it's positively clear.

REVISED NOTICE OF PREPARATION (SCH # 2017051076)

LANCASTER HEALTH DISTRICT MASTER PLAN

(GENERAL PLAN AMENDMENT NO. 17-03/ZONE CHANGE NO. 17-03)

DATE: APRIL 1, 2020

TO: STATE CLEARINGHOUSE AND INTERESTED PARTIES

FROM: CITY OF LANCASTER DEVELOPMENT SERVICES DEPARTMENT, COMMUNITY DEVELOPMENT DIVISION

SUBJECT: REVISED NOTICE OF PREPARATION (NOP) OF A DRAFT ENVIRONMENTAL IMPACT REPORT FOR LANCASTER HEALTH DISTRICT MASTER PLAN (SCH # 2017051076)

The City of Lancaster is releasing a revised NOP for the Lancaster Health District Master Plan as a result of a significant increase in the amount of development to be allowed through the Master Plan. All comments submitted will be added to those previously received and included in the Draft EIR. The 30-day comment period for the revised NOP is from March 20, 2020 to April 20, 2020. No additional scoping meetings will be held.

Pursuant to Section 15082(a) of the California Environmental Quality Act, the City of Lancaster is the Lead Agency in charge of environmental review for the proposed Lancaster Health District Master Plan ("Project"). The City has determined that an Environmental Impact Report (EIR) shall be prepared to evaluate potential effects on the environment. The City is soliciting comments from reviewing agencies and the public regarding the scope and content of the EIR. For reviewing agencies, the City requests comments with respect to your agency's statutory authority pertaining to the proposed Project. Your agency may need to use the EIR prepared by the City when considering any applicable permits or other approvals for the Project. The City is also seeking comments from residents, property owners, and other interested parties regarding the potential environmental effects the City should address in this EIR.

Comment Period: Comments may be sent anytime during the 30-day NOP comment period. The original NOP review and comment period started on May 31, 2017 and ended on June 29, 2017. The review and comment period for the Revised NOP starts on **April 1, 2020** and ends on **May 1, 2020**. All comments must be received during the comment period and no later than 6 p.m. on May 1, 2020. Please include the name of a contact period for your agency, if applicable. All comments should be directed to:

City of Lancaster
Attn: Jocelyn Swain, Senior Planner
44933 Fern Avenue
Lancaster, CA 93534

Comments may also be emailed to jswain@cityoflancasterca.org or faxed to (661) 723-6182.

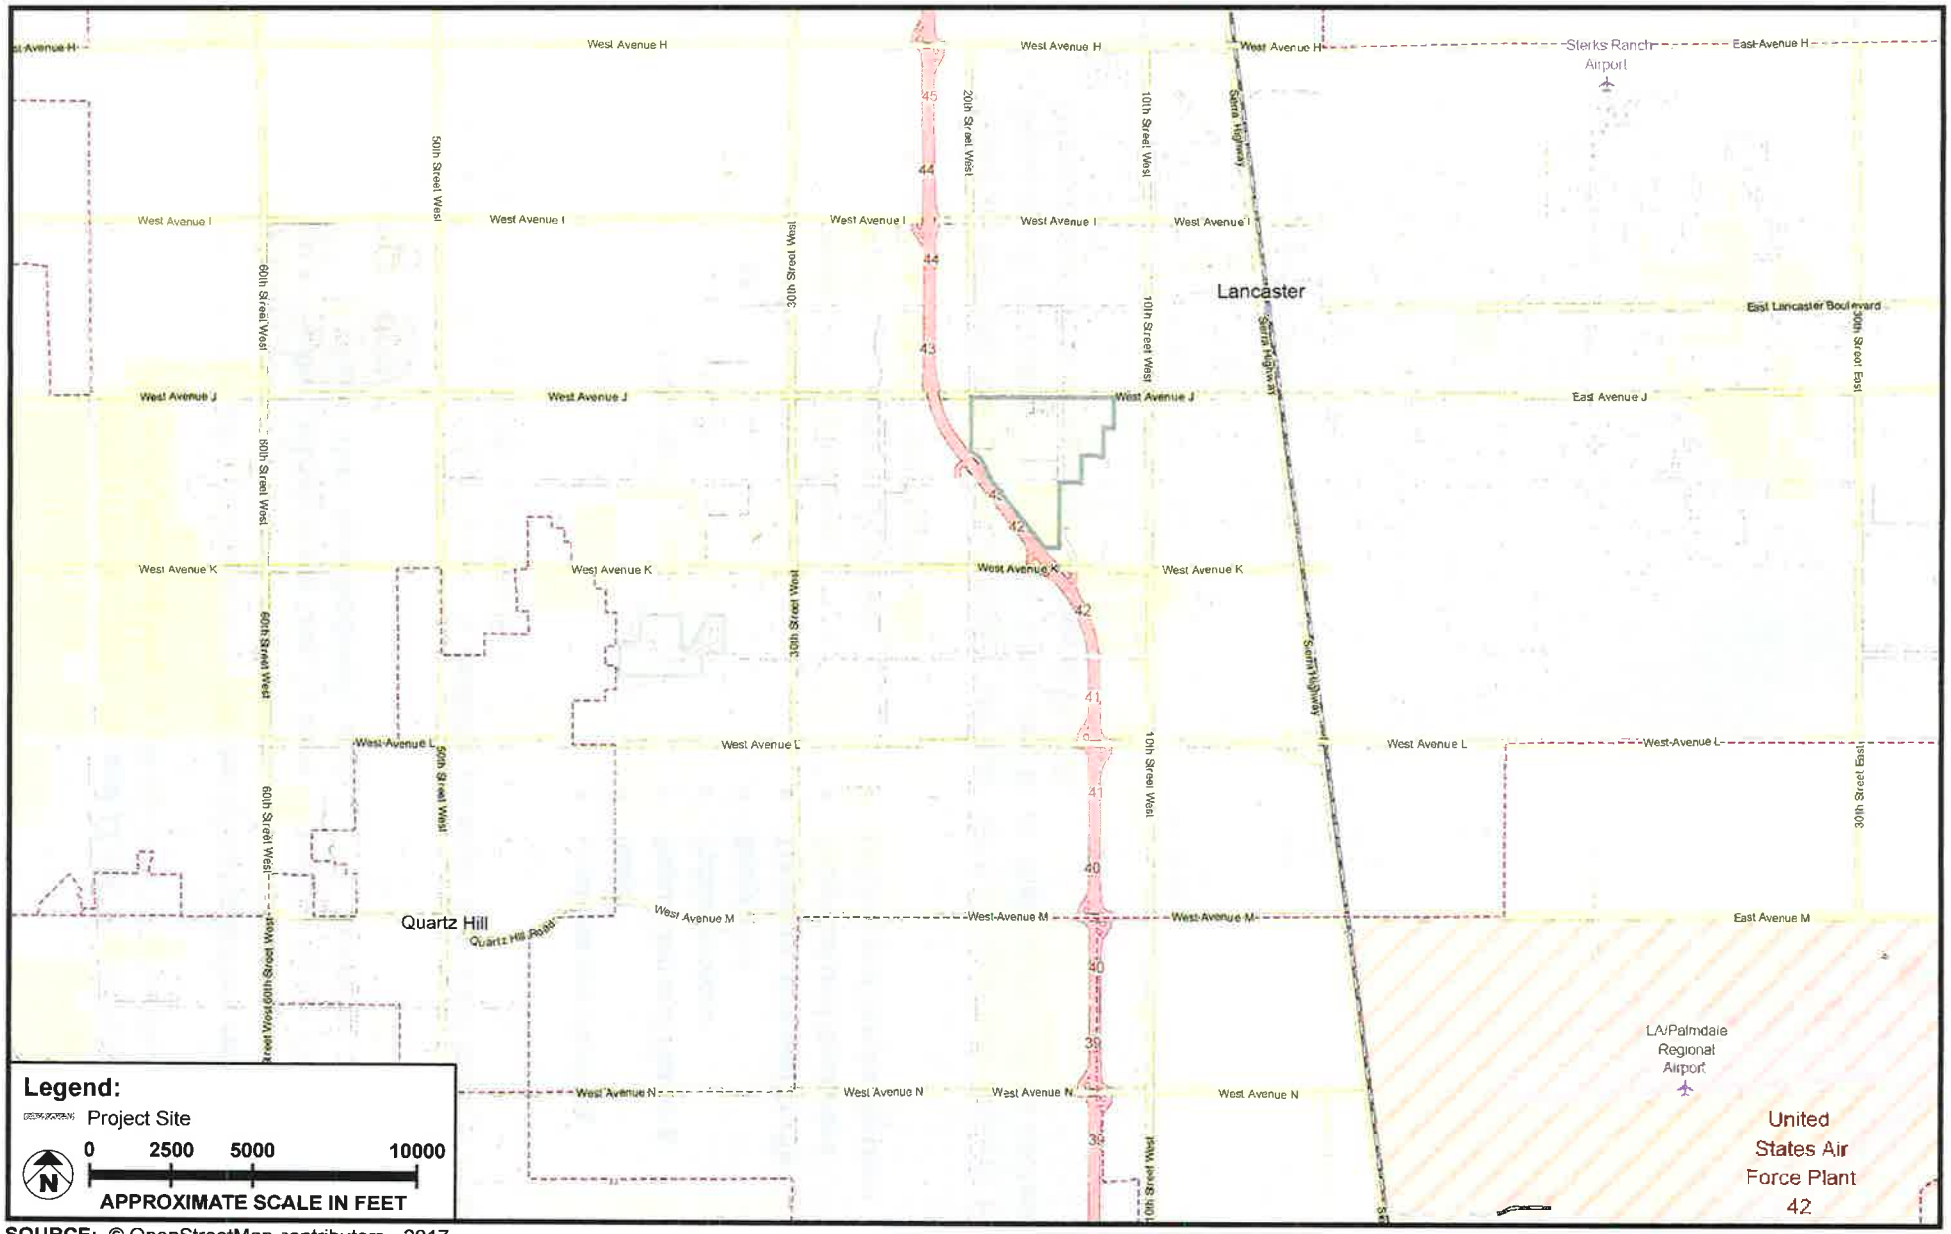
Scoping Meeting: A scoping meeting was previously held on Wednesday, May 31, 2017 at the Cedar Center for the Arts located at 44851 Cedar Avenue, Lancaster, California 93534. No additional scoping meetings have been scheduled for this project.

Project Location: The Lancaster Health District Master Plan addresses approximately 288 gross acres in the central portion of the City of Lancaster ("project site"). Specifically, the project site is located south of Avenue J; north of Avenue K; east of 20th Street West and State Route 14; and west of Kingtree Avenue (see Figures 1 and 2). The proposed project encompasses the following assessor's parcel numbers: 3123-001-004, 005, 028, 042, 045, 062, 068, 069, 901, 904, 908, 909, 912, 914, 915, 917, 920 to 922; 3123-002-031, 032, 034, 047, 050, 051, 059 thru 066, 903, 907, 909; 3123-003-086 thru 089, 094 thru 101; 3123-004-024, 027, 037, 038, 040, 042, 045 thru 048, 903, 904, 907 thru 910; 3123-012-015, 041; 3123-013-036, 041, 068, 101, 900, 901; 3123-014-900 thru 916; 3123-015-026 thru 028, 030, 033, 035, 900 thru 908; and 3123-016-004, 005, 085, 904, 905.

Existing Environmental Conditions: The project site consists of land developed with a variety of commercial, retail, and medical facilities, as well as vacant land, undeveloped land containing native and nonnative vegetation, including several ornamental trees. The existing Antelope Valley Hospital is located in the north-central portion of the project site. The Amargosa Creek/flood control channel forms the southwestern boundary and intersects the southern portion of the project site. The project site is surrounded by developed areas and has been disturbed from compaction of soil, dumping and excavation, off-road vehicle use, and other man-made disturbances.

Project Description: The City of Lancaster is proposing to develop the Lancaster Health District Master Plan, which would provide direction for development around the Antelope Valley Hospital over a 20-year period. Mixed-use development is proposed including medical and general offices, retail and commercial uses, housing, and hotel/conference space. The Master Plan defines a vision for the long-term improvements that would enable the City and Antelope Valley Hospital to transform the existing urban character toward a pedestrian-oriented, transit-oriented, mixed-use district that would support medical institutions and health-related businesses.

The maximum development allowed by the Master Plan will be analyzed in the EIR to provide a conservative estimate of the potential impacts from the Project. Specifically, the Master Plan would allow for the development of 1,600 residential units; 259,200 sf of hotel uses (180 rooms) and a 70,000 sf conference center; 740,000 sf of commercial/office space; 480,000 sf of continuum of care facilities; 791,000 sf of acute care facilities including replacing the existing



hospital with a new 700,000 sf facility (380 beds) and 12,000 sf plant facility; 249,800 sf of sub-acute care facilities and a 385,000 sf parking car garage with 1,100 parking spaces.

The City of Lancaster will consider approval of the following actions related to the proposed Lancaster Health District Master Plan: 1) General Plan Amendment to change the land use designation to Health District Mixed Use; 2) Zone Change to Health District Mixed Use and Health District Mixed Use Neighborhood; and 3) the formation of an infrastructure Maintenance District.

Scope of the EIR: The City proposes to evaluate potential significant impacts related to the following environmental topics in the EIR:

- Aesthetics
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology and Soils
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Noise
- Population and Housing
- Public Services
- Recreation
- Transportation and Traffic
- Tribal Cultural Resources
- Utilities and Service Systems

Based on the site, the proposed Project will not result in significant impacts to Mineral Resources or Agricultural and Forestry Resources; there, these topics will be addressed in the Effects Found Not to be Significant section of the EIR.

Re: 2017051076, Lancaster Health District Master Plan NOP (Revised) Project, Los Angeles County

Dear Ms. Swain:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b)). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1)). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements.** If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.

AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project: Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

a. A brief description of the project.

b. The lead agency contact information.

c. Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).

d. A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).

2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report: A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subds. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1(b)).

a. For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).

3. Mandatory Topics of Consultation If Requested by a Tribe: The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

a. Alternatives to the project.

b. Recommended mitigation measures.

c. Significant effects. (Pub. Resources Code §21080.3.2 (a)).

4. Discretionary Topics of Consultation: The following topics are discretionary topics of consultation:

a. Type of environmental review necessary.

b. Significance of the tribal cultural resources.

c. Significance of the project's impacts on tribal cultural resources.

d. If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).

5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process: With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).

6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document: If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

a. Whether the proposed project has a significant impact on an identified tribal cultural resource.

b. Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

7. Conclusion of Consultation: Consultation with a tribe shall be considered concluded when either of the following occurs:

a. The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or

b. A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).

8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document: Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).

9. Required Consideration of Feasible Mitigation: If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b).. (Pub. Resources Code §21082.3 (e)).

10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:

a. Avoidance and preservation of the resources in place, including, but not limited to:

i. Planning and construction to avoid the resources and protect the cultural and natural context.

ii. Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.

b. Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:

i. Protecting the cultural character and integrity of the resource.

ii. Protecting the traditional use of the resource.

iii. Protecting the confidentiality of the resource.

c. Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.

d. Protecting the resource. (Pub. Resource Code §21084.3 (b)).

e. Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).

f. Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).

11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource: An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:

a. The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.

b. The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.

c. The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf

SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf.

Some of SB 18's provisions include:

1. Tribal Consultation: If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).
2. No Statutory Time Limit on SB 18 Tribal Consultation. There is no statutory time limit on SB 18 tribal consultation.
3. Confidentiality: Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).
4. Conclusion of SB 18 Tribal Consultation: Consultation should be concluded at the point in which:
    a. The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
    b. Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: http://nahc.ca.gov/resources/forms/.

NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center (http://ohp.parks.ca.gov/?page_id=1068) for an archaeological records search. The records search will determine:
    a. If part or all of the APE has been previously surveyed for cultural resources.
    b. If any known cultural resources have already been recorded on or adjacent to the APE.
    c. If the probability is low, moderate, or high that cultural resources are located in the APE.
    d. If a survey is required to determine whether previously unrecorded cultural resources are present.

2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.
    a. The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
    b. The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

3. Contact the NAHC for:
   a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.
   b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.

4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.
   a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, §15064.5(f) (CEQA Guidelines §15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.
   b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.
   c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, §15064.5, subdivisions (d) and (e) (CEQA Guidelines §15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

Subject: Revised Notice of Preparation of a Draft Environmental Impact Report for Lancaster Health District Master Plan, SCH #2017051076, City of Lancaster, Los Angeles County

Dear Ms. Swain:

The California Department of Fish and Wildlife (CDFW) has reviewed the above-referenced Notice of Preparation (NOP) for the Lancaster Health District Master Plan (Project). Thank you for the opportunity to provide comments and recommendations regarding those activities involved in the Project that may affect California fish and wildlife. Likewise, we appreciate the opportunity to provide comments regarding those aspects of the Project that CDFW, by law, may be required to carry out or approve through the exercise of its own regulatory authority under the Fish and Game Code.

CDFW's Role

CDFW is California's Trustee Agency for fish and wildlife resources and holds those resources in trust by statute for all the people of the State [Fish & Game Code, §§ 711.7, subdivision (a) & 1802; Public Resources Code, § 21070; California Environmental Quality Act (CEQA) Guidelines, § 15386, subdivision (a)]. CDFW, in its trustee capacity, has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species (Id., § 1802). Similarly, for purposes of CEQA, CDFW is charged by law to provide, as available, biological expertise during public agency environmental review efforts, focusing specifically on projects and related activities that have the potential to adversely affect State fish and wildlife resources.

CDFW is also submitting comments as a Responsible Agency under CEQA (Public Resources Code, § 21069; CEQA Guidelines, § 15381). CDFW expects that it may need to exercise regulatory authority as provided by the Fish and Game Code, including lake and streambed alteration regulatory authority (Fish & Game Code, § 1600 *et seq*.). Likewise, to the extent implementation of the Project as proposed may result in "take", as defined by State law, of any species protected under the California Endangered Species Act (CESA) (Fish & Game Code, § 2050 *et seq.*), or CESA-listed rare plant pursuant to the Native Plant Protection Act (NPPA; Fish & Game Code, §1900 et seq.), CDFW recommends the Project proponent obtain appropriate authorization under the Fish and Game Code.

DocuSign Envelope ID: 8FAA4E27-AD2C-4AF8-B7B4-69C48D3B5BAE

Project Description and Summary

Objective: The City of Lancaster (City) is proposing the Project, which would provide direction for development around the Antelope Valley Hospital over a 20-year period. Mixed-use development is proposed, including medical and general offices, retail and commercial uses, housing, and hotel/conference space. The Project would allow for the development of 1,600 residential units; 259,200 square feet (ft^2) of hotel uses and a 70,000 ft^2 conference center; 740,000 ft^2 of commercial/office space; 480,000 ft^2 of continuum of care facilities; 791,000 ft^2 of acute care facilities including replacing the existing hospital with a new 700,000 ft^2 facility (380 beds) and 12,000 ft^2 plant facility; 249,800 ft^2 of subacute care facilities and a 385,000 ft^2 parking car garage.

Location: The Project addresses approximately 288 gross acres in the central portion of the City of Lancaster. Specifically, the Project site is located south of Avenue J; north of Avenue K; east of 20th Street West and State Route 14; and west of Kingtree Avenue. The proposed Project encompasses the following assessor's parcel numbers: 3123-001-004, 005, 028, 042, 045, 062, 068, 069, 901, 904, 908, 909, 912, 914, 915, 917, 920 to 922; 3123-002-031, 032, 034, 047, 050, 051, 059 through 066, 903, 907, 909; 3123-003-086 through 089, 094 through 101; 3123-004-024, 027, 037, 038, 040, 042, 045 through 048, 903, 904, 907 through 910; 3123-012-015, 041; 3123-013-036, 041, 068, 101, 900, 901; 3123-014-900 through 916; 3123-015-026, 027, 028, 030, 033, 035, 900 through 908; and 3123-016-004, 005, 085, 904, 905.

Comments and Recommendations

CDFW offers the comments and recommendations below to assist the City in adequately identifying, avoiding and/or mitigating the Project's significant, or potentially significant, direct and indirect impacts on fish and wildlife (biological) resources.

Specific Comments

1) Nesting Birds. Based on a review of satellite imagery, there is scattered vegetation throughout the Project site that may provide potential habitat where Project activities may impact nesting birds. Project activities occurring during the breeding season of nesting birds could result in the incidental loss of fertile eggs, or nestlings, or otherwise lead to nest abandonment in trees directly adjacent to the Project boundary. The Project could also lead to the loss of foraging habitat for sensitive bird species.

    - CDFW recommends that measures be taken to avoid Project impacts to nesting birds. Migratory nongame native bird species are protected by international treaty under the Federal Migratory Bird Treaty Act (MBTA) of 1918 (Code of Federal Regulations, Title 50, § 10.13). Sections 3503, 3503.5, and 3513 of the California Fish and Game Code prohibit take of all birds and their active nests including raptors and other migratory nongame birds (as listed under the Federal MBTA).

    - Proposed Project activities including (but not limited to) staging and disturbances to native and nonnative vegetation, structures, and substrates should occur outside of the avian breeding season which generally runs from February 15 through August 31 (as early as January 1 for some raptors) to avoid take of birds or their eggs. If avoidance of the avian breeding season is not feasible, CDFW recommends surveys

DocuSign Envelope ID: 8FAA4E27-AD2C-4AF8-B7B4-69C48D3B5BAE

by a qualified biologist with experience in conducting breeding bird surveys to detect protected native birds occurring in suitable nesting habitat that is to be disturbed and (as access to adjacent areas allows) any other such habitat within 300-feet of the disturbance area (within 500-feet for raptors). Project personnel, including all contractors working on site, should be instructed on the sensitivity of the area. Reductions in the nest buffer distance may be appropriate depending on the avian species involved, ambient levels of human activity, screening vegetation, or possibly other factors.

2) Landscaping. As part of this redevelopment plan, landscaping will occur throughout the 288-acre site for aesthetic purposes. Habitat loss and invasive plants are a leading cause of native biodiversity loss. Invasive plant species spread quickly and can displace native plants, prevent native plant growth, and create monocultures. CDFW recommends using native, locally appropriate plant species for landscaping on the Project site. CDFW recommends invasive/exotic plants, such as pampas grass (*Cortaderia selloana*) and salt cedar (*Tamarisk spp*.), be restricted from use in landscape plans for this Project. A list of invasive/exotic plants that should be avoided as well as suggestions for better landscape plants can be found at https://www.cal-ipc.org/solutions/prevention/landscaping/

3) Biological Baseline Assessment. Page 2 of the NOP states that "The Project site consists of land developed with a variety of commercial, retail, and medical facilities, as well as vacant land, undeveloped land containing native and nonnative vegetation, including several ornamental trees." Undisturbed land may be considered sensitive habitat or may provide suitable habitat for special status or regionally and locally unique species. CDFW recommends providing a complete assessment and impact analysis of the flora and fauna within and adjacent to the Project area, with emphasis upon identifying endangered, threatened, sensitive, regionally and locally unique species, and sensitive habitats. Impact analysis will aid in determining any direct, indirect, and cumulative biological impacts, as well as specific mitigation or avoidance measures necessary to offset those impacts. CDFW recommends avoiding any sensitive natural communities found on or adjacent to the Project. CDFW also considers impacts to Species of Special Concern a significant direct and cumulative adverse effect without implementing appropriate avoid and/or mitigation measures. The DEIR should include the following information:

   a) Information on the regional setting that is critical to an assessment of environmental impacts, with special emphasis on resources that are rare or unique to the region [CEQA Guidelines, § 15125(c)]. The DEIR should include measures to fully avoid and otherwise protect Sensitive Natural Communities from Project-related impacts. Project implementation may result in impacts to rare or endangered plants or plant communities that have been recorded adjacent to the Project vicinity. CDFW considers these communities as threatened habitats having both regional and local significance. Plant communities, alliances, and associations with a state-wide ranking of S1, S2, S3 and S4 should be considered sensitive and declining at the local and regional level. These ranks can be obtained by visiting https://www.wildlife.ca.gov/Data/VegCAMP/Natural-Communities#sensitive%20natural%20communities;

   b) A thorough, recent, floristic-based assessment of special status plants and natural communities, following CDFW's *Protocols for Surveying and Evaluating Impacts to*

DocuSign Envelope ID: 8FAA4E27-AD2C-4AF8-B7B4-69C48D3B5BAE

Special Status Native Plant Populations and Natural Communities (CDFW, 2018) (see https://nrm.dfg.ca.gov/FileHandler.ashx?DocumentID=18959&inline);

c) Floristic, alliance- and/or association-based mapping and vegetation impact assessments conducted at the Project site and within the neighboring vicinity. *The Manual of California Vegetation*, second edition, should also be used to inform this mapping and assessment (Sawyer, 2008). Adjoining habitat areas should be included in this assessment where site activities could lead to direct or indirect impacts offsite. Habitat mapping at the alliance level will help establish baseline vegetation conditions;

d) A complete, recent, assessment of the biological resources associated with each habitat type on site and within adjacent areas that could also be affected by the Project. CDFW's CNDDB in Sacramento should be contacted to obtain current information on any previously reported sensitive species and habitat. CDFW recommends that CNDDB Field Survey Forms be completed and submitted to CNDDB to document survey results. Online forms can be obtained and submitted at http://www.dfg.ca.gov/biogeodata/cnddb/submitting_data_to_cnddb.asp;

e) A complete, recent, assessment of rare, threatened, and endangered, and other sensitive species on site and within the area of potential effect, including California Species of Special Concern and California Fully Protected Species (Fish & G. Code, §§ 3511, 4700, 5050 and 5515). Species to be addressed should include all those which meet the CEQA definition of endangered, rare or threatened species (CEQA Guidelines, § 15380). Seasonal variations in use of the Project area should also be addressed. Focused species-specific surveys, conducted at the appropriate time of year and time of day when the sensitive species are active or otherwise identifiable, are required. Acceptable species-specific survey procedures should be developed in consultation with CDFW and the USFWS; and,

f) A recent, wildlife and rare plant survey. CDFW generally considers biological field assessments for wildlife to be valid for a one-year period. Assessments for rare plants may be considered valid for a period of up to three years, except when significant environmental changes occur, such as disturbance resulting from urbanization or wildfire. Some aspects of the proposed Project may warrant periodic updated surveys for certain sensitive taxa, particularly if build out could occur over a protracted time frame, or in phases.

