An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

SOUTH SITE
E PALM CANYON DR
CATHEDRAL CITY, CA 92234

TARGET PROPERTY COORDINATES

Latitude (North):	33.777635 - 33° 46' 39.49''
Longitude (West):	116.461405 - 116° 27' 41.06''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	549868.7
UTM Y (Meters):	3737437.5
Elevation:	332 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5639316 CATHEDRAL CITY, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

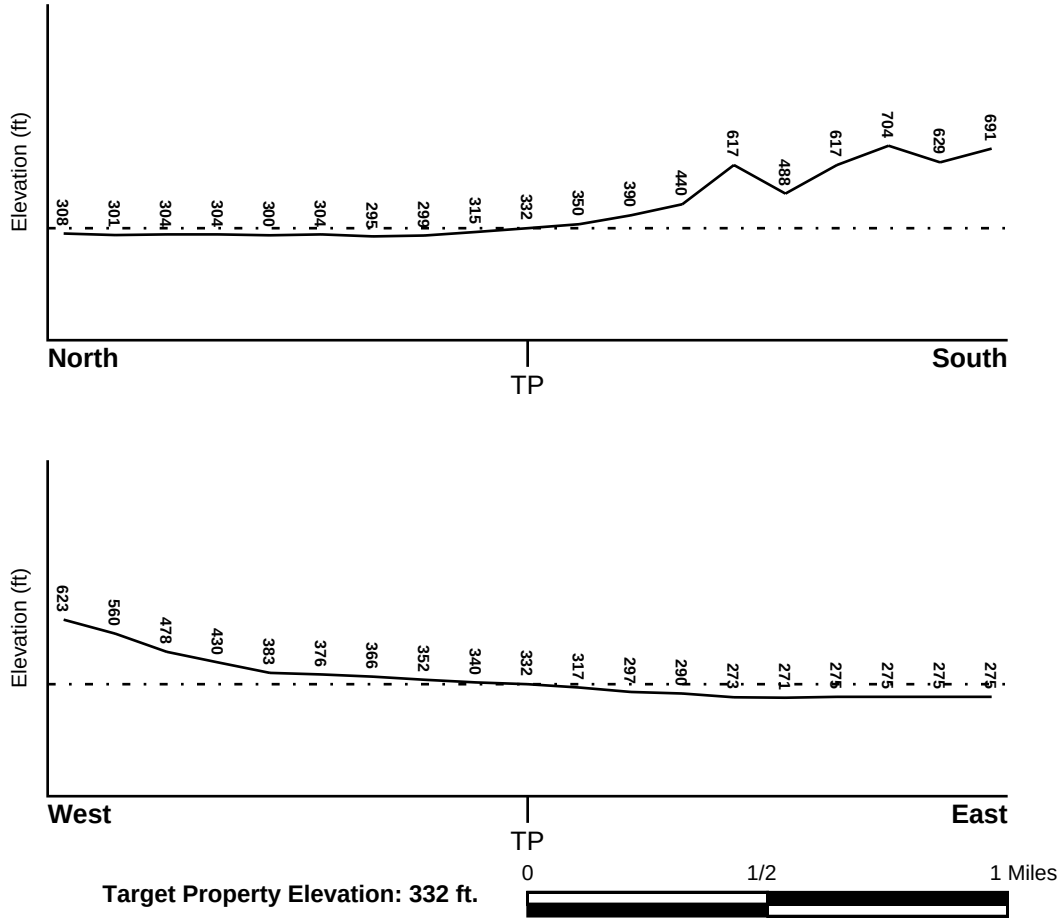
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C1589G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06065C1588G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CATHEDRAL CITY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Carsitas

Soil Surface Texture: cobbly sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	cobbly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9
2	9 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: Carsitas

Soil Surface Texture: gravelly sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9
2	9 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: Rock outcrop

Soil Surface Texture: unweathered bedrock

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	59 inches	unweathered bedrock	Not reported	Not reported	Max: 141 Min: 0.07	Max: Min:

Soil Map ID: 4

Soil Component Name: Coachella

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	11 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish & Game
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Contact: Katherine Green

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ANALYTICAL ENVIRONMENTAL SERVICES were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # F318-42FF-87B6

Agua Caliente Cathedral City FTT Casino Project

Project-Specific Inputs for the Agua Caliente Cathedral City FTT Casino Project

Input	Type of Input	Project Specific Inputs	
		Inputs	Source/Notes
Project Name	Project Name	Agua Caliente Cathedral City FTT Casino Project – Alternative A	Project Description
Project Location	County	Riverside County	Modeler, based on location
Climate zone	Climate Zone Number	10	Appendix F of CalEEMod User Guide Climate Zones Lookup
Land Use Setting	Urban or Rural	Urban	Modeler, based on proximity of project site to airport and Tulare
Start of Construction	Date	June 1, 2018	Based on an 18 month construction schedule and an opening date in 2020.
Operational Year	1st year of operation after full buildout.	2020	Appendix TIS
Utility Company	Utility Company Name	Southern California Edison	CEC, 2015
Land Use Type and Subtype	Residential, Commercial, Recreation, etc.	See **Table 1.**	See **Table 1.**
Unit Amount	Size of Buildings or Number of units for each Land Use Type.	See **Table 1.**	See **Table 1.**
Lot Acreage	Acreage of each Land Use Type	See **Table 1.**	See **Table 1.**
Population	Population based on persons/household	See **Table 1.**	See **Table 1.**
Construction Phases	Type of construction phase (Demo, Site Prep, etc.) and beginning and ending dates	See **Table 2.**	See **Table 2.**
Off-Road Equipment	Type of equipment (Excavator, Dozer, etc.) and number of units per construction phase	See **Table 2.**	See **Table 2.**
Demolition	Sq ft or tons of Demo	--	--
Construction Trip Gen Rate	Average number of one-way trips per day	See **Table 2.**	See **Table 2.**
Operational Trip Reductions	% reduction in trips.	60% internal capture rate	Traffic Impact Analysis for Agua Caliente Casino (Appendix TIS)

Input	Type of Input	Project Specific Inputs	
		Inputs	**Source/Notes**
Operational Trip Gen Rate and trip length	Trips and trip lengths	See **Table 3**.	See **Table 3**.
Area Sources	Hearths – # of wood-burning fireplaces, #of gas fireplaces, and # of units with no fireplace.	Not Applicable	No hearths are included in the project design.
	Landscape Equipment - % of equipment that is electric.	--	--
Energy Use	Project Specific Emission Factors.	See **Table 4**.	See **Table 4**.
Water and Wastewater	Indoor and outdoor water use for each Land Use Subtype in gallons per year.	See **Table 1.**	Water demand based on like projects and scaled by square footage
Solid waste	Tons of solid waste generated per year	375.95 tons/year	Section 4.9 of the EA
	Land Fill Gas Capture Rate	94%	CARB Mandatory Reporting Regulation Guidance
Operational off-road equipment	Excavator, Dozer, etc.	--	--
Stationary Sources	Emergency Generators/Fire Pumps	Three 2,923 Horsepower emergency gen/sets operating 30 hours per year Three 0.5 MMBtu/hr CNG boilers	Based on like project emergency gen/set size and use.
Land Use Change	Vegetation land use type (cropland, etc.) and initial and final acreage	--	--
Sequestration	Type and net number of new trees added	--	--

Table 1 – Land Use Inputs Alternative A

Land Use Type	Land Use Subtype	Unit Amount	Size Metric[1]	Lot Acreage[2]	Square Feet	Population	Indoor Water Demand (gal/yr)[3]	Outdoor Water Demand (gal/yr)[3]
Recreation	User Defined Recreation (Casino - Gaming Floor)	40	TSF	13.68	40,000	0	15,931,489	6,928,889
Retail	Shopping Center	24	TSF	0	24,000	0	Default	Default
Recreational	High-Turnover Sit-Down Restaurant	14	TSF	0	14,000	0	Default	Default
Recreational	Quality Restaurant	14	TSF	0	14,000	0	Default	Default
Recreational	Fast Casual Restaurant	6	TSF	0	6,000	0	Default	Default
Recreational	Coffee/Donut Shop Without Drive-Through Window	2	TSF	0	2,000	0	Default	Default
Parking	Parking Lot	1,000	Spaces	0	Default	0	Default	Default

[1] TSF = Thousand Square Feet
[2] Development of Alternative A would occur on the 13.68-acre North Site; all Retail and Recreational land use acreages are included within the Recreation land use acreage in this analysis. The parking lot acreage is based on CalEEMod defaults for a 1000-space parking lot.
[3] Water demand is based off of similar projects and scaled by square footage.

Table 2 – Construction Equipment Usage

Equipment	Construction Phase Activities				
	Site Preparation	Grading	Construction	Paving	Architectural Coating
	1/1/2019 - 1/14/2019	1/152019 - 2/25/2019	2/26/2019 - 11/5/2019	11/6/2019 - 12/3/2019	12/4/2019 - 12/31/2019

[1] Based on raw import volumes (MSA Consulting, Inc., 2018a)

Table 3 – Trip Generation Rates

Land Use	Daily Trip Generation Rate[1]	Trip Length (miles)			Trip Type (%)[2]			Trip Purpose (%)		
		C-C	C-W	C-NW	Primary	Diverted	Pass-B	C-C	C-W	C-NW
User Defined Recreation (Casino - Gaming Floor)	93	Default	Default	Default	100	0	0	80	15	5
Shopping Center	36	Default	Default	Default	100	0	0	Default	Default	Default
High-Turnover Sit-Down Restaurant	45.52	Default	Default	Default	100	0	0	Default	Default	Default
Quality Restaurant	17.18	Default	Default	Default	100	0	0	Default	Default	Default
Fast Casual Restaurant	159.63	Default	Default	Default	100	0	0	Default	Default	Default
Coffee/Donut Shop Without Drive-Through Window	287.93	Default	Default	Default	100	0	0	Default	Default	Default
Parking Lot	0	0	0	0	0	0	0	0	0	0

[1] Trip generation rates used in CalEEMod include internal capture trips between retail, restaurant, and casino uses and are based off of the TIS (Appendix TIS). Table 4 shows trip generation rates used in the TIS along with the number of internal capture trips for each land use.
[2] All trip types are assumed to be primary as internal capture trips are included within the trip generation rate.

