Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): Yes
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No

CHILDREN'S HOSPITAL OF LOS ANGELES (Continued) **1000278867**

Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 133
. Waste name: Aqueous solution with 10% or more total organic residues

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 725
. Waste name: Liquids with mercury > 20 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D007
. Waste name: CHROMIUM

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002950842

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

PACIFIC BELL (Continued) **1000250325**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

Historical Generators:
Date form received by agency: 02/16/2006
Site name: DELUXE LABORATORIES
Classification: Large Quantity Generator

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D011
. Waste name: SILVER

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

DELUXE LABORATORIES INC (Continued) **1000428979**

TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Date form received by agency: 02/18/2004

LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 11/14/2018

Next Scheduled EDR Contact: 04/15/2019
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 11/14/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

UTM Y (Meters):	3773639.2
Elevation:	381 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

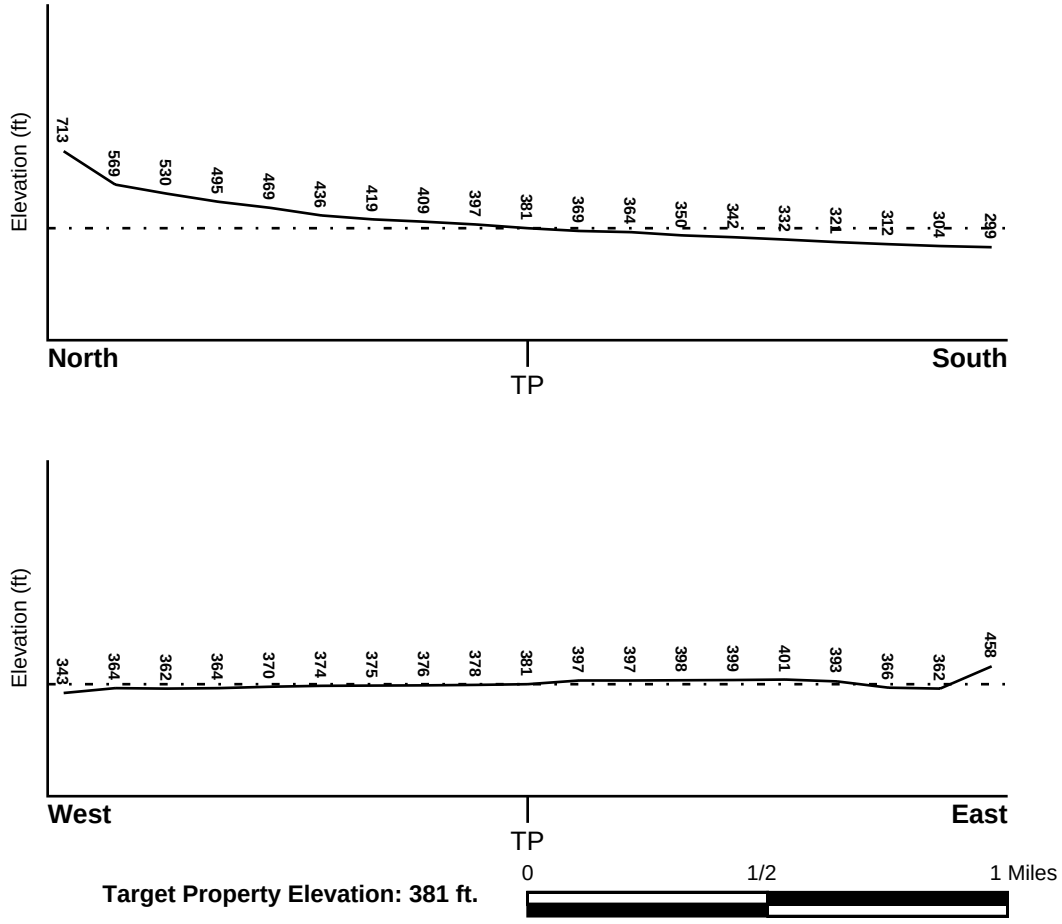
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1610F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1605F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/8 - 1/4 Mile West	S
1G	1/8 - 1/4 Mile West	S

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Miocene
Code:	Tm *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

DESKTOP ENVIRONMENTAL RECORDS REVIEW

4867 Sunset Boulevard
Los Angeles, California
January 31, 2019

Executive Summary

On behalf of Kaiser Permanente (Kaiser), Stantec Consulting Services Inc. (Stantec) has completed a desktop environmental records review for the property located at 4867 Sunset Boulevard, Los Angeles, California (the "Property"). The environmental review was completed to evaluate the possible presence of environmental impacts that may have sourced from current and historical site activities, and/or operations associated with surrounding properties and facilities. Stantec understands that the intended use of the Property is continued medical facilities and infrastructure.

Stantec obtained historical sources of information to ascertain the past use of the Property and surrounding area and evaluate if past uses may have had the potential to impact environmental media beneath the Property. Governmental, regulatory, and other public records were evaluated to identify potential contributors to possible adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from first developed use of the Property and that of surrounding properties, to the present. The following are conclusions from the records review.

- Prior to the current development as a hospital/medical office buildings, the Property was a portion of the Barnsdall Park on Olive Hill and remained undeveloped until approximately 1954 when the Kaiser Foundation Hospital was developed on the southwest portion of the parcel. The original hospital consisted of a single long rectangular building. By 1966, the hospital had expanded to include an additional medical office building, lab, and wards. A parking garage building was also constructed to the north of the Property boundary. In subsequent years, the Property developed into the Los Angeles Medical Center, undergoing additional development in several phases. The most recent phase of redevelopment occurred in 2012-2103, resulting in the current configuration of improvements at the Property.

- Past land uses on nearby properties that could pose an environmental threat to the Property include gas stations and/or auto repair shops at 4850 Sunset Blvd., directly across Sunset from the Property and at 4901 Sunset (now 1505 Edgemont), directly across Edgemont from the Property. Additional nearby former gas stations and/or auto repair shops were located at 4700, 4720, and possibly onsite or adjoining the Property at 4747 Sunset Boulevard.

- The Property is on record as containing a 25,000-gallon diesel UST permitted by the Los Angeles City Fire Department (LAFD). However, the lead Kaiser engineer for the LAMC confirmed that there is no UST at the Property and that the referenced UST is located at the 1550 Edgemont facility.

- In July 1988, minor overfill contamination was found in soil and hydrocarbons were detected in groundwater during a Leak Detection Program for a 6,000-gallon UST. The LAFD referred the LUST case to the RWQCB, who directed Kaiser to install additional groundwater monitoring wells to confirm/delineate impacts to groundwater. In April 1997, a letter from the RWQCB to Kaiser confirmed the completion of investigation and remedial action activities and granted UST Case Closure for the LUST case.

- LAFD files reviewed contained a report of removal of a diesel UST in September 1992 at the Property. Soil containing hydrocarbons was over-excavated from the UST pit. An estimated 595 cubic yards of soil were removed and disposed offsite. No further action was recommended in the report. LAFD files also described the discovery during grading and removal of two previously abandoned USTs on the Property in October 2011 and January 2012, respectively. No contamination was found upon removal of the USTs and a No Further Action (NFA) letter was issued by the LAFD.

- The Property is identified in environmental databases as a generator of hazardous waste. No records of environmental non-compliance or violations were found pertaining to the Property.

- The Property is located within the City of Los Angeles with multiple nearby listings of hazardous waste generators and sites with current or historic releases of hydrocarbons to soil and/or groundwater. Nearly all the nearby Leaking Underground Storage Tank sites have received regulatory case closure. Numerous active USTs are present at facilities in the vicinity of the Property. Properly maintained and permitted USTs are not considered an imminent environmental threat to the Property.

Conclusions and Recommendations

Historical maps and directory listings identified nearby gas stations and/or auto repair shops located at 4700, 4720, 4747, 4850, and 4901 Sunset Boulevard as early as 1919-1924. These historical operations likely included handling of hazardous materials and petroleum products and generation of hazardous wastes, as well as possible underground leaks from UST systems. Currently, the locations of these former gas stations and/or auto repair shops are fully developed commercial properties.

During redevelopment of the Property, soil and soil vapor containing petroleum hydrocarbons, solvents, and other organic and inorganic contaminants could be encountered during grading, excavation of footings, underground utility installation, and other ground disturbing activities. Accordingly, Stantec recommends that a Soil Management Plan approach be implemented to address these environmental contingencies during ground disturbance and construction activities. The Soil Management Plan (SMP) would specify the roles, responsibilities, protocols, and procedures to be employed in the event that subsurface chemical impacts are indicated or encountered during redevelopment of the Property. Key functions of the SMP in the event of a discovery of subsurface impacts are to specify procedures for immediate notification to local

oversight agencies, provide health and safety protocols to protect workers, site occupants, and the public, and to isolate and contain suspected impacted materials while chemical analysis of preliminary samples is conducted.

For new facilities that include occupied space, a vapor barrier is recommended if potential vapor encroachment conditions (VEC) are indicated or suspected during construction, for protection of future occupants. Such conditions could include soil impacted with volatile organic compounds (VOC) being left in place beneath the depth of ground disturbance for new construction, the presence of shallow groundwater containing VOC beneath the Property, or soil vapor migration from adjacent or nearby sites impacted with VOC.

1.0 Introduction

At the request of Kaiser Permanente (Kaiser), Stantec Consulting Services Inc. (Stantec) is pleased to submit this report documenting the results of a desktop environmental records review conducted for the property located at 4867 Sunset Boulevard in Los Angeles, California (the "Property", **Figure 1**). This assessment was completed to evaluate the possible presence of environmental conditions and impacts that may have sourced from historical or current activities on the Properties, as well as the potential for environmental impacts that may have impacted the Properties from off-site third-party sources. Stantec understands that the intended use of the Property is continued medical facilities and infrastructure associated with the Kaiser Permanente Los Angeles Medical Center. All work was completed in accordance with the Work Authorization from Kaiser Permanente dated January 8, 2019.

1.1 PROPERTY LOCATION & FACILITY DESCRIPTION

The Property, identified by Los Angeles County Assessor Identification Numbers 5543-010-017 and 5543-011-010, is situated on the north side of Sunset Boulevard and east of North Edgemont Street in the City of Los Angeles. The Property encompasses approximately 4.7 acres and is developed with a large commercial medical building/hospital complex that comprises a portion of the Kaiser Permanente Los Angeles Medical Center.

The Property comprises a portion of the approximately 15.34-acre Kaiser Permanente Los Angeles Medical Center campus which is located along Sunset Boulevard between North Alexandria Avenue and North Vermont Avenue in the Hollywood Community Plan Area of the City of Los Angeles. The City of Los Angeles Planning Department considers the Unified Hospital Development Area to encompass the Kaiser Medical Center campus. The property is part of the Kaiser Permanente Los Angeles Medical Center redevelopment project which proposes to expand the existing medical center campus by replacing facilities and adding new buildings.

Land uses generally surrounding the Medical Center campus include open space, specifically Barnsdall Art Park to the northeast; and commercial uses to the north along Edgemont Street and to the east and west along Sunset; and residential farther to the north, south, and west. A Property location map is provided as **Figure 1** and a Property site map is provided as **Figure 2**.

2.0 DESKTOP RECORDS REVIEW

The objective of consulting historical sources of information was to develop the history of the Property and surrounding area, in order to evaluate if past uses could have impacted subsurface conditions at the Property. Physical setting records were evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the first developed use of the Property and surrounding properties. Stantec's research included the reasonably ascertainable and useful records described in this section.

2.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below with additional details in the following subsections

Topography:	The topographic gradient in the vicinity of the Property is generally to the south, away from Olive Hill, and the Property is located at approximately 410 feet above mean sea level (ft. amsl).
Soil/Bedrock Data:	The Property and surrounding area soils are classified as urban land. Unconsolidated alluvium consists of silt, clay, and silty sand. Bedrock consists of marine and non-marine sedimentary rocks of the Santa Monica Mountains.
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	The depth to groundwater may vary from approximately 30 to 70 feet below ground surface (bgs), with gradient direction to the south.
Note: Site-specific groundwater direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

2.1.1 Property Topography and Surface Water Flow

The Property is situated at an elevation approximately 410 ft. amsl. Olive Hill rises to 495 feet amsl to the north of Sunset Boulevard and the Medical Center campus. Based on the topography and existing surface conditions, general surface water flow direction is to the south.

2.1.2 Regional and Property Geology

The Property is situated near the southern edge of the Transverse Ranges Geomorphic Province of California, within the Los Angeles Basin. The Los Angeles Basin is a lowland coastal plain approximately 50 miles long by 20 miles wide that slopes gradually southward and westward toward the Pacific Ocean. The coastal plain overlies a structural trough filled with a thick

sequence of early Cenozoic through Holocene age marine and nonmarine sediments that were deposited as the basin subsided.

The Property is further located on the Hollywood Piedmont slope of the Coastal Plain of Los Angeles. The site area is underlain by Pleistocene alluvium of the Lakewood Formation which is underlain by the upper Miocene age Puente Formation. Alluvial deposits within this area are underlain by basement rocks of the nearby Santa Monica Mountains (DWR 1961). Based on a previous subsurface investigations at a nearby site, the shallow soils/alluvium beneath the site area is dominated by layers of silt, clay, and silty poorly-graded sand.

2.1.3 Regional and Property Hydrogeology

According the Department of Water Resources (DWR) Bulletin 118, the Property lies within the Hollywood Subbasin which occupies a 16 square mile area of the northeastern Coastal Plain. The Hollywood Subbasin is bounded on the north by Santa Monica Mountains and the Hollywood fault, on the east by the Elysian Hills, on the west by the Inglewood fault zone, and on the south by La Brea High, formed by an anticline that brings impermeable rocks close to the surface. Surface drainage from the site flows in a southerly direction towards Ballona Creek, where it then flows to the west and to the Pacific Ocean.

Groundwater in the Hollywood Subbasin is mainly produced from Pleistocene age alluvial sands and gravels. Unconfined groundwater conditions exist in the shallow aquifers in the northern and eastern portion of the subbasin. In the deeper aquifers and in the remainder of the subbasin, groundwater is confined, and clay members separate the aquifers over much of this subbasin. (DWR 1961).

Local depth to groundwater was evaluated through a review of the Regional Water Quality Control Board's (RWQCB's) Geotracker database. According to the most recent groundwater monitoring report for the site located at 1630 North Vermont Avenue (Shell/Tesoro Former Arco#5025), approximately 1,150 feet northeast of the Property, groundwater was gauged at depths ranging from 25 to 44 feet below ground surface (bgs) in May 2018 with a flow direction to the east/southeast. However, based on local topography, the average groundwater flow direction in the site area is inferred to be southerly.

2.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources Inc. (EDR), a third-party environmental database search firm. Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in **Attachment A**.

2.2.1 Listings for Property

The Property was identified in the following databases searched by EDR:

- CA RGA LUST: The Property is listed as a Leaking Underground Storage Tank (LUST) site. No other pertinent information is included under this listing.

- CA HAZNET: The Property is listed as having generated and disposed of off-specification, aged, or surplus organic wastes, alkaline solutions, unspecified oil-containing waste, and paint sludge in 2007.

- CA UST, SWEEPS UST: The Property is listed as containing an active underground storage tank (UST) permitted by the City of Los Angeles Fire Department. The UST is listed as 1,000 gallons in capacity and contains diesel fuel. No other pertinent information is included under this listing.

- RCRA-LQG: The Property was listed as a Large Quantity Generator of various categories of hazardous waste with an active EPA ID number.

- CA HAZNET: The Property is listed under the name Rudolph & Sletten Inc. as having generated and disposed of laboratory waste chemicals including off-specification, aged, or surplus organic wastes in 2007.

