PHASE I ENVIRONMENTAL SITE ASSESSMENT

ASTM E: 1527-21

APNs: 678-690-70, 678-690-71 and 678-690-72
in
San Diego, California 92127

CLIENT: Cambridge School
12855 Black Mountain Road
San Diego, CA 92129

PREPARED BY: *Marc Boogay*
Consulting Engineer
1584 Whispering Palm Drive
Oceanside, California 92056
(760) 407-4000

DATE: July 5, 2024

PROJECT NUMBER: 24-0604

IMPORTANT NOTICE: This report is confidential. It may not be read or relied upon, except by the Client.

ABSTRACT

A Phase I Environmental Site Assessment was conducted for the contiguous commercial properties identified by the Assessor Parcel Numbers: 678-690-70, -71, & -72 (together, the "subject site")[1] in San Diego, California. The purpose of this effort was to conduct "all appropriate inquiries"[2] to identify adverse environmental issues associated with previous ownership and uses of the facility/property prior to a commercial real estate transaction (sale, lease, etc.) or development.

Research for this report included a visit to the subject site and adjacent properties/vicinity, review of available subject site history including building permit records, aerial photographs, and city directories, discussion of the subject site's physical characteristics, and review of regulatory agency records for the potential for "recognized environmental conditions" [3] in connection with the subject site.

Evaluation of the key component of "business environmental risk" [4] was made for the subject site by MBCE (Marc Boogay Consulting Engineer, "the environmental professional"[5], per the specification, ASTM 1527-21).

This assessment identified environmental concerns with previous agricultural usage onsite and in adjacent areas. With previous agricultural usage there is risks on onsite pesticides such at DDT to remain in the soil. A provided report indicated risks in the site area due to placement of the chemical, Toxaphene. Nearby commercial usage and automotive repair and adjacent aboveground tank for diesel fuel were considered environmental concerns. With development of the subject site, it is recommended that soil sampling check for agricultural/hazardous chemicals. No other significant additional investigative effort is deemed warranted at this time.

---

1 The words "offsite" and "onsite" will generally refer to on the subject site; however, appendices provided by Environmental Data Resources (EDR) refer to the subject site as the "target property."

2 "All appropriate inquiry" is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* defenses.

3 **RECs** are defined by the ASTM specification as, " the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions." **Controlled RECs** are past releases that have been addressed to the satisfaction of the applicable regulatory authority (for example, a "no further action" designation has been assigned). Controlled RECs do not imply unrestricted use of the property. **Historical RECs** meet unrestricted use criteria as determined by the applicable regulatory authority.

4 Defined by ASTM E 1527-21 as "a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

5 Defined by ASTM E 1527-21 as a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b).

1.0 AUTHORIZATION, OBJECTIVE AND APPROACH

This study was conducted in accordance with a contract between *Marc Boogay Consulting Engineer* (MBCE) and *Cambridge School* (the "Client"), dated June 20, 2024. It concerns the contiguous commercial properties at the APNs: 678-690-70, -71 & -72 in San Diego, CA. This study was performed in accordance with the scope of American Society of Testing & Materials (ASTM) E 1527-21, Standard Practice for Environmental Subject site Assessments: Phase I Environmental Subject site Assessment Process.

The purpose of this Phase I Environmental Subject site Assessment was to identify recognized environmental conditions in connection with the subject site and for “due diligence” (as defined in the ASTM specification) in judging the likelihood of hazardous substances or petroleum products that may be present in soil, soil vapor [6], or groundwater at the subject site, as could potentially result in an enforced environmental clean-up.

2.0 SCOPE OF WORK

The scope of services for this work is described by the following elements, transcribed from the contract:

- A subject site inspection and vicinity visit, with assessment of the possible presence of soil and groundwater contamination and threats from current or past subject site and vicinity usage.
- A review of readily available (published) regulatory agency records, including lists of CERCLIS and Superfund/SARA subject locations, hazardous waste storage/generation locations, vicinity violations and releases, and leaking underground tanks.
- A review of readily available local government agency records including enforcing UST/AST regulatory agencies, enforcing hazardous materials storage agencies, county/city departments of environmental health, and local departments of Building, Planning, Public Works, and Fire.
- A review of readily available soils, topographic, and geologic/hydrogeologic data for the subject site and vicinity.
- A review of readily available historical information for the subject site, including aerial photographs, interviews, and records regarding on-subject site hazardous materials/wastes.
- Review of documents as provided by the Client, including appraisals, geotechnical and soils reports, chain-of-title information, etc.

[6] Per the ASTM standard, the presence within a building of hazardous substances such as vapors that have migrated into a building from a “release into the environment” (i.e., from a release outside of the building) can result in CERCLA liability.

3.0 SUBJECT SITE RECONNAISANCE

The inspection of the subject site and the adjacent properties/ vicinity was performed on June 27, 2024 by Marc Boogay, of *Marc Boogay Consulting Engineer* ("environmental professional" per the ASTM specification). The subject site comprised a vacant property.

3.1 Subject site Description

Material in this section was based on a visit to the subject site/vicinity conducted by MBCE. The subject site was only visually inspected; no inspection was completed within piled materials, etc. Information concerning presence of hazardous materials may also be noted in Section 3.2.

The subject site comprised three contiguous parcels in the southwest corner of Camino Del Sur and Coyote Bush Drive. The main parcel 678-690-70 was relatively flat, and parcels -71 and -72 largely comprised stormwater retention basins. A small pipe stub was seen and photographed near the boundary between parcels. A small pile of concrete rubble was along the subject site's Templeton Street boundary. High weeds prevented full access or observation.

Buildings, ancillary structures:

No buildings were present onsite.

Typical utilities were on or adjacent to the subject site. These appeared to include water, sewer, electricity and natural gas provided by the City of San Diego, local water district, and SDG&E.

3.2 Selected Environmental Assessment Issues

Hazardous Materials Storage/Use – This section describes the types, quantities, container types, and storage conditions of hazardous materials observed at the subject site.

Storage tanks – None was observed.

Drains and sumps – None was observed.

Pits, ponds, lagoons, and/or pools of liquids - Stormwater collection basins were noted in the northeast corner of the subject site.

Interior or exterior stains/corrosion – None was observed.

Distressed vegetation – None was observed.

Odors – None was observed.

Solid wastes – None was observed.

Wells – None was observed.

Engineering Controls – No physical modifications, such as capping, slurry walls, or point-of-use water treatment, were seen at the subject site.

Polychlorinated biphenyls – Polychlorinated biphenyls (PCBs) have historically been found in electrical equipment such as transformers and lighting ballasts. Installations of equipment involving PCBs are much less likely in recent decades. Where present, warning placards are often in place. No transformers on or adjacent to the subject site were noted to have evidence of leakage or placards warning of PCBs. (NOTE: The ASTM standard does not require disclosure of fluorescent lighting ballasts).

3.3 Adjacent Property Observations

The immediate vicinity was characterized by general commercial and residential usage with a predominance of residential usage.

Properties adjacent to the subject site were as follows:

- To the north was the roadway Camino Del Sur, across this was vacant land and residential usage.
- To the south was the roadway Templeton Street and across this was residential usage.
- To the east was the roadway Coyote Bush Drive and across this was vacant land under construction in a large, active project.
- To the west was commercial usage at 16067 Babcock Street and parking for *Snap-on*, an automotive tool company.

4.0 HISTORY AND USAGE

A records review was performed to obtain and analyze "reasonably ascertainable"[7] records to help identify recognized environmental conditions in connection with the subject site. Per the ASTM standard, a reasonable attempt was made to identify uses back to 1940 or to the first developed usage. These sections may include the results of additional research completed for adjoining properties, if/as deemed necessary by the environmental professional. Interviews were completed with local government officials as deemed relevant by the environmental professional. Historical resources provided by EDR, where appropriate, are included in Appendix VI.

4.1 City/Local Department Records

Building/Planning/Public Works Departments – Building department records were requested by subject site APNs, records were not received within the time constraint of this report.

Department of Fire Protection and Safety – Records were requested by subject site APNs, records could not be found with the subject site not having a physical address.

4.2 County Department of Environmental Health

Records were requested by the subject site's APNs; no records were found.

4.3 Land Use Limitations

Zoning/Land Use – Information obtained from the City of San Diego Zoning and Parcel Information[i] indicated the subject site is part of its zoning designation CC-4-5 (Commercial-Community Zones).

Deed Restrictions –Activity and use limitations (AUL) aim to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater,

[7] Per the ASTM standard, "reasonably ascertainable" information is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable. Information that is "practically reviewable" means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary data analysis.

and/or surface water at the subject site through legal (institutional controls) and physical restrictions (engineering controls). AULs may indicate that hazardous substances or petroleum products have been released at the subject site and that, as a result, unrestricted use of the subject site is not appropriate. California law requires that the Department of Toxic Substances Control (DTSC) notify the planning and building departments of all local governments of any recorded land use restriction ("deed restriction" or restrictive covenants). Included should be any institutional controls that apply to the subject site. On its website [ii], DTSC maintains a list of land use restrictions, including street addresses or the equivalent description of location. Threats were not identified within 1000-feet of the subject site.

4.4 Sanborn Fire Insurance Maps

A search of available maps from a private fire insurance map company, *Sanborn Fire Insurance Maps*, was performed. These typically indicate historical usage. Search of these maps by *Environmental Data Resources* (EDR) indicated coverage for the subject site. Search of these maps by *Environmental Data Resources* (EDR) indicated no coverage for the subject site.

4.5 Historical Photographs and Topographic Maps

Per the ASTM specification, historical aerial photographs (photographs taken from an aerial platform with "sufficient resolution to allow identification of development and activities of areas encompassing the property") were reviewed. These and historical USGS Topographic Maps were made available by resources from *Environmental Data Resources Inc.* (EDR). Any gaps of greater than five years were due to insufficient data for the specific subject site. A recent aerial photograph noting position of the subject site is presented with all reviewed photographs as Appendix IV. The following table lists photographs and interpretations.

