EXECUTIVE SUMMARY

Arcadis U.S., Inc. (Arcadis) was retained by Regency Centers Corporation (Regency) to conduct a Phase I Environmental Site Assessment (ESA) of Town & Country Retail located at 6310-6360 W. Third Street in Los Angeles, Los Angeles County, California (the Site). The Site is an existing retail center proposed for redevelopment.

As directed by Regency, the Phase I ESA was performed in accordance with the ASTM International (ASTM) Standard E1527-13, Standard Practice for Environmental Site Assessments: *Phase I Environmental Site Assessment Process*. The goal of the Phase I ESA was to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), and historical recognized environmental conditions (HRECs) associated with the property in conformance with ASTM E1527-13.

The Phase I ESA included a visual inspection of the property completed on May 17, 2017; observation of adjacent properties; reviews of environmental regulatory agency records, historical documents, and facility records that were available on site; and interviews with personnel represented to be familiar with the Site as indicated elsewhere in the report.

The findings identified by Arcadis are summarized below and discussed in greater detail in the body of the report.

Historical Findings

The Site is located in the former Salt Lake Oil Field and north of the La Brea Tar and Fossil Pits. Two oil wells were drilled onsite circa 1906 and associated features included sumps and crude oil storage tanks. The wells were abandoned circa 1930. In the 1940s, the Site was developed with the Town & Country Market in the central portion of the Site. The Site was developed in its present-day retail configuration in the early 1960s.

The Site is located in a high potential methane zone as defined by the Los Angeles Public Works Department and is currently monitored for methane and is subject to methane ordinances established by the Los Angeles Fire Department and the Los Angeles Building Department.

Based on the Site's historical use for oil field activities, a previous consultant conducted soil testing onsite. Results of soil testing identified crude oil impacted soil in the former oil well locations and in two suspected former oil sump locations. The highest concentrations of contaminants were primarily less than 10 feet below ground surface (bgs); however, in one location contaminants were identified to greater than 20 feet bgs. Low level impacts were also encountered in drainage channel locations but did not extend beyond 3 feet bgs. No impacts were found in former suspected aboveground tank locations. The highest total petroleum hydrocarbon (TPH) concentration detected was 14,000 parts per million (ppm). Concentrations of other contaminants of concern were trace to non-detect, or in the case of metals, consistent with background concentrations. The previous consultant stated that based on the current development of the site, the lack of pathways for human exposure to the contaminated soil limited the human health risk. They also stated the TPH impacts at the Site did not present a significant risk to groundwater beneath the Site. However, they did state that the Regional Water Quality Control Board

(RWQCB) might require remedial activities were the site to be redeveloped. They estimated the cost for excavation of 6,000 cubic yards (9,000 tons) of impacted soil, transport, treatment, and import of clean soil at $324,000 (1998 dollars). They also stated that a methane monitoring and maintenance plan should be developed for the Site and that the estimated cost of annual testing was $25,000 (1998 dollars).

On-Site Findings

The approximate 7.5-acre, irregular-shaped site consists of a retail center and a paved parking lot. Tenants of note include the following:

Kmart

Kmart occupies the east shopping center building. The Kmart building is a two-story building with a basement. The basement and first floors are used for retail sales. The second story consists of retail goods storage areas, former offices, a staff lounge, restrooms, a hazardous materials storage room, and air handler rooms for the building.

Three elevators and a series of escalators provide access to the floors of the building. Two of the elevators are traction-type. A service elevator is hydraulic. An inspection of the elevator equipment rooms did not reveal evidence of spills or releases of hydraulic fluid or unusual odors. The equipment appeared to be in aged condition.

Used automotive batteries are stored in a hazardous materials room located on the second floor of the building. The batteries were observed to be stored on wooden pallets. Poly drums of hazardous materials are also stored in the room. The hazardous materials consist of damaged aerosols such as hair spray, soaps and cleaners, waxes and polishes, makeup, etc. The poly drums are labeled stating their contents. No evidence of releases or staining was observed in the hazardous materials room.

Whole Foods Market

Whole Foods Market occupies the western portion of the shopping center buildings. A refrigeration equipment room, hazardous materials center and offices are located in the rear, southern portion of the building.

The refrigeration equipment room contains approximately 16 compressors and large cooling equipment. The equipment and piping is labeled as containing R-404A refrigerant and Polyol Ester Lubricant. The equipment appeared to be aged but in good operating order. Dark staining was observed on and around the compressors but the staining appeared to be due to small releases over a long period of time and not from a malfunction release.

A hydraulic box compressor is present near the loading dock. The compressor appeared to be in good operating order and no evidence of releases or significant staining was observed on the compactor or in the surrounding area.

A hazardous materials center is located next to the box compressor. The area contained two poly 55-gallon drums and approximately seven poly bins. The containers were labeled as to their contents. The hazardous materials consist of damaged general waste. No evidence of staining or releases was observed on the containers or in the surrounding area.

A truck loading dock is located at the south side of the building. Forklift propane tanks are stored in locked steel cages on the loading dock. Additionally, four steel plates are present in the floor of the loading dock, evidence of a possible clarifier. The Site contact was unaware of a clarifier at the Site.

CVS Pharmacy

The CVS Pharmacy building occupies the western end of the retail buildings. The building is a single-story structure with a basement. The basement is used for retail goods storage.

A hydraulic box compressor is present near the loading dock at the south side of the building. The compressor appeared to be in good operating order and no evidence of releases or significant staining was observed on the compactor or in the surrounding area.

Citibank

Citibank occupies a building located on the northwest corner of the Site. Access to the interior of the bank was not granted for this assessment.

Regulatory Findings

An environmental database report prepared by Environmental Data Resources, Inc. (EDR) was reviewed for local, state, and federal listings for the Site and properties within the site vicinity. Regulatory database lists were reviewed for cases pertaining to leaking underground storage tanks (USTs) and aboveground storage tanks (ASTs), hazardous waste sites, and abandoned sites within the specified radii of standards established by ASTM guidelines. The Site address 6310 W. Third Street is listed under the name Kmart in the HAZNET database. Kmart is listed as generating hazardous waste under manifest from 1995 through 2015. There are over 60 records listed. Typical waste streams included waste oil and mixed oil, unspecified solvent mixture, off-specification, aged or surplus organics, asbestos-containing waste, alkaline solution without metals, latex waste, and acidic liquids. This listing indicates the proper offsite disposal under manifest of hazardous waste and does not in itself indicate an environmental concern for the Site. The Site address 6360 W. Third Street is listed under the name CVS Pharmacy No. 9661 in the RCRA-LQG and ECHO databases. The RCRA database provides a variety of waste codes for wastes generated at the site and indicates there were no violations. The same information is provided in the EPA's ECHO database. The remaining site addresses were not listed in any of the databases searched.

According to EDR's report, numerous properties are listed within the ASTM-search radius due to the Site's location in a dense urban area. However, based on their listing for tracking purposes only, distance from the Site, hydraulic location with respect to groundwater flow, and/or case closure, these off-site properties are unlikely to represent a concern of environmental impairment or a vapor encroachment condition to the Site. However, the following offsite property warrants discussion:

Kings Cleaners, 349 S. Fairfax Avenue, located adjacent to the west of the Site across S. Fairfax Avenue, is listed in the RCRA-SQG, ECHO, CA HAZNET, and CA Drycleaners databases. This address is currently an operating cleaner named Fair Dry Cleaners. It is listed as a generator of hazardous waste from 1995 to 2000; the waste stream is listed as halogenated solvents which includes the dry cleaning solvent perchloroethylene (PCE). No violations are reported. This facility currently uses a non-toxic dry cleaning compound according to signage on the facility. However, the historical long-term use of PCE and

the propensity for dry cleaners to release PCE to the environment represents a potential concern for the Site due to this facility's proximity to the Site. There are no agency records of a release from this facility; however, this can simply mean that no subsurface testing has been conducted. Arcadis observed two monitoring wells near this property, one north and one west of it. However, these wells are associated with a release south of the cleaners and the plume from that release is confined to the west side of S. Fairfax Avenue according to the most recent information from the RWQCB.

It is noted that the EDR database report does not identify any regional groundwater plumes underlying the Site; however, this does not rule out that groundwater beneath the Site and in the surrounding area is not impacted with contaminants of concern due to the fairly shallow depth, reported to be less than 30 feet bgs, and the long-term development of the surrounding area for oil field and commercial uses. The shallow aquifer is not considered a potable water source.

Conclusions

Arcadis has performed a Phase I ESA of the Site in conformance with the scope and limitations of ASTM Practice E1527-13 for Phase I ESAs. This assessment has revealed no evidence of RECs in connection with the Site, with the following exceptions:

- A previous subsurface investigation conducted onsite in 1998 identified soil impacted with petroleum hydrocarbons. The depth of impact was mainly confined to less than 10 feet bgs; however, one location had elevated concentrations of contaminants to greater than 20 feet bgs. The origin of the contamination is attributed to former oil field activities onsite including oil wells and oil sumps.

- The former oil wells onsite do not appear to have been abandoned to current standards and a previous consultant suspected the well in the northeast portion of the Site was leaking and contributing to high methane gas levels in that area.

- The presence of current and historical dry cleaners adjacent west of the Site represents a suspect REC for the Site. If releases of PCE from the dry cleaners impacted soil vapor and groundwater, a vapor intrusion concern may exist for the Site.

No CRECs were identified in connection with the Site, with the following exception:

- The Site's location within a defined methane zone and the detected presence of methane gas onsite represents an environmental concern for the Site and the health and safety of site occupants. However, as long as methane continues to be monitored and vented in accordance with Fire Department requirements, it is considered a CREC for the Site.

The following *de minimis* conditions were identified in connection with the Site:

- It is a possible a clarifier is present at the south end of the Site. Based on the types of current and historical tenant uses it is not anticipated that hazardous materials were routed through the clarifier. It is likely that the clarifier was used for waste cooking grease from onsite restaurants. However, evaluation of the clarifier is warranted if the Site is redeveloped.

- Aging equipment onsite, such as elevators and compressors, indicate the potential for oily releases to the subsurface.

In order to more fully understand the ownership liability of the RECs, Arcadis recommends further investigation and/or discussion with legal counsel.

1 INTRODUCTION

Arcadis U.S., Inc. (Arcadis) was retained by Regency Centers Corporation (Regency) to conduct a Phase I Environmental Site Assessment (ESA) of Town & Country Retail located at 6310-6360 W. Third Street in Los Angeles, Los Angeles County, California (the Site). The Site is an existing retail center proposed for redevelopment.

1.1 Purpose

Arcadis understands that the purpose for conducting this Phase I ESA is to assess and document the current status of environmental conditions at the Site.

1.2 Detailed Scope of Services

As directed by Regency, the Phase I ESA was conducted in accordance with the ASTM International (ASTM) E1527-13 Standard Practice for Site Assessments: Phase I Environmental Site Assessment Process. The goal of the Phase I ESA was to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), and historical recognized environmental conditions (HRECs) associated with the property in conformance with ASTM E1527-13.

A REC is defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not RECs.

A CREC is defined as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority and that subjects the property to activity and/or use limitations.

A HREC is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed in a manner accepted by the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent), without subjecting the property to any activity and use limitations.

The ASTM practice requires environmental professionals to identify data gaps following reasonable inquiry of site and Regency personnel and Arcadis' search for "reasonably ascertainable" resources. ASTM E1527-13 defines a data gap as "a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information."

Arcadis' scope of work included:

- On-site inspection of the Site to identify environmental conditions issues as defined above;
- Review of available environmental documents for the Site, including previous site assessments and investigations;
- Interviews with persons represented to be familiar with the operation and history of the Site;

- Review of property history through interviews, aerial photographs, on-line planning portals, and historical mapping (as available);
- Observation of adjacent properties and the local area to evaluate the potential for adverse environmental impact to the Site; and
- Contracting of Environmental Data Resources, Inc. (EDR) to identify sites of concern as required in the regulatory records review section of the ASTM practice for a Phase I ESA.

The Phase I ESA did not include the collection or analysis of soil, air, water, groundwater, transformer/ electrical fluids, hazardous building materials, or other samples, nor did it include a title search or search for environmental liens. This ESA did not include an assessment of the environmental (or health and safety) compliance status of the site operations.

1.3 Significant Assumptions

Arcadis has assumed that the information sources used for this assessment provided accurate information. Evaluations presented in this report are based exclusively on information provided by Regency and site personnel and observations made during the site visit. No invasive field activities were conducted and no laboratory analyses were performed.

The boundaries of the Site were described in documents provided by Regency and by interviews with Regency and site personnel. Arcadis assumed this information was accurate.

1.4 Limitations and Exceptions

The services performed and any opinions expressed by Arcadis in this report are based upon the limits of the assessment described herein. Arcadis has relied upon the accuracy of documents, information, data, and other materials provided or made available by Regency and others. Arcadis has not independently verified such information and assumes no liability for the accuracy or completeness of such information. Arcadis makes no guarantee that site conditions do not exist, or will not exist in the future, that were undetected or that could lead to liability in connection with the Site. Similarly, past and present activities on the Site indicating the potential for the existence of environmental concerns may not have been discovered by Arcadis. Such activities may include those that would indicate the potential for regulated hazardous substances at the Site. Likewise, site conditions or site activities that were outside the scope of the services described above, or changes to site conditions or regulatory requirements may lead to liabilities in connection with the Site that are not identified in this report. Arcadis has reviewed the information obtained in connection with the performance of the services described above, in keeping with existing applicable environmental consulting standards and enforcement practices, but cannot predict what actions any given agency may take or what standards and practices may apply in the future.

Where access to portions of the Site or to structures on the Site was unavailable or limited, Arcadis renders no opinion and accepts no responsibility for assessment of the condition of these portions of the Site, including specifically, but not limited to, the presence of hazardous substances or petroleum products at these locations. In addition, Arcadis renders no opinion concerning the presence or absence of hazardous substances or petroleum products where direct observation of any part of the Site, or structure on the Site, is limited by physical obstructions.

The conclusions and observations are based upon limited data and professional opinions, and the assessment is performed on a particular date. Site conditions and activities may change after that date. Therefore, the risk of undiscovered environmental impairment of the Site cannot be ruled out. Arcadis does not make any representations or warranties regarding the condition or value of the Site, regardless of the results of the assessment presented in this report.

Arcadis makes no guarantees, certifications, warranties, or representations of any kind whatsoever, whether expressed or implied, regarding this Phase I ESA, the condition of the Site, or the liabilities associated with the Site.

1.5 Special Terms and Conditions

No special terms and conditions were imposed on this Phase I ESA.

1.6 Reliance

It is understood that this report will be prepared for the sole use of Regency, and the contents thereof may not be used or relied upon by any other person without the express written consent and authorization of Arcadis. Use of this report by any other party shall be at such party's sole risk and liability.

1.7 Deviations

No deviations from the referenced ASTM Standard occurred.

1.8 Additional Services

No additional services beyond those outlined in ASTM E1527-13 were conducted as part of the assessment.

2 SITE LOCATION / LAND USE

2.1 Site Location

The irregular-shaped, approximate 7.5-acre site is located at the southeast corner of the intersection of W. Third Street and S. Fairfax Avenue in Los Angeles, California. The Site is located approximately 2.5-miles north of the 10 Freeway. The Site Location Map and Site Plan are presented as **Figures 1 and 2**.

2.2 Site and Vicinity Characteristics

The Site is a retail shopping center constructed in the 1960s. An asphalt-paved parking lot, a small locksmith shop, and stand-alone bank building cover the north end of the Site, and approximately 252,645 square feet of retail-use buildings cover the south end of the Site. An alleyway for store deliveries is present along the south boundary of the Site. The site vicinity is comprised of commercial, retail and residential uses. Photographs of the Site and surrounding areas were taken to document current conditions and are included in **Appendix A**.

2.3 Current Use of the Property

The current use of the site is a retail shopping center. The shopping center is anchored by Kmart located on the east and Whole Foods Market and CVS Pharmacy on the west. The remaining retail stores consist of Payless Shoes, Little Caesars Pizza, Image Clothing, Kmart Shoes, Wigs Today, News Stand, and Andres Restaurant. A small locksmith shop and a small tobacco shop are located in the parking lot. See **Appendix E** for a list of the current onsite tenants.

A stand-alone building occupied by Citibank is located in the northwest corner of the Site. Access to the interior of the Citibank building was not granted by Citibank for this assessment.

2.4 Description of Structures, Roads, and Other Improvements on the Site

The Site is improved with a retail shopping center constructed in the early 1960s. The retail buildings are located on the south side of the Site. The north portion of the Site is occupied by an asphalt-paved parking lot, a bank building, and a small locksmith shop.

Kmart occupies the east portion of the retail buildings. The Kmart building is a two-story building with a basement. The basement and first floors are used for retail sales. The second story contains retail goods storage areas, former offices, a staff lounge, restrooms, a hazardous materials storage room, and air handler rooms for the building.

Single-story retail stores and a restaurant occupy the central portion of the shopping center buildings.

Whole Foods Market and CVS Pharmacy occupy the western portion of the shopping center buildings. These buildings are of single-story construction; however, the CVS Pharmacy building contains a below-grade basement for retail goods storage.

The buildings are of wood, steel, and concrete construction, with some brick support walls. Interior building materials consist of ceramic floor tiles, wood laminate flooring, vinyl floor tiles, carpeting, drywall, plaster, suspended ceiling tiles, and glue-on ceiling tiles. The building materials were observed to be in conditions varying from good to significantly damaged. Most of the building materials are in aged condition. Suspect asbestos-containing materials (ACMs) were observed in the Kmart building and include 12”x12” and 9”x9” vinyl floor tiles, black mastic, carpet mastic, pipe insulation, and glue-on ceiling tiles. There were some identifying labels on the doors indicating a prior ACM inspection. Other onsite buildings may also contain ACMs.