Table 4 – Trip Generation Rates and Average Daily Trips

Land Use	Size	Units[1]	Trip Generation Rate	Trips per Day	Trip Generation Rate (w/Internal Capture)[2]	Trips per Day (w/Internal Capture)
Casino	40	TSF	93	3,720	93	3,720
Subtotal: Casino				**3,720**		**3,720**
Shopping Center (820)	24	TSF	Fitted Curve[3]	2,278	36	872
Internal Capture (Retail - Restaurant)				*98*		
Internal Capture (Retail - Casino)				*1,308*		
Subtotal: Shopping Center (820)				**872**		**872**
High-Turnover Sit-Down Restaurant (932)	14	TSF	112.18	1,571	45.52	637
Quality Restaurant (931)	14	TSF	83.84	1,174	17.18	241
Fast Casual Restaurant (930)	6	TSF	315.17	1,891	159.63	958
Coffee/Donut Shop Without Drive-Through Window (936)	2	TSF	754.55	1,509	287.93	576
Internal Capture (Restaurant - Retail)				*113*		
Internal Capture (Restaurant - Casino)				*3,620*		
Subtotal: Restaurants (932, 931, 930, 936)				**2,413**		**2,413**
Project Total				**7,005**		**7,005**

[1] TSF = Thousand Square Feet

[2] Trip Generation Rate (w/Internal Capture) indicates reduced trip generation rates that account for the internal capture trips between retail, restaurant, and casino land uses.

[3] The equation of the fitted curve line was used to determine daily trips for the Shopping Center (820) land use; the TIS determined that the fitted curve line more accurately shows the trend in shopping centers than the average rate line. The equation of the fitted curve line is: Ln(T) = 0.68LN(X) + 5.57, where T is equal to the number of trip ends and X is equal to the square feet of the shopping center.

Table 5 – Energy Use

Land Use Subtype	Title-24 Electricity Energy Intensity (KWhr/size/yr)	Nontitle-24 Electricity Energy Intensity (KWhr/size/yr)[1]	Lighting Energy Intensity (KWhr/size/yr)	Title-24 Natural Gas Intensity (KBtu/size/yr)	Non-title-24 Natural Gas Intensity (KBtu/size/yr)[1]
User Defined Recreation (Casino - Gaming Floor)	--	3.37	--	--	560.88
Shopping Center	Default	Default	Default	Default	Default
High-Turnover Sit-Down Restaurant	Default	Default	Default	Default	Default
Quality Restaurant	Default	Default	Default	Default	Default
Fast Casual Restaurant	Default	Default	Default	Default	Default
Coffee/Donut Shop Without Drive-Through Window	Default	Default	Default	Default	Default
Parking Lot	Default	Default	Default	Default	Default

[1] Electricity energy and natural gas intensity determined from similar projects and scaled by square footage.

Table 6 – Off-Road Equipment Mitigation Inputs

Equipment Type	Engine Tier	Number of Equipment Mitigated	Diesel Particulate Filter (DPF) Level 2014
All Equipment	Tier 3	All	Level 3
Scrapers	No Change	0	No Change

Mitigation Measures

- The Tribe shall use Tier 3 construction equipment (with the exception of Tier 3 Scrapers, which are not widely available), using a minimum of 90 percent of the equipment's total horsepower, as well as construction equipment with Level 3 diesel particulate filters (DPF);
- The Tribe shall use soil stabilizer on unpaved roads;
- The Tribe shall apply water to exposed construction areas twice a day;
- The Tribe shall restrict vehicle speeds on the construction site to 15 miles per hour;
- The Tribe shall use energy efficient lighting;
- The Tribe shall use low-flow faucets, toilets, and showers; and
- The Tribe shall use low VOC architectural coatings.

Agua Caliente Cathedral City FTT Casino Project

Project-Specific Inputs for the Agua Caliente Cathedral City FTT Casino Project

Input	Type of Input	Project Specific Inputs	
		Inputs	Source/Notes
Project Name	Project Name	Agua Caliente Cathedral City FTT Casino Project – Alternative B	Project Description
Project Location	County	Riverside County	Modeler, based on location
Climate zone	Climate Zone Number	10	Appendix F of CalEEMod User Guide Climate Zones Lookup
Land Use Setting	Urban or Rural	Urban	Modeler, based on proximity of project site to airport and Tulare
Start of Construction	Date	June 1, 2018	Based on an 18 month construction schedule and an opening date in 2020.
Operational Year	1st year of operation after full buildout.	2020	Appendix TIS
Utility Company	Utility Company Name	Southern California Edison	CEC, 2015
Land Use Type and Subtype	Residential, Commercial, Recreation, etc.	See **Table 1.**	See **Table 1.**
Unit Amount	Size of Buildings or Number of units for each Land Use Type.	See **Table 1.**	See **Table 1.**
Lot Acreage	Acreage of each Land Use Type	See **Table 1.**	See **Table 1.**
Population	Population based on persons/household	See **Table 1.**	See **Table 1.**
Construction Phases	Type of construction phase (Demo, Site Prep, etc.) and beginning and ending dates	See **Table 2.**	See **Table 2.**
Off-Road Equipment	Type of equipment (Excavator, Dozer, etc.) and number of units per construction phase	See **Table 2.**	See **Table 2.**
Demolition	Sq ft or tons of Demo	--	--
Construction Trip Gen Rate	Average number of one-way trips per day	See **Table 2.**	See **Table 2.**

Input	Type of Input	Project Specific Inputs	
		Inputs	**Source/Notes**
Operational Trip Reductions	% reduction in trips.	60% internal capture rate	Traffic Impact Analysis for Agua Caliente Casino (Appendix TIS)
Operational Trip Gen Rate and trip length	Trips and trip lengths	See **Table 3**.	See **Table 3**.
Area Sources	Hearths – # of wood-burning fireplaces, #of gas fireplaces, and # of units with no fireplace.	Not Applicable	No hearths are included in the project design.
	Landscape Equipment - % of equipment that is electric.	--	--
Energy Use	Project Specific Emission Factors.	See **Table 4**.	See **Table 4**.
Water and Wastewater	Indoor and outdoor water use for each Land Use Subtype in gallons per year.	See **Table 1.**	Water demand based on like projects and scaled by square footage
Solid waste	Tons of solid waste generated per year	375.95 tons/year	Section 4.9 of the EA
	Land Fill Gas Capture Rate	94%	CARB Mandatory Reporting Regulation Guidance
Operational off-road equipment	Excavator, Dozer, etc.	--	--
Stationary Sources	Emergency Generators/Fire Pumps	Three 2,923 Horsepower emergency gen/sets operating 30 hours per year Three 0.5 MMBtu/hr boilers	Based on like project emergency gen/set size and use.
Land Use Change	Vegetation land use type (cropland, etc.) and initial and final acreage	--	--
Sequestration	Type and net number of new trees added	--	--

Table 6 – Off-Road Equipment Mitigation Inputs

Equipment Type	Engine Tier	Number of Equipment Mitigated	Diesel Particulate Filter (DPF) Level 2014
All Equipment	Tier 3	All	Level 3
Scrapers	No Change	0	No Change

Mitigation Measures

- The Tribe shall use Tier 3 construction equipment (with the exception of Tier 3 Scrapers, which are not widely available), using a minimum of 90 percent of the equipment's total horsepower, as well as construction equipment with Level 3 diesel particulate filters (DPF);
- The Tribe shall use soil stabilizer on unpaved roads;
- The Tribe shall apply water to exposed construction areas twice a day;
- The Tribe shall restrict vehicle speeds on the construction site to 15 miles per hour;
- The Tribe shall use energy efficient lighting;
- The Tribe shall use low-flow faucets, toilets, and showers; and
- The Tribe shall use low VOC architectural coatings.

Agua Caliente Cathedral City FTT Casino Project

Project-Specific Inputs for the Agua Caliente Cathedral City FTT Casino Project

Input	Type of Input	Project Specific Inputs	
		Inputs	Source/Notes
Project Name	Project Name	Agua Caliente Cathedral City FTT Casino Project – Alternative C	Project Description
Project Location	County	Riverside County	Modeler, based on location
Climate zone	Climate Zone Number	10	Appendix F of CalEEMod User Guide Climate Zones Lookup
Land Use Setting	Urban or Rural	Urban	Modeler, based on proximity of project site to airport and Tulare
Start of Construction	Date	June 1, 2018	Based on an 18 month construction schedule and an opening date in 2020.
Operational Year	1st year of operation after full buildout.	2020	Appendix TIS
Utility Company	Utility Company Name	Southern California Edison	CEC, 2015
Land Use Type and Subtype	Residential, Commercial, Recreation, etc.	See **Table 1.**	See **Table 1.**
Unit Amount	Size of Buildings or Number of units for each Land Use Type.	See **Table 1.**	See **Table 1.**
Lot Acreage	Acreage of each Land Use Type	See **Table 1.**	See **Table 1.**
Population	Population based on persons/household	See **Table 1.**	See **Table 1.**
Construction Phases	Type of construction phase (Demo, Site Prep, etc.) and beginning and ending dates	See **Table 2.**	See **Table 2.**
Off-Road Equipment	Type of equipment (Excavator, Dozer, etc.) and number of units per construction phase	See **Table 2.**	See **Table 2.**
Demolition	Sq ft or tons of Demo	--	--
Construction Trip Gen Rate	Average number of one-way trips per day	See **Table 2.**	See **Table 2.**

Input	Type of Input	Project Specific Inputs	
		Inputs	Source/Notes
Operational Trip Reductions	% reduction in trips.	60% internal capture rate	Traffic Impact Analysis for Agua Caliente Casino (Appendix TIS)
Operational Trip Gen Rate and trip length	Trips and trip lengths	See **Table 3**.	See **Table 3**.
Area Sources	Hearths – # of wood-burning fireplaces, #of gas fireplaces, and # of units with no fireplace.	Not Applicable	No hearths are included in the project design.
	Landscape Equipment - % of equipment that is electric.	--	--
Energy Use	Project Specific Emission Factors.	See **Table 4**.	See **Table 4**.
Water and Wastewater	Indoor and outdoor water use for each Land Use Subtype in gallons per year.	See **Table 1.**	Water demand based on like projects and scaled by square footage
Solid waste	Tons of solid waste generated per year	375.95 tons/year	Section 4.9 of the EA
	Land Fill Gas Capture Rate	94%	CARB Mandatory Reporting Regulation Guidance
Operational off-road equipment	Excavator, Dozer, etc.	--	--
Stationary Sources	Emergency Generators/Fire Pumps	Three 2,923 Horsepower emergency gen/sets operating 30 hours per year Three 0.5 MMBtu/hr boilers	Based on like project emergency gen/set size and use.
Land Use Change	Vegetation land use type (cropland, etc.) and initial and final acreage	--	--
Sequestration	Type and net number of new trees added	--	--

Table 1 – Land Use Inputs Alternative C

Land Use Type	Land Use Subtype	Unit Amount	Size Metric[1]	Lot Acreage[2]	Square Feet	Population	Indoor Water Demand (gal/yr)	Outdoor Water Demand (gal/yr)
Retail	Shopping Center	36	TSF	1.476	36,000	0	Default	Default
Recreational	High-Turnover Sit-Down Restaurant	22	TSF	1.476	22,000	0	Default	Default
Recreational	Quality Restaurant	22	TSF	1.476	22,000	0	Default	Default
Recreational	Fast Casual Restaurant	8	TSF	1.476	8,000	0	Default	Default
Recreational	Coffee/Donut Shop Without Drive-Through Window	2	TSF	1.476	2,000	0	Default	Default
Parking	Parking Lot	700	Spaces	6.3	Default	0	Default	Default

[1] TSF = Thousand Square Feet

[2] Development of Alternative C would occur on the 13.68-acre North Site; all Retail and Recreational land use acreages are divided into 1.476-acre allotments for the purposes of this analysis. The parking lot acreage is based on CalEEMod defaults for a 700-space parking lot.