Photograph Year	Description
1939	The subject site appeared to be fully taken by raw natural land and in all directions adjacent to the subject site. A roadway was interpreted to the north of the subject site.
1947	This image was not interpreted to show significant changes on or adjoining the subject site as compared with the preceding image.
1949	The subject site appeared to have a natural drainage channel from the northeast corner to the southwest corner of the subject site. .
1953	To the north of the subject site across the roadway to the north, agricultural usage was interpreted.
1964	The subject site appeared to have agricultural usages onsite with a agricultural roadways going throughout the site.
1966	Agricultural usage onsite was no longer interpreted onsite.
1970	The subject site and surrounding areas appeared to be graded.
1979	The subject site and surrounding areas appeared to be vacant land.
1985	The subject site and surrounding areas appeared to have agricultural usage.
1985	This image was not interpreted to show significant changes on or adjoining the subject site as compared with the preceding image.

Aerial Imagery summary, continued

Photograph Year	Description
1994	The subject site and surrounding areas appeared to be graded and vacant land.
1996	This image was not interpreted to show significant changes on or adjoining the subject site as compared with the preceding image.
2002	The subject site and surrounding areas appeared to have agricultural usage. With residential development to the north across a roadway identified as Camino Del Sur.
2005	The subject site was interpreted as vacant land and vacant land to the east and south. A roadway was to the west and across this was grading and development.
2009	Residential and commercial development was interpreted to the west of the subject site.
2012	The subject site and surrounding areas appeared to be graded.
2016	The subject site appeared to have a large slab in the southeast corner of the subject site and small structure in the northeast corner. Roadways were developed around the subject site; to the east was Coyote Bush Drive, to the south was Templeton Street and to the west across a vacant property was Babcock Street. Residential development was interpreted to the far south.
2020	The subject site appeared to have a retention pond along the eastern boundary of the subject site with graded area along the northern boundary and possibly additional dry retention basin in the northeast corner. Commercial development was interpreted to the west of the subject site and residential development to the south across Templeton Street.
Historical USGS topographical maps were reviewed for the years 2022, 2018, 2015, 2012, 1994, 1983, 1975, 1967, 1949, 1948, 1947, 1901, and 1893 provided by EDR. Notations near the subject site were consistent with aerial photograph interpretations and other inputs. No significant land usage threat to the subject site was interpreted from these maps.	

4.6 Criss-Cross Street Directories

Cross-referenced ("criss-cross") street directories showing tenancy/ownership of the subject site were researched by EDR; city directories were researched in approximately five-year intervals. The following table describes the type of directory, its publication year, and a summary of subject site tenancies found for the subject site address. Where appropriate, adjacent/nearby offsite usages are noted as may represent environmental risk for the subject site. Listings for adjoining properties were interpreted as consistent with observed and known usages. Directories for 2020, 2017, 2014, 2010, 2006, 2005, 2000, 1995, 1992, 1991, 1989, 1985, 1984, 1980, 1976, 1975, 1971, 1970, 1966, 1965, 1962, 1961, 1960, 1956, 1955, 1952, 1950, 1948, 1945, 1945, 1943, 1940, 1938, 1933, 1927, 1907 and 1903 were reviewed.

Onsite occupants' were not found for the subject site address.

Very nearby non-residential addresses/tenants interpreted were:

16016 Babcock Street
2020: CASAM FOUNDATION INC/ UZAK APPLIANCE/ CIC FAIRBANKS
2017: CIC FAIRBANKS LP
2014: CIC FAIRBANKS LP
2010: UZAK APPLIANCES/ CIC FAIRBANKS LP

Complete results of directories research are provided in Appendix VI.

4.7 Questionnaires and Interviews

Questionnaires - A questionnaire was prepared using a form generated by *Marc Boogay Consulting Engineer* in accordance with the ASTM Practice E 1527-13 specification. One copy of the questionnaire was filled out by MBCE, based on observations made during the subject site/vicinity visit and research conducted as part of this assessment. MBCE also conveyed a questionnaire to the site owner/manager. Questionnaires are attached in Appendix V. The questionnaire was filled out by Scott Kim, from the Board of Trustees. The questionnaire was marked "no" or "unknown" for most questions except the questions regarding specific known chemicals present onsite was marked "yes" with the following note:

"Toxaphene detected at some point."

Interviews – Per the ASTM standard, interviews are to be conducted with owners, operators, occupants and past occupants (at the discretion of the environmental professional), and/or key subject site managers. An interview was not made available with key personnel.

4.8 Property Tax Files

These refer to files kept for property tax purposes by the local jurisdiction where the subject site is located and may include reports of past ownership, appraisals, maps, sketches, photos, or other information that is *reasonably ascertainable* as defined by the ASTM standard. These were limited to those provided by the Client for review; no historical ownership documents were provided.

4.9 Recorded Land Title Records

Records of historical fee ownership (e.g., leases, and land contracts) on or of the subject site may be of use in environmental subject site assessment. In San Diego County, recorded land title records are filed at the County Recorder (see Section 4.8, above). No title reports or chain-of-title records were supplied by the Client for review.

(The ASTM E 1527-13 standard does not require review of recorded land title records and judicial records for environmental liens or activity and use limitations.)

4.10 Other Historical Records

Other readily available historical records may be reviewed for a Phase I report, e.g., miscellaneous maps, newspaper archives, internet sites, community organizations, local libraries, historical societies, current owners or occupants of neighboring properties, and other sources. No additional resources were identified.

5.0 PHYSICAL SETTING

In the following sections, information regarding soils, geology, topography, and groundwater at the subject site is considered. Such information sometimes indicates direction/extent for contaminant migration in groundwater or soil, in the event of a spill or other release.

5.1 Soil

As indicated by soil survey information provided in the EDR report, the subject site appeared to be underlain by clay, with the name, *DIABLO*; the hydrology was said to be well drained with very slow infiltration rates. Soils are clayey, have a high-water table, or are shallow to an impervious layer.

5.2 Geology

EDR's geologic resources indicated the subject site to be underlain by Cenozoic strata with a Tertiary System with a Eocene series with code Tec and a category of Continental Deposits.

5.3 Topography

Subject site topography appeared generally level. Further research using EDR's proprietary topographical software showed the subject site to be approximately 492-feet above mean sea level, generally level with regional slight downward slope towards the general north-northeast.

5.4 Groundwater

Groundwater depth on or near the subject site provided in the EDR report; it was deemed likely to migrate in a north-northeast direction. Wells were not identified within 1/8-mile of the subject site.

6.0 REGULATORY AGENCY RECORDS REVIEW

Environmental Data Resources Inc. (EDR), an independent firm specializing in governmental database information, was assigned the search of databases for locations, which represent various environmental threats, within distances specified in the American Society for Testing & Materials standard, ASTM E 1527-21. The resulting report is presented in appendix VI, and includes descriptions of all researched sources and maps showing the locations of facilities identified in the database searches. Other information was researched through local sources and other in-house sources. Results of this additional research are presented in Section 6.2.

In general, listings within 1/8-mile of the subject site are considered of particular interest. Releases involving chlorinated hydrocarbons within 1/3-mile of the subject site should be especially considered for potential soil vapor intrusion risk to the subject site.

6.1 EDR Database Review

Many databases were researched by EDR; these were organized by distance from the subject site. A table summarizing listed threats and potential threats identified in these databases is provided as follows:

The Subject site	
NONE	-
Listings within 1/8 mile	
RCRA-LQG	1
RCRA-VSQG	1
CERS HAZ WASTE	3
CERS TANKS	1
RCRA NonGen/NLR	1
NPDES	1
CIWQS	1
E MANIFEST	2
Listings between 1/8 and 1/4 mile	
NONE	-
Listings between 1/4 and 1/2 mile	
ENVIROSTOR	1
Listings between 1/2 and 1 mile	
ENVIROSTOR	2
FUDS	1

A listing of databases searched for the subject site is located on Page 4 of the EDR report. Notable listings are further described in the following paragraphs.

THE SUBJECT SITE

The subject site address was not found on any databases searched by EDR.

THE SUBJECT SITE VICINITY

Threats to the site were primarily discounted on the basis of distance. Those within 1/8-mile were deemed to represent the greatest potential risk for contaminant migration to the subject site.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on locations which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. One location was within 1/4-mile of the subject site; this was within 1/8-mile identified as:

Target Corporation at 17170 Camino Del Sur was listed for ignitable waste, corrosive waste, reactive waste, arsenic, barium, cadmium, chromium, lead, mercury, selenium, silver, benzene, M-cresol, cresol, dichlorobenzene, tetrachloroethylene, etc. with the description "discount department stores, department stores" and no violations found. This facility was additionally listed on the FINDS database under environmental interest type "LQG and hazardous waste biennial reporter"; the E MANIFEST database for ignitable waste, methyl ethyl ketone, ignitable waste, barium, chromium, silver, benzene, methyl ethyl ketone, propane acetone, , corrosive waste, lead, mercury, off-specification aged or surplus organics, liquids with pH <2 with metals, alkaline solution without metals (pH > 12.5), other organic solid waste, waste aerosols, batteries, etc.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on locations which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. One location was within 1/4-mile of the subject site; this was within 1/8-mile identified as:

CVS (SIS) at 17170 Camino Del Sur, Suite B was listed for ignitable waste, corrosive waste, chromium, mercury, selenium, silver, etc. and the description "pharmacies and drug stores" and no violations were found. This facility was also listed on the FINDS database under environmental interest type "VSQG"; ECHO database with no violations identified and the description "pharmacies and drug stores" and the E MANIFEST database for acetaldehyde, pharmaceutical waste, waste toxics, liquids and organics.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: This is Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database; it denotes locations with known

contamination or for which there may be reasons to investigate further. It includes Federal Superfund locations (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School locations. EnviroStor provides similar information to that available in CalSites, and provides additional information, including identification of formerly-contaminated properties released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information used to assess potential impacts to public health and the environment. Three locations were identified within 1-mile of the subject site; none was within 1/8-mile.

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of locations in the California Environmental Protection Agency (CalEPA) Regulated Facility Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs. Three locations were within 1/4-mile of the subject site; all were within 1/8-mile identified as:

Mitchell 1 at 16067 Babcock Street was listed with the description “hazardous waste generator.” This facility was additionally listed on the San Diego Co. HMMD database with a “permit renewed” status dated 9/08/2023 under the “aboveground petroleum storage act” with various violations noted and for various waste and materials including: lead acid batteries, propane, diesel fuel No. 2 and propane. This facility was additionally listed on the CERS TANKS database with the description “aboveground petroleum storage”; the HWTS database with a create date of 08/05/2020; the CERS database with the description “chemical storage facilities” with various violations found.

