Present Land Use/Zoning/General Plan Designation:

Project Description: *(please use a separate page if necessary)*

The EIR Addendum includes minor modifications to the Samoa Peninsula Wastewater Project. The modifications include replacing existing septic tanks and leachfields with septic tank effluent pump systems that pump treated effluent to the Samoa WWTF, abandon existing leachfields, demolish old tanks, and add a 1,590 foot pressure pipeline segment along Bay Street. At the WWTF, the approved treatment system would be changed to a moving bed biofilm reactor, solids dewatering would be eliminated, and new headworks would be installed, all within the existing facility footprint.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