Table 2 – Construction Equipment Usage

Equipment	Construction Phase Activities				
	Site Preparation	Grading	Construction	Paving	Architectural Coating
	1/1/2019 - 1/14/2019	1/152019 - 2/25/2019	2/26/2019 - 11/5/2019	11/6/2019 - 12/3/2019	12/4/2019 - 12/31/2019
All Equipment	Default	Default	Default	Default	Default
Material Imported[1]	0	98, 613 cy	0	0	--
Worker Trips	Default	Default	Default	Default	Default
Haul Trips	Default	Default	Default	Default	Default
Vendor Trips	Default	Default	Default	Default	Default

Source: CalEEMod Version 2016.3.2; AES, 2018.
[1] Based on raw import volumes (MSA Consulting, Inc., 2018c)

Table 3 – Trip Generation Rates

Land Use	Daily Trip Generation Rate[1]	Trip Length (miles)			Trip Type (%)[2]			Trip Purpose (%)		
		C-C	C-W	C-NW	Primary	Diverted	Pass-B	C-C	C-W	C-NW
Shopping Center	80.15	Default	Default	Default	100	0	0	Default	Default	Default
High-Turnover Sit-Down Restaurant	110.82	Default	Default	Default	100	0	0	Default	Default	Default
Quality Restaurant	82.52	Default	Default	Default	100	0	0	Default	Default	Default
Fast Casual Restaurant	311.50	Default	Default	Default	100	0	0	Default	Default	Default
Coffee/Donut Shop Without Drive-Through Window	995.50	Default	Default	Default	100	0	0	Default	Default	Default
Parking Lot	0	0	0	0	0	0	0	0	0	0

[1] Trip generation rates used in CalEEMod include internal capture trips between retail, restaurant, and casino uses and are based off of the TIS (Appendix TIS). Table 4 shows trip generation rates used in the TIS along with the number of internal capture trips for each land use.
[2] All trip types are assumed to be primary as internal capture trips are included within the trip generation rate.

Table 4 – Trip Generation Rates and Average Daily Trips

Land Use	Size	Units[1]	Trip Generation Rate	Trips per Day	Trip Generation Rate (w/Internal Capture)[2]	Trips per Day (w/Internal Capture)
Shopping Center (820)	36	TSF	Fitted Curve[3]	3,001	80.15	2,885
Retail Internal Trips				*116*		
Subtotal: Shopping Center (820)				**2,885**		**2,885**
High-Turnover Sit-Down Restaurant (932)	22	TSF	112.18	2,468	110.82	2,439
Quality Restaurant (931)	22	TSF	83.84	1,844	82.52	1,815
Fast Casual Restaurant (930)	8	TSF	315.17	2,521	311.50	2,492
Coffee/Donut Shop Without Drive-Through Window (936)	2	TSF	754.55	2,020	995.50	1,991
Internal Capture (Restaurant - Retail)				*116*		
Subtotal: Restaurants (932, 931, 930, 936)				**8,737**		**8,737**
Project Total				**11,622**		**11,622**

[1] TSF = Thousand Square Feet

[2] Trip Generation Rate (w/Internal Capture) indicates reduced trip generation rates that account for the internal capture trips between retail and restaurant land uses.

[3] The equation of the fitted curve line was used to determine daily trips for the Shopping Center (820) land use; the TIS determined that the fitted curve line more accurately shows the trend in shopping centers than the average rate line. The equation of the fitted curve line is: Ln(T) = 0.68LN(X) + 5.57, where T is equal to the number of trip ends and X is equal to the square feet of the shopping center.

Table 5 – Energy Use

Land Use Subtype	Title-24 Electricity Energy Intensity (KWhr/size/yr)	Nontitle-24 Electricity Energy Intensity (KWhr/size/yr)[1]	Lighting Energy Intensity (KWhr/size/yr)	Title-24 Natural Gas Intensity (KBtu/size/yr)	Non-title-24 Natural Gas Intensity (KBtu/size/yr)[1]
Shopping Center	Default	Default	Default	Default	Default
High-Turnover Sit-Down Restaurant	Default	Default	Default	Default	Default
Quality Restaurant	Default	Default	Default	Default	Default
Fast Casual Restaurant	Default	Default	Default	Default	Default
Coffee/Donut Shop Without Drive-Through Window	Default	Default	Default	Default	Default
Parking Lot	Default	Default	Default	Default	Default

[1] Electricity energy and natural gas intensity determined from similar projects and scaled by square footage.

Table 6 – Off-Road Equipment Mitigation Inputs

Equipment Type	Engine Tier	Number of Equipment Mitigated	Diesel Particulate Filter (DPF) Level 2014
All Equipment	Tier 3	All	Level 3
Scrapers	No Change	0	No Change

Mitigation Measures

- The Tribe shall use Tier 3 construction equipment (with the exception of Tier 3 Scrapers, which are not widely available), using a minimum of 90 percent of the equipment's total horsepower, as well as construction equipment with Level 3 diesel particulate filters (DPF);
- The Tribe shall use soil stabilizer on unpaved roads;
- The Tribe shall apply water to exposed construction areas twice a day;
- The Tribe shall restrict vehicle speeds on the construction site to 15 miles per hour;
- The Tribe shall use energy efficient lighting;
- The Tribe shall use low-flow faucets, toilets, and showers; and
- The Tribe shall use low VOC architectural coatings.

Table 1 – Land Use Inputs Alternative D

Land Use Type	Land Use Subtype	Unit Amount	Size Metric[1]	Lot Acreage[2]	Square Feet	Population	Indoor Water Demand (gal/yr)[3]	Outdoor Water Demand (gal/yr)[3]
Recreation	User Defined Recreation (Casino - Gaming Floor)	40	TSF	14.05	40,000	0	15,931,489	6,928,889
Retail	Shopping Center	24	TSF	0	24,000	0	Default	Default
Recreational	High-Turnover Sit-Down Restaurant	14	TSF	0	14,000	0	Default	Default
Recreational	Quality Restaurant	14	TSF	0	14,000	0	Default	Default
Recreational	Fast Casual Restaurant	6	TSF	0	6,000	0	Default	Default
Recreational	Coffee/Donut Shop Without Drive-Through Window	2	TSF	0	2,000	0	Default	Default
Parking	Parking Lot	1,150	Spaces	0	Default	0	Default	Default

[1] TSF = Thousand Square Feet
[2] Development of Alternative D would occur on the 14.05-acre South Site; all Retail and Parking land use acreages are included within the Recreation land use acreage in this analysis.
[3] Water demand is based off of similar projects and scaled by square footage.

Table 2 – Construction Equipment Usage

Equipment	Construction Phase Activities				
	Site Preparation	Grading	Construction	Paving	Architectural Coating

Table 3 – Trip Generation Rates

Land Use	Daily Trip Generation Rate[1]	Trip Length (miles)			Trip Type (%)[2]			Trip Purpose (%)		
		C-C	C-W	C-NW	Primary	Diverted	Pass-B	C-C	C-W	C-NW
User Defined Recreation (Casino - Gaming Floor)	93	Default	Default	Default	100	0	0	80	15	5
Shopping Center	36.34	Default	Default	Default	100	0	0	Default	Default	Default
High-Turnover Sit-Down Restaurant	45.55	Default	Default	Default	100	0	0	Default	Default	Default
Quality Restaurant	17.20	Default	Default	Default	100	0	0	Default	Default	Default
Fast Casual Restaurant	159.63	Default	Default	Default	100	0	0	Default	Default	Default
Coffee/Donut Shop Without Drive-Through Window	288.38	Default	Default	Default	100	0	0	Default	Default	Default
Parking Lot	0	0	0	0	0	0	0	0	0	0

[1] Trip generation rates used in CalEEMod include internal capture trips between retail, restaurant, and casino uses and are based off of the TIS (Appendix TIS). Table 4 shows trip generation rates used in the TIS along with the number of internal capture trips for each land use.
[2] All trip types are assumed to be primary as internal capture trips are included within the trip generation rate.

Table 4 – Trip Generation Rates and Average Daily Trips

Land Use	Size	Units[1]	Trip Generation Rate	Trips per Day	Trip Generation Rate (w/Internal Capture)[2]	Trips per Day (w/Internal Capture)
Casino	40	TSF	93	3,720	93	3,720
Subtotal: Casino				**3,720**		**3,720**
Shopping Center (820)	24	TSF	Fitted Curve[3]	2,278	36.34	872
Internal Capture (Retail - Restaurant)				*98*		
Internal Capture (Retail - Casino)				*1,308*		
Subtotal: Shopping Center (820)				**872**		**872**
High-Turnover Sit-Down Restaurant (932)	14	TSF	112.18	1,571	45.55	638
Quality Restaurant (931)	14	TSF	83.84	1,174	17.20	241
Fast Casual Restaurant (930)	6	TSF	315.17	1,891	159.63	958
Coffee/Donut Shop Without Drive-Through Window (936)	2	TSF	754.55	1,509	288.38	577
Internal Capture (Restaurant - Retail)				*113*		
Internal Capture (Restaurant - Casino)				*3,620*		
Subtotal: Restaurants (932, 931, 930, 936)				**2,413**		**2,413**
Project Total				**7,005**		**7,005**

[1] TSF = Thousand Square Feet

[2] Trip Generation Rate (w/Internal Capture) indicates reduced trip generation rates that account for the internal capture trips between retail, restaurant, and casino land uses.

[3] The equation of the fitted curve line was used to determine daily trips for the Shopping Center (820) land use; the TIS determined that the fitted curve line more accurately shows the trend in shopping centers than the average rate line. The equation of the fitted curve line is: Ln(T) = 0.68LN(X) + 5.57, where T is equal to the number of trip ends and X is equal to the square feet of the shopping center.

Table 5 – Energy Use

Land Use Subtype	Title-24 Electricity Energy Intensity (KWhr/size/yr)	Nontitle-24 Electricity Energy Intensity (KWhr/size/yr)[1]	Lighting Energy Intensity (KWhr/size/yr)	Title-24 Natural Gas Intensity (KBtu/size/yr)	Non-title-24 Natural Gas Intensity (KBtu/size/yr)[1]
User Defined Recreation (Casino - Gaming Floor)	--	3.37	--	--	560.88
Shopping Center	Default	Default	Default	Default	Default
High-Turnover Sit-Down Restaurant	Default	Default	Default	Default	Default
Quality Restaurant	Default	Default	Default	Default	Default
Fast Casual Restaurant	Default	Default	Default	Default	Default
Coffee/Donut Shop Without Drive-Through Window	Default	Default	Default	Default	Default
Parking Lot	Default	Default	Default	Default	Default

[1] Electricity energy and natural gas intensity determined from similar projects and scaled by square footage.