4) Biological Direct, Indirect, and Cumulative Impacts. Page 2 of the NOP states that "The Amargosa Creek/flood control channel forms the southwestern boundary and intersects the southern portion of the Project site." The Amargosa Creek is the main riparian corridor in the Lancaster area that serves as an important wildlife movement corridor connecting much of the open spaces through the rapidly urbanizing city. It is essential to understand how these open spaces and the biological diversity within them may be impacted by Project activities. This should aid in identifying specific mitigation or avoidance measures necessary to offset those impacts. CDFW recommends providing a thorough discussion of direct, indirect, and cumulative impacts expected to adversely affect biological resources, with specific measures to offset such impacts. The following should be addressed in the DEIR:

DocuSign Envelope ID: 8FAA4E27-AD2C-4AF8-B7B4-69C48D3B5BAE

a) A discussion regarding indirect Project impacts on biological resources, including resources in nearby public lands, open space, adjacent natural habitats, riparian ecosystems, and any designated and/or proposed or existing reserve lands (e.g., preserve lands associated with a Natural Community Conservation Plan (NCCP, Fish & G. Code, § 2800 et. seq.). Impacts on, and maintenance of, wildlife corridor/movement areas, including access to undisturbed habitats in adjacent areas, should be fully evaluated in the DEIR;

b) A discussion of potential adverse impacts from lighting, noise, human activity, and exotic species and identification of any mitigation measures;

c) A discussion on Project-related changes on drainage patterns and downstream of the Project site; the volume, velocity, and frequency of existing and post-Project surface flows; polluted runoff; soil erosion and/or sedimentation in streams and water bodies; and, post-Project fate of runoff from the Project site. The discussion should also address the proximity of the extraction activities to the water table, whether dewatering would be necessary and the potential resulting impacts on the habitat (if any) supported by the groundwater. Mitigation measures proposed to alleviate such Project impacts should be included;

d) An analysis of impacts from land use designations and zoning located nearby or adjacent to natural areas that may inadvertently contribute to wildlife-human interactions. A discussion of possible conflicts and mitigation measures to reduce these conflicts should be included in the DEIR; and,

e) A cumulative effects analysis, as described under CEQA Guidelines section 15130. General and specific plans, as well as past, present, and anticipated future projects, should be analyzed relative to their impacts on similar plant communities and wildlife habitats.

General Comments

1) Project Description and Alternatives. To enable CDFW to adequately review and comment on the proposed Project from the standpoint of the protection of plants, fish, and wildlife, we recommend the following information be included in the DEIR:

   a) A complete discussion of the purpose and need for, and description of, the proposed Project, including all staging areas and access routes to the construction and staging areas; and,

   b) A range of feasible alternatives to Project component location and design features to ensure that alternatives to the proposed Project are fully considered and evaluated. The alternatives should avoid or otherwise minimize direct and indirect impacts to sensitive biological resources and wildlife movement areas.

2) CESA. CDFW considers adverse impacts to a species protected by CESA to be significant without mitigation under CEQA. As to CESA, take of any endangered, threatened, candidate species, or CESA-listed rare plant species that results from the Project is prohibited, except as authorized by State law (Fish and G. Code, §§ 2080, 2085; Cal. Code

DocuSign Envelope ID: 8FAA4E27-AD2C-4AF8-B7B4-69C48D3B5BAE

Regs., tit. 14, §786.9). Consequently, if the Project, Project construction, or any Project-related activity during the life of the Project will result in take of a species designated as endangered or threatened, or a candidate for listing under CESA, CDFW recommends that the Project proponent seek appropriate take authorization under CESA prior to implementing the Project. Appropriate authorization from CDFW may include an Incidental Take Permit (ITP) or a consistency determination in certain circumstances, among other options [Fish & G. Code, §§ 2080.1, 2081, subds. (b) and (c)]. Early consultation is encouraged, as significant modification to a Project and mitigation measures may be required in order to obtain a CESA Permit. Revisions to the Fish and Game Code, effective January 1998, may require that CDFW issue a separate CEQA document for the issuance of an ITP unless the Project CEQA document addresses all Project impacts to CESA-listed species and specifies a mitigation monitoring and reporting program that will meet the requirements of an ITP. For these reasons, biological mitigation monitoring and reporting proposals should be of sufficient detail and resolution to satisfy the requirements for a CESA ITP.

3) Compensatory Mitigation. The DEIR should include mitigation measures for adverse Project- related impacts to sensitive plants, animals, and habitats. Mitigation measures should emphasize avoidance and reduction of Project impacts. For unavoidable impacts, on-site habitat restoration or enhancement should be discussed in detail. If on-site mitigation is not feasible or would not be biologically viable and therefore not adequately mitigate the loss of biological functions and values, off-site mitigation through habitat creation and/or acquisition and preservation in perpetuity should be addressed. Areas proposed as mitigation lands should be protected in perpetuity with a conservation easement, financial assurance and dedicated to a qualified entity for long-term management and monitoring. Under Government Code section 65967, the lead agency must exercise due diligence in reviewing the qualifications of a governmental entity, special district, or nonprofit organization to effectively manage and steward land, water, or natural resources on mitigation lands it approves.

4) Long-term Management of Mitigation Lands. For proposed preservation and/or restoration, the DEIR should include measures to protect the targeted habitat values from direct and indirect negative impacts in perpetuity. The objective should be to offset the Project-induced qualitative and quantitative losses of wildlife habitat values. Issues that should be addressed include (but are not limited to) restrictions on access, proposed land dedications, monitoring and management programs, control of illegal dumping, water pollution, and increased human intrusion. An appropriate non-wasting endowment should be set aside to provide for long-term management of mitigation lands.

5) Translocation/Salvage of Plants and Animal Species. Translocation and transplantation is the process of moving an individual from the Project site and permanently moving it to a new location. CDFW generally does not support the use of, translocation or transplantation as the primary mitigation strategy for unavoidable impacts to rare, threatened, or endangered plant or animal species. Studies have shown that these efforts are experimental and the outcome unreliable. CDFW has found that permanent preservation and management of habitat capable of supporting these species is often a more effective long-term strategy for conserving sensitive plants and animals and their habitats.

DocuSign Envelope ID: 8FAA4E27-AD2C-4AF8-B7B4-69C48D3B5BAE

6) Moving out of Harm's Way. The proposed Project is anticipated to result in clearing of natural habitats that support many species of indigenous wildlife. To avoid direct mortality, we recommend that a qualified biological monitor approved by CDFW be on-site prior to and during ground and habitat disturbing activities to move out of harm's way special status species or other wildlife of low mobility that would be injured or killed by grubbing or Project- related construction activities. It should be noted that the temporary relocation of on-site wildlife does not constitute effective mitigation for the purposes of offsetting Project impacts associated with habitat loss. If the Project requires species to be removed, disturbed, or otherwise handled, we recommend that the DEIR clearly identify that the designated entity should obtain all appropriate state and federal permits.

CONCLUSION

CDFW appreciates the opportunity to comment on the NOP to assist the City of Lancaster in identifying and mitigating Project impacts on biological resources. If you have any questions or comments regarding this letter, please contact Andrew Valand, Environmental Scientist, at Andrew.Valand@wildlife.ca.gov or (562) 292-6821.

Sincerely,

4/17/2020

RE: Lancaster Health District Master Plan
NOP (Revised)
Vic. LA-14/PM R67.98-R66.75
SCH # 2017051076
GTS # LA-2017-03223AL-NOP

Dear Ms. Swain:

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the above referenced project. The City of Lancaster is proposing to develop the Lancaster Health District Master Plan. The Master Plan would allow for the development of 1,600 residential units; 259,000 sf of hotel uses (180 rooms) and a 70,000 sf conference center; 740,000 sf of commercial/office space; 480,000 sf of continuum of care facilities; 791,000 sf of acute care facilities including replacing the existing hospital with a new 700,000 sf facility (380 beds) and 12,000 sf plant facility; 249,800 sf of subacute care facilities and a 385,000 sf parking car garage with 1,100 parking spaces.

The mission of Caltrans is to provide a safe, sustainable, integrated and efficient transportation system to enhance California's economy and livability. Senate Bill 743 (2013) has codified into CEQA law and mandated that CEQA review of transportation impacts of proposed development be modified by using Vehicle Miles Traveled (VMT) as the primary metric in identifying transportation impacts for all future development projects. You may reference to The Governor's Office of Planning and Research (OPR) for more information.

http://opr.ca.gov/ceqa/updates/guidelines/

Caltrans is aware of challenges that the region faces in identifying viable solutions to alleviating congestion on State and Local facilities. With limited room to expand vehicular capacity, this development should incorporate multi-modal and complete streets transportation elements that will actively promote alternatives to car use and better manage existing parking assets. Prioritizing and allocating space to efficient

modes of travel such as bicycling and public transit can allow streets to transport more people in a fixed amount of right-of-way.

As a reminder, Vehicle Miles Traveled (VMT) will be the standard transportation analysis metric in CEQA for land use projects after the July 1, 2020 statewide implementation date. Agencies may opt-in prior to that date.

Caltrans supports the implementation of complete streets and pedestrian safety measures such as road diets and other traffic calming measures. Please note the Federal Highway Administration (FHWA) recognizes the road diet treatment as a proven safety countermeasure, and the cost of a road diet can be significantly reduced if implemented in tandem with routine street resurfacing.

Overall, the EIR should include Transportation Impact Study (TIS) to ensure all modes are served well by planning and development activities. This includes reducing single occupancy vehicle trips, ensuring safety, reducing vehicle miles traveled, supporting accessibility, and reducing greenhouse gas emissions.

We encourage the Lead Agency to evaluate the potential of Transportation Demand Management (TDM) strategies and Intelligent Transportation System (ITS) applications in order to better manage the transportation network, as well as transit service and bicycle or pedestrian connectivity improvements.

For additional TDM options, please refer to the Federal Highway Administration's *Integrating Demand Management into the Transportation Planning Process: A Desk Reference* (Chapter 8). The reference is available online at:

http://www.ops.fhwa.dot.gov/publications/fhwahop12035/fhwahop12035.pdf

One of Caltrans' safety concerns is the potential traffic conflict on the State facilities such that Avenue K has the potential for queuing vehicles upstream on SR-14 which can create a significant speed differential and increase the conflicts at that intersection. Currently, the state facilities are operating at or near capacity during the peak hours. Any additional trips may cause potential rear-end accident. When this large project is at built-out condition, many project traffic and cumulative trips would assign to the state facilities, traffic analysis should include queuing analysis to address safety issues to comply with CEQA. We recommend following to be included in the traffic analysis.

1. Caltrans requests information regarding the assignment of direct and cumulative trips to state facilities in the project vicinity.

2. The impact study should include the potential traffic conflict impact of the added traffic volumes to SR-14 and the on- and off-ramps from Avenue J to Avenue K.

3. The project proponent may use a 95 percentile to obtain queue length for a queuing analysis. To calculate the baseline condition for total queue length on off-ramps, measure the distance from the intersection to the gore point. Caltrans recommends that any queuing on an off-ramp beyond 85% of this total length be considered a significant impact for direct or cumulative impacts. If Synchro software is used to calculate queue length, then actual signal timing must be used for existing condition as a based condition.

4. In the event that the project proponent finds a significant impact to an intersection, an Intersection Control Evaluation (ICE) should be prepared as an initial step of an intersection-improvement project.

5. If an impact is identified, Caltrans recommends consideration of the following potential traffic conflict improvement measures:
    a. Safety sign/Yield Sign, delineation
    b. Pavement markings
    c. ADA ramps, pedestrian sidewalk
    d. Ramp metering
    e. Intersection control, signal optimization
    f. Ramp/lane widening. While ramp or lane widening is a potential improvement measure, this measure should be considered as a last resort after first considering measures (a) through (e) above.
    g. Please note that the above is a non-exclusive list of potential improvement measures. The project proponent should consider additional feasible measures.
6. The project proponent may pay 100% of the direct impact and/or fair-share contribution (i.e., a fee program) with cumulative impacts.

A discussion of mitigation measures appropriate to alleviate anticipated traffic impacts should be presented in the traffic study. Any mitigation involving transit or Transportation Demand Management (TDM) is encouraged and should be justified to reduce VMT and greenhouse gas emissions. Such measures are critical to facilitating efficient site access. If you have any questions, please feel free to contact Mr. Alan Lin the project coordinator at (213) 897-8391 and refer to GTS # LA-2017-03223AL-NOP.

Sincerely,

Miya Edmonson

Jocelyn Swain, Senior Planner
City of Lancaster
Community Development Division
44933 Fern Avenue
Lancaster, CA 93534

Dear Ms. Swain:

REVISED NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT, "LANCASTER HEALTH DISTRICT MASTER PLAN," WOULD PROVIDE DIRECTION FOR DEVELOPMENT AROUND THE ANTELOPE VALLEY HOSPITAL OVER A 20-YEAR PERIOD, LANCASTER, FFER 2020001953

The Revised Notice of Preparation of a Draft Environmental Impact Report has been reviewed by the Planning Division, Land Development Unit, Forestry Division, and Health Hazardous Materials Division of the County of Los Angeles Fire Department.

The following are their comments:

PLANNING DIVISION:

We will reserve our comments for the Draft EIR.

For any questions regarding this response, please contact Loretta Bagwell, Planning Analyst, at (323) 881-2404 or Loretta.Bagwell@fire.lacounty.gov.

LAND DEVELOPMENT UNIT:

The proposed Land Development comments are "Preliminary", and are "Subject to Change" with the submittal of plans. Additional Land Development Unit requirements may be required to be addressed with the submittal of plans. The proposed project is required to comply with all applicable codes, ordinances and regulations.

ACCESS REQUIREMENTS:

1. All on-site Fire Apparatus Access Roads shall be labeled as "Private Driveway and Fire Lane" on the site plan along with the widths clearly depicted on the plan. Labeling is necessary to assure the access availability for Fire Department use. The designation allows for appropriate signage prohibiting parking.

2. Fire Apparatus Access Roads must be installed and maintained in a serviceable manner prior to and during the time of construction. Fire Code 501.4.

3. All fire lanes shall be clear of all encroachments and shall be maintained in accordance with the Title 32, County of Los Angeles Fire Code.

4. The Fire Apparatus Access Roads and designated fire lanes shall be measured from flow line to flow line.

5. For buildings where the vertical distance between the access roadway and the highest roof surface does not exceed 30 feet, Fire Apparatus Access Roads shall have an unobstructed width of not less than 26 feet, exclusive of shoulders, and an unobstructed clearance of clear to the sky. The highest roof surface shall be determined by measurement of the vertical distance between the access roadway and the eve of a pitched roof, the intersection of the roof to the exterior wall, or the top of parapet walls, whichever is greater.

6. For buildings where the vertical distance between access roadway and the highest roof surface exceeds 30 feet, an approved Fire Apparatus Access Roadway with a minimum width of 28 feet, exclusive of shoulders, shall be provided in the immediate vicinity of the building or portion thereof. This roadway shall have an unobstructed clearance of clear to the sky. At least one required access route meeting this condition shall be located such that the edge of the Fire Apparatus Access Roadway, not including shoulders, that is closest to the building being served, is between 10 feet and 30 feet from the building, as determined by the fire code official, and shall be positioned parallel to one entire side of the building. The side of the building on which the Fire Apparatus Access Road is positioned shall be approved by the fire code official.

7. If the Fire Apparatus Access Road is separated by island, provide a minimum unobstructed width of 20 feet, exclusive of shoulders, and an unobstructed vertical clearance "clear to sky" Fire Department vehicular access to within 150 feet of all portions of the exterior walls of the first story of the building, as measured by an approved route around the exterior of the building.

8. The dimensions of the approved Fire Apparatus Access Roads shall be maintained as originally approved by the fire code official. Fire Code 503.2.2.1.

9. Dead-end Fire Apparatus Access Roads in excess of 150 feet in-length shall be provided with an approved Fire Department turnaround. The dimensions of the

turnaround, with the orientation of the turnaround shall be properly placed in the direction of travel of the access roadway on the plan.

10. Fire Apparatus Access Roads shall be provided with a 32-foot centerline turning radius. The centerline, inside, and outside turning radii for each change in direction shall be indicated on the plan.

11. Fire Apparatus Access Roads shall be designed and maintained to support the imposed load of fire apparatus weighing 75,000 pounds and shall be surfaced so as to provide all-weather driving capabilities. Fire Apparatus Access Roads having a grade of 10 percent or greater shall have a paved or concrete surface.

12. Provide approved signs or other approved notices or markings that include the words "NO PARKING - FIRE LANE." Signs shall have a minimum dimension of 12 inches wide by 18 inches high and have red letters on a white reflective background. Signs shall be provided for Fire Apparatus Access Roads, to clearly indicate the entrance to such road, or prohibit the obstruction thereof and at intervals, as required by the Fire Inspector.

13. Fire Apparatus Access Roads shall not be obstructed in any manner, including by the parking of vehicles, or the use of traffic calming devices, including but not limited to, speed bumps or speed humps. The minimum widths and clearances established in the Fire Code shall be maintained at all times.

14. Traffic Calming Devices, including but not limited to, speed bumps and speed humps, shall be prohibited unless approved by the fire code official.

15. A minimum 5-foot wide approved firefighter access walkway leading from the Fire Department Access Road to all required openings in the building's exterior walls shall be provided for firefighting and rescue purposes. The firefighter walkway access routes shall be clearly indicated on the site plan, along with the required width, and the slope and walking surface material.

16. Security barriers, visual screen barriers, or other obstructions shall not be installed on the roof of any building in such a manner as to obstruct firefighter access or egress in the event of fire or other emergency. Parapets shall not exceed 36 inches on at least two sides of the building. These sides should face an access roadway or yard sufficient to accommodate ladder operations. The height of all parapets shall be clearly indicated in a section view.

17. Approved building address numbers, building numbers, or approved building identification shall be provided and maintained so as to be plainly visible and legible from the street fronting the property. The numbers shall contrast with their background, be Arabic numerals or alphabet letters, and be a minimum of 4 inches high with a minimum stroke width of 0.5 inch.

18. Multiple residential and commercial buildings having entrances to individual units not visible from the street or road shall have unit numbers displayed in groups for all units within each structure. Such numbers may be grouped on the wall of the structure or mounted on a post independent of the structure and shall be positioned to be plainly visible from the street or road as required by the Fire Code.

19. Gate Requirements: The method of gate control shall be subject to review by the Fire Department, prior to clearance to proceed to public hearing. All gates, to control vehicular access shall be in compliance with the following:

    a. The keypad location shall be located a minimum of 50 feet from the public right-of-way.

    b. Provide a minimum 32-foot turning radius beyond the keypad, prior to the gate entrance at a minimum width of 20' for turnaround purposes.

    c. The gated entrance design with a single access point (ingress and egress) shall provide for a minimum width of 20 feet, clear-to-sky, with all gate hardware is clear of the access way.

    d. Where the Fire Apparatus Access Road consists of a divided roadway, the gate width shall be not less than 15 feet for residential use and 20 feet for commercial /industrial uses. Each side of the roadway shall be clear-to-sky.

    e. Construction of gates shall be materials that allow manual operations by one person.

    f. Gates shall be of the swinging or sliding type.

    g. The security gate shall be provided with an approved means of emergency operation, and shall be maintained operational at all times and replaced or repaired when defective.

    h. Electric gate operators, where provided, shall be listed in accordance with UL 325.

    i. Gates intended for automatic operation shall be designed, constructed, and installed to comply with the requirements of ASTM F2200.

    j. All locking devices shall comply with the County of Los Angeles Fire Department Regulation 5, Compliance for Installation of Emergency Access Devices.

    k. An approved key box, listed in accordance with UL 1037 shall be provided as required by the Fire Code. The location of each key box shall be determined by the Fire Inspector.

WATER SYSTEM REQUIREMENTS:

1. All fire hydrants shall measure 6"x 4"x 2-1/2" brass or bronze conforming to current AWWA standard C503 or approved equal and shall be installed in accordance with the County of Los Angeles Fire Code.

2. All required public fire hydrants shall be installed, tested, and accepted prior to beginning construction.

3. All required private on-site fire hydrants shall be installed, tested, and approved prior to building occupancy. Plans showing underground piping for private on-site fire hydrants shall be submitted to the Sprinkler Plan Check Unit for review and approval prior to installation. Fire Code 901.2 and County of Los Angeles Fire Department Regulation 7.

4. All on-site fire hydrants shall be installed a minimum of 25 feet from a structure or protected by a two (2) hour rated firewall. Indicate compliance prior to project proceeding to the public hearing process.

   Exception: For fully sprinkled multi-family structures, on-site hydrants may be installed a minimum of 10 feet from the structure.

5. The required fire flow for the public fire hydrants for will determined with the submittal of plans. The type of construction and total square footage for each proposed and existing building, along with written verification of an approved automatic fire sprinkler system in conformance of NFPA 13 shall be submitted to determine the exact fire flow. The maximum fire flow is 8,000 GPM at 20 pounds PSI for 4 hours.

6. The required fire flow for the on-site private fire hydrants for this project is 2,500 GPM at 20 pounds psi residual pressure for 2 hours. Two (2) on-site fire hydrants flowing simultaneously may be used to achieve the required fire flow. Each on-site fire hydrant is required a minimum 1,250 GPM at 20 pounds PSI for 2 hours.

7. An approved automatic fire sprinkler system is required for the proposed buildings within this development. Submit design plans to the Fire Department Sprinkler Plan Check Unit for review and approval prior to installation.

8. The public and the on-site fire hydrants will be determined with the submittal of plans.

For any questions regarding the report, please contact FPEA Wally Collins at (323) 890-4243 or Wally.Collins@fire.lacounty.gov.

FORESTRY DIVISION – OTHER ENVIRONMENTAL CONCERNS:

The statutory responsibilities of the County of Los Angeles Fire Department's Forestry Division include erosion control, watershed management, rare and endangered species, vegetation, fuel modification for Very High Fire Hazard Severity Zones, archeological and

cultural resources, and the County Oak Tree Ordinance. Potential impacts in these areas should be addressed.

Under the Los Angeles County Oak tree Ordinance, a permit is required to cut, destroy, remove, relocate, inflict damage or encroach into the protected zone of any tree of the Oak genus which is 25 inches or more in circumference (eight inches in diameter), as measured 4 1/2 feet above mean natural grade.

If Oak trees are known to exist in the proposed project area further field studies should be conducted to determine the presence of this species on the project site.

The County of Los Angeles Fire Department's Forestry Division has no further comments regarding this project.

For any questions regarding this response, please contact Forestry Assistant, Joseph Brunet at (818) 890-5719.

HEALTH HAZARDOUS MATERIALS DIVISION:

The Health Hazardous Materials Division of the Los Angeles County Fire Department has no comments or requirements for the project at this time.

Please contact HHMD senior typist-clerk, Perla Garcia at (323) 890-4035 or Perla.garcia@fire.lacounty.gov if you have any questions.

If you have any additional questions, please contact this office at (323) 890-4330.

