Instructions: Complete this form for each month during the Stormwater Wet Weather Season months of October through May. This form is used to document no discharge during the month or any discharge that occurs during the first hour of the first stormwater discharge of that month. This form is also used to record any rain events throughout the month. Keep all completed forms in your plant files.

Plant: Carroll Canyon

Plant Discharge Location: Access Road #2 (Below office building #7)

Month and Year: NOV. 2010

Inspector(s): Jud Harvey

Inspector(s) Job Title: Site Manager

Fill out this section during the month:

DATE	AMOUNT OF RAIN	DISCHARGE? Yes or No	COMMENTS
11/8/10	TRACE	NO	
11/20/10	.62	YES	RAIN STARTED AT 7:45 PM Sat NIGHT, NO ONE ON SITE
11/22/10	.25	NO	

Was there any discharge of stormwater to a storm drain, creek or other drainage during the month, during operating hours?

[X] No [ ] Yes

- If you answered *"No,"* sign and date the bottom of the form. This form is now completed.
- If you answered *"Yes,"* fill out the below data before signing and dating the form.

Observation Summary of ***First*** Discharge of Month, During Operating Hours:

Date of Discharge Observation	Time of Discharge Observation	Time Discharge Began (est)

Characteristics of Discharge:

Discharge turbid or colored?	[ ] No	[ ] Yes
Discharge have sheen?	[ ] No	[ ] Yes
Discharge leave staining?	[ ] No	[ ] Yes
Discharge have odor?	[ ] No	[ ] Yes
Discharge have debris?	[ ] No	[ ] Yes

Source of any pollutants in discharge:

BMP's in place?	[ ] No	[X] Yes
New BMP's needed to reduce pollutants in discharge?	[X] No	[ ] Yes

If "Yes," describe new BMP's:

Wet Weather Season Monthly Stormwater Visual Observation Form 4

Instructions: Complete this form for each month during the Stormwater Wet Weather Season months of October through May. This form is used to document no discharge during the month or any discharge that occurs during the first hour of the first stormwater discharge of that month. This form is also used to record any rain events throughout the month. Keep all completed forms in your plant files.

Plant: Carroll Canyon
Access Road #2
Plant Discharge Location: (Below office building #7)

Month and Year: April 2011

Inspector(s): Jud Harvey

Inspector(s) Job Title: Site Manager

Fill out this section during the month:

DATE	AMOUNT OF RAIN	DISCHARGE? Yes or No	COMMENTS
	N/A		

Was there any discharge of stormwater to a storm drain, creek or other drainage during the month, during operating hours?

☒ No ☐ Yes

- If you answered *"No,"* sign and date the bottom of the form. This form is now completed.
- If you answered *"Yes,"* fill out the below data before signing and dating the form.

Observation Summary of ***First*** Discharge of Month, During Operating Hours:

Date of Discharge Observation	Time of Discharge Observation	Time Discharge Began (est)

Characteristics of Discharge:

Discharge turbid or colored?	☐ No	☐ Yes
Discharge have sheen?	☐ No	☐ Yes
Discharge leave staining?	☐ No	☐ Yes
Discharge have odor?	☐ No	☐ Yes
Discharge have debris?	☐ No	☐ Yes

Source of any pollutants in discharge: _____

BMP's in place?	☐ No	☐ Yes
New BMP's needed to reduce pollutants in discharge?	☐ No	☐ Yes

If "Yes," describe new BMP's: _____

STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD
2010-2011 ANNUAL REPORT
FOR STORM WATER DISCHARGES ASSOCIATED
WITH INDUSTRIAL ACTIVITIES

SAN DIEGO REGIONAL
WATER QUALITY
CONTROL BOARD
2011 JUN 29 P 2:53

Reporting Period July 1, 2010 through June 30, 2011

An Annual Report is required to be submitted to your local Regional Water Quality Control Board (Regional Board) by July 1 of each year. This document must be certified and signed, under penalty of perjury, by the appropriate official of your company. Many of the Annual Report questions require an explanation. Please provide explanations on a separate sheet as an attachment. **Retain a copy of the completed Annual Report for your records.**

Please circle or highlight any information contained in Items A, B, and C below that is new or revised so we can update our records. Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers, and e-mail addresses of the Regional Board contacts, as well as the Regional Board Offices addresses are indicated below.

REGIONAL BOARD INFORMATION:

San Diego Region
9174 Sky Park Court, Suite 100
San Diego, CA 92123

2010-2011
ANNUAL REPORT

SPECIFIC INFORMATION

MONITORING AND REPORTING PROGRAM

D. SAMPLING AND ANALYSIS EXEMPTIONS AND REDUCTIONS

1. For the reporting period, was your facility exempt from collecting and analyzing samples from two storm events in accordance with sections B.12 or 15 of the General Permit?

   [X] **YES** Go to Item D.2 [ ] **NO** Go to Section E

2. Indicate the reason your facility is exempt from collecting and analyzing samples from **two** storm events. Attach a copy of the first page of the appropriate certification if you check boxes ii, iii, iv, or v.

   i. [X] Participating in an Approved Group Monitoring Plan **Group Name:** Building Materials Industry (BMI)

   ii. [ ] Submitted **No Exposure Certification (NEC)** Date Submitted: _____

   Re-evaluation Date: _____

   Does facility continue to satisfy NEC conditions? [ ] YES [ ] NO

   iii. [ ] Submitted **Sampling Reduction Certification (SRC)** Date Submitted: _____

   Re-evaluation Date: _____

   Does facility continue to satisfy SRC conditions? [ ] YES [ ] NO

   iv. [ ] Received Regional Board Certification Certification Date: _____

   v. [ ] Received Local Agency Certification Cetification Date: _____

3. If you checked boxes i or iii above, were you scheduled to sample **one** storm event during the reporting year?

   [ ] **YES** Go to Section E [X] **NO** Go to Section F

4. If you checked boxes ii, iv, or v, go to Section F.

E. SAMPLING AND ANALYSIS RESULTS

1. How many storm events did you sample? ____ If less than 2, **attach explanation** (if you checked item D.2.i or iii. above, only attach explanation if you answer "0").

2. Did you collect storm water samples from the first storm of the wet season that produced a discharge during scheduled facility operating hours? (Section B.5 of the General Permit)

   [ ] **YES** [ ] **NO, attach explanation** **(Please note that if you do not sample the first storm event, you are still required to sample 2 storm events)**

3. How many storm water discharge locations are at your facility? _____

4. For each storm event sampled, did you collect and analyze a sample from each of the facilitys' storm water discharge locations? ☐ YES, go to Item E.6 ☐ NO

5. Was sample collection or analysis reduced in accordance with Section B.7.d of the General Permit? ☐ YES ☐ NO, attach explanation

   If "YES", **attach documentation** supporting your determination that two or more drainage areas are substantially identical.

   Date facility's drainage areas were last evaluated _____

6. Were all samples collected during the first hour of discharge? ☐ YES ☐ NO, **attach explanation**

7. Was all storm water sampling preceded by three (3) working days without a storm water discharge? ☐ YES ☐ NO, **attach explanation**

8. Were there any discharges of stormwater that had been temporarily stored or contained? (such as from a pond) ☐ YES ☐ NO, go to Item E.10

9. Did you collect and analyze samples of temporarily stored or contained storm water discharges from two storm events? (or one storm event if you checked item D.2.i or iii. above) ☐ YES ☐ NO, **attach explanation**

10. Section B.5. of the General Permit requires you to analyze storm water samples for pH, Total Suspended Solids (TSS), Specific Conductance (SC), Total Organic Carbon (TOC) or Oil and Grease (O&G), other pollutants likely to be present in storm water discharges in significant quantities, and analytical parameters listed in Table D of the General Permit.

    a. Does Table D contain any additional parameters related to your facility's SIC code(s)? ☐ YES ☐ NO, Go to Item E.11

    b. Did you analyze all storm water samples for the applicable parameters listed in Table D? ☐ YES ☐ NO

    c. If you did not analyze all storm water samples for the applicable Table D parameters, check one of the following reasons:

    _____ In prior sampling years, the parameter(s) have not been detected in significant quantities from two consecutive sampling events. **Attach explanation**

    _____ The parameter(s) is not likely to be present in storm water discharges and authorized non-storm water discharges in significant quantities based upon the facility operator's evaluation. **Attach explanation**

    _____ Other. **Attach explanation**

11. For each storm event sampled, attach a copy of the laboratory analytical reports and report the sampling and analysis results using **Form 1** or its equivalent. The following must be provided for each sample collected:

- Date and time of sample collection
- Name and title of sampler.
- Parameters tested.
- Name of analytical testing laboratory.
- Discharge location identification.
- Testing results.
- Test methods used.
- Test detection limits.
- Date of testing.
- Copies of the laboratory analytical results.

F. QUARTERLY VISUAL OBSERVATIONS

1. **Authorized Non-Storm Water Discharges**
Section B.3.b of the General Permit requires quarterly visual observations of all authorized non-storm water discharges and their sources.

a. Do authorized non-storm water discharges occur at your facility?

☐ YES ☒ NO Go to Item F.2

b. Indicate whether you visually observed all authorized non-storm water discharges and their sources during the quarters when they were discharged. **Attach an explanation for any "NO" answers**. Indicate "N/A" for quarters without any authorized non-storm water discharges.

July -September	☒ YES	☐ NO	☐ N/A	October-December	☒ YES	☐ NO	☐ N/A
January-March	☒ YES	☐ NO	☐ N/A	April-June	☒ YES	☐ NO	☐ N/A

c. Use **Form 2** to report quarterly visual observations of authorized non-storm water discharges or provide the following information.

i. name of each authorized non-storm water discharge
ii. date and time of observation
iii. source and location of each authorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** new or revised BMPs necessary to reduce or prevent pollutants in authorized non-storm water discharges. Provide new or revised BMP implementation date.

2. **Unauthorized Non-Storm Water Discharges**
Section B.3.a of the General Permit requires quarterly visual observations of all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources.

a. Indicate whether you visually observed all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources. **Attach an explanation for any "NO" answers.**

July -September	☒ YES	☐ NO	October-December	☒ YES	☐ NO
January-March	☒ YES	☐ NO	April-June	☒ YES	☐ NO

b. Based upon the quarterly visual observations, were any unauthorized non-storm water discharges detected?

☐ YES ☒ NO Go to item F.2.d

c. Have each of the unauthorized non-storm water discharges been eliminated or permitted?

☐ YES ☐ NO **Attach explanation**

d. Use **Form 3** to report quarterly unauthorized non-storm water discharge visual observations or provide the following information.

i. name of each unauthorized non-storm water discharge.
ii. date and time of observation.
iii. source and location of each unauthorized non-storm water discharge.
iv. characteristics of the discharge at its source and impacted drainage area/discharge location.
v. name, title, and signature of observer.
vi. **any** corrective actions necessary to eliminate the source of each unauthorized non-storm water discharge and to clean impacted drainage areas. Provide date unauthorized non-storm water discharge(s) was eliminated or scheduled to be eliminated.

G. MONTHLY WET SEASON VISUAL OBSERVATIONS

Section B.4.a of the General Permit requires you to conduct monthly visual observations of storm water discharges at all storm water discharge locations during the wet season. These observations shall occur during the first hour of discharge or, in the case of temporarily stored or contained storm water, at the time of discharge.

1. Indicate below whether monthly visual observations of storm water discharges occurred at all discharge locations. **Attach an explanation for any "NO" answers**. Include in this explanation whether any eligible storm events occurred during scheduled facility operating hours that did not result in a storm water discharge, and provide the date, time, name and title of the person who observed that there was no storm water discharge.

	YES	NO		YES	NO
October	[X]	[ ]	February	[X]	[ ]
November	[X]	[ ]	March	[X]	[ ]
December	[X]	[ ]	April	[X]	[ ]
January	[X]	[ ]	May	[X]	[ ]

2. Report monthly wet season visual observations using **Form 4** or provide the following information.

   a. date, time, and location of observation
   b. name and title of observer
   c. characteristics of the discharge (i.e., odor, color, etc.) and source of any pollutants observed.
   d. **any** new or revised BMPs necessary to reduce or prevent pollutants in storm water discharges. Provide new or revised BMP implementation date.

ANNUAL COMPREHENSIVE SITE COMPLIANCE EVALUATION (ACSCE)

H. ACSCE CHECKLIST

Section A.9 of the General Permit requires the facility operator to conduct one ACSCE in each reporting period (July 1-June 30). Evaluations must be conducted within 8-16 months of each other. The SWPPP and monitoring program shall be revised and implemented, as necessary, within 90 days of the evaluation. The checklist below includes the minimum steps necessary to complete a ACSCE. Indicate whether you have performed each step below. **Attach an explanation for any "NO" answers.**

1. Have you inspected all potential pollutant sources and industrial activities areas? [X] YES [ ] NO
   The following areas should be inspected:

   - areas where spills and leaks have occured during the last year.
   - outdoor wash and rinse areas.
   - process/manufacturing areas.
   - loading, unloading, and transfer areas.
   - waste storage/disposal areas.
   - dust/particulate generating areas.
   - erosion areas.
   - building repair, remodeling, and construction
   - material storage areas
   - vehicle/equipment storage areas
   - truck parking and access areas
   - rooftop equipment areas
   - vehicle fueling/maintenance areas
   - non-storm water discharge generating areas

2. Have you reviewed your SWPPP to assure that its BMPs address existing potential pollutant sources and industrial activities areas? [X] YES [ ] NO

3. Have you inspected the entire facility to verify that the SWPPP's site map, is up-to-date? The following site map items should be verified: [X] YES [ ] NO

   - facility boundaries
   - outline of all storm water drainage areas
   - areas impacted by run-on
   - storm water discharges locations
   - storm water collection and conveyance system
   - structural control measures such as catch basins, berms, containment areas, oil/water separators, etc.

4. Have you reviewed all General Permit compliance records generated since the last annual evaluation? [X] YES [ ] NO

The following records should be reviewed:

- quarterly authorized non-storm water discharge visual observations
- monthly storm water discharge visual observation
- records of spills/leaks and associated clean-up/response activities
- quarterly unauthorized non-storm water discharge visual observations
- Sampling and Analysis records
- preventative maintenance inspection and maintenance records

5. Have you reviewed the major elements of the SWPPP to assure compliance with the General Permit? [X] YES [ ] NO

The following SWPPP items should be reviewed:

- pollution prevention team
- list of significant materials
- description of potential pollutant sources
- assessment of potential pollutant sources
- identification and description of the BMPs to be implemented for each potential pollutant source

6. Have you reviewed your SWPPP to assure that a) the BMPs are adequate in reducing or preventing pollutants in storm water discharges and authorized non-storm water discharges, and b) the BMPs are being implemented? [X] YES [ ] NO

The following BMP categories should be reviewed:

- good housekeeping practices
- spill response
- employee training
- erosion control
- quality assurance
- preventative maintenance
- material handling and storage practices
- waste handling/storage
- structural BMPs

7. Has all material handling equipment and equipment needed to implement the SWPPP been inspected? [X] YES [ ] NO

I. ACSCE EVALUATION REPORT

The facility operator is required to provide an evaluation report that includes:

- identification of personnel performing the evaluation
- the date(s) of the evaluation
- necessary SWPPP revisions
- schedule for implementing SWPPP revisions
- any incidents of non-compliance and the corrective actions taken.

Use **Form 5** to report the results of your evaluation or develop an equivalent form.

J. ACSCE CERTIFICATION

The facility operator is required to certify compliance with the Industrial Activities Storm Water General Permit. To certify compliance, both the SWPPP and Monitoring Program must be up to date and be fully implemented.

Based upon your ACSCE, do you certify compliance with the Industrial Activities Storm Water General Permit? [X] YES [ ] NO

If you answered "NO" **attach an explanation** to the ACSCE Evaluation Report why you are not in compliance with the Industrial Activities Storm Water General Permit.

ATTACHMENT SUMMARY

Answer the questions below to help you determine what should be attached to this annual report. Answer NA (Not Applicable) to questions 2-4 if you are not required to provide those attachments.

1. Have you attached Forms 1,2,3,4, and 5 or their equivalent?	☒ YES (Mandatory)		
2. If you conducted sampling and analysis, have you attached the laboratory analytical reports?	☒ YES	☐ NO	☐ NA
3. If you checked box II, III, IV, or V in item D.2 of this Annual Report, have you attached the first page of the appropriate certifications?	☐ YES	☐ NO	☒ NA
4. Have you attached an explanation for each "NO" answer in items E.1, E.2, E.5-E.7, E.9, E.10.c, F.1.b, F.2.a, F.2.c, G.1, H.1-H.7, or J?	☒ YES	☐ NO	☐ NA

ANNUAL REPORT CERTIFICATION

I am duly authorized to sign reports required by the INDUSTRIAL ACTIVITIES STORM WATER GENERAL PERMIT (see Standard Provision C.9) and I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

ANNUAL REPORT

FORM 4-MONTHLY VISUAL OBSERVATIONS OF

SIDE A

STORM WATER DISCHARGES

- Storm water discharge visual observations are required for at least one storm event per month between October 1 and May 31.
- Visual observations must be conducted during the first hour of discharge at all discharge locations.
- Discharges of temporarily stored or contained storm water must be observed at the time of discharge.
- Indicate "None" in the first column of this form if you did not conduct a monthly visual observation.
- Make additional copies of this form as necessary.
- Until a monthly visual observation is made, record any eligible storm events that do not result in a storm water discharge and note the date, time, name, and title of who observed there was no storm water discharge.

SAN DIEGO REGIONAL
WATER QUALITY
CONTROL BOARD
2014 JUN 30 PM 12 00

State of California
STATE WATER RESOURCES CONTROL BOARD

2013-2014

ANNUAL REPORT

FOR
STORM WATER DISCHARGES ASSOCIATED
WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2013 through June 30, 2014

An annual report is required to be submitted to your local Regional Water Quality Control Board (Regional Board) by July 1 of each year. This document must be certified and signed, under penalty of perjury, by the appropriate official of your company. Many of the Annual Report questions require an explanation. Please provide explanations on a separate sheet as an attachment. **Retain a copy of the completed Annual Report for your records.**

Please circle or highlight any information contained in Items A, B, and C below that is new or revised so we can update our records. Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers and e-mail addresses of the Regional Board contacts, as well as the Regional Board office addresses can be found at http://www.waterboards.ca.gov/stormwtr/contact.html. To find your Regional Board information, match the first digit of your WDID number with the corresponding number that appears in parenthesis on the first line of each Regional Board office.

