A.1 INTRODUCTION

A.1.1 Section 4(f) of the Department of Transportation Act

Section 4(f) of the Department of Transportation Act of 1966, codified in federal law at 49 United States Code (USC) 303, declares that "[i]t is the policy of the United States Government that special effort should be made to preserve the natural beauty of the countryside and public park and recreational lands, wildlife and waterfowl refuges, and historic sites."

Section 4(f) specifies that the Secretary of Transportation "may approve a transportation program or project…requiring the use of publicly owned land of a public park, recreational area, or wildlife and waterfowl refuge of national, State, or local significance, or land of an historic site of national, State, or local significance (as determined by the federal, State, or local officials having jurisdiction over the park, area, refuge, or site) only if:

- there is no prudent and feasible alternative to using that land; and
- the program or project includes all possible planning to minimize harm to the park, recreational area, wildlife and waterfowl refuge, or historic site resulting from the use."

Section 4(f) further requires coordination with the Department of the Interior and, as appropriate, the involved offices of the Department of Agriculture and the Department of Housing and Urban Development in developing transportation projects and programs that use lands protected by Section 4(f). If historic sites are involved, then coordination with the State Historic Preservation Officer (SHPO) is also needed.

Responsibility for compliance with Section 4(f) has been assigned to the California Department of Transportation (Caltrans) pursuant to 23 USC 326 and 327, including determinations and approval of Section 4(f) evaluations as well as coordination with those agencies that have jurisdiction over a Section 4(f) resource that may be affected by a project action.

The proposed project is a transportation project that may receive federal funding and/or discretionary approvals through the U.S. Department of Transportation (USDOT) (i.e., Federal Highway Administration [FHWA]); therefore, documentation of compliance with Section 4(f) is required.

This Section 4(f) analysis provides documentation of compliance with Section 4(f) through the analysis of effects and determination of use of public parks, recreational facilities, wildlife refuges, and historic properties as a result of the proposed project and the identification and evaluation of avoidance alternatives and measures to minimize harm, as applicable, in accordance with the requirements of Section 4(f).

To determine whether Section 4(f) applies to a federal transportation project, two prerequisites are considered: (1) the project must involve a resource that is protected

under the provisions of Section 4(f), and (2) there must be a use of that resource. Resources subject to Section 4(f) consideration include publicly owned lands that are considered part of a public park or a recreational area of national, state, or local significance, whether publicly or privately owned.

A.1.2 Section 4(f) Use Definitions

When a project is adjacent to or on a property protected under Section 4(f), the impacts of the proposed project must be evaluated. Section 4(f) defines the impact level by types of "use." These "uses" occur when any of the conditions discussed in the subsections that follow are met.

A.1.2.1 Permanent Use

A permanent use of a Section 4(f) resource occurs when property is permanently incorporated into a transportation facility. Permanent use may occur as a result of partial or full acquisition or a permanent easement that allows permanent access onto the property for maintenance or other transportation-related purposes.

A.1.2.2 Temporary Occupancy

A temporary use of a Section 4(f) property results in a "temporary occupancy" of a Section 4(f) resource when a Section 4(f) property is required for construction-related activities and meets specific conditions of use. If the activity does not meet the temporary occupancy conditions, even if the property is not permanently incorporated into a transportation facility, the temporary construction use would be considered a Section 4(f) use. Such use may be found to be *de minimis*. Temporary occupancy of property does not constitute a use of a Section 4(f) resource when the following conditions are satisfied:

- The occupancy must be of temporary duration (e.g., shorter than the period of construction) and must not involve a change in ownership of the property.
- The scope of use must be minor, with only minimal changes to the protected resource.
- There must be no permanent adverse physical impacts on the protected resource or temporary or permanent interference with activities or the purpose of the resource.
- The property being used must be fully restored to a condition that is at least as good as the condition that existed before project construction.
- There must be documented agreement of the appropriate officials having jurisdiction over the resource regarding the foregoing requirements.

A.1.2.3 Constructive Use

A constructive use of a Section 4(f) resource occurs when a transportation project does not permanently incorporate land from the resource, but the project's proximity results in impacts (e.g., noise, vibration, visual, access, ecological) so severe that the protected activities, features, or attributes that qualify the property for protection under Section 4(f) are substantially impaired. Substantial impairment occurs only if the protected activities, features, or attributes of the resource are substantially diminished.

A.1.2.4 De Minimis Impact

Section 6009(a) of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users amended Section 4(f) legislation at 23 USC 138 and 49 USC 303 to simplify the processing and approval of projects that have only *de minimis* impacts on lands protected by Section 4(f). This revision provides that once USDOT determines that a transportation use of a Section 4(f) property—after consideration of any impact avoidance, minimization, and mitigation or enhancement measures—results in a *de minimis* impact on that property, an analysis of avoidance alternatives is not required, and the Section 4(f) evaluation process is complete. FHWA's final rule on Section 4(f) *de minimis* findings is codified in 23 Code of Federal Regulations (CFR) 774.3 and CFR 774.17.

When impacts on a Section 4(f) property are minor, as agreed to by the agency with jurisdiction over that property, Section 4(f) regulations can be satisfied through a *de minimis* determination.

De minimis impact is defined in 23 CFR 774.17 as follows:

- "For historic sites, *de minimis* impact means that [Caltrans] has determined, in accordance with 36 CFR part 800 that no historic property is affected by the project or the project would have 'no adverse effect' on the property in question." The SHPO and Advisory Council on Historic Preservation, if involved, must be notified that Caltrans intends to enter a *de minimis* finding for properties where the project results in "no adverse effect."
- "For parks, recreational areas, and wildlife and waterfowl refuges, a *de minimis* impact is one that will not adversely affect the features, attributes, or activities qualifying the property for protection under Section 4(f)."
- The officials with jurisdiction must concur in writing with a *de minimis* determination. For recreational or refuge properties, concurrence from the officials having jurisdiction over the properties is required. For historical sites, concurrence from the SHPO is required.

A.1.2.5 Section 4(f) Applicability

For a park or recreational area to qualify as a Section 4(f) property, it must meet all of the following criteria:

- Publicly owned at the time at which the use occurs
- Open to the general public
- Being used for recreation
- Considered significant by the agency with jurisdiction
- A publicly owned recreational property designated in a formal plan
- A public or private school with a joint use agreement for public recreational use of the school grounds/recreational facilities

Section 4(f) does not apply in the following circumstances:

- Publicly owned facilities whose major purpose is for commercial reasons, such as professional sport or music venues, rather than for park or recreational purposes
- Land that is privately owned, even if it is designated in a formal plan
- Where no joint use agreement for use of public or private school recreational facilities exists
- Publicly owned facilities where park, recreational, or refuge activities would be incidental, secondary, occasional, or dispersed
- Publicly owned land or facilities whose major purpose, as described by the agency with jurisdiction, is transportation, even when recreational activities may occur within the facility
- Privately owned golf course
- Planned facilities that are not publicly owned by the entity

A wildlife or waterfowl refuge qualifies for protection under Section 4(f) if it (1) is publicly owned at the time at which the use occurs, (2) the land has been officially designated as a wildlife and/or waterfowl refuge by a federal, state, or local agency, (3) its primary designated purpose is consistent with its primary function and how it is intended to be managed, and (4) is considered significant by the agency with jurisdiction. Coordination with the agency with jurisdiction and examination of the land management plan for the area would be necessary to determine if Section 4(f) should apply to an area that would be used by a transportation project.

Historic sites listed or eligible for listing in the National Register of Historic Places (NRHP) are protected under Section 4(f). Although the statutory requirements of Section 106 of the National Historic Preservation Act (Section 106) and Section 4(f) are similar, if a proposed action results in an “adverse effect” under Section 106, there is not automatically a Section 4(f) use. To determine whether a use of an NRHP-protected property would occur, Caltrans completes a separate Section 4(f) analysis and determination, in addition to those completed in compliance with the Section 106 process.

For a property to be eligible for listing in the NRHP, it must meet at least one of the four NRHP criteria (i.e., Criteria A–D) described in this section. The quality of significance in American history, architecture, archaeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association and meet one or more of the following criteria:

- Criterion A—Properties that are associated with events that have made a significant contribution to the broad patterns of our history
- Criterion B—Properties that are associated with the lives of persons significant in our past
- Criterion C—Properties that embody distinctive characteristics of a type, period, or method of construction; represent the work of a master; possess high artistic values; or represent a significant and distinguishable entity whose components may lack individual distinction
- Criterion D—Properties that have yielded, or may be likely to yield, information important in prehistory or history

An archaeological resource that is eligible only under NRHP Criterion D is considered valuable primarily in terms of the data that can be recovered from it. For such resources (such as pottery scatters and refuse deposits), it is generally assumed that there is minimal value attributed to preserving such resources in place. Conversely, resources eligible under Criterion A, B, or C are considered to have value intrinsic to the resource's location. In other words, Section 4(f) does not apply to a site if it is important chiefly because of what can be learned by data recovery and has minimal value for preservation in place.

A.2 DESCRIPTION OF PROPOSED PROJECT

A.2.1 Project Overview

Caltrans, in coordination with the Ventura County Transportation Commission (VCTC), is proposing the US 101 Improvement Project. The project would widen US Highway 101 (US 101) by adding one high-occupancy vehicle (HOV)/express bus lane in each direction from Moorpark Road in the city of Thousand Oaks to State Route (SR) 33 in the city of Ventura, Ventura County, California. The project covers an approximate distance of 27 miles. The proposed project would include outside widening, retaining walls, and right-of-way (ROW) acquisition at some locations. For the proposed project, a No-Build Alternative and two build alternatives are being considered.

A.2.2 Purpose and Need of the Proposed Project

A brief summary of the project purpose and need is provided here. Please refer to Chapter 1 of the Draft Environmental Impact Report/Environmental Assessment (EIR/EA), for a more detailed description.

A.2.2.1 Project Purpose

The purpose of the proposed project is to improve traffic conditions along the US 101 corridor within Ventura County. The primary objectives of the proposed project are as follows:

- Improve trip reliability and traffic operations.
- Achieve regional HOV connectivity along US 101.
- Support regional prosperity.
- Improve the reliability and efficiency of the public transit system within Ventura County.

A.2.2.2 Project Need

The need for the proposed project stems from unreliable trip times and traffic operations on US 101, the lack of HOV connectivity within the project limits, regional growth and trends in goods movement, and the lack of reliable and efficient public transit.

A.2.3 Description of the Proposed Project

As discussed in detail in Section 1.3, *Project Description*, of the Draft EIR/EA, US 101 runs north–south along the Pacific coast and connects the western portions of California, Oregon, and Washington, beginning in Los Angeles at Interstate 5 (I-5) and terminating in Tumwater, Washington (also at I-5). In the project area, US 101—known as the Ventura Freeway in the section that runs through Ventura County—is critical to local mobility and the economic well-being of the county by serving as the "Main Street" that connects different cities in the corridor. Despite the overall north–south orientation of the freeway within the county, it runs in a general southeast–northwestern direction, traveling through the cities of Thousand Oaks, Camarillo, and Oxnard before crossing the Santa Clara River and through the city of Ventura.

A.2.4 Alternatives

A.2.4.1 Alternative 1: No-Build Alternative

The No-Build Alternative proposes no further improvements to the existing segment of US 101. All freeway facilities would remain in their existing condition, with two to four general purpose (GP) lanes in each direction but no HOV or additional auxiliary lanes. Operational deficiencies along US 101 would continue to deteriorate as traffic volumes increase. Existing and projected increases in traffic congestion would not be addressed with this alternative, and level of service (LOS) would continue to decline. The No-Build Alternative does not address the purpose and need for the project.

The No-Build Alternative represents a baseline condition. It is used to evaluate the effectiveness of proposed build alternatives. This alternative allows decision-makers to

compare and evaluate the impacts of build alternatives with those of a no-build alternative.