Table 6 – Off-Road Equipment Mitigation Inputs

Equipment Type	Engine Tier	Number of Equipment Mitigated	Diesel Particulate Filter (DPF) Level 2014
All Equipment	Tier 3	All	Level 3
Scrapers	No Change	0	No Change

Mitigation Measures

- The Tribe shall use Tier 3 construction equipment (with the exception of Tier 3 Scrapers, which are not widely available), using a minimum of 90 percent of the equipment's total horsepower, as well as construction equipment with Level 3 diesel particulate filters (DPF);
- The Tribe shall use soil stabilizer on unpaved roads;
- The Tribe shall apply water to exposed construction areas twice a day;
- The Tribe shall restrict vehicle speeds on the construction site to 15 miles per hour;
- The Tribe shall use energy efficient lighting;
- The Tribe shall use low-flow faucets, toilets, and showers; and
- The Tribe shall use low VOC architectural coatings.

Agua Caliente Cathedral City FTT Casino Project - Alternative A

Riverside-Salton Sea County, Annual

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Parking Lot	1,000.00	Space	9.00	400,000.00	0
Fast Food Restaurant w/o Drive Thru	2.00	1000sqft	0.00	2,000.00	0
Fast Food Restaurant with Drive Thru	6.00	1000sqft	0.00	6,000.00	0
High Turnover (Sit Down Restaurant)	14.00	1000sqft	0.00	14,000.00	0
Quality Restaurant	14.00	1000sqft	0.00	14,000.00	0
User Defined Recreational	40.00	User Defined Unit	4.68	40,000.00	0
Regional Shopping Center	24.00	1000sqft	0.00	24,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2020
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative A - Riverside-Salton Sea County, Annual

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative A - Riverside-Salton Sea County, Summer

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative A - Riverside-Salton Sea County, Winter

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative A Cumulative - Riverside-Salton Sea County, Annual

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative A Cumulative - Riverside-Salton Sea County, Summer

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

11.0 Vegetation

Agua Caliente Cathedral City FTT Casino Project - Alternative A Cumulative

Riverside-Salton Sea County, Winter

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Parking Lot	1,000.00	Space	9.00	400,000.00	0
Fast Food Restaurant w/o Drive Thru	2.00	1000sqft	0.00	2,000.00	0
Fast Food Restaurant with Drive Thru	6.00	1000sqft	0.00	6,000.00	0
High Turnover (Sit Down Restaurant)	14.00	1000sqft	0.00	14,000.00	0
Quality Restaurant	14.00	1000sqft	0.00	14,000.00	0
User Defined Recreational	40.00	User Defined Unit	4.68	40,000.00	0
Regional Shopping Center	24.00	1000sqft	0.00	24,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative A Cumulative - Riverside-Salton Sea County, Winter

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

Agua Caliente Cathedral City FTT Casino Project - Alternative B

Riverside-Salton Sea County, Annual

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Parking Lot	850.00	Space	7.65	340,000.00	0
Fast Food Restaurant w/o Drive Thru	2.00	1000sqft	0.00	2,000.00	0
Fast Food Restaurant with Drive Thru	3.80	1000sqft	0.00	3,800.00	0
High Turnover (Sit Down Restaurant)	8.50	1000sqft	0.00	8,500.00	0
Quality Restaurant	8.50	1000sqft	0.00	8,500.00	0
User Defined Recreational	40.00	User Defined Unit	6.03	40,000.00	0
Regional Shopping Center	15.20	1000sqft	0.00	15,200.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2020
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative B - Riverside-Salton Sea County, Annual

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative B - Riverside-Salton Sea County, Summer

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative B - Riverside-Salton Sea County, Winter

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

Mitigation Measures	Input Value

Institute Recycling and Composting Services Percent Reduction in Waste Disposed	50.00

Agua Caliente Cathedral City FTT Casino Project - Alternative B Cumulative

Riverside-Salton Sea County, Annual

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Parking Lot	850.00	Space	7.65	340,000.00	0
Fast Food Restaurant w/o Drive Thru	2.00	1000sqft	0.00	2,000.00	0
Fast Food Restaurant with Drive Thru	3.80	1000sqft	0.00	3,800.00	0
High Turnover (Sit Down Restaurant)	8.50	1000sqft	0.00	8,500.00	0
Quality Restaurant	8.50	1000sqft	0.00	8,500.00	0
User Defined Recreational	40.00	User Defined Unit	6.03	40,000.00	0
Regional Shopping Center	15.20	1000sqft	0.00	15,200.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

Regional Shopping Center	15.20	1000sqft	0.00	15,200.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative B Cumulative - Riverside-Salton Sea County, Summer

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative B Cumulative - Riverside-Salton Sea County, Winter

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018a (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative C - Riverside-Salton Sea County, Annual

Project Characteristics -

Land Use - Project Description; all Retail and Recreational land use acreages are divided into 1.476-acre allotments for the purposes of this analysis.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018c (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste -

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative C - Riverside-Salton Sea County, Summer

Project Characteristics -

Land Use - Project Description; all Retail and Recreational land use acreages are divided into 1.476-acre allotments for the purposes of this analysis.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018c (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste -

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

	ROG	NOx	CO	SO2	Fugitive PM10	Exhaust PM10	PM10 Total	Fugitive PM2.5	Exhaust PM2.5	PM2.5 Total	Bio- CO2	NBio- CO2	Total CO2	CH4	N2O	CO2e

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative C - Riverside-Salton Sea County, Winter

Project Characteristics -

Land Use - Project Description; all Retail and Recreational land use acreages are divided into 1.476-acre allotments for the purposes of this analysis.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018c (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste -

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

Agua Caliente Cathedral City FTT Casino Project - Alternative C Cumulative

Riverside-Salton Sea County, Annual

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Parking Lot	700.00	Space	6.30	280,000.00	0
Fast Food Restaurant w/o Drive Thru	2.00	1000sqft	1.48	2,000.00	0
Fast Food Restaurant with Drive Thru	8.00	1000sqft	1.48	8,000.00	0
High Turnover (Sit Down Restaurant)	22.00	1000sqft	1.48	22,000.00	0
Quality Restaurant	22.00	1000sqft	1.48	22,000.00	0
Regional Shopping Center	36.00	1000sqft	1.48	36,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative C Cumulative - Riverside-Salton Sea County, Annual

Project Characteristics -

Land Use - Project Description; all Retail and Recreational land use acreages are divided into 1.476-acre allotments for the purposes of this analysis.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018c (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste -

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative C Cumulative - Riverside-Salton Sea County, Summer

Project Characteristics -

Land Use - Project Description; all Retail and Recreational land use acreages are divided into 1.476-acre allotments for the purposes of this analysis.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018c (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste -

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

11.0 Vegetation

Agua Caliente Cathedral City FTT Casino Project - Alternative C Cumulative

Riverside-Salton Sea County, Winter

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Parking Lot	700.00	Space	6.30	280,000.00	0
Fast Food Restaurant w/o Drive Thru	2.00	1000sqft	1.48	2,000.00	0
Fast Food Restaurant with Drive Thru	8.00	1000sqft	1.48	8,000.00	0
High Turnover (Sit Down Restaurant)	22.00	1000sqft	1.48	22,000.00	0
Quality Restaurant	22.00	1000sqft	1.48	22,000.00	0
Regional Shopping Center	36.00	1000sqft	1.48	36,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative C Cumulative - Riverside-Salton Sea County, Winter

Project Characteristics -

Land Use - Project Description; all Retail and Recreational land use acreages are divided into 1.476-acre allotments for the purposes of this analysis.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018c (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste -

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2020
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative D - Riverside-Salton Sea County, Annual

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018d (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative D - Riverside-Salton Sea County, Summer

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018d (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative D - Riverside-Salton Sea County, Winter

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018d (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

Quality Restaurant	14.00	1000sqft	0.00	14,000.00	0
User Defined Recreational	40.00	User Defined Unit	3.70	40,000.00	0
Regional Shopping Center	24.00	1000sqft	0.00	24,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018d (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

11.0 Vegetation

Agua Caliente Cathedral City FTT Casino Project - Alternative D Cumulative

Riverside-Salton Sea County, Summer

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Parking Lot	1,150.00	Space	10.35	460,000.00	0
Fast Food Restaurant w/o Drive Thru	2.00	1000sqft	0.00	2,000.00	0
Fast Food Restaurant with Drive Thru	6.00	1000sqft	0.00	6,000.00	0
High Turnover (Sit Down Restaurant)	14.00	1000sqft	0.00	14,000.00	0
Quality Restaurant	14.00	1000sqft	0.00	14,000.00	0
User Defined Recreational	40.00	User Defined Unit	3.70	40,000.00	0
Regional Shopping Center	24.00	1000sqft	0.00	24,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.4	**Precipitation Freq (Days)**	28
Climate Zone	10			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative D Cumulative - Riverside-Salton Sea County, Summer

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018d (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

1.3 User Entered Comments & Non-Default Data

Agua Caliente Cathedral City FTT Casino Project - Alternative D Cumulative - Riverside-Salton Sea County, Winter

Project Characteristics -

Land Use - Project Description; lot acreage for all recreational and retail space is all included within the User Defined Recreational land use.

Construction Phase - Construction phasing based on a 12-month construction schedule.

Grading - MSA Consulting, Inc., 2018d (See Table 2, CalEEMod Inputs)

Vehicle Trips - See Table 3, CalEEMod Inputs. Trip generation rates are derived from the TIS (Appendix TIS).

Energy Use - Electricity energy and natural gas intensity for the user defined recretational land use determined from similar projects and scaled by square footage

Water And Wastewater - Water demand is based off of similar projects and scaled by square footage

Solid Waste - Section 4.9 of the EA

Construction Off-road Equipment Mitigation - Construction Mitigation

Area Mitigation - MDAQMD Rule 1113 Architectural Coatings (based on nonflat coating)

Energy Mitigation -

Water Mitigation -

Waste Mitigation - Tribe will use the Salton City Landfill's facilities and will divert 50 percent of waste from the landfill.

Stationary Sources - Emergency Generators and Fire Pumps - Based on like project emergency generator size and use

Stationary Sources - Process Boilers - Based on like project boiler size and use

DRAFT

1.0 INTRODUCTION

A Draft Environmental Assessment (EA) has been prepared pursuant to the National Environmental Policy Act (NEPA) to assess the environmental consequences of the U.S. Bureau of Indian Affairs (BIA) taking land located in Cathedral City, California into federal trust on behalf of the Agua Caliente Band of Cahuilla Indians (Tribe) (Federal Action). The effects of five alternatives identified below are analyzed within the EA.