Very truly yours,

RONALD M. DURBIN, CHIEF, FORESTRY DIVISION

RE: SCAG Comments on the Revised Notice of Preparation of a Draft Environmental Impact Report for the Lancaster Health District Master Plan [SCAG NO. IGR9276]

Dear Ms. Swain,

Thank you for submitting the Revised Notice of Preparation of a Draft Environmental Impact Report for the Lancaster Health District Master Plan ("proposed project") to the Southern California Association of Governments (SCAG) for review and comment. SCAG is the authorized regional agency for Inter-Governmental Review (IGR) of programs proposed for Federal financial assistance and direct Federal development activities, pursuant to Presidential Executive Order 12372. Additionally, SCAG reviews the Environmental Impact Reports of projects of regional significance for consistency with regional plans pursuant to the California Environmental Quality Act (CEQA) and CEQA Guidelines.

SCAG is also the designated Regional Transportation Planning Agency under state law, and is responsible for preparation of the Regional Transportation Plan (RTP) including the Sustainable Communities Strategy (SCS) pursuant to Senate Bill (SB) 375. As the clearinghouse for regionally significant projects per Executive Order 12372, SCAG reviews the consistency of local plans, projects, and programs with regional plans.[1] SCAG's feedback is intended to assist local jurisdictions and project proponents to implement projects that have the potential to contribute to attainment of Regional Transportation Plan/Sustainable Community Strategies (RTP/SCS) goals and align with RTP/SCS policies.

SCAG staff has reviewed the Revised Notice of Preparation of a Draft Environmental Impact Report for the Lancaster Health District Master Plan. The proposed project includes the development of 1,600 residential units, 259,200 square feet (SF) of hotel uses, a 70,000 SF conference center, 740,000 SF of commercial/office space, 480,000 SF of continuum of care facilities, 791,000 SF of acute care facilities, 249,800 SF of sub-acute care facilities, and a 385,000 SF parking car garage on 288 acres.

When available, please email environmental documentation to *IGR@scag.ca.gov* providing, at a minimum, the full public comment period for review.

If you have any questions regarding the attached comments, please contact the Inter-Governmental Review (IGR) Program, attn.: Anita Au, Associate Regional Planner, at (213) 236-1874 or IGR@scag.ca.gov. Thank you.

Sincerely,

Ping Chang

Ping Chang
Manager, Compliance and Performance Monitoring

[1] Lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with the 2016 RTP/SCS for the purpose of determining consistency for CEQA. Any "consistency" finding by SCAG pursuant to the IGR process should not be construed as a determination of consistency with the 2016 RTP/SCS for CEQA.

COMMENTS ON THE REVISED NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE LANCASTER HEALTH DISTRICT MASTER PLAN [SCAG NO. IGR9276]

CONSISTENCY WITH RTP/SCS

SCAG reviews environmental documents for regionally significant projects for their consistency with the adopted RTP/SCS. For the purpose of determining consistency with CEQA, lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with the RTP/SCS.

Please note the Draft 2020 RTP/SCS (Connect SoCal) was released for public review on November 14, 2019 until January 24, 2020. The Final Connect SoCal is anticipated to be adopted on May 7, 2020. Please refer to the adopted Connect SoCal goals and growth forecast for RTP/SCS consistency for future projects. The Proposed Final Connect SoCal is now available for review here: https://www.connectsocal.org/Pages/Connect-SoCal-Final-Plan.aspx.

2016 RTP/SCS GOALS

The SCAG Regional Council adopted the 2016 RTP/SCS in April 2016. The 2016 RTP/SCS seeks to improve mobility, promote sustainability, facilitate economic development and preserve the quality of life for the residents in the region. The long-range visioning plan balances future mobility and housing needs with goals for the environment, the regional economy, social equity and environmental justice, and public health (see http://scagrtpscs.net/Pages/FINAL2016RTPSCS.aspx). The goals included in the 2016 RTP/SCS may be pertinent to the proposed project. These goals are meant to provide guidance for considering the proposed project within the context of regional goals and policies. Among the relevant goals of the 2016 RTP/SCS are the following:

SCAG 2016 RTP/SCS GOALS	
RTP/SCS G1:	*Align the plan investments and policies with improving regional economic development and competitiveness*
RTP/SCS G2:	*Maximize mobility and accessibility for all people and goods in the region*
RTP/SCS G3:	*Ensure travel safety and reliability for all people and goods in the region*
RTP/SCS G4:	*Preserve and ensure a sustainable regional transportation system*
RTP/SCS G5:	*Maximize the productivity of our transportation system*
RTP/SCS G6:	*Protect the environment and health for our residents by improving air quality and encouraging active transportation (e.g., bicycling and walking)*
RTP/SCS G7:	*Actively encourage and create incentives for energy efficiency, where possible*
RTP/SCS G8:	*Encourage land use and growth patterns that facilitate transit and active transportation*
RTP/SCS G9:	*Maximize the security of the regional transportation system through improved system monitoring, rapid recovery planning, and coordination with other security agencies**
	**SCAG does not yet have an agreed-upon security performance measure.*

For ease of review, we encourage the use of a side-by-side comparison of SCAG goals with discussions of the consistency, non-consistency or non-applicability of the goals and supportive analysis in a table format. Suggested format is as follows:

SCAG 2016 RTP/SCS GOALS		
	Goal	Analysis
RTP/SCS G1:	*Align the plan investments and policies with improving regional economic development and competitiveness*	*Consistent: Statement as to why;* *Not-Consistent: Statement as to why;* *Or* *Not Applicable: Statement as to why;* *DEIR page number reference*
RTP/SCS G2:	*Maximize mobility and accessibility for all people and goods in the region*	*Consistent: Statement as to why;* *Not-Consistent: Statement as to why;* *Or* *Not Applicable: Statement as to why;* *DEIR page number reference*
etc.		etc.

2016 RTP/SCS STRATEGIES

To achieve the goals of the 2016 RTP/SCS, a wide range of land use and transportation strategies are included in the 2016 RTP/SCS. Technical appendances of the 2016 RTP/SCS provide additional supporting information in detail. To view the 2016 RTP/SCS, please visit: http://scagrtpscs.net/Pages/FINAL2016RTPSCS.aspx. The 2016 RTP/SCS builds upon the progress from the 2012 RTP/SCS and continues to focus on integrated, coordinated, and balanced planning for land use and transportation that the SCAG region strives toward a more sustainable region, while the region meets and exceeds in meeting all of applicable statutory requirements pertinent to the 2016 RTP/SCS. These strategies within the regional context are provided as guidance for lead agencies such as local jurisdictions when the proposed project is under consideration.

DEMOGRAPHICS AND GROWTH FORECASTS

Local input plays an important role in developing a reasonable growth forecast for the 2016 RTP/SCS. SCAG used a bottom-up local review and input process and engaged local jurisdictions in establishing the base geographic and socioeconomic projections including population, household and employment. At the time of this letter, the most recently adopted SCAG jurisdictional-level growth forecasts that were developed in accordance with the bottom-up local review and input process consist of the 2020, 2035, and 2040 population, households and employment forecasts. To view them, please visit http://www.scag.ca.gov/Documents/2016GrowthForecastByJurisdiction.pdf. The growth forecasts for the region and applicable jurisdictions are below.

	Adopted SCAG Region Wide Forecasts			Adopted City of Lancaster Forecasts		
	Year 2020	**Year 2035**	**Year 2040**	**Year 2020**	**Year 2035**	**Year 2040**
Population	19,663,000	22,091,000	22,138,800	167,400	195,800	209,900
Households	6,458,000	7,325,000	7,412,300	52,400	61,000	65,300
Employment	8,414,000	9,441,000	9,871,500	51,700	56,700	59,600

MITIGATION MEASURES

SCAG staff recommends that you review the Final Program Environmental Impact Report (Final PEIR) for the 2016 RTP/SCS for guidance, as appropriate. SCAG's Regional Council certified the Final PEIR and adopted the associated Findings of Fact and a Statement of Overriding Considerations (FOF/SOC) and Mitigation Monitoring and Reporting Program (MMRP) on April 7, 2016 (please see: http://scagrtpscs.net/Pages/FINAL2016PEIR.aspx). The Final PEIR includes a list of project-level performance standards-based mitigation measures that may be considered for adoption and implementation by lead, responsible, or trustee agencies in the region, as applicable and feasible. Project-level mitigation measures are within responsibility, authority, and/or jurisdiction of project-implementing agency or other public agency serving as lead agency under CEQA in subsequent project- and site- specific design, CEQA review, and decision-making processes, to meet the performance standards for each of the CEQA resource categories.

Please note the Draft Connect SoCal PEIR was released for public review from December 9, 2019 to January 24, 2020. The Final Connect SoCal PEIR is anticipated to be certified by SCAG's Regional Council on May 7, 2020. Please refer to the certified Final Connect SoCal PEIR and adopted Findings of Fact and a Statement of Overriding Considerations (FOF/SOC) and Mitigation Monitoring and Reporting Program (MMRP) for future projects. The Proposed Final Connect SoCal PEIR is now available for review here: https://www.connectsocal.org/Pages/Final-2020-PEIR.aspx.

Lancaster, CA 93534-2461

Dear Ms. Swain:

Revised NOP Response to the Lancaster Health District Master Plan

The Los Angeles County Sanitation Districts (Districts) received a Revised Notice of Preparation of a Draft Environmental Impact Report (NOP) for the subject project on April 1, 2020. Previous comments submitted by the Districts in correspondence dated June 8, 2017 (copy enclosed), to Mr. Christopher Aune of your agency, still apply to the subject project with the following comments and updated information:

1. Segments of the proposed project may require an amendment to a Districts' permit for Industrial Wastewater Discharge. Project developers should contact the Districts' Industrial Waste Section in order to reach a determination on this matter. If this update is necessary, project developers will be required to forward copies of final plans and supporting information for the proposed project to the Districts for review and approval before beginning project construction.

2. The wastewater flow originating from the proposed project will discharge to local sewer lines, which are not maintained by the Districts, for conveyance to either or both the Districts' Westside Trunk Sewer, located along Avenue J between Kingtree Avenue and 15th Street West, or the Districts' Westside Relief Trunk Sewer, located in 17th Street West at Lancaster Boulevard. The Districts' 15–inch diameter Westside Trunk Sewer has a capacity range of 2.3 million gallons per day (mgd) to 2.8 mgd and conveyed a peak flow of 1.6 mgd when last measured in 2018. The Districts' 24-inch diameter Westside Relief Trunk Sewer has a capacity of 7.8 mgd and conveyed a peak flow of 2.1 mgd when last measured in 2018.

3. The Lancaster Water Reclamation Plant currently processes an average flow of 14.3 mgd.

4. The Master Plan allows for a maximum development of 1,600 residential units, 180 hotel rooms, including 70,000 square feet of conference center space, 740,000 square feet of commercial/office space, 480,000 square feet of continuum of care facilities, 380 hospital beds, 91,000 square feet of auxiliary facilities, and 249,800 square feet of acute care facilities. Based on these project

DocuSign Envelope ID: 9EBD10CC-AA76-422A-B849-95107C3FAD9F

specifications, the expected increase in average wastewater flow from the project site is 568,777 gallons per day, after the structures on the project site are demolished.

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2717 or araza@lacsd.org.

Very truly yours,

Adriana Raza

GRACE ROBINSON HYDE
Chief Engineer and General Manager

June 8, 2017

Ref. Doc. No.: 4153171

Mr. Christopher Aune, Associate Planner
Community Development Technician
Community Development Services
City of Lancaster
44933 Fern Avenue
Lancaster, CA 93534-2461

Dear Mr. Aune:

Response to NOP for the Lancaster Health District Master Plan

The Sanitation Districts of Los Angeles County (Districts) received a Notice of Preparation of a Draft Environmental Impact Report (NOP) for the subject project on May 16, 2017. The majority of the proposed project area is located within the jurisdictional boundary of District No. 14. We offer the following comments:

1. The portions of the project area outside of the jurisdictional boundaries of the Districts will require annexation into District No. 14 before sewerage service can be provided to proposed development within those areas. For a copy of the Districts' Annexation Information and Processing Fee sheets, go to www.lacsd.org, Wastewater & Sewer Systems, Will Serve Program, and click on the appropriate link. For more specific information regarding the annexation procedure and fees, please contact Ms. Donna Curry at (562) 908-4288, extension 2708.

2. The Districts own, operate, and maintain the trunk sewers that form the backbone of the regional wastewater conveyance system. Local collector and/or lateral sewer lines are the responsibility of the jurisdiction in which they are located. As such, the Districts cannot comment on any deficiencies in the sewerage system within the Lancaster Health District area (LHD) except to state that presently no deficiencies exist in Districts' facilities that serve LHD. For information on deficiencies within LHD's sewerage system, please contact the City of Lancaster's Department of Public Works and/or the Los Angeles County Department of Public Works.

3. The wastewater generated by the proposed project area will be treated at the Lancaster Water Reclamation Plant, which has a capacity of 18 mgd and currently produces an average recycled water flow of 12.8 mgd.

4. Based on the Districts' average wastewater generation factors, the maximum development capacity stated in the notice as 875,000 square feet of commercial and office space, a renovated or new hospital with up to 468 beds, approximately 147,000 square feet of continuum of care space, up to 150 hotel rooms, 275 single-family residential dwelling units, and 965 multi-family residential dwelling units would total to an average wastewater flow of approximately 627,765 gallons per day. For a copy of the Districts' average wastewater generation factors, go to

Recycled Paper

DocuSign Envelope ID: 9EBD10CC-AA76-422A-B849-95107C3FAD9F

www.lacsd.org, Wastewater & Sewer Systems, click on Will Serve Program, and click on the Table 1, Loadings for Each Class of Land Use link.

5. The Districts should review individual developments within LHD in order to determine whether or not sufficient trunk sewer capacity exists to serve each project and if Districts' facilities will be affected by the project.

6. The Districts are empowered by the California Health and Safety Code to charge a fee for the privilege of connecting (directly or indirectly) to the Districts' Sewerage System or for increasing the strength or quantity of wastewater discharged from connected facilities. This connection fee is a capital facilities fee that is imposed in an amount sufficient to construct an incremental expansion of the Sewerage System to accommodate proposed projects. Payment of a connection fee will be required before a permit to connect to the sewer is issued. For more information and a copy of the Connection Fee Information Sheet, go to www.lacsd.org, Wastewater & Sewer Systems, click on Will Serve Program, and search for the appropriate link. In determining the impact to the Sewerage System and applicable connection fees, the Districts' Chief Engineer will determine the user category (e.g. Condominium, Single Family home, etc.) that best represents the actual or anticipated use of the parcel or facilities on the parcel. For more specific information regarding the connection fee application procedure and fees, please contact the Connection Fee Counter at (562) 908-4288, extension 2727.

7. In order for the Districts to conform to the requirements of the Federal Clean Air Act (CAA), the capacities of the Districts' wastewater treatment facilities are based on the regional growth forecast adopted by the Southern California Association of Governments (SCAG). Specific policies included in the development of the SCAG regional growth forecast are incorporated into clean air plans, which are prepared by the South Coast and Antelope Valley Air Quality Management Districts in order to improve air quality in the South Coast and Mojave Desert Air Basins as mandated by the CAA. All expansions of Districts' facilities must be sized and service phased in a manner that will be consistent with the SCAG regional growth forecast for the counties of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial. The available capacity of the Districts' treatment facilities will, therefore, be limited to levels associated with the approved growth identified by SCAG. As such, this letter does not constitute a guarantee of wastewater service, but is to advise you that the Districts intend to provide this service up to the levels that are legally permitted and to inform you of the currently existing capacity and any proposed expansion of the Districts' facilities.

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2717.

Very truly yours,

Adriana Raza

DOC: #4174840.D1499

OFFICE OF THE SHERIFF

COUNTY OF LOS ANGELES

HALL OF JUSTICE

ALEX VILLANUEVA, SHERIFF

May 4, 2020

Jocelyn Swain, Senior Planner
City of Lancaster
44933 Fern Avenue
Lancaster, California 93534

Dear Ms. Swain:

REVIEW COMMENTS
REVISED NOTICE OF PREPARATION OF A
DRAFT ENVIRONMENTAL IMPACT REPORT
LANCASTER HEALTH DISTRICT MASTER PLAN PROJECT

Thank you for inviting the Los Angeles County Sheriff's Department (Department) to review and comment on the April 2020 Revised Notice of Preparation (Revised NOP) of a Draft Environmental Impact Report (Draft EIR) for the Lancaster Health District Master Plan Project (Project). The proposed Project, a master plan which would provide direction for a pedestrian-oriented, transit-oriented, mixed-use district in support of medical institutions and health-related businesses over a 20-year period, is located along the south side of Avenue J; north of Avenue K; and east of 20th Street West and State Route 14; and west of Kingtree Avenue in the City of Lancaster (City). The proposed Project involves the development of 1,600 residential units, 25,900 sf of hotel uses (180 rooms) and a 70,000 sf conference center, 740,000 sf of commercial/office space, 480,000 sf of continuum of care facilities, 791,000 sf of acute care facilities including replacing the existing hospital with a new 700,000 sf facility (380 beds) and 12,000 sf plant facility, 249,800 sf of sub-acute care facilities and a 385,000 sf parking car garage with 1,100 parking spaces.

The proposed Project is located within the service area of the Department's Lancaster Sheriff's Station (Station) and approximately 2.3 miles from the Station. It may impact the current level of service provided by the Station due to the potential increase in resident and workforce population proposed by the Project. The Project applicant will be required to pay all required development and impact fees associated with the project.

In addition, the Department's Station is equipped with a heliport and a communications tower at its northern parking lot and recommends that the Draft EIR address that any new construction and improvements for the proposed Project shall not interfere with Flight Approach and Take-Off pattern of the Station's heliport and with the signal and radio frequency of its communications tower. The project designer shall coordinate with the Department on the design of any projects within the Master Plan area that may affect these essential infrastructure.

The proposed Project and its surrounding area is served by the Lancaster Library (County Library). The Department's CSB provide law enforcement service to the County Library. Once the Project is completed and new residents begin occupancy, the law enforcement service requirements for the County Library would increase. The Department remains concerned that continued growth and intensification of land uses within the service area will ultimately contribute to significant cumulative impacts on the Department's resources and operations. The Department will provide further impact comments for the Draft EIR during the public review period.

Also, for future reference, the Department provides the following updated address and contact information for all requests for review comments, law enforcement service information, California Environmental Quality Act documents, and other related correspondence:

Tracey Jue, Director
Facilities Planning Bureau
Los Angeles County Sheriff's Department
211 West Temple Street
Los Angeles, California 90012

Attention: Planning Section

Should you have any questions regarding this matter, please contact me at (323) 526-5657, or your staff may contact Ms. Rochelle Campomanes of my staff, at (323) 526-5614.

Sincerely,

ALEX VILLANUEVA, SHERIFF

Tracey Jue, Director
Facilities Planning Bureau

APPENDIX A.3

Original Notice of Preparation and Comment Letters

NOTICE OF PREPARATION

City of Lancaster, California

LANCASTER HEALTH DISTRICT MASTER PLAN
GENERAL PLAN AMENDMENT NO. 17-03/ZONE CHANGE NO. 17-03

To:	**California Office of Planning and Research, State Clearinghouse** **Responsible and Trustee Agencies** **Other Interested Parties**
Subject:	**Notice of Preparation (NOP) of a Draft Environmental Impact Report (EIR)**
Project:	**Lancaster Health District Master Plan**
Lead Agency:	**City of Lancaster**

Pursuant to Section 15082(a) of the California Environmental Quality Act (1970), the City of Lancaster is the Lead Agency in charge of environmental review for the proposed Lancaster Health District Master Plan Project ("Project"). Based on preliminary review of this proposed Project, the City has determined that an Environmental Impact Report (EIR) should be prepared to evaluate potential effects on the environment. The City is soliciting comments from reviewing agencies and the public regarding the scope and content of the EIR. For reviewing agencies, the City requests comments with respect to your agency's statutory authority pertaining to the proposed Project. Your agency may need to use the EIR prepared by the City of Lancaster when considering any applicable permits or other approvals for the Project. The City is also seeking comments from residents, property owners, and other interested parties regarding the potential environmental effects the City should address in this EIR.

Comment Period: Comments may be sent to the City of Lancaster during the 30-day NOP review and comment period, which begins on May 31, 2017, and ends on June 29, 2017. All comments must be received by the City by 5:00 PM on June 29, 2017. Please include the name of a contact person for your agency, if applicable. Direct all comments to:

City of Lancaster
Attn: Christopher Aune, Associate Planner
44933 Fern Avenue
Lancaster, CA 93564

Comments can also be provided by fax at (661) 723-5873 or e-mailed to caune@cityoflancasterca.org.

Any questions can be directed to the City at 661-723-6100.

Scoping Meeting: The City will also hold a Scoping Meeting to provide an additional opportunity to discuss the potential environmental effects of this Project on Wednesday, May 31, 2017, at 6:30 PM, at the Cedar Center for the Arts located at 44851 Cedar Avenue, Lancaster, California, 93534. A brief presentation describing the proposed Project and environmental review process will be provided, followed by a public comment period and open forum with city staff. Public agencies, organizations, and interested parties are encouraged to attend and participate in this meeting.

Project Location: The Lancaster Health District Master Plan addresses approximately 288 gross acres in the central portion of the City of Lancaster ("Project site"). Specifically, the Project site is located south of Avenue J; north of Avenue K; east of 20th Street West and State Route 14; and west of Kingtree Avenue. See the attached **Figure 1, Regional Map**, and **Figure 2, Vicinity Map**.

Existing Environmental Condition: The Project site consists of land developed with a variety of commercial, industrial, retail, and medical facilities, as well as vacant, undeveloped land containing native and nonnative vegetation, including several ornamental trees. The existing Antelope Valley Hospital is located in the north-central portion of the Project site. A flood-control channel forms the southwestern boundary and intersects the southern portion of the Project site. The Project site is surrounded by developed areas and has been disturbed from compaction of soil, dumping and excavation, off-road vehicle use, and other man-made disturbances. See attached **Figure 3, Aerial Photograph**.

Project Description: The City of Lancaster is proposing to develop the Lancaster Health District Master Plan, which would provide direction for development around the Antelope Valley Hospital over a 20-year period. Mixed-use development is proposed, including medical and general offices, retail and commercial uses, and a range of housing types, as shown in **Figure 4, Conceptual Framework Plan**.

A primary objective of the Project is to surround the Antelope Valley Hospital with a variety of health and wellness related uses, supporting and expanding the hospital's medical facilities and treatment capabilities while accommodating the needs of patients and their families, faculty, staff, and the community. The Master Plan defines a vision for the long-term improvements that would enable the City and Antelope Valley Hospital to transform the existing urban character toward a pedestrian-oriented, transit-oriented, mixed-use district character that would support existing medical institutions and health-related businesses of many types.

The Master Plan includes a vision plan, implementation plan, and development code to guide future development over the next 20 years on the Project site.