GENERAL INFORMATION:

A. Facility Information:

Facility WDID No: 937I014663

Facility Business Name: Hanson Aggregates Pacific Southwest, Inc. Contact Person: Ron Thompson
Physical Address: 9255 Camino Santa Fe e-mail Ron.Thompson@hanson.com
City: San Diego **CA** Zip: 92121 . Phone: (760) 802-5365
Standard Industrial Classification (SIC) Code(s): 1442, 3273, 2875, 7699

B. Facility Operator Information:

Operator Name: Hanson Aggregates Pacific Southwest, Inc Contact Person: Steve Zacks
Mailing Address. P.O. Box 639069 e-mail: steve.zacks@hanson.com
City: San Diego State: CA Zip: 92163 Phone. 805 748-0128

C. Facility Billing Information:

Operator Name: Hanson Aggregates Pacific Southwest , Inc Contact Person Steve Zacks
Mailing Address: P.O Box 639069 e-mail. steve zacks@hanson.com
City: San Diego State: CA Zip: 92163 Phone: 805 748-0128

2013-2014
ANNUAL REPORT

SPECIFIC INFORMATION

MONITORING AND REPORTING PROGRAM

D. SAMPLING AND ANALYSIS EXEMPTIONS AND REDUCTIONS

1 For the reporting period, was your facility exempt from collecting and analyzing samples from **two** storm events in accordance with sections B 12 or 15 of the General Permit?

☒ **YES** Go to Item D 2 ☐ **NO** Go to Section E

2. Indicate the reason your facility is exempt from collecting and analyzing samples from **two** storm events Attach a copy of the first page of the appropriate certification if you check boxes ii, iii, iv, or v

i ☒ Participating in an Approved Group Monitoring Plan **Group Name:** _: Building Materials Industry

ii ☐ Submitted **No Exposure Certification (NEC)** Date Submitted: ___/___/___

Re-evaluation Date: ___/___/___

Does facility continue to satisfy NEC conditions? ☐ YES ☐ NO

iii ☐ Submitted **Sampling Reduction Certification (SRC)** Date Submitted: ___/___/___

Re-evaluation Date: ___/___/___

Does facility continue to satisfy SRC conditions? ☐ YES ☐ NO

iv ☐ Received Regional Board Certification Certification Date: ___/___/___

v. ☐ Received Local Agency Certification Certification Date: ___/___/___

3. If you checked boxes i or iii above, were you scheduled to sample **one** storm event during the reporting year?

☐ **YES** Go to Section E ☒ **NO** Go to Section F

4. If you checked boxes ii, iv, or v, go to Section F.

E. SAMPLING AND ANALYSIS RESULTS

1. How many storm events did you sample? _____ If less than 2, **attach explanation** (if you checked item D.2.i or iii above, only attach explanation if you answer "0").

2 Did you collect storm water samples from the first storm of the wet season that produced a discharge during scheduled facility operating hours? (Section B 5 of the General Permit)

☐ **YES** ☐ **NO** **attach explanation** (Please note that if you do not sample the first storm event, you are still required to sample 2 storm events)

3. How many storm water discharge locations are at your facility? _____

2013-2014
ANNUAL REPORT

4. For each storm event sampled, did you collect and analyze a sample from each of the facility's' storm water discharge locations? ☐ YES, go to Item E.6 ☐ NO

5. Was sample collection or analysis reduced in accordance with Section B.7.d of the General Permit? ☐ YES ☐ NO, **attach explanation**

   If "YES", **attach documentation** supporting your determination that two or more drainage areas are substantially identical.

   Date facility's drainage areas were last evaluated ___/___/____

6. Were all samples collected during the first hour of discharge? ☐ YES ☐ NO, **attach explanation**

7. Was all storm water sampling preceded by three (3) working days without a storm water discharge? ☐ YES ☐ NO, **attach explanation**

8. Were there any discharges of storm water that had been temporarily stored or contained? (such as from a pond) ☐ YES ☐ NO, go to Item E 10

9. Did you collect and analyze samples of temporarily stored or contained storm water discharges from two storm events? (or one storm event if you checked item D.2.i or iii. above) ☐ YES ☐ NO, **attach explanation**

10. Section B.5. of the General Permit requires you to analyze storm water samples for pH, Total Suspended Solids (TSS), Specific Conductance (SC), Total Organic Carbon (TOC) or Oil and Grease (O&G), other pollutants likely to be present in storm water discharges in significant quantities, and analytical parameters listed in Table D of the General Permit.

    a. Does Table D contain any additional parameters related to your facility's SIC code(s)? ☐ YES ☐ NO, Go to Item E.11

    b. Did you analyze all storm water samples for the applicable parameters listed in Table D? ☐ YES ☐ NO

    c. If you did not analyze all storm water samples for the applicable Table D parameters, check one of the following reasons:

    _____ In prior sampling years, the parameter(s) have not been detected in significant quantities from two consecutive sampling events. **Attach explanation**

    _____ The parameter(s) is not likely to be present in storm water discharges and authorized non-storm water discharges in significant quantities based upon the facility operator's evaluation. **Attach explanation**

    _____ Other. **Attach explanation**

11. For each storm event sampled, attach a copy of the laboratory analytical reports and report the sampling and analysis results using **Form 1** or its equivalent. The following must be provided for each sample collected:

- Date and time of sample collection
- Name and title of sampler
- Parameters tested
- Name of analytical testing laboratory
- Discharge location identification
- Testing results
- Test methods used
- Test detection limits
- Date of testing
- Copies of the laboratory analytical results

2013-2014
ANNUAL REPORT

F QUARTERLY VISUAL OBSERVATIONS

1 **Authorized Non-Storm Water Discharges**

Section B.3 b of the General Permit requires quarterly visual observations of all authorized non-storm water discharges and their sources.

a. Do authorized non-storm water discharges occur at your facility?

☐ **YES** ☒ **NO** Go to Item F.2

b. Indicate whether you visually observed all authorized non-storm water discharges and their sources during the quarters when they were discharged. **Attach an explanation for any "NO" answers** Indicate "N/A" for quarters without any authorized non-storm water discharges.

July-September	☐ **YES**	☐ **NO**	☐ **N/A**	October-December	☐ **YES**	☐ **NO**	☐ **N/A**
January-March	☐ **YES**	☐ **NO**	☐ **N/A**	April-June	☐ **YES**	☐ **NO**	☐ **N/A**

c Use **Form 2** to report quarterly visual observations of authorized non-storm water discharges or provide the following information:

i. name of each authorized non-storm water discharge
ii date and time of observation
iii. source and location of each authorized non-storm water discharge
iv characteristics of the discharge at its source and impacted drainage area/discharge location
v name, title, and signature of observer
vi. **any** new or revised BMPs necessary to reduce or prevent pollutants in authorized non-storm water discharges Provide new or revised BMP implementation date

2. **Unauthorized Non-Storm Water Discharges**

Section B.3 a of the General Permit requires quarterly visual observations of all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources

a Indicate whether you visually observed all drainage areas to detect the presence of unauthorized non- storm water discharges and their sources. **Attach an explanation for any "NO" answers**

July-September	☒ **YES**	☐ **NO**	October-December	☒ **YES**	☐ **NO**
January-March	☒ **YES**	☐ **NO**	April-June	☒ **YES**	☐ **NO**

b. Based upon the quarterly visual observations, were any unauthorized non-storm water discharges detected?

☐ **YES** ☒ **NO** Go to Item F 2 d

c. Have each of the unauthorized non-storm water discharges been eliminated or permitted?

☐ **YES** ☐ **NO** **Attach explanation**

d. Use **Form 3** to report quarterly unauthorized non-storm water discharge visual observations or provide the following information

i. name of each unauthorized non-storm water discharge
ii. date and time of observation
iii source and location of each unauthorized non-storm water discharge
iv characteristics of the discharge at its source and impacted drainage area/discharge location
v name, title, and signature of observer
vi **any** corrective actions necessary to eliminate the source of each unauthorized non-storm water discharge and to clean impacted drainage areas. Provide date unauthorized non-storm water discharge(s) was eliminated or scheduled to be eliminated.

2013-2014
ANNUAL REPORT

G. MONTHLY WET SEASON VISUAL OBSERVATIONS

Section B 4.a of the General Permit requires you to conduct monthly visual observations of storm water discharges at all storm water discharge locations during the wet season. These observations shall occur during the first hour of discharge or, in the case of temporarily stored or contained storm water, at the time of discharge.

1. Indicate below whether monthly visual observations of storm water discharges occurred at all discharge locations **Attach an explanation for any "NO" answers**. Include in this explanation whether any eligible storm events occurred during scheduled facility operating hours that did not result in a storm water discharge, and provide the date, time, name and title of the person who observed that there was no storm water discharge.

	YES	NO		YES	NO
October	☐	☒	February	☐	☒
November	☐	☒	March	☐	☒
December	☐	☒	April	☐	☒
January	☐	☒	May	☐	☒

2. Report monthly wet season visual observations using **Form 4** or provide the following information:

   a. date, time, and location of observation
   b. name and title of observer
   c. characteristics of the discharge (i.e., odor, color, etc.) and source of any pollutants observed
   d **any** new or revised BMPs necessary to reduce or prevent pollutants in storm water discharges. Provide new or revised BMP implementation date

ANNUAL COMPREHENSIVE SITE COMPLIANCE EVALUATION (ACSCE)

H. ACSCE CHECKLIST

Section A.9 of the General Permit requires the facility operator to conduct one ACSCE in each reporting period (July 1- June 30). Evaluations must be conducted within 8-16 months of each other. The SWPPP and monitoring program shall be revised and implemented, as necessary, within 90 days of the evaluation. The checklist below includes the minimum steps necessary to complete a ACSCE. Indicate whether you have performed each step below. **Attach an explanation for any "NO" answers.**

1. Have you inspected all potential pollutant sources and industrial activities areas? ☒ YES ☐ NO
   The following areas should be inspected:

   - areas where spills and leaks have occurred during the last year
   - outdoor wash and rinse areas
   - process/manufacturing areas
   - loading, unloading, and transfer areas
   - waste storage/disposal areas
   - dust/particulate generating areas
   - erosion areas
   - building repair, remodeling, and construction
   - material storage areas
   - vehicle/equipment storage areas
   - truck parking and access areas
   - rooftop equipment areas
   - vehicle fueling/maintenance areas
   - non-storm water discharge generating areas

2. Have you reviewed your SWPPP to assure that its BMPs address existing potential pollutant sources and industrial activities areas? ☒ YES ☐ NO

3. Have you inspected the entire facility to verify that the SWPPP's site map is up-to-date? The following site map items should be verified: ☒ YES ☐ NO

   - facility boundaries
   - outline of all storm water drainage areas
   - areas impacted by run-on
   - storm water discharges locations
   - storm water collection and conveyance system
   - structural control measures such as catch basins, berms, containment areas, oil/water separators, etc

2013-2014
ANNUAL REPORT

4. Have you reviewed all General Permit compliance records generated since the last annual evaluation? ☒ YES ☐ NO

   The following records should be reviewed.

   - quarterly authorized non-storm water discharge visual observations
   - monthly storm water discharge visual observation
   - records of spills/leaks and associated clean-up/response activities
   - quarterly unauthorized non-storm water discharge visual observations
   - Sampling and Analysis records
   - preventative maintenance inspection and maintenance records

5. Have you reviewed the major elements of the SWPPP to assure compliance with the General Permit? ☒ YES ☐ NO

   The following SWPPP items should be reviewed

   - pollution prevention team
   - list of significant materials
   - description of potential pollutant sources
   - assessment of potential pollutant sources
   - identification and description of the BMPs to be implemented for each potential pollutant source

6 Have you reviewed your SWPPP to assure that a) the BMPs are adequate in reducing or preventing pollutants in storm water discharges and authorized non-storm water discharges, and b) the BMPs are being implemented? ☒ YES ☐ NO

   The following BMP categories should be reviewed.

   - good housekeeping practices
   - spill response
   - employee training
   - erosion control
   - quality assurance
   - preventative maintenance
   - material handling and storage practices
   - waste handling/storage
   - structural BMPs

7. Has all material handling equipment and equipment needed to implement the SWPPP been inspected? ☒ YES ☐ NO

I ACSCE EVALUATION REPORT

The facility operator is required to provide an evaluation report that includes

- identification of personnel performing the evaluation
- the date(s) of the evaluation
- necessary SWPPP revisions
- schedule for implementing SWPPP revisions
- any incidents of non-compliance and the corrective actions taken

Use **Form 5** to report the results of your evaluation or develop an equivalent form.

J ACSCE CERTIFICATION

The facility operator is required to certify compliance with the Industrial Activities Storm Water General Permit. To certify compliance, both the SWPPP and Monitoring Program must be up to date and be fully implemented

Based upon your ACSCE, do you certify compliance with the Industrial Activities Storm Water General Permit? ☒ YES ☐ NO

If you answered "NO" **attach an explanation** to the ACSCE Evaluation Report why you are not in compliance with the Industrial Activities Storm Water General Permit.

2013-2014
ANNUAL REPORT

ATTACHMENT SUMMARY

Answer the questions below to help you determine what should be attached to this annual report. Answer NA (Not Applicable) to questions 2-4 if you are not required to provide those attachments

1.	Have you attached Forms 1,2,3,4, and 5 or their equivalent?	☒ YES (Mandatory)		
2.	If you conducted sampling and analysis, have you attached the laboratory analytical reports?	☐ YES	☐ NO	☒ NA
3.	If you checked box II, III, IV, or V in item D.2 of this Annual Report, have you attached the first page of the appropriate certifications?	☐ YES	☐ NO	☒ NA
4.	Have you attached an explanation for each "NO" answer in items E.1, E 2, E.5-E 7, E.9, E.10.c, F 1.b, F.2.a, F.2.c, G 1, H.1-H 7, or J?	☒ YES	☐ NO	☐ NA

ANNUAL REPORT CERTIFICATION

I am duly authorized to sign reports required by the INDUSTRIAL ACTIVITIES STORM WATER GENERAL PERMIT (see Standard Provision C.9) and I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Printed Name: Ron Thompson

Signature: Thompson, Ron (Lakeside) NA Date: 6/4/14

Title: Plant Manager

2013-2014
ANNUAL REPORT

G-1: There were no industrial stormwater discharges to Waters of the US that met all inspection criteria (e.g. discharge during operating hours) from October 2013 through May 2014. The date, name, and title of the person who observed there were no stormwater discharges during operating hours are shown on the attached Form 4's. The Form 4's contain rain records for the reporting period. The potential for discharge is reduced by several detention ponds.

Annual Comprehensive Site Evaluation

The site and SWPPP review for this evaluation was conducted on 3/26/2014 by the Environmental Manager with the site manager. The SWPPP was subsequently updated to reflect a new BMP- sediment build-up is removed at the secondary plant by end of shift and used for backfill. This reduces the potential for this build-up to be picked up by stormwater.

2013- 2014

ANNUAL REPORT

SIDE A

FORM 1-SAMPLING & ANALYSIS RESULTS

To be provided by BMI

FIRST STORM EVENT

- If analytical results are less than the detection limit (or non detectable), show the value as less than the numerical value of the detection limit (example: <.05)
- If you did not analyze for a required parameter, do not report "0". Instead, leave the appropriate box blank
- When analysis is done using portable analysis (such as portable pH meters, SC meters, etc.), indicate "PA" in the appropriate test method used box.
- Make additional copies of this form as necessary.

NAME OF PERSON COLLECTING SAMPLE(S):_____ **TITLE:** _____ **SIGNATURE:** _____

FORM 1-SAMPLING & ANALYSIS RESULTS

To be provided by BMI

SECOND STORM EVENT

- If analytical results are less than the detection limit (or non detectable), show the value as less than the numerical value of the detection limit (example· < 05)
- If you did not analyze for a required parameter, do not report "0". Instead, leave the appropriate box blank
- When analysis is done using portable analysis (such as portable pH meters, SC meters, etc.), indicate "PA" in the appropriate test method used box.

ANNUAL REPORT

SIDE A

FORM 2-QUARTERLY VISUAL OBSERVATIONS OF AUTHORIZED NON-STORM WATER DISCHARGES (NSWDs)

N/A- No authorized NSWD's

- Quarterly dry weather visual observations are required of each authorized NSWD.
- Observe each authorized NSWD source, impacted drainage area, and discharge location.
- Authorized NSWDs must meet the conditions provided in Section D (pages 5-6), of the General Permit.
- Make additional copies of this form as necessary

QUARTER: **JULY-SEPT.** DATE: __/__/__	**Observers Name:** _____ **Title:** _____ **Signature:** _____	**WERE ANY AUTHORIZED NSWDs DISCHARGED DURING THIS QUARTER?** ☐ **YES** ☐ **NO** If **YES**, complete reverse side of this form.
QUARTER: **OCT.-DEC.** DATE: __/__/__	**Observers Name:** _____ **Title:** _____ **Signature:** _____	**WERE ANY AUTHORIZED NSWDs DISCHARGED DURING THIS QUARTER?** ☐ **YES** ☐ **NO** If **YES**, complete reverse side of this form.
QUARTER: **JAN.-MARCH** DATE: __/__/__	**Observers Name:** _____ **Title:** _____ **Signature:** _____	**WERE ANY AUTHORIZED NSWDs DISCHARGED DURING THIS QUARTER?** ☐ **YES** ☐ **NO** If **YES**, complete reverse side of this form.
QUARTER: **APRIL-JUNE** DATE: __/__/__	**Observers Name:** _____ **Title:** _____ **Signature:** _____	**WERE ANY AUTHORIZED NSWDs DISCHARGED DURING THIS QUARTER?** ☐ **YES** ☐ **NO** If **YES**, complete reverse side of this form.

FORM 3-QUARTERLY VISUAL OBSERVATIONS OF UNAUTHORIZED NON-STORM WATER DISCHARGES (NSWDs)

- Unauthorized NSWDs are discharges (such as wash or rinse waters) that do not meet the conditions provided in Section D (pages 5-6) of the General Permit
- Quarterly visual observations are required to observe current and detect prior unauthorized NSWDs.
- Quarterly visual observations are required during dry weather and at all facility drainage areas.
- Each unauthorized NSWD source, impacted drainage area, and discharge location must be identified and observed.
- Unauthorized NSWDs that can not be eliminated within 90 days of observation must be reported to the Regional Board in accordance with Section A.10.e of the General Permit.
- Make additional copies of this form as necessary.

QUARTER: **JULY-SEPT.** **DATE/TIME OF OBSERVATIONS** ☒ AM ☐ PM 9/13/13 10:00	Observers Name: Ron Thompson Title: Manager Signature:	**WERE UNAUTHORIZED NSWDs OBSERVED?** ☐ YES ☒ NO **WERE THERE INDICATIONS OF PRIOR UNAUTHORIZED NSWDs?** ☐ YES ☒ NO	If **YES** to either question, complete reverse side

Wet Weather Season Monthly Stormwater Visual Observation Form 4

Instructions: Complete this form for each month during the Stormwater Wet Weather Season months of October through May. This form is used to document rain events, discharges that occur during the month, or that there was no discharge during the entire month. Keep all completed forms in your plant files.