- CA FINDS: The Property was listed for hazardous waste generation with an ID number, but no other pertinent information is included under this listing.

- CA LUST, HIST CORTESE, NPDES, CIWQS: The Property is listed as a LUST Cleanup Site with a status of Case Closed as of April 7, 1997. The UST release was reported in February 1989 and listed as diesel. The site was listed in the NPDES database for a Stormwater Permit for Construction activities that was terminated in February 2014 and for an earlier Stormwater Permit for Construction activities that was terminated in September 2010.

- CA HIST UST, CA EMI: The Property was listed as containing a historical 10,000-gallon diesel UST installed in 1976 and for air emissions (CA EMI) reported to the South Coast AQMD for 1987.

- CA HIST UST: The Property was listed as a Hospital containing two historical USTs. A 10,000-gallon diesel UST was installed in 1976 and a 1,500-gallon diesel UST was installed in 1983. The leak detection method for the USTs was listed as Visual.

2.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions associated with neighboring properties to impact the

Property. Based on this evaluation, the following individual facilities were identified as the most likely potential sources of releases that could possibly impact the Property.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property
Texaco Inc. 4747 Sunset Boulevard Los Angeles, CA	Sweeps UST, CA FID UST	116 feet / 0.022 miles east/southeast (cross-gradient to the Property)
This site was listed in the UST databases but no pertinent information is included under this listing.		
Schmitt Gustav 4874 Sunset Boulevard Los Angeles, CA	EDR Hist Auto	199 feet / 0.038 miles southwest (down-gradient to the Property)
The site was reportedly a gasoline service station and automotive repair facility between 1924 and 1942. No further information was provided.		
Kovall CC 4720 Sunset Boulevard Los Angeles, CA	EDR Hist Auto	239 feet / 0.045 miles east/southeast (cross-gradient to the Property)
The site was reportedly a gasoline service station and automotive repair facility between 1929 and 1942. No further information was provided.		
COVEV J A 4901 Sunset Boulevard Los Angeles, CA	EDR Hist Auto	275 feet / 0.052 miles west/southwest (cross-gradient to the Property)
This site was listed as a gasoline and oil service station in 1937 but no pertinent information is included under this listing.		
McCall Payne Inc 4700 Sunset Boulevard Los Angeles, CA	EDR Hist Auto	436 feet / 0.083 miles east/southeast (cross-gradient to the Property)
The site was reportedly an automotive repair facility in 1924. No further information was provided.		
Abramson Morris 1528 N. Vermont Ave. Los Angeles, CA	EDR Hist Auto	643 feet / 0.122 miles east (cross-gradient to the Property)
The site was reportedly a gasoline service station and automotive repair facility between 1924 and 1942. No further information was provided.		
Hollywood Cleaners 4730 Hollywood Blvd. Los Angeles, CA	RCRA, CAL HAZNET	776 feet / 0.147 miles northeast (up-gradient to the Property)
The site was reported as a Small Quantity Generator but no violations were reported.		

2.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of releases that might impact the Property:

2.3.1 Local Environmental Agency Records

Agency Name Contact Information	Finding
Custodian of Records, Los Angeles County Public Health Investigation (PHI) Via Facsimile: (323) 728-0217 January 11, 2019	A written request subject to the FOIA was submitted to the Los Angeles County Public Health Investigation to review their files regarding the Property. The information requested included file information regarding any records that indicate environmental concern at the Property. A response had not been received at the time of this report. Pertinent information, if received, will be summarized in an addendum to the report.
City of Los Angeles Fire Department 200 N. Mail St., 17th Fl. Los Angeles, CA 90012 January 9, 2019	A written request subject to the FOIA was submitted to the Los Angeles City Fire Department to review their files regarding the Property. The information requested included active and inactive hazardous materials file information, active/inactive UST files, and any records that indicate environmental concern at the Property. A response was received on January 14, 2019 which included the following documents related to USTs: • Documents related to removal of an abandoned 1,000-gallon diesel UST in Oct. 2011. The UST was discovered during demolition activities at the Property. No contamination was found upon removal of the UST and a No Further Action (NFA) letter was issued by the LAFD in May 2012. • Records related to removal of an abandoned 8,200-gallon UST in Jan. 2012, uncovered during grading in Dec. 2011. No contamination was found upon removal of the UST and a NFA letter was issued by the LAFD in April 2012. • Report of Leak Detection Program for a 6,000-gallon UST dated July 1988. Minor overfill

Agency Name Contact Information	Finding
	contamination was found in soil and hydrocarbons were detected in groundwater. • Letter from the LAFD to Kaiser dated May 1988 referring the UST release case to the RWQCB for oversight. • Letter from Kaiser to the RWQCB dated April 1991 requesting no further action for the minor overfill release from a UST discovered in 1987 and low levels of groundwater impact. • Letter from the RWQCB to Kaiser dated July 1992 directing Kaiser to install additional groundwater monitoring wells to confirm/delineate impacts to groundwater. • Letter from the RWQCB to Kaiser dated April 1997 confirming completion of investigation and remedial action activities and granting UST Case Closure. • Report of removal of a diesel UST in Sept. 1992. Soil containing hydrocarbons was over-excavated from the UST pit. An estimated 595 cubic yards of soil were removed and disposed offsite. No further action was recommended. • Records regarding installation of a double-wall Plasteel 20,000-gallon UST in Oct. 1992. • A permit from LAFD dated July 2003 to install a 25,000-gallon double wall fiberglass UST for diesel storage. • Secondary Containment Testing report dated May 2014 for a 25,000-gallon fiberglass diesel UST system indicating failing results for a secondary pipe and piping sump. • Secondary Containment Testing report dated Sept. 2014 for a 25,000-gallon fiberglass diesel UST system indicating failing results for a secondary pipe. • A UST permit from LAFD dated Dec. 2014 to install a new vent box, sensor, and repair a secondary vent line on a 25,000-gallon double wall diesel UST. Soil sampling and secondary containment testing was performed following completion of UST modifications.

Agency Name Contact Information	Finding
	A response was received from the LAFD which included the following records related to hazardous materials and USTs: • Application for Division 5 Permit – Atmospheric Underground Tank, Permit type: UST System Modify, Plan Check and Inspection, 8-4-2016 • Data Entry Instruction Form, 4-4-2014 • 2 USTs- Diesel • 1 Belly Tank • All Addresses inspected • Inspection Referral Form, 4-2-2014 • Note: there is a UST at 1550 N Edgemont St and at 4730 Barnsdall Av- confirmed 4-4-2014. 4730 Barnsdall changed to 4733 E Barnsdall • Business info Note: Inactivated 3 USTs under 1526 Edgemont St • Hazardous Material System BP-8: Computer Listing of Inventory Submitter Inspection Responsibility: VIU • Total chemicals: 14 • Compressed Air • Freon • Liquid Oxygen • Oxygen • Formaldehyde • Hydrochloric Acid • Formalin • EG 5611 • EG 5610 • EG 5360 • Liquid Nitrogen • Liquid Nitrous Oxide • Diesel Fuel • Autep Developer • 1550 Barnsdall – UST Diesel Abandonment • Date of abandonment 1-17-2012 • 3 tanks not abandoned • Hazardous Materials Business Plan HMBP
City of Los Angeles Department of Building and Safety 201 N Figueroa St, Los Angeles, CA 90012	Stantec obtained and reviewed a list of building permits issued for the Property address. The records reviewed included approximately 30 building permits issued between February 1952 and August 1978 for the Kaiser Permanente Hospital at the Property. The project description on the permit applications ranged from minor

Agency Name Contact Information	Finding
	repairs, upgrades, and alterations to additions, remodeling, and renovations. No activities related to hazardous materials or potential environmental conditions were noted in the permit applications.

2.3.2 Regional Environmental Agency Records

Agency Name, Contact Information	Findings
Custodian of Records, Department of Toxic Substances Control Chatsworth Regional Office Via Facsimile: (818) 717-6526 January 9, 2019	A written request subject to the FOIA was submitted to the Department of Toxic Substances Control, Chatsworth Regional Office to review their files regarding the Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property. A response was received on January 10, 2019 indicating that after a thorough search, no records pursuant to the requests were identified.
Custodian of Records, Department of Toxic Substances Control Cypress Regional Office Via Facsimile: (714) 484-5318 January 9, 2019	A written request subject to the FOIA was submitted to the Department of Toxic Substances Control, Cypress Regional Office to review their files regarding the Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property. A response was received on January 10, 2019 indicating that after a thorough search, no records pursuant to the requests were identified.
Custodian of Records, Los Angeles Regional Water Quality Control Board	A written request subject to the FOIA was submitted to the Los Angeles Regional Water Quality Control Board to review their files regarding the Property. The information requested included file information regarding permits, hazardous materials, waste,

Agency Name, Contact Information	Findings
Via e-mail: rb4-publicrecords @waterboards.ca.gov January 9, 2019	complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property. Files were reviewed at the RWQCB Los Angeles office on January 29, 2018. Records reviewed pertained to the NPDES Stomwater Permit for Construction Activities and notices of procedural deficiencies related to the permits. An incident involving a spill/discharge of concrete slurry or wash water to the storm drain system was noted during an inspection in April 2003. No other activities related to hazardous materials or potential environmental conditions were found in the records reviewed.

2.4 HISTORICAL RECORDS REVIEW

2.4.1 Aerial Photographs

Stantec reviewed historical aerial photographs of the Property. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs. The aerial photographs are provided in **Attachment B**.

Year	Scale	Observations, Property and Adjoining Properties
1923	1" = 500'	The Property appears to be a portion of Barnsdall Park with orchards visible. The historic Hollyhock House is situated northeast of the Property. Adjacent and nearby properties appear to be undeveloped or contain residences.
1928	1" = 500'	The Property appears to remain undeveloped and a portion of Barnsdall Park. Adjacent and nearby properties appear to be dominantly residential.
1938	1" = 500'	The Property appears to be undeveloped and primarily unchanged from the previous photograph.
1948	1" = 500'	The Property remains undeveloped and a portion of Barnsdall Park. Adjacent and nearby properties appear to be dominantly residential, with increasing commercial development along the major streets.
1954	1" = 500'	The Property has been developed with a commercial building, possibly a hospital or medical center, and parking areas near the

Year	Scale	Observations, Property and Adjoining Properties
		intersection of Sunset and Edgemont. Undeveloped portions of Barnsdall Park border the development. Increased commercial development is evident along Sunset Blvd.
1964	1" = 500'	The Property has been further developed as the Los Angeles Medical Center with additional buildings and a large parking lot to the east. Adjoining properties are now fully developed along the north side of Sunset Blvd.
1972	1" = 500'	The Property has undergone further development/redevelopment as the Los Angeles Medical Center with additional buildings and a nearby parking structure.
1985	1" = 500'	The Property and immediately surrounding land uses appear similar to the previous photograph.
1994	1" = 500'	The Property is fully developed with medical buildings and the nearby properties along Sunset and Edgemont are developed with large commercial buildings.
2005	1" = 500'	The layout of the buildings and improvements on the Property appears similar to the previous photograph.
2016	1" = 500'	The Property has been redeveloped since the 2005 photo and appears as it does currently with a landscaped driveway and parking area along Sunset Blvd. and large medical buildings on the remaining portions of the Property.

Aerial photograph source: The EDR Aerial Photo Decade Package

2.4.2 Historical City Address Directories

Stantec retained EDR to research available reverse city directories for the Property, in approximately five-year intervals, if available. EDR searched directories published by several sources between the years 1920 and 2014 for the subject Property addresses, and adjacent/adjoining addresses along Sunset Boulevard and the major cross streets. The following is a summary of Stantec's review of the address directory listings:

Street Address	Year	Property Listings
4867 Sunset (the Property)	1958 to 1986	The Property is variously listed as Kaiser Permanente Medical Center, Southern California Permanente Medical Group, and Kaiser Foundation Hospital during this period.
1505 Edgemont	1967 to 1990	Variously listed as Southern California Permanente Medical Group, Kaiser Permanente Medical Care, and individual doctor's names.
1517 Edgemont	1951	Kenneth Geis
1519 Edgemont	1951	W G Black
1525 Edgemont	1929-1958	Various residents

Street Address	Year	Property Listings
1526 Edgemont	1962- 2014	Southern California Permanente Medical Group Kaiser Permanente Medical Care Program Individual Doctor's names
1529 Edgemont	1951	Chas Hampton
1533 Edgemont	1951	Various residents
1539 Edgemont	1951	Norman Wright
1543 Edgemont	1951	Alva Leasure
4650 Sunset	1971 to 1986	Medical office building
4705 Sunset	1962 1976 1981	California Federal Savings and Loan
4725 Sunset	1981	Kaiser Permanente Medical Care Program
4733 Sunset	1981 1986	Kaiser Permanente Medical Care Program
4810 Sunset	1981 1986	Scientology Church of Dianetics Church of Scientology
4860 Sunset	1958 to 1990	Self Realization Church of All Religions Self Realization Fellowship Church
4900 Sunset	1962 to 1986	Kaiser Permanente Medical Care Program
4904 Sunset	1962 1981 1986	Kaiser Permanente Medical Care Program
4918 Sunset	1924 1929 1942 1962 1981 1986	Gustav Verrier Aldo Freppoli Ralph Koehler Ivy Motel Kaiser Permanente Medical Care Program Kaiser Permanente Medical Care Program
4950 Sunset	1986	Kaiser Permanente Medical Care Program

2.4.3 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Property uses. However, specific facility details on the maps can be difficult to interpret and labels and notes often contain abbreviations.

The following table summarizes Stantec's observations of the reviewed historical Sanborn maps. The historical maps are provided in **Attachment C.**

Year	Scale	Observations, Property and Adjoining Properties
1919	1" = 500'	The Property is shown to be undeveloped and a portion of the Prospect Park area. Nearby properties across Sunset Blvd. and Edgemont St. are mostly undeveloped or contain residences. An Auto Repairing shop is located at 4850 Sunset Blvd., directly across Sunset from the Property.
1950	1" = 500'	The Property remains undeveloped and is now a portion of Barnsdall Park. The Barnsdall residence and California Art Club are located north of the Property. The Auto Repairing shop located at 4850 Sunset Blvd. in 1919 is no longer shown. A gasoline and oil station is shown at the intersection of Sunset and Edgemont, directly south (across Sunset) from the Property. The property at 4901 Sunset, directly across Edgemont from the Property, is labeled as Auto Repairing and Gas & Oil.
1957	1" = 150'	The Property is developed with the Kaiser Foundation Hospital on the southwest portion of the parcel. The hospital consists of a single long rectangular building with a reception area on the west end. The property at 4901 Sunset, directly across Edgemont from the Property, is still labeled as Auto Repairing and Gas & Oil. The gasoline and oil station at the intersection of Sunset and Edgemont, directly south (across Sunset) from the Property is also still shown.
1966	1" = 150'	The Kaiser Foundation Hospital on the Property has expanded to include an additional medical office building, lab, and wards. A parking garage building has been constructed to the north of the Property boundary. The Blue Cross Office Building has been constructed to the east of the Property along Sunset Blvd.
1970	1" = 150'	The layout of the Kaiser Foundation Hospital on the Property appears similar to the 1966 map. Across Edgemont St. from the Property is a clinic and the Sunset Edgemont Medical Building is present diagonally across the intersection.

Map source: The EDR Certified Sanborn Map Report

2.4.4 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-Minute Topographic Maps (scale 1:24,000 and 1:62,500) of the Hollywood, Quadrangle to help identify past Property usage and areas of potential environmental concern. Copies of the historical maps are provided in **Attachment C**. The following table summarizes the maps reviewed and observations.