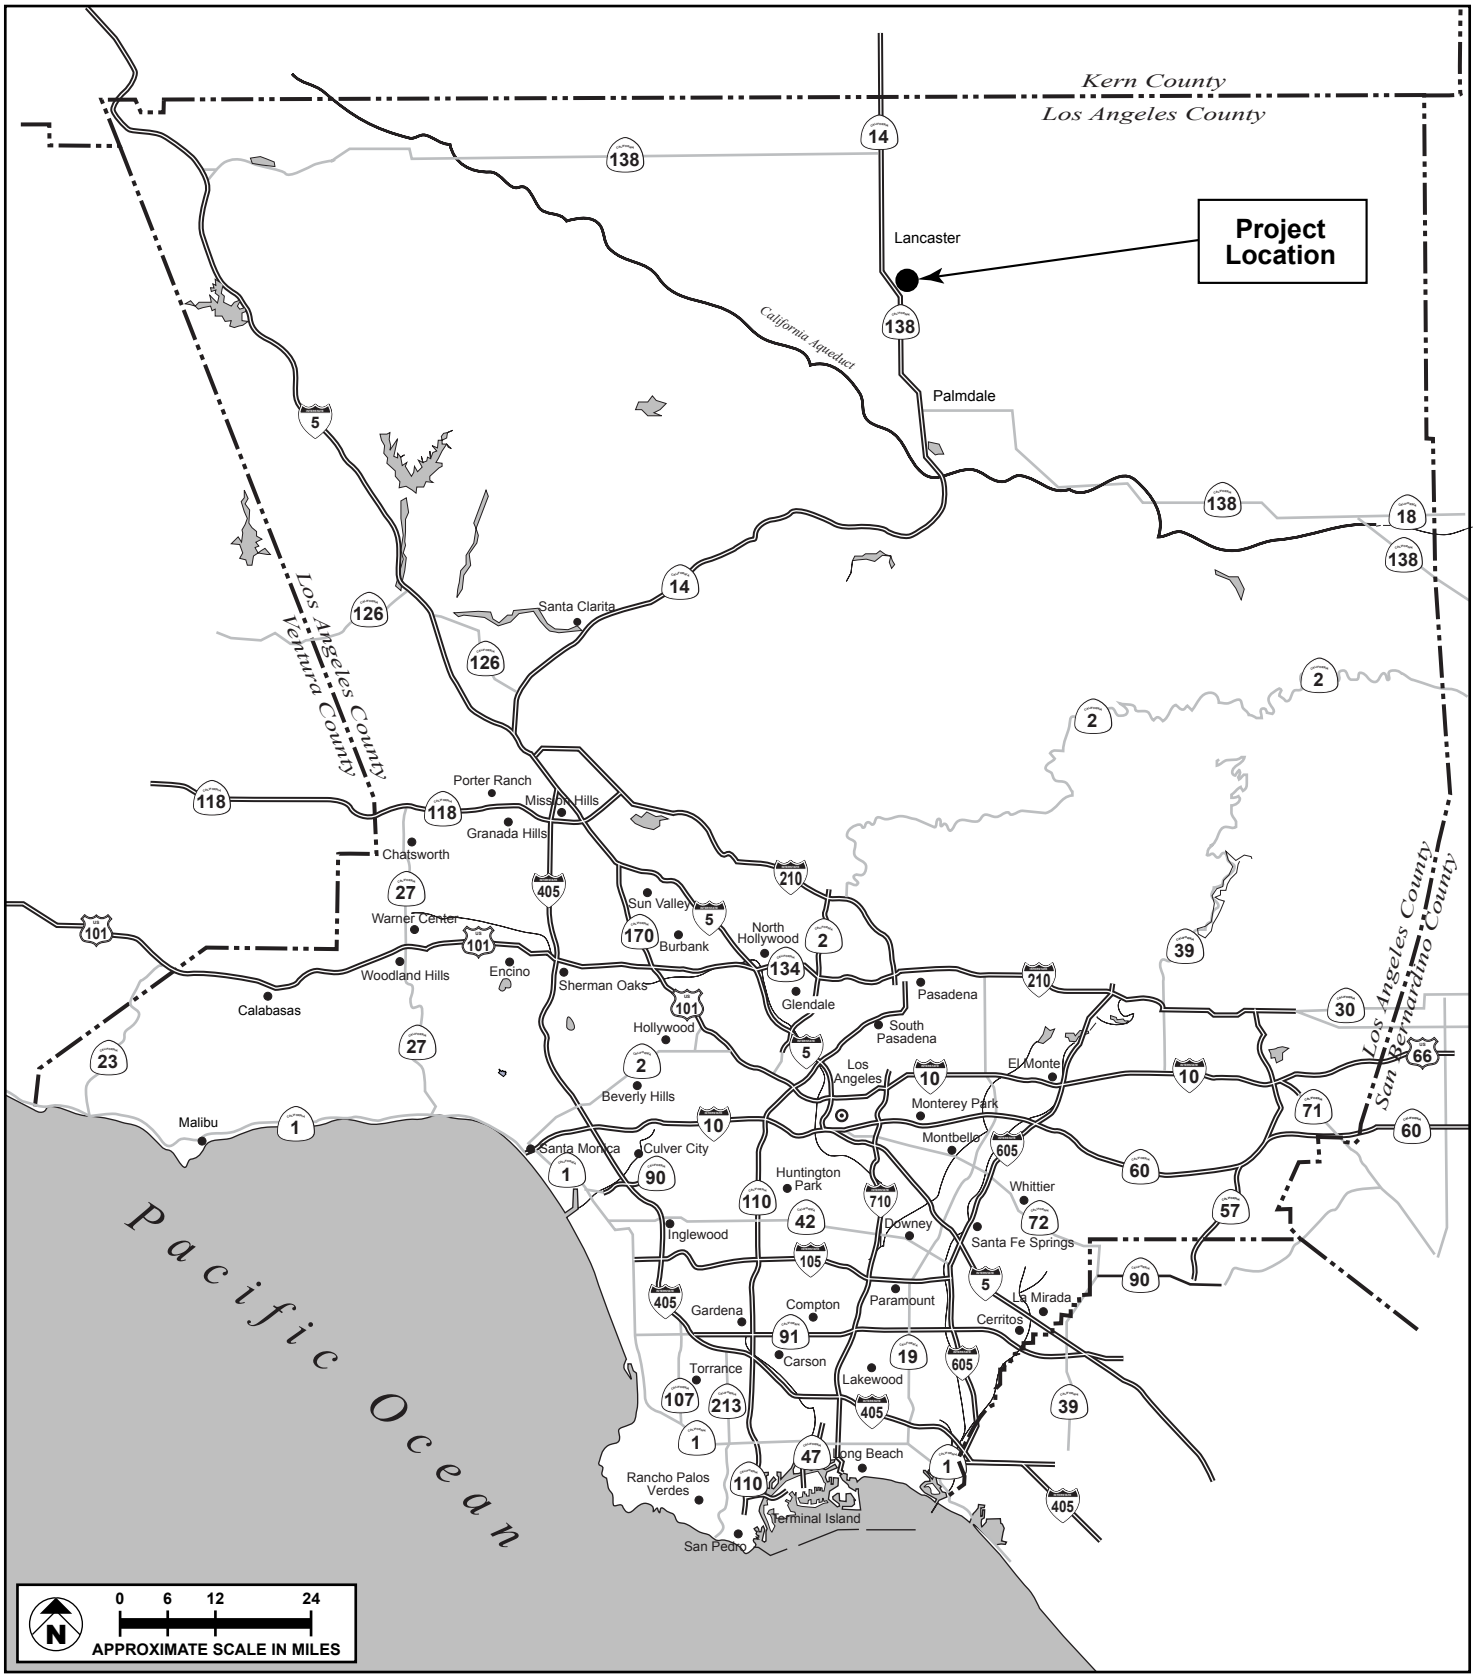
The maximum development capacity allowed by the Master Plan will be analyzed in the EIR to provide a conservative estimate of potential impacts from the Project. The Master Plan would allow development

of up to approximately 875,000 square feet of commercial and office space; a renovated or new hospital with up to 468 beds; approximately 147,000 square feet of continuum of care space; up 150 hotel rooms; 275 single-family residential dwelling units; 965 multifamily residential dwelling units; redesign of the internal circulation system; and other infrastructure systems.

The City of Lancaster will consider approval of the following actions related to the proposed Lancaster Health District Master Plan: (1) General Plan Amendment to change the land use designation to Health District Mixed Use; (2) Zone Change to Health District Mixed Use and Health District Mixed Use Neighborhood; (3) Tentative Map(s); and (4) the formation of an Infrastructure or Financing and Maintenance District.

Scope of the EIR: The City proposes to evaluate potential significant impacts related to the following environmental topics in the EIR:

- Aesthetics
- Air Quality
- Biological Resources
- Cultural Resources
- Geology and Soils
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Noise
- Population and Housing
- Public Services
- Recreation
- Transportation and Traffic
- Utilities and Service Systems



Based on the site, the proposed Project will not result in significant impacts to Mineral Resources or Agricultural and Forestry Resources; therefore, these topics will be addressed in the Effects Found Not to Be Significant section of the EIR.

RE: Lancaster Health District Master Plan
Vic. LA-14/PM 66.285
SCH# 2017051076
GTS#07-LA-2017-00932ME-NOP

Dear Mr. Aune:

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the above referenced project. The Lancaster Health District Master Plan would allow development of up to approximately 875,000 sf of commercial and office space; a renovated or new hospital with up to 468 beds; approx. 147,000 sf of continuum of care space; up 150 hotel rooms; 275 single-family residential dwelling units; 965 multifamily residential dwelling units; redesign of the internal circulation system; and other infrastructure systems.

We have reviewed this local development for impact to the State Highway System in keeping with our mission, vision, and goals for sustainability/livability/economy, and safety/health. We provide these comments consistent with the State's smart mobility goals that support a vibrant economy, and build communities, not sprawl.

This development will significantly increase Vehicle-Miles Traveled (VMT) on the State Highway System. It is anticipated to generate a considerable amount of trips per peak hour on nearby State Route-14 (SR-14).

Senate Bill 743 (2013) mandated that CEQA review of transportation impacts of proposed development be modified by eliminating consideration of delay- and capacity- based metrics such as level of service (LOS) and instead focusing analysis on another metric of impact. The Governor's Office of Planning and Research (OPR) is currently updating its CEQA Guidelines to implement SB 743 (https://www.opr.ca.gov/s_sb743.php) and is proposing that vehicle miles traveled be the primary metric used in identifying transportation impacts.

The City should refer the project's traffic consultant to OPR's website, guidelines on evaluating transportation impacts in CEQA if VMT methodology is used:
https://www.opr.ca.gov/docs/Revised_VMT_CEQA_Guidelines_Proposal_January_20_2016.pdf

If the City decides to use Level of Service (LOS) when preparing the traffic analysis on the State facilities, please refer the project's traffic consultant to Caltrans' traffic study guide Website:
http://www.dot.ca.gov/hq/tpp/offices/ocp/igr_ceqa_files/tisguide.pdf

To assist in evaluating the impacts of this project on State transportation facilities, a traffic study should be prepared prior to preparing the Draft Environmental Impact Report (DEIR). Please refer the project's traffic consultant to Caltrans' traffic study guide Website:
http://www.dot.ca.gov/hq/tpp/offices/ocp/igr_ceqa_files/tisguide.pdf

Listed below are elements of what is generally expected in the traffic study:

1. Key intersections and any traffic impact including, but not limited to SR-14.

2. Traffic volume counts to include anticipated AM and PM peak-hour volumes

3. Level of Service (LOS) before and during construction.

4. A brief traffic discussion showing ingress/egress, turning movements, and the directional flow of project vehicle trips.

5. Analysis of the multimodal travel demand expected from the proposed project. The study should include and analysis of the Base Year, (at the time the project opens for business), project only, as well as Base Year plus Project. This analysis should also identify potentially significant adverse impacts from such demands and avoidance, minimization, and mitigation measures needed to address them.

6. Discussion of mitigation measures appropriate to alleviate anticipated traffic impacts, including sharing of mitigation costs.

In the Spirit of mutual cooperation, Caltrans staff is available to work with your planners and traffic engineers for this project, if needed. If you have any questions regarding these comments, please contact project coordinator Ms. Miya Edmonson, at (213) 897-6536 and refer to GTS# LA-2017-00932ME

Sincerely,

DIANNA WATSON
IGR/CEQA Branch Chief

Re: **CEQA and Land Use Notice Request for the Lancaster Health District Master Plan (SCH2017051076)**

Dear Addressees:

I am writing on behalf of the Laborers International Union of North America, Local Union 300 and its members living in Los Angeles County and/or the City of Lancaster ("LiUNA") regarding the Project known as Lancaster Health District Master Plan (SCH 2017051076), including all actions referring or related to the development of up to approximately 875,000 sf of commercial and office space; a renovated or new hospital with up to 468 beds; 147,000 sf of continuum of care space; up 150 hotel rooms; 275 single family residential dwelling units, and 965 multifamily residential dwelling units near the cross of Avenue J, Avenue K, 20th St West, and Kingtree Ave ("Project").

We hereby request that the City of Lancaster ("City") send by electronic mail, if possible or U.S. mail to our firm at the address below notice of any and all actions or hearings related to activities undertaken, authorized, approved, permitted, licensed, or certified by the City and any of its subdivisions, and/or supported, in whole or in part, through contracts, grants, subsidies, loans or other forms of assistance from the City, including, but not limited to the following:

- Notice of any public hearing in connection with the Project as required by California Planning and Zoning Law pursuant to Government Code Section 65091.
- Any and all notices prepared for the Project pursuant to the California Environmental Quality Act ("CEQA"), including, but not limited to:

- Notices of any public hearing held pursuant to CEQA.
- Notices of determination that an Environmental Impact Report ("EIR") is required for a project, prepared pursuant to Public Resources Code Section 21080.4.
- Notices of any scoping meeting held pursuant to Public Resources Code Section 21083.9.
- Notices of preparation of an EIR or a negative declaration for a project, prepared pursuant to Public Resources Code Section 21092.
- Notices of availability of an EIR or a negative declaration for a project, prepared pursuant to Public Resources Code Section 21152 and Section 15087 of Title 14 of the California Code of Regulations.
- Notices of approval and/or determination to carry out a project, prepared pursuant to Public Resources Code Section 21152 or any other provision of law.
- Notices of approval or certification of any EIR or negative declaration, prepared pursuant to Public Resources Code Section 21152 or any other provision of law.
- Notices of determination that a project is exempt from CEQA, prepared pursuant to Public Resources Code section 21152 or any other provision of law.
- Notice of any Final EIR prepared pursuant to CEQA.
- Notice of determination, prepared pursuant to Public Resources Code Section 21108 or Section 21152.

Please note that we are requesting notices of CEQA actions and notices of any public hearings to be held under any provision of Title 7 of the California Government Code governing California Planning and Zoning Law. **This request is filed pursuant to Public Resources Code Sections 21092.2 and 21167(f), and Government Code Section 65092**, which require local counties to mail such notices to any person who has filed a written request for them with the clerk of the agency's governing body.

Please send notice by electronic mail, if possible or U.S. mail to:

GRACE ROBINSON HYDE
Chief Engineer and General Manager

June 8, 2017

Ref. Doc. No.: 4153171

Mr. Christopher Aune, Associate Planner
Community Development Technician
Community Development Services
City of Lancaster
44933 Fern Avenue
Lancaster, CA 93534-2461

Dear Mr. Aune:

Response to NOP for the Lancaster Health District Master Plan

The Sanitation Districts of Los Angeles County (Districts) received a Notice of Preparation of a Draft Environmental Impact Report (NOP) for the subject project on May 16, 2017. The majority of the proposed project area is located within the jurisdictional boundary of District No. 14. We offer the following comments:

1. The portions of the project area outside of the jurisdictional boundaries of the Districts will require annexation into District No. 14 before sewerage service can be provided to proposed development within those areas. For a copy of the Districts' Annexation Information and Processing Fee sheets, go to www.lacsd.org, Wastewater & Sewer Systems, Will Serve Program, and click on the appropriate link. For more specific information regarding the annexation procedure and fees, please contact Ms. Donna Curry at (562) 908-4288, extension 2708.

2. The Districts own, operate, and maintain the trunk sewers that form the backbone of the regional wastewater conveyance system. Local collector and/or lateral sewer lines are the responsibility of the jurisdiction in which they are located. As such, the Districts cannot comment on any deficiencies in the sewerage system within the Lancaster Health District area (LHD) except to state that presently no deficiencies exist in Districts' facilities that serve LHD. For information on deficiencies within LHD's sewerage system, please contact the City of Lancaster's Department of Public Works and/or the Los Angeles County Department of Public Works.

3. The wastewater generated by the proposed project area will be treated at the Lancaster Water Reclamation Plant, which has a capacity of 18 mgd and currently produces an average recycled water flow of 12.8 mgd.

4. Based on the Districts' average wastewater generation factors, the maximum development capacity stated in the notice as 875,000 square feet of commercial and office space, a renovated or new hospital with up to 468 beds, approximately 147,000 square feet of continuum of care space, up to 150 hotel rooms, 275 single-family residential dwelling units, and 965 multi-family residential dwelling units would total to an average wastewater flow of approximately 627,765 gallons per day. For a copy of the Districts' average wastewater generation factors, go to

Recycled Paper

www.lacsd.org, Wastewater & Sewer Systems, click on Will Serve Program, and click on the Table 1, Loadings for Each Class of Land Use link.

5. The Districts should review individual developments within LHD in order to determine whether or not sufficient trunk sewer capacity exists to serve each project and if Districts' facilities will be affected by the project.

6. The Districts are empowered by the California Health and Safety Code to charge a fee for the privilege of connecting (directly or indirectly) to the Districts' Sewerage System or for increasing the strength or quantity of wastewater discharged from connected facilities. This connection fee is a capital facilities fee that is imposed in an amount sufficient to construct an incremental expansion of the Sewerage System to accommodate proposed projects. Payment of a connection fee will be required before a permit to connect to the sewer is issued. For more information and a copy of the Connection Fee Information Sheet, go to www.lacsd.org, Wastewater & Sewer Systems, click on Will Serve Program, and search for the appropriate link. In determining the impact to the Sewerage System and applicable connection fees, the Districts' Chief Engineer will determine the user category (e.g. Condominium, Single Family home, etc.) that best represents the actual or anticipated use of the parcel or facilities on the parcel. For more specific information regarding the connection fee application procedure and fees, please contact the Connection Fee Counter at (562) 908-4288, extension 2727.

7. In order for the Districts to conform to the requirements of the Federal Clean Air Act (CAA), the capacities of the Districts' wastewater treatment facilities are based on the regional growth forecast adopted by the Southern California Association of Governments (SCAG). Specific policies included in the development of the SCAG regional growth forecast are incorporated into clean air plans, which are prepared by the South Coast and Antelope Valley Air Quality Management Districts in order to improve air quality in the South Coast and Mojave Desert Air Basins as mandated by the CAA. All expansions of Districts' facilities must be sized and service phased in a manner that will be consistent with the SCAG regional growth forecast for the counties of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial. The available capacity of the Districts' treatment facilities will, therefore, be limited to levels associated with the approved growth identified by SCAG. As such, this letter does not constitute a guarantee of wastewater service, but is to advise you that the Districts intend to provide this service up to the levels that are legally permitted and to inform you of the currently existing capacity and any proposed expansion of the Districts' facilities.

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2717.

Very truly yours,

Adriana Raza

RE: SCAG Comments on the Notice of Preparation of a Draft Environmental Impact Report for the Lancaster Health District Master Plan [SCAG NO. IGR9276]

Dear Mr. Aune,

Thank you for submitting the Notice of Preparation of a Draft Environmental Impact Report for the Lancaster Health District Master Plan ("proposed project") to the Southern California Association of Governments (SCAG) for review and comment. SCAG is the authorized regional agency for Inter-Governmental Review (IGR) of programs proposed for Federal financial assistance and direct Federal development activities, pursuant to Presidential Executive Order 12372. Additionally, SCAG reviews the Environmental Impact Reports of projects of regional significance for consistency with regional plans pursuant to the California Environmental Quality Act (CEQA) and CEQA Guidelines.

SCAG is also the designated Regional Transportation Planning Agency under state law, and is responsible for preparation of the Regional Transportation Plan (RTP) including the Sustainable Communities Strategy (SCS) pursuant to Senate Bill (SB) 375. As the clearinghouse for regionally significant projects per Executive Order 12372, SCAG reviews the consistency of local plans, projects, and programs with regional plans.[1] Guidance provided by these reviews is intended to assist local agencies such as local jurisdictions and project proponents to take actions that help contribute to the attainment of the regional goals and policies in the RTP/SCS.

SCAG staff has reviewed the Notice of Preparation of a Draft Environmental Impact Report for the Lancaster Health District Master Plan in Los Angeles County. The proposed project would permit development potential of up to 875,000 square feet (sf) of commercial and office space, 147,000 sf of continuum of care space, a hospital with up to 468 beds, a hotel with up to 150 rooms, 275 single-family residential dwelling units, and 965 multi-family residential dwelling units.

When available, please send environmental documentation to *SCAG's office in Los Angeles or by email to au@scag.ca.gov* providing, at a minimum, the full public comment period for review. If you have any questions regarding the attached comments, please contact the Inter-Governmental Review (IGR) Program, attn.: Anita Au, Assistant Regional Planner, at (213) 236-1874 or au@scag.ca.gov Thank you.

Sincerely,

Ping Chang

Ping Chang
Acting Manager, Compliance and Performance Monitoring

[1] Lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with the 2016 RTP/SCS for the purpose of determining consistency for CEQA. Any "consistency" finding by SCAG pursuant to the IGR process should not be construed as a determination of consistency with the 2016 RTP/SCS for CEQA.

COMMENTS ON THE NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE LANCASTER HEALTH DISTRICT MASTER PLAN [SCAG NO. IGR9276]

CONSISTENCY WITH RTP/SCS

SCAG reviews environmental documents for regionally significant projects for their consistency with the adopted RTP/SCS. For the purpose of determining consistency with CEQA, lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with the RTP/SCS.

2016 RTP/SCS GOALS

The SCAG Regional Council adopted the 2016 RTP/SCS in April 2016. The 2016 RTP/SCS seeks to improve mobility, promote sustainability, facilitate economic development and preserve the quality of life for the residents in the region. The long-range visioning plan balances future mobility and housing needs with goals for the environment, the regional economy, social equity and environmental justice, and public health (see http://scagrtpscs.net/Pages/FINAL2016RTPSCS.aspx). The goals included in the 2016 RTP/SCS may be pertinent to the proposed project. These goals are meant to provide guidance for considering the proposed project within the context of regional goals and policies. Among the relevant goals of the 2016 RTP/SCS are the following:

SCAG 2016 RTP/SCS GOALS	
RTP/SCS G1:	*Align the plan investments and policies with improving regional economic development and competitiveness*
RTP/SCS G2:	*Maximize mobility and accessibility for all people and goods in the region*
RTP/SCS G3:	*Ensure travel safety and reliability for all people and goods in the region*
RTP/SCS G4:	*Preserve and ensure a sustainable regional transportation system*
RTP/SCS G5:	*Maximize the productivity of our transportation system*
RTP/SCS G6:	*Protect the environment and health for our residents by improving air quality and encouraging active transportation (e.g., bicycling and walking)*
RTP/SCS G7:	*Actively encourage and create incentives for energy efficiency, where possible*
RTP/SCS G8:	*Encourage land use and growth patterns that facilitate transit and active transportation*
RTP/SCS G9:	*Maximize the security of the regional transportation system through improved system monitoring, rapid recovery planning, and coordination with other security agencies**
	**SCAG does not yet have an agreed-upon security performance measure.*

For ease of review, we encourage the use of a side-by-side comparison of SCAG goals with discussions of the consistency, non-consistency or non-applicability of the goals and supportive analysis in a table format. Suggested format is as follows:

SCAG 2016 RTP/SCS GOALS		
Goal		Analysis
RTP/SCS G1:	*Align the plan investments and policies with improving regional economic development and competitiveness*	*Consistent: Statement as to why;* *Not-Consistent: Statement as to why;* *Or* *Not Applicable: Statement as to why;* *DEIR page number reference*
RTP/SCS G2:	*Maximize mobility and accessibility for all people and goods in the region*	*Consistent: Statement as to why;* *Not-Consistent: Statement as to why;* *Or* *Not Applicable: Statement as to why;* *DEIR page number reference*
etc.		etc.

2016 RTP/SCS STRATEGIES

To achieve the goals of the 2016 RTP/SCS, a wide range of land use and transportation strategies are included in the 2016 RTP/SCS. Technical appendances of the 2016 RTP/SCS provide additional supporting information in detail. To view the 2016 RTP/SCS, please visit: http://scagrtpscs.net/Pages/FINAL2016RTPSCS.aspx. The 2016 RTP/SCS builds upon the progress from the 2012 RTP/SCS and continues to focus on integrated, coordinated, and balanced planning for land use and transportation that the SCAG region strives toward a more sustainable region, while the region meets and exceeds in meeting all of applicable statutory requirements pertinent to the 2016 RTP/SCS. These strategies within the regional context are provided as guidance for lead agencies such as local jurisdictions when the proposed project is under consideration.

DEMOGRAPHICS AND GROWTH FORECASTS

Local input plays an important role in developing a reasonable growth forecast for the 2016 RTP/SCS. SCAG used a bottom-up local review and input process and engaged local jurisdictions in establishing the base geographic and socioeconomic projections including population, household and employment. At the time of this letter, the most recently adopted SCAG jurisdictional-level growth forecasts that were developed in accordance with the bottom-up local review and input process consist of the 2020, 2035, and 2040 population, households and employment forecasts. To view them, please visit http://www.scag.ca.gov/Documents/2016GrowthForecastByJurisdiction.pdf. The growth forecasts for the region and applicable jurisdictions are below.

	Adopted SCAG Region Wide Forecasts			Adopted City of Lancaster Forecasts		
	Year 2020	Year 2035	Year 2040	Year 2020	Year 2035	Year 2040
Population	19,663,000	22,091,000	22,138,800	167,400	195,800	209,900
Households	6,458,000	7,325,000	7,412,300	52,400	61,000	65,300
Employment	8,414,000	9,441,000	9,871,500	51,700	56,700	59,600

MITIGATION MEASURES

SCAG staff recommends that you review the Final Program Environmental Impact Report (Final PEIR) for the 2016 RTP/SCS for guidance, as appropriate. SCAG's Regional Council certified the Final PEIR and adopted the associated Findings of Fact and a Statement of Overriding Considerations (FOF/SOC) and Mitigation Monitoring and Reporting Program (MMRP) on April 7, 2016 (please see: http://scagrtpscs.net/Pages/FINAL2016PEIR.aspx). The Final PEIR includes a list of project-level performance standards-based mitigation measures that may be considered for adoption and implementation by lead, responsible, or trustee agencies in the region, as applicable and feasible. Project-level mitigation measures are within responsibility, authority, and/or jurisdiction of project-implementing agency or other public agency serving as lead agency under CEQA in subsequent project- and site- specific design, CEQA review, and decision-making processes, to meet the performance standards for each of the CEQA resource categories.

