Appendix M-3

Draft Emissions Reduction Agreement

This page intentionally left blank.

EMISSION REDUCTION AGREEMENT

DRAFT – October 29, 2015

This Emission Reduction Agreement ("Agreement") is entered into as of [month] [date], 2015, by and between the COUNTY OF KERN ("County") and the SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, an air pollution control district formed pursuant to California Health and Safety Code section 40150, et seq. ("District").

RECITALS

WHEREAS, the County approved amendments to the Kern County Zoning Ordinance regulating oil and gas production, including Chapter 19.98 and related sections of the Zoning Ordinance ("Project" or "Ordinance"), and certified an Environmental Impact Report ("EIR") for the Project, in [2015]; and

WHEREAS, the Project requires compliance with the Ordinance and the EIR mitigation measures set forth in Exhibit A, including but not limited to Air Quality Mitigation Measures 4.3-1 to 4.3-5, attached hereto and incorporated herein ("Emission Reduction Mitigation Measures"), in order to significantly reduce Project air emissions associated with the Project; and

WHEREAS, despite incorporation of various emission reduction mitigation measures, without additional emission reductions the Project would cause impacts on air quality within the geographical boundaries of the San Joaquin Valley Unified Air Pollution Control District, as depicted on Exhibit B attached hereto and incorporated herein (the "District Boundaries"); and

WHEREAS, County has required in Mitigation Measure 4.3-5 that applicants for County oil and gas permits issued under the Ordinance ("Applicants") offset emissions of Nitrogen Oxide (NOx), Reactive Organic Compounds (ROGs) and Particulate Matter (PM) of County-permitted activities ("Activities") under the Ordinance through offsetting emission reductions that are either: (1) implemented by the Applicant, with the quantity of emission reductions verified by the Air District; (2) funded by the Applicant and

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

implemented by or under contract to the County, with the quantity of emission reductions verified by the Air District; or (3) funded by the Applicant through the District's incentive programs, as described below.

WHEREAS, District is an air pollution control district formed by the counties of Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus and Tulare, pursuant to California Health and Safety Code section 40150, et seq.; and

WHEREAS, District is responsible for developing and implementing air quality control measures within the District Boundaries, including air quality control measures for stationary sources, transportation sources, and indirect sources; and

WHEREAS, the District has developed emission reduction incentive programs have been developed around several core principles, including cost-effectiveness, integrity, effective program administration, excellent customer service, the efficient use of District resources, fiscal transparency and public accountability; and

WHEREAS, the District's incentive programs and regulatory activities are regularly audited by independent outside agencies including professional accountancy corporations on behalf of the federal government, the California Air Resources Board (ARB), the California Department of Finance and the California Bureau of State Audits; and

WHEREAS, the District has determined that with appropriate funding, the District can provide: (1) protocols for measuring and verifying emission reductions achieved by Applicants to offset emission increases; (2) protocols for measuring and verifying emission reductions achieved by or under contract to the County based on mitigation fees paid to the County by the Applicant; and (3) reductions of emissions through District incentive programs, and achieve emission reductions in sufficient quantities to comply with Mitigation Measure 4-3-5; and

WHEREAS, County and District desire to enter into this Agreement in order to assure implementation of Mitigation Measure 4.3-5, with per well emission reductions in the amounts set forth in Exhibit C (EIR Table 3.4-32) for NOx, ROG, and PM (including

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

particulate matter that is less than 10 microns in size, and the subset of 2.5-microns or less in size) (collectively, "criteria pollutants"). As a result of the implementation of this Agreement, the development of the Project will result in no net increase in these criteria pollutant emissions from the oil and gas production activities regulated by the Ordinance.

AGREEMENT

NOW THEREFORE, in exchange of the mutual covenants herein contained, County and District hereby agree as follows:

1. **Mitigation of Project-Related Impacts on Air Quality**

Project emissions shall be mitigated by achieving surplus, quantifiable and enforceable emission reductions for VOC/ROG, NOx, and PM (collectively, "Mitigation of Criteria Pollutants"). "Surplus" emission reductions are reductions that are not otherwise required by laws or regulations in effect and applicable to Applicant Activities in the year for which a County permit or approval is issued under the Ordinance. The determination of whether proposed emission reductions are surplus shall be performed by the District based on laws and regulations (including but not limited to emission offsets required under District stationary source permit rules) in effect in the year for which a County permit is issued.

Mitigation of Criteria Pollutants shall be required in the amounts set forth in Exhibit C. Fewer emission reductions than identified in Exhibit C may be provided as mitigation only if:

(a) the County approves a revised air quality impact assessment, which is reviewed as required under CEQA and is approved by the District, that demonstrates that Project related air quality impacts are less than originally quantified and accordingly that Exhibit C should be revised;

(b) the District reviews and approves an alternate per well emission calculation based on an Applicant's use of different well emission construction equipment than the list used to derive the quantities set forth in Exhibit C ("Schedule 1 List"), and provides

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

such alternative equipment lists to the County (e.g., "Schedule 2 List," Schedule 3 List," etc.); or

(c) the District's rules or regulations change such that Project-related emissions that are not, as of the effective date of this Agreement, required to obtain offsets under District stationary source permitting rules are subsequently required to obtain such offsets.

Project-related air quality impacts shall be implemented by one or more of the following three categories of emission reduction proposals:

Category 1: **Applicant Emission Reductions**. The District shall separately contract with interested applicants for permits and approvals issued under the Ordinance ("Applicant(s)") for the cost of developing protocols for calculating emission reduction estimates from Applicant Emission Reduction proposals ("Quantification Protocol"). An Applicant may satisfy its emission reduction obligations under Mitigation Measure 4.3-5 with an Applicant Emission Reduction only after the District has approved a corresponding Quantification Protocol, and the District has provided written confirmation to the County of the emission reduction quantities for an Applicant Emission Reduction that an applicant proposes to use to satisfy its obligations under Mitigation Measure 4.3-5 in lieu of paying the mitigation fee prescribed therein. It is anticipated that one or more Applicants will seek District approval for the Applicant Emission Reduction proposals listed on Exhibit D.

Category 2: **County Emission Reductions**. Applicants shall pay an air quality mitigation fee to the County as specified in Mitigation Measure 4.3-5, which shall be due and payable at the time a permit is approved ("Air Quality Mitigation Fee"), to be used for Mitigation of Criteria Pollutants through projects annually selected by the County. The County staff shall accept for review emission reduction applications submitted by any party during an annual application process. Each such application shall be evaluated by County staff, working in collaboration with District staff, based on the quantity and types of emission reductions achieved, public health benefits, the cost-effectiveness of the

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

proposal, and any other factor that a sponsor of a proposal may choose to bring to the County's attention. The Board of Supervisors shall annually review and select among such applications the County Emission Reduction Proposals.

An administrative fee of three percent shall be added to the Air Quality Mitigation Fee collected under Mitigation Measure 4.3-5 to administer the County Emission Reduction program, with one percent retained by the County and two percent provided to the District. The District shall use its administrative funding amount to peer review or otherwise quantify emission reductions that would be achieved from submitted applications, and to assist the County staff in evaluating applications for Board consideration. The County shall use its administrative funding amount to manage the annual review and selection process, and to validate implementation of emission reduction proposals for purposes of tracking emission reductions under the Mitigation Monitoring and Reporting Program ("MMRP").

Category 3: District Incentive Program Emission Reductions. The County may, as part of the annual review and selection process, select emission reduction measures from the District's Incentive Programs (including but not limited to specifying that such measures must be implemented within Kern County). Upon selection, the County shall provide Air Quality Mitigation Funds to the District to achieve emission reductions through the District's Incentive Programs. Upon District's receipt of Air Quality Mitigation Funds, District shall (1) use diligent efforts to enter into Funding Agreements with the owners and/or operators of the pollution source equipment as identified in the Emission Reduction Proposals, within one hundred eighty (180) days of receiving funding; (2) determine the types and quantities of permanent reduction in emissions which would be realized by the Emission Reduction Proposals; (3) perform the determination of surplus emission reductions of NOx, ROG, and PM; and (4) advise County of such determination in writing. District shall notify County or designee in writing of Funding Agreements entered into by the District. If District is unable to enter into Funding Agreements with owners or operators, or if requested by County in writing,

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

District shall return the unused portion the Air Quality Mitigation Funds to the County for use as County Emission Reductions. The District shall charge an administrative fee of 2% for implementation of District Incentive Program Emission Reductions.

2. **Administration and Monitoring of Emission Reductions**

County shall prepare, as part of annual Mitigation Monitoring and Reporting Plans, emission reductions paid for and achieved by implementation of this Agreement.

3. **Excess Emission Reductions**

County shall be credited with all emission reductions achieved by District through this Agreement that exceed the amount of required emission reductions for the Project ("Excess Emission Reduction"). Unless otherwise agreed to by the County, District and an Applicant, Excess Emission Reductions for wells that are not constructed during the planned calendar shall be credited to the Applicant, or to an alternate applicant designated by the Applicant, to achieve required Emission Reductions for future wells in subsequent

4. **Compliance with District Rules and Regulations**

County acknowledges that notwithstanding this Agreement, Applicants remain subject to and are required to comply with all applicable District rules and regulations.

5. **CEQA Compliance**

The County shall remain fully responsible as the lead agency for enforcing the Ordinance and monitoring to assure implementation of the Mitigation Measures included in the EIR, and for preparing annual reports pursuant to the County's Mitigation Monitoring and Reporting Program.

6. **District Obligations**

6.1 **Oversight of Funding Agreements**

District shall ensure that the owners/operators of equipment subject to Funding Agreements for District Incentive Program Emission Reductions perform all obligations to be performed on the part of such parties under said Funding Agreements.

6.2 **Emission Reduction Quantification Protocol**

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

District shall, at the sole cost of an Applicant, develop Quantification Protocols for Applicant Emission Reductions.

6.3 **Emission Reduction Estimates**

District shall collaborate with the County staff in reviewing applications for County Emission Reductions, and shall advise the County on the quantity of emission reductions by applications and County Emission Reductions.

7. **Subsequent Litigation, Legislation and/or Administrative Action / Credit to County**

In the event that despite this Agreement, the County is required as a result of a final judgment or District Approved Settlement (as defined below) in any third party litigation, to pay air quality mitigation funds in addition to the Air Quality Mitigation Fees paid under Paragraph 1 above, then District shall acknowledge and credit the County with emission reductions achieved pursuant to Paragraph 1, and any additional emission reductions achieved to mitigate the Project related impacts on air quality that will result from payment of such additional monies. For purposes of this Paragraph, a "District Approved Settlement" shall mean a settlement of a lawsuit filed pursuant to CEQA, the National Environmental Protection Act or other applicable environmental law which: (i) provides for the County's (or an Applicant(s)') payment of monies in exchange for a dismissal of such lawsuit, (ii) provides for the use of such monies by the petitioner in such lawsuit in such a manner as to further reduce Project-related air emissions, and (iii) is approved in writing by District. The District shall have no authority to settle, or otherwise, commit the Air Quality Mitigation Fees in any settlement of, a third party lawsuit without the County's consent.

8. **Term of Agreement**

This Agreement shall be effective upon the date first written above, and shall remain in effect until or unless terminated by the County or the District. County may, at any time by written notice to District, terminate this Agreement, whereupon, (i) District shall acknowledge in writing to the Lead Agency that County has mitigated air quality

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

impacts of the Project to the extent and in the types and quantities brought about by Funding Agreements and Mitigation Measures, (ii) District shall refund to County any unused portion of County's Emission Reduction Proposal Advances or Air Quality Mitigation Funds less any unpaid administrative costs incurred; and (iii) neither County nor District shall have any further rights or obligations under this Agreement except as expressly provided. District's obligations to oversee implementation of Funding Agreements pursuant to Paragraph 9.2 (Oversight of Funding Agreements), shall remain effective for as long as necessary to ensure that the anticipated emission reductions continue to be achieved to the extent specified in the environmental review document certified by the County.

9. **Representations, Covenants and Warranties**

9.1. **County's Representations, Covenants and Warranties**.

County represents, covenants and warrants to District, as of the date of this Agreement, as follows:

9.1.1 The undersigned representatives of County are duly authorized to execute, deliver and perform this Agreement, and upon County's execution and delivery of this Agreement, this Agreement will have been duly authorized by County.

9.1.2 Upon execution and delivery of this Agreement by County, County's obligations under this Agreement shall be legal, valid and binding obligations of County, duly enforceable at law and in equity in accordance with the terms and conditions of this Agreement.

9.1.3. There is no lawsuit, legal action, arbitration, legal or administrative proceeding, legislative quasi-legislative or administrative action or claim existing, pending, threatened or anticipated which would render all or any portion of this Agreement invalid, void or unenforceable in accordance with the terms and conditions thereof.

9.1.4. Other than the execution and delivery of this Agreement by the undersigned representatives of County, there are no approvals, consents, confirmations,

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

proceedings, or other actions required by County or any third party, entity or agency in order to enter into and carry out the terms, conditions and intent of the parties with respect to this Agreement, except as required to enter Funding Agreements.

9.2. **District's Representations, Covenants and Warranties**

District represents, covenants and warrants to County, as of the date of this Agreement, as follows:

9.2.1. The undersigned representatives of District are duly authorized to execute, deliver and perform this Agreement, and upon District's execution and delivery of this Agreement, this Agreement will have been duly authorized by District.

9.2.2. Upon execution and delivery of this Agreement by District, District's obligations under this Agreement shall be legal, valid and binding obligations of District, duly enforceable at law and in equity in accordance with the terms and conditions of this Agreement.

9.2.3. There is no lawsuit, legal action, arbitration, legal or administrative proceeding, legislative, quasi-legislative or administrative action or claim existing, pending, threatened or anticipated which would render all or any portion of this Agreement invalid, void or unenforceable in accordance with the terms and conditions thereof.

9.2.4. Other than the execution and delivery of this Agreement by the undersigned representatives of District, there are no approvals, consents, confirmations, proceedings, or other actions required by District or any third party, entity or agency in order to enter into and carry out the terms, conditions and intent of the parties with respect to this Agreement, except as required to enter Funding Agreements

9.2.5. Upon the approval of this Agreement by the governing board of District, the Air Pollution Control Officer of District, or equivalent representative, or a delegee of such officer, shall have the authority to approve, deliver, verify, enter into, acknowledge and/or accept any communication, notice, notification, verification, agreement and/or other document to be issued or entered into by District under the terms

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

and conditions of this Agreement, without further approval of the governing board of District.

10. **Indemnification**

Neither party agrees to indemnify, defend and hold harmless the other party to this Agreement.

11. **Recitals Incorporated**

The recitals set forth hereinabove are hereby incorporated into this Agreement and acknowledged, agreed to and adopted by the parties to this Agreement.

12. **Further Assurances**

County and District agree to execute and deliver any documents and/or perform any acts which are reasonably necessary in order to carry out the intent of the parties with respect to this Agreement.

13. **No Joint Venture or Partnership**

District and County agree that nothing contained in this Agreement or in any document executed in connection with this Agreement shall be construed as making District and County joint venturers or partners.

14. **Notices**

Any notices or communications relating to this Agreement shall be given in writing and shall be deemed sufficiently given and served for all purposes when delivered, if (a) in person, (b) by facsimile (with the original delivered by other means set forth in this paragraph, (c) by generally recognized overnight courier or (d) by United States Mail, certified or registered mail, return receipt requested, postage prepaid, to the respective addresses set forth below, or to such other addresses as the parties may designate from time to time by providing written notice of the change to the other party.

15. **Entire Agreement**

The terms of this Agreement, together with all attached exhibits, are intended by the parties as the complete and final expression of their agreement with respect to such terms and exhibits and may not be contradicted by evidence of any prior or contemporaneous agreement. this Agreement specifically supersedes any prior written or oral agreements between the parties with respect to the subject matter of this Agreement.

16. **Amendments and Waivers**

No addition to or modification of this Agreement shall be effective unless set forth in writing and signed by the party against whom the addition or modification is sought to be enforced. The party benefited by any condition or obligation may waive the same, but such waiver shall not be enforceable by another party unless made in writing and signed by the waiving party.

17. **Invalidity of Provisions**

If any provision of this Agreement as applied to either party or to any circumstance shall be adjudged by a court of competent jurisdiction to be void or unenforceable for any reason, the same shall in no way affect (to the maximum extent permissible by law) any other provision of this Agreement, the application of any such provision under circumstances different from those adjudicated by the court, or the validity or enforceability of this Agreement as a whole. The parties further agree to replace any such invalid, illegal or unenforceable portion with a valid and enforceable provision, which will achieve, to the maximum extent legally possible, the economic, business or other purposes of the invalid, illegal or unenforceable portion.

18. **Construction**

Unless otherwise indicated, all paragraph references are to the paragraph of this Agreement and all references to days are to calendar days. Whenever, under the terms

of this Agreement the time for performance of a covenant or condition falls upon a Saturday, Sunday or California state holiday, the time for performance shall be extended to the next business day. The headings used in this Agreement are provided for convenience only and this Agreement shall be interpreted without reference to any headings. Wherever required by the context, the singular shall include the plural and vice versa, and the masculine gender shall include the feminine or neuter genders, or vice versa. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. The language in all parts of this Agreement shall be construed as a whole in accordance with its fair meaning, and shall not be construed against any party solely by virtue of the fact that such party or its counsel was primarily responsible for its preparation.

19. **Governing Law**

19.1 The rights and obligations of the parties and the interpretation and performance of this Agreement shall be governed in all respects by the laws of the State of California.

19.2 Venue for any action arising out of or relating to this Agreement shall be in Kern County, California.

20. **No Third-party Beneficiaries**

Nothing in this Agreement, express or implied, is intended to confer any rights or remedies under or by reason of this Agreement on any person other than the parties to it and their respective permitted successors and assigns, nor is anything in this Agreement intended to relieve or discharge any obligation of any third person to any party hereto or give any third person any right of subrogation or action over or against any party to this Agreement. All Applicants shall continue to be required to comply with all applicable District rules and regulations.

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

21. **Exhibits**

The exhibits attached to this Agreement shall be deemed to be a part of this Agreement and are fully incorporated herein by reference.

22. **Force Majeure**

The time within which any party shall be required to perform under this Agreement shall be extended on a day-per-day basis for each day during which such performance is prevented or delayed by reason of events reasonably outside of the control of the performing party, including, without limitation, acts of God, events of destruction, acts of war, civil insurrection, strikes, shortages, governmental delays, moratoria, civil litigation and the like, and/or delays caused by the non-performing party's act or omission.

IN WITNESS WHEREOF, County and District have executed this Agreement and agree that it shall be effective as of the date first written above.

Validation of Emissions Calculations and Methodology

I. Correction to Stationary Source Equipment Numbers

Two corrections are needed to the projected stationary source equipment numbers provided by Vector Environmental. The first is that the growth factor in the spreadsheet for the stationary source information changed (primarily KR) resulting from the manner in which abandoned wells were accounted for. The growth factor is now smaller than previously identified. The change in growth factor resulted in changes to spreadsheets "SS_EQUIP_EMS_V2.slsx" and "KC_WELL_STATS_BY_ZONE_V2.XLSX".

In addition to this first correction, the spreadsheet, "SS_EQUIP_EMS_V2.slsx", contained an incorrect factor. The factor used in the equation for projecting needed equipment capacity for small producers should have been expressed as a fractional value (0.10). However 10% (integer value) was used to estimate the amount of equipment at buildout. Consequently, emissions from construction activity were significantly overestimated. The values have been revised accordingly.

Revised spreadsheets are included in Appendix A.

II. Correction to Total Project Emissions Calculation

A correction is needed to the total project emissions calculation of the draft EIR. The worksheet used to calculate the total project emissions incorrectly includes the incremental stationary source permitted equipment emissions rather than the stationary source construction emissions.

Specifically, the tab "Totals VERA" includes a table at the bottom "Permitted Emissions". The data in the table "Permitted Emissions" comes from the tab, "Permitted". The "Permitted" tab data that is referenced is not linked to construction emissions. Instead it appears to be pulling the incremental increase in permitted stationary source emissions. These numbers should be adjusted to reference the table "Construction" in the "Permitted" tab.

III. Engine Use Survey Results

To validate the drilling emissions included in the draft EIR, five oil and gas companies of various sizes were surveyed. The survey had two primary objectives: 1) Validate the typical engine equipment set-up utilized for the well drilling portion of the well construction emissions calculations and 2) Validate the engine load factors utilized in the analysis.

Typical Engine Equipment Set-up Validation:

The draft EIR currently has the following equipment configurations listed:

Equipment used for Drilling a 5,000’ well

ENGHP	EQUIPCNT	EQUIPUSE	EQUIPCLASS	Load Factor
230	1	Portable Crane	Construction and Mining	0.288100000
20	5	Port Light stands	Industrial	0.341700000
80	1	Portable Gen. Hydraulic Power	Industrial	0.341700000
100	2	Portable Gen. DSM/Trailers	Industrial	0.341700000
420	1	Portable Gen. Mud Separator	Industrial	0.341700000
135	1	Rotary Table or Top Drive	Oil Drilling	0.502500000
455	1	Diesel Engine For Hoist	Oil Drilling	0.502500000
442	1	Diesel Engine For Hoist	Oil Drilling	0.502500000
424	1	Diesel Engine For Mud Pump	Oil Drilling	0.502500000
1741 hp	Total	Including all engines > 400 hp		

Equipment used for Drilling a 10,000’ well

ENGHP	EQUIPCNT	EQUIPUSE	EQUIPCLASS	Load Factor
230	1	Portable Crane	Construction and Mining	0.288100000
20	5	Port Light stands	Industrial	0.341700000
80	1	Portable Gen. Hydraulic Power	Industrial	0.341700000
100	2	Portable Gen. DSM/Trailers	Industrial	0.341700000
420	1	Portable Gen. Mud Separator	Industrial	0.341700000
144	1	Diesel Electric - Rotary	Oil Drilling	0.502500000
996	1	Diesel Electric - Hoist & Pump	Oil Drilling	0.502500000
981	1	Diesel Electric - Hoist & Pump	Oil Drilling	0.502500000
1145	1	Diesel Electric - Hoist & Pump	Oil Drilling	0.502500000
3,542 hp	Total	Including all engines > 400 hp		

Equipment used for Drilling a 15,000’ well

ENGHP	EQUIPCNT	EQUIPUSE	EQUIPCLASS	Load Factor
230	1	Portable Crane	Construction and Mining	0.288100000
20	5	Port Light stands	Industrial	0.341700000
80	1	Portable Gen. Hydraulic Power	Industrial	0.341700000
100	2	Portable Gen. DSM/Trailers	Industrial	0.341700000
420	1	Portable Gen. Mud Separator	Industrial	0.341700000
158	1	Diesel Electric - Rotary	Oil Drilling	0.502500000
1094	1	Diesel Electric - Hoist	Oil Drilling	0.502500000
962	1	Diesel Electric - Hoist	Oil Drilling	0.502500000
1898	1	Diesel Electric - Hoist	Oil Drilling	0.502500000
4,374	Total	Including all engines > 400 hp		

Survey results for the five companies are consistent in total hp with these typical configurations as follows:

For wells depths 5,000 feet or less, typical drilling rig configuration included main engines at a rated capacity of approximately 1,800 hp with:

- Combination of three (3) of the following engine types:
    - Detroit Diesel Series 60 (525 hp)
    - Detroit Diesel Model 6063MK33 (475 hp)
    - Detroit Diesel Model 6063HK33 (665 hp)
    - Detroit Diesel Model 6063HV33 (665 hp)
    - Detroit Diesel Model 6063HV35 (685 hp)

For well depths greater than 5,000 feet, typical drilling rig configurations included main engines at a rated capacity of approximately 4,400 hp with:

- Three (3) of the following engine types:
    - Caterpillar Model 3512D (1477 hp)
    - Detroit Diesel Model 16V2000 (1354 hp)
    - Detroit Diesel Series 2000 (1495 hp)

The full engine use survey summary and results are included in Appendix B.

Load Factor Validation

Emissions for the engines were quantified in the draft EIR using fleet average emission factors from CARB's 2011 OFFROAD Model. Engines were grouped into three categories: Construction and Mining, Industrial or Oil Drilling as identified in the equipment configurations provided above. The OFFROAD Model relies on the following load factors for these categories:

Construction and Mining	0.288100000
Industrial	0.341700000
Oil Drilling	0.502500000

To validate use of these load factors, the following information was obtained in the engine use survey: rated bhp (to calculate maximum fuel use using EPA Fuel usage conversion AP-42 section 3.4, Table 3.4-1), fuel use, and hours of use. Given this data, the survey results indicate the average load factor for engines used in well drilling ranges from 0.297 – 0.393. Therefore, the Oil Drilling Emission factor was revised to 0.40.

To do this the following steps were taken:

1. The percent of Construction – Well Drilling offroad engine emissions associated with the Oil Drilling category was identified for each well depth. Equipment/emissions used to calculate this percentage was taken from calendar year 2015.
2. Next the percent of wells drilled in each well depth was determined for each year of the project.
3. These two percentages were multiplied together. This provides the portion of wells drilled each year whose Construction-Well Drilling offroad emissions utilized the oil drilling load factor.
4. The conversion from 0.5025 to 0.40 was converted to a percent reduction –
   1-(0.4/0.5025) = 0.20398
5. Multiplying this percent reduction by the previous percentages then provides the overall reduction to Construction – Well Drilling offroad engine emissions for each well depth, each year.

A summary of the emissions reductions associated with lowering the load factor of the Oil Drilling engine category is included below:

Amount of Construction - Well Drilling Emissions Reduced in Changing from 0.5025 to 0.4 Load Factor in tons/year							
Year	NOX	ROG	CO	SOX	PM10	PM25	VERA Fee Reduction Per Well
2015	87.68	4.58	72.69	0.09	3.03	2.79	$1,370.92
2016	83.65	4.38	72.80	0.09	2.85	2.62	$1,329.07
2017	79.18	4.16	72.94	0.09	2.66	2.45	$1,288.43
2018	68.54	3.62	73.01	0.09	2.21	2.04	$1,186.86
2019	63.04	3.36	73.16	0.09	1.99	1.83	$1,035.59
2020	52.87	3.03	73.25	0.09	1.69	1.55	$953.35
2021	50.92	2.94	73.39	0.09	1.57	1.45	$932.47
2022	39.04	2.49	73.57	0.09	1.20	1.10	$839.78
2023	36.11	2.39	73.67	0.09	1.07	0.98	$813.12
2024	32.46	2.30	73.73	0.09	0.95	0.87	$787.28
2025	30.41	2.23	73.82	0.09	0.86	0.79	$770.54
2026	28.48	2.18	73.94	0.09	0.77	0.71	$598.13
2027	27.32	2.16	74.01	0.09	0.71	0.66	$588.13

2034	24.91	2.10	74.79	0.09	0.64	0.59	$570.17
2035	24.95	2.10	74.93	0.09	0.64	0.59	$569.61
						Average:	**$812.12**

III. Emissions Offsets Requirements for Major Stationary Sources

San Joaquin Valley Air Pollution Control District (District) Rule 2201, New and Modified Stationary Source Review Rule (NSR), is applicable, "…to all new stationary sources and all modifications to existing stationary sources which are subject to the District permit requirements and after construction emit or may emit one or more affected pollutant." Section 1.0 of Rule 2201 states, "The purpose of this rule is to provide the following:

1.1 The review of new and modified Stationary Sources of air pollution and to provide mechanisms including emission trade-offs by which Authorities to Construct such sources may be granted, without interfering with the attainment or maintenance of Ambient Air Quality Standards; and

1.2 No net increase in emissions above specified thresholds from new and modified Stationary Sources of all nonattainment pollutants and their precursors.

