Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 02/16/2021. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. The last recertification occurred in 2017 - site maps to be updated as well as hazardous materials inventory. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the annual due date.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
AIR EMISSIONS CLASSIFICATION UNKNOWN
US National Pollutant Discharge Elimination System (NPDES) module of

CHURCHILL DOWNS CALIF CO, HOLLYWOOD PARK (Continued) **1007649232**

the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Region:	STATE
Facility Status:	**Completed - Case Closed**
Status Date:	01/25/2021
Global Id:	T10000013222
Lead Agency:	LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number:	Not reported
Latitude:	33.95208
Longitude:	-118.34329
Case Type:	Cleanup Program Site
Case Worker:	GAC
Local Agency:	Not reported
RB Case Number:	1207A
File Location:	All Files are on GeoTracker or in the Local Agency Warehouse
Potential Media Affected:	Soil, Soil Vapor
Potential Contaminants of Concern:	Not reported
Site History:	The Site is located at the south-east corner of Arbor Vitae Street and South Prairie Avenue in the City of Inglewood. The Site is approximately 4 acres and was paved with asphalt prior to the start of the removal project. The Site is currently surrounded on three sides by the construction of the new Los Angeles Ram Stadium by Turner/AECOM. Commercial and multi-family residential development is present across Prairie Avenue to the west. The Site was formerly part of the western parking lot of the Hollywood Park Racetrack and Casino property which was owned by the Hollywood Park Land Company, LLC (HPLC) since 2005. Prior to development of the racetrack in 1938 the site was used for row crops. In 2005, areas of arsenic contaminated soil and groundwater were identified at HPR&C during a preliminary site assessment by Erler & Kalinowski, Inc (EKI). In 2010, the Site was transferred to the City of Inglewood (City) before remediation activities began on the Site and developed into a transit center and park-and-ride facility. The soil removal and confirmation soil sampling were performed between March 23 and April 27, 2020, following the procedures outlined by the SMP prepared by Geosyntec in 2019 and Field Portable X-Ray Fluorescence Spectrometry for In-Situ Screening of Arsenic in Soil prepared by EKI, dated February 26, 2015. The SMP was approved by the Los Angeles Regional Water Quality Control Board (LARWQCB) before excavation activities began on the site. Griffith excavated the arsenic contaminated soil in two phases, based on the analytical data from the limited site assessment performed by EKI on behalf of Hollywood Park Racetrack and Casino (HPR&C) as presented in the Geosyntec Soil Management Plan dated 2 August 2019. The first phase involved the removal of the top 12 inches of soil as non-RCRA hazardous waste. The soil was treated on site using a Transportable Treatment Unit (TTU) and exported to Simi Valley Landfill as treated, non-hazardous waste. A total of 9,179 tons of soil was removed during this phase. The second phase of removal excavated the next 24 inches of soil and was exported as non-hazardous, arsenic-impacted soil to Simi Valley Landfill. A total of 18,026 tons of soil was removed from the site during the second

CITY OF INGLEWOOD INTERMODAL TRANSIT FACILITY (Continued) **S124443097**

phase. Over both phases of soil removal, a total of 27, 205 tons of soil were removed from the site. After the contaminated soil was removed, ACG performed confirmation soil sampling of the excavation bottom. A total of 123 soil samples were collected for field X-ray fluorescence (XRF) analysis and laboratory analysis to confirm the removal of soil with arsenic concentrations above the Property specific Soil Criterion (PSC) of 12 mg/kg and that the Site is in compliance with the LARWQCB approved SMP criteria and is suitable for redevelopment. The report of the confirmation sampling, Post- Removal Soil Sampling Report - Removal of Arsenic-Contaminated Soil, City of Inglewood Intermodal Transit Facility, 998 South Prairie Ave., Inglewood, California, Site I.D. No. 2040585, SCP No. 1207A, dated May 21, 2020, was submitted to LARWQCB.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violation Date: 06-17-2020
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Site Name:	MIDAS SHOP OF INGLEWOOD
Violation Date:	12-16-2015
Citation:	HSC 6.11 25404.1 - California Health and Safety Code, Chapter 6.11, Section(s) 25404.1
Violation Description:	Failure to obtain and/or maintain an active hazardous waste generator permit.
Violation Notes:	Returned to compliance on 03/23/2016. OBSERVATION: The Owner/Operator failed to obtain or no longer has an active hazardous waste generator permit. New ownership submitted for entry in database. SR# SRLNP1BEK - recorded change in ownership. CORRECTIVE ACTION: The Owner/Operator shall immediately apply to receive a new or renewed hazardous waste generator permit and maintain that permit as active as long as the facility is in operation and continues to generate hazardous waste. Every person, business, or business concern within the jurisdiction of the LACoCUPA and subject to the requirements of one or more of the program elements shall be required to pay the applicable annual fees and any applicable late payment penalty and apply for and obtain from the LACoCUPA a unified program facility permit for the program elements applicable to such facility prior to the commencement of any business or activity related to any of the program elements. Upon receipt of full payment from a unified program facility [Truncated]

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date: 03-21-2014
Citation: 19 CCR 4.5 2755.5(a) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2755.5(a)
Violation Description: Failure to prepare and implement procedures to maintain the on-going mechanical integrity of the process equipment.
Violation Notes: Returned to compliance on 07/14/2014. The hazard review on March 9, 2009 requires ammonia detectors as measures to reduce the threat of an unplanned release of ammonia from a line break, vessel rupture, or connector leak on human health and safety. These detectors were not recognized for being in good condition to accurately read the concentration of ammonia. Also the annual ammonia inspection requires for you to inspect the insulation foundation bolts of vessels and insulation of piping. Deterioration was observed at the insulation of the intercooler and the foundation support of the high pressure receiver was observed to have a missing bolt. REQUIRED ACTION: install new ammonia detectors at the freezers, cold storage rooms, and the equipment area. Replace deteriorated insulation of the intercooler. Replace missing foundation bolt of the high pressure receiver.
Violation Division: Los Angeles County Fire Department
Violation Program: CalARP
Violation Source: CERS

Violation Date: 08-28-2019
Citation: 19 CCR 4.5 2755.2(e) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2755.2(e)
Violation Description: Failure to address the following in the hazard review: 1. Document the results of the hazard review and ensure problems identitifed are resolved; 2. Complete these actions on a timetable agreed upon with the AA, or within two and one-half (2.5) years of performing the hazard review, or the next planned turnaround, for those items that require a turnaround; 3. Document the final resolution taken to address each recommendation and actual completion date.
Violation Notes: Returned to compliance on 09/30/2020. OBSERVATION: The owner/operator failed to ensure that problems identified in the hazard review were resolved. The following recommendations on the 2014 seismic assessment do not have a completion dates: 14SA-03 - Conduct additional analysis on Condensors #1 and #2 anchorage to support steel as it could not be verified due to corrosion. 14SA-04 - Add lateral restraints at the bases of the Spiral Freezers. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that problems identified in the 2014 seismic assessment are being resolved.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
FEDERAL FACILITY HAZARDOUS WASTE DOCKET
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: SUPREME PLATING CO
Violation Date: 06-24-2019
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 07/10/2019. OBSERVATION: The business failed to implement a business plan when handling hazardous materials at or above the reportable threshold quantities. Section G (EMERGENCY EQUIPMENT) of the facility's Emergency Response Plan includes a plumbed eyewash fountain as emergency response equipment available at the facility. During the inspection, the owner, Luis Manuel Delarosa, failed to demonstrate that the plumbed eyewash attached to the water rinse tank is operational. Mr. Delarosa, stated that his employee that operates the metal plating process is off work today and has the key that allows the eyewash to operate. CORRECTIVE ACTION: Fully implement the business plan for the facility by allowing the plumbed eyewash to be available and operational at all times. Contact the inspector to schedule a time to demonstrate that the plumbed eyewash is operational.

Violation Date: 06-24-2019
Citation: HSC 6.95 25536(b) - California Health and Safety Code, Chapter 6.95, Section(s) 25536(b)
Violation Description: Failure of a stationary source to submit a Risk Management Plan to the Administering Agency after the owner or operator has received a notice from the Administering Agency requesting submission of a Risk Management Plan.
Violation Notes: Returned to compliance on 07/27/2020. OBSERVATION: Owner/operator failed to submit a Risk Management Plan (RMP) to the Administering Agency (AA), CalARP Unit, after being notified by the AA to submit the RMP. The owner/operator failed to submit an updated RMP by the due date of 2/5/19 per 19 CCR section 2745.10(b). A letter from the CalARP Unit was emailed to the owner, Luis Manuel Delarosa, on 4/4/19 notifying Mr. Delarosa that an updated RMP is past due. CORRECTIVE ACTION: Complete and submit an updated RMP to the AA by 7/24/19.

