GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

6050 SUNSET BOULEVARD
LOS ANGELES, CA 90028

COORDINATES

Latitude (North):	34.098000 - 34° 5' 52.8''
Longitude (West):	118.321200 - 118° 19' 16.3''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	378123.5
UTM Y (Meters):	3773615.2
Elevation:	357 ft. above sea level

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1

RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
HOLLYWOOD PALLADIUM	*6215 W SUNSET BLVD*	*W 1/8 - 1/4 (0.172 mi.)*	*H40*	*42*

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 09/13/2011 has revealed that there are

10 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-NonGen site within approximately 0.25 miles of the target property.

EDR Proprietary Records

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected

listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 20 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

HOLLYWOOD FILM AND VIDEO (Continued) **1000857091**

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

HOLLYWOOD FILM AND VIDEO (Continued) **1000857091**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D005
Waste name: BARIUM

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D016
Waste name: 2,4-D

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: U002
Waste name: ACETONE (I)

RITE AID 5438 (Continued) **1014387514**

Waste code: U080
Waste name: METHANE, DICHLORO-

Waste code: U160
Waste name: 2-BUTANONE, PEROXIDE (R,T)

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

PACIFIC BELL (Continued) **1000250334**

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Registry ID: 110002950931

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CENTRAL LOS ANGELES HS #1 AKA METROMEDIA (Continued) **S107736102**

EXECUTED ON 2/10/00. As part of the Master Oversight Agreement between DTSC and the Los Angeles Unified School District (LAUSD), DTSC will provide oversight for a Preliminary Endangerment Assessment (PEA) for the proposed Central Los Angeles High School No. 1 site (aka Metromedia)

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 2001-10-01 00:00:00
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 2001-12-12 00:00:00
Comments: Approximately 136 cubic yards of soil were removed. Based on confirmation sampling, the estimated mean for surface soil based on 95% UCL was 0.860 mg/kg and for subsurface 1.91 mg/kg. Based on this, residual arsenic levels are below the cleanup goal.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 2001-12-07 00:00:00
Comments: RAW/CEQA - DTSC approved the Removal Action Workplan for the removal of arsenic contaminated soil. CEQA completed.

Completed Area Name: PROJECT WIDE

CENTRAL LOS ANGELES HS #1 AKA METROMEDIA (Continued) **S107736102**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 2002-07-02 00:00:00
Comments: DTSC has determined that all appropriate response actions have been completed, that all acceptable engineering practices were implemented and that no further removal/remedial action is necessary, specific only to the removal around the underground storage tank. Additional sampling will be conducted post- demolition near on-site hydraulic elevators and residential structures. For Arsenic only. FA for hydraulic elevators and lead

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/30/2011
Date Data Arrived at EDR: 07/12/2011
Date Made Active in Reports: 09/29/2011
Number of Days to Update: 79

Source: EPA
Telephone: N/A
Last EDR Contact: 10/12/2011
Next Scheduled EDR Contact: 01/23/2012
Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/30/2011
Date Data Arrived at EDR: 07/12/2011
Date Made Active in Reports: 09/29/2011

Next Scheduled EDR Contact: 01/23/2012
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/30/2011
Date Data Arrived at EDR: 07/12/2011
Date Made Active in Reports: 09/29/2011

Last EDR Contact: 10/12/2011
Next Scheduled EDR Contact: 01/23/2012
Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011
Date Data Arrived at EDR: 03/01/2011

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/08/2011

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 06/15/2011

Next Scheduled EDR Contact: 12/26/2011
Data Release Frequency: Annually

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009
Date Made Active in Reports: 09/11/2009

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

COMMERCIAL BUILDING
6050 SUNSET BOULEVARD
LOS ANGELES, CA 90028

TARGET PROPERTY COORDINATES

Latitude (North):	34.09800 - 34° 5' 52.8''
Longitude (West):	118.3212 - 118° 19' 16.3''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	378123.5
UTM Y (Meters):	3773615.2
Elevation:	357 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	34118-A3 HOLLYWOOD, CA
Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

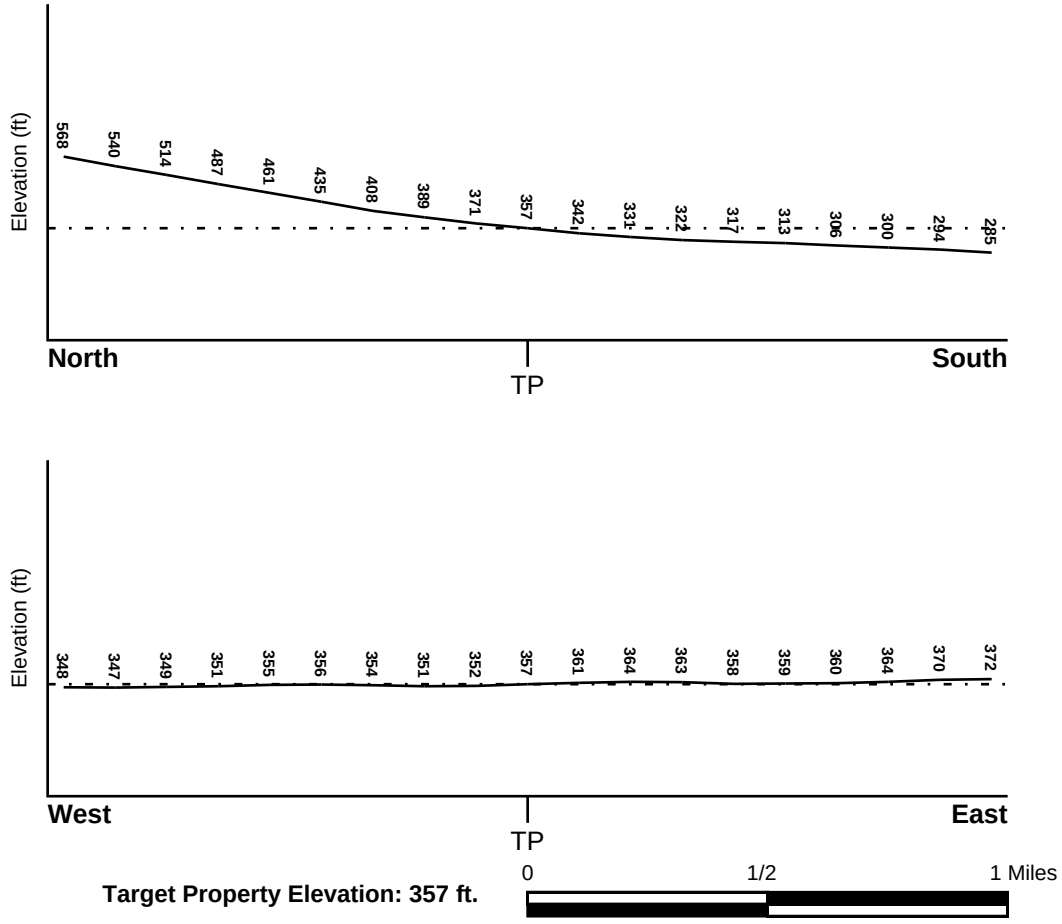
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 357 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/2 - 1 Mile SW	SW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Miocene
Code:	Tm *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

Re: CITADEL Project No. 5113.1039.0
Phase I Environmental Site Assessment Report
1455 Beachwood Drive
Los Angeles, California 90028

Dear Mr. Barton:

Citadel Environmental Services, Inc. is pleased to provide you and Hudson Pacific Properties, LP with this Phase I Environmental Site Assessment Report for the above-referenced location.

The Phase I Environmental Site Assessment Report was conducted for Hudson Pacific Properties, LP in accordance with Citadel's Proposal 5113.1039.P, dated November 8th, 2011, and a mutually agreed upon scope of work.

If, after your review, you have any questions or require additional information, please do not hesitate to telephone me at the Citadel Office in San Jose at 408.573.6905.

Sincerely,
CITADEL ENVIRONMENTAL SERVICES, INC.

Mark Drollinger

EXECUTIVE SUMMARY

Citadel Environmental Services, Inc. (Citadel) was contracted by Hudson Pacific Properties, L.P. (client) to perform a Phase I Environmental Site Assessment (Phase I ESA) and Limited Asbestos and Lead Paint Surveys at the property located at 1455 Beachwood Drive, in the City of Los Angeles, County of Los Angeles, California; hereinafter referred to as the "Site."

The Site inspection focused on general site conditions, on-site hazardous materials (use and storage), hazardous waste (generation, storage, and disposal), the presence of surface impoundments, underground and/or aboveground storage tanks (USTs and ASTs), the use of hydraulically operated equipment, and the presence of asbestos containing materials, lead-containing paint and on-site power transformers.

The Site is located near the southwest corner of the intersection of Sunset Boulevard and Beachwood Drive in a densely developed urban area. The Site is located adjoining the Sunset Gower Studios within close proximity to major transportation points, as well as shopping and entertainment areas along Sunset Boulevard.

The Site consists of a rectangular lot of approximately 4,440 square feet, comprised of a three-story concrete block and steel building constructed in 1963. The parcel is identified by the Loss Angeles County Assessor's Parcel Number 5545-013-056. The Site is currently vacant and unoccupied. Prior to the current structure, previous smaller structures were on-site and used as storage vaults for film. Since 1963, occupancy uses appear to have been primarily related to the storage of film and other items supporting the film industry, and offices supporting the film and music industry. In general, the Site appeared to be well maintained and in good condition.

Portions of an adjacent building to the north were apparently used for the development and printing of film using volatile chemicals (VOCs) from the 1920's into recent times. Previous site assessments for this area confirmed relatively low levels of VOCs consisting primarily of tetrachlorethene (PCE), trichloroethane (TCA) and 1,2-dichloroethane (DCA) in the shallow soil gas and soil. Groundwater was reportedly sampled and found to be unaffected. Vapor intrusion modeling and comparison of the soil VOC concentrations to the Regional Water Quality Control Boards site screening levels indicated that the adjacent site would require mitigation of the VOCs to be compliant with human health and environmental risks.

A vapor extraction system was installed at the adjacent site with three vapor extraction wells installed in areas deemed to have the highest contaminant levels in the soil gas, or soil. The system operated continuously for one year and then shutdown, in accordance with the one year operation permit from the South Coast Air Quality Management District (SCAQMD). Results of VOC levels showed significant declines in VOCs in the soil gas, from an initial maximum of 14.8 part per million by volume (ppmV) of PCE to a low of 3.08 ppmV at system shutdown. During this period, a total of 97.1 lbs of PCE mass was removed. At the conclusion of system operations, the final inlet concentrations still exceeded acceptable VOC levels in preliminary vapor intrusion models, indicating that additional VOC removal would be required to meet the compliance goals. Ambient soil gas sampling in September 2009 indicated a significant rebound of VOCs at the system inlet

The system inlet VOC levels were dramatically reduced to 1.12 ppmV PCE by January 2011. In February 2011, the system was shut down to allow for VOC rebound of the subsurface. On April 26, 2011, the system was restarted and VOC rebound samples were collected. Results

indicated wells VE1 and VE5 had moderate concentrations of PCE with 3.72 and 1.86 ppmV, respectively.

Since remediation of the soil gas was initiated in 2008, approximately 147 lbs of PCE mass have been removed from the subsurface. Available contours of the PCE plume in the soil show that the Site lies outside the vapor extraction radius.

During the course of the Phase I ESA, Citadel inspected the site for chemical and hazardous waste storage and handling practices. At the time of the inspection, the on-site building was vacant and unoccupied. No evidence for the historical use, generation, storage or disposal of chemical or hazardous waste was observed. No medical, radiological or photo-developing wastes were observed or reported during the site reconnaissance.

An asbestos survey was conducted by Citadel. No historical documentation relative to asbestos at the Site was reviewed during the course of this assessment. Based on the original age of the current on-site buildings, there was a potential for the presence of asbestos-containing materials. Citadel conducted a limited asbestos survey of the on-site building. Mr. Lloyd Tangunan, a Certified Asbestos Consultant with Citadel identified suspect materials to be sampled. The suspect materials were grouped into homogenous areas and collected. The samples were delivered to a state-certified laboratory and analyzed for asbestos content. Based on the analytical results, the laboratory reported the presence of asbestos in 9x9 vinyl floor tiles found on the 2nd floor, black mastic on the 3rd floor, the exterior stucco and several roofing materials.