Year	Scale	Observations, Property and Adjoining Properties
1894 1896 1898 1900 1902	1:62,500 1:62,500 1:62,500 1:62,500 1:62,500	The Property is situated within the Prospect Park area and Sunset Boulevard does not extend to the Property location. The Hollywood and Cahuenga Valley Railroad is visible to the west of the Property. No individual structures are visible on the Property. No features of environmental concern are noted on or near the Property location.
1921	1:24,000	Near the Property, Sunset Boulevard and other major streets have been developed. The Property still appears to be undeveloped on the south flank of Olive Hill, with an access road passing through the Property. No features of environmental concern are noted on or near the Property location.
1928	1:24,000	The 1928 map shows increased development in the site area, including the historic Hollyhock House on Olive Hill to the north. However, the Property still appears to be undeveloped, with no structures shown. No features of environmental concern are noted on or near the Property location.
1953	1:24,000	The property is within the Los Angeles corporate boundaries and individual structures, other than landmark buildings, are not shown. A rectangular building noted as a Hospital is shown on the southwestern portion of the Property. The larger Lebanon Hospital is shown to the south of the Property.
1966	1:24,000	The hospital on the Property has expanded and consists of an L-shaped building or complex. The Barnsdall House is shown to the northeast of the Property.
1981	1:24,000	The outline of the hospital complex on the Property appears similar as shown in the 1966 map. No features of environmental concern are noted on or near the Property location.
2012	1:24,000	No details regarding specific structures are provided on this map version. The Property is marked with the symbol of a hospital. No features of environmental concern are noted on or near the Property location.

Name of maps and source: EDR Historical Topo Map Report

2.5 ELECTRONIC DATABASES

Publicly accessible electronic databases were searched by Stantec to better understand subsurface conditions in the vicinity of the Property and identify potential sources of impacts to soil and groundwater.

2.5.1 State Water Resources Control Board - GeoTracker Database

GeoTracker is a publicly accessible database operated by the California Environmental Protection Agency State Water Resources Control Board (SWRCB). The searchable database is utilized by State and local oversight agencies to track and archive data related to releases of hazardous substances. Using GeoTracker, Stantec identified sites within approximately 1,750-foot radius (1/3 mile) of the Property having at least one reported release of a hazardous material. A summary of results is presented below.

Subject Property Permitted UST and Closed LUST Site
A flag is shown on the Property for an active UST permitted by the City of Los Angeles Fire Department. A closed LUST site is shown on the southern portion of the Property near Sunset Blvd. This case was granted closure on April 7, 1997. The contaminants of concern were reported as diesel.

Open Leaking Underground Storage Tank (LUST) / Cleanup Program Sites
The following provides a summary of open LUST/Cleanup Program sites identified within a 1/3-mile radius of the Site. Only one open case was located within the search area:

- An open LUST Cleanup Site identified as Shell/Tesoro (former ARCO #5025) is located at 1630 N. Vermont Avenue, approximately 1,150 feet northeast of the Property. The RWQCB approved a revised Remedial Action Plan in October 2018 to address fuel hydrocarbons in soil and groundwater at the site. Groundwater flow direction at the site is towards the east/southeast, placing the site hydraulically cross-gradient from the Property. The dissolved hydrocarbon plumes, including benzene and MTBE, extend eastward from the site, beneath Hollywood Blvd.

Closed LUST/Cleanup Program Sites
The following provides a summary of closed LUST/Cleanup Program sites identified within a 1/3-mile radius of the Site:

- A closed LUST case identified as Thrifty #183 is located at 5025 Sunset Boulevard, approximately 875 feet west of the Property. This case was granted closure on January 7, 2013. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Presbyterian Medical Center at 1300 N. Vermont Avenue is located approximately 1,325 feet southeast of the Property. This case was granted closure on May 7, 2013. The contaminants of concern were listed as diesel.

- A closed LUST case identified as Pacific Bell (G1-125) at 1255 N. Vermont Avenue is located approximately 1,575 feet southeast of the Property. This case was granted closure on July 27, 1998. The contaminants of concern were listed as "other solvent or non-petroleum hydrocarbons".

- A closed LUST case identified as 76 Products Station #3647 at 1270 N. Vermont Avenue is located approximately 1,000 feet south/southeast of the Property. This case was granted closure on April 20, 1998. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Hollywood Car Wash at 4810 Hollywood Blvd. is located approximately 950 feet north of the Property. This case was granted closure on January 22, 1997. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Edgemont Hospital at 4841 Hollywood Blvd. is located approximately 975 feet north of the Property. This case was granted closure on July 7, 1996. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Unocal #3837 at 4900 Hollywood Blvd. is located approximately 975 feet north of the Property. This case was granted closure on September 8, 1997. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Hollywood Gas at 4977 Hollywood Blvd. is located approximately 975 feet north of the Property. This case was granted closure on January 9, 1997. The contaminants of concern were listed as gasoline.

Permitted Underground Storage Tank

The following provides a summary of USTs permitted through the Los Angeles County Fire Department that have been identified within a 1/3-mile radius of the Site:

- Including the listing for the Property, eleven active USTs are located within the search radius. The nearest offsite permitted UST is located 500 feet south of the Property at the Church of Scientology at 1404 N. Catalina Street. Active USTs at the Children's Hospital at 4661 Sunset Boulevard, and the Kaiser Permanente building at 4760 Sunset Boulevard are located between 600 to 900 feet from the Property.

2.5.2 EnviroStor

EnviroStor is a publicly accessible database operated by the State of California Department of Toxic Substances Control (DTSC). The searchable database contains information related to sites with contamination and/or sites where the DTSC's environmental oversight has been requested or required. Stantec utilized EnviroStor to obtain information relating to identified DTSC sites located within 1,750-foot radius of the Property.

- The only site listed in EnviroStor within the search radius distance was the Children's Hospital at 4650 Sunset Boulevard. The site was listed for a tiered permit not related to contamination or site cleanup.

3.0 SITE RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Laura Butler of Stantec on January 23, 2019. Stantec was accompanied by a Kaiser representative during the Property visit. Figure 2 provides information about the Property and adjoining properties and the location of potential areas of environmental concern.

3.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Property that may indicate the presence of environmental concerns. The reconnaissance of the Property was conducted by entering the building on the property, viewing representative interior areas, and by viewing exterior portions of the property including parking areas and storage/maintenance areas or structures. In general, Stantec utilized the following methodology to observe the Property:

- View the outer Property boundary as accessible by public thoroughfares.
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces, as applicable to the Property.
- View storage areas for bulk chemicals, hazardous materials, and compressed gases.

Weather conditions during the visit to the Property were clear and mostly sunny. There were no weather-related Property access restrictions encountered during the reconnaissance visit.

3.2 GENERAL DESCRIPTION AND OBSERVATIONS

Stantec primarily toured the ground floor level and the basement areas, as the upper floors are primarily used for offices and patient rooms. The ground floor houses the Clinical Laboratory, which contained two steel flammables cabinets for storage of hazardous waste. The Flow Cytometry Laboratory also contained steel flammables cabinets for storage of hazardous waste. The Interventional Radiology center is located on this level of the building. The ground floor also contains offices and patient examinations rooms.

The basement level houses more offices and patient examination rooms, the old (idle) kitchen facility, storage of hospital equipment, and electrical/utility rooms. The electrical rooms contain rows of steel electrical cabinets mounted on raised concrete pads with numerous overhead conduits. The basement level contains a tunnel that extends northwesterly from the hospital and connects to the 1550 N. Edgemont Building. The tunnel is reportedly used for patient transfer between the facilities in critical situations.

DESKTOP ENVIRONMENTAL RECORDS REVIEW

4867 Sunset Boulevard
Los Angeles, California
January 31, 2019

Adjoining and adjacent properties are characterized by the following uses:

North: Kaiser parking garage at 1550 Edgemont and Barnsdall Park.

South: Sunset Boulevard and the Church of Scientology and Kaiser medical office building at 4760 Sunset.

East: Kaiser medical center building at 4733 Sunset Boulevard.

West: N. Edgemont Street and Kaiser building at 1505 Edgemont.

4.0 INTERVIEWS

Stantec conducted interviews with the following individuals:

Name and Contact Information	**Relationship to Property**	**Key findings:**
Peter E. Zaragoza 323-783-7709	Kaiser Permanente General Superintendent - LAMC Capital Project Facilities Construction	During the site visit, Mr. Zaragoza stated that he was not aware of any past or current environmental conditions such as releases of hazardous materials or known contamination at the Property.
Daniel P. Weaver (323) 783-7734	Lead Engineer Kaiser Permanente LAMC	Mr. Weaver confirmed that there is no UST at the Property.

4.1 FINDINGS FROM INTERVIEW WITH PROPERTY REPRESENTATIVE

No indications of known environmental impairments or releases of hazardous materials or petroleum products at the Property were identified based on the information obtained.

5.0 SUMMARY, CONCLUSIONS, AND RECOMENDATIONS

On behalf of Kaiser Permanente (Kaiser), Stantec Consulting Services Inc. (Stantec) has completed a desktop environmental records review for the property located at 4867 Sunset Boulevard, Los Angeles, California (the "Property"). The environmental review was completed to evaluate the possible presence of environmental impacts that may have sourced from current and historical site activities, and/or operations associated with surrounding properties and facilities. Stantec understands that the intended use of the Property is continued medical facilities and infrastructure.

Stantec obtained historical sources of information to ascertain the past use of the Property and surrounding area and evaluate if past uses may have had the potential to impact environmental media beneath the Property. Governmental, regulatory, and other public records were evaluated to identify potential contributors to possible adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from first developed use of the Property and that of surrounding properties, to the present. The following are conclusions from the records review.

- Prior to the current development as a hospital/medical office buildings, the Property was a portion of the Barnsdall Park on Olive Hill and remained undeveloped until approximately 1954 when the Kaiser Foundation Hospital was developed on the southwest portion of the parcel. The original hospital consisted of a single long rectangular building. By 1966, the hospital had expanded to include an additional medical office building, lab, and wards. A parking garage building was also constructed to the north of the Property boundary. In subsequent years, the Property developed into the Los Angeles Medical Center, undergoing additional development in several phases. The most recent phase of redevelopment occurred in 2012-2103, resulting in the current configuration of improvements at the Property.

- Past land uses on nearby properties that could pose an environmental threat to the Property include gas stations and/or auto repair shops at 4850 Sunset Blvd., directly across Sunset from the Property and at 4901 Sunset (now 1505 Edgemont), directly across Edgemont from the Property. Additional nearby former gas stations and/or auto repair shops were located at 4700, 4720, and possibly onsite or adjoining the Property at 4747 Sunset Boulevard.

- The Property currently is on record as containing a 25,000-gallon diesel UST permitted by the Los Angeles City Fire Department (LAFD). However, the lead Kaiser engineer for the LAMC confirmed that there is no UST at the Property and that the referenced UST is located at the 1550 Edgemont facility.

- In July 1988, minor overfill contamination was found in soil and hydrocarbons were detected in groundwater during a Leak Detection Program for a 6,000-gallon UST. The

LAFD referred the LUST case to the RWQCB, who directed Kaiser to install additional groundwater monitoring wells to confirm/delineate impacts to groundwater. In April 1997, a letter from the RWQCB to Kaiser confirmed the completion of investigation and remedial action activities and granted UST Case Closure for the LUST case.

- LAFD files reviewed contained a report of removal of a diesel UST in September 1992 at the Property. Soil containing hydrocarbons was over-excavated from the UST pit. An estimated 595 cubic yards of soil were removed and disposed offsite. No further action was recommended in the report. LAFD files also described the discovery during grading and removal of two previously abandoned USTs on the Property in October 2011 and January 2012, respectively. No contamination was found upon removal of the USTs and a No Further Action (NFA) letter was issued by the LAFD.

- The Property is identified in environmental databases as a generator of hazardous waste. No records of environmental non-compliance or violations were found pertaining to the Property.

- The Property is located within the City of Los Angeles with multiple nearby listings of hazardous waste generators and sites with current or historic releases of hydrocarbons to soil and/or groundwater. Nearly all the nearby Leaking Underground Storage Tank sites have received regulatory case closure. Numerous active USTs are present at facilities in the vicinity of the Property. Properly maintained and permitted USTs are not considered an imminent environmental threat to the Property.

5.1 RECOMMENDATIONS

Historical maps and directory listings identified nearby gas stations and/or auto repair shops located at 4700, 4720, 4747, 4850, and 4901 Sunset Boulevard as early as 1919-1924. These historical operations likely included handling of hazardous materials and petroleum products and generation of hazardous wastes, as well as possible underground leaks from UST systems. Currently, the locations of these former gas stations and/or auto repair shops are fully developed commercial properties.

During redevelopment of the Property, soil and soil vapor containing petroleum hydrocarbons, solvents, and other organic and inorganic contaminants could be encountered during grading, excavation of footings, underground utility installation, and other ground disturbing activities. Accordingly, Stantec recommends that a Soil Management Plan approach be implemented to address these environmental contingencies during ground disturbance and construction activities. The Soil Management Plan (SMP) would specify the roles, responsibilities, protocols, and procedures to be employed in the event that subsurface chemical impacts are indicated or encountered during redevelopment of the Property. Key functions of the SMP in the event of a discovery of subsurface impacts are to specify procedures for immediate notification to local oversight agencies, provide health and safety protocols to protect workers, site occupants, and

the public, and to isolate and contain suspected impacted materials while chemical analysis of preliminary samples is conducted.

For new facilities that include occupied space, a vapor barrier is recommended if potential vapor encroachment conditions (VEC) are indicated or suspected during construction, for protection of future occupants. Such conditions could include soil impacted with volatile organic compounds (VOC) being left in place beneath the depth of ground disturbance for new construction, the presence of shallow groundwater containing VOC beneath the Property, or soil vapor migration from adjacent or nearby sites impacted with VOC.