A small access alley provides delivery access to the buildings and is located along the southern boundary of the Site. Customer access to the Site is via Fairfax Avenue to the west, West 3rd Street to the north, and Ogden Drive to the east.

2.5 Current Uses of the Adjoining Properties

Land uses surrounding the Site predominately consist of commercial and residential properties. The adjoining properties and land uses include:

- North: W. Third Street followed by the Los Angeles Farmers Market.
- East: S. Ogden Drive followed by a Ross retail store
- South: Hancock Park elementary school.
- West: S. Fairfax Avenue followed by commercial uses including a dry cleaner.

Based on visual observations, current activities at the adjacent properties do not appear to be of environmental concern to the Site.

3 USER-PROVIDED INFORMATION

Arcadis was not provided with an ASTM User Questionnaire.

3.1 Environmental Liens

Arcadis' review of regulatory records did not identify environmental liens recorded for the Site.

3.2 Activity and Use Limitations

Arcadis' review of regulatory records did not identify activity and use limitations, such as engineering controls, land use restrictions or institutional controls, that are in place at the Site and/or have been filed or recorded in a registry.

3.3 Specialized Knowledge

Regency does not have specialized knowledge or experience related to the property other than as provided in a prior report (see Section 4.1).

3.4 Valuation Reduction for Environmental Issues

Regency did not comment on whether the purchase price reasonably reflects the fair market value of the property.

3.5 Commonly Known or Reasonably Ascertainable Information

Regency does not have commonly known or reasonably ascertainable information other than as provided in a prior report.

3.6 Obvious Contamination Presence or Likely Presence

Regency stated that the Site is monitored for methane gas due to its location within a defined methane zone.

3.7 Owner, Property Manager, and Occupant Information

The Site is owned by Third & Fairfax, LLC and managed by The ARBA Group. According to a prior report, the Site is identified as Assessor's Parcel Numbers 5509-018-003, -004, -005, -009, -010, -012, and -013. Site occupants were identified in Section 2.3.

3.8 Reason for Performing Phase I ESA

The reason for performing the Phase I ESA was to evaluate current environmental conditions at the Site.

4 SITE HISTORY

Historical information obtained by Arcadis from EDR during this Phase I ESA is summarized in **Table 1**.

Table 1 Historical Information Reviewed

Source	Date	Information Obtained
Sanborn® Fire Insurance Maps (copies provided in **Appendix B**)	1950, 1969	The 1950 map depicts the Site improved with the Town & Country Market, identified as "numerous stores and booths." The stores and booths are all clustered in the center of the Site. Along the southeast property line there are two small storage structures, a service yard and an incinerator. To the north is the farmers market and to the northwest of the stalls there is a small structure labelled gas & oil. The northwest corner of the intersection of W. Third Street and S. Fairfax Avenue, diagonal to the Site, is also identified as "gas & oils." Commercial buildings are depicted to the west, Hancock Park School to the south, and undeveloped land to the east. The 1969 map depicts the Site in its current configuration with buildings in the southern half of the site, a parking lot in the northern half, and a small structure in the northwest corner. The surrounding area is fairly similar to the 1950 map; however, a grocery warehouse is now depicted east of the Site across Ogden Drive. No obvious concerns to the Site were depicted on the maps reviewed.
Topographic Maps (copies provided in **Appendix B**)	1894, 1896, 1898, 1900, 1902, 1920, 1921, 1924, 1926, 1950/53, 1966, 1972, 1981, 1991/94, and 2012	The 1894 through 1902 maps depict the Site as undeveloped land south of the present-day W. Third Street and in between the branches of two blue-line streams. The surrounding area is depicted as mostly undeveloped land other than several roads and scattered residences. The 1920 and 1921 maps depict the Site at the southeast corner of the present-day W. Third Street and S. Fairfax Avenue. What appears to be a small road is present in the northwest corner of the Site. The Site is located within the Salt Lake Oil Fields and oil wells are shown onsite and in the surrounding area. On the 1924 and 1926 maps, the small road onsite is no longer shown; however, oil wells are still depicted onsite. The surrounding oil field is now identified as the La Brea Oil Field. The area outside of the oil field is depicted with city streets. Fossil pits are identified southeast of the Site north of Wilshire Boulevard. The 1950/53 map shows what the Sanborn map from the same time period described as the Town & Country Market in the center of the Site. A school is shown south of the Site and what is likely the Farmers Market north of the Site. The majority of the surrounding area is shaded red indicating a developed urban area. The 1966 through 1991/94 maps depict the Site in its current configuration. The surrounding area is a well-developed urban area. The 2012 map does not depict features onsite or in the surrounding area. No features were depicted on or off the Site on the maps reviewed that would indicate an environmental concern for the Site except for historic oil field uses, which are discussed later in this report.

Source	Date	Information Obtained
Aerial Photographs (copies provided in **Appendix B**)	1923, 1928, 1938, 1948, 1952, 1964, 1972, 1977, 1983, 1989, 1990, 1994, 2002, 2005, 2009, 2010, and 2012. Also Google Earth 2016.	In the 1923 photograph, the Site is covered with oil field related features including access roads, small structures, storage tanks, and possible oil wells (unclear due to the scale of the photograph). The surrounding area is an oil field with many oil field related features. In the 1928 photograph, the site and a portion of the surrounding area remain an oil field; however, residential neighborhoods are now visible in the surrounding area as well. In the 1938 photograph, oil field related activities onsite and in the surrounding area appear to have ceased or to have been significantly reduced in scope. There does appear to be at least one storage tank onsite in the northeast corner and a possible sump in the southwest corner. More urban development is visible in the surrounding area. The 1948 and 1952 photograph show the center of the Site developed with the Town & Country Market. The market is surrounded by a paved parking area. North of the Site is the L.A. farmers market, northeast is a drive-in movie theatre, east is undeveloped land, south is a school, and west is commercial and residential. The 1964 through the 2012 photographs show the Site developed in its general present-day configuration. The surrounding area also remains pretty stable over this time period. Land to the east is first developed with a commercial use on the 1964 photograph, and the drive-in movie theatre is gone by 2002 and has been replaced with commercial buildings. The 2016 aerial image shows the Site and surrounding area in their present-day configurations. No features were depicted on or off the Site on the photographs reviewed that would indicate an environmental concern for the Site except for historical oil field uses which are discussed later in this report.
City Directory Abstract (copy provided in **Appendix B**)	1920 - 2014	The EDR City Directory Abstract Report covers the years from 1920 to 2014 in approximately 5-year intervals. 6310 W. Third is first listed in 1933 as a private individual's name identified as an oil worker. From 1967 to 1976 it is listed as Britts Department Store, and from 1981 to 2014 as K Mart. 6320 W. Third is listed from 1967 to 1990 as several different shoe stores. 6330 W. Third is listed from 1967 to 2006 as a jewelry, handbag and shoe store, and in 2010 as a shoe store and wireless phone store. 6340 W. Third is listed in 1967 and 1971 as a jewelry and handbag store, in 1976 to 1981 as a travel agent, in 1986 and 1990 as Leeds Imports, and in 2006 as Annas Linens. 6350 W. Third is listed as a grocery store from 1976 to 1990 and from 2006 to 2014 as Whole Foods Market. 6360 W. Third is listed as a drug store from 1967 to 2014 (CVS Pharmacy in 2014). Prior and current tenant types do no indicate an obvious concern for the Site. There were no listings for dry cleaners or gas stations in the city directory listings.

4.1 Previous Environmental Investigations

Arcadis was provided with the following environmental report for the Site:

EBI Consulting. 2004. Phase I Environmental Site Assessment Report, Town & Country Retail, 6310-6360 W. Third Street, Los Angeles, CA. August 13.

According to EBI, the Site is multi-tenant retail center consisting of three, one-, two- and three-story buildings totaling 228,390 square feet and constructed in 1961. At the time of EBI's inspection, they noted that the stand-alone bank building and the buildings occupied by Savon and Kmart had basements. No chemical storage was observed onsite other than photo processing chemicals in Savon and Kmart and typical janitorial compounds. Waste cooking grease from several restaurants was observed to be stored in exterior bins. EBI stated that the current use of the site did not represent an environmental concern for the Site. However, based on the date(s) of building construction they noted the potential for asbestos-containing materials (ACMs) to be present onsite.

EBI stated that the Site is located in the Salt Lake Oil Field and north of the La Brea Tar and Fossil Pits, which are sources of methane gas. Reportedly, accumulation of methane gas caused an explosion at the east adjacent Ross retail store in 1985. As a result of the explosion, the Los Angeles City Fire Department (LAFD) issued a methane ordinance requiring methane monitoring and mitigation measures in the "high potential methane zone" centered on the Salt Lake Oil Field. As the Site is located within this zone, a methane mitigation and monitoring system was implemented on the Site and has been in effect since 1990. EBI stated that the onsite methane gas monitoring system includes 12 street probes, seven gas vents and 10 parking lot gas vents, six wells, and three onsite gas probes. EBI stated that the site, in accordance with LAFD requirements, conducts semi-weekly methane gas monitoring and gas pressure monitoring and reporting. EBI reviewed a gas monitoring report for the Site dated June 2004 and methane gas concentrations ranged from non-detect to 88% of the lower explosive limit (LEL). The highest gas concentrations were reported to be in the eastern portion of the parking lot. EBI contacted a representative of the LAFD Environmental Unit, which has local agency oversight of methane compliance. The LAFD representative stated that the "current concentrations of methane gas reported in the semi-weekly methane monitoring reports are not a concern to the Fire Department at this time."

EBI also contacted a representative of Lofy Engineering, the firm that conducted the semi-weekly onsite methane monitoring. The representative stated that two gas venting mitigation wells were installed onsite in 1991/1992 after "mud geysers and gas buildup occurred at the subject property and in the local vicinity." In 1997, the wells were abandoned at the direction of the property management firm due to cost; however, the representative stated that the Site did not violate any local oversight agency requirements and that the Site was still in compliance with local, state and federal regulations as long as the twice-weekly monitoring and onsite monitoring alarm systems were maintained.

EBI stated that two former oil wells were located on site, one in the northwest portion of the Site and one in the northeast portion of the Site. They stated the wells were abandoned in the 1930s. EBI referenced a prior geophysical survey conducted at the Site that apparently located one well but not the second one. EBI discussed the wells with a representative of the Division of Oil, Gas & Geothermal Resources (DOGGR) who stated that a "construction site review for the reported abandoned wells by DOGGR would be required if the subject property proposed further development."

EBI was provided with prior reports for the Site including a Phase I and II report prepared by California Environmental (CE) in 1998. Based on the site's prior use for oil field related activities and its location within a methane zone, CE conducted a Phase II investigation which consisted of a geophysical survey to locate the two former onsite oil wells and advancing six soil borings to depths of 8- and 20-feet bgs. 18

soil samples were collected from the borings and analyzed for total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), semi-VOCs (SVOCs), and metals. The geophysical survey identified an anomaly in the northwest corner of the Site that was interpreted to be oil well #102. No anomalies suspected of being a well were detected in the northeast corner of the Site where oil well #99 was reported to be located. CE stated that the highest rate of methane gas venting was in the northeast portion of the Site. They stated “It is the opinion of CE that the methane gas problem in this area is at least partially due to a leaking well. If the well can be located and re-abandoned the methane problem will probably be reduced or eliminated.”

Results of soil testing identified crude oil impacted soil in the former oil well locations and in two suspected former oil sump locations. The highest concentrations of contaminants were primarily less than 10 feet below ground surface (bgs); however, in one location contaminants were identified to greater than 20 feet bgs. Low level impacts were also encountered in drainage channel locations but did not extend beyond 3 feet bgs. No impacts were found in former suspected aboveground tank locations. The highest TPH concentration detected was 14,000 parts per million (ppm). Concentrations of VOCs and SVOCs were trace to non-detect. Detections of metals were consistent with background concentrations. CE stated that based on the current development of the site, the lack of pathways for human exposure to the contaminated soil limited the human health risk. They also stated the petroleum impacts at the Site did not present a significant risk to groundwater beneath the Site. However, they did state that the Regional Water Quality Control Board (RWQCB) might require remedial activities were the site to be redeveloped. They estimated the cost for excavation of 6,000 cubic yards (9,000 tons) of impacted soil, transport, treatment, and import of clean soil at $324,000 (1998 dollars). CE also stated that a methane monitoring and maintenance plan should be developed for the Site and that the estimated cost of annual testing is $25,000 (1998 dollars).

The EBI report also reviewed an asbestos inspection report for the Whole Foods Market and an asbestos abatement report for that space.

EBI also reviewed weekly methane monitoring reports prepared by Lofy Engineering in 2004. The reports summarize probe testing of detectable levels of methane in 11 out of 12 probes at the Site. Monitoring of exterior gas vents was also performed, and the reports note that there are gas detection alarm systems in place at the Site. The reports noted that at one time, there were two onsite vent wells identified as Kerbrat #2 and Fukuda #3. The wells had been a pathway for venting the methane gas in the area and reducing ambient pressure in the soil. The wells had served as key gas relief wells, which had prevented any gas building up in the Kmart basement since their activation in 1992. The discharge water from the wells was directed to a 5,000-gallon onsite aboveground storage tank located near Kerbrat #2. During its existence, the tank had been drained to the storm sewer system seven times prior to the tank’s removal in 1997. The well venting system was discontinued and the relief wells were abandoned by the property management company in 1997 as the system was too expensive to operate. The Lofy reports also noted the continuous pumping of an offsite well (Anthony #2) between Ogden Drive and the Ross store east of the Site. The reports noted a new concrete subterranean clarifier next to this well.

Based on the information contained in the prior reports discussed in the EBI report, Arcadis concludes that the presence of TPH-impacted soil at the Site is a REC for the Site. Additionally, the presence of methane gas onsite is CREC for the Site as long as methane venting and regular monitoring are conducted. Any change in site use would likely require a re-evaluation of onsite methane mitigation.

According to EBI's review of an EDR regulatory records database report, no offsite properties with the potential to impact the Site were identified. EBI stated that no adverse environmental records were identified for the Site at local agencies contacted such as the Building Department, Fire Department, and Public Works Department.

EBI concluded their report as follows: "Although EBI recommends no further actions at this time, EBI is of the opinion that the potential exists for significant Subject Property ownership liability for costs associated with any future requirement for further actions related to the following environmental concerns: re-abandonment of the two former oil wells reportedly abandoned on the Subject Property in the 1930s; subsurface assessment and remediation of potentially contaminated surface and subsurface soils; and further actions required to address any future methane gas pressure and/or methane gas concentrations."

Arcadis concurs with EBI's conclusion with regard to future ownership liability related to historical uses of the Site and the Site's location within a defined high potential methane zone. Although EBI did not identify further action at the time, it is Arcadis' opinion that more refined cost estimates for future ownership liability could be obtained from a current subsurface site investigation. See **Appendix C** for a copy of the prior report.

5 RECORDS REVIEW

As part of this assessment, Arcadis reviewed regulatory databases and available agency files and records for the Site. Information from these sources is discussed in the following sections.

5.1 Regulatory Database Research

An environmental database report prepared by EDR was reviewed for local, state, and federal listings for properties within the site area. Included in EDR's report are regulatory databases reviewed by EDR for cases pertaining to leaking underground storage tanks (USTs) and aboveground storage tanks (ASTs), hazardous waste sites, and abandoned sites within the ASTM-specified radii **(Table 2)**. EDR also reviewed selected databases generated by the United States Environmental Protection Agency (U.S. EPA). Explanations of the regulatory agency databases reviewed are presented in EDR's report, which is included as **Appendix D**.

It should be noted that the computerized geocoding technology used in the database search is based on available census data and is only accurate to approximately ±300 feet. Also, elevations were determined from the U.S. Geological Survey Digital Elevation Model and are relative (not absolute). Sites with an elevation equal to or higher than the target property have been differentiated from sites with an elevation lower than the target property.

Sites identified within the study radii were evaluated to determine if they are likely to have adversely impacted the Site. The criteria used to evaluate the potential for adverse impact to the Site include:

- Distance from the Site;
- Expected depth and direction of groundwater and surface water flow;
- Expected storm water flow direction; and
- Presence/absence of documented contaminant releases at the identified sites not identified as remediated.

Table 2 **Regulatory Agency Databases / Lists Reviewed**

Search Radius	Agency	Database	Type of Records in Database
1 mile	U.S. EPA	NPL	Sites designated for Superfund cleanup by the U.S. EPA
	U.S. EPA	CORRACTS	RCRA facilities undergoing "corrective actions"
0.5 mile	U.S. EPA	CERCLIS	Sites under review by the U.S. EPA
	U.S. EPA	TSD	Facilities that treat, store, and/or dispose of hazardous waste
	RWQCB	LUST	Sites with LUSTs

Search Radius	Agency	Database	Type of Records in Database
	SWRCB	SWLF/SWAT	Sites permitted as solid waste landfills, incinerators, or transfer stations
	IWMB	WMUDS/SWAT	Tracking and inventory of waste management units
	U.S. EPA	CERCLIS-NFRAP	CERCLIS sites with no further remedial actions planned.
Site or Adjacent Properties	U.S. EPA	RCRA Generator	Sites that generate large or small quantities of hazardous waste
	U.S. EPA	ERNS	Sites with reported accidental releases of oil and hazardous substances
	RWQCB	UST	Sites with registered USTs

Notes:

BEP = Bond Expenditure Plan

CERCLIS = Comprehensive Environmental Response Compensation and Liability Information System

CORRACTS = Corrective Action Report

ERNS = Emergency Response Notification System

DHS = Department of Public Health

IWMB = Integrated Waste Management Board

LUST = Leaking Underground Storage Tank

NFRAP = No Further Remedial Action Planned

NPL= National Priorities List

OES = Office of Emergency Services

SWAT = Solid Waste Assessment Test

SWLF = Solid Waste Landfills

TSD = Transfer, Storage and Disposal

WMUDS = Waste Management Unit Database

5.1.1 Site

According to EDR's report, the Site address 6310 W. Third Street is listed under the name Kmart in the HAZNET database. Kmart is listed as generating hazardous waste under manifest from 1995 through 2015. There are over 60 records listed. Typical waste streams included waste oil and mixed oil, unspecified solvent mixture, off-specification, aged or surplus organics, asbestos-containing waste, alkaline solution without metals, latex waste, and acidic liquids. This listing indicates the proper offsite disposal under manifest of hazardous waste and does not in itself indicate an environmental concern for the Site.