Section 4.5, Emission Offset Requirements, addresses the rule's emission trade-off mechanism referenced in Section 1.1 above. Section 4.5.3 states:

> Offset requirements shall be triggered on a pollutant-by-pollutant basis. Unless exempted pursuant to Section 4.6, offsets shall be required if the post-project Stationary Source Potential to Emit (SSPE2) equals or exceeds the following offset threshold levels:

Table 4-1, Emissions Offset Threshold Levels

POLLUTANT	SSPE2 (POUNDS /YEAR)
VOC	20,000
NOx	20,000
CO (non-attainment areas)	30,000
CO (attainment areas)	200,000
SOx	54,750
PM10	29,200

Major Sources are defined in Section 3.24 as "for each pollutant, a Stationary Source with post-project emissions or a post-project Stationary Source Potential to Emit (SSPE2), equal to or exceeding one or more of the following threshhold values…"

Table 3-3, Major Source Emission Thresholds

POLLUTANT	THRESHOLD (POUNDS PER YEAR)
VOC	20,000
NOx	20,000
CO	200,000
PM2.5	200,000
PM10	140,000
SOx	140,000

As VOC and NOx Major Source Emission Thresholds (Table 4.1) are equal to those of Emission Offset Threshold levels (Table 3.3), the post-project Stationary Source Potential to Emit (SSPE2) for Major Sources of NOx and/or VOC will exceed offset threshold levels as long as they are a major source for these pollutants. Therefore, Major Sources for VOC and/or NOx will be required to provide offsets for all projects which result in an increase of emissions for either of these pollutants.

Section 4.7, Emission Offset Quantity Calculations, addresses the quantity of offsets that Major Sources of NOx and VOC would be required to provide under this rule. Section 4.7.1 states, "For pollutants with a pre-project Stationary Source Potential to Emit (SSPE1) greater than the emission offset threshold levels, emission offsets shall be provided for:

> 4.7.1.1 All increases in Stationary Source emissions, calculated as the sum of differences between the post-project Potential to Emit (PE2) and the Baseline Emissions (BE) of all new and modified emissions units…"

As Major Sources of NOx and VOC will have SSPE1 values which are greater than the emission offset threshold levels as noted above, all increases in stationary source emissions will need to be offset.

The distance offset ratio requirement for these emissions offsets is described in Section 4.8. Section 4.8 states, "Distance Offset Ratio: For offset calculations, the distance offset ratio shall be as shown below:

> 4.8.1 For NOx and VOC offsets for new major sources and federal major modifications, the distance offset ratio shall be 1.5;"

Pursuant to Section 3.18, of Rule 2201, a federal major modification for NOx and VOC is any increase in emissions from a Major Source of NOx or VOC. However, not every source is a major source for both NOx and VOC. Therefore, the list of O&G Major Sources (Appendix C) was reviewed for those facilities which are a major source for each of the respective pollutants. For NOx, 96% of Oil and Gas Major Source emissions would fall into the category of requiring offsets at a ratio of 1.5. For VOC, 99% of Oil and Gas Major Source emissions would fall into the category of requiring offsets at a ratio of 1.5.

The following table can be used to calculate the amount of emissions that will be mitigated through NSR:

Facility operation						
Year	**NOx**	**ROG**	**CO**	**SO2**	**PM10**	**PM2.5**
2012	1862	4266	2876	394	812	812

VOCDD (Flare)	55,845.47	MMBtu/Hr	85.86	78.25	225.07	24.93	11.94	11.94
Total Emissions Title-v O&G Sources			2,625.04	5,475.26	4,077.92	524.93	1,170.88	1,170.88
Total Emissions Small O&G Sources (+10%)			262.50	547.53	407.79	52.49	117.09	117.09
Total Emissions All O&G SOurces (TPY)			2,887.55	6,022.78	4,485.71	577.42	1,287.97	1,287.97
Total Emissions All O&G SOurces (TPD)			7.89	16.46	12.26	1.58	3.52	3.52

As noted, 96% of future NOx Major Source emissions would fall into the category of requiring offsets at a ratio of 1.5 and 99% of future VOC Major Source emissions would also fall into this category. Therefore, the expected amount of emissions reduction achieved through Title V source offsets was calculated as follows:

1. Total Emissions for Title V O&G sources were reduced to 96% of the calculated emissions for NOx and 99% of the calculated emissions for VOC to account for the % of major sources which would be required to provide offsets at a ratio of 1.5 for these two pollutants.
2. This number was then multiplied by the offset ratios. Offset ratios for NOx and VOC were set at 1.5 and offset ratios for CO, SOx, PM10 and PM2.5 were set to 1.0 (no additional reduction is accounted for CO, SOx, PM10 and PM2.5 emissions as these will vary by project and the offsets supplied).
3. The resulting emissions were then added to the total emissions for small O&G sources (+10% of total emissions for Title V O&G Sources) and the remaining Title V O&G source emissions (remaining 4% of emissions for NOx and remaining 1% of emissions for VOC).

At the conclusion of the draft EIR, the total project emissions were summarized then stationary source emissions were subtracted from this total. Rather than subtracting out the stationary source emissions from the total emissions calculation, the emissions with offsets accounted for, as provided above and summarized below, should be subtracted. This approach accounts for the additional mitigation required of Oil and Gas sources through the District's NSR offset mechanism. The resulting total emissions from all O&G sources which should be accounted for as mitigation are included in the last line of each of the following tables.

Kern County - Baseline Emissions from Stationary Source Equipment						
	NOx (TPY)	**VOC (TPY)**	**CO (TPY)**	**SOx (TPY)**	**PM10 (TPY)**	**PM2.5 (TPY)**
Total Emissions Title-v O&G Sources	1,692.97	3,878.58	2,614.16	358.3599	738.4023	738.4023

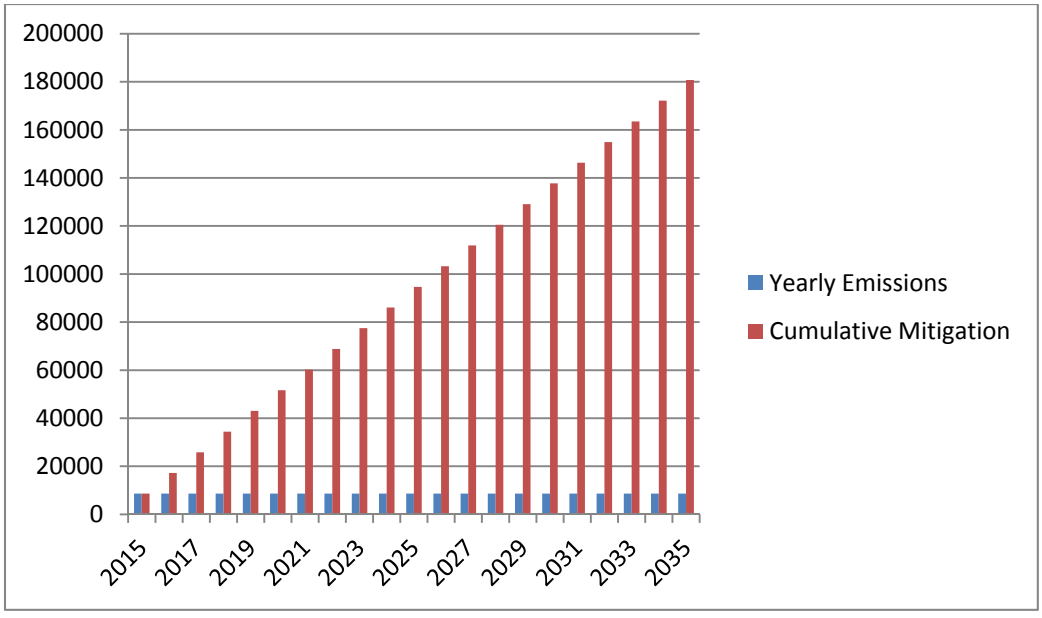
2035	4148	8733	4486	577	1288	1288

Subtracting these emissions from the total project emissions ensures sources are given credit for the existing mitigation required through NSR.

IV. Vera Methodology

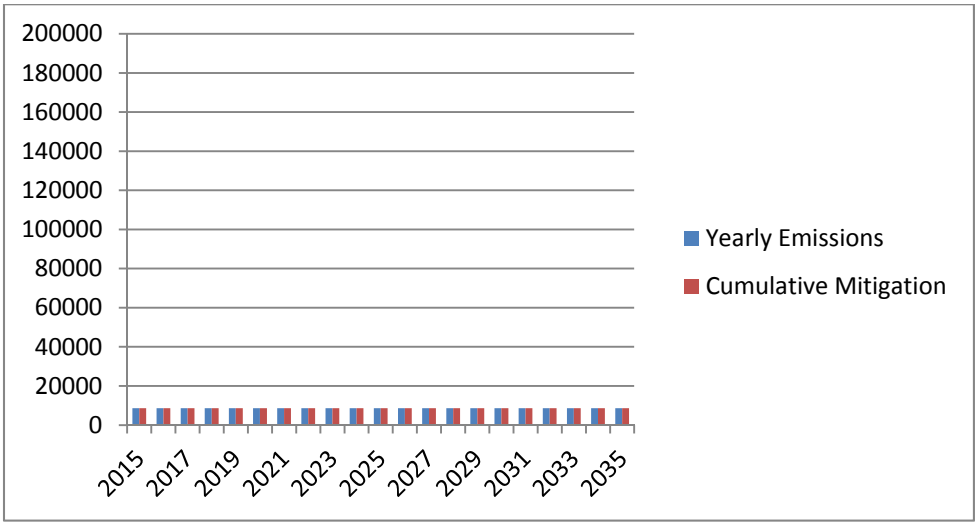


The draft EIR describes the currently proposed VERA. In this proposal it states that each year total yearly emissions from the project will be offset through the VERA. Below is an excerpt of this discussion,

> "The SJVAPCD 2014 Annual Report on the Indirect Source Review Program shows the cost currently as $6,974 per ton to implement projects. Based on this estimated cost, which will be adjusted for depth of well and equipment configuration, the mitigation fee will be range from $18,603 to $8,000, per well plus an administrative cost to the Air District to be determined which is up to 4%. The estimated amount generated every year for in mitigation fees to fund emission reduction projects ranges from $30 million to $14 million (based on an estimate of 1,800 permits year). The total fees collected by the OG-ERA over 21 years (again using the estimate of 1,800 permits per year) will range from $600 million to $280 million."

However, this is not typical of past District VERA agreements. Typically the yearly emissions for the project are quantified (tons/year), and these emissions are then offset through the VERA in a single year.

When the mitigation fee is paid, the District identifies projects which reduce the total project emissions (tons/year). Although the mitigation projects may be conducted in a single year, the mitigation from these projects is on-going and continues to reduce emissions for an indefinite period of time, thus creating a stream of emissions reduction.



For example, an unpaved road which is paved in the first year with a reduction of 1 ton/year, will continue to achieve a reduction of 1 ton/year as long as it is in service. This emissions reduction is indefinite and therefore, the project emissions do not need to be continually mitigated each year. The following chart was created to illustrate the error in the proposed VERA agreement. The blue bars illustrate the average yearly project emissions, while the red bars represent the cumulative mitigation that will be achieved as time progresses through yearly mitigations of the project emissions.

As demonstrated, the proposed VERA significantly over mitigates project emissions. Instead of the above approach, past VERAs signed by the District appear to require mitigation of the project emissions by multiplying the yearly emissions (tons/year) for the project by the cost of mitigation ($/ton). Mitigations are then found which equal these to ensure that project emissions are fully mitigated. For example, using the current values in Table 4.3-32 of the draft report (included below), the average emissions for this project would be 2.36 tons/year - well. Therefore, using past VERA agreements as a template. The VERA agreement would be yearly emissions (tons per year per well x maximum number of wells authorized under the project) x Standard VERA Mitigation Fee (in this example it is $6,974) = total project mitigation. The final result for this O&G EIR would be equal to:

$$\left(2.36\frac{tons}{year-well}x\ 3{,}647\ wells\right)x\frac{\$6{,}974}{ton}=\$60{,}024{,}660\ total\ project\ mitigation$$

The new approach is illustrated below. As demonstrated, all emissions are still fully mitigated.

Examples where the District appears to have applied this type of approach can be found in the following projects:

- The Canyons Development Project brought before the Board on October 25, 2007
- Silver Creek Plaza Project brought before the Board on December 20, 2007
- Tesoro Viejo Specific Plan Development Project brought before the Board on December 20, 2012
- Pillsbury Estates Development Project brought before the Board on April 18, 2013

Governing Board agenda items for these project VERAs are included in Appendix D.

Mitigation Menu

In addition to the above corrections and methodology changes, ANT proposes that a mitigation menu be established. This mitigation menu would provide facilities with the option to reduce the Air Quality ERA per well fee by having the facility identify mitigations they have taken and allowing the facility to claim an ERA reduction associated with those mitigations.

Mitigation Option 1: Engine Replacement

Description of Mitigation

The current ARB model for determining offroad emissions for projects involving Oil and Gas Production has a regulatory reduction built in to the emission factors used to calculate the impact. By using Tier 4 engines and corresponding Tier 4 emission factors, mitigation of the offroad emissions would continue until the compliance deadline of calendar year 2027. Certain fleets would have the deadline extended until the calendar year 2029, which is the limit of the model.

This mitigation option evaluates the effects on project emissions and the emission reduction agreement for facilities which switch out existing engines for tier 4i or tier 4f alternatives. For the emission calculations, the following methodology was used:

- The engines used in the CEQA analysis were separated into 6 engine categories:
    - ≤ 75 hp
    - 75 < hp ≤ 120
    - 120 < to < 175
    - 175 ≤ hp ≤ 250
    - 250 < hp < 750
    - ≥ 750 hp
- The OFFROAD Model engine category used in the technical analysis to estimate emissions for each engine category was identified as follows:

≤ 75 hp	Industrial – Other General Industrial
75 < hp ≤ 120	Industrial – Other General Industrial
120 < hp < 175	Oil Drilling – Drilling Rig
175 ≤ hp ≤ 250	Construction and Mining – Cranes
250 < hp < 750	Oil Drilling – Drilling Rig
≥ 750 hp	Oil Drilling – Drilling Rig

- The percent of engine emissions associated with each of the 6 engine horsepower categories was identified for each well depth. Equipment/emissions used to calculate this percentage was taken from calendar year 2015.

- Next the percent of wells drilled in each well depth was determined for each year of the project.
- These two percentages were multiplied together. This provides the portion of wells drilled each year whose emissions are attributed to that particular engine horsepower category.
- The OFFROAD Model fleet average emissions for each horsepower category was then compared to the tier 4i and tier 4f values to calculate the percent reduction in switching to either a tier 4i or tier 4f engine. Equipment/emissions used to calculate this percentage was taken from calendar year 2015.
- Multiplying this percent reduction by the previous percentages then provides the overall reduction in changing out engines in that horsepower category to either tier 4i or tier 4f for each well depth, each year.

By comparing the Baseline (model output) value with the Tier 4i and Tier 4f emission factors, as described above, allows the percent reductions to be calculated. Summaries of these calculations are provided below for each engine horsepower category.

Post-Mitigation Emissions

The following tables summarize the post-mitigation emissions reductions for given engine sizes and Tier 4i/4f replacements.

Engines ≤ 75 hp:

Summary of Mitigation Menu Option

If all engines within the given horsepower range are replaced with either Tier 4i or 4f alternatives, the facility may claim the following reduction per well. Detailed calculations are provided in Appendix E.

≤ 75 hp	
Tier 4i	**Tier 4f**
$3.22	$5.26
75 < hp ≤ 120	
Tier 4i	**Tier 4f**
$325.78	$472.72
120 < hp < 175	
Tier 4i	**Tier 4f**
$222.47	$312.50
175 ≤ hp ≤ 250	
Tier 4i	**Tier 4f**
$26.69	$31.45

Mitigation Option 2: Carpool/Vanpool

The Draft EIR includes emissions from Routine Business Travel as shown in Table 4.3-26. The data in this table is derived from the Routine Business Travel emissions generated in the Air Quality Study for Petroleum Production Activities prepared by Vector Environmental. A footnote to Table 6.1 in this study notes that emissions for Routine Business Travel assume average vehicle occupancy of 1.35, with 36% of employers required to participate in District Rule 9410 eTRIP programs. The 1.35 average vehicle occupancy, or AVO, originates in the SJVUAPCD Rule 9410 Final Staff Report. This report gives credit to Rule 9410 for increasing AVO from 1.1 to 1.35 for employers with at least 100 employees. The 1.35 AVO factor accounts for the result of all measures used in an eTRIP program including carpools and other alternate transportation methods such as vanpools.

This mitigation option evaluates the effects on project emissions and the emission reduction agreement for facilities which increase carpool/vanpool participation thus increasing their AVO factor. For the emission calculations, the following methodology was used:

- Emissions for Routine Business Travel at the existing AVO of 1.35 were identified
- These emissions were multiplied by 1.35 and then divided by alternative AVO factors in order to calculate the emissions associated with Routine Business Travel at higher AVO factors.

Summaries of these calculations are provided below for each alternative AVO factor.

AVO of 1.5:

Incremental Emissions Reduction at AVO 1.50 (TPY/well)

								Average:	$17.92

Detailed calculations are provided in Appendix F.

Summary of Mitigation Menu Option

Facilities increasing their carpool/vanpool usage in order to reach higher AVO factors may claim the following reductions:

AVO	VERA Fee Reduction
1.50	$3.26
1.75	$7.45
2.00	$10.59
2.25	$13.03
2.50	$14.98
2.75	$16.58
3.00	$17.92

Mitigation Option 3: Road Paving

According to Vector Environmental's draft technical report unpaved road particulate emissions are associated with both operational and construction activities. The report states,

> "Operational activities include two duct generating activities that result in the generation of fugitive on unpaved road dust: routine well inspections and treatment; and of the well maintenance. …
>
> With respect to crude oil and natural gas production wells, construction activity includes 1) the construction of the well; 2) the rework of existing wells; 3) the plugging and abandonment of wells."

This mitigation option evaluates the effects on project emissions and the emission reduction agreement for facilities which pave currently unpaved roads thus decreasing particulate emissions. For the emission calculations, the following methodology was used:

- Particulate emissions for unpaved road use were identified in the following activities:
  - Construction:
    - Abandonment
    - Drilling
    - Well Stimulation
    - Rework
  - Operations:
    - Well Maintenance
    - Routine Operations
    - Facility Inspections
- Total unpaved road particulate emissions, vehicle miles traveled (VMT), and number of wells drilled were identified for each well depth.
- Emissions per VMT-well were determined.
- Emissions per VMT-well associated with paved road travel were calculated.
- Given the same VMT for both the unpaved road and paved road emissions calculation, the reduction in emissions expected on a per well basis due to paving unpaved roads can be calculated.

Detailed calculations are included in Appendix G.

Summary of Mitigation Menu Option

Facilities who pave the unpaved roads associated with a specific well may claim the following reduction for that well:

Year	VERA Reduction Associated with Paving Unpaved Roads	VERA Reduction Expected
2015	0.228647456	$1,594.59
2016	0.24652325	$1,719.25
2017	0.263835922	$1,839.99
2018	0.28077343	$1,958.11
2019	0.297165295	$2,072.43
2020	0.313139726	$2,183.84
2021	0.328546953	$2,291.29
2022	0.343633964	$2,396.50
2023	0.358514986	$2,500.28
2024	0.372914691	$2,600.71
2025	0.387225098	$2,700.51
2026	0.401047842	$2,796.91
2027	0.415401149	$2,897.01
2028	0.42902202	$2,992.00
2029	0.442151266	$3,083.56
2030	0.455399994	$3,175.96
2031	0.468455829	$3,267.01
2032	0.481027445	$3,354.69
2033	0.493842872	$3,444.06
2034	0.506101105	$3,529.55
2035	0.519126503	$3,620.39
	Average:	$2,667.55

Additional Mitigation Options

In addition to the mitigation menu options identified above, ANT proposes to investigate the following mitigation options in the future:

- Advanced emission control technologies for stationary source equipment (i.e. catalysts)
- Rig electrification
- Remote well surveillance systems to reduce inspection travel
- Emissions/ERA broken out by well depth and location

APPENDIX A

KERN COUNTY
OPERATOR WELL DRILLING SURVEY SUMMARY
(2014 data)

The Kern County operator well drilling survey summary was based on drilling equipment, fuel use, drilling times, and drilling depth information for 2014 based upon the following typical drill rig configurations:

For wells depths 5,000 feet or less, typical drilling rig configuration included main engines at a rated capacity of approximately 1,800 hp with:

- Combination of three (3) of the following engine types:
    - Detroit Diesel Series 60 (525 hp)
    - Detroit Diesel Model 6063MK33 (475 hp)
    - Detroit Diesel Model 6063HK33 (665 hp)
    - Detroit Diesel Model 6063HV33 (665 hp)
    - Detroit Diesel Model 6063HV35 (685 hp)

  or

- Combination of two (2) of the following engine types:
    - Detroit Diesel Series 2000 (1495 hp)
    - Detroit Diesel Model 16V2000 (1354 hp)
    - Tognum America Model 16V2000 (1200 hp)

For well depths greater than 5,000 feet, typical drilling rig configuration included main engines at a rated capacity of approximately 4,400 hp with:

- Three (3) of the following engine types:
    - Caterpillar Model 3512D (1477 hp)
    - Detroit Diesel Model 16V2000 (1354 hp)
    - Detroit Diesel Series 2000 (1495 hp)

The summary considered rig data that was documented in a variety of analytical formats by the operators. To optimize submitted data while accomplishing the objectives of the survey, the following actions were taken:

- Data from submitters for engines with rated horsepower of less than 99 hp was <u>not</u> included in the summary.

- Data from a rig configuration that did not align with the typical rig configurations identified above was <u>not</u> included in the summary. Specifically, there was only one instance where a rig identified an additional engine (i.e., four Detroit Diesel engines rather than the typical three Detroit Diesel engines). The fuel use and drilling times for this rig were similar to data submitted for a typical rig configuration, but engine load factors for this rig were obviously much lower (clearly because there was more rated unused capacity on the rig).

- Because the raw data for fuel use and hours was received in varying formats, the de-identified survey summary includes line items that represent fuel use and hours of drilling for either a single engine or for combined engines of identical types on a single rig. For this reason, data may have been entered into the summary reflecting either: (1) the duration of an individual drilling event, or (2) over a reporting month. In several cases, drilling depth was also estimated based on averaging. Despite these complexities, the total fuel use, total drilling times, and placement in drilling depth categories (all key factors in identifying engine load by well depth interval) is a comparable representation that is consistent with the raw data.

- Overall Engine Load Factors for each depth interval has been calculated using the USEPA diesel fuel consumption factor of 0.0511 gal/bhp-hr.

RE: **APPROVE VOLUNTARY EMISSION REDUCTION AGREEMENT WITH CANYONS LLC, TO RECEIVE FUNDS IN THE AMOUNT OF $5,357,000 FOR THE PURPOSE OF MITIGATING AIR QUALITY IMPACTS OF THE PROPOSED "THE CANYONS" DEVELOPMENT PROJECT**

RECOMMENDATION:

1. Approve and authorize the Chair to sign the Voluntary Emissions Reduction Agreement with Canyons LLC.
2. Authorize staff to identify, fund and manage air quality projects that will mitigate the net project criteria pollutant impacts as determined in the approved Air Quality Impact Assessment for the proposed project.

BACKGROUND:

Since 2005, the District has entered into Voluntary Emission Reduction Agreements (VERA) with developers to mitigate the air impacts of their development projects. These agreements benefit air quality by achieving emission reductions in excess of District Rule 9510 (Indirect Source Review) requirements, applicable to development projects. In 2006 – 2007, the District entered into four VERA, which generated $11,829,250 in revenues. Projects funded by the District achieved total emission reductions of 824 tons of NOx, 33.7 tons of PM10 and 95 tons of VOC. The agreement before you today is similar to the previous agreements approved by your Board.

Representatives of Canyons LLC, have approached the District with a request for assistance in mitigating the significant air quality impacts of their development project proposed in the City of Bakersfield. Per the

Agreement, the District will review and identify acceptable air quality impact analysis methods and procedures, and verify and manage consultant provided emission reduction projects or, if those projects prove insufficient, identify and manage other emission reduction projects to fully mitigate the net air quality impacts as identified in a District approved Air Quality Impact Assessment.

The proposed "The Canyons" Development Project entails the development of a mixed-use residential community on approximately 889 acres that includes: 1,380 single-family residential dwellings, 120 condominiums/townhouses; 8 acres of commercial development; a 28.18-acre site for semi-public recreation; a private recreation center; three public parks totaling 17.33 acres; 9 miles of public trails, 2 miles of public bike path; approximately 42 acres of maintained common area and approximately 284 acres of open space.

DISCUSSION:

Consultants for Canyons LLC provided the District with a preliminary Air Quality Impact Assessment (AQIA) of the project's impact on air quality. District staff has not received the final AQIA for review, so the amount of emission reductions is based on the developer's preliminary estimate of emissions. Upon receiving the final AQIA, District staff will verify the correctness of the emissions estimates for the project. The contract contains provisions that if upon completion of staff's review the amount of emission reductions increases or the funding is inadequate to purchase the reductions, District will notify Canyons LLC that additional funds are necessary to achieve full mitigation of the project's emissions. The final AQIA will address criteria pollutant emissions, public health/hazard impacts, carbon monoxide (CO) hotspots impacts, construction impacts, and mitigation.

One of the prerequisites of entering into a Voluntary Emission Reduction Agreement with the District is to include all feasible measures to reduce emissions at the project site. Construction fugitive dust emissions should be mitigated onsite by complying with the requirements specified in the District's Regulation VIII and with the use of cleaner construction equipment when available. Including design features that facilitate and encourage alternate forms of transportation and increase energy efficiency can mitigate operational emissions. Specific onsite operational mitigation features agreed to by Canyons LLC are provided in the contract.

After accounting for the benefit of the onsite mitigation measures, Canyons LLC will provide monies to the District to fund projects that will reduce oxides of nitrogen (NOx), reactive organic gases (ROG) and fine particulate matter (PM10) emissions off-site. Given our experience in administering grants for emission reduction projects, with adequate funding, the District can bring about sufficient emission reductions from existing sources of emissions to fully and permanently mitigate the net air emissions from this development project. The emission reduction projects will permanently reduce emissions, because even

after the useful life of the project has ended, the funded equipment, device or vehicle will be replaced with equipment, devices or vehicles that are as clean or cleaner than the original.

Canyons LLC has not provided the District a list of potential off-site emission reduction projects. The dollar value of this agreement is based on the emissions, as estimated by Canyons LLC, multiplied times the 2008 emission reduction schedule contained in Section 1.7.1 of the Agreement. Per the Agreement, Canyons LLC may propose emission reduction projects, and therefore, actual funds received by the District may be less than estimated. Projects proposed by Canyons LLC will be verified by the District to ensure that reductions are valid and each project will be field inspected by the District prior to and after installation. The District will also perform long term monitoring of the projects to ensure the emissions remain in place during the period of the agreement. Whether Canyons LLC or the District identifies projects, all will be under contract with the District to ensure their enforceability.

The preliminary AQIA prepared for the project provided the following criteria pollutant emission estimates:

ROG	36.11 tons/year
NOx	24.61 tons/year
PM10	13.06 tons/year
Total	73.78 tons/year

As presented in the following table, the District would receive an estimated $5,357,000. This amount includes a four percent (4%) administrative fee to cover the District's costs of administering the program.