A.2.4.2 Build Alternative 2: Add an HOV/Express Bus Lane in Each Direction

This alternative proposes to construct an HOV/express bus lane in each direction from Moorpark Road in Thousand Oaks to SR 33 in Ventura, with limited design exceptions and auxiliary lanes where operationally beneficial. This alternative proposes to maintain the existing number of GP lanes, with the exception of the segment from Vineyard Avenue to Johnson Drive where an existing GP lane is proposed to be converted to an HOV lane in lieu of adding a lane. This alternative would require outside widening, retaining walls, and ROW acquisition at some locations.

Build Alternative 2 proposes the following engineering features:

- **Mainline Improvements**
  - 10-foot (minimum) left shoulder, with the exception of overcrossing column bents.
  - 2-foot left shoulder northbound from Arneill Road to north of Carmen Drive and 4-foot left shoulder southbound from Arneill Road to Carmen Drive to prevent significant ROW acquisitions and maintain frontage road.
  - 11- to 12-foot HOV lane.
  - 2-foot buffer between HOV and GP lanes at select locations.
  - 11- to 12-foot GP lanes.
  - 10-foot right shoulder.
  - The southbound truck climbing lane would begin at the Santa Rosa Road/Pleasant Valley Road interchange, lengthening it by 5,060 feet.
- **Local Improvements**
  - Camarillo Springs Road would be realigned to accommodate realignment of the Camarillo Springs Road northbound off-ramp.
  - Calle Cuesta Road would be realigned to accommodate mainline widening and realignment of the Pleasant Valley Road southbound on-ramp.
  - Daily Drive would be realigned to accommodate mainline widening.
  - The sign structure at Station 1060+00 would be relocated to accommodate mainline widening.
  - Ventura Boulevard would be realigned to accommodate mainline widening.

Build Alternative 2 would require two structures to be replaced, a new one to be constructed, and 21 to be widened. The Borchard Road overcrossing and Pleasant

Valley Road overcrossing would require a half-bridge replacement. The Camarillo Springs Road off-ramp undercrossing would be a new structure (refer to Table A-1).

Table A-1. Alternatives 2 and 3 Structure Impacts

Post Mile	Bridge No.	Bridge Name	Potential Structure Impacts		
			Rebuild (R)/ New (N)	Outside Widening	Median Widening
4.1	52-0237	Moorpark Rd UC		X

Notes: Ave = Avenue; Dr = Drive; Rd = Road; St = Street; OC = overcrossing; OH = overhead; UC = undercrossing
*This location only applies to Build Alternative 2 only.

A.2.5 Build Alternative 3: Add an HOV/Express Bus Lane in Each Direction with Design Variations

This alternative proposes to construct an HOV/express bus lane in each direction from Moorpark Road in Thousand Oaks to SR 33 in Ventura, with limited design exceptions and auxiliary lanes where operationally beneficial. This alternative would require outside widening, retaining walls, and ROW acquisition at some locations. In addition, Build Alternative 3 would require two structures to be replaced, a new one to be constructed, and 18 to be widened (refer to Table A-1). The Borchard Road overcrossing and Pleasant Valley Road overcrossing would require a half-bridge replacement. The Camarillo Springs Road off-ramp undercrossing would be a new structure.

Build Alternative 3 is identical to Build Alternative 2, except it provides the design variations discussed below.

A.2.5.1 Shift Alignment on the Conejo Grade

The centerline of the US 101 mainline would be realigned 24 to 60 feet to the east between the inspection station and Camarillo Springs Road to minimize or prevent additional excavation into the southern hillside. An existing ROW that extends 2,200 feet north of the inspection station on the north side of US 101 was previously graded. This graded area varies from 26 feet at the ends to 61 feet near the middle, improving sight distance for stopping. Paving over the existing graded area would eliminate the impact and cost associated with cutting deeper into the southern slope and be safer for both motorists and construction workers.

A.2.5.2 Extended Southbound Auxiliary Lane at Dawson Drive

Existing conditions between the southbound on-ramp from Ventura Boulevard/Lewis Street and the off-ramp to Dawson Drive/Village at the Park Drive include a short weave lane, causing recurring congestion at this location. Build Alternative 3 proposes extending the auxiliary lane through the Dawson Drive/Village at the Park Drive off- and on-ramps and connecting it to the proposed auxiliary lane between Dawson Drive/Village at Park Drive and Pleasant Valley Road. This design variation, extending

the existing auxiliary lane and connecting to a proposed auxiliary lane, would reduce peak-hour congestion at this location.

A.2.5.3 Four General-Purpose Lanes from Vineyard Avenue to Victoria Avenue, including Additional Lanes on the Santa Clara River Bridge by Restriping

This design variation would maintain the existing fourth GP lane in both directions from Vineyard Avenue (beneath the SR 232/US 101 separation) to just south of the Victoria Avenue undercrossing. Under Build Alternative 2, the lane would be converted to an HOV lane.

Northbound, the Vineyard Avenue loop on-ramp would be the beginning of a new GP lane. The auxiliary lane between Vineyard Avenue and Oxnard Boulevard would be reconstructed to maintain operations. A new retaining wall would be built to support the northbound Oxnard Boulevard exit ramp. The northbound Victoria Avenue exit would be a single-lane optional exit, similar to the existing condition. The fourth GP lane would be dropped after the 23-foot point of this exit.

Southbound, the Victoria Avenue hook on-ramp would be the beginning of a new GP lane. The auxiliary lane between Victoria Avenue and Johnson Drive would be reconstructed to maintain operations. The southbound Vineyard Avenue exit would be a single-lane forced exit. The fourth GP lane would be dropped after the southbound Vineyard Avenue exit.

This design variation would maintain existing GP lane capacity within this segment of the project. The high-volume ramps at Vineyard Avenue, Oxnard Boulevard, Johnson Drive, and Victoria Avenue would benefit from the proximity of existing lanes to accommodate weaving movements. In addition, existing pavement is available, extending about 4,200 feet north of Vineyard Avenue, for one additional northbound lane. Because only restriping would be needed in these areas, this design variation would save time and money during construction. Other areas, without additional pavement, would be widened and striped accordingly. In addition, this design variation would add a lane in each direction on the Santa Clara River Bridge. Currently, there are six lanes in each direction. Build Alternative 2 proposes converting one of the GP lanes to an HOV lane. The Build Alternative 3 design variation would restripe the Santa Clara River Bridge to provide seven lanes (the six existing GP lanes and a new HOV lane) in each direction. To accommodate the new HOV lane, the width of the left shoulder would be reduced to 4 feet. The lane width would be reduced to 11 feet for the HOV lane and #1 lane. The reductions in lane and shoulder widths would occur over a distance of 1,886 feet on a curve south of Oxnard Boulevard. The lane and shoulder width increases would occur over a distance of 339 feet on a curve near the Johnson Drive interchange. The reductions and increases in lane and shoulder widths around the curves would allow the smoothest transition for the motorist and meet *Highway Design Manual* (Caltrans 2025) standards. This design variation would maintain the four existing GP lanes and two auxiliary lanes on the Santa Clara River Bridge. Striping would be maintained for each lane right of the #1 GP lane.

A.2.5.4 Lane Drop at California Street Northbound Off-Ramp

This design variation would shift the proposed northbound project terminus from just south of SR 33 to a point about 0.5 mile to the south. The northbound HOV lane would be converted to a GP lane at San Jon Road. From there, four GP lanes would continue north until one would be dropped at a forced exit at the California Street northbound off-ramp. A proposed 2,900-foot radius curve would replace the former compound curves beneath the Ash Street pedestrian overcrossing, Ventura Avenue underpass, Chestnut Street on-ramp overhead, and California Street overcrossing. The Ventura Avenue off-ramp undercrossing would not have to be widened because the proposed striping would match the existing striping under the California Street overcrossing at Station 1560+40. No construction is proposed on the northbound mainline north of this station. This design variation would eliminate the non-standard shoulder design exceptions beneath the Ventura Avenue underpass, Chestnut Street on-ramp overhead, and California Street overcrossing.

A.3 SECTION 4(F) PROPERTIES

Section 4(f) properties include publicly owned land within a public park or recreational area, such as trails (e.g., bicycle, pedestrian, equestrian trails), and public schools with publicly accessible recreational areas. Some parks and recreational areas may require a user fee to enter or use the facility, such as public golf courses, and may also be considered Section 4(f) properties. Public wildlife and waterfowl refuges of national, state, or local significance are also considered Section 4(f) properties. Section 4(f) also applies to all historic sites that are publicly or privately owned historic properties of national, state, or local significance and listed in or determined eligible for listing in the NRHP. Section 4(f) regulations exempt archeological sites, except when the sites warrant preservation in place.

A.3.1 Section 4(f) Properties in the Study Area

A.3.1.1 Cultural Resources

The study area for historic properties and archaeological sites is the Section 106 Area of Potential Effect (APE) developed for this project in accordance with 36 CFR 800.4(a)(1). Historic properties included in or eligible for listing in the NRHP were identified as Section 4(f) resources. Section 4(f) applies to archaeological sites that are in or eligible for listing in the NRHP and warrant preservation in place.

The APE is the geographic area or areas within which an undertaking may directly or indirectly cause alterations in the character or use of historic properties, including archaeological sites. The APE incorporates the direct impact area for architectural and archaeological properties as well as one parcel beyond the proposed ROW for the built environment (history and architecture).

A.3.1.2 Parks, Recreational Facilities, and Wildlife and Waterfowl Refuges

An inventory of publicly owned parks and recreational facilities was conducted within the Section 4(f) resource study area, consisting of properties within 0.25 mile of the project limits, to ensure that proximity impacts would be considered. The *project limits* refers to the area needed to construct, operate, and maintain all permanent features of the project.

No wildlife or waterfowl refuges were identified.

Table A-2 provides a summary of the Section 4(f) resource study area by property type. Figure A-1 shows where these Section 4(f) properties are located within the Section 4(f) resource study area. Given the sensitivity of some cultural resources present within the project area, only parks and recreational facilities and historic properties were mapped.

Table A-2. Summary of Properties Subject to Section 4(f) Consideration

Type of Property	Number of Properties Identified	Geographic Location to Project
Public parks (including open space)	23	Adjacent
Public trails and bike paths	2	Adjacent
Public schools with publicly available recreational areas	0	Adjacent
Wildlife and waterfowl refuges	0	N/A
NRHP-eligible historic sites (including districts)	10	Within the APE
NRHP-eligible archaeological sites	1	Within the APE

Notes: APE = Area of Potential Effects; N/A = not applicable; NRHP=National Register of Historic Places

A.4 USE OF SECTION 4(F) PROPERTIES

A.4.1 No-Build Alternative

Under the No-Build Alternative, no project improvements would be implemented; therefore, use of Section 4(f) properties would not occur.

A.4.2 Build Alternatives

Under both Build Alternatives 2 and 3, the project would result in a *de minimis* use of four Section 4(f) properties: Camarillo Grove Park, Los Robles Greens Golf Course, Walnut Grove Park, and Firestone Tire and Service Station, and a use of the Adolfo Camarillo Heritage Grove. Table A-3 provides a summary of all Section 4(f) properties within the Section 4(f) study area for the project and includes information pertaining to property ownership, amenities, and the use determination under Section 4(f).

Table A-3. Use of Section 4(f) Resources within the Study Area

Resource Name	Location	Official with Jurisdiction/ Owner/Operator	Amenities	Location Relative to the Project	Section 4(f) Use?	Build Alternative 2 Use Determination/ Evaluation	Build Alternative 3 Use Determination/ Evaluation
Park and Recreational Resources							
Ventura Waterfront Promenade, Surfer's Point, and Promenade Park	Ventura	City of Ventura	Beach and park facilities, including a trail, walkway, restrooms, showers, a spacious lawn, and picnic tables.	500 feet	Permanent Use: No. No land would be incorporated into the project. A.5 INDIVIDUAL SECTION 4(F) EVALUATION

Section 4(f) of the Department of Transportation Act of 1966, codified in federal law at 49 USC 303, declares that "[i]t is the policy of the United States Government that special effort should be made to preserve the natural beauty of the countryside and public park and recreation lands, wildlife and waterfowl refuges, and historic sites."