Target Store T2855 at 17170 Camino Del Sur was listed with the description “hazardous waste generator.” This facility was additionally listed on the San Diego Co. HMMD database with a “permit renewed” status dated 07/07/2023 for propane, refrigerant, signature floor finish, aerosol retail waste, corrosive acids retail waste, flammable toxic retail waste, oxidizer retail waste, medical waste- sharps; the CERS HAZ WASTE database with the description “hazardous waste generator”; the HWTS database with a create date of 8/25/2015 with the description “department stores”; the HAZNET database for off-specification aged or surplus inorganics, unspecified organic liquid mixture, alkaline solution without metals pH>=12.5, unspecified aqueous solution and other inorganic solid waste. This facility was also listed on the CERS database with the description “chemical storage facilities” with various violations noted.

CVS Pharmacy #17668 at 17170 Camino Del Sur Ste A was listed with the description “hazardous waste generator.” This facility was additionally listed on the CERS database with the description “chemical storage facilities.”

CERS TANKS: List of locations in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. One location was within 1/4-mile; this was within 1/8-mile identified as:

Mitchell 1 at 16067 Babcock Street was listed with the description “aboveground petroleum storage.” This facility was described in detail previously in the CERS HAZ WASTE database section.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on locations which generate, transport, store, treat and/or dispose of hazardous waste as define by the Resource Conservation and Recovery Act (RCRA). Non-

Generators do not presently generate hazardous waste. One location was identified within 1/4-mile of the subject site; this was within 1/8-mile identified as:

Mitchell 1 at 16067 Babcock Street was listed with the description “all other waste management services” and no violations found.

FUDS: The Listing includes locations of Formerly Used Defense Facility Properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions. One location was within 1-mile of the subject site; this was not within 1/8-mile.

NPDES: A listing of NPDES permits, including stormwater. One location was within 1/8-mile of the subject site identified as:

Mitchell 1 at Camino Del Sur and Babcock Street was listed under regulatory measure type “construction” with a “terminated” status dated 11/26/2019. This facility was additionally listed on the CIWQS database with a “terminated” status under regulatory measure type “storm water construction” dated 11/26/2019.

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities. One location was within 1/8-mile of the subject site identified as:

Mitchell 1 at Camino Del Sur and Babcock Street was listed with a “terminated” status under regulatory measure type “storm water construction” dated 11/26/2019. This facility was described previously in the NPDES database section.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as E-Manifest, will modernize the nations cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states. Two locations were within 1/4-mile of the subject site; both were within 1/8-mile identified as:

CVS (SIS) at 17170 Camino Del Sur, Suite B was listed for acetaldehyde, pharmaceutical waste, waste toxics and liquids and organics. This location was described in detailed previously in the RCRA-VSQG database section.

Target Corporation at 17170 Camino Del Sur was listed for ignitable waste, methyl ethyl ketone, ignitable waste, barium, chromium, silver, benzene, methyl ethyl ketone, propane acetone, , corrosive waste, lead, mercury, off-specification aged or surplus organics, liquids with pH <2 with metals, alkaline solution without metals (pH > 12.5), other organic solid waste, waste aerosols, batteries, etc. This facility was described in detail previously in the RCRA-LQG database section.

6.2 Additional Research

Findings from other reviewed resources are summarized as follows.

Oil Fields and Pipelines - Wastes generated during oil drilling and leakage from pipelines were also researched, as they may threaten environmental conditions for a subject site. California State’s Division of Oil and Gas (DOG) provided a map [iii] showing oil wells/fields and petroleum product pipelines in California. Wells were not identified within 1-mile of the subject site.

Provided Documents – The following is a summary of provided documents for review:

- A Phase I Environmental Site Assessment for the property south of Templeton Street and west of Garretson Street (offsite, south of the subject site across Templeton Street) prepared for *Lennar* by *Geocon Incorporated,* dated 9/04/2018 was reviewed. This report identified no recognized environmental conditions, with soil sampling performend and various concentrations of agricultural chemicals found; however, Toxaphene-impacted soil, reportedly above residential threshold limits, was identified and removed. This (offsite) was considered a Historical REC bases on subsequent assessment/remediation of contaminants and no further action was considered warranted. The subject site was included in the surrounding properties found to have Toxaphene-impacted soil or toxaphene placement. Truncated report summary attached in Appendix VII.

7.0 FINDINGS, DISCUSSION

7.1 Subject site

Observed Conditions – The subject site comprised a vacant property with dry storm water retention basins in the northeast corner of the subject site. These findings represented an environmental concern not rising to the level of a recognized environmental condition.

History – The subject site has a history of vacant land and agricultural usage with water retention ponds in the northeast corner of the subject site. Previous agricultural usage is an environmental concern as previous pesticides and agricultural hazardous chemicals could remain in the soil.

Questionnaires/Interviews – The questionnaire Toxaphene had been detected in the soil; no interview was considered possible.

Regulatory Agency Records Review – The subject site was not listed on any database searched by EDR.

7.2 Subject site Vicinity

Observed Conditions – The subject site vicinity included commercial usage adjacent to the west of the subject site, vacant and residential usage. Minor environmental concerns did not rise to the level of a recognized environmental condition.

History – The subject site vicinity included agricultural usages, residential and commercial. These were not deemed to represent threats rising to the level of a recognized environmental condition; however, additional sampling is deemed appropriate.

Special additional note regarding risks from soil vapor – Cases have arisen where migration of soil vapors (gasses evolving from volatile chemicals released to the soil) have affected occupied spaces. This is a growing concern in environmental subject site assessment. Another ASTM specification, No. E2600-10 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, has been incorporated in Phase I reports per the E1527-13 specification; it suggests potentially significant risk from vapor for non-petroleum-hydrocarbon contamination within a 1/3-mile radius, and for petroleum-hydrocarbon contamination within a 1/10-mile radius.

Threats identified within these search radii area listed on the following table:

SITE NAME	ADDRESS	DATABASES	DIST(mi)
MITCHELL 1	16067 BABCOCK ST	RCRA NONGEN / NLR	0.077
MITCHELL1	16067 BABCOCK ST	SAN DIEGO CO. HMMD,CERS HAZ WASTE,CERS TANKS,HWTS,CERS	0.077
TARGET STORE T2855	17170 CAMINO DEL SUR	SAN DIEGO CO. HMMD,CERS HAZ WASTE,HWTS,HAZNET,CERS	0.089
CVS (SIS)	17170 CAMINO DEL SUR, SUITE B	E MANIFEST,RCRA-VSQG,FINDS,ECHO	0.089
TARGET CORPORATION	17170 CAMINO DEL SUR	E MANIFEST,RCRA-LQG,FINDS,ECHO	0.089
CVS PHARMACY #17668	17170 CAMINO DEL SUR STE A	CERS HAZ WASTE,CERS	0.089

Threats listed above were considered environmental concerns, with consideration of groundwater flow and distance, the following vapor intrusion and encroachment screening details assessment of nearby threats.

Vapor intrusion and vapor encroachment – A default area of concern (AOC) for known contaminated locations or suspect contaminated locations is 1/3-mile radius from subject site for COCs (chemicals of concern) (volatile/semi-volatile hazardous substances) and a 1/10-mile radius for petroleum hydrocarbon COCs, measured from the subject site boundary to known or suspect contaminated property. Taking groundwater flow and subsurface characteristics into consideration, an adjusted area of concern (AAOC) was identified. For down-gradient COCs and for PHC (petroleum hydrocarbons) the AAOC was deemed a 100-foot distance for LNAPLs (light, non-aqueous-phase-liquids) and 30-feet for dissolved constituents. For cross-gradient COCs the AAOC used was 365-feet, 165-feet for LNAPLs, and 95-feet for dissolved COCs. For up gradient COCs the AAOC was deemed 528 feet. Threats were not identified within these search radii.

Physical Characteristics – The subject site's topographic gradient suggested a likely flow direction for groundwater in the general north-northeast; implying somewhat greater risk from releases in the opposite, "up gradient"; up gradient threats were identified and described in the previous sections. With this considered surrounding threats were deemed environmental concerns not rising to the level of a recognized environmental condition.

Regulatory Agency Records Review – As presented in Section 6.0, there were fifteen potential environmental threats listed within search radii. Eleven were identified within 1/8-mile. Most were found to store and/or use hazardous waste, including solvents, an aboveground tank for diesel fuel and an adjacent commercial property and automotive repair. These threats were identified as environmental concerns not rising to the level of a recognized environmental condition.

7.3 Data Gaps

Data gaps comprise inability to obtain mandatory information required by the ASTM standard despite a good faith effort by the environmental professional to do so. Data gaps, if any, are summarized here. Response from city records was not received within the time constraint of this report and an interview was not considered possible with knowledgeable personnel.

8.0 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E: 1527-21 for the subject site identified by the APNs: 678-690-70, -71 & -72 in San Diego, CA. Any exceptions to, or deletions from, this practice are described in the corresponding section of this report.

This assessment identified environmental concerns regarding onsite historical agricultural usage and nearby testing of soils indicating agricultural chemicals. Nearby concerns were identified with adjacent aboveground diesel fuel tanks and automotive repair. With subject site development, soil testing is recommended to assess long-lived agricultural residues, especially Toxaphene.

9.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professionals as defined in 312.10 of 40 CFR 312, with specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

This report has been prepared with reasonable diligence, reflecting the standards of skill and care typically exercised in the field of environmental assessment. The accuracy or completeness of any report cannot be guaranteed, however, since government records, which provide the basis for much of the subject site research, may be incomplete, inaccurate, or out of date. Also, per the scope of this assessment, no inspection has been made of that which was not easily accessible within the time frame of this report. This assessment is not intended to be exhaustive and uncertainty has not been eliminated.

This work researched only the likelihood of a hazardous waste condition that could result in an enforced cleanup or abatement action. It did not include toxicological or industrial hygiene services and did not assess threats from contact with any hazardous wastes or substances. This investigation does not represent any level of survey for radon, lead-containing dust or paint, molds/allergens, or asbestos.

Due to the likelihood of change in the subject site and subject site vicinity, and the potential for future releases of hazardous materials in the vicinity, this report will become obsolete and, therefore, is intended for use only in the six months following the submittal date. This document is prepared solely for the use of the Client, and shall not be used or relied upon by other individuals, agencies, or organizations, except if and as specifically designated in writing by both Client and Consultant.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Marc Boogay Cons. Engineers were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

APPENDIX V QUESTIONNAIRE(S)

Follow this sheet.