SUPREME PLATING AND COATING (Continued) **S113001046**

Site ID:	72643
Site Name:	SUPREME PLATING CO
Violation Date:	05-28-2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 08/23/2019. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Violation Date: 05-04-2016
Citation: 40 CFR 1 265.171 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.171
Violation Description: Failure to accumulate hazardous waste in a container that is in good condition.
Violation Notes: Returned to compliance on 06/14/2016. OBSERVATION: Generator failed to accumulate hazardous waste in a container(s) that are in good condition. Deterioration at containers and drums observed throughout the facility. CORRECTIVE ACTION: Immediately transfer all hazardous wastes into containers that are in good condition or have hazardous wastes properly disposed of by a licensed hazardous waste hauler under a proper manifest.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 72643
Site Name: SUPREME PLATING CO
Violation Date: 05-04-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 06/14/2016. OBSERVATION: Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. Evidence of last disposal dated 2/14/2012 - accumulation of hazardous waste on site has exceeded two years. As soon as EPA ID is re-activated, call for immediate pick of hazardous waste. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA within 30 days from the date of inspection.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: D007

WALGREENS #6413 (Continued) **1016954296**

Waste Description: CHROMIUM

Waste Code: D009
Waste Description: MERCURY

Waste Code: D010
Waste Description: SELENIUM

Waste Code: D016
Waste Description: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D024
Waste Description: M-CRESOL

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P075
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: U034
Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U129
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U188
Waste Description: PHENOL

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

SOUTHERN CALIFORNIA WASTE OIL CO (Continued) **1000409155**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 6061
Site Name: ANTHONY'S PAINT AND BODY SHOP
Violation Date: 05-23-2016
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes: Returned to compliance on 02/09/2017. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. CERS review indicates 2016 reporting year not submitted. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 6061
Site Name: ANTHONY'S PAINT AND BODY SHOP
Violation Date: 05-23-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/23/2016. OBSERVATION: 2-55 G DM used oil, 2-55 G DM waste coolant, 3-55 G DM waste paint thinner, 1-30 G DM water based waste paint containers unlabeled . Issued HW labels and the containers were labeled during the inspection. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 12/23/2016. OBSERVATION: A business plan has not been received by the CUPA. The facility was previously sent a notice/request from the CUPA for the submittal of a business plan by April 1, 2016. CORRECTIVE ACTION: Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately.

Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted

JP CLEANERS (Continued) **S105266052**

for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 12/23/2016. OBSERVATION: Copies of hazardous waste disposal records for waste hydrocarbon were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by 10/9/2016.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 29732
Site Name: FARRAR GRINDING CO INC
Violation Date: 03-29-2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 04/27/2016. OBSERVATION: All hazardous waste containers shall be closed at all times except when adding or removing waste. Observed 28 5-gallon containers of waste oil intended to be run through the treatment unit (fluid eliminator) - unlabeled and uncovered at time of inspection. All containers were stored beneath an awning. Repeat violation from inspection conducted on 1/5/2012. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 29732
Site Name: FARRAR GRINDING CO INC
Violation Date: 03-29-2016
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 04/27/2016. OBSERVATION: The facility is not maintained or operated to minimize the release of a HW. Observed waste oil collected at ground surface at hazardous waste storage area for waste intended to be treated at a later date. CORRECTIVE ACTIONS: Immediately maintain and operate this facility to minimize the release of a HW.

Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.
Violation Notes:	Returned to compliance on 04/27/2016. OBSERVATION: The Owner/Operator failed to provide a hazardous waste contingency plan that contains all of the required content of this section. This facility's hazardous waste contingency plan shall be designed to comply with the required content in the regulations. CORRECTIVE ACTIONS: Immediately redesign the content of the hazardous waste contingency plan for this facility to comply with the regulations. Submit a copy of the redesigned hazardous waste contingency plan to the CUPA for review.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 05/20/2020. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	06-01-2020
Citation:	HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description:	Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	OBSERVATION: The business failed to establish and implement a business plan when handling hazardous materials at or above the reportable threshold quantities. One 55-gallon plastic drum with waste antifreeze was observed inside the facility. Also, the owner/operator uses an underground storage tank with an approximate capacity of 550-gallons in the parking lot to store used oil. The owner/operator failed to submit a Hazardous Material Business Plan in the online California Environmental Reporting System (CERS). According the owner, Mr. Obed Ortiz Mejia, the business has been in operation since 2007. CORRECTIVE ACTION: Establish and implement a business plan for the facility. Submit documentation of correction to the unified program agency through CERS.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description:	Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID:	416773
Site Name:	INGLEWOOD HIGH SCHOOL
Violation Date:	02-20-2018
Citation:	40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description:	Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.
Violation Notes:	Returned to compliance on 07/03/2018. OBSERVATION: Eye wash stations in science labs have not been tested and maintained to assure proper operation in time of emergency. CORRECTIVE ACTION: Submit photos/documentation to the CUPA demonstrating eye wash stations have been properly tested and maintained.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS

Site ID:	416773
Site Name:	INGLEWOOD HIGH SCHOOL
Violation Date:	02-20-2018
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 07/03/2018. OBSERVATION: Formaldehyde-containing specimens was observed without an accumulation date and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Dispose of dissection specimens and submit a copy of the manifest/receipt to the CUPA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site ID: 104088
Site Name: CENTINELA HOSPITAL MEDICAL CTR
Violation Date: 12-07-2018
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

CENTINELA HOSPITAL MEDICAL CTR (Continued) **S113743952**

Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

CERS HAZ WASTE:
Name: COMPLETE AUTO CARE
Address: 410 N LA BREA AVE # 5
City,State,Zip: INGLEWOOD, CA 90302
Site ID: 21168
CERS ID: 10299610
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 21168
Site Name: COMPLETE AUTO CARE
Violation Date: 11-30-2016
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 01/18/2018. OBSERVATION: Owner/Operator failed to submit the hazardous waste notification electronically to CERS. CORRECTIVE ACTION: Owner/Operator shall submit a notification of hazardous waste generated by the facility in accordance with HSC 25158 electronically to CERS. HSC 25404(e)(4) No later than three years after the statewide information management system is established, each CUPA, PA, and regulated business shall report program data electronically. The secretary shall work with the CUPAs to develop a phased in schedule for the electronic collection and submittal of information to be included in the statewide information management system, giving first priority to information relating to those chemicals determined by the secretary to be of greatest concern. The secretary, in making this determination shall consult with the CUPAs, the California Emergency Management Agency, the State Fire Marshal, and the boards, departments, and offices within the California [Truncated]
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 21168
Site Name: COMPLETE AUTO CARE
Violation Date: 01-08-2015
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 08/19/2015. OBSERVATION: Copies of hazardous waste disposal records were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by January 8, 2015.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

COMPLETE AUTO CARE (Continued) **S123537269**

Site Name:	COMPLETE AUTO CARE
Violation Date:	11-30-2016
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/18/2018. OBSERVATION: All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Hazardous waste drums observed with deteriorated waste labels and no accumulation date. CORRECTIVE ACTION: Immediately label these containers and ensure that all containers are marked with all the required information. Since these containers have been on site longer 180 days, immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA - corrected on site.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes:	Returned to compliance on 10/15/2016. OBSERVATION: The Emergency Response plan and procedures submitted to the CUPA is missing required elements. Your Emergency Response and Training Plans were not accepted for the following reasons: 1) Missing information; must include the Name of the Hospital, address, and phone number. Please update and resubmit in CERS. 2) Please indicate Employee Training Plan is "Provided Elsewhere in CERS" and supplied with the "Emergency Response and Training Plans" and resubmit. CORRECTIVE ACTION: Revise the emergency response plan and procedures to include all required content and submit electronically in the California Environmental Reporting System (CERS).

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	142385
Site Name:	PEP BOYS #630
Violation Date:	12-29-2015
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the

PEP BOYS STORE#0630 (Continued) **S113009628**

possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment..

Violation Notes: Returned to compliance on 03/14/2016. OBSERVATION: Generator failed to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment. [enter specific observations] CORRECTIVE ACTION: Owner/Operator shall immediatly maintin the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment. The Owner/Operator shall develop procedures to operate the facility in such a manner to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment. Owner/Operator shall [Truncated]

Site Name: PEP BOYS #630
Violation Date: 08-19-2019
Citation: 40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35

Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.

Violation Notes: Returned to compliance on 10/01/2019. OBSERVATION: The hazardous waste storage area located at the south side of the repair bays did not have adequate aisle space allowing for unobstructed movement. Various materials and satellite containers observed disorganized throughout the waste storage area. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that adequate aisle space has been provided.

Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 142385
Site Name: PEP BOYS #630
Violation Date: 08-19-2019
Citation: 40 CFR 1 262.34(d)(5)(i) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(i)

Violation Description: Failure to have at least one employee either on the premises or on call (i.e., available to respond to an emergency by reaching the facility within a short period of time) with the responsibility for coordinating all emergency response measures.

Violation Notes: Returned to compliance on 10/01/2019. OBSERVATION: An emergency coordinator was not on the premises or available on call. There was no manager or designated emergency contact for the sole employee staffed at the time of inspection. CORRECTIVE ACTION: Submit documentation to this office demonstrating that at least one employee is either on the

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 437698
Site Name: EMMANUEL AUTO REPAIR
Violation Date: 01-24-2017
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 05/07/2019. OBSERVATION: Owner/Operator failed to establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet. CORRECTIVE ACTION: Establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 437698
Site Name: EMMANUEL AUTO REPAIR
Violation Date: 08-14-2020
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: OBSERVATION: Three 5 gallon containers of used oil filters located in the back storage area were observed a lid and without a label. A label was provided at the time of inspection. Manager indicated he would transfer the empty oil filters into a container and lid and will place the label on the container. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the used oil and filters are being properly managed or submit a bill of lading to this department demonstrating proper disposal.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 437698
Site Name: EMMANUEL AUTO REPAIR
Violation Date: 08-14-2020
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: OBSERVATION: The generator's EPA ID number CAL000374914 is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have reactivated the facility's EPA ID

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	07/08/1992
Comments:	The Department completed review of the PEA on July 8, 1992. The Department concurred with the recommendation that Further Action was needed at the site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	04/07/1992
Comments:	The 1.4 acre of total 58 acre park was used by the Gas Co. for the production of "manufactured gas" in the early 1900s. Currently the site is used as a city owned rec- reational park. The manufactured gas was made at the site from coal and oil. The byproducts from this operation were tars, oils, sludges, lampblack etc, which were sold to various industrial uses. Some of these byproduct residues have been found in soils at former towne gas plant sites. Out of these polycyclic aromatic hydrocarbons (PAH) are hazardous. Also, elevated levels of heavy metals such as lead and arsenic were found at a few sites. A PEA is required at the site to determine, if any emergency removal action is required to reduce the potential threat to public health and the environment. The Dept received a Notice of Intent dated March 20, 1992 to initiate PEA.

Manufactured Gas Plants:

A 1.4 acre former, early 1900's, manufactured gas plant site that was dismantled in 1913. The site is currently part of an 18 acre city-owned park. A PEA identified some contamination (lampblack PAH's) in the subsurface soils. A removal action was coompleted in February of 1995 and this section of the public park returned to use.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Inactive Status Letter
Completed Date: 09/17/2009
Comments: DTSC issued an inactive letter due to the delays of the project and after discussing the issue with the District. The District indicated during a telephone conversation that funding is not available to move the project forward. District will contact DTSC when funding becomes available.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 10/09/2007
Comments: In a letter, dated October 9, 2007, DTSC approved the Phase I Environmental Site Assessment report, dated May 4, 2007, with additional information provided on October 2, 2007. The Phase I concludes that the only recognized environmental conditions at the site are asbestos containing material, lead from lead-based paint, and organochlorine pesticides from termiticides. DTSC concurred with the conclusion that further environmental investigation of the site is required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 4.14 Request
Completed Date: 10/11/2007
Comments: On October 11, 2007, DTSC signed the completed SFPD 4.14 form and transmitted the form to Lennox School District via a letter, dated October 11, 2007. The form documents commitment of the District to complete the required further investigation and related response action with DTSC's oversight. Further investigation of lead from lead-based paint and organochlorine pesticides from termiticides, including asbestos containing material, is required per DTSC's letter, dated October 9, 2007.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Cost Recovery Closeout Memo
Completed Date: 11/07/2011
Comments: DTSC prepared project close out Cost Recovery Unit Memorandum.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Inactive Status Letter
Completed Date: 09/17/2009
Comments: DTSC issued an inactive letter due to the delays of the project and after discussing the issue with the District. The District indicated during a telephone conversation that funding is not available to move the project forward. District will contact DTSC when funding becomes available.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 10/09/2007
Comments: In a letter, dated October 9, 2007, DTSC approved the Phase I Environmental Site Assessment report, dated May 4, 2007, with additional information provided on October 2, 2007. The Phase I concludes that the only recognized environmental conditions at the site are asbestos containing material, lead from lead-based paint, and organochlorine pesticides from termiticides. DTSC concurred with the conclusion that further environmental investigation of the site is required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 4.14 Request
Completed Date: 10/11/2007
Comments: On October 11, 2007, DTSC signed the completed SFPD 4.14 form and transmitted the form to Lennox School District via a letter, dated October 11, 2007. The form documents commitment of the District to complete the required further investigation and related response action with DTSC's oversight. Further investigation of lead from lead-based paint and organochlorine pesticides from termiticides, including asbestos containing material, is required per DTSC's letter, dated October 9, 2007.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2021

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 02/22/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