Section 4(f) specifies that the Secretary of Transportation "may approve a transportation program or project . . . requiring the use of publicly owned land of a public park, recreation area, or wildlife and waterfowl refuge of national, State, or local significance, or land of an historic site of national, State, or local significance (as determined by the federal, State, or local officials having jurisdiction over the park, area, refuge, or site) only if:

- there is no prudent and feasible alternative to using that land; and
- the program or project includes all possible planning to minimize harm to the park, recreation area, wildlife and waterfowl refuge, or historic site resulting from the use."

Section 4(f) further requires coordination with the Department of the Interior and, as appropriate, the involved offices of the Department of Agriculture and the Department of Housing and Urban Development in developing transportation projects and programs that use lands protected by Section 4(f). If historic sites are involved, then coordination with the SHPO is also needed.

Responsibility for compliance with Section 4(f) has been assigned to Caltrans pursuant to 23 USC 326 and 327, including determinations and approval of Section 4(f) evaluations, as well as coordination with those agencies that have jurisdiction over a Section 4(f) resource that may be affected by a project action.

A.5.1 Adolfo Camarillo Heritage Grove Individual Section 4(f) Evaluation

A.5.1.1 Description of the Section 4(f) Property – Adolfo Camarillo Heritage Grove

In 1892, Adolfo Camarillo, the founder of the city of Camarillo, planted a double row of 650 eucalyptus, which once lined both sides of the old two-lane El Camino Real and extended from Pleasant Valley Road to Las Posas Road. The trees were an identifying mark for the city of Camarillo and provided shade for travelers.

A 1973 US 101 widening project between Thousand Oaks and Oxnard would have required removal of a portion of the Adolfo Camarillo Heritage Grove due to the trees being located within the median of the highway at the time. An alternative design was approved, which involved rerouting the highway around the trees. The approved plan

shifted the entire alignment to the south, leaving a 5,000-foot stretch of trees along the northern side of the highway instead of in the middle (County of Ventura 2026).

The Adolfo Camarillo Heritage Grove was evaluated in 1994. SHPO concurred with the evaluation on September 16, 1994. Therefore, Adolfo Camarillo Heritage Grove was determined to be NRHP eligible under NRHP Criterion B and the grove was listed in the California Register of Historical Resources (CRHR) in 1994. It has a period of significance of 1892 (the year of its planting) to 1958 (the year of Camarillo's passing). In addition, in 1978 the trees became a Ventura County Landmark. The historic property boundary is the area roughly bounded by US 101 to the south, Mission Oaks Boulevard/Dawson Drive to the west, Mission Oaks Boulevard to the north, and Arroyo Las Posas (Calleguas Creek) to the east. Character-defining features of the Adolfo Camarillo Heritage Grove include its eucalyptus trees, double-row design, traversable pathway between the rows, and proximity to and relationship with Camarillo Ranch to the north. As a NRHP-eligible historic property within the resource study area, the Adolfo Camarillo Heritage Grove qualifies for protection under Section 4(f).

A fraction of the original 650 trees remains today. Portions of the property are within both a Caltrans ROW and City of Camarillo ROW. The Adolfo Camarillo Heritage Grove is visible from US 101 as well as Mission Oaks Boulevard. The public can currently access the property from the Calleguas Creek Bike Path. The bike/pedestrian path runs along the historic El Camino Real between the existing double row of trees and ends near the entrance to the Camarillo Ranch property. Please refer to Figure A-2 to see the location of the Adolfo Camarillo Heritage Grove as it relates to the project.

A.5.1.2 Use of the Section 4(f) Property – Adolfo Camarillo Heritage Grove

This section discusses the concept of "use." Per 23 CFR 774.17, a Section 4(f) "use" occurs when at least one of the following occurs:

- Land is permanently incorporated into a transportation facility.
- There is a temporary occupancy of land that is adverse in terms of the Section 4(f) statute's preservation purposes.
- There is a constructive use of a Section 4(f) property.

When Section 4(f) applies to historic sites, it relies on analysis carried out under Section 106.

Impacts on this Section 4(f) property are the same for ***both*** of the proposed build alternatives. Due to the widening to incorporate HOV lanes, both build alternatives would require the **removal of approximately eight trees** and the **relocation of two trees** in the southern row of trees from Calleguas Creek to approximately Flynn Road, as shown in Figure A-3. The number of trees that will be affected will be further investigated during final design. Removal of the trees would result in a permanent use under Section 4(f). This impact is discussed in further detail below.

The widening of the US 101 to accommodate the addition of the HOV/express bus lanes, necessitates the removal of trees that are considered character-defining features to the NRHP-eligible Adolfo Camarillo Heritage Grove. Although protective measures will be taken, grading and paving activities within or adjacent to the historic property could cause some of the remaining trees to fall, become sick, or die because of damage to root systems or changes in soil chemistry. The removal of trees and adjacent construction activities would result in a potential adverse effect under Section 106 of the National Historic Preservation Act. As a result, both build alternatives would result in a permanent use under Section 4(f).

The removal of the trees would result in a Finding of Adverse Effect determination under Section 106 of the National Historic Preservation Act (pending SHPO concurrence). The resulting Finding of Adverse Effect determination would be due to the remaining trees no longer retaining sufficient integrity to convey the historical significance of the Adolfo Camarillo Heritage Grove. All character-defining features of the Adolfo Camarillo Heritage Grove, including its double row of eucalyptus trees, traversable pathway between the rows, and proximity to and relationship with the Camarillo Ranch property to the north, which qualify the property as a historic resource for the purposes of Section 106, would be permanently altered in a manner that would diminish its integrity of location, design, materials, workmanship, feeling, or association.

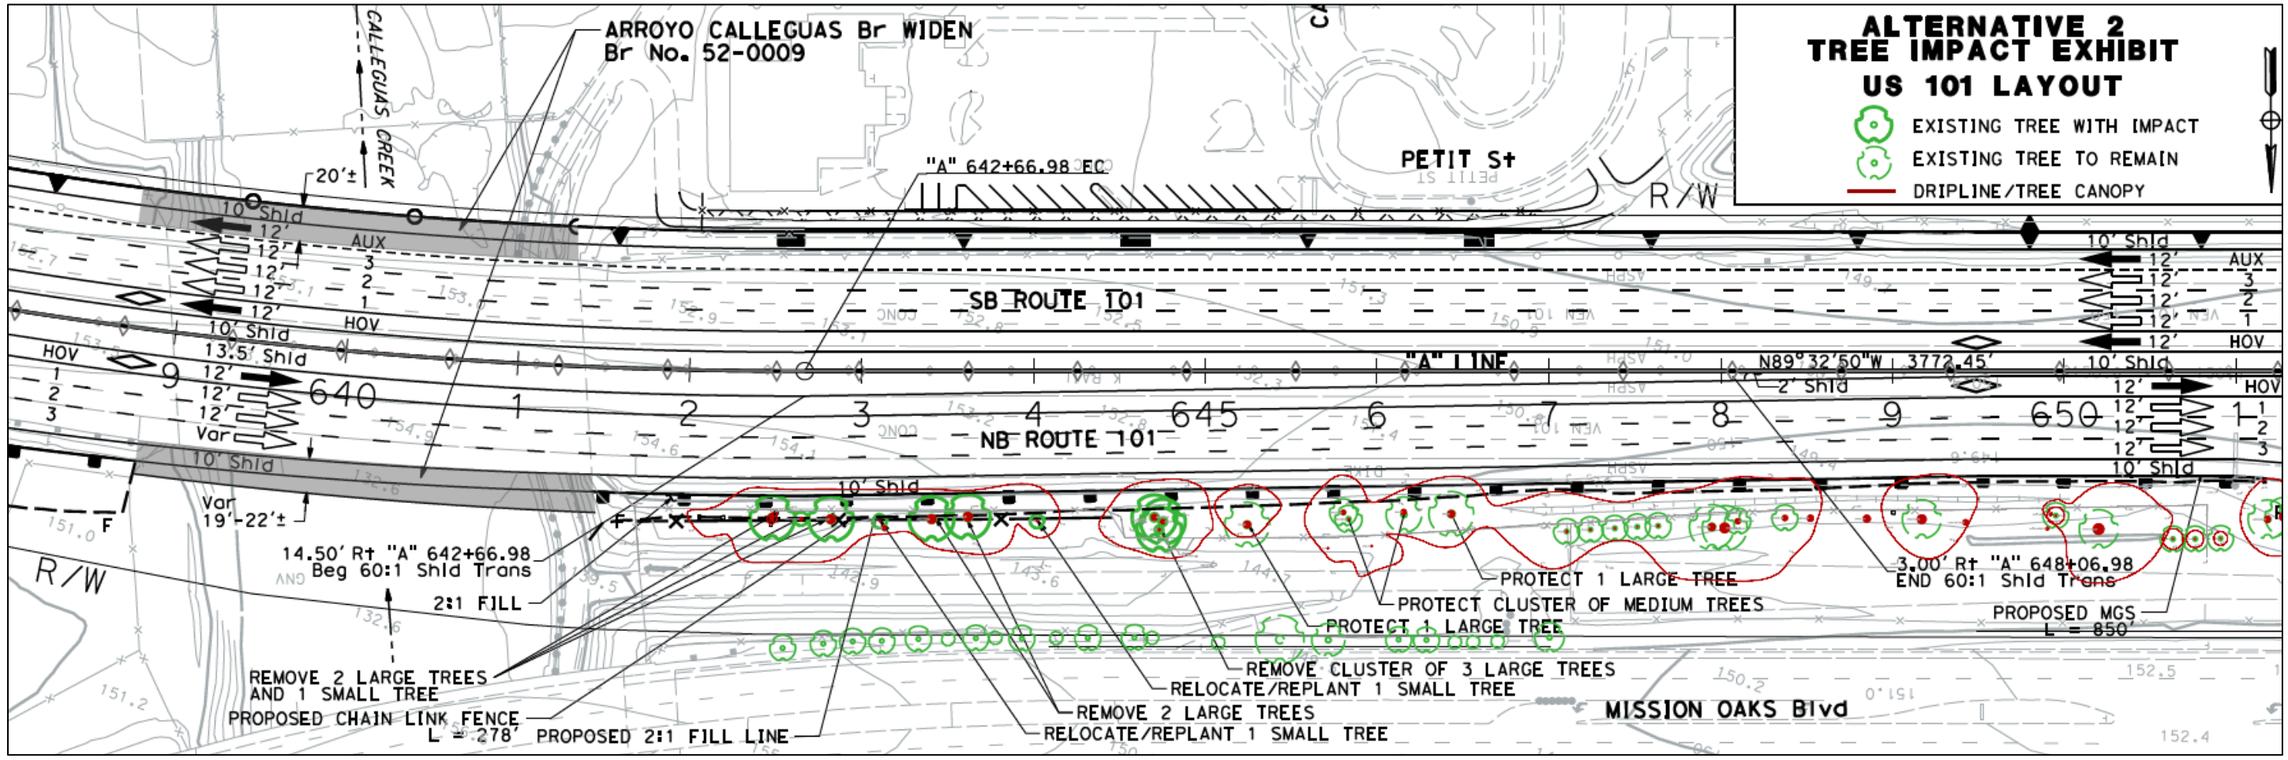
Figure A-3. Tree Impact Exhibit



This page intentionally left blank.

A.5.1.3 Avoidance Alternatives – Adolfo Camarillo Heritage Grove

Section 4(f) requires the selection of an alternative that completely avoids the use of Section 4(f) properties if that alternative is deemed feasible and prudent. According to 23 CFR 774.17, a "feasible and prudent avoidance alternative" is defined as follows.

1. A feasible and prudent avoidance alternative avoids using Section 4(f) property and does not cause other severe problems of a magnitude that substantially outweighs the importance of protecting the Section 4(f) property. In assessing the importance of protecting the Section 4(f) property, it is appropriate to consider the relative value of the resource to the preservation purpose of the statute.