Paint chip samples were collected of interior painted surfaces and exterior stucco. The samples were delivered to a state-certified laboratory for analysis of lead. Based on the results, the laboratory reported that paint chips collected from the building exterior wall on the north side and gray double doors on the 1st floor were reported above the regulatory level of 0.5% lead by weight, and is classified as a LBP. Paint chips collected from exterior east wall, roof wall and roof double doors, 3rd and 4th floor stairwells and 1st floor wall were reported to contain lead and are classified as a LCP.

No historical documentation relative to lead-containing paint on the site was reviewed during the course of this assessment. Based on the original age of the current on-site buildings, there was a potential for the presence of lead-based paint. All painted surfaces were observed to be in fair to good condition at the time of the survey.

The historical records reviewed included aerial photographs, Sanborn Fire Insurance Maps, city telephone directories, building permits, and other sources. A review of these resources indicates that the Site may have been developed as early as 1928, but evidence is mostly weighted to first development in 1948. The neighboring properties surrounding the Site along Sunset Boulevard, Gower Street and Beachwood Drive appear to have been developed from at least 1917. Properties across Sunset Boulevard to the north were primarily residential into the 1960's. Historic use of the Site vicinity appears to have been primarily related to the storage of film, and in later years other items supporting the film industry to the present day. Occupancies and uses for adjacent properties to the north, east, west and south appear to have been primarily to support the entertainment industry.

No visual indicators of current USTs or above-ground storage tanks (AST's) were identified during the site reconnaissance. The Los Angeles Fire Department (LAFD) has not responded to our request for information at this time. Any response from the LAFD will be forwarded once received.

The neighboring properties identified on federal and state environmental lists do not represent an immediate environmental concern to the Site, based on their distance, current regulatory status (Case Closed) and/or direction hydrogeologically down or cross gradient from the Site.

Citadel has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 and the All Appropriate Inquiries (AAI) Rule published in 40 CFR Part 312, of the property identified as 1455 Beachwood Drive in the City of Los Angeles, County of Los Angeles, California. Any exceptions to, or deletions from, this practice are described in the Scope of Services section of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the aforementioned property, and no recommendations or response actions are warranted, with the exception of the appropriate removal of the ACMs and LCMs on-site.

1.0 INTRODUCTION

Citadel Environmental Services, Inc. (Citadel) was contracted by Hudson Pacific Properties, L.P. (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 1455 Beachwood Drive in the City of Los Angeles, County of Los Angeles, California; hereinafter referred to as the "Site."

1.1 Purpose

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the property's structure, ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the site. A site visit was also conducted to observe existing site conditions. This report provides the results of the Phase I ESA.

1.2 Involved Parties

The involved party(s) in this study, to the best of our knowledge, is Hudson Pacific Properties, L.P.

1.3 Scope of Services

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-05 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The scope of services for this assessment consisted of the following:

- Performed a site inspection to verify current site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.

- Conducted a visual survey of adjacent properties and immediate vicinity to determine if any nearby property use posed a significant environmental threat to the Site.

- Reviewed currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.

- Consulted with appropriate governmental agencies having jurisdiction relative to past history of the Site, complaints or incidents in the immediate area, and permits that may have been issued.

- Collected bulk material and paint chip samples for analysis of asbestos and lead content, respectively.

- Prepared a report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the subject site based on the data search, reasonably ascertainable documents, and site inspection.

2.0 GENERAL SITE CHARACTERISTICS

2.1 Location

The Site is located near the southwest corner of the intersection of Sunset Boulevard and Beachwood Drive in a densely developed urban area. The Site is located adjoining the Sunset Gower Studios within close proximity to major transportation points, as well as shopping and entertainment areas along Sunset Boulevard.

The Site consists of a rectangular lot of approximately 4,440 square feet, comprised of a three-story concrete block and steel building constructed in 1963. The parcel is identified by the Los Angeles County Assessor's Parcel Number 5545-013-056. The Site is currently vacant and unoccupied. In general, the Site appeared to be in good condition with on-going maintenance.

According to the U.S. Geological Survey (USGS) Hollywood, Quadrangle (7.5 Minute Series), dated 1994, the Site is at an elevation of approximately 357 feet above mean sea level (AMSL). The site is located at approximate coordinates of 33°55' 03" North Latitude and 118° 19' 16" West Longitude. The Site and surrounding vicinity slope moderately to the south-southwest.

2.2 Site Description

The Site consists of a rectangular lot of approximately 4,440 square feet, comprised of a three-story concrete block and steel building constructed in 1963. The roof area is covered with a built-up roofing system over a wood deck. Previous occupancy uses appears to have been primarily related to the storage of film and other items supporting the film industry; and offices. In general, the Site appeared to be well maintained and in good condition.

The roof areas are covered with rolled composite roofing materials. The majority of the mechanical equipment for the building is located on the roof.

A site plan is included in the report as Figure 2 in Appendix A. Photographs of the Site are included as Appendix B.

2.3 Adjacent Properties

The Site is bound to the north by a two-story building, beyond which is Sunset Boulevard. The Site is bound to the east by Beachwood Drive, with mixed-use area of entertainment, office and commercial/retail spaces beyond. The Site is bound to the south by office,

and entertainment properties that abut the Site building. The Site is bound to the west by mixed-use occupancies, beyond which is Gower Street.

Based upon Citadel's observations and the information provided in the environmental database report, current operations at the surrounding properties do not appear to represent a current environmental concern to the Site. Photographs depicting adjacent property conditions can be found in Appendix B.

2.4 Utilities

Gas and electrical service are provided to the Site by the Los Angeles Department of Water and Power. Sewer service is supplied to the site by the City of Los Angeles. General rubbish (non-hazardous) is removed from the site on a regular basis by a public waste hauler.

3.0 ENVIRONMENTAL SETTING

3.1 Physical Site Characteristics

Based upon the National Geodetic Vertical Datum (NGVD) of 1929, the site is at an elevation of approximately 357 AMSL. Regional topography in the area of the site slopes moderately to the south-southwest. The surface drainage is east to west along Sunset Boulevard and north to south along Beachwood Drive.

3.2 Geologic Conditions and Soils

The subject site is located in the Peninsular Ranges Geomorphic Province of Southern California. The Peninsular Ranges are a series of northwest-southeast trending ranges separated by subparallel longitudinal valleys. The Peninsular Ranges are bounded on the east by the Mojave Desert, on the north by the Transverse Ranges (e.g., Santa Monica Mountains) and extend to the south into lower California. Within the Peninsular Ranges, the Subject Property is located in the Torrance Plain of the Los Angeles Basin. The Los Angeles Basin is underlain by thousands of feet of alluvium and associated recent deposits of Pleistocene age. Many of these deposits are water-bearing (aquifers) and the many physiographic features of the basin play major roles in the occurrence of groundwater in the area of the subject site.

The soils in the site area have been classified by the U.S. Department of Agriculture (USDA) Soil Conservation Service (SCS) as "Urban Land". This classification for soil does not define any specific soil qualities, such as soil type, depth, permeability, or drainage.

3.3 Groundwater/Hydrogeological Conditions

Precise groundwater information for the site area is unavailable, due to the absence of groundwater monitoring or production wells on the site. However, based on local well information obtained from the State of California Regional Water Quality Control Board, via their GeoTracker website, depth to regional groundwater in the area of the site is generally estimated at a minimum of 18 to 30 feet below ground surface (bgs), with a flow gradient toward the south-southwest. Groundwater occurrence, depth and flow

direction can be influenced by fluctuations in precipitation, pumping and other seasonal factors.

3.4 Wetlands and Flood Zone

According to the U.S. Department of the Interior, Los Angeles, California, National Wetlands Inventory Map, there are no designated wetlands on-site or within a 1.0-mile radius of the site. According to the EDR report, no flood zone information was available.

4.0 SITE RECONNAISSANCE

Citadel representative Mr. Lloyd Tangunan conducted the Phase I ESA inspection on November 15, 2011, including the site reconnaissance and perimeter survey of the surrounding properties. Mr. Mark Drollinger conducted the historical and regulatory research and served as the project manager. The site reconnaissance included observations at the Site. The reconnaissance also included observations of exterior portions of neighboring properties from public right of ways.

The findings of the site inspection are presented in the following sections:

4.1 On-Site Storage Tanks

No visual indicators of current underground storage tanks (USTs) were identified during the site reconnaissance. The City of Los Angeles Fire Department (LAFD) reported no permitted USTs in response to an inquiry by Citadel.

4.2 Identified Hazardous Materials

Citadel inspected the Site for chemical and hazardous waste storage and handling practices. At the time of the inspection, the Site building was vacant and unoccupied with scattered boxes and material No cleaning equipment, chemical storage, or evidence of use or spills was observed during the site reconnaissance.

4.3 Asbestos Containing Materials

Citadel conducted a limited asbestos survey of the on-site building. Mr. Lloyd Tangunan, a Certified Asbestos Consultant with Citadel identified suspect materials to be sampled. The suspect materials were grouped into homogenous areas and collected. The samples were delivered to a state-certified laboratory and analyzed for asbestos content. Based on the analytical results, the laboratory reported the presence of asbestos in select 9x9 vinyl floor tiles found on the 2nd floor, black mastic on the 3rd floor and several roofing materials. Citadel recommends that the asbestos-containing materials (ACM's) found during the survey be removed by a licensed and qualified asbestos removal company in accordance with applicable regulations.

Documentation of our survey methodologies and results is provided as a separate report.

4.4 Lead Paints

A lead-containing paint (LCP) survey was conducted by Citadel. No historical documentation relative to lead-containing paint on the site was reviewed during the course of this assessment. Based on the original age of the current on-site buildings,

there was a potential for the presence of lead-based paint. All painted surfaces were observed to be in fair to good condition at the time of the survey. Paint chip samples were collected of interior painted surfaces and exterior stucco. The samples were delivered to a state-certified laboratory for analysis of lead. The laboratory reported that paint chips collected from the building exterior wall on the north side and gray double doors on the 1st floor were reported above the regulatory level of 0.5% lead by weight, and is classified as a LBP. Paint chips collected from exterior east wall, roof wall and roof double doors, 3rd and 4th floor stairwells and 1st floor wall were reported to contain lead and are classified as a LCP. Citadel recommends that the LCP materials found during the survey be removed by a licensed and qualified LCP removal company in accordance with applicable regulations.

Documentation of our survey methodologies and results is provided as a separate report.

4.5 Polychlorinated Biphenyls

Typical sources of polychlorinated biphenyls (PCBs) include electrical transformer cooling oils, fluorescent light fixture ballasts and hydraulic oil. In 1976, the U.S. EPA banned the manufacture and sale of polychlorinated biphenyl (PCB)-containing transformers. Prior to this date, transformers were frequently filled with a dielectric fluid containing PCB-laden oil. By 1985, the US EPA required that commercial property owners with transformers containing more than 500 parts per million (ppm) PCBs must register the transformer with the local fire department, provide exterior labeling, and remove combustible materials within 5.0 meters (40 Code of Federal Regulations 761.30: "Fire Rule").

No oil-filled transformers were observed on-site during the site reconnaissance.

PCBs may also be found in capacitors and fluorescent lighting unit ballasts. At the time of the Site inspection, the fluorescent lighting ballasts were inaccessible for inspection. Given the age of the structure and that fluorescent fixtures have been in long-term use, PCBs are unlikely to be used at this property. However, if upon inspection during replacement and routine maintenance, if ballast labels do not include the statement “No PCBs”, the ballast(s) should be disposed of as PCB-containing waste.

4.6 Pits, Ponds, and Lagoons

No pits, ponds, or lagoons were visually observed during the site reconnaissance.

4.7 Septic Tanks and Cesspools

No septic tanks or cesspools were visually observed during the site reconnaissance.

4.8 Wells, Cisterns and Sumps

No wells, cisterns or sumps were visually observed during the site reconnaissance.

4.9 Wastewater Interceptors / Grease Interceptors

No waste water interceptors or grease interceptors were visually observed during the site reconnaissance.

4.10 Drinking Water

The Site is supplied with municipal drinking water by the Los Angeles Department of Water and Power.