Plant: Carroll Canyon
Camino Santa Fe
Plant Discharge Location: Desilt Basin

Month and Year: May 2014

Inspector(s): Ron Thompson

Inspector(s) Job Title: Manager

Fill out this section during the month:

1 DATE	2 AMOUNT OF RAIN	3 DISCHARGE? Yes or No	4 1ST HOUR OF DISCHARGE DURING OPERATING HOURS? Yes, No, or N/A	5 DISCHARGE PRECEDED BY 3 DAYS OF NO DISCHARGE? Yes, No, or N/A	6 COMMENTS

Is yes entered in columns 3, 4, and 5?

☒ No ☐ Yes

- If you answered *"No"*, then do not fill out the below Observations data.
- If you answered "Yes" and this is the first discharge of the month, then fill in the below Observation and BMP data

Observation Summary of ***First*** Discharge of Month, During Operating Hours:

Date of Discharge Observation	Time of Discharge Observation	Time Discharge Began (est)

Characteristics of Discharge:

Discharge turbid or colored?	☐ No	☐ Yes
Discharge have sheen?	☐ No	☐ Yes
Discharge leave staining?	☐ No	☐ Yes
Discharge have odor?	☐ No	☐ Yes
Discharge have debris?	☐ No	☐ Yes

Source of any pollutants in discharge: _____

BMP's in place?	☐ No	☐ Yes
New BMP's needed to reduce pollutants in discharge?	☐ No	☐ Yes

If "Yes," describe new BMP's: _____

Inspector's Signature _____ Date 6/2/14

Date should reflect the last operating day of the month or the first operating day of the following month.

Wet Weather Season Monthly Stormwater Visual Observation Form 4

Instructions: Complete this form for each month during the Stormwater Wet Weather Season months of October through May. This form is used to document rain events, discharges that occur during the month, or that there was no discharge during the entire month. Keep all completed forms in your plant files.

Plant: Carroll Canyon

Plant Discharge Location: Access Road #1 (Low point in road)

Date should reflect the last operating day of the month or the first operating day of the following month.

Wet Weather Season Monthly Stormwater Visual Observation Form 4

Instructions: Complete this form for each month during the Stormwater Wet Weather Season months of October through May. This form is used to document rain events, discharges that occur during the month, or that there was no discharge during the entire month. Keep all completed forms in your plant files.

Plant: Carroll Canyon

Plant Discharge Location: A-1 Soils yard

Month and Year: Nov 2013

Inspector(s): Ron Thompson

Inspector(s) Job Title: Manager

Fill out this section during the month:

1 DATE	2 AMOUNT OF RAIN	3 DISCHARGE? Yes or No	4 1ST HOUR OF DISCHARGE DURING OPERATING HOURS? Yes, No, or N/A	5 DISCHARGE PRECEDED BY 3 DAYS OF NO DISCHARGE? Yes, No, or N/A	6 COMMENTS
11/21/13	.97	No	N/A	N/A	
11/22/13	.49	No	N/A	N/A	

Is yes entered in columns 3, 4, and 5?

☒ **No** ☐ **Yes**

- If you answered *"No"*, then do not fill out the below Observations data.
- If you answered "Yes" and this is the first discharge of the month, then fill in the below Observation and BMP data

Observation Summary of ***First*** Discharge of Month, During Operating Hours:

Date of Discharge Observation	Time of Discharge Observation	Time Discharge Began (est)

Characteristics of Discharge:

Discharge turbid or colored?	☐ No	☐ Yes
Discharge have sheen?	☐ No	☐ Yes
Discharge leave staining?	☐ No	☐ Yes
Discharge have odor?	☐ No	☐ Yes
Discharge have debris?	☐ No	☐ Yes

Source of any pollutants in discharge: _____

BMP's in place?	☐ No	☐ Yes
New BMP's needed to reduce pollutants in discharge?	☐ No	☐ Yes

If "Yes," describe new BMP's: _____

Inspector's Signature 12/2/13 **Date**

Date should reflect the last operating day of the month or the first operating day of the following month.

SAN DIEGO REGIONAL
WATER QUALITY
CONTROL BOARD
2013 JUN 27 PM 2 30

State of California
STATE WATER RESOURCES CONTROL BOARD

2012-2013

ANNUAL REPORT

FOR
STORM WATER DISCHARGES ASSOCIATED
WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2012 through June 30, 2013

An annual report is required to be submitted to your local Regional Water Quality Control Board (Regional Board) by July 1 of each year. This document must be certified and signed, under penalty of perjury, by the appropriate official of your company. Many of the Annual Report questions require an explanation. Please provide explanations on a separate sheet as an attachment. **Retain a copy of the completed Annual Report for your records.**

Please circle or highlight any information contained in Items A, B, and C below that is new or revised so we can update our records. Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers and e-mail addresses of the Regional Board contacts, as well as the Regional Board office addresses can be found at http://www.waterboards.ca.gov/stormwtr/contact.html. To find your Regional Board information, match the first digit of your WDID number with the corresponding number that appears in parenthesis on the first line of each Regional Board office.

GENERAL INFORMATION:

A. Facility Information:

Facility WDID No: 937I014663

Facility Business Name: Hanson Aggregates Pacific Southwest, Inc. Contact Person: Ron Thompson
Physical Address: 9255 Camino Santa Fe e-mail: Ron.Thompson@hanson.com
City: San Diego CA Zip: 92121 : Phone: (760) 802-5365
Standard Industrial Classification (SIC) Code(s): 1442, 3273, 2875, 7699

B. Facility Operator Information:

Operator Name: Hanson Aggregates Pacific Southwest, Inc Contact Person: Steve Zacks
Mailing Address: P.O. Box 639069 e-mail: steve.zacks@hanson.com
City: San Diego State: CA Zip: 92163 Phone: 805 748-0128

C. Facility Billing Information:

Operator Name: Hanson Aggregates Pacific Southwest , Inc Contact Person: Steve Zacks
Mailing Address: P.O. Box 639069 e-mail: steve.zacks@hanson.com
City: San Diego State: CA Zip: 92163 Phone: 805 748-0128

2012-2013
ANNUAL REPORT

SPECIFIC INFORMATION

MONITORING AND REPORTING PROGRAM

D. SAMPLING AND ANALYSIS EXEMPTIONS AND REDUCTIONS

1. For the reporting period, was your facility exempt from collecting and analyzing samples from **two** storm events in accordance with sections B.12 or 15 of the General Permit?

   ☒ **YES** Go to Item D.2 ☐ **NO** Go to Section E

2. Indicate the reason your facility is exempt from collecting and analyzing samples from **two** storm events. Attach a copy of the first page of the appropriate certification if you check boxes ii, iii, iv, or v.

   i. ☒ Participating in an Approved Group Monitoring Plan **Group Name:** Building Materials Industry

   ii. ☐ Submitted **No Exposure Certification (NEC)** Date Submitted: ___/___/___

   Re-evaluation Date: ___/___/___

   Does facility continue to satisfy NEC conditions? ☐ YES ☐ NO

   iii. ☐ Submitted **Sampling Reduction Certification (SRC)** Date Submitted: ___/___/___

   Re-evaluation Date: ___/___/___

   Does facility continue to satisfy SRC conditions? ☐ YES ☐ NO

   iv. ☐ Received Regional Board Certification Certification Date: ___/___/___

   v. ☐ Received Local Agency Certification Certification Date: ___/___/___

3. If you checked boxes i or iii above, were you scheduled to sample **one** storm event during the reporting year?

   ☐ **YES** Go to Section E ☒ **NO** Go to Section F

4. If you checked boxes ii, iv, or v, go to Section F.

E. SAMPLING AND ANALYSIS RESULTS

1. How many storm events did you sample? _____ If less than 2, **attach explanation** (if you checked item D.2.i or iii. above, only attach explanation if you answer "0").

2. Did you collect storm water samples from the first storm of the wet season that produced a discharge during scheduled facility operating hours? (Section B.5 of the General Permit)

   ☐ **YES** ☐ **NO** **attach explanation** **(Please note that if you do not sample the first storm event, you are still required to sample 2 storm events)**

3. How many storm water discharge locations are at your facility? _____

2012-2013
ANNUAL REPORT

4. For each storm event sampled, did you collect and analyze a sample from each of the facility's' storm water discharge locations? ☐ YES, go to Item E.6 ☐ NO

5. Was sample collection or analysis reduced in accordance with Section B.7.d of the General Permit? ☐ YES ☐ NO, **attach explanation**

   If "YES", **attach documentation** supporting your determination that two or more drainage areas are substantially identical.

   Date facility's drainage areas were last evaluated ___/___/____

6. Were <u>all</u> samples collected during the first hour of discharge? N/A ☐ YES ☐ NO, **attach explanation**

7. Was <u>all</u> storm water sampling preceded by three (3) working days without a storm water discharge? ☐ YES ☐ NO, **attach explanation**

8. Were there any discharges of storm water that had been temporarily stored or contained? (such as from a pond) ☐ YES ☐ NO, go to Item E.10

9. Did you collect and analyze samples of temporarily stored or contained storm water discharges from two storm events? (or one storm event if you checked item D.2.i or iii. above) ☐ YES ☐ NO, **attach explanation**

10. Section B.5. of the General Permit requires you to analyze storm water samples for pH, Total Suspended Solids (TSS), Specific Conductance (SC), Total Organic Carbon (TOC) or Oil and Grease (O&G), other pollutants likely to be present in storm water discharges in significant quantities, and analytical parameters listed in Table D of the General Permit.

    a. Does Table D contain any additional parameters related to your facility's SIC code(s)? ☐ YES ☐ NO, Go to Item E.11

    b. Did you analyze all storm water samples for the applicable parameters listed in Table D? ☐ YES ☐ NO

    c. If you did not analyze all storm water samples for the applicable Table D parameters, check one of the following reasons: N/A

    _____ In prior sampling years, the parameter(s) have not been detected in significant quantities from two consecutive sampling events. **Attach explanation**

    _____ The parameter(s) is not likely to be present in storm water discharges and authorized non-storm water discharges in significant quantities based upon the facility operator's evaluation. **Attach explanation**

    _____ Other. **Attach explanation**

11. For each storm event sampled, attach a copy of the laboratory analytical reports and report the sampling and analysis results using **Form 1** or its equivalent. The following must be provided for each sample collected:

- Date and time of sample collection
- Name and title of sampler
- Parameters tested
- Name of analytical testing laboratory
- Discharge location identification
- Testing results
- Test methods used
- Test detection limits
- Date of testing
- Copies of the laboratory analytical results

2012-2013
ANNUAL REPORT

F. QUARTERLY VISUAL OBSERVATIONS

1. **Authorized Non-Storm Water Discharges**

Section B.3.b of the General Permit requires quarterly visual observations of all authorized non-storm water discharges and their sources.

a. Do authorized non-storm water discharges occur at your facility?

☐ **YES** ☒ **NO** Go to Item F.2

b. Indicate whether you visually observed all authorized non-storm water discharges and their sources during the quarters when they were discharged. **Attach an explanation for any "NO" answers**. Indicate "N/A" for quarters without any authorized non-storm water discharges.

July-September	☐ **YES**	☐ **NO**	☐ **N/A**	October-December	☐ **YES**	☐ **NO**	☐ **N/A**
January-March	☐ **YES**	☐ **NO**	☐ **N/A**	April-June	☐ **YES**	☐ **NO**	☐ **N/A**

c. Use **Form 2** to report quarterly visual observations of authorized non-storm water discharges or provide the following information:

i. name of each authorized non-storm water discharge
ii. date and time of observation
iii. source and location of each authorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** new or revised BMPs necessary to reduce or prevent pollutants in authorized non-storm water discharges. Provide new or revised BMP implementation date.

2. **Unauthorized Non-Storm Water Discharges**

Section B.3.a of the General Permit requires quarterly visual observations of all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources.

a. Indicate whether you visually observed all drainage areas to detect the presence of unauthorized non- storm water discharges and their sources. **Attach an explanation for any "NO" answers**.

July-September	☒ **YES**	☐ **NO**	October-December	☒ **YES**	☐ **NO**
January-March	☒ **YES**	☐ **NO**	April-June	☒ **YES**	☐ **NO**

b. Based upon the quarterly visual observations, were any unauthorized non-storm water discharges detected?

☐ **YES** ☒ **NO** Go to Item F.2.d

c. Have each of the unauthorized non-storm water discharges been eliminated or permitted?

☐ **YES** ☐ **NO** **Attach explanation**

d. Use **Form 3** to report quarterly unauthorized non-storm water discharge visual observations or provide the following information:

i. name of each unauthorized non-storm water discharge
ii. date and time of observation
iii. source and location of each unauthorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** corrective actions necessary to eliminate the source of each unauthorized non-storm water discharge and to clean impacted drainage areas. Provide date unauthorized non-storm water discharge(s) was eliminated or scheduled to be eliminated.

2012-2013
ANNUAL REPORT

G. MONTHLY WET SEASON VISUAL OBSERVATIONS

Section B.4.a of the General Permit requires you to conduct monthly visual observations of storm water discharges at all storm water discharge locations during the wet season. These observations shall occur during the first hour of discharge or, in the case of temporarily stored or contained storm water, at the time of discharge.

1. Indicate below whether monthly visual observations of storm water discharges occurred at all discharge locations. **Attach an explanation for any "NO" answers.** Include in this explanation whether any eligible storm events occurred during scheduled facility operating hours that did not result in a storm water discharge, and provide the date, time, name and title of the person who observed that there was no storm water discharge.

	YES	NO		YES	NO
October	☐	☒	February	☐	☒
November	☐	☒	March	☐	☒
December	☒	☐	April	☐	☒
January	☐	☒	May	☐	☒

2. Report monthly wet season visual observations using **Form 4** or provide the following information:

   a. date, time, and location of observation
   b. name and title of observer
   c. characteristics of the discharge (i.e., odor, color, etc.) and source of any pollutants observed
   d. any new or revised BMPs necessary to reduce or prevent pollutants in storm water discharges. Provide new or revised BMP implementation date.

ANNUAL COMPREHENSIVE SITE COMPLIANCE EVALUATION (ACSCE)

H. ACSCE CHECKLIST

Section A.9 of the General Permit requires the facility operator to conduct one ACSCE in each reporting period (July 1-June 30). Evaluations must be conducted within 8-16 months of each other. The SWPPP and monitoring program shall be revised and implemented, as necessary, within 90 days of the evaluation. The checklist below includes the minimum steps necessary to complete a ACSCE. Indicate whether you have performed each step below. **Attach an explanation for any "NO" answers.**

1. Have you inspected all potential pollutant sources and industrial activities areas? ☒ YES ☐ NO
   The following areas should be inspected:

   - areas where spills and leaks have occurred during the last year
   - outdoor wash and rinse areas
   - process/manufacturing areas
   - loading, unloading, and transfer areas
   - waste storage/disposal areas
   - dust/particulate generating areas
   - erosion areas
   - building repair, remodeling, and construction
   - material storage areas
   - vehicle/equipment storage areas
   - truck parking and access areas
   - rooftop equipment areas
   - vehicle fueling/maintenance areas
   - non-storm water discharge generating areas

2. Have you reviewed your SWPPP to assure that its BMPs address existing potential pollutant sources and industrial activities areas? ☒ YES ☐ NO

3. Have you inspected the entire facility to verify that the SWPPP's site map is up-to-date? The following site map items should be verified: ☒ YES ☐ NO

   - facility boundaries
   - outline of all storm water drainage areas
   - areas impacted by run-on
   - storm water discharges locations
   - storm water collection and conveyance system
   - structural control measures such as catch basins, berms, containment areas, oil/water separators, etc.

4. Have you reviewed all General Permit compliance records generated since the last annual evaluation? ☒ YES ☐ NO

The following records should be reviewed:

- quarterly authorized non-storm water discharge visual observations
- monthly storm water discharge visual observation
- records of spills/leaks and associated clean-up/response activities
- quarterly unauthorized non-storm water discharge visual observations
- Sampling and Analysis records
- preventative maintenance inspection and maintenance records

5. Have you reviewed the major elements of the SWPPP to assure compliance with the General Permit? ☒ YES ☐ NO

The following SWPPP items should be reviewed:

- pollution prevention team
- list of significant materials
- description of potential pollutant sources
- assessment of potential pollutant sources
- identification and description of the BMPs to be implemented for each potential pollutant source

6. Have you reviewed your SWPPP to assure that a) the BMPs are adequate in reducing or preventing pollutants in storm water discharges and authorized non-storm water discharges, and b) the BMPs are being implemented? ☒ YES ☐ NO

The following BMP categories should be reviewed:

- good housekeeping practices
- spill response
- employee training
- erosion control
- quality assurance
- preventative maintenance
- material handling and storage practices
- waste handling/storage
- structural BMPs

7. Has all material handling equipment and equipment needed to implement the SWPPP been inspected? ☒ YES ☐ NO

I. ACSCE EVALUATION REPORT

The facility operator is required to provide an evaluation report that includes:

- identification of personnel performing the evaluation
- the date(s) of the evaluation
- necessary SWPPP revisions
- schedule for implementing SWPPP revisions
- any incidents of non-compliance and the corrective actions taken

Use **Form 5** to report the results of your evaluation or develop an equivalent form.

J. ACSCE CERTIFICATION

The facility operator is required to certify compliance with the Industrial Activities Storm Water General Permit. To certify compliance, both the SWPPP and Monitoring Program must be up to date and be fully implemented.

Based upon your ACSCE, do you certify compliance with the Industrial Activities Storm Water General Permit? ☒ YES ☐ NO

If you answered "NO" **attach an explanation** to the ACSCE Evaluation Report why you are not in compliance with the Industrial Activities Storm Water General Permit.

2012-2013
ANNUAL REPORT

ATTACHMENT SUMMARY

Answer the questions below to help you determine what should be attached to this annual report. Answer NA (Not Applicable) to questions 2-4 if you are not required to provide those attachments.

1.	Have you attached Forms 1,2,3,4, and 5 or their equivalent?	☒ YES (Mandatory)		
2.	If you conducted sampling and analysis, have you attached the laboratory analytical reports?	☐ YES	☐ NO	☒ NA
3.	If you checked box II, III, IV, or V in item D.2 of this Annual Report, have you attached the first page of the appropriate certifications?	☐ YES	☐ NO	☒ NA
4.	Have you attached an explanation for each "NO" answer in items E.1, E.2, E.5-E.7, E.9, E.10.c, F.1.b, F.2.a, F.2.c, G.1, H.1-H.7, or J?	☒ YES	☐ NO	☐ NA

ANNUAL REPORT CERTIFICATION

I am duly authorized to sign reports required by the INDUSTRIAL ACTIVITIES STORM WATER GENERAL PERMIT (see Standard Provision C.9) and I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Printed Name: Ron Thompson

Signature: Thompson, Ron (Lakeside) NA [illegible] Date: 6/5/13

Title: Plant Manager

2012-2013
ANNUAL REPORT

Explanation for "No" and "N/A" Answers

G-1: There were no industrial stormwater discharges to Waters of the US that met all inspection criteria (e.g. discharge during operating hours) from October 2012 through May 2013, except during December 2012. The date, name, and title of the person who observed there were no stormwater discharges during operating hours are shown on the attached Form 4's. The Form 4's contain rain records for the reporting period. The potential for discharge is reduced by several detention ponds.

