Re: Reaffirmation of California Environmental Quality Act (CEQA) Compliance for the Klamath Community Service District's Klamath CSD Wastewater System Renovation (Project) Funded through the Clean Water State Revolving Fund Program

Dear State Water Resources Control Board:

The Klamath Community Services District has applied for and anticipates receipt of a funding agreement for a wastewater infrastructure upgrade project to be administered through the Clean Water State Revolving Fund (CWSRF) program. The project being reaffirmed, along with the CWSRF project and State Clearinghouse number, is as follows:

- Klamath CSD Wastewater System Renovation (Project No. C-06-8138-210)
- SCH NO. 2018032064

This project has demonstrated compliance with CEQA requirement under the CWSRF program, and the Mitigated Negative Declaration was filed with the State Clearinghouse on March 23, 2018, under State Clearinghouse number 2018032064. Since the project has not secured a funding agreement within five years of the original posting date, Klamath Community Services District is reaffirming that no project changes of regulatory changes have occurred and that there have been no new potential environmental impacts since the original posing date.

If you have any questions regarding this reaffirmation, please do not hesitate to contact me at 707-482-0723 or by e-mail at klamathcsd@gmail.com.

Sincerely,

Margaret Caldwell,
KCSD Board President

Veronica Downs,
KCSD Secretary