2. An alternative is not feasible if it cannot be built as a matter of sound engineering judgment.

3. An alternative is not prudent if:

   (i) It compromises a project to a degree that it is unreasonable to proceed with the project in light of its stated purpose and need;

   (ii) It results in unacceptable safety or operational problems;

   (iii) After reasonable mitigation, it still causes:

      (A) Severe social, economic, or environmental impacts,

      (B) Severe disruption to established communities,

      (C) Severe disproportionate impacts on minority or low-income populations, or

      (D) Severe impacts on environmental resources protected under other federal statutes;

   (iv) It results in additional construction, maintenance, or operational costs of an extraordinary magnitude;

   (v) It causes other unique problems or unusual factors; or

   (vi) It involves multiple factors listed above that, although individually minor, cumulatively cause unique problems or impacts of extraordinary magnitude.

Alternatives Considered But Still Resulted in Use

Several alternatives were examined as potential Section 4(f) avoidance alternatives but were determined not to be avoidance alternatives because they still resulted in the use of one or more Section 4(f) properties.

No Widening at Adolfo Camarillo Heritage Grove

This alternative would avoid the removal of the southern row of trees at the Adolfo Camarillo Heritage Grove by implementing non-standard shoulders on the northbound mainline by narrowing the left inside shoulder to 2 feet and the right outside shoulder to 1 foot. The limits of the non-standard shoulders, including the narrowing tapers, would be from Santa Rosa Road and North Lewis Road. This alternative would reduce the shoulder widths on both sides of the northbound mainline and would reduce the ramp merging lengths to keep northbound improvements within the limits of the existing northbound pavement section. Although this alternative would avoid use of the Adolfo Camarillo Heritage Grove, it would not achieve the project objective to address operational deficiencies in this area and may, in fact, cause additional operational deficiencies due to the reduction in shoulder widths and ramp merging lengths. Additionally, Caltrans did not approve the non-standard shoulders because they would significantly reduce shoulder widths, thereby affecting sight distance and safety, especially on curves, by limiting a driver's ability to see ahead and by not providing the shoulder room needed to avoid potential collisions. This alternative would also not prevent use of other Section 4(f) resources that would be affected under Alternatives 2 and 3, as listed in Table A-3. For these reasons, this alternative was eliminated from further consideration.

Shifting US 101 Centerline in the Vicinity of the Adolfo Camarillo Heritage Grove

This alternative would avoid removal of a portion of the southern row of trees at the Adolfo Camarillo Heritage Grove by shifting the highway centerline between approximately Santa Rosa Road and North Lewis Road. This alternative would require removing the inside shoulder, relocating drainages along the freeway median, and closing the freeway to implement full reconstruction of the pavement section of the superelevated highway. This alternative would still remove several trees in the grove to accommodate a northbound auxiliary lane at the Calleguas Creek overcrossing. Because it would still result in use of trees within the grove, this alternative is not considered a Section 4(f) avoidance alternative. Due to the significant engineering and construction costs, and because this alternative would not qualify as a Section 4(f) avoidance alternative since it would still result in adverse impacts on the Adolfo Camarillo Heritage Grove, it was eliminated from further consideration.

Widening on South Side of US 101 in the Vicinity of the Adolfo Camarillo Heritage Grove

This alternative would be similar to the alternative above (*Shifting US 101 Centerline in the Vicinity of the Adolfo Camarillo Heritage Grove*), except that this alternative would not include a northbound auxiliary lane at the Calleguas Creek overcrossing. To avoid tree impacts at the Adolfo Camarillo Heritage Grove, this alternative would entail maintaining the existing edge of pavement on the northbound side of US 101 and shifting the highway centerline and all the highway widening to the southbound side of US 101 between approximately Santa Rosa Road and North Lewis Road. Similar to the alternative above (*Shifting US 101 Centerline in the Vicinity of the Adolfo Camarillo Heritage Grove*), this alternative would require removing the inside shoulder, relocating

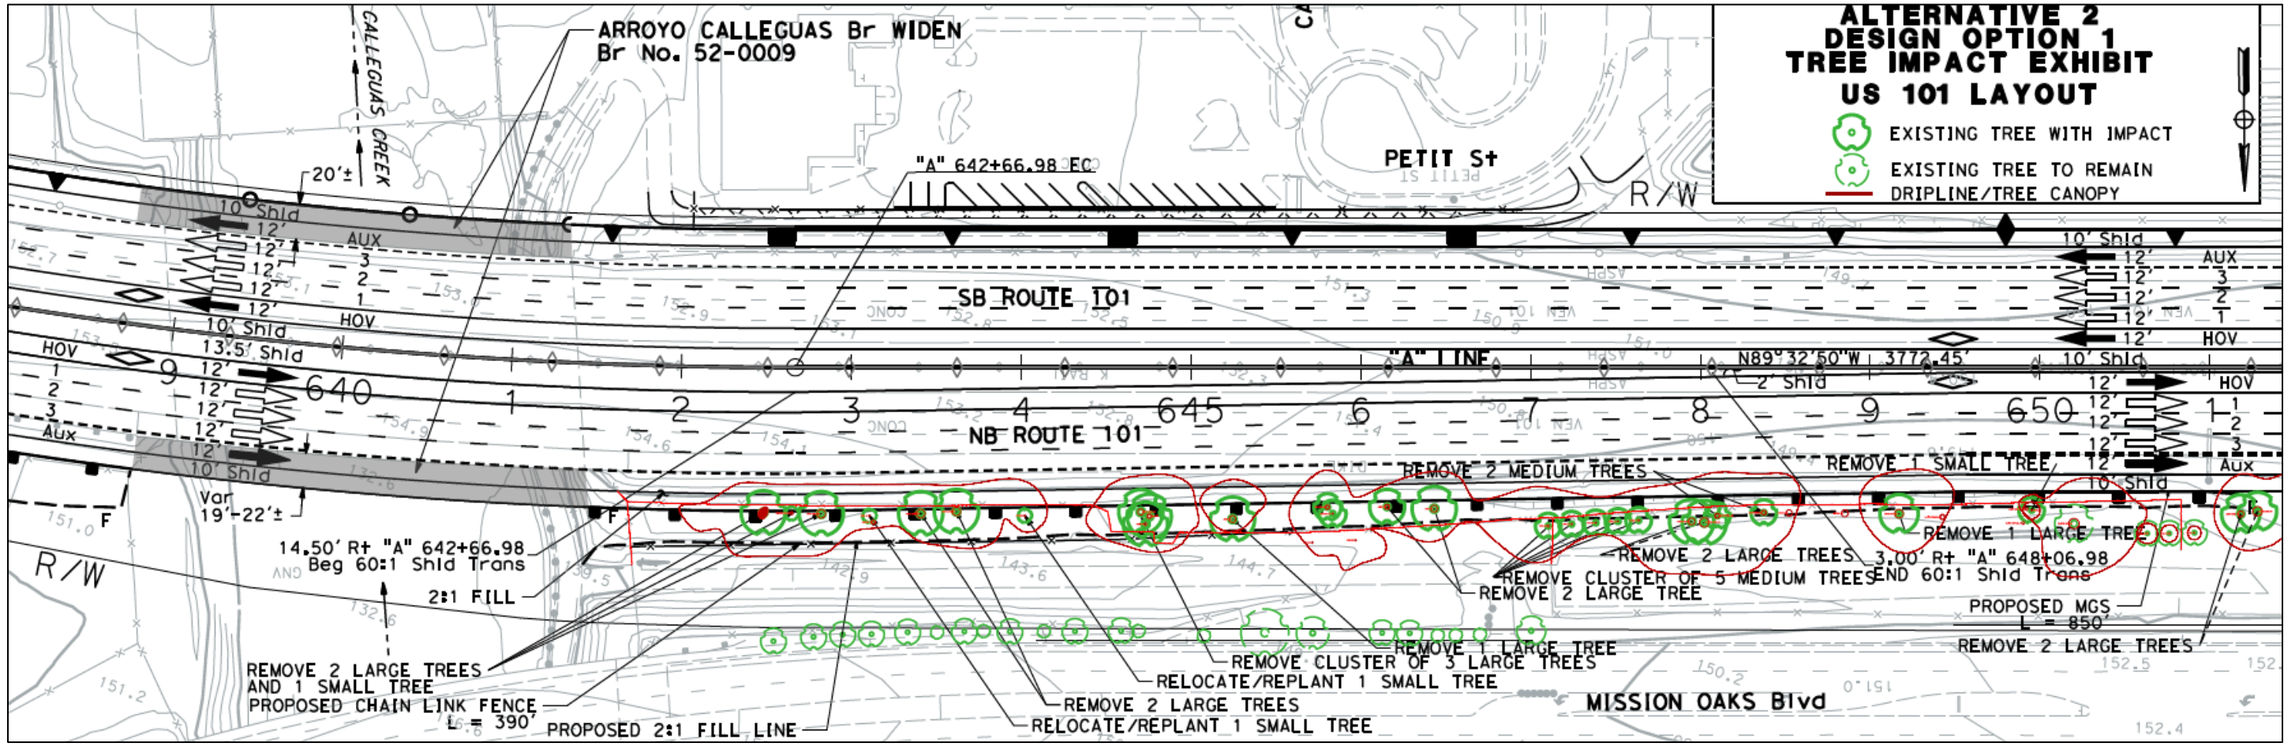
drainages along the freeway median, and closing the freeway to implement full reconstruction of the pavement section of the superelevated highway. Although this alternative would avoid adverse impacts on the Adolfo Camarillo Heritage Grove (adjacent to the northbound side of US 101), it would require acquisition of the entire parking lot at the Kingdom Hall of Jehovah's Witnesses property, necessitating acquisition of the entire property (adjacent to the southbound side of US 101). This alternative would also affect Section 4(f) resources, including the Calleguas Creek bike path and the Pleasant Valley Fields property. There would be both temporary and permanent impacts on the Calleguas Creek bike path. During construction, 3,000 feet of bike lane would need to be relocated to the Pleasant Valley Fields property and parking lot to construct the retaining walls needed for the freeway widening. This alternative would also require permanent acquisition of approximately 14,500 square feet of landscaping that serves as a buffer between US 101 and the Pleasant Valley Fields property and Calleguas Creek bike path. The strip of landscaping includes trees and grass. Removal of the landscaping would have permanent air quality, noise, vibration, and visual impacts on the adjacent park and bike path due to the freeway mainline moving closer to Section 4(f) resources. In addition, this alternative would entail significant engineering and construction costs due to complete reconstruction of a portion of the freeway. For these reasons, this alternative was eliminated from further consideration.

Auxiliary Lane from Santa Rosa Road to Flynn Road

This alternative, which was examined as part of the initial design of the project, would include a proposed auxiliary lane on northbound US 101 from Santa Rosa Road to Flynn Road, while maintaining the proposed HOV/express bus lanes in both the northbound and southbound direction along US 101. The build alternatives with the proposed auxiliary lane would result in impacts on approximately 25 trees at the Adolfo Camarillo Heritage Grove, which would include the removal of 23 trees and the relocation of two trees, as shown in Figure A-4. For an Individual Section 4(f) Evaluation, when two or more build alternatives remain then only the alternative that causes the least overall harm in light of the statute's preservation may be approved. Because the harm caused by the auxiliary lane would be greater than it would be without it and because of substantial number of trees that would experience impacts at the Adolfo Camarillo Heritage Grove by the auxiliary lane, which could potentially destroy the resource, the proposed auxiliary lane on northbound US 101 from Santa Rosa Road to Flynn Road was eliminated from further consideration.

This page intentionally left blank.

Figure A-4. Tree Impact Exhibit with Proposed Auxiliary Lane



This page intentionally left blank.

Avoidance Alternative

The only alternative that avoids use of the Adolfo Camarillo Heritage Grove and all other Section 4(f) resources is the No-Build Alternative.

This avoidance alternative, No-Build Alternative (Alternative 1), would not result in changes to the project corridor. Therefore, the No-Build Alternative would not result in use of the Adolfo Camarillo Heritage Grove or any other Section 4(f) resources, and all impacts would be avoided.