Annual Comprehensive Site Evaluation

The site and SWPPP review for this evaluation was conducted on 3/26/2013 by the Environmental Manager with the site manager. The SWPPP was subsequently updated in June 2013. The SWPPP map was also updated in May 2013.

2012- 2013

ANNUAL REPORT

SIDE A

FORM 1-SAMPLING & ANALYSIS RESULTS

To be provided by BMI

FIRST STORM EVENT

- If analytical results are less than the detection limit (or non detectable), show the value as less than the numerical value of the detection limit (example: <.05)
- If you did not analyze for a required parameter, do not report "0". Instead, leave the appropriate box blank
- When analysis is done using portable analysis (such as portable pH meters, SC meters, etc.), indicate "PA" in the appropriate test method used box.
- Make additional copies of this form as necessary.

NAME OF PERSON COLLECTING SAMPLE(S):_____ **TITLE:** _____ **SIGNATURE:** _____

DESCRIBE DISCHARGE LOCATION Example: NW Out Fall	DATE/TIME OF SAMPLE COLLECTION	TIME DISCHARGE STARTED	ANALYTICAL RESULTS For First Storm Event

2012- 2013

ANNUAL REPORT

SIDE A

FORM 2-QUARTERLY VISUAL OBSERVATIONS OF AUTHORIZED NON-STORM WATER DISCHARGES (NSWDs)

N/A- No authorized NSWD's

- Quarterly dry weather visual observations are required of each authorized NSWD.
- Observe each authorized NSWD source, impacted drainage area, and discharge location.
- Authorized NSWDs must meet the conditions provided in Section D (pages 5-6), of the General Permit.
- Make additional copies of this form as necessary.

QUARTER: **JULY-SEPT.** DATE: __/__/__	**Observers Name:** _____ **Title:** _____ **Signature:** _____	**WERE ANY AUTHORIZED NSWDs DISCHARGED DURING THIS QUARTER?**	☐ **YES** ☐ **NO** If **YES**, complete reverse side of this form.
QUARTER: **OCT.-DEC.** DATE: __/__/__	**Observers Name:** _____ **Title:** _____ **Signature:** _____	**WERE ANY AUTHORIZED NSWDs DISCHARGED DURING THIS QUARTER?**	☐ **YES** ☐ **NO** If **YES**, complete reverse side of this form.
QUARTER: **JAN.-MARCH** DATE: __/__/__	**Observers Name:** _____ **Title:** _____ **Signature:** _____	**WERE ANY AUTHORIZED NSWDs DISCHARGED DURING THIS QUARTER?**	☐ **YES** ☐ **NO** If **YES**, complete reverse side of this form.

SIDE A

FORM 3-QUARTERLY VISUAL OBSERVATIONS OF UNAUTHORIZED NON-STORM WATER DISCHARGES (NSWDs)

- Unauthorized NSWDs are discharges (such as wash or rinse waters) that do not meet the conditions provided in Section D (pages 5-6) of the General Permit.
- Quarterly visual observations are required to observe current and detect prior unauthorized NSWDs.
- Quarterly visual observations are required during dry weather and at all facility drainage areas.
- Each unauthorized NSWD source, impacted drainage area, and discharge location must be identified and observed.
- Unauthorized NSWDs that can not be eliminated within 90 days of observation must be reported to the Regional Board in accordance with Section A.10.e of the General Permit.
- Make additional copies of this form as necessary.

Wet Weather Season Monthly Stormwater Visual Observation Form 4

Instructions: Complete this form for each month during the Stormwater Wet Weather Season months of October through May. This form is used to document rain events, discharges that occur during the month, or that there was no discharge during the entire month. Keep all completed forms in your plant files.

Plant: Carroll Canyon

Plant Discharge Location: Access Road #1 (Low point in road)

Month and Year: Oct 2012

Inspector(s): Ron Thompson

Inspector(s) Job Title: Manager

Fill out this section during the month:

1 DATE	2 AMOUNT OF RAIN	3 DISCHARGE? Yes or No	4 1ST HOUR OF DISCHARGE DURING OPERATING HOURS? Yes, No, or N/A	5 DISCHARGE PRECEDED BY 3 DAYS OF NO DISCHARGE? Yes, No, or N/A	6 COMMENTS
10/11/12	.31	No			
10/12/12	.20	NO			

Is yes entered in columns 3, 4, and 5?

☒ No ☐ Yes

- If you answered *"No"*, then do not fill out the below Observations data.
- If you answered "Yes" and this is the first discharge of the month, then fill in the below Observation and BMP data

Observation Summary of ***First*** Discharge of Month, During Operating Hours:

Date of Discharge Observation	Time of Discharge Observation	Time Discharge Began (est)

Characteristics of Discharge:

Discharge turbid or colored?	☐ No	☐ Yes
Discharge have sheen?	☐ No	☐ Yes
Discharge leave staining?	☐ No	☐ Yes
Discharge have odor?	☐ No	☐ Yes
Discharge have debris?	☐ No	☐ Yes

Source of any pollutants in discharge: _____

BMP's in place?	☐ No	☐ Yes
New BMP's needed to reduce pollutants in discharge?	☐ No	☐ Yes

If "Yes," describe new BMP's: _____

Inspector's Signature

State of California
STATE WATER RESOURCES CONTROL BOARD

SAN DIEGO REGIONAL
WATER QUALITY
CONTROL BOARD

2012 JUN 28 P 2:58

2011-2012

ANNUAL REPORT

FOR
STORM WATER DISCHARGES ASSOCIATED
WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2011 through June 30, 2012

An annual report is required to be submitted to your local Regional Water Quality Control Board (Regional Board) by July 1 of each year. This document must be certified and signed, under penalty of perjury, by the appropriate official of your company. Many of the Annual Report questions require an explanation. Please provide explanations on a separate sheet as an attachment. **Retain a copy of the completed Annual Report for your records.**

Please circle or highlight any information contained in Items A, B, and C below that is new or revised so we can update our records. Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers and e-mail addresses of the Regional Board contacts, as well as the Regional Board office addresses can be found at http://www.waterboards.ca.gov/stormwtr/contact.html. To find your Regional Board information, match the first digit of your WDID number with the corresponding number that appears in parenthesis on the first line of each Regional Board office.

GENERAL INFORMATION:

A. Facility Information:

Facility WDID No: 937I014663

Facility Business Name: Hanson Aggregates Pacific Southwest, Inc. Contact Person: Ron Thompson

Physical Address: 9255 Camino Santa Fe e-mail: Ron.Thompson@hanson.com

City: San Diego **CA** Zip: 92121 : Phone: (760) 802-5365

Standard Industrial Classification (SIC) Code(s): 1442, 3273, 2875, 7699

B. Facility Operator Information:

Operator Name: Hanson Aggregates Pacific Southwest, Inc. Contact Person: Steve Zacks

Mailing Address: P.O. Box 639069 e-mail: steve.zacks@hanson.com

City: San Diego State: CA Zip: 92163 Phone: 805 748-0128

C. Facility Billing Information:

Operator Name: Hanson Aggregates Pacific Southwest, Inc. Contact Person: Steve Zacks

Mailing Address: P.O. Box 639069 e-mail: steve.zacks@hanson.com

2011-2012

ANNUAL REPORT

SPECIFIC INFORMATION

MONITORING AND REPORTING PROGRAM

D. SAMPLING AND ANALYSIS EXEMPTIONS AND REDUCTIONS

1. For the reporting period, was your facility exempt from collecting and analyzing samples from **two** storm events in accordance with sections B.12 or 15 of the General Permit?

   ☒ **YES** Go to Item D.2 ☐ **NO** Go to Section E

2. Indicate the reason your facility is exempt from collecting and analyzing samples from **two** storm events. Attach a copy of the first page of the appropriate certification if you check boxes ii, iii, iv, or v.

   i. ☒ Participating in an Approved Group Monitoring Plan **Group Name:** Building Materials Industry

   ii. ☐ Submitted **No Exposure Certification (NEC)** Date Submitted: ___/___/___

   Re-evaluation Date: ___/___/___

   Does facility continue to satisfy NEC conditions? ☐ YES ☐ NO

   iii. ☐ Submitted **Sampling Reduction Certification (SRC)** Date Submitted: ___/___/___

   Re-evaluation Date: ___/___/___

   Does facility continue to satisfy SRC conditions? ☐ YES ☐ NO

   iv. ☐ Received Regional Board Certification Certification Date: ___/___/___

   v. ☐ Received Local Agency Certification Certification Date: ___/___/___

3. If you checked boxes i or iii above, were you scheduled to sample **one** storm event during the reporting year?

   ☒ **YES** Go to Section E ☐ **NO** Go to Section F

4. If you checked boxes ii, iv, or v, go to Section F.

E. SAMPLING AND ANALYSIS RESULTS

1. How many storm events did you sample? 1

   If less than 2, **attach explanation** (if you checked item D.2.i or iii. above, only attach explanation if you answer "0").

2. Did you collect storm water samples from the first storm of the wet season that produced a discharge during scheduled facility operating hours? (Section B.5 of the General Permit)

   ☒ **YES** ☐ **NO** **attach explanation** (Please note that if you do not sample the first storm event, you are still required to sample 2 storm events)

3. How many storm water discharge locations are at your facility? 3

2011-2012
ANNUAL REPORT

4. For each storm event sampled, did you collect and analyze a sample from each of the facility's' storm water discharge locations? ☐ YES, go to Item E.6 ☒ NO

5. Was sample collection or analysis reduced in accordance with Section B.7.d of the General Permit? ☐ YES ☒ NO, **attach explanation**

   If "YES", **attach documentation** supporting your determination that two or more drainage areas are substantially identical.

   Date facility's drainage areas were last evaluated ___/___/_____

6. Were <u>all</u> samples collected during the first hour of discharge? ☒ YES ☐ NO, **attach explanation**

7. *Was <u>all</u> storm water sampling preceded by three* (3) working days without a storm water discharge? ☒ YES ☐ NO, **attach explanation**

8. Were there any discharges of storm water that had been temporarily stored or contained? (such as from a pond) ☒ YES ☐ NO, go to Item E.10

9. Did you collect and analyze samples of temporarily stored or contained storm water discharges from two storm events? (or one storm event if you checked item D.2.i or iii. above) ☒ YES ☐ NO, **attach explanation**

10. Section B.5. of the General Permit requires you to analyze storm water samples for pH, Total Suspended Solids (TSS), Specific Conductance (SC), Total Organic Carbon (TOC) or Oil and Grease (O&G), other pollutants likely to be present in storm water discharges in significant quantities, and analytical parameters listed in Table D of the General Permit.

    a. Does Table D contain any additional parameters related to your facility's SIC code(s)? ☒ YES ☐ NO, Go to Item E.11

    b. Did you analyze all storm water samples for the applicable parameters listed in Table D? ☒ YES ☐ NO

    c. If you did not analyze all storm water samples for the applicable Table D parameters, check one of the following reasons: N/A

    _____ In prior sampling years, the parameter(s) have not been detected in significant quantities from two consecutive sampling events. **Attach explanation**

    _____ The parameter(s) is not likely to be present in storm water discharges and authorized non-storm water discharges in significant quantities based upon the facility operator's evaluation. **Attach explanation**

    _____ Other. **Attach explanation**

11. For each storm event sampled, attach a copy of the laboratory analytical reports and report the sampling and analysis results using **Form 1** or its equivalent. The following must be provided for each sample collected:

- Date and time of sample collection
- Name and title of sampler
- Parameters tested
- Name of analytical testing laboratory
- Discharge location identification
- Testing results
- Test methods used
- Test detection limits
- Date of testing
- Copies of the laboratory analytical results

2011-2012
ANNUAL REPORT

F. *QUARTERLY VISUAL OBSERVATIONS*

1. **Authorized Non-Storm Water Discharges**

Section B.3.b of the General Permit requires quarterly visual observations of all authorized non-storm water discharges and their sources.

a. Do authorized non-storm water discharges occur at your facility?

☐ **YES** ☒ **NO** Go to Item F.2

b. Indicate whether you visually observed all authorized non-storm water discharges and their sources during the quarters when they were discharged. **Attach an explanation for any "NO" answers.** Indicate "N/A" for quarters without any authorized non-storm water discharges.

July-September	☐ **YES**	☐ **NO**	☐ **N/A**	October-December	☐ **YES**	☐ **NO**	☐ **N/A**
January-March	☐ **YES**	☐ **NO**	☐ **N/A**	April-June	☐ **YES**	☐ **NO**	☐ **N/A**

c. Use **Form 2** to report quarterly visual observations of authorized non-storm water discharges or provide the following information:

i. name of each authorized non-storm water discharge
ii. date and time of observation
iii. source and location of each authorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** new or revised BMPs necessary to reduce or prevent pollutants in authorized non-storm water discharges. Provide new or revised BMP implementation date.

2. **Unauthorized Non-Storm Water Discharges**

Section B.3.a of the General Permit requires quarterly visual observations of all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources.

a. Indicate whether you visually observed all drainage areas to detect the presence of unauthorized non- storm water discharges and their sources. **Attach an explanation for any "NO" answers.**

July-September	☒ **YES**	☐ **NO**	October-December	☒ **YES**	☐ **NO**
January-March	☒ **YES**	☐ **NO**	April-June	☒ **YES**	☐ **NO**

b. Based upon the quarterly visual observations, were any unauthorized non-storm water discharges detected? N/A

☐ **YES** ☒ **NO** Go to Item F.2.d

c. Have each of the unauthorized non-storm water discharges been eliminated or permitted? N/A

☐ **YES** ☐ **NO** **Attach explanation**

d. Use **Form 3** to report quarterly unauthorized non-storm water discharge visual observations or provide the following information:

i. name of each unauthorized non-storm water discharge
ii. date and time of observation
iii. source and location of each unauthorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** corrective actions necessary to eliminate the source of each unauthorized non-storm water discharge and to clean impacted drainage areas. Provide date unauthorized non-storm water discharge(s) was eliminated or scheduled to be eliminated.

2011-2012
ANNUAL REPORT

G. MONTHLY WET SEASON VISUAL OBSERVATIONS

Section B.4.a of the General Permit requires you to conduct monthly visual observations of storm water discharges at all storm water discharge locations during the wet season. These observations shall occur during the first hour of discharge or, in the case of temporarily stored or contained storm water, at the time of discharge.

1. Indicate below whether monthly visual observations of storm water discharges occurred at all discharge locations. ***Attach an explanation for any "NO" answers.*** *Include in this explanation whether any eligible storm events* occurred during scheduled facility operating hours that did not result in a storm water discharge, and provide the date, time, name and title of the person who observed that there was no storm water discharge.

	YES	NO		YES	NO
October	☐	☒	February	☐	☒
November	☐	☒	March	☐	☒
December	☒	☐	April	☐	☒
January	☐	☒	May	☐	☒

2. Report monthly wet season visual observations using **Form 4** or provide the following information:

   a. date, time, and location of observation
   b. name and title of observer
   c. characteristics of the discharge (i.e., odor, color, etc.) and source of any pollutants observed
   d. **any** new or revised BMPs necessary to reduce or prevent pollutants in storm water discharges. Provide new or revised BMP implementation date.

ANNUAL COMPREHENSIVE SITE COMPLIANCE EVALUATION (ACSCE)

H. ACSCE CHECKLIST

Section A.9 of the General Permit requires the facility operator to conduct one ACSCE in each reporting period (July 1-June 30). Evaluations must be conducted within 8-16 months of each other. The SWPPP and monitoring program shall be revised and implemented, as necessary, within 90 days of the evaluation. The checklist below includes the minimum steps necessary to complete a ACSCE. Indicate whether you have performed each step below. **Attach an explanation for any "NO" answers.**

1. Have you inspected all potential pollutant sources and industrial activities areas? ☒ YES ☐ NO
   The following areas should be inspected:

   - areas where spills and leaks have occurred during the last year
   - outdoor wash and rinse areas
   - process/manufacturing areas
   - loading, unloading, and transfer areas
   - waste storage/disposal areas
   - dust/particulate generating areas
   - erosion areas
   - building repair, remodeling, and construction
   - material storage areas
   - vehicle/equipment storage areas
   - truck parking and access areas
   - rooftop equipment areas
   - vehicle fueling/maintenance areas
   - non-storm water discharge generating areas

2. Have you reviewed your SWPPP to assure that its BMPs address existing potential pollutant sources and industrial activities areas? ☒ YES ☐ NO

3. Have you inspected the entire facility to verify that the SWPPP's site map is up-to-date? The following site map items should be verified: ☒ YES ☐ NO

   - facility boundaries
   - outline of all storm water drainage areas
   - areas impacted by run-on
   - storm water discharges locations
   - storm water collection and conveyance system
   - structural control measures such as catch basins, berms, containment areas, oil/water separators, etc.

2011-2012
ANNUAL REPORT

4. Have you reviewed all General Permit compliance records generated since the last annual evaluation? ☒ YES ☐ NO

   The following records should be reviewed:

   - quarterly authorized non-storm water discharge visual observations
   - monthly storm water discharge visual observation
   - records of spills/leaks and associated clean-up/response activities
   - quarterly unauthorized non-storm water discharge visual observations
   - Sampling and Analysis records
   - preventative maintenance inspection and maintenance records

5. Have you reviewed the major elements of the SWPPP to assure compliance with the General Permit? ☒ YES ☐ NO

   The following SWPPP items should be reviewed:

   - pollution prevention team
   - list of significant materials
   - description of potential pollutant sources
   - assessment of potential pollutant sources
   - identification and description of the BMPs to be implemented for each potential pollutant source

6. Have you reviewed your SWPPP to assure that a) the BMPs are adequate in reducing or preventing pollutants in storm water discharges and authorized non-storm water discharges, and b) the BMPs are being implemented? ☒ YES ☐ NO

   The following BMP categories should be reviewed:

   - good housekeeping practices
   - spill response
   - employee training
   - erosion control
   - quality assurance
   - preventative maintenance
   - material handling and storage practices
   - waste handling/storage
   - structural BMPs

7. Has all material handling equipment and equipment needed to implement the SWPPP been inspected? ☒ YES ☐ NO

I. ACSCE EVALUATION REPORT

The facility operator is required to provide an evaluation report that includes:

- identification of personnel performing the evaluation
- the date(s) of the evaluation
- necessary SWPPP revisions
- schedule for implementing SWPPP revisions
- any incidents of non-compliance and the corrective actions taken

Use **Form 5** to report the results of your evaluation or develop an equivalent form.

J. ACSCE CERTIFICATION

The facility operator is required to certify compliance with the Industrial Activities Storm Water General Permit. To certify compliance, both the SWPPP and Monitoring Program must be up to date and be fully implemented.