Lancaster Health District (All Sub Areas - Antelope Valley APCD Air District, Summer

Lancaster Health District (Existing)

Antelope Valley APCD Air District, Summer

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Medical Office Building	230.00	1000sqft	5.28	230,000.00	0
Hospital	420.00	Bed	6.90	300,618.18	0
Apartments Low Rise	376.00	Dwelling Unit	23.50	376,000.00	1075
Single Family Housing	59.00	Dwelling Unit	19.16	106,200.00	169
General Office Building	394.43	1000sqft	9.05	394,430.00	0
Regional Shopping Center	646.00	1000sqft	38.39	646,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	9			**Operational Year**	2019
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

NOTE: Only operational emissions were used during this phase. To avoid confusion, portions of this output related to construction were removed.

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - According to Trip Generation estimates for the entire project

Construction Phase - Operation only

Off-road Equipment - Short construction period

Off-road Equipment - Operation only

Trips and VMT -

Demolition -

Grading - Project description

Vehicle Trips - Based on weekday trip rates from Traffic Study; weekend trip rates adjusted based on default ratio for each land use

Woodstoves - No woodstoves

Water And Wastewater -

Solid Waste -

Land Use Change -

Sequestration -

Construction Off-road Equipment Mitigation -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

Waste Mitigation -

Stationary Sources - Emergency Generators and Fire Pumps -

Stationary Sources - Process Boilers -

Stationary Sources - User Defined -

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Medical Office Building	230.00	1000sqft	5.28	230,000.00	0
Hospital	420.00	Bed	6.90	300,618.18	0
Apartments Low Rise	376.00	Dwelling Unit	23.50	376,000.00	1075
Single Family Housing	59.00	Dwelling Unit	19.16	106,200.00	169
General Office Building	394.43	1000sqft	9.05	394,430.00	0
Regional Shopping Center	646.00	1000sqft	38.39	646,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	9			**Operational Year**	2019
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

NOTE: Only operational emissions were used during this phase. To avoid confusion, portions of this output related to construction were removed.

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - According to Trip Generation estimates for the entire project

Construction Phase - Operation only

Off-road Equipment - Short construction period

Off-road Equipment - Operation only

Trips and VMT -

Demolition -

Grading - Project description

Vehicle Trips - Based on weekday trip rates from Traffic Study; weekend trip rates adjusted based on default ratio for each land use

Woodstoves - No woodstoves

Water And Wastewater -

Solid Waste -

Land Use Change -

Sequestration -

Construction Off-road Equipment Mitigation -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

Waste Mitigation -

Stationary Sources - Emergency Generators and Fire Pumps -

Stationary Sources - Process Boilers -

Stationary Sources - User Defined -

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	600.00	1000sqft	13.77	600,000.00	0
Hospital	300.00	Bed	4.93	700,000.00	0
Hospital	364.00	Bed	5.98	260,535.76	0
Unenclosed Parking with Elevator	1,100.00	Space	9.90	440,000.00	0
High Turnover (Sit Down Restaurant)	91.00	1000sqft	2.09	91,000.00	0
Hotel	180.00	Room	6.00	329,200.00	0
Apartments Low Rise	1,350.00	Dwelling Unit	84.38	1,350,000.00	3861
Congregate Care (Assisted Living)	400.00	Dwelling Unit	25.00	400,000.00	1144
Single Family Housing	250.00	Dwelling Unit	81.17	450,000.00	715
Regional Shopping Center	151.00	1000sqft	3.47	151,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	9			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - According to Trip Generation estimates for the entire project

Construction Phase - Default construction assumption
Paving and architectural coating to take place intermittently

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Demolition - Demolition of existing hospital and partial demolition of commercial uses.

Grading - Project description

Vehicle Trips - Based on weekday trip rates from Traffic Study; weekend trip rates adjusted based on default ratio for each land use

Woodstoves - No woodstoves

Water And Wastewater -

Solid Waste -

Land Use Change -

Sequestration -

Construction Off-road Equipment Mitigation - Per CARB Title 13 CCR Section 2520-2427, equipment required to be Tier 4 Final for new equipment. Air Basin recommends Tier 3 with Level 3 DPF at the minimum
Mobile Land Use Mitigation - Metrolink station located approximately 1 mile to the east

Area Mitigation - AVAQMD Rule 1113 VOC limit of 50 grams per liter (g/L) for flats, 100 g/L for non-flat, and those used for traffic coating would meet the 100 g/L VOC limit

Energy Mitigation -

Water Mitigation -

Waste Mitigation -

Stationary Sources - Emergency Generators and Fire Pumps -

Stationary Sources - Process Boilers -

Stationary Sources - User Defined -

Off-road Equipment - Short construction period

Trips and VMT - Haul trips are Round Trips

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Replace Ground Cover

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Demolition - 2021

Unmitigated Construction On-Site

Regional Shopping Center	151.00	1000sqft	3.47	151,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	9			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - According to Trip Generation estimates for the entire project

Construction Phase - Default construction assumption
Paving and architectural coating to take place intermittently

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Demolition - Demolition of existing hospital and partial demolition of commercial uses.

Grading - Project description

Vehicle Trips - Based on weekday trip rates from Traffic Study; weekend trip rates adjusted based on default ratio for each land use

Woodstoves - No woodstoves

Water And Wastewater -

Solid Waste -

Land Use Change -

Sequestration -

Construction Off-road Equipment Mitigation - Per CARB Title 13 CCR Section 2520-2427, equipment required to be Tier 4 Final for new equipment. Air Basin recommends Tier 3 with Level 3 DPF at the minimum

Mobile Land Use Mitigation - Metrolink station located approximately 1 mile to the east

Area Mitigation - AVAQMD Rule 1113 VOC limit of 50 grams per liter (g/L) for flats, 100 g/L for non-flat, and those used for traffic coating would meet the 100 g/L VOC limit

Energy Mitigation -

Water Mitigation -

Waste Mitigation -

Stationary Sources - Emergency Generators and Fire Pumps -

Stationary Sources - Process Boilers -

Stationary Sources - User Defined -

Off-road Equipment - Short construction period

Trips and VMT - Haul trips are Round Trips

3.1 Mitigation Measures Construction

Use DPF for Construction Equipment

Replace Ground Cover

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Use Cleaner Engines for Construction Equipment

3.2 Demolition - 2021

Unmitigated Construction On-Site

1.0 INTRODUCTION

BioResource Consultants, Inc., (BRC) has prepared this Habitat and Resource Assessment Report for the analysis of biological resources, including the potential for occurrence of special-status species and their habitats, at the proposed Lancaster Health District (Project) site within the city of Lancaster, Los Angeles County, California.

1.1 PROJECT LOCATION

The Project site is located within the City of Lancaster (City) in Los Angeles County, California. The Project site is approximately 288 acres and consists of multiple parcels bordered by West Avenue J to the north; 15th Street West, Kinglee Avenue, West Avenue J-5, and 13th Street West to the east; West Avenue K to the south; and the Antelope Valley Freeway (SR-14) to the west. The Project islocated at 34.684803°N, -118.160411°W, Township 7 North, Range 12 West, Section 21 on the *Lancaster West* United States Geological Survey (USGS) 7.5-minute series topographic quadrangle (Figure 1).

1.2 PROJECT DESCRIPTION

The proposed Project includes the development of a Master Plan to guide development within the Project boundary with a mix of land uses including hospital/medical, retail, and multifamily use (Figure 2).

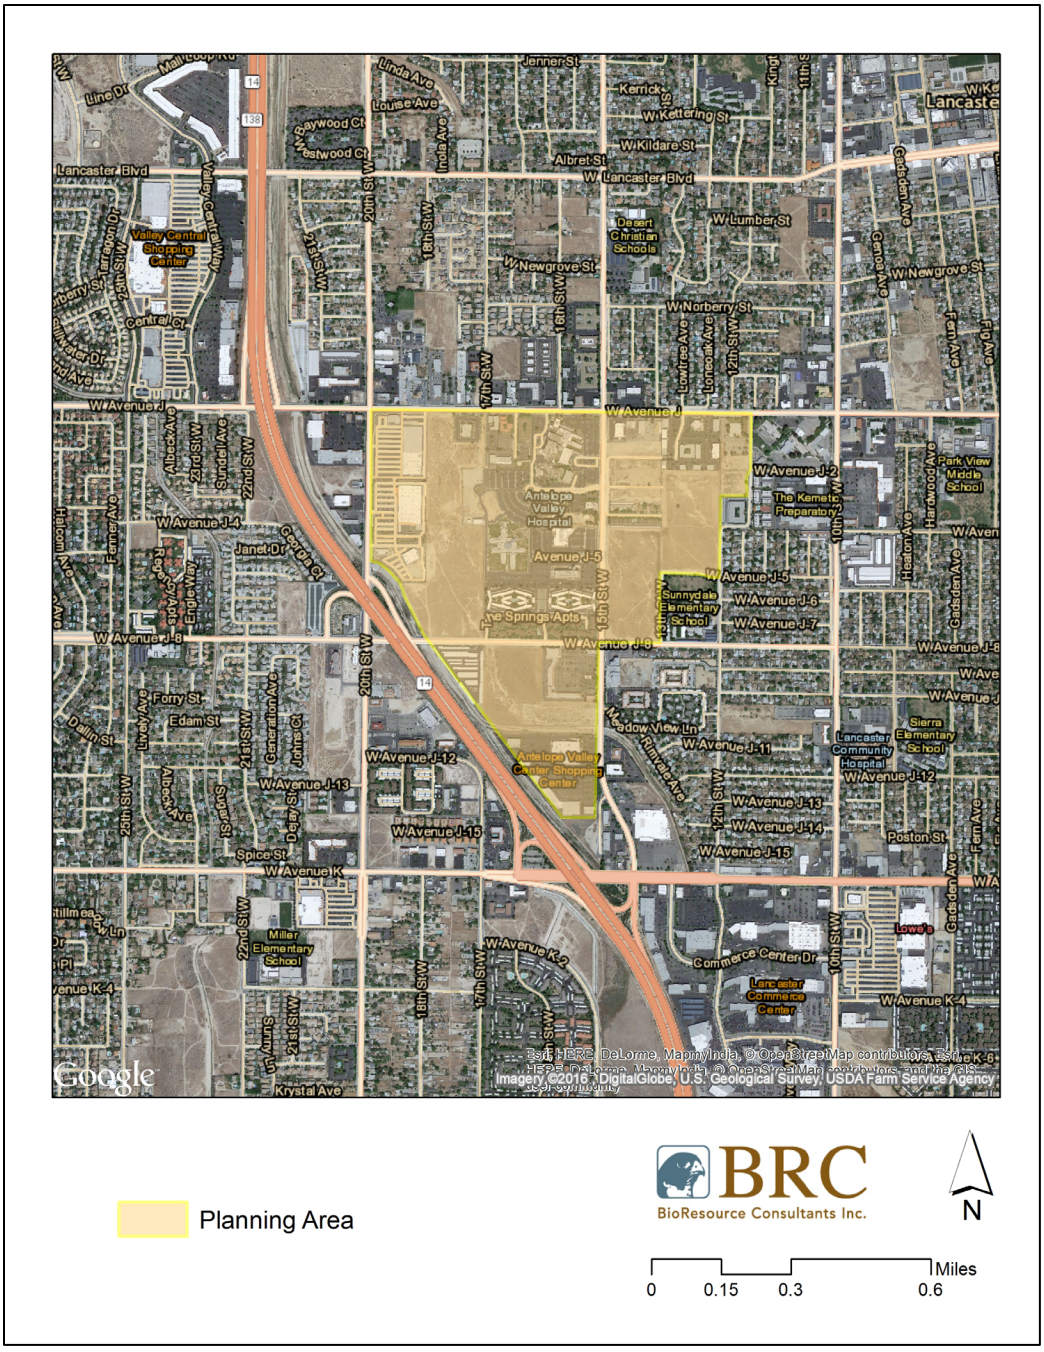

Figure 1. Project Location

2.0 METHODOLOGY

2.1 LITERATURE AND DATABASE REVIEW

Prior to conducting the on-site biological surveys, BRC conducted standard database searches and reviewed reports from previous surveys of the Project area to obtain pertinent information regarding potential special-status species and sensitive natural communities that occur within the Project vicinity. The results of these preliminary database searches provided a basis for addressing the appropriate special-status species within the Project area. The following resources were reviewed:

- CNDDB *Rarefind 5* (CDFW 2015) data within the U.S. Geological Survey *Lancaster West* and surrounding 7.5 minute topographic quadrangles
- California Native Plant Society's (CNPS) online *Inventory of Rare and Endangered Plants* containing species-specific habitat requirements for plant species (CNPS 2015)
- United States Fish and Wildlife Service (USFWS) database of designated Critical Habitat
- *The Jepson Manual*, second edition (Baldwin et al. 2012)
- *A Manual of California Vegetation* (Sawyer et al. 2009)
- *eBird* website (eBird 2012).

Using information from the various listed sources, the potential for special-status species to occur within the Project area was assessed as High, Medium, or Low based on the following criteria:

- High: CNDDB or other documented occurrences have been recorded within one mile of the Project area and suitable habitat is present; or, individuals were observed during field surveys.
- Medium: CNDDB or other documented occurrences have been recorded within five miles of the Project area and suitable habitat is present. Individuals were not observed during field surveys, but have potential to occur during breeding season.
- Low: Habitat is not present or marginal habitat may occur in the Survey area but no CNDDB records exist for the species within five miles of the Project area; or, the species in question was potentially misidentified for CNDDB reporting; or, individuals of the species were not observed during field surveys and are not anticipated to be present.

2.2 BIOLOGICAL FIELD SURVEYS

On July 20, 2016, BRC biologist Stephen Jones, who is familiar with the natural resources and sensitive species of the region, conducted a reconnaissance-level natural resources survey of the Project area. The survey area included the entire approximately 288-acre Project site. The area was methodically surveyed on foot to document the existing conditions as well as wildlife and plant species present and to map plant communities.

Due to the timing of the survey it was not possible to schedule the field survey during the optimum survey period for all of the special-status plant and wildlife species known to occur in

the region. Therefore, the objective of the field survey was to determine the likelihood of occurrence of any special-status plant or wildlife species based on the presence/absence of suitable habitat and other natural history elements that might predict their occurrence.

The survey conditions and timing of the survey were deemed suitable for determining potential biological constraints for the proposed Project. The biologists recorded all dominant plant species encountered during the field surveys. Scientific nomenclature follows the Jepson Interchange *List of Currently Accepted Names of Native and Naturalized Plants of California* (Jepson Flora Project 2012).

Surveys for wildlife species included searching for and identifying species' diagnostic sign (i.e. audible calls, prints, scat, nests, skeletal remains, burrows, etc.) and habitat features (i.e. rock or debris piles, cavities, and rock outcrops) that may attract and/or support special-status species. Taxonomy and nomenclature for wildlife generally follows Collins and Taggert (2009) for amphibians and reptiles, American Ornithologists Union (AOU 2012) for birds, and Baker et al. (2003) for mammals.

2.3 VEGETATION MAPPING

Vegetation communities were determined by identifying the dominant and co-dominant plant species. Once the dominant and co-dominant species were determined, the community boundary was delineated and mapped for the Project area. The delineated boundary was hand-drawn onto field maps and representative GPS coordinates were taken along the boundary to provide reference points for subsequent GIS mapping of vegetation community polygons. The vegetation communities were defined to an alliance and association level based on the guidelines within the *Manual of California Vegetation: Second Edition* (Sawyer et al. 2009).

2.4 WETLANDS AND WATERS

A preliminary delineation of the extent of potentially jurisdictional wetland and non-wetland Waters of the United States pursuant to the Federal Clean Water Act (CWA) and that of lakes, rivers, or streambeds and associated riparian vegetation pursuant to the California Fish and Game Code was conducted at the Project site. The survey focused on the United States Army Corp of Engineers (USACE) three mandatory criteria (hydric soils, hydrology, and hydrophytic vegetation), to determine the need for further analysis based on the routine onsite delineation method described in the *U.S. Army Corps of Engineers Wetland Delineation Manual* (1987), and in accordance with the methods identified in the *Regional Supplement to the Corps of Engineers Wetland Delineation Manual Arid West Region (Version 2.0)* (2008).

The boundaries of non-tidal, non-wetland waters were delineated at the ordinary high water mark (OHWM), as defined by 33 CFR 328.3 and in accordance with *A Field Guide to the Identification of the Ordinary High Water Mark (OHWM) in the Arid West Region of the U.S., A Delineation Manual* (August 2008). The boundaries of aquatic resources potentially subject to regulation by the CDFW were delineated using agency-issued guidance under the California Fish and Game Code, related CDFW guidance materials, and standard practices by CDFW personnel.

CDFW jurisdiction was delineated by measuring the outer boundaries of the greater of either the top of bank measurement or the extent of associated riparian or wetland vegetation.

3.0 RESULTS

3.1 EXISTING ENVIRONMENTAL CONDITIONS

The 288-acre Project site is located within the city of Lancaster in Los Angeles County. Elevation at the Project site ranges from 2,348 to 2,394 feet above mean sea level. The Project site consists of developed land characterized by a variety of commercial, industrial, retail, and medical facilities with vacant, undeveloped parcels dominated by native and non-native plant assemblages. Several ornamental non-native trees are found on the vacant undeveloped parcels. A flood control channel forms the southwestern boundary and intersects the southern portion of the Project site. The Project site is surrounded by development and is highly disturbed due to alteration from compaction of soil, dumping and excavation, off-road vehicle use, and other man-made disturbances.

3.2 VEGETATION COMMUNITIES

The following vegetation communities/alliances were identified within the Project survey area (Table 1; Figure 3).

3.2.1 *Atriplex canascens* Shrubland Alliance (Fourwing Saltbush Scrub)

The Fourwing Saltbush Scrub is dominated by fourwing saltbush (*Atriplex canascens*) with rabbitbrush scrub (*Ericemeria nauseous*) as co-dominant in the scrub canopy with Russian thistle (*Salsola tragus*) and Mediterranean grass (*Schismus barbatus*). The herbaceous layer is variable with seasonal herbs and non-native grasses (Sawyer 2009).

3.2.2 *Schismus barbatus/Salsola tragus* Herbaceous Alliance (Mediterranean Grass/Russian Thistle Scrub)

The Mediterranean Grass/Russian Thistle Scrub is dominated by Mediterranean grass and Russian thistle, with storksbill (*Erodium cicutatium*) also occurring. This community is not described in *A Manual of California Vegetation* (Sawyer 2009).

3.2.3 Disturbed/Developed

Within the Project area, areas classified as disturbed/developed include graded areas, old foundations, existing structures, cleared areas, and roads. This community is not described in *A Manual for California Vegetation* (Sawyer 2009).

Table 1. Vegetation communities within the Project site.

Vegetation Community	Acres Within Project Site
Atriplex canascens Shrubland Alliance (Fourwing Saltbush Scrub) (FWSS)	22
Schismus barbatus/*Salsola tragus*(Mediterranean Grass/Russian Thistle Scrub) (MG/RTH)	80
Disturbed/Developed (D)	171
Flood Control Channel	15
Total	**288**

3.3 SENSITIVE HABITATS

No sensitive habitats are present at the Project site.

3.4 WATERS AND WETLANDS

No areas meeting the three mandatory criteria (hydrophytic vegetation, hydrology and hydric soils) for wetland Waters of the U.S. occur at the Project site. In addition, no natural non-wetland waters of the U.S regulated by the United States Army Corps of Engineers pursuant to Section 404 of the Clean Water Act or California Department of Fish and Wildlife streambeds or riparian habitat regulated by Section 1602 of the Fish and Game Code are present at the Project site. An improved flood-control channel forms the southwestern boundary and traverses the extreme southern portion of the Project Site. The drainage is cement-lined to naturally-lined with high banks and is bounded by a chain link fence (Figure 3). No impacts are expected form future Project development.

Figure 2. Vegetation communities within the Project site.

3.5 SPECIES

A total of 25 plant species were observed, including 15 native and 10 non-native species. A total of seven wildlife species were observed within the Project survey area. Refer to Appendix B for a full list of observed plant and wildlife species.

3.5.1 Special-Status Plant Species

Several special-status plant species are documented to occur within the vicinity of the Project area (Figure 5). No special-status plant species were documented within the Project area during the survey.

Based on the absence of suitable habitat within the Project area, all of the documented potential special-status plant species have a low likelihood to occur within the Project area and are not expected (Appendix A, Table 1).

A complete list of observed plant species is presented in Appendix B, Table 2.

While no special-status species occur in the Project area, Joshua trees (*Yucca brevifolia*) are present (Figure 5). Joshua trees are considered a significant resource in the Mojave Desert. However, the City of Lancaster does not have Joshua tree protection ordinance and the Project is not within unincorporated Los Angeles County; therefore, the Joshua trees onsite would not be protected or require a permit for removal.

Figure 3. Joshua Tree Locations

3.5.2 Special-Status Wildlife Species

Several special-status wildlife species are documented to occur in the vicinity of the Project site (Figure 5). No special-status wildlife species were observed within the Project site at the time of the survey.

The Project site does not contain designated critical habitat for sensitive wildlife species.

Based on the presence of suitable habitat within the Project area and nearby documented occurrences, two special-status wildlife species have a medium likelihood to occur. The remaining special-status species have a low likelihood to occur within the Project area and are not expected (Appendix A, Table 1).

A complete list of observed plant species is presented in Appendix B, Table 3.

Blainville's horned lizard (*Phrynosoma blainvillii*), a California Species of Special Concern (SSC). Blainville's horned lizard has a medium likelihood of occurrence, as ssuitable habitat is present on the Project site within the vacant non-developed parcels. The species inhabits open areas of sandy soil and low vegetation in valleys, foothills and semiarid mountains. Typically found in grasslands, coniferous forests, woodlands, and chaparral with open areas and patches of loose soil, this species could occur throughout the Project site. This species was not observed during Project surveys.

Loggerhead shrike (*Lanius ludovicianus*), a California SSC. Loggerhead shrikes have a medium likelihood of occurrence, as suitable habitat is present on the Project site within the vacant undeveloped parcels. Shrubs at the Project site provide nesting habitat for this species and the remainder of the Project site provides foraging habitat. Loggerhead shrikes inhabit open country with short vegetation and well-spaced shrubs or low trees, particularly those with spines or thorns. They frequent agricultural fields, pastures, old orchards, riparian areas, desert scrublands, savannas, prairies, golf courses, and cemeteries. The species was not observed during Project surveys.

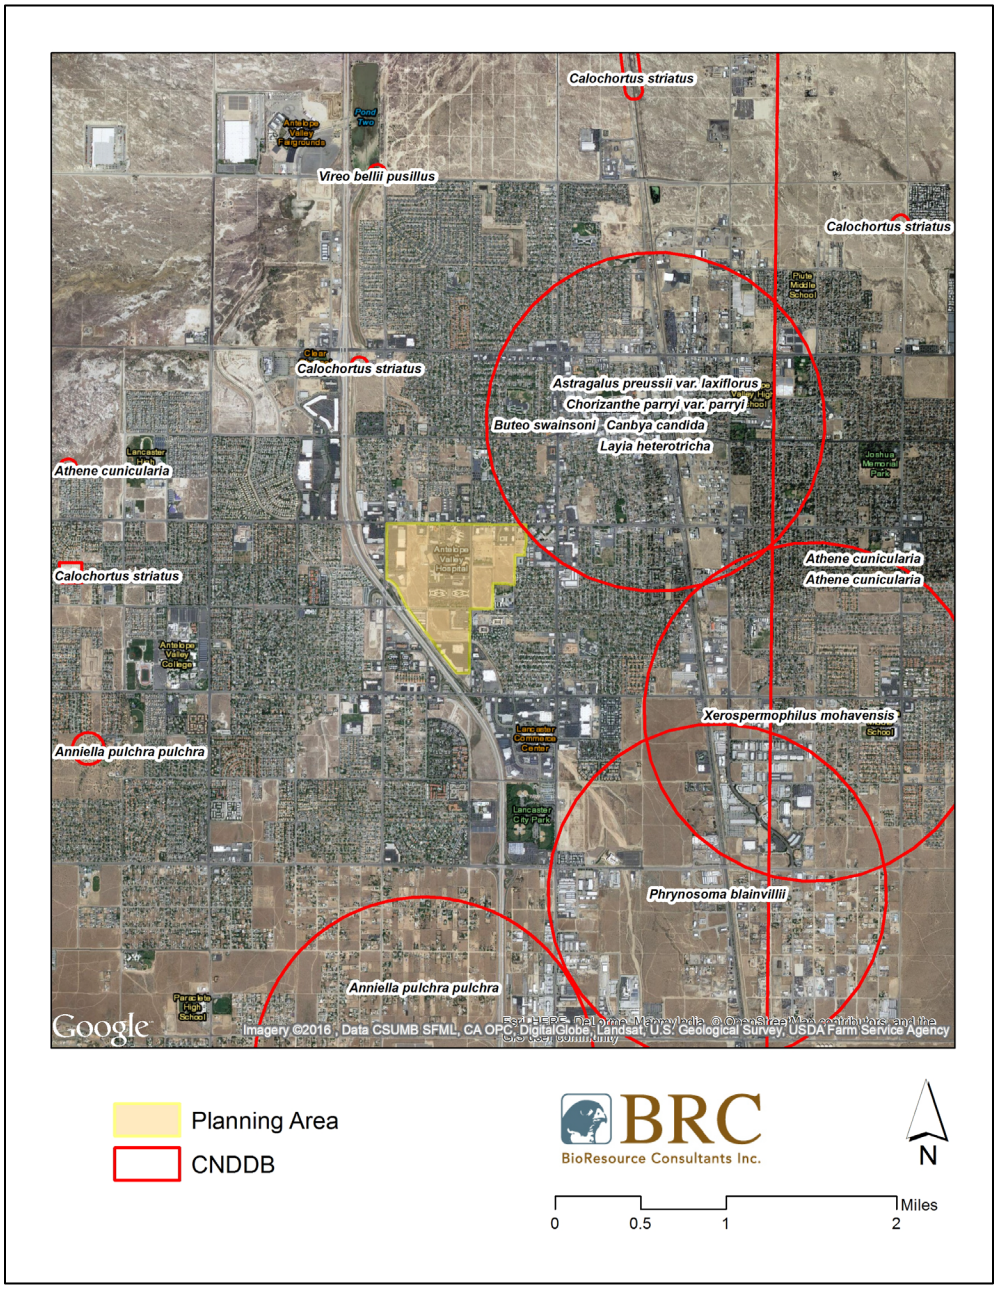

Figure 4. Documented occurrences of special-status species (CNDDB records) within the vicinity of the Project site.