Prudence

To determine if the No-Build Alternative was prudent, the six factors listed below were evaluated.

1. **Compromise the project so that it is unreasonable given the purpose and need?**

   The No-Build Alternative would not meet the purpose and need of the project, as stated in Section 1.2, *Purpose and Need*, of the Draft EIR/EA.

   US 101 within the proposed project limits consists solely of mixed-flow lanes in both directions. Currently, during peak hours, the LOS varies from F (vehicle operating speed less than 29 miles per hour [mph]) to C (vehicle operating speed more than 54 mph). Traffic within the project region has grown by about 45 percent since 1990 and is anticipated to increase further. In addition, the population of Ventura County is projected to grow by approximately 1 percent annually (Southern California Association of Governments [SCAG] 2020), and forecast regional growth in the SCAG region is projected to be 16.3 percent from 2016 to 2045. SCAG estimates that the SCAG region will add 3,672,000 residents, 1,621,000 households, and 1,660,000 jobs over the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) planning horizon (2016–2045) (SCAG 2020). As a result, it is anticipated that forecast traffic demands will continue to increase and traffic conditions will continue to degrade along US 101 due to its role as the main throughfare through Ventura County.

   Under the No-Build Alternative, the project would not be constructed. The amount of vehicle throughput would continue to worsen within the project area because of projected increases in traffic volumes. The degraded traffic conditions as a result of the No-Build Alternative would not meet the purpose of the project—specifically, improving trip reliability, supporting regional prosperity, and ensuring reliable and efficient goods movement. Please refer to Section 2.1.10, *Traffic and Transportation/Pedestrian and Bicycle Facilities,* of the Draft EIR/EA for further details regarding existing conditions and traffic operations.

   Currently, US 101 has no HOV lanes within the project limits; however, there are HOV lanes north of the project limits, traversing through Santa Barbara County. The No-Build Alternative would not result in the construction of additional HOV lanes

through Ventura County. Therefore, the No-Build Alternative would not meet the purpose and need of the project (i.e., to achieve HOV connectivity within the region).

2. Result in unacceptable safety or operational problems?

As stated above, under current conditions, US 101 within the proposed project limits consists solely of mixed-flow lanes in both directions. Currently, during peak hours, LOS varies from F (vehicle operating speed less than 29 mph) to C (vehicle operating speed more than 54 mph). LOS is a letter designation that describes a range of operating conditions for a particular roadway, with LOS A representing the best operating conditions and LOS F representing the worst. LOS E and F are generally considered unacceptable.

As discussed within Section 2.1.10, *Traffic and Transportation/Pedestrian and Bicycle Facilities,* of the Draft EIR/EA, the traffic analysis prepared for the project shows that, currently along northbound US 101, 17 merge segments, 12 diverge segments, 18 weaving segments, and 17 basic segments operate at LOS E or worse during AM or PM peak hours. Along southbound US 101, 23 merge segments, 12 diverge segments, 18 weaving segments, and 24 basic segments operate at LOS E or worse during AM or PM peak hours. Of the 142 intersections studied, 32 intersections fail to meet the LOS standard under existing conditions in the AM or PM peak hours.

Under the No-Build Alternative, the proposed project would not be built, and conditions would be anticipated to deteriorate. Therefore, the No-Build Alternative would result in unacceptable operational conditions when considering future growth and projected increased traffic demands.

3. After reasonable mitigation, still causes:

- **Severe social, economic, or environmental impacts;**
- **Severe disruption to established communities;**
- **Severe environmental justice impacts; or**
- **Severe impacts on other federally protected resources.**

Because no construction would occur under the No-Build Alternative, no Section 4(f) use of the resource, Adolfo Camarillo Heritage Grove, would occur. The No-Build Alternative also would not cause any severe impacts to other environmental resources. Therefore, the factors regarding reasonable mitigation do not apply to the No-Build Alternative because no avoidance, minimization, and/or mitigation measures are proposed.

4. Result in additional construction, maintenance, or operational costs of an extraordinary magnitude?

Because no construction would occur, the maintenance and operational costs of the No-Build Alternative would not be applicable.

5. Cause other unique problems or unusual factors?

There are no unique or unusual factors associated with the No-Build Alternative because the alternative would not result in construction. However, the No-Build Alternative would not accommodate projected growth within the region, leading to the alternative not meeting the purpose and need of the project.

6. Involve multiple factors, listed above, that, although individually minor, cumulatively cause unique problems or impacts of extraordinary magnitude?

US 101 serves as the main throughfare for the movement of both goods and commuters throughout the region. Future projected growth and traffic volumes, as stated above, would lead to inefficient traffic operations under the No-Build Alternative and result in a lack of vehicle throughput within the region. This lack of vehicle throughput could result in problems of an extraordinary magnitude in the future, including significant traffic delays from a decrease in trip reliability, below-standard traffic operations, and interruptions in goods movement.

In summary, the No-Build Alternative has the following deficiencies, which make it not prudent:

- The existing configuration or the no-build condition has insufficient capacity on US 101 to accommodate existing travel demands, with several areas along the corridor currently operating at oversaturated conditions.
- Northbound direction has 23 of 63 segments with collision rates that exceed the statewide average and consist primarily of congestion-related events.
- Southbound direction has 21 of 63 segments with collision rates that exceed the statewide average and consist primarily of congestion-related events.
- 128 ramps were evaluated, with 44 southbound and 39 northbound ramps having collision rates that exceed the statewide average and again are largely congestion-related due to stop-and-go conditions.
- Proposed improvements are anticipated to reduce collisions along the corridor through capacity-increasing features (new HOV/express bus lane in each direction and added auxiliary lanes) in an effort to improve operations and reduce the amount of stop-and-go traffic. This benefit will not be achieved under the no-build conditions.
- It is anticipated that the proposed improvements will reduce the intensity of congestion along the corridor with the implementation of an HOV/express bus lane in each direction. This benefit will not be achieved under the no-build conditions.
- The project condition for Build Alternatives 2 and 3 shows the US 101 carrying more vehicles and people compared to the project conditions of the No-Build alternative.

- Overall, Build Alternatives 2 and 3 are anticipated to reduce travel time, mitigate or eliminate bottlenecks, and increase travel time reliability.

Feasibility

An assessment of engineering feasibility would not apply with this alternative. The No-Build Alternative would not result in any construction, and existing US 101 conditions within the project area would remain.

Prudent and Feasibility Conclusion

Given the above analysis, the No-Build Alternative would not address the factors of the prudency evaluation. The No-Build Alternative would not meet the purpose and need of the project, resulting in future degradation of traffic operations by maintaining existing conditions, which do not support forecast growth within the region. Therefore, the No-Build Alternative is not anticipated to be prudent.

A.5.1.4 Measures to Minimize Harm to the Section 4(f) Property – Adolfo Camarillo Heritage Grove

Resolutions for minimizing the undertaking's potential for adverse effects on the Adolfo Camarillo Heritage Grove would be outlined in a project-specific memorandum of agreement (MOA). The following project-specific measures are examples of measures that may be included in the MOA under the *Treatment of Historic Properties* stipulation. Consultation under Section 106 regarding the resolution of adverse effects would continue with participating organizations through development of the MOA. The MOA would be completed and approved prior to the Final Section 4(f) Evaluation, and the text below would be updated as applicable.

- Replacement of every tree removed for construction of the proposed project, on axis with the existing trees.
- Preparation of an arborist report of the Adolfo Camarillo Heritage Grove, to include a framework for long-term treatment, maintenance, and protection; a feasibility assessment for deep-root irrigation; and a maintenance plan including a historic preservation component to guide the City of Camarillo and Caltrans to ensure the historic property's continued integrity.
- Completion of an update to the existing National Register of Historic Places nomination for the Camarillo Ranch property to include the Adolfo Camarillo Heritage Grove.
- Development of a print-on-demand booklet, including historical information about Adolfo Camarillo and photographs of the Adolfo Camarillo Heritage Grove.
- Development of an interpretive program focused on Adolfo Camarillo, the Adolfo Camarillo Heritage Grove, and the history of Camarillo during the period of significance, including, but not limited to:

- An ArcGIS Story Map or educational website to cover the history of Camarillo, Camarillo Ranch, the Adolfo Camarillo Heritage Grove and its change over time; and
- Interpretive panel(s) along the bike path through the Adolfo Camarillo Heritage Grove, to include information regarding Adolfo Camarillo, the Adolfo Camarillo Heritage Grove, and its connection to Camarillo Ranch.

A.5.1.5 Coordination – Adolfo Camarillo Heritage Grove

Coordination with the officials with jurisdiction over the property is ongoing. Currently, Caltrans is coordinating with the SHPO (agency with jurisdiction) on the Finding of Effect determination for this property. Documentation, coordination, and agreements would be included within the final Section 4(f) evaluation.

Section A.6 contains information regarding least overall harm analysis.

A.6 LEAST OVERALL HARM ANALYSIS

After circulation of the draft environmental document, if it is determined that there is no feasible and prudent alternative that completely avoids Section 4(f) properties, pursuant to 23 CFR 774.3(c), and there is more than one build alternative still under consideration, the alternative that causes the least overall harm in light of the statute's preservation purpose must be chosen. This alternative would be determined by balancing the following factors:

- Ability to mitigate adverse impacts on each Section 4(f) resource.
- The relative severity of the remaining harm, after mitigation, to the protected activities, attributes, or features that qualify each Section 4(f) resource for protection.
- The relative significance of each Section 4(f) resource.
- The views of the officials with jurisdiction over each Section 4(f) resource.
- The degree to which each alternative meets the purpose and need for the project.
- After reasonable mitigation, the magnitude of any adverse impacts on resources not protected by Section 4(f).
- Substantial differences in costs among alternatives.

Input from agencies (officials with jurisdiction) and members of the public are important to a least overall harm analysis. If needed, the analysis will be included in the Final Section 4(f), incorporating input resulting from circulation of the draft environmental document.

A.7 PROPOSED SECTION 4(F) *DE MINIMIS* FINDINGS

This section of the document discusses the *de minimis* impact determination under Section 4(f). Section 6009(a) of the Safe, Accountable, Flexible, Efficient Transportation Equity Act amended Section 4(f) legislation at 23 USC 138 and 49 USC 303 to simplify the processing and approval of projects that have only *de minimis* impacts on lands protected by Section 4(f). This amendment provides that once USDOT determines that a transportation use of Section 4(f) property, after consideration of any impact avoidance, minimization, and mitigation or enhancement measures, results in a *de minimis* impact on that property, an analysis of avoidance alternatives is not required, and the Section 4(f) evaluation process is complete. FHWA's final rule on Section 4(f) *de minimis* findings is codified in 23 CFR 774.3 and CFR 774.17.

Responsibility for compliance with Section 4(f) has been assigned to Caltrans pursuant to 23 USC 326 and 327, including *de minimis* impact determinations, as well as coordination with those agencies that have jurisdiction over a Section 4(f) resource that may be affected by a project action.

If it is determined that there would be a "use" of a property or properties protected by Section 4(f), that "use" would be *de minimis* if it meets the following definitions (23 CFR 774.17) of *de minimis* impacts:

- *De minimis* impacts on publicly owned parks, recreational areas, and wildlife and waterfowl refuges are defined as those that do not adversely affect the activities, features, and attributes of the Section 4(f) property.
    - The *de minimis* finding considers avoidance, minimization, compensation, and/or enhancement measures addressing the project impacts on the Section 4(f) property.
    - Following an opportunity for public review and comment, the official(s) with jurisdiction over the property must provide written concurrence on the determination that project effects on the Section 4(f) property are *de minimis*. Caltrans, as assigned by FHWA, makes the final determination on the *de minimis* finding.
- *De minimis* impacts on historic sites are defined as the determination of either "No Adverse Effect" or "No Historic Properties Impacted," in compliance with Section 106 regulations, including the SHPO's and the Advisory Council on Historic Preservation's written concurrence, when applicable.