Based upon your ACSCE, do you certify compliance with the Industrial Activities Storm Water General Permit? ☒ YES ☐ NO

If you answered "NO" **attach an explanation** to the ACSCE Evaluation Report why you are not in compliance with the Industrial Activities Storm Water General Permit.

2011-2012
ANNUAL REPORT

ATTACHMENT SUMMARY

Answer the questions below to help you determine what should be attached to this annual report. Answer NA (Not Applicable) to questions 2-4 if you are not required to provide those attachments.

1.	Have you attached Forms 1,2,3,4, and 5 or their equivalent?	☒ YES (Mandatory)		
2.	If you conducted sampling and analysis, have you attached the laboratory analytical reports?	☒ YES	☐ NO	☐ NA
3.	If you checked box II, III, IV, or V in item D.2 of this Annual Report, have you attached the first page of the appropriate certifications?	☐ YES	☐ NO	☒ NA
4.	*Have you attached an explanation for each "NO" answer in* items E.1, E.2, E.5-E.7, E.9, E.10.c, F.1.b, F.2.a, F.2.c, G.1, H.1-H.7, or J?	☒ YES	☐ NO	☐ NA

ANNUAL REPORT CERTIFICATION

I am duly authorized to sign reports required by the INDUSTRIAL ACTIVITIES STORM WATER GENERAL PERMIT (see Standard Provision C.9) and I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Printed Name: Ron Thompson

Title: Plant Manager

2011-2012
ANNUAL REPORT

Explanation for "No" Answers

E-4, E-5: The sampling criteria (e.g. discharge occurs during operating hours) were met at one of the three discharge locations (see rain logs on December Form 4's). Also it was recently determined that samples in the future could be collected from a fourth discharge location at the lower A-1 Soils area.

F-1: There were no authorized non-stormwater discharges generated from site activities during the reporting year. However the site did receive runoff from an offsite broken fire hydrant on 6/15/2011. The discharge was brown in color from slope sediment. The discharge occurred during the July 2010 to June 2011 reporting year, but was not included in the 2010-11 annual report since the discharge occurred after that report was submitted to BMI.

G: There were no industrial stormwater discharges to Waters of the US that met all inspection/ sampling criteria (e.g. discharge during operating hours) in October 2011, November 2011, and January through May 2012. The date, name, and title of the person who observed there were no stormwater discharges during operating hours are shown on the attached Form 4's. The Form 4's contain rain records for the reporting period.

Annual Comprehensive Site Evaluation

The field review for this evaluation was conducted on 2/9/2012 (for A-1 Soils, Mining, and Shop areas), 11/16/2011 (for concrete plant field review), and 6/6/2012 (concrete plant document review) by the Environmental Manager. The SWPPP was updated in April 2010 and last amended on 6/6/2012.

There appears to be an error in the December Form 4. The lab sample was taken on 12/13/2011- this date is shown on the lab report and the person collecting the sample confirmed this date was logged in his calendar. However the Form 4 shows there was a discharge on 12/12/2011 and not 12/13/2011. After reviewing the discrepancy with staff involved in the sampling, it is assumed that Form 4 should show the discharge on 12/13/2011 and not 12/12/2011.

There is a discharge from the lower A-1 Area to a tributary to Carroll Canyon Creek. This discharge co-mingles with runoff from bluffs located south of the A-1 Soils area. It was previously determined that sampling and inspections will not be conducted of this discharge due to this co-mingling. However this discharge was reevaluated and it was determined that a sample can be taken prior to the co-mingling with offsite runoff, where the storm water overflows a small detention basin. Therefore, a fourth discharge point has been added to the SWPPP.

A 12/2011 stormwater sample from the Access Road #2 Discharge Point (below office building) shows the benchmark level for SC is exceeded, even though a rock filter located upgradient of the sample point was enhanced approximately 1 month before the sample event. Fabric was replaced on the riser after the sample was taken- perhaps this BMP could reduce SC in the future. If SC is again elevated, further evaluation will be conducted and appropriate BMP's will be installed.

2011- 2012

ANNUAL REPORT

SIDE A

FORM 1-SAMPLING & ANALYSIS RESULTS

To be provided by BMI

FIRST STORM EVENT

- If analytical results are less than the detection limit (or non detectable), show the value as less than the numerical value of the detection limit (example: <.05)
- If you did not analyze for a required parameter, do not report "0". Instead, leave the appropriate box blank
- When analysis is done using portable analysis (such as portable pH meters, SC meters, etc.), indicate "PA" in the appropriate test method used box.
- Make additional copies of this form as necessary.

NAME OF PERSON COLLECTING SAMPLE(S): _____ **TITLE:** _____ **SIGNATURE:** _____

SIDE A

FORM 3-QUARTERLY VISUAL OBSERVATIONS OF UNAUTHORIZED NON-STORM WATER DISCHARGES (NSWDs)

- Unauthorized NSWDs are discharges (such as wash or rinse waters) that do not meet the conditions provided in Section D (pages 5-6) of the General Permit.
- *Quarterly visual observations are required to observe current and detect prior unauthorized NSWDs.*
- Quarterly visual observations are required during dry weather and at all facility drainage areas.
- Each unauthorized NSWD source, impacted drainage area, and discharge location must be identified and observed.
- Unauthorized NSWDs that can not be eliminated within 90 days of observation must be reported to the Regional Board in accordance with Section A.10.e of the General Permit.
- *Make additional copies of this form as necessary.*

Wet Weather Season Monthly Stormwater Visual Observation Form 4

Instructions: Complete this form for each month during the Stormwater Wet Weather Season months of October through May. This form is used to document no discharge during the month or any discharge that occurs during the first hour of the first stormwater discharge of that month. This form is also used to record any rain events throughout the month. Keep all completed forms in your plant files.

Plant: Carroll Canyon
Camino Santa Fe
Plant Discharge Location: Desilt Basin

Month and Year: Oct 2011

Inspector(s): Jud Harvey

Inspector(s) Job Title: Site Manager

Fill out this section during the month:

DATE	AMOUNT OF RAIN	DISCHARGE? Yes or No	COMMENTS

Was there any discharge of stormwater to a storm drain, creek or other drainage during the month, during operating hours?

☒ **No** ☐ **Yes**

- If you answered *"No,"* sign and date the bottom of the form. This form is now completed.
- If you answered *"Yes,"* fill out the below data before signing and dating the form.

Observation Summary of ***First*** Discharge of Month, During Operating Hours:

Date of Discharge Observation	Time of Discharge Observation	Time Discharge Began (est)

Characteristics of Discharge:

Discharge turbid or colored?	☐ No	☐ Yes
Discharge have sheen?	☐ No	☐ Yes
Discharge leave staining?	☐ No	☐ Yes
Discharge have odor?	☐ No	☐ Yes
Discharge have debris?	☐ No	☐ Yes

Source of any pollutants in discharge: _____

BMP's in place?	☐ No	☐ Yes
New BMP's needed to reduce pollutants in discharge?	☐ No	☐ Yes

If "Yes," describe new BMP's: _____

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD

NOTICE OF TERMINATION

OF COVERAGE UNDER THE GENERAL PERMIT FOR DISCHARGES OF HIGHLY TREATED GROUNDWATER TO SURFACE WATERS (NPDES PERMIT No. CAG 993002, WDR ORDER No. 01-134)

Submission of this Notice of Termination constitutes notice that the owner/operator of facility identified on this form is no longer authorized to discharge wastewater by NPDES General Permit No. CAG993002.

I. OWNER/OPERATOR

Name PETROCHEM MARKETING, INC			
Mailing Address 5205 AVENIDA ENCINAS, SUITE K			
City CARLSBAD	State CA	Zip 92008	Phone (760) 6030961
Contact Person DEANNA WILLIAMS		1. [ ] Owner 2. [ ] Operator 3. [X] Owner/Operator	

II. BASIS OF TERMINATION (Please provide additional detail under Section III)

X 1. All discharges subject to regulation under the general permit for discharge of highly treated groundwater to surface waters have been terminated.
Date of termination 2/28/07.

_____ 2. All wastewater discharge previously authorized by the general permit has been redirected to:

_____ a. wastewater retained on site.
_____ b. wastewater is discharged to a municipal sanitary sewer system.
_____ c. wastewater is discharged to evaporation ponds or percolation ponds offsite.
_____ d. wastewater is reused/reclaimed.
_____ e. other, please explain_____

_____.

_____ 3. Discharge of wastewater is now subject to another NPDES general permit or an individual NPDES permit.

NPDES Permit No._____ Date coverage began____/____/____.

_____ 4. There is a new owner/operator of the identified facility.

Date of owner/operator transfer____/____/____.
Has the new owner/operator been notified of NPDES general permit requirements? Yes___ No___

NEW OWNER/OPERATOR INFORMATION

COMPANY NAME_____ CONTACT PERSON_____

STREET ADDRESS_____ TITLE_____

CITY_____ STATE_____ ZIP_____ PHONE_____

RECEIVED JUL 2007 DIVISION OF WATER QUALITY

III. EXPLANATION OF BASIS OF TERMINATION:

THE PLANT HAS MOVED TO SOUTH GATE, CA.
WE NO LONGER HAVE ANYTHING ON THIS LEASED PROPERTY. EFFECTIVE DATE 2/28/07

SITE: 9255 CAMINO SANTA FE, SAN DIEGO, CA 92121

IV. CERTIFICATION:

I certify under penalty of law that all wastewater discharges associated with the identified facility that are authorized by NPDES general permit No. CAG993002 have been eliminated or that I am no longer the owner/operator of the facility. I understand that by submitting this Notice of Termination, I am no longer authorized to discharge wastewater under the general permit, and that discharging pollutants in wastewater to waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by a NPDES permit. I also understand that the submittal of this Notice of Termination does not release an owner/operator from liability for any violations of the general permit or the Clean Water Act.

RE: Required Technical Report (dated April 9, 2010) for Hanson Aggregates, 9225 Camino Santa Fe, San Diego, CA 92121 (WDID No. 9 37I014663)

Dear Mr. Harvey,

This is a response to the Required Technical Report which you submitted in April of this year. In the report, you indicated that a number of activities were implemented last spring to address sediment discharges from a sediment basin and along the haul road that runs adjacent to Carroll Canyon Creek. Actions that have already been implemented according to the report include:

1. A berm along the south side of the haul road was extended to intercept runoff from the road that was entering Carroll Canyon Creek during rain events.

2. A swale was installed on the north side of the haul road to direct runoff away from the haul road and away from Carroll Canyon Creek.

3. The large sediment detention basin located near Camino Santa Fe was partitioned by installing rock walls in the basin to filter sediment.

4. A total of 1,500 gravel bags were procured to be used as emergency BMPs where needed.

5. Gravel filter basins have been installed along the unpaved access road to the main plant area. The basins are intended to trap and filter sediment in flows along the dirt road.

6. A 22,000 gallon Baker Tank was utilized during the 2009 to 2010 rainy season. The tank was used as additional treatment stage (after the detention basin). The tank has since been removed from the site.

Actions to be taken in the future (as of the time period in which the RTR was prepared, April of 2010) were to include the following.

minimum, the use of a Baker tank (or equivalent) as an additional treatment stage (as stated above).

4. Please also provide a status update that discusses the BMPs that are being implemented during the months of June and July (the two additional detention basins and the expansion of the existing detention basin). The status update should be submitted by August 31, 2010.

If you have any questions regarding these requirements, please contact me at (858) 637-7137 or by e-mail at Ppeuron@waterboards.ca.gov.

Sincerely,

Peter Peuron

RE: NOTICE OF VIOLATION NO. R9-2010-0060 & REQUIRED TECHNICAL REPORT

Dear Mr. Harvey,

Enclosed is **Notice of Violation (NOV) No. R9-2010-0060** for the subject site. The violations specified were identified during site inspections on December 8, 2009 and March 1, 2010. Corrective measures and Best Management Practices (BMPs) should be implemented immediately to address these violations.

Pursuant to California Water Code (CWC) section 13267 and 13383, the California Regional Water Quality Control Board (San Diego Water Board) directs you to submit a **Required Technical Report (RTR)** to be received at the San Diego Water Board no later than **5:00 PM, April 12, 2010**. The RTR is required due to the violations noted in the enclosed NOV. The RTR will be reviewed to assess the need for further enforcement actions. The RTR shall include the following Sections:

1. A Site Status Report section including photo-documentation of proper implementation of BMPs addressing, but not necessarily limited to, those specific violations indicated in the attached NOV. The report should include a listing of violations noted in the NOV along with the BMP or BMPs implemented to correct the violation. Any interim corrective action

IN THE MATTER OF:	NOTICE OF VIOLATION NO. R9-2010-0060
Mr. Jud Harvey Hanson Aggregates P.O. Box 639069 San Diego, CA 92163-9069	WDID NO. *9 37I014663*

YOU ARE HEREBY NOTIFIED OF THE FOLLOWING VIOLATIONS:

Best Management Practices associated with the operation of a sediment detention basin were ineffective at preventing discharges from exceeding Water Quality Objectives for turbidity established in the San Diego Region's Water Quality Control Plan (Basin Plan).

BASIS FOR ALLEGED VIOLATIONS:

On December 8, 2009, a facility inspection was performed by Peter Peuron, Environmental Scientist and Wayne Chiu, Water Resource Control Engineer, both of the San Diego Regional Water Quality Control Board (San Diego Water Board). The inspection was conducted after a relatively heavy rainfall event (2.09 inches of rain during a two-day period). During this inspection, it was determined that a sediment detention basin that was being used to capture runoff from a quarry was discharging highly turbid water directly into Carroll Canyon Creek. Best Management Practices (BMPs) that were being employed to control the discharges were therefore, inadequate. A Facility Inspection Report (Attachment 1) documenting the violations was provided to representatives of Hanson Aggregates on December 24, 2009 via mail and e-mail (one copy mailed to Jud Harvey, Plant Manager and one copy e-mailed to Steve Zachs, a Hanson environmental affairs representative). The report indicates that the turbidity exceeds the Basin Plan standard of 20 Nephelometric Turbidity Units (NTUs). The report directs Hanson Aggregates to upgrade BMPs to achieve Basin Plan Standards. The report also notes that Carroll Canyon Creek (one of three creeks that flow into the Los Penasquitos Lagoon) has been found to be the primary contributor of sediment loads to Los Penasquitos Lagoon, a lagoon that is 303(d)-listed for sediment/siltation.

On March 1, 2010, a second inspection was conducted by Peter Peuron. Attachment 2 documents the findings of this inspection. Once again, highly turbid water was discharging into Carroll Canyon Creek from the outfall that leads to the sediment basin. The Facility Inspection Report also documents a turbidity plume in Los Penasquitos Creek. Since the depth of the creek was less than 12 inches and the turbidity plume was opaque enough to obscure the bottom of the creek, it can be inferred that both the

September 15 – October 15, 2017 Pre- Diligence / LOI Period Package Addendum 2October 10, 2017

discharge from the outfall and the receiving water immediately outside the outfall were at turbidity levels that exceed the Basin Plan Water Quality Objective of 20 NTUs. Therefore, the discharge is in violation of the Basin Plan. In addition, BMP implementation fails to meet the standard for Best Conventional Technology specified in the Statewide General Industrial Stormwater Permit (Water Quality Order No. 97-03-DWQ). Another sediment discharge of turbid water into Carroll Canyon Creek was observed in front of the facility's administrative office. Again, BMPs were inadequate.

Summary of Violations:

I. FAILURE TO PREVENT PROHIBITED DISCHARGES

- ***Pursuant to Water Quality Order No. 97-03-DWQ Order No. C.2:***
  Storm water discharges and authorized non-storm water discharges shall not cause or contribute to an exceedance of any applicable water quality standards contained in a Statewide Water Quality Control Plan or the applicable Regional Water Board's Basin Plan.

  Observations: On December 8, 2009 and March 1, 2010, turbid water that exceeded the Basin Plan Water Quality Objective of 20 Nephelometric Turbidity Units (NTUs) was observed to be discharging from an outfall leading to a sediment detention basin that receives runoff from the Hanson Aggregates quarry in Carroll Canyon. The turbidity of the water (in both cases) significantly attenuated light and did not allow a transparency of 1 foot which corresponds to a turbidity of 20 NTUs[1]. These visual observations which are documented in two inspection reports (Attachments 1 and 2) demonstrate that both discharges are in violation of the Basin Plan Standard.

  On March 1, 2010, turbid water that exceeded the Basin Plan Water Quality Objective of 20 Nephelometric Turbidity Units (NTUs) was observed to be discharging from a road adjacent to the facility's administrative office directly into Carroll Canyon Creek. Visual observations which are documented in an inspection report (Attachment 2) demonstrate that this discharge is in violation of the Basin Plan Standard.

II. FAILURE TO IMPLEMENT / MAINTAIN BEST MANAGEMENT PRACTICES

- **Pursuant to Water Quality Order NO. 97-03-DWQ, Order No. B.3.:**
  At a minimum, the discharger/operator must reduce or prevent storm water pollution associated with industrial activity by implementing Best Management Practices (BMPs) that achieve the standard of Best Available Technology (BAT)

[1] 1 "A Protocol to Estimate the Response of Aquatic Systems to Changes in Phosphorus and Nitrogen Inputs", USDA, October, 1999.

for toxic and non-conventional pollutants and Best Conventional Technology (BCT) for conventional pollutants.

Observation: As discussed earlier, on December 8, 2009 and March 1, 2010, the sediment detention basin at the Hanson Aggregates quarry was observed to be discharging sediment in violation of the Basin Plan Water Quality Objective of 20 NTUs. In 2005 and 2006, a panel of storm water experts (known as the "Blue Ribbon Panel") determined that it was feasible to achieve turbidity levels below 10 NTUs on average using Active Treatment Systems (i.e., applying chemical flocculant to turbid water to remove suspended sediment). Therefore, at least one technology exists (i.e, a Best Conventional Technology or BCT which is appropriate for suspended sediment) that is technologically and economically feasible for attaining Water Quality Objectives, yet Water Quality Objectives were not achieved even after a period of 83 days (from Decembr 8, 2009 to March 1, 2010) passed. The failure to implement BCT in violation of the Industrial Stormwater Permit occurred for a period of at least 83 days.

The above-referenced discharge of sediment from a road to Carroll Canyon Creek resulted from inadequate BMP implementation. It is technologically and economically feasible to implement Active Treatment to attain turbidity levels that comply with Basin Plan standards. Therefore, BMP implementation did not meet the Best Conventional Technology standard.

If you have any questions, please telephone Pete Peuron at (858) 637-7137, or email at Ppeuron@waterboards.ca.gov

Respectfully,

for David Barker
Supervising Water Resource Control Engineer

I. COMPLIANCE HISTORY/BACKGROUND

This site has been enrolled in the Industrial Stormwater Permit since October of 1998. In 1999, the site received a Notice of Violation for failure to submit an annual report. The facility is located in a sensitive environment. Carroll Canyon Creek flows through the site from east to west. Also, the Los Penasquitos Lagoon is located downstream of this site and it is impaired for sedimentation and siltation (i.e., on the 303(d) list for impaired water bodies). In addition, recent investigations indicate that Carroll Canyon Creek is the primary source of sediment that is impacting the lagoon.