3.5.3 Nesting Birds

The trees and shrubs at the Project site provide suitable nesting, roosting and perching habitat for migratory birds and raptors. It is anticipated that nesting birds protected by the MBTA and CDFW, fully-protected species, and species of special concern could nest at the Project site. No nesting birds were observed during Project surveys.

4.0 IMPACTS AND MITIGATION

Future Project development could result in the loss of native and non-native plant assemblages due to potential grading and construction. All of the vegetation communities in the Project site could be affected. In total, 102 acres of vegetated communities and171 acres of non-vegetated, Disturbed/Developed land could be affected by Project development.

4.1 SPECIES

4.1.1 Special-Status Wildlife Species

4.1.1.1 Loggerhead Shrike

Direct Impacts

Future Project development could result in the loss of suitable foraging, roosting and potential nesting habitat.

Indirect Impacts

Indirect impacts could occur due to potential elevated noise levels and vibration associated with future construction development, possibly resulting in the abandonment of nests, eggs, or young.

Mitigation

To the extent feasible, future Project construction should be conducted outside the general bird nesting season, which usually occurs between February 1 and August 31. If construction must occur within the nesting season, prior to any construction activity (including vegetation disturbance) a qualified biologist should conduct a survey for nesting birds, including owls and raptors, in all breeding/nesting habitat within 300 feet of any disturbance areas both within the Project site and adjacent to the Project site. The surveys shall be conducted no earlier than 30 days prior to initiation of ground or vegetation disturbance by the Project. If no breeding/nesting birds are observed, preparation and construction activities may begin.

If breeding activities and/or an active bird nest are located, the breeding habitat/nest site shall be delineated by a biological monitor to a minimum of 300 feet (500 feet for raptors) in all directions and this area shall not be disturbed until the nest becomes inactive, the young have fledged, the young are no longer being fed by the parents, the young have left the area, or the young will otherwise no longer be impacted by the Project.

4.1.1.2 Blainville's Horned Lizard

Direct Impacts

Future Project development could impact habitat for or individual Blainville's horned lizards due to vegetation removal and compaction from grading and construction.

Indirect Impacts

Indirect impacts could occur due to potential elevated noise levels and vibration associated with future construction development.

Mitigation

A qualified, permitted biologist will conduct a pre-construction survey within 72 hours of future Project construction. If lizards are not found during the pre-construction survey, work can commence. If lizards are observed, no work will commence until the individuals have left the area or have been relocated by a qualified biologist.

4.1.2 Nesting Birds

Direct Impacts

Project construction and implementation would result in the loss of suitable foraging, roosting and potential nesting habitat for birds within vegetated Fourwing Saltbush Scrub and Mediterranean Grass/Russian Thistle Herbaceous Alliance, totaling 102 acres, on the Project site.

Indirect Impacts

Indirect impacts could occur due to potential elevated noise levels and vibration associated with future construction development, possibly resulting in the abandonment of nests, eggs, or young.

Mitigation

Pre-construction nesting bird surveys shall occur as described in Section 4.1.1.1.

5.0 CUMULATIVE IMPACTS

Numerous species, including birds protected by the MBTA, occur in the region and development projects may adversely affect their suitable habitat and/or individuals of these species. With the implementation of Project-specific impact avoidance and mitigation measures, the proposed Project is not expected to substantially contribute to cumulative impacts on biological resources.

California Rare Plant Rank:
1B = Rare or Endangered in California and elsewhere
2B= Plants Rare, Threatened, or Endangered in California, But More Common Elsewhere
4 = Plants of limited distribution - Watch list
.1 = Seriously endangered in California (>80% of occurrences threatened)
.2 = Fairly endangered in California (20-80% occurrences threatened)
.3 = Not very endangered in California (<20% of occurrences threatened)

APPENDIX B:
Plants and Wildlife Observed During Field Surveys

Table 2. Plant and wildlife species observed within the Project area.

Scientific Name	Common Name	Family	Native/Non-Native
Amaranthus blitoides	prostrate pigweed	Amaranthaceae	Native
Ambrosia psilostachya	western ragweed	Asteraceae	Native
Ambrosia salsola	Russian thistle	Chenopodiaceae	Non-native
Atriplex canascens	Four-winged saltbush	Chenopodiaceae	Native
Atriplex polycarpa	allscale	Chenopodiaceae	Native
Bromus diandrus	ripgut brome	Poaceae	Non-native
Bromus. rubens	red brome	Poaceae	Non-native,
Chenopodium album	goosefoot	Chenopodiaceae	Non-native
Conyza canadensis	horseweed	Asteraceae	Native
Croton californica	croton	Euphorbiaceae	Native
Datura stramonium	jimson weed	Solanaceae	Native
Distichilis spicata	saltgrass	Poaceae	Native
Ericemeria nauseosa	rubber rabbitbrush	Asteraceae	Native
Heliotropum convolvulaceum	phlox heliotrope	Boraginaceae	Native
Helminthotheca echioides	bristly ox-tongue	Asteraceae	Non-native
Hirschfeldia incana	summer mustard	Brassicaceae	Non-native,
Marrubium vulgare	horehound	Lamiaceae	Non-native
Plantago erecta	California plantain	Plantaginaceae	Native
Rumex acetosella	common sheep sorrel	Polygonaceae	Native
Rumex hymenosepalus	dock	Polygonceae	Native
Schismus barbatus	meditrianian schismus	Poasceae	Non-Native
Stephanomeria runcinata	wire lettuce	Asteraceae	Native
Tamarix sp.	saltcedar	Tamaricaceae	Non-native
Tribulus terrestris	Puncture vine	Zygophyllaceae	Non-native
Yucca brevifolia	Joshua tree	Agavaceae	Native

Table 3. List of wildlife observed within the Project Site

Scientific Name	Common Name
Reptiles	
Sceloporus occidentalis longipes	Great Basin fence lizard
Birds	
Cathartes aura	turkey vulture
Columba livia	rock pigeon
Corvus corax	common raven
Haemorhous mexicanus	house finch
Mammals	
Otospermophilus beecheyi	California ground squirrel
Lepus californicus	Jackrabbit

MANAGEMENT SUMMARY

BCR Consulting LLC (BCR Consulting) is under contract to Meridian Consultants to complete an Archaeological Resources Assessment of the Lancaster Health District Project (project) located in the City of Lancaster, Los Angeles County, California. Please note that this assessment does not address historic-period buildings or paleontological resources. An archaeological resources records search and intensive-level pedestrian field survey were conducted for the project in partial fulfillment of the California Environmental Quality Act (CEQA). The records search revealed that 60 previous cultural resource studies have taken place and 15 archaeological resources have been recorded within one mile of the project site. Of the previous studies, eight have assessed portions of the project site, and 10 archaeological resources have been previously recorded within its boundaries. The 10 archaeological resources include four historic-period archaeological sites, three prehistoric archaeological sites, one archaeological site with historic-period and prehistoric components, and two isolated artifacts (one historic-period and one prehistoric).

During the field survey, BCR Consulting archaeologists identified two of the 10 previously recorded resources within the project site boundaries. These included P-19-2539 (a historic-period refuse scatter) and P-19-485 (a prehistoric lithic scatter). The two resources identified are not recommended eligible for the California Register, and as such are not recommended "historical resources" under CEQA. Existing building and parking lot construction have destroyed the remaining eight resources. Since they have been destroyed, these resources are also not recommended eligible for the California Register, and are not recommended "historical resources" under CEQA. However, due to the previous identification of numerous archaeological resources within the project site boundaries, it is possible that ground-disturbing activities could reveal the presence of resources not identified during the current study. Therefore, BCR Consulting recommends that an archaeological monitor be present during any earthmoving activities proposed within the project site boundaries. The monitor shall work under the direct supervision of a cultural resource professional who meets the U.S. Secretary of the Interior's Professional Qualification Standards for archaeology. The monitor shall be empowered to temporarily halt or redirect construction work in the vicinity of any find until the project archaeologist can evaluate it. In the event of a new find, salvage excavation and reporting will be required.

If human remains are encountered during the undertaking, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to Public Resources Code Section 5097.98. The County Coroner must be notified of the find immediately. If the remains are determined to be prehistoric, the Coroner will notify the Native American Heritage Commission (NAHC), which will determine and notify a Most Likely Descendant (MLD). With the permission of the landowner or his/her authorized representative, the MLD may inspect the site of the discovery. The MLD shall complete the inspection within 48 hours of notification by the NAHC.

INTRODUCTION

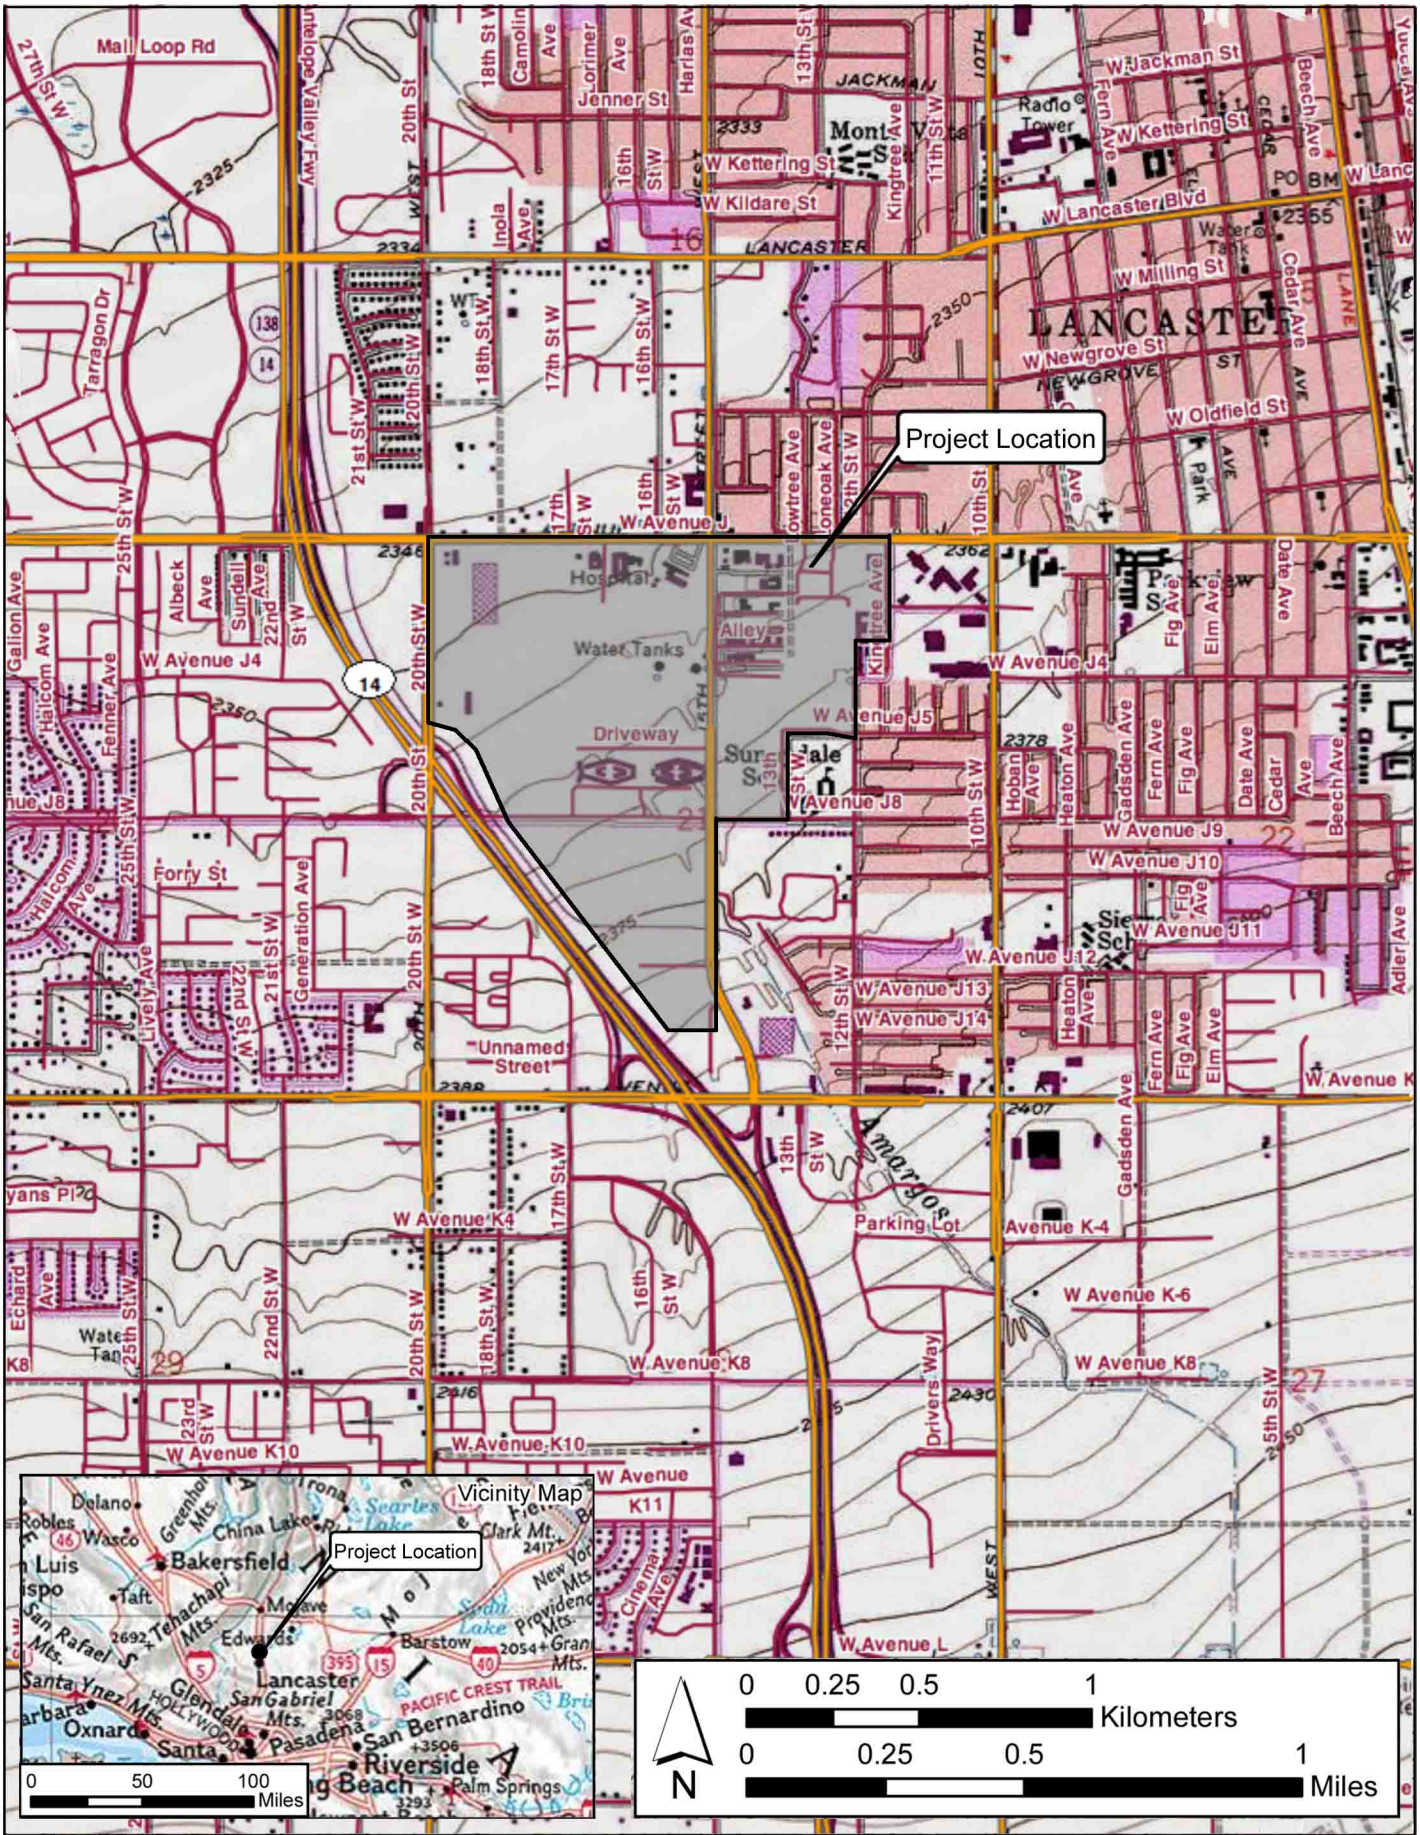
BCR Consulting LLC (BCR Consulting) is under contract to Meridian Consultants to complete an Archaeological Resources Assessment of the Lancaster Health District Project (project) located in the City of Lancaster, Los Angeles County, California. Please note that this assessment does not address historic-period buildings or paleontological resources. An archaeological resources records search and intensive-level pedestrian field survey were conducted for the project in partial fulfillment of the California Environmental Quality Act (CEQA). The project site, as identified in this report, is located in Section 21 of Township 7 North, Range 13 West, San Bernardino Baseline and Meridian (see Figure 1).

NATURAL SETTING

Geology

The project site is located in the southwestern portion of the Mojave Desert. Sediments within the project site boundaries have been derived from several geologic units (Hernandez 2010). These units include:

- Holocene slope wash composed of loose sand and rubble debris from downslope movement of Holocene surficial materials;
- Holocene modern alluvium containing unconsolidated fluvial gravel, sand and silt;
- Younger alluvial fan deposits (Holocene to Late Pleistocene) consisting of consolidated, dark-yellowish-brown, silty, fine sand with clay and calcium carbonate.



Field observations during the current study are basically consistent with these descriptions, although disturbances related to excavation and grading for fire suppression, building and parking lot construction, and utility and road installations were severe. The survey has revealed the presence of some lithic materials (including chalcedony and chert) within the project site boundaries that have been used in the manufacture of prehistoric stone tools.

Hydrology

The project site elevation ranges from approximately 2,343 to 2,395 feet above mean sea level (AMSL). Sheetwashing generally occurs from southeast to northwest, and flood channels are often active after summer and winter storms. To the southeast, the peaks of the San Gabriel Mountains rise above 10,000 feet and are often capped with snow until late spring or early summer. The area currently exhibits an arid climate, with dry, hot summers and cool winters. Rainfall ranges from five to 15 inches annually (Jaeger and Smith 1971:36-37). Precipitation usually occurs in the form of winter and spring rain or snow at high elevations, with occasional warm monsoonal showers in late summer.

Biology

The mild climate of the late Pleistocene allowed piñon-juniper woodland to thrive throughout most of the Mojave (Van Devender et al. 1987). The vegetation and climate during that epoch attracted significant numbers of Rancholabrean fauna, including dire wolf, saber-toothed cat, short-faced bear, horse, camel, antelope, mammoth, pelican, goose, duck, cormorant, and eagle (Reynolds 1988). The drier climate of the middle Holocene resulted in the local development of complementary flora and fauna, which remain largely intact to this day. Common native plants currently include creosote, cacti (various species), rabbit bush, interior golden bush, cheesebush, sage (various species), buckwheat (at high elevations

and near drainages), Joshua tree, and seasonal grasses. Common native animals include coyotes, cottontail and jackrabbits, rats, mice, desert tortoises, roadrunners, raptors, turkey vultures, and other bird species (see Williams et al. 2008).

CULTURAL SETTING

Prehistory

The prehistoric cultural setting of the Mojave Desert has been organized into many chronological frameworks (see Warren and Crabtree 1986; Bettinger and Taylor 1974; Lanning 1963; Hunt 1960; Wallace 1958, 1962, 1977; Wallace and Taylor 1978; Campbell and Campbell 1935), although there is no definitive sequence for the region. The difficulties in establishing cultural chronologies for the Mojave are a function of its enormous size and the small amount of archaeological excavations conducted there. Moreover, throughout prehistory many groups have occupied the Mojave and their territories often overlap spatially and chronologically resulting in mixed artifact deposits. Due to dry climate and capricious geological processes, these artifacts rarely become integrated in-situ. Lacking a milieu hospitable to the preservation of cultural midden, Mojave chronologies have relied upon temporally diagnostic artifacts, such as projectile points, or upon the presence/absence of other temporal indicators, such as groundstone. Such methods are instructive, but can be limited by prehistoric occupants' concurrent use of different artifact styles, or by artifact re-use or re-sharpening, as well as researchers' mistaken diagnosis, and other factors (see Flenniken 1985; Flenniken and Raymond 1986; Flenniken and Wilke 1989). Recognizing the shortcomings of comparative temporal indicators, this study synthesizes Warren and Crabree (1986), who have drawn upon this method to produce a commonly cited and relatively comprehensive chronology.

Paleoindian (12,000 to 10,000 BP) and Lake Mojave (10,000 to 7,000 BP) Periods. Climatic warming characterizes the transition from the Paleoindian Period to the Lake Mojave Period. This transition also marks the end of Pleistocene Epoch and ushers in the Holocene. The Paleoindian Period has been loosely defined by isolated fluted (such as Clovis) projectile points, dated by their association with similar artifacts discovered in-situ in the Great Plains (Sutton 1996:227-228). Some fluted bifaces have been associated with fossil remains of Rancholabrean mammals approximately dated to ca. 13,300-10,800 BP near China Lake in the northern Mojave Desert. The Lake Mojave Period has been associated with cultural adaptations to moist conditions, and resource allocation pointing to more lacustrine environments than previous eras (Bedwell 1973; Hester 1973). Artifacts that characterize this period include stemmed points, flake and core scrapers, choppers, hammerstones, and crescentics (Warren and Crabtree 1986:184). Projectile points associated with the period include the Silver Lake and Lake Mojave styles. Lake Mojave sites commonly occur on shorelines of Pleistocene lakes and streams, where geological surfaces of that epoch have been identified (Basgall and Hall 1994:69).

Pinto Period (7,000 to 4,000 BP). The Pinto Period has been largely characterized by desiccation of the Mojave. As formerly rich lacustrine environments began to disappear, the artifact record reveals more sporadic occupation of the Mojave, indicating occupants' recession to the more hospitable fringes (Warren 1984). Pinto Period sites are rare, and are characterized by surface manifestations that usually lack significant in-situ remains. Artifacts from this era include Pinto projectile points and a flake industry similar to the Lake Mojave tool complex (Warren 1984), though use of Pinto projectile points as an index artifact for the

era has been disputed (see Schroth 1994). Milling stones have also occasionally been associated with sites of this period (Warren 1984).

Gypsum Period. (4,000 to 1,500 BP). A temporary return to moister conditions during the Gypsum Period is postulated to have encouraged technological diversification afforded by the relative abundance of resources (Warren 1984:419-420; Warren and Crabtree 1986:189). Lacustrine environments reappear and begin to be exploited during this era (Shutler 1961, 1968). Concurrently a more diverse artifact assemblage reflects intensified reliance on plant resources. The new artifacts include milling stones, mortars, pestles, and a proliferation of Humboldt Concave Base, Gypsum Cave, Elko Eared, and Elko Corner-notched dart points (Warren 1984; Warren and Crabtree 1986). Other artifacts include leaf-shaped projectile points, rectangular-based knives, drills, large scraper planes, choppers, hammer stones, shaft straighteners, incised stone pendants, and drilled slate tubes. The bow and arrow appears around 2,000 BP, evidenced by the presence of a smaller type of projectile point, the Rose Spring point (Rogers 1939; Shutler 1961; Yohe 1992).