Pollutant	Tons	2008 Rate	Amount
ROG	36.11	$65,450	$2,363,400
NOx	24.61	$65,450	$1,610,725
PM10	13.06	$90,110	$1,176,837

Total	$5,150,962
Admin. Fee (4%)	$206,038
Grand Total	$5,357,000

The total funds identified in this item reflect the District's and developer's best estimate, and may increase in the future if it becomes necessary to reduce more emissions due to projects costing more than expected or be reduced if projects are obtained at a lower cost than anticipated.

All funds collected will be used for emission reduction projects that will fully mitigate the net air quality impact of criteria pollutants as identified in the approved assessment from the proposed project. The emission reduction projects will be in place contemporaneous with the development and will provide localized air quality benefits in the vicinity of the project. The District will establish a separate budgetary account for these

mitigation funds, and will provide routine tracking and status reports documenting fund expenditures and the emissions reductions achieved for the development project.

FISCAL IMPACT:

Under the terms of the agreement, Canyons LLC is expected to pay to the District approximately a total of $5,150,962 in mitigation fees and $206,038 in administrative fees for a total of $5,357,000. Canyons LLC shall pay the mitigation fees in sufficient amounts to fully mitigate each phase of the project. Fees must be paid before generating emissions for the respective project phases. The agreement also contains provisions for the District to recover costs for staff time spent and materials used by the District in the administration of this Agreement. The District's 2007-08 Budget contains adequate revenue estimates and appropriations to facilitate the receipt of mitigation funds from Canyons LLC and for expenditure of those funds in accordance with the Voluntary Emission Reduction Agreement.

San Joaquin Valley Air Pollution Control District
Meeting of the Governing Board
Thursday, October 25, 2007

APPROVE VOLUNTARY EMISSION REDUCTION AGREEMENT WITH CANYONS LLC, TO RECEIVE FUNDS IN THE AMOUNT OF $5,357,000 FOR THE PURPOSE OF MITIGATING AIR QUALITY IMPACTS OF THE PROPOSED "THE CANYONS" DEVELOPMENT PROJECT

Attachments:

Attachment A – Canyons LLC – "The Canyons" Air Quality Mitigation Agreement (19 pages)

The above attachment has been included with the agenda packets distributed to members of the Governing Board. It has not been included with other agenda packets. A copy of this document is available for review and/or purchase from the San Joaquin Valley Unified Air Pollution Control District.

VOLUNTARY EMISSION REDUCTION AGREEMENT

This Voluntary Emission Reduction Agreement ("Agreement") is entered into as of _____, 2007 by and between John M. Antongiovanni Trust ("Developer") and the SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, an air pollution control district formed pursuant to California Health and Safety Code section 40150, et seq. ("District").

RECITALS

WHEREAS, Developer is presently seeking governmental approval of land use entitlements ("Entitlements") which will permit the development of Silver Creek Plaza Project located in the City of Bakersfield, California, as more particularly described on Exhibit A attached hereto (the "Project"); and

WHEREAS, the Project incorporates the design features specified on Exhibit B attached hereto ("Emission Reduction Design Features"), in order to significantly reduce the air quality impacts associated with the Project; and

WHEREAS, despite incorporation of the Emission Reduction Design Features, without additional emission reductions, the Project would cause impacts on air quality within the geographical boundaries of the San Joaquin Valley Unified Air Pollution Control District, as depicted on Exhibit C attached hereto (the "District Boundaries"); and

WHEREAS, Developer anticipates that mitigation of impacts on air quality resulting from the Project will be either required as a condition to the approval of Developer's Entitlements, or voluntarily imposed by Developer as a means of reducing such impacts; and

WHEREAS, Developer desires to fully comply with all requirements of the California Environmental Quality Act codified at California Public Resources Code section 21000, et seq. ("CEQA"), including all requirements relating to the mitigation of air quality impacts arising from or in connection with the Project; and

///

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

WHEREAS, District is an air pollution control district formed by the counties of Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus and Tulare, pursuant to California Health and Safety Code section 40150, et seq.; and

WHEREAS, District is responsible for developing and implementing air quality control measures within the District Boundaries, including air quality control measures for stationary sources, transportation sources, and indirect sources; and

WHEREAS, District has determined that with appropriate funding, District can bring about a reduction of emissions from certain projects in types and in sufficient quantities to fully mitigate the net air quality criteria pollutant impacts of the Project as quantified in the Verified Air Quality Assessment (as defined in Section 2.2 below) ("Project's Air Impact"); and

WHEREAS, Developer and District desire to enter into this Agreement in order to develop and implement air quality control measures which will fully mitigate the Project's Air Impact to the extent that the development of such Project will result in no net increase in criteria pollutant emissions over the criteria pollutant emissions which would otherwise exist without the development thereof.

AGREEMENT

NOW THEREFORE, in exchange of the mutual covenants herein contained, Developer and District hereby agree as follows:

1. **Emission Reduction by Developer and District.**

1.1. **Emission Reduction Proposals**. Developer shall identify and propose to District opportunities to reduce emissions to fully mitigate Project's Air Impact, including but not limited to opportunities for removal or retrofitting of stationary, transportation, indirect, and/or mobile pollution source equipment, and/or other opportunities therefore (each, an "**Emission Reduction Proposal**"). Each Emission Reduction Proposal shall be submitted in writing to District, using District approved forms, and shall contain a representation by Developer that the owner/operator of the identified Pollution Source Equipment has expressed interest in entering into a written

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

funding agreement with District in District's then standard form ("**Funding Agreement**") requiring removal or replacement of the identified equipment with new equipment under District's "Heavy Duty Engine Emission Reduction Incentive Program", or another emission reduction program adopted by District ("**District Emission Reduction Program**"). Developer shall submit Emission Reduction Proposals to District in sufficient amounts to fully mitigate emissions from each distinct phase of the project. For each phase of the project, Developer shall submit Emission Reduction Proposals to District no later than application for grading permits for, and before generating emissions from, that phase. Any Emission Reduction Shortfall for a given phase shall be addressed according to Section 1.7.2 of this Agreement.

1.2. **District's Verification of Emission Reduction**. As quickly as practicable upon Developer's submission to District of an Emission Reduction Proposal, District shall determine the types and quantities of permanent reduction in emissions which would be realized by the proposed removal or retrofit and shall advise Developer of such determination in writing ("**Emission Reduction Verification**") thereby verifying that in District's considered opinion the removal or retrofit proposed in the Emission Reduction Proposal would result in permanent emission reduction in the locality of the Project in the types and quantities so determined by District.

1.3. **Emission Reduction Proposal Advance**. Developer shall advance to District, on the date of submittal of each Developer's Emission Reduction Proposal, a monetary sum equal to the total estimated cost (as specified in each Developer's Emission Reduction Proposal), until sufficient advance is received by District to fully mitigate the Project's Air Impact ("**Emission Reduction Proposal Advance**").

1.4. **Funding Agreements**. As soon as practicable after District's receipt of Developer's Emission Reduction Proposal Advance, District shall use diligent efforts to enter into Funding Agreements with the owners and/or operators of the pollution source equipment identified in Developer's Emission Reduction Proposal, thereby providing for the removal and/or retrofit of all of such Pollution Source Equipment, and

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

providing for District's payment (from the Emission Reduction Proposal Advance) to such owner or operator, of an amount equal to the estimated cost of such opportunity, as specified in Developer's Emission Reduction Proposals. District shall use diligent efforts to enter into Funding Agreements with all of the owners or operators identified in Developer's Emission Reduction Proposals within one hundred eighty (180) days following District's receipt of a complete Emission Reduction Proposal and the Emission Reduction Proposal Advance from Developer.

1.5. **Use of Emission Reduction Proposal Advance.** District shall use the Emission Reduction Proposal Advance to meet its monetary obligations under the Funding Agreements that District shall enter into with the owners of the Pollution Source Equipment identified in Developer's Emission Reduction Proposals.

1.6. **Use of Unused Portions of Emission Reduction Proposal Advance.** In the event Developer is unable to submit to District Emission Reduction Proposals providing for emission reduction in the types and quantities necessary to fully mitigate the Project's Air Impact, or in the event District is unable to enter into Funding Agreements with any of the owners or operators identified in Developer's Emission Reduction Proposals, District shall notify Developer in writing of the additional emission reductions needed to fully mitigate the Project's Air Impact, and Developer shall have a reasonable time, not to exceed one hundred eighty (180) days within which to submit to District additional or supplemental Emission Reduction Proposals in order to provide the necessary additional emission reduction.

1.7. **Unused Advance / Emission Reduction Shortfall / Additional Payment.**

1.7.1. **Unused Advance.** If, despite District's diligent efforts to enter into Funding Agreements with all of the owners or operators identified in Developer's Emission Reduction Proposals (and, if applicable, supplemental Emission Reduction Proposals submitted by Developer), District is unable to enter into Funding Agreements sufficient to fully mitigate the Project's Air Impact, then District shall use any unused portion of Developer's Emission Reduction Proposal Advance to fund

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

emission reduction opportunities to mitigate the balance of the Project's Air Impact at District's actual cost of doing so, provided that such actual costs shall not exceed the costs set forth in the following Emission Reduction Cost Schedule:

Emission Reduction Cost Schedule		
Year Paid	NOx or ROG ($/ton)	PM10 ($/ton)
2007	$49,700	$55,940
2008	$65,450	$90,110
Beyond	Prevailing Costs	Prevailing Costs

District is of the considered opinion that the emission reductions listed in the above schedule can be achieved at the corresponding times and costs shown in said schedule. If, at the time of invoicing, the District has not identified Prevailing Costs for post-2008 payments, 2008 costs shall apply.

1.7.2. **Emission Reduction Shortfall/Additional Payment**. In the event the emission reduction brought about by the Funding Agreements entered into between District and the owners or operators identified in Developer's Emission Reduction Proposals (and, if applicable supplemental Emission Reduction Proposals), and that brought about pursuant to Section 1.7.1 above, are not sufficient to fully mitigate the Project's Air Impact ("**Emission Reduction Shortfall**"), then Developer shall be credited for the emission reduction brought about as a result of Funding Agreements entered into between District and the owners or operators identified in Developer's Emission Reduction Proposals and for the emission reduction brought about pursuant to Section 1.7.1 above, and Developer thereafter shall deposit with District, within 30 days of receiving notice of the Emission Reduction Shortfall from District, an additional amount equal to the product of (i) District's cost per ton of emission reduction as shown in the Emission Reduction Cost Schedule set forth in Section 1.7.1 above, multiplied by (ii) the total number of tons of emission reduction necessary to fully mitigate the Project's Air Impact less the total number of tons of emission reduction so credited to Developer. However, in no case shall the amount paid to District and the

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

amount of emission reductions achieved per this agreement be less than the amount that would be paid to District or the amount of emission reductions that would be required for this Project according to District Rule 9510 (Indirect Source Review). To allow verification of equivalency of emission reductions and off-site mitigation fee amounts, according to District Rule 9510, Developer shall submit to District an ISR Air Impact Assessment Application, using District forms, no later than concurrent with the Developer's submission of the air quality assessment, as set forth in Section 2.2.

1.9 **Time of Use**. Any emission reductions brought about by this Agreement prior to the date Developer receives final approval of the Project from all applicable Governmental Authorities shall be credited to the total amount of emission reductions achieved per this agreement.

1.10. **District's Obligation**. The monies paid by Developer under this Agreement shall be used by District to obtain localized emission reductions in the types and quantities necessary to fully mitigate the Project's Air Impact as quantified in the Verified Air Quality Assessment. If necessary, District shall assist Developer in securing emission reductions, consistent with the provisions established in Section 1.7.2.

1.11. **Developer's Obligation**. District acknowledges that, if the Project is not finally approved so that such development is allowed to proceed, Developer has no obligations under this Agreement relative to the respective Project. Developer acknowledges that it must satisfy the terms of this Agreement in order to develop the Project.

2. **CEQA Compliance/Full Mitigation**. For and in exchange of Developer's payment of funds pursuant to Section 1 above, District shall ensure, by way of entering into, funding and enforcing the Funding Agreements in accordance with the provisions of Section 1.4 above, that the Project's Air Impact is fully mitigated, such that the Project, combined with the emission reductions brought about in accordance with Section 1 above, shall result in no net increase in air quality impacts over those air

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

quality impacts which would otherwise exist without the development of such Project. For the purpose of this agreement, full mitigation means the sum of all NOx, ROG, and PM10 emission reductions achieved by the Emission Reductions Proposals equals, or is greater than, the sum of all NOx, ROG, and PM10 emissions increases calculated as the average annual construction and the peak annual area source and mobile source emissions of NOx, ROG, and PM10 less the average annual emissions that have occurred at the project site during the three years prior to release of the Notice of Preparation. In addition to entering into, funding and enforcing the Funding Agreements in accordance with the provisions of Section 1.4 above, District shall do all of the following:

2.1. **District's Verification of Air Assessment Protocol.** Within ten (10) business days following the date of this Agreement, Developer shall submit to District an air assessment protocol prepared by Developer's air quality consultant reflecting the methodology, including air quality impact modeling, to be utilized in the preparation of the air quality assessment for the Project. Within thirty (30) business days following District's receipt of Developer's air assessment protocol, District shall review and comment upon such air assessment protocol, and, after Developer's incorporation of any revisions suggested by District, District shall verify in writing to Developer the correctness of the air assessment protocol which will be utilized in the preparation of the air quality assessment for the Project.

2.2 **District's Verification of Air Quality Assessment**. Following District's Verification of Air Assessment Protocol, Developer shall submit to District an air quality assessment prepared by Developer's air quality consultant assessing the air quality impacts of the Project. District shall use its best efforts to review and comment upon Developer's air quality assessment within thirty (30) days following District's receipt of Developer's complete air quality assessment, and, after Developer's incorporation of any and all revisions suggested by District, District shall verify in writing to Developer the correctness of the air quality assessment to be utilized in connection with the

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

CEQA documents for the Project, including (i) the methodology utilized in the preparation of the CEQA document, (ii) the types and quantities of any net air quality impacts associated with the Project, (iii) the appropriateness of the mitigation measures proposed in the CEQA document, and (iv) any other matters which may pertain to such CEQA document and/or any air quality impacts or air quality mitigation measures referenced therein (the "**Verified Air Quality Assessment**").

2.3. **District's Verification of Administrative Draft Environmental Impact Report**. Upon request by Developer, and submission by Developer to District of any administrative Draft Environmental Impact Report, or other applicable CEQA documents for the Project, District shall review, comment upon and, after incorporation of any and all revisions made by District, verify in writing to Developer the correctness of all portions thereof which pertain to air quality impacts, including, (i) the methodology utilized in the preparation of the CEQA document, (ii) the types and quantities of any net air quality impacts associated with the Project, (iii) the appropriateness of the mitigation measures proposed in the CEQA document, and (iv) any other matters which may pertain to such CEQA document and/or any air quality impacts or air quality mitigation measures referenced therein.

2.4 **District's Acknowledgment Regarding Full Mitigation**. At such time as District is provided an opportunity as a commenting agency to comment upon the Draft Environmental Impact Report and Final Environmental Impact Report for the Project, District shall comment in writing as to the correctness of all portions thereof which pertain to air quality impacts, including (i) the methodology utilized in the preparation of the CEQA document, (ii) the types and quantities of any net air quality impacts associated with the Project, (iii) the appropriateness of the mitigation measures proposed in the CEQA document, and (iv) any other matters which may pertain to such CEQA document and/or any air quality impacts or air quality mitigation measures referenced therein. District shall at all times fully perform its duties and obligations as a commenting agency, and the provisions of this Section 2.4 shall not be

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

interpreted to the contrary. At such time as District has entered into Funding Agreements pursuant to Section 1.4 above and the owners/operators of equipment to be removed and/or replaced under such agreements have removed and replaced such equipment in accordance with the provisions thereof, District shall verify in writing to Developer and to the lead agency that full mitigation of the Project's Air Impact has been achieved, upon successful fulfillment of all Funding Agreements. District shall ensure that the owners/operators of equipment to be removed and/or replaced pursuant to such Funding Agreements perform all obligations to be performed on the part of such parties under said Funding Agreements. District acknowledges that the Verified Air Quality Assessment and its quantification of the Project's Air Impact will be based on the pending applications for development of the Project and that actual approvals may be for a lesser amount of development. District agrees that Developer's obligations under this Agreement shall be based on the amount of development actually approved, and the final quantification of the Project's Air Impact will be revised accordingly.

2.5. **District's Oversight of Air Quality Mitigation Monitoring Plan**. Upon request of the lead agency having jurisdiction over the Project, District shall oversee that portion of the mitigation monitoring plan adopted by the lead agency for the Project which relates to the mitigation brought about by Section 1 of this Agreement. Alternatively, upon request of that lead agency, District shall cooperate with the lead agency in the oversight of that portion of the mitigation monitoring plan adopted by the lead agency for the Project which relates to the mitigation brought about by Section 1 of this Agreement.

2.6. **District's Documentation, Record Keeping and Monitoring**. District shall document, keep adequate records on and monitor the emission reduction brought about as a result of this Agreement, and shall from time to time, upon written request by Developer or by the lead agency for the Project, provide to Developer or to the lead agency written reports verifying that emission reduction has been and/or is being

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

brought about so as to fully mitigate the Project's Air Impact.

3. **Subsequent Litigation, Legislation and/or Administrative Action / Credit to Developer.**

3.1. **Subsequent Litigation.** In the event that despite this Agreement, Developer is required as a result of a final judgment or District Approved Settlement (as defined below) in any subsequent third party litigation, to pay monies in addition to the monies to be paid by Developer pursuant to Section 1 above, then, provided that the project total emissions are the same as quantified in the Verified Air Quality Assessment, District shall acknowledge and credit Developer with mitigation of the air quality impacts of the Project in such types and quantities that Developer can establish, to the reasonable satisfaction of District, will result from Developer's payment of such additional monies, and shall reduce any amounts thereafter payable by Developer under this Agreement by an amount equal to the additional monies so paid by Developer. This requirement shall not apply if the additional monies are required to mitigate emissions that exceed those set forth in the Verified Air Quality Assessment. For purposes of this Section 3.1.1, a "**District Approved Settlement**" shall mean a settlement of a lawsuit filed pursuant to CEQA, the National Environmental Protection Act or other applicable environmental law which (i) provides for Developer's payment of monies in exchange for a dismissal of such lawsuit, (ii) provides for the use of such monies by the petitioner in such lawsuit in such a manner as to mitigate adverse air quality impacts of the Project, and (iii) is approved in writing by District.

3.2. **District Rule 9510.** The performance of Developer's and District's obligations under this Agreement will fully mitigate the Project's Air Impact. Inasmuch as the mitigation provided under this Agreement exceeds the mitigation which would otherwise have been provided under Sections 6.0 and 7.0 of District's Rule 9510, and the Project's mitigated baseline (being zero emissions) is less than the threshold stated in Section 4.3 of said Rule 9510, the Project is exempt from Sections 6.0 and

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

7.0 of District's Rule 9510. Accordingly, no off-site Emission Reduction Fee will be required in connection with the approval or development of the Project. For each individual project developed at the project site requiring a discretionary approval by the lead agency, Developer shall provide District with a map or diagram indicating its location within the area covered by this Agreement.

4. **Term of Agreement**. This Agreement shall be effective upon the date first written above, and shall terminate upon District's meeting its obligation to implement projects that provide necessary emissions reductions to fully mitigate the Project's Air Impact (the "**Term**"). Developer may, at any time by written notice to District, terminate this Agreement, whereupon, (i) District shall acknowledge in writing to the lead agency that Developer has mitigated air quality impacts of the Project to the extent and in the types and quantities brought about by Funding Agreements theretofore funded by Developer's Emission Reduction Proposal Advance (and if applicable pursuant to Section 1.7.1 above), (ii) District shall refund to Developer any unused portion of Developer's Emission Reduction Proposal Advance less any unpaid administrative fees incurred; and (iii) neither Developer nor District shall have any further rights or obligations under this Agreement. Developer acknowledges that in the absence of this Agreement, the project is subject to all applicable provisions of District Rule 9510 (Indirect Source Review).

5. **Payment of Administrative Fees to District**. Developer agrees to pay to District, in order to reimburse District for its general overhead required for the administration of this Agreement, an administrative fee ("***ERIP Fee***") in an amount equal to four percent (4%) of the Emission Reduction Proposal Advance. Such ERIP Fee shall be due and payable upon Developer's delivery of the Emission Reduction Proposal Advance pursuant to Section 1.3 above. In addition to the ERIP Fee, Developer agrees to pay to District, within thirty (30) days following Developer's receipt of District's invoice, administrative fees to reimburse District for staff time spent and materials used by District in the administration of this Agreement, other than that time

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

associated with the ERIP program covered by the ERIP Fee above, including review, verification and preparation of documents, and staff time relating to the performance of District's obligations hereunder, based on a time and materials basis at District's average weighted labor rates.

6. **Representations, Covenants and Warranties.**

6.1. **Developer's Representations, Covenants and Warranties.** Developer represents, covenants and warrants to District, as of the date of this Agreement, and as of the date of Developer's submission to District of any documents contemplated hereunder, as follows:

6.1.1. The undersigned representatives of Developer are duly authorized to execute, deliver and perform this Agreement, and upon Developer's execution and delivery of this Agreement, this Agreement will have been duly authorized by Developer.

6.1.2. Upon execution and delivery of this Agreement by Developer, Developer's obligations under this Agreement shall be legal, valid and binding obligations of Developer, duly enforceable at law and in equity in accordance with the terms and conditions of this Agreement.

6.1.3. There is no lawsuit, legal action, arbitration, legal or administrative proceeding, legislative or quasi-legislative action or claim existing, pending, threatened or anticipated which would render all or any portion of this Agreement invalid, void or unenforceable in accordance with the terms and conditions thereof.

6.1.4. Other than the execution and delivery of this Agreement by the undersigned representatives of Developer, there are no approvals, consents, confirmations, proceedings, or other actions required by Developer or any third party, entity or agency in order to enter into and carry out the terms, conditions and intent of the parties with respect to this Agreement.

6.2. **District's Representations, Covenants and Warranties.** District represents, covenants and warrants to Developer, as of the date of this Agreement,

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

and as of the date of District's delivery to Developer of any documents contemplated hereunder, as follows:

6.2.1. The undersigned representatives of District are duly authorized to execute, deliver and perform this Agreement, and upon District's execution and delivery of this Agreement, this Agreement will have been duly authorized by District.

6.2.2. Upon execution and delivery of this Agreement by District, District's obligations under this Agreement shall be legal, valid and binding obligations of District, duly enforceable at law and in equity in accordance with the terms and conditions of this Agreement.

6.2.3. There is no lawsuit, legal action, arbitration, legal or administrative proceeding, legislative, quasi-legislative or administrative action or claim existing, pending, threatened or anticipated which would render all or any portion of this Agreement invalid, void or unenforceable in accordance with the terms and conditions thereof.

6.2.4. Other than the execution and delivery of this Agreement by the undersigned representatives of District, there are no approvals, consents, confirmations, proceedings, or other actions required by District or any third party, entity or agency in order to enter into and carry out the terms, conditions and intent of the parties with respect to this Agreement.

6.2.5. No lawsuit, legal action, arbitration, legal or administrative proceeding, legislative or quasi-legislative action or claim existing, pending, threatened or anticipated will render invalid, void or unenforceable any right or benefit Developer is to receive under the terms and conditions of this Agreement.

6.2.6. The monies paid by Developer under this Agreement shall be sufficient to ensure that the emission reduction contemplated by this Agreement shall occur, and District shall utilize such monies in such a manner as to ensure that such emission reduction shall occur.

///

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

6.2.7. Upon the approval of this Agreement by the governing board of District, the Air Pollution Control Officer of District, or equivalent representative, or a delegee of such officer, shall have the authority to approve, deliver, verify, enter into, acknowledge and/or accept any communication, notice, notification, verification, agreement and/or other document to be issued or entered into by District under the terms and conditions of this Agreement, without further approval of the governing board of District.

7. **Indemnification**. Developer agrees to indemnify, defend and hold harmless District for, from and in connection with any third party claims, losses and/or liabilities arising from or in connection with District's performance of this Agreement, excluding only such claims, losses and/or liabilities which result from or in connection with District's sole negligence, act or omission.

8. **Inurement**. Developer's rights and obligations under this Agreement, or applicable portions thereof, shall run with the land encompassed by the Project, and shall inure to the benefit of and be binding upon the heirs, successors and assigns of Developer who take title to such lands or applicable portions thereof. Upon Developer's conveyance of all or any portion of the lands encompassed by the Project, the rights and obligations of Developer under this Agreement shall, to the extent applicable to the lands so conveyed, be transferred to the transferee thereof, and Developer shall thereupon be released by District from, all obligations and liabilities so assigned, except for such obligations and liabilities arising prior to such transfer.

9. **Assignment**. Developer shall have the right to assign all or any part of its rights and/or obligations under this Agreement. Upon any such assignment, Developer shall deliver to District a written assignment and assumption agreement specifying the fact and extent of the assignment, the name and address of the assignee, and the assignee's assumption of all obligations of Developer thereby assigned. Developer shall have the right to assign all or any part of its rights and/or obligations under this Agreement to a third party for use in connection with the mitigation of air quality impacts resulting from one or more projects other than the Project, so long as (i) the

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

project is located within the District Boundaries, (ii) the air quality impacts of such project(s) will in fact be mitigated, as verified by District, by the emission reductions brought about by this Agreement, and (iii) the project(s) consist of residential, commercial, industrial and/or mixed use real estate projects which incorporate the Emission Reduction Design Features. Upon any such assignment by Developer, District shall enter into an amendment of this Agreement which acknowledges the assignment and conforms the various provisions of this Agreement as may be required to be conformed in order to provide to the assignee the rights and benefits of this Agreement as if such assignee and its project were the original party and project contemplated in this Agreement.

10. **Recitals Incorporated**. The recitals set forth hereinabove are hereby incorporated into this Agreement and acknowledged, agreed to and adopted by the parties to this Agreement.

11. **Further Assurances**. Developer and District agree to execute and deliver any documents and/or perform any acts which are reasonably necessary in order to carry out the intent of the parties with respect to this Agreement.

12. **No Joint Venture or Partnership**. District and Developer agree that nothing contained in this Agreement or in any document executed in connection with this Agreement shall be construed as making District and Developer joint ventures or partners.

13. **Notices**. Any notices or communications relating to this Agreement shall be given in writing and shall be deemed sufficiently given and served for all purposes when delivered, if (a) in person, (b) by facsimile (with the original delivered by other means set forth in this Section 13), (c) by generally recognized overnight courier or (d) by United States Mail, certified or registered mail, return receipt requested, postage prepaid, to the respective addresses set forth below, or to such other addresses as the parties may designate from time to time by providing written notice of the change to the other party.

DEVELOPER	DISTRICT
John M. Antongiovanni Trust 5254 North Stine Road Bakersfield, CA 93309 Fax: (661) 322-7777 Attn: Gary Uhalt	Seyed Sadredin Executive Director/APCO 1990 E. Gettysburg Avenue Fresno, CA 93726 (559) 230-6000

14. **Entire Agreement**. The terms of this Agreement, together with all attached exhibits, are intended by the parties as the complete and final expression of their agreement with respect to such terms and exhibits and may not be contradicted by evidence of any prior or contemporaneous agreement. This Agreement specifically supersedes any prior written or oral agreements between the parties with respect to the subject matter of this Agreement.

15. **Amendments and Waivers**. No addition to or modification of this Agreement shall be effective unless set forth in writing and signed by the party against whom the addition or modification is sought to be enforced. The party benefited by any condition or obligation may waive the same, but such waiver shall not be enforceable by another party unless made in writing and signed by the waiving party.