Under the Section 106 Programmatic Agreement (Caltrans 2014), Caltrans must inform the SHPO in writing that a non-response for the purposes of a "No Adverse Effect" or a "No Historic Properties Affected" determination will be treated as written concurrence for the *de minimis* determination. Caltrans, as assigned by FHWA, makes the final determination on the *de minimis* finding.

The Section 4(f) properties listed below would be directly affected by the proposed project, resulting in permanent incorporation into a transportation facility and/or

temporary occupancy during construction. In each of these cases, use of property does not adversely affect the activities, features, or attributes of the Section 4(f) property. Therefore, a proposed *de minimis* finding for each of these Section 4(f) property impacts is outlined in this chapter.

- Camarillo Grove Park (publicly owned park)
- Los Robles Greens Golf Course (publicly owned golf course)
- Walnut Grove Park (publicly owned park)
- Firestone Tire and Service Station (historic resource)

A.7.1 Camarillo Grove Park

A.7.1.1 Description of Property – Camarillo Grove Park

Camarillo Grove Park is a 24.6-acre public park near the base of the Conejo Grade in the city of Camarillo. The park is owned and managed by a special district, the Pleasant Valley Recreation and Park District. The south end of the park abuts US 101. The park has a terrain differential of approximately 600 feet between the entrance and its high point.

Amenities within this park include a nature center, hiking trails, a dog park, covered picnic shelters, restrooms, picnic tables, barbecue grills, group picnic areas, playground equipment, and horseshoe pits, all of which are located on the north side.

The entrance to Camarillo Grove Park is off Camarillo Springs Road and US 101, which is approximately 0.6 mile north of the park. The parking lot is close to the entrance. The park is open each day from dawn to dusk.

See Figure A-5 for the layout of park facilities.

A.7.1.2 Section 4(f) Use – Camarillo Grove Park

Permanent Use

Build Alternative 2 **would not** result in permanent use of Camarillo Grove Park. No land from the park would be permanently incorporated into the project under Build Alternative 2.

Build Alternative 3 would require permanent acquisition of approximately 5,049 square feet of natural open space at Camarillo Grove Park, resulting in Permanent Use. The section of the property that would be acquired is adjacent to US 101. The rugged terrain has no recreational features and is at a higher elevation compared to the rest of the park. The recreational features of the park, such as its interpretive center and trails, are located away from this section. This partial acquisition of a Section 4(f) property would

result in permanent incorporation under Section 4(f). No full acquisition of a parcel belonging to the Pleasant Valley Recreation and Park District or Camarillo Grove Park itself would occur as a result of the project.

Temporary Use

Under the proposed project, a TCE of approximately 2,939 square feet would be required for Build Alternative 2, and Build Alternative 3 would require a TCE of approximately 6,723 square feet adjacent to the freeway. Build Alternative 3 would require a larger TCE area because the median shoulder width in this section of the project alignment adjacent to the Camarillo Grove Park is designed to be 20 feet to provide sight distance. In comparison, under Build Alternative 2, the median shoulder width is designed to be 10 feet with nonstandard sight distance, resulting in a smaller TCE area. These TCEs would meet the criteria to qualify for *de minimis*.

The facilities and amenities of Camarillo Grove Park are concentrated on the north side of the park. The areas with the partial acquisition and TCEs for both build alternatives would occur near the south end of the park, which is adjacent to the freeway. Although hiking trails extend toward the south side of the park, the closest project activities would occur 150 feet away from the southernmost trail. For both Build Alternatives 2 and 3, all access to the trails would remain, and no closures would occur. Table A-4 provides a summary of potential uses for Camarillo Grove Park under Build Alternatives 2 and 3.

Table A-4. Summary of Potential Uses for Camarillo Grove Park under Build Alternatives 2 and 3

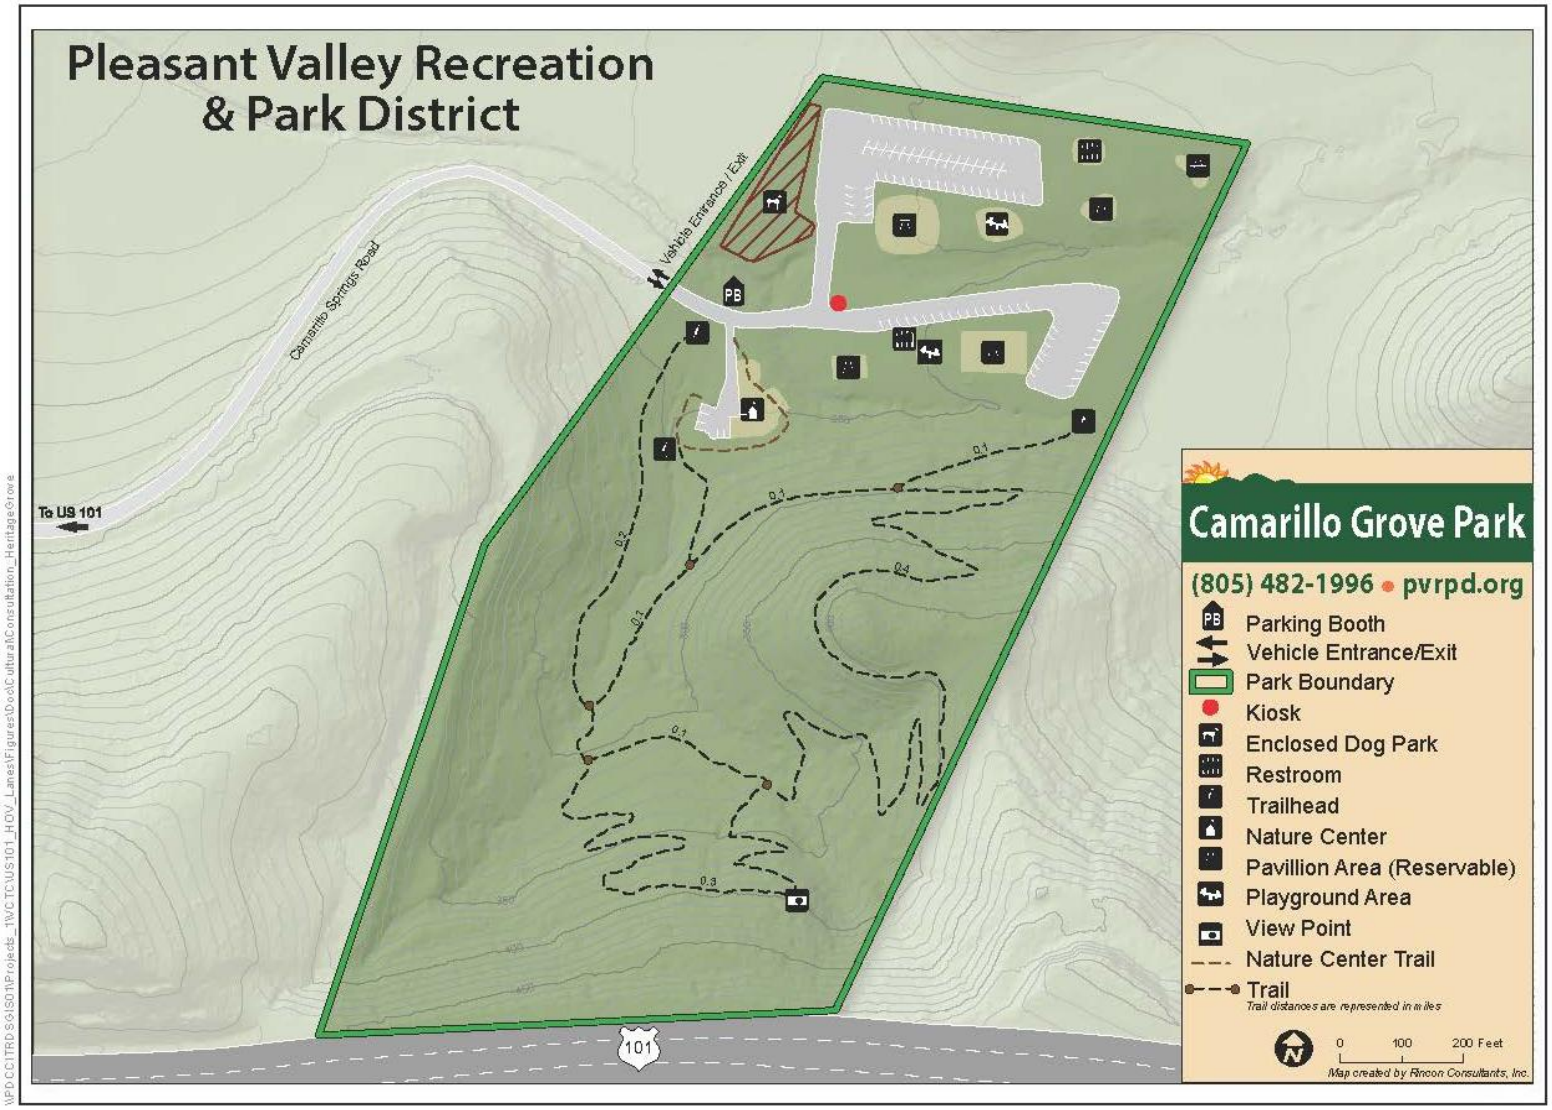
Impact Type	Build Alternative 2	Build Alternative 3
Permanent Incorporation	None.	Would require approximately 5,049 square feet of land from the park, which would be permanently incorporated into the project.
Temporary Use Resulting in Use	Would require 2,939-square-foot TCE	Would require 6,723-square-foot TCE.
Facilities, Functions, and/or Activities Affected	None. The recreational areas of the park are away from the area required for TCEs.	None. The recreational areas of the park are located away from the area being considered for acquisition and TCEs.
Accessibility	No change. The sole entrance to Camarillo Grove Park is off Camarillo Springs Rd, which is approximately 0.6 mile north of the park. The parking lot is located toward the north end of the park, approximately 900 feet away from project activities within the park.	No change. The sole entrance to Camarillo Grove Park is off Camarillo Springs Rd, which is approximately 0.6 mile north of the park. The parking lot is located toward the north end of the park, approximately 900 feet away from project activities within the park.

Impact Type	Build Alternative 2	Build Alternative 3
Visual	No change.	Minor change. The freeway mainline would move closer to the park. No vertical structures would be constructed in the vicinity of the park. As such, the value of views toward the freeway is not high.
Air Quality	Temporary exhaust and dust during construction.	Temporary exhaust and dust during construction.
Noise and Vibration	Temporary intermittent increase in noise and vibration during construction. No perceptible change under operational conditions.	Temporary intermittent increase in noise and vibration during construction. No perceptible change under operational conditions.

Rd = road; TCE = temporary construction easement

This page intentionally left blank.

Figure A-5. Camarillo Grove Park Layout



This page intentionally left blank.

A.7.1.3 Proposed De Minimis Finding – Camarillo Grove Park

For Build Alternative 2, a *de minimis* impact finding is proposed, based on the following:

Build Alternative 2 would require a temporary construction easement (TCE) of 2,939 square feet in the southern area of the park. The temporary use would not adversely affect any of the park's key activities, features, and attributes since the improved features of the park are in the northern portion of the park.

For Build Alternative 3, a *de minimis* impact finding is proposed, based on the following:

The project would convert a portion of this Section 4(f) property near the southern portion of the park adjacent to US 101, which is not used for recreational purposes. Permanent acquisition (approximately 5,049 square feet), under Build Alternative 3, of this non-recreational portion of the park to accommodate a transportation use would not adversely affect the activities, features, or attributes of the park that qualify the property for protection under Section 4(f). No facilities would be displaced; the portion to be permanently acquired under Build Alternative 3 is in an undeveloped portion of the park. The use would not result in a change in functionality for the remainder of the park. Permanent acquisition would not affect any existing trails, viewsheds, access, or parking. Construction of Build Alternative 3 would require temporary use of 5,049 square feet. The use would be for a short duration, and the area would be restored to the condition it was in before construction.

Provided concurrence is obtained from the Pleasant Valley Recreation and Parks District (official with jurisdiction over this resource), the impacts on this Section 4(f) resource are expected to be potentially *de minimis* under both Build Alternatives 2 and 3.