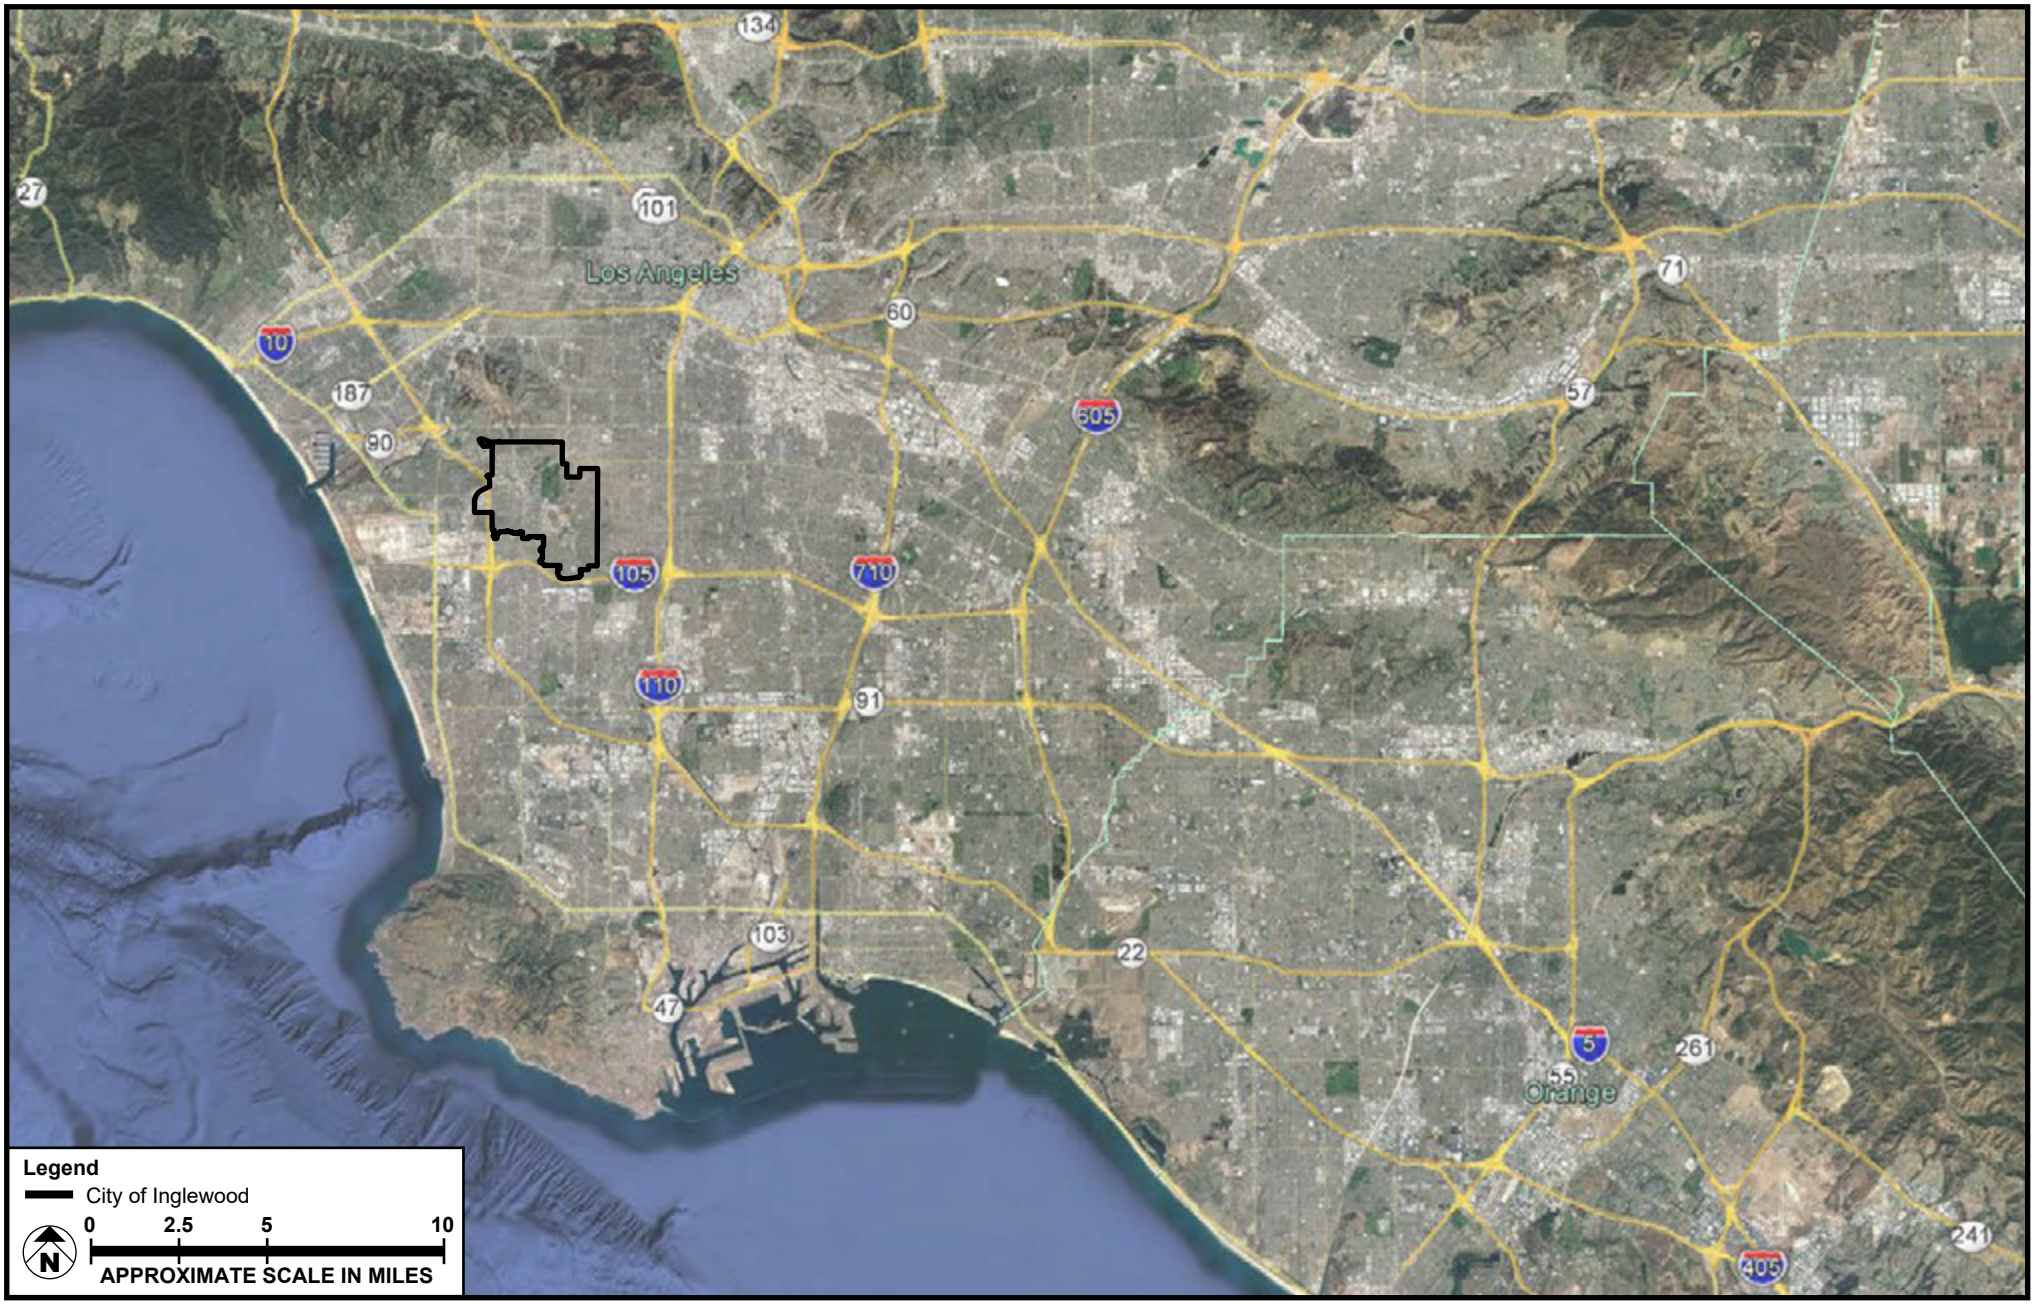
1.0 INTRODUCTION



The City of Inglewood is proposing development of the Inglewood Transit Connector (ITC) Project. The ITC Project is being developed to address the increase in mobility needs associated with the City's projected population and employment growth and the new sports and entertainment venues under development in the City. The City recognized that in order to provide quality and high level of service for residents, commuters, and event attendees, a transit system providing the "last mile" connection between the future Metro Crenshaw/LAX Station and the event venues is needed. The transit system would also improve economic activity along the alignment, providing opportunities for integration with transit-oriented development and other initiatives in the area.

1.1 Location

The proposed Project is located in the central and northern portions of the City, east of the San Diego Freeway (I-405) and north of the Glenn Anderson Freeway (I-105) in Los Angeles County, California, as shown in **Figure 1: Regional Location Map**.

The Project would be constructed in an area generally bound by the Metro Crenshaw/LAX Line to the north; Hardy Street to the south; the Los Angeles Sports and Entertainment District (LASED) including SoFi Stadium, and The Forum to the east; and La Brea Avenue to the west, as shown in **Figure 2: City of Inglewood Map**.

The Project extends from the Metro Crenshaw/LAX Line Downtown Inglewood station southwest to the intersection of Market Street and Regent Street, continues south on Market Street, east on Manchester Boulevard, and south on Prairie Avenue to Hardy Street, as shown in **Figure 3: Project Vicinity Map**. The elevated guideway and stations would be largely located within the public rights-of-way for the streets and sidewalk areas along Market Street, Manchester Boulevard, and Prairie Avenue with some limited encroachments on property located adjacent to the public right of way for vertical circulation features, such as stairways, elevators and escalators.

1.2 ITC Description

The ITC Project is a fully elevated, automated transit system, spanning a total length of approximately 1.6 miles (dual track lane) and connecting a total of three, center platform stations.

The proposed Project's transit technology is a form of light rail technology that can be steel-wheel/steel rail, rubber tired or magnetically levitated, supported on dual rails (that may be steel rail or concrete plinths) or straddling or suspended from a single beam/rail such as in a monorail type technology and that will operate within a dedicated trainway. Power distribution will be through a third rail instead of overhead catenary to avoid additional visual impacts due to the overhead catenary system wires and support structures. It will be fully automated (i.e., driverless) which is necessary to operate at the tight headways to meet the projected ridership needs. The vehicles are smaller than traditional heavy rail technology so as to successfully maneuver the tight curves driven by the site-specific conditions. This type of technology is often times also referred to as automated guideway transit, automated people movers or simply monorails; regardless of the terminology used, it is a form of a light rail technology. The APM trains will operate in a pinched loop mode on dual tracks along the alignment, wherein trains follow each other and switch back at the end-of-line stations to make the return journey on the other track. As planned, the trains can be operated in multiple different configurations, ranging from a one-car train to multiple-car length trains with a maximum train length of approximately 200 feet. Depending on the ridership demands, which will be time of day and event day dependent, multiple trains of up to the maximum train length can be operated at varying headways (as close as 1.5 minutes) to provide the necessary capacity.

On the north end of the alignment, the system begins with the Market St. Station located on Market St. just south of Florence Ave., serving the future Metro/LAX Crenshaw LRT Station located on Florence Ave and the historic Market St. district. The ITC Project will operate as an extension of existing transit facilities by providing a station and passenger walkway connecting the ITC Project to the Downtown Inglewood Station on the Metro Crenshaw/LAX Line. The ITC Project is necessary to close the last-mile gap between the Crenshaw/LAX line and the City's new activity centers, allowing passengers to transfer to or from the Crenshaw/LAX Line to the City's activity centers. The alignment runs southwest for approximately 0.35 miles, turning east at Manchester for another 0.5 miles until turning south on PrairieAve.

The alignment continues south on Prairie Ave. for approximately .75 miles, ending north of Hardy St. The two event-serving stations, Forum Station and Hollywood Park Station, are located along Prairie Ave.

The stations are located over the roadways to minimize impacts to existing developments and to remain within the public right of way to the extent possible; this approach minimized impacts on private

properties and the potential acquisition requirements. Where possible, the dual tracks are narrowed and designed to allow for a single column to support the structure, thus minimizing the infrastructure needs.