The Site address 6360 W. Third Street is listed under the name CVS Pharmacy No. 9661 in the RCRA-LQG and ECHO databases. The RCRA database provides a variety of waste codes for wastes generated at the site and indicates there were no violations. The same information is provided in the EPA's ECHO database.

The remaining site addresses were not listed in any of the databases searched.

5.1.2 Off-Site Properties

According to EDR's report, numerous properties are listed within the ASTM-search radius due to the Site's location within a densely developed urban area. However, based on their listing for tracking purposes only, distance from the Site, type of release, groundwater flow pattern, inactivity and no active regulatory involvement, and/or successful remediation with case closure granted by the regulatory oversight agency, none of the off-site properties listed in the EDR database report are likely to represent an obvious concern of environmental impairment or a vapor encroachment condition to the Site. However, the following adjacent properties are of note:

Hancock Park Elementary School, 408 S. Fairfax Avenue, is located adjacent south of the Site. It is listed in the Envirostor, RCRA-SQG, ECHO, and UST databases. It is listed on the DTSC's Envirostor website as "inactive – needs evaluation as of 11/22/2005." The only information provided is as follows: *The site is currently a school that has been in operation since 1953. The school is within an area designated by the city of Los Angeles as "high potential methane district." An abandoned oil well is in the middle of the school. The school has methane sensors underneath some buildings with high levels of alarms at 25 % of LEL. Manual measurements taken daily. 160 PPM methane detected (max).*

The Grove at Farmer's Market, 6301 W. Third Street, is located diagonal to the Site to the northeast. It is listed in the SLIC database. According to the RWQCB's Geotracker website, the case is listed as "open - verification monitoring as of 1/21/2000." Summary information is as follows: *The Grove is a 16-acre commercial development site, has been historically related to oil production operations. Soil, soil gas, and groundwater beneath the property are impacted by petroleum hydrocarbons. No free product is present at the site. No municipal supply well is located within three miles from the site. Shallow aquifer is at 5 to 25 feet below grade. Several phases of environmental assessments including health risk assessment and remediation were conducted through 2000. Site soil gas mitigation system under residential land use including vapor barrier and venting system for indoor air exposure pathway was permitted and installed. The complete site improvements satisfied human health protection requirements. The site has been redeveloped as commercial land-use prevents additional excavation.*

Mas Auto Service, 371 S. Fairfax Avenue, was located adjacent to the west of the Site across S. Fairfax Avenue. Mas Auto Service (also known as Mas Texaco Service) is listed in the LUST, UST and Historic Auto databases. According to the RWQCB's Geotracker website, the current status is "open - remediation as of 9/16/2005." The contaminant is listed as gasoline. The most recent (1st quarter 2017) groundwater monitoring report on Geotracker depicts the plume generated from the release at this facility to flow north and to remain on the west side of S. Fairfax Avenue. Therefore, based on active characterization of this site, ongoing remediation, and oversight by the RWQCB, this release does not appear to represent a current environmental concern for the Site. In addition, the sources of the releases, which were USTs, have been removed and the property is currently a vacant lot.

Kings Cleaners, 349 S. Fairfax Avenue, is located adjacent to the west of the Site across S. Fairfax Avenue. This address is also listed as Fair Fine Dry Cleaners and Fair Cleaners and is a currently an operating cleaner named Fair Dry Cleaners. It is listed in the RCRA-SQG, ECHO, CA HAZNET, and CA Drycleaners databases. It is listed as a generator of hazardous waste from 1995 to 2000; the waste stream is listed as halogenated solvents which includes the dry cleaning solvent perchloroethylene (PCE). No violations are reported. This facility currently uses a non-toxic dry cleaning compound

according to signage on the facility. However, the historical long-term use of PCE and the propensity for dry cleaners to release PCE to the environment represents a potential concern for the Site due to this facility's proximity to the Site. There are no agency records of a release from this facility; however, this can simply mean that no subsurface testing has been conducted. Arcadis observed two monitoring wells near this property, one north and one west of it. However, these wells are associated with the Mas Auto Service release south of the cleaners and the plume from that release is confined to the west side of S. Fairfax Avenue according to the most recent information from the RWQCB.

Thrifty Tailor & Dry Cleaners, 410 S. Fairfax Avenue, was located adjacent to the southwest of the Site across S. Fairfax Avenue and is listed as an Historical Cleaner in 2005 and 2006. No other information is provided. However, taken in context with an active dry cleaner approximately 300 feet north of this former dry cleaner, the potential remains for historical releases of dry cleaning solvents to have impacted the Site.

Several other historical cleaners and auto stations are listed within a 1/8-mile radius of the Site dating back to 1924; however, without further information, they are not anticipated to represent a current environmental concern to the Site. It is also noted that the EDR database report does not identify any regional groundwater plumes underlying the Site; however, this does not rule out that groundwater beneath the Site and in the surrounding area is not impacted with contaminants of concern due to the fairly shallow depth, reported to be less than 30 feet bgs, and the long-term development of the surrounding area for oil field and commercial uses. The shallow aquifer is not considered a potable water source.

Two properties are listed in EDR's Orphan Summary; however, neither appear to represent a current environmental concern to the Site.

5.2 Agency Research

Files and records available at the agencies listed in **Table 3** were reviewed for information on the Site.

Table 3 Local Agency Files

Source	Date	Information Obtained
California Regional Water Quality Control Board (RWQCB)	May 2017	Available information maintained by the RWQCB at http://geotracker.waterboards.ca.gov was reviewed for records concerning hazardous spills, USTs, and LUSTs at the Site. There were no records for the Site addresses.
Department of Toxic Substances Control (DTSC)	May 2017	A review of the DTSC website (http://www.envirostor.dtsc.ca.gov/public/) did not identify any records for the Site addresses.
Los Angeles City Fire Department (LAFD)	May 2017	Arcadis requested records for the site addresses from the LAFD. A response is pending at this time.
Los Angeles County Department of Public Works Environmental Programs Division	May 2017	A review of the agency's website (http://ladpw.org/epd/CleanLA/OpenFileReview.aspx) did not identify any records for the Site addresses.

Source	Date	Information Obtained
Division of Oil, Gas & Geothermal Resources (DOGGR)	May 2017	According to DOGGR's Well Finder database, two oil wells were located onsite, one north of the CVS along the western site boundary near S. Fairfax Avenue (API 03715230), and one located north of the Kmart near the northeast corner of the Site (API 03715229). See below for further details on the wells. Numerous wells are depicted in the surrounding area including one on the property north of the Site and one on the property south of the Site.
Los Angeles City Department of Public Works, Bureau of Engineering	March 31, 2004	*Methane and Methane Buffer Zones Map*. According to the map, the Site is located within a Methane Zone, which then indicates it is subject to various codes such as those enforced by the LAFD and the Los Angeles Building Department. See **Appendix E** for a copy of the map.

Onsite well detail -

Well ID	Well Number	Operator	Status
API 03715230	No. 102	Chevron U.S.A., Inc.	Plugged and abandoned in 1930/31 as reported in a prior report. No records on DOGGR website to confirm.
API 03715229	No. 99	Chevron U.S.A., Inc.	Plugged and abandoned in 1930/31 as reported in a prior report. No records on DOGGR website to confirm.

6 ENVIRONMENTAL SETTING

6.1 Topography

According to information obtained from the U.S. Geological Survey 7.5-Minute Series Topographic Map of the Hollywood quadrangle, dated 2012, topography at the Site is approximately 180 feet above mean sea level. The Site and surrounding area are relatively level. The general topographic gradient of the surrounding area exhibits a slight downward slope to the southwest.

6.2 Geology

The general geology summary provided by EDR specifies that the sediments beneath the Site have been identified as part of the Quaternary Series of the Quaternary System of the Cenozoic Era. According to the United States Department of Agriculture Soil Conservation Service, the Site is underlain by the Urban Land soil component, which indicates near surface soil has been reworked to the extent that native soil characteristics are no longer identifiable.

6.3 Surface Water

Arcadis did not observe surface water features onsite or adjacent to the Site.

6.4 Hydrogeology

According to a report on Geotracker for a property located adjacent west of the Site across S. Fairfax Avenue (371 S. Fairfax Avenue), depth to groundwater ranges from approximately 14 to 31 feet bgs. The groundwater gradient is reported to be to the north/northwest.

6.5 Flood Zones

According to the EDR report, the eastern, western and northern boundaries of the Site are within a 500-year flood zone.

7 SITE RECONNAISSANCE

On May 17, 2017, Mr. Blake Hunter, a representative of Arcadis, performed a reconnaissance-level assessment of the Site to observe general site conditions and indications of the possible release(s) of chemicals to the subsurface. A walk-over site reconnaissance was conducted to identify visible evidence of RECs. Mr. Hunter was accompanied by Mr. Osmar Flores, Maintenance Supervisor with The ARBA Group, the property manager, and Mr. Bob Voakes, Building Engineer with Kmart, during the site reconnaissance. Photographs taken during the site reconnaissance are included in **Appendix A**.

7.1 Methodology and Limiting Conditions

Arcadis' representative was granted full access to the Site. The methodology for the site visit included walking and observing the entire site except for the Citibank building. There were no other limiting conditions.

7.2 General Site Conditions

7.2.1 Site Observations

The approximate 7.5-acre, irregular-shaped site consists of a retail shopping center. The retail buildings are located on the south side of the Site. The north portion of the Site is occupied by an asphalt-paved parking lot, a bank building, and a small locksmith shop.

Kmart

Kmart occupies the east shopping center building. The Kmart building is a two-story building with a basement. The basement and first floors are used for retail sales. The second story consists of retail goods storage areas, former offices, a staff lounge, restrooms, a hazardous materials storage room, and air handler rooms for the building.

Three elevators and a series of escalators provide access to the floors of the building. Two of the elevators are traction-type. A service elevator is hydraulic. An inspection of the elevator equipment rooms did not reveal evidence of spills or releases of hydraulic fluid or unusual odors. The equipment appeared to be in aged condition.

Two hydraulic box compactors are located on the first floor of the building. According to Mr. Voakes, one of the compactors is not in operating order and is not used. No evidence of releases or significant staining was observed on the compactors or in the surrounding area. Mr. Voakes was unaware of any releases from the compactors.

New automotive batteries and automotive maintenance and cleaning chemicals are stored on retail shelves in the basement of the building and in a small storage room. The containers appeared to be in new condition and no evidence of releases or staining was observed.

Used automotive batteries are stored in a hazardous materials room located on the second floor of the building. The batteries were observed to be stored on wooden pallets. Poly drums of hazardous materials

are also stored in the room. The hazardous materials consist of damaged aerosols such as hair spray, soaps and cleaners, waxes and polishes, makeup, etc. The poly drums are labeled stating their contents and are sealed. No evidence of releases or staining was observed in the hazardous materials room. According to Mr. Voakes, the hazardous materials and batteries are removed on a regular basis by regional Kmart personnel.

Whole Foods Market

Whole Foods Market occupies the western portion of the shopping center buildings. The building is single-story and of concrete, wood, and steel beam construction. Stockrooms, a refrigeration equipment room, hazardous materials center, and offices are located in the rear, southern portion of the building.

The refrigeration equipment room contains approximately 16 compressors and large cooling equipment. The equipment and piping is labeled as containing R-404A refrigerant and Polyol Ester Lubricant. The equipment appeared to be aged but in good operating order. Dark staining was observed on and around the compressors but the staining appeared to be due to small releases over a long period of time and not from a malfunction release.

A hydraulic box compressor is present near the loading dock. The compressor appeared to be in good operating order and no evidence of releases or significant staining was observed on the compactor or in the surrounding area.

A hazardous materials center is located next to the box compressor. The area contained two poly 55-gallon drums and approximately seven poly bins. The containers were labeled as to their contents. The hazardous materials consist of damaged cleaners, bleach, liquids, small batteries, make up, and aerosols. No evidence of staining or releases was observed on the containers or in the surrounding area.

A truck loading dock is located at the south side of the building. Forklift propane tanks are stored in locked steel cages on the loading dock. Additionally, four steel plates are present in the floor of the loading dock, evidence of a possible clarifier. Mr. Flores was unaware of a clarifier at the Site. Mr. Flores did state that the floor drain in the loading dock was connected to a sump pump.

CVS Pharmacy

The CVS Pharmacy building occupies the western end of the retail buildings. The building is a single-story structure with a basement. The basement is used for retail goods storage and utilizes a conveyer system to transport the goods to the first floor.

A hydraulic box compressor is present near the loading dock at the south side of the building. The compressor appeared to be in good operating order and no evidence of releases or significant staining was observed on the compactor or in the surrounding area.

Citibank

Citibank occupies the building located in the northwest corner of the Site. Access to the interior of the bank was not granted for this assessment. There is reportedly a basement in this building.

7.2.2 Hazardous Substances and Petroleum Products in Connection with Identified Uses

No hazardous substances or petroleum products were observed onsite other than as described above.

7.2.3 Storage Tanks

Arcadis did not observe ASTs at the Site. No evidence of USTs, such as dispensers, pipes, or vent lines, was observed on the Site.

7.2.4 Odors

No odors that would indicate an environmental concern were noted on the Site.

7.2.5 Pools of Liquid

No readily visible standing surface water, pools, or sumps containing liquids likely to be hazardous substances or petroleum products were identified during this assessment.

7.2.6 Drums

Poly drums containing hazardous waste are stored in the Kmart and Whole Food Market facilities. The drums contain general waste such damaged cleaners, make up, and aerosols. No other drums were observed on site.

7.2.7 Hazardous Substances and Petroleum Product Containers (Not Necessarily in Connection with Identified Uses)

No hazardous substances or petroleum products were observed onsite not in connection with identified uses.

7.2.8 Unidentified Substance Containers

No unidentified substance containers were observed onsite.

7.2.9 PCBs

No electrical or hydraulic equipment known to contain polychlorinated biphenyls (PCBs) or likely to contain PCBs was identified onsite during this assessment. An electrical transmission line with pole - mounted transformers was observed along the eastern site boundary. The transformers appeared to be in good condition and no evidence of seepage or releases was observed. The transformers are owned by the Los Angeles Department of Water & Power (DWP) and any concerns with the transformers would be the responsibility of DWP.

7.2.10 Pits, Ponds, or Lagoons

During the site visit, Arcadis' representative looked for pits, ponds, or lagoons on the Site. Arcadis' representative also looked for pits, ponds, and lagoons on adjoining properties to the extent that such features could be visually and/ or physically observed from the Site or identified in the interviews or records review. No such features were identified on or near the Site.

7.2.11 Stained Soil or Pavement

During the site visit, Arcadis' representative did not observe areas of stained soil or significantly stained pavement.

7.2.12 Stressed Vegetation

During the site visit, Arcadis' representative looked for areas of stressed vegetation (from other than insufficient water). No areas of stressed vegetation were observed during this assessment.

7.2.13 Solid Waste

During the site visit, Arcadis looked for areas that were apparently filled or graded by non-natural causes (or filled with material of unknown origin) that suggest the presence of trash construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal. No such areas were observed.

7.2.14 Wastewater

During the site visit, Arcadis looked for wastewater or other liquids (including storm water) or discharges into a drain, ditch, underground injection system, or stream on or adjacent to the Site. There is no process wastewater discharged on site.

7.2.15 Wells

During the site visit, Arcadis looked for wells, including dry wells, irrigation wells, injection wells, monitoring wells, water wells, abandoned wells, oil wells, or other wells. No wells were observed onsite. Former oil wells onsite are discussed elsewhere in this report.

7.2.16 Septic Systems

During the site visit, Arcadis looked for indications of on-site septic systems or cesspools. No septic systems or cesspools were observed. The Site is connected to the municipal sewer system.

7.2.17 Heating / Cooling

Heating and cooling systems were not evaluated for this assessment.

7.2.18 Stains or Corrosion

Arcadis did not observe areas of significant staining or corrosion during this site assessment.

7.2.19 Drains or Sumps

Floor drains were observed in the air handler and refrigeration rooms onsite. The drains appeared to direct condensation to the sewer system.

A steel-grated drain was observed in the truck loading dock of the Whole Foods Market building. According to Mr. Flores, the drain is connected to a sump pump. Mr. Flores was unaware of the further discharge of the drain.

8 INTERVIEWS

8.1 Interview with Site Contacts

Arcadis interviewed Mr. Osmar Flores, Maintenance Supervisor for The ARBA Group, the property management company. Mr. Flores was aware of the methane monitoring system onsite; however, he was unaware of the system being activated since managing the property for the past two years. Additional relevant information from Mr. Flores is included within this report.

Arcadis interviewed Mr. Bob Voakes with Kmart. Mr. Voakes stated he has been associated with the Site's Kmart facility for 35 years. Mr. Voakes was aware of the methane monitoring system onsite and stated he was unaware of the system being activated since installed after an east adjacent facility explosion. Additional relevant information from Mr. Voakes is included within this report.

