Pavement Condition Improvement Table

Oil and Gas EIR
TRANSPORTATION STUDY

PAVEMENT CONDITION IMPROVEMENT TABLE
LEGEND

Roadway Segment: County road or state route segment included within the scope of the study.

Proj AADT: Daily oil/gas traffic volume estimate for the year 2014.

2014 AADT: Annual average daily traffic volume for the year 2014.

Trucks: Percent of 2014 AADT assumed to be heavy trucks.

Urban: Percent truck volume assumed for roadway segments in urban settings.

Type: Roadway type for state routes (F=Freeway and H=Highway) and county roads (A=Arterial and C=Collector).

Subregion: Study area subregion (W=Western, C=Central and E=Eastern).

No. Lanes: Total number of travel lanes (both directions).

Estimated 20-yr TI: Twenty-year Traffic Index (TI) assigned to each roadway segment.

Estimated Max ESAL: Maximum Equivalent Single-Axle Load (ESAL) for corresponding 20-year TI.

Life: Estimate of percent remaining pavement service life based on 2013 pavement condition data and study pavement life cycle curve.

ESAL 2014: ESAL for the year 2014 estimated as the product of percent remaining pavement service life and maximum ESAL.

ESAL 2015 through ESAL 2035: As defined below, color shading of the cells in these columns denotes the type of pavement condition improvement scheduled.

NONE: No pavement condition improvement scheduled
GREEN: Preventive maintenance scheduled
BLUE: Corrective maintenance scheduled
ORANGE: Major rehabilitation scheduled
RED: Roadway reconstruction scheduled
GREY/BLACK: Pavement condition improvement deferred