6.0 LIMITATIONS & CERTIFICATION

This report was prepared in accordance with the scope of work outlined in Stantec's contract and with generally accepted professional environmental consulting practices existing at the time this report was prepared and applicable to the location of the Property. It was prepared for the exclusive use of Kaiser, for the express purpose stated above. Any re-use of this report for a different purpose or by others not identified above shall be at the user's sole risk without liability to Stantec. To the extent that this report is based on information provided to Stantec by third parties, Stantec may have made efforts to verify this third party information, but Stantec cannot guarantee the completeness or accuracy of this information. No other warranties, expressed or implied are made by Stantec.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information

that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/29/2018 has revealed that there are 15 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 17 CA LUST sites within approximately 0.5 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there is 1 CA CPS-SLIC site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 13 CA UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SCHMITT GUSTAV	4874 S SUNSET BLVD	SW 0 - 1/8 (0.038 mi.)	C18	32

ABRAMSON MORRIS	1528 N VERMONT AVE	E 0 - 1/8 (0.122 mi.)	E40	56

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Handler Activities Summary:
U.S. importer of hazardous waste: No

KAISER PERMANENTE LOS ANGELES (Continued) **1007199251**

Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011

FINDS:

Registry ID: 110002615714

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D008
. Waste name: LEAD

Violation Status: No violations found

Registry ID: 110002767097

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

PRESTIGE STATIONS INC NO 6261 (Continued) **1004677663**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002839590

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018
. Waste name: BENZENE

Violation Status: No violations found

FINDS:

Registry ID: 110002815017

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

FINDS:

Registry ID: 110002705957

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)

L A U S D LOS FELIZ EL (Continued) **1000427624**

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LA FIRE STATION 35 (Continued) **1000229428**

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

Historical Generators:
Date form received by agency: 02/16/2006
Site name: DELUXE LABORATORIES
Classification: Large Quantity Generator

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D011
. Waste name: SILVER

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

DELUXE LABORATORIES INC (Continued) **1000428979**

TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 11/14/2018

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 11/14/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/14/2018

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/12/2018

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

USGS TOPOGRAPHIC MAP

Target Property Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

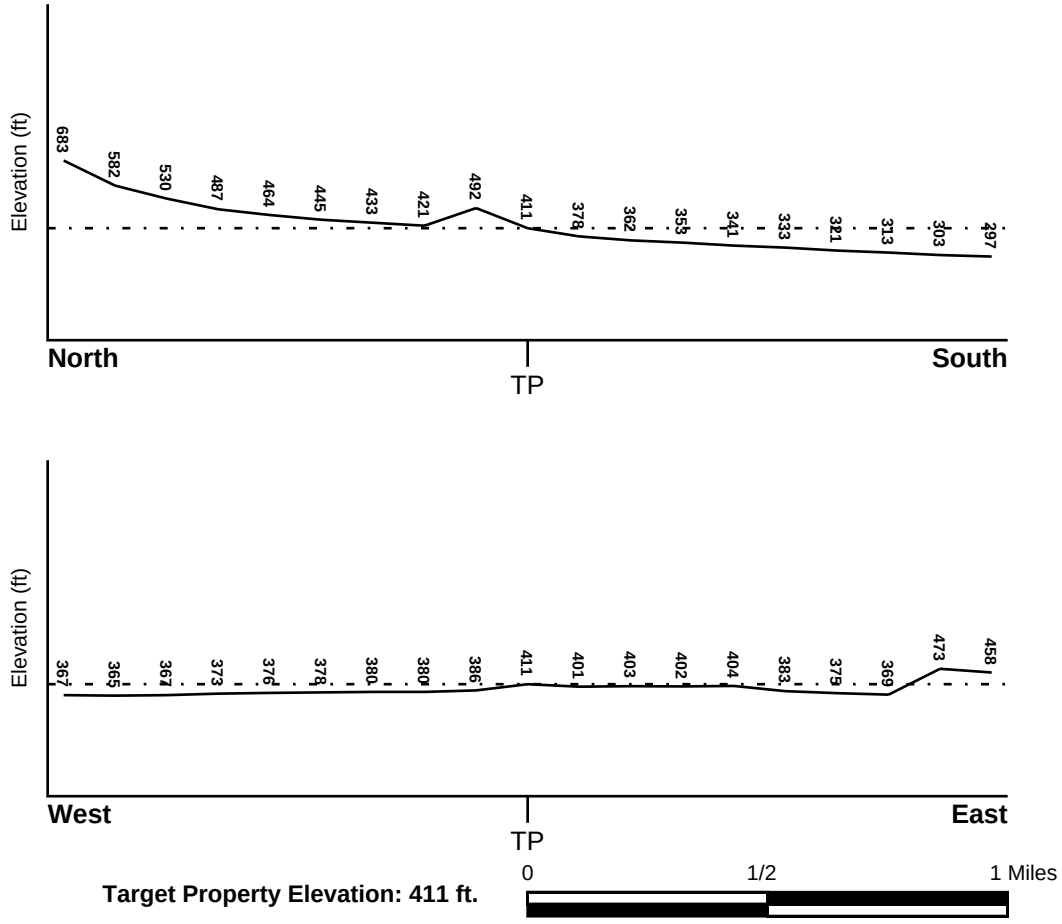
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1610F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
2	1/4 - 1/2 Mile West	S
1G	1/4 - 1/2 Mile West	S

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Miocene
Code:	Tm *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

DESKTOP ENVIRONMENTAL RECORDS REVIEW

1526 North Edgemont Street
Los Angeles, California
February 8, 2019

Executive Summary

On behalf of Kaiser Permanente (Kaiser), Stantec Consulting Services Inc. (Stantec) has completed a desktop environmental records review for the property located at 1526 N. Edgemont Street, Los Angeles, California (the "Property"). The environmental review was completed to evaluate the possible presence of environmental impacts that may have sourced from current and historical site activities, and/or operations associated with surrounding properties and facilities. Stantec understands that the intended use of the Property is continued medical facilities and infrastructure.

Stantec obtained historical sources of information to ascertain the past use of the Property and surrounding area and evaluate if past uses may have had the potential to impact environmental media beneath the Property. Governmental, regulatory, and other public records were evaluated to identify potential contributors to possible adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from first developed use of the Property and that of surrounding properties, to the present. The following are conclusions from the records review.

- Prior to the current development as a medical office building, the Property was a portion of the Barnsdall Park on Olive Hill and remained undeveloped until approximately 1954 when the Kaiser Foundation Hospital was developed on the southern portion of the parcel which includes the Property. The location of the current 1526 Edgemont building appeared to be a parking lot in 1954. By 1966, the Kaiser Foundation Hospital on the parcel has expanded to include an additional medical office building and lab in the location of the current 1526 Edgemont medical building on the Property. Building permits issued between 1962 and 2013 to Kaiser Foundations Hospitals were found for the Property.

- Past land uses on nearby properties that could pose an environmental threat to the Property include gas stations and/or auto repair shops at 4850 Sunset Blvd., across Sunset to the south the Property and at 4901 Sunset (now 1505 Edgemont), southwest across Edgemont from the Property. Additional nearby former gas stations and/or auto repair shops were located at 4720, 4747, and 4874 Sunset Boulevard.

- The Property is listed in database sources as containing a permitted UST. The LAFD issued a permit for UST abandonment in August 1989 and a site map showed a previously abandoned 4,000-gallon diesel UST located on the Property. The lead Kaiser engineer for the LAMC confirmed that there is no active UST at the Property. The Property was identified as a past generator of hazardous waste. No records of environmental non-compliance or violations were found pertaining to the Property.

- The Property is located within the City of Los Angeles with multiple nearby listings of hazardous waste generators and sites with current or historic releases of hydrocarbons to

soil and/or groundwater. Nearly all the nearby Leaking Underground Storage Tank sites have received regulatory case closure. Numerous active USTs are present at facilities in the vicinity of the Property. Properly maintained and permitted USTs are not considered an imminent environmental threat to the Property.

Conclusions and Recommendations

Historical maps and directory listings identified nearby gas stations and/or auto repair shops located at 4850, 4874, 4901, 5000, and 5001 Sunset Boulevard were depicted as early as 1919-1923. These historical operations likely included handling of hazardous materials and petroleum products and generation of hazardous wastes, as well as possible underground leaks from UST systems.

Based on the results of the environmental records review, the potential exists for soil containing petroleum hydrocarbons, solvents, and other organic contaminants to be encountered during grading and ground disturbing activities associated with redevelopment of the Property. Stantec recommends that a Soil Management Plan approach be implemented to address these environmental contingencies. The Soil Management Plan (SMP) would specify the roles, responsibilities, protocols, and procedures to be employed in the event that subsurface chemical impacts are encountered. Key functions of the SMP in the event of a discovery of subsurface impacts are to specify procedures for immediate notification to local oversight agencies, provide health and safety protocols to protect workers, site occupants, and the public, and to isolate and contain suspected impacted materials while chemical analysis of preliminary samples is conducted.

For new facilities that include occupied space for Kaiser personnel and patients, Stantec recommends that a vapor barrier be incorporated into the designs for new proposed buildings, for protection of future occupants. Given the results of the environmental records review and proposed construction of a new medical office building or hospital addition at the Property, incorporation of a vapor barrier into the new building design is considered to be appropriate.

1.0 Introduction

At the request of Kaiser Permanente (Kaiser), Stantec Consulting Services Inc. (Stantec) is pleased to submit this report documenting the results of a desktop environmental records review conducted for the property located at 1505 North Edgemont Street in Los Angeles, California (the "Property", Figure 1). This assessment was completed to evaluate the possible presence of environmental conditions or impacts that may have sourced from historical or current activities on the Property, as well as the potential for environmental conditions that may have impacted the Property from off-site third-party sources. Stantec understands that the intended use of the Property is continued medical facilities and infrastructure associated with the Kaiser Permanente Los Angeles Medical Center. All work was completed in accordance with the Work Authorization from Kaiser Permanente dated January 8, 2019.

1.1 PROPERTY LOCATION & FACILITY DESCRIPTION

The Property, identified by Los Angeles County Assessor Identification Number 5543-010-017, is situated on the north side of Sunset Boulevard and east side of North Edgemont Street in the City of Los Angeles. The Property encompasses approximately 2.86 acres and is developed with an approximately commercial medical building that comprises a portion of the Kaiser Permanente Los Angeles Medical Center. The medical building, reportedly constructed in 1962, is approximately eight stories high and is situated on the western portion of the parcel, fronting on North Edgemont Street. An enclosed overhead walkway connects the building to the parking structure located across North Edgemont Street.

The Property comprises a portion of the approximately 15.34-acre Kaiser Permanente Los Angeles Medical Center campus which is located along Sunset Boulevard between North Alexandria Avenue and North Vermont Avenue in the Hollywood Community Plan Area of the City of Los Angeles. The City of Los Angeles Planning Department considers the Unified Hospital Development Area to encompass the Kaiser Medical Center campus. The Property is part of the Kaiser Permanente Los Angeles Medical Center redevelopment project which proposes to expand the existing medical center campus by replacing facilities and adding new buildings. The current plan for the Property is to demolish the existing medical office building, to be replaced with a new medical office building or by an addition to the existing hospital at 4867 Sunset Boulevard, during the second phase of the redevelopment project.

Land uses generally surrounding the Medical Center campus include open space, specifically Barnsdall Art Park to the northeast; and commercial uses to the north along Edgemont Street and to the east and west along Sunset Boulevard; and residential farther to the north, south, and west. A Property location map is provided as **Figure 1** and a Property site map is provided as **Figure 2**.

2.0 DESKTOP RECORDS REVIEW

The objective of consulting historical sources of information was to develop the history of the Property and surrounding area, in order to evaluate if past uses could have impacted subsurface conditions at the Property. Physical setting records were evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the first developed use of the Property and surrounding properties. Stantec's research included the reasonably ascertainable and useful records described in this section.

2.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below with additional details in the following subsections

Topography:	The topographic gradient in the vicinity of the Property is to the general south, away from nearby Olive Hill, and the Property is located at approximately 395 feet above mean sea level (ft. amsl).
Soil/Bedrock Data:	The Property and surrounding area soils are classified as urban land. Unconsolidated alluvium consists of silt, clay, and silty sand. Bedrock consists of marine and non-marine sedimentary rocks of the Santa Monica Mountains.
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	The depth to groundwater may vary from approximately 30 to 70 feet below ground surface (bgs), with gradient direction to the south.
Note: Site-specific groundwater direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

2.1.1 Property Topography and Surface Water Flow

The Property is situated at an elevation approximately 395 ft. amsl. Olive Hill rises to 495 feet amsl to the north of Sunset Boulevard and the Medical Center campus. Based on the topography and existing surface conditions, general surface water flow direction is to the south.

2.1.2 Regional and Property Geology

The Property is situated near the southern edge of the Transverse Ranges Geomorphic Province of California, within the Los Angeles Basin. The Los Angeles Basin is a lowland coastal plain approximately 50 miles long by 20 miles wide that slopes gradually southward and westward toward the Pacific Ocean. The coastal plain overlies a structural trough filled with a thick

sequence of early Cenozoic through Holocene age marine and nonmarine sediments that were deposited as the basin subsided.

The Property is further located on the Hollywood Piedmont slope of the Coastal Plain of Los Angeles. The site area is underlain by Pleistocene alluvium of the Lakewood Formation which is underlain by the upper Miocene age Puente Formation. Alluvial deposits within this area are underlain by basement rocks of the nearby Santa Monica Mountains (DWR 1961). Based on a previous subsurface investigations at a nearby site, the shallow soils/alluvium beneath the site area is dominated by layers of silt, clay, and silty poorly-graded sand.

2.1.3 Regional and Property Hydrogeology

According the Department of Water Resources (DWR) Bulletin 118, the Property lies within the Hollywood Subbasin which occupies a 16 square mile area of the northeastern Coastal Plain. The Hollywood Subbasin is bounded on the north by Santa Monica Mountains and the Hollywood fault, on the east by the Elysian Hills, on the west by the Inglewood fault zone, and on the south by La Brea High, formed by an anticline that brings impermeable rocks close to the surface. Surface drainage from the site flows in a southerly direction towards Ballona Creek, where it then flows to the west and to the Pacific Ocean.

Groundwater in the Hollywood Subbasin is mainly produced from Pleistocene age alluvial sands and gravels. Unconfined groundwater conditions exist in the shallow aquifers in the northern and eastern portion of the subbasin. In the deeper aquifers and in the remainder of the subbasin, groundwater is confined, and clay members separate the aquifers over much of this subbasin. (DWR 1961).

Local depth to groundwater was evaluated through a review of the Regional Water Quality Control Board's (RWQCB's) Geotracker database. According to the most recent groundwater monitoring report for the site located at 1630 North Vermont Avenue (Shell/Tesoro Former Arco#5025), approximately 1,000 feet northeast of the Property, groundwater was gauged at depths ranging from 25 to 44 feet below ground surface (bgs) in May 2018 with a flow direction to the east/southeast. However, based on local topography, the average groundwater flow direction in the site area is inferred to be southerly.

2.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources Inc. (EDR), a third-party environmental database search firm. Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in **Attachment A**.

2.2.1 Listings for Property

The Property was identified in the following databases searched by EDR:

- CA UST, SWEEPS UST: The Property is listed as containing an active underground storage tank (UST) permitted by the City of Los Angeles Fire Department. No other pertinent information is included under this listing.

- CA HAZNET: The Property is listed as having generated and disposed of off-specification, aged, or surplus organic wastes and alkaline solutions in 2013-2017. The Property was also listed as generating asbestos-containing waste in 2002.

2.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions associated with neighboring properties to impact the Property. Based on this evaluation, the following individual facilities were identified as the most likely potential sources of releases that could possibly impact the Property.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property
COVEV J A 4901 Sunset Boulevard Los Angeles, CA	EDR Hist Auto	126 feet / 0.024 miles southeast
This site was listed as a gasoline and oil service station in 1937 but no pertinent information is included under this listing.		
Kaiser Foundation Hospital 4867 Sunset Boulevard Los Angeles, CA	CA HIST UST, CA LUST	93 feet / 0.018 miles east/southeast (cross-gradient to the Property)
The site was reportedly as having two diesel USTs installed in 1976 and 1983, respectively with a total combined capacity of 11,150 gallons. A leak was reported in February 1989 and the LUST case was closed in April 1997. No further information was provided within the EDR report or Geotracker database.		
Schmitt Gustav 4874 Sunset Boulevard Los Angeles, CA	EDR Hist Auto	160 feet / 0.030 miles south/southeast (cross-gradient to the Property)
The site was reportedly a gasoline service station and automotive repair facility between 1924 and 1942. No further information was provided.		
Advanced Auto Clinic Inc ARA Shell Service Ara Kessedjian Sunboa Inc. 5007 Sunset Boulevard	CA Hist UST UST EDR Hist Auto	800 feet / 0.15 miles west/southwest (cross-gradient to the Property)

Listed Facility Name/Address	Database Listing	Distance/Direction from Property
Los Angeles, CA		
Currently an active ARCO gas station with four permitted USTs. The site was also listed as having a historical 8,000-gallon UST storing unleaded gasoline. The site was reportedly a gasoline service station and automotive repair facility from 1971 to the Present.		

