# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 1988062818

Project Title: A.R. Wilson Quarry Reclamation Plan and Use Permit Amendment Project (PLN250093)

Lead Agency: San Benito County Resource Management Agency

Contact Name: Michael Kelly, Senior Planner

Email: mkelly@sanbenitocountyca.gov Phone Number: 831-902-2287

Project Location: Unincorporated area near Aromas / San Benito County

*City* *County*

Project Description (Proposed actions, location, and/or consequences).

The A.R. Wilson Quarry is an existing aggregate mining operation operated by Granite Rock Company (Graniterock) located approximately 2 miles east of Aromas in unincorporated San Benito County. Mining began in 1895 and was recognized by the County in 1981 as a vested operation. In 1993, the County certified an EIR and approved Use Permit No. 460-88A authorizing designed placement of reclamation materials on adjacent property south of the quarry. The reclamation plan was last updated in 2016.

Graniterock seeks to amend the 2016 Reclamation Plan and modify Use Permit No. 460-88A to extend reclamation materials placement into an additional 195-acre area (referred to as the "Permit Amendment Project Area") that is entirely within the existing Use Permit Area and adjacent to the 2016 Reclamation Plan Area. The Project includes designed placement of reclamation materials and subsequent reclamation and revegetation, consistent with activities evaluated in the 1993 EIR, to support aggregate production at the vested quarry.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The SEIR will evaluate potential impacts related to aesthetics, air quality, biological resources, cultural resources, energy, geology and soils, greenhouse gas emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, noise, transportation, tribal cultural resources, and wildfire. Other resource topics will be evaluated in detail if potentially significant impacts are identified during scoping or preparation of the SEIR. Mitigation measures will be identified, as appropriate, to reduce or avoid significant impacts.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No specific areas of controversy are known to the Lead Agency at this time. Agency and public comments received during the NOP review period and public scoping meeting will be considered in preparing the SEIR.

Provide a list of the responsible or trustee agencies for the project.

Potential responsible and trustee agencies include the Monterey Bay Air Resources District; Central Coast Regional Water Quality Control Board; and California Department of Fish and Wildlife. Federal agencies with potential permitting or consultation responsibilities include the U.S. Fish and Wildlife Service and U.S. Army Corps of Engineers.