MARC BOOGAY
Consulting Engineer

ENVIRONMENTAL QUESTIONNAIRE

The following questions should be asked of (1) the current owner of the subject site, (2) any major occupant of the subject site, and (3) in addition to the current owner and the occupants identified, any occupant likely to be using, treating, generating, storing or disposing of hazardous substances or petroleum products on or from the subject site. In a Multifamily property containing both residential and commercial uses, the Preparer does not need to ask questions of the residential occupants. The respondent should ask each person to answer all questions to the best of actual knowledge and in good faith.

DESCRIPTION OF THE SUBJECT SITE

Phase I, 3 APNs 678-690-70, -71, & -72 in San Diego, CA
Address City State Zip

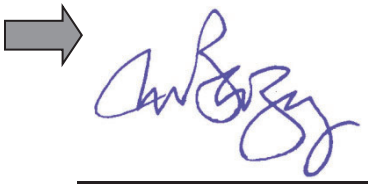

(none)
Major Occupant Phone

(none)
Present Use

RESPONSES TO THIS QUESTIONNAIRE DERIVE FROM:

(*Circle One)* **Owner / Seller / Tenant / Buyer / Consultant**

Preparer represents that to the best of their knowledge the below statements and facts are true and correct and that no material facts have been suppressed or misstated.

Marc Boogay (MBCE)	1584 Whispering Palm Drive
Name	Address
Marc Boogay Consulting Engineer (MBCE)	Oceanside CA 92056
Firm	City State Zip
	
Signature	07/5/2024 760-407-4000
	Date Phone

QUESTION	YES	NO	UNK
1. Is the subject site or any adjoining property used for an industrial use?		X	
2. Has the subject site or any adjoining property been used for an industrial use in the past?		X	
3. Is the subject site or any adjoining property currently used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment storage, disposal, processing, or recycling facility? **Note: Adjacent motor repair facility**	X		
4. Has the subject site or any adjoining property been used in the past as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility? **Note: Adjacent motor repair facility**	X		
5. Are there currently, or have there been previously, any damaged or discarded automotive or industrial batteries or pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the subject site?		X	
6. Have there been previously, any industrial drums (typically 55 gallon) or sacks of chemicals located on the subject site or at the facility?			X
7. Has fill dirt been brought onto the subject site which originated from a contaminated site or which is of an unknown origin?			X
8. Have there been previously any, pits, ponds or lagoons located on the subject site in connection with waste treatment or waste disposal?		X	

UNK = Not Applicable or Unknown or No Response

QUESTION	YES	NO	UNK
9. Is there currently, or to the best of your knowledge has there been previously, any stained soil on the subject site?			X
10. Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (above or underground) located on the subject site?		X	
11. Have there been previously, any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the subject site or adjacent to any structure located on it? **Note: Function of small pipe stub along edge of stormwater basin should be ascertained.**		X	
12. Have there been previously, any flooring, drains, or walls located within the subject site that are stained by substances other than water or are emitting foul odors?		X	
13. If the site is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental/health agency?		X	
14. Does the owner or occupant of the subject site have any knowledge of environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the site or any facility located on the site?			X
15. Has the owner or occupant of the subject site been informed of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the subject site?			X
16. Does the owner or occupant of the subject site have any knowledge of any environmental site assessment of the subject site that indicated the presence of hazardous substances or petroleum products on, or contamination of, the subject site or recommended its further assessment? **Note: Placement of the chemical toxaphene on adjoining properties was acknowledged.**			X

UNK = Not Applicable or Unknown or No Response

QUESTION	YES	NO	UNK
17. Does the owner or occupant of the subject site know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release of any hazardous substances or petroleum products involving the subject site by any owner or occupant of the subject site?			X
18. Does the subject site discharge waste water on or adjacent it other than storm water or into a sanitary sewer system?		X	
19. Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the subject site?		X	
20. Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?		X	

UNK = Not Applicable or Unknown or No Response

"REQUEST FOR BENEFICIAL DOCUMENTS"

INTRODUCTION

Federally promulgated Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) as can apply to Phase I Environmental Site Assessments require the property owner, key site manager and/or user/client be asked for completion of a questionnaire and copies of documents such as those listed below for Consultant's review in preparing the Phase I Report. Even partial information may be useful.

Please provide copies of Existing Documents such as:

Prior Environmental Site Assessment Reports,

Environmental "Compliance Reports,"

Environmental Permits, e.g., permits for solid waste disposal, hazardous waste disposal, National Pollution Discharge Elimination System (NPDES) discharge, and/or other discharge,

Registration for underground storage tanks and aboveground storage tanks,

Registration for underground injection systems,

Material Safety Data Sheets,

Community right-to-know plans,

Safety plans, Preparedness and Prevention plans; spill prevention/countermeasure/control plans,

Reports regarding geologic or hydrologic conditions on the site or surrounding area.

Notices, liens, correspondence from government agencies relating to violations of environmental law involving the site, or recorded Activity and Use Limitations (AULs),

Hazardous waste generator notices or reports,

Geotechnical Studies or Risk Assessments,

Legal Proceedings Involving the Site, such as pending, threatened, or past litigation relevant to hazardous substances or petroleum products, proceedings relevant to hazardous substances or petroleum products in, on, or from the site, or government notices regarding possible violation of environmental laws or related liabilities from released hazardous substances or petroleum products.

PLEASE PROVIDE COPIES IF/AS AVAILABLE TO
marc@boogay.com

ENVIRONMENTAL QUESTIONNAIRE

Site Address: SW corner of Camino Del Sur and Coyotre Bush Dr.

Name of Respondent: Scott Kim

Respondent's Relationship to Site: Board of Trustees

(Please initial bottom of sheets as indicated.)

INTRODUCTION

Landowner Liability Protection (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments "), require the following questionnaire to be requested from individuals identified to be familiar with the site and its history. Please check yes/no/unknown and annotate explanatory details if possible.*

1.
Do environmental cleanup liens exist against the site, filed or recorded under federal, tribal, state or local law?

yes	no	unknown
	X	

2.
Have institutional controls or engineering controls or land use limitations (AULs) in place on the site or otherwise filed or recorded under federal, state, or tribal law?

yes	no	unknown
	X	

Do you have specialized knowledge/experience related to the site or nearby properties, for example, knowledge of chemicals/processes used on or adjoining the site?

yes	no	unknown
	X	

3.
(If purchase of the site is underway) Does the purchase price represent reduction from its fair market value due to contamination by hazardous materials/wastes?

yes	no	unknown
	X	

4.
Do you know the past uses of the site?

yes	no	unknown
	X	

info source please initial _____

PLEASE RETURN TO marc@boogay.com

5.
Have you any other information about the site that indicates potential for environmentally adverse conditions or releases?

yes	no	unknown
		X

6.
Do you know specific chemicals as have been present at the site?

yes	no	unknown
X		

7.
Have spills or other chemical releases taken place at the site?

yes	no	unknown
		X

8.
Have there been environmental cleanups at the site?

yes	no	unknown
		X

9.
Has the site had aboveground tanks or underground tanks?

yes	no	unknown
	X	

10.
Has there been automotive repair or body painting done on the site?

yes	no	unknown
	X	

11.
Has the site been a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, landfill, or waste treatment/storage/disposal/processing/recycling facility?

yes	no	unknown
	X	

12.
Has fill dirt been imported onto the site which originated from a contaminated site or from an unknown origin?

yes	no	unknown
		X

13.
Have flooring, drains, or walls located within the site been stained by substances other than water or given off chemical or petroleum odors?

yes	no	unknown
	X	

info source please initial _____

PLEASE RETURN TO marc@boogay.com

14. Is there a transformer, capacitor or hydraulic equipment for which there are records indicating the presence of PCBs?	yes	no	unknown
		X	

Please summarize any comments below for questions marked "yes":

Toxaphane detected at some point.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

TARGET CORPORATION	***17170 CAMINO DEL SUR***	***ENE 0 - 1/8 (0.089 mi.)***	***B6***	***225***

EPA ID:: CAR000255240

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/22/2024 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 01/16/2024 has revealed that there are 3 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

MITCHELL 1 EPA ID:: CAL000456038	16067 BABCOCK ST	WSW 0 - 1/8 (0.077 mi.)	A2	10

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 01/30/2024 has revealed that there is 1 FUDS site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
LAKE HODGES SCAR ROC		WSW 1/2 - 1 (0.952 mi.)	C11	259

NPDES: A listing of NPDES permits, including stormwater.

A review of the NPDES list, as provided by EDR, and dated 02/05/2024 has revealed that there is 1 NPDES site within approximately 0.001 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MITCHELL1	***CAMINO DEL SUR AND B***	***0 - 1/8 (0.000 mi.)***	***1***	***9***

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 02/26/2024 has revealed that there is 1 CIWQS site within approximately 0.001 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MITCHELL1	***CAMINO DEL SUR AND B***	***0 - 1/8 (0.000 mi.)***	***1***	***9***

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 2 E MANIFEST sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/31/2023

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Next Scheduled EDR Contact: 07/15/2024
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991

Northeast Map:	50005761 ESCONDIDO, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