- Proposed Project Alternative (Casino and Mixed Use Facilities)
- Reduced Intensity Alternative
- Non-Gaming Alternative
- South Site Alternative
- No Action Alternative

As explained further below, operational emissions associated with the Proposed Project Alternative, the Reduced Intensity Alternative, the South Site Alternative, and the No Action Alternative, do not exceed *de minimis* thresholds and are therefore not analyzed in this conformity determination. Only emissions resulting from the Non-Gaming Alternative, exceed the applicable *de minimis* thresholds. Thus the general conformity determination requirements apply only to the Non-Gaming Alternative.

2.0 GENERAL CONFORMITY – REGULATORY BACKGROUND

The United States Environmental Protection Agency (USEPA) promulgated the General Conformity Rule on November 30, 1993, to implement the conformity provision of Title I, Section 176(c)(1) of the federal Clean Air Act (CAA), which requires that the federal government not engage, support or provide financial assistance for licensing or permitting, or approving any activity not conforming to an approved CAA implementation plan for compliance with the National Ambient Air Quality Standards (NAAQS). NAAQS have been developed for carbon monoxide (CO), lead (Pb), coarse and fine particulate matter (PM_{10} or $PM_{2.5}$, respectively), sulfur oxides (SOx), and nitrogen dioxide (NO_2), ozone (O_3) and its precursors, oxides of nitrogen (NOx) and reactive organic gasses (ROGs). CAA conformity is an issue that may be addressed during the NEPA process, and USEPA recommends that the conformity process be coupled with NEPA analysis.

2.1 GENERAL CONFORMITY PROCESS

The general conformity process will be addressed in two phases. The first phase is the conformity applicability process, which evaluates whether the conformity regulations apply to the federal action (i.e., whether a determination is warranted). The second phase is the conformity determination process, which demonstrates how a federal action conforms to the applicable State Implementation Plan (SIP).

Phase One

The purpose of a conformity review is to evaluate whether the general conformity determination requirements apply to a federal action under 40 Code of Federal Regulations (CFR) 93.153. There are four steps in the review process. The first three steps can be performed in any order; the four steps are listed below:

1. Determine whether the proposed action causes emissions of criteria pollutants.
2. Determine whether the emissions of a criteria pollutant or its precursor (i.e., NOx and ROGs for ozone) would occur in a nonattainment or maintenance area for that pollutant.
3. Determine whether the federal action or activities to be conducted under the federal action are exempt from the conformity requirement per 40 CFR 93.153(c)(2).
4. Estimate the total emissions of the pollutants of concern from the federal action and compare the estimates to the *de minimis* thresholds of 40 CFR 93.153(b)(1) and (2) and to the nonattainment or maintenance area's emissions inventory for each criteria pollutant of concern.

Operational emissions associated with the Proposed Project Alternative, the Reduced Intensity Alternative, the South Site Alternative, and the No Action Alternative, do not exceed *de minimis* thresholds and are therefore not analyzed in this conformity determination. Only emissions resulting from the Non-Gaming Alternative, exceed the applicable *de minimis* thresholds.

Phase Two

The purpose of the conformity determination is to show if the the Non-Gaming Alternative conforms to the California SIP. Conformity can be shown for ozone (precursor: NOx) by meeting one or more of following four requirements:

1. The applicable SIP specifically includes an allowance for emissions of the Non-Gaming Alternative, 40 CFR 93.158(a)(1).
2. Offset emission credits are purchased for the total direct and indirect emissions, which fully offsets within the same nonattainment or maintenance area (or nearby area of equal or higher classification provided the emissions from that area contribute to the violations or have contributed in the past, in the area of the Federal Action) so that there is no net increase in emissions, 40 CFR 93.158(a)(2).
3. NOx and ROG emissions from the Non-Gaming Alternative coupled with the current emissions in the nonattainment area would not exceed the emissions budget in the SIP, 40 CFR 93.158(a)(5)(i)(A).
4. The project proponent can request that the SIP be changed by the State Governor or the State Governor's designee to include the emissions budget of the federal action, 40 CFR 93.158(a)(5)(i)(B).

DRAFT

Conformity can be shown for particulate matter 10 microns in size or smaller (PM_{10}) by one of following two options:

1. The applicable SIP specifically includes an allowance for emissions of the Non-Gaming Alternative, 40 CFR 93.158(a)(1).
2. Modeling of directly emitted PM_{10} shows that the action does not cause or contribute to any new violation of any standard in any area or increase the frequency or severity of any existing violation of any standard in any area, 40 CFR 93.159(a)(4)(i) and (b).

Even if a project is shown to conform to the SIP by one of the above methods, the project may not be determined to conform to the applicable SIP unless the total of the direct and indirect emissions of the federal action is in compliance or consistent with all relevant requirements and milestones contained in the applicable SIP, including but not limited to the use of baseline emissions that reflect the historical activity levels that occurred in the geographic area, reasonable further progress schedules, assumptions specified in the attainment or maintenance demonstration, prohibitions, numerical emission limits, and work practice requirements (40 CFR 93.158[c]).

3.0 APPLICABILITY OF NON-GAMING ALTERNATIVE

3.1 EMISSIONS

The Non-Gaming Alternative's emissions are evaluated in two phases: construction and operation. The two phases would not overlap. Criteria pollutants will be emitted during both phases. The pollutants of concern are $PM_{10,}$ and the ozone precursors ROG and NOx. Construction emissions include ROG and NOx, which are generally a product of combustion, in this case from heavy equipment. PM_{10} is generated during site grading and though diesel exhaust. Operational emissions are mainly emitted from customer and employee vehicles driving to and from the casino/hotel and also consist of ROG, NOx, and PM_{10}. Area emissions and stationary sources are typically minor compared to mobile emissions during operations of facilities such as casinos and hotels. The EA gives a detailed account of both operational and construction emissions.

3.2 ATTAINMENT/NONATTAINMENT AREA

The Non-Gaming Alternative would be constructed within the boundaries of the Salton Sea Air Basin (SSAB), which is currently in attainment or unclassified for $PM_{2.5}$, CO, NO_2, SO_2, and Pb. The SSAB is currently designated serious nonattainment for PM_{10} and Severe 15 nonattainment for 8-hour ozone (ROGs and NOx) (USEPA, 2018).

3.3 EXEMPTION

The Federal Action that is described in **Section 1.0** (Non-Gaming Alternative) is not exempt for the following reasons: (1) the action results in emission levels of at least one criteria pollutant exceeding the applicable *de minimis* thresholds; (2) the action does not have criteria pollutant emissions that are

associated with a conforming program; (3) the action cannot be analyzed under certain other environmental regulation; and/or (4) the action is not in response to an emergency or natural disaster. The area and stationary source emissions of the Non-Gaming Alternative would require the Tribe to apply for a tribal minor new source review (NSR) permit under the NSR program if exceeded and, therefore, are exempt emissions under exemption 40 CFR 93.153(d)(1). While these exempt emissions are presented in **Table 1** below, the emissions are not included in the total annual emissions of the Non-Gaming Alternative to determine conformity. The energy use and mobile emissions from the Non-Gaming Alternative are not exempt from a conformity determination under 40 CFR 93.153(c)(2) and are thereby considered the total annual emissions that must be compared to the *de minimis* thresholds.

TABLE 1
UNMITIGATED OPERATIONAL EMISSIONS OF SIGNIFICANT CRITERIA POLLUTANTS[1]

Sources	ROGs	NOx	PM_{10}
	tons per year (tpy)[1]		
Exempt Emissions			
Stationary	0	1	0
Area	1	0	0
Total Exempt Emissions	**1**	**1**	**0**
Non-Exempt Emissions			
Energy	0	1	0
Mobile	3	26	2
Waste[2]	0	0	0
Water[2]	0	0	0
Total Non-Exempt Emissions[3]	**3**	**27**	**2**
Applicable Conformity Threshold	25	25	70
Exceedance of Threshold	*No*	*Yes*	*No*

Notes:
1 – NOx, ROGs, and PM_{10} emissions values were estimated using CalEEMod.2016.3.2 air modeling program approved by the USEPA and CARB (see Appendix N of the Draft EA).
2 – Emissions from waste and water are negligible and round to zero.
3 – Excludes exempt emissions in accordance with 40 CFR 93.153(d)(1).
Source: AES, 2018.

3.4 DE MINIMIS THRESHOLDS

Emissions estimates were provided in the EA for both construction and operation (mobile, area, stationary, and energy) of the Non-Gaming Alternative. EA Sections 3.0, 4.3, and 5.0 give a more in-depth analysis. Because operation and construction would not overlap, their emissions were evaluated separately by using the most up-to-date USEPA and California Air Resources Board (CARB)-approved land use based California Emissions Estimator Model (CalEEMod) air model. Stationary source emissions (area and stationary) were estimated using CalEEMod.2016.3.2. Construction emissions were below the 25 tons per year (tpy) *de minimis* thresholds for ozone precursors ROGs and NOx and the 70 tpy *de minimis* threshold for PM_{10}. Accordingly, no Conformity Determination is required for

construction emissions. **Table 1** presents the estimated total annual emissions for pollutants of concern during operation. Operational emissions for NOx would exceed the 25 tpy threshold established under 40 CFR 93.153(b)(1), while ROGs would be below the 25 tpy *de minimis* threshold. For PM_{10}, emissions were below the *de minimis* level of 70 tpy.

A conformity determination is required for ozone precursor NOx. This requirement is due to the Non-Gaming Alternative being located in a nonattainment area for ozone and the total NOx emissions being greater than the *de minimis* levels shown in **Table 1**.

4.0 CONFORMITY DETERMINATION: OZONE PRECURSOR NO_X

4.1 ANALYSIS

Air modeling analysis was performed for the EA and the general conformity determination concurrently. The results of this analysis can be found in the Draft EA Section 4.3 and Appendix N. As stated above, a general conformity determination is required for ozone precursor NOx. Conformity for NOx can be shown by complying with the criteria detailed in **Section 2.0**, under phase two.

Analysis – Ozone Precursor NOx

On June 15, 2004, the Riverside County, Coachella Valley area was designated as a "Subpart 2/Severe 15" nonattainment area for the federal 1997, 8-hour ozone standard. However, the 1997, 8-hour ozone NAAQS was revoked on April 6, 2015, and replaced with the 2008, 8-hour ozone NAAQS (USEPA, 2016a). On July 20, 2012, the USEPA designated and classified the Riverside County, Coachella Valley planning area in the SSAB as "Severe 15" nonattainment for the federal 2008, 8-hour ozone standard (USEPA, 2016b).

The South Coast Air Quality Management District (SCAQMD) submitted a final Air Quality Management Plan (AQMP) for achieving the federal 2008, 8-hour ozone air quality standards in 2016. The SCAQMD recently approved the 2016 AQMP on March 3, 2017. An addendum to the 2016 AQMP in the South Coast Air Basin (SCAB) and the Coachella Valley, released March 23, 2017 (Resolution No. 17-8), indicates that the deadline to attain the 8-hour ozone NAAQS in the Coachella Valley area is 2026. The Resolution concludes that the 2016 AQMP meets the requirements of the CAA related to ozone for the Coachella Valley nonattainment area (CARB, 2016).