A.7.1.4 Measures to Minimize Harm to the Section 4(f) Property – Camarillo Grove Park

Although the proposed *de minimis* findings for this property are not contingent on providing avoidance, minimization, and/or mitigation, the measures listed below are proposed to avoid and minimize impacts on Camarillo Grove Park. Upon further coordination with Pleasant Valley Recreation and Park District (official with jurisdiction), additional measures may be identified in collaboration with VCTC (project sponsor) and Caltrans (as assigned by FHWA). The appropriate strategies would be identified and incorporated into the project.

AQ-1: The contractor will adhere to Caltrans Standard Specifications for construction (Section 14-9.02) and nonstandard Special Provision (nSSP) 14-9.05, which require the contractor to comply with all applicable laws and regulations related to air quality, including air pollution control district and air quality management district regulations and local ordinances.

AQ-2: All trucks that are to haul excavated or graded material on site will comply with State Vehicle Code Section 23114, with special attention to Sections 23114(b)(F), (e)(2), and (e)(4), as amended, regarding the prevention of such material spilling onto public streets and roads.

AQ-3: Project grading plans will show the duration of construction. Ozone precursor emissions from construction equipment vehicles will be controlled by maintaining equipment engines in good condition and in proper tune per manufacturers' specifications.

AQ-4: During clearing, grading, earthmoving, or excavation operations, fugitive dust emissions will be controlled by regular watering or other dust preventive measures using the following procedures, as specified in VCAPCD Rule 55. All material excavated or graded will be sufficiently watered to prevent excessive amounts of dust. Watering will occur at least twice daily with complete coverage, preferably in the late morning and after work is done for the day. All material transported on site or off site will be either sufficiently watered or securely covered to prevent excessive amounts of dust. The areas disturbed by clearing, grading, earthmoving, or excavation operations will be minimized so as to prevent excessive amounts of dust. These control techniques will be indicated in project specifications. Visible dust beyond the property line emanating from the project will be prevented to the maximum extent feasible.

N-1: Sound control will conform to the provisions in Section 14-8.02, Noise Control, of the Caltrans Standard Specifications. According to requirements of these specifications, construction noise cannot exceed 86 dBA L_{max} at 50 feet from the job site activities from 9:00 p.m. to 6:00 a.m.

N-2: The following are control measures that will be implemented to minimize noise disturbances at sensitive areas during construction:

- All equipment will have sound-control devices no less effective than those provided on the original equipment. Each internal combustion engine used for any purpose on the job or related to the job will be equipped with a muffler of a type recommended by the manufacturer. No internal combustion engine will be operated on the job site without an appropriate muffler.
- Construction methods or equipment that will provide the lowest level of noise impact will be used.
- Idling equipment will be turned off.
- Truck loading, unloading, and hauling operations will be restricted so that noise and vibration are kept to a minimum through residential neighborhoods to the greatest possible extent.
- Construction activities will be coordinated to build recommended permanent soundwalls during the first phase of construction to protect sensitive receptors from subsequent construction noise, dust, light, glare, and other impacts to the extent feasible.

- Where feasible, temporary soundwalls will be used and relocated, as needed, to protect sensitive receptors against excessive noise from construction activities involving large equipment and by small items such as compressors, generators, pneumatic tools, and jackhammers. Soundwalls can be made of heavy plywood, moveable insulated sound blankets, or other best available control techniques.
- Construction activities will be minimized in residential areas during evening, nighttime, weekend, and holiday periods. Noise impacts are typically minimized when construction activities are performed during daytime hours; however, nighttime construction may be desirable (e.g., in commercial areas where businesses may be disrupted during daytime hours) or necessary to avoid major traffic disruption. Coordination with each city will occur before construction can be performed in noise-sensitive areas.
- Construction lay-down or staging areas will be selected in industrially zoned districts. If industrially zoned areas are not available, then commercially zoned areas may be used or locations that are at least 100 feet from any noise-sensitive land use (e.g., residences).

N-3: The following are procedures that will be used to minimize the potential impacts from construction vibration:

- The hours of vibration-intensive equipment or activities such as vibratory rollers will be restricted so that impacts on residents are minimal (e.g., weekdays during daytime hours only, when as many residents as possible are away from home).
- The owner of a building that is close to a construction vibration source with the potential to cause damage to a structure is entitled to a preconstruction building inspection to document the preconstruction condition of that structure.
- Vibration monitoring will be conducted during vibration-intensive activities, such as the use of vibratory compaction rollers, demolition, or pavement breaking.

LU-1: During final design, efforts will be undertaken to minimize construction and operational impacts on existing and planned land uses.

LU-2: The contractor will ensure that the areas acquired for TCEs will be restored to their original conditions or similar conditions where feasible.

A.7.1.5 Coordination – Camarillo Grove Park

Coordination efforts were conducted with the Pleasant Valley Recreation and Park District to discuss the project plans and partial property acquisition at the Camarillo Grove Park. A letter was sent on January 15, 2024, to the Pleasant Valley Recreation and Park District to request a meeting. A virtual conference call was held with the Pleasant Valley Recreation and Park District on January 29, 2025. The letter and virtual conference call included discussions of the need for replacement land to account for the anticipated partial acquisition of park land. An in-person meeting with the Pleasant Valley Recreation and Park District was held on July 1, 2026 to discuss potential viable replacement property options.

Under Section 4(f), a letter requesting concurrence with the *de minimis* finding would be sent to the Pleasant Valley Recreation and Park District after public circulation of the Draft EIR/EA. Documentation of coordination and letters of concurrence would be included within the final Section 4(f) evaluation.

A.7.2 Los Robles Greens Golf Course

A.7.2.1 Description of Property – Los Robles Greens Golf Course

Los Robles Greens Golf Course, located at 299 S Moorpark Road in Thousand Oaks, is owned by the City of Thousand Oaks and operated by a private operator. The par-70, 6,300-yard golf course with championship layout has an array of amenities, including an 8-acre practice facility, a world-class golf shop, and a 22,000-square-foot clubhouse.

A.7.2.2 Section 4(f) Use – Los Robles Greens Golf Course

Permanent Use

No land from the golf course would be incorporated into the project under either Build Alternative 2 or 3. Therefore, no permanent use under Section 4(f) would occur.

Temporary Use

A TCE for 5,180 square feet for Build Alternatives 2 and 3 would meet the requirements for *de minimis*. Build Alternatives 2 and 3 would require the TCE for access for the construction crew. Build Alternatives 2 and 3 would not result in any change in ownership at this location. The TCE would be required for less than 6 months, which is much shorter than the period of construction for the project.

The area of the golf course where the TCE is proposed is not used for golfing; the area includes a buffer zone between the golf course and US 101. The area does have mature trees, but they would not be removed by construction activities. Construction of a soundwall at this location would offer noise reduction benefits for users of the golf course.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, and material stockpiles. This would disturb the golf course's existing aesthetic to a minor degree because construction may be partially visible from some parts of the golf course. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape. Therefore, the minor visual changes associated with Build Alternatives 2 and 3 would occur only during construction and only for a short period. Any increase in noise or vibration, or fugitive dust, during construction would be temporary and intermittent. Noise levels during construction are not anticipated to be high enough that they would

interfere with golfers' ability to play and communicate. Dust would be controlled as set forth in **AQ-4.** Other facilities at the golf course, such as the driving range, practice greens, and clubhouse, would remain unaffected by construction. No change in access or parking at the golf course would occur. The area would be restored to its existing condition. Any removed fencing would be re-installed and disturbed vegetation replanted.

A.7.2.3 Proposed De Minimis Finding – Los Robles Greens Golf Course

For Build Alternatives 2 and 3, a *de minimis* impact finding is proposed, based on the following:

Build Alternatives 2 and 3 would require a TCE of 5,180 square feet in the southern area of the park. The temporary use would not adversely affect any of the park's key activities, features, and attributes since the improved features of the park are in the northern portion of the park.

The area of the golf course where the TCE is proposed is not used for golfing; the area includes a buffer zone between the golf course and US 101. The area does have mature trees, but they would not be removed by construction activities. Construction of a soundwall at this location would offer noise reduction benefits for users of the golf course.

Other facilities at the golf course, such as the driving range, practice greens, and clubhouse, would remain unaffected by construction. No change in access or parking at the golf course would occur. The area would be restored to its existing condition. Any removed fencing would be re-installed and disturbed vegetation replanted.

Provided concurrence is obtained from the City of Thousand Oaks (official with jurisdiction over this resource), the impacts on this Section 4(f) resource are expected to be potentially *de minimis* under both Build Alternatives 2 and 3.

A.7.2.4 Measures to Minimize Harm to the Section 4(f) Property – Los Robles Greens Golf Course

Although the proposed *de minimis* findings for this property are not contingent on providing avoidance, minimization, and/or mitigation, the measures listed below are proposed to avoid and minimize impacts on Los Robles Greens Golf Course. Upon further coordination with City of Thousand Oaks (official with jurisdiction), additional measures may be identified in collaboration with VCTC (project sponsor) and Caltrans (as assigned by FHWA). The appropriate strategies would be identified and incorporated into the project.

AQ-1: The contractor will adhere to Caltrans Standard Specifications for construction (Section 14-9.02) and nonstandard Special Provision (nSSP) 14-9.05, which require the

contractor to comply with all applicable laws and regulations related to air quality, including air pollution control district and air quality management district regulations and local ordinances.

AQ-2: All trucks that are to haul excavated or graded material on site will comply with State Vehicle Code Section 23114, with special attention to Sections 23114(b)(F), (e)(2), and (e)(4), as amended, regarding the prevention of such material spilling onto public streets and roads.

AQ-3: Project grading plans will show the duration of construction. Ozone precursor emissions from construction equipment vehicles will be controlled by maintaining equipment engines in good condition and in proper tune per manufacturers' specifications.

AQ-4: During clearing, grading, earthmoving, or excavation operations, fugitive dust emissions will be controlled by regular watering or other dust preventive measures using the following procedures, as specified in VCAPCD Rule 55. All material excavated or graded will be sufficiently watered to prevent excessive amounts of dust. Watering will occur at least twice daily with complete coverage, preferably in the late morning and after work is done for the day. All material transported on site or off site will be either sufficiently watered or securely covered to prevent excessive amounts of dust. The areas disturbed by clearing, grading, earthmoving, or excavation operations will be minimized so as to prevent excessive amounts of dust. These control techniques will be indicated in project specifications. Visible dust beyond the property line emanating from the project will be prevented to the maximum extent feasible.

N-1: Sound control will conform to the provisions in Section 14-8.02, Noise Control, of the Caltrans Standard Specifications. According to requirements of these specifications, construction noise cannot exceed 86 dBA L_{max} at 50 feet from the job site activities from 9:00 p.m. to 6:00 a.m.

N-2: The following are control measures that will be implemented to minimize noise disturbances at sensitive areas during construction:

- All equipment will have sound-control devices no less effective than those provided on the original equipment. Each internal combustion engine used for any purpose on the job or related to the job will be equipped with a muffler of a type recommended by the manufacturer. No internal combustion engine will be operated on the job site without an appropriate muffler.
- Construction methods or equipment that will provide the lowest level of noise impact will be used.
- Idling equipment will be turned off.
- Truck loading, unloading, and hauling operations will be restricted so that noise and vibration are kept to a minimum through residential neighborhoods to the greatest possible extent.

- Construction activities will be coordinated to build recommended permanent soundwalls during the first phase of construction to protect sensitive receptors from subsequent construction noise, dust, light, glare, and other impacts to the extent feasible.
- Where feasible, temporary soundwalls will be used and relocated, as needed, to protect sensitive receptors against excessive noise from construction activities involving large equipment and by small items such as compressors, generators, pneumatic tools, and jackhammers. Soundwalls can be made of heavy plywood, moveable insulated sound blankets, or other best available control techniques.
- Construction activities will be minimized in residential areas during evening, nighttime, weekend, and holiday periods. Noise impacts are typically minimized when construction activities are performed during daytime hours; however, nighttime construction may be desirable (e.g., in commercial areas where businesses may be disrupted during daytime hours) or necessary to avoid major traffic disruption. Coordination with each city will occur before construction can be performed in noise-sensitive areas.
- Construction lay-down or staging areas will be selected in industrially zoned districts. If industrially zoned areas are not available, then commercially zoned areas may be used or locations that are at least 100 feet from any noise-sensitive land use (e.g., residences).