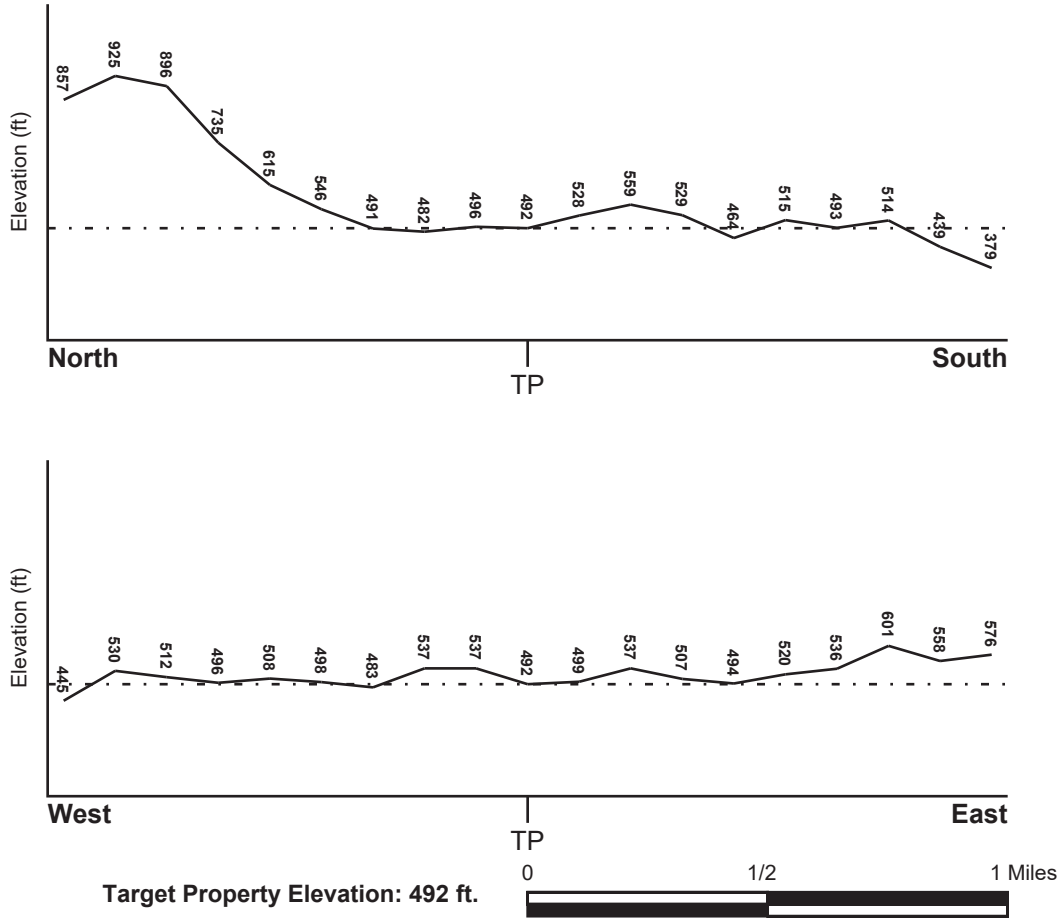

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C1070G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06073C1090G	FEMA FIRM Flood data
06073C1088G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
RANCHO SANTA FE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: DIABLO

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:
2	14 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:
3	31 inches	35 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: SALINAS

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	22 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	22 inches	46 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
3	46 inches	64 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: HUERHUERO

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
2	11 inches	55 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
3	55 inches	72 inches	stratified sand to sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT
DEL SUR TOWN CENTER
BLOCKS F (AVANTE) AND G (SKYE)
SAN DIEGO, CALIFORNIA

Dear Mr. Plishner:

In accordance with your request and our Proposal No. LE-18300 dated August 17, 2018, we have performed a Phase I Environmental Site Assessment (ESA) of the property south of Templeton Street and west of Garretson Street (the Site) in San Diego, California.

The Phase I ESA was performed to provide information regarding the potential for existing hazardous substances and/or petroleum product impacts at the Site as part of Lennar's construction loan financing requirements. The accompanying report presents the details of our Phase I ESA.

We appreciate the opportunity to have performed this Phase I ESA for Lennar. Please contact us if you have any questions concerning this report or if we may be of further service.

Very truly yours,

GEOCON INCORPORATED

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

1. INTRODUCTION

This report presents the findings of a Phase I Environmental Site Assessment (ESA) of the property south of Templeton Street and west of Garretson Street (the Site) in San Diego, California. The Phase I ESA was requested by Lennar (the Client) to provide information regarding the potential for existing hazardous substances and/or petroleum product impacts at the Site as part of their construction loan financing requirements.

1.1 Purpose and Objectives

The purpose of the Phase I ESA was to identify evidence or indications of 'recognized environmental conditions' (REC) as defined by the American Society for Testing and Materials (ASTM) *Designation E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Section 1.1.1 of *ASTM Designation E 1527-13* defines an REC as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions." De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of enforcement action if brought to the attention of appropriate governmental agencies.

ASTM *Designation E 1527-13* also defines 'Historical' and 'Controlled' RECs. They define an 'Historical REC' (HREC) as "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." ASTM defines a 'Controlled REC' (CREC) as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." An HREC is not an REC if a property meets current standards for unrestricted residential use. A CREC remains an REC by definition when the property does not meet the unrestricted residential use requirements unconditionally.

We also conducted the Phase I ESA in general accordance with the requirements of 40 Code of Federal Regulations (CFR) Part 312 titled *Standards and Practices for All Appropriate Inquiries*, as required under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of conducting an all appropriate inquiries investigation into the previous ownership and uses of a property is to meet the provisions necessary for the landowner, contiguous property owner, and/or bona fide prospective purchaser to qualify for certain landowner liability protections under CERCLA.

The following principles are an integral part of ASTM *Designation E1527-13*:

- **"Uncertainty Not Eliminated -** No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost."

- **"Not Exhaustive -** All Appropriate Inquiries does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information."

- **"Level of Inquiry is Variable -** Not every property will warrant the same level of assessment. Consistent with good commercial and customary practice, the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry."

1.2 Scope of Services

We performed the scope of services outlined in our Proposal No. LE-18300 dated August 17, 2018, with the exception that we did not review Sanborn fire insurance maps, as Environmental Data Resources, Inc. (EDR) indicated that there are none available for the Site or surrounding vicinity. The main components of the Phase I ESA and their objectives, as specified by the referenced standards, include the following:

- **Physical Setting Review:** we reviewed physical setting references for information concerning the topographic, geologic, and hydrogeologic characteristics of the Site and vicinity. Such information may be indicative of pathways (i.e., direction and/or extent) that a contaminant could migrate along in the event of a spill or release.

- **Regulatory Agency Records Review:** we reviewed publicly available Federal, State, and local regulatory agency records for information regarding the use, storage, and disposal of

hazardous substances and/or petroleum products at the Site and facilities and properties adjoining or within ¼ mile of the Site. Such records may identify RECs at or potentially affecting the Site.

- **Site History Review:** we reviewed information regarding the historical uses of the Site and adjoining and nearby facilities and properties back to the Site's and other properties' first use or 1940, whichever is earlier, that could have led to RECs on or near the Site. Historical sources reviewed included aerial photographs, topographic maps, and city directories. In addition, we conducted interviews with persons who were expected to be reasonably knowledgeable about historical and/or current conditions at and uses of the Site.

- **Site Reconnaissance:** we performed a site reconnaissance to observe site conditions and activities for evidence of RECs. The site reconnaissance was for the Site only. We viewed offsite properties and features solely from the vantage of the Site and public thoroughfares.

1.3 Report Limitations

We prepared this Phase I ESA report exclusively for the Client. The information obtained is only relevant for the dates of the records reviewed and the latest site visit. Therefore, the information contained herein is only valid as of the date of the report and will require an update after 180 days to reflect updated records and another reconnaissance to assess current site conditions.

The Client should recognize that a Phase I ESA is not a comprehensive site characterization and should not be construed as such. The findings and conclusions presented in this report are predicated on the site reconnaissance, information in the specified regulatory records, and information regarding the historical usage of the Site, as presented in this report. The Client should also understand that wetlands, asbestos-containing building materials, lead-containing paint, lead in drinking water, radon, mercury related to mining activities, methane, and mold surveys were not included in the scope of services for this Phase I ESA. Assessment for potential naturally occurring hazards such as asbestos and arsenic was also not included.

Therefore, the report should only be deemed conclusive with respect to the information obtained. No guarantee or warranty of the results of the Phase I ESA is implied within this report or any subsequent reports, correspondence or consultation, either express or implied. We strived to conduct the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

1.4 Data Gaps

A data gap is defined by ASTM *Designation E 1527-13* as "a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information." Data gaps could include such things as insufficient historical information, the inability to interview persons with direct site knowledge (e.g., the owner(s), past owner(s), tenants, workers,

etc.) or the lack of access to all parts of a site during the site reconnaissance. As indicated in Section 1.2, we did not review Sanborn fire insurance maps for the Site and surrounding vicinity because there are none for the Site and vicinity. We do not consider this a significant data gap however, because of other available historical information we reviewed.

2. SITE DESCRIPTION

This section provides information regarding the location and physical characteristics of the Site including its size, topography, geologic, soil, and hydrogeologic conditions.

2.1 Location and Legal Description

The 11.88-acre Site is located south of Templeton Street and west of Garretson Street in the 4S Ranch area of San Diego, California (Figure 1). The Site is situated south of Camino Del Sur and adjacent to the west of the Del Sur Town Center retail complex. The San Diego County assessor's parcel numbers (APNs) for the Site are 678-690-12 through -19. A copy of the parcel map is in Appendix A.

The Site is depicted in the northwestern quarter of Section 30 of Township 13 South, Range 2 West, San Bernardino Base and Meridian on the United States Geological Survey's (USGS) *Rancho Santa Fe, California,* 7.5-minute topographic map (USGS, 2012).

2.2 Site and Vicinity General Characteristics

The Site is two sheet-graded pads separated by Coyote Bush Drive that are currently under construction with multi-family residential structures. The western portion of the Site west of Coyote Bush Drive is identified as Block F and is also known as "Avante." The eastern portion of the Site is identified as Block G and is also known as "Skye." The surrounding vicinity includes single- and multi-family residences, and commercial (retail) development. Figure 2 depicts the site boundaries and features and surrounding properties. Further site description is provided in Sections 2.4 and 6.

2.2.1 Topography

The topography of the site vicinity is characterized by hills and ravines with moderate to steep slopes. The Site is situated in an area that has been graded relatively flat for development. The USGS *Rancho Santa Fe, California,* 7.5-minute topographic map (USGS, 2012), depicts the elevation of the Site as approximately 520 feet above mean sea level.

2.2.2 Geologic and Soil Conditions

The Site is located in the Peninsular Ranges geomorphic province of Southern California (Norris and Webb, 1990). This geomorphic province extends approximately 900 miles from its northern terminus against the Transverse Ranges and Los Angeles Basin, south to the tip of Baja California. In general, the province is characterized by rugged mountains in Mesozoic igneous and metamorphic rocks to the east, with a dissected coastal plain on Cenozoic sediments to the west. The Peninsular Ranges vary in width from approximately 30 to 100 miles, and are traversed fault zones trending roughly northwest-southeast.