Saratoga Springs Period (1,500 to 800 BP). During the Saratoga Springs Period regional cultural diversifications of Gypsum Period developments are evident within the Mojave. Basketmaker III (Anasazi) pottery appears during this period, and has been associated with turquoise mining in the eastern Mojave Desert (Warren and Crabtree 1986:191). Influences from Patayan/Yuman assemblages are apparent in the southern Mojave, and include buff and brown wares often associated with Cottonwood and Desert Side-notched projectile points (Warren 1984:423). Obsidian becomes more commonly used throughout the Mojave and characteristic artifacts of the period include milling stones, mortars, pestles, ceramics, and ornamental and ritual objects. More structured settlement patterns are evidenced by the presence of large villages, and three types of identifiable archaeological sites (major habitation, temporary camps, and processing stations) emerge (McGuire and Hall 1988). Diversity of resource exploitation continues to expand, indicating a much more generalized, somewhat less mobile subsistence strategy.

Shoshonean Period (800 BP to Contact). The Shoshonean period is the first to benefit from contact-era ethnography –as well as be subject to its inherent biases. Interviews of living informants allowed anthropologists to match artifact assemblages and particular traditions with linguistic groups, and plot them geographically (see Kroeber 1925; Gifford 1918; Strong 1929). During the Shoshonean Period continued diversification of site assemblages, and reduced Anasazi influence both coincide with the expansion of Numic (Uto-Aztecan language family) speakers across the Great Basin, Takic (Uto-Aztecan language family) speakers into southern California, and the Hopi across the Southwest (Sutton 1996). Hunting and gathering continued to diversify, and the diagnostic arrow points include desert side-notch and cottonwood triangular. Ceramics continue to proliferate, though are more common in the southern Mojave during this period (Warren and Crabtree 1986). Trade routes have become well established across the Mojave, particularly the Mojave Trail, which transported goods and news across the desert via the Mojave River, to the west of the study area. Trade in the western Mojave was more closely related to coastal groups than others.

Ethnography

The Uto-Aztecan “Serrano” people occupied the western Mojave Desert periphery. Kroeber (1925) applied the generic term “Serrano” to four groups, each with distinct territories: the

Kitanemuk, Tataviam, Vanyume, and Serrano. Only one group, in the San Bernardino Mountains and West-Central Mojave Desert, ethnically claims the term Serrano. Bean and Smith (1978) indicate that the Vanyume, an obscure Takic population, was found along the Mojave River at the time of Spanish contact. The Kitanemuk lived to the north and west, while the Tataviam lived to the west. The Serrano lived mainly to the south (Bean and Smith 1978). All may have used the western Mojave area seasonally. Historical records are unclear concerning precise territory and village locations. It is doubtful that any group, except the Vanyume, actually lived in the region for several seasons yearly.

History

Historic-era California is generally divided into three periods: the Spanish or Mission Period (1769 to 1821), the Mexican or Rancho Period (1821 to 1848), and the American Period (1848 to present).

Spanish Period. The first European to pass through the study area is thought to be a Spaniard called Father Francisco Garces. Having become familiar with the area, Garces acted as a guide to Juan Bautista de Anza, who had been commissioned to lead a group across the desert from a Spanish outpost in Arizona to set up quarters at the Mission San Gabriel in 1771 near what today is Pasadena (Beck and Haase 1974). This is the first recorded group crossing of the Mojave Desert and, according to Father Garces' journal, they camped at the headwaters of the Mojave River, one night less than a day's march from the mountains. Today, this is estimated to have been approximately 11 miles southeast of Victorville (Marenczuk 1962). Garces was followed by Alta California Governor Pedro Fages, who briefly explored the western Mojave region in 1772. Searching for San Diego Presidio deserters, Fages had traveled north through Riverside to San Bernardino, crossed over the mountains into the Mojave Desert, and then journeyed westward to the San Joaquin Valley (Beck and Haase 1974).

Mexican Period. In 1821, Mexico overthrew Spanish rule and the missions began to decline. By 1833, the Mexican government passed the Secularization Act, and the missions, reorganized as parish churches, lost their vast land holdings, and released their neophytes (Beattie and Beattie 1974).

American Period. The American Period, 1848–Present, began with the Treaty of Guadalupe Hidalgo. The Gold Rush had attracted huge numbers of American settlers and in 1850, California was accepted into the Union. The cattle industry reached its greatest prosperity during the first years of the American Period. Mexican Period land grants had created large pastoral estates in California, and demand for beef during the Gold Rush led to a cattle boom that lasted from 1849–1855. However, beginning about 1855, the demand for beef began to decline due to imports of sheep from New Mexico and cattle from the Mississippi and Missouri Valleys. When the beef market collapsed, many California ranchers lost their ranchos through foreclosure. A series of disastrous floods in 1861–1862, followed by a significant drought diminished the economic impact of local ranching. This decline combined with ubiquitous agricultural and real estate developments of the late 19th century, set the stage for diversified economic pursuits that have continued to proliferate to this day (Beattie and Beattie 1974; Cleland 1941).

Local Sequence. Lancaster grew up around the Southern Pacific Railroad, which entered the area in 1876. The railroad brought speculators that used artesian wells to found an early

local agricultural and horticultural economy. A newspaper was established in 1884, and grammar schools and a local post office soon followed (Lewis Publishing Company 1889:350). Parcels within the new town were originally settled near today's I Street and the Sierra Highway. Although farming was initially successful, it was also subject to the caprices of desert rainfall that varied dramatically and caused a downturn during the early 20th century. Continued well drilling managed to revive local agriculture and by the teens and 1920s local mining and the continued influence of the railroad resulted in an economic resurgence. Municipal advancements included paved streets in 1916, the formation of a local Los Angeles County Waterworks district in 1919, a fire department in 1921, and electric service brought by Southern California Edison in 1923. Although the economy slowed again during the depression and World War II, the founding of the Muroc Lake Bombing and Gunnery Range (now Edwards Air Force Base) in 1933 compensated somewhat for the losses, and mining and alfalfa farming remained locally viable (Ford 1998). The post war years brought an economic boom to Lancaster, which was locally punctuated by the opening of the first local ready-mix plant, the Antelope Valley Freeway plan, and eventually resulted in the local population expanding to 40,609 by 1970. Lancaster finally incorporated in 1977 and has since developed into a bedroom community, in addition to remaining a hub for farming, mining, and transportation (City of Lancaster 2012). McKenna (2004 and 2005) and numerous others have complied historical information for the study area.

PERSONNEL

David Brunzell, M.A., RPA acted as the Project Manager and Principal Investigator for the current study. Mr. Brunzell also conducted the archaeological resources records search through information from the South Central Coastal Information Center (SCCIC) located at California State University, Fullerton, and compiled the technical report. Mr. Brunzell completed the archaeological field study with assistance from Archaeological Crew Chief Mary Shockley, M.A., RPA, and Staff Archaeologist Judy Bernal, B.A.

RESEARCH DESIGN

This work was completed pursuant to CEQA, the Public Resources Code (PRC) Chapter 2.6, Section 21083.2, and California Code of Regulations (CCR) Title 14, Chapter 3, Article 5, Section 15064.5. The pedestrian archaeological resources survey was intended to locate and document previously recorded and new archaeological sites, features, and isolates that exceed 45 years in age within defined project site boundaries. The project site was examined using systematic pedestrian field survey methods. The study is intended to determine whether archaeological resources are located within the project site boundaries, whether any archaeological resources are significant pursuant to the above-referenced regulations and standards, and to develop specific mitigation measures that will address potential impacts to existing or potential resources. Tasks pursued to achieve that end include:

- Archaeological resources records search to review any studies conducted and the resulting resources recorded within a one-mile radius of the project site boundaries
- Systematic pedestrian survey of the project site

- Evaluation of California Register of Historical Resources (California Register) eligibility for any archaeological resources discovered
- Development of recommendations for archaeological resources documented within the project boundaries, following CEQA guidelines
- Completion of Department of Park and Recreation (DPR) 523 forms for any discovered archaeological resources.

METHODS

Research

Prior to fieldwork, a records search was conducted using records from the SCCIC. This archival research reviewed the status of all recorded historic and prehistoric archaeological resources, and survey and excavation reports completed within one mile of the project site. Additional resources reviewed included the National Register of Historic Places (National Register), the California Register, and documents and inventories published by the California Office of Historic Preservation. These include the lists of California Historical Landmarks, California Points of Historical Interest, Listing of National Register Properties, and the Inventory of Historic Structures.

Field Survey

An intensive-level archaeological resources field survey of the project site was conducted on August 1, 2, and 31, 2016. The survey was conducted by walking parallel transects spaced approximately 15 meters apart across the site. Preparation for the field survey involved a thorough review of modern and historic aerial photos and topographic maps, and field checks and updates for previously identified archaeological resources (see Appendix A). Digital photographs were taken at various points within the project site. Archaeological resources were recorded per the California OHP *Instructions for Recording Historical Resources* in the field using:

- Detailed note taking for entry on DPR Forms (Appendix B)
- Hand-held Global Positioning Systems for mapping purposes
- Digital photography of all archaeological resources (see Appendices B and C).

RESULTS

Research

Data from the SCCIC revealed that 60 previous cultural resource studies have taken place and 15 archaeological resources have been recorded within one mile of the project site. Of the previous studies, eight have assessed portions of the project site, and 10 archaeological resources have been previously recorded within its boundaries (plotted in Appendix A). The records search results are summarized as follows:

Table A. Archaeological Resources and Reports Within the Project Site

Field Survey

During the field survey, BCR Consulting archaeologists attempted to identify each of the 10 resources that had been previously recorded within the project site boundaries. Of these, eight have been destroyed by building and parking lot construction (see Appendix A). The below table summarizes the status of each of these resources.

Table C. Status of Resources Previously Identified within the Project Site

Resource	Status
P-19-419: prehistoric lithic scatter	Destroyed by parking lot and building construction
P-19-485: prehistoric midden and lithics	Destroyed by 1969 excavation (Robinson 1969), re-routing of creek, grading for fire suppression, and road construction and maintenance activities.

Resource	Status
P-19-486: prehistoric lithic scatter	Destroyed by parking lot and building construction
P-19-2533: prehistoric lithics/historic refuse	Destroyed by parking lot and building construction
P-19-2538: historic-period refuse	Destroyed by parking lot and building construction
P-19-2539: historic-period refuse	In place
P-19-2540: hist.-period agricultural site	Destroyed by parking lot and building construction, and by grading for fire suppression.
P-19-2550: historic-period homestead	Destroyed by parking lot and building construction
P-19-100192: isolated auto fender	Destroyed by parking lot and building construction
P-19-100193: prehistoric isolated mano	Destroyed by parking lot and building construction

Eight resources have been destroyed by building and parking lot construction could not be relocated and are not described any further. The two remaining archaeological resources are described below.

P-19-485. R.W. Robinson originally recorded this resource in 1969 as a "small midden lying along one of the many channels of Amargosa Creek" (Robinson 1969). Robinson noted extensive damage from vandalism, and that salvage excavations by Antelope Valley College "yielded the remains of a butchered calf associated with chipped stone hunting and butchering implements" (ibid.). The presence of a calf indicates a late (i.e. post-European contact) site. BCR Consulting archaeologists revisited this site location on August 2 and August 31. Although two small chalcedony flakes were located on the surface, remains of the Amargosa Creek channel can no longer be identified. The site has been subject to severe grading for fire suppression, rerouting of the former channel, and with construction and maintenance activities associated with the adjacent 15th Street West. The previous archaeological excavation, combined with disturbances described, have destroyed this site.

P-19-2539. R.H. Norwood originally recorded this resource in 1997 as a historic to recent refuse deposit that "has been thoroughly destroyed and mixed due to grading" (Norwood 1997). This effort included some surface collection and the artifacts were "to be curated at the Lancaster Museum" (ibid.). BCR Consulting archaeologists revisited this site on August 1, 2016 and recorded the site in place as described. The site condition is considered poor.

SIGNIFICANCE EVALUATIONS

The records search identified 10 archaeological resources within the project site boundaries. Eight of these have been destroyed by building and parking lot construction. As a result these are not considered "historical resources" under CEQA, and do not require further evaluation. Two resources (P-19-485 and 2539) were plotted in open fields and had not been destroyed by these developments. As a result, attempts at relocation and updated recordation, in addition to California Register eligibility evaluation are pursued for these two resources (see Field Survey Results above).

CEQA (PRC Chapter 2.6, Section 21083.2 and CCR Title 145, Chapter 3, Article 5, Section 15064.5) calls for the evaluation and recordation of historic and archaeological resources

(non-isolates). The criteria for determining the significance of impacts to cultural resources are based on Section 15064.5 of the *CEQA Guidelines* and Guidelines for the Nomination of Properties to the California Register. Properties eligible for listing in the California Register and subject to review under CEQA are those meeting the criteria for listing in the California Register, National Register, or designation under a local ordinance. Please note that the current study has not addressed historic-period buildings that may be present within the project site boundaries.

Significance Criteria

California Register of Historical Resources. The California Register criteria are based on National Register criteria. For a property to be eligible for inclusion on the California Register, one or more of the following criteria must be met:

1. It is associated with the events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California or the U.S.;
2. It is associated with the lives of persons important to local, California, or U.S. history;
3. It embodies the distinctive characteristics of a type, period, region, or method of construction, represents the work of a master, possesses high artistic values; and/or
4. It has yielded, or has the potential to yield, information important to the prehistory or history of the local area, California, or the nation.

In addition to meeting one or more of the above criteria, the California Register requires that sufficient time has passed since a resource's period of significance to "obtain a scholarly perspective on the events or individuals associated with the resources." (CCR 4852 [d][2]). The California Register also requires that a resource possess integrity. This is defined as the ability for the resource to convey its significance through seven aspects: location, setting, design, materials, workmanship, feeling, and association.

California Register Evaluation

P-19-485. BCR Consulting has conducted substantial research regarding the project site. There is nothing to suggest a clear association between this resource and any important events (California Register Criterion 1), or important persons (California Register Criterion 2). Prehistoric lithic scatters and middens do not embody distinctive characteristics of a type, period, region, or method of construction, represent the work of a master, or possess high artistic values (California Register Criterion 3). The 1969 excavations have exhausted the resource's data potential, and (combined with subsequent disturbances) have destroyed the site (California Register Criterion 4). The site does not exhibit any integrity of location, setting, design, materials, workmanship, feeling, or association. Because of the failure to meet any of the above criteria combined with a lack of integrity BCR Consulting recommends that P-19-485 is not potentially eligible for the California Register, and therefore is not recommended a historical resource under CEQA.

P-19-2539. BCR Consulting has conducted substantial research regarding the project site, and there is nothing to suggest a clear association with any important events (California Register Criterion 1), or important persons (California Register Criterion 2). This type of

refuse scatter is ubiquitous throughout the region and as such does not embody distinctive characteristics of a type, period, region, or method of construction, represent the work of a master, or possess high artistic values (California Register Criterion 3). Due to extensive damage to the site related to fire suppression excavation and grading, the site's data potential is not considered significant (California Register Criterion 4). Although the complex does retain a measure of integrity of location and materials, the site lacks integrity of setting, design, workmanship, feeling, and association. Because of the failure to meet any of the above criteria combined with diminished integrity, BCR Consulting recommends that P-19-2539 is not potentially eligible for the California Register, and therefore is not recommended a historical resource under CEQA.

RECOMMENDATIONS

BCR Consulting conducted an intensive Archaeological Resources Assessment for the Lancaster Health District Project in the City of Lancaster, Los Angeles County, California. The records search identified 10 previously recorded resources within the project site. Eight of these were destroyed by building and parking lot construction and as a result are not recommended "historical resources" under CEQA. The remaining two resources included P-19-485 (a prehistoric lithic scatter and midden) and P-19-2539 (a historic-period refuse scatter). The research and field survey have indicated that P-19-485 has been destroyed by previous archaeological excavation combined with subsequent disturbances associated with fire suppression, and road construction and maintenance. P-19-2539 remains in place as described, but has been subject to severe disturbances and lacks integrity. Therefore, these two resources are not recommended eligible for the California Register, and as such are not recommended "historical resources" under CEQA. However, due to the previous identification of numerous archaeological resources within the project site boundaries, it is possible that ground-disturbing activities could reveal the presence of resources not identified during the current study. Therefore, BCR Consulting recommends that an archaeological monitor be present during any earthmoving activities proposed within the project site boundaries. The monitor shall work under the direct supervision of a cultural resource professional who meets the U.S. Secretary of the Interior's Professional Qualification Standards for archaeology. The monitor shall be empowered to temporarily halt or redirect construction work in the vicinity of any find until the project archaeologist can evaluate it. In the event of a new find, salvage excavation and reporting will be required.

If human remains are encountered during the undertaking, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to Public Resources Code Section 5097.98. The County Coroner must be notified of the find immediately. If the remains are determined to be prehistoric, the Coroner will notify the Native American Heritage Commission (NAHC), which will determine and notify a Most Likely Descendant (MLD). With the permission of the landowner or his/her authorized representative, the MLD may inspect the site of the discovery. The MLD shall complete the inspection within 48 hours of notification by the NAHC.

*Recorded by: David Brunzell, Mary Shockley, Judith Bernal *Date: August 31, 2016 ☐ Continuation ☑ Update

R.W. Robinson originally recorded this resource in 1969 as a "small midden lying along one of the many channels of Amargosa Creek" (Robinson 1969). Robinson noted extensive damage from vandalism, and that salvage excavations by Antelope Valley College "yielded the remains of a butchered calf associated with chipped stone hunting and butchering implements" (ibid.). The presence of a calf indicates a late (i.e. post-European contact) site. BCR Consulting archaeologists revisited this site location on August 2 and August 31. Although two small chalcedony flakes were located on the surface, remains of the Amargosa Creek channel can no longer be identified. The site has been subject to severe grading for fire suppression, rerouting of the former channel, and with construction and maintenance activities associated with the adjacent 15th Street West. The previous archaeological excavation, combined with disturbances described, have destroyed this site.

1969 Site Record for P-19-485. On File at the South Central Coastal Information Center. Fullerton, California.

***Recorded by:** Judith Bernal ***Date:** August 2, 2016 ☐ Continuation ☑ Update

R.H. Norwood originally recorded this resource in 1997 as a historic to recent refuse deposit that "has been thoroughly destroyed and mixed due to grading" (Norwood 1997). This effort included some surface collection and the artifacts were "to be curated at the Lancaster Museum" (ibid.). BCR Consulting archaeologists revisited this site on August 1, 2016 and recorded the site in place as described. The site condition is considered poor.

Unmitigated	104,749,872	2,795,867	1,103,054	3,898,921
Mitigated	98,082,542	2,617,911	1,032,844	3,650,755

Table 8. Fuel Consumption Summary

Fuel	Fuel Efficiency (MPG)	%Fleet	%Existing
Gasoline	34.1	91.0%	93.0%
Diesel	8.5	9.0%	7.0%

Notes:

Percent fleet based on VMT from EMFAC2014 as shown in ***Table 8: EMFAC2014 Emissions Inventory-Operations***

Annual VMT obtained from the CalEEMod Output files in **Appendix F**.

Fuel efficiency based on calculations in ***Table 9: EMFAC2014 Emissions Inventory-Operations,*** *from EMFAC2014.*

Table 8. EMFAC2014 Emissions Inventory - Operations

Fuel	VMT (miles/day)	Fuel Consumption (1,000 gal/day)	Fuel Efficiency (miles per gallon)	Fuel Percentage
GAS	5,585,724	164	34.1	91
DSL	575,234	67	8.5	9

Existing VMT	Fuel Consumption	Fuel Efficiency	Fuel Percentage
5,520,014	263	21.0	93
437,955	54	8.1	7

Note: Fuel percentage based on VMT.
Fuel efficiency calculated using fuel consumption and VMT from EMFAC2014.

Buildout

EMFAC2014 (v1.0.7) Emissions Inventory
Region Type: Air District
Region: Antelope Valley AQMD
Calendar Year: 2040
Season: Annual
Vehicle Classification: EMFAC2011 Categories
Units: miles/day for VMT, trips/day for Trips, tons/day for Emissions, 1000 gallons/day for Fuel Consumption

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Medical Office Building	230.00	1000sqft	5.28	230,000.00	0
Hospital	420.00	Bed	6.90	300,618.18	0
Apartments Low Rise	376.00	Dwelling Unit	23.50	376,000.00	1075
Single Family Housing	59.00	Dwelling Unit	19.16	106,200.00	169
General Office Building	394.43	1000sqft	9.05	394,430.00	0
Regional Shopping Center	646.00	1000sqft	38.39	646,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	9			**Operational Year**	2019
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

NOTE: Only operational emissions were used during this phase. To avoid confusion, portions of this output related to construction were removed.

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - According to Trip Generation estimates for the entire project

Construction Phase - Operation only

Off-road Equipment - Short construction period

Off-road Equipment - Operation only

Trips and VMT -

Demolition -

Grading - Project description

Vehicle Trips - Based on weekday trip rates from Traffic Study; weekend trip rates adjusted based on default ratio for each land use

Woodstoves - No woodstoves

Water And Wastewater -

Solid Waste -

Land Use Change -

Sequestration -

Construction Off-road Equipment Mitigation -

Mobile Land Use Mitigation -

Area Mitigation -

Energy Mitigation -

Water Mitigation -

Waste Mitigation -

Stationary Sources - Emergency Generators and Fire Pumps -

Stationary Sources - Process Boilers -

Stationary Sources - User Defined -

Antelope Valley APCD Air District, Annual

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	600.00	1000sqft	13.77	600,000.00	0
Hospital	300.00	Bed	4.93	700,000.00	0
Hospital	364.00	Bed	5.98	260,535.76	0
Unenclosed Parking with Elevator	1,100.00	Space	9.90	440,000.00	0
High Turnover (Sit Down Restaurant)	91.00	1000sqft	2.09	91,000.00	0
Hotel	180.00	Room	6.00	329,200.00	0
Apartments Low Rise	1,350.00	Dwelling Unit	84.38	1,350,000.00	3861
Congregate Care (Assisted Living)	400.00	Dwelling Unit	25.00	400,000.00	1144
Single Family Housing	250.00	Dwelling Unit	81.17	450,000.00	715
Regional Shopping Center	151.00	1000sqft	3.47	151,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	**Wind Speed (m/s)**	2.2	**Precipitation Freq (Days)**	33
Climate Zone	9			**Operational Year**	2040
Utility Company	Southern California Edison				
CO2 Intensity (lb/MWhr)	702.44	**CH4 Intensity (lb/MWhr)**	0.029	**N2O Intensity (lb/MWhr)**	0.006

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - According to Trip Generation estimates for the entire project

Construction Phase - Default construction assumption
Paving and architectural coating to take place intermittently

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Off-road Equipment - Short construction period

Demolition - Demolition of existing hospital and partial demolition of commercial uses.

Grading - Project description

Vehicle Trips - Based on weekday trip rates from Traffic Study; weekend trip rates adjusted based on default ratio for each land use

Woodstoves - No woodstoves

Water And Wastewater -

Solid Waste -

Land Use Change -

Sequestration -

Construction Off-road Equipment Mitigation - Per CARB Title 13 CCR Section 2520-2427, equipment required to be Tier 4 Final for new equipment. Air Basin recommends Tier 3 with Level 3 DPF at the minimum

Mobile Land Use Mitigation - Metrolink station located approximately 1 mile to the east

Area Mitigation - AVAQMD Rule 1113 VOC limit of 50 grams per liter (g/L) for flats, 100 g/L for non-flat, and those used for traffic coating would meet the 100 g/L VOC limit

Energy Mitigation -

Water Mitigation -

Waste Mitigation -

Stationary Sources - Emergency Generators and Fire Pumps -

Stationary Sources - Process Boilers -

Stationary Sources - User Defined -

Off-road Equipment - Short construction period

Trips and VMT - Haul trips are Round Trips

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Replace Ground Cover

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 Demolition - 2021

Unmitigated Construction On-Site

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - Construction water and solid waste activities run

Demolition -

Water And Wastewater - Total building area at an application rate of 3,020 gallons per acre per day (Air & Waste Management Association Air Pollution Engineering Manual (1992 Edition)) and average of 20 construction days per month
Solid Waste - Construction debris generation/diversion rates provided in Section 5.17.3: Solid Waste of the EIR

Area Mitigation -

Water Mitigation -

Construction Phase -

Off-road Equipment - Operational run only

Waste Mitigation - Construction debris generation/diversion rates provided in Section 5.17.3: Solid Waste of the EIR

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 6

RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 15 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 11 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the SCH list, as provided by EDR, and dated 01/27/2020 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 13 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 44 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

RMP: When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

A review of the RMP list, as provided by EDR, and dated 04/25/2019 has revealed that there is 1 RMP site within approximately 0.001 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/22/2019 has revealed that there are 17 FINDS sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there are 33 HAZNET sites within approximately 0.001 miles of the target property.