2.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of releases that might impact the Property:

2.3.1 Local Environmental Records

Agency Name Contact Information	Finding
Custodian of Records, Los Angeles County Public Health Investigation (PHI) Via Facsimile: (323) 728-0217 January 11, 2019	A written request subject to the FOIA was submitted to the Los Angeles County Public Health Investigation to review their files regarding the Property. The information requested included file information regarding any records that indicate environmental concern at the Property. No agency records had been received at the time of this report. Pertinent information, if received, will be summarized in an addendum to the report.
City of Los Angeles Fire Department 200 N. Mail St., 17th Fl. Los Angeles, CA 90012 January 9, 2019	A written request subject to the FOIA was submitted to the Los Angeles City Fire Department to review their files regarding the Property. The information requested included active and inactive hazardous materials file information, active/inactive UST files, and any records that indicate environmental concern at the Property. A response was received on January 11, 2019 which included the following documents: • A permit for UST abandonment dated August 1989. A site map showed a previously abandoned 4,000-gallon UST located on the southwestern portion of the Property, to be removed. No other specific information was provided.
City of Los Angeles Department of Building and Safety	Stantec conducted a database search for building permits issued for the Property address. The records

201 N Figueroa St, Los Angeles, CA 90012	reviewed included nearly 200 building department records and permits issued between 1962 and 2013 to Kaiser Foundations Hospitals for the Property. The project descriptions on the permit applications ranged from minor repairs, upgrades, plumbing, and modifications to major remodeling and renovations. No activities related to hazardous materials or potential environmental conditions were noted in the permit applications reviewed.

2.3.2 Regional Environmental Department Records

Agency Name, Contact Information	Findings
Custodian of Records, Department of Toxic Substances Control Chatsworth Regional Office Via Facsimile: (818) 717-6526 January 9, 2019	A written request subject to the FOIA was submitted to the Department of Toxic Substances Control, Chatsworth Regional Office to review their files regarding the Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property. A response was received on January 10, 2019 indicating that after a thorough search, no records pursuant to the requests were identified.
Custodian of Records, Department of Toxic Substances Control Cypress Regional Office Via Facsimile: (714) 484-5318 January 9, 2019	A written request subject to the FOIA was submitted to the Department of Toxic Substances Control, Cypress Regional Office to review their files regarding the Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property. A response was received on January 10, 2019 indicating that after a thorough search, no records pursuant to the requests were identified.
Custodian of Records, Los Angeles Regional Water Quality Control Board	A written request subject to the FOIA was submitted to the Los Angeles Regional Water Quality Control Board to review their files regarding the Property. The information requested included file

Agency Name, Contact Information	Findings
Via e-mail: rb4-publicrecords @waterboards.ca.gov January 9, 2019	information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property. A response was received on January 18, 2019 indicating that files were available for review. However, upon reviewing files at the Los Angeles RWQCB office on January 29, 2018, no records were found pertaining to the Property.

2.4 HISTORICAL RECORDS REVIEW

2.4.1 Aerial Photographs

Stantec reviewed historical aerial photographs of the Property. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs. The aerial photographs are provided in **Attachment A**.

Year	Scale	Observations, Property and Adjoining Properties
1923	1" = 500'	The Property appears to be a portion of Barnsdall Park with orchards visible. The historic Hollyhock House is situated northeast of the Property. Adjacent and nearby properties appear to be undeveloped or contain residences.
1928	1" = 500'	The Property appears to remain undeveloped and a portion of Barnsdall Park. Adjacent and nearby properties appear to be dominantly residential.
1938	1" = 500'	The Property appears to be undeveloped and primarily unchanged from the previous photograph.
1948	1" = 500'	The Property remains undeveloped and a portion of Barnsdall Park. Adjacent and nearby properties appear to be dominantly residential, with increasing commercial development along the major streets.
1954	1" = 500'	The Property has been developed with a commercial building, possibly a hospital or medical center, and parking areas near the intersection of Sunset and Edgemont. The location of the current 1526 Edgemont building appears to be a parking lot in 1954. Undeveloped portions of Barnsdall Park border the development.

Year	Scale	Observations, Property and Adjoining Properties
		Increased commercial development is evident along Sunset Blvd. to the south.
1964	1" = 500'	The Property has been further developed as the Los Angeles Medical Center with additional buildings and a large parking lot to the east. What appears to be the current 1526 Edgemont medical building has been constructed. Adjoining properties are now fully developed along the north side of Sunset Blvd.
1972	1" = 500'	The Property has undergone further development/redevelopment as the Los Angeles Medical Center with additional buildings and a parking structure. The current 1526 Edgemont medical building is visible.
1985	1" = 500'	The Property and immediately surrounding land uses appear similar to the previous photograph.
1994	1" = 500'	The Property is fully developed with medical buildings and the nearby properties along Sunset and Edgemont are developed with large commercial buildings.
2005	1" = 500'	The layout of the buildings and improvements on the Property appears similar to the previous photograph.
2016	1" = 500'	The hospital complex has been redeveloped since the 2005 photo and appears as it does currently with a landscaped driveway and parking area along Sunset Blvd. and large medical buildings on the remaining portions of the Property. The current 1526 Edgemont medical building and overhead walkway to the parking structure appear as they do currently.

Aerial photograph source: The EDR Aerial Photo Decade Package

2.4.2 Historical City Address Directories

Stantec retained EDR to research available reverse city directories for the Property, in approximately five-year intervals, if available. EDR searched directories published by several sources between the years 1920 and 2014 for the subject Property addresses, and adjacent/adjoining addresses along Sunset Boulevard and the major cross streets. The following is a summary of Stantec's review of the address directory listings:

Street Address	Year	Property Listings
1526 Edgemont (the Property)	1962-2014	Southern California Permanente Medical Group Kaiser Permanente Medical Care Program Individual Doctor's names
1505 Edgemont	1967 to 1990	Variously listed as Southern California Permanente Medical Group, Kaiser Permanente Medical Care, and individual doctor's names.
1517 Edgemont	1951	Kenneth Geis

Street Address	Year	Property Listings
1519 Edgemont	1951	W G Black
1525 Edgemont	1929-1958	Various residents
1529 Edgemont	1951	Chas Hampton
1533 Edgemont	1951	Various residents
1539 Edgemont	1951	Norman Wright
1543 Edgemont	1951	Alva Leasure
4650 Sunset	1971 to 1986	Medical office building
4705 Sunset	1962 to 1981	California Federal Savings and Loan
4725 Sunset	1981	Kaiser Permanente Medical Care Program
4733 Sunset	1981 to 1986	Kaiser Permanente Medical Care Program
4810 Sunset	1981 1986	Scientology Church of Dianetics Church of Scientology
4860 Sunset	1958 to 1990	Self Realization Church of All Religions Self Realization Fellowship Church
4867 Sunset	1958 to 1986	The Property is variously listed as Kaiser Permanente Medical Center, Southern California Permanente Medical Group, and Kaiser Foundation Hospital during this period.
4900 Sunset	1962 to 1986	Kaiser Permanente Medical Care Program
4904 Sunset	1962 1981 1986	Kaiser Permanente Medical Care Program
4918 Sunset	1924 1929 1942 1962 1981 1986	Gustav Verrier Aldo Freppoli Ralph Koehler Ivy Motel Kaiser Permanente Medical Care Program Kaiser Permanente Medical Care Program
4950 Sunset	1986	Kaiser Permanente Medical Care Program

2.4.3 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been

periodically updated since the late 19th century, often provide valuable insight into historical Property uses. However, specific facility details on the maps can be difficult to interpret and labels and notes often contain abbreviations.

The following table summarizes Stantec's observations of the reviewed historical Sanborn maps. The historical maps are provided in **Attachment C.**

Year	Scale	Observations, Property and Adjoining Properties
1919	1" = 500'	The Property is shown to be undeveloped and a portion of the Prospect Park area. Nearby properties across Sunset Blvd. and Edgemont St. are mostly undeveloped or contain residences. An Auto Repairing shop is located at 4850 Sunset Blvd., to the south across Sunset Blvd.
1950	1" = 500'	The Property remains undeveloped and is now a portion of Barnsdall Park. The Barnsdall residence and California Art Club are located north of the Property. The Auto Repairing shop located at 4850 Sunset Blvd. in 1919 is no longer shown. A gasoline and oil station is shown at the intersection of Sunset and Edgemont, south (across Sunset) from the Property. The property at 4901 Sunset, directly southwest across Edgemont from the Property, is labeled as Auto Repairing and Gas & Oil.
1957	1" = 150'	The Property is developed with the Kaiser Foundation Hospital on the southwest portion of the parcel. The hospital consists of a single long rectangular building with a reception area on the west end. The property at 4901 Sunset, directly across Edgemont from the hospital, is still labeled as Auto Repairing and Gas & Oil. The gasoline and oil station at the intersection of Sunset and Edgemont, south (across Sunset) from the Property is also still shown.
1966	1" = 150'	The Kaiser Foundation Hospital on the Property has expanded to include an additional medical office building and lab in the location of the current medical building on the Property. A parking garage building has been constructed to the north of the Property boundary. The Blue Cross Office Building has been constructed to the east of the Property along Sunset Blvd.
1970	1" = 150'	The layout of the Kaiser Foundation Hospital on the Property appears similar to the 1966 map. The medical office/lab building on the map looks similar in shape to the current 1526 Edgemont medical building.

Map source: The EDR Certified Sanborn Map Report

2.4.4 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-Minute Topographic Maps (scale 1:24,000 and 1:62,500) of the Hollywood, Quadrangle to help identify past Property usage and areas of potential environmental concern. Copies of the historical maps are provided in **Attachment C**. The following table summarizes the maps reviewed and observations.

Year	Scale	Observations, Property and Adjoining Properties
1894 1896 1898 1900 1902	1:62,500 1:62,500 1:62,500 1:62,500 1:62,500	The Property is situated within the Prospect Park area and Sunset Boulevard does not extend to the Property location. The Hollywood and Cahuenga Valley Railroad is visible to the west of the Property. No individual structures are visible on the Property. No features of environmental concern are noted on or near the Property location.
1921	1:24,000	Near the Property, Sunset Boulevard and other major streets have been developed. The Property still appears to be undeveloped on the south flank of Olive Hill, with an access road passing through the Property. No features of environmental concern are noted on or near the Property location.
1928	1:24,000	The 1928 map shows increased development in the site area, including the historic Hollyhock House on Olive Hill to the north. However, the Property still appears to be undeveloped, with no structures shown. No features of environmental concern are noted on or near the Property location.
1953	1:24,000	The property is within the Los Angeles corporate boundaries and individual structures, other than landmark buildings, are not shown. A rectangular building noted as a Hospital is shown on the southwestern portion of the Property. The larger Lebanon Hospital is shown to the south of the Property.
1966	1:24,000	The hospital on the Property has expanded and consist of an L-shaped building or complex. The Barnsdall House is shown to the northeast of the Property.
1981	1:24,000	The outline of the hospital complex on the Property appears similar as shown in the 1966 map. No features of environmental concern are noted on or near the Property location.
2012	1:24,000	No details regarding specific structures are provided on this map version. The Property is marked with the symbol of a hospital. No features of environmental concern are noted on or near the Property location.

Name of maps and source: EDR Historical Topo Map Report

2.5 ELECTRONIC DATABASES

Publicly accessible electronic databases were searched by Stantec to better understand subsurface conditions in the vicinity of the Property and identify potential sources of impacts to soil and groundwater.

2.5.1 State Water Resources Control Board - GeoTracker Database

GeoTracker is a publicly accessible database operated by the California Environmental Protection Agency State Water Resources Control Board (SWRCB). The searchable database is utilized by State and local oversight agencies to track and archive data related to releases of hazardous substances. Using GeoTracker, Stantec identified sites within approximately 1,750-foot radius (1/3 mile) of the Property having at least one reported release of a hazardous material. A summary of results is presented below.

Subject Property Permitted UST
A flag is shown on the parcel that encompasses the Property for a UST permitted by the City of Los Angeles Fire Department, with the address listed as 4867 W. Sunset Blvd.

Open Leaking Underground Storage Tank (LUST) / Cleanup Program Sites
The following provides a summary of open LUST/Cleanup Program sites identified within a 1/3-mile radius of the Site. Only one open case was located within the search area:

- An open LUST Cleanup Site identified as Shell/Tesoro (former ARCO #5025) is located at 1630 N. Vermont Avenue, approximately 1,400 feet northeast of the Property. The RWQCB approved a revised Remedial Action Plan in October 2018 to address fuel hydrocarbons in soil and groundwater at the site. Groundwater flow direction at the site is towards the east/southeast, placing the site hydraulically cross-gradient from the Property. The dissolved hydrocarbon plumes, including benzene and MTBE, extend eastward from the site, beneath Hollywood Blvd.

Closed LUST/Cleanup Program Sites
The following provides a summary of closed LUST/Cleanup Program sites identified within a 1/3-mile radius of the Site:

- A closed LUST site is shown at the adjacent 4867 W. Sunset Blvd. address. This case was granted closure on April 7, 1997. The contaminants of concern were reported as diesel.

- A closed LUST case identified as Thrifty #183 is located at 5025 Sunset Boulevard, approximately 975 feet west of the Property. This case was granted closure on January 7, 2013. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Presbyterian Medical Center at 1300 N. Vermont Avenue is located approximately 1,400 feet southeast of the Property. This case was granted closure on May 7, 2013. The contaminants of concern were listed as diesel.

- A closed LUST case identified as Pacific Bell (G1-125) at 1255 N. Vermont Avenue is located approximately 1,650 feet southeast of the Property. This case was granted closure on July 27, 1998. The contaminants of concern were listed as "other solvent or non-petroleum hydrocarbons".

- A closed LUST case identified as 76 Products Station #3647 at 1270 N. Vermont Avenue is located approximately 1,050 feet south/southeast of the Property. This case was granted closure on April 20, 1998. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Hollywood Car Wash at 4810 Hollywood Blvd. is located approximately 1,000 feet north of the Property. This case was granted closure on January 22, 1997. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Edgemont Hospital at 4841 Hollywood Blvd. is located approximately 1,025 feet north of the Property. This case was granted closure on July 7, 1996. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Unocal #3837 at 4900 Hollywood Blvd. is located approximately 1,025 feet north of the Property. This case was granted closure on September 8, 1997. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Hollywood Gas at 4977 Hollywood Blvd. is located approximately 1,150 feet north of the Property. This case was granted closure on January 9, 1997. The contaminants of concern were listed as gasoline.

Permitted Underground Storage Tank
The following provides a summary of USTs permitted through the Los Angeles County Fire Department that have been identified within a 1/3-mile radius of the Site:

- Including the listing for the Property parcel, nine active USTs are located within the search radius. The nearest offsite permitted UST is located 600 feet south of the Property at the Church of Scientology at 1404 N. Catalina Street. Active USTs at the Children's Hospital at 4661 Sunset Boulevard, and the Kaiser Permanente building at 4760 Sunset Boulevard are located between 700 to 900 feet from the Property.

2.5.2 EnviroStor

EnviroStor is a publicly accessible database operated by the State of California Department of Toxic Substances Control (DTSC). The searchable database contains information related to sites with contamination and/or sites where the DTSC's environmental oversight has been requested or required. Stantec utilized EnviroStor to obtain information relating to identified DTSC sites located within 1,750-foot radius of the Property.

- The only site listed in EnviroStor within the search radius distance was the Children's Hospital at 4650 Sunset Boulevard. The site was listed for a tiered permit not related to contamination or site cleanup.

3.0 SITE RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Laura Butler of Stantec on January 23, 2019. Stantec was accompanied by a Kaiser representative during the Property visit. Figure 2 provides information about the Property and adjoining properties and the location of potential areas of environmental concern.