Trains will be maintained and stored at an off-line Maintenance and Storage Facility (MSF), which isplanned to be located at 500 E Manchester Blvd, Inglewood, CA 90301 at Manchester Blvd. and S Hillcrest Blvd. The ITC is planned to be powered by two power distribution substations (one located at the MSF site and the second located at the City's Transit Center site). The power substations are expected to receive power (through underground duct banks) from Southern California Edison (SCE) substations; these are under coordination with the SCE at the time of the writing of this report.

The alignment profile was developed assuming a minimum clearance of 16 feet 6 inches is required above all roadways. The alignment elevation is dictated by the elevation at the stations. The alignment elevation between stations is then adjusted to ensure the minimum roadway clearance is maintained.

1.3 Purpose of the Rail Safety Study

The ITC Project will be located near existing school facilities operated by the Inglewood Unified School District (IUSD). These include those schools listed in **Table 1: Existing IUSD Schools within 1,500 Feet of the ITC Guideway Alignment**.

Table 1
Existing IUSD Schools within 1,500 Feet of the ITC Guideway Alignment

School	Address	Distance from ITC (feet)	Direction from ITC
Kelso Elementary School	809 Kelso St.	25	West
Inglewood Adult School	106 E Manchester Blvd.	600	West
City Honors College Preparatory Academy	120 Regent St.	1,000	West
George W Crozier Middle School	120 Regent St.	1,000	West
Inglewood High School	231 Grevillea Ave.	1,000	West
Dolores Huerta Elementary School	4125 105th St.	1,250	Southwest
City Honors High School	155 Kelso St.	1,400	Southwest

Under Education Code Section 17251, the California Department of Education (CDE)[1] has the authority to approve the acquisition of proposed school sites. IUSD must obtain CDE site approval to receive State funds under the State's School Facilities Program, which is administered by the State Allocation Board. CDE's standards and regulations for the process are presented in the California Code of Regulations.

1 California Department of Education (CDE), *Resources for School Facilities Planning, School Selection, and Approval Guide*, https://www.cde.ca.gov/ls/fa/sf/schoolsiteguide.asp (last reviewed June 21, 2016).

Under *Education Code* Section 17251,[2] the California Department of Education (CDE) requires preparation of a rail safety study if a school site is within 1,500 feet of a railroad easement. CDE standards and regulations about this process.

CDE requires that a Rail Safety Study (RSS) be completed on all new school sites within 1,500 feet of a railroad easement prior to CDE approving a new school site.[3] Specifically, CCR Section 14010 (d) States:

> *If the proposed site is within 1,500 feet of a railroad track easement, a safety study shall be done by a competent professional trained in assessing cargo manifests, frequency, speed, and schedule of railroad traffic, grade, curves, type and condition of track need for sound or safety barriers, need for pedestrian and vehicle safeguards at railroad crossings, presence of high pressure gas lines near the tracks that could rupture in the event of a derailment, preparation of an evacuation plan. In addition to the analysis, possible and reasonable mitigation measures must be identified.*

An RSS is required by CDE as part of the process of reviewing and approving new school sites. CDE would not require an RSS to be prepared by IUSD due to the construction of the ITC Project within 1,500 feet of existing approved IUSD school sites.[4]

Typically, an RSS is required to assess cargo manifests, frequency, speed, and schedule of railroad traffic; the grade, curves, type and condition of tracks; the need for sound or safety barriers, and pedestrian and vehicle safeguards at railroad crossings; the potential for risk from a derailment and the need for evacuation plans.

While preparation of an RSS is not required for exiting school sites pursuant to CCR Section 14010 (d), the City has prepared this RSS to provide IUSD with additional information on the potential for safety impacts from operation of the proposed ITC that could affect the ongoing operation of existing schools. For analytical purposes, this RSS uses the Kelso Elementary School as the primary site as it is the nearest to the ITC alignment; potential impacts to other schools would less as they are further away from the ITC Project.

IUSD provides parents rules and information on routes best associated with their location via a Safe Routes to School Plan. Consideration in preparing the Safe Route to School Plan emphasizes the potential risks of students in all form of transit (walking, biking, driving, etc.) to get to and from schools. It further emphasizes the need for drivers, bicyclists, and motorcyclists to strictly adhere to the traffic safety rules and comply with local transportation safety requirements (crosswalks, safety signs, etc.).

3 California Code of Regulations Section 14010 (d).

4 Personal Communication, Rob Corley, Field Representative, California Department of Education School Facilities Staff, February 8, 2021.

2.0 METHODOLOGY

The quantitative probability, or annual frequency, of a derailment accident was determined for the proposed ITC Project for a distance of 1,500 feet from the ITC guideway alignment to assess the potential effects on IUSD schools.

As discussed above, CCR Section 14010 (d)[5] identifies the factors to be assessed in an RSS. CDE has not developed a methodology for preparation of an RSS. The Los Angeles Unified School District (LAUSD) has developed a comprehensive methodology for assessing the safety of rail operations consistent with CCR Section 14010 (d); this methodology has been accepted by CDE.

This analysis of potential rail safety concerns is based on the "incident analysis" method revised in 2007 as a part of the Office of Environmental Health and Safety (OEHS) *Rail Safety Study Protocol* (LAUSD *Rail Safety Protocol*).[6] The LAUSD *Rail Safety Protocol* incident analysis methodology was used for the assessment to calculate accident rates and probabilities; derailment rates and probabilities; and a hazardous materials release probability.

2.1 LAUSD Rail Safety Protocol Methodology Overview

The RSS consists of two components: (1) a rail safety assessment, and (2) a railroad derailment assessment. The first component, a rail safety assessment, involves the collection of existing information related to the similar rail and automated people mover (APM) systems, and includes information relative to the type of rail/APM train traffic, type of cargo, frequency and average speed of trains, and rail line maintenance schedules, if available. The second component, a rail derailment assessment, involves an analysis of the probability of a derailment or other rail-related incidents.

As noted in the LAUSD *Rail Safety Study Protocol*,[7] a RSS analysis is composed of three steps. The first step is to collect existing information on the rail line by conducting a field survey and contacting federal and State agencies and the railroad companies to determine rail traffic, type of cargo, train speed, and number of highway-rail crossings. The second step involves calculating the probability of an accident or derailment on the rail line within a 1,500-foot radius of the school site. Finally, the risk is evaluated using a matrix spreadsheet, site-specific parameters, and accident/derailment probabilities to determine if an

6 Los Angeles Unified School District (LAUSD), Office of Environmental Health and Safety (OEHS), *Rail Safety Study Protocol (2007).* The LAUSD methodology is used as it is the most currently methodology available and has been accepted by CDE.

7 Los Angeles Unified School District (LAUSD), Office of Environmental Health and Safety (OEHS), *Rail Safety Study Protocol (2007).*

unacceptable hazard would result to occupants of the school site. If the results show an unacceptable risk to students and staff at the school, mitigation measures are warranted.

The LAUSD *Rail Safety Study Protocol*,[8] separate probability analysis should be conducted for each individual rail line within 1500 feet of the site using accident data provided by the Federal Railroad Administration, National Transportation Safety Board, and other applicable State or local authorities. Information from the most recent 5 years of data should be used to calculate accident and derailment rates, considering the following:

- Type of track (mainline or yard)
- Class of track (X, 1 through 6)
- Number of cars in train

Accident rates for yard and main line track are determined by the FRA and are obtained from the FRA safety website (http://safetydata.fra.dot.gov/officeofsafety/).[9] Accident rates also vary among railroads. For the RSS, the main line accident rate specific to the rail operator is generally most appropriate for the analysis. If the school site is within 1,500 feet of a rail yard, then the rail yard accident rate should be included as part of the analysis.

The accident rate per train mile can be calculated by dividing the total accidents per year by the total number of train miles/year, and the percentage of accidents that result in a derailment can be determined by dividing the total derailments per year by the total accidents per year. This percentage is then multiplied by the accident rate to get the derailment rate per train mile per year.

The FRA website[10] also provides the number of accidents that occur per year on main lines. The total number of accidents on main lines divided by the total number of accidents gives the percentage of accidents that occur on the main line. This number then can be multiplied by the total accident rate per train mile to get the main line accident rate per train mile.

There are no specific standards for determining an acceptable level of risk for derailment. Instead, the probability of an accident that involves the potential for a derailment is provided to decision makers to use in considering risks for school sites.

10 Federal Railroad Administration (FRA), Office of Safety Analysis, Safety website.

2.2 ITC RSS Considerations

As noted above, the CDE regulations, which took effect in 2000, require that if a proposed school site is within 1,500 feet of a railroad track easement, an RSS shall be completed.[11] The 1,500-foot-radius area from the proposed ITC Guideway is referred to in this RSS as the "Study Area"; however, for analytical purposes, this RSS uses the Kelso Elementary School as the primary site as it is the nearest (approximately 25 feet) to the ITC Guideway; potential impacts to other schools would be less as they are further away from the ITC Guideway.

