the User is required to provide and/or report to the environmental professional any environmental liens or AULs so identified for the subject property. The environmental professional per the ASTM practice is not responsible to undertake a review of information to identify environmental liens or AULs.

Please provide any information on environmental liens or activity and use limitations (AULs):

SPECIALIZED OR ACTUAL KNOWLEDGE OF USER

Per the ASTM standard, it is the User's responsibility to communicate to the environmental professional any information that is material to recognized environmental conditions in connection with the subject property based on such specialized knowledge, actual knowledge, experience, or commonly known and reasonably ascertainable information within the local community.

Please provide any information of the following items:

ASTM Scope Item	Property Contact Aware of them (Y/N)	Comment
USTs		
ASTs		
PCB Electrical Equipment		
Hydraulic Equipment		
Chemicals, Hazardous Materials, and Raw Materials Storage and Usage		
Waste Generation, Storage and Disposal		
Wells, Sumps, Pits, and Floor Drains		
Stormwater Runoff and Surface Water		
Lagoons, Septic Systems, Wastewater Treatment, and Separators		
Stressed Vegetation, Staining and Odors		
Surficial Disturbances		
On-Property Dry Cleaners		

NON-ASTM Scope Item	Property Contact Aware of them (Y/N)	Comment
Asbestos Containing Materials		
Radon		
Lead-Based Paint		
Lead in Drinking Water		
Potable Well		
Potential Wetlands		
Air Emissions		
Mold/Water Intrusion		

Please refer to "Helpful Documents" section below to provide any relevant reports associated with the above items.

VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

(For Property Owner) Per the ASTM standard, in a transaction involving the purchase of a parcel of commercial real estate, the user shall consider the relationship of the purchase price of the property to the fair market value of the property if the property was not affected by hazardous substances or petroleum products. The User should try to identify an explanation for a significantly lower price which does not reasonably reflect fair market value if the property was not contaminated, and make a written record of such explanation. The ASTM standard does not require that a real estate appraisal be obtained in order to ascertain fair market value of the property.

PROCEEDINGS INVOLVING THE PROPERTY

Per the ASTM standard, prior to the site visit, the User (if different from the property owner), Key site manager (if any is identified), and property owner shall be asked whether they know of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

- **Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, or from the property? Y / N**
  If yes, please explain:

- **Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? Y / N**
  If yes, please explain:

HELPFUL DOCUMENTS

Per the ASTM Standard, Prior to the property visit, the Property owner, key site manager (if any is identified), and User (if different from the property owner) shall be asked if they know whether any of the documents below exist and if so, whether copies can and will be provided within reasonable time and cost constraints:

	User		Key Site Manager		Property Owner

EDR Environmental Lien and AUL Search 1980

The EDR Environmental Lien and AUL Search 1980 report provides results from a search of available land title records for environmental cleanup liens and other activity and use limitations (AULs), such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel number and/or legal description
- search for ownership information filed between 1980 and the most current publicly available date
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.
- search for publicly available environmental encumbering instrument(s) filed between 1980 and present
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Property Archives, LLC researched and compiled the land title information contained in this EDR Environmental Lien and AUL Search 1980 report on behalf of EDR.

QUITCLAIM DEED

The Undersigned Grantor Declares:

DOCUMENTARY TRANSFER TAX $0; CITY TRANSFER TAX $0

- ☐ Computed on full value of property conveyed, or
- ☐ Computed on full value less liens and encumbrances remaining at time of sale.

THE GRANTOR AND THE GRANTEE IN THIS CONVEYANCE ARE COMPRISED OF THE SAME PARTIES WHO CONTINUE TO HOLD THE SAME PROPORTIONATE INTEREST IN THE PROPERTY. (REVENUE AND TAXATION CODE SECTION 11925(d))

FOR VALUABLE CONSIDERATION, receipt of which is hereby acknowledged, the undersigned, **CALIFORNIA ASSOCIATION OF REALTORS, INC.**, a California non-profit mutual benefit corporation ("Grantor"), hereby remises, releases, and forever quitclaims to **REAL ESTATE BUSINESS TECHNOLOGIES, INC.**, a California corporation ("Grantee"), as to an undivided thirty percent (30%) interest, as a tenant-in-common, any and all right, title, and interest that Grantor has or might have in that certain real property in the County of Los Angeles, State of California described in Exhibit A attached hereto and incorporated herein, together with all buildings and improvements located thereon and any and all improvements, easements, privileges and rights appurtenant thereto (collectively, the "Property").

THE PROPERTY IS CONVEYED TO GRANTEE WITHOUT ANY COVENANTS OR WARRANTIES, EXPRESS OR IMPLIED, AND SPECIFICALLY EXCLUDES THOSE IMPLIED COVENANTS DESCRIBED IN CALIFORNIA CIVIL CODE SECTION 1113.

MAIL TAX STATEMENTS AS SET FORTH ABOVE

Dated: August 8, 2024

GRANTOR:

CALIFORNIA ASSOCIATION OF REALTORS, INC.,
a California non-profit mutual benefit corporation

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there are 31 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 4 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 26 CA UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 14 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that

there are 41 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 21 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are

EXECUTIVE SUMMARY

88 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR

researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
KAYS CLEANERS	3033 W 6TH ST STE 10	SW 0 - 1/8 (0.022 mi.)	A8	29

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "best available" air pollution technologies that have been required to reduce the emission of air pollutions from stationary sources. RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation:
- Eval General Type: Compliance Evaluation Inspection
- Eval Date: 03-14-2024
- Violations Found: No
- Eval Type: Routine done by local agency
- Eval Notes: Consent to enter, inspect and take photographs was given by: VINCE PROVENCIO The Business Activities, Owner/Operator Identification, Hazardous Materials Inventory, Site Map, Emergency Response/Contingency Plan and Employee Training Plan sections were reviewed in CERS and field verified. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation. NOTE: The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA **** Annual submission of a Hazardous Materials Business Plan into California Environmental Reporting System (CERS) is required between January 1 and March 1 of every year. Per L.A.M.C. 57.121.3.5, failure to submit the required hazardous material business plan (HMBP) information annually into CERS [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