3.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Property that may indicate the presence of environmental concerns. The reconnaissance of the Property was conducted by entering the building on the property, viewing representative interior areas, and by viewing exterior portions of the property including parking areas and storage/maintenance areas or structures. In general, Stantec utilized the following methodology to observe the Property:

- View the outer Property boundary as accessible by public thoroughfares.
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces, as applicable to the Property.
- View storage areas for bulk chemicals, hazardous materials, and compressed gases.

Weather conditions during the visit to the Property were clear and mostly sunny. There were no weather-related Property access restrictions encountered during the reconnaissance visit.

3.2 GENERAL DESCRIPTION AND OBSERVATIONS

The 1526 N. Edgemont medical office building has a total of eight levels with various medical departments/functions on each level. The ground floor of the building was formerly used as the Urgent Care facility, which has since moved to 4700 Sunset Boulevard. Departments for Radiology, Ultrasound, MRI, and CAT scanning are located on the Basement level. Among the numerous services provided, the Cardiology Department and Physical Medicine are on Level 2 and Cardiovascular Surgery is located on Level 3. Physical & Occupational Therapy/Speech is located on Level 4. The Gastroenterology Department is located on Levels 6 and 7. Solid Organ Transplant is located on Level 7.

Street level access to the building is from Edgemont Street and an overhead enclosed walkway spanning Edgemont Street connect the building to the parking structure at 1549 Edgemont Street.

Adjoining and adjacent properties are characterized by the following uses:

DESKTOP ENVIRONMENTAL RECORDS REVIEW

1526 North Edgemont Street
Los Angeles, California
February 8, 2019

North: Kaiser Permanente facilities and Central Plant.

South: Kaiser Permanente hospital facilities at 4867 Sunset Blvd.

East: Kaiser Permanente hospital facilities at 4867 Sunset Blvd.

West: Edgemont Street and Kaiser Permanente parking structure.

4.0 INTERVIEWS

Stantec conducted interviews with the following individuals.

Name and Contact Information	**Relationship to Property**	**Key findings:**
Peter E. Zaragoza 323-783-7709	Kaiser Permanente General Superintendent - LAMC Capital Project Facilities Construction	During the site visit, Mr. Zaragoza stated that he was not aware of any past or current environmental conditions such as releases of hazardous materials or known contamination at the Property.
Daniel P. Weaver (323) 783-7734	Lead Engineer Kaiser Permanente LAMC	Mr. Weaver confirmed that there is no active UST at the Property.

4.1 FINDINGS FROM INTERVIEW WITH PROPERTY REPRESENTATIVE

No indications of known environmental impairments or releases of hazardous materials or petroleum products at the Property were identified based on the information obtained.

5.0 SUMMARY, CONCLUSIONS, AND RECOMENDATIONS

On behalf of Kaiser Permanente (Kaiser), Stantec Consulting Services Inc. (Stantec) has completed a desktop environmental records review for the property located at 1526 N. Edgemont Street, Los Angeles, California (the "Property"). The environmental review was completed to evaluate the possible presence of environmental impacts that may have sourced from current and historical site activities, and/or operations associated with surrounding properties and facilities. Stantec understands that the intended use of the Property is continued medical facilities and infrastructure.

Stantec obtained historical sources of information to ascertain the past use of the Property and surrounding area and evaluate if past uses may have had the potential to impact environmental media beneath the Property. Governmental, regulatory, and other public records were evaluated to identify potential contributors to possible adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from first developed use of the Property and that of surrounding properties, to the present. The following are conclusions from the records review.

- Prior to the current development as a medical office building, the Property was a portion of the Barnsdall Park on Olive Hill and remained undeveloped until approximately 1954 when the Kaiser Foundation Hospital was developed on the southern portion of the parcel which includes the Property. The location of the current 1526 Edgemont building appeared to be a parking lot in 1954. By 1966, the Kaiser Foundation Hospital on the parcel has expanded to include an additional medical office building and lab in the location of the current 1526 Edgemont medical building on the Property. Building permits issued between 1962 and 2013 to Kaiser Foundations Hospitals were found for the Property.

- Past land uses on nearby properties that could pose an environmental threat to the Property include gas stations and/or auto repair shops at 4850 Sunset Blvd., across Sunset to the south the Property and at 4901 Sunset (now 1505 Edgemont), southwest across Edgemont from the Property. Additional nearby former gas stations and/or auto repair shops were located at 4720, 4747, and 4874 Sunset Boulevard.

- The Property is listed in database sources as containing a permitted UST. The LAFD issued a permit for UST abandonment in August 1989 and a site map showed a previously abandoned 4,000-gallon diesel UST located on the Property. The lead Kaiser engineer for the LAMC confirmed that there is no active UST at the Property. The Property was identified as a past generator of hazardous waste. No records of environmental non-compliance or violations were found pertaining to the Property.

- The Property is located within the City of Los Angeles with multiple nearby listings of hazardous waste generators and sites with current or historic releases of hydrocarbons to

soil and/or groundwater. Nearly all the nearby Leaking Underground Storage Tank sites have received regulatory case closure. Numerous active USTs are present at facilities in the vicinity of the Property. Properly maintained and permitted USTs are not considered an imminent environmental threat to the Property.

5.1 RECOMMENDATIONS

Historical maps and directory listings identified nearby gas stations and/or auto repair shops located at 4850, 4874, 4901, 5000, and 5001 Sunset Boulevard were depicted as early as 1919-1923. These historical operations likely included handling of hazardous materials and petroleum products and generation of hazardous wastes, as well as possible underground leaks from UST systems.

Based on the results of the environmental records review, the potential exists for soil containing petroleum hydrocarbons, solvents, and other organic contaminants to be encountered during grading and ground disturbing activities associated with redevelopment of the Property. Stantec recommends that a Soil Management Plan approach be implemented to address these environmental contingencies. The Soil Management Plan (SMP) would specify the roles, responsibilities, protocols, and procedures to be employed in the event that subsurface chemical impacts are encountered. Key functions of the SMP in the event of a discovery of subsurface impacts are to specify procedures for immediate notification to local oversight agencies, provide health and safety protocols to protect workers, site occupants, and the public, and to isolate and contain suspected impacted materials while chemical analysis of preliminary samples is conducted.

For new facilities that include occupied space for Kaiser personnel and patients, Stantec recommends that a vapor barrier be incorporated into the designs for new proposed buildings, for protection of future occupants. Given the results of the environmental records review and proposed construction of a new medical office building or hospital addition at the Property, incorporation of a vapor barrier into the new building design is considered to be appropriate.

6.0 LIMITATIONS & CERTIFICATION

This report was prepared in accordance with the scope of work outlined in Stantec's contract and with generally accepted professional environmental consulting practices existing at the time this report was prepared and applicable to the location of the Property. It was prepared for the exclusive use of Kaiser, for the express purpose stated above. Any re-use of this report for a different purpose or by others not identified above shall be at the user's sole risk without liability to Stantec. To the extent that this report is based on information provided to Stantec by third parties, Stantec may have made efforts to verify this third party information, but Stantec cannot guarantee the completeness or accuracy of this information. No other warranties, expressed or implied are made by Stantec.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/29/2018 has revealed that there

are 15 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that

there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

CA DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the CA DRYCLEANERS list, as provided by EDR, has revealed that there are 5 CA DRYCLEANERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D007
. Waste name: CHROMIUM

ARA SHEL SERVICE (Continued) **1000131773**

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,

BARNSDALL PARK (Continued) **1000243399**

WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D008
. Waste name: LEAD

Violation Status: No violations found

FINDS:

Registry ID: 110002781008

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D024
. Waste name: M-CRESOL

. Waste code: D026
. Waste name: CRESOL

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P075
. Waste name: NICOTINE, & SALTS

Violation Status: No violations found

FINDS:

Registry ID: 110002884022

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): Yes
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: 725
. Waste name: Liquids with mercury > 20 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

QUEEN OF ANGELS HOLLYWOOD PRES (Continued) **1000597740**

Registry ID: 110002867979

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002950842

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

FINDS:

Registry ID: 110002756385

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

Historical Generators:
Date form received by agency: 02/16/2006
Site name: DELUXE LABORATORIES
Classification: Large Quantity Generator

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D011
. Waste name: SILVER

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

DELUXE LABORATORIES INC (Continued) **1000428979**

TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 11/14/2018

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 11/14/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 11/14/2018

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/12/2018
Date Data Arrived at EDR: 11/14/2018
Date Made Active in Reports: 12/04/2018

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services

Longitude (West):	118.295736 - 118° 17' 44.65''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	380473.9
UTM Y (Meters):	3773685.5
Elevation:	394 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

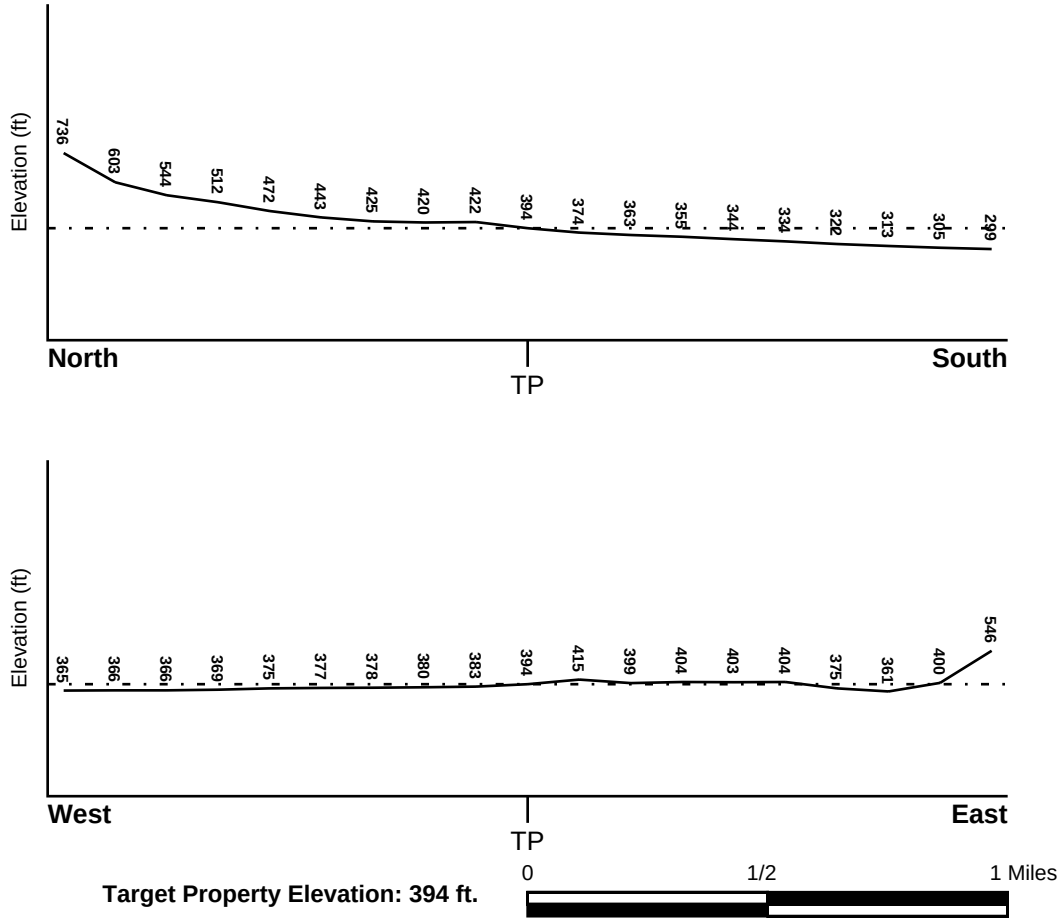
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1610F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1605F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/8 - 1/4 Mile WSW	S
1G	1/8 - 1/4 Mile WSW	S

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Miocene
Code:	Tm *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

DESKTOP ENVIRONMENTAL RECORDS REVIEW

1517 Vermont Avenue
Los Angeles, California
February 8, 2019

Executive Summary

On behalf of Kaiser Permanente (Kaiser), Stantec Consulting Services Inc. (Stantec) has completed a desktop environmental records review for the property located at 1517 N. Vermont Avenue, Los Angeles, California (the "Property"). The environmental review was completed to evaluate the possible presence of environmental impacts that may have sourced from current and historical site activities, and/or operations associated with surrounding properties and facilities. Stantec understands that the intended use of the Property is continued medical facilities and infrastructure.

Stantec obtained historical sources of information to ascertain the past use of the Property and surrounding area and evaluate if past uses may have had the potential to impact environmental media beneath the Property. Governmental, regulatory, and other public records were evaluated to identify potential contributors to possible adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from first developed use of the Property and that of surrounding properties, to the present. The following are conclusions from the records review.

- It should be noted that before the Request for Change of Address in August 1996, there was no 1517 N. Vermont address and records pertaining to the Property were listed under the 1515 N. Vermont address. Prior to the current development as a medical office building, the Property was undeveloped and a portion of the Barnsdall Park on Olive Hill. The Property remained undeveloped until approximately 1957 when a gas station and auto repair shop were present and listed as Pedro Petroleum Corporation in 1962. By 1964, the California Federal Savings Association Office Building had been constructed at 1515 N. Vermont with a parking lot (now 1517 Vermont) situated immediately north of the office building. By 1970, business occupants at the Property were listed as Kaiser Foundation and later Kaiser Permanente. A parking structure was constructed on the Property by 1972.

- Past land uses on nearby properties that could pose an environmental threat to the Property include gas stations and/or auto repair shops at 1515 Vermont (the Property), 1528 Vermont, 1630 Vermont, 4720 Sunset Blvd., and 4700 Sunset Blvd. Sparkling Cleaners was listed at 1553 Vermont in 1980 and the active Hollywood Cleaners operates at 4730 Hollywood Blvd.

- The Property (1515 Vermont) was listed in a database source as having contained a permitted UST, with the status listed as "inactive". The lead engineer for the Kaiser LAMC confirmed that there are no USTs at the Property currently, as reflected by the Geotracker database. The Property was identified as a past generator of hazardous waste. No records of environmental non-compliance or violations were found pertaining to the Property.

- The Property is located within the City of Los Angeles with multiple nearby listings of hazardous waste generators and sites with current or historic releases of hydrocarbons to soil and/or groundwater. Nearly all the nearby Leaking Underground Storage Tank sites have received regulatory case closure. Numerous active USTs are present at facilities in the vicinity of the Property. Properly maintained and permitted USTs are not considered an imminent environmental threat to the Property.

Conclusions and Recommendations

Historical maps and directory listings identified nearby gas stations and/or auto repair shops located at 1515 Vermont (the Property), 1528 Vermont, 1630 Vermont, 4720 Sunset Blvd., and 4700 Sunset Blvd. Sparkling Cleaners was listed at 1553 Vermont in 1980 and the active Hollywood Cleaners operates at 4730 Hollywood Blvd.4850, 4874, 4901, 5000, and 5001 Sunset Boulevard were depicted as early as 1919-1923. These historical operations likely included handling of hazardous materials and petroleum products and generation of hazardous wastes, as well as possible underground leaks from UST systems.

Based on the results of the environmental records review and a former gas station located onsite, the potential exists for soil containing petroleum hydrocarbons, solvents, and other organic contaminants to be encountered during grading and ground disturbing activities associated with redevelopment of the Property. Stantec recommends that a Soil Management Plan approach be implemented to address these environmental contingencies. The Soil Management Plan (SMP) would specify the roles, responsibilities, protocols, and procedures to be employed in the event that subsurface chemical impacts are encountered. Key functions of the SMP in the event of a discovery of subsurface impacts are to specify procedures for immediate notification to local oversight agencies, provide health and safety protocols to protect workers, site occupants, and the public, and to isolate and contain suspected impacted materials while chemical analysis of preliminary samples is conducted.