4.11 Radon

The California Bureau of Mines and Geology and the Department of Health Services (DHS) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states in the country. Thirty-four (34) states had participated by 1990. The interim results published by the DHS in 1993 indicate that in Los Angeles County, which is in Region 9 of the survey, an average concentration of radon was 0.6. pCi/l (pico curies of activity per liter of air). A total of 182 homes in Region 9 were surveyed. Based on the results of this survey, DHS predicted that approximately 0.5% of homes in Region 9 will have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for Los Angeles County is Zone 2, which indicates an average indoor concentration of between 2.0 pCi/l and 4.0 pCi/l of air.

Based on documented regional radon levels, radon gas is not expected to pose an environmental concern at the Site. If accurate levels of radon on-site need to be documented, site specific testing by licensed personnel would be required.

5.0 SITE HISTORY

To investigate the history of the Site, Citadel reviewed select historic aerial photographs, building permits, city directories and Sanborn Fire Insurance Rate Maps. Results of these investigations are discussed below.

5.1 Historical Aerial Photographs

Historical aerial photographs of the Site and vicinity were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous materials generation or storage. Nine (9) aerial photographs dating from 1928 to 2005 were reviewed. Below are brief descriptions of observations made from the aerial photographs of the Site and vicinity.

1928 Historical Aerial Photograph

The Site appears to be developed with several small structures throughout the apparent Site boundary of unknown occupancy or use. Adjoining properties to west and south appear to be similar to that currently in-place. Most of the site vicinity is built-out, with some vacant land and unimproved land parcels. No pits or tanks were observed on, or near the Site in this aerial photograph.

1938, 1947 and 1956 Historical Aerial Photographs

The Site and neighboring properties to the north, west, south and east appear to be essentially unchanged from the 1928 aerial photograph, with the exception that fewer residential structures were observed, having been replaced with larger

office/commercial type buildings. In the 1956 aerial photograph, the on-site structures appear to have changed and are now larger, but not with the current on-site structure. The adjoining property to the east appears to be comprised of several smaller buildings.

1967, 1976, 1989 and 1994 Historical Aerial Photographs

The on-site building has changed and appears to be similar to that currently on-site. The neighboring properties appear to be essentially unchanged from the 1956 aerial photograph, with the exception of what appears to be a vacant lot to the east of the Site. The lot appears to be used as a parking area.

2005 Historical Aerial Photograph

The Site and vicinity appear in its current configuration.

Copies of Historical Aerial Photographs can be found in Appendix D.

5.2 Historic Building Permits

Building permits for the years 1998 through 2008 were provided by Environmental Data Resources (EDR). No Permits were on-file for the on-site building. Building permits issued prior to 1998 may be on file (microfiche) at the Los Angeles Building Department. Based on the general absence of site-specific information, no documented hazardous materials usage at the Site was identified in the EDR report.

5.3 Historical Sanborn Fire Insurance Rate Maps

Sanborn Fire Insurance Rate Maps of the subject site were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous materials usage, generation or storage. Sanborn Maps dating from 1919, 1950, 1955, 1957, 1960, 1961, 1962, 1966, 1968 and 1970 were provided for review.

1919 Sanborn Map

The Site is vacant and undeveloped at this time. An adjoining property to the north is developed and shown as a "Stage" and offices; properties to the south and west are undeveloped and vacant. The Francis Ford Movie Studio is located northeast of the Site, across Beachwood Drive. Single and multi-family structures are located across Sunset Boulevard and further south of the Site. An oil and gas station was observed on the southeast corner of the intersection of Sunset Boulevard and Gower Street.

1950, 1955 and 1957 Sanborn Maps

The Site appears to be developed with several smaller structures identified as "film vaults." According to the 1950 Sanborn, these vaults were constructed in 1948. The Site is part of the Columbia Pictures Corporation studios. Adjoining properties are shown to be occupied by contributors to the film industry, including film development to the north and east. The adjoining building to the south is listed as a film laboratory.

The Site is bordered to the north by Sunset Boulevard with mixed use occupancies comprised of residential, offices and retail; to the east by Beachwood Drive and

Columbia Studios properties; to the south by Columbia Studios and to the west by portions of Columbia Studios and other offices and restaurants.

1960, 1961, 1962, 1966, 1968 and 1969 Sanborn Maps

Until 1962, the Site and site vicinity appear to be very similar in development and occupancies as the 1957 Sanborn. In the 1966 Sanborn Map, the current structure located at 1455 Beachwood Drive was observed and listed as "offices and storage." No other significant changes were observed in the site vicinity.

1970 Sanborn Map

The Site and site vicinity appear to be very similar in development and occupancies as the 1966 Sanborn. No significant changes were observed.

5.4 Historical City Directories

City Directories were reviewed in order to identify previous site tenants and/or neighboring properties with a potential for hazardous materials generation and/or storage. City Directories dating from 1924 through 2006 (non-inclusive) were researched. The current site address (1455 Beachwood Drive) was not identified in city directories from 1924 through 2006. This appears consistent with the long standing use of the property for storage purposes.

The City Directories identified numerous occupancies in the site vicinity with the entertainment industry dating to 1924 and into the present day. This is consistent with findings from other historical sources.

5.5 Previous Environmental Reports

No Environmental reports were provided to Citadel as part of this Phase I ESA.

5.6 Interviews

Citadel did not conduct any on-site interviews with respect to the Site history or current operations as part of this Phase I ESA.

5.7 Environmental Lien Search

An Environmental Lien Search was not conducted as part of this Phase I ESA.

5.8 Summary of Site History

The historical records reviewed included aerial photographs, Sanborn Fire Insurance Maps, city telephone directories, building permits, and other sources. A review of these resources indicates that the Site may have been developed as early as 1928, but evidence is mostly weighted to first development in 1948. The neighboring properties surrounding the Site along Sunset Boulevard, Gower Street and Beachwood Drive appear to have been developed from at least 1917. Properties across Sunset Boulevard to the north were primarily residential into the 1960's. Historic use of the Site vicinity appears to have been primarily related to the storage of film, and in later years other

items supporting the film industry to the present day. Occupancies and uses for adjacent properties to the north, east, west and south appear to have been primarily to support the entertainment industry.

6.0 REGULATORY AGENCY REVIEW

6.1 Database Review

Citadel contracted Environmental Data Resources, Inc. (EDR) to conduct a database search of standard environmental records sources to help identify recognized environmental conditions in connection with the subject site. A full description of the regulatory agency lists researched can be found in Appendix C. Lists identifying facilities within the search radii and the subject site are discussed below.

Major Hazardous Waste Sites Databases

DATABASE	AGENCY	RADIUS
National Priority List (NPL); Delisted NPL List	United States Environmental Protection Agency (USEPA)	1.0 mile
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); No Further Remediation Action Planned (NFRAP)	United States Environmental Protection Agency (USEPA)	0.5 mile
Resource Conservation and Recovery Act (RCRA), Corrective Action Report (CORRACTS), Treatment Storage and Disposal (TSD), Large Quantity Generators (LQG), and Small Quantity Generators (SQG)	United States Environmental Protection Agency (USEPA)	CORRACTS = 1.0 mile; TSD = 0.50 mile; LQG / SQG = 0.25 mile
Engineering Institutional Control / Engineering Control Registries	United States Environmental Protection Agency (USEPA)	0.50 mile
Annual Workplan Sites / CAL-Sites	California Environmental Protection Agency (Cal/EPA)	1.0 mile
Leaking Underground Storage Tank Report (LUST)	California Division of Environmental Protection; Regional Water Quality Control Board (RWQCB)	0.50 mile
Underground Storage Tank (UST)	State Water Resources Control Board (SWRCB)	0.25 mile

Major Hazardous Waste Sites Databases		
DATABASE	**AGENCY**	**RADIUS**
Spills, Leaks, Investigations, and Cleanups (SLIC)	State Water Resources Control Board (SWRCB)	0.25 mile
Solid Waste Information System (State Landfill)	Integrated Waste Management Board (IWMB)	0.50 mile
Cleaner Facilities (Drycleaners)	California Division of Environmental Protection; Department of Toxic Substance Control (DTSC)	0.25 mile
Indian Reservations Hazardous Waste Sites, Indian- - Equivalent NPL, CERCLIS, Landfill, Engineering Controls, Brownfields	Indian Reservations	1.0 mile or equivalent State / Federal distances
Indian Leaking Underground Storage Tanks (LUST)	Indian Leaking Underground Storage Tanks (LUST)	0.5 mile
Indian Registered Underground Storage Tank (UST)	Indian Registered Underground Storage Tank (UST)	0.25 mile

No visual indicators of current USTs or above-ground storage tanks (AST's) were identified during the site reconnaissance. The Los Angeles Fire Department (LAFD) has not responded to our request for information at this time. Any response from the LAFD will be forwarded once received.

Portions of an adjacent building to the north were apparently used for the development and printing of film using volatile chemicals (VOCs) from the 1920's into recent times. Previous site assessments for this area, confirmed relatively low levels of VOCs consisting primarily of tetrachlorethene (PCE), trichloroethane (TCA) and 1,2-dichloroethane (DCA) in the shallow soil gas and soil. Groundwater was reportedly sampled and found to be unaffected. Vapor intrusion modeling and comparison of the soil VOC concentrations to the Regional Water Quality Control Boards site screening levels indicated that the adjacent site would require mitigation of the VOCs to be compliant with human health and environmental risks.

A vapor extraction system was installed at the adjacent site with three vapor extraction wells installed in areas deemed to have the highest contaminant levels in the soil gas, or soil. The system operated continuously for one year and then shutdown, in accordance with the one year operation permit from the South Coast Air Quality Management District (SCAQMD). Results of VOC levels showed significant declines in VOCs in the soil gas, from an initial maximum of 14.8 part per million by volume (ppmV) of PCE to a low of 3.08 ppmV at system shutdown. During this period, a total of 97.1 lbs of PCE mass was removed. At the conclusion of system operations, the final inlet concentrations still exceeded acceptable VOC levels in preliminary vapor intrusion models, indicating that additional VOC removal would be required to meet the compliance goals. Ambient soil

gas sampling in September 2009 indicated a significant rebound of VOCs at the system inlet

The system inlet VOC levels were dramatically reduced to 1.12 ppmV PCE by January 2011. In February 2011, the system was shut down to allow for VOC rebound of the subsurface. On April 26, 2011, the system was restarted and VOC rebound samples were collected. Results indicated wells VE1 and VE5 had moderate concentrations of PCE with 3.72 and 1.86 ppmV, respectively.

Since remediation of the soil gas was initiated in 2008, approximately 147 lbs of PCE mass have been removed from the subsurface. Available contours of the PCE plume in the soil show that the Site lies outside the vapor extraction radius.

The neighboring properties identified on federal and state environmental lists do not represent an environmental concern to the site, based on their distance, current regulatory status (Case Closed) and/or direction hydrogeologically down or cross gradient from the Site.

6.2 Agency Correspondence

Citadel submitted requests to the following agencies for information regarding the subject site:

- Δ Los Angeles Fire Department (LAFD) Underground Tank Division.
- Δ South Coast Air Quality Management District (SCAQMD).

LAFD

At the time of issuance of this report, the LAFD UST and Hazardous Materials Department has not responded to Citadel's request for information.

SCAQMD

According to the SCAQMD records, there are no violation notices for the Site with this agency. The SCAQMD had no other information regarding the Site in their files.

7.0 CONCLUSIONS

Citadel Environmental Services, Inc. (Citadel) was contracted by Hudson Pacific Properties, L.P. (client) to perform a Phase I ESA and Limited Asbestos and Lead Paint Surveys at the property located at 1455 Beachwood Drive, in the City of Los Angeles, County of Los Angeles, California; hereinafter referred to as the "Site."

The Site inspection focused on general site conditions, on-site hazardous materials (use and storage), hazardous waste (generation, storage, and disposal), the presence of surface impoundments, underground and/or aboveground storage tanks (USTs and ASTs), the use of hydraulically operated equipment, and the presence of asbestos containing materials, lead-containing paint and on-site power transformers.

The Site is located near the southwest corner of the intersection of Sunset Boulevard and Beachwood Drive in a densely developed urban area. The Site is located adjoining the Sunset

Gower Studios within close proximity to major transportation points, as well as shopping and entertainment areas along Sunset Boulevard.