II. FINDINGS

Along with Wayne Chiu (Regional Board staff member) I arrived at the site on the morning after a very intense rainfall event. The Miramar weather station (which is the station closest to this site) measured a total of 2.19 inches of rainfall from the storm. Photo 1 shows the facility and Carroll Canyon which surrounds it. We met with Jud Harvey, the Plant Manager and Henry Pimentel, also of Hanson Aggregates. We reviewed the SWPPP. No problems were noted. However, the location and extent of Carroll Canyon Creek could be more clearly indicated on at least one of the maps. After the SWPPP review, we performed the site inspection. From the main office which is located on the east side of the site, we drove to the west.

FACILITY: Hanson Carroll Canyon (WDID) 9 37I014663 INSPECTION DATE 12/8/09

Sediment Discharge Area No.1: Dirt road running along the north side of Carroll Canyon Creek. A few hundred yards west of the office, we observed a location along the road with a significant accumulation of sediment and standing water (Photo 2). The road actually runs parallel and adjacent to Carroll Canyon Creek at this point. Photos 3 and 4 show the south side of the road where it appears that flowing water has dislodged fiber rolls. Standing water located east of the fiber rolls appears to have been retained by a rock berm. Therefore, while the rock berm (which extends all the way back to the office area) appears to have prevented sediment-laden water from reaching the creek, the failed fiber rolls may have allowed turbid water to reach the creek. Photo 5 shows the north bank of Carroll Canyon Creek just beyond the area of the fiber roll breach. There did not appear to be any significant sediment accumulation in this area however.

Sediment Discharge Area No. 2: Sediment detention basin located south of the quarry. We proceeded to the west end of the site and parked at the intersection of Camino Santa Fe and the driveway of the facility. Photo 6 shows the detention basin which is used to collect runoff from the quarry. Jud explained that there is a riser in the basin which conducts water directly to Carroll Canyon Creek which is located on the other side of the facility driveway. Rock material packed around the riser is used to filter and slow down the discharge. Photo 6 also shows a brow ditch which conveys water from off-site to the creek using the same outfall as the detention basin. We walked across the driveway to observe Carroll canyon Creek where it leaves the facility (Photo 7). I walked down the bank of the creek and photographed the discharge from the outfall (Photos 8 and 9). The discharge was turbid. Photo 10 shows the Carroll Canyon Creek upstream of the outfall area. Water in this area appeared to be clear and unaffected by sediment. We drove up a dirt road north of the creek and viewed the quarry. There was not a great deal of activity in this area because of the recent rainfall. On the north side of the quarry area, we observed a stream of turbid water which was flowing to the detention basin (Photos 12 and 13). After inspecting the detention basin and quarry area, we slowly drove east along the north bank of Carroll Canyon Creek and did not observe any issues. The creek is undergrounded (apparently in a culvert) for a distance below an area where various aggregate processing activities take place. Photo 11 shows a rock berm above the location where the creek undergrounds. Once again, this type of berm appears to be effective at keeping surface flows from entering the creek.

III. CONCLUSIONS, RECOMMENDATIONS AND ADDITIONAL ITEMS FOR FOLLOWUP

As noted earlier, the impairment of the Los Penaquitos Lagoon by sediment is a major concern. It is also important to note that Carroll Canyon Creek has been identified as the primary source of this impairment. Therefore, any identified sediment discharges in this area require corrective action. Pursuant to the requirements of the Industrial Stormwater Permit, any identified source of sediment discharge must be mitigated to the BAT/BCT standard (Best Available Technology or Best Conventional Technology, as appropriate). The two primary concerns at this facility are 1) The potential for direct discharges into the creek in the area where fiber rolls had been dislodged (along the dirt road that connects the quarry to the processing area) and 2) Turbid discharges from the detention basin. In both of these areas, it is necessary to upgrade Best Management Practices (BMPs) to (at a minimum) prevent visibly turbid discharges from occurring. In Sediment Discharge Area No. 1, all necessary erosion controls and sediment controls must be implemented to prevent sediment discharges from the dirt road to Carroll Canyon Creek from occurring. There is also a need to remove sediment that has encroached on the bank area of the creek (in the area between the dislodged fiber rolls shown in Photo 4). This sediment may enter the creek during a future rain event. In Sediment Discharge Area No. 2, it is necessary to upgrade the detention basin or the manner in which the detention basin is used to achieve a significantly greater reduction in sediment concentration. It is important to note that the Basin Plan standard for turbidity for discharges into surface waters of the Los Penaquitos Watershed is 20 Nephelometric Turbidity Units (NTUs). This standard corresponds to a transparency of one foot, meaning that visible light can penetrate water with a turbidity of 20 NTUs to a depth of one foot. In order to achieve an acceptable level of turbidity, either a major redesign of the detention basin will be needed (possibly including using alternate storage such as a Baker tank) or it may be necessary to augment the system with chemical flocculants. The SWPPP should be revised to include a discussion of all BMP upgrades.

I. COMPLIANCE HISTORY/BACKGROUND

This site has been enrolled in the Industrial Stormwater Permit since October of 1998. In 1999, the site received a Notice of Violation for failure to submit an annual report. The facility is located in a sensitive environment. Carroll Canyon Creek flows through the site from east to west. Also, the Los Penasquitos Lagoon is located downstream of this site and it is impaired for sedimentation and siltation (i.e., on the 303(d) list for impaired water bodies). In addition, recent investigations indicate that Carroll Canyon Creek is the primary source of sediment that is impacting the lagoon. On December 8, 2009 I inspected this site and noted that the sediment basin was discharging turbid water to Carroll Canyon Creek. There was also a potential for discharge along the main road at the facility where it runs alongside the creek. Muddy water had encroached into a grassy area next to the creek. The facility was required to upgrade BMPs in both areas to prevent any future exceedances of discharge standards. The report notes that the standard for Carroll Canyon Creek is 20 Nephelometric Turbidity Units (NTUs). On February 25th, I called Jud Harvey, the Plant Manager, and asked what progress had been made in upgrading the sediment basin. Jud told me that Hanson still had Wayne Chang, an engineer, working on the design of a new basin but that they hadn't actually done anything to upgrade it. He stated that they could not do work on the basin because they would be in trouble if a storm event occurred while the basin was still under construction. I told Jud that in any case they must prevent sediment discharges from occurring. So if they don't upgrade the basin immediately, they must have other contingencies in place to prevent turbid discharges. It was apparent from this discussion that they had not

FACILITY: Hanson Carroll Canyon (WDID) 9 37I014663 INSPECTION DATE 3/2/10

taken such steps. Today's inspection followed a weekend during which about 1.32 inches of rain fell (according to the nearest weather station per NOAA's database).

II. FINDINGS

I arrived at the site and observed the sediment detention basin which is located near the front gate of the facility adjacent to Camino Santa Fe. As shown in Photo 1, there was a significant amount of turbid water in the basin. I proceeded to the outfall where water from the basin is discharged to Carroll Canyon Creek. Turbid water was flowing out of the outfall as shown in Photo 2. This outfall is located at the bottom of the north bank of Carroll Canyon Creek and it discharges directly into the creek. Photo 3 shows turbid water that had ponded just outside the outfall. Photo 4 and 5 show a turbidity plume that formed at the point where the turbid water being discharged from the outfall mixes with water in the creek. I proceeded back to the front gate where I had parked and encountered Henry Pimentel, Production Supervisor for Hanson who asked me what I was doing. I explained that I was there to see if they were continuing to discharge sediment-laden water from their sediment basin and since I had confirmed that a discharge was occurring, I would need to meet with Jud Harvey, the plant manager, and complete my inspection. I also explained the problem with the sediment basin to Henry and made the point that the facility is required to prevent these discharges from occurring. I then drove to the facility's administrative offices and met with Jud Harvey and David Chong, the Environmental Health and Safety manager for the facility. I told Jud that they should be preventing any turbid discharges from occurring and Jud repeated the point he had made last week to the effect that attempting to reconfigure the basin during the rainy season would be a problem. Over the course of the inspection, we discussed what options were available for terminating the sediment discharge. Jud said they planned to enlarge the basin, but needed to wait until there was no threat of rain. I explained to Jud that it was technologically feasible to prevent the discharge from occurring because they can either use active treatment (flocculant) or store the water in a Baker tank (or tanks). Therefore, there is no reason for the facility to be discharging sediment. Even if they implement a long-term fix, such as an upgraded basin, they must implement interim measures to prevent discharges in violation of the Basin Plan. Jud, and David and I went to the sediment basin and the outfall and I showed them the same conditions shown in Photos 2 through 4. On the way back to the administrative office, we stopped at a location where, during the inspection in December, sediment had been observed to be encroaching into the creek area. Turbid water was again ponding in a depression in the road and seeping into the the area of the north bank of Carroll Canyon Creek. Photo 6 shows the ponded water and Photo 7 shows sediment that has accumulated on the other side of a rock berm (a berm that is intended to trap sediment). It did not appear that the sediment had reached the creek at this location, but it is necessary to remove sediment in this area to prevent it from reaching the creek in the future. Further up the road (This is the main road at the facility which runs from the front gate to the main office.) there was another flow of turbid water occurring (Photos 9 and 10). Piles of rock material have been placed along the road to trap sediment, but the turbid water was reaching the creek at the location shown in Photo 11.

III. CONCLUSIONS, RECOMMENDATIONS AND ADDITIONAL ITEMS FOR FOLLOWUP

On the morning of March 2, 2009 (the day after the inspection) I telephoned both Jud and David and told them that they should do whatever is necessary to terminate the discharge from the sediment basin as soon as possible. I referred to the possibility of monetary penalties since there is no question that discharge violations have occurred and that they could have been avoided. I again pointed out that it is technologically possible because either active treatment or using mobile storage tanks would be effective. David said that they will do there best to get something in place within 24 hours. I spoke with Jud after speaking with David and we agreed to again discuss the situation on March 3rd. On March 3rd I spoke with David Chong. He said that they pumped out much of the basin water and sent it back to the quarry. They then partitioned the basin by building two rock dams (using 3/4" rock) thereby creating three compartments. David said these measures resulted in a clear discharge at the outfall. He indicated that the intake of the riser in the basin is near the top of the basin and that water in this zone was now clear. They ordered a 21,000 gallon Baker tank which they will use in conjunction with the detention basin. The tank will be available for use on March 4th. David said that they are still working on a long-term plan and that plan will include building an additional sediment basin as well as incorporating contingency measures into their SWPPP so that future discharges are prevented. I told David that we will be sending an NOV along with a directive to implement both interim and permanent sediment basin upgrades and a requirement for a report that documents the upgrades.

2008-2009

ANNUAL REPORT

FOR
STORM WATER DISCHARGES ASSOCIATED
WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2008 through June 30, 2009

An annual report is required to be submitted to your local Regional Water Quality Control Board (Regional Board) by July 1 of each year. This document must be certified and signed, under penalty of perjury, by the appropriate official of your company. Many of the Annual Report questions require an explanation. Please provide explanations on a separate sheet as an attachment. **Retain a copy of the completed Annual Report for your records.**

Please circle or highlight any information contained in Items A, B, and C below that is new or revised so we can update our records. Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers and e-mail addresses of the Regional Board contacts, as well as the Regional Board office addresses can be found at http://www.waterboards.ca.gov/stormwtr/contact.html. To find your Regional Board information, match the first digit of your WDID number with the corresponding number that appears in parenthesis on the first line of each Regional Board office.

GENERAL INFORMATION:

A. Facility Information:

Facility WDID No: 937I014663

Facility Business Name: Hanson Aggregates (Carroll Canyon)

2008-2009
ANNUAL REPORT

SPECIFIC INFORMATION

MONITORING AND REPORTING PROGRAM

D. SAMPLING AND ANALYSIS EXEMPTIONS AND REDUCTIONS

1. For the reporting period, was your facility exempt from collecting and analyzing samples from **two** storm events in accordance with sections B.12 or 15 of the General Permit?

   ☒ **YES** Go to Item D.2 ☐ **NO** Go to Section E

2. Indicate the reason your facility is exempt from collecting and analyzing samples from **two** storm events. Attach a copy of the first page of the appropriate certification if you check boxes ii, iii, iv, or v.

   i. ☒ Participating in an Approved Group Monitoring Plan **Group Name:** Building Materials Industry

   ii. ☐ Submitted **No Exposure Certification (NEC)** Date Submitted: ___/___/___

   Re-evaluation Date: ___/___/___

   Does facility continue to satisfy NEC conditions? ☐ YES ☐ NO

   iii. ☐ Submitted **Sampling Reduction Certification (SRC)** Date Submitted: ___/___/___

   Re-evaluation Date: ___/___/___

   Does facility continue to satisfy SRC conditions? ☐ YES ☐ NO

   iv. ☐ Received Regional Board Certification Certification Date: ___/___/___

   v. ☐ Received Local Agency Certification Certification Date: ___/___/___

3. If you checked boxes i or iii above, were you scheduled to sample **one** storm event during the reporting year?

   ☐ **YES** Go to Section E ☒ **NO** Go to Section F

4. If you checked boxes ii, iv, or v, go to Section F.

E. SAMPLING AND ANALYSIS RESULTS

1. How many storm events did you sample? _____ If less than 2, **attach explanation** (if you checked item D.2.i or iii. above, only attach explanation if you answer "0").

2. Did you collect storm water samples from the first storm of the wet season that produced a discharge during scheduled facility operating hours? (Section B.5 of the General Permit)

   ☐ **YES** ☐ **NO** **attach explanation** **(Please note that if you do not sample the first storm event, you are still required to sample 2 storm events)**

3. How many storm water discharge locations are at your facility? _____

2008-2009
ANNUAL REPORT

4. For each storm event sampled, did you collect and analyze a sample from each of the facility's' storm water discharge locations? ☐ YES, go to Item E.6 ☐ NO

5. Was sample collection or analysis reduced in accordance with Section B.7.d of the General Permit? ☐ YES ☐ NO, **attach explanation**

   If "YES", **attach documentation** supporting your determination that two or more drainage areas are substantially identical.

   Date facility's drainage areas were last evaluated ___/___/____

6. Were <u>all</u> samples collected during the first hour of discharge? ☐ YES ☐ NO, **attach explanation**

7. Was <u>all</u> storm water sampling preceded by three (3) working days without a storm water discharge? ☐ YES ☐ NO, **attach explanation**

8. Were there any discharges of storm water that had been temporarily stored or contained? (such as from a pond) ☐ YES ☐ NO, go to Item E.10

9. Did you collect and analyze samples of temporarily stored or contained storm water discharges from two storm events? (or one storm event if you checked item D.2.i or iii. above) ☐ YES ☐ NO, **attach explanation**

10. Section B.5. of the General Permit requires you to analyze storm water samples for pH, Total Suspended Solids (TSS), Specific Conductance (SC), Total Organic Carbon (TOC) or Oil and Grease (O&G), other pollutants likely to be present in storm water discharges in significant quantities, and analytical parameters listed in Table D of the General Permit.

    a. Does Table D contain any additional parameters related to your facility's SIC code(s)? ☐ YES ☐ NO, Go to Item E.11

    b. Did you analyze all storm water samples for the applicable parameters listed in Table D? ☐ YES ☐ NO

    c. If you did not analyze all storm water samples for the applicable Table D parameters, check one of the following reasons:

    _____ In prior sampling years, the parameter(s) have not been detected in significant quantities from two consecutive sampling events. **Attach explanation**

    _____ The parameter(s) is not likely to be present in storm water discharges and authorized non-storm water discharges in significant quantities based upon the facility operator's evaluation. **Attach explanation**

    _____ Other. **Attach explanation**

11. For each storm event sampled, attach a copy of the laboratory analytical reports and report the sampling and analysis results using **Form 1** or its equivalent. The following must be provided for each sample collected:

- Date and time of sample collection
- Name and title of sampler
- Parameters tested
- Name of analytical testing laboratory
- Discharge location identification
- Testing results
- Test methods used
- Test detection limits
- Date of testing
- Copies of the laboratory analytical results

2008-2009
ANNUAL REPORT

F. QUARTERLY VISUAL OBSERVATIONS

1. **Authorized Non-Storm Water Discharges**

Section B.3.b of the General Permit requires quarterly visual observations of all authorized non-storm water discharges and their sources.

a. Do authorized non-storm water discharges occur at your facility?

☐ **YES** ☒ **NO** Go to Item F.2

b. Indicate whether you visually observed all authorized non-storm water discharges and their sources during the quarters when they were discharged. **Attach an explanation for any "NO" answers.** Indicate "N/A" for quarters without any authorized non-storm water discharges.

July-September	☐ **YES**	☐ **NO**	☐ **N/A**	October-December	☐ **YES**	☐ **NO**	☐ **N/A**
January-March	☐ **YES**	☐ **NO**	☐ **N/A**	April-June	☐ **YES**	☐ **NO**	☐ **N/A**

c. Use **Form 2** to report quarterly visual observations of authorized non-storm water discharges or provide the following information:

i. name of each authorized non-storm water discharge
ii. date and time of observation
iii. source and location of each authorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** new or revised BMPs necessary to reduce or prevent pollutants in authorized non-storm water discharges. Provide new or revised BMP implementation date.

2. **Unauthorized Non-Storm Water Discharges**

Section B.3.a of the General Permit requires quarterly visual observations of all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources.

a. Indicate whether you visually observed all drainage areas to detect the presence of unauthorized non- storm water discharges and their sources. **Attach an explanation for any "NO" answers.**

July-September	☒ **YES**	☐ **NO**	October-December	☒ **YES**	☐ **NO**
January-March	☒ **YES**	☐ **NO**	April-June	☒ **YES**	☐ **NO**

b. Based upon the quarterly visual observations, were any unauthorized non-storm water discharges detected?

☐ **YES** ☒ **NO** Go to Item F.2.d

c. Have each of the unauthorized non-storm water discharges been eliminated or permitted?

☐ **YES** ☐ **NO** **Attach explanation**

d. Use **Form 3** to report quarterly unauthorized non-storm water discharge visual observations or provide the following information: None observed

i. name of each unauthorized non-storm water discharge
ii. date and time of observation
iii. source and location of each unauthorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** corrective actions necessary to eliminate the source of each unauthorized non-storm water discharge and to clean impacted drainage areas. Provide date unauthorized non-storm water discharge(s) was eliminated or scheduled to be eliminated.

2008-2009

ANNUAL REPORT

G. MONTHLY WET SEASON VISUAL OBSERVATIONS

Section B.4.a of the General Permit requires you to conduct monthly visual observations of storm water discharges at all storm water discharge locations during the wet season. These observations shall occur during the first hour of discharge or, in the case of temporarily stored or contained storm water, at the time of discharge.

