Project Title: Blossom Valley Reservoir Replacement and I-8 Unencased Transmission Mains Project **Addendum No. 2** to the Comprehensive Facilities Master Plan Final Impact Report (SCH 2015111014)

Project Applicant: Padre Dam Municipal Water District (PDMWD)

Specific Project Location – Identify street address and cross street or attach a map showing project site (preferably a USGS 15’ or 7 ½’ topographical map identified by quadrangle name):

The Blossom Valley Reservoir site is along Via Caballo Road, approximately 0.7 mile north of I-8 and 1.2 miles east of Lake Jennings. The Labrador Lane pipeline crossing would be located near Olde Highway 80, run northeast through Labrador Lane, cross under I-8 and terminate under Flinn Springs Road. The proposed Dunbar Lane pipeline crossing would be located near Alpine Boulevard, cross perpendicularly under I-8, run west through Chocolate Summit Drive crossing Dunbar Lane, and terminate under Olde Highway 80.

General Project Location (City and/or County): San Diego County

Project Description:

Replacement of the Blossom Valley Reservoir (BVR) consists of two primary improvements: (1) demolition of the existing BVR and access road; and (2) construction of the new tank and access road. Demolition of the existing BVR would include demolition of the entire reservoir itself, as well as the access road and other asphalt concrete pavement, perimeter chain link fence and gates, groundwater monitoring well, AC drainage swales, and piping. The new tank would be a 3.25-MG, cylindrical, prestressed concrete tank with an inside diameter of 146 feet and a height of 30 feet. It would be partially buried, with 20 feet of the structure height below finished grade and would be centered within the existing reservoir location.

The Labrador Lane pipeline crossing involves installation of approximately 1,800 feet of new 20-inch cement mortar lined and coated (CMLC) steel pipe that would connect to an existing 24-inch pipeline in Olde Highway 80, run northeast through Labrador Lane, cross perpendicularly under I-8 via jack and bore methods with a 30-inch steel casing, and re-connect to an existing 33-inch pipeline in Flinn Springs Road.

The Dunbar Lane crossing involves installation of approximately 2,120 feet of new 24-inch CMLC steel pipe that would connect to an existing 30-inch pipeline in Alpine Boulevard, cross perpendicularly under I-8 via jack-and-bore methods with a 36-inch steel casing, run west through Chocolate Summit Drive crossing Dunbar Lane, and re-connect to an existing 30 inch pipeline in Olde Highway 80.

This is to advise that the (Lead Agency or Responsible Agency) has approved the above described project on February 19, 2025 and has made the following determinations regarding the above described project:

| | |
|--|---|
| 1. | <input type="checkbox"/> The project will have a significant effect on the environment. |
| | <input checked="" type="checkbox"/> The project will NOT have a new or substantially more severe significant effect on the environment |
| 2. | <input checked="" type="checkbox"/> An Addendum to a previously certified Environmental Impact Report was prepared and certified for this project pursuant to the provisions of CEQA and reflects the independent judgment of the Lead Agency. |
| | <input type="checkbox"/> A Negative Declaration was prepared for this project pursuant to the provisions of CEQA and reflects the independent judgment of the Lead Agency. |
| | <input type="checkbox"/> A Mitigated Negative Declaration was prepared for this project pursuant to the provisions of CEQA and reflects the independent judgment of the Lead Agency. |
| 3. | <input checked="" type="checkbox"/> Mitigation measures identified in the previously certified EIR were made a condition of the approval of the project. |
| | <input type="checkbox"/> Mitigation measures were NOT made a condition of the approval of the project. |
| 4. | <input checked="" type="checkbox"/> A Mitigation Monitoring or Reporting Plan was adopted for this project. |
| | <input type="checkbox"/> A Mitigation Monitoring or Reporting Plan was NOT adopted for this project. |
| 5. | <input type="checkbox"/> A Statement of Overriding Considerations was adopted for this project. |
| | <input checked="" type="checkbox"/> A Statement of Overriding Considerations was NOT adopted for this project |
| 6. | <input checked="" type="checkbox"/> Findings pursuant to CEQA Guidelines Section 15162 were made pursuant to the provisions of CEQA. |
| | <input type="checkbox"/> Findings were NOT made pursuant to the provisions of CEQA. |
| This is to certify that the Addendum, the Final EIR and the remainder of the administrative record documents are available to General Public at: | |
| Custodian: Michael Hindle, PE | Location: Padre Dam Municipal Water District 9300 Fanita Parkway Santee, CA 92071 |
| Date: <u>06/23/2025</u> |  Signature |
| Date Received for Filing: _____ | Engineering Manager - CIP Title |
