Lead Agency
Address
375 Beale Street Ste 600, San Francisco, CA 94105
Phone #: (415) 749-5113

SCH # 1998092072 Contact: Ivy Tao

Project Title: Applied Materials Building 100 Equipment and Process Innovation and Commercialization Center Semiconductor Research and Development Laboratory

Project Location: Sunnyvale Santa Clara
City *County*

Explain "exceptional circumstances" (CEQA, Section 15205(d)) for requesting a shortened review. Identify which of the 5 criteria in Appendix K are met for this project.

Of the criteria in Appendix K, the following two are met for this project:

Severe time constraints – The project applicant (Applied Materials) faces urgent financing or decision-making deadlines that cannot be met without shortening the review.

Supplement to existing document – The document is a supplement to a draft EIR or proposed/mitigated negative declaration already submitted to the SCH. The Bay Area Air District prepared this supplemental EIR to address air quality and greenhouse gas emissions impacts associated with its discretionary permit action, and this EIR supplements the certified EIR prepared by City of Sunnyvale, and reviewed by the City of Sunnyvale's Addendum in 2024.

List responsible and trustee state agencies with contact person, phone number and date of consent for the shortened review, as well as any agencies that have commented on the project (attach additional pages, if necessary):

No other responsible or trustee state agencies have discretionary approval related to the project.

City of Sunnyvale, lead agency, issued all of its discretionary permits related to the project, including project approval on April 22, 2024.

As designated representative for the lead agency, I verify, in their behalf, that there is no "statewide, regional, or areawide significance" to this project.

Length of review being requested: 30 days
