Project Title: Emergency Routine Maintenance at the Damon 1 and Garnet 2 Channels

Project Location: This project was located at two MWMP facilities within the Rose Creek-Garnet facility group, Garnet 2 and Damon 1. The Project sites are not located within but are adjacent to the Coastal Overlay Zone (COZ). Damon 1 is adjacent to the City's Multi-Habitat Planning Area (MHPA) and Garnet 2 is located within and adjacent to the City's MHPA, however no impacts occurred within the MHPA. Damon 1 is fully concrete-lined, and Garnet 2 is split with both fully concrete-lined and fully earthen sections. Emergency maintenance in FY 24 was limited to the fully concrete-lined section of Garnet 2. Garnet 2 and Damon 1 are part of Rose Creek which is located within the Mission Bay Watershed in the Pacific Beach Community Planning Area in Council District 2. The Garnet 2 segment is located northwest of the intersection of Garnet Avenue and Mission Bay Drive at approximately 32.807295, -117.220203. The Damon 1 segment is located north of the intersection of Garnet Avenue and Mission Bay Drive at approximately 32.808911, -117.219227.

Description of Previous Action: On June 9, 2020, the City of San Diego City Council certified the Final Environmental Impact Report (EIR) for the Municipal Waterways Maintenance Plan (MWMP). The Final EIR provided a project-level and program-level analysis for maintenance and repair activities of stormwater facilities in order to reduce and manage flood risk.

Description of Subsequent Action:

City of San Diego Development Services Department approval of a Substantial Conformance Review (SCR) for City of San Diego maintenance activities at the Garnet 2 and Damon 1 channels. The project includes an after-the-fact SCR for emergency maintenance activities at the Garnet 2 and Damon 1 channels The project components are discussed below.

Emergency Maintenance Activities:

This project includes completed emergency maintenance and repair activities within the Garnet 2 and Damon 1 facilities which were authorized under Emergency ESL Approval No. PMT-3304128. The Garnet 2 and Damon 1 facilities were not originally identified and analyzed at the project-level in the MWMP EIR, and as such no Facility Maintenance Plan (FMP) was prepared for the facilities. Damon 1 is fully concrete-lined, and Garnet 2 is fully concrete-lined where it connects to Damon 1 before transitioning into a fully earthen channel. Emergency maintenance was limited to the fully concrete-lined portion of the Garnet 2 facility.

A site evaluation of the Garnet 2 and Damon 1 facility segments was conducted by City engineers on January 24, 2024 to assess the levels of sediment, vegetation, and debris within the channels as a result of an intense storm and associated severe flooding that occurred on January 22, 2024. Due to

impending conditions and precipitation forecast to provide upwards of 0.58 inches of rain beginning the morning of February 1, 2024, emergency actions were deemed necessary to ensure areas blocking downstream flows within the channels were cleared of deposited debris to alleviate the threat to life and property. Additionally, a secondary storm event, which occurred from February 1st through 9th and brought up to 1.04 inches of precipitation. Due to the sudden nature of the emergency conditions, work was initiated as soon as possible at Garnet 2 and Damon 1 on March 29, 2024.

This project involved the removal of material (i.e., vegetation, sediment, and debris) from the Garnet 2 and Damon 1 channels to alleviate the emergency conditions caused by the heavy rainfall at the end of January 2024. The channels are concrete-bottomed with concrete-lined banks throughout the emergency maintenance area. City of San Diego and contractor crews removed sediment, vegetation, and debris utilizing excavators, bulldozers, bobcats, front-end loaders, and dump trucks staged both within the channels and above the banks of the facilities. All material was hauled to an approved disposal location (Miramar Landfill). The emergency project removed approximately 10,923 cubic yards (CY) (16,385 tons) of accumulated sediment, vegetation, and debris from approximately 379 linear feet (LF) of the concrete-lined segment of Garnet 2 and 685 LF of the concrete-lined segment of Damon 1. The emergency work at Garnet 2 and Damon 1 was completed on May 19, 2024 and represented the minimum impacts necessary to alleviate the threat to life and property due to the unexpected flood risk.

Project Applicant: City of San Diego, Stormwater Department, 2781 Caminito Chollas, MS 46, San Diego, CA 92105. Contact: Eddie Salinas, Deputy Director. Phone: (619)-527-7506. E-mail: ESalinas@sandiego.gov.

This is to advise that on June 9, 2026 the City of San Diego Development Services Department approved the above described project and made the following determinations:

1. The activity in its approved form will not have significant effects on the environment beyond those identified in the Final Environmental Impact Report (EIR) for the Municipal Waterways Maintenance Plan (Project No. 616992 / SCH No. 2017071022) which was certified by the City of San Diego City Council on July 9, 2020 (Resolution No. R-313080).

2. Mitigation measures ☒ were, ☐ were not, made a condition of the approval of the project and a mitigation, monitoring, and reporting program was adopted for the project.