1. Indicate below whether monthly visual observations of storm water discharges occurred at all discharge locations. **Attach an explanation for any "NO" answers.** Include in this explanation whether any eligible storm events occurred during scheduled facility operating hours that did not result in a storm water discharge, and provide the date, time, name and title of the person who observed that there was no storm water discharge.

	YES	NO		YES	NO
October	☐	☒	February	☐	☒
November	☒	☐	March	☐	☒
December	☒	☐	April	☐	☒
January	☐	☒	May	☐	☒

2. Report monthly wet season visual observations using **Form 4** or provide the following information:

   a. date, time, and location of observation
   b. name and title of observer
   c. characteristics of the discharge (i.e., odor, color, etc.) and source of any pollutants observed
   d. any new or revised BMPs necessary to reduce or prevent pollutants in storm water discharges. Provide new or revised BMP implementation date.

ANNUAL COMPREHENSIVE SITE COMPLIANCE EVALUATION (ACSCE)

H. ACSCE CHECKLIST

Section A.9 of the General Permit requires the facility operator to conduct one ACSCE in each reporting period (July 1-June 30). Evaluations must be conducted within 8-16 months of each other. The SWPPP and monitoring program shall be revised and implemented, as necessary, within 90 days of the evaluation. The checklist below includes the minimum steps necessary to complete a ACSCE. Indicate whether you have performed each step below. **Attach an explanation for any "NO" answers.**

1. Have you inspected all potential pollutant sources and industrial activities areas? ☒ YES ☐ NO
   The following areas should be inspected:

   - areas where spills and leaks have occurred during the last year
   - outdoor wash and rinse areas
   - process/manufacturing areas
   - loading, unloading, and transfer areas
   - waste storage/disposal areas
   - dust/particulate generating areas
   - erosion areas
   - building repair, remodeling, and construction
   - material storage areas
   - vehicle/equipment storage areas
   - truck parking and access areas
   - rooftop equipment areas
   - vehicle fueling/maintenance areas
   - non-storm water discharge generating areas

2. Have you reviewed your SWPPP to assure that its BMPs address existing potential pollutant sources and industrial activities areas? ☒ YES ☐ NO

3. Have you inspected the entire facility to verify that the SWPPP's site map is up-to-date? The following site map items should be verified: ☒ YES ☐ NO

   - facility boundaries
   - outline of all storm water drainage areas
   - areas impacted by run-on
   - storm water discharges locations
   - storm water collection and conveyance system
   - structural control measures such as catch basins, berms, containment areas, oil/water separators, etc.

4. Have you reviewed all General Permit compliance records generated since the last annual evaluation? ☒ YES ☐ NO

   The following records should be reviewed:

   - quarterly authorized non-storm water discharge visual observations
   - monthly storm water discharge visual observation
   - records of spills/leaks and associated clean-up/response activities
   - quarterly unauthorized non-storm water discharge visual observations
   - Sampling and Analysis records
   - preventative maintenance inspection and maintenance records

5. Have you reviewed the major elements of the SWPPP to assure compliance with the General Permit? ☒ YES ☐ NO

   The following SWPPP items should be reviewed:

   - pollution prevention team
   - list of significant materials
   - description of potential pollutant sources
   - assessment of potential pollutant sources
   - identification and description of the BMPs to be implemented for each potential pollutant source

6. Have you reviewed your SWPPP to assure that a) the BMPs are adequate in reducing or preventing pollutants in storm water discharges and authorized non-storm water discharges, and b) the BMPs are being implemented? ☒ YES ☐ NO

   The following BMP categories should be reviewed:

   - good housekeeping practices
   - spill response
   - employee training
   - erosion control
   - quality assurance
   - preventative maintenance
   - material handling and storage practices
   - waste handling/storage
   - structural BMPs

7. Has all material handling equipment and equipment needed to implement the SWPPP been inspected? ☒ YES ☐ NO

I. ACSCE EVALUATION REPORT

The facility operator is required to provide an evaluation report that includes:

- identification of personnel performing the evaluation
- the date(s) of the evaluation
- necessary SWPPP revisions
- schedule for implementing SWPPP revisions
- any incidents of non-compliance and the corrective actions taken

Use **Form 5** to report the results of your evaluation or develop an equivalent form.

J. ACSCE CERTIFICATION

The facility operator is required to certify compliance with the Industrial Activities Storm Water General Permit. To certify compliance, both the SWPPP and Monitoring Program must be up to date and be fully implemented.

Based upon your ACSCE, do you certify compliance with the Industrial Activities Storm Water General Permit? ☒ YES ☐ NO

If you answered "NO" **attach an explanation** to the ACSCE Evaluation Report why you are not in compliance with the Industrial Activities Storm Water General Permit.

2008-2009
ANNUAL REPORT

ATTACHMENT SUMMARY

Answer the questions below to help you determine what should be attached to this annual report. Answer NA (Not Applicable) to questions 2-4 if you are not required to provide those attachments.

1.	Have you attached Forms 1,2,3,4, and 5 or their equivalent?	☒ YES (Mandatory)		
2.	If you conducted sampling and analysis, have you attached the laboratory analytical reports?	☒ YES	☐ NO	☐ NA
3.	If you checked box II, III, IV, or V in item D.2 of this Annual Report, have you attached the first page of the appropriate certifications?	☐ YES	☐ NO	☒ NA
4.	Have you attached an explanation for each "NO" answer in items E.1, E.2, E.5-E.7, E.9, E.10.c, F.1.b, F.2.a, F.2.c, G.1, H.1-H.7, or J?	☒ YES	☐ NO	☐ NA

ANNUAL REPORT CERTIFICATION

I am duly authorized to sign reports required by the INDUSTRIAL ACTIVITIES STORM WATER GENERAL PERMIT (see Standard Provision C.9) and I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

2008-2009
ANNUAL REPORT

G-1: There were no discharges during operating hours for the months of October, and January through May.

DESCRIPTION OF BASIC ANALYTICAL PARAMETERS

The Industrial Activities Storm Water General Permit (General Permit) requires you to analyze storm water samples for at least four parameters. These are pH, Total Suspended Solids (TSS), Specific Conductance (SC),and Total Organic Carbon (TOC). Oil and Grease (O&G) may be substituted for TOC. In addition, you must monitor for any other pollutants which you believe to be present in your storm water discharge as a result of industrial activity and analytical parameters listed in Table D of the General Permit. There are no numeric limitations for the parameters you test for.

The four parameters which the General Permit requires to be tested are considered *indicator* parameters. In other words, regardless of what type of facility you operate, these parameters are nonspecific and general enough to usually provide some indication whether pollutants are present in your storm water discharge. The following briefly explains what each of these parameters mean:

pH is a numeric measure of the hydrogen-ion concentration. The neutral, or acceptable, range is within 6.5 to 8.5. At values less than 6.5, the water is considered acidic; above 8.5 it is considered alkaline or basic. An example of an acidic substance is vinegar, and a alkaline or basic substance is liquid antacid. Pure rainfall tends to have a pH of a little less than 7. There may be sources of materials or industrial activities which could increase or decrease the pH of your storm water discharge. If the pH levels of your storm water discharge are high or low, you should conduct a thorough evaluation of all potential pollutant sources at your site.

Total Suspended Solids (TSS) is a measure of the undissolved solids that are present in your storm water discharge. Sources of TSS include sediment from erosion of exposed land, and dirt from impervious (i.e. paved) areas. Sediment by itself can be very toxic to aquatic life because it covers feeding and breeding grounds, and can smother organisms living on the bottom of a water body. Toxic chemicals and other pollutants also adhere to sediment particles. This provides a medium by which toxic or other pollutants end up in our water ways and ultimately in human and aquatic life. TSS levels vary in runoff from undisturbed land. It has been shown that TSS levels increase significantly due to land development.

Specific Conductance (SC) is a numerical expression of the ability of the water to carry an electric current. SC can be used to assess the degree of mineralization, salinity, or estimate the total dissolved solids concentration of a water sample. Because of air pollution, most rain water has a SC a little above zero. A high SC could affect the usability of waters for drinking, irrigation, and other commercial or industrial use.

Total Organic Carbon (TOC) is a measure of the total organic matter present in water. (All organic matter contains carbon) This test is sensitive and able to detect small concentrations of organic matter. Organic matter is naturally occurring in animals, plants, and man. Organic matter may also be man made (so called synthetic organics). Synthetic organics include pesticides, fuels, solvents, and paints. Natural organic matter utilizes the oxygen in a receiving water to biodegrade. Too much organic matter could place a significant oxygen demand on the water, and possibly impact its quality. Synthetic organics either do not biodegrade or biodegrade very slowly. Synthetic organics are a source of toxic chemicals that can have adverse affects at very low concentrations. Some of these chemicals bioaccumulate in aquatic life. If your levels of TOC are high, you should evaluate all sources of natural or synthetic organics you may use at your site.

Oil and Grease (O&G) is a measure of the amount of oil and grease present in your storm water discharge. At very low concentrations, O&G can cause a sheen (that floating "rainbow") on the surface of water (1 qt. of oil can pollute 250,000 gallons of water). O&G can adversely affect aquatic life and create unsightly floating material and film on water, thus making it undrinkable. Sources of O&G include maintenance shops, vehicles, machines and roadways.

If you have any questions regarding whether or not your constituent concentrations are too high, please contact your local Regional Board office. The United States Environmental Protection Agency (USEPA) has published stormwater discharge benchmarks for a number of parameters. These benchmarks may be helpful when evaluating whether additional BMPs are appropriate. These benchmarks can be accessed at our website at http://www.waterboards.ca.gov. It is contained in the Sampling and Analysis Reduction Certification.

FORM 3-QUARTERLY VISUAL OBSERVATIONS OF UNAUTHORIZED NON-STORM WATER DISCHARGES (NSWDs)

- Unauthorized NSWDs are discharges (such as wash or rinse waters) that do not meet the conditions provided in Section D (pages 5-6) of the General Permit.
- Quarterly visual observations are required to observe current and detect prior unauthorized NSWDs.
- Quarterly visual observations are required during dry weather and at all facility drainage areas.
- Each unauthorized NSWD source, impacted drainage area, and discharge location must be identified and observed.
- Unauthorized NSWDs that can not be eliminated within 90 days of observation must be reported to the Regional Board in accordance with Section A.10.e of the General Permit.
- Make additional copies of this form as necessary.

FORM 4-MONTHLY VISUAL OBSERVATIONS OF STORM WATER DISCHARGES

Storm water discharge visual observations are required for at least one storm event per month between October 1 and May 31.

- Visual observations must be conducted during the first hour of discharge at all discharge locations.
- Discharges of temporarily stored or contained storm water must be observed at the time of discharge.
- Indicate "None" in the first column of this form if you did not conduct a monthly visual observation.
- Make additional copies of this form as necessary.
- Until a monthly visual observation is made, record any eligible storm events that do not result in a storm water discharge and note the date, time, name, and title of who observed there was no storm water discharge.

September 15 - October 15, 2017 Due Diligence LLC Report Package Addendum 2 October 10, 2017

2008- 2009

ANNUAL REPORT

Annual Comprehensive Site Compliance Evaluation Addendum

The Evaluation Date shown on Form 5 is date of site visit and BMP evaluation. Annual Report certification date is the date Annual Report was filled out (including Form 5 itself).

A TSS concentration of 4,670 mg/L was measured during 2007-08 season. The following corrective actions were conducted during the 2008-09 season to address this issue:

- The area adjacent to the creekbed to the south of the main access road was re-graded with gravel fill around the sewer access hatches.
- The roadway berms were also improved and repaired to eliminate the low-point where storm water tended to overflow the road and enter the creek.

Another related BMP implemented during the reporting year is:

- Large berms were added and the ground was re-graded in the upper (east) end of the plant near the sand stockpiles in order to prevent storm water run-off into the creek. Water is now filtered or diverted into the onsite retention ponds

To: Steve (Oxnard) NA Zacks; Mitchell, Roger@Waterboards
Subject: RE: Chula Vista- WDR 94-07

Hi Steve,

Robert Mitchell is now handling these projects. I'm sure you'll enjoy working with him.

Best regards,
Ben

From: Steve (Oxnard) NA Zacks [mailto:Steve.Zacks@hanson.biz]
Sent: Monday, August 13, 2012 11:08 AM
To: Tobler, Benjamin@Waterboards
Subject: Chula Vista- WDR 94-07

Ben,
This is a request to terminate WDR 94-07. The operation associated with this WDR has not operated since March 2008 and all plant facilities have been removed. A Notice of Termination for stormwater permit coverage was issued in May 2012 (see attached).

Lehigh Hanson recently became aware we are overdue on a WDR invoice and am in the process of obtaining a check for this invoice.

Thanks,

Steve Zacks

Review Date: 08/15/2007

Termination Date: **08/15/2007**

Dear Permittee:

This letter is to inform you that we have approved the Notice of Termination (NOT) of Coverage under the Statewide Storm Water General Permit for WDID number as referenced above. Please keep this letter as proof of termination under the Statewide Storm Water General Permit. Should site conditions change such that coverage under the Storm Water General Permit is again necessary, you must submit a new Notice of Intent, site map, and appropriate fee.

Please note if there are applicable unpaid invoice(s) when the NOT is approved, all outstanding invoices are required to be paid in full. If you have any questions regarding fees, please contact the Fee Unit at (916) 341-5247.

If you have any further questions, please contact the California Regional Water Quality Control Board, San Diego Region at 858-467-2952.

Sincerely,

for Peter Peuron

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 36 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to,

EXECUTIVE SUMMARY

identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2017 has revealed that there are 14 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 28 LUST sites within approximately 0.5 miles of the target property.

SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there are 30 SAN DIEGO CO. SAM sites within approximately 0.5 miles of the target property.

SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the SLIC list, as provided by EDR, has revealed that there are 21 SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 10 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 12 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Measure:	Gal(s)
Other:	Not reported
Date/Time:	1300
Year:	2014
Agency:	Hanson Aggregates
Incident Date:	4/2/2014
Admin Agency:	Not reported
Amount:	Not reported
Contained:	Yes
Site Type:	Not reported
E Date:	Not reported
Substance:	Hydraulic Oil
Quantity Released:	15
Unknown:	Not reported
Substance #2:	Not reported
Substance #3:	Not reported
Evacuations:	Not reported
Number of Injuries:	Broken Oil Line
Number of Fatalities:	Not reported
#1 Pipeline:	No
#2 Pipeline:	No
#3 Pipeline:	No
#1 Vessel >= 300 Tons:	No
#2 Vessel >= 300 Tons:	No
#3 Vessel >= 300 Tons:	No
Evacs:	No
Injuries:	Other
Fatals:	No
Comments:	Not reported
Description:	RP states that a broken hydraulic line on a semi trailer caused the release. Cleanup is in progress.

FINDS:

Registry ID: 110001187251

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Agency Name:	HANSON AGGREGATES PACIFIC SW
Agency Address:	PO BOX 639069
Agency City,St,Zip:	SAN DIEGO 921639069
Agency Contact:	Pete Zagar
Agency Telephone:	8585772772
Agency Type:	Private
SIC Code:	1442
SIC Code 2:	3273
Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste:	WSHWTR
Waste Type2:	Not reported
Waste2:	Washwater Waste (Product washwater wastes: E.G., photo reuse wastewater, vegetable washwater)
Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002896251

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Lead Agency: SAN DIEGO COUNTY LOP
Case Worker: CH
Local Agency: SAN DIEGO COUNTY LOP
RB Case Number: Not reported
LOC Case Number: H14610-004
File Location: Local Agency
Potential Media Affect: Aquifer used for drinking water supply, Soil, Under Investigation
Potential Contaminants of Concern: Diesel, Gasoline
Site History: On 9/24/2009, two underground storage tanks, two dispensers, and associated piping were removed from the site. At that time, soil samples and a standing water grab sample in the tank excavation were taken under the direction of DEH, and the results showed TPH impacts in the gasoline and diesel ranges. The tank excavation was back-filled with the soil removed during the excavation and clean, imported fill. The standing water in the tank excavation was not removed prior to back-filling the excavation. The consultant drilled six soil borings to a depth of 20 feet below ground surface (bgs). These borings were located adjacent to, and radiating outward from the location of the USTs. TPH for gasoline and diesel were below laboratory detection limits in all soil samples. BTEX, oxygenates, and naphthalene were not detected in any soil samples. Based upon

7 UP/RC BOTTLING COMPANY OF SAN DIEGO (Continued) **1000142412**

these results, the consultant concluded that the unauthorized release encountered during UST removal was limited both in quantity and locality; and that the source of the release was mitigated when the USTs, piping, and dispensers were removed. The residual petroleum-impacted soil is estimated to be limited to an area of approximately 50 square feet, extending to approximately 5 feet bgs, and is conservatively estimated to be less than 10 cubic yards. The consultant attributed the water in the tank excavations to irrigation run-off from adjacent landscaped areas, as groundwater was not encountered in any of the borings (to 20 feet bgs) and historical data on site indicates groundwater is at least 45 feet bgs. The consultant recommended no further action with respect to site assessment or mitigation, as the residual petroleum-impacted soil beneath the site poses no risk of adverse impacts to public health or ground or surface water resources; and that the case be closed. DEH concurs with the consultants conclusions and recommendation to close the case.