The Site consists of a rectangular lot of approximately 4,440 square feet, comprised of a three-story concrete block and steel building constructed in 1963. The parcel is identified by the Loss Angeles County Assessor's Parcel Number 5545-013-056. The Site is currently vacant and unoccupied. Prior to the current structure, previous smaller structures were on-site and used as storage vaults for film. Since 1963, occupancy uses have consisted of businesses related to the film and music industry, specifically for storage. In general, the Site appeared to be well maintained and in good condition.

Portions of an adjacent building to the north were apparently used for the development and printing of film using volatile chemicals (VOCs) from the 1920's into recent times. Previous site assessments for this area, confirmed relatively low levels of VOCs consisting primarily of tetrachlorethene (PCE), trichloroethane (TCA) and 1,2-dichloroethane (DCA) in the shallow soil gas and soil. Groundwater was reportedly sampled and found to be unaffected. Vapor intrusion modeling and comparison of the soil VOC concentrations to the Regional Water Quality Control Boards site screening levels indicated that the adjacent site would require mitigation of the VOCs to be compliant with human health and environmental risks.

A vapor extraction system was installed at the adjacent site with three vapor extraction wells installed in areas deemed to have the highest contaminant levels in the soil gas, or soil. The system operated continuously for one year and then shutdown, in accordance with the one year operation permit from the South Coast Air Quality Management District (SCAQMD). Results of VOC levels showed significant declines in VOCs in the soil gas, from an initial maximum of 14.8 part per million by volume (ppmV) of PCE to a low of 3.08 ppmV at system shutdown. During this period, a total of 97.1 lbs of PCE mass was removed. At the conclusion of system operations, the final inlet concentrations still exceeded acceptable VOC levels in preliminary vapor intrusion models, indicating that additional VOC removal would be required to meet the compliance goals. Ambient soil gas sampling in September 2009 indicated a significant rebound of VOCs at the system inlet.

The system inlet VOC levels were dramatically reduced to 1.12 ppmV PCE by January 2011. In February 2011, the system was shut down to allow for VOC rebound of the subsurface. On April 26, 2011, the system was restarted and VOC rebound samples were collected. Results indicated wells VE1 and VE5 had moderate concentrations of PCE with 3.72 and 1.86 ppmV, respectively.

Since remediation of the soil gas was initiated in 2008, approximately 147 lbs of PCE mass have been removed from the subsurface. Available contours of the PCE plume in the soil show that the Site lies outside the vapor extraction radius.

During the course of the Phase I ESA, Citadel inspected the site for chemical and hazardous waste storage and handling practices. At the time of the inspection, the on-site building was vacant and unoccupied. No evidence for the historical use, generation, storage or disposal of chemical or hazardous waste was observed. No medical, radiological or photo-developing wastes were observed or reported during the site reconnaissance.

An asbestos survey was conducted by Citadel. No historical documentation relative to asbestos at the Site was reviewed during the course of this assessment. Based on the original age of the current on-site buildings, there was a potential for the presence of asbestos-containing materials. Citadel conducted a limited asbestos survey of the on-site building. Mr. Lloyd Tangunan, a Certified Asbestos Consultant with Citadel identified suspect materials to be sampled. The

suspect materials were grouped into homogenous areas and collected. The samples were delivered to a state-certified laboratory and analyzed for asbestos content. Based on the analytical results, the laboratory reported the presence of asbestos in 9x9 vinyl floor tiles found on the 2nd floor, black mastic on the 3rd floor, the exterior stucco and several roofing materials.

Paint chip samples were collected of interior painted surfaces and exterior stucco. The samples were delivered to a state-certified laboratory for analysis of lead. The laboratory reported that paint chips collected from the building exterior wall on the north side and gray double doors on the 1st floor were reported above the regulatory level of 0.5% lead by weight, and is classified as a LBP. Paint chips collected from exterior east wall, roof wall and roof double doors, 3rd and 4th floor stairwells and 1st floor wall were reported to contain lead and are classified as a LCP.

No historical documentation relative to lead-containing paint on the site was reviewed during the course of this assessment. Based on the original age of the current on-site building, there was a potential for the presence of lead-based paint. All painted surfaces were observed to be in fair to good condition at the time of the survey.

The historical records reviewed included aerial photographs, Sanborn Fire Insurance Maps, city telephone directories, building permits, and other sources. A review of these resources indicates that the Site may have been developed as early as 1928, but evidence is mostly weighted to first development in 1948. The neighboring properties surrounding the Site along Sunset Boulevard, Gower Street and Beachwood Drive appear to have been developed from at least 1917. Properties across Sunset Boulevard to the north were primarily residential into the 1960's. Historic use of the Site vicinity appears to have been primarily related to the storage of film, and in later years other items supporting the film industry to the present day. Occupancies and uses for adjacent properties to the north, east, west and south appear to have been primarily to support the entertainment industry.

No visual indicators of current UST's/AST's were identified during the site reconnaissance. The LAFD has not responded to our request for information at this time. Any response from the LAFD will be forwarded once received.

The neighboring properties identified on federal and state environmental lists do not represent an immediate environmental concern to the site, based on their distance, current regulatory status (Case Closed) and/or direction hydrogeologically down or cross gradient from the Site.

Citadel has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 and the All Appropriate Inquiries (AAI) Rule published in 40 CFR Part 312, of the property identified as 1455 Beachwood Drive in the City of Los Angeles, County of Los Angeles, California. Any exceptions to, or deletions from, this practice are described in the Scope of Services section of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the aforementioned property, and no recommendations or response actions are warranted, with the exception of the appropriate removal of the ACMs on-site.

8.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel Environmental Services, Inc. will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and

preparing this report in accordance with the normal standards of our profession, but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies.

9.0 REFERENCES

Interviews

Citadel did not conduct any interviews of the Site as part of this Phase I ESA.

10.0 PROFESSIONAL CERTIFICATION

Citadel has completed a Phase I Environmental Site Assessment (ESA) for the property located at 1455 Beachwood Drive in the City of Los Angeles, County of Los Angeles, California. The Phase I ESA was performed at the Clients request in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-2005 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The independent conclusions represent our professional judgment based on information and data available to Citadel during the course of this project. Information regarding historical and present operations, conditions and test data provided by the Client or their representative, is assumed to be correct and complete. The conclusions presented by this Phase I ESA are based on information provided to Citadel and from observations and perceived conditions existing on the date of the site reconnaissance.

In expressing the opinions stated in this report, Citadel has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional. Documentation provided by the Client, Client-designated representatives, interested third-parties, or from the public domain, and referenced in preparation of the Phase I ESA report, have been assimilated with the understanding that Citadel assumes no responsibility or liability for their accuracy.

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by the final All Appropriate Inquiry (AAI) Rule published in 40 CFR Part 312.10 (November 1, 2005). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting described in this Phase I ESA. I have developed and performed the AAI in conformance with the standard and care of this Rule.

EXPERIENCE

With 25 years of experience in environmental compliance, permitting and environmental management projects, Mr. Drollinger has a strong working knowledge of EPA, DTSC, AQMD/APCD, OSHA and DOT regulations. Among his vast experience, Mr. Drollinger has provided environmental assessment and compliance expertise, safety management, and engineering construction management services on numerous projects for the US Navy, Veterans Administration, US Department of Agriculture, Cal Trans, EPA and numerous private projects throughout the western United States. In addition, Mr. Drollinger has developed and implemented programs to train managers and staff in storm water and NPDES compliance, soil and groundwater sample collection and data interpretation, Hazcomm, IIPP, and safe-work practices such as identifying and handling hazardous materials, fall protection, confined space, traffic control, LO/TO and ergonomics; and has conducted environmental and permitting audits of facilities including health and safety assessments.

Specific Cal-Trans projects Mr. Drollinger has been involved with include managing and providing environmental compliance services for the I-605 South to I-10 East Interchange and developing NEPA 2 Level environmental assessment protocols for a right-of-way corridor study along I-10 in the Coachella Valley.