Data from readily available sources were used to prepare this RSS. The Federal Railroad Administration (FRA) is responsible for ensuring the safety of all railroad operations in the United States under the Federal Railroad Safety Act of 1970.[12] The FRA issues and enforces a broad array of regulations related to the 1970 and other federal railroad safety acts. The FRA, along with the National Transportation Safety Board (NTSB), also investigates major train accidents; assists the railway industry in training its workforce on relevant safety laws and regulations; educates the public on the dangers associated with railroading; conducts research; and facilitates cooperative efforts between industry and government to enhance the safety of all railroad operations. The FRA also maintains crossing protection and accident data for each crossing in the Unites States. The FRA database has been reviewed for the Study Area.[13]

The RSS assesses a conservative scenario as the distance from the ITC Guideway to the eastern edge of the Kelso Elementary School is approximately 25 feet.

2.3 Railroad Safety Assessment

The portion of the ITC Guideway within 1,500 feet of the existing Kelso Elementary School extends from approximately the corner of East Spruce Street and Manchester Boulevard) to northwest corner of E. Arbor Vitae Street and Prairie Avenue to the south. The APM Guideway alignment has one turn from Manchester Boulevard to Prairie Avenue approximately 700 feet north of the school site; the remainder of the alignment within the 1,500 foot radius is straight. The total length of the APM Guideway within a 1,500 foot radius of Kelso Elementary School is approximately 3,850 feet.

The proposed APM system will have 3 stations along its 1.6-mile length. All stations would have three levels (platform level for passenger loading and unloading, mezzanine level, and street level) be elevated above existing streets. The Prairie/Pincay Station to be located at Prairie Avenue and Kelso Street adjacent

11 California Code of Regulations, sec. 14010(d).
12 Code of Federal Regulations, Federal Railroad Safety Act of 1970, 49 USC sec. 20101–20144; 21301–21304.
13 Federal Railroad Administration (FRA), Office of Safety Analysis, http://safetydata.fra.dot.gov/OfficeofSafety/default.aspx. Accessed November 2017.

to the school campus. The Prairie/Pincay Station would be approximately 90 feet tall as measured from existing grade to the top of canopy. It would be approximately 75 feet wide and have a platform of approximately 250 feet in length.

The ITC APM is a passenger train and can run up to 55 mph; therefore, it would be considered a Class 3 train by the FRA.[14] FRA categorizes all track in six classes, segregated by maximum speed limits. They are:

- **Class 1:** 10 mph for freight, 15 mph for passenger. Much yard, branch line, short line, and industrial spur trackage falls into category.
- **Class 2:** 25 mph for freight, 30 mph for passenger. Branch lines, secondary main lines, many regional railroads, and some tourist operations frequently fall into this class.
- **Class 3**: 40 mph for freight, 60 mph for passenger. This commonly includes regional railroads and Class 1 secondary main lines.
- **Class 4**: 60 mph for freight, 80 mph for passenger. This is the dominant class for main-line track used in passenger and long-haul freight service.
- **Class 5:** 80 mph for freight, 90 mph for passenger. This is the standard for most high-speed track in the U.S.
- **Class 6**: 110 mph for freight, 110 mph for passenger.

2.4 Railroad Derailment Assessment

The quantitative probability (annual frequency) of a derailment accident was determined for the APM trains using this portion of the ITC Guideway within 1,500 feet of the Kelso Elementary School. This determination is based on the likelihood of derailment, based on a comparison of the ITC APM train travel characteristics with the characteristics of similar systems in the FRA railroad accident statistics.

Table 2
Summary of Specific Project Information and Data

Information	Summary
Proposed configuration of roadways and APM guideway proximate to the Kelso Elementary School site	The ITC trends in a north–south direction and is located east of the school site. The APM guideway runs adjacent and parallel to Prairie Avenue and intersects with Kelso Street east of the school.
Distance to site	The proposed ITC Guideway is approximately 25 feet east of the Kelso Elementary School site.
Proximity to any switching yards and/or rail spurs	The APM will include a maintenance facility (MSF) located to the north of the Kelso Elementary School at 500 E. Manchester Boulevard; approximately 1,250 feet to the

14 Title 49 - Transportation. Subtitle B - Other Regulations Relating to Transportation (Continued). Chapter II – Federal Railroad Administration, Pt. 213PART 213—Track Safety Standards, § 213.9 - Classes of track: operating speed limits.

Information	Summary
	northwest. This facility will have switches allowing for APM trains to leave the guideway and access the MSF.
Existing track conditions including but not limited to single or double track, elevation, curvature, line type, track conditions, signage, and existing warning systems	The are no existing track in the area.
Relationship of proposed ITC APM tracks to the Kelso Elementary School site and attendance area	The proposed ITC Guideway runs in a north–south direction and is approximately 25 feet east of Kelso Elementary school. Virtually all students and faculty will access the school site via Kelso Street just west of Prairie Avenue. This is west of the ITC Project and will be separated from the APM Guideway as the guideway is elevated above Prairie Avenue. The guideway would be located on both sides of the Prairie Avenue right=of-way (ROW) with the southbound rail nearest the Kelso Elementary School and the northbound rail located on the eastern side of Prairie Avenue. The bottom of the guideway would be approximately 40 feet above grade with the top of the guideway approximately 50 feet above grade at Kelso Street.
Information relative to operation of the rail line: Current rail operations	APM trains will transport passengers between the various stations on the ITC. The ITC will be a “pinched loop” system, whereby trains operate back and forth from the Market St. Station to the Hollywood Park Station, stopping at each station along the way and reversing at “turnbacks” at each end of the system. Trains will crossover to the adjacent guideway prior to entering the Market St. Station and reverse direction when leaving the station. At the Hollywood Park Station endof the line, trains will also crossover prior to entering the station and reverse direction when leaving the station. The system is planned to operate from 6am to 12am for normal weekday/weekend service, with the possibility to add trains and extend hours, as needed, to serve special events. Generally, additional service will be provided before the start of an event to bring passengers to the venue, and again at the end of the event to bring passengers back to the LA Metro system.
Type of rail traffic (passenger, freight, both)	Automated people mover: passengers.
Frequency of APM trains	The estimated round trip time for the pinched loop is 12.5 minutes (750 seconds).
Speed of trains	Maximum potential vehicle speed of up to 50 mph but operating at a maximum of 45 mph forpassenger comfort
Type of cargo (hazardous and/or nonhazardous)	None.

2.5 APM Noise Environment

The APM trains would be either a rubber-tire, steel-wheel system, or a monorail system. The technical requirements for large, automated monorail, rubber-tire APM train, and automated steel-wheel/steel-rail, also known as automated light rail transit (ALRT) were reviewed against the public rights of-way and property availability to determine the technologies best applicable for the proposed Project. While rubber tired APM trains, including monorail systems, can meet the defined physical requirements for the Project, steel wheel/steel rail technologies may also be viable provided this technology can comply with the defined requirements for the Project, including the ability to fit within the defined physical space available for the Project and maximum limits on noise. A steel wheel/steel rail may be applied to the project provided it can be demonstrated that the noise that would be generated by this system would be within the maximum limits defined for rubber tired APM Systems in the ASCE APM Standards Section 2.2.1, Exterior Airborne Noise, ASCE 21-05.[15] Accordingly if steel wheel/steel rail technologies are applied the Project the noise levels generated would not be greater than the noise levels from a rubber tire system and no additional analysis for noise that would be generated by a steel wheel/steel rail system is required.

The estimated fleet size considers the operating fleet, which is the number of vehicles required to provide the necessary line capacity to meet the projected demand, as well as the spare fleet, comprised of the hot standby and maintenance trains to ensure that the number of trains required for operations is always available.[16] Rubber-tire APM train are typically used at airports around the world as well as urban areas. Typical characteristics of such APM trains include speeds of up to 50 miles per hour and vehicle dimensions of approximately 40 to 42 feet long and approximately 9 feet wide.[17] Monorail technologies are typically used in urban environments. Typical characteristics of monorails include train speeds of up to 50 miles per hour and vehicle dimensions of approximately 55 to 65 feet long by approximately 9.5 feet to 10.3 feet wide.[18]

Noise from APM trains is generated primarily from electric control systems and traction (electric) motors, gear systems, wind shear, and contact between wheels and the rails.

15 American Society of Civil Engineers, Automated People Mover Standards – Part 2 Section 2.2.1, Exterior Airborne Noise, ASCE 21-05.