A conformity determination is required for this project due to the Non-Gaming Alternative emissions exceeding the current conformity thresholds of 25 tpy of NOx. As shown in **Table 1,** project related ROG emissions are less than the *de minimis* level; therefore, a conformity determination for ROG is not required. A conformity determination for the Non-Gaming Alternative is required for NOx because project related emissions exceed the *de minimis* levels within the SSAB.

DRAFT

SIP Allowance for Project Emissions

Emission control measures and regulations that have been included in the 2016 AQMP do not include the estimated emissions of the Non-Gaming Alternative; therefore, conformity cannot be determined though inclusion of the project's emissions in the most recent applicable SIP.

Offsets

Conformity can be achieved by fully offsetting the Non-Gaming Alternative's mitigated operational emissions through the acquisition of emission reduction credits (ERCs) for ozone precursor NOx, which shall be real, surplus, permanent, quantifiable, enforceable, and must be obtained and used in accordance with the federally approved SIP for SSAB, or an equally enforceable measure. The Non-Gaming Alternative does not include the purchase of offset credits for NOx in the EA project description, but this purchase of offset credits is included as mitigation in Section 5.0 of the EA.

As stated above, ERCs fully offset project emissions and must be purchased within the same nonattainment or maintenance area (or nearby area of equal or higher classification provided the emissions from that area contribute to the violations or have contributed in the past, in the area of the federal action) so that there is no net increase in emissions. Therefore, ERCs can be purchased from the SSAB or adjacent air basin that meets the above criteria such as the SCAB.

Emission Budget

The NOx emissions of the Non-Gaming Alternative coupled with the most recent SSAB emissions inventory (2013) exceeds the applicable ozone SIP's emission budget (CARB, 2013).

Addendum to SIP

The Non-Gaming Alternative does not anticipate that the Governor or State Governor designee will approve an addendum to applicable provisions of the SIP, which would include the Non-Gaming Alternative's estimated NOx emissions. Therefore, conformity will not be determined using this option.

4.2 MITIGATION

BMPs to reduce project emissions have been included in the design of the Non-Gaming Alternative (Section 2.2.3) and mitigation measures for emissions of NOx are outlined in Section 5.0 of the Final EA. According to the EA, no operational mitigation is available that would quantifiably reduce NOx emissions.

To reduce impacts under NEPA, the BIA shall demonstrate conformity for the Non-Gaming Alternative through the purchase by the Tribe of 27 tons of NOx ERCs in the SSAB and/or another adjacent district with an equal or higher nonattainment classification (extreme) meeting the requirements outlined in 40 CFR 93.158(a)(2). This ensures compliance with the applicable federal, state, and SCAQMD requirements. Real, surplus, permanent, quantifiable, and enforceable ERCs will be purchased prior to

opening day of the restaurants and retail businesses. This will not necessarily be done prior to or during construction, as the anticipated NOx emissions presented in **Table 1** are associated with operation of the Non-Gaming Alternative and not with construction of the facilities. The Tribe will provide the BIA, and thereby the USEPA and other agencies, with documentation necessary to support the emissions reductions through offset purchase, such as certification of ERC purchase or a binding agreement requiring ERC purchase prior to operation.

5.0 CONCLUSION

If the BIA elects to select the Non-Gaming Alternative as the preferred alternative, then prior to issuing a decision, this Draft General Conformity Determination will be submitted to all required parties in accordance with 40 CFR 93.155(a) and (b) and made available for public comment in accordance with 40 CFR 93.0156. In compliance with the mitigation measures detailed in the EA, it is recommended that if the Non-Gaming Alternative is selected as the preferred alternative, the Tribe commits to purchasing 27 tons of NOx ERCs prior to operation of the recreational and retail businesses, an amount which will be sufficient to offset the operational effects in accordance with the federally approved SIP for the SSAB and the applicable general conformity requirements. After the comment period for this Draft General Conformity Determination, the BIA will make a Final Conformity Determination per 40 CFR 93.150(b), which will include detailed information on the purchase of NOx ERCs. At the time these credits are purchased by the Tribe, the Non-Gaming Alternative will have met the requirements of conformity and conformed to the applicable SIP.

The BIA expects to receive documentation supporting conformity before issuing a decision to proceed with the Non-Gaming Alternative, pursuant to 40 CFR 93.150. Upon receipt of documentation supporting conformity, the BIA will issue a Final Conformity Determination.

SECTION 1.0
INTRODUCTION

The Draft EA dated October 18, 2018 (SCH #2017124002) was submitted to the State Clearinghouse and released to the public and agencies for a 45-day comment period beginning on October 19, 2018, and ending on December 3, 2018. Comments on the Draft EA were carefully reviewed and are addressed in this **Appendix P** of the Final EA. As required by Section 11.4 of the Compact, this Final EA includes comments (**Section 2.0**) and responses to comments (**Section 3.0**). Any resulting updates, modifications, or revisions to the Draft EA as were warranted after review of the comments received are incorporated within the Final EA.

SECTION 2.0
COMMENTS

Comments received on the Draft EA are listed in **Table 2-1**, and provided in their entirety on the following pages. Issues are individually bracketed and numbered in the margins of the comment letters. Responses to comments are provided in **Section 3.0**.

COMMENT LETTER A1

CITY OF RANCHO MIRAGE

---------- Forwarded message ---------
From: **William Enos, P.E.** <bille@ranchomirageca.gov>
Date: Mon, Dec 3, 2018 at 4:50 PM
Subject: [EXTERNAL] Review of Draft Environmental Assessment-Traffic Impact Analysis (TIA) For Agua Caliente Casino
To: chad.broussard@bia.gov <chad.broussard@bia.gov>
Cc: Bud Kopp, AICP <budk@ranchomirageca.gov>, Jeremy Gleim, AICP <jeremyg@ranchomirageca.gov>, Jesse Eckenroth <jessee@ranchomirageca.gov>

Mr. Broussard,

I have reviewed the TIA for the Agua Caliente Casino prepared by Webb Associates dated July 2018 and have the following questions and comments:

- Page 1-3, Buildout Year 2040 Conditions, second paragraph, states that Level of Service for several segments along East Palm Canyon Drive, including #5 Date Palm to Frank Sinatra and #6 Frank Sinatra to Country Club, are expected to continue to operate at unacceptable levels of service (LOS E or F). This conflicts with the TIA for the City of Rancho Mirage General Plan 2017 Update. Please address. A1-1
- Page 1-8, Table 1-5, the last two roadway segments in the table are largely within the jurisdiction of the City of Rancho Mirage. A1-2
- Page 3-2, second paragraph, Frank Sinatra Drive is located in Rancho Mirage. A1-3
- Page 3-6, Figure 3-A, there are two additional existing traffic signals on East Palm Canyon between Date Palm and Frank Sinatra that are close to the project that are not shown on the map. One at the entrance to Palm Springs Ford and the other at One Mirage Place. Do these intersections impact the capacity of the roadway and Level of Service? Should they be included in the TIA? A1-4
- Page 5-8, Table 5-5, Row 5 Date Palm to Frank Sinatra, Year 2020 LOS is shown as E for the segment, yet no improvements are proposed. Please address. A1-5

Thank you for the opportunity to review and comment.

Re: County of Riverside Comments on the Cathedral City Fee-to-Trust Casino Project Draft Tribal Environmental Impact Report

Dear Mr. Davis:

Thank you for providing the County of Riverside ("County") the opportunity to review and comment on the Agua Caliente Band of Cahuilla Indians' ("the Tribe") Draft Tribal Environmental Impact Report ("TEIR") for the proposed Cathedral City Fee-to-Trust Casino Project ("the Project"). According to the TEIR, the Project includes taking 13.6 acres contiguous to the Tribe's reservation into trust for the Tribe for gaming purposes, as well as construction and operation of a casino, parking, bars, restaurants, retail, and mixed-use space. We hope that the issues mentioned in the attachments to this letter are helpful to the Tribe and are part of an ongoing dialog about the Project and TEIR, which can continue throughout the environmental review process and beyond. Also, we remain very interested in continuing to work in a cooperative manner with the Tribe on these issues and the Intergovernmental Agreement ("IGA") negotiations.

The TEIR was disseminated to a number of County departments and to Riverside County Flood Control & Water Conservation District ("Flood"). While most departments have no significant comments on the Draft TEIR, there are three that submitted a memorandum with comments. The Office of County Counsel has attached these comments to this letter for ease of reference. We are happy to discuss and work with the Tribe on all of the issues addressed in these memoranda and believe they can all be resolved informally. We look forward to working with the Tribe on the IGA, and, even after Project and IGA approval, we hope that there can be a continuing dialog between the County and the Tribe to ensure full understanding of the issues each other faces and continued cooperation on ongoing regional issues. A2-1

To the extent the Tribe has any questions, department representatives would be happy to sit down and discuss these issues with the hope that we can come to an understanding about them prior to the completion of the Final TEIR. County staff with specialized knowledge in the above areas are happy to work with the Tribe and consultants to assist in making sure the Final TEIR analysis and mitigation are of the highest

quality. Please feel free to contact me at any time at mcushman@rivco.org or 951-955-6300 for referral to the appropriate County staff with specialized knowledge about particular resource areas or to discuss some of the specific issues raised above.

A2-1 (Cont.)

Sincerely,

GREGORY P. PRIAMOS
County Counsel

MELISSA R. CUSHMAN
Deputy County Counsel

RIVERSIDE COUNTY FLOOD CONTROL
AND WATER CONSERVATION DISTRICT

November 8, 2018

Riverside County Executive Office
4080 Lemon Street, 4th Floor
Riverside, CA 92501

Attention: Jennifer Sargent

Re: Agua Caliente Band of Cahuilla Indians
Cathedral City Fee-to-Trust Casino Project
Environmental Assessment/Tribal EIR

The District does not normally recommend conditions for land divisions or other land use cases in incorporated cities. The District also does not plan check City land use cases, or provide State Division of Real Estate letters or other flood hazard reports for such cases. District comments/recommendations for such cases are normally limited to items of specific interest to the District including District Master Drainage Plan facilities, other regional flood control and drainage facilities which could be considered a logical component or extension of a master plan system, and District Area Drainage Plan fees (development mitigation fees). In addition, information of a general nature is provided.

The District's review is based on the above-referenced project transmittals, received November 1, 2018. The District **has not** reviewed the proposed project in detail, and the following comments do not in any way constitute or imply District approval or endorsement of the proposed project with respect to flood hazard, public health and safety, or any other such issue:

☐ This project would not be impacted by District Master Drainage Plan facilities, nor are other facilities of regional interest proposed.

☐ This project involves District Master Plan facilities, namely _____ from _____ to _____. The District will accept ownership of such facilities on written request of the City. Facilities must be constructed to District standards, and District plan check and inspection will be required for District acceptance. Plan check, inspection, and administrative fees will be required.