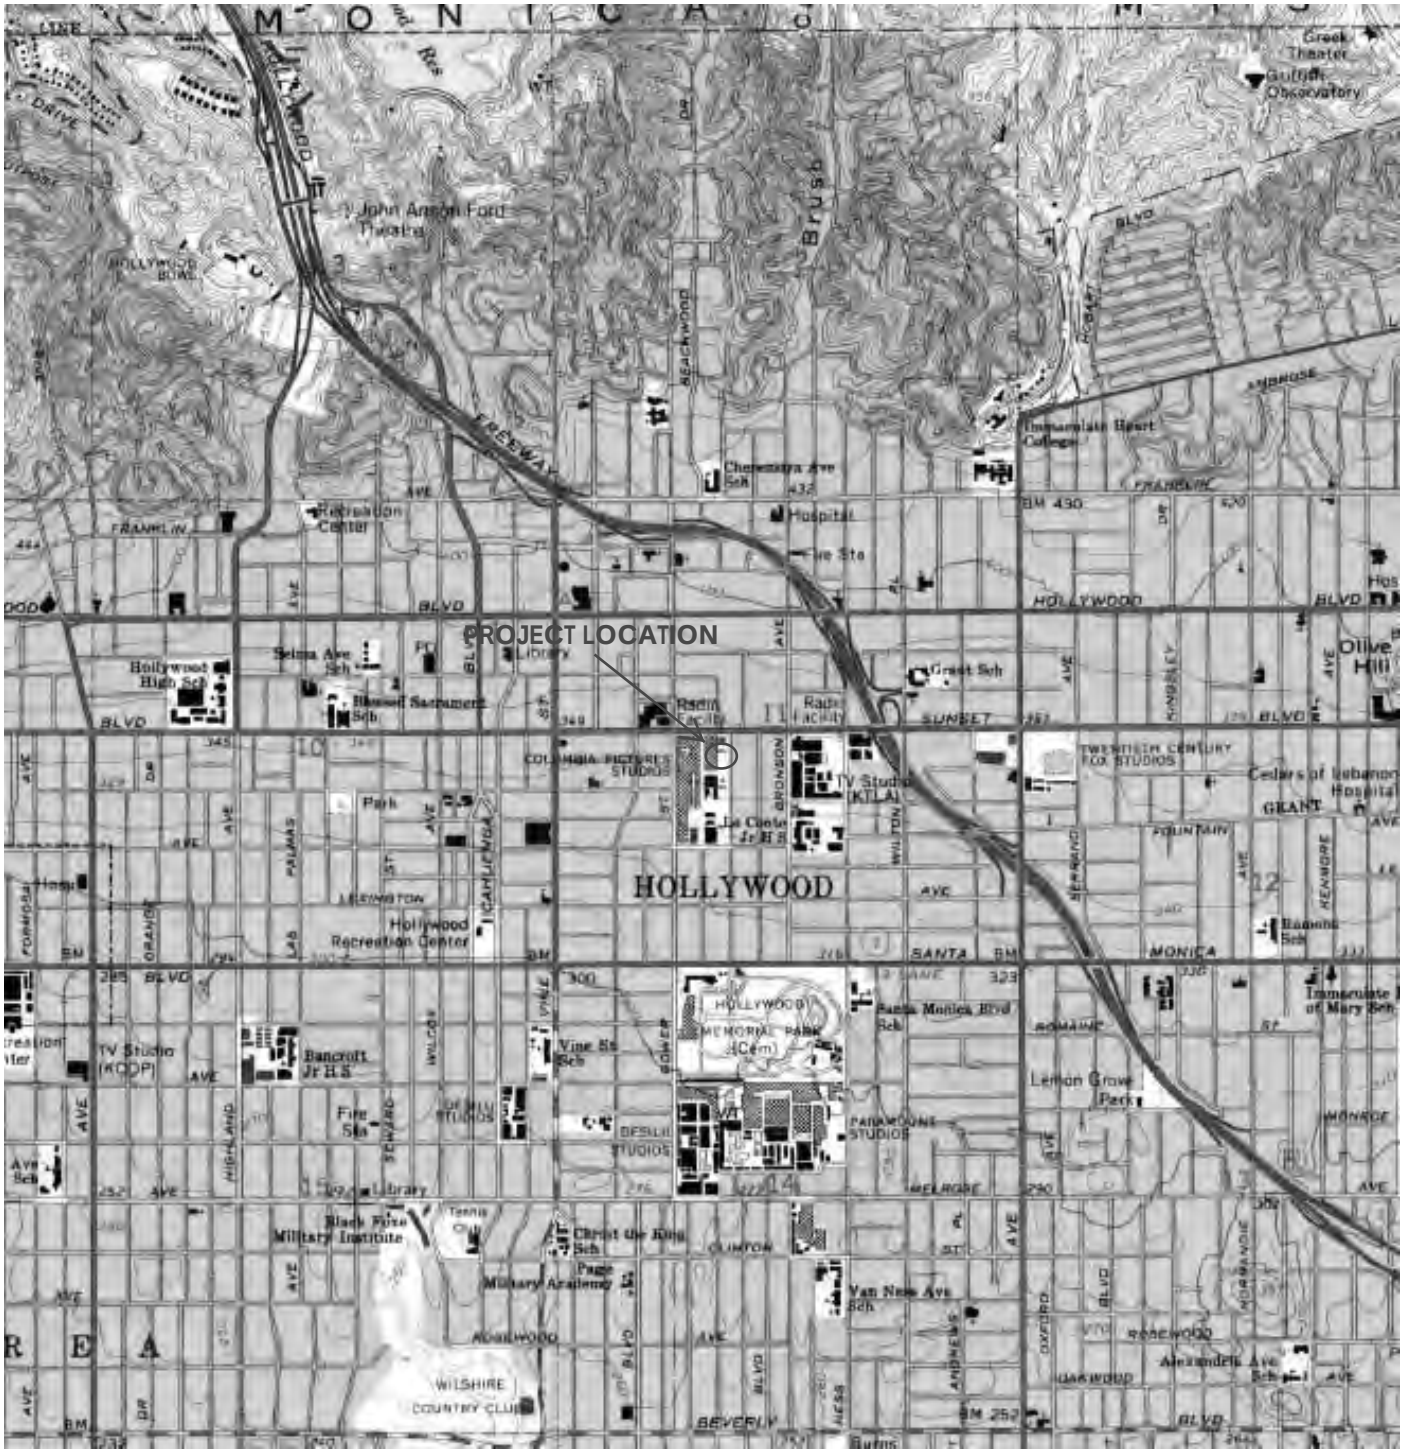
ROLE

As Principal Engineer and Director of the Environmental Geology Group, Mr. Drollinger's primary responsibilities include managing all areas of environmental assessment, environmental compliance including permitting, and achieving closure for sites under regulatory review. As a Qualified Storm Water Developer, Mr. Drollinger manages all aspects of Storm Water compliance and developing Storm Water Pollution Prevention Plans to comply with both Industrial and Construction NPDES permitting.

Mr. Drollinger works closely with, and often develops protocols for conducting assessments related to Environmentally Regulated Materials Management (ERM), Industrial Hygiene (IH), and Occupational Safety and Training (OST) departments. Mr. Drollinger's responsibilities also include developing and implementing health and safety protocols; safety training of management, staff and subcontractor personnel; establishing and managing budgets and personnel; negotiating with local, regional, state, and federal agencies; and coordinating tasks with multi-discipline project teams.

EDUCATION

Mr. Drollinger has a B.S. in Applied and Natural Sciences from the University of Alabama (Tuscaloosa), and an M.S. in Engineering, Advanced Safety Engineering and Management, University of Alabama, Birmingham (in progress).



Mr. Drollinger is also a certifying board member of the American Council of Accredited Certifications (formerly known as the American Indoor Air Quality Council), and is a member of the American Industrial Hygiene Association, American Society of Safety Engineers, Board of Certified Safety Professionals, and Institute of Hazardous Materials Management.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-05 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records – The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1

RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 09/13/2011 has revealed that there are

10 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-NonGen site within approximately 0.25 miles of the target property.

EDR Proprietary Records

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 20 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

HOLLYWOOD FILM AND VIDEO (Continued) **1000857091**

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

HOLLYWOOD FILM AND VIDEO (Continued) **1000857091**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste code:	D002

RITE AID 5438 (Continued) **1014387514**

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110002950931

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type:	Cleanup Program Site
Case Worker:	HJ
Local Agency:	Not reported
RB Case Number:	1186
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Tetrachloroethylene (PCE)
Site History:	Paragon cleaners is located on the northeast corner of the intersection of Vine Street and Fountain Avenue. Ground water has been impacted by the contaminant PCE due to operations at the dry cleaners. The dry cleaner has been in operation since 1961, and in 2006, switched to "green" chemicals.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/30/2011

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/30/2011

Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011
Date Data Arrived at EDR: 03/01/2011

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/25/2011
Date Data Arrived at EDR: 03/01/2011

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2011

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/15/2011

Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Last EDR Contact: 09/12/2011
Next Scheduled EDR Contact: 12/26/2011
Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011

Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/08/2011

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Last EDR Contact: 11/14/2011
Next Scheduled EDR Contact: 02/27/2012
Data Release Frequency: Quarterly

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database
The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 09/09/2010

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009
Date Made Active in Reports: 09/11/2009

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

COMMERCIAL BUILDING
1445 BEACHWOOD
LOS ANGELES, CA 90028

TARGET PROPERTY COORDINATES

Latitude (North):	34.09780 - 34° 5' 52.1''
Longitude (West):	118.3212 - 118° 19' 16.3''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	378123.2
UTM Y (Meters):	3773593.0
Elevation:	355 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	34118-A3 HOLLYWOOD, CA
Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

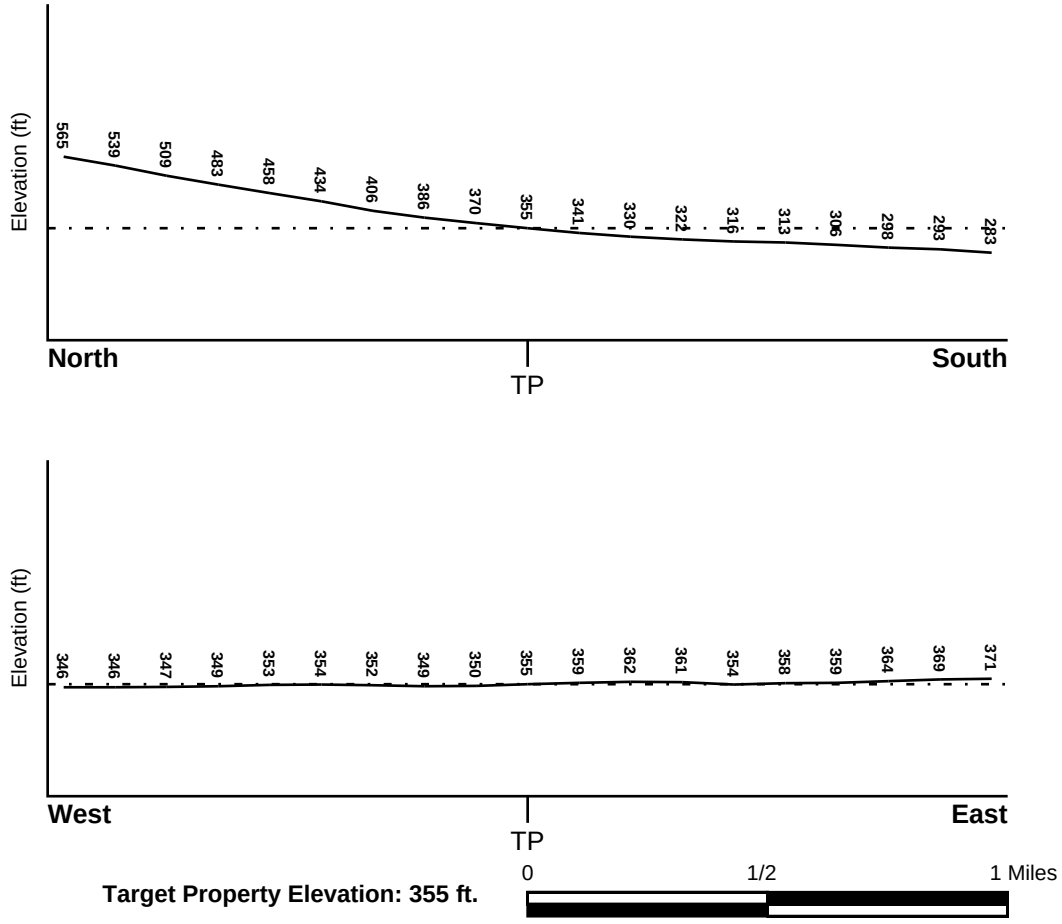
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/2 - 1 Mile SW	SW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Miocene
Code:	Tm *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APN 5545-013-002

Dear Mr. Kalt:

Enclosed please find Citadel Environmental Services, Inc.'s Phase I Environmental Site Assessment Report for the above-referenced location.

The Phase I Environmental Site Assessment Report was conducted for Hudson Pacific, LP in accordance with Citadel's Proposal 5113.1060.P, dated September 5, 2012, and a mutually agreed upon scope of work.

If after your review you have any questions or require additional information, please do not hesitate to telephone me at the Citadel Office in San Jose at (408) 418-4690.

Sincerely,
CITADEL ENVIRONMENTAL SERVICES, INC.

Mark Drollinger

EXECUTIVE SUMMARY

Citadel Environmental Services, Inc. (Citadel) was contracted by Hudson Pacific Properties, LP, to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 1455 Gordon Street, Los Angeles, County of Los Angeles, California (APN 5545-013-002).

The Site is located along the west side of Gordon Street between Sunset Boulevard and Fountain Avenue in a densely developed urban area. It is located within Hollywood, which is part of the city of Los Angeles. The general Site vicinity is occupied by commercial properties along Sunset Boulevard, Sunset Gower Studios which occupies most of the block to the south and west, residences to the southeast, and a construction site for Emerson College along the east side of Gordon Street.

The Site consists of a rectangular parcel that occupies approximately 6,750 square feet. The Site is occupied by a building that occupies approximately 6,000 square feet and a concrete-paved driveway located along the northern property line. The building mostly consists of one story, with a relatively small second-floor/loft movie projection room. According to the Los Angeles Tax Assessor, the Site is comprised of parcel currently known as Los Angeles Assessor Parcel Number 5545-013-002.

The Site inspection focused on general site conditions, on-site hazardous materials (use and storage), hazardous waste (generation, storage, and disposal), the presence of surface impoundments, underground and/or aboveground storage tanks (USTs and ASTs), the use of hydraulically operated equipment, and the presence of on-site power transformers.

No building systems that require environmental permits or the use or storage of significant volumes of hazardous or regulated chemicals (e.g. hydraulic elevators or large HVAC systems) were identified at the Site. Limited quantities of household cleaners are used on the Site for janitorial purposes. No on-site USTs or ASTs were identified with the current Site or historic Site addresses. In general, the Site appeared to be well maintained and the building/ground conditions observed were good.

The historical records reviewed indicate that the property was largely vacant and unoccupied prior to 1931. The current building was constructed for use as a sound studio, and appears to have historically been used for sound studio, bindery, dance studio, photography studio, and offices. Although a building permit indicates that the building was used for "light manufacturing" in the 1930s, evidence of large-scale, wet chemical processes has not been identified at the Site.

Construction of the current Site building began in 1931, prior to the bans on asbestos-containing building materials, PCBs in electrical equipment, and lead-based paint. Testing was performed to evaluate for the presence of ACBMs and lead-based paint. No transformers were identified on site, and PCB-containing electrical equipment was not positively identified during the Site visit.

Radon and methane do not appear to be issues of concern for the Site.

The Site has not appeared on any of the reviewed environmental databases as a location where hazardous substances have been used or released to the subsurface. The adjacent property to the west, Sunset Gower Studios, was listed as a former RCRA-SQG; however, the specific location where hazardous materials were used or hazardous wastes were generated on

this 9-acre facility was not identified in the databases. Additional nearby facilities located along Sunset Boulevard appear on the reviewed databases. The listings include a variety of historical dry cleaners, historical gas stations, laboratories, active gas stations, and other facilities where hazardous substances have been reported to be used. Some but not all of these facilities are locations where unauthorized releases of hazardous substances have been reported.

A machine shop was formerly located on the adjacent property to the south. This location is currently occupied by a multi-story parking structure, which is part of the Sunset Gower Studios. Citadel assumes that grading was required for the construction of this parking structure and shallow soils in the area of the former machine shop have been removed or redistributed from their original location.

The nearby property to the east, across Grover Street, was formerly a gas station from the early 1960s through the 1970s. That property is currently undergoing construction, and Citadel assumes that potential subsurface contamination at that location would have been identified and remediated prior to the current construction.