We performed an update geotechnical investigation (GI) of the Site in August 2017 during which we evaluated the Site's geologic conditions by trenching in several locations to a maximum depth of 7 feet (Geocon, 2017). During our GI we observed that the majority of the Site is underlain by compacted fill generally consisting of silty to clayey sands and silty to sandy clays with thicknesses up to 2 ½ feet. The western and southwestern portions of Block F are underlain by the Stadium Conglomerate and the Mission Valley Formation, respectively. The Stadium Conglomerate typically consists of dense to very dense, sandy to clayey, gravel and cobble conglomerate with interbedded silty sands. The Mission Valley Formation typically consists of dense to very dense, sandstone and interbedded siltstones and claystones. The compacted fill is underlain by the Mission Valley Formation (generally in the south-central portion of the Site), Stadium Conglomerate (central and southeastern portions of the Site) or Friars Formation/Delmar Formations (undifferentiated; northwestern portion of the Site). The Friars/Delmar Formations typically consist of dense sandstones, hard claystones and siltstones.

Information concerning the soil conditions at and in proximity to the Site from the United States Department of Agriculture, Natural Resources Conservation Service, Web Soil Survey (http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm) indicates that site soils are Diablo clay, which is well drained and has low infiltration rates, and Huerhuero loam, which is moderately well drained and has very low to moderately low infiltration rates.

2.2.3 Hydrologic and Hydrogeologic Conditions

Groundwater quality and occurrence information available from the California Department of Water Resources and the California State Water Resources Control Board (SWRCB) indicates that the Site is located in the Solana Beach Hydrologic Area (905.10) of the San Dieguito Hydrologic Unit (905.00). Groundwater in the Solana Beach Hydrologic Area has existing beneficial use designations for municipal, agricultural, and industrial supply purposes (SWRCB, 2018).

We did not encounter groundwater in any of our trenches excavated at the Site as part of our geotechnical investigation in 2017. The maximum depth explored was 7 feet. Therefore, in an effort to

assess local groundwater conditions, we reviewed reports available on the SWRCB's GeoTracker online database (http://geotracker.waterboards.ca.gov) for nearby facilities with a groundwater monitoring well array. However, the nearest such facility is over 2 miles east of the Site and groundwater conditions there are likely not representative of those beneath the Site. Based on the site topography and elevation, depth to groundwater is anticipated to be in excess of 50 feet and groundwater flow direction is expected to be generally to the west toward the Pacific Ocean with local variations associated with topography.

2.3 Current and Planned Uses of the Site

The Site is currently being developed with multi-family residential structures. Further description of the Site is provided in Section 6.

2.4 Descriptions of Structures, Roads, Other Improvements on the Site

Multi-family residential structures are currently under construction at the Site. An improved road, Coyote Bush Drive, extends north to south through the central portion of the Site and separates Blocks F and G. Further description of the Site is provided in Section 6.3.

2.5 Current Uses of Adjoining Properties

Current uses of adjoining properties are primarily single- and multifamily residential with commercial (retail) to the east and sheet-graded pads to the north. Further information regarding adjoining properties is provided in Section 6.4.

3. USER–PROVIDED INFORMATION

This section summarizes site information provided by the Client – the "user" of this Phase I ESA. Also provided are responses to inquiries to the Client via a "user" questionnaire for information pertaining to the Site. Alexander Plishner with Lennar completed the questionnaire (Appendix B).

3.1 Title, Appraisal and Sale Agreement Records

Mr. Plishner provided Preliminary Title Reports (PTRs) for Blocks F and G of the Site prepared by North American Title Company and dated March 2 and March 7, 2018, respectively. The PTRs indicate that the site parcels are owned by SPIC Del Sur, LLC, a Delaware limited liability company. The PTRs identify no issues regarding the environmental condition of the Site.

3.2 Environmental Liens or Activity and Use Limitations

Mr. Plishner indicated that he has no knowledge of environmental liens on or activity and use limitations for the Site.

3.3 Specialized Knowledge

Mr. Plishner indicated he has no specialized knowledge of the Site.

3.4 Commonly Known or Reasonably Ascertainable Information

Mr. Plishner indicated he is not aware of commonly known or reasonably ascertainable information pertaining to the Site other than that the Site is actively under construction.

3.5 Owner, Property Manager, and Occupant Information

Mr. Plishner indicated the Site is owned by Standard Pacific Investment Corporation (SPIC), an entity owned/operated by Lennar Homes.

3.6 Valuation Reduction for Environmental Issues

A real estate transaction and appraisal is not the basis for this Phase I ESA. Therefore, there is no purchase price to compare to fair market value.

3.7 Reason for Performing the Phase I ESA

The Phase I ESA was requested to provide information regarding the potential for existing hazardous substance and/or petroleum product impacts at the Site for construction loan financing purposes.

4. RECORDS REVIEW

This section summarizes information we obtained from readily available agency records for the Site and properties and facilities in the surrounding vicinity.

4.1 Standard Environmental Record Sources

EDR searched federal, state, and local databases regarding the use, storage, disposal, or release of hazardous substances and/or petroleum products for the Site and area within one mile of the Site. The databases that list the Site and/or properties/facilities within one mile of the Site and the number of

properties/facilities listed are summarized in the table below. A copy of *The EDR Radius Map™ Report with GeoCheck*, dated August 17, 2018, is in Appendix C.

Database Name	Search Radius (Mile)	Number of Listings
FEDERAL DATABASES		
RCRA-CESQG (Resource Conservation and Recovery Act – Conditionally Exempt Small Quantity Generators)	¼	1
RCRA-SQG (Small Quantity Generators)	¼	1
STATE AND LOCAL DATABASES		
CA ENVIROSTOR (Department of Toxic Substance Control Database)	1	3

4.1.1 Site

The Site is not listed on any of the databases searched by EDR.

4.1.2 Offsite Properties

The following table summarizes information provided by various databases and presented in EDR's report for listed properties/facilities located less than ⅛ mile (or ¼ mile for LUST facilities) from the Site, their status, and their potential, if any, to cause (or have caused) an REC at the Site. Information for properties/facilities in excess of ⅛ mile (or ¼ mile for LUST facilities) of the Site is not included in the table. Distances reported by EDR may differ from actual distances.

Property Name and Address	Approximate Distance, Direction, and Hydraulic Gradient Position	Databases	Pertinent Information
CVS Pharmacy #17668 17170 Camino Del Sur Suite B	485 feet northeast Upgradient	RCRA – CESQG FINDS ECHO	This facility was first listed as a conditionally exempt small-quantity generator (CESQG) in March 2016. No violations are noted for the RCRA or ECHO listings. The distance from the Site and lack of inclusion on any release-related databases [1], indicate that this facility is unlikely to have caused an REC at the Site.

Property Name and Address	Approximate Distance, Direction, and Hydraulic Gradient Position	Databases	Pertinent Information
Target Store T2855 17170 Camino Del Sur	485 feet northeast Upgradient	RCRA – SQG FINDS ECHO	This facility was first listed as a small-quantity generator (SQG) in August 2015. No violations are noted for the RCRA or ECHO listings. The distance from the Site and lack of inclusion on any release-related databases [1], indicate that this facility is unlikely to have caused an REC at the Site.

[1] "Release" refers to an unauthorized release of a petroleum product or hazardous substance to the environment - i.e. the ground surface, soil, soil vapor, groundwater, or surface water on a property. "Release-related database" refers to those which provide information regarding an unauthorized release. "Non-release-related database" refers to those that may report use, storage, or disposal of hazardous substances and/or petroleum products or other environmental conditions, but do not report releases of such.

4.1.3 Orphan Summary

EDR's Orphan Summary identifies properties with incomplete address information and therefore cannot be accurately plotted. Three properties are listed but because they are all greater than approximately 900 feet from the Site none are suspected of having caused an REC at the Site.

4.2 Additional Environmental Record Sources

This section summarizes information from additional, readily available environmental record sources regarding the Site and properties/facilities within one mile from the Site.

4.2.1 GeoTracker and EnviroStor Databases

We reviewed GeoTracker and the California Department of Toxic Substance Control's (DTSC) EnviroStor (http://www.envirostor.dtsc.ca.gov/public/) online databases for information regarding the Site and nearby properties/facilities within ¼ mile of the Site. GeoTracker and EnviroStor do not have information pertaining to the Site or any properties/facilities within ¼ mile of the Site.

4.2.2 State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR)

We reviewed the California Division of Oil, Gas, and Geothermal Resources' (DOGGR) website (http://maps.conservation.ca.gov/doggr/index.html) to evaluate the potential for existing/former oil,

gas, or geothermal wells on the Site or properties proximal to the Site. DOGGR information indicates that no former or current wells are or were located within one mile of the Site.

4.2.3 County of San Diego Department of Agriculture, Weights and Measures

We submitted a request to the County of San Diego, Department of Agriculture, Weights and Measures (DAWM), Pesticide Use Enforcement Division regarding possible use of restricted pesticides/herbicides at the Site. That office maintains such records for approximately 4 years. The DAWM indicated that no record of restricted pesticide/herbicide use was reported for the site APNs for the period of 2015 through 2018.

4.2.4 San Diego Air Pollution Control District

We submitted a request to the San Diego Air Pollution Control District (APCD) for records pertaining to the Site. The APCD indicated that no records are on file for the site APNs.

4.2.5 County of San Diego Department of Environmental Health

We submitted a request to the DEH for records pertaining to the Site. The DEH indicated that no records are on file for the site APNs.

4.2.6 San Diego Gas and Electric Company

Pad-mounted transformers are present on the Site. Documented discussions with San Diego Gas & Electric Company (SDG&E) representatives regarding transformers indicate that SDG&E has never specified polychlorinated biphenyl (PCB)-containing transformers for its electrical distribution system. Regardless, SDG&E has determined that some older (pre-1980s) mineral transformers were inadvertently contaminated with PCBs by the manufacturer. Based on a statistical sampling and testing program reportedly performed by SDG&E, it is unlikely that transformers found within its service area contain PCBs.

4.3 Previous Documents/Reports

Following are summaries of documents pertaining to the Site that the Client provided.