FINDS:

Registry ID: 110002673474

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 4940

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 50520

Violation Status: No violations found

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 928

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 918

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 928

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 835

Waste code: D011
Waste name: SILVER
Amount (Lbs): 835

Waste code: D022
Waste name: CHLOROFORM
Amount (Lbs): 37

Waste code: D035

FINDS:

Registry ID: 110018887953

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

FINDS:

Registry ID: 110002909960

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Owner/Operator Summary:
- Owner/operator name: STONE YARD INC
- Owner/operator address: Not reported
  Not reported
- Owner/operator country: Not reported
- Owner/operator telephone: Not reported
- Legal status: Private
- Owner/Operator Type: Operator
- Owner/Op start date: 06/22/2007
- Owner/Op end date: Not reported

- Owner/operator name: LINDEN S BLUE
- Owner/operator address: 3550 GENERAL ATOMICS CT
  SAN DIEGO, CA 92121
- Owner/operator country: US
- Owner/operator telephone: Not reported
- Legal status: Private
- Owner/Operator Type: Owner
- Owner/Op start date: 01/01/2005
- Owner/Op end date: Not reported

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

STONE YARD INC (Continued) **1001459747**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Historical Generators:
- Date form received by agency: 01/23/1986

Violation:	NO UPF PERMIT FOR HAZMATS
Violation Citation:	A Unified Program Facility permit has not been obtained for hazardous materials. 68.905
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	07/23/2007
Violation Code:	6HV0131
Violation:	UPF Permit NOT OBTAINED for HAZWASTE
Violation Citation:	A Unified Program Facility permit has not been obtained for the generation of hazardous waste. 68.905
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	07/23/2007
Violation Code:	6HV0132
Violation:	EPA ID NUMBER NOT OBTAINED/MAINTAINED
Violation Citation:	Generator of hazardous waste has not obtained/maintained an EPA identification number. CCR 66262.12(a)
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	07/23/2007
Violation Code:	6HV0301
Violation:	HAZWASTE:UNAUTHORIZED DISPOSAL
Violation Citation:	Disposal or causing the disposal of hazardous waste to an unauthorized point (ground, storm drain, sewer system, trash, or air). HSC 25189.5(a) or 25189(d)
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	07/23/2007
Violation Code:	6HV0302
Violation:	HAZWASTE:UNLAWFUL TRANSPORTATION
Violation Citation:	Hazardous waste generator has unlawfully transported hazardous waste. HSC 25163(a)
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	07/23/2007
Violation Code:	6HV0303
Violation:	WASTE TRANSPORT W/O MANIFEST
Violation Citation:	Hazardous waste generator has transported a hazardous waste off-site without preparing a manifest prior to transport. 66262.20(a), 25160.2(b)9
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	07/23/2007
Violation Code:	6HV0227
Violation:	HAZWASTE TANK/CONTAINER W/O LABEL/DATE

HYBRITECH INC (Continued) **1001075506**

Violation Citation:	Failed to properly label/date hazardous waste container &/or tank. 66262.34(f)
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	07/23/2007
Violation Code:	6HV0228
Violation:	CONTAINER NOT KEPT CLOSED
Violation Citation:	Failed to keep container closed. CFR 265.173
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	07/23/2007
Violation Code:	6HV1004
Violation:	HMBP NOT SUBMITTED TO HMD
Violation Citation:	Hazardous Materials Handler has not submitted a completed Business Plan to the HMMD. HSC 25505(a)
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	07/23/2007
Violation Code:	6HV0232
Violation:	HW CONTAINER IN POOR CONDITION
Violation Citation:	Waste accumulated in a container in poor condition. CFR 265.171
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	07/23/2007
Violation Code:	6HV0407
Violation:	EMPLOYEE TRAINING NOT ADEQUATE
Violation Citation:	Employee training program for small quantity generator of hazardous waste is inadequate. CFR 262.34(d)(5)(iii)
Activity:	ACTIVE
Permit Number:	208357
Update Date:	11/02/2012
Inspection Date:	01/18/2011
Violation Code:	6HV0217
Violation:	HAZMAT CON. NOT REPACKAGED WI 96 HRS.
Violation Citation:	Failed to repackage damaged/deteriorated hazardous material container within 96 hours. 25124(b)(3)(B) & 66262.34(f)
Activity:	ACTIVE
Permit Number:	208357
Business Type:	6HK70
EPA Id Number:	CAL000323183

Registry ID: 110000887238

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location: Local Agency
Potential Media Affect: Soil
Potential Contaminants of Concern: Diesel, Gasoline
Site History: Note: Please see "Site Documents" for additional information.

DIAMOND ENVIRONMENTAL SERVICES, LLC (Continued) **S106063080**

Approximately 300 feet of unleaded gasoline and diesel fuel piping was removed from the site on January 29, 2004, during re-piping operations. Soil staining was observed in some locations, and nine subsurface soil samples were collected from beneath dispensers and piping. All nine samples were analyzed for total petroleum hydrocarbons as gasoline (TPH-g), and seven of the nine samples were analyzed for TPH as diesel (TPH-d). The soil sample with the highest TPH-g concentration (310 milligrams per kilogram [mg/kg]) was also analyzed for benzene (1.72 mg/kg), toluene (25.1 mg/kg), ethylbenzene (10.7 mg/kg), and xylenes (68 mg/kg) (BTEX), as well as fuel oxygenates (none detected). Based on the elevated concentrations of petroleum hydrocarbons in the soil samples, an unauthorized release case was opened by DEH/SAM in February 2006. Twenty additional soil samples were collected from seven soil borings drilled at the site on April 16, 2009. TPH-g, BTEX, naphthalene, and fuel oxygenates were not detected in any of the soil samples. TPH-d was detected in two of the soil samples at concentrations of 22 mg/kg and 120 mg/kg. One of the seven soil borings was converted to a groundwater monitoring well (MW-1). The well was installed between the dispenser islands and a stream/riverbed located approximately 75 feet north. Beneficial uses have been designated for site groundwater and surface water in the vicinity of the site. Two groundwater monitoring and sampling events were conducted at the site, in April and October 2009. TPH-g, TPH-d, BTEX, naphthalene, and fuel oxygenates were not detected in the MW-1 groundwater samples. Surface water was flowing within the riverbed under low-flow conditions in April 2009, but the riverbed was dry in October 2009. The consultant did not identify any water production wells within \\% mile of the property. The consultant states that the results of the soil and groundwater assessment operations conducted at the site indicate that the unauthorized release was limited to a small volume of gasoline and diesel fuel in the vicinity of the central fuel dispenser island. The consultant also states that the source of the leak was apparently near surface leaks in the dispenser/piping system, and estimates that the volume of impacted soil containing over 100 mg/kg TPH is approximately 44 cubic yards. The consultant concludes the following: 1) migration of petroleum hydrocarbons appears to be negligible due to the low permeability of the clayey matrix, 2) groundwater and surface water were not impacted by the release of petroleum fuel, and 3) the petroleum-impacted soil beneath the site poses no risk of adverse impacts to public health, surface water resources, groundwater resources, or any other sensitive receptors. Based on the results of the site assessment and groundwater monitoring operations, the consultant recommends no further action at the site with respect to site assessment or mitigation. DEH/SAM concurs, and approves site closure with no further action.

Description:	Caller states: At the San Diego Freight Terminal, a trailer was placed on a door to be unloaded. When they opened the door an overwhelming odor came from the trailer. The facility attempted to contact their emergency response company. According to the report no one answered the phone. At that time 911 was called. Emergency response crews were dispatched. The fire department evacuated the facility; it is unknown how many people were evacuated, however it is believed to be less than 100. Three employees have been transported to the hospital for vomiting and dizziness. The local authorities have HAZMAT on scene. At 0832 they were gearing up to preform a level B entry into the trailer.

Potential Media Affected:	Not reported
Potential Contaminants of Concern:	Not reported
Site History:	The December 2012 Phase I Environmental Site Assessment (ESA) report indicated that the Site consists of two connected buildings, parking lots, and landscaped areas that encompass an approximately 4.1-acre area. The two, single-story buildings cover approximately 63,000 square feet. The buildings are currently unoccupied and were most recently used as office and laboratory space for laser technology

FLANDERS COURT (Continued) **S113034770**

research and development. The ESA concluded that based on the reported use of halogenated volatile organic compounds (HVOCs) such as tetrachloroethylene (PCE) at the Site, the reported length of time that HVOCs have been used at the Site (since the early 1990s), and the reported quantities of halogenated solvent waste generated at the Site, there was a moderate likelihood that the long term use of HVOCs at the Site has resulted in recognized environmental condition (REC). Based on the REC and a future property transfer, the property owner submitted a Voluntary Assistance Program (VAP) application and a VAP case was opened on March 29, 2013. On December 11, 2012, SCS Engineers (SCS) conducted a soil vapor survey. Eleven soil vapor probes were sampled within and immediately adjacent to the buildings. SCS reported soil vapor concentrations of vinyl chloride above the risk-based screening level (RBSL) at all sample locations. In addition, one or more of the following compounds were detected in four samples at concentrations above their respective RBSLs: chloroform, carbon tetrachloride, and PCE. SCS conducted a limited human health risk assessment (HHRA) using the soil vapor data and the San Diego County Department of Department of Environmental Health (DEH), Site Assessment & Mitigation Vapor Risk Assessment Model. The limited HHRA reported a potential vapor intrusion risk of 5 x 10-6 and a hazard index of 1.40 x 10-1. In February 2013, Geosyntec conducted a soil vapor survey to confirm the results of the December 2012 investigation. The February 2013 vapor intrusion assessment partially confirmed the results of the December 2012 soil vapor investigation. PCE, carbon tetrachloride and chloroform were measured at concentrations similar to those measured during the December 2012 event. PCE, carbon tetrachloride and chloroform were detected in sub-slab soil vapor above their respective RBSLs in three general areas: 1) Former Hellads Lab and the adjoining Mechanical Room at 10247 Flanders Court; 2) Former Storage Room, located approximately 50 feet southwest of the former Hellads Lab, at 10247 Flanders Court; 3) Shipping/Receiving and the adjoining former Hazardous Waste Storage Area at 10240 Flanders Court. Indoor air samples were also collected in February 2013, to directly assess potential vapor intrusion. Indoor air measurements indicated that chemical concentrations were consistent with outdoor air levels (which indicate background sources for VOCs detected in indoor air) or indoor air concentrations were below RBSLs. Based on the results of the February 2013 investigation, additional characterization was recommended to assess the vertical and lateral extent of VOCs in soil and soil vapor beneath the Site, and re-sampling of indoor air was recommended to confirm previous indoor air measurements. Between April and June 2013, Geosyntec conducted a follow-up vapor intrusion assessment to further evaluate soil vapor concentrations measured in December 2012 and February 2013. Vinyl chloride (which was found during the 2012 SCS investigation) was not detected in any sub-slab soil vapor samples during any 2013 sampling events. Based on their findings, Geosyntec concluded that VOCs detected in the soil vapor samples do not pose an unacceptable risk; however, soil impacts were not defined to non-detect levels vertically or laterally in the vicinity of the former Hellads Lab and adjoining Mechanical Room. Between July and August 2013, Geosyntec oversaw the advancement of five soil borings. A total of 21 soil samples were collected and analyzed. Based on their findings, Geosyntec concluded that soil contamination has been defined vertically and laterally at the Site. Geosyntec recommended that DEH grant a No Further Action. Based on

FLANDERS COURT (Continued) **S113034770**

the information provided, DEH concurs with Geosyntecs conclusions and recommendation.

Violation Code:	2030036 Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 23 CCR 16 2635(b)(2), 2665

Latitude: 32.884767181
Longitude: -117.162585
Case Type: Cleanup Program Site
Case Worker: BKM
Local Agency: DEPARTMENT OF TOXIC SUBSTANCES CONTROL
RB Case Number: 2090018
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Tetrachloroethylene (PCE)
Site History: The Sunflower Properties Inc. Site is located at 9755 Distribution Avenue, San Diego, California, the property is 2.12 acres parcel of land (APN 343-100-26). On or about June 15, 1975, the original owners of the site, Nicholas and Hronopoulos, entered into a 10 year lease agreement with Goss-Jewett Company for the Sunflower site. Goss-Jewett was in the business of receiving, selling and distributing perchloroethylene (PCE), a solvent typically used in dry cleaning operations. The PCE contamination at the site resulted from Goss-Jewett's operations between June 1975 and December 1990. Detectable concentrations of PCE in soil vapors ranged from 1.9 to 8444 mg/l. The highest concentrations of PCE in soil vapor were detected at sample points SV-11 (8444 mg/l), and SV-12 (7579 mg/l), located adjacent to the train loading dock on the south side of the site structure. Soil sampling consisted of installing two soil borings in the area where the greatest concentrations of PCE in soil vapors were detected north of the site structure, near the truck loading dock (at sample point SV-2, PCE was detected at 6431 mg/l). PCE concentrations in the soil from the borings were as high as 10,059,000 mg/kg at B-2, (at 2 feet) and 248,863 mg/kg at B-1 (at 2 feet). On June 19, 1997, a technical report was prepared by Dames & Moore and submitted to DTSC. Consequently, on July 24, 1998, DTSC issued an Imminent and Substantial Endangerment (I&SE) order to the Responsible Parties (RPs) to clean up the site. On June 24, 2003, DTSC approved the final Remedial Action Plan (RAP) for the soils operable unit (OU1) and asked the RPs to start investigation on the groundwater & VOCs operable unit (OU2). On June 10, 2005, the RPs submitted the well installation report. On August 4, 2005, the RPs submitted the updated Groundwater Monitoring report. The San Diego Regional Water Quality Control Board was the Lead Agency for the groundwater issue for investigation and remediation and they transfered it back to DTSC on Jan. 2011. DTSC is following up with the RPs and cosultant to complete vadose zone characterization for VOCs, to stop the downward migration of VOCs and to remediate the entire vadose zone. The new owner of the property now is: Westcore Properties Inc.

Background Info:	On or about June 15, 1975, the original owners of the site, Nicholas and Hronopoulos, entered into a 10 year lease agreement with Goss-Jewett Company for the Sunflower site. Goss-Jewett was in the business of receiving, selling and distributing perchloro-ethylene (PCE), a solvent typically used in dry cleaning operations. The PCE contamination at the site resulted from Goss-Jewett's operations between June 1975 and December 1990. Not reported Detectable concentrations of PCE in soil vapors ranged from 1.9 to 8444 mg/l. The highest concentrations of PCE in soil vapor were detected at sample points SV-11 (8444 mg/l), and SV-12 (7579 mg/l), located adjacent to the train loading dock on the south side of the site structure. Not reported

SUNFLOWER PROPERTIES INC. (Continued) **S103393805**

Soil sampling consisted of installing two soil borings in the area where the greatest concentrations of PCE in soil vapors were detected north of the site structure, near the truck loading dock (at sample point SV-2, PCE was detected at 6431 mg/l). PCE concentrations in the soil from the borings were as high as 10,059,000 mg/kg at B-2, (at 2 feet) and 248,863 mg/kg at B-1 (at 2 feet). On June 19, 1997, a technical report was prepared by Dames & Moore and submitted to DTSC. On July 24, 1998, consequently, DTSC issued an I&SE order to the RPs to clean up the site. On June 24, 2003 DTSC approved the final RAP for the soil OU1 and asked the RPs to start investigation on the groundwater OU2.

Comments Date: 01302003
Comments: Reviewing RAP. DTSC is preparing an Initial Study (CEQA

FINDS:

Registry ID: 110000478983

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

INDUSTRIAL CIRCUITS (Continued) **1000428461**

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FINDS:

Registry ID: 110002844129

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Event date: 03/15/2007
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 03/15/2007
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

SAN DIEGO GAS AND ELECTRIC (Continued) **1000110656**

CAMDBS (Clean Air Markets Division Business System) is a national information system that supports the implementation of market-based air pollution control programs administered by the Clean Air Markets Division, within the Office of Air and Radiation. These programs include the Acid Rain Program, established by Title IV of the Clean Air Act Amendments of 1990, and regional programs designed reduce the transport of ozone. These emissions trading programs allows regulated facilities (primarily electric utilities) to adopt the most cost-effective strategies to reduce emissions at their units. Units that reduce their emissions below the number of allowances they hold -- each allowance is equivalent to one ton of sulfur dioxide or nitrogen oxides -- may trade allowances with other units in their system, sell them to other utilities on the open market or through EPA auctions, or bank them to cover emissions in future years. CAMDBS functions include registering responsible officials, establishing allowance accounts, reporting hourly emissions data, and transferring allowances between accounts.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.

Comments:	Not reported
Description:	Caller states a 55-gallon drum, located within their spill containment area, developed a small pinhole leak in the bottom of the container. This caused the release of approximately 1-2 gallons of oil based paint onto the concrete. A clean-up has been conducted and no waterways were impacted.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

South Map:	5622824 LA JOLLA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

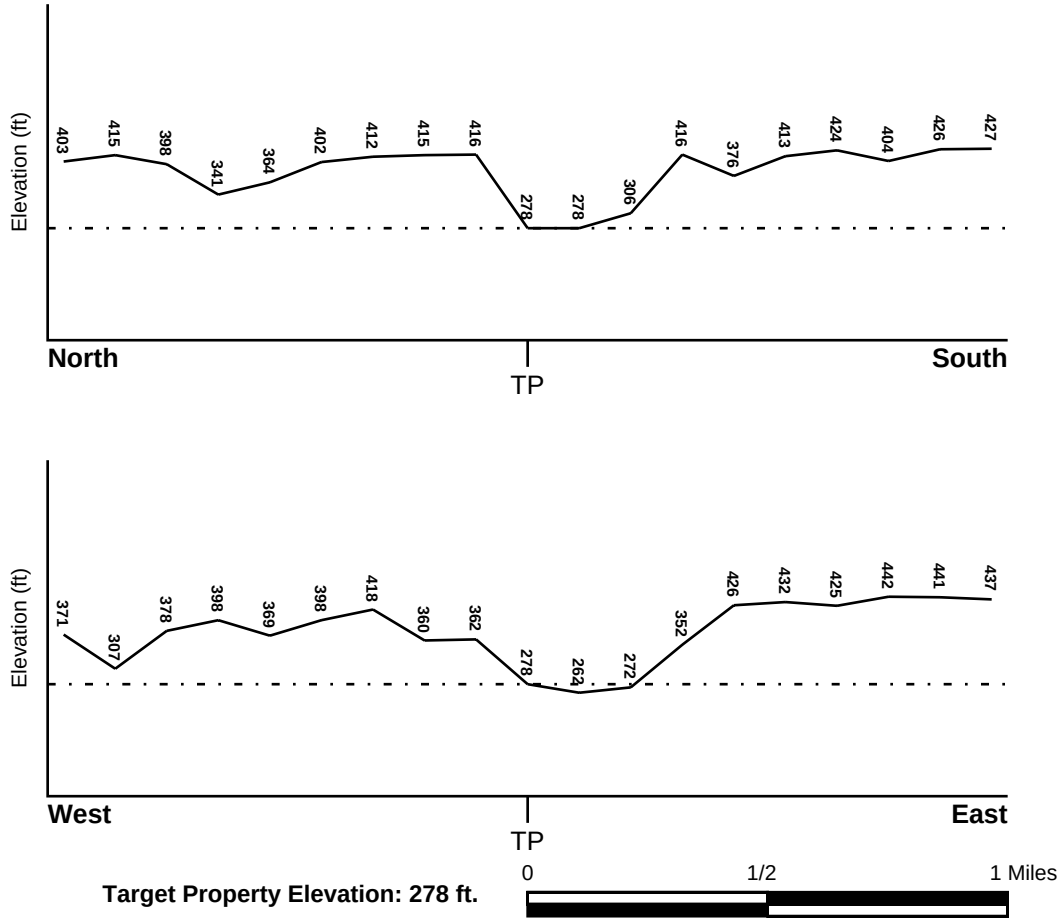
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C1343G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06073C1341G	FEMA FIRM Flood data

06073C1344G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
DEL MAR	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TERRACE ESCARPMENTS

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: RIVERWASH

Soil Surface Texture: gravelly coarse sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Excessively drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 168 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	gravelly coarse sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified extremely gravelly coarse sand to gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILIS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 3

Soil Component Name: REDDING

Soil Surface Texture: gravelly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 14 Min: 4	Max: 6 Min: 5.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	14 inches	29 inches	gravelly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 5 Min: 4.5
3	29 inches	44 inches	indurated	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 4

Soil Component Name: Gravel pits

Soil Surface Texture: very gravelly sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by GeoSyntec Consultants were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GeoSyntec Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 2C4F-4365-9A5E

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