Citadel has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 and the All Appropriate Inquiries (AAI) Rule published in 40 CFR Part 312, of the property identified as 1455 Gordon Street (APN 5545-013-002), Los Angeles, County of Los Angeles, California. Any exceptions to, or deletions from, this practice are described in the Scope of Services section of this report. This assessment has revealed no evidence of ***recognized environmental conditions*** in connection with the Site, and no further recommendations or response actions are warranted, with the possible exception of the appropriate removal of the ACMs and lead-based paint on-site.

1.0 INTRODUCTION

Citadel Environmental Services, Inc. (Citadel) was contracted by Hudson Pacific Properties, LP, (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 1455 Gordon Street in the City of Los Angeles, Los Angeles County, California (APN 5545-013-002); hereinafter referred to as the "Site."

1.1 Purpose

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the property's structure, ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the Site. A Site visit was also conducted to observe existing Site conditions. This report provides the results of the Phase I ESA performed.

1.2 Involved Parties

The involved party(s) in this study, to the best of our knowledge, is Hudson Pacific Properties, LP.

Citadel understands that this Phase I ESA is being requested in conjunction with due diligence activities by Hudson Pacific Properties, LP. Citadel recognizes that this report is to be used exclusively by Hudson Pacific Properties, LP, and its successors, lenders, and assigns. It is a report upon which Hudson Pacific Properties, LP, and its successors, lenders, and assigns, can rely.

1.3 Scope of Services

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-05 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The scope of services for this assessment consisted of the following:

- Performed a Site inspection to verify current Site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.

- Conducted a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites pose a significant environmental threat to the Site.

- Reviewed currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and

underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.

- Consulted with appropriate governmental agencies having jurisdiction relative to past history of the property, complaints or incidents in the immediate area, and permits that may have been issued.

- Prepared a report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the Site based on the data search, reasonably ascertainable documents, and Site inspection.

2.0 GENERAL SITE CHARACTERISTICS

2.1 Location

The Site is located along the west side of Gordon Street between Sunset Boulevard and Fountain Avenue in a densely developed urban area. The Site is located in Hollywood, which is part of the city of Los Angeles. The general Site vicinity is occupied by commercial properties along Sunset Boulevard, Sunset Gower Studios which occupies most of the block to the south and west, residences along the east side of Gordon Street, and a construction site for Emerson College along the east side of Gordon Street and along Sunset Boulevard.

According to the U.S. Geological Survey (USGS) Beverly Hills Quadrangle (7.5 Minute Series), dated 1999, the Site is at an elevation of approximately 352 feet above mean sea level (AMSL) and appears to slope gently to the south. The Site is located at approximate coordinates of 34° 5' 49.92" North Latitude and 118° 19' 12.36" West Longitude.

A Site Location Map identified as Figure 1 is included in Appendix A.

2.2 Site Description

The Site consists of a rectangular parcel that occupies approximately 6,750 square feet. The Site is occupied by a building that occupies approximately 6,000 square feet and a concrete-paved driveway located along the northern property line. The building mostly consists of one story, with a relatively small second-floor/loft movie projection room. According to the Los Angeles Tax Assessor website, the Site is comprised of parcel currently known as Los Angeles Assessor Parcel Number 5545-013-002.

No building systems that require environmental permits or the use or storage of significant volumes of hazardous or regulated chemicals (e.g. hydraulic elevators or large HVAC systems) were identified at the Site. In general, the Site appeared to be well maintained and the building/ground conditions observed were good.

A Site Plan is included as Figure 2 in Appendix A. Select photographs of the Site and vicinity are included as Appendix B.

2.3 Adjacent Properties

The Site vicinity consists of residential and commercial use properties along Sunset Boulevard and Gordon Street. At the time of the Site visit, construction was underway for Emerson College and future use of the Site vicinity is anticipated to include the planned educational institution.

The Site is bounded by Gordon Street to the east, Sunset Gower Studios (NBC) to the south and west, and East West Studios (6000 Sunset Boulevard) to the north.

2.4 Utilities

Water and electrical service are supplied to the Site by the City of Los Angeles Department of Water and Power (DWP). General rubbish (non-hazardous) is removed from the Site on a regular basis by a private waste hauler. At the time of the Site visit, the owner's representative, Mr. Steven P. Tronson, did not know whether natural gas is supplied to the Site.

3.0 ENVIRONMENTAL SETTING

3.1 Physical Site Characteristics

Based upon the National Geodetic Vertical Datum (NGVD) of 1929, the Site is at an elevation of approximately 352 feet AMSL. Regional topography in the area of the Site appears to slope to the south-southwest. Surface drainage is generally to the south-southwest.

3.2 Geologic Conditions and Soils

The Site is located within the La Brea Plain of the Los Angeles Basin. The Santa Monica Mountains lie approximately 0.75 mile to the north. The Hollywood and Santa Monica faults lie north of the Site near the base of the Santa Monica Mountains (Dibblee, 1991). However, the Site is not located within an Alquist-priolo zone. The Site vicinity is underlain by alluvium derived from the nearby mountains. Soils in the Site vicinity are likely to consist of interbedded sands, silts, and clays.

3.3 Groundwater/Hydrogeological Conditions

The Site is located in the Los Angeles Forebay Area of the Central Basin (CDWR, 1961).

Citadel reviewed the Geotracker database of sites that have had releases of fuels, solvents, or other material into the soil and groundwater to obtain information regarding depth to first ground water in the Site vicinity. This database is maintained by the California Regional Water Quality Control Board. Information was obtained from this database for Mobil service station No. 18-HYO located at 5857 Sunset Boulevard, Los Angeles, California, approximately 0.1 mile east of the Site. At that facility, shallow soils were found to consist of interbedded sand, silt and clay to approximately 50 feet below grade (Cardno ERI, 2011). At that facility, depth to first ground water has been reported to range from approximately 44 to 66 feet below ground surface (bgs). More information about this offsite facility is provided in Section 6.1 Database Review.

3.4 Wetlands and Flood Zone

Citadel reviewed information for the presence of wetlands and flood zone areas at the Site and within ½-mile from the Site. Information from the National Wetlands Inventory (NWI) database provided by the United States Fish and Wildlife Service, and Flood Insurance Rate Map (FIRM), published by the Federal Emergency Management Agency (FEMA) were provided by Environmental Data Resources (EDR).

Based on information obtained by EDR and reviewed by Citadel:

- No wetland areas are indicated at the Site or adjacent properties.
- The Site is located outside of the 100- and 500-year flood zones, per FEMA Flood Insurance Rate Map No. 06037C.

4.0 SITE RECONNAISSANCE

Citadel representative Ms. Rachel Fischer conducted the Phase I ESA reconnaissance on September 7, 2012. Ms. Fischer met with Mr. Tronson of Avison Young, the owner's representative. The Site reconnaissance consisted of an inspection of the building interior. Ms. Fischer also performed a perimeter survey of surrounding properties. Ms. Fischer conducted the historical and regulatory research for the Site and Mr. Drollinger of Citadel served as the Project Manager. Findings from the Site inspection and perimeter survey are presented here.

At the time of the Site visit, the building was being used by the tenant, Emerson College, as a business office for the on-going construction across Grover Street. Three spring-loaded dance floors were observed to be present in three of the larger studio rooms, which were being used for office space. The sound booth present near the entry way was largely being used for storage. Several restrooms were present. The movie projection room on the second floor/loft did not appear to be actively used, except possibly as an employee lounge. The film vault, located in the center of the Site, was locked and reportedly used by the property owner for storing personal papers. Select photographs of the Site and vicinity are included as Appendix B.

4.1 On-Site Storage Tanks

No on-site above ground or underground storage tanks were identified with the current Site or historic Site addresses.

4.2 Identified Hazardous Materials

Citadel inspected the Site for current chemical and hazardous waste storage and handling practices. Limited quantities of household cleaners are used on the Site for janitorial purposes. No building systems that require the use of hazardous materials for system maintenance (e.g. heating, ventilation and air conditioning, hot water, and hydraulic elevator) were identified at the Site.

- Municipal trash is currently stored in a single dumpster and disposed of by a contracted waste hauler.
- Domestic sewage is disposed of to the municipal sanitary sewer system.

Visual observation of the Site and adjacent properties did not identify evidence of staining, or surface migration of petroleum releases or hazardous materials onto or off the Site.

4.3 Asbestos Containing Materials

Citadel conducted a limited asbestos survey of the on-site building. Mr. Shawn Robbins, a Certified Asbestos Consultant with Citadel identified suspect materials to be sampled. The suspect materials were grouped into homogenous areas and collected. The samples were delivered to a state-certified laboratory and analyzed for asbestos content. Based on the analytical results, the laboratory reported the presence of asbestos in the mastic of the "battleship" gray flooring and in roofing materials consisting of the rolled roofing on the parapet and the black and gray roof penetrations.

Documentation of our survey methodologies and results is provided as a separate report.

4.4 Lead Paints

A lead-containing paint (LCP) survey was conducted by Citadel. No historical documentation relative to lead-containing paint on the site was reviewed during the course of this assessment. Based on the 1931 construction date of the current on-site building, there was a potential for the presence of lead-based paint. All painted surfaces were observed to be in fair to good condition at the time of the survey. Citadel collected lead in paint data using an x-ray fluorescence (XRF) tool. The XRF measures for the presence of lead using a commercial grade atomic device. The use of the XRF reduces the need to collect physical paint chip samples. Based on the results, Lead paint was detected on the first floor consisting of several wood and metal doors and frames, gray metal flooring and a ceramic window trough and porcelain toilet. Lead paint was detected on the second floor on a metal ceiling and wall and fire door.

Documentation of our survey methodologies and results is provided as a separate report.

4.5 Polychlorinated Biphenyls

Typical sources of polychlorinated biphenyls (PCBs) include electrical transformer cooling oils, fluorescent light fixture ballasts and hydraulic oil. In 1976, the U.S. EPA banned the manufacture and sale of polychlorinated biphenyl (PCB)-containing transformers. Prior to this date, transformers were frequently filled with a dielectric fluid containing PCB-laden oil. By 1985, the US EPA required that commercial property owners with transformers containing more than 500 parts per million (ppm) PCBs must register the transformer with the local fire department, provide exterior labeling, and remove combustible materials within 16 feet (40 Code of Federal Regulations 761.30: "Fire Rule").

No pad-mounted or pole-mounted transformers were observed to be present on Site.

PCBs may also be found in capacitors and fluorescent lighting unit ballasts. As the building may have been rewired in 1989, the potential for older PCB-containing light ballasts to be present on Site is very low. No PCB-containing electrical equipment was identified during the Site reconnaissance.

4.6 Radioactive Man-Made Materials

Many public and private office buildings in the United States have self-luminescent tritium exit signs that contain radioactive materials. While these do not constitute a recognized environmental condition, the exit signs must be properly identified to ensure proper handling and disposal practices. Citadel recommends that the client be aware of whether such exit signs are present within the Site building and institute a management plan to ensure proper handling and disposal whenever such signs are damaged or replaced.

4.7 Pits, Ponds, and Lagoons

No pits, ponds, or lagoons were visually observed during the Site reconnaissance or reported to be historically present at the Site.

4.8 Septic Tanks and Cesspools

No septic tanks or cesspools were visually observed during the Site reconnaissance or reported to have been historically present on the Site.

4.9 Wells, Cisterns and Sumps

No wells, cisterns, or sumps were visually observed during the Site reconnaissance or reported to be historically present on the Site.

4.10 Wastewater Interceptors / Grease Interceptors

No wastewater interceptors/grease interceptors were observed during the Site reconnaissance or reported to be historically present on the Site.

4.11 Drinking Water

The Site is supplied with municipal drinking water by LADWP.

4.12 Radon

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for Los Angeles County is Zone 2, which indicates an average indoor concentration of less than 2.0 pCi/L of air. In a survey, 11 tests were tested within the 90028 zip code for the presence of radon. Of these, none were found to contain radon in excess of 4 pCi/L.

5.0 SITE HISTORY

To investigate the history of the Site, Citadel reviewed select historic aerial photographs, building permits, city directories, and Sanborn Fire Insurance Maps provided by EDR. In addition, Citadel

reviewed client-supplied information, a city parcel profile report, and oil and gas maps, and Citadel interviewed selected individuals regarding historic site use. Citadel's reviews of these reports and interviews are discussed below.