9 FINDINGS AND CONCLUSIONS

Arcadis has performed a Phase I ESA in accordance with the ASTM International E1527-13 Standard Practice for Site Assessments: Phase I Environmental Site Assessment Process. Limitations or deviations from this practice are described in Section 1.4 of this report. The findings identified by Arcadis are summarized below and discussed in greater detail in the body of the report.

9.1 Recognized Environmental Conditions

No RECs were identified in connection with the Site, with the following exceptions:

- A previous subsurface investigation conducted onsite in 1998 identified soil impacted with petroleum hydrocarbons. The depth of impact was mainly confined to less than 10 feet bgs; however, one location had elevated concentrations of contaminants to greater than 20 feet bgs. The origin of the contamination is attributed to former oil field activities onsite including oil wells and oil sumps.

- The former oil wells onsite do not appear to have been abandoned to current DOGGR standards and a previous consultant suspected the well in the northeast portion of the Site was leaking and contributing to high methane gas levels in this area.

- The presence of current and historical dry cleaners adjacent west of the Site represents a suspect REC for the Site. If releases of PCE from the dry cleaners impacted soil vapor and groundwater, a vapor intrusion concern may exist for the Site.

9.2 Controlled Recognized Environmental Conditions

No CRECs were identified in connection with the Site, with the following exception:

- The Site's location within a defined methane zone and the detected presence of methane gas onsite represents an environmental concern for the Site and the health and safety of site occupants. However, as long as methane continues to be monitored and vented in accordance with Fire Department requirements, it is considered a CREC for the Site.

9.3 Historical Recognized Environmental Conditions

No HRECs were identified in connection with the Site.

9.4 *De Minimis* Conditions

The following *de minimis* conditions were identified in connection with the Site:

- It is a possible a clarifier is present at the south end of the Site. Based on the types of current and historical tenant uses it is not anticipated that hazardous materials were routed through the

clarifier. It is likely that the clarifier was used for waste cooking grease from onsite restaurants. However, evaluation of the clarifier is warranted if the Site is redeveloped.

- Aging equipment onsite, such as elevators and compressors, indicate the potential for oily releases to the subsurface.

9.5 Conclusions

Arcadis has performed a Phase I ESA of the Site in conformance with the scope and limitations of ASTM Practice E1527-13 for Phase I ESAs. This assessment has revealed no evidence of RECs in connection with the Site other than as identified in Section 9.1 above. In order to more fully understand the ownership liability of the RECs, Arcadis recommends further investigation and/or discussion with legal counsel.

No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. This evaluation was intended to reduce, but not eliminate uncertainty in RECs.

10 DATA GAPS

Previous reports prepared for the Site indicated that the Site is monitored for methane gas. However, Arcadis was not provided with current information regarding onsite methane monitoring and site contacts indicated the methane monitoring system onsite is currently inactive. The lack of information provided on the current status of onsite methane monitoring and the Site's compliance with Fire and Building Department ordinances represents a data gap for the Site. An in-depth evaluation is recommended.

No other significant data gaps were identified during this assessment. Pertinent data, if any, obtained by Regency following the issuance of this report should be reviewed by an environmental professional and an addendum should be prepared to present an evaluation of the data and any changes to the conclusions of this report, as warranted by the data.

11 ENVIRONMENTAL PROFESSIONALS STATEMENT

The environmental assessment described herein was conducted by the undersigned employee of Arcadis. Arcadis' assessment consisted solely of the activities described in the Introduction of this Report, and in accordance with the ASTM E1527-13 guidelines for Phase I Environmental Site Assessments signed prior to initiation of the assessment, as applicable.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. *

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ARCADIS U.S., Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Inquiry # 4930273.4	Contact: Janet Holtz

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by ARCADIS U.S., Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# NA

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Subject: **Phase I Environmental Site Assessment Report, Town & Country Retail**
6310-6360 West Third Street, Los Angeles, California
EBI Project #24-1775A

Dear Mr. Maher:

Attached please find our *Phase I Environmental Site Assessment Report*, (the *Report*) for the above-mentioned asset (the Subject Property). During the survey and research, our surveyor met with agents representing the Subject Property, or agents of the owner, and reviewed the Subject Property and its history. The *Report* was completed according to the terms and conditions authorized by you. This *Report* has been completed in general conformance with the ASTM Practice E 1527.

The purpose of this *Report* is to assist *Aetna Real Estate Investments* in its underwriting of a proposed mortgage loan on the Subject Property described herein.

This *Report* is addressed to *Aetna Real Estate Investments* and such other persons as may be designated by *Aetna Real Estate Investments* and their respective successors and assigns.

Reliance on the *Report* and the information contained herein shall mean (i) the *Report* may be relied upon by *Aetna Real Estate Investments*, in determining whether to make a loan evidenced by a note secured by the Subject Property ("the Mortgage Loan"); (ii) the *Report* may be relied upon by any loan purchaser in determining whether to purchase the Mortgage Loan from *Aetna Real Estate Investments*, or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan, and any rating agency rating securities representing an interest in the Mortgage Loan or backed or secured by the Mortgage Loan; (iii) the *Report* may be referred to in and included, in whole or in part, with materials offering for sale the Mortgage Loan or an interest in the Mortgage Loan or securities backed or secured by the Mortgage Loan; (iv) the *Report* speaks only as of its date in the absence of a specific written update of the *Report* signed and delivered by EBI Consulting.

There are no intended or unintended third party beneficiaries to this *Report*, except as expressly stated herein.

EBI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the *Report* or on the closing of any business transaction.

Thank you for the opportunity to prepare this *Report*, and assist you with this project. Please call us if you have any questions or if we may be of further assistance.

Respectfully Submitted,

Tiffany Grant
Author/Environmental Scientist

EXECUTIVE SUMMARY

The Subject Property, known as Town & Country Retail, was reportedly constructed in 1961, and consists of a multi tenant retail center with three one, two, and three story buildings totaling 228,390± net rentable square feet on a 7.5-acre lot. The Subject Property is located in Los Angeles, Los Angeles County, California at 6310-6360 West Third Street. Los Angeles is located in Southern California, and the Subject Property is approximately 10 miles west of downtown Los Angeles. The current tenancy is retail use.

Ms. Tiffany Grant of EBI surveyed the Subject Property on July 28, 2004. She was accompanied by and interviewed Mr. Michael Turner, the owner's representative. At the time of the survey, the weather was sunny and approximately 75° Fahrenheit. During the survey, representative tenant spaces, mechanical spaces and/or equipment components were observed. EBI was not provided with access to the bank basement, behind counters, or vault areas. A Pre-Survey Questionnaire was forwarded to the designated Subject Property contact and has been returned.

Below is the Assessment Summary presenting our recommended actions for the Subject Property. Additional detail regarding each recommended action is provided in *Section 7.0.*

ASSESSMENT SUMMARY TABLE

REPORT COMPONENT	SECTION (S)	CONCERN NOTED OR REPORTED	RECOMMENDED ACTIONS	ESTIMATED COST
Current Tenant or Property Use Concerns	3.2	✔	No Further Action Methane gas pressure and gas concentration monitoring is ongoing at the Subject Property and appears to be performed in accordance with regulatory requirements. At this time, the results of the semi-weekly gas monitoring indicate no apparent environmental concern to the Subject Property or the Public.	
ASTs/USTs	3.3		No Further Action	
Suspect Asbestos Containing Material (ACM)	3.4	✔	EBI laboratory results for asbestos are pending. Previous asbestos survey reports identified ACM at the Subject Property. Develop and implement an asbestos operations and maintenance (O&M) plan	$500.00
Radon	3.5		No Further Action	
Lead-based Paint	3.6		No Further Action	
Lead in Water	3.7		No Further Action	
Suspect PCB-containing Equipment	3.10	✔	Light ballasts potentially contain PCBs. Light ballasts should be discarded in accordance with regulatory disposal requirements.	Action Item

ASSESSMENT SUMMARY TABLE				
REPORT COMPONENT	**SECTION (S)**	**CONCERN NOTED OR REPORTED**	**RECOMMENDED ACTIONS**	**ESTIMATED COST**
Historical Use of Subject Property	4.0	✔	A previous limited subsurface soil investigation report indicated elevated concentrations of total petroleum hydrocarbons in soil. No further action was taken at that time. The potential exists for elevated concentrations, potentially hazardous concentrations, of contaminants of concern in subsurface soil at the Subject Property. EBI recommends further subsurface assessment of soil for contaminants of concern in the event of future soil excavation at the Subject Property. Two oil wells, abandoned in the 1930s, are located on the Subject Property. The abandoned wells may be a conduit for methane gas migration to the surface. The potential exists for a requirement at some time in the future to re-abandon these wells. Costs associated with oil well re-abandonment can be significant.	Action Item
Potential Off-site Sources	3.12, 5.0			
Federal, State and Local Agency Concerns	5.2, 5.3, 5.4			

1.0 PURPOSE & LIMITATIONS

The purpose of this *Phase I Environmental Site Assessment Report* (the *Report*) is to assist *Aetna Real Estate Investments* in its underwriting of a proposed mortgage loan on the Subject Property. This *Report* can be relied upon by only the parties stated in the transmittal letter at the front of this *Report*. EBI's liability to a purchaser wishing to use this *Report* is limited to the cost of the *Report*. Amendments to EBI's limitations as stated herein that may occur after issuance of the *Report* are considered to be included in this *Report*. Payment for the *Report* is made by, and EBI's contract and *Report* extends to *Aetna Real Estate Investments* only, in accordance with our *Standard Conditions For Engagement* and, *Authorization Letter* and *Agreement for Environmental Services*.

The additional purpose of this *Report* is to assess a parcel of *real estate* with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and *petroleum products*. As such, this practice is intended to permit *Aetna Real Estate Investments* to satisfy one of the requirements to qualify for the *innocent landowner defense* to CERCLA liability: that is, the practices that constitute "all appropriate inquiry into the previous ownership and uses of the Subject Property consistent with good commercial or customary practice" as defined in 42 USC § 9601(35)(B).

In defining a standard of good commercial and customary practice for conducting an *environmental site assessment* of a parcel of *property*, the goal of the processes established by this practice is to identify *recognized environmental conditions*. The term *recognized environmental conditions (RECs)* means the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *RECs*.

EBI has performed this *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E 1527. This *Report* was prepared with no exceptions or deletions from ASTM Standard E1527.

SCOPE OF WORK

This *Report* was prepared for the use of *Aetna Real Estate Investments*. This *Report* has been prepared in accordance with our *Standard Conditions For Engagement* and *Authorization Letter* and *Agreement for Environmental Services* approved and signed by *Aetna Real Estate Investments*, and with the limitations described below, all of which are integral parts of this *Report*. A copy of the signed *Standard Conditions For Engagement* and *Authorization Letter* and *Agreement for Environmental Services* is maintained at the EBI Consulting office in Burlington, Massachusetts.

The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM E1527-00; a visual site survey of areas readily observable, easily accessible or made accessible by the Subject Property contact and interviews with owners, agents, occupants, or other appropriate persons involved with the Subject Property. Municipal information was obtained through file reviews of reasonably ascertainable standard government record sources, and interviews with the authorities having jurisdiction over the Subject Property. Findings, conclusions and recommendations included in the *Report* are based on our visual observations in the field, the municipal information reasonably obtained, information provided by the Client, and/or a review of readily available and supplied drawings and documents. EBI relies completely on the information, whether written, graphic or verbal, provided by the Subject Property contact or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of these *Environmental Services*.

The observations in this *Report* are valid on the date of the investigation. Where access to portions of the Subject Property or to structures on the Subject Property was unavailable or limited, EBI renders no opinion as to the presence of petroleum products or hazardous substances in that portion of the Subject Property or structure. Inaccessible portions of the Subject Property are described below. In addition, EBI renders no opinion as to the

presence of, or indirect evidence relating to, petroleum products or hazardous substances where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

It is acknowledged that EBI judgments shall not be based on scientific or technical tests or procedures beyond the scope of the Services or beyond the time and budgetary constraints imposed by the Client. It is acknowledged further that EBI conclusions shall not rest on pure science but on such considerations as economic feasibility and available alternatives. Client also acknowledges that, because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement with respect to such Services, are not guaranteed to be a representation of actual conditions on the Subject Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI shall use that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality. The standard of care shall be determined solely at the time the Services are rendered and not according to standards utilized at a later date. The Services shall be rendered without any other warranty, expressed or implied, including, without limitation, the warranty of merchantability and the warranty of fitness for a particular purpose.

Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect or consequential damages whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause or causes whatsoever.

The ASTM Standard E1527 does not encompass analytical testing to evaluate Asbestos Containing Materials (ACM), radon, lead-based paint (LBP), drinking water quality, indoor air quality, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. EBI performed testing at the Subject Property in accordance with the *Standard Conditions For Engagement* and, *Authorization Letter* and *Agreement for Environmental Services* and the client-specific *Scope of Work*. Unless otherwise specified herein, such testing involves screening methods intended to provide a broad and approximate evaluation of conditions at readily accessible portions of the Subject Property, limited by project constraints, and should not be construed as a comprehensive program designed to comply with a specific regulatory program. If a thorough and regulatory-compliant study is warranted based on the findings of the Phase I ESA, EBI will recommend the appropriate further investigation. In certain cases, quantitative laboratory testing is performed as part of the assessment and analyses have been conducted by an outside laboratory. EBI relies upon the data provided by the outside laboratory, and has not conducted an independent evaluation of the reliability of this data.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The *Report* speaks only as of its date, in the absence of a specific written update of the *Report*, signed and delivered by EBI. Additional information that becomes available after our survey and draft submission concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified if necessary, at additional cost. This *Report* has been prepared in accordance with our Standard Conditions for Engagement, which is an integral part of this *Report.*

INACCESSIBLE OR UN-SURVEYED PORTIONS OF SUBJECT PROPERTY

EBI was not provided access to the bank building basement, vault, or behind counter areas. There were no other notable portions of the Subject Property excluded from this survey.

ABBREVIATIONS

EBI may use various abbreviations to describe various site, building or system components or legal descriptions. Not all abbreviations may be applicable to all reports. The abbreviations most often utilized are defined below.

ACM	Asbestos-containing material	HVAC	Heating, ventilating and air conditioning
AST	Aboveground storage tank	MSDS	Material Safety Data Sheet(s)
CMU	Concrete masonry unit	REC	Recognized environmental condition
EIFS	Exterior insulating finishing system	RTU	Rooftop (HVAC) unit
FOIA	Freedom of Information Act	UST	Underground storage tank
LBP	Lead-based paint	VCT	Vinyl composition tile

2.0 SUBJECT PROPERTY CHARACTERISTICS

2.1 OWNERSHIP AND LOCATION

According to the Los Angeles County Assessor's Office and Mr. Michael Turner, the Subject Property is owned by Third & Fairfax, LLC. The Subject Property is zoned commercial industrial and consists of seven parcels numbered 5509-018-003, 004, 005, 010, 012, and 013. The Subject Property is located in Los Angeles, Los Angeles County, California at 6310-6360 West Third Street. The Subject Property is adjacent to the intersection of Third and Fairfax on the Southeast corner. *Figure 1, Location Map* attached to this *Report* depicts the Subject Property on a street map of the vicinity.

Figure 2, Topographic Map attached to this *Report* depicts the Subject Property on a portion of the *Hollywood, California* United States Geological Survey (USGS) Topographic Quadrangle.

Figure3, Site Plan attached to this *Report* depicts the immediate vicinity of the Subject Property.

2.2 DESCRIPTION AND OPERATIONS

LAND AND BUILDING AREAS

Areas of the Subject Property not improved with buildings include asphalt paving surrounding the buildings that is used as parking and trash collection areas. Minimal landscaping is scattered throughout the Subject Property. An outdoor eating area is located in an enclosure between the Subject Property buildings. The main building occupies the southern portion of the Subject Property. An alley with loading docks is located to the south of the buildings. A bank building is located on the northwestern corner of the Subject Property. The Savon, bank building and Kmart buildings have basements.

CURRENT TENANTS AND USE OF THE SUBJECT PROPERTY

At the time of EBI's survey, several retail tenants occupied the Subject Property. The current tenants and their activities/business type are summarized in the Table below. EBI was provided with a copy of the most recent rent roll, which is appended to this *Report.*

CURRENT TENANTS/ACTIVITIES

TENANT NAME	REPORTED SQUARE FOOTAGE	USE OF TENANT	ARE HAZARDOUS MATERIALS PRESENT?	TYPE AND AMOUNT OF MATERIALS GENERATED	STAINING/CONDITION OF STORAGE/ CONTAINMENT
Sav-On	23,040	Drug Store	Yes	Silver recovery from photo processing operations.	Minor staining, no secondary containment, poor housekeeping around developer.
Whole Foods	29,928	Grocery Store	No	N/A	N/A
Anna's Linens	7,033	Linen Store	No	N/A	N/A
K-Mart	138,147	Retail Store	Yes	Silver recovery from photo processing operations.	Minor staining, secondary containment present.
				Used Car Battery Cores	No staining, no secondary containment.
Citibank	11,249	Bank	No	N/A	N/A

CURRENT TENANTS/ACTIVITIES					
TENANT NAME	**REPORTED SQUARE FOOTAGE**	**USE OF TENANT**	**ARE HAZARDOUS MATERIALS PRESENT?**	**TYPE AND AMOUNT OF MATERIALS GENERATED**	**STAINING/CONDITION OF STORAGE/ CONTAINMENT**
Payless Shoesource	3,804	Retail Shoe Store	No	N/A	N/A
Thai Patio	2,207	Restaurant	No	Grease waste from cooking disposed of in shared grease container.	Some cooking grease staining on asphalt/concrete, no secondary containment.
Andre's of Town and Country	4,315	Restaurant	No	Grease waste from cooking disposed of in shared grease container.	Some cooking grease staining on asphalt/concrete, no secondary containment.
Fortune Plate	1,770	Restaurant	No	Grease waste from cooking disposed of in shared grease container.	Some cooking grease staining on asphalt/concrete, no secondary containment.
Fresh Start	1,908	Restaurant	No	Grease waste from cooking disposed of in shared grease container.	Some cooking grease staining on asphalt/concrete, no secondary containment.
Saka's Outlet	934	Retail	No	N/A	N/A
Fashion Studio	2,170	Retail	No	N/A	N/A
Tong-Shin Newsstand	612	Retail	No	N/A	N/A
Vista Optical	600	Retail	No	N/A	N/A
Wigs Today	675	Retail	No	N/A	N/A
Van Wagner Communications	Billboard	-	No	N/A	N/A
A-1 Keys	Kiosk	Retail	No	N/A	N/A
United Mobile Phone	72	Retail	No	N/A	N/A

The current uses of the Subject Property do not represent a potential environmental concern. However, improved housekeeping of photochemicals and placement of secondary containment beneath all photochemicals and photochemical waste is recommended to mitigate a release of chemicals to the flooring.