16. **Invalidity of Provisions**. If any provision of this Agreement as applied to either party or to any circumstance shall be adjudged by a court of competent jurisdiction to be void or unenforceable for any reason, the same shall in no way affect (to the maximum extent permissible by law) any other provision of this Agreement, the application of any such provision under circumstances different from those adjudicated by the court, or the validity or enforceability of this Agreement as a whole. The parties further agree to replace any such invalid, illegal or unenforceable portion with a valid and enforceable provision, which will achieve, to the maximum extent legally possible, the economic, business or other purposes of the invalid, illegal or unenforceable portion.

17. **Construction**. Unless otherwise indicated, all Section references are to the sections of this Agreement and all references to days are to calendar days.

Whenever, under the terms of this Agreement the time for performance of a covenant or condition falls upon a Saturday, Sunday or California state holiday, the time for performance shall be extended to the next business day. The headings used in this Agreement are provided for convenience only and this Agreement shall be interpreted without reference to any headings. Wherever required by the context, the singular shall include the plural and vice versa, and the masculine gender shall include the feminine or neuter genders, or vice versa. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. The language in all parts of this Agreement shall be construed as a whole in accordance with its fair meaning, and shall not be construed against any party solely by virtue of the fact that such party or its counsel was primarily responsible for its preparation.

18. **Governing Law**. This Agreement shall be governed by the laws of the State of California applicable to contracts made and to be performed in California.

19. **No Third-party Beneficiaries**. Nothing in this Agreement, express or implied, is intended to confer any rights or remedies under or by reason of this Agreement on any person other than the parties to it and their respective permitted successors and assigns, nor is anything in this Agreement intended to relieve or discharge any obligation of any third person to any party hereto or give any third person any right of subrogation or action over or against any party to this Agreement.

20. **Exhibits**. The exhibits attached to this Agreement shall be deemed to be a part of this Agreement and are fully incorporated herein by reference.

21. **Force Majeure**. The time within which any party shall be required to perform under this Agreement shall be extended on a day-per-day basis for each day during which such performance is prevented or delayed by reason of events reasonably outside of the control of the performing party, including, without limitation, acts of God, events of destruction, acts of war, civil insurrection, strikes, shortages, governmental delays, moratoria, civil litigation and the like, and/or delays caused by

the non-performing party's act or omission.

IN WITNESS WHEREOF, Developer and District have executed this Agreement and agree that it shall be effective as of the date first written above.

EXHIBIT A

DESCRIPTION OF THE PROJECT

Silver Creek Plaza is a proposed shopping center to be located at the southwest corner of Panama Lane and Ashe Road within the City of Bakersfield, California. It is more specifically identified as approximately 20 gross acres (17 net acres) of land located at the southwest corner of Panama Lane and Ashe Road within Kern County in Section 28, Township 30 South, Range 27 East, Mount Diablo Base & Meridian. The current land use designation is LR- Low Density Residential and the existing zoning is R-1- Residential one family dwelling. The proposed land use is GC- general commercial with a proposed zone change to C-2/PCD – Commercial/Planned Commercial Development. Silver Creek Plaza will consist of 137,609 square feet of leasable area and shall include a grocery store, freestanding drug store, three outparcels commonly referred to as "pads" and two service shop buildings intended to serve the residents of the trade area with basic "daily needs" products and services. The project design will be of a soft Mediterranean style which will blend harmoniously with the neighboring residential tracts.

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

EXHIBIT B

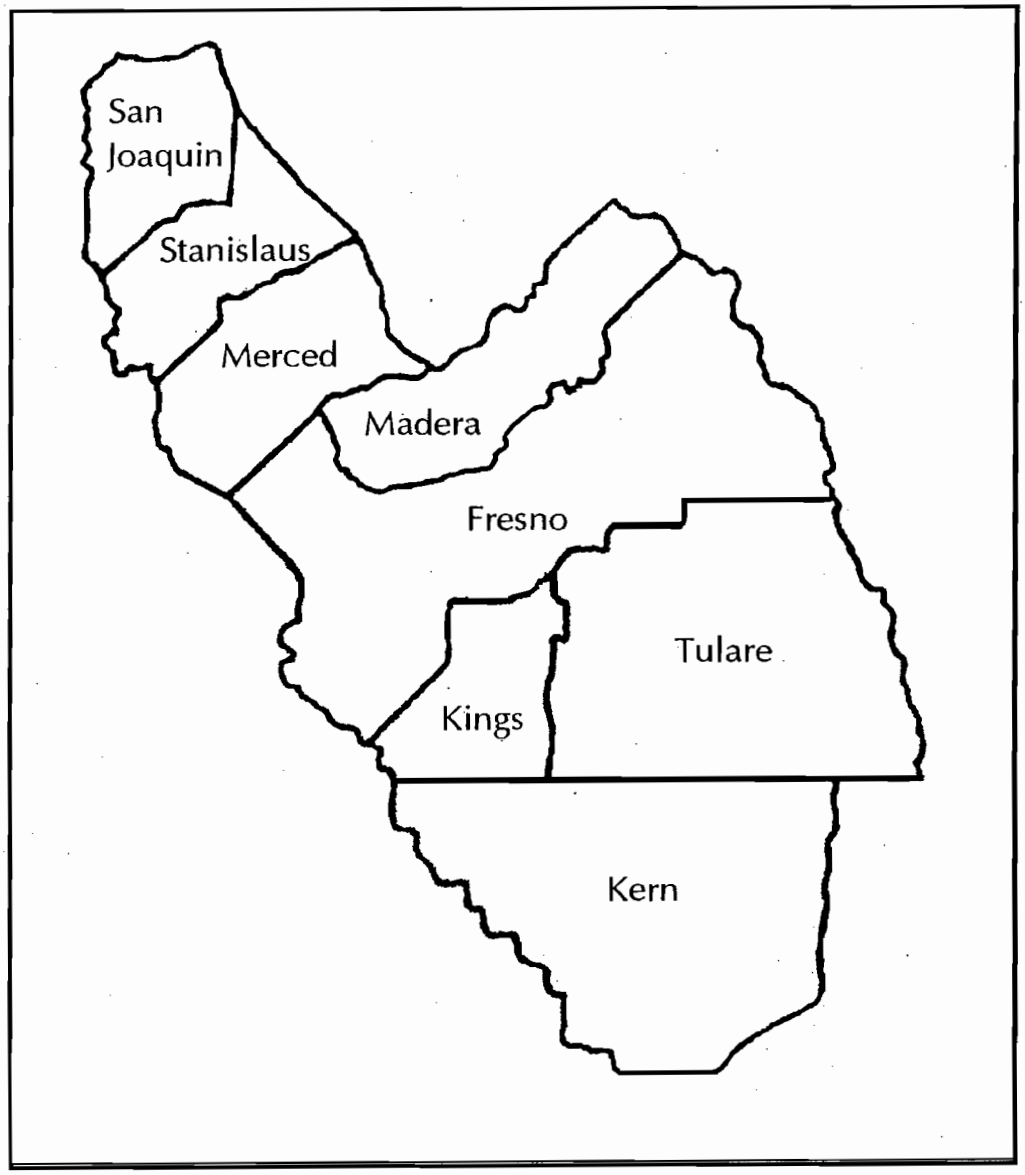
EMISSION REDUCTION DESIGN FEATURES

The project shall incorporate the following Emission Reduction Design Features:

The project will incorporate the following on-site features:

1. Utilization of land use designs which create walkable communities and encourage pedestrian travel.
2. Utilization of interconnecting sidewalks, walking paths and/or bike paths in order to encourage travel by means other than motor vehicle.
3. Utilization of appropriate landscaping to create reasonable shade canopies for streets, parkways and parking areas.
4. Utilization of roadway designs, which enhance pedestrian safety by appropriate signaling, signage and separation from traffic.

Prior to issuance of grading permits for the Project, Developer shall prepare and submit to District dust control plans for the areas to be graded, in accordance with District Regulation VIII. The plan shall be prepared consistent with District Regulation VIII and must be reviewed and approved by the District prior to commencement of grading activities. Each contractor working on the Project site shall implement the dust control measures outlined in the approved dust control plan. The dust control measures selected shall be incorporated as a note on each grading plan.



District maintains New Source Review requirements that direct owners/operators of certain types of stationary equipment to obtain an Authority to Construct ("ATC") and Permits to Operate ("PTO") from the District. As part of this process, the need for emission control equipment is assessed and the District determines whether a Health Risk Assessment ("HRA") must be prepared. Owners/operators of all stationary sources for which such approvals are required should show proof of compliance with District Rules and Regulations prior to issuance of certificates of occupancy.

RE: **APPROVE VOLUNTARY EMISSION REDUCTION AGREEMENT WITH JOHN M. ANTONGIOVANNI TRUST, TO RECEIVE FUNDS IN THE AMOUNT OF $2,497,290 FOR THE PURPOSE OF MITIGATING AIR QUALITY IMPACTS OF THE PROPOSED "SILVER CREEK PLAZA" DEVELOPMENT PROJECT**

RECOMMENDATIONS:

1. Approve and authorize the Chair to sign the Voluntary Emissions Reduction Agreement with John M. Antongiovanni Trust.

2. Authorize staff to identify, fund and manage air quality projects that will mitigate the net project criteria pollutant impacts as determined in the approved Air Quality Impact Assessment for the proposed project.

BACKGROUND:

Since 2005, the District has entered into Voluntary Emission Reduction Agreements (VERA) with developers to mitigate the air impacts of their development projects. These agreements benefit air quality by achieving emission reductions in excess of District Rule 9510 (Indirect Source Review) requirements, applicable to development projects. In 2006-07, the District entered into four VERAs, which generated $11,829,250 in revenues. Projects funded by the District achieved total emission reductions of 824 tons of NOx, 33.7 tons of PM10 and 95 tons of VOC. The agreement before you today is similar to the previous agreements approved by your Board.

Representatives of John M. Antongiovanni Trust, have approached the District with a request for assistance in mitigating the significant air quality impacts of their development project proposed in the City of Bakersfield. Per the Agreement, the District will review and identify acceptable air quality impact analysis methods and procedures, and verify and manage consultant provided emission reduction projects or, if those projects prove insufficient, identify and manage other emission reduction projects to fully mitigate the net air quality impacts as identified in a District approved Air Quality Impact Assessment.

Silver Creek Plaza is a proposed shopping center to be located at the southwest corner of Panama Lane and Ashe Road within the City of Bakersfield, California. It is more specifically identified as approximately 20 gross acres (17 net acres) of land located at the southwest corner of Panama Lane and Ashe Road within Kern County in Section 28, Township 30 South, Range 27 East, Mount Diablo Base & Meridian. The current land use designation is LR- Low Density Residential and the existing zoning is R-1- Residential one family dwelling. The proposed land use is GC- general commercial with a proposed zone change to C-2/PCD – Commercial/Planned Commercial Development. Silver Creek Plaza will consist of 137,609 square feet of leasable area and shall include a grocery store, freestanding drug store, three outparcels commonly referred to as "pads" and two service shop buildings intended to serve the residents of the trade area with basic "daily needs" products and services. The project design will be of a soft Mediterranean style which will blend harmoniously with the neighboring residential tracts.

DISCUSSION:

Consultants for John M. Antongiovanni Trust provided the District with a preliminary Air Quality Impact Assessment (AQIA) of the project's impact on air quality. District staff has not received the final AQIA for review, so the amount of emission reductions is based on the developer's preliminary estimate of emissions. Upon receiving the final AQIA, District staff will verify the correctness of the emissions estimates for the project. The contract contains provisions that if upon completion of staff's review the amount of emission reductions increases or the funding is inadequate to purchase the reductions, District will notify John M. Antongiovanni Trust that additional funds are necessary to achieve full mitigation of the project's emissions. The final AQIA will address criteria pollutant emissions, public health/hazard impacts, carbon monoxide (CO) hotspots impacts, construction impacts, and mitigation.

One of the prerequisites of entering into a Voluntary Emission Reduction Agreement with the District is to include all feasible measures to reduce emissions at the project site. Construction fugitive dust emissions should be mitigated onsite by complying with the requirements specified in the District's Regulation VIII and with the use of cleaner construction equipment when available. Including design features that facilitate and encourage alternate forms of transportation and increase energy efficiency can mitigate

operational emissions. Specific onsite operational mitigation features agreed to by John M. Antongiovanni Trust are provided in the contract.

After accounting for the benefit of the onsite mitigation measures, John M. Antongiovanni Trust will provide monies to the District to fund projects that will reduce oxides of nitrogen (NOx), reactive organic gases (ROG) and fine particulate matter (PM10) emissions off-site. Given our experience in administering grants for emission reduction projects, with adequate funding, the District can bring about sufficient emission reductions from existing sources of emissions to fully and permanently mitigate the net air emissions from this development project. The emission reduction projects will permanently reduce emissions, because even after the useful life of the project has ended, the funded equipment, device or vehicle will be replaced with equipment, devices or vehicles that are as clean or cleaner than the original.

John M. Antongiovanni Trust has not provided the District a list of potential off-site emission reduction projects. The dollar value of this agreement is based on the emissions, as estimated by John M. Antongiovanni Trust, multiplied times the 2008 emission reduction schedule contained in Section 1.7.1 of the Agreement. Per the Agreement, John M. Antongiovanni Trust may propose emission reduction projects, and therefore, actual funds received by the District may be less than estimated. Projects proposed by John M. Antongiovanni Trust will be verified by the District to ensure that reductions are valid and each project will be field inspected by the District prior to and after installation. The District will also perform long term monitoring of the projects to ensure the emissions remain in place during the period of the agreement. Whether John M. Antongiovanni Trust or the District identifies projects, all will be under contract with the District to ensure their enforceability.

The preliminary AQIA prepared for the project provided the following criteria pollutant emission estimates:

ROG	12.31 tons/year
NOx	16.09 tons/year
PM10	6.02 tons/year
Total	34.42 tons/year

As presented below, the District would receive an estimated $2,497,290. This amount includes a four percent (4%) administrative fee to cover the District's costs of administering the program:

Mitigation Fees	$2,401,241
Admin. Fee (4%)	$96,049
Total	$2,497,290

The total funds identified in this item reflect the District's and developer's best estimate, and may increase in the future if it becomes necessary to reduce more emissions due to projects costing more than expected or be reduced if projects are obtained at a lower cost than anticipated.

All funds collected will be used for emission reduction projects that will fully mitigate the net air quality impact of criteria pollutants as identified in the approved assessment from the proposed project. The emission reduction projects will be in place contemporaneous with the development and will provide localized air quality benefits in the vicinity of the project. The District will establish a separate budgetary account for these mitigation funds, and will provide routine tracking and status reports documenting fund expenditures and the emissions reductions achieved for the development project.

FISCAL IMPACT:

Under the terms of the agreement, John M. Antongiovanni Trust is expected to pay to the District approximately a total of $2,401,241 in mitigation fees and $96,049 in administrative fees for a total of $2,497,290. John M. Antongiovanni Trust shall pay the mitigation fees in sufficient amounts to fully mitigate each phase of the project. Fees must be paid before generating emissions for the respective project phases. The agreement also contains provisions for the District to recover costs for staff time spent and materials used by the District in the administration of this Agreement. The District's 2007-08 Budget contains adequate revenue estimates and appropriations to facilitate the receipt of mitigation funds from John M. Antongiovanni Trust and for expenditure of those funds in accordance with the Voluntary Emission Reduction Agreement.

RE: **APPROVE VOLUNTARY EMISSION REDUCTION AGREEMENT WITH TESORO VIEJO, INC. TO RECEIVE AN ESTIMATED $13,901,416 IN FUNDS FOR THE PURPOSE OF MITIGATING AIR QUALITY IMPACTS OF THE PROPOSED "TESORO VIEJO SPECIFIC PLAN" DEVELOPMENT PROJECT**

RECOMMENDATION:

1. Approve and authorize the Chair to sign the Voluntary Emissions Reduction Agreement with Tesoro Viejo, Inc.

2. Authorize staff to identify, fund and manage air quality projects that will mitigate the project's criteria pollutant impacts as determined in the approved Revised Environmental Impact Report and subsequent Air Impact Assessments for the proposed project to a less than significant level.

BACKGROUND:

Since 2005, the District has entered into Voluntary Emission Reduction Agreements (VERA) with developers to mitigate the air impacts of their development projects. These agreements benefit air quality by achieving additional reductions in emissions. The District has entered into 17 VERAs, and to date has received $12,527,994.67 in revenues. Currently, projects funded by the District achieved total emission reductions of 128.31 tons of VOC, 37.10 tons of PM10 and 1,089.20 tons of NOx. The agreement before you today is similar to the previous agreements approved by your Board.

Representatives of Tesoro Viejo, Inc. have approached the District with a request for assistance in mitigating the significant air quality impacts of their development project proposed in Madera County. Per the agreement, the District will review and identify acceptable air quality impact analysis methods and procedures, and verify and manage consultant provided emission reduction projects, or identify and manage other emission reduction projects, to mitigate to a less than significant level the air quality impacts as identified in the Revised Environmental Impact Report (EIR) approved by Madera County and in subsequent District approved Air Impact Assessments.

The Tesoro Viejo project is located in southeastern Madera County, approximately 9 miles north of the City of Fresno and 13 miles east of the City of Madera, on property known locally as the Peck Ranch. The project proposes a mix of residential, commercial, office, retail, and light industrial uses, in addition to open space and recreational uses, schools and other institutional and public uses. The project proposes up to 5,190 residential units and 3 million square feet of commercial, industrial, and other non-residential space. The project will be developed in several phases, with full build-out expected in about 2025.

DISCUSSION:

The County of Madera has approved a Revised EIR for the Tesoro Viejo, Inc. project, which includes an assessment of the project's impact on air quality, addressing criteria pollutant emissions and public health/hazard impacts for both construction and longer-term operational impacts, and mitigation opportunities. The District has also received an application from Tesoro Viejo, Inc., to determine compliance with District Rule 9510, Indirect Source Review. District staff will use these sources of information to quantify emissions of each phase of construction as it is proposed.

One of the prerequisites of entering into a Voluntary Emission Reduction Agreement with the District is to include all feasible measures to reduce emissions at the project site. Fugitive dust emissions from construction activities will be mitigated onsite by complying with the requirements specified in the District's Regulation VIII and with the use of cleaner construction equipment when available. Including design features that facilitate and encourage alternate forms of transportation and increase energy efficiency can mitigate operational emissions. Specific onsite operational mitigation features agreed to by Tesoro Viejo, Inc. are provided in the contract, and are extensive.

After accounting for the benefit of the onsite mitigation measures, Tesoro Viejo, Inc. will provide monies to the District to fund projects that will reduce oxides of nitrogen (NOx), reactive organic gases (ROG), and fine particulate matter (PM10) emissions off-site to a less than significant level. Tesoro Viejo has committed to mitigating each of these three pollutants to the District's thresholds of significance (10 tons per year for NOx and ROG and 15 tons per year of PM10), but the VERA also allows Tesoro Viejo to mitigate to a

net zero emissions level, at their option. Given our experience in administering grants for emission reduction projects, with adequate funding, the District can bring about sufficient emission reductions from existing sources of emissions to permanently mitigate the air emissions from this development project. The emission reduction projects will permanently reduce emissions, because even after the useful life of the project has ended, the funded equipment, device or vehicle will be replaced with equipment, devices or vehicles that are as clean or cleaner than the original.

Tesoro Viejo, Inc. has not provided the District a list of potential off-site emission reduction projects, although they have the option to do so at a later date under this agreement. In addition, District-identified projects are generally more cost-effective than this schedule, and therefore, actual funds received by the District may be less than estimated. Projects proposed by Tesoro Viejo, Inc. will be verified by the District to ensure that reductions are valid and each project will be field inspected by the District prior to and after installation. The District will also perform long term monitoring of the projects to ensure the emissions remain in place during the period of the agreement. Whether Tesoro Viejo, Inc. or the District identifies projects, all will be under contract with the District to ensure their enforceability.

The dollar value of this agreement is based on the emissions, as estimated in the Revised EIR certified by Madera County, multiplied by the emission reduction schedule contained in Section 2.3 of the agreement. The actual amount paid will be based on emissions remaining after considering all on-site design features and project-related mitigation measures consistent with the procedures and calculations used to demonstrate compliance with Rule 9510 and CEQA.

The Revised EIR prepared for the project provided the following criteria pollutant emission estimates:

ROG	117.9	tons/year
NOx	39.9	tons/year
PM10	56.1	tons/year
Total	213.9	tons/year

As presented below, the District would receive an estimated $13,901,416 to mitigate these emissions to a less than significant level. This amount includes a four percent (4%) administrative fee to cover the District's costs of administering the program:

Mitigation Fees	$	13,366,746
Admin. Fee (4%)	$	534,670
Total	$	13,901,416

The total funds identified in this memo reflect the District's best estimate, and may increase in the future if it becomes necessary to reduce more emissions or if projects are more expensive than anticipated, or may be reduced due to the implementation additional enforceable mitigations or if projects are obtained at a lower cost than anticipated in the VERA fee schedule. It should be noted that, thus far, the District has been able to fund projects that are significantly more cost effective than this estimate.

All funds collected will be used for emission reduction projects that will mitigate the air quality impact of criteria pollutants to a less than significant level as identified in the approved assessment from the proposed project. The emission reduction projects will be in place contemporaneously with the development and will directly provide air quality benefits in the San Joaquin Valley, with priority placed on projects within Madera County. The District will establish a separate budgetary account for these mitigation funds, and will provide routine tracking and status reports documenting fund expenditures and the emissions reductions achieved for the development project.

Finally, upon completion of the mitigation, the District will verify in writing to Tesoro Viejo and the County of Madera the extent of mitigation supplied, and will continue to enforce the contracts related to the emissions reduction projects to assure that the mitigation is permanent.

FISCAL IMPACT:

Under the terms of the agreement, Tesoro Viejo, Inc. is expected to pay to the District an estimated $13,366,746 in mitigation fees and $534,670 in administrative fees for a total of $13,901,416, in phases corresponding to construction phases starting in the year 2013 or later. Tesoro Viejo, Inc. shall pay the mitigation fees in sufficient amounts to mitigate each phase of the project. Fees must be paid at least six months before generating emissions for the respective project phases. District's Budget will be adjusted accordingly to facilitate the receipt of mitigation funds and for expenditure of those funds in accordance with the Voluntary Emission Reduction Agreement.

San Joaquin Valley Unified Air Pollution Control District
Meeting of the Governing Board
December 20, 2012

APPROVE VOLUNTARY EMISSION REDUCTION AGREEMENT WITH TESORO VIEJO, INC. TO RECEIVE AN ESTIMATED $13,901,416 IN FUNDS FOR THE PURPOSE OF MITIGATING AIR QUALITY IMPACTS OF THE PROPOSED "TESORO VIEJO SPECIFIC PLAN" DEVELOPMENT PROJECT

Attachment:

TESORO VIEJO, INC.
VOLUNTARY EMISSION REDUCTION AGREEMENT
(34 PAGES)

VOLUNTARY EMISSION REDUCTION AGREEMENT 20100115

This Voluntary Emission Reduction Agreement ("Agreement") is entered into as of December __, 2012 by and between Tesoro Viejo, Inc. ("Developer") and the SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, an air pollution control district formed pursuant to California Health and Safety Code section 40150, et seq. ("District").

RECITALS

WHEREAS, the County of Madera previously approved a Project known as the Tesoro Viejo Specific Plan, as more particularly described on Exhibit A attached hereto (the "Project") in 2008 and whereas certain court decisions required revisions to the previously certified Environmental Impact Report ("2008 EIR") and rescission and subsequent reconsideration of Project approvals; and

WHEREAS, such court decisions did not require any reconsideration of air quality impacts in the 2008 EIR except to the extent required by reason of other required revisions; and

WHEREAS, the 2008 EIR demonstrated that the Project would satisfy the requirements of District's Indirect Source Rule 9510 ("Rule 9510) with respect to reduction thresholds ("Reduction Thresholds") for NOx and PM10 emissions by a combination of design features incorporated into the Project, as recited in the 2008 EIR and specified on Exhibit B attached hereto and incorporated herein ("Emission Reduction Design Features") and payment of fees to the District pursuant to Rule 9510 to be used by District to accomplish offsetting reductions in such emissions; and

WHEREAS, the 2008 EIR found that the Project would still have significant and unavoidable Project and cumulative impacts by reason of exceeding the District's adopted thresholds for operational emissions of 10 tons each for individual projects for NOx and ROG emissions("Operational Thresholds") at buildout and would therefore

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

have significant and unavoidable impacts as also found for prospective development for the Rio Mesa Area Plan; and

WHEREAS, the County made corresponding findings pursuant to its role as lead agency for the Project under the California Environmental Quality Act ("CEQA"); and

WHEREAS, the County has now prepared a Final Revised EIR ("Final REIR") in response to court requirements which did not require changes in the air quality analysis and therefore identifies the same operational air quality impacts at Project buildout as those previously shown and results in the same findings regarding significant and unavoidable impacts under CEQA as before and the County has made corresponding findings under CEQA; and

WHEREAS, Developer has volunteered additional emission reductions beyond those required for compliance with District's Rule 9510 pursuant to its Development Agreement with the County and a corresponding condition of approval to which reference is made in the REIR to be achieved pursuant to this Agreement (or by the County and Developer seeking to achieve the equivalent by alternative means) as hereinafter described; and

WHEREAS, Developer proposes to reduce and/or offset emissions to be no greater than the District's adopted Operational Thresholds and the District's proposed PM 10 threshold of 15 tons (which proposed threshold is also included in the term "Operational Thresholds" as used hereinafter); or, if determined by Developer to be feasible and involving no substantially greater cost and therefore elected by Developer, to involve reductions or offsets in the sum of all emissions of NOx, ROG and PM10to net zero impacts (which the District refers to as the "net zero level"), thereby achieving less than significant impacts on air quality despite the finding of same in the Final REIR, all as verified by the District as more particularly described below, such reductions and offsets being referred to hereinafter as "Reduction of Project Related Impacts on Air Quality to Less than Significant Levels"; and

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

WHEREAS, notwithstanding the lack of any obligation to revisit the issue of the significance of air quality impacts in the REIR, Developer has offered to County and now to District to enter into this Agreement so as to seek to reduce such operational impacts to less than significant levels, as well as achieving compliance with the Indirect Source Rule 9510 ("Rule 9510"), and County has accepted such offer pursuant to both a Development Agreement (the "Development Agreement") and a corresponding condition of approval to the Project to which the Developer has voluntarily assented and, subject to the District's approval of this Agreement or implementation of an alternative enforceable agreement between the Developer and County with the objective of achieving the same results by identification and incorporation into the Project or funding by Developer of projects which will satisfy the offset requirements as well as by on-site and other Project-related measures as have been and may be further identified to be available and selected by Developer and determined effective as additions to Emission Reduction Design Features already incorporated into the Project and recognized in the Final REIR; and

WHEREAS, the County has now reapproved the Project with no substantial changes and the Project incorporates the same Emission Reduction Design Features as well as a contractual commitment and volunteered condition of approval to implement additional emission reduction measures through a combination of additional on-site measures, direct Project-related measures and indirect measures involving offsetting existing emissions within Madera County (and within the District's boundaries as depicted on Exhibit C attached hereto and incorporated herein (the "District Boundaries") if insufficient sources exist in Madera County) by direct funding or by payment of fees to District to fund offsetting projects through this Agreement, as recited in the Final REIR, in order to reduce the air quality impacts associated with the Project both as required by Rule 9510 and to achieve a Reduction of Project Related Impacts on Air Quality to Less than Significant Levels; and

WHEREAS, Developer desires to enter into this Agreement in order to fulfill its

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

obligations pursuant to condition of the County's Project approval and its contractual obligations under the Development Agreement; and

WHEREAS, District is responsible for developing and implementing air quality control measures within the District Boundaries, including air quality control measures for stationary sources, transportation sources, and indirect sources; and

WHEREAS, District has determined that with appropriate funding, District can achieve Reduction of Project Related Impacts on Air Quality to Less than Significant Levels through projects in types and in sufficient quantities to offset the net air quality criteria pollutant impacts of the Project not achieved by Emission Reduction Design Features or other on-site or Project-related measures available to Developer (which when identified and found to cause emission reductions shall also be deemed Emission Reduction Design Features as referred to hereinafter); and

WHEREAS, Developer and District desire to enter into this Agreement in order to develop and implement air quality control measures which will reduce Project impacts to or below the Operational Thresholds in order to achieve Reduction of Project Related Impacts on Air Quality to Less than Significant Levels.