3. (EIR only) Findings ☐ were, ☐ were not, made pursuant to CEQA Guidelines Section 15091 in association with the previously certified PEIR.

4. (EIR only) A Statement of Overriding Considerations ☐ was, ☐ was not, made in association with the previously certified PEIR.

5. A record of the project approval may be examined at the City of San Diego Development Services Department, located at 7650 Mission Valley Rd., San Diego, CA 9218.

The final environmental document listed above, including comments and responses, is available to the public on the City's CEQA webpage at https://www.sandiego.gov/ceqa/final.

Project Number: 616992 **State Clearinghouse Number:** 2017071022

Permit Numbers: COASTAL DEVELOPMENT PERMIT (CDP) No. 2392208
SITE DEVELOPMENT PERMIT (SDP) No. 2392210

Project Title: MUNICIPAL WATERWAYS MAINTENANCE PLAN & ASSOCIATED DISCRETIONARY ACTIONS

Project location: Citywide / City Council Districts 1-9. The City's municipal separate storm sewer system (MS4) or storm water system is distributed throughout the 342 square-mile metropolitan area. In general, the MS4 conveys storm water runoff from natural and developed areas to receiving waters. The City's MS4 system is an inter-connected system of constructed drains, pipes, and engineered channels that discharge to natural drainages and receiving waters. As a result, the physical characteristics vary with the individual components of the MS4.

Description of Action: CITY COUNCIL APPROVAL of a Coastal Development Permit (CDP) and Site Development Permit (SDP), and an Ordinance for implementation of the Municipal Waterways Maintenance Plan to allow for a subsequent approval process not required in the San Diego Municipal Code (SDMC).

The Municipal Waterways Maintenance Plan (MWMP) provides the regulatory guidance and parameters for the City of San Diego's (City) Transportation & Storm Water Department (TSW) to maintain and repair existing storm water facilities necessary to reduce and manage flood risk. The MWMP provides both a project-level and program-level analysis for the specific maintenance and repair activities in areas where potential local, state, and federally regulated impacts may be necessary and includes:

- A list of Facility Maintenance Plans (FMPs) that provide project-specific details and requirements for the majority of facilities that are likely to require routine maintenance and repair.
- A range of plan-wide activities that may occur throughout the storm water system where flood risks may arise and that will be conducted in accordance with a regulatory framework identified under the MWMP and associated permits.

Together, these two components provide operational flexibility while also providing specific, detailed analysis for the majority of anticipated maintenance and repair activities.

Project-Level Analysis (Facility Maintenance Plans): The MWMP identifies specific channels, ditches, storm drain structures (outlets/inlets), and basins that may require maintenance in the near future. This list of facilities is included in the MWMP for site-specific evaluation and project-level maintenance. For the project-level evaluation, the MWMP includes 66 FMPs (covering 111 segments and approximately 18 linear miles) that include the following:

- 50 channel/ditch groups – 94 segments
- 6 basins groups – 7 segments
- 10 structure groups covering 10 structures

Program-Level Analysis (Other Activities): The MWMP also includes a program-level analysis and process to handle and address other storm water assets or facilities that are not analyzed at the project-level, as well as certain plan-wide maintenance activities that may also be implemented under the MWMP. The MWMP establishes a process and mitigation framework to address these potential additional related plan-wide programmatic activities, including:

- Minor maintenance activities
- Changed conditions for new or substantially amended FMPs
- Compensatory mitigation sites
- Emergency maintenance or repair

For the plan-wide programmatic evaluation, the following facilities comprise the City's storm water system:

- Approximately 50 miles of channels, ditches, and basins
- 48,561 drainage conveyance facilities (including storm drain pipes and channels)
- 55,334 structures (including inlets, outlets, cleanouts, and connectors)
- 3,724 drainage best management practice (BMP) facilities
- 85 Capital Improvement Program facilities (outlets, BMPs, and stream restoration)

Project Applicant: City of San Diego, Transportation and Storm Water Department, Storm Water Division, 2781 Caminito Chollas, MS 46, San Diego, CA 92105, Contact: Anne Jarque, Senior Planner/Project Manager, (619) 527-7507.

This is to advise that the City of San Diego City Council on 06/09/2020 approved the above described project and made the following determinations: R-313080

1. The project in its approved form X will ___ will not, have a significant effect on the environment.
2. X An Environmental Impact Report was prepared for this project and certified pursuant to the provisions of CEQA.
3. Mitigation measures X were, ___ were not, made a condition of the approval of the project.
4. (EIR only) Findings X were, ___ were not, made pursuant to CEQA Guidelines Section 15091.
5. (EIR only) A Statement of Overriding Considerations X was, ___ was not, adopted for this project.

Record of project approval may be examined at the address above

It is hereby certified that the final environmental report, including comments and responses, is available to the general public at the office of the Planning Department, 9485 Aero Drive, MS 413, San Diego, CA 92123.