2.3 MUNICIPAL SERVICES & UTILITIES

2.3.1 Water & Sewer

Domestic drinking water is provided by the *Los Angeles Department of Water and Power (LADWP)*. The Subject Property is reportedly connected to the municipal sewer system, which is maintained by the *LADWP*.

2.3.2 Gas/Oil

The Gas Company provides gas service to the Subject Property. No oil service is provided to the Subject Property.

2.3.3 Electrical

Los Angeles Department of Water and Power supplies electrical service to the Subject Property. Two pad-mounted transformers are located in the rear of the Subject Property buildings. No leaks or staining was observed around the transformers. According to the LADWP, four transformers are located at the Kmart Store. The transformers are discussed in *Section 3.10* of this *Report*.

3.0 SUBJECT PROPERTY RECONNAISSANCE

3.1 INTERIOR SURVEY

The following table summarizes issues on which the survey of interior areas of the Subject Property focused:

INTERIOR SURVEY		
ITEM	NOTED	LOCATION AND DESCRIPTION
Processes that generate petroleum products or hazardous substances		N/A
Unusual odors		N/A
Pools of liquid		N/A
Containers not attributed to current use of the Subject Property		N/A
Stains or corrosion		N/A
Drains and Sumps	✔	Floor drains are located throughout the Subject Property. Sumps are located in the Kmart basement area.
Oil-containing equipment	✔	Oil-containing equipment at interior portions of the Subject Property include hydraulic balers at Savon and KMart. (See *Section 3.10*)

3.2 USAGE, HANDLING AND DISPOSAL OF PETROLEUM PRODUCTS AND/OR HAZARDOUS SUBSTANCES

Routine quantities of hazardous chemicals, oils, lubricants and cleaning chemicals are used to maintain the Subject Property. These materials include cleaning compounds, paints, thinners, gasoline and joint compounds. Materials observed at the Subject Property are utilized during routine operations and do not result in the generation of regulated waste. No evidence of significant leaks or spills was noted during EBI's site visit.

The Subject Property operations include two photo-developing stations located in Savon and KMart that use automated photo processors with small volumes of photochemicals. EBI observed the limited quantity of photo developing chemicals to be poorly stored and managed in the Savon and properly stored and maintained in KMart. EBI recommends improved housekeeping at the Savon photoprocessing center to mitigate the release of photochemicals or waste. The discharge of the used chemicals includes filtration of the chemicals through a silver recovery system. Recovered silver is contained in an approximately five-gallon plastic vessel in Kmart and in 55-Gallon Drums in Savon. The recovered material is shipped via parcel delivery to a central repository per corporate requirements. No hazardous wastes are disposed at the Subject Property. The spent photo processing chemicals are flushed into the sanitary sewer following filtration and removal of the silver, in accordance with regulatory requirements.

3.3 ABOVEGROUND/UNDERGROUND STORAGE TANKS (ASTs/USTs)

Based on observations, interviews and a review of state and local records, there are no indications of USTs or ASTs located at the Subject Property. Historic USTs and ASTs is/are discussed in *Section 4.0* and *Section 5.3* of this *Report*.

3.4 ASBESTOS-CONTAINING MATERIAL (ACM)

Asbestos-containing material (ACM) represents a concern when it is subject to damage that results in the release of fibers. Friable ACM, which can be crumbled by hand pressure and is therefore susceptible to damage, is of particular concern. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition or other activities.

The previous ESA cited in *Section 4.1* of this *Report* did not include sampling and analysis of suspect ACM; however, the report did note suspect ACM in the form of acoustic ceiling spray in the bank building, ceiling panels, ceiling tiles, and flooring materials. The previous report notes a review of asbestos survey reports by Pacific Southwest, WPM Construction Technology, and CF Environmental that reportedly address renovation of limited areas of the property. No other information was provided. The previous report noted that no asbestos surveys were identified for the entire property. ACM identified in the previous asbestos reports reportedly include structural steel fireproofing, pipe insulation, asbestos-cement pipes, flooring materials, and roofing materials.

The Arba Group provided EBI with a previous pre-renovation ACM survey for the Whole Foods Store area. The previous report identified ACM in the form of flex joint, pipe insulation, floor tile, and floor tile mastic. Another previous report supplied by the ARBA Group titled PDG Environmental Close-Out for Whole Foods Space that documented asbestos abatement during September 2001. The report documented the removal of ACM in the form of floor tile, flex joint, and pipe insulation. It was unclear whether the floor tile mastic was removed.

EBI observed friable suspect ACM in the form of trowelled-on stucco and plaster in the basement of Savon, drywall throughout the Subject Property, textured ceiling surfacing, ceiling tile, and spray on fireproofing. In addition, non-friable suspect ACM was observed in the form of terrazzo, vinyl floor tile, roofing materials, and construction mastics at the Subject Property. Where observed, the suspect ACM is intact and in good condition except in the Kmart. It should be noted that additional suspect ACM may be present in portions of the structure that are not accessible, such as behind walls and above ceilings.

As directed by the scope of work for this ESA, EBI collected 20 representative samples of suspect ACM in the form of troweled-on stucco/plaster and drywall. Due to the inaccessible ceiling height, poor condition, and high friability and potential for ACM fiber release and human exposure potential, EBI did not collect samples of the fireproofing in the Kmart. The suspect ACM samples collected by EBI were submitted to Environmental Hazards Laboratory in Richmond, VA to be tested for the presence of asbestos by polarized light microscopy (PLM). The following table below presents the results of the testing.

ASBESTOS SAMPLING RESULTS

SAMPLE ID	LOCATION	MATERIAL	% ASBESTOS	FRIABILITY	CONDITION	ESTIMATED AMOUNT FT2
040728-01	Southwest Basement Corner of	Trowelled on stucco / plaster.	*	Friable	Damaged	500

ASBESTOS SAMPLING RESULTS						
SAMPLE ID	**LOCATION**	**MATERIAL**	**% ASBESTOS**	**FRIABILITY**	**CONDITION**	**ESTIMATED AMOUNT FT2**
	Savon					
040728-02	Southwest Basement Corner of Savon	Trowelled on stucco / plaster.	*	Friable	Damaged	500
040728-03	Southwest Basement Corner of Savon	Trowelled on stucco / plaster.	*	Friable	Damaged	500
040728-04	Main floor of Savon behind employee door.	Drywall	*	Friable	Good	23,040
040728-05	Main Floor stockroom	Drywall	*	Friable	Good	23,040
040728-06	Main Floor stockroom	Drywall	*	Friable	Good	23,040
040728-07	Main Floor stockroom	Drywall	*	Friable	Good	23,040
040728-08	Main Floor Stockroom	Drywall	*	Friable	Good	23,040
040728-09	Main Store	Drywall	*	Friable	Good	23,040

040728-16	Kmart basement stockroom	Drywall	*	Friable	Good	138,147
040728-17	Kmart basement stockroom	Drywall	*	Friable	Good	138,147
040728-18	Kmart main floor by shoes	Drywall	*	Friable	Good	138,147
040728-19	Kmart upper stair well	Drywall	*	Friable	Good	138,147
040728-20	Kmart 3rd Floor	Drywall	*	Friable	Damaged	138,147

* As of the date of this draft *Report*, EBI has not received the laboratory analysis results.

It should be noted that the visual asbestos screening survey conducted under the scope of this investigation does not constitute a full asbestos inspection, in which all areas of the buildings would have been thoroughly surveyed and sampled. The possibility exists for ACM to be present in areas of the buildings not accessed or sampled by EBI personnel.

Due to the continued distribution of a wide variety of asbestos-containing building materials, asbestos may be present in some of the roofing, flooring, caulking/putties, adhesives, spackling compounds, and/or non-accessible insulation materials at the Subject Property. Sampling of these types of materials require techniques that may be destructive to subject facilities and in the case of roofing material may void warranties. It is recommended that all such possible asbestos-containing materials be tested prior to renovation or demolition activities that could disturb the materials. Any testing, removal, or disturbance of ACM should be handled in compliance with federal, state, and local regulations. Licensed, qualified asbestos abatement personnel should be retained prior to demolition or renovation of subject facilities.

3.5 RADON

Radon is a naturally-occurring, colorless and odorless radioactive gas that is generated primarily in granitic rocks. The United States Surgeon General has published information that radon is a cause of lung cancer. Radon usually enters a building through openings in the foundation, and therefore is a potential health concern to residents of the lowest level of a building with inadequate ventilation.

Due to the non-residential use of the Subject Property, and in accordance with the scope of work for this ESA, radon testing was not performed.

3.6 LEAD-BASED PAINT (LBP)

Use of lead in household paint was banned by the Environmental Protection Agency (EPA) effective January 1, 1978. The EPA considers paint containing greater than 0.5% lead by weight to be "lead-based." Federal regulations specify that lead paint hazards must be abated in residential buildings occupied by children under the age six.

Based on the commercial use of the buildings and the scope of work for this ESA, an LBP survey was not conducted at the Subject Property.

3.7 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and plumbing material. In 1986, EPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing material. The Los Angeles Department of Water and Power provides domestic water. According to personnel at this agency, potable drinking water is obtained from the eastern Sierra, and the most recent analytical testing data indicates compliance with Safe Drinking Water Act (SDWA) requirements.

3.8 EXTERIOR SURVEY

The following table summarizes issues on which the survey of exterior areas of the Subject Property focused:

EXTERIOR SURVEY		
ITEM	**NOTED**	**LOCATION AND DESCRIPTION**
Storage tanks		N/A
Unusual odors		N/A
Areas of asphalt patch or surface depressions		N/A
Containers not attributed to current use of the Subject Property		N/A
Oil-containing equipment	✔	Two pad-mounted and Four underground transformers are located on the Subject Property (see *Section 3.10*).
Stained soil or pavement		N/A
Stressed vegetation		N/A
Fill material of questionable origin/ Piles		N/A
Wastewater		N/A
Monitoring Wells		N/A
Catch basins or dry wells	✔	Water run-off catch basins are located on the Subject Property and drain to the municipal sewer system.
Septic systems		N/A

3.9 SOLID WASTE DISPOSAL

Solid waste generated at the Subject Property is typical domestic waste consisting of paper, plastics, and food refuse. Solid waste is collected in dumpsters located in enclosures throughout the Subject Property. No evidence of illicit dumping of solid waste was observed during EBI's site visit.

The on-site restaurants generate waste cooking grease. The waste grease is stored in a waste grease container, which are removed monthly by a private waste company. Minor staining was observed around the containers. Cooking grease is non-hazardous and not considered an environmental concern to the Subject Property.

3.10 POLYCHLORINATED BIPHENYLS (PCBS) EQUIPMENT

PCBs were used in the dielectric fluid of some transformers and capacitors manufactured prior to 1979. The EPA banned the use of PCBs in 1978. Potential PCB-containing equipment observed at the Subject Property included several pad-mounted and underground transformers. The transformers appeared to be in good condition and no indications of leaks or staining were observed on or below the transformer casings. The transformers are owned and operated by the regional utility company, *LADWP*, which has indicated that none of the Subject Property transformers contain PCBs over the EPA's maximum

allowable concentration of 50 ppm. A previous Phase I ESA, discussed in section 4.1 of this report stated that the Savon transformer contained 13 ppm of PCB's according to the LADWP, and that the transformers at the Kmart have PCB counts of 8, 9, 13, and 25. EBI contacted the LADWP and requested confirmation of the transformers and PCB results. The LADWP has not responded to EBI's request as of this report. If the provided information has a material affect on the findings of this *Report*, EBI will forward the new information, together with revised findings, as an addendum to this *Report*. If no response is received or no material violations are noted, our *Report* will not be modified. In the event of a release of dielectric fluid from one of its transformers, the utility company typically performs the cleanup.

Potential PCB-containing equipment observed at the Subject Property also includes two hydraulic balers and a trash compactor. There was indication of minor, de minimis, hydraulic fluid leakage around the Savon compactor and the Kmart compactor. No other hydraulically operated equipment was observed at the Subject Property. The Kmart compactor was provided by Consolidate Waste Services and appears to be newer than 1978. Due to the assumed date of construction of the Kmart compactor, it is not suspected to contain PCB's. The date of construction of the Savon hydraulic baler could not be determined; however, recent servicing of the hydraulics suggests the hydraulic fluid does not contain PCBs. No further action is recommended at this time with regards to the two compactor units.

The previous CA Environmental report discussed in section 4.1 of this report stated that PCB containing light ballasts may be present at the Subject Property. EBI noted older light ballasts at the Subject Property and recommended that the unlabeled fluorescent light ballasts should be assumed to contain PCB's and be handled and disposed of in accordance with EPA regulations.

3.11 PHYSICAL SETTING

TOPOGRAPHY
The Subject Property is at an elevation of approximately 183 feet above mean sea level (msl). The Subject Property is flat and sloped down gently to the south. The Subject Property is in a relatively flat and level area (see *Figure 2-Subject Locus Map,* which is a portion of the *Hollywood, California* USGS Quadrangle). The overall slope of the surrounding area is down to the south.

GEOLOGY
Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, California region (1995). The Subject Property is located within the Pacific Border physiographic province, which is characterized by steep rolling hills and mountains and consists of severely folded, faulted, commonly metamorphosed marine and continental sediments.

HYDROLOGY/HYDROGEOLOGY
No surface water bodies are present on the Subject Property. Local groundwater gradient is expected to follow surface topography; therefore, groundwater flow near the Subject Property is expected to flow to the south / southeast. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure.

A previous environmental report by California Environmental, referenced in *Section 4.1* of this *Report,* stated that the Subject Property is located near the northwestern boundary of the Pressure Area of the Los Angeles Central Groundwater Basin. Silts, clays, and sands of the Pleistocene Lakewood Formation reportedly underlie the property. Groundwater occurs in the Exposition Aquifer at a depth of approximately 124 feet below ground surface (bgs). Perched ground water was encountered beneath the

site between 20 to 60 feet bgs. California environmental noted that the probable direction of groundwater flow is towards the south or southeast.

3.12 ADJACENT PROPERTIES

NORTH
The northern boundary of the Subject Property is adjacent to West Third Street. Across Third Street is the Los Angeles Farmers Market and further more commercial and residential areas. No evidence of adverse environmental conditions was observed during the survey of the northern boundary of the Subject Property.

SOUTH
Hancock Park Elementary School borders the Subject Property on the south. Beyond is Parklabrea, which includes the La Brea Tar and Fossil Pits. No evidence of adverse environmental conditions was observed during the survey of the southern boundary of the Subject Property.

EAST
The Subject Property is bordered on the east by Fairfax Avenue. Beyond Fairfax are various commercial properties including and office building, a dry cleaner, a nail salon, a pizza parlor, and a LUST facility discussed in section 5.2.

WEST
The Subject Property is bordered on the west by Ogden Drive. Beyond Ogden Drive is a Ross Department Store and parking area. Beyond are newer apartment buildings. No evidence of adverse environmental conditions was observed during the survey of the western boundary of the Subject Property.

3.13 METHANE

The Subject Property is located in the Salt Lake Oil Field. South of the Subject Property are the La Brea Tar and Fossil Pits. The Subject Property and surrounding area were used for oil production from the 1900's to the 1930's. In the 1930's the local oil derricks and wells were abandoned to make way for urban construction. Accumulation of methane gas, which migrates from the subsurface through soil or other preferential pathways, caused an explosion at the Ross retail store property in 1985, located approximately 500 feet west of the Subject Property. Explosive levels of methane gas were reportedly detected in the Subject Property Kmart store at that time. As a result of the explosion, the Los Angeles City Fire Department issued a methane ordinance requiring methane monitoring and mitigation measures in "High Potential Methane Zone" centered on the Salt Lake Oil Field. As the Subject Property is located within this zone, a methane mitigation and monitoring system was implemented on the Subject Property.

Methane gas is combustible at certain concentrations in air and is odorless, colorless, lighter than air, and formed by the decomposition of organic matter. It is common in swamps, wetlands, peat deposits, oilfields, and old landfills. The gas moves along the most unrestricted pathway, such as layers of sand, along pipelines, wells, or through underground structures such as a basement. At a concentration of between 5 and 15 percent methane in air, methane becomes an explosive hazard. Five percent or 50,000 parts per million (ppm) is defined as the lower explosive limit (LEL). Methane gas also can cause asphyxiation in a confined space. Sensors to measure methane display the concentration in three ways: percent by volume, parts per million, and percent of the LEL. (A concentration of 100 percent of the LEL is 5 percent by volume.)