16 Lea+Elliott, Inc. *Inglewood Transit Connector EIR Operating Systems Conceptual Planning EIR Project Definition DRAFT - December 2020*. "Section 5.4, Fleet Size and Line Capacity Analysis."

17 Lea+Elliott, Inc. *Inglewood Transit Connector EIR Operating Systems Conceptual Planning EIR Project Definition DRAFT - December 2020.*

18 Lea+Elliott, Inc. *Inglewood Transit Connector EIR Operating Systems Conceptual Planning EIR Project Definition DRAFT - December 2020.*

The Automated People Mover Standards Committee of the Standards Council of the Transportation and Development Institute of ASCE[19] has developed the Automated People Mover Standards, ANSI/ASCE/T&DI 21-13,[20] which establishes the minimum requirements necessary to achieve an acceptable level of safety and performance for an APM train. An APM train is defined as a guided light-rail transit train mode that is fully automated, featuring vehicles that operate on guideways with exclusive right-of-way. The ASCE Standard covers design, construction, operation, and maintenance of APM trains. Top APM train speed of 50 mph is achievable, but the actual operational speed will be limited to a maximum of 45 mph for passenger comfort and will be further governed by the speed restrictions imposed by the City as a condition of operation. Conservatively, this analysis assumes a maximum top speed of 50 miles per hour and travel speeds of 45 miles per hour for the rubber tire APM trains and monorails.

The exterior noise level generated by the APM train, with all contributing noise sources in operation, would not exceed the levels specified in Exterior Airborne Noise, ASCE 21-05.[21] The design of any barrier-type noise reducing devices along the guideway would be subject to the limits noted in **Table 3: Exterior APM Train Noise Limits**.

Rail noise is modeled according to the industry standard rail noise prediction methodologies adopted by the Federal Railroad Administration (FRA).[22] The FRA noise prediction model calculates an A-weighted noise level at a receiver location through direct propagation or by taking into account shielding provided by barriers.

Daytime noise level increases from the rubber-tired APM trains would range from 0.1 dBA Leq (Lday) at various sites to a high of 0.2 dBA Leq (Lday). As such, operational noise levels would not result in increases of 3 dBA to or within the “normally unacceptable” or “clearly unacceptable” compatibility category for land uses or result in an increase of 10 dBA or greater when noise levels remain within acceptable limits.

3.0 RAILROAD SAFETY ASSESSMENT

3.1 Railroad Derailment Assessment

Derailment probability is defined as the annual probability of experiencing a train accident that causes a derailment. Derailment affecting one or more cars occurs in about 75 percent of accidents. It should be noted though that most reported train derailments are not major events, and typically result in wheel detachment and derailment of a single car. The percentage of derailments can vary based on railroad conditions.

FRA accident/incident statistics from 1990 to 2018 were reviewed to identify previous APM accident history.[23] Data are presented in **Appendix A: Transit Safety Data by Mode for All Reported Accidents 1990 to 2018**, include that provided only for transit systems that furnished safety data for inclusion in the U.S. Department of Transportation, Federal Transit Administration Transit Safety and Security Statistics and Analysis annual reports. These statistics relate failure frequency to other characteristics, such as track structural conditions, human factors, mechanical and electrical failure, signal and communication, and miscellaneous factors.

During the 1990 to 2018 period, at total of 1,760 accidents were reported for rail lines that were classified as automated guideways; this includes over 66 million miles of travel on a fixed guideway system for a rate of 2.65E-05 accidents per mile.[24] For the most recent 10-year period (2009 to 2018) of data, the total number of reported accidents was 303 over a total distance travel of 40 million miles or a rate of 7.60E-06 accidents per mile.[25] As shown, with more recent technology and design, the rate has dropped by of 349 percent. The total number of injuries from accidents reports on fixed guideways for the period from 2009 to 2018 was 21 with a total of 4 fatalities.

The quantitative probability (annual frequency) of a derailment accident is determined for the ITC Project for a distance of 1,500 feet from the Kelso Elementary School site; the determination is based on the protocol developed by the LAUSD.[26] The Incident Analysis method is used to calculate accident rates and probabilities, derailment rates and probabilities, and a hazardous materials release probability.

23 U.S. Department of Transportation, Bureau of Transportation Statistics, Table 2-33: Transit Safety Data by Mode for All Reported Accidents. https://www.bts.gov/content/transit-safety-data-modes-all-reported-accidents

24 Rates are based on total incidents including Accidents and were calculated by dividing the number of Fatalities, Injuries, and Accidents in this table by the number of Vehicle-miles.

25 Rates are based on total incidents including Accidents and were calculated by dividing the number of Fatalities, Injuries, and Accidents in this table by the number of Vehicle-miles.

26 LAUSD, OEHS, *Rail Safety Study Protocol,* "Incident Analysis" (2007), 4–10. The LAUSD methodology is used as it is the most currently methodology available and has been accepted by CDE.

The ITC Project would operate APM trains on a regular schedule form AM to 12 PM (midnight daily). Typically, the number of trains would be approximately 10 t 20 per hour, depending on ridership needs. During special events (such as NFL games at SoFi Stadium), the number of trains could increase to 30 per hours; under such events, train would operate for 5 Pm to 12 PM on weekdays or during the day on weekends to accommodate riders attending such events. These event would be outside school hours (7 AM to 4 PM weekdays; therefore, the incident analysis used a peak of 20 trains per hour.

Input data for the assessment was determined from publicly available information (including local, federal, and State railroad statistics). This RSS provides a brief summary of the data obtained and the likelihood of a future derailment for the proposed ITC Guideway near Kelso Elementary School. Since the APM trains will operate above grade within a confined concrete elevated guideway, there is a little or no chance of potential impact on traffic or pedestrians from APM train activity because 1) trains will be operating at very low speeds as they approach and leave the station near Kelso, 2) there will be parapet walls that will contain any derailment however negligible the probability, and 3) the APM Systems have control systems that are constantly detecting the train operations and are typically equipped to emergency "stop" all operations should it detect an anomaly within the operations.

Using the LAUSD *Rail Safety Protocol*, the annual probability of an accident/incident for proposed ITC APM was determined to be negligible (0.00E+0.0 as shown in **Appendix B: ITC RSS Probability Analysis**) accidents/train-mile.

The LAUSD *Rail Safety Protocol*[27] discusses the data sources, methodology, and computations used for the railroad derailment assessment. As of 2016, passenger train accident rates at the national (1.32×10^{-6}) and County (1.62×10^{-6}) levels are similar. National (43.8 percent) and State (42.9 percent) statistics were similar with regard to the percentage of passenger train accidents that result in derailment.[28]

There is no specific methodology for APM trains using fixed guideway, therefore the LAUSD *Rail Safety Protocol* main line accident rate specific to the rail operator has been used for the analysis. In the case of the ITC APM trains, the estimated probability of an accident is considered to be 1.44E-04 accidents per train mile in one direction or 2.88E-04 in both directions (see **Appendix B)**.

The probabilities of a train accident and a train derailment are computed considering the single main line track. The annual probability of the occurrence of a passenger train derailment within the Study Area

27 LAUSD, OEHS, *Rail Safety Study Protocol,* "Incident Analysis" (2007), 4–10 (attached as Appendix C). The LAUSD methodology is used as it is the most currently methodology available and has been accepted by CDE.

28 FRA, Office of Safety Analysis, "Freight/Passenger Operations Ten Year Overview." Accessed November 2017

during hours of school occupancy (7 AM to 4 PM)is considered to be negligible (0.00E+0.0) (see **Appendix B)**.

Additionally, the probability of a derailment impacting Kelso Elementary School are extremely low due (0.00E+0.0 see **Appendix B**) to the nature of the ITC Project facilities (e.g., Class 3 track and a fixed guideway system), train frequency, number of cars per train, and allowable train speeds. The likelihood for encroachment of APM railcar or debris onto the site directly from a derailment event is considered negligible.

3.2 Potential Hazardous Materials Release

Because the APM is a passenger train that does not transport cargo, it is unlikely that operation of the system would result in the release of hazardous materials. Nonetheless, a generalized analysis of release impact potential was completed. A hazardous materials (hazmat) release could involve liquids, flammable liquids and gases, or toxic gases.