For new facilities that include occupied space for Kaiser personnel and patients, Stantec recommends that a vapor barrier be incorporated into the designs for new proposed buildings, for protection of future occupants. Given the results of the environmental records review and proposed current plan for reconstruction of the 1517 North Vermont Avenue parking structure, including 2,300 square feet of retail/commercial space on the ground floor, incorporation of a vapor barrier into the new building design is considered to be appropriate.

1.0 Introduction

At the request of Kaiser Permanente (Kaiser), Stantec Consulting Services Inc. (Stantec) is pleased to submit this report documenting the results of a desktop environmental records review conducted for the property located at 1517 N. Vermont Avenue in Los Angeles, California (the "Property", **Figure 1**). This assessment was completed to evaluate the possible presence of environmental conditions or impacts that may have sourced from historical or current activities on the Property, as well as the potential for environmental conditions that may have impacted the Property from off-site third-party sources. Stantec understands that the intended use of the Property is continued medical facilities and infrastructure associated with the Kaiser Permanente Los Angeles Medical Center. All work was completed in accordance with the Work Authorization from Kaiser Permanente dated January 8, 2019.

1.1 PROPERTY LOCATION & FACILITY DESCRIPTION

The Property, identified by Los Angeles County Assessor Identification Number 5543-012-022, is situated on the west side of North Vermont Avenue, just north of Sunset Boulevard in the City of Los Angeles. The Property encompasses approximately 1.17 acres and is developed with a parking garage structure with rooftop parking associated with the adjoining Kaiser Permanente medical office building at 1515 N. Vermont. Entrance to the parking structure is from Sunset Boulevard.

The Property comprises a portion of the approximately 15.34-acre Kaiser Permanente Los Angeles Medical Center campus which is located along Sunset Boulevard between North Alexandria Avenue and North Vermont Avenue in the Hollywood Community Plan Area of the City of Los Angeles. The City of Los Angeles Planning Department considers the Unified Hospital Development Area to encompass the Kaiser Medical Center campus. The Property is part of the Kaiser Permanente Los Angeles Medical Center redevelopment project which proposes to expand the existing medical center campus by replacing facilities and adding new buildings. The current plan for the Property includes demolition and reconstruction of the 1517 North Vermont Avenue parking structure, including 2,300 square feet of retail/commercial space on the ground floor, during the second phase of the redevelopment project.

Land uses generally surrounding the Medical Center campus include open space, specifically Barnsdall Art Park to the northwest; and commercial uses to the north along Vermont Avenue and to the east and west along Sunset Boulevard; and residential farther to the south. A Property location map is provided as **Figure 1** and a Property site map is provided as **Figure 2**.

2.0 DESKTOP RECORDS REVIEW

The objective of consulting historical sources of information was to develop the history of the Property and surrounding area, in order to evaluate if past uses could have impacted subsurface conditions at the Property. Physical setting records were evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the first developed use of the Property and surrounding properties. Stantec's research included the reasonably ascertainable and useful records described in this section.

2.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below with additional details in the following subsections

Topography:	The topographic gradient in the vicinity of the Property is to the general south, away from Olive Hill, and the Property is located at approximately 400 feet above mean sea level (ft. amsl).
Soil/Bedrock Data:	The Property and surrounding area soils are classified as urban land. Unconsolidated alluvium consists of silt, clay, and silty sand. Bedrock consists of marine and non-marine sedimentary rocks of the Santa Monica Mountains.
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	The depth to groundwater may vary from approximately 30 to 70 feet below ground surface (bgs), with gradient direction to the south.
Note: Site-specific groundwater direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.	

2.1.1 Property Topography and Surface Water Flow

The Property is situated at an elevation approximately 400 ft. amsl. Olive Hill rises to 495 feet amsl to the north of Sunset Boulevard and the Medical Center campus. Based on the topography and existing surface conditions, general surface water flow direction is to the south.

2.1.2 Regional and Property Geology

The Property is situated near the southern edge of the Transverse Ranges Geomorphic Province of California, within the Los Angeles Basin. The Los Angeles Basin is a lowland coastal plain approximately 50 miles long by 20 miles wide that slopes gradually southward and westward toward the Pacific Ocean. The coastal plain overlies a structural trough filled with a thick

sequence of early Cenozoic through Holocene age marine and nonmarine sediments that were deposited as the basin subsided.

The Property is further located on the Hollywood Piedmont slope of the Coastal Plain of Los Angeles. The site area is underlain by Pleistocene alluvium of the Lakewood Formation which is underlain by the upper Miocene age Puente Formation. Alluvial deposits within this area are underlain by basement rocks of the nearby Santa Monica Mountains (DWR 1961). Based on a previous subsurface investigations at a nearby site, the shallow soils/alluvium beneath the site area is dominated by layers of silt, clay, and silty poorly-graded sand.

2.1.3 Regional and Property Hydrogeology

According the Department of Water Resources (DWR) Bulletin 118, the Property lies within the Hollywood Subbasin which occupies a 16 square mile area of the northeastern Coastal Plain. The Hollywood Subbasin is bounded on the north by Santa Monica Mountains and the Hollywood fault, on the east by the Elysian Hills, on the west by the Inglewood fault zone, and on the south by La Brea High, formed by an anticline that brings impermeable rocks close to the surface. Surface drainage from the site flows in a southerly direction towards Ballona Creek, where it then flows to the west and to the Pacific Ocean.

Groundwater in the Hollywood Subbasin is mainly produced from Pleistocene age alluvial sands and gravels. Unconfined groundwater conditions exist in the shallow aquifers in the northern and eastern portion of the subbasin. In the deeper aquifers and in the remainder of the subbasin, groundwater is confined, and clay members separate the aquifers over much of this subbasin. (DWR 1961).

Local depth to groundwater was evaluated through a review of the Regional Water Quality Control Board's (RWQCB's) Geotracker database. According to the most recent groundwater monitoring report for the site located at 1630 North Vermont Avenue (Shell/Tesoro Former Arco#5025), approximately 500 feet north of the Property, groundwater was gauged at depths ranging from 25 to 44 feet below ground surface (bgs) in May 2018 with a flow direction to the east/southeast. However, based on local topography, the average groundwater flow direction in the site area is inferred to be southerly.

2.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources Inc. (EDR), a third-party environmental database search firm. Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in **Attachment A**.

2.2.1 Listings for Property

The Property address (1517 N. Vermont) was not found, however, listings for the adjoining medical building on the Property (1515 N. Vermont) were identified in the following databases searched by EDR:

- RCRA NonGen, FINDS: The adjoining medical building on the Property (1515 N. Vermont) is identified as the Kaiser Permanente Research Lab which is a non-generator of hazardous waste based on information provided in 1988. No violations were identified under this listing.

- RCRA-LQG: The adjoining 1515 N. Vermont Kaiser Permanente facility was listed as a Large Quantity Generator of various categories of hazardous waste with an active EPA ID number. The listing also identified the site as the Kaiser Foundation Hospital with an operations start date of 1961

- CA SWEEPS UST, CA FID UST: The Kaiser facility at 1515 N. Vermont was listed in two UST databases, but was marked as inactive with the number of tanks listed as "0".

2.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions associated with neighboring properties to impact the Property. Based on this evaluation, the following individual facilities were identified as the most likely potential sources of releases that could possibly impact the Property.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property
Abramson Morris 1528 N. Vermont Ave. Los Angeles, CA	EDR Hist Auto	166 feet / 0.031 miles east (cross-gradient to the Property)
The site was reportedly a gasoline service station and automotive repair facility between 1924 and 1942. No further information was provided.		
Kovall CC 4720 Sunset Boulevard Los Angeles, CA	EDR Hist Auto	167 feet / 0.032 miles south/southwest (down-gradient to the Property)
The site was reportedly a gasoline service station and automotive repair facility between 1929 and 1942. No further information was provided.		
McCall Payne Inc 4700 Sunset Boulevard Los Angeles, CA	EDR Hist Auto	205 feet / 0.039 miles south (down-gradient to the Property)
The site was reportedly an automotive repair facility in 1924. No further information was provided.		

Listed Facility Name/Address	Database Listing	Distance/Direction from Property
Pratt Garland 4661 Sunset Boulevard Los Angeles, CA	EDR Hist Auto	290 feet / 0.055 miles east/southeast (cross-gradient to the Property)
The site was reportedly a gasoline service station in 1942. No further information was provided.		
Sparkling Cleaners 1553 N. Vermont Ave. Los Angeles, CA	EDR Hist Cleaners	292 feet / 0.055 miles north/northeast (up-gradient to the Property)
This site was listed as Garment Pressing and Cleaners' Agent in 1980 and 1982. No other pertinent information is included under this listing.		
Petrol Six LLC 1630 N. Vermont Ave. Los Angeles, CA	EDR Hist Auto	567 feet / 0.107 miles north/northeast (up-gradient to the Property)
The site was listed as a gasoline service station in 2003 through 2014. No further information was provided.		
Hollywood Cleaners 4730 Hollywood Boulevard Los Angeles, CA	RCRA-SQG	620 feet / 0.117 miles north/northeast (up-gradient to the Property)
The site was listed as a generator of halogenated solvents, including PCE. No violations were noted.		

2.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of releases that might impact the Property:

2.3.1 Local Environmental Agency Records

Agency Name Contact Information	Finding
Custodian of Records, Los Angeles County Public Health Investigation (PHI) Via Facsimile: (323) 728-0217 January 11, 2019	A written request subject to the FOIA was submitted to the Los Angeles County Public Health Investigation to review their files regarding the Property. The information requested included file information regarding any records that indicate environmental concern at the Property. No agency records had been received at the time of this report. Pertinent information, if received, will be summarized in an addendum to the report.
City of Los Angeles Fire Department 200 N. Mail St., 17th Fl. Los Angeles, CA 90012 January 9, 2019	A written request subject to the FOIA was submitted to the Los Angeles City Fire Department to review their files regarding the Property. The information requested included active and inactive hazardous materials file information, active/inactive UST files, and any records that indicate environmental concern at the Property. A response was received on January 14, 2019 indicating that after a thorough search, no records pursuant to the requests were identified.
City of Los Angeles Department of Building and Safety 201 N Figueroa St, Los Angeles, CA 90012	Stantec conducted a database search for building permits issued for the Property address. The records reviewed included 14 building department records and permits issued between 1965 and 1996 for the Property. In August 1996, a Request for Change of Address from 1515 N. Vermont to 1517 N. Vermont was approved for the Property. The project descriptions on the permit applications appeared to apply to the office building (1515 N. Vermont) rather than the parking garage (1517 N. Vermont) and included minor modifications, upgrades, partitioning, and remodeling. The most recent permits were issued to Kaiser Foundation Hospitals. No activities related to hazardous materials or potential environmental conditions were noted in the permit applications reviewed.

2.3.2 Regional Environmental Agency Records

Agency Name, Contact Information	Findings
Custodian of Records, Department of Toxic Substances Control Chatsworth Regional Office Via Facsimile: (818) 717-6526 January 9, 2019	A written request subject to the FOIA was submitted to the Department of Toxic Substances Control, Chatsworth Regional Office to review their files regarding the Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property. A response was received on January 10, 2019 indicating that after a thorough search, no records pursuant to the requests were identified.
Custodian of Records, Department of Toxic Substances Control Cypress Regional Office Via Facsimile: (714) 484-5318 January 9, 2019	A written request subject to the FOIA was submitted to the Department of Toxic Substances Control, Cypress Regional Office to review their files regarding the Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property. A response was received on January 10, 2019 indicating that after a thorough search, no records pursuant to the requests were identified.
Custodian of Records, Los Angeles Regional Water Quality Control Board Via e-mail: rb4-publicrecords @waterboards.ca.gov January 9, 2019	A written request subject to the FOIA was submitted to the Los Angeles Regional Water Quality Control Board to review their files regarding the Property. The information requested included file information regarding permits, hazardous materials, waste, complaints, violations, underground or aboveground storage tanks, remedial action, and case closure documentation, or any records that indicate environmental concern at the Property. A response was received on January 14, 2019 indicating that after a thorough search, no records pursuant to the request were identified.

2.4 HISTORICAL RECORDS REVIEW

2.4.1 Aerial Photographs

Stantec reviewed historical aerial photographs of the Property. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs. The aerial photographs are provided in **Attachment B**.

Year	Scale	Observations, Property and Adjoining Properties
1923	1" = 500'	The Property appears to be a portion of Barnsdall Park with orchards visible. The historic Hollyhock House is situated northeast of the Property. Adjacent and nearby properties appear to be undeveloped or contain residences.
1928	1" = 500'	The Property appears to remain undeveloped and a portion of Barnsdall Park. Adjacent and nearby properties appear to be dominantly residential.
1938	1" = 500'	The Property appears to be undeveloped and primarily unchanged from the previous photograph.
1948	1" = 500'	The Property remains undeveloped and a portion of Barnsdall Park. Adjacent and nearby properties appear to be dominantly residential, with increasing commercial development along the major streets.
1954	1" = 500'	The Property has been developed with a three small buildings, with vehicles or equipment situated near the buildings. The adjacent property to the north has been developed with two large rectangular commercial buildings and a large parking lot. The adjacent property to the west remains undeveloped and vegetated with trees.
1964	1" = 500'	The Property has been further developed with a large multi-level commercial building along Sunset Blvd. A parking lot is visible on the north side of the building. Adjoining properties are now fully developed along the north side of Sunset Blvd.
1972	1" = 500'	The Property has undergone further development with a parking structure constructed along E. Barnsdall Ave., directly north of the medical building on the Property.
1985	1" = 500'	The Property and immediately surrounding land uses appear similar to the previous photograph.

Year	Scale	Observations, Property and Adjoining Properties
1994	1" = 500'	The Property remains developed with a medical building along Sunset Blvd. and a parking garage immediately north of the building.
2005	1" = 500'	The layout of the buildings and improvements on the Property appears similar to the previous photograph.
2016	1" = 500'	The buildings on the Property appear as they do currently, with rooftop parking visible on the parking garage building.

Aerial photograph source: The EDR Aerial Photo Decade Package

2.4.2 Historical City Address Directories

Stantec retained EDR to research available reverse city directories for the Property, in approximately five-year intervals, if available. EDR searched directories published by several sources between the years 1920 and 2014 for the subject Property addresses, and adjacent/adjoining addresses along Sunset Boulevard and the major cross streets. The following is a summary of Stantec's review of the address directory listings:

Street Address	Year	Property Listings
1515 Vermont (the Property)	1933 1962 1964-66 1967 1970 1971 to 1990	Lisetta Fleming Pedro Petroleum Corporation, attorney offices Attorney offices Federal Savings & Loan; medical/dental offices Kaiser Foundation Health Plan variously listed as Kaiser Permanente Medical Care Program and Southern California Permanente Medical Group during this period.
1514 Vermont	1929 1958 1971 1986-90	Agnes Croner A One sewing machine & Appliance Service A-1 Appliance Company Sun Refrigeration Services
1512 Vermont	1958-71 1986-90	Barber Shop A-1 Appliance Company
1510 Vermont	1924 1929 1937 1990	Window Shades & Draperies Scherer Architects Chiropractors Uptown Cafe
1508 Vermont	1962 to1986	Fez Night Club, Fez Supper Club, Fez Restaurant & Night Club
1517 Vermont (the Property)	1967-76 1981-90 1991	United California Bank First Interstate Bank of California Sunset-Vermont Office Building
1528 Vermont	1924	Auto Repairs

Street Address	Year	Property Listings
	1933 1942 1962-71 1986-90	Abramson Morris Gas Station Auto Repairs and Gas Station Catering Crocker National Bank, Wells Fargo Bank
1530 Vermont	1958 to 2010	Bulgarian American Cultural & Educational Society
1533 Vermont	1962-90	Thrifty Drug Stores
4650 Sunset	1971 to 1986	Medical office building
4705 Sunset	1962 1976 1981	California Federal Savings and Loan
4725 Sunset	1981	Kaiser Permanente Medical Care Program
4733 Sunset	1981 1986	Kaiser Permanente Medical Care Program
4810 Sunset	1981 1986	Scientology Church of Dianetics Church of Scientology
4860 Sunset	1958 to 1990	Self Realization Church of All Religions Self Realization Fellowship Church
4900 Sunset	1962 to 1986	Kaiser Permanente Medical Care Program
4904 Sunset	1962 1981 1986	Kaiser Permanente Medical Care Program
4918 Sunset	*1924* *1929* *1942* *1962* *1981* *1986*	Gustav Verrier Aldo Freppoli Ralph Koehler Ivy Motel Kaiser Permanente Medical Care Program Kaiser Permanente Medical Care Program
4950 Sunset	1986	Kaiser Permanente Medical Care Program

2.4.3 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical

Property uses. However, specific facility details on the maps can be difficult to interpret and labels and notes often contain abbreviations.

