Date: 06/30/2026 Date Received for filing at OPR:

Addendum to the 2017 Final Program Environmental Impact Report (FPEIR) for the 2017 Santa Barbara Airport Master Plan

NOD Project Description Attachment

June 30, 2026

The Proposed Project has been developed to accommodate existing and forecast passenger demands at the Airport, as identified in collaboration with the Federal Aviation Administration (FAA). The Proposed Project consists of improvements to the John T. Rickard Airline Terminal (Terminal) that would include an additional 16,500 square feet (sf) (approximately 310 sf larger than presented in the FPEIR) to the footprint of the Terminal and the redevelopment of approximately 20,400 square yards (sy) of Terminal and overflow apron (approximately 11,200 sy smaller than presented in the FPEIR). The airside pavement would not be expanded beyond existing limits.

Additionally, compared to what was presented in the FPEIR, the Proposed Project would result in one fewer passenger loading bridge and a new access roadway instead of the realignment of the Terminal loop road. The adjustment to surface parking would result in the demolition of Building 122, which was not specifically addressed in the FPEIR, but would have been necessary for the expansion of the short-term parking lot and the extension of the Terminal loop road that were analyzed in the FPEIR. A portion of Building 122 is used as a breakroom for Airport employees, and the rest is leasable space. Following demolition, the breakroom would be accommodated within the redeveloped Terminal area.

Project Description: The Santa Barbara Airport Master Plan (Master Plan) would provide guidance for airport facility improvements for the next 15-20 years. The proposed Master Plan relies on Federal Aviation Administration (FAA)-approved forecasted estimates of future aviation activity at the Santa Barbara Airport (Airport) and identifies improvement projects to support short term, intermediate term (2022) and long term (2032) levels of airport activity. The development projects are not only reflective of the level of activity forecasted to occur at the Airport, but are dependent on federal funding cycles and the availability of grant money for aviation projects. The proposed Airport Master Plan facility improvement projects include:

Airfield Recommendations: Extension of Taxiway H to the west, parallel to the main runway, restriping of existing paved areas, paving light lanes along taxiway edges, and relocating entrances and exits from the taxiway system to comply with Federal Aviation Administration (FAA) recommendations.

North Landside Recommendations: Consolidation of general aviation operations to facilitate two Fixed Base Operator (FBO) lease areas on the northeast portion of the airfield to provide tenant and visiting private aircraft services and facilities, and support facility changes including the relocation of the Airport Maintenance Yard.

Terminal Area Recommendations: Construction of a new Long Term Parking Lot south of the Terminal to accommodate 1,315 new or relocated parking spaces, expansion of the Airline Terminal, and relocation of the south-side FBO.

This is to advise that the City of Santa Barbara made decisions relative to the above-described project on August 10, 2017 and has made the following determinations regarding the above-described project:

1. The project will have a significant effect on the environment.
2. An Environmental Impact Report prepared for this project pursuant to the provisions of CEQA. The Environmental Impact Report and record of project approval may be examined at the City of Santa Barbara Community Development Department, Planning Division located at 630 Garden Street, Santa Barbara.
3. Mitigation measures have been made part of the project.
4. Statements of Overriding Considerations were adopted for this project.
5. Findings were made pursuant to the provisions of CEQA.
