Temporary Northside Ground Transportation Facilities – Addendum to the Final EIR (FEIR) for the San Diego International Airport Development Plan (ADP)

## Project Description

The proposed Project involves temporarily relocating existing ground transportation facilities, including the taxi "hold lot" and the Rental Car Center (RCC) shuttle storage lot, from the southern portion of SDIA to the northern portion of SDIA while construction of the new Terminal 1 is underway, after which these ground transportation facilities would be moved back to the south side of SDIA property to its new permanent location.

The purposes of this Addendum are: (1) to document the review that the San Diego County Regional Airport Authority (SDCRAA) has undertaken to assess the proposed Project in relation to the FEIR and current conditions; and (2) to substantiate the conclusion, based on substantial evidence presented in this Addendum and attachments, that there are no substantial changes to the project evaluated in the FEIR, no substantial changes in circumstances, and no new information indicating that there would be new significant impacts or a substantial increase in the severity of any previously disclosed significant impacts which would require major revisions to the FEIR. Because no major changes to the FEIR are required pursuant to this framework, the preparation of a Supplemental or Subsequent EIR is not required pursuant to the California Environmental Quality Act (CEQA); codified as Public Resources Code, Section 21000 et seq.

Based on a review of the currently proposed project conducted pursuant to Section 15162 of the CEQA Guidelines, an Addendum to the 2020 FEIR was prepared, and considered along with the 2020 FEIR in approving the project.

### Notice of Determination

# San Diego International Airport Development Plan

### Project Description

The San Diego County Regional Airport Authority (SDCRAA) is proposing the next master planning phase for the San Diego International Airport (SDIA or Airport), in accordance with a new Airport Development Plan (ADP). The ADP provides a development framework to implement improvements that will enable SDCRAA to accommodate future demand for air travel anticipated to occur at SDIA with more modern, efficient, and comfortable facilities. The ADP improvements approved by the SDCRAA Board on January 9, 2020 represent those that were presented as "Alternative 4: T1 Replacement and Transportation Improvements" in the ADP Environmental Impact Report (EIR). Implementation of Alternative 4 would result in less or reduced environmental impacts than the originally proposed project presented in the EIR, is feasible, and would meet all of the project objectives. As such, the Board approved Alternative 4 instead of the originally proposed project. The primary elements of the approved project (i.e., Alternative 4) include: (1) replacement of Terminal 1 with a new terminal of up to 30 gates; (2) development of circulation and roadway improvements to enhance mobility to the existing and proposed terminals from North Harbor Drive, including a new multi-use pedestrian and bicycle pathway and airport entry road for inbound vehicle traffic, and the preservation of right-of-way on airport property to accommodate potential off-airport access road improvements: (3) preservation of a portion of SDIA as a "transit-ready" area to accommodate potential future regional transit system improvements that would link to SDIA; (4) implementation of a dedicated shuttle service between the Old Town Transit Center and SDIA; (5) airfield taxiway improvements and reconfigured remain overnight (RON) aircraft parking areas; (6) development of a five-story parking structure adjacent to the new Terminal 1; and, (7) other related improvements, such as replacement of SDCRAA's administrative offices that would be displaced by the new Terminal 1, and various infrastructure improvements.