5.1 Historical Aerial Photographs

Historical aerial photographs of the Site and vicinity were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous materials generation or storage. Eight (8) aerial photographs dating from 1928 to 2005 were reviewed. Below are brief descriptions of observations made from the aerial photographs of the Site and vicinity.

1928 Aerial Photograph

The Site vicinity had been developed prior to 1928. Sunset Boulevard, Gordon Street, Beachwood Avenue, and other local streets had been established. The Site appears to have been vacant and void of development. The adjacent property to the north appears to have been largely vacant; however, a circular feature (possibly a fenced enclosure for animals) was present on that property. One building was present on the adjacent property to the west and two buildings were present on the adjacent property to the south.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

1938 Historic Aerial Photograph

By 1938, the current buildings at the Site and the adjacent property to the north (6000 Sunset Boulevard) had been constructed. The adjacent property to the west appears to have remained unchanged. Only one of the two buildings formerly present on the adjacent property to the south appears to have remained on that property.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

1947 and 1956 Historic Aerial Photographs

The 1947 and 1956 photos show that no significant changes occurred at the Site or adjacent properties.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

1965 Historic Aerial Photograph

Land use of the Site and nearby properties appears to be largely unchanged since 1956 with the following two exceptions. First, the building formerly located immediately south of the site was no longer present and that property was used for parking cars. Second, the property located to the east, across Grover Street, appears to have been an active gasoline service station.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

1976 Historic Aerial Photographs

Land use of the Site and nearby properties appears to be largely unchanged since 1965.

No pits, sumps or above ground tanks were observed at the Site in this aerial photograph.

1989, 1994, and 2005 Historic Aerial Photographs

During this time, land use of the Site and nearby properties appears to be largely unchanged since 1976, with the following two exceptions. First, a parking lot, which was formerly present south of the Site, had been replaced with the current parking structure. Second, the gas station was not longer present east of the site across Grover Street.

No pits, sumps or above ground tanks were observed at the Site in these aerial photographs.

Copies of the Aerial Photographs can be found in Appendix C.

5.2 Historic Building Permits

Citadel reviewed selected building permits Site for the years dating from 1941 through 2007 at the City of Los Angeles Department of Building and Safety. The Site address was used in the document search. Citadel also requested an EDR building permit report for the Site and adjoining properties; however no EDR coverage was found.

While numerous permits are available for review at the City of Los Angeles Department of Building and Safety, Citadel personnel reviewed and printed selected copies of documents that from the 1930s. The objective of this review was to evaluate land use of the Site prior to the construction of the current building in 1931, and to evaluate historic uses of the current building. No certificates of occupancy were found within the city's files; however, Mr. Tronson reported seeing a certificate of occupancy formerly posted at the Site.

The reviewed permits indicate that prior to construction of the building in 1931, the Site was vacant. The original building permit indicates that the stated purpose of the building was for sound research and scoring. In 1935, Balsely and Phillips submitted a change of address form to the city to formally change the Site address from 1438 or 1445 N. Gordon Street to 1455 N. Gordon Street. A building permit obtained in 1936 indicates that the building was used for light manufacturing and offices by "Westmore's."

Additional permits for building alteration or repair dating from the 1930s through the 1990s indicate that modifications have been made to the existing structure since the time of original construction.

Copies of selected documents from the City of Los Angeles Department of Building and Safety are included as Appendix D. A copy of the EDR Building Permit report is included as Appendix E.

5.3 Historical Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps of the Site were obtained from EDR to assist Citadel with identifying any evidence of hazardous materials usage, generation or storage from historical land uses. Sanborn Maps for the years from 1919 through 1970 were provided for review.

1919 Sanborn Map

Sunset Boulevard and Gordon Street were developed prior to 1919. The Site and adjacent properties to the north and south were void of structures. The adjacent property to the west was used by the Francis Ford Studio (Moving Pictures), which used nearby property to the southwest for motion picture sets. Nearby properties in the Site vicinity included multi-family and single-family residences. The property located east of the Site (5954 Sunset Boulevard), across Gordon Street, was used by the City of Los Angeles Engineering Department.

1950 – 1970 Sanborn Maps

The 1950 Sanborn map shows that the Site had been developed with the currently existing building. The western part of the building was used for a bindery, the central part was used for a projection room, and the eastern part was used for offices. A fireproof vault was located on Site in the same location observed during the current Site visit. No oil or gas tanks were identified on the Site or on nearby property. No changes to the Site were noted in the maps dating from 1950 through 1970.

By 1950, the current building at 6000 Sunset Boulevard had been constructed and was used as a radio broadcast studio. From 1950 through 1970, a generator was located on that property, adjacent to the northeast corner of the Site. No oil or gas tanks were identified on the maps in association with the generator.

During this period, Columbia Pictures Corporation of California remained present west of the Site.

In 1950, the building located immediately south of the site (1451 Gordon Street) was used as a machine shop and for parking. By 1966, that property and adjoining property to the west were redeveloped for use as a larger parking area (1449 Gordon Street).

The property located east of the Site (5960 Sunset Boulevard), across Gordon Street, was used for motor cycle sales, automotive repairs and automotive parking from 1950 through 1961. From 1962 through 1970, property at 5960 (and 5954) Sunset Boulevard was used as a gas station.

Nearby properties in the Site vicinity also included residences.

A copy of the EDR Sanborn Insurance Map Report is included as Appendix F.

5.4 City Parcel Profile Report

Citadel reviewed the on-line parcel profile report from the city of Los Angeles interactive database, NavigateLA. The report did not indicate any alias addresses for the Site.

5.5 Historical City Directories

City directories were researched by EDR in order to identify previous Site tenants and/or neighboring properties with a potential for hazardous materials generation and/or storage. EDR researched city directory listings from 1920 through 2006 (non-inclusive) and provided their search results to Citadel for review.

Site Address

Information obtained from the city directories indicate that the Site address have been used for the following purposes in the following years:

- Balsey & Philips, Inc. sound recording—1933 through 1937;
- Artisan Press—1951 through 1986; and
- Alley Kat Studio/Anthony Cunn Photography—2000 through 2006.

Adjacent Properties

The adjacent property to the north at 6000 W. Sunset Boulevard appears to have been used by a variety of occupants during the period from 1937 through 1990. In 1937 and 1942, the address may have been occupied by a restaurant, grocery, liquor store, and/or florist. Since 1950, most of the listed businesses appear to be associated with the music industry or publishing. However, a city directory dated 1971 also lists the two following businesses as being building occupants: Guleaf Oil Chemical Co. Plastics Division and Pac Minerals Industries. As a number of other businesses are also listed for that address in 1971, Citadel assumes that the listings reflects the use of the building for offices and not for any sort of manufacturing purposes associated with these two businesses.

The adjacent properties to the west and south at 6010 W. Sunset Boulevard and 1432 N. Beachwood Drive were not listed in the city directories. However, a number of listings for various properties along N. Beachwood Drive and Gordon Street indicate that the Site vicinity was a mixed-use area with residential and commercial listings. No listings are provided for the property located adjacent to the south of the Site along Gordon Street.

A copy of the EDR City Directories report is included as Appendix G.

5.6 Client-Supplied Environmental Information

The client provided Citadel with a copy of a previously prepared Phase I environmental report for review. No additional information regarding the Site was provided by the client.

The report dated August 22, 2012, by Sigma-EORM Inc., did not identify any Recognized Environmental Conditions in association with the Site but did identify the following four issues of potential concern:

- The film safe was not inspected for content and may potentially contain asbestos.

- Asbestos and lead-based paint were identified as potential issues of concern but were not tested.

- A lack of property owner questionnaire was identified as a potential data gap in the executive summary; however, a property owner questionnaire was provided in the appendix material for that report.

- A machine shop was formerly located adjacent to the southern property boundary.

With regards to these findings, Citadel taken the following actions and/or has made the following observations.

- The owner's representative stated that the former film vault is being used for storage of personal property, chiefly paper files. It is possible that asbestos is present in the insulation material for the vault and if so, it is highly likely that such insulation is encapsulated and does not present an immediate threat to human health at the Site. However, the vault should be evaluated for the presence of asbestos if and when this film it is removed or demolished so that appropriate measures may be taken to protect human health and the environment.

- Citadel is performing a general survey to evaluate for the potential presence of asbestos and lead-based paint on the Site.

- Citadel provided the owner with a real estate transaction questionnaire, which was returned to Citadel and is provided as Appendix H.

- A multi-story parking structure is located in the vicinity of the former machine shop. This parking structure is part of the Sunset Gower Studios. Citadel assumes that grading was required for the construction of this parking structure and shallow soils in the area of the former machine shop have been removed or redistributed from their original location.

5.7 Historical Topographic Maps

Historical topographic maps were provided by EDR in order to identify natural features and changes in development over a long period of time. The topographic maps provides the user with a regional view of changes to the Site and vicinity that other historical databases such as aerial photographs may not provide.

EDR provided topographic maps dating from 1896 through 1972 (non-inclusive) for review.

1896, 1900, 1901, and 1902 Topographic Maps

Sunset Boulevard is present on these maps. Grover Street and Beachwood Avenue do not appear to have been developed at this time. The Site appears to be void of

development, and sparse development is present along Sunset Boulevard in the site vicinity. The Site appears to be located within the rancho boundary of Los Felis.

1920 Topographic Map

The Site and adjacent properties appear to have been vacant. Nearby properties to the east, across Gower Street, appear to be occupied by small buildings. Beachwood Avenue does not appear to connect to Sunset Boulevard in the vicinity of the Site. Property further to the west across Beachwood Avenue appears to be developed by a single small building. The Salt Lake oil fields are shown to the southwest.

1926 Topographic Map

The Site appears to have been vacant. The adjacent property to the north appears to have been occupied by a building. Adjacent property to west along Beachwood Avenue may have been occupied by small to medium-sized buildings. Property further to the west across Beachwood Avenue appears to be developed by a large building. Properties south of the Site along Gower Street appear to be occupied by small buildings. The property to the east, across Gower Street, appears to be void of structures.

1953 Topographic Map

The Site vicinity is shown as being developed for dense, urban use. Columbia Studios was present west of the Site, between Beachwood Avenue and Gower Street.

1966, 1972, 1981, and 1994 Topographic Maps

The Site and vicinity were largely developed for commercial and residential use prior to 1966. The 1966 and 1972 indicate urbanized land use of the site vicinity and indicate the presence of Columbia Pictures to the west of the Site (between Gower Street and Gordon Street from Sunset Boulevard to Fountain Avenue), but do not indicate the presence of the Site building. The 1981 and 1994 topo maps were revised to include buildings on the Site and 6000 Sunset Boulevard but do not identify individual buildings present in the site vicinity.

Copies of the historical topographic maps provided by EDR are included as Appendix I.

5.8 Historic Oil and Gas Maps

Citadel reviewed information available on-line through the California Department of Conservation's website. Wildcat Map W1-5 shows the Site and vicinity. The nearest wildcat hole drilled for oil or gas, Chevron USA, Inc. Hollywood Corehole #1, is located approximately 0.4 mile southwest of the site. This well was a dry hole that was plugged and abandoned.

The Site is not considered to be within the boundaries of any identified oil fields. The Site is not located within an area designated by the City of Los Angeles to be a Methane Hazard Zone (NavigateLA).

5.9 South Coast Air Quality Management District – FIND Database

Citadel reviewed information available on-line through the South Coast Air Quality Management District's Facility Information Detail (FIND) database. No information regarding the Site address was identified in the database. Hence, no permits for regulated equipment have been reported to have been obtained for the Site.

5.10 Interviews

Citadel interviewed Mr. Tronson at the Site on September 7, 2012. Ms. Fischer gave Mr. Tronson a real estate transaction screen questionnaire for the property owner, Ms. Rayna Vonk, to complete. The questionnaire was completed and submitted to Citadel for incorporation into this report as Appendix H.

5.11 Environmental Lien

Title documents and environmental lien reports were researched by EDR in order to identify potential environmental liens or activity use limitations (AULs) for the Site. Mr. Tronson and Ms. Vonk were not aware of any environmental liens or AULs against the Site. The EDR report also did not identify any environmental liens of AULs against the Site. A copy of the EDR report is provided as Appendix J.