The Subject Property methane gas monitoring system includes 12 street probes, located along the streets that abut the Subject Property, 7 gas vents and 10 parking lot gas vents (attached to light poles), 6 wells, and 3 gas probes located on the Town and Country property. Manual gas monitoring of the Kmart basement was discontinued in 1996 in accordance with approval by the Los Angeles City Fire Department (LAFD). An automated gas detection-alarm system operates at the Kmart location and was determined to be adequate for methane gas monitoring. The Whole Foods store reportedly has there own interior gas sensors and alarm system.

Methane gas monitoring has reportedly occurred at the Subject Property, as directed by the LAFD, since 1990. Currently, the Subject Property, in accordance with the LAFD oversight requirements, conducts semi-weekly methane gas monitoring and gas pressure monitoring and reporting. EBI reviewed recent semi-weekly Methane Gas Monitoring Reports prepared for the Subject Property and dated June 2004. Methane gas concentrations ranged from non-detect to 88% of the LEL, less than the LEL and not considered a concern to the public health and welfare at this time. The highest gas concentrations are reported in the eastern portion, exterior parking lot area, of the Subject Property. Gas pressure readings for this period indicated zero gas pressure at all of the pressure monitoring locations.

Two former oil wells, designated #99 and #102, were reportedly abandoned on the Subject Property in the 1930s. A previous ESA report attempted to locate these wells with geophysical techniques and identified a potential subsurface anomaly consistent with the estimated location of the abandoned well #102, located in the northwest perimeter of the Subject Property. The second oil well #99, estimated location in the northeast portion of the Subject Property, was not detected by geophysical methods. A previous ESA report (See Section 4.1, CA- April 1998) concluded that the highest rate of methane gas venting is in the same area as the suspected location of former oil well #99, northeast portion of the Subject Property. It was the opinion of CA Environmental that the methane gas problem in this area is at least partially due to a leaking well and if the well could be located and re-abandoned the methane problem will probably be reduced or eliminated. EBI's discussion with a representative of The Division of Oil and Gas (DOG) stated that a construction site review for the reported abandoned wells by the DOG would be required if the Subject Property proposed further development.

EBI contacted Mr. David Myers of the Los Angeles City Fire Department Environmental Unit, which has local agency oversight of methane compliance. Mr. Myers stated that the current concentrations of methane gas reported in the semi-weekly methane monitoring reports are not a concern to the Fire Department at this time.

EBI spoke with Mr. Ron Lofy, of Lofy Engineering, who conducts the semi-weekly onsite monitoring of methane gas monitoring system at the Subject Property. Mr. Lofy stated that the two gas venting mitigation wells, designated Kerbrat Well #2 and Fukuda Well #3, were installed in 1991/1992 after mud geysers and gas buildup occurred at the Subject Property and local vicinity. The mitigation wells were installed in conjunction with required horizontal vent pipes that are still in operation at the Subject Property. In 1997, the mitigation wells were abandoned at the direction of the property management firm, Investment Development Services. Mr. Lofy stated that this did not violate any local oversight agency requirements and that the Subject Property is currently in compliance with local, state, and federal regulations as long as the twice-weekly monitoring and onsite monitoring alarm systems are maintained.

4.0 SUBJECT PROPERTY AND VICINITY HISTORY

EBI obtained historical information regarding the Subject Property from the sources listed below. From review of the following, it appears that the Subject Property was previously an oil field (early 1900s to 1930), residences in 1939, single story commercial buildings in 1945 to 1960, a car wash in 1951, and the existing shopping center buildings since 1961. The discussion of the reviewed historical resources is provided below.

4.1 PREVIOUS ENVIRONMENTAL REPORTS

Mr. Michael Turner provided EBI with five previous environmental site assessments performed for the Subject Property:

***Revised Updated Preliminary Phase I Environmental Site Assessment and Phase II Subsurface Environmental Site Assessment,* performed by California Environmental (CA) of Westlake Village, California, dated April 1998.** According to the CA report, the Subject Property was previously occupied by a car wash, which was constructed on the Subject Property in 1951. From 1906 to 1931, the Subject Property was used for oil production. The CA report noted two abandoned wells on the Subject Property, which were reportedly abandoned in 1930-1931 and were not abandoned in accordance with current oil well abandonment standards. CA noted a 1931 aerial photograph, which showed aboveground oil storage tanks and sumps on the Subject Property. CA discussed the onsite methane issue and concluded that the onsite methane mitigation measures comply with regulatory requirements and appear to adequately protect against loss of life due to methane fires or explosions.

The CA report documented a Phase II investigation of the Subject Property which included: an attempt to locate the former oil wells, reportedly abandoned in the 1930s, using geophysical methods; to characterize petroleum impacts in subsurface soils; and to determine whether hazardous wastes are present in soil beneath the Subject Property. Six soil borings were advanced to depths of 8 feet to 20 feet, and 18 soil samples were collected and analyzed for total petroleum hydrocarbons (TPH), volatile organic compounds, semi-volatile organic compounds, and metals.

- **FORMER ONSITE OIL WELLS**
  The geophysical survey reportedly detected a subsurface anomaly in the area of suspected well #102, located at the northwest perimeter of the Subject Property. The anomaly was interpreted as either a deeply buried well casing, or metal debris at a shallower depth. No subsurface anomaly was found in the suspected area of the abandoned oil well #99 reportedly located in the northeastern portion of the Subject Property.

- **PETROLEUM IMPACTED SOIL LOCATED BENEATH SUBJECT PROPERTY**
  The CA Phase II report identified crude oil impacted soil in the suspected abandoned oil well locations and in two suspected former oil sump locations. The highest concentrations of contaminants were primarily less than 10 feet below ground surface (bgs). One location was reported to have elevated concentrations of contaminants to more than 20 feet bgs. Low level impacts were found at a depth of 3 feet in the drainage channel locations but did not extend to greater depths. No impacts were found in the suspect aboveground tank location. The highest total petroleum hydrocarbon (TPH) concentration that CA noted was 14,000 parts per million (ppm). Volatile and Semi-volatile compound concentrations in soil were trace to non-detect. Heavy metal concentrations were reported to be consistent with background metal concentrations in soil and not a potential concern. The CA report concluded that hazardous concentrations of

contaminants of concern may be present in the near surface (less that 25 feet bgs) and that crude oil impacted soil may be encountered during future grading activities at the site, if such activities are conducted.

- The CA report stated that based on the current development at the site and the lack of pathways for human exposure to the contaminated soil limited the human health risk. The CA report also stated that based on the hydrogeologic conditions at the Subject Property, the petroleum impacts do not present a significant risk to the groundwater resource beneath the Subject Property. The CA report stated that it was unlikely that the Los Angeles County Regional Water Quality Control Board (LARWQCB) would require the remediation of the impacted soil in the absence of redevelopment of the Subject Property even though the minimum level at which the LARWQCB would set a site specific action level for TPH would be 10,000 ppm (CA report quoting the Interim Site Assessment and Cleanup Guidebook, LARWQCB, May 1996, Table 4-1). The CA report stated that based on recent LARWQCB actions at other oil field properties, onsite refuse of petroleum impacted soil would likely be allowed at high levels. The CA report concluded that no further action was recommended for the petroleum impacts at the time of the report, but noted that if the soil is disturbed in the future, applicable regulations in effect at that time should be consulted to determine whether special handling will be necessary. Based on an estimated impacted soil volume of 6,000 cubic yards (9,000 tons), the 1998 estimate for excavation, loading, transportation, treatment, import, backfill, and compaction of the contaminated soil was $324,000.00.

- The CA report concluded that the highest rate of methane gas venting is in the same area as the suspected location of former oil well #99, northeast portion of the Subject Property. CA stated, "It is the opinion of CA Environmental that the methane gas problem in this area is at least partially due to a leaking well. If the well can be located and re-abandoned the methane problem will probably be reduced or eliminated."

***Updated Preliminary Environmental Site Assessment and Subsurface Investigation,* performed by California Environmental (CA) of Westlake Village, California, dated April 1998.** The revised Phase I, II ESA report recommended that an asbestos survey be conducted and an Operations and Maintenance Plan be instituted to manage the onsite asbestos containing material. The CA revised ESA report conclusions stated that a methane monitoring and maintenance plan should be developed and that the estimated cost of annual testing is $25,000.00.

***Pre-Renovation Asbestos Inspection* performed by Camco Group (Camco) of Fonata, California, dated August 17, 2001.** The Camco report addressed the area of the single story grocery store (now Whole Foods) and sampled for asbestos containing materials. The report identified ACM in the form of Flex Joint in the rear stock room attic, pipe insulation near the HVAC unit in the attic, floor tile (12" red brick pattern) on the sales floor, and associated floor tile mastic. It should be noted that this report only addresses the Whole Foods tenant space.

***Abatement Report for Whole Foods Space,* performed by PDG Environmental (PDG) of Fullerton, California, dated September 15, 2001.** . The previous report supplied by the ARBA Group titled PDG Environmental Close-Out for Whole Foods Space documented abatement during September 2001. The report documented the removal of floor tile, flex joint, and pipe insulation. It was unclear whether the floor tile mastic was removed. It should be noted that this report only addresses the Whole Foods tenant space.

***Weekly Methane Monitoring Reports,* performed by Lofy Engineering (Lofy) of Pasadena, California, dated July 3, 2004**. The Los Angeles City Fire Department requires the routine semi-weekly methane gas monitoring of the Subject Property and submittal of a Methane Gas Monitoring report. EBI reviewed monitoring reports for 2004. The monitoring reports summarize probe testing of detectable levels of methane in 11 out of 12 probes at the Subject Property. Monitoring of exterior gas vent locations were performed. The weekly monitoring reports note the gas detection alarm systems in place at the Subject Property. The reports note the almost continuous pumping of an offsite well (Anthony #2) between Ogden Drive and the Ross Dress for Less. The report noted a new concrete subterranean clarifier next to Anthony well #2. The discharge water from Kerbrat well #2 and Fekuda Well #3 (on the Subject Property) have been redirected to a new 5,000 gallon tank located in the immediate vicinity of the Kerbrat well #2. During its existence, the 5,000 gallon tank at the Subject Property had been drained to the storm sewer a total of seven times prior to the tank being removed in 1997.

The monitoring report stated that in 1997, the onsite vent wells (kerbrat #2 and Fukuda #3) were abandoned at the direction of the property management firm. The wells had been a pathway for venting the methane gas in the area and reducing ambient pressure in the soil. These wells had served as key gas relief wells, which had prevented any gas build up in the Kmart basement since their activation in 1992. Reportedly, the operation was too expensive for the Subject Property management firm.

Relevant information from the previous reports is discussed in the appropriate sections of this *Report*. Portions of the previous reports are included as an Appendix to this *Report*.

4.2 FIRE INSURANCE MAPS

EBI reviewed Sanborn fire insurance maps as provided by the Los Angeles Public Library. Map sets dated 1888, 1894, 1900, and 1906 updated 1950 were reviewed. The review revealed the following:

- The 1888 map set did not encompass the Subject Property area.
- The 1894 – 1900 map set did not encompass the Subject Property area.
- In the 1906 updated 1950 map set, the Subject Property appears to by located in either Volume 8 or Volume 24. Neither volume was accessible on August 10, 2004.

The previous CA report reference Sanborn Fire Insurance Maps dated 1950 and 1969. The Previous report stated that following:

- The 1950 map depicts the Subject Property as occupied by the Town and Country Market with numerous shops and small restaurants. The service yard is occupied with an incinerator, three storage buildings, and a greenhouse is present along the southern property line. No underground tanks of hazardous waste generating activities were indicated on the Subject Property. Hancock Park School is adjacent to the south, with the large Park LaBrea residential development beyond. The area across Ogden Drive to the east is vacant. The map does not show the properties across Fairfax to the west or Third Street to the north
- The 1969 map depicts the Subject Property as occupied by the existing shopping center and bank buildings. No underground tanks or hazardous waste generating activities are indicated on the property. Hancock Park School is adjacent to the south, with the large Park La Brea residential development beyond. The area across Ogden Drive to the east is occupied by the Park La Brea

shopping center. The map does not show the properties across Fairfax to the west or Third Street to the north.

4.3 HISTORIC AERIAL PHOTOGRAPHS

EBI reviewed historical aerial photographs dated 1928, 1947, 1952, 1965, 1976, 1989, 1994, and 2002 as provided by EDR, Inc. The historical aerial photograph review revealed the following:

- The 1928 photo depicts the Subject Property as an oil production field. Large above ground storage tanks, apparently used to store crude oil, are located on the Subject Property. Dirt road accesses are located throughout the Subject Property. Residential areas are located to the west and northwest of the Subject Property. The areas to the south and east of the Subject Property are also a part of the large oil production field. The area to the north of the Subject Property across Third Street is apparently vacant land with intermittent uses including oil production. The larger surrounding area is moderately densely developed with residential areas.

- The 1947 photo depicts the Subject Property with several single story commercial buildings. The remaining portion of the Subject Property is utilized for parking, apparently unpaved. The Subject Property is bound to the west by Fairfax and then by sparse commercial buildings, to the north by Third and then by Farmers Market, to the east by undeveloped land (Ogden has not yet been constructed) and the south by a two-story school building and unpaved land. Further south is the La Brea Park Development.

- The 1952 photo depicts the Subject Property with the same single story commercial buildings as in 1947. The remaining portion of the Subject Property is utilized for parking, apparently unpaved. The Subject Property is bound to the west by Fairfax and then by commercial buildings, to the north by Third and then by Farmers Market, to the east by Ogden and undeveloped land, and the south by a two-story school building and unpaved land. Further south is the La Brea Park Development.

- The 1965 photo depicts the Subject Property as occupied by a shopping complex along the southern portion. The northwest corner of the Subject Property is occupied by a commercial building. The remaining portion of the Subject Property is covered with a parking lot. The Subject Property is bounded to the south by a school and parking lot, to the west by Fairfax and then by commercial properties, to the north by Third Street and then by Farmer's Market, to the east by Ogden and then by another commercial complex.

- The 1976 photo depicts the Subject Property and adjacent properties as in 1965.

- The 1989 photo depicts the Subject Property and adjacent properties as in 1965 and 1976. The surrounding area has been highly developed and is now a high-density urban area.

- The 1994 photo depicts the Subject Property and adjacent properties similar to those depicted in 1965, 1976, and 1989. No major changes were noted from 1989 to 1994.

- The 2002 photo depicts the Subject Property and adjacent properties similar to those depicted in 1965, 1976, 1989, 1994 and as the Subject Property appears today. The apartment buildings to the far east of the Subject Property have been constructed. The school to the south of the Subject Property has added more buildings.

The previous CA report reviewed historical aerial photographs as provided by Spence Aerial Photograph dated 1931, 1939, 1945, 1950, 1955, 1960, 1962, 1964, and 1969. The CA review revealed the following:

- The 1931 photo depicts the Subject Property as occupied by an oil field including three large aboveground storage tanks, an oil well derrick, and approximately 12 buildings. Six or seven shallow impoundments or sumps are present, four of which appear to contain oil. A drainage course leading from impoundments across Third Street to the northeast crosses the southeast corner of the property. Oil wells are present to the north, east, and south. A residential neighborhood is located to the west and northwest. A possible gas station is located on the southwest corner of Third and Fairfax. A real estate office is located in the northwest corner of 4th and Fairfax.

- The 1939 photo depicts the Subject Property as occupied by two single story dwellings and trees along the south-central portion of the Subject Property. The remaining portion of the Subject Property is undeveloped land. Billboards are located along the northwest corner and western portion of the Subject Property. No oil wells were noted on the Subject Property. The Subject Property is bordered on the south by a school; to the east by undeveloped land, to the north by Third Street and the farmers market, and to the west by Fairfax and then by sparse commercial buildings. There are service stations located on the southwest and northwest corners of Fairfax and Third.

- The 1945 photo depicts the Subject Property with the central portion occupied by several single story commercial buildings. The remaining portion of the Subject Property is utilized for parking, apparently unpaved. There are service stations located on the northwest and southwest corners of Fairfax and Third. The Subject Property is bound to the west by Fairfax and then by sparse commercial buildings, to the north by Third and then by Farmers Market, to the east by undeveloped land (Ogden has not yet been constructed) and the south by a two-story school building and unpaved land.

- The 1950 photo depicts the Subject Property with the same several single story commercial buildings as noted in 1945. The remaining portion of the Subject Property is utilized for parking, apparently unpaved. There is a service station located on the northwest corner of Fairfax and Third. There may be a service station located on the southwest corner of Third and Fairfax. The property is bounded on the north by Third and then by Farmer's Market, to the east by Ogden and then by a storage yard for lumber and possible sand, to the south by a school and single-story dwellings/school rooms, and to the west by Fairfax and then by commercial buildings.

- The 1955 photo depicts the Subject Property as occupied by a cluster of commercial buildings. There is a service station located along the northeast corner of the Subject Property. A single-story commercial structure is located along the eastern portion of the Subject Property. There appears to be a small single-story structure located along the west-central portion of the Subject Property. The Subject Property is bounded to the north by Third and then by Farmers Market, to the east by Ogden and then by a commercial shopping center, to the south by a school and playing field and to the east by Fairfax and then by commercial structures.

- The 1960 photo depicts the Subject Property as occupied by a cluster of commercial buildings in the central portion of the Subject Property. There are service stations located along the northeast and northwest corners of the Subject Property. A single story commercial structure (possible drive in restaurant) was located along the eastern property line. There appears to be an overhang along the eastern portion of this building. The property is bounded to the north by Third and then

by Farmers Market, to the east by Ogden and then by a commercial complex, to the south by a school and parking lot and to the west by Fairfax and then by commercial buildings.