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 8 HIST CORTESE sites within approximately 0.5 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 01/21/2020 has revealed that there are 6 CERS sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto

sites within approximately 0.125 miles of the target property.

FED-MART STORES INC	2033 W AVE J	NW 0 - 1/8 (0.084 mi.)	V145	569

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Notes: Not reported
Violation Division: Los Angeles County Department of Public Works
Violation Program: UST
Violation Source: CERS

Site ID: 6025
Site Name: ANTELOPE VALLEY HOSPITAL
Violation Date: 01-31-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

ANTELOPE VALLEY ANODIZING INC (Continued) **1000978133**

Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 03/02/2018. OBSERVATION: 1 x 55-gallon drum of used oil located in the central plant generator room was observed open and missing the bung cap. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed.

Site Name: ANTELOPE VALLEY HOSPITAL
Violation Date: 01-31-2018
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes: Returned to compliance on 03/02/2018. OBSERVATION: Based upon the number and type of violations observed during the inspection, adequate weekly inspections of the hazardous waste storage area are not being conducted as required. CORRECTIVE ACTION: Submit a copy of an inspection log to this division demonstrating that the hazardous waste storage area is being inspected weekly.
Violation Division: Los Angeles County Fire Department
Violation Program: HW

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D009
. Waste name: MERCURY

. Waste code: D016
. Waste name: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

. Waste code: D018
. Waste name: BENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name:	ANTELOPE VALLEY SURGERY CENTER
Violation Date:	04-21-2017
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 04/24/2017. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. - The Hazardous Materials Business Plan was last submitted on 2/4/2016. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D024
. Waste name: M-CRESOL

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P075
. Waste name: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

WALGREENS #10692 (Continued) **1016954581**

. Waste code: U034
. Waste name: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

. Waste code: U165
. Waste name: NAPHTHALENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 319

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 77

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 10

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 3

Waste code: D010
Waste name: SELENIUM
Amount (Lbs): 10

Waste code: D024
Waste name: M-CRESOL
Amount (Lbs): 5

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Amount (Lbs): 4

Waste code: P075
Waste name: NICOTINE, & SALTS
Amount (Lbs): 91

Violation Status: No violations found

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Land type: Private
Classification: Small Small Quantity Generator
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:
Owner/operator name: THRIFTY PAYLESS, INC
Owner/operator address: HUNTER LNL
CAMP HILL, PA 17011

RITE AID NO 5840 (Continued) **1016955179**

Owner/operator country: US
Owner/operator telephone: 717-761-2633
Owner/operator email: EHS@RITEAID.COM
Owner/operator fax: Not reported
Owner/operator extension: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 1997-03-27 00:00:00.
Owner/Op end date: Not reported

Owner/operator name: GRANITE PEAK PROPERTY INVESTMENTS, L.P., C/O THE MIDTOWN NIKI GRP., L.P.
Owner/operator address: EL CAMINO REAL, STE 220
SAN DIEGO, CA 92130
Owner/operator country: US
Owner/operator telephone: 858-334-8000
Owner/operator email: EHS@RITEAID.COM
Owner/operator fax: Not reported
Owner/operator extension: Not reported
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 2010-12-31 00:00:00.
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 2018-02-02 00:00:00.0

Classification: Large Quantity Generator

Hazardous Waste Summary:

RITE AID NO 5840 (Continued) **1016955179**

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 232
. Waste name: Pesticides and other waste associated with pesticide production

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB’s

. Waste code: 291
. Waste name: Latex waste

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 561
. Waste name: Detergent and soap

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002

RITE AID NO 5840 (Continued) **1016955179**

. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D024
. Waste name: M-CRESOL

. Waste code: D026
. Waste name: CRESOL

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P075
. Waste name: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

. Waste code: U165
. Waste name: NAPHTHALENE

. Waste code: U188
. Waste name: PHENOL

. Waste code: U201
. Waste name: 1,3-BENZENEDIOL (OR) RESORCINOL

. Waste code: U279
. Waste name: CARBARYL (OR) 1-NAPHTHALENOL, METHYLCARBAMATE

Violation Status: No violations found

Violation Date:	06-17-2016
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 07/13/2017. OBSERVATION: A business plan for this reporting year 2016 has not been received by the CUPA. The facility was previously sent a notice/request from the CUPA for the submittal of a business plan. CORRECTIVE ACTION: Submit all elements of the business plan electronically in the California Environmental Reporting System (CERS).
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	396255
Site Name:	Desert Canyon Post Acute
Violation Date:	08-02-2018
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 03/20/2019. OBSERVATION: The business failed to complete and electronically submit a site map with all required content including: north orientation, loading area, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shut offs, evacuation staging area, hazardous materials/waste storage areas and emergency response equipment. CORRECTIVE ACTION: Complete and electronically submit a site map with

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes:	Returned to compliance on 08/15/2018. OBSERVATION: The business failed to establish and electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material. CORRECTIVE ACTION: Establish and electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material through CERS within 30 days.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	396255
Site Name:	Desert Canyon Post Acute
Violation Date:	08-02-2018
Citation:	Un-Specified
Violation Description:	Business Plan Program - Operations/Maintenance - General Local Ordinance
Violation Notes:	Returned to compliance on 10/24/2018. OBSERVATION: Observed 2 cylinder storage racks in the oxygen storage room that were not properly secured to prevent cylinders from falling. The doors to the cylinder racks were left open and the cylinders are not secured to the racks. CORRECTIVE ACTION: Properly secure compressed gas cylinders to a fixed object with one or more restraints, or properly secure inside of a storage rack, to prevent falling caused by contact, vibration or seismic activity in accordance with LA County Fire Code Section 5303.5.3.

Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Returned to compliance on 08/15/2018. OBSERVATION: The business failed to update business plan within 30 days of a 100 percent or more increase in the quantity of a previously disclosed material; any

DESERT CANYON POST ACUTE (Continued) **S123515819**

handling of a previously undisclosed hazardous material; a change of business ownership or change of business name. Facility has changed ownership and DBA as of 7/1/18 and has not reported the change through CERS. Facility is storing ~3,200 cubic feet of oxygen in small cylinders throughout the facility and is storing 100 gallons of propane outside near generator. Facility will be increasing propane storage on-site to 400 gallons. CORRECTIVE ACTION: Update all submittal elements effected by the changes and electronically submit the updates through CERS within 30 days.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

CVS PHARMACY #8522 (Continued) **1015740215**

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 2012-09-04 00:00:00.0
Site name: CVS PHARMACY NO 8522
Classification: Large Quantity Generator

Hazardous Waste Summary:

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D024
. Waste name: M-CRESOL

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P042
. Waste name: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

. Waste code: P075
. Waste name: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

CVS PHARMACY #8522 (Continued) **1015740215**

. Waste code: P081
. Waste name: 1,2,3-PROPANETRIOL, TRINITRATE (R) (OR) NITROGLYCERINE (R)

. Waste code: U129
. Waste name: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

. Waste code: U205
. Waste name: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D007
Waste name: CHROMIUM

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No

KAISER PERMANANTE LANCASTER WOMENS HEALTH MOB (Continued) **1024838716**

Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Hazardous Waste Summary:

. Waste code:	331
. Waste name:	Off-specification, aged, or surplus organics
. Waste code:	D001
. Waste name:	IGNITABLE WASTE
. Waste code:	D011
. Waste name:	SILVER
Violation Status:	No violations found

Registry ID: 110002727817
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002727817

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/operator extension:	Not reported
Legal status:	Other
Owner/Operator Type:	Operator
Owner/Op start date:	Not reported
Owner/Op end date:	Not reported

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	Yes
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No

15TH STREET SURGICAL CENTER INC (Continued) **1024862889**

Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

AMERICAN TIRE DEPOT (Continued) **S123535978**

Site Name:	AMERICAN TIRE DEPOT
Violation Date:	05-22-2015
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to properly close hazardous waste containers when not in active use.
Violation Notes:	Returned to compliance on 06/25/2015. OBSERVATION: Observed one open container of used motor oil and one open container of saturated absorbent. All hazardous waste containers shall be closed at all times except when adding or removing waste. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS

Site ID:	91760
Site Name:	AMERICAN TIRE DEPOT
Violation Date:	05-22-2015
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes:	Returned to compliance on 06/25/2015. OBSERVATION: Copies of hazardous waste disposal records for clarifier waste were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA.

Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Returned to compliance on 06/07/2018. OBSERVATION: The business failed to update business plan within 30 days of any handling of a previously undisclosed hazardous material. Facility is currently storing an ~60 gallon tank of liquid nitrogen in the shop area that is not disclosed on the inventory in CERS. CORRECTIVE ACTION: Update all submittal elements effected by the change and electronically submit the update through CERS within 30 days.
Violation Division:	Los Angeles County Fire Department

AMERICAN TIRE DEPOT (Continued) **S123535978**

Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	91760
Site Name:	AMERICAN TIRE DEPOT
Violation Date:	06-06-2018
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 07/26/2018. OBSERVATION: 300-gal used oil tank in the main shop area was missing caps for tank top openings. CORRECTIVE ACTION: Submit photos to this division demonstrating that the tank listed above has been properly closed.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	91760
Site Name:	AMERICAN TIRE DEPOT
Violation Date:	05-22-2015
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 06/25/2015. OBSERVATION: The facility has not submitted a complete Hazardous Materials Inventory Chemical Description. The current submittal states 120 gallons of motor oil on site, but observation confirms 680 gallon of oil at the time of inspection. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in the California Environmental Reporting System (CERS).
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	91760

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 06/28/2018. OBSERVATION: 1 x 55-gal drum of

AMERICAN TIRE DEPOT (Continued) **S123535978**

waste paper oil filters and absorbent located in the oil storage room was observed 2/3 full with an accumulation start date of 10/6/17 and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Dispose of waste paper oil filters and absorbent and submit a copy of the manifest/receipt to this division.

Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste name: NAPHTHALENE

. Waste code: U205
. Waste name: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 858

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CVS PHARMACY NO 9785 (Continued) **1016140244**

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 14

Waste code: D007
Waste name: CHROMIUM

PEP BOYS #678 (Continued) **S123501472**

Chapter 15, Section(s) 66265.195(c)
Violation Description: Failure to conduct and document inspections of hazardous waste tank systems each operating day and retain records of those inspections at the facility.
Violation Notes: Returned to compliance on 11/28/2018. OBSERVATION: Daily inspections of the 500-gal used oil and 280-gal waste antifreeze tank systems have not been adequately conducted and properly documented. Observed hazardous waste accumulating in secondary containment of the 500-gal used oil tank and the 280-gal waste antifreeze tank, observed several months of tank inspection logs not available for review from the previous 3 years, observed several months of daily tank logs available on-site that were not completely and consistently filled out and observed logs with issues marked but with no explanation or comment of what were the identified issues. CORRECTIVE ACTION: Submit documentation to this division demonstrating that the hazardous waste tank systems are being properly inspected on a daily basis whenever waste is added to or removed from the tank, and the inspections are being properly documented and records maintained available for 3 years.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 142390
Site Name: PEP BOYS #678
Violation Date: 07-13-2018
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.
Violation Notes: Returned to compliance on 08/30/2018. OBSERVATION: A hazardous waste tank assessment report, prepared by a qualified independent professional engineer, was not available at time of the inspection for the 500-gal used oil tank system or the 280-gal waste antifreeze tank system. CORRECTIVE ACTION: Obtain a written hazardous waste tank system assessment report for the 500-gal used oil and 280-gal waste antifreeze tank systems in accordance with 22 CCR 66265.192 and submit copies to this division.

Site Name: PEP BOYS #678
Violation Date: 07-13-2018
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Release/Leaks/Spills - General
Violation Notes: Returned to compliance on 08/30/2018. OBSERVATION: 1) Spillage of oil observed on the floor in the storage room at Southwest corner of the service garage. 2) Observed saturated waste oily absorbent accumulated on floor around and under the used oil tank and waste antifreeze tank. 3) Spillage of oily waste on top of waste brake fluid drum. 4) Saturated waste oily absorbent accumulated on floor under new oil storage rack. 5) Used oil observed accumulating in the secondary containment of the 500-gal used oil tank. 6) Waste antifreeze observed accumulating in the secondary containment of the 280-gal waste antifreeze tank. CORRECTIVE ACTION: Immediately clean up any spillage of hazardous materials and hazardous waste and place in appropriate containers or tanks for proper disposal. Submit photos of the cleaned up area to this division to demonstrate compliance.

Violation Date: 07-13-2018
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 11/13/2018. OBSERVATION: Employee training is not adequate based upon violation observed on-site, and required employee training documentation as required by 22 CCR 66265.16(d) was not available at the time of inspection. The facility only had record of the last date that employees received training, but did not have the documentation identifying the job titles at the facility related to hazardous waste management and the employees filling those

PEP BOYS #678 (Continued) **S123501472**

positions, a written job description of each of those positions and a written description of type and amount of both introductory and continuing training provided for each position. CORRECTIVE ACTION: Ensure employees receive adequate hazardous waste management training as it pertains to their position, and submit a copy of all required training documentation required by 22 CCR 66265.16(d) to this division.

Site ID: 142390
Site Name: PEP BOYS #678
Violation Date: 07-13-2018
Citation: 22 CCR 12 66262.42(a), (b), (d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.42(a), (b), (d)
Violation Description: Failure to determine the status of any hazardous waste if a signed copy of the manifest isnG t received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest isnG t received within 45 days of the date the waste was accepted by the initial transporter.
Violation Notes: Returned to compliance on 11/28/2018. OBSERVATION: The generator failed to determine the status of a uniform hazardous waste manifested shipment within 35 days from the date the waste was shipped, and/or failed to submit an exception report to DTSC if a signed copy of the manifest isn't received within 45 days of the date the waste was accepted by the initial transporter. Generator could not provide final designated facility signed copies of the following hazardous waste manifests: 009388593FLE dated 12/23/16, 009388992FLE dated 4/4/17 and 010201845FLE dated 4/12/18. CORRECTIVE ACTION: Submit documentation to this division demonstrating that the generator has determined the status of the hazardous waste manifest shipments for the manifests noted above, or a copy of the exception report submitted to DTSC, if applicable.

Violation Date: 05-21-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Date: 05-21-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Date: 07-03-2018
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes: Returned to compliance on 03/11/2019. OBSERVATION: 1 x 100-gal empty waste antifreeze tank was observed in the lube pit and was not properly labeled. Corporate officer Mr. Rockport stated that the facility no longer uses this tank and is using a 55-gal drum stored near trash enclosure. Mr. Rockport stated that he will be removing the tank from this facility. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating that the empty container listed above has been removed or is being properly managed pursuant to 22 CCR 66261.7.

AVLUBE INC. DBA JIFFY LUBE #2967 (Continued) **S123077476**

	of the required consolidated manifesting procedures and retain copies of receipts for three years.
Violation Notes:	Returned to compliance on 03/11/2019. OBSERVATION: Consolidated disposal receipts for the previous 3 years for all hazardous waste streams were not available on-site at time of inspection. Observed used oil receipts from 2017 and January - March of 2018, and observed receipts dated 7/3/18 for removal of drained used oil filters that occurred during the inspection. CORRECTIVE ACTION: Maintain copies of all consolidated disposal receipts, for all hazardous wastes generated, available on-site for a period of 3 years from date of shipment.

Violation Date:	07-03-2018
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Returned to compliance on 03/11/2019. OBSERVATION: Required employee training documentation as required by 22 CCR 66265.16(d) was not available at the time of inspection. The facility did not have the documentation identifying the job titles at the facility related to hazardous waste management and the employees filling those positions, a written job description of each of those positions and a written description of type and amount of both introductory and continuing training provided for each position and a copy of records showing the most recent date employees received the required training. CORRECTIVE ACTION: Submit a copy of all required training documentation required by 22 CCR 66265.16(d) to this division, and maintain this required documentation on-site for as long as the facility is in business.

Violation Description:	Failure to conduct and document inspections of hazardous waste tank systems each operating day and retain records of those inspections at

AVLUBE INC. DBA JIFFY LUBE #2967 (Continued) **S123077476**

	the facility.
Violation Notes:	Returned to compliance on 09/27/2018. OBSERVATION: Daily inspections of the 700-gal used oil tank system have not been conducted and/or adequately documented. Observed a tank inspection log on-site that had some dates of inspections conducted during the previous month, but the inspections are not being conducted or adequately documented for every day the tank is in operation. No other records of previous tank inspections observed on-site. A sample daily tank inspection log will be emailed to operator with the inspection report. CORRECTIVE ACTION: Submit documentation to this division demonstrating that the 700-gal used oil tank system is being properly inspected and the inspections documented.

Citation:	22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes:	Returned to compliance on 07/09/2018. OBSERVATION: A written hazardous waste tank assessment report was not available for the 700-gal used oil tank system. Corporate officer Mr. Rockport stated that a

AVLUBE INC. DBA JIFFY LUBE #2967 (Continued) **S123077476**

professional engineer, Mr. John Schroeder, performed an on-site inspection for the assessment yesterday 7/2/18 and will be preparing a report. CORRECTIVE ACTION: Submit a copy to this division of a written hazardous waste tank system assessment, prepared in accordance with 22 CCR 66265.192, for the 700-gal used oil tank system.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 11/20/2018. OBSERVATION: The business failed to complete and electronically submit a complete business plan when handling hazardous materials at or above the reportable threshold quantities. Facility has never submitted the hazardous materials inventory, facility site map or Aboveground Petroleum Storage Act (APSA) element in CERS. Only submittal in CERS is dated 4/23/18 and included the facility information element and the emergency response and training plans element. CORRECTIVE ACTION: Complete and electronically submit a hazardous materials business plan that includes all applicable submittal elements (facility information, hazardous materials inventory, emergency response and training plans and the APSA element).

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to maintain a complete copy of the SPCC Plan at the facility if the facility is normally attended at least four hours per day, or at the nearest field office if the facility is not so attended.
Violation Notes: Returned to compliance on 03/11/2019. OBSERVATION: Failure to maintain SPCC plan on-site if facility is manned at least four (4) hours per day, or at the nearest field office if the facility is not so attended. The SPCC plan was not available on-site at the time of inspection, but corporate officer Mr. Rockport stated that he is sure that the SPCC plan has been prepared and he is just not aware of where it is located. This is a repeat and open violation from the previous inspection dated 4/13/16. Failure to correct this violation may result in further enforcement action. CORRECTIVE ACTION: Maintain the SPCC plan available on-site as the facility is manned more than 4 hours per day.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110018959858

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site ID: 121686
Site Name: HARLEY-DAVIDSON OF LANCASTER
Violation Date: 07-17-2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 09/13/2019. OBSERVATION: Operator is a small quantity generator and failed to send hazardous waste off-site for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. Observed 10-15 gallons of used antifreeze accumulating on-site for an unknowbn amount of time and no disposal records were available for the previous 3 years. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation to this division demonstrating that the violation has been corrected.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Violation Date: 08-17-2017
Citation: 22 CCR 15 66265.32 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.32
Violation Description: Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes: Returned to compliance on 09/05/2017. OBSERVATION: The facility is not been equip with decontamination equiment (i.e. eyewash bottles) or spill aborbent material. Mr. Abed stated that the facility usually has bags of absorbent material but none were observed on-site during the inspection. No decontamination equipment, such as portable eyewash bottles, was on-site at time of inspection. CORRECTIVE ACTION: Submit photos/documentation to the CUPA demonstrating the facility has been equip with spill absorbent material and decontamination equipment to the CUPA within 30 days.

Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Returned to compliance on 10/02/2017. OBSERVATION: The business failed to update business plan within 30 days of a 100 percent or more increase in the quantity of a previously disclosed material and handling of a previously undisclosed hazardous material. Facility previously reported Used Oil as 80 gallons Max Daily Amount, but the current storage capacity is 555 gallons. Facility reported Motor Oil at 250 gallons, but the current storage capacity is 1,800 gallons. Facility has 1 x 200-gallon and 1 x 100-gallon steel lube cubes for Automatic Transmission Fluid in the lube pit that are not disclosed on the inventory. Facility is accumulating Waste Antifreeze on-site that is not disclosed on the inventory (currently in a 200-gallon container that is being reduced to a 55-gallon container). CORRECTIVE ACTION: Update all submittal elements effected by the change(s) and electronically submit the update within 30 days.

Violation Date:	08-17-2017
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a

ECONO LUBE N TUNE 4115 (Continued) **S123513257**

person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of this section; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of this section shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: Returned to compliance on 09/05/2017. OBSERVATION: Facility currently has 2 x 200 gallon poly tanks in the storage area of the service bays. Mr. Abed stated that one empty tank was previously used to store new antifreeze (not marked with date emptied) and the other currently has 50 gallons of waste antifreeze. Mr. Abed stated that these containers were at the facility since he took over ownership in 2012, and he stated he will have them removed and only accumulate waste antifreeze in a 55-gallon poly drum. All new antifreeze on-site is stored in 1-gallon containers. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating that the empty containers listed above have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.

Local Agency:	LOS ANGELES COUNTY
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	Not reported
Potential Media Affect:	Under Investigation
Potential Contaminants of Concern:	Gasoline
Site History:	The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as overseen by the Lahontan Regional Water Quality Control Board. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the Lahontan Regional Water Quality Control Board should be consulted.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TOYS"R" US #5615 (Continued) **S123513446**

Citation:	HSC 6.5 25123.3(h) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)
Violation Description:	Failure to determine the status of any hazardous waste if a signed copy of the manifest isnG t received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest isnG t received within 60 days of the date the waste was accepted by the initial transporter.
Violation Notes:	Returned to compliance on 12/07/2017. OBSERVATION: The generator failed to determine the status of hazardous waste manifest shipments within 35 days from the date the waste was shipped. Facility did not have any final signed copies of uniform hazardous waste manifests and the operator was not aware of requirement to contact designated facility after 35 days to locate the final signed manifest. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the generator has determined the status of the hazardous wate manifest shipment for 008601066FLE and 009310810FLE.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	366345
Site Name:	Toys"R" Us #5615
Violation Date:	10-16-2017
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 12/07/2017. OBSERVATION: Employees are not thoroughly familiar with proper hazardous waste handling procedures as they pertain to their job duties as demonstrated by the type of hazardous waste violations. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that employees have been properly trained.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	366345
Site Name:	Toys"R" Us #5615
Violation Date:	10-16-2017
Citation:	HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description:	Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 01/29/2018. OBSERVATION: The business failed to establish and implement a business plan when handling hazardous materials at or above the reportable threshold quantities. Observed 110 gallons of "Hard As Nails" Hard Film Floor Finish stored on-site in 5-gallon containers. Packing slip on pallet was dated 4/5/2017 and operator stated she was unaware of exactly how long that material has been on-site. Operator stated that the floors are usually resurfaced every 6 months. CORRECTIVE ACTION: Establish and implement a business plan for the facility, and submit all required documentation through the California Environmental Reporting System (CERS).
Violation Division:	Los Angeles County Fire Department

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 12/07/2017. OBSERVATION: Uniform Hazardous Waste Manifests for all hazardous waste shipped off-site were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all final signed manifests for any hazardous waste generated and shipped off-site within the previous 3 years and submit copies to the CUPA.

Local Case Number:	Not reported
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the Lahontan Regional Water Quality Control Board. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the Lahontan Regional Water Quality Control Board should be consulted.

Violation Program:	UST
Violation Source:	CERS

Site ID:	92979
Site Name:	ARCO #82560
Violation Date:	05-04-2018
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of

ARCO #82560 (Continued) **S110070354**

hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 06/04/2018. OBSERVATION: 4 x 55-gallon drums of unknown liquid that appears to be waste water and fuel located in the outside storage area West of the building were observed with incorrect, incomplete or no labels, and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Dispose of all drums on-site containing waste liquid in outside storage area and submit a copy of the manifest/receipt to this division.

Potential Media Affect:	Aquifer used for drinking water supply, Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Gasoline
Site History:	The Water Board closed this site in 1996 (see Water Board letter dated 8/2/1996). However, the County evidently keep the case open in their files and transferred this case to the Water Board in conjunction with the transfer of many of their open cases to the Water Board. I have reviewed the files, and determined there is no justification to reopen the case. This Water Board case was closed in

Eval Notes:	Facility still had an unlabeled drum full of waste stored at the North East corner of the parking lot. Provided manager Louis Almeida with hazardous waste labels, Mr. Almeida labeled the drum during the follow-up inspection. Instucted facility to dispose of drum immediately as Mr. Almeida stated that the drum had been there since the new owners took over in May of 2017.