Geocon Inc. – *Limited Pesticide Assessment and Soil Reuse Plan, Black Mountain Ranch, North Village East and Future Golf Course Site, San Diego, California* dated February 7, 2006

We performed an investigation of soil and prepared the referenced Soil Reuse Plan (SRP) for an approximate 294-acre property that included the Site. The SRP references a Phase I ESA from July 2003 that identified agricultural use of the property from approximately the 1950s through 1988. The soil investigation included collecting 76 soil samples from the North Village East portion of the property, which contains the Site, and analyzing them for organochlorine pesticides (OCPs). We compared the OCP concentrations reported for the samples to the U.S. EPA Region IX Preliminary Remediation Goals (PRGs, since replaced by the EPA's Regional Screening Levels or RSLs) for residential land use. We summarized those results as follows:

> "Of the analytes detected, concentrations of DDD, DDE, DDT, dieldrin, or endrin aldehyde were not reported at or above the respective TTLC [Total Threshold Limit Concentration] and/or residential PRG in any of the soil samples analyzed from the site. Of the analytes detected, only concentrations of toxaphene were reported at or above the residential PRG in more than 1% of the soil samples analyzed from the site. Toxaphene was not reported at concentrations at or above the TTLC. Based upon a review of the analytical data, toxaphene was selected as the indicator constituent that would provide the best human health-based assessment of the site. The lateral extent of toxaphene in soil exceeding the residential PRG also encompasses the extent of all other OCPs."

We stated the following regarding arsenic in soil on the property:

> "Based upon information gathered during the soils investigation conducted on contiguous properties (West Cluster Unit 2) within the Black mountain Ranch development, no soil samples collected during this investigation were analyzed for arsenic. In 2004, fifty-two discrete surface soil samples from West Cluster Unit 2 were analyzed for total arsenic. Concentrations of arsenic ranged from below the laboratory detection limit to 27 mg/kg [milligrams per kilogram]. The 90% UCL [upper confidence limit] mean concentration of arsenic a calculated from the 52 soil samples analyzed is 9.8 mg/kg. Concentrations of arsenic did not exceed the TTLC in any of the soil samples analyzed from West Cluster Unit 2. Concentrations of arsenic exceeded the residential PRG (non-cancer endpoint) in eight of the soil samples."

We recommended special management of soil containing OCPs at concentrations exceeding the residential PRGs. In addition to best management practices, we specifically recommended the following:

- "Soil containing concentrations of OCPs above the residential PRGs shall only be used as fills where encapsulation by a minimum of 10 feet of soil that does not exhibit concentrations of OCPs above the residential PRGs.
- Soil containing concentrations of OCPs above residential PRGs shall not be placed adjacent to slopes exceeding (steeper than) a ratio of 1 vertical to 2 horizontal.
- Soil containing concentrations of OCPs at or above the residential PRGs shall not be placed within 5 feet of an engineered drainage structure or the groundwater table."

It was estimated that approximately 330,000 cubic yards of soil would require special management and that there was approximately 368,000 cubic yards of available fill volume for the project that met this criteria.

We concluded that soil containing concentrations of OCPs exceeding residential PRGs are generally limited to depths of 2 feet below ground surface or shallower; that capacity for placement exceeds the estimated volume of soil containing concentrations of OCPs above the residential PRG by 38,000 cubic yards; and that management of soil containing concentrations of OCPs above the residential PRG, providing a minimum 10-foot buffer to final grade and 5-foot buffer to canyon drains as described in the SRP, would be protective of human health, surface water, and groundwater.

Geocon Inc. – *Updated Limits of Toxaphene in Soil and Placement Areas, Black Mountain Ranch, North Village East, San Diego, California* dated March 20, 2013

This letter report describes the collection of 28 additional soil samples in December 2011 and January 2012 from the North Village East portion of Black Mountain Ranch, which includes the Site. The soil samples were collected from both new locations and locations previously sampled as part of the February 2006 soil investigation and analyzed for OCPs to further delineate/update the extent of toxaphene-impacted soil. Prior to preparing this letter report, portions of the initially defined limits of toxaphene-impacted soil from the 2006 SRP were excavated and encapsulated per the SRP. The area where impacted soil was excavated prior to this additional investigation included the Site, and the impacted soil removed was encapsulated in two areas, one area adjacent to the northwest of the Site and the other approximately 800 feet southeast of the Site. Based on the laboratory analysis results for the soil samples collected in 2011 and 2012, the total volume of toxaphene-impacted soil requiring excavation and encapsulation, including the soil previously excavated and encapsulated prior to the additional investigation, was revised to approximately 159,000 cubic yards. Following the excavation and encapsulation performed prior to the additional investigation, two areas remained on North Village East with toxaphene-impacted soil that still required excavation and encapsulation, and they were located approximately 2,000 and 3,300 feet south of the Site.

Geocon Inc. – *Transmittal, Black Mountain Ranch (Del Sur), North Village East, San Diego, California* dated June 5, 2013

This transmittal includes four figures that depict three areas where toxaphene-impacted soil was encapsulated and the survey data defining the limits of the encapsulation areas. The encapsulation areas are adjacent to the northwest of the Site, approximately 800 feet southeast of the Site, and approximately 4,500 feet south-southwest of the Site. The transmittal states: "The soils containing toxaphene were incorporated into properly compacted embankments in accordance with the recommendations contained in our reports entitled *Limited Pesticide Assessment and Soil Reuse Plan,*

Black Mountain Ranch, North Village East and Future Golf Course, dated February 7, 2006, and update date March 20, 2013." A copy of this transmittal is in Appendix B.

As described above and depicted on the figures in our June 2013 transmittal (Appendix B), soil impacted with toxaphene at concentrations exceeding the PRG for residential land use was removed from the Site and encapsulated offsite. This removal effectively remediated the toxaphene-impacted soil at the Site and, therefore, the impacted soil would no longer be considered an REC. However, the former presence of toxaphene impacted soil at the Site would be considered an HREC.

5. HISTORICAL USE

This section summarizes information obtained from a variety of sources regarding the historical uses of the Site in an effort to identify those uses that could have led to RECs. The sources of information included historical aerial photographs, historical topographic maps, and an abstract of city directories provided by EDR.

5.1 Sanborn, Inc. Fire Insurance Maps

EDR's *Certified Sanborn Map Report* dated August 17, 2018, indicates that Sanborn maps do not exist for the Site or site vicinity.

5.2 Aerial Photographs

We reviewed historical aerial photographs for the years 1939, 1947, 1949, 1953, 1964, 1966, 1970, 1979, 1985, 1989, 1994, 2005, 2009, 2012 and 2016 (Appendix D) for indications of past land uses that had the potential to have impacted the Site through the use, storage or disposal of hazardous substances and/or petroleum products. The following table summarizes our observations of the Site and adjacent properties.

Year	Observations	
	Site	Adjacent Properties
1939 (1" = 500')	The Site appears to have been undeveloped land with native vegetation.	Adjacent properties appear to have been undeveloped land with native vegetation.
1947 (1" = 500')	Conditions appear to have been similar to those observed on the 1939 aerial photograph.	Conditions appear to have been similar to those observed on the 1939 aerial photograph.
1949 (1" = 500')	Conditions appear to have been similar to those observed on the 1947 aerial photograph.	Conditions appear to have been similar to those observed on the 1947 aerial photograph.

Year	Observations	
	Site	Adjacent Properties
1953 (1" = 500')	Conditions appear to have been similar to those observed on the 1949 aerial photograph.	Conditions appear to have been similar to those observed on the 1949 aerial photograph.
1964 (1" = 500')	The Site appears to have been agricultural land (likely row crops).	Adjacent properties appear to have been agricultural land.
1966 (1" = 500')	Conditions appear to have been similar to those observed on the 1964 aerial photograph.	Conditions appear to have been similar to those observed on the 1964 aerial photograph.
1970 (1" = 500')	Conditions appear to have been similar to those observed on the 1966 aerial photograph.	Conditions appear to have been similar to those observed on the 1966 aerial photograph.
1979 (1" = 500')	Conditions appear to have been similar to those observed on the 1970 aerial photograph.	Conditions appear to have been similar to those observed on the 1970 aerial photograph.
1985 (1" = 500')	Conditions appear to have been similar to those observed on the 1979 aerial photograph.	Conditions appear to have been similar to those observed on the 1979 aerial photograph.
1989 (1" = 500')	Conditions appear to have been similar to those observed on the 1985 aerial photograph.	Conditions appear to have been similar to those observed on the 1985 aerial photograph.
1994 (1" = 500')	Conditions appear to have been similar to those observed on the 1989 aerial photograph.	Conditions appear to have been similar to those observed on the 1989 aerial photograph.
2005 (1" = 500')	Conditions appear to have been similar to those observed on the 1994 aerial photograph.	Conditions appear to have been similar to those observed on the 1994 aerial photograph except that an unimproved road extended north-south near the western boundary of the Site, beyond which was vacant land.
2009 (1" = 500')	The Site appears to have been undeveloped land not used for agricultural purposes with the western portion used to store construction equipment and materials likely related to development west of the Site.	Adjacent properties appear to have been undeveloped land not used for any specific purpose. An unimproved road extended north-south near the western boundary of the Site.
2012 (1" = 500')	The Site appears to have been graded land.	Adjacent properties to the north, south and west appear to have been graded land and the adjacent property to the east was undeveloped land not used for any specific purpose.
2016 (1" = 500')	The Site appears to have been two graded pads separated by an improved road.	Adjacent properties to the north and northwest appear to have been graded pads. Multi-family and single-family residences were present adjacent to the south and southwest, respectively, and commercial (retail) development was present adjacent to the east. The Site was bound by improved roads similar to the present-day configuration.

The past agricultural use (row crops) of the Site suggests that persistent pesticides may have been used on the Site. As described in Section 4.3, toxaphene was detected in soil samples collected from the Site in 2006 at concentrations exceeding the PRGs in use at that time for residential land use and the impacted soil was encapsulated offsite during grading activities. The former presence of toxaphene-impacted soil at the Site is considered an HREC.

5.3 Topographic Maps

We reviewed historical topographic maps for the years 1893, 1901/1903, 1947, 1948, 1949/1952/1953, 1967/1968, 1975, 1983, 1994/1996 and 2012 (Appendix E). The following table summarizes observations of the Site and adjacent properties on the historical topographic maps.