5.12 Summary of Site History

The historical records reviewed indicate that the property was vacant and unoccupied prior to 1931. The current Site building was constructed in 1931 for "sound research and scoring." The Site has been used for sound stage and dance studio purposes since then, as well as for a photography studio, bindery, and offices. A building permit indicates that the Site was used for light manufacturing (possibly bindery operations) and offices in 1936. Evidence of large-scale, wet chemical processes has not been identified at the Site.

The adjacent property to the south was formerly occupied by a machine shop from the 1930s through the late 1950s or early 1960s. This location is currently occupied by a multi-story parking structure, which is part of the Sunset Gower Studios. Citadel assumes that construction at that facility would have disturbed and redistributed shallow soils from their original location.

The nearby property to the east, across Grover Street, was formerly a gas station from the early 1960s through the 1970s. That property is currently undergoing construction, and Citadel assumes that potential subsurface contamination at that location would have been identified and remediated prior to the current construction.

6.0 REGULATORY AGENCY REVIEW

6.1 Database Review

Citadel contracted with EDR to conduct a database search of standard environmental records sources to assist Citadel with identifying recognized environmental conditions in connection with the Site. A full description of the regulatory agency lists researched can

be found in Appendix K. A partial listing of environmental databases reviewed by Citadel to identify facilities within the search radii, and the Site are discussed below.

Major Hazardous Waste Sites Databases		
DATABASE	**AGENCY**	**RADIUS**
National Priority List (NPL); Delisted NPL List	United States Environmental Protection Agency (USEPA)	1.0 mile
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); No Further Remediation Action Planned (NFRAP)	United States Environmental Protection Agency (USEPA)	0.5 mile
Resource Conservation and Recovery Act (RCRA), Corrective Action Report (CORRACTS), Treatment Storage and Disposal (TSD), Large Quantity Generators (LQG), and Small Quantity Generators (SQG)	United States Environmental Protection Agency (USEPA)	CORRACTS = 1.0 mile; TSD = 0.50 mile; LQG / SQG = 0.25 mile
Engineering Institutional Control / Engineering Control Registries	United States Environmental Protection Agency (USEPA)	0.50 mile
Annual Workplan Sites / CAL-Sites	California Environmental Protection Agency (Cal/EPA)	1.0 mile
Leaking Underground Storage Tank Report (LUST)	California Division of Environmental Protection; Regional Water Quality Control Board (RWQCB)	0.50 mile
Underground Storage Tank (UST)	State Water Resources Control Board (SWRCB)	0.25 mile
Spills, Leaks, Investigations, and Cleanups (SLIC)	State Water Resources Control Board (SWRCB)	0.25 mile
Solid Waste Information System (State Landfill)	Integrated Waste Management Board (IWMB)	0.50 mile
Cleaner Facilities (Drycleaners)	California Division of Environmental Protection; Department of Toxic Substance Control (DTSC)	0.25 mile

The Site did not appear on the reviewed databases.

The Sunset Gower Studios at 1438 Gower Street (APN 5545-013-404) is listed on the databases as a historic RCRA-small quantity generator of hazardous wastes. This address includes the 9.5-acre property located adjacent to and south of the Site. The database does not indicate where on that facility hazardous substances were formerly handled. Hazardous wastes were disposed of under manifest as recently as 2011 and 2009. The listed hazardous wastes include organics, latex wastes, other organic solids, and paint sludge.

Additional nearby facilities located along Sunset Boulevard appear on the reviewed databases. The listings include a variety of historical dry cleaners, historical gas stations, laboratories, active gas stations, and other facilities where hazardous substances have been reported to be used. Some but not all of these facilities are locations where unauthorized releases of hazardous substances have been reported.

Other facilities within a half-mile radius of the Site have been identified on federal and state environmental lists. Maps showing the location of these facilities and additional information are provided in the EDR Radius Map Report in Appendix K.

6.2 Agency Correspondence

Citadel submitted a request to the City of Los Angeles Fire Department for information regarding the Site address. Due to the tight framework for environmental due diligence, the agency had not responded to Citadel's request for information prior to completion of this. Once received, an addendum to this report will be provided regarding whether the agency has files for the Site addresses. However, the previous Phase I indicates that the LAFD did not have files for the Site.

7.0 DATA GAPS

The following data gaps have been identified during the course of this investigation:

- Additional governmental agencies, such as the Los Angeles County Department of Public Works, that are not included in the EDR Radius Map report may maintain information regarding environmental conditions at the Site and nearby facilities.

- A complete listing of all previous site tenants was not reviewed, and information regarding the Site occupants during the 1940s was not obtained.

With regard to these data gaps, Citadel believes that the most significant potential sources for on-site contamination have been identified during the current investigation.

8.0 CONCLUSIONS

Citadel Environmental Services, Inc. (Citadel) was contracted by Hudson Pacific Properties, LP, to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 1455 Gordon Street, Los Angeles, County of Los Angeles, California (APN 5545-013-002).

The Site is located along the west side of Gordon Street between Sunset Boulevard and Fountain Avenue in a densely developed urban area. It is located within Hollywood, which is part of the city of Los Angeles. The general Site vicinity is occupied by commercial properties along Sunset

Boulevard, Sunset Gower Studios which occupies most of the block to the south and west, residences to the southeast, and a construction site for Emerson College along the east side of Gordon Street.

The Site consists of a rectangular parcel that occupies approximately 6,750 square feet. The Site is occupied by a building that occupies approximately 6,000 square feet and a concrete-paved driveway located along the northern property line. The building mostly consists of one story, with a relatively small second-floor/loft movie projection room. According to the Los Angeles Tax Assessor, the Site is comprised of parcel currently known as Los Angeles Assessor Parcel Number 5545-013-002.

The Site inspection focused on general site conditions, on-site hazardous materials (use and storage), hazardous waste (generation, storage, and disposal), the presence of surface impoundments, underground and/or aboveground storage tanks (USTs and ASTs), the use of hydraulically operated equipment, and the presence of on-site power transformers.

No building systems that require environmental permits or the use or storage of significant volumes of hazardous or regulated chemicals (e.g. hydraulic elevators or large HVAC systems) were identified at the Site. Limited quantities of household cleaners are used on the Site for janitorial purposes. No on-site USTs or ASTs were identified with the current Site or historic Site addresses. In general, the Site appeared to be well maintained and the building/ground conditions observed were good.

The historical records reviewed indicate that the property was largely vacant and unoccupied prior to 1931. The current building was constructed for use as a sound studio, and appears to have historically been used for sound studio, bindery, dance studio, photography studio, and offices. Although a building permit indicates that the building was used for "light manufacturing" in the 1930s, evidence of large-scale, wet chemical processes has not been identified at the Site.

Construction of the current Site building began in 1931, prior to the bans on asbestos-containing building materials, PCBs in electrical equipment, and lead-based paint. Testing was performed to evaluate for the presence of ACBMs and lead-based paint. No transformers were identified on site, and PCB-containing electrical equipment was not positively identified during the Site visit.

Radon and methane do not appear to be issues of concern for the Site.

The Site has not appeared on any of the reviewed environmental databases as a location where hazardous substances have been used or released to the subsurface. The adjacent property to the west, Sunset Gower Studios, was listed as a former RCRA-SQG; however, the specific location where hazardous materials were used or hazardous wastes were generated on this 9-acre facility was not identified in the databases. Additional nearby facilities located along Sunset Boulevard appear on the reviewed databases. The listings include a variety of historical dry cleaners, historical gas stations, laboratories, active gas stations, and other facilities where hazardous substances have been reported to be used. Some but not all of these facilities are locations where unauthorized releases of hazardous substances have been reported.

A machine shop was formerly located on the adjacent property to the south. This location is currently occupied by a multi-story parking structure, which is part of the Sunset Gower Studios. Citadel assumes that grading was required for the construction of this parking structure and

shallow soils in the area of the former machine shop have been removed or redistributed from their original location.

The nearby property to the east, across Grover Street, was formerly a gas station from the early 1960s through the 1970s. That property is currently undergoing construction, and Citadel assumes that potential subsurface contamination at that location would have been identified and remediated prior to the current construction.

Citadel has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 and the All Appropriate Inquiries (AAI) Rule published in 40 CFR Part 312, of the property identified as 1455 Gordon Street (APN 5545-013-002), Los Angeles, County of Los Angeles, California. Any exceptions to, or deletions from, this practice are described in the Scope of Services section of this report. This assessment has revealed no evidence of ***recognized environmental conditions*** in connection with the Site, and no further recommendations or response actions are warranted, with the possible exception of the appropriate removal of the ACMs and lead-based paint on-site.

9.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel Environmental Services, Inc. will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and preparing this report in accordance with the normal standards of our profession, but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies.

11.0 PROFESSIONAL CERTIFICATION

Citadel has completed a Phase I Environmental Site Assessment (ESA) for the vacant and undeveloped land located at 10701 Bellagio Road in Los Angeles, California. The Phase I ESA was performed at the Clients request in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-2005 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The independent conclusions represent our professional judgment based on information and data available to Citadel during the course of this project. Information regarding historical and present operations, conditions and test data provided by the Client or their representative, is assumed to be correct and complete. The conclusions presented by this Phase I ESA are based on information provided to Citadel and from observations and perceived conditions existing on the date of the site reconnaissance.

In expressing the opinions stated in this report, Citadel has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional. Documentation provided by the Client, Client-designated representatives, interested third-parties, or from the public domain, and referenced in preparation of the Phase I ESA report, have been assimilated with the understanding that Citadel assumes no responsibility or liability for their accuracy.

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by the final All Appropriate Inquiry (AAI) Rule published in 40 CFR Part 312.10 (November 1, 2005). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting described in this Phase I ESA. I have developed and performed the AAI in conformance with the standard and care of this Rule.

EXPERIENCE

With 25 years of experience in environmental compliance, permitting and environmental management projects, Mr. Drollinger has a strong working knowledge of EPA, DTSC, AQMD/APCD, OSHA and DOT regulations. Among his vast experience, Mr. Drollinger has provided environmental assessment and compliance expertise, safety management, and engineering construction management services on numerous projects for the US Navy, Veterans Administration, US Department of Agriculture, Cal Trans, EPA and numerous private projects throughout the western United States. In addition, Mr. Drollinger has developed and implemented programs to train managers and staff in storm water and NPDES compliance, soil and groundwater sample collection and data interpretation, Hazcomm, IIPP, and safe-work practices such as identifying and handling hazardous materials, fall protection, confined space, traffic control, LO/TO and ergonomics; and has conducted environmental and permitting audits of facilities including health and safety assessments.

Specific Cal-Trans projects Mr. Drollinger has been involved with include managing and providing environmental compliance services for the I-605 South to I-10 East Interchange and developing NEPA 2 Level environmental assessment protocols for a right-of-way corridor study along I-10 in the Coachella Valley.

ROLE

As Principal Engineer and Director of the Environmental Geology Group, Mr. Drollinger's primary responsibilities include managing all areas of environmental assessment, environmental compliance including permitting, and achieving closure for sites under regulatory review. As a Qualified Storm Water Developer, Mr. Drollinger manages all aspects of Storm Water compliance and developing Storm Water Pollution Prevention Plans to comply with both Industrial and Construction NPDES permitting.

Mr. Drollinger works closely with, and often develops protocols for conducting assessments related to Environmentally Regulated Materials Management (ERM), Industrial Hygiene (IH), and Occupational Safety and Training (OST) departments. Mr. Drollinger's responsibilities also include developing and implementing health and safety protocols; safety training of management, staff and subcontractor personnel; establishing and managing budgets and personnel; negotiating with local, regional, state, and federal agencies; and coordinating tasks with multi-discipline project teams.

EDUCATION

Mr. Drollinger has a B.S. in Applied and Natural Sciences from the University of Alabama (Tuscaloosa), and an M.S. in Engineering, Advanced Safety Engineering and Management, University of Alabama, Birmingham (in progress).

Mr. Drollinger is also a certifying board member of the American Council of Accredited Certifications (formerly known as the American Indoor Air Quality Council), and is a member of the American Industrial Hygiene Association, American Society of Safety Engineers, Board of Certified Safety Professionals, and Institute of Hazardous Materials Management.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

DEPARTMENT OF BUILDING AND SAFETY

Application for the Erection of Buildings

CLASS ~~"A"~~ "B"—"C"

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-05 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records – The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.