- The 1962 photo depicts the Subject Property as occupied by a commercial building along the northwest corner of the Subject Property. The western portion of the shopping center has been constructed. The eastern portion of the site is under construction. A subsurface excavation for a basement is being constructed. The northern most and western portions of the site not occupied by buildings are covered with a paved parking lot. There are several service station located on the northwest and southwest corners of Fairfax and Third Streets. The Subject Property is bound to the south by a school and parking lot, to the west by Fairfax and then by commercial structures, to the north by Third and then Farmers Market, and to the east by Ogden and then by a commercial shopping center.

- The 1964 photo depicts the Subject Property as occupied by a commercial complex and a single commercial building along the northwest corner of the Subject Property. The remaining portion of the Subject Property is occupied by a parking lot. There are service stations located on the northwest and southwest corners of the Fairfax and Third. The Subject Property is bound to the south by an alley and then by a school along the southwestern portion and a parking lot along the remaining southern portion, to the east by Ogden and then by another commercial complex, to the north by Third Street and then a group of commercial buildings, and to the west by Fairfax and then by commercial property.

- The 1969 photo depicts the Subject Property as occupied by a shopping complex along the southern portion. The northwest corner of the Subject Property is occupied by a commercial building. The remaining portion of the Subject Property is covered with a parking lot. There are service stations on the northwest and southwest corners of Fairfax and Third Streets. The Subject Property is bounded to the south by a school and parking lot, to the west by Fairfax and then by commercial properties, to the north by Third Street and then by Farmer's Market, to the east by Ogden and then by another commercial complex.

4.4 CITY DIRECTORIES

City directories were reviewed at Sherman Library in Corona Del Mar, California. The city directory review revealed the following:

- The 1902 directory listed 3rd Street West up to 1422 where Witmer intersects but did not include the Subject Property.
- The 1910, 1920, 1925, 1931, and 1942 directories did not have reverse listings.
- The 1955 directory lists 6306 as Town and Country Market Auto Wash and West 3rd and Fairfax with many listings for Farmer's Market.
- The 1960 directory did not list the Subject Property, but had many listings for the adjacent Farmer's Market.
- The 1965 directory listed the Subject Property as 6310 Britt Department Store and many other retail and restaurant addresses.
- The 1970 and 1975 directories list the Subject Property with various retail and restaurant addresses.
- The 1980 directory lists the Subject Property as Kmart, Savon, and various retail stores.
- The 1985 directory lists the Subject Property as Kmart, Fox 50 minute color prints, and various retail stores.

- The 1987 and 1989 directories list the Subject Property as various retail stores.

4.5 INTERVIEWS

The following information was provided by individuals contacted by EBI in connection with the Subject Property.

INTERVIEW COMMENTS		
CONTACT	**RELATION TO SUBJECT PROPERTY**	**DETAILS OF CONVERSATION**
Mr. Mark Gemache	Associate Oil and Gas Engineer, Division of Oil and Gas	Ms. Gemache explained to EBI that the local oil wells have previously acted as a release valve for the local underground methane build up. The methane is a naturally occurring by-product of the oil-producing zone below the surface. When the oil wells were abandoned, the methane's only route of evacuation from the underground soil is to permeate through the soil. When leached in this fashion, methane can accumulate in underground spaces and basements.

4.6 PROPERTY TAX RECORDS

Property tax information was obtained from the Los Angeles County Tax Assessor's Office. The property owner is 3rd Fairfax LLC. According to the Subject Property the previous owner was the University of Southern California until 1998.

5.0 REGULATORY INFORMATION

5.1 PROCEDURE

A review of databases maintained by state and federal offices was completed through Environmental FirstSearch. The databases were searched for properties with reported environmental issues within radii specified by ASTM Standard E 1527-00, by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded "orphan" properties within the same zip code. The database report is included as an appendix to this *Report*.

The database report identified 917 "orphan sites." Orphan sites are those facilities, which could not be automatically mapped or geocoded due to inadequate location information. EBI did not identify listed orphan sites within the specified radii.

It should be noted that plotted locations of listed properties are not always accurate. With regard to listings that are determined or suspected to be inaccurate, based on information from other sources such as direct observation or consultation with individuals familiar with the property, EBI uses the best available data when evaluating the location of listed properties discussed below.

5.2 FEDERAL OFFICE RECORDS

NATIONAL PRIORITY LIST (NPL) FACILITIES
The NPL Report, also known as the Superfund List, is an EPA listing of the nation's worst uncontrolled or abandoned hazardous waste facilities. Listing as a Superfund Site is primarily based on a score that the facility receives from the EPA's Hazard Ranking System. These facilities are targeted for possible long-term remedial action under the Superfund Act. The NPL indicated that no NPL facilities are located within one mile of the Subject Property.

COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION & LIABILITY INFORMATION SYSTEM (CERCLIS) AND CERCLIS - NO FURTHER REMEDIAL ACTION PLANNED (CERCLIS-NFRAP) FACILITIES
CERCLIS is a compilation of the facilities EPA has investigated or is currently investigating for a release or threatened release of hazardous substances. The updated EPA Superfund Program CERCLIS List indicates that no CERCLIS facilities are located within a one-half mile radius of the Subject Property. No CERCLIS-NFRAP facilities were identified on or adjacent to the Subject Property.

CORRECTIVE ACTION TRACKING SYSTEM (CORRACTS)
CORRACTS is a list of facilities that are found to have had hazardous waste releases and require Resource Conservation and Recovery Act (RCRA) corrective action activity, which can range from site investigations to remediation. According to the CORRACTS list, no CORRACTS facilities are located within a one-mile radius of the Subject Property.

RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM (RCRIS)
The RCRIS report of hazardous waste generators and treatment, storage, and disposal (TSD) facilities contains information pertaining to facilities that are required to register their hazardous waste activity under RCRA). According to the RCRIS list, no RCRA TSD facilities are located within one-half mile of the Subject Property.

RCRA hazardous waste generators are identified as Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQG). RCRA LQGs are identified as those facilities, which generate at least 1,000 kilograms (2,200 pounds) of non-acutely hazardous waste (or 1 kilogram of acutely hazardous waste) monthly. RCRA SQGs are identified as those facilities that generate less than 1,000 kilograms of non-acutely hazardous waste monthly. According to the RCRIS list, no RCRA facilities were identified on or adjacent to the Subject Property. According to the RCRIS list, the Subject Property was not identified as a RCRA generator; however, three adjoining properties were identified as RCRA facilities. The following table presents the listed facilities:

RCRA GENERATOR FACILITIES			
NAME / ADDRESS	**GENERATOR TYPE**	**DISTANCE / DIRECTION / GRADIENT**	**STATUS**
Kings Cleaners 349 S Fairfax	SQG	Adjacent to the west, crossgradient.	No reported violations in connection with this listing.
LA USD Hancock Park Elementary 408South Fairfax Ave.	SQG	Adjacent to the south downgradient.	No reported violations in connection with this listing.

None of the RCRA generator listings identified in the databases is suspected to have an adverse environmental impact on the Subject Property based on the absence of reported RCRA violations and no reported release incidents.

EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS)
The ERNS is a national database used to collect information on reported releases of petroleum products or hazardous substances. The database contains information from spill reports made to federal authorities including the EPA, the U.S. Coast Guard, the National Response Center and the U.S. Department of Transportation. A review of this database was made in order to determine if any spills or incidents involving releases of petroleum products or hazardous substances have occurred at the Subject Property. According to this updated ERNS database, the Subject Property is not on file as being a release site.

5.3 STATE OFFICE RECORDS

LEAKING UNDERGROUND STORAGE TANKS (LUSTS)
According to the state LUST site list, nine LUST sites are located within a one-half mile radius of the Subject Property. Of the listed sites, 6 are located more than ¼-mile from the Subject Property, and based on the urban setting these are not suspected to represent an environmental concern to the Subject Property. Two of the remaining sites within ¼-mile of the Subject Property are listed as case closed, and on this basis are not suspected to represent an environmental concern to the Subject Property. The following table lists the one active LUST sites within ¼ mile:

LEAKING UNDERGROUND STORAGE TANK FACILITIES			
NAME / ADDRESS	**DISTANCE / DIRECTION / GRADIENT**	**REPORT DATE / SUBSTANCE / MEDIA AFFECTED**	**STATUS**
Mas Auto Service 371 Fairfax	Adjacent to the west/crossgradient.	1991 / Gasoline / Other	Remediation Plan

The Mas Auto Service LUST facility is also listed as an underground storage tank facility. The LUST listings identified in the database is not suspected to have an adverse environmental impact on the Subject

Property based on the crossgradient relationship to the Subject Property, the regulatory status, and the presence of an apparent responsible party.

STATE REGISTERED UNDERGROUND STORAGE TANKS (USTS)
According to the state UST database, no UST's are located on the Subject Property. However, one other UST facility is located adjacent to the Subject Property. The following table presents the listed facility:

UNDERGROUND STORAGE TANK FACILITIES		
NAME / ADDRESS	**DISTANCE / DIRECTION / GRADIENT**	**NUMBER / TYPE / CONTENTS OF TANK**
Los Angeles Unified School District 408 Fairfax	Adjacent / South / Downgradient	No details were available.

None of the UST listings identified in the databases is suspected to have an adverse environmental impact on the Subject Property based on the absence of reported releases and the apparent presence of an off-site responsible party in the event a release is discovered.

STATE SITES
According to the State database listing, the adjacent Elementary School is listed as having methane monitoring for methane issues at the property.

SOLID WASTE LANDFILLS
According to the State Active List of Solid Waste Landfill facilities, no reported landfills are located within one-half mile of the Subject Property.

5.4 LOCAL OFFICE RECORDS

Local offices consulted during the preparation of this *Report* included the Los Angeles Building, Planning, Engineering, County Public Works Department, County Health Department, Fire Department, and Regional Water Quality Control Board (LA-RWQCB). No documented adverse environmental conditions or complaints were reported at the Subject Property and readily on file at the Building, Planning, Engineering, County Public Works, or RWQCB offices.

- EBI contacted Mr. David Myers of the Los Angeles City Fire Department Environmental Unit, which has local agency oversight of the methane monitoring and compliance performed at the Subject Property. Mr. Myers stated that the Subject Property appears to be compliant with the current semi-weekly monitoring and reporting requirements and that the current concentrations of methane gas reported in the semi-weekly methane monitoring reports are not a concern to the Fire Department at this time.

- EBI submitted a FOIA requests to the Los Angeles County Health Department for information regarding storage tanks, chemical spills, and other potential environmental concerns in connection with the Subject Property. As of the date of this *Report* EBI has not received a response to this inquiry. Upon receipt of the agency response, if the provided information has a material affect on the findings of this *Report*, EBI will forward the new information, together with revised findings, as an addendum to this *Report*. If no response is received or no material violations are noted, our *Report* will not be modified.

5.5 OTHER RECORDS

The previous CA environmental report (Section 4.1) noted that one above ground storage tank was formerly used to store groundwater, but had been removed prior to the CA site visit. Based on the lack of noted violations, hazardous materials, and the AST reportedly holding groundwater, this former AST is not suspected to pose an adverse environmental impact to the Subject Property.

6.0 FINDINGS AND OPINIONS

EBI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of the Subject Property. Any exceptions to, or deletions from, this practice are described in *Section 1.0* of this *Report.* This assessment has revealed no evidence of recognized environmental conditions in connection with the Subject Property except for the following:

The Subject Property is located in the Salt Lake Oil Field. The Subject Property and surrounding area were used for oil production from the 1900's to the 1930's. In the 1930's the local oil derricks and wells were abandoned to make way for urban construction. Two oil wells were reportedly abandoned on the Subject Property in the 1930s. Elevated methane gas concentrations were identified on the Subject Property and adjacent properties in the mid-1980s, which resulted in methane monitoring and mitigation requirements. A methane gas pressure and gas concentration monitoring system was implemented on the Subject Property. Monitoring data for the Subject Property from June of 2004 indicate no detectable gas pressure and methane concentrations are less than the regulatory action level, the lower explosive limit (LEL). A previous ESA report for the Subject Property suggests a potential source for the detectable concentrations of methane to be methane migration through the previously abandoned oil well reportedly located in the northeastern portion of the Subject Property. Based on the information and documentation available to EBI for preparation of this *Report,* the methane gas monitoring program appears to be proceeding in accordance with regulatory requirements. Therefore, no further action is recommended at this time with regards to methane gas concentrations, methane gas pressure, or the previously abandoned oil wells.

A previous limited subsurface soil investigation report indicated elevated concentrations of total petroleum hydrocarbons (TPH) in soil. No further action was recommended at that time. However, the report concluded that hazardous concentrations of contaminants of concern may be present in the near surface (less that 25 feet bgs) and that crude oil impacted soil may be encountered during future grading activities at the site, if such activities are conducted. Refer to Section 7.0 of this *Report* for recommendations.

- *Although EBI recommends no further actions at this time, EBI is of the opinion that the potential exists for significant Subject Property ownership liability for costs associated with any future requirement for further actions related to the following environmental concerns: re-abandonment of the two former oil wells reportedly abandoned on the Subject Property in the 1930s; subsurface assessment and remediation of potentially contaminated surface and subsurface soils; and further actions required to address any future elevated methane gas pressure and/or methane gas concentrations.*

The following non-ASTM conditions were also evaluated:

ACM identified in previous asbestos survey reports reportedly include structural steel fireproofing, pipe insulation, asbestos-cement pipes, flooring materials, and roofing materials. Asbestos abatement reportedly occurred at the Whole Foods tenant space during September 2001 and included the removal of ACM in the form of floor tile, flex joint, and pipe insulation. It was unclear whether the floor tile mastic was removed.

- EBI observed friable suspect ACM in the form of trowelled-on stucco and plaster in the basement of Savon, drywall throughout the Subject Property, textured ceiling surfacing, ceiling tile, and spray on fireproofing. In addition, non-friable suspect ACM was observed in the form of terrazzo, vinyl floor tile, roofing materials, and construction mastics at the Subject Property. Where observed, the suspect

ACM is intact and in good condition except damaged drywall in the Kmart and damaged stucco/plaster in the Savon.

- As directed by the scope of work for this ESA, EBI collected 20 representative samples of suspect ACM in the form of troweled-on stucco/plaster and drywall. Due to the inaccessible ceiling height, poor condition, and high friability and potential for ACM fiber release and human exposure potential; EBI did not collect samples of the fireproofing in the Kmart. The suspect ACM samples collected by EBI were submitted to Environmental Hazards Laboratory in Richmond, VA to be tested for the presence of asbestos by polarized light microscopy (PLM). The results of the laboratory analysis for asbestos of suspect ACM collected by EBI is pending at this time.

A previous ESA report noted that suspect PCB containing light ballast may be present at the Subject Property.

7.0 RECOMMENDATIONS

The following additional actions are recommended:

- Based upon the presence of asbestos containing materials (ACM), EBI recommends development and implementation of an asbestos Operations and Maintenance (O&M) Plan for the Subject Property. This O&M Plan provides the procedures and guidelines that, when used during facility cleaning, maintenance, and general operations, will minimize human exposure to asbestos fibers and minimize release of asbestos fibers to the environment. This O&M Plan is a long-term management approach. Estimated cost: $500

- EBI recommends that soil sampling and laboratory analysis be conducted for contaminants of concern should surface or subsurface soils be exposed during any future soil excavation activities.

- EBI recommends improved housekeeping of photochemical and waste chemical storage and placement of secondary containment beneath all photochemicals and photochemical waste in order to mitigate a release of chemicals to the flooring.

- Unlabeled fluorescent lights should be assumed to contain PCB's. Unlabeled ballasts and used lamp tubes should be handled and disposed of in accordance with local, state, and federal regulations.

8.0 REFERENCES

8.1 REFERENCES CONTACTED

A number of sources were contacted during the preparation of this *Report*. The following individuals were interviewed, and state, county or local municipal departments consulted. Documentation applicable to the Subject Property in those departments was requested and reviewed when and where reasonably ascertainable, as detailed in ASTM E-1527-00. Individuals listed without phone numbers were contacted in person or by e-mail.

LOS ANGELES CITY FIRE DEPARTMENT

FIRE PROTECTION EQUIPMENT PERFORMANCE CERTIFICATE

THIS PAGE BY ITSELF IS NOT A COMPLETE DOCUMENT

DATE(S) OF TESTING	TEST SITE ADDRESS: (street)	(CITY)	(STATE)	(ZIP)	FIRM or O.S.A.:
11/15/01	6301-6360 W. 3rd St.	Los Angeles	Ca.	90046	Arba Group

EQUIPMENT TESTED AND DESCRIPTION:

Automatic Fire Sprinkler System

NOTEWORTHY CHARACTERISTICS, SYSTEM DESCRIPTION, PROCEDURES PERFORMED, AND DEFECTS FOUND IN EQUIPMENT TESTED (IF NONE, SO NOTE).

Local Alarm (ITV) Bell Test - FAIL - (see defects)
Backflush of the fire dept. connection performed.
Spare sprinkler heads and wrench present - SEE DEFECTS
DEFECTS:

1) Sav-on Drug Store - 6360
   a) Spare sprinkler head box is missing the following components: one 165F pendant head, two 165F uprights, two 280F uprights, and two 360F pendants.
   b) OS&Y control valve is missing break lock and chain and a sign indicating are controlled (6360 entire only.)
   c) Doors leading to the control valve (located in the basement) are missing directional signs indicating the location to the sprinkler riser.
   d) Main floor area is missing 3 escutcheon skirts on sprinkler heads.
   e) Fire dept connection is missing sign "Feeds 6302-6360 3rd St."
2) Vacant Store (under remodeling) - 6350
   a) The underground sectional control valve (located outside the southeast entrance) is unidentified. Recommend sign to be placed on the building showing location (sectional control valve with arrow pointing downward.
   b) Electronic water flow device and tamper switch currently not tied to a central station monitoring panel (wires cut and previous panel removed.)
   c) Main control valve is missing a sign identifying area controlled (6350 only.)
   d) Control valve is missing a break lock and chain.
   e) Due to tenant space of approx. 30,000 square feet in size (which is currently under remodel) numerous drops (200) with ceiling removed are below and will obstruct upright sprinkler heads from operating properly.

