

**Notice of Availability / Notice of Intention to Adopt an Addendum to a Mitigated Negative Declaration  
(SCH#2018091025)**

Notice is Hereby Given: The City of Livingston (City) is the Lead Agency on the below-described project and has prepared a second Addendum to the previously adopted Mitigated Negative Declaration (State Clearinghouse #2018091025) on the proposed TCP Removal Treatment System Project (Project). The complete Project description, location and the potential environmental effects are contained in the Addendum and the previous Mitigated Negative Declaration (MND). Both the previous MND and the current Addendum concluded that no significant environmental impacts will occur as a result of the Project.

Project Title: Addendum No. 2 to the Mitigated Negative Declaration for the Livingston 1,2,3 - TCP Removal Treatment System Project

Project Location and Description: The City plans to make several improvements to increase the City's water system capacity and improve centralized proposed trichloropropane (TCP) treatment. Minor changes were made to the original Project Description in the previous MND and Addendum No. 1 which consist of:

- **Additions to the TCP Treatment Facility at Arakelian Park**

The scope of work for the TCP Treatment Facility at Arakelian Park remains unchanged in intent; however, this Addendum clarifies and supplements the project description provided in Addendum No. 1.

Specifically, while the original description referenced the treatment facility site, it did not explicitly identify all supporting buildings, grading, and infrastructure components, including a partially buried water storage tank and booster pumps. These elements are integral to the operation of the facility and were always contemplated as part of the project's functional design. This Addendum, Addendum No. 2 now includes these components explicitly for clarity. All previously analyzed components of the TCP Treatment Facility remain valid, and clarification of the facility and the inclusion of the storage tank and booster pumps do not result in new or more severe environmental impacts than those previously disclosed.

- **Additions to the Well 8 site**

In addition to the previously approved TCP treatment facility at the Well 8 location, the City is adding two new filtration vessels and a new backwash tank (approximately 70,000 gallons) for arsenic removal to the existing Well 8 site.

- **Relocation of Well 18**

Addendum No. 1 identified the location of Well 18 on the northwest corner of White Avenue and Davis Street, with associated water pipeline running east on Davis Street, north on White Avenue, east on Swan Street and north on North Main Street to the Well 8 Centralized Treatment Site. This Addendum, Addendum No. 2, memorializes the relocation of Well 18 and the associated buildings, grading, and infrastructure

components to Lucero Park, with water pipeline running west on Celia Drive and north on North Main Street to the Well 8 Centralized Treatment Site.

**Document Availability and Public Review Timeline:** The review period for the Addendum will be from May 9, 2025 to May 19, 2025. Copies of the Addendum can be reviewed at the City of Livingston, 1416 C Street, Livingston, CA 95334.

Please send your comments to Miguel Galvez at the address shown above or by email: [mgalvez@livingstoncity.com](mailto:mgalvez@livingstoncity.com).

**City Council Consideration:** The Livingston City Council intends to consider the Addendum on:

- Date: Tuesday May 20, 2025
- Time: On or after 7:00 p.m.
- Location: City Council Chambers 1416 C Street Livingston, CA 95334