AGREEMENT

NOW THEREFORE, in exchange of the mutual covenants herein contained, Developer and District hereby agree as follows:

1. **Reduction of Project Related Impacts on Air Quality to Less than Significant Levels**

Project related impacts shall be offset and therefore reduced, to the extent not mitigated by Emission Reduction Design Features (as heretofore defined) by achieving surplus, quantifiable and enforceable reductions of ROG, NOx, and PM_{10} from Project operational emissions ("Emission Reductions") equal to Reduction of Project Related Impacts on Air Quality to Less than Significant Levels. The determination of whether proposed Emission Reductions are surplus shall be performed by the District through

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

its Strategy and Incentives Department. To quantify and achieve the Emission Reductions provided for in this Agreement for the Project, each tentative subdivision map application (or commercial site plan application if not preceded by a tentative subdivision map application), (or combinations of the same if processed at the same time) submitted by the Developer to County to implement the Project shall comprise a separate and distinct Project Phase ("Project Phase"). Subject to adjustments and qualifications as hereinafter provided, a portion ("Project Phase Impact") of the Project's forecasted total operational emissions of NOx, ROG and PM10 (" Project Impact") will be allocated to each Project Phase and quantified as a Project Phase Impact in accordance with the share of total Project development that is included in that Project Phase. For the initial Project Phases, until 400 dwelling unit equivalents are reached and additional measurements of Project-generated traffic are available for use, the Project Phase Impact shall be quantified based on proportionality to the Project Impact as shown in the Final REIR unless a greater or lesser impact is shown to be required for compliance with Rule 9510 in which case the Project Phase Impact shall be deemed to equal that required to comply with Rule 9510. In the case of subsequent Project Phases, adjustments shall be made to the proportion otherwise determined based on the Final REIR as are shown to be justified by those measurements of Project-generated traffic (and associated trip lengths reasonably predicted by market analysis, survey or other analytical technique approved by the District for use in air quality modeling for Rule 9510 compliance) measured to be entering and leaving the Project required to be conducted pursuant to the Development Agreement. As in the case of air quality modeling for Rule 9510 compliance performed for Project Phases, credit shall be allowed for planned land uses, infrastructure, and design standards included in the Tesoro Viejo Specific Plan. The Project Impact and associated Project Phase Impacts will be subject to further adjustment if: (1) the County or Developer approves a revised air quality impact assessment, demonstrating that the Project or Project Phase related air quality

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

impacts are different than originally quantified; or (2) the County adopts and/or certifies a new supplemental environmental assessment demonstrating that the Project or Project Phase related impacts are different than originally quantified; (3) Developer changes the size of Project or changes its attributes in a manner which would change Project emissions and surrenders the associated entitlements or (4) District determines on its own that by reason of the nature of the Project Phase and/or Emission Reduction Design Features incorporated therein, its impacts will be different than otherwise anticipated based on forecasts for the entire Project contained in the Final REIR.

Developer may mitigate the Project Impact and any Project Phase Impact by any combination of the following: 1) providing District with off-site Emission Reduction proposals and sufficient funds or security to execute the proposals, 2) paying Air Quality Mitigation Fees to the District which the District shall apply to off-site Emission Reductions, or 3) binding itself to implement additional Emission Reduction Design Features or Emission Reduction proposals related to the Project (such as off-site transit services) and such Emission Reduction proposals are made subject to District monitoring equivalent to that provided for other Emission Reduction proposals or Developer provides security deemed adequate by the District to assure fulfillment of such obligations. Developer may mitigate all Project Impact at one time, or Developer may mitigate Project Phase Impact by Project Phase. For the purpose of this agreement, a Project Phase is any subset of the total Project which would result in operational emissions as hereinbefore defined and which is approved by the County, with the exception of stationary and area-wide source emissions subject to District permit that are mitigated through compliance with Rule 2201 – New and Modified Stationary Source Review. If Developer mitigates all Project Impact at once, Developer shall comply with Rule 9510 with respect to the entire Project and provide District with sufficient Emission Reductions proposals and/or Emission Reduction Design Features to fully achieve the Reduction of Project Related Impacts on Air

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

Quality to Less than Significant Levels no later than six months prior to generating Project operational emissions. If Developer mitigates Project Impact in Project Phases, Developer must provide District with sufficient mitigation measures to mitigate each Project Phase before generating emissions in such Project Phase consistent with the Emission Reductions for the Project as a whole provided for by this Agreement. If Developer mitigates Project Impact by Project Phase, Developer must submit to the District an Air Impact Assessment (AIA) Application for each project phase under the timelines set forth in Rule 9510. The Emission Reductions for the Project Phase shall be proportional to those required for the Project as a whole as indicated in the Final REIR for the uses involved in such Project Phase unless evidence demonstrates that the Emission Reductions for such Project Phase should be altered consistent with the requirements of this Agreement set forth above with respect to subsequent assessments or reductions in Project size or other characteristics giving rise to operational emissions. Developer agrees to Emission Reductions for each Project Phase necessary to reduce emissions to the Operational Thresholds or better for all Project Phases or with the extent of mitigation required in any subsequent air quality impact assessment certified or approved by the County. If at any time Developer, having commenced Emission Reductions based on Project Phases, chooses to fund Emission Reductions for future Project Phases or the Project as a whole, Developer may do so without losing its right to proceed to fund Emission Reductions for phases with respect to subsequent Project Phases. District shall credit Developer for all Emission Reductions brought about by this Agreement, including any Emission Reductions District achieves prior to the date Developer receives final approval of the Project from all applicable governmental authorities other than the County which has already granted approval.

2. **Priority for Location and Character of Emission Reduction Proposals**

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

2.1 **Priority for Emission Reduction Proposals in Madera County**

In accordance with the agreement between County and Developer, priority shall be given for Emission Reduction Proposals proposed and funded by Developer or proposed and funded by District from fees paid by Developer to District shall be within Madera County and directed to assist in reducing emissions generated by agricultural activities within Madera County, by Madera County businesses and by the County itself, to the maximum extent feasible and consistent with principles of maximum cost-effectiveness, District agrees to consult with County on the same.

2.2. **Emission Reduction Proposals submitted by Developer**

Developer shall submit complete Emission Reduction proposals to District on District's approved application forms. Each Emission Reduction proposal shall contain the following: (1) an estimate of Emission Reductions to be achieved; (2) an estimated funding cost; and (3) a representation by Developer that the owner/operator (if other than Developer) of the identified emission reduction proposal (whether equipment, service, materials or technologies) has expressed interest in entering into a written Funding Agreement with the District. Representation is in the form of a signed and complete District emission reduction project application(s).

On the date of submittal of each Emission Reduction Proposal which does not involve Emission Reduction Proposals to be carried out by Developer itself, Developer shall advance to District a monetary sum equal to the total estimated cost specified in the Emission Reduction Proposal ("Emission Reduction Proposal Advance") plus an administrative fee of four (4) percent. District shall use such Emission Reduction Proposal Advance(s) to execute Funding Agreements, as set forth in Paragraph 3 (Funding Agreements). In the case of Emission Reduction Proposals to be carried out by Developer itself, Developer shall provide adequate security to assure that such proposals are implemented and/or Developer's activities shall be subject to periodic monitoring by District to ensure that measures continue to be carried out.

2.3. **Emission Reduction Proposals initiated by the District.**

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

Developer may request in writing for District to identify Emission Reduction proposals on behalf of Developer for the Project or any Project Phase. On the date of the request, Developer shall advance to District a monetary sum equal to District's estimated cost per ton, as set forth in Table 1 ("Emission Reduction Cost Schedule") multiplied times the number of tons of emission reductions to be achieved ("Air Quality Mitigation Fee"), plus an administrative fee of four (4) percent. District will identify Emission Reduction Proposals from District's Strategy and Incentives Department and use said Air Quality Mitigation Fees to achieve emission reductions on behalf of Developer. The future cost of reductions is uncertain due to yet to be adopted regulations on emission sources used for Emission Reduction proposals, future technological advancements and market conditions. In the event that adjustments to the Emission Reductions are required, the analysis shall be conducted in accordance with modeling assumptions acceptable for use in compliance with Rule 9510, including credit for land uses, design standards and infrastructure provided for in the Tesoro Viejo Specific Plan as previously indicated. The District commits to endeavor to identify projects at the least cost possible to achieve the Emission Reductions required. .

Table 1 Emission Reduction Cost Schedule

Pollutant	Fee Rate $/ton
NOx or ROG	$70,125
PM10	$90,110

3. **Funding Agreements**

Upon Developer's submission to District of each Emission Reduction Proposal Advance or Air Quality Mitigation Fee, District shall (1) shall use diligent efforts to enter into Funding Agreements with the owners and/or operators of the pollution source equipment as identified in the Emission Reduction Proposals, within one hundred eighty (180) days of receiving funding; (2) determine the types and quantities of permanent reduction in emissions which would be realized by the Emission Reduction Proposals; (3) shall perform the determination of surplus emission reductions of ROG,

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

NOx, and PM10 or combined reductions of all three; and (4) shall advise Developer of such determination in writing.

District shall notify Developer or designee in writing of Funding Agreements entered into by the District. In the event District is unable to achieve the required reductions District shall provide Developer a written statement of the amount of reductions that have been achieved. Developer shall have a reasonable time, not to exceed ninety (90) days, within which to submit to District additional Emission Reduction Proposal(s); or provide District additional Air Quality Mitigation Fee(s).

4. **Unused Emission Reduction Proposal Advance**

If District is unable to enter into Funding Agreements with owners or operators identified in Developer's Emission Reduction Proposals, or if requested by Developer in writing, District may use any unused portion of Developer's Emission Reduction Proposal Advance to fund Emission Reduction Proposals per Paragraph 2.2 (Emission Reduction Proposals initiated by the District).

5. **Excess Emission Reductions**

Developer shall be credited with all Emission Reductions achieved by District through this Agreement that exceed the amount of required Emission Reductions for the Project as a whole ("Excess Emission Reduction"). Developer shall have two years from the date the reductions are identified as an Excess Emission Reduction, with the ability to extend an additional two years based on economic conditions, to transfer the Excess Emission Reduction, if determined by District to be surplus at the time of transfer, to another development project owned by Developer within the San Joaquin Valley Air Basin or to a development project owned by another developer within the District or to obtain a refund as provided below. Developer must provide District written request for such transfer or refund.

6. **Refunds**

Upon verification by District that Project or Project Phase related impacts have been fully mitigated District shall refund Developer any unused Emission Reduction

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

Proposal Advance or Air Quality Mitigation Fee related to the Project or a Project Phase. District shall have reasonable time, not to exceed sixty (60) days to refund Developer after a request therefor.

7. **District Rule 9510 (Indirect Source Review)**

Developer acknowledges that except as provided for in this Agreement, Developer is subject to all applicable provisions of Rule 9510 that are in effect at the time of submitting or amending an Air Impact Assessment Application in accordance with Paragraph 7.1. District acknowledges that to the extent that Emission Reductions provided under this Agreement equals or exceeds Emission Reductions that would otherwise be achieved through compliance with Sections 6.0 and 7.0 of Rule 9510, Developer shall be considered to be in compliance with Sections 6.0 and 7.0 of Rule 9510.

7.1 **Rule 9510 Equivalency**

District acknowledges that Developer has submitted an initial Air Impact Assessment Application under Rule 9510 for the Project. Developer shall submit to District an amendment to the Air Impact Assessment Application for each Project Phase that is subject to a further discretionary approval by the County as required by Rule 9510 or, as required by the Project's approvals, including the Development Agreement, if imposing stricter requirements than Rule 9510. Developer shall submit each amendment to the Air Impact Assessment Application consistent with Rule 9510 requirements. Upon receipt of each amendment to the Air Impact Assessment Application, the District shall calculate the amount of Emission Reductions required pursuant to Rule 9510 and verify equivalency of Emission Reductions achieved under this Agreement in accordance with the same analytical procedures utilized to calculate Emission Reductions to achieve Reduction of Project Related Impacts on Air Quality to Less than Significant Levels.

8. **Compliance with Any Subsequent CEQA Requirements**

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

Upon request by Developer, and submission to District of any supplemental or subsequent CEQA document for the Project or Project Phase required by the County which analyzes the Project's impacts on air quality, District shall use the results for purposes of applying the requirements of this Agreement to subsequent Project Phases affected thereby. District reserves its right to perform and shall fully perform its duties and obligations as a commenting agency when provided opportunity to comment upon any supplemental or subsequent CEQA document for the Project or a Project Phase.

9 District's Obligation

9.1 Acknowledgement Regarding Extent of Mitigation

Upon successful fulfillment of all Emission Reductions identified pursuant to this Agreement to achieve Reduction of Project Related Impacts on Air Quality to Less than Significant Levels for the Project as a whole or for a Project Phase, District shall verify in writing to Developer and to the County that the Project or Project Phase related impacts on air quality have been so reduced.

///

///

9.2 Oversight of Funding Agreements

District shall ensure that the owners/operators of equipment, services, materials or technologies subject to Funding Agreements perform all obligations to be performed on the part of such parties under said Funding Agreements.

9.3 Oversight of Air Quality Mitigation Monitoring Plan

Upon request of the County, District shall oversee that portion of the mitigation monitoring plan adopted for the Project. Alternatively, upon request of the County, District shall cooperate with County in the oversight of that portion of the mitigation monitoring plan adopted for the Project which relates to the mitigation brought about by Paragraph 1 of this Agreement.

9.4 Documentation, Record Keeping and Monitoring

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

District shall document, keep adequate records on and monitor the emission reductions brought about as a result of this Agreement, and shall, upon written request by Developer or by the County, provide Developer and County written reports verifying achieved Emission Reductions and/or Emission Reductions being brought about to address Project impacts on air quality.

9.5 **Achievement of Emission Reductions**

For and in exchange of Developer's payment of funds pursuant to Paragraph 2 above, District shall ensure, by way of entering into, funding and enforcing the Funding Agreements in accordance with the provisions of Paragraph 9.2 (Oversight of Funding Agreements), that the Project achieves the required Emission Reductions to the extent specified in this Agreement.

10. **Subsequent Litigation, Legislation and/or Administrative Action / Credit to Developer**

In the event that despite this Agreement, Developer is required as a result of a final judgment or District Approved Settlement (as defined below) in any subsequent third party litigation, to expend or pay monies in addition to the monies to be paid by Developer pursuant to Paragraph 2 (Mitigation Measures) above, then District shall acknowledge and credit Developer with the Emission Reductions achieved pursuant to Paragraph 1 and any additional Emission Reductions achieved to mitigate the Project related impacts on air quality that will result from Developer's payment of such additional monies. For purposes of this Paragraph, a "District Approved Settlement" shall mean a settlement of a lawsuit filed pursuant to CEQA, the National Environmental Protection Act, the Clean Air Act or other applicable environmental law which (i) provides for Developer's payment of monies in exchange for a dismissal of such lawsuit, (ii) provides for the use of such monies by the petitioner in such lawsuit in such a manner as to mitigate adverse air quality impacts of the Project, and (iii) is approved in writing by District.

11. **Term of Agreement**

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

This Agreement shall be effective upon the date first written above, and shall terminate upon District's meeting its obligation to implement projects that provide Emissions Reductions provided for by this Agreement to achieve Reduction in Project Related Impacts to Less than Significant Levels. Developer may, at any time by written notice to District, terminate this Agreement, whereupon, (i) District shall acknowledge in writing to the County that Developer has mitigated air quality impacts of the Project to the extent and in the types and quantities brought about by Funding Agreements and Emission Reductions and Emission Reduction Design Features, (ii) District shall refund to Developer any unused portion of Developer's Emission Reduction Proposal Advances or Air Quality Mitigation Fee less any unpaid administrative fees incurred; and (iii) neither Developer nor District shall have any further rights or obligations under this Agreement except as expressly provided. District's obligations to oversee implementation of Funding Agreements pursuant to Paragraph 9.2 (Oversight of Funding Agreements) and to ensure that required Emission Reductions are achieved, pursuant to Paragraph 9.5 (Achievement of Emission Reductions), shall remain effective for as long as necessary to ensure that the anticipated Emission Reductions continue to be achieved to the extent specified in the Final REIR or any applicable subsequent CEQA document..

12. **Representations, Covenants and Warranties**

12.1. **Developer's Representations, Covenants and Warranties.**

Developer represents, covenants and warrants to District, as of the date of this Agreement, as follows:

12.1.1. The undersigned representatives of Developer are duly authorized to execute, deliver and perform this Agreement, and upon Developer's execution and delivery of this Agreement, this Agreement will have been duly authorized by Developer.

12.1.2. Upon execution and delivery of this Agreement by Developer, Developer's obligations under this Agreement shall be legal, valid and

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

binding obligations of Developer, duly enforceable at law and in equity in accordance with the terms and conditions of this Agreement.

12.1.3. There is no lawsuit, legal action, arbitration, legal or administrative proceeding, legislative or quasi-legislative action or claim existing, pending, threatened or anticipated which would render all or any portion of this Agreement invalid, void or unenforceable in accordance with the terms and conditions thereof.

12.1.4. Other than the execution and delivery of this Agreement by the undersigned representatives of Developer, there are no approvals, consents, confirmations, proceedings, or other actions required by Developer or any third party, entity or agency in order to enter into and carry out the terms, conditions and intent of the parties with respect to this Agreement.

12.2. **District's Representations, Covenants and Warranties**

District represents, covenants and warrants to Developer, as of the date of this Agreement, as follows:

///

12.2.1. The undersigned representatives of District are duly authorized to execute, deliver and perform this Agreement, and upon District's execution and delivery of this Agreement, this Agreement will have been duly authorized by District.

12.2.2. Upon execution and delivery of this Agreement by District, District's obligations under this Agreement shall be legal, valid and binding obligations of District, duly enforceable at law and in equity in accordance with the terms and conditions of this Agreement.

12.2.3. There is no lawsuit, legal action, arbitration, legal or administrative proceeding, legislative, quasi-legislative or administrative action or claim existing, pending, threatened or anticipated which would render all or any portion of

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

this Agreement invalid, void or unenforceable in accordance with the terms and conditions thereof.

12.2.4. Other than the execution and delivery of this Agreement by the undersigned representatives of District, there are no approvals, consents, confirmations, proceedings, or other actions required by District or any third party, entity or agency in order to enter into and carry out the terms, conditions and intent of the parties with respect to this Agreement.

12.2.5. The monies paid by Developer under this Agreement shall be sufficient to ensure that the Emission Reductions contemplated by this Agreement shall occur, and District shall utilize such monies in such a manner as to ensure that such Emission Reductions shall occur.

12.2.6. Upon the approval of this Agreement by the governing board of District, the Air Pollution Control Officer of District, or equivalent representative, or a delegee of such officer, shall have the authority to approve, deliver, verify, enter into, acknowledge and/or accept any communication, notice, notification, verification, agreement and/or other document to be issued or entered into by District under the terms and conditions of this Agreement, without further approval of the governing board of District.

13. **Indemnification**

Developer agrees to indemnify, defend and hold harmless District for, from and in connection with any third party claims, losses and/or liabilities arising from or in connection with District's performance of this Agreement, excluding only such claims, losses and/or liabilities which result from or in connection with District's sole negligence, act or omission.

14. **Inurement**

Developer's rights and obligations under this Agreement, or applicable portions thereof, shall run with the land encompassed by the Project, and shall inure to the benefit of and be binding upon the heirs, successors and assigns of Developer who

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

take title to such lands or applicable portions thereof. Upon Developer's conveyance of all or any portion of the lands encompassed by the Project, the rights and obligations of Developer under this Agreement shall, to the extent applicable to the lands so conveyed, be transferred to the transferee thereof, and Developer shall thereupon be released by District from, all obligations and liabilities so assigned, except for such obligations and liabilities arising prior to such transfer or specifically not transferred with the land conveyed as indicated in an instrument in writing.

15. **Assignment**

Developer shall have the right to assign all or any part of its rights and/or obligations under this Agreement with respect to a Project Phase or the Project and District shall cooperate with Developer in providing for assignment and assumption of rights and responsibilities hereunder applicable to the implementation of any Project Phase. Upon any such assignment, Developer shall deliver to District a written assignment and assumption agreement specifying the fact and extent of the assignment, the name and address of the assignee, and the assignee's assumption of all obligations of Developer thereby assigned. Developer shall have the right to assign all or any part of its rights and/or obligations under this Agreement to a third party for use in connection with the mitigation of air quality impacts resulting from one or more projects other than the Project, so long as (i) the project is located within the District Boundaries and(ii) the air quality impacts of such project(s) will in fact be mitigated, as verified by District, by the Emission Reductions brought about by this Agreement.. Upon any such assignment by Developer, District shall enter into an amendment of this Agreement which acknowledges the assignment and conforms the various provisions of this Agreement as may be required to be conformed in order to provide to the assignee the rights and benefits of this Agreement as if such assignee and its project were the original party and project contemplated in this Agreement.

16. **Recitals Incorporated**

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

The recitals set forth hereinabove are hereby incorporated into this Agreement and acknowledged, agreed to and adopted by the parties to this Agreement.

17. **Further Assurances**

Developer and District agree to execute and deliver any documents and/or perform any acts which are reasonably necessary in order to carry out the intent of the parties with respect to this Agreement.

18. **No Joint Venture or Partnership**

District and Developer agree that nothing contained in this Agreement or in any document executed in connection with this Agreement shall be construed as making District and Developer joint venturers or partners.

19. **Notices**

Any notices or communications relating to this Agreement shall be given in writing and shall be deemed sufficiently given and served for all purposes when delivered, if (a) in person, (b) by facsimile (with the original delivered by other means set forth in this paragraph, (c) by generally recognized overnight courier or (d) by United States Mail, certified or registered mail, return receipt requested, postage prepaid, to the respective addresses set forth below, or to such other addresses as the parties may designate from time to time by providing written notice of the change to the other party.

DEVELOPER	**DISTRICT**
Tesoro Viejo, Inc. Attn: Robert A. McCaffrey 7020 N. Van Ness Blvd. Fresno, CA 93711 (559) 256-7010 Fax: (559) 256-7010	Seyed Sadredin Executive Director/APCO 1990 E. Gettysburg Avenue Fresno, CA 93726 (559) 230-6000 Fax: (559) 230-6061

20. **Entire Agreement**

The terms of this Agreement, together with all attached exhibits, are intended by the parties as the complete and final expression of their agreement with respect to

such terms and exhibits and may not be contradicted by evidence of any prior or contemporaneous agreement. This Agreement specifically supersedes any prior written or oral agreements between the parties with respect to the subject matter of this Agreement.

21. **Amendments and Waivers**

No addition to or modification of this Agreement shall be effective unless set forth in writing and signed by the party against whom the addition or modification is sought to be enforced. The party benefited by any condition or obligation may waive the same, but such waiver shall not be enforceable by another party unless made in writing and signed by the waiving party.

22. **Invalidity of Provisions**

If any provision of this Agreement as applied to either party or to any circumstance shall be adjudged by a court of competent jurisdiction to be void or unenforceable for any reason, the same shall in no way affect (to the maximum extent permissible by law) any other provision of this Agreement, the application of any such provision under circumstances different from those adjudicated by the court, or the validity or enforceability of this Agreement as a whole. The parties further agree to replace any such invalid, illegal or unenforceable portion with a valid and enforceable provision, which will achieve, to the maximum extent legally possible, the economic, business or other purposes of the invalid, illegal or unenforceable portion.

23. **Construction**

Unless otherwise indicated, all paragraph references are to the paragraph of this Agreement and all references to days are to calendar days. Whenever, under the terms of this Agreement the time for performance of a covenant or condition falls upon a Saturday, Sunday or California state holiday, the time for performance shall be extended to the next business day. The headings used in this Agreement are provided for convenience only and this Agreement shall be interpreted without reference to any headings. Wherever required by the context, the singular shall include the plural and

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726

vice versa, and the masculine gender shall include the feminine or neuter genders, or vice versa. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. The language in all parts of this Agreement shall be construed as a whole in accordance with its fair meaning, and shall not be construed against any party solely by virtue of the fact that such party or its counsel was primarily responsible for its preparation.

24. **Governing Law**

This Agreement shall be governed by the laws of the State of California applicable to contracts made and to be performed in California.

25. **No Third-party Beneficiaries**

Nothing in this Agreement, express or implied, is intended to confer any rights or remedies under or by reason of this Agreement on any person other than the parties to it and their respective permitted successors and assigns, nor is anything in this Agreement intended to relieve or discharge any obligation of any third person to any party hereto or give any third person any right of subrogation or action over or against any party to this Agreement.

26. **Exhibits**

The exhibits attached to this Agreement shall be deemed to be a part of this Agreement and are fully incorporated herein by reference.

27. **Force Majeure**

The time within which any party shall be required to perform under this Agreement shall be extended on a day-per-day basis for each day during which such performance is prevented or delayed by reason of events reasonably outside of the control of the performing party, including, without limitation, acts of God, events of destruction, acts of war, civil insurrection, strikes, shortages, governmental delays, moratoria, civil litigation and the like, and/or delays caused by the non-performing party's act or omission.

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

IN WITNESS WHEREOF, Developer and District have executed this Agreement and agree that it shall be effective as of the date first written above.