Year	Observations	
	Site	Adjacent Properties
1893 (1:62,500)	No structures or land use are depicted on the Site.	No structures or land use are depicted on the adjacent properties to the north, south and west. A structure is depicted adjacent to the east of the Site and an improved road is depicted extending east-west north of the Site.
1901/1903 (1:62,500)	An improved road is depicted extending roughly north-south through the eastern portion of the Site.	Conditions are similar to those depicted on the 1893 topographic map except that an improved road is depicted extending south from the eastern portion of the Site and a structure is depicted north of the western portion.
1947 (1:50,000)	No structures or land use are depicted on the Site.	No structures or land use are depicted on the adjacent properties.
1948 (1:24,000)	Conditions are similar to those depicted on the 1947 topographic map.	Conditions are similar to those depicted on the 1947 topographic map.
1949/1952/ 1953 (1:24,000)	Conditions are similar to those depicted on the 1948 topographic map.	Conditions are similar to those depicted on the 1948 topographic map.
1967/1968 (1:24,000)	Conditions are similar to those depicted on the 1949/1952/1953 topographic map.	Conditions are similar to those depicted on the 1949/1952/1953 topographic map except that an unimproved road extended roughly east-west south of the Site.
1975 (1:24,000)	The Site is located in a portion of the map labelled “unmapped.”	Adjacent properties are located in a portion of the map labelled “unmapped.”
1983 (1:24,000)	Conditions are similar to those depicted on the 1967/1968 topographic map.	Conditions are similar to those depicted on the 1967/1968 topographic map.

Year	Observations	
	Site	Adjacent Properties
1994/1996 (1:24,000)	Conditions are similar to those depicted on the 1983 topographic map.	Conditions are similar to those depicted on the 1983 topographic map.
2012 (1:24,000)	No shading or structures are depicted.	No shading or structures are depicted.

The historical topographic maps depict no conditions, structures, or uses on the Site or adjacent properties that would suggest the presence of RECs.

5.4 City Directories

EDR prepared an abstract of city directories including city, cross-reference, and telephone directories summarized in the *EDR-City Directory Image Report* dated August 18, 2018. The directories were reviewed at approximately 5-year intervals, if available, from 1903 to 2014. A copy of the EDR city directory abstract including information regarding offsite facilities is in Appendix F. Neither the Site nor adjacent properties are listed in the city directories reviewed.

6. SITE RECONNAISSANCE

This section summarizes observations of the Site and surrounding properties made during the site reconnaissance.

6.1 Methodology and Limiting Conditions

Brett Conner, Senior Geologist with Geocon, performed the site reconnaissance unaccompanied on August 22, 2018, by walking the Site. Mr. Conner performed the offsite survey by observing adjacent properties from the Site and adjacent public streets. Weather on the day of the site reconnaissance was clear with temperatures in the mid-80s. Photographs of various site features and offsite properties are appended. Figure 2 is a Site Plan illustrating selected site features.

6.2 General Site Setting

The Site is located in an area of predominantly residential (single- and multi-family) and commercial (retail and dining) use. Sheet-graded pads are adjacent to the north of the Site beyond Templeton Street.

6.3 Onsite Survey

The Site is composed of two parcels/blocks referred to as Block F (Avante) and Block G (Skye). Both blocks are sheet-graded pads with two- and three-story multi-family residential structures currently under construction on both.

Block F is the western portion of the Site west of Coyote Bush Drive (Figure 2; Photograph Nos. 1 through 5). Eight multi-family residential structures are currently being constructed on the southern portion of Block F, six of which are roughly half completed and two nearly/fully completed (Photograph Nos. 6 and 7). A sales office is also located on the eastern portion of Block F (Photograph No. 8).

Block G is the eastern portion of the Site east of Coyote Bush Drive (Photograph Nos. 9 through 12). Three multi-family residential structures are currently being constructed on the northern and western portions of Block G, two of which are roughly half completed and one nearly/fully completed (Photograph Nos. 13 and 14). We observed a metal storage container on the southern portion of Block G (Photograph No. 15). Although we were unable to access the container, no staining or evidence of a release was observed near it.

We observed no odors, pools of liquid, stained soil or distressed vegetation on the Site. We observed no evidence of RECs on the Site.

6.4 Offsite Survey

Properties within the site vicinity include:

- **North:** Templeton Street beyond which are sheet-graded pads with the eastern portion of the pads containing temporary construction trailers related to the Site as well as being used to store construction equipment and materials (Photographs Nos. 16 and 17).
- **South:** Del Sur Ridge Road beyond which are multi-family residences/townhomes (Photograph No. 18).
- **East:** Garretson Street beyond which is commercial (retail) development (Photograph No. 19).
- **West:** Paseo Del Sur beyond which is a dog park and single-family residences (Photograph No. 20).

We observed no evidence of RECs on the surrounding properties.

7. INTERVIEWS

The current property owner representative, Alexander Plishner, reported via a site owner/occupant questionnaire (Appendix B) that the Site has been under construction since November 2017. Mr. Plishner also reported that the Site was previously owned by Black Mountain Ranch and was empty, graded lots. The owner/occupant questionnaire identifies no environmental concerns.

8. SUMMARY OF FINDINGS

The following table summarizes our findings and opinions regarding the Site, including known or suspect RECs, CRECs, HRECs, and de minimis environmental conditions.

Assessment Category	Observed (Y/N)	(REC/ CREC/ HREC/ DM or None)	Recommended Actions	Report Section(s)
Hazardous Substances/Petroleum Products	N	N	NFA	
Hazardous Wastes	N	N	NFA	
Non-Hazardous Wastes	N	N	NFA	
Aboveground/Underground Storage Tanks	N	N	NFA	
Unidentified Substance Containers	N	N	NFA	
Equipment Potentially Containing PCBs	N	N	NFA	
Wastewater Systems	N	N	NFA	
Evidence of Releases	N	N	NFA	
Pools of Liquid, Pits, Ponds, Lagoons	N	N	NFA	
Wells	N	N	NFA	
Other Site Issues	N	N	NFA	
Nearby Properties	N	N	NFA	
Historical Land Use – Site	Y	HREC	NFA	4.3, 5.2
Historical Land Use – Nearby Properties	N	N	NFA	

Recommended Action:
AA = Additional action recommended.
NFA = No further action required at this time.
DM = De minimis condition where additional activities do not appear warranted at this time.

As described in Section 4.3 and 5.2, toxaphene was detected in soil samples collected from the Site at concentrations exceeding PRGs for residential land use and the impacted soil was encapsulated offsite during grading activities. The former presence of toxaphene-impacted soil at the Site is considered an HREC.

9. CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I ESA, in general conformance with the scope and limitations of ASTM E 1527-13, of the approximate 11.88-acre property located south of Templeton Street and west of Garretson Street in San Diego, California. The San Diego County APNs for the Site are 678-690-12 through -19.

This Phase I ESA identified no evidence of RECs in connection with the Site. Toxaphene-impacted soil on the Site was removed and encapsulated offsite. The former presence of toxaphene-impacted soil on the Site is considered an HREC. An HREC is an environmental condition which would have been considered a REC in the past, but which is no longer considered an REC based on subsequent assessment and/or remediation of any contaminants to meet the most restrictive (generally residential) cleanup target concentrations or regulatory closure with no formal or implied restricted uses. Additional environmental assessment of the Site does not appear to be warranted at this time.

APPENDIX VIII SELECTED CITY & COUNTY DOCUMENTS

(None)

APPENDIX IX AUTHOR'S CREDENTIALS

Curriculum Vitae, Marc Boogay

1584 Whispering Palm Drive, Oceanside 92056; phone 760.407.4000

Experience

Over thirty years of experience in environmental assessment and teaching in Southern California counties including research, site inspection, review of manufacturing processes and commercial site usage. Site assessment familiarity includes regulations and regulatory practice concerning soil/groundwater contamination and remediation/monitoring requirements; teaching experience includes mathematics, science, and aviation.

Experience including designing, maintaining and regulatory requirements for sanitary landfills, landfill monitoring and closure reports, and soil-gas monitoring to assess risks for methane and volatile vapors as might intrude into structural spaces of buildings near a landfill.

Phase II site assessments have included soil, soil-gas, and groundwater sampling for assessment of many sites in Southern California, preparation of work plans to county Department of Environmental Health standards, estimations for risk assessment.

Experience with site-remediation includes comparisons of alternative strategies, project design, negotiation for approvals by regulatory agencies, and progress monitoring and follow-up studies; preparation of reports through case-closure status on several sites.

Registrations-

- Registered Professional Engineer, Civil Engineering, California, No. 27718.
- Registered Professional Engineer, Civil Engineering, Arizona, No. 25146.
- Registered Professional Engineer, Mechanical Engineering, California, No. 19245.
- Contractor's Licenses: *General Building*, *General Engineering*, *Hazardous Substances Removal and Remedial Actions* Certificates, California, all under License No. 491501 certificates in inactive status.

Education-

B.S., Mechanical Engineering, University of Missouri, Columbia, MO, 1971.
M.S., Civil Engineering, New Mexico State University, Las Cruces, NM, 1974.

Experience-

Environmental Engineer, Phase I and Phase II environmental site assessments, abatement designs, *Marc Boogay Consulting Engineer*, Vista, CA, 1988-present.

Project Manager, general environmental site assessments, restoration of prior oil well sites, *Applied Geosciences Inc.*, Tustin, CA, 1987-1988.

Environmental Engineer, Design Section Supervisor, *Public Works Office, Marine Corps Base, Camp Pendleton*, 1976-1988, Camp Pendleton, CA.

Environmental Engineer, Research and Test/Evaluation, *Naval Civil Engineering Laboratory*, Port Hueneme, CA, 1974-1976.

San Diego, CA 92106

attn: Brandon Hong, Business Mgr

subj: Phase I report, "Cambridge School," APNs 678-690-70, -71 -72, San Diego, CA

Dear Mr. Hong,

Among comments from the City of San Diego, dated August 22, 2024, were those identified as #191, requesting an additional explanation on "*how the nearby concerns with adjacent aboveground diesel fuel tanks and automotive repair will be addressed"* and *"are diesel fuel tanks and automotive repair past uses or are they existing?*"

The adjoining usage at issue was *Snap-on*, reportedly having an aboveground diesel fuel tank, automotive repair, and wastes including lead-acid batteries. These things or activities appeared to be existing, but not near the boundary between this property and the site, and no history involving release was known or suspected; as such, these matters were not deemed "recognized environmental concerns," and no additional protective countermeasures or investigative actions were deemed appropriate.

After additional consideration, our opinion regarding this is unchanged.

Sincerely,
Marc Boogay, RCE 27718