The following table summarizes Stantec's observations of the reviewed historical Sanborn maps. The historical maps are provided in **Attachment C.**

Year	Scale	Observations, Property and Adjoining Properties
1919	1" = 500'	The Property is shown to be undeveloped and a portion of the Prospect Park. Nearby properties across Sunset Blvd. and Vermont Ave. are mostly undeveloped or contain residences. A gas station is located at 4700 Sunset, directly south across Sunset from the Property.
1950	1" = 500'	The Property remains undeveloped. A gas station is located at 4661 Sunset, directly east across Vermont from the Property. Another gas station is located at 4720 Sunset, across Sunset to the southwest of the Property.
1957	1" = 150'	The Property is now developed as a gas station on the southeast portion of the Property. A garage building labeled Auto Repair is situated west of the gas station building. The adjacent property to the west has been developed with an office building. The gas station located at 4720 Sunset, across Sunset to the southwest of the Property is still shown.
1966	1" = 150'	The Property has been developed with the California Federal Savings Association Office Building at 1515 N. Vermont. A parking garage has been constructed immediately north of the commercial building on the Property.
1970	1" = 150'	The commercial bank building on the Property appears similar to the previous map and is now identified as the Sunset-Vermont Building. The adjoining parking garage to the north also appears similar to the previous map.

Map source: The EDR Certified Sanborn Map Report

2.4.4 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-Minute Topographic Maps (scale 1:24,000 and 1:62,500) of the Hollywood, Quadrangle to help identify past Property usage and areas of potential environmental concern. Copies of the historical maps are provided in **Attachment C**. The following table summarizes the maps reviewed and observations.

Year	Scale	Observations, Property and Adjoining Properties
1894 1896 1898 1900 1902	1:62,500 1:62,500 1:62,500 1:62,500 1:62,500	The Property is situated within the Prospect Park area and Sunset Boulevard does not extend to the Property location. The Hollywood and Cahuenga Valley Railroad is visible to the west of the Property. No individual structures are visible on the Property. No features of environmental concern are noted on or near the Property location.
1921	1:24,000	Near the Property, Sunset Boulevard and other major streets have been developed. The Property still appears to be undeveloped on the southeastern flank of Olive Hill, with an access road passing through the Property. No features of environmental concern are noted on or near the Property location.
1928	1:24,000	The 1928 map shows increased development in the site area, including the historic Hollyhock House on Olive Hill to the north. However, the Property still appears to be undeveloped, with an access road passing through the Property but no structures shown.
1953	1:24,000	A small square structure of unknown use is shown on the Property. The Lebanon Hospital and Presbyterian Hospital are shown to the south of the Property.
1966	1:24,000	No structures are shown on the property. Only larger landmark buildings in the surrounding area are shown.
1981	1:24,000	No structures are shown on the property. Only larger landmark buildings in the surrounding area are shown. No features of environmental concern are noted on or near the Property location.
2012	1:24,000	No details regarding specific structures are provided on this map version. No features of environmental concern are noted on or near the Property location.

Name of maps and source: EDR Historical Topo Map Report

2.5 ELECTRONIC DATABASES

Publicly accessible electronic databases were searched by Stantec to better understand subsurface conditions in the vicinity of the Property and identify potential sources of impacts to soil and groundwater.

2.5.1 State Water Resources Control Board - GeoTracker Database

GeoTracker is a publicly accessible database operated by the California Environmental Protection Agency State Water Resources Control Board (SWRCB). The searchable database is utilized by State and local oversight agencies to track and archive data related to releases of hazardous substances. Using GeoTracker, Stantec identified sites within approximately 1,750-foot

radius (1/3 mile) of the Property having at least one reported release of a hazardous material. A summary of results is presented below.

Subject Property
No listed sites or facilities shown.

Open Leaking Underground Storage Tank (LUST) / Cleanup Program Sites
The following provides a summary of open LUST/Cleanup Program sites identified within a 1/3-mile radius of the Site. Only one open case was located within the search area:

- An open LUST Cleanup Site identified as Shell/Tesoro (former ARCO #5025) is located at 1630 N. Vermont Avenue, approximately 600 feet north of the Property. The RWQCB approved a revised Remedial Action Plan in October 2018 to address fuel hydrocarbons in soil and groundwater at the site. Groundwater flow direction at the site is towards the east/southeast, placing the site hydraulically cross-gradient from the Property. The dissolved hydrocarbon plumes, including benzene and MTBE, extend eastward from the site, beneath Hollywood Blvd.

Closed LUST/Cleanup Program Sites
The following provides a summary of closed LUST/Cleanup Program sites identified within a 1/3-mile radius of the Site:

- A closed LUST case identified as Thrifty #183 is located at 5025 Sunset Boulevard, approximately 950 feet west of the Property. This case was granted closure on January 7, 2013. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Presbyterian Medical Center at 1300 N. Vermont Avenue is located approximately 825 feet southeast of the Property. This case was granted closure on May 7, 2013. The contaminants of concern were listed as diesel.

- A closed LUST case identified as Pacific Bell (G1-125) at 1255 N. Vermont Avenue is located approximately 1,400 feet south of the Property. This case was granted closure on July 27, 1998. The contaminants of concern were listed as "other solvent or non-petroleum hydrocarbons".

- A closed LUST case identified as 76 Products Station #3647 at 1270 N. Vermont Avenue is located approximately 1,175 feet south/southeast of the Property. This case was granted closure on April 20, 1998. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Hollywood Car Wash at 4810 Hollywood Blvd. is located approximately 1,300 feet northwest of the Property. This case was granted closure on January 22, 1997. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Edgemont Hospital at 4841 Hollywood Blvd. is located approximately 1,400 feet northwest of the Property. This case was granted closure on July 7, 1996. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Unocal #3837 at 4900 Hollywood Blvd. is located approximately 1,550 feet northwest of the Property. This case was granted closure on September 8, 1997. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Hollywood Gas at 4977 Hollywood Blvd. is located approximately 975 feet north of the Property. This case was granted closure on January 9, 1997. The contaminants of concern were listed as gasoline.

- A closed LUST case identified as Fire Station #35 at 1601 HillHurst Ave. is located approximately 1,500 feet northeast of the Property. This case was granted closure on April 27, 1998. The contaminants of concern were listed as diesel.

Permitted Underground Storage Tank
The following provides a summary of USTs permitted through the Los Angeles County Fire Department that have been identified within a 1/3-mile radius of the Site:

- Ten active USTs are located within the search radius. The nearest permitted UST is located 350 feet southwest of the Property at the Children's Hospital at 4650 Sunset Boulevard. Active USTs are located at the Kaiser Permanente building at 4760 Sunset Boulevard and the Kaiser Permanente hospital building at 4867 Sunset Boulevard, between 400 to 900 feet from the Property.

2.5.2 EnviroStor

EnviroStor is a publicly accessible database operated by the State of California Department of Toxic Substances Control (DTSC). The searchable database contains information related to sites with contamination and/or sites where the DTSC's environmental oversight has been requested or required. Stantec utilized EnviroStor to obtain information relating to identified DTSC sites located within 1,750-foot radius of the Property.

- The only site listed in EnviroStor within the search radius distance was the Children's Hospital at 4650 Sunset Boulevard. The site was listed for a tiered permit not related to contamination or site cleanup.

3.0 SITE RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Laura Butler of Stantec on January 23, 2019. Stantec was accompanied by a Kaiser representative during the Property visit. Figure 2 provides information about the Property and adjoining properties and the location of potential areas of environmental concern.

3.1 SITE RECONNAISSANCE METHODOLOGY

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Property that may indicate the presence of environmental concerns. The reconnaissance of the Property was conducted by entering the building on the property, viewing representative interior areas, and by viewing exterior portions of the property including parking areas and storage/maintenance areas or structures. In general, Stantec utilized the following methodology to observe the Property:

- View the outer Property boundary as accessible by public thoroughfares.
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces, as applicable to the Property.
- View storage areas for bulk chemicals, hazardous materials, and compressed gases.

Weather conditions during the visit to the Property were clear and mostly sunny. There were no weather-related Property access restrictions encountered during the reconnaissance visit.

3.2 GENERAL DESCRIPTION AND OBSERVATIONS

The parking structure at the Property is accessed from Sunset Boulevard and provides two levels of enclosed parking plus rooftop parking. The lowest level of the structure is also occupied by the Painting Department, with offices, storage rooms, and a utility area. The second level of the structure provides direct entrance to the adjoining medical office building at 1515 Vermont Avenue. Linear patches in the concrete floor of the parking structure were observed that appear to correspond to drain or sewer lines, suggesting previous repairs or replacement of plumbing.

Adjoining and adjacent properties are characterized by the following uses:

North: Barnsdall Avenue and shopping center across the street.

South: Adjoining Kaiser Permanente medical office building at 1515 Vermont.

East: Vermont Avenue and small restaurants with parking across the street.

West: Multi-level Kaiser Permanente parking structure.

4.0 INTERVIEWS

Stantec conducted interviews with the following individuals.

Name and Contact Information	**Relationship to Property**	**Key findings:**
Peter E. Zaragoza 323-783-7709	Kaiser Permanente General Superintendent - LAMC Capital Project Facilities Construction	During the site visit, Mr. Zaragoza stated that he was not aware of any past or current environmental conditions such as releases of hazardous materials or known contamination at the Property.
Daniel P. Weaver (323) 783-7734	Lead Engineer Kaiser Permanente LAMC	Mr. Weaver confirmed that there is no active UST at the Property.

4.1 FINDINGS FROM INTERVIEW WITH PROPERTY REPRESENTATIVE

No indications of known environmental impairments or releases of hazardous materials or petroleum products at the Property were identified based on the information obtained.

5.0 SUMMARY, CONCLUSIONS, AND RECOMENDATIONS

On behalf of Kaiser Permanente (Kaiser), Stantec Consulting Services Inc. (Stantec) has completed a desktop environmental records review for the property located at 1517 N. Vermont Avenue, Los Angeles, California (the "Property"). The environmental review was completed to evaluate the possible presence of environmental impacts that may have sourced from current and historical site activities, and/or operations associated with surrounding properties and facilities. Stantec understands that the intended use of the Property is continued medical facilities and infrastructure.

Stantec obtained historical sources of information to ascertain the past use of the Property and surrounding area and evaluate if past uses may have had the potential to impact environmental media beneath the Property. Governmental, regulatory, and other public records were evaluated to identify potential contributors to possible adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from first developed use of the Property and that of surrounding properties, to the present. The following are conclusions from the records review.

- It should be noted that before the Request for Change of Address in August 1996, there was no 1517 N. Vermont address and records pertaining to the Property were listed under the 1515 N. Vermont address. Prior to the current development as a medical office building, the Property was undeveloped and a portion of the Barnsdall Park on Olive Hill. The Property remained undeveloped until approximately 1957 when a gas station and auto repair shop were present and listed as Pedro Petroleum Corporation in 1962. By 1964, the California Federal Savings Association Office Building had been constructed at 1515 N. Vermont with a parking lot (now 1517 Vermont) situated immediately north of the office building. By 1970, business occupants at the Property were listed as Kaiser Foundation and later Kaiser Permanente. A parking structure was constructed on the Property by 1972.

- Past land uses on nearby properties that could pose an environmental threat to the Property include gas stations and/or auto repair shops at 1515 Vermont (the Property), 1528 Vermont, 1630 Vermont, 4720 Sunset Blvd., and 4700 Sunset Blvd. Sparkling Cleaners was listed at 1553 Vermont in 1980 and the active Hollywood Cleaners operates at 4730 Hollywood Blvd.

- The Property (1515 Vermont) was listed in a database source as having contained a permitted UST, with the status listed as "inactive". The lead engineer for the Kaiser LAMC confirmed that there are no USTs at the Property currently, as reflected by the Geotracker database. The Property was identified as a past generator of hazardous waste. No records of environmental non-compliance or violations were found pertaining to the Property.

- The Property is located within the City of Los Angeles with multiple nearby listings of hazardous waste generators and sites with current or historic releases of hydrocarbons to soil and/or groundwater. Nearly all the nearby Leaking Underground Storage Tank sites have received regulatory case closure. Numerous active USTs are present at facilities in the vicinity of the Property. Properly maintained and permitted USTs are not considered an imminent environmental threat to the Property.

5.1 RECOMMENDATIONS

Historical maps and directory listings identified nearby gas stations and/or auto repair shops located at 1515 Vermont (the Property), 1528 Vermont, 1630 Vermont, 4720 Sunset Blvd., and 4700 Sunset Blvd. Sparkling Cleaners was listed at 1553 Vermont in 1980 and the active Hollywood Cleaners operates at 4730 Hollywood Blvd.4850, 4874, 4901, 5000, and 5001 Sunset Boulevard were depicted as early as 1919-1923. These historical operations likely included handling of hazardous materials and petroleum products and generation of hazardous wastes, as well as possible underground leaks from UST systems.

Based on the results of the environmental records review and a former gas station located onsite, the potential exists for soil containing petroleum hydrocarbons, solvents, and other organic contaminants to be encountered during grading and ground disturbing activities associated with redevelopment of the Property. Stantec recommends that a Soil Management Plan approach be implemented to address these environmental contingencies. The Soil Management Plan (SMP) would specify the roles, responsibilities, protocols, and procedures to be employed in the event that subsurface chemical impacts are encountered. Key functions of the SMP in the event of a discovery of subsurface impacts are to specify procedures for immediate notification to local oversight agencies, provide health and safety protocols to protect workers, site occupants, and the public, and to isolate and contain suspected impacted materials while chemical analysis of preliminary samples is conducted.

For new facilities that include occupied space for Kaiser personnel and patients, Stantec recommends that a vapor barrier be incorporated into the designs for new proposed buildings, for protection of future occupants. Given the results of the environmental records review and proposed current plan for reconstruction of the 1517 North Vermont Avenue parking structure, including 2,300 square feet of retail/commercial space on the ground floor, incorporation of a vapor barrier into the new building design is considered to be appropriate.

6.0 LIMITATIONS & CERTIFICATION

This report was prepared in accordance with the scope of work outlined in Stantec's contract and with generally accepted professional environmental consulting practices existing at the time this report was prepared and applicable to the location of the Property. It was prepared for the exclusive use of Kaiser, for the express purpose stated above. Any re-use of this report for a different purpose or by others not identified above shall be at the user's sole risk without liability to Stantec. To the extent that this report is based on information provided to Stantec by third parties, Stantec may have made efforts to verify this third party information, but Stantec cannot guarantee the completeness or accuracy of this information. No other warranties, expressed or implied are made by Stantec.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.