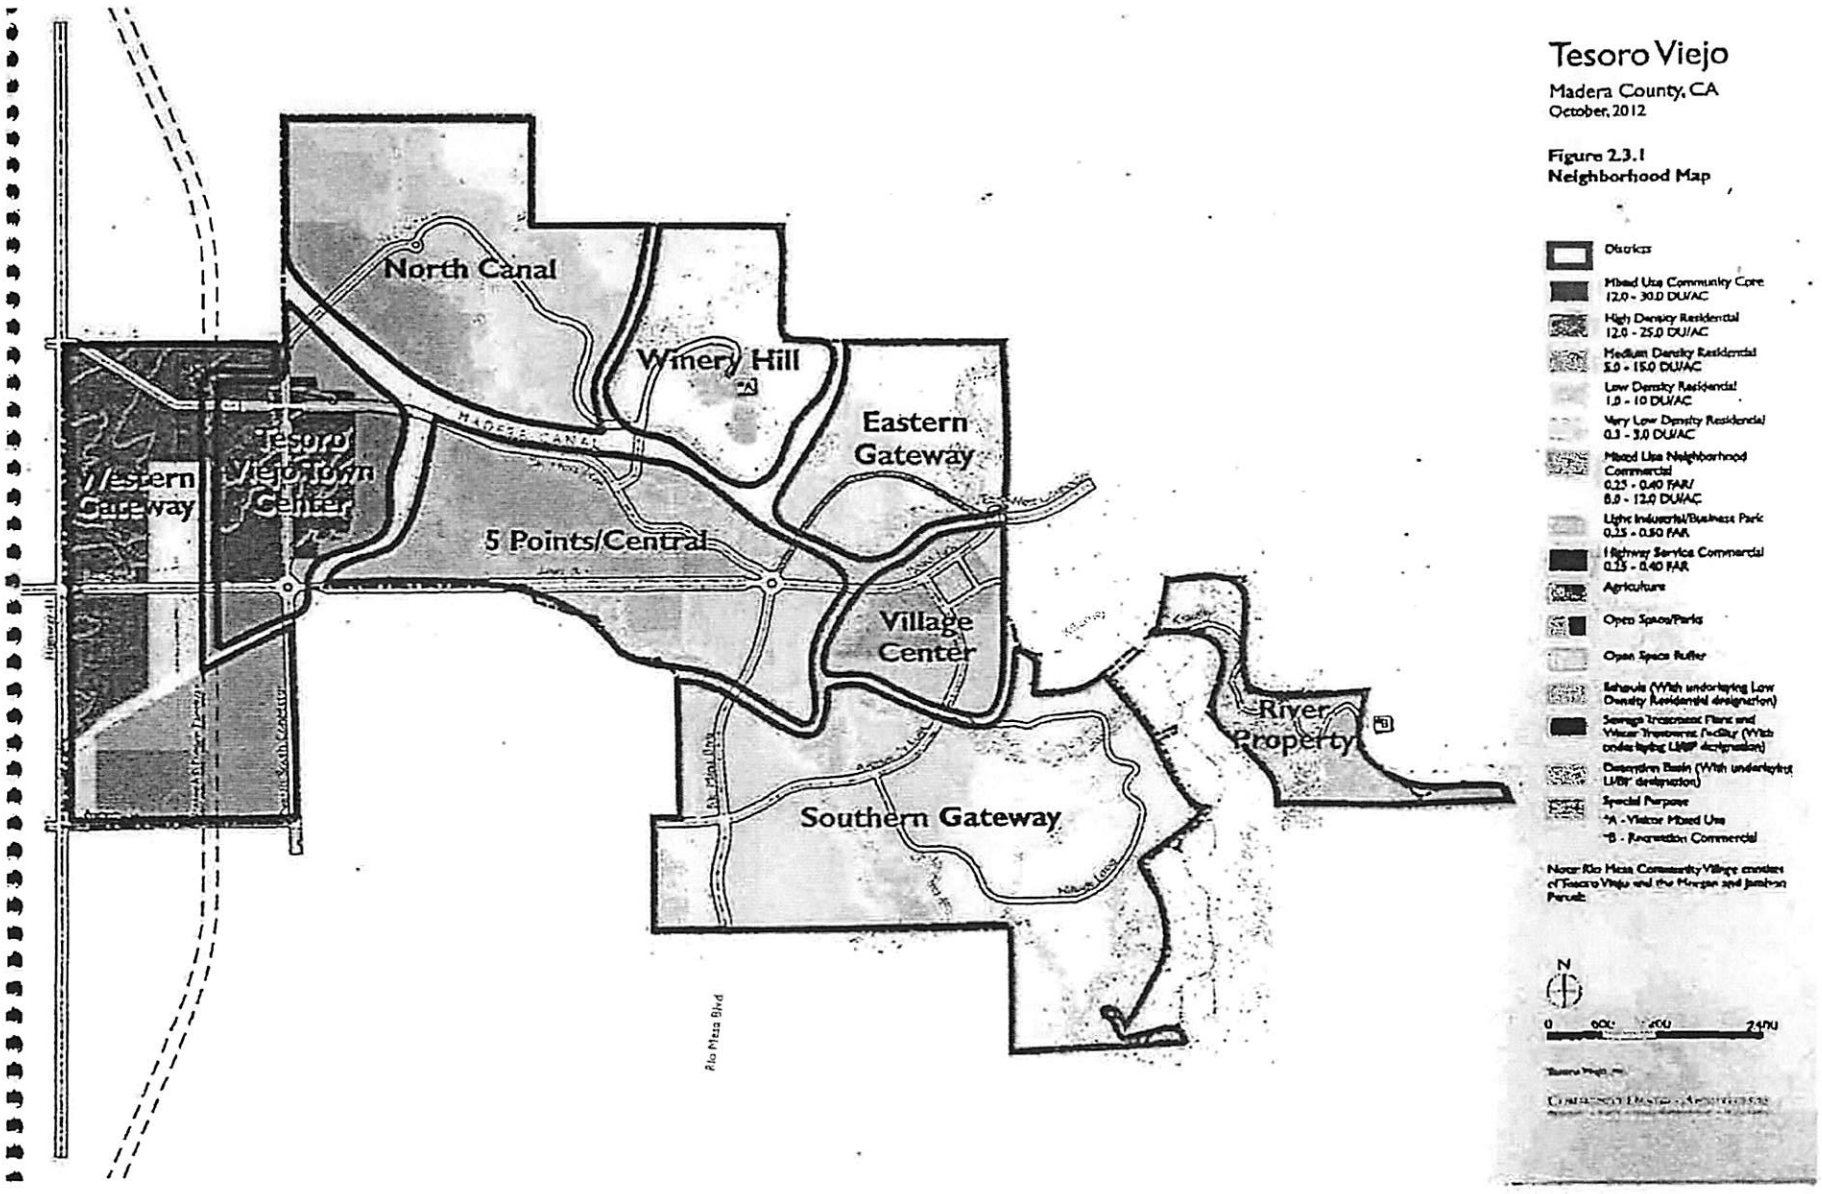
EXHIBIT A



DESCRIPTION OF THE PROJECT

The Tesoro Viejo Specific Plan Project site is located in southeastern Madera County, approximately 9 miles north of the City of Fresno and 13 miles east of the City of Madera. The Project Site is bordered by the San Joaquin River to the east, State Route (SR) 41 to the west, Little Table Mountain to the north, and the Coombs Ranch to the south in an area known as Rio Mesa. The Project Site is located on two U.S. Geological Survey (USGS) topographic maps, which are the Lanes Bridge and Friant California quadrangle maps. The Project would involve development of a property known locally as the Peck Ranch. The project proposes a mix of residential, commercial retail, office, highway commercial, visitor commercial, light industrial and business park uses, in addition to open space and recreational uses, schools, and other institutional and public uses. The project proposes a mixed-use development consisting of up to 5,190 dwelling units (du), about 3 million square feet of commercial, retail, office, public institutional, and light industrial uses, and approximately 218 acres of mapped open space, not including approximately 128 acres of open space and recreational areas associated with boulevards, trails, and neighborhood parks that would be incorporated in the developed areas (open space buffers). Another 37 acres would be set aside for utilities and stormwater facilities (including detention basins), and at least up to 60 acres for schools.

The population at project buildout is projected to be up to 15,650 residents, assuming development of a maximum of 5,190 dwelling units with nonresidential development involving from 6000-7000 jobs in accordance with the County's jobs-housing balance requirements. Full project buildout is assumed to be completed by 2025 for purposes of the analysis prepared for the REIR. See the following pages for additional content from the Specific Plan

2 COMMUNITY DEVELOPMENT PLAN

The Tesoro Viejo Specific Plan incorporates elements of community design, land use, parks and open space, traffic and circulation, and public facilities and services into a comprehensive plan that implements the project vision.

2.1 Land Use Plan

The Tesoro Viejo Project will contain between 3,800 and 5,190 dwelling units, with a target of at least 4,600 dwelling units. (See Tesoro Viejo Program Summary – Table 2.1 and Figure 2.1.1 - Tesoro Viejo Land Use Plan) Residential development will involve a range of densities generally based on designations in the Rio Mesa Area Plan and the General Plan Land Use Element. Most of the units will be in the low and medium density residential use categories, but there will also be a sizeable number of high density units in and around the community core and a subsidiary neighborhood core. The Tesoro Viejo Project will also include up to about 3.0 million square feet of non-residential space, including highway service or large format commercial uses along Highway 41, commercial retail and office uses in the community core, and a small amount of neighborhood, visitor-serving and recreational commercial use. In addition, there would be public and institutional uses such as schools, public service offices and facilities, religious uses, and utility buildings and structures. When completely occupied, the Tesoro Viejo Project will accommodate an estimated 11,500 to 15,650 people, with a school age population of approximately 2,600 to 3,400 students based on projections by the Chawanakee Unified School District (the Project Sponsor anticipates school enrollment at the lower number at full buildout as permitted). The Tesoro Viejo Project area itself is planned to be able to accommodate up to three K-8 school sites, including one site in the Town Center. A site is also reserved in the Town Center for a high school. The sites in the Town Center will probably be developed first and others as enrollment justifies. The Tesoro Viejo Project will also include over 200 acres of specifically identified dedicated open space plus additional buffer areas, totaling over 128 acres guaranteed to remain in open space although included in parcels allowed to be developed to which density is allocated. These open spaces and buffers include existing natural drainages and biological resource areas. In addition, about 200 acres of additional open space and recreational uses would be incorporated into the Town Center and residentially designated areas, boulevards, trails and neighborhood parks.

Two areas are identified for possible special purpose mixed uses because of the unique opportunities for visitor-serving and recreational uses. One area, identified as Special Purpose Area A on the Land Use Plan, is the highest point on the property. This is viewed as having the potential for a combination of hilltop residential uses with a winery, restaurant, and/or inn. A location for recreational uses is identified on the banks of the San Joaquin River where the opportunity for a low-intensity visitor serving recreational use is envisioned, possibly involving a cafe or self-service vending retreat, along with recreational uses oriented towards the river, such as canoe and kayak storage and/or rentals and a pull-in/pull-out facility, along with a small parking facility and/or a possible

clubhouse serving club members and/or campsites. In any event a portion of this area will be available for public access along a trail anticipated to be part of the regional trail system planned to the north and south. But at the present time the Project Sponsor is unable to assure public access to this area or any trail connection from west to east by reason of lack of control of points of access to the north and south and court decisions limiting public access from property to the west owned by the Project Sponsor through the Sumner Hill subdivision to the portion of the property on the east adjacent to the river. Accordingly, public access will depend upon what happens in nearby properties or what is achieved by public agencies.

The Proposed Circulation Plan has been based upon the Rio Mesa Area Plan, with adjustments to ensure consistency with the principles of the Specific Plan. Various refinements and modifications have also been made to adjust both for plans anticipated to the north and south in accordance with the Rio Mesa Area Plan. The objectives of the Tesoro Viejo Land Use Plan have been paramount, especially the latter's emphasis on community cohesiveness around a community core which is as accessible as possible by non-vehicular means for residents of Tesoro Viejo and adjoining villages. The Circulation Plan (Figure 4.1) also indicates the plan for an extensive trail network which would provide connections among all the residential and nonresidential areas and to open spaces and parks, as well as to the community core. Trail connections to the San Joaquin River through adjoining properties will be made as opportunities present themselves. Adjustments to the Circulation Plan can be made as adjoining landowners move forward and seek County approvals.

2.2 *Specific Plan Goals and Objectives*

2.2.1 Land Use

GOAL 1: Provide a viable and balanced mix of regional and local-serving commercial and employment uses.

GOAL 2: Encourage properly designed mixed-use and residential neighborhoods to insure compatibility with and transportation choices for access to residential and non-residential uses by creating a pedestrian-supportive environment that activate Tesoro Viejo's streets.

GOAL 3: Create a vibrant mixed use community core that provides for the needs of the all residents and visitors to the Rio Mesa area, serving as the major Community Center for Rio Mesa, containing all major public and community services.

GOAL 4: Create an attractive and easily accessible neighborhood-serving Village Center within the eastern center of the community that meets the convenience needs of nearby residents of Tesoro Viejo neighborhoods and adjacent villages.

GOAL 5: Reflect anticipated marketing needs and public demand by providing a diversity of housing types and locations that will be marketable within the region.

GOAL 6: Promote a diverse community and create opportunities for housing near workplaces.

GOAL 7: Provide development guidelines and standards to lead builders, designers, and developers to create residential neighborhood and individual homes that encourage diverse and creative housing types and ensure the highest possible quality of community and architectural design.

GOAL 8: Encourage the creation of fine-grained detail in architectural and urban form that provides visual interest and complexity.

GOAL 9: Provide detached and attached housing to serve a spectrum of buyers and household types, and to provide "move-up" and "move-down" opportunities for present residents in the vicinity and the surrounding region.

GOAL 10: Provide an opportunity for high density, multi-family housing near and within the mixed use employment center of Tesoro Viejo.

2.2.2 Transportation and Circulation

GOAL 11: Design multimodal streets that effectively facilitate vehicular traffic and future transit connections but also provide for a safe, attractive and continuous pedestrian and bicycle circulation system throughout Tesoro Viejo.

GOAL 12: Design roadways to be aesthetically and environmentally sensitive features of Tesoro Viejo.

GOAL 13: Minimize or eliminate the need for wide arterial streets by creating an interconnected circulation network that distributes traffic across many streets while providing the capacity necessary to accommodate the levels and types of traffic anticipated in the land use plan and those of the surrounding area.

GOAL 14: Plan pedestrian-oriented mixed use areas that maintain an adequate level of parking and access for automobiles, but that encourage a park-once approach that minimizes the total demand for parking.

GOAL 15: Create a circulation network that is interconnected with the regional transportation system.

GOAL 16: Design all streets with the intention that land uses will front directly on them by using landscape medians, setbacks, and local access lanes on streets with higher levels of through traffic volume.

GOAL 17: Create a network of multi-use and hiking trails along Tesoro Viejo's open space corridors that complements the walkways and paths along the community's streets in order to encourage walking and bicycling for transportation and recreation.

2.2.3 Community Facilities and Services

GOAL 18: Create high-quality schools, parks, libraries, police and fire stations, public utility centers, post-offices and similar community facilities that are integrated into the mixed use centers of Tesoro Viejo; these uses will be key assets of the community and their design and quality must reflect their importance.

GOAL 19: Provide a high level of community facilities and services and utility services and infrastructure that will be phased in accordance with development.

GOAL 20: Provide the appropriate level of county and district services within Tesoro Viejo to meet the needs of its residents, businesses, and workers; and that also reflects the importance of Tesoro Viejo Town Center within Southeastern Madera County.

2.2.4 Natural, Cultural, and Recreational Resources

GOAL 21: Preserve features and resources of environmental and cultural value to enhance the future identity and value of Tesoro Viejo as a community.

GOAL 22: Identify, preserve and incorporate significant natural features such as channels, bluffs, rock outcroppings, and steep slopes into a functional open space system that is integrated into the community plan.

GOAL 23: Preserve significant biological, archaeological, and paleontological resources in a manner to reflect their importanee.

GOAL 24: Establish conservation areas along drainage ways to provide an effective buffer between new development and sensitive biological and wildlife resources while allowing these areas to be a visual and recreational amenity.

GOAL 25: Create and maintain access to the San Joaquin River for both residents and visitors to the extent possible within the control of the Project Sponsor and County.

GOAL 26: Meet and, as appropriate, exceed the parks and recreation standards of Madera County.

GOAL 27: Adopt "Green Building" practices for site and building design that focus on resource and energy efficiency, and where feasible, treatment of irrigation and stormwater runoff through natural, landscape-based processes.

GOAL 28: Use of reclaimed water for landscape irrigation and other non-potable water uses for parkways, open space areas, and agricultural uses is strongly encouraged.

GOAL 29: To the extent feasible, provide for the future use of reclaimed water for landscape irrigation within the developed areas of Tesoro Viejo.

GOAL 30: Emphasize planting of native trees, shrubs and groundcovers suitable to climatic conditions while still providing visual interest and variety.

2.2.5 Agricultural Resources

GOAL 31: Encourage some continued vineyard, orchard and farming operations where feasible by clustering of dwellings and infrastructure to allow open space preservation and functional agricultural use for local community sustenance and interest.

GOAL 32: Encourage sustainable methods of local food production to sustain both local business and the health of the land and seek to incorporate farmer's markets into local commercial activities and edible gardens into schools and open squares.

GOAL 33: Promote opportunities for youth education and employment in agriculture.

2.2.6 Economic Vitality

GOAL 34: Develop a set of permitted commercial and employment uses within Tesoro Viejo that provide a wide range of employment and shopping opportunities for existing and future residents of Madera County.

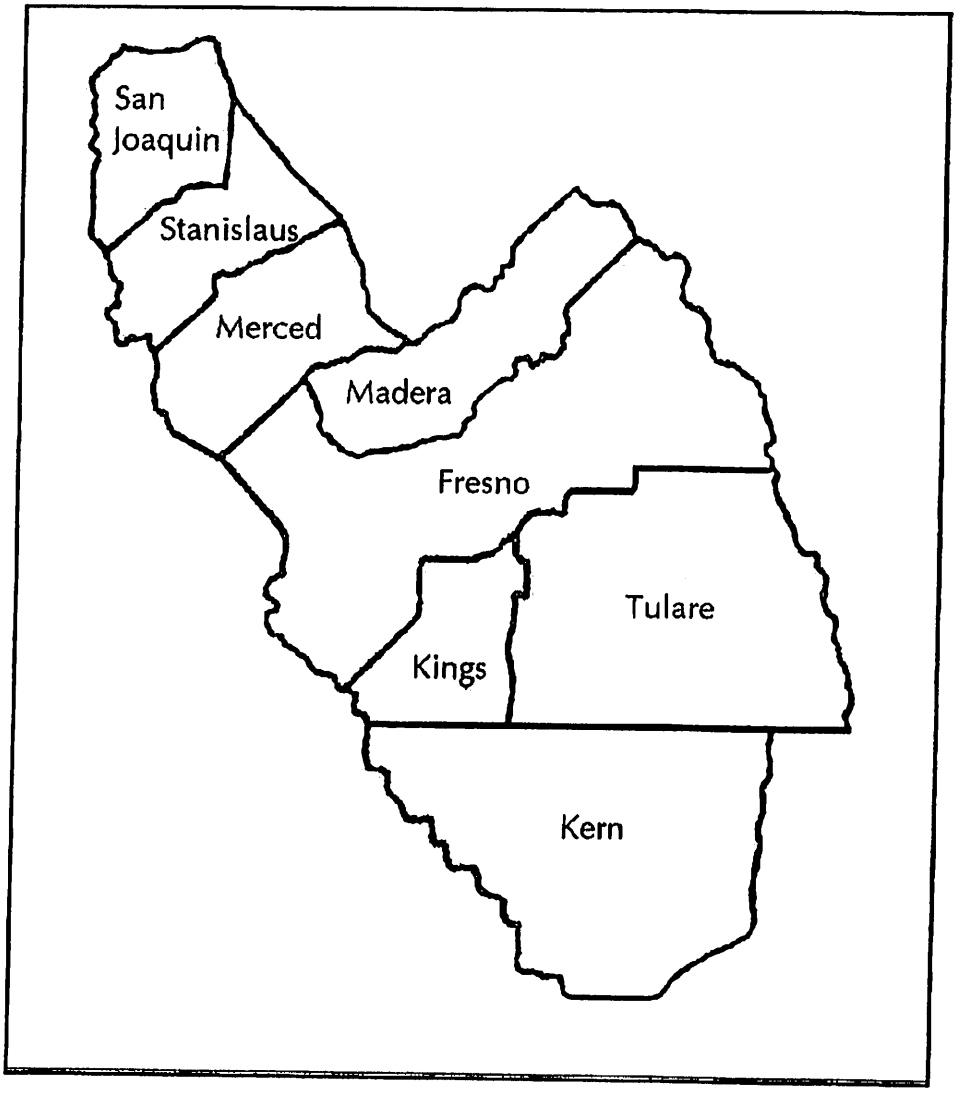
GOAL 32: Enhance the vitality of the Town Center by encouraging uses that allow for safe around-the-clock activity that makes it an attractive environment for shopping, entertainment, recreation, living, and working.

GOAL 33: Encourage job creation and self-employment opportunities to ensure a vital and self-sustaining town.

EXHIBIT B

EMISSION REDUCTION DESIGN FEATURES

The project shall incorporate the following Emission Reduction Design Features:



- Provide a viable and balanced mix of regional and local-serving commercial and employment uses.
- Encourage properly designed mixed-use and residential neighborhoods to insure compatibility with and transportation choices for access to residential and nonresidential uses by creating a pedestrian-supportive environment that activate Tesoro Viejo's streets.
- Promote a diverse community and create opportunities for housing near workplaces.
- Provide an opportunity for high-density, multi-family housing near and within the mixed-use employment center of Tesoro Viejo.
- Design multimodal streets that effectively facilitate vehicular traffic and future transit connections, but also provide for a safe, attractive and continuous pedestrian and bicycle circulation system throughout Tesoro Viejo.
- Minimize or eliminate the need for wide arterial streets by creating an interconnected circulation network that distributes traffic across many streets while providing the capacity necessary to accommodate the levels and types of traffic anticipated in the land use plan and those of the surrounding area.
- Plan pedestrian-oriented mixed-use areas that maintain an adequate level of parking and access for automobiles, but that encourage a park-once approach that minimizes the total demand for parking.
- Create a circulation network that is interconnected with the regional transportation system.
- Create a network of multi-use and hiking trails along Tesoro Viejo's open space corridors that complements the walkways and paths along the community's streets in order to encourage walking and bicycling for transportation and recreation.

See also the Tesoro Viejo Specific Plan for more detailed information regarding design features and design standards that apply to the project.

RE: **ITEM NUMBER 8: APPROVE VOLUNTARY EMISSION REDUCTION AGREEMENT WITH MERITAGE HOMES OF CALIFORNIA, INC.TO RECEIVE FUNDS IN THE AMOUNT OF APPROXIMATELY $1,940,000 FOR THE PURPOSE OF MITIGATING AIR QUALITY IMPACTS OF THE PROPOSED "PILLSBURY ESTATES" DEVELOPMENT PROJECT**

RECOMMENDATION:

1. Approve and authorize the Chair to sign the Voluntary Emission Reduction Agreement with Meritage Homes of California, Inc.

2. Authorize staff to identify, fund and manage air quality projects that will fully mitigate the project criteria pollution impacts.

BACKGROUND:

Since 2005, the District has entered into Voluntary Emission Reduction Agreements (VERA) with developers to mitigate the air impacts of their development projects. These agreements benefit air quality by achieving additional reductions in emissions. The District has entered into 18 VERAs, and to date has received $12,434,671.78 in revenues. Currently, projects funded by the District achieved total emission reductions of 1,089.20 tons of NOx, 128.31 tons of VOC, and 37.10 tons of PM10. The agreement before you today is similar to the previous agreements approved by your Board.

Representatives of Meritage Homes of California, Inc. have approached the District with a request for assistance in mitigating the air quality impacts of their development project proposed in San Joaquin County. Per the agreement, the District will review and identify acceptable air quality impact analysis methods and procedures, and verify and manage consultant provided emission reduction projects, or identify and manage other emission reduction projects, to fully mitigate the air quality impact of criteria pollutants from the proposed project.

The Pillsbury Estates project (Tract No. 3512) is an approved 80.1 acre, 203 lot single family residential (R-1) zoning project that allows for an additional 71 lots upon rezone of the two adjacent parcels (currently R-3 and R-4 zoning). The project is located in the City of Manteca, County of San Joaquin and received its project approvals in 2007. As proposed, the project will be phased over six years with construction commencing in Spring 2013 and completion targeted for Spring of 2019.

DISCUSSION:

The County of San Joaquin has approved an Environment Impact Report (EIR) for the Pillsbury Estates development project, which includes an assessment of the project's impact on air quality, addressing criteria pollutant emissions and public health/hazard impacts for both construction and longer-term operational impacts, and mitigation opportunities. The District has also received an application from Meritage Homes of California Inc., to determine compliance with District Rule 9510, Indirect Source Review. District staff will use these sources of information to quantify emissions of each phase of construction as it is proposed.

One of the prerequisites of entering into a Voluntary Emission Reduction Agreement with the District is to include all feasible measures to reduce emissions at the project site. Fugitive dust emissions from construction activities will be mitigated onsite by complying with the requirements specified in the District's Regulation VIII and with the use of cleaner construction equipment when available. Including design features that facilitate and encourage alternate forms of transportation and increase energy efficiency can mitigate operational emissions. Specific onsite operational mitigation features agreed by Meritage Homes of California, Inc. are provided in the agreement.

After accounting for the benefit of the onsite mitigation measures, Meritage Homes of California, Inc. will provide monies to the District to fund projects to fully and permanently mitigate project emissions of oxides of nitrogen (NOx), reactive organic gases (ROG), and fine particulate matter (PM10) emissions off-site. Given our experience in administering grants for emission reduction projects, with adequate funding, the District can bring about sufficient emission reductions from existing sources of emissions to fully and permanently mitigate the air emissions from this development project. The emission reduction projects will permanently reduce emissions, because even after the useful life of the project has ended, the funded equipment, device or vehicle

will be replaced with equipment, devices or vehicles that are as clean or cleaner than the original.

Meritage Homes of California, Inc. has not provided the District a list of potential off-site emission reduction projects, although they have the option to do so at a later date under this agreement. In addition, District-identified projects are generally more cost-effective than this schedule, and therefore, actual funds received by the District may be less than estimated. Projects proposed by Meritage Homes of California, Inc. will be verified by the District to ensure that reductions are valid and each project will be field inspected by the District prior to and after installation. The District will also perform long term monitoring of the projects to ensure the emissions remain in place during the period of the agreement. Whether Meritage Homes of California, Inc. or the District identifies projects, all will be under contract with the District to ensure their enforceability.

The dollar value of this agreement is based on the emissions, as estimated by the EIR, multiplied times the emission reduction schedule contained in Section 2 of the agreement.

The EIR prepared for the project provided the following criteria pollutant emission estimates:

ROG	7.67	tons/year
NOx	6.47	tons/year
PM10	6.03	tons/year
Total	20.17	tons/year

As presented below, the District would receive an estimated $1,940,071. This amount includes a four percent (4%) administrative fee to cover the District's costs of administering the program:

Mitigation Fees	$	1,865,453
Admin. Fee (4%)	$	74,618
Total	$	1,940,071

The total funds identified in this memorandum reflect the District's and developer's best estimate, and may increase in the future if it becomes necessary to reduce more emissions due to projects costing more than expected, or be reduced if projects are obtained at a lower cost than anticipated in the VERA fee schedule. It should be noted that, thus far, the District has been able to fund projects that are significantly more cost effective than this estimate.

All funds collected will be used for emission reduction projects that will fully mitigate the air quality impact of criteria pollutants from the proposed project. The emission reduction projects will be in place contemporaneously with the development and will

directly provide air quality benefits in the San Joaquin Valley. The District will establish a separate budgetary account for these mitigation funds, and will provide routine tracking and status reports documenting fund expenditures and the emissions reductions achieved for the development project.

FISCAL IMPACT:

Under the terms of the agreement, Meritage Homes of California, Inc. is expected to pay to the District approximately a total of $1,865,453 in mitigation fees and $74,618 in administrative fees for a total of $1,940,071, in the year 2013 or later. Meritage Homes of California, Inc. may pay the mitigation fees in sufficient amounts to mitigate the entire project, or may choose to pay fees prior to initiating each phase of the project. Fees must be paid no later than applying to the Lead Agency for the first construction permit, and before occurrence of the first project related emissions generating activity, for the Project or phase of the Project. Staff will present adjustments to the District's budget for the Board's consideration at the appropriate times to coordinate the receipt of mitigation funds and the expenditure of those funds in accordance with the Voluntary Emission Reduction Agreement.