A number of factors suggest that a hazmat release along the proposed ITC Project to the nearby school campuses would be very unlikely. These include:

- Presence of intervening concrete guideway and ITC structures (station platforms and structures) that would prevent liquids from approaching a school site.
- The stations would include use of materials typical to an industrial/commercial setting such as cleaning solutions, solvents, pesticides for landscaping, and painting supplies. Compliance with federal, State, and local laws and regulations relating to transport, storage, disposal, and sale of hazardous materials would minimize any potential for accidental release or upset of hazardous materials during station operation. The proposed Project would comply with planning and emergency response regulations pertaining to the presence of such materials during operation.
- The operation of the MSF would be subject to the requirements of programs administered by the Los Angeles County Fire Department's HHMD for storage of all hazardous materials on site, including the diesel fuel, would be required to adhere to a facility-specific HMBP.
- The Maintenance and Storage Facility (MSF) would require the use of equipment, tools, and materials for maintenance activities; these may also require the use of various materials and substances that could be considered hazardous. The MSF would use and store bulk quantities of hazardous materials—such as fuel, solvents, oil, transmission fluid, paints and other chemicals—that would have the potential to be released into the environment if not properly handled and stored. The proposed Project would comply with existing regulations governing the storage and handling of such chemicals, and applicable regulations to responding to accidental release of such chemicals.

- Traction Power Substations (TPSS) would be located at the MSF site and at the southeast corner of Arbor Vitae and Prairie Avenue that would each house transformers, DC rectifiers, primary and secondary switchgear, auxiliary power and other propulsion related equipment, and backup diesel generators required to provide power to the APM train propulsion and operation of the MSF and stations. The use of common hazardous materials would occur as part of the operation of the proposed Project, primarily associated with maintenance activities as well as storage of diesel for the backup generators. If released, diesel stored for the backup generators could cause adverse effects to the public and the environment. Pursuant to the provisions of programs administered by the Los Angeles County Fire Department's HHMD, storage of all hazardous materials on site, including the diesel fuel, would be required to adhere to the facility-specific HMBPs.

Based on these mitigating factors, the probability that a hazardous material release to impact the Kelso Elementary School is negligible (0.00E+0.0; see **Appendix B**).

4.0 SUMMARY

Because the proposed ITC Project includes an APM train system that will operate within an enclosed concrete guideway, school facilities, including Kelso Elementary School and other IUSD campuses within 1,500 feet of the ITC Project, are unlikely to be impacted by a derailment event.

4.1 Findings

The findings of this RSS are as follows:

- The Study Area includes the entire ITC Project (1.6 mile) alignment which is proposed to include an APM dual lane train system. The ITC project is within 1,500 feet of several IUSD schools and located approximately 25 feet east of the Kelso Elementary School (the closest point to the proposed APM track centerline).
- The ITC Project will include only passenger trains (APM trains powered by an electrified system) making trips during normal school hours (Monday through Friday, 7:00 AM to 4:00 PM) running approximately every 5 minutes (10 trains per hour each direction or 20 trains per hour total), and as often as 2 minutes (for special events that would normally not occur during school hours). The proposed APM will run in the evening and weekends during non-school hours.
- The ITC APM trains will run on elevated guideway which eliminate conflicts with pedestrian or other vehicular traffic that could affect students traveling to and from schools.
- The frequency of APM trains and speed (maximum up to 50 mph) are considered Class 3 by the FRA and are similar compared to other transit lines operated by Metro in the region. However, entering and exiting stations the average speed will be approximately 25 mph.
- The probability of an accident for each train mile in one direction is 1.44E-04 or 2.88E-04 in both directions, which is extremely low.
- The ITC APM trains are used strictly for transporting passengers; there will not be any other cargo.
- Calculated annual probability of a derailment for the ITC project is roughly zero (0.00E+0.0) during hours of school occupancy.
- The annual probability of a hazardous material release, although no such materials are to be transported, is negligible (0.00E+0.0).
- Daytime noise level increases from the rubber-tired APM trains would range from 0.1 dBA Leq (Lday) at various sites to a high of 0.2 dBA Leq (Lday). As such, operational noise levels would not result in increases of 3 dBA to or within the “normally unacceptable” or “clearly unacceptable” compatibility category for land uses or result in an increase of 10 dBA or greater when noise levels remain within acceptable limits. Therefore, noise from APM trains is not anticipated to negatively impact students or staff.

4.2 Conclusions

The following conclusions are made:

- Railroad accident statistics demonstrate that the operation of trains near a school or any other location poses intrinsic risks that can be managed but not fully eliminated. The potential for accidents on the APM system that could affect IUSD schools is considered low; the probability of an accident is approximately 1.44E-04 each direction or 2.88E-04 in both directions for the ITC Project.
- The probability exists that students or parents with students would use the ITC project as a mode of transportation to and from campuses within the IUSD. Therefore, traffic and pedestrian safety are issues to be addressed in the final design of the stations and other components of the APM system.
- With no transportation of chemicals or freight cars on the ITC APM trains, there is presently no concern that APM train-related hazardous materials spills would occur near a school site.
- The likelihood of an accident with a subsequent train derailment and movement of railcars and solid debris outside the easement, is very low (0.00E+0.0). In the event that such an incident should occur, the likelihood of any debris reaching the Kelso Elementary School campus, which is greater than 25 feet away, in considered low as the guideway is enclosed on all sides with concrete sides that would contain any debris.

5.0 LIMITATIONS

As discussed, this RSS has been prepared in compliance with the incident analysis portion of the LAUSD *Rail Safety Protocol*, using the incident analysis methodology.[29] Noted modifications to the incident analysis methodology by Meridian Consultants LLC as part of this analysis were made based on a review of the LAUSD *Rail Safety Protocol*.

Distance and length measurements cited in this report are estimates made from available maps and aerial photographs (e.g., USGS, Google Earth, and Meridian Consultants LLC measurements). Although some accident risk may always remain, a lower probability of future problems should result if more conservative criteria for (1) track upgrade and maintenance, and (2) APM operations procedures (e.g., speed and protective barriers).

Meridian Consultants makes no warranties expressed or implied as a result of this RSS analysis.

KEY: P = preliminary.

[a] *Accident* statistics for cable car, inclined plane, jitney, and ferry boat are not available. The number of incidents, *Fatalities*, and *Injuries* for these modes appear in the footnotes for table 2-34.

[b] *Accidents* includes collisions with vehicles, objects, people (except suicides), and derailments/vehicles going off road.

[c] *Motor bus* also includes trolley bus.

[d] In 2002 the drop in the number of *Accidents* and *Injuries* is due largely to a change in definitions by the Federal Transit Administration, particularly the definition of *Injuries*. Only *Injuries* requiring immediate medical treatment away from the scene now qualify as reportable. Previously, any *Injury* was reportable. *Commuter rail* data are now derived from the Federal Railroad Administration's Rail Accident Incident Reporting System (RAIRS).

[e] Rates are based on total incidents including *Accidents* and were calculated by dividing the number of *Fatalities*, *Injuries*, and *Accidents* in this table by the number of *Vehicle-miles*.

NOTES

Data are provided only for transit systems that furnished safety data for inclusion in the U.S. Department of Transportation, Federal Transit Administration *Transit Safety and Security Statistics and Analysis* annual reports. Data covers only directly operated urban transit systems. *Vehicle-miles* for all transit systems including nonurban and purchased can be found in the *Vehicle-miles* table in chapter 1.

Prior to the 2000 edition, *Transit Safety and Security Statistics and Analysis Report* was entitled *Safety Management Information Statistics* (SAMIS) annual report.

Analysts for the FTA believe the change in reporting requirements in 2002 may have resulted in unreliable data in that year, particularly for *Injuries* and *Accidents*. The reliability of reporting is believed to be much better in 2003 and is expected to improve in the future. Details may not add to totals due to rounding.

There were definition changes made in 2008 to simplify the injury thresholds for filing an incident report. Previously, the injury threshold for filing an incident report was two or more injuries requiring immediate medical transportation away from the scene, or one or more injuries requiring immediate medical transportation away from the scene in the case of incidents at grade crossings or along rail right-of-ways. FTA simplified this threshold to being simply one or more injuries requiring immediate medical transportation away from the scene.

ITC RSS Probability Analysis

Rail line: ITC APM
Location: Inglewood
School Site: Kelso Elemetary School

Original Data	
accidents/yr	30.32
main line (ML) accidents/yr	30.32
train miles/yr*	210,240
derailments/yr	0
track class (TC)	3
Representative # of cars	6
Length of track (mi) within 1500 feet of site	0.72
Length of track (mi) within 128 feet of site	**0.128**
Distance from track centerline to site (ft)	25
School frontage length parallel to track (ft)	425
# trains/yr**	131,400.00
# trains/yr from 8 am to 5 pm, 240 days/yr	65,700.00
% of time school is occupied	**25%**
Speed of train (mph)***	25
Shared track or two way traffic (yes/no)	no
% of trains that carry hazmat (enter 0.24 if unknown)	0.00
Max car length feet)	36

Fill in these boxes ->	Value
These boxes are automatically calculated ->	**Value**
Check to see if calculation fits site ->	**Value**

Length calculation assuming track is parallel to site boundary

Length of track (ft) within 128' of site = **675**

Track Class Adjustment

X	48.5
1	84.5
2	6.1
3	2.0