☐ This project proposes channels, storm drains 36 inches or larger in diameter, or other facilities that could be considered regional in nature and/or a logical extension of the adopted Cathedral City Master Drainage Plan. The District would consider accepting ownership of such facilities on written request of the City. Facilities must be constructed to District standards, and District plan check and inspection will be required for District acceptance. Plan check, inspection, and administrative fees will be required.

☒ An encroachment permit shall be obtained for any construction related activities occurring within District right of way or facilities, namely, Cathedral Canyon Channel – East and West, and Cathedral Canyon Channel – North. For further information, contact the District's Encroachment Permit section at 951.955.1266.

A2-2

223290

City of Cathedral City - 2 - November 8, 2018
Re: Agua Caliente Band of Cahuilla Indians
Cathedral City Fee-to-Trust Casino Project
Environmental Assessment/Tribal EIR

☐ The District's previous comments are still valid.

☒ Other: The project site is currently located in FEMA Zone X protected by levee on FIRM 06065C1589G. The levees along West Cathedral, North Cathedral and East Cathedral Channels are currently being reviewed by FEMA. Once the review is complete, the levees will be certified and the site will remain in FEMA Zone X protected by levee. A2-3

GENERAL INFORMATION

This project may require a National Pollutant Discharge Elimination System (NPDES) permit from the State Water Resources Control Board. Clearance for grading, recordation, or other final approval should not be given until the City has determined that the project has been granted a permit or is shown to be exempt.

If this project involves a Federal Emergency Management Agency (FEMA) mapped floodplain, then the City should require the applicant to provide all studies, calculations, plans, and other information required to meet FEMA requirements, and should further require that the applicant obtain a Conditional Letter of Map Revision (CLOMR) prior to grading, recordation, or other final approval of the project and a Letter of Map Revision (LOMR) prior to occupancy. A2-4

If a natural watercourse or mapped floodplain is impacted by this project, the City should require the applicant to obtain a Section 1602 Agreement from the California Department of Fish and Wildlife and a Clean Water Act Section 404 Permit from the U.S. Army Corps of Engineers, or written correspondence from these agencies indicating the project is exempt from these requirements. A Clean Water Act Section 401 Water Quality Certification may be required from the local California Regional Water Quality Control Board prior to issuance of the Corps 404 permit.

Very truly yours,

Deborah de Chambeau

RIVERSIDE COUNTY
DEPARTMENT OF
WASTE RESOURCES

November 8, 2018

TO: Melissa Cushman, Deputy County Counsel
Office of County Counsel

FROM: Ryan Ross, Principal Planner
Department of Waste Resources

RE: **Review of Draft Tribal Environmental Impact Report (TEIR) for the Agua Caliente Band of Mission Indians Casino Project (Project)**

The Riverside County Department of Waste Resources (RCDWR) has reviewed the Draft TEIR for Project. We have included comments and waste related information for consideration.

Solid Waste Analysis and Discussion

1. While the Draft TEIR incorrectly identifies the Salton City Landfill as the disposal facility for the Project (see comment 2), based on the Project scope, it is unlikely that the Project would have an adverse impact upon the County's solid waste system and overall waste reduction compliance. A2-5

2. Pages 20, 42, and 58 of the Draft TEIR identifies the Salton City Landfill, located in Imperial County, as the waste disposal facility for the Project. While the TEIR correctly identifies that waste services for the Project will be provided by Burrtec, which will deliver Project waste to the Edom Hill Transfer Station (EHTS), the Waste Delivery Agreement for the EHTS requires solid waste to be disposed of at a Riverside County facility, primarily the Lamb Canyon Landfill, located at 16411 Lamb Canyon Rd., Beaumont, CA, 92223. A2-6

3. To further reduce potential impacts to solid waste services, the RCDWR offers the following suggestions for consideration, which were developed to meet the goals and standards of State legislation and regulations addressing solid waste, including recycling and organics management:

   - Prior to construction, develop a Waste Recycling Plan (WRP) that identifies the materials (i.e., concrete, asphalt, wood, etc.) that will be generated by construction and development, the projected amounts, the measures/methods that will be taken to recycle, reuse, and/or reduce the amount of materials, the facilities and/or haulers that will be utilized, and the targeted recycling or reduction rate.
   - Ensure that the trash enclosures constructed for the Project are sized appropriately to house multiple bins for collection of trash, recyclables, and organic materials. A2-7
   - Subscribe to a recycling service for recyclables and organics with the waste hauler servicing the Project site.
   - The use of mulch and/or compost in the development and maintenance of landscaped areas within the project boundaries is recommended. Recycle green waste through either onsite composting of grass, i.e., leaving the grass clippings on the lawn, or sending separated green waste to a composting facility.

- Consider xeriscaping and the use of drought tolerant low maintenance vegetation in all landscaped areas of the project.
- Hazardous materials are not accepted at the Riverside County landfills. Any hazardous wastes, including paint, used during construction must be properly disposed of at a licensed facility in accordance with local, state and federal regulations.

Re: Impacts and increased costs to the Office of the District Attorney resulting from the proposed expansion of the Agua Caliente Band of Cahuilla Indians

---

Riverside County is the birthplace of Indian gaming and boasts the largest number of Indian casinos in California. The gaming industry here has boosted California's economy and increased the quality of life for tribal and non-tribal members. Indian casinos have become true resort destinations, and Riverside County has become a national model for government-to-government relations. This Tribal Unit (TU) is comprised of dedicated prosecutors, investigators, and support staff. The TU has formed close ties with sovereign Indian gaming tribes across the county for a common goal: Keeping criminals out of Riverside County casinos and off tribal lands. To achieve this goal, the TU vigorously prosecutes all casino-related crimes. Recently, the TU expanded to include the prosecution of all crimes that occur or have a nexus to any tribal land, not just those occurring in the casino.

The Riverside County Tribal Unit is currently staffed by portions of the following classifications:

A2-8

- Managing Deputy District Attorney ("MDDA")
- Deputy District Attorneys ("DDA")
- District Attorney Investigators
- Senior Investigative Technician ("IT")
- Government Relations Officer

Approximately 60% of our Eastern region DDA is devoted to Agua Caliente Casinos. Approximately, 33% of this number are criminal matters that originate from the Agua Caliente Spa Resort Casino (SRC).

In Fiscal Year 2017/2018, our office reviewed 124 criminal filings from the Agua Caliente Casinos and filed 90 criminal cases (11 felonies/79 misdemeanors), of which 24 (3 felonies/21 misdemeanors) arose from crimes occurring on the property of the SRC. It should also be noted

that since July 8, 2014, SRC has been operating without a functioning hotel. Our prosecutorial efforts during the FY 17/18 resulted in 50 total convictions from the Agua Caliente Casinos consisting of 15 felony convictions, 35 misdemeanor convictions and 6 prison commitments. At the end of FY 17/18, our Eastern Tribal DDA had an active caseload of 27 criminal cases arising out of the Agua Caliente Casinos of which 11 were felonies and 16 were misdemeanors.

These numbers once again bear out the impact of Proposition 47, codified in Penal Code section 1170.18, on our Tribal Gaming Unit. Proposition 47 reclassified numerous crimes, including felony drug possession and theft crimes, as misdemeanors. Our Tribal Gaming Unit continues to handle an increasingly large number of misdemeanor drug and theft crimes. In fact, at the end of FY 16/17, the number of misdemeanor filings in our Tribal Gaming Unit had reached triple digits for the fifth straight quarter.

A2-8 (Cont.)

From January 2018, through October 2018, the assigned DDA has reviewed 123 filing requests from Agua Casinos. Our office filed 99 of the cases submitted resulting in 13 felony cases and 86 misdemeanor cases (SPA casino contributed 29 cases for review, 24 filed resulting in 3 felony cases and 21 misdemeanors.) These 2018 filing numbers from the Agua Casino have already exceed the 2017 filing numbers in which our office reviewed 103 filing requests from the Agua Casinos. Of those cases reviewed our office filed 67 cases of which 12 were felony cases and 55 were misdemeanors (SPA casino contributed 42 cases for review, 33 filed resulting in 7 felony cases and 21 misdemeanors.)

The proposed renovation and expansion of the Agua Caliente Casinos includes casino expansion of 65,000 square feet of new gaming space. The 65,000 square feet of casino expansion will consist of 40,000 square feet of gaming floor, 17,500 square feet of housing and support, 5,000 square feet of restaurants and 2,500 square feet of retail. Other new construction associated with the proposed Project includes a 60,000 square feet of mixed used development and parking lot expansion of 1,000 spaces.

Based on the statistics from Fiscal Year 17/18, it is fair to predict that the number of criminal cases that will be generated is significant because of the entire expansion. The proposed project would increase the current square footage from 70,000 square feet to include a proposed additional 125,000 square feet (65,000 casino plus 60,000 mixed use), to create a total site square footage of 195,000 square feet. This would constitute 179% square foot increase.

A2-9

Proportionally the expansion would equate to an additional 71 cases from the Agua Caliente Casinos to the Riverside County District Attorney caseload. Given the increased external growth (as opposed to casino / gaming growth), it is reasonably projected that the percentage of "quality of life" crimes will increase, with a resultant increase in our commitment of prosecutorial and investigative resources needed to combat such crimes.

At a minimum, 70% of a DDA and 70% of a DA Investigator would be appropriate and necessary to address the anticipated increase in criminal activities that will be generated as an unavoidable result of the SRC expansion. Of course since the final effects of criminal activity

due to this expansion are unknown, the estimated additional resources above will need to be adjusted once the projects are completed, and the facilities are up and running.

The District Attorney's Office appreciates having the opportunity to response to this request and will be available to address any questions that arise as a result of this feedback.

RE: Agua Caliente Band of Cahuilla Indian Cathedral City Fee-to-Trust Casino Project

Dear Ms. Amy Dutschke:

This letter responds to your request for comments regarding Cathedral City Fee-to-Trust Casino Project . As you are aware, SunLine Transit Agency (SunLine) currently operates fixed route service along Hwy 111 and Date Palm Drive, with transit service provided within the project area.

After future review of transit amenities within the defined project area, it indicates that the proposed Fee-to-Trust Casino Project will impact transit amenities utilized by passengers. Therefore, we are recommending the City of Cathedral City work with SunLine on the following issues:

A. Impacts to Existing Bus Stops

Based on our review, the existing bus stop #234 located on the northwest corner of Highway 111 at Allen maybe impacted by the improvement project, as well as, bus stop #46 at Date Palm at Grove. According to the proposed plans, bus stops #234 and #46 may need to be temporarily closed while work is being performed at those locations. Please have the contractor performing work for this project contact SunLine at least thirty (30) days in advance of work commencing so arrangements can be made to have the existing amenities (bench and waste container) removed.