San Joaquin Valley Unified Air Pollution Control District
Meeting of the Governing Board
April 18, 2013

APPROVE VOLUNTARY EMISSION REDUCTION AGREEMENT WITH MERITAGE HOMES OF CALIFORNIA, INC.TO RECEIVE FUNDS IN THE AMOUNT OF APPROXIMATELY $1,940,000 FOR THE PURPOSE OF MITIGATING AIR QUALITY IMPACTS OF THE PROPOSED "PILLSBURY ESTATES" DEVELOPMENT PROJECT

Attachment:

MERITAGE HOMES VOLUNTARY EMISSION REDUCTION AGREEMENT
20 PAGES

VOLUNTARY EMISSION REDUCTION AGREEMENT 20130088

This Voluntary Emission Reduction Agreement ("Agreement") is entered into as of April 18, 2013 by and between Meritage Homes of California, Inc. ("Developer") and the SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, an air pollution control district formed pursuant to California Health and Safety Code section 40150, et seq. ("District").

RECITALS

WHEREAS, the County of San Joaquin approved the development of a Project known as "Pillsbury Estates", located in the County of San Joaquin, California, as more particularly described on Exhibit A attached hereto (the "Project") in 2007; and

WHEREAS, the Project incorporates the design features specified on Exhibit B attached hereto and incorporated herein ("Emission Reduction Design Features"), in order to significantly reduce the air quality impacts associated with the Project; and

WHEREAS, despite incorporation of the Emission Reduction Design Features, without additional emission reductions, the Project would cause impacts on air quality within the geographical boundaries of the San Joaquin Valley Unified Air Pollution Control District, as depicted on Exhibit D attached hereto and incorporated herein (the "District Boundaries"); and

WHEREAS, Developer has volunteered additional emission reductions as a means of reducing such impacts; and

WHEREAS, Developer desires to fully comply with all requirements of the California Environmental Quality Act codified at California Public Resources Code section 21000, et seq. ("CEQA"), including all requirements relating to the mitigation of air quality impacts arising from or in connection with the Project and each Project Phase; and

///

///

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

WHEREAS, District is an air pollution control district formed by the counties of Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus and Tulare, pursuant to California Health and Safety Code section 40150, et seq.; and

WHEREAS, District is responsible for developing and implementing air quality control measures within the District Boundaries, including air quality control measures for stationary sources, transportation sources, and indirect sources; and

WHEREAS, District has determined that with appropriate funding, District can provide reductions of emissions from certain projects in types and in sufficient quantities to fully mitigate the net air quality criteria pollutant impacts of the Project as quantified in Paragraph 1 below ("Mitigation of Project Related Impacts on Air Quality"); and

WHEREAS, Developer and District desire to enter into this Agreement in order to develop and implement air quality control measures which will fully mitigate the Project's Air Impact so that the development of such Project will result in no net increase in criteria pollutant emissions over the criteria pollutant emissions which would otherwise exist without the development thereof.

AGREEMENT

NOW THEREFORE, in exchange of the mutual covenants herein contained, Developer and District hereby agree as follows:

1. **Mitigation of Project Related Impacts on Air Quality**

Project related impacts shall be mitigated by achieving surplus, quantifiable and enforceable reductions of ROG, NOx, and PM_{10} in accordance with Paragraph 2 (collectively, "mitigation measures"). The determination of whether proposed emission reductions are surplus shall be performed by the District through its Strategy and Incentives Department. Project related air quality impacts as estimated in Exhibit C, which is attached hereto and incorporated herein, shall be fully mitigated. Fewer emission reductions than identified by the Lead Agency may be provided as mitigation

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

if: (1) the Lead Agency approves a revised air quality impact assessment, demonstrating that Project or Project Phase related air quality impacts are less than originally quantified; or (2) the Lead Agency Governing Body certifies a new environmental assessment demonstrating that Project or Project Phase related impacts are less than originally quantified; or (3) Developer reduces the size of Project and surrenders the associated entitlements.

Developer may mitigate Project related air quality impacts by any combination of the following: 1) providing District with Emission Reduction Proposals and sufficient funds to execute the proposals, or 2) paying Air Quality Mitigation Fees to the District. Developer may mitigate all Project related air impacts at one time, or Developer may mitigate Project related impacts consistent with defined project phases (Project Phase). For the purpose of this agreement, a Project Phase is any subset of the total project which would result in air emissions and which is approved by the Lead Agency. If Developer mitigates all Project related impacts at once, Developer must provide District with sufficient mitigation measures to fully mitigate the entire Project no later than applying to Lead Agency for the first construction permit and before occurrence of the first project related emissions generating activity for Project. If Developer mitigates Project related impacts in phases, Developer must provide District with sufficient mitigation measures to fully mitigate each Project Phase before generating emissions. If Developer mitigates Project related impacts in phases, Developer must submit to District an air quality impact analysis for each Project Phase that quantifies the emissions to be mitigated.

2. **Mitigation Measures**

District shall credit Developer for all air quality mitigation measures brought about by this Agreement, including any emission reductions District achieves prior to the date Developer receives final approval of the Project from all applicable Governmental Authorities.

///

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

2.1. **Emission Reduction Proposals submitted by Developer**

Developer shall submit complete Emission Reduction Proposals to District on District's approved application forms. Each Emission Reduction Proposal shall contain the following: (1) an estimate of emission reductions to be achieved; (2) an estimated funding cost; and (3) a representation by Developer that the owner/operator of the identified emission reduction proposal equipment has expressed interest in entering into a written Funding Agreement with the District. Representation is in the form of a signed and complete District emission reduction project application(s).

On the date of submittal of each Emission Reduction Proposal, Developer shall advance to District a monetary sum equal to the total estimated cost specified in the Emission Reduction Proposal ("Emission Reduction Proposal Advance") plus an administrative fee of four (4) percent. District shall use Emission Reduction Proposal Advance(s) to execute Funding Agreements, as set forth in Paragraph 3 (Funding Agreements).

2.2. **Emission Reduction Proposals initiated by the District**.

Developer may request in writing for District to identify Emission Reduction Proposals on behalf of Developer. On the date of the request, Developer shall advance to District a monetary sum equal to District's estimated cost per ton, as set forth in Table 1 (Emission Reduction Cost Schedule) multiplied times the number of tons of emission reductions to be achieved ("Air Quality Mitigation Fee"), plus an administrative fee of four (4) percent. District will identify Emission Reduction Proposals from District's Strategy and Incentives Department and use said Air Quality Mitigation Fees to achieve emission reductions in behalf of Developer.

Table 1 Emission Reduction Cost Schedule

Pollutant	Fee Rate $/ton
NOx or ROG	$93,500
PM10	$90,110

///

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

3. **Funding Agreements**

Upon Developer's submission to District of each Emission Reduction Proposal Advance or Air Quality Mitigation Fee, District shall (1) shall use diligent efforts to enter into Funding Agreements with the owners and/or operators of the pollution source equipment as identified in the Emission Reduction Proposals, within one hundred eighty (180) days of receiving funding; (2) determine the types and quantities of permanent reduction in emissions which would be realized by the Emission Reduction Proposals; (3) shall perform the determination of surplus emission reductions of ROG, NOx, and PM10; and (4) shall advise Developer of such determination in writing.

District shall notify Developer or designee in writing of Funding Agreements entered into by the District. In the event District is unable to achieve the required reductions District shall provide Developer a written statement of the amount of reductions that have been achieved. Developer shall have a reasonable time, not to exceed ninety (90) days, within which to submit to District additional Emission Reduction Proposal(s); or provide District additional Air Quality Mitigation Fee(s).

4. **Unused Emission Reduction Proposal Advance**

If District is unable to enter into Funding Agreements with owners or operators identified in Developer's Emission Reduction Proposals, or if requested by Developer in writing, District may use any unused portion of Developer's Emission Reduction Proposal Advance to fund Emission Reduction Proposals per Paragraph 2.2 (Emission Reduction Proposals initiated by the District).

5. **Excess Emission Reductions**

Developer shall be credited with all emission reductions achieved by District through this agreement that exceed the amount of required emission reductions for the Project as a whole ("Excess Emission Reduction"). Developer shall have two years from the date the reductions are identified as an Excess Emission Reduction, with the ability to extend an additional two years based on economic conditions, to transfer the Excess Emission Reduction, if determined by District to be surplus at the time of

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

transfer, to another development project owned by Developer or to a development project owned by another developer. Developer must provide District written request notification of the transfer.

6. **Refunds**

Upon verification by District that project related impacts have been fully mitigated District shall refund Developer any unused Emission Reduction Proposal Advance or Air Quality Mitigation Fee. District shall have reasonable time, not to exceed sixty (60) days to refund Developer.

7. **District Rule 9510 (Indirect Source Review)**

Developer acknowledges that except as provided for in this Agreement, Developer is subject to all applicable provisions of District Rule 9510 (Indirect Source Review), that are in effect at the time of submitting an Air Impact Assessment Application in accordance with Paragraph 7.1. District acknowledges that to the extent that mitigation provided under this Agreement equals or exceeds mitigation that would otherwise be achieved through compliance with Sections 6.0 and 7.0 of District Rule 9510, Developer shall be considered to be in compliance with Sections 6.0 and 7.0 of District's Rule 9510.

7.1 **Rule 9510 Equivalency**

District acknowledges that Developer has submitted an Air Impact Assessment Application under Rule 9510 for the Project. District shall calculate the amount of emission reductions required pursuant to District Rule 9510 (Indirect Source Review) and verify equivalency of emission reductions achieved under this Agreement.

8 **District's Obligation**

8.1 **Acknowledgement Regarding Full Mitigation**

Upon successful fulfillment of all mitigation measures identified pursuant to Paragraph 2, District shall verify in writing to Developer and to the Lead Agency that the Project or Project Phase related impacts on air quality have been fully mitigated as set forth in Paragraph 1 (Mitigation of Project Related Impacts on Air Quality). For the

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

purpose of this agreement, full mitigation means the sum of all NOx, ROG, and PM10 emission reductions achieved by the mitigation measures equals, or is greater than, the sum of all NOx, ROG, and PM10 emissions specified in the environmental review document certified by the Lead Agency when approving the Project, or the emissions as adjusted in accordance with Paragraph 1.

8.2 **Oversight of Funding Agreements**

District shall ensure that the owners/operators of equipment subject to Funding Agreements perform all obligations to be performed on the part of such parties under said Funding Agreements.

8.3 **Oversight of Air Quality Mitigation Monitoring Plan**

Upon request of the CEQA lead agency for the Project, District shall oversee that portion of the mitigation monitoring plan adopted by the lead agency for the Project which relates to the mitigation brought about by Paragraph 1 of this Agreement. Alternatively, upon request of the Project's CEQA lead agency, District shall cooperate with the lead agency in the oversight of that portion of the mitigation monitoring plan adopted by the lead agency for the Project which relates to the mitigation brought about by Paragraph 1 of this Agreement.

8.4 **Documentation, Record Keeping and Monitoring**

District shall document, keep adequate records on and monitor the emission reductions brought about as a result of this Agreement, and shall, upon written request by Developer or by the lead agency for the Project, provide Developer or lead agency written reports verifying achieved emission reductions and/or emission reductions being brought about to fully mitigate Project related impacts on air quality.

8.5 **Achievement of Emission Reductions**

For and in exchange of Developer's payment of funds pursuant to Paragraph 2 above, District shall ensure, by way of entering into, funding and enforcing the Funding Agreements in accordance with the provisions of Paragraph 9.2 (Oversight of Funding Agreements), that the Project achieves the required emission reductions to the extent

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

specified in the environmental review document certified by the Lead Agency.

9. **Subsequent Litigation, Legislation and/or Administrative Action / Credit to Developer**

In the event that despite this Agreement, Applicant is required as a result of a final judgment or District Approved Settlement (as defined below) in any subsequent third party litigation, to pay monies in addition to the monies to be paid by Applicant pursuant to Paragraph 2 (Mitigation Measures) above, then District shall acknowledge and credit Applicant with the emission reduction achieved pursuant to Paragraph 1 (Mitigation of Project Related Impacts on Air Quality) and any additional emission reduction achieved to mitigate the Project related impacts on air quality that will result from Applicant's payment of such additional monies. For purposes of this Paragraph, a "District Approved Settlement" shall mean a settlement of a lawsuit filed pursuant to CEQA, the National Environmental Protection Act or other applicable environmental law which (i) provides for Applicant's payment of monies in exchange for a dismissal of such lawsuit, (ii) provides for the use of such monies by the petitioner in such lawsuit in such a manner as to mitigate adverse air quality impacts of the Project, and (iii) is approved in writing by District.

10. **Term of Agreement**

This Agreement shall be effective upon the date first written above, and shall terminate upon District's meeting its obligation to implement projects that provide necessary emissions reductions to fully mitigate the Project's related air impacts. Developer may, at any time by written notice to District, terminate this Agreement, whereupon, (i) District shall acknowledge in writing to the Lead Agency that Developer has mitigated air quality impacts of the Project to the extent and in the types and quantities brought about by Funding Agreements and Mitigation Measures, (ii) District shall refund to Developer any unused portion of Developer's Emission Reduction Proposal Advances or Air Quality Mitigation Fee less any unpaid administrative fees incurred; and (iii) neither Developer nor District shall have any further rights or

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

obligations under this Agreement except as expressly provided. District's obligations to oversee implementation of Funding Agreements pursuant to Paragraph 9.2 (Oversight of Funding Agreements) and to ensure that required emission reductions are achieved, pursuant to Paragraph 9.5 (Achievement of Emission Reductions), shall remain effective for as long as necessary to ensure that the anticipated emission reductions continue to be achieved to the extent specified in the environmental review document certified by the Lead Agency.

11. **Representations, Covenants and Warranties**

11.1. **Developer's Representations, Covenants and Warranties**.

Developer represents, covenants and warrants to District, as of the date of this Agreement, as follows:

11.1.1. The undersigned representatives of Developer are duly authorized to execute, deliver and perform this Agreement, and upon Developer's execution and delivery of this Agreement, this Agreement will have been duly authorized by Developer.

11.1.2. Upon execution and delivery of this Agreement by Developer, Developer's obligations under this Agreement shall be legal, valid and binding obligations of Developer, duly enforceable at law and in equity in accordance with the terms and conditions of this Agreement.

11.1.3. There is no lawsuit, legal action, arbitration, legal or administrative proceeding, legislative or quasi-legislative action or claim existing, pending, threatened or anticipated which would render all or any portion of this Agreement invalid, void or unenforceable in accordance with the terms and conditions thereof.

11.1.4. Other than the execution and delivery of this Agreement by the undersigned representatives of Developer, there are no approvals, consents, confirmations, proceedings, or other actions required by Developer or any third party, entity or agency in order to enter into and carry out the terms, conditions and intent of

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

the parties with respect to this Agreement.

11.2. **District's Representations, Covenants and Warranties**

District represents, covenants and warrants to Developer, as of the date of this Agreement, as follows:

11.2.1. The undersigned representatives of District are duly authorized to execute, deliver and perform this Agreement, and upon District's execution and delivery of this Agreement, this Agreement will have been duly authorized by District.

11.2.2. Upon execution and delivery of this Agreement by District, District's obligations under this Agreement shall be legal, valid and binding obligations of District, duly enforceable at law and in equity in accordance with the terms and conditions of this Agreement.

11.2.3. There is no lawsuit, legal action, arbitration, legal or administrative proceeding, legislative, quasi-legislative or administrative action or claim existing, pending, threatened or anticipated which would render all or any portion of this Agreement invalid, void or unenforceable in accordance with the terms and conditions thereof.

11.2.4. Other than the execution and delivery of this Agreement by the undersigned representatives of District, there are no approvals, consents, confirmations, proceedings, or other actions required by District or any third party, entity or agency in order to enter into and carry out the terms, conditions and intent of the parties with respect to this Agreement.

11.2.5. The monies paid by Developer under this Agreement shall be sufficient to ensure that the emission reduction contemplated by this Agreement shall occur, and District shall utilize such monies in such a manner as to ensure that such emission reduction shall occur.

11.2.6. Upon the approval of this Agreement by the governing board of District, the Air Pollution Control Officer of District, or equivalent

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

representative, or a delegee of such officer, shall have the authority to approve, deliver, verify, enter into, acknowledge and/or accept any communication, notice, notification, verification, agreement and/or other document to be issued or entered into by District under the terms and conditions of this Agreement, without further approval of the governing board of District.

12. **Indemnification**

Developer agrees to indemnify, defend and hold harmless District for, from and in connection with any third party claims, losses and/or liabilities arising from or in connection with District's performance of this Agreement, excluding only such claims, losses and/or liabilities which result from or in connection with District's sole negligence, act or omission.

13. **Inurement**

Developer's rights and obligations under this Agreement, or applicable portions thereof, shall run with the land encompassed by the Project, and shall inure to the benefit of and be binding upon the heirs, successors and assigns of Developer who take title to such lands or applicable portions thereof. Upon Developer's conveyance of all or any portion of the lands encompassed by the Project, the rights and obligations of Developer under this Agreement shall, to the extent applicable to the lands so conveyed, be transferred to the transferee thereof, and Developer shall thereupon be released by District from, all obligations and liabilities so assigned, except for such obligations and liabilities arising prior to such transfer.

14. **Assignment**

Developer shall have the right to assign all or any part of its rights and/or obligations under this Agreement. Upon any such assignment, Developer shall deliver to District a written assignment and assumption agreement specifying the fact and extent of the assignment, the name and address of the assignee, and the assignee's assumption of all obligations of Developer thereby assigned. Developer shall have the right to assign all or any part of its rights and/or obligations under this Agreement to a

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

third party for use in connection with the mitigation of air quality impacts resulting from one or more projects other than the Project, so long as (i) the project is located within the District Boundaries, (ii) the air quality impacts of such project(s) will in fact be mitigated, as verified by District, by the emission reductions brought about by this Agreement, and (iii) the project(s) consist of residential, commercial, industrial and/or mixed use real estate projects which incorporate the Emission Reduction Design Features. Upon any such assignment by Developer, District shall enter into an amendment of this Agreement which acknowledges the assignment and conforms the various provisions of this Agreement as may be required to be conformed in order to provide to the assignee the rights and benefits of this Agreement as if such assignee and its project were the original party and project contemplated in this Agreement.

15. **Recitals Incorporated**

The recitals set forth hereinabove are hereby incorporated into this Agreement and acknowledged, agreed to and adopted by the parties to this Agreement.

16. **Further Assurances**

Developer and District agree to execute and deliver any documents and/or perform any acts which are reasonably necessary in order to carry out the intent of the parties with respect to this Agreement.

17. **No Joint Venture or Partnership**

District and Developer agree that nothing contained in this Agreement or in any document executed in connection with this Agreement shall be construed as making District and Developer joint venturers or partners.

18. **Notices**

Any notices or communications relating to this Agreement shall be given in writing and shall be deemed sufficiently given and served for all purposes when delivered, if (a) in person, (b) by facsimile (with the original delivered by other means set forth in this paragraph, (c) by generally recognized overnight courier or (d) by United States Mail, certified or registered mail, return receipt requested, postage

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

prepaid, to the respective addresses set forth below, or to such other addresses as the parties may designate from time to time by providing written notice of the change to the other party.

DEVELOPER	**DISTRICT**
Meritage Homes of California Inc. Northern California Division 1671 East Monte Vista Avenue, Ste 214 Vacaville, California 95688 Fax: (707) 359-2056 Attn: John Barnhart	Seyed Sadredin Executive Director/APCO 1990 E. Gettysburg Ave. Fresno, CA 93726 Phone: (559) 230-6000 Fax: (559) 230-6061

19. **Entire Agreement**

The terms of this Agreement, together with all attached exhibits, are intended by the parties as the complete and final expression of their agreement with respect to such terms and exhibits and may not be contradicted by evidence of any prior or contemporaneous agreement. This Agreement specifically supersedes any prior written or oral agreements between the parties with respect to the subject matter of this Agreement.

20. **Amendments and Waivers**

No addition to or modification of this Agreement shall be effective unless set forth in writing and signed by the party against whom the addition or modification is sought to be enforced. The party benefited by any condition or obligation may waive the same, but such waiver shall not be enforceable by another party unless made in writing and signed by the waiving party.

21. **Invalidity of Provisions**

If any provision of this Agreement as applied to either party or to any circumstance shall be adjudged by a court of competent jurisdiction to be void or unenforceable for any reason, the same shall in no way affect (to the maximum extent permissible by law) any other provision of this Agreement, the application of any such provision under circumstances different from those adjudicated by the court, or the

validity or enforceability of this Agreement as a whole. The parties further agree to replace any such invalid, illegal or unenforceable portion with a valid and enforceable provision, which will achieve, to the maximum extent legally possible, the economic, business or other purposes of the invalid, illegal or unenforceable portion.

2. **Construction**

Unless otherwise indicated, all paragraph references are to the paragraph of this Agreement and all references to days are to calendar days. Whenever, under the terms of this Agreement the time for performance of a covenant or condition falls upon a Saturday, Sunday or California state holiday, the time for performance shall be extended to the next business day. The headings used in this Agreement are provided for convenience only and this Agreement shall be interpreted without reference to any headings. Wherever required by the context, the singular shall include the plural and vice versa, and the masculine gender shall include the feminine or neuter genders, or vice versa. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. The language in all parts of this Agreement shall be construed as a whole in accordance with its fair meaning, and shall not be construed against any party solely by virtue of the fact that such party or its counsel was primarily responsible for its preparation.

23. **Governing Law**

This Agreement shall be governed by the laws of the State of California applicable to contracts made and to be performed in California.

24. **No Third-party Beneficiaries**

Nothing in this Agreement, express or implied, is intended to confer any rights or remedies under or by reason of this Agreement on any person other than the parties to it and their respective permitted successors and assigns, nor is anything in this Agreement intended to relieve or discharge any obligation of any third person to any party hereto or give any third person any right of subrogation or action over or against

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

any party to this Agreement.

25. **Exhibits**

The exhibits attached to this Agreement shall be deemed to be a part of this Agreement and are fully incorporated herein by reference.

26. **Force Majeure**

The time within which any party shall be required to perform under this Agreement shall be extended on a day-per-day basis for each day during which such performance is prevented or delayed by reason of events reasonably outside of the control of the performing party, including, without limitation, acts of God, events of destruction, acts of war, civil insurrection, strikes, shortages, governmental delays, moratoria, civil litigation and the like, and/or delays caused by the non-performing party's act or omission.

DESCRIPTION OF THE PROJECT

The Pillsbury Estates project (Tract No. 3512) is an approved 80.1 acre, 203 lot single family residential (R-1) zoning project that allows for an additional 71 lots upon rezone of the two adjacent parcels (currently R-3 and R-4 zoning). The project is located in the City of Manteca, County of San Joaquin and received its project approvals in 2007. As proposed, the project will be phased over six years with construction commencing in Spring 2013 and completion targeted for Spring of 2019.

RE: **ITEM NUMBER 9: APPROVE VOLUNTARY EMISSION REDUCTION AGREEMENT WITH CALIFORNIA RESOURCES PRODUCTION CORPORATION TO RECEIVE FUNDS IN THE ESTIMATED AMOUNT OF $186,701 TO MITIGATE AIR QUALITY IMPACTS OF THE PROPOSED BUENA VISTA NOSE AREA APPRAISAL PROJECT**

RECOMMENDATIONS:

1. Approve and authorize the Chair to sign the attached Voluntary Emission Reduction Agreement with California Resources Production Corporation.

2. Authorize staff to identify, fund and manage air quality projects to mitigate construction criteria pollution impacts associated with the Buena Vista Nose Area Appraisal Project.

BACKGROUND:

Since 2005, the District has entered into Voluntary Emission Reduction Agreements (VERAs) with project proponents to mitigate air quality impacts of their projects. These agreements benefit air quality by achieving additional reductions in emissions. The District has entered into 26 VERAs and to date has received over $13.5 million through the VERA process to invest in local emission reduction projects. Projects funded by the District have achieved total emission reductions of over 1,530 tons of Nitrogen Oxides (NOx), 185 tons Volatile Organic Compounds (VOC), and 113 tons of Particulate Matter 10 microns or less in size (PM10). The agreement before you today is similar to previous agreements approved by your Board.

California Resources Production Corporation (CRPC) has proposed the Buena Vista Nose Area Appraisal Project which consists of the construction of four new well pad sites, the expansion of one existing well pad site, and the drilling of nine exploratory oil and gas wells located eight miles northeast of the City of Taft (Project).

The Division of Oil, Gas, and Geothermal Resources (DOGGR) serves as lead agency for the Project under the California Environmental Quality Act (CEQA) and has approved and certified the Mitigated Negative Declaration (MND). Per the MND, CRPC is required to mitigate actual NOx emissions from Project construction to below the District's CEQA significance threshold to ensure a less than significant impact on air quality. The VERA proposed for your Board's consideration today implements that commitment.

ROLE OF VOLUNTARY EMISSION REDUCTION AGREEMENTS:

VERAs provide a mechanism under which project proponents can voluntarily enter into a contractual agreement with the District to mitigate their project's impacts on air quality. Once entered into, VERAs become legally enforceable mechanisms for achieving air quality mitigation.

Dollars provided by the project proponent are reinvested in the Valley to reduce emissions. Utilizing the District's highly successful grant administration program, the funds generated here will be awarded to Valley businesses, residents, and municipalities to generate real and quantifiable reductions in emissions. The following are some examples of how these funds can be utilized to reduce air pollution:

- Grants to Valley businesses and municipalities to replace old trucks with new low-emissions trucks
- Grants to Valley businesses and municipalities to electrify or replace existing diesel-powered off-road equipment
- Grants to Valley residents to replace fireplaces and non-certified wood burning stoves with clean-burning EPA certified units
- Grants to Valley residents through the District's Tune-In-Tune-Up program to repair older high-polluting vehicles
- Grants to Valley residents to purchase cleaner vehicles
- Grants to Valley school districts to replace older and high-polluting school buses

The emissions reductions secured through VERAs are "surplus" to existing regulations, achieving reductions earlier or beyond those required by regulations. Over the years, the District has built a reputation for excellence in the implementation of these programs, as highlighted in multiple audits by state agencies that lauded the District's incentive programs for their efficiency and effectiveness. The District's incentive programs have invested over $1 billion in public and private funding for clean air projects reducing more than 100,000 tons of emissions.

MITIGATION OF PROJECT EMISSIONS:

As required by the MND, CRPC has agreed to provide funds to the District to mitigate the air quality impact of NOx emissions from the construction of the Project to less than significant levels under CEQA. Given the District's experience in administering grants for emission reduction projects, with adequate funding, the District can bring about sufficient emission reductions from existing sources of emissions to mitigate the air emissions resulting from construction of this Project.

The District will receive funds from CRPC on an annual basis for the emissions above the significance thresholds projected in the MND to occur in the following year. The District will then implement emission reduction projects through its emissions reduction incentive programs. If actual emissions for that year exceed the estimates or if the District is unable to generate sufficient reductions with the initial funding, additional funding may be necessary. If actual emissions are lower than estimated, excess emissions reductions generated can be credited to the following year. CRPC's annual funding obligation will cease upon completion of the Project.

The MND estimated that, over a period of approximately three years, excess emissions may be as high as 19.2 tons of NOx emissions. While excess emissions are likely to be less, the District has used this high-end approximation to estimate that $186,701 will be necessary to mitigation excess NOx emissions. This amount includes a four percent (4%) administrative fee to cover the District's costs of administering the program:

Mitigation Funds:	$ 179,520
Admin. Fee (4%):	$ 7,181
Total	$ 186,701

All mitigation funds collected will be used for emission reduction projects to mitigate Project construction emissions impacts. To the extent possible, the emission reductions will be in place contemporaneously with construction of the Project, providing direct air quality benefits in the San Joaquin Valley. The District will establish a separate budgetary account for these funds, will provide routine tracking and status reports documenting fund expenditures and the emissions reductions achieved for the Project, and will certify to the lead agency and the project proponent the successful conclusion of mitigation obligations under the VERA.