   NOTE: Riser control valve was found two thirds closed during testing. Valve must remain open at all times.
3) 16 Tenant Spaces - 6340-6332
   a) Missing sprinkler riser inside signs showing direction to the riser (loading dock access areas above door.)
   b) Main riser control valve is currently unsupervised. Requires electronic tamper device and break lock and chain.
   c) Missing a main control valve sign with area of control information (6340-6332 (16).)
   d) Spare sprinkler heads are missing near the riser: three 165F F/L type uprights, three 165F F/L pendants, and three 165F bulb type white frame.
   e) System side 300 PSI gauge is defective and gives incorrect readings.
4) Tenant Spaces - 6332-6310
   a) Riser control valve is missing area of control information sign (6332-6310.)
   b) Spare sprinkler head box is missing the following items: three 165F bulb white frame pendants, three 165F bulb chrome uprights, and three 165F F/L uprights.
   c) City feed side gauge is defective and requires replacement (gives improper reading.)
   d) Inside 6310 address five escutcheon skirts are missing.
5) K-Mart - 6302
   a) Riser control valve are missing signs indicating area of control (basement level and ground level) to be mounted on wall below each control valve.
   b) Riser room is extremely packed with storage which prohibits access to control valves (minimum of three feet wide path of clearance required.)

Re: Property Condition Report & Environmental Site Assessment Questionnaire for property known as or located at:

Town & Country Retail; 6310-6310 West Third Street, Los Angeles, CA

We have been requested by:	EBI Project #:	Subject:
Aetna	**24-1775**	**To complete an Engineering and Environmental survey of the above mentioned property.**

1. **Please assemble this original questionnaire and one copy of property plans and documents, and forward all information to the site or the site contact for the Engineer to use during the site visit. This documentation will be included in our reports.**
2. **Provide a second copy of property plans and documents to: EBI Consultants, 4A Street, Burlington, MA 01803, attention Production Department, and include the EBI project number shown above.**
3. **Please fill out this questionnaire to the best of your knowledge and FAX BACK TO (208) 955-2873 or EMAIL TO wysasi@ebiconsulting.com within three business days. Please remember to keep a copy of this questionnaire for the EBI Assessor who will be on site to perform the engineering assessment.**
4. **The Engineer and/or Scientist will contact you directly to schedule the site visit.**
5. **This information is extremely time sensitive and necessary to provide your lender with accurate and timely reports.**

EBI CONSULTING

RE: 24-1775 PROPERTY CONDITION REPORT PRE-SURVEY QUESTIONNAIRE

Please fill out and sign this questionnaire to the best of your knowledge for the Engineer or Scientist's site visit.

• Fax a copy to EBI at (208) 955-2873, or email to wysasi@ebiconsulting.com for our report files, and keep the original to provide to the Engineer. • Additional plans and documents (see page 2) must be forwarded to the site for the Engineer or Scientist during the survey.

For questions not applicable to the subject property, please respond "N/A." Attach additional pages if necessary. This document and your responses to it will be included as an exhibit in the reports. Accurate and full completion of this Questionnaire is critical to a timely completion of our reports, and timely closing of your loan.

Subject Property Name: Town & Country Shopping Center

Address: 6300-6370 W. 3rd Street; 300 S. Fairfax Avenue; and 300 S. Ogden Drive

Subject Property Owner: Third Fairfax, LLC **Purchase Date:**

On-Site Property Contact: See Below **Telephone:** (323) 651-1808

LOCAL JURISDICTIONAL INFORMATION

1. What is the property ID #, Lot and Block, or Township/Range ID #? See attached legal description
2. What is the legal Municipality or County that has jurisdiction over the property? City of Los Angeles

PROPERTY INFORMATION

3. What is the size of the subject property lot or lots, in acres? ± 7.5 acres
4. How many parking spaces are present at the property? ± 487
5. How many buildings comprise the subject property? Three ?
6. What is the gross and net rentable square footage of the building(s)? 228,390
7. What is the date of construction of the building(s)? When was the building(s) first occupied? ± 1961
8. How many tenants are present? See attached Tenant List
   a. If the property is apartments, please provide a unit and type count by bedroom and square feet. N/A
9. Please list, to the best of your knowledge, any deficiencies or problems with the site, parking area, amenities or utilities. None Known
10. Please list, to the best of your knowledge, any structural, water infiltration, mold, roof, plumbing, HVAC, Fire Alarm or electrical deficiencies or problems. None Known

Does the property have	Y or N	Does the property have	Y or N
Polybutylene piping	?	Compressed wood or composite board siding	?
Galvanized steel water lines	?	EIFS exterior finishes	NO
ABS sanitary lines	?	Fire Retardant Treated plywood	?
Aluminum branch wiring	?	Cadet/Encore electric heaters installed 1982-99	?
Omega (Central or CSC) brand sprinkler heads	?	GE or Hotpoint dishwashers installed 1983-89	?

11. During the last five years, have any major capital improvements been made to the site or building(s)? If so, please explain, with the approximate cost. See attached

12. Please list any deficiencies noted during any Building, Fire or Health Department inspections in the last three years. See attached LA City Fire Sept. Inspection & Follow-up Inspection Clearance.

13. When were the fire alarm systems and/or sprinkler system (if any) last tested? Alarm 6/03: Sprinkler 1/03

14. Please list the following utility providers:

Electricity: LA DWP

Water: LA DWP

Storm Drainage: City of Los Angeles

Sanitary Sewer: City of Los Angeles

Natural Gas or Oil: The Gas Co.

Trash Hauler: Consolidated and, Frequency of Pick-ups: 3 times - weekly

15. If you are performing or planning any repairs or replacement work to the property that will exceed an aggregate cost of $2,000 please explain, with the approximate cost. N/A

16. Please list the responsible party for tenant improvements and maintenance of major systems (if applicable).

Varies by Tenant. All tenants are responsible for their own HVAC. K-MART & Whole Foods are responsible for their own roofs. See leases for details.

17. Please attach a brief history of the property. This information helps us properly assess, evaluate and understand your property, and will assist in the financial analysis. The information should include:

- The date of approvals and construction, the contractor who built the property
- History of major capital improvements, repairs, additions or modifications
- History of fires or violations
- A list of any ongoing maintenance issues
- Tenant history, approximate turnover rate

DOCUMENT AND INFORMATION CHECKLIST

Please provide the following information so the Engineer or Scientist can proceed with the survey of the property. Asterisk (*) items are critical to report completion. The documents will become exhibits in the Consultant's report.

A. Plans	B. Municipal Documents	C. Additional Information
ALTA Survey or Site Plan*	Certificate of Occupancy*	Capital expense report for 1 to 3 years*
Architectural Building Plans*	Building Permit*	Tenant Rent Roll*
Extremely critical for properties in Seismically active zones 3 and 4* *STRUCTURAL PLANS – **Seismic Assessments are required for these properties. Structural drawings must be provided at the time of the site visit. If no drawings are provided, the report will be delayed and the Seismic Assessment may be overly conservative.***	Copy of tax cards	
	Copy of violations	Schedule of Floor Area Measurements - Gross and Rentable Square Feet
	B-1 NYC Projects	History of recent improvements
	*Department of Building Violations *Environmental Control Board Violations *Local Law 11 Facade Reports	Previous Due Diligence or Building Component (i.e., roof) Reports
Reduced scale Site and Building Plans		Copy of most Recent Appraisal

EBI ACCESS REQUIREMENTS

At the time of the site visit the Consultant is required to gain access to <u>all</u> areas of the property. This includes:

- All building roofs, unless pitched asphalt shingles. This may require you to obtain and provide a ladder.
- All building perimeters
- All site amenities
- All building interiors, including common areas, lobbies, garages, community rooms, exercise rooms, pool areas, storage rooms, attics and basements, if applicable, and a representative sampling of offices, retail spaces, manufacturing or assembly areas, or apartments.
- All mechanical, electric, sprinkler, HVAC, utility, service, elevator, storage and equipment rooms

ENVIRONMENTAL SITE ASSESSMENT PRE- SURVEY QUESTIONNAIRE

1. Describe the current uses of the property noting tenant names and oil/chemical usage. Retail Shopping Center – See Tenant List

2. Describe the past uses of the property noting tenant names and oil/chemical usage. Unknown

3. (Y) (N) Has a previous environmental site assessment report been prepared for the property? If yes, for what reason? Can EBI have a copy? Previously submitted

4. (Y) (N) Has a subsurface investigation ever been conducted on the property, including soil sampling, groundwater sampling, or installation of groundwater monitoring wells? If yes, for what reason? What were the results? Can EBI have a copy of the report? Are there any groundwater monitoring wells currently located on the property? Previously Submitted

5. (Y) (N) Has there ever been previous sampling for Asbestos, Lead-Based Paint, Lead in Water, or Radon? If yes, please describe. Previously Submitted

6. (Y) (N) Any known environmental liens, deed restrictions, or use limitations for the Property? If yes, please describe. None Known

7. (Y) (N) Any permitted or regulated activities (Hazardous waste generator, air) on the Property? If yes, please describe. Unknown

8. (Y) (N) Are there any transformers or other electrical equipment, which may contain PCBs? If yes, please describe. Where are they? Who owns the transformer(s)? Who services them? Unknown

9. (Y) (N) Has an industrial or manufacturing operation, gas station, motor repair facility, commercial printing facility, dry cleaners, photo-developing laboratory, junk yard, landfill or waste, treatment, storage, disposal processing or recycling facility ever been located at **or** adjacent to the property? If yes, please describe. Two current tenants have photo processing; unknown if other listed uses were present.

10. (Y) (N) Are there any discarded drums, barrels or containers, construction debris, damaged or discarded automobile or industrial batteries, or pesticides, paints or other chemicals in individual containers or drums of greater than five gallons or fifty gallons in aggregate located on the property? If yes, please describe. ?

11. (Y) (N) Have there ever been any waste storage or treatment lagoons, pits, ponds, or surface impoundments on the property? If yes, please describe. None Known

12. (Y) (N) Does the property have floor drains not discharging to a sewer? Septic System? If yes, please describe. Unknown

13. (Y) (N) Are there currently aboveground or underground storage tanks at the property? If yes, complete table. Unknown

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

CVS PHARMACY NO 9661	*6360 W THIRD ST*	*NNW 0 - 1/8 (0.050 mi.)*	*3*	*10*

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there are 5 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there is 1 CA UST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CA SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the CA SCH list, as provided by EDR, and dated 10/31/2016 has revealed that there is 1 CA SCH site within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 6 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Case Type:	Cleanup Program Site
Case Worker:	KL
Local Agency:	Not reported
RB Case Number:	0898
File Location:	Regional Board
Potential Media Affected:	Indoor Air, Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Not reported
Site History:	The Grove is a 16-acre commercial development site, has been historically related to oil production operations. Soil, soil gas, and groundwater beneath the property are impacted by petroleum hydrocarbons. No free product is present at the site. No municipal supply well is located within three miles from the site. Shallow aquifer is at 5 to 25 feet below grade. Several phases of environmental assessments including health risk assessment and remediation were conducted through 2000. Site soil gas mitigation system under residential landuse including vapor barrier and venting system for indoor air exposure pathway was permitted and installed. The complete site improvements satisfied human health protection requirements. The site has been redeveloped as commercial land-use prevents additional excavation.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

WORLD OIL CO (Continued) **1000278377**

corrective action activities required under RCRA.

Case Type: Cleanup Program Site
Case Worker: BA
Local Agency: Not reported
RB Case Number: 1236
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Benzene, Tetrachloroethylene (PCE), Toluene, Trichloroethylene (TCE), MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: The site consists of a rectangular parcel of land occupied by an L-shaped shopping center building. Historical aerial photographs show that the site was vacant prior to at least 1928. It was then occupied by an auto repair and gas station from approximately 1933 to 1985. The gas station maintained three underground storage tanks (USTs) with storage capacities of 1,000 gallons, 3,000 gallons, and 5,000 gallons, respectively. The USTs were removed in approximately 1985 when the gas station was demolished for the construction of the shopping center. After the construction of the shopping center, a dry

AL SIMON (Continued) **S101585566**

cleaner occupied one of the units of the building and operated from approximately 1987 to 1991. According to site assessment reports submitted to the Regional Board, the soil and groundwater beneath the site are contaminated with low level volatile organic compounds (VOCs) and petroleum hydrocarbons. After evaluation of the site assessment data and the results of a human health risk assessment, the site has been closed with a deed restriction on the property for commercial/inductrial land use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/05/2016

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/05/2016

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/05/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/07/2017

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 03/02/2017

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database

The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

Date of Government Version: 10/05/2016

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

West Map:	5630733 BEVERLY HILLS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

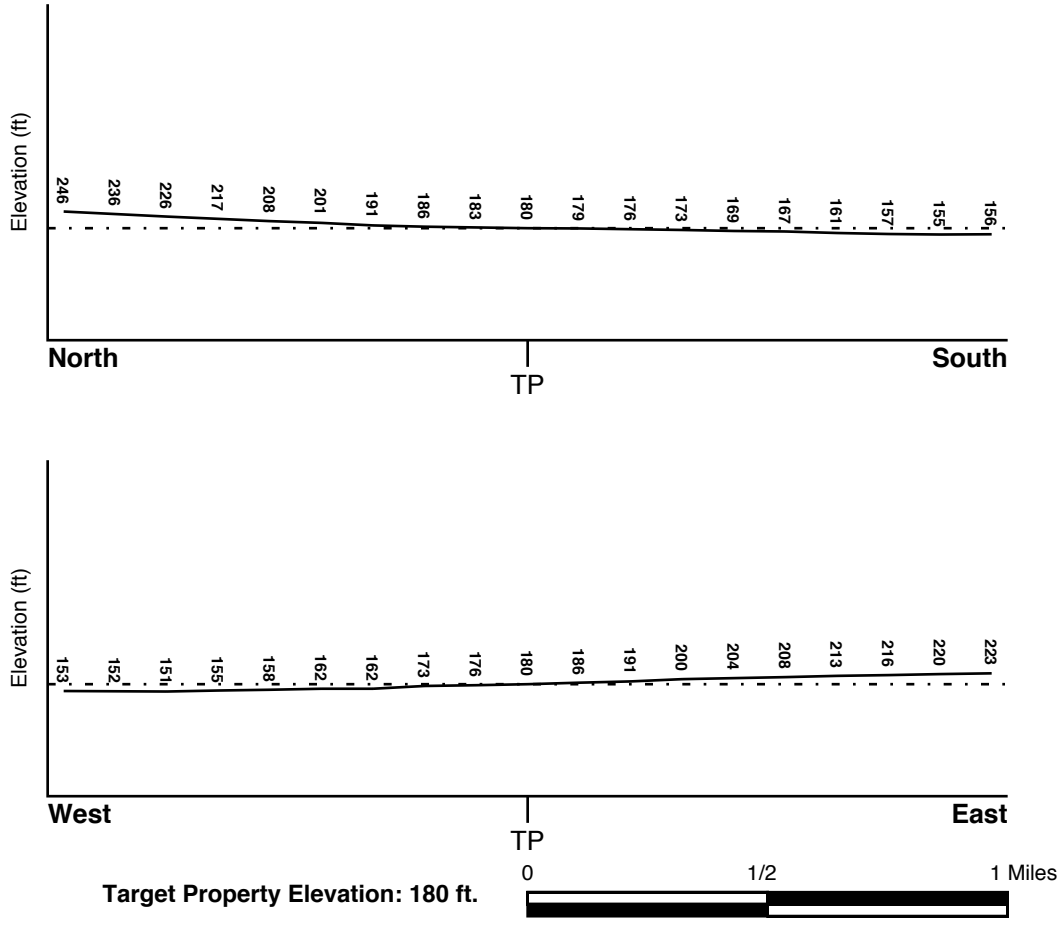
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1605F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1585F	FEMA FIRM Flood data
06037C1615F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
A1	1/2 - 1 Mile WSW	S
A2	1/2 - 1 Mile WSW	S

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

WELL SEARCH DISTANCE INFORMATION

DATABASE	SEARCH DISTANCE (miles)
Federal USGS	1.000
Federal FRDS PWS	Nearest PWS within 1 mile
State Database	1.000

FEDERAL USGS WELL INFORMATION

MAP ID	WELL ID	LOCATION FROM TP
No Wells Found		

FEDERAL FRDS PUBLIC WATER SUPPLY SYSTEM INFORMATION

MAP ID	WELL ID	LOCATION FROM TP
No PWS System Found		

Note: PWS System location is not always the same as well location.

Federal EPA Radon Zone for LOS ANGELES County: 2

Note: Zone 1 indoor average level > 4 pCi/L.
: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.
: Zone 3 indoor average level < 2 pCi/L.

Federal Area Radon Information for LOS ANGELES COUNTY, CA

Number of sites tested: 63

Area	Average Activity	% <4 pCi/L	% 4-20 pCi/L	% >20 pCi/L
Living Area - 1st Floor	0.711 pCi/L	98%	2%	0%
Living Area - 2nd Floor	Not Reported	Not Reported	Not Reported	Not Reported
Basement	0.933 pCi/L	100%	0%	0%

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish & Game
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