A3-1

Please note internal transit-friendly pedestrian access can be accomplished by following the guiding principles below:

- Pedestrian walkways to bus stops should be designed to meet the needs of all passengers, including the disabled, seniors and children. All pedestrian walkways should be designed to be direct from the street network to the main entrance of buildings.

SunLine TRANSIT AGENCY

MEMBERS: Desert Hot Springs Palm Springs Cathedral City Rancho Mirage
Palm Desert Indian Wells La Quinta Indio Coachella Riverside County

A Public Agency

- Pedestrian walkways should be designed to provide convenient connections between destinations, including residential areas, schools, shopping centers, public services and institutions, recreation, and transit.
- Provide a dedicated sidewalk and/or bicycle paths through new development that are direct to the nearest bus stop or transit facilities.
- Provide shorter distance between building and the bus stop by including transit friendly policies that address transit accessibility concerns to encourage transit-oriented development. These policies can be achieved through zoning policies, setback guidelines, building orientation guidelines, and parking requirements
- Limit the use of elements that impede pedestrian movement such as meandering sidewalks, walled communities, and expansive parking lots.
- Eliminate barriers to pedestrian activities, including sound walls, berms, fences, and landscaping which obstructs pedestrian access or visibility. Gates should be provided at restricted areas to provided access to those using transit services.
- Pedestrian pathways should be paved to ensure that they are accessible to everyone. Accessible circulation and routes should include curb cuts, ramps, visual guides and railing where necessary. ADA compliant ramps should be placed at each corner of an intersection.
- A minimum horizontal clearance of 48 inches (preferable 60 inches) should be maintained along the entire pathway.
- A vertical clearance of 84 inches (preferable 96 inches) should also be maintained along the pathway.

A3-1 (Cont.)

Should you have any questions or concerns regarding our comments, please do not hesitate to contact me. You may reach me at 760-343-3456, ext. 1603.

Respectfully,

Victor A. Duran

SECTION 3.0
RESPONSE TO COMMENTS

3.1 RESPONSE TO COMMENT LETTER A1 – CITY OF RANCHO MIRAGE

Response to Comment A1-1

Comment noted. The Traffic Impact Analysis (TIA) analyzed the roadway segments of East Palm Canyon Drive between Date Palm to Frank Sinatra and Frank Sinatra to Country Club using traffic volumes from the Cathedral City General Plan. Under these conditions, the TIA indicates that these road segments are expected to continue to operate at unacceptable levels of service.

It is acknowledged that using the forecasted 2040 traffic volumes from the City of Rancho Mirage General Plan 2017 Update for road segment #5 Date Palm to Frank Sinatra and #6 Frank Sinatra to County Club would yield acceptable levels of service. However, the traffic volumes used in the TIA represent a more conservative estimate of future traffic conditions.

The traffic volumes used in the TIA were obtained from Cathedral City's General Plan Circulation Element which utilized a refined version of the Coachella Valley Area Transportation Study (CVATS) forecasting model. The model outputs were then extrapolated to Year 2040 using an annual growth rate of 1.5 percent per year (See page 4-7 of the TIA). The Rancho Mirage traffic volumes are based on the Riverside County Transportation Analysis Model (RivTAM) which has not had a major update since 2009. Furthermore, the Rancho Mirage General Plan Update assumed minimal growth over existing 2016 traffic conditions, resulting in the relatively lower 2040 traffic volume forecasts. These assumptions result in a generously low traffic volume forecast in comparison to the Cathedral City volumes.

The forecasted traffic volumes from the Cathedral City General Plan, used in the TIA, provide a reasonable estimate of future traffic conditions. No changes to the TIA or Draft EA are warranted.

Response to Comment A1-2

Comment noted. The TIA analyzed the roadway segments of East Palm Canyon Drive between Date Palm to Frank Sinatra and Frank Sinatra to Country Club using guidelines from the Cathedral City General Plan, which are more conservative than Rancho Mirage Guidelines. As such, the "jurisdiction" identified in Table 1-5 of the TIA for the roadway segments was incorrectly identified as Cathedral City. The roadway segments are, in fact, largely within the jurisdiction of the City of Rancho Mirage. However, this error does not impact the analysis or conclusions of the TIA.

Response to Comment A1-3

Comment noted. While Frank Sinatra Drive is located in the City of Rancho Mirage, it is classified as a major highway in the Cathedral City General Plan. This classification is consistent with the roadway classification in the Rancho Mirage General Plan 2017 Update. Therefore, no changes to the TIA or Draft EA are warranted.

Response to Comment A1-4

Figure 3-A of the TIA identifies the study intersections and roadways that were analyzed within the traffic model. While three signalized intersections exist along East Palm Canyon between Date Palm and Frank Sinatra, the intersecting roadways (Sungate Way, Officer Jermaine Gibson Avenue, One Mirage Place) are not considered General Plan Roadways and thus were not included in the analysis. In general, only General Plan Roadway intersections and intersections with potential LOS issues are analyzed in traffic impact analyses. The size and potential volume of these three intersecting streets was determined to not be significant enough to warrant analysis. In addition, nearby intersections with much higher volumes (Date Palm Drive and Frank Sinatra Drive) were analyzed and resulted in acceptable LOS.

Response to Comment A1-5

Refer to Section 3.7 of the TIA, Determination of Significant Impact, on page 3-16. If a roadway segment is currently operating unacceptably with a vehicle-to-capacity ratio less than 1.0 and the project increases the overall vehicle-to-capacity ratio to greater than 1.0, this would constitute a significant impact on the roadway segment. This criterion is consistent with surrounding agencies' policies and other recent similar traffic impact studies.

Table 5-5 on page 5-8 of the TIA indicates that road segment #5 Date Palm to Frank Sinatra is currently operating at an unacceptable LOS with a vehicle-to-capacity ratio of 0.82. Under Alternative A, the roadway segment would continue to operate at an unacceptable LOS with an increased vehicle-to-capacity ratio of 0.85. Given that the vehicle-to-capacity ratio would remain below 1.0, this increase would not constitute a significant impact. Therefore, no improvements are proposed.

3.2 RESPONSE TO COMMENT LETTER A2 – COUNTY OF RIVERSIDE

Response to Comment A2-1

Comment noted.

Response to Comment A2-2

Comment noted. Refer to Table 1-1 of the Draft EA regarding potential permits required for the Proposed Project.

Response to Comment A2-3

Comment noted. Refer to Section 4.2.1 of the Draft EA for discussion of potential floodplain impacts.

Response to Comment A2-4

Comment noted. Refer to Table 1-1 and Section 4.2 of the Draft EA. The Proposed Project will not require a NPDES permit, but will require coverage under the existing NPDES General Construction Permit from the U.S. Environmental Protection Agency (USEPA) for Stormwater Discharges. The Proposed Project does not involve a Federal Emergency Management Act (FEMA) mapped floodplain, and thus does not require further related studies such as a Letter of Map Revision. Additionally, the project alternatives will not impact a natural watercourse or mapped floodplain, and thus will not require a Clean Water Act permit from the U.S. Army Corps of Engineers or a 401 Water Quality Certification from the USEPA. It should be noted that state permitting requirements do not apply on federal trust lands.

Response to Comment A2-5

Comment noted. Commenter acknowledges that the Proposed Project is unlikely to have an impact on the County's solid waste system and waste reduction compliance, which is consistent with the discussion in Section 4.9 of the Draft EA.

Response to Comment A2-6

Comment noted. The Draft EA has been revised to reflect that solid waste will be disposed of at the Lamb Canyon Landfill. Refer to **Section 4.0 Errata Sheet** for revisions to pages 20, 42, and 58 of the Draft EA. As noted in Comment A2-5, the Lamb Canyon landfill has sufficient capacity to accept waste from the Proposed Project and therefore the conclusions of the Draft EA with respect to less than significant solid waste effects remain valid.

Response to Comment A2-7

Comment noted. Refer to Section 4.9.1 of the Draft EA regarding impacts to solid waste services. Impacts to solid waste services from both construction and operation of the Proposed Project were determined to be less than significant, and therefore do not warrant mitigation measures. Best management practices, green construction methods as adopted under the Tribal Building and Safety Code, and voluntary measures that would be implemented by the Tribe, including strategies to reduce waste,

have been incorporated into the design of the Proposed Project and are discussed in Table 2-2 of the Draft EA.

Response to Comment A2-8

Comment noted. No response is required. Commenter provides background information on law enforcement and criminal activity in Riverside County.

Response to Comment A2-9

The commenter is mistaken in characterizing the Proposed Project as a "renovation and expansion of the Agua Caliente Casinos." As described in Section 2.2 of the Draft EA, the Proposed Project consists of the fee-to-trust transfer of the 13.6-acre North Site and subsequent development of a new casino and related facilities, wholly located within the City of Cathedral City.

As stated in Section 4.6 of the Draft EA, criminal incidents may increase in the vicinity of the Proposed Project, as with any other development of this size. The commenter's calculations of anticipated additional criminal cases were incorrectly calculated from an assumption of a casino expansion rather than a new casino facility; moreover, the methodology for the commenter's calculations was not explained and cannot be confirmed. The commenter notes that the Palm Springs Spa Resort Casino operated by the Tribe contributed 42 cases in 2017 for review by the Riverside County District Attorney, and 29 from January 2018 through October 2018. The proposed Cathedral City Casino would be smaller in size than the Palm Springs Spa Resort Casino and thus is likely to generate fewer cases than the 71 cases estimated by the commenter. As detailed in Section 4.9 of the Draft EA and the Community Impact Analysis (Appendix E of the Draft EA), the Proposed Project is projected to generate approximately 164 to 269 annual calls for law enforcement service beginning in its first year of operation, between a 0.3 and 0.5 percent increase over Cathedral City Police Department's most recent (2017) annual call volume. Mitigation measures are provided in Section 5.0 of the Draft EA to avoid potential fiscal impacts that would offset the increased cost of law enforcement services.

In accordance with Section 11.7 of the Compact and mitigation within the Draft EA, prior to the commencement of the Proposed Project, the Tribe shall offer to commence negotiations with the County related to the provision of public services to meet the increase in demands resulting from the project. Refer to Section 1.4.2 of the Draft EA for information about the Compact requirements.

3.3 RESPONSE TO COMMENT LETTER A3 – SUNLINE TRANSIT AGENCY

Response to Comment A3-1

Comment noted. Potential impacts to transit service in the vicinity of the North Site are addressed in Section 4.7 of the Draft EA and Section 3.11 of the TIA. Potential impacts to transit facilities would be mitigated by contributions to transit development funds, as outlined in Section 5.0 of the Draft EA. Additionally, the Best Management Practices outlined in Table 2-2 of the Draft EA provide measures that would promote pedestrian friendly design and transit accessibility throughout operation of the Proposed Project.

Additional BMPs related to coordination with SunLine Transit Agency to temporarily remove, replace, and/or relocate the bus stops have been added to Table 2-2 of the revised Draft EA. Please refer to the errata sheets in **Section 4.0** of this Final EA.