FISCAL IMPACT:

Under the terms of the agreement, CRPC is expected to pay the District an estimated total of $179,520 in mitigation and $7,181 in administrative fees, for a total of $186,701. The District's proposed 2015-16 budget contains adequate revenue estimates and appropriations to facilitate the receipt of mitigation funds from CRPC and for expenditures of those funds in accordance with the VERA.

Attachment: Voluntary Emission Reduction Agreement No. 20150063 (20 pages)

San Joaquin Valley Unified Air Pollution Control District
Meeting of the Governing Board
June 18, 2015

APPROVE VOLUNTARY EMISSION REDUCTION AGREEMENT WITH CALIFORNIA RESOURCES PRODUCTION CORPORATION TO RECEIVE FUNDS IN THE ESTIMATED AMOUNT OF $186,701 TO MITIGATE AIR QUALITY IMPACTS OF THE PROPOSED BUENA VISTA NOSE AREA APPRAISAL PROJECT

Attachment:

Voluntary Emission Reduction Agreement No. 20150063
(20 Pages)

VOLUNTARY EMISSION REDUCTION AGREEMENT 20150063

This Voluntary Emission Reduction Agreement ("Agreement") is entered into as of _____ by and between CALIFORNIA RESOURCES PRODUCTION CORPORATION ("Developer") and the SAN JOAQUIN VALLEY UNIFIED AIR POLLUTION CONTROL DISTRICT, an air pollution control district formed pursuant to California Health and Safety Code section 40150, et seq. ("District").

RECITALS

WHEREAS, the Buena Vista Nose Area Appraisal Project ("Project"), located in Kern County and as more particularly described on Exhibit A attached hereto, is subject to the California Environmental Quality Act ("CEQA") codified at California Public Resources Code section 21000, et seq. and the Division of Oil, Gas and Geothermal Resources has approved and certified a Mitigated Negative Declaration; and

WHEREAS, the Project incorporates the design features specified on Exhibit B attached hereto and incorporated herein ("Emission Reduction Design Features"), in order to reduce the air quality impacts associated with the Project; and

WHEREAS, the Project, if constructed could result in oxides of nitrogen (NOx) emissions from construction exceeding the District's CEQA significance threshold of 10 tons per year and would cause impacts on air quality within the geographical boundaries of the San Joaquin Valley Unified Air Pollution Control District, as depicted on Exhibit C attached hereto and incorporated herein (the "District Boundaries"). Any amount of NOx emissions exceeding the District's NOx significance threshold is to be mitigated and are hereafter referred to as the "Required NOx Reductions"; and

WHEREAS, Developer desires to fully comply with all requirements of CEQA, including all requirements relating to the mitigation of air quality impacts arising from or in connection with the Project and each project phase; and

\\\

\\\

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

WHEREAS, District is an air pollution control district formed by the counties of Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus and Tulare, pursuant to California Health and Safety Code section 40150, et seq.; and

WHEREAS, District is responsible for developing and implementing air quality control measures within the District Boundaries, including air quality control measures for stationary sources, transportation sources, and indirect sources; and

WHEREAS, the District's incentive programs have been developed around several core principles, including cost-effectiveness, integrity, effective program administration, excellent customer service, the efficient use of District resources, fiscal transparency and public accountability; and

WHEREAS, the District's incentive programs are regularly audited by independent outside agencies including professional accountancy corporations on behalf of the federal government, the California Air Resources Board (ARB), the California Department of Finance and the California Bureau of State Audits; and

WHEREAS, District has determined that with appropriate funding, District can provide reductions of emissions through its incentive programs from certain projects in types and in sufficient quantities to mitigate the air quality criteria pollutant impacts of the Project as presented in Paragraph 1 below ("Mitigation of Project Related Impacts on Air Quality"); and

WHEREAS, Developer and District desire to enter into this Agreement in order to develop and implement air quality mitigation measures which will mitigate the project air impact and result in an estimated emission reduction of 19.2 tons of NOx (see Exhibit D for further details). As a result of the implementation of this Agreement the development of the Project will result in no increase in NOx emissions over the District's threshold of significance of 10 tons per year for NOx.

\\\

\\\

\\\

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

AGREEMENT

NOW THEREFORE, in exchange of the mutual covenants herein contained, Developer and District hereby agree as follows:

1. **Mitigation of Project Related Impacts on Air Quality**

The Developer shall mitigate the Project's actual Required NOx Reductions from construction by achieving surplus, quantifiable and enforceable emission reductions in accordance with Paragraph 3 ("Mitigation of Criteria Pollutants"). "Surplus" emission reductions are reductions that are not otherwise required by existing laws or regulations. The determination of whether emission reductions are surplus shall be performed by the District through its Incentive Programs.

Developer shall mitigate the Project's actual Required NOx Reductions by providing funds (Air Quality Mitigation Funds) to the District to execute Emission Reduction Projects through the Districts Incentive Programs (Emission Reduction Projects). The emission reductions achieved by the Emission Reduction Projects shall equal, or exceed, the actual Required NOx Reductions according to Paragraph 4.

2. **Timing of Air Quality Funds**

Developer may mitigate Project related air impacts at one time, or Developer may mitigate Project related air impacts consistent with defined project phases (Project Phase). For the purpose of this agreement, a Project Phase is any subset of the total Project which would result in air emissions. If Developer mitigates all Project related impacts at once, Developer shall provide the District with sufficient Air Quality Mitigation Funds to execute Emission Reduction Projects for Mitigation of Required NOx Reductions for the entire Project, as estimated in the Mitigated Negative Declaration, prior to ground-disturbance construction activity. If Developer mitigates Project air impacts in phases, Developer shall provide District with sufficient Air Quality Mitigation Funds, based on estimated Required NOx Reductions for the Project Phase in the Mitigated Negative Declaration prior to ground-disturbance construction activity for the Project Phase.

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

3. **Mitigation of Criteria Pollutants**

District shall credit Developer for all air quality mitigation measures brought about by this Agreement, including any emission reductions District achieves prior to the date Developer receives final approval of the Project from all applicable Governmental Authorities.

Developer shall advance to District a monetary sum equal to District's estimated cost per ton as set forth in Table 1 (Emission Reduction Cost Schedule) multiplied by the number of tons of Required NOx Reductions to be achieved, as estimated in the Mitigated Negative Declaration, plus an administrative cost of four (4) percent. District will identify Emission Reduction Projects from District's Incentive Programs and use said Air Quality Mitigation Funds to achieve emission reductions on behalf of Developer.

Table 1. Emission Reduction Cost Schedule

Criteria Pollutants	Construction Rate $/ton
NOx	$9,350

This per-ton cost is not a guarantee and only an estimate, but the District shall use every reasonable effort to accomplish average per-ton costs no higher than these Table 1 costs.

In the event District is unable to achieve the required reductions due to a shortfall in funding, District shall provide Developer a written statement of the amount of reductions that have been achieved. Developer shall have a reasonable time, not to exceed ninety (90) days, within which to provide District Air Quality Mitigation Funds based on the amount of emission reductions necessary to satisfy the terms specified in Paragraph 1.

4. **Project Related Construction Emissions**

4.1 **Actual Construction Emissions Assessment**

i. The Developer shall collect detailed daily construction information to determine the actual NOx construction emissions from the Project. To determine the

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

actual NOx construction emissions, the Developer shall perform an analysis approved by the District (such as a spreadsheet containing calculations using the most current emission factors for quantifying actual construction emissions). The construction information and the analysis shall be provided in a report (Construction Report).

ii. Construction information shall include emission sources associated with the on-site and off-site construction activities. For on-site construction activities, the Developer shall collect data for all off-road equipment by equipment type, engine horsepower, engine model year, and total daily hours of operation for each construction activity (i.e., site preparation, grading, paving, demolition, etc.). For off-site construction activities, the Developer shall collect all vehicle trips by general category of activity (employee and vendor travel or materials delivery), by vehicle type (i.e., auto, light-duty truck, heavy duty truck) and their associated total vehicle miles.

iii. The Developer shall submit to the District a Construction Report within thirty (30) days starting at the end of every twelve (12) month period following the start of construction. The District shall evaluate the Construction Report and provide its review in the Emission Reduction Status Report in accordance with Paragraph 4.2.

4.2 **Emission Reduction Status Reporting**

Upon the District's receipt of the Construction Report, the District shall have sixty (60) days to prepare and submit to the Developer an Emission Reduction Status Report ("Status Report"). This Status Report shall compare the emission reductions achieved to date to the actual emissions of NOx in the Construction Report to date.

5. **Phase Excess Emission Reductions**

If mitigating the Project by phases, Developer shall be credited with all excess NOx emission reductions achieved by District through this Agreement that exceed the amount of actual Required NOx Reductions for the Project Phase ("Phase Excess Emission Reduction"). District shall credit the Phase Excess Emission Reduction toward the next Project Phase.

\\\

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

6. **Project Excess Emission Reductions**

Developer shall be credited with all excess NOx emission reductions achieved by District through this Agreement that exceed the amount of actual Required NOx Reductions for the Project as a whole ("Project Excess Emission Reduction"). Developer shall have two years from the date the reductions are identified as an Excess Emission Reduction, with the ability to extend an additional two years based on economic conditions, to transfer the Project Excess Emission Reduction, if determined by District to be surplus at the time of transfer, to another project owned by Developer that is located in the San Joaquin Valley Air Basin. Developer must provide District written request notification of the transfer.

7. **Refunds**

After the end of the construction for the Project and upon verification by District that all actual Required NOx Reductions from the Project have been mitigated, District shall refund Developer any unused Air Quality Mitigation Funds. District shall have a reasonable time, not to exceed sixty (60) days, to refund Developer.

8. **District's Obligation**

8.1 **Funding Agreements**

District shall use diligent efforts to enter into Funding Agreements for Emission Reduction Projects with owners and/or operators of pollution source equipment within one hundred eighty (180) days of the District's receipt of Air Quality Funds.

8.2 **Oversight of Funding Agreements**

District shall ensure that the owners/operators of equipment subject to Funding Agreements perform all obligations to be performed on the part of such parties under said Funding Agreements.

8.3 **Oversight of Air Quality Mitigation Monitoring Plan**

Upon request of the CEQA lead agency for the Project, District shall oversee that portion of the mitigation monitoring plan adopted by the lead agency for the Project which relates to the mitigation brought about by Paragraph 1 of this Agreement.

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

Alternatively, upon request of the Project's CEQA lead agency, District shall cooperate with the lead agency in the oversight of that portion of the mitigation monitoring plan adopted by the lead agency for the Project which relates to the mitigation brought about by Paragraph 1 of this Agreement.

8.4 **Documentation, Record Keeping and Monitoring**

District shall document, keep adequate records on and monitor the emission reductions brought about as a result of this Agreement, and shall, upon written request by Developer or by the lead agency for the Project, provide Developer or lead agency written reports verifying achieved emission reductions and/or emission reductions being brought about to mitigate Project related impacts on air quality.

8.5 **Achievement of Emission Reductions**

For and in exchange of Developer's payment of funds pursuant to Paragraph 2 above, District shall ensure, by way of entering into, funding and enforcing the Funding Agreements in accordance with the provisions of Paragraph 8.2 (Oversight of Funding Agreements), that the Project achieves the required emission reductions to the extent specified in the environmental review document certified by the Lead Agency.

8.6 **Acknowledgement Regarding Mitigation**

Upon successful fulfillment of mitigation of NOx identified pursuant to Paragraph 2, District shall verify in writing to Developer and to the Lead Agency that Project related impacts on air quality have been mitigated as set forth in Paragraph 1 (Mitigation of Project Related Impacts on Air Quality).

9. **Subsequent Litigation, Legislation and/or Administrative Action / Credit to Developer**

In the event that despite this Agreement, Developer is required as a result of a final judgment or District Approved Settlement (as defined below) in any third party litigation, to pay monies in addition to the monies to be paid by Developer pursuant to Paragraph 3 (Mitigation of Criteria Pollutants) above, then District shall acknowledge and credit Developer with the emission reductions achieved pursuant to Paragraph 1

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

(Mitigation of Project Related Impacts on Air Quality) and any additional emission reductions achieved to mitigate the Project related impacts on air quality that will result from Developer's payment of such additional monies. For purposes of this Paragraph, a "District Approved Settlement" shall mean a settlement of a lawsuit filed pursuant to CEQA, the National Environmental Protection Act or other applicable environmental law which (i) provides for Developer's payment of monies in exchange for a dismissal of such lawsuit, (ii) provides for the use of such monies by the petitioner in such lawsuit in such a manner as to mitigate adverse air quality impacts of the Project, and (iii) is approved in writing by District. The District shall have no authority to commit the Developer's money in any settlement of a third party lawsuit without the Developer's consent.

10. **Term of Agreement**

This Agreement shall be effective upon the date first written above, and shall terminate upon District's meeting its obligation to implement projects that provide necessary emissions reductions to mitigate the Project related air impacts. Developer may, at any time by written notice to District, terminate this Agreement, whereupon, (i) District shall acknowledge in writing to the Lead Agency that Developer has mitigated air quality impacts of the Project to the extent and in the types and quantities brought about by Funding Agreements and Mitigation Measures, (ii) District shall refund to Developer any unused portion of Developer's Air Quality Mitigation Funds less any unpaid administrative costs incurred; and (iii) neither Developer nor District shall have any further rights or obligations under this Agreement except as expressly provided. District's obligations to oversee implementation of Funding Agreements pursuant to Paragraph 8.2 (Oversight of Funding Agreements) and to ensure that required emission reductions are achieved, pursuant to Paragraph 8.5 (Achievement of Emission Reductions), shall remain effective for as long as necessary to ensure that the anticipated emission reductions continue to be achieved to the extent specified in the environmental review document certified by the Lead Agency.

11. **Representations, Covenants and Warranties**

11.1. **Developer's Representations, Covenants and Warranties**.

Developer represents, covenants and warrants to District, as of the date of this Agreement, as follows:

11.1.1. The undersigned representatives of Developer are duly authorized to execute, deliver and perform this Agreement, and upon Developer's execution and delivery of this Agreement, this Agreement will have been duly authorized by Developer.

11.1.2. Upon execution and delivery of this Agreement by Developer, Developer's obligations under this Agreement shall be legal, valid and binding obligations of Developer, duly enforceable at law and in equity in accordance with the terms and conditions of this Agreement.

11.1.3. There is no lawsuit, legal action, arbitration, legal or administrative proceeding, legislative quasi-legislative or administrative action or claim existing, pending, threatened or anticipated which would render all or any portion of this Agreement invalid, void or unenforceable in accordance with the terms and conditions thereof.

11.1.4. Other than the execution and delivery of this Agreement by the undersigned representatives of Developer, there are no approvals, consents, confirmations, proceedings, or other actions required by Developer or any third party, entity or agency in order to enter into and carry out the terms, conditions and intent of the parties with respect to this Agreement, except as required to enter Funding Agreements.

11.2. **District's Representations, Covenants and Warranties**

District represents, covenants and warrants to Developer, as of the date of this Agreement, as follows:

11.2.1. The undersigned representatives of District are duly authorized to execute, deliver and perform this Agreement, and upon District's

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726
(559) 230-6000

execution and delivery of this Agreement, this Agreement will have been duly authorized by District.

11.2.2. Upon execution and delivery of this Agreement by District, District's obligations under this Agreement shall be legal, valid and binding obligations of District, duly enforceable at law and in equity in accordance with the terms and conditions of this Agreement.

11.2.3. There is no lawsuit, legal action, arbitration, legal or administrative proceeding, legislative, quasi-legislative or administrative action or claim existing, pending, threatened or anticipated which would render all or any portion of this Agreement invalid, void or unenforceable in accordance with the terms and conditions thereof.

11.2.4. Other than the execution and delivery of this Agreement by the undersigned representatives of District, there are no approvals, consents, confirmations, proceedings, or other actions required by District or any third party, entity or agency in order to enter into and carry out the terms, conditions and intent of the parties with respect to this Agreement, except as required to enter Funding Agreements

11.2.5. The monies paid by Developer under this Agreement shall be sufficient to ensure that the emission reduction contemplated by this Agreement shall occur, and District shall utilize such monies in such a manner as to ensure that such emission reduction shall occur.

11.2.6. Upon the approval of this Agreement by the governing board of District, the Air Pollution Control Officer of District, or equivalent representative, or a delegee of such officer, shall have the authority to approve, deliver, verify, enter into, acknowledge and/or accept any communication, notice, notification, verification, agreement and/or other document to be issued or entered into by District under the terms and conditions of this Agreement, without further approval of the governing board of District.

SJVUAPCD

Fresno, CA 93726
(559) 230-6000

12. **Indemnification**

Developer agrees to indemnify, defend and hold harmless District for, from and in connection with any third party claims, losses and/or liabilities arising from or in connection with District's performance of this Agreement, excluding only such claims, losses and/or liabilities which result from or are in connection with District's sole negligence, act or omission.

13. **Inurement**

Developer's rights and obligations under this Agreement, or applicable portions thereof, shall run with the land encompassed by the Project, and shall inure to the benefit of and be binding upon the heirs, successors and assigns of Developer who take title to such lands or applicable portions thereof. Upon Developer's conveyance of all or any portion of the lands encompassed by the Project, the rights and obligations of Developer under this Agreement shall, to the extent applicable to the lands so conveyed, be transferred to the transferee thereof, and Developer shall thereupon be released by District from, all obligations and liabilities so assigned, except for such obligations and liabilities arising prior to such transfer.

14. **Assignment**

Developer shall have no right to assign all or any part of its rights and/or obligations under this Agreement without the District's written consent. In the event the District does give consent to any such assignment, the District, the third party assignee and Developer shall enter into an amendment and novation of this Agreement which acknowledges the assignment and conforms the various provisions of this Agreement as may be required to be conformed in order to provide to the assignee the rights and benefits of this Agreement as if such assignee and its project were the original party and project contemplated in this Agreement.

15. **Recitals Incorporated**

The recitals set forth hereinabove are hereby incorporated into this Agreement and acknowledged, agreed to and adopted by the parties to this Agreement.

16. **Further Assurances**

Developer and District agree to execute and deliver any documents and/or perform any acts which are reasonably necessary in order to carry out the intent of the parties with respect to this Agreement.

17. **No Joint Venture or Partnership**

District and Developer agree that nothing contained in this Agreement or in any document executed in connection with this Agreement shall be construed as making District and Developer joint venturers or partners.

18. **Notices**

Any notices or communications relating to this Agreement shall be given in writing and shall be deemed sufficiently given and served for all purposes when delivered, if (a) in person, (b) by facsimile (with the original delivered by other means set forth in this paragraph, (c) by generally recognized overnight courier or (d) by United States Mail, certified or registered mail, return receipt requested, postage prepaid, to the respective addresses set forth below, or to such other addresses as the parties may designate from time to time by providing written notice of the change to the other party.

Fax: (661) 869-8024	Fax: (559) 230-6061

19. **Entire Agreement**

The terms of this Agreement, together with all attached exhibits, are intended by the parties as the complete and final expression of their agreement with respect to such terms and exhibits and may not be contradicted by evidence of any prior or contemporaneous agreement. This Agreement specifically supersedes any prior

written or oral agreements between the parties with respect to the subject matter of this Agreement.

20. **Amendments and Waivers**

No addition to or modification of this Agreement shall be effective unless set forth in writing and signed by the party against whom the addition or modification is sought to be enforced. The party benefited by any condition or obligation may waive the same, but such waiver shall not be enforceable by another party unless made in writing and signed by the waiving party.

21. **Invalidity of Provisions**

If any provision of this Agreement as applied to either party or to any circumstance shall be adjudged by a court of competent jurisdiction to be void or unenforceable for any reason, the same shall in no way affect (to the maximum extent permissible by law) any other provision of this Agreement, the application of any such provision under circumstances different from those adjudicated by the court, or the validity or enforceability of this Agreement as a whole. The parties further agree to replace any such invalid, illegal or unenforceable portion with a valid and enforceable provision, which will achieve, to the maximum extent legally possible, the economic, business or other purposes of the invalid, illegal or unenforceable portion.

22. **Construction**

Unless otherwise indicated, all paragraph references are to the paragraph of this Agreement and all references to days are to calendar days. Whenever, under the terms of this Agreement the time for performance of a covenant or condition falls upon a Saturday, Sunday or California state holiday, the time for performance shall be extended to the next business day. The headings used in this Agreement are provided for convenience only and this Agreement shall be interpreted without reference to any headings. Wherever required by the context, the singular shall include the plural and vice versa, and the masculine gender shall include the feminine or neuter genders, or vice versa. This Agreement may be executed in one or more counterparts, each of

SJVUAPCD
1990 E. Gettysburg
Fresno, CA 93726

which shall be deemed an original, but all of which together shall constitute one and the same instrument. The language in all parts of this Agreement shall be construed as a whole in accordance with its fair meaning, and shall not be construed against any party solely by virtue of the fact that such party or its counsel was primarily responsible for its preparation.

23. **Governing Law**

23.1 The rights and obligations of the parties and the interpretation and performance of this Agreement shall be governed in all respects by the laws of the State of California.

23.2 Venue for any action arising out of or relating to this Agreement shall be in Fresno County, California.

24. **No Third-party Beneficiaries**

Nothing in this Agreement, express or implied, is intended to confer any rights or remedies under or by reason of this Agreement on any person other than the parties to it and their respective permitted successors and assigns, nor is anything in this Agreement intended to relieve or discharge any obligation of any third person to any party hereto or give any third person any right of subrogation or action over or against any party to this Agreement.

25. **Exhibits**

The exhibits attached to this Agreement shall be deemed to be a part of this Agreement and are fully incorporated herein by reference.

26. **Force Majeure**

The time within which any party shall be required to perform under this Agreement shall be extended on a day-per-day basis for each day during which such performance is prevented or delayed by reason of events reasonably outside of the control of the performing party, including, without limitation, acts of God, events of destruction, acts of war, civil insurrection, strikes, shortages, governmental delays, moratoria, civil litigation and the like, and/or delays caused by the non-performing

party's act or omission.

IN WITNESS WHEREOF, Developer and District have executed this Agreement and agree that it shall be effective as of the date first written above.

EXHIBIT A

DESCRIPTION OF THE PROJECT

The Project consists of the construction of four new 11.2-acre well pad sites (sites), the expansion of one existing site from 2.5 acres to 11.2 acres, and the drilling of nine new exploratory oil and gas wells on the five sites. Subsurface gathering lines will be installed to connect the new sites to existing processing infrastructure. The proposed wells will be located in Section 31 of Township 31 South, Range 25 East, and Sections 4, 10, 14, and 15 of Township 32 South, Range 25 East, Mount Diablo Base and Meridian (MDB&M), east of the established Buena Vista Oilfield in Western Kern County.

The purpose of the proposed Project is to appraise leased mineral rights for commercial hydrocarbon resource recovery, which depends on multiple variables including fluid and rock properties, production characteristics and Project economics. This information would enable California Resources Production Corporation to characterize future investment and refine development strategies to limit surface and subsurface impacts.

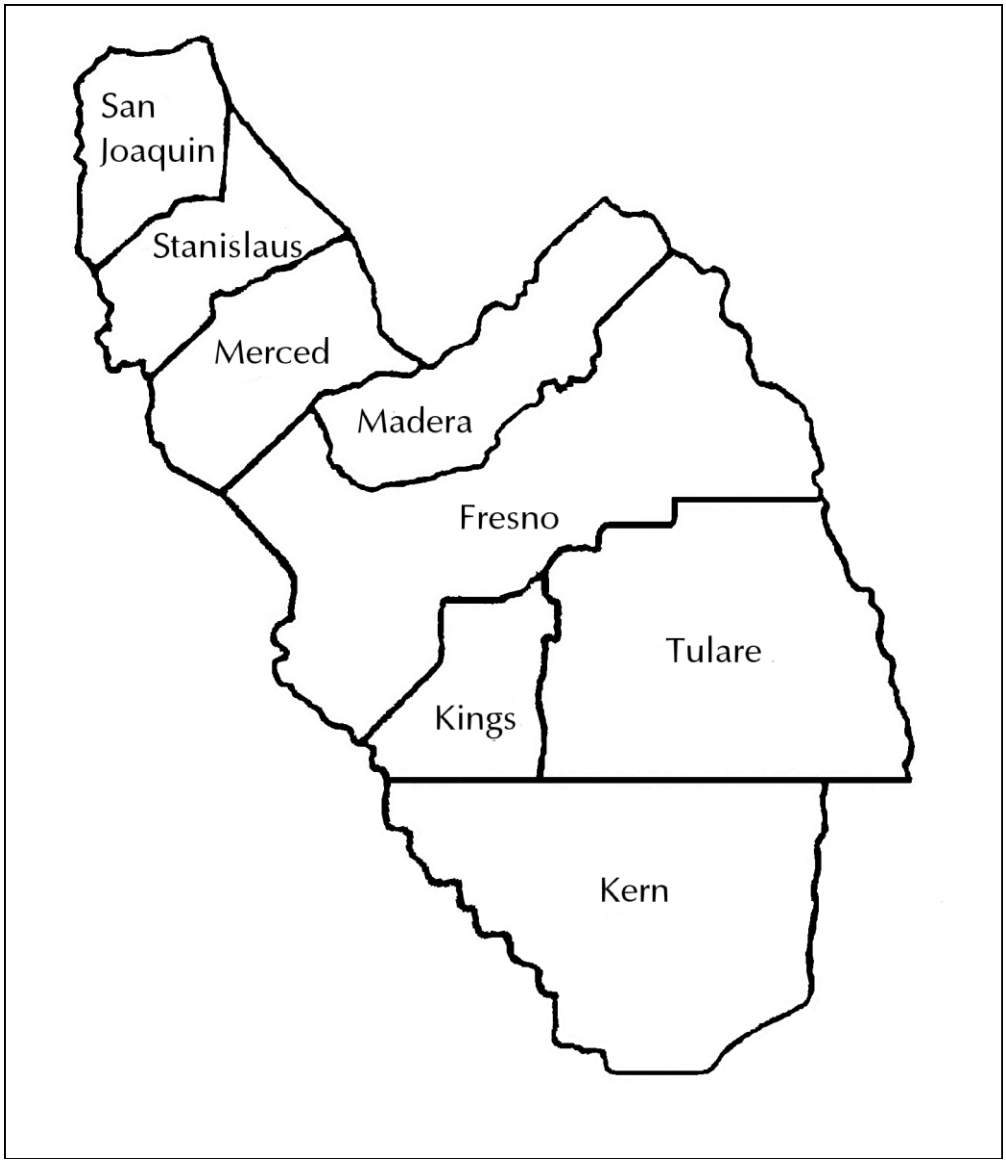
EXHIBIT B

EMISSION REDUCTION DESIGN FEATURES



Mitigation Measure AQ-1: Vintage (also known as California Resources Production Corporation) shall use engines that meet EPA Tier 2 engine emission standards on drill rigs and well service rigs, per SJVAPCD State Implementation Plan (SIP) goals and requirements.

Mitigation Measure AQ-3: In addition to implementing required control measures in Regulation VIII, Vintage (also known as California Resources Production Corporation) shall implement the Enhanced Control Measure of limiting traffic speeds on unpaved roads to 15 miles per hour (mph).