N-3: The following are procedures that will be used to minimize the potential impacts from construction vibration:

- The hours of vibration-intensive equipment or activities such as vibratory rollers will be restricted so that impacts on residents are minimal (e.g., weekdays during daytime hours only, when as many residents as possible are away from home).
- The owner of a building that is close to a construction vibration source with the potential to cause damage to a structure is entitled to a preconstruction building inspection to document the preconstruction condition of that structure.
- Vibration monitoring will be conducted during vibration-intensive activities, such as the use of vibratory compaction rollers, demolition, or pavement breaking.

LU-1: During final design, efforts will be undertaken to minimize construction and operational impacts on existing and planned land uses.

LU-2: The contractor will ensure that the areas acquired for TCEs will be restored to their original conditions or similar conditions where feasible.

A.7.2.5 Coordination – Los Robles Greens Golf Course

Under Section 4(f), a letter requesting concurrence with the *de minimis* finding would be sent to the City of Thousand Oaks after public circulation of the Draft EIR/EA.

Documentation of coordination and letters of concurrence would be included within the final Section 4(f) evaluation.

A.7.3 Walnut Grove Park

A.7.3.1 Description of Property – Walnut Grove Park

Located between US 101 and Newbury Road, Walnut Grove Park (400 Windtree Avenue in Thousand Oaks) is a 6.5-acre community park that was opened by the Conejo Recreation and Park District in 1994. The park consists of backstops, an outdoor handball court, children's playground, dog park, barbeque grills, outdoor basketball courts, and a 0.21-mile recreational walking path.

A.7.3.2 Section 4(f) Use – Walnut Grove Park

Permanent Use

No land from the park would be incorporated into the project under either Build Alternative 2 or 3. Therefore, no permanent use under Section 4(f) would occur.

Temporary Use

Build Alternatives 2 and 3 would require a TCE of 5,500 square feet in the northern portions of the park on two parcels (212 square feet from APN 682-022-101 and 5,288 square feet from APN 682-025-002). The TCE is required for access for the construction crew and would meet the requirements for *de minimis*. Build Alternatives 2 and 3 would not result in any change in ownership at this location. The TCE would be required for less than 6 months, which is much shorter than the period of construction for the project.

The TCE area is in the northern portions of the park, adjacent to the freeway and away from the park's amenities, which are concentrated to the south of the TCE area. Although a recreational walking path is adjacent to the TCE area, all access to the walking path would remain, and no closure would occur. The TCE area would be used for a short duration, and the area would be restored to its existing condition.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, and material stockpiles. This would disturb the park's existing aesthetic to a minor degree because construction may be partially visible from some parts of the park. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape. Therefore, the minor visual changes associated with Build Alternatives 2 and 3 would occur only during construction and only for a short period. Any increase in noise or vibration, or fugitive dust, during construction would be temporary and intermittent.

Other amenities at the park in addition to the recreational walking path, such as the backstops, outdoor handball court, children's playground, dog park, barbeque grills, and outdoor basketball courts, would remain unaffected by construction. No change in access would occur. The area would be restored to its existing condition. Any removed fencing would be re-installed and disturbed vegetation replanted.

A.7.3.3 Proposed De Minimis Finding – Walnut Grove Park

For Build Alternatives 2 and 3, a *de minimis* impact finding is proposed, based on the following:

Build Alternatives 2 and 3 would require a TCE of 5,500 square feet in the northern portions of the park on two parcels (212 square feet from APN 682-022-101 and 5,288 square feet from APN 682-025-002). The TCE is required for access for the construction crew and would be used for a short duration of less than 6 months. Although a recreational walking path is adjacent to the TCE area, all access to the walking path would remain, and no closure would occur. The temporary use would not adversely affect any of the park's key activities, features, and attributes since the improved features of the park are south of the TCE area.

The area of the park where the TCE is proposed is not used for recreational activities; the area includes a buffer zone between the park and US 101. The area does have mature trees and other vegetation. Other amenities at the park in addition to the recreational walking path, such as the backstops, outdoor handball court, children's playground, dog park, barbeque grills, and outdoor basketball courts, would remain unaffected by construction. No change in access would occur. The area would be restored to its existing condition. Any removed fencing would be re-installed and disturbed vegetation replanted.

Provided concurrence is obtained from the Conejo Recreation and Park District (official with jurisdiction over this resource), the impacts on this Section 4(f) resource are expected to be potentially *de minimis* under both Build Alternatives 2 and 3.

A.7.3.4 Measures to Minimize Harm to the Section 4(f) Property – Walnut Grove Park

Although the proposed *de minimis* findings for this property are not contingent on providing avoidance, minimization, and/or mitigation, the measures listed below are proposed to avoid and minimize impacts on Walnut Grove Park. Upon further coordination with Conejo Recreation and Park District (official with jurisdiction), additional measures may be identified in collaboration with VCTC (project sponsor) and Caltrans (as assigned by FHWA). The appropriate strategies would be identified and incorporated into the project.

AQ-1: The contractor will adhere to Caltrans Standard Specifications for construction (Section 14-9.02) and nonstandard Special Provision (nSSP) 14-9.05, which require the

contractor to comply with all applicable laws and regulations related to air quality, including air pollution control district and air quality management district regulations and local ordinances.

AQ-2: All trucks that are to haul excavated or graded material on site will comply with State Vehicle Code Section 23114, with special attention to Sections 23114(b)(F), (e)(2), and (e)(4), as amended, regarding the prevention of such material spilling onto public streets and roads.

AQ-3: Project grading plans will show the duration of construction. Ozone precursor emissions from construction equipment vehicles will be controlled by maintaining equipment engines in good condition and in proper tune per manufacturers' specifications.

AQ-4: During clearing, grading, earthmoving, or excavation operations, fugitive dust emissions will be controlled by regular watering or other dust preventive measures using the following procedures, as specified in VCAPCD Rule 55. All material excavated or graded will be sufficiently watered to prevent excessive amounts of dust. Watering will occur at least twice daily with complete coverage, preferably in the late morning and after work is done for the day. All material transported on site or off site will be either sufficiently watered or securely covered to prevent excessive amounts of dust. The areas disturbed by clearing, grading, earthmoving, or excavation operations will be minimized so as to prevent excessive amounts of dust. These control techniques will be indicated in project specifications. Visible dust beyond the property line emanating from the project will be prevented to the maximum extent feasible.

N-1: Sound control will conform to the provisions in Section 14-8.02, Noise Control, of the Caltrans Standard Specifications. According to requirements of these specifications, construction noise cannot exceed 86 dBA L_{max} at 50 feet from the job site activities from 9:00 p.m. to 6:00 a.m.

N-2: The following are control measures that will be implemented to minimize noise disturbances at sensitive areas during construction:

- All equipment will have sound-control devices no less effective than those provided on the original equipment. Each internal combustion engine used for any purpose on the job or related to the job will be equipped with a muffler of a type recommended by the manufacturer. No internal combustion engine will be operated on the job site without an appropriate muffler.
- Construction methods or equipment that will provide the lowest level of noise impact will be used.
- Idling equipment will be turned off.
- Truck loading, unloading, and hauling operations will be restricted so that noise and vibration are kept to a minimum through residential neighborhoods to the greatest possible extent.

- Construction activities will be coordinated to build recommended permanent soundwalls during the first phase of construction to protect sensitive receptors from subsequent construction noise, dust, light, glare, and other impacts to the extent feasible.
- Where feasible, temporary soundwalls will be used and relocated, as needed, to protect sensitive receptors against excessive noise from construction activities involving large equipment and by small items such as compressors, generators, pneumatic tools, and jackhammers. Soundwalls can be made of heavy plywood, moveable insulated sound blankets, or other best available control techniques.
- Construction activities will be minimized in residential areas during evening, nighttime, weekend, and holiday periods. Noise impacts are typically minimized when construction activities are performed during daytime hours; however, nighttime construction may be desirable (e.g., in commercial areas where businesses may be disrupted during daytime hours) or necessary to avoid major traffic disruption. Coordination with each city will occur before construction can be performed in noise-sensitive areas.
- Construction lay-down or staging areas will be selected in industrially zoned districts. If industrially zoned areas are not available, then commercially zoned areas may be used or locations that are at least 100 feet from any noise-sensitive land use (e.g., residences).

N-3: The following are procedures that will be used to minimize the potential impacts from construction vibration:

- The hours of vibration-intensive equipment or activities such as vibratory rollers will be restricted so that impacts on residents are minimal (e.g., weekdays during daytime hours only, when as many residents as possible are away from home).
- The owner of a building that is close to a construction vibration source with the potential to cause damage to a structure is entitled to a preconstruction building inspection to document the preconstruction condition of that structure.
- Vibration monitoring will be conducted during vibration-intensive activities, such as the use of vibratory compaction rollers, demolition, or pavement breaking.

LU-1: During final design, efforts will be undertaken to minimize construction and operational impacts on existing and planned land uses.

LU-2: The contractor will ensure that the areas acquired for TCEs will be restored to their original conditions or similar conditions where feasible.

A.7.3.5 Coordination – Walnut Grove Park

Under Section 4(f), a letter requesting concurrence with the *de minimis* finding would be sent to the Conejo Recreation and Parks District after public circulation of the Draft EIR/EA. Documentation of coordination and letters of concurrence would be included within the final Section 4(f) evaluation.

A.7.4 Firestone Tire and Service Station

A.7.4.1 Description of Property – Firestone Tire and Service Station

The Firestone Tire and Service Station is a privately owned, one-and-a-half-story building from 1929. Designed in the Art Deco architectural style by local Ventura County master architect Harold E. Burket, it is NRHP/CRHR eligible as an excellent example of Art Deco/PWA (WPA) Moderne architecture and of Burkert's work. SHPO concurred with this evaluation on July 18, 2024.

A.7.4.2 Section 4(f) Use – Firestone Tire and Service Station

Permanent Use

No land from the resource would be permanently incorporated into the project.

Temporary Use

Build Alternatives 2 and 3 both propose a TCE of approximately 117 square feet in the southern portion of the parcel, within the historic property's boundary. The TCE is needed to construct a soundwall located approximately 12.5 feet from the historic property boundary and approximately 43 feet from the building's south elevation. Construction equipment would be temporarily staged and operated within the TCE area and directly adjacent to the property's rear boundary. The proposed soundwall would be installed within the Caltrans ROW, outside of the historic property's boundary. In addition, construction staging and access, and grading and striping would also occur within the Caltrans ROW. Construction of the soundwall would not result in any temporary or permanent physical changes to the Firestone Tire and Service Station building; the TCE would not destroy or damage the property's character-defining features.

There would be no change to the character of the Firestone Tire and Service Station's use; the property would remain an automotive service station. The property's immediate setting to the south would change during construction due to the TCE and during project operation due to the new soundwall located adjacent to the rear of the property. However, the setting outside of the historic property boundary would not contribute to its significance under NRHP Criterion 3. No changes are proposed within the historic property boundary for the soundwall.

Construction activities would temporarily increase sound levels at the Firestone Tire and Service Station. However, a quiet setting is not a character-defining feature of the property, which is surrounded by high-speed vehicular traffic on US 101 and local vehicular traffic along E. Thompson Boulevard and S. California Street. Therefore, a temporary increase in noise at the building during construction would result in no

adverse effect on the historic property. Moreover, the presence of construction equipment would not diminish the integrity of the property's character-defining features, which are architectural and focused on the building's street-facing elevations and away from proposed construction areas. The area surrounding the property is urban, and the visual character of the proposed project would be compatible with the existing highway corridor. Neither a quiet setting nor specific viewsheds from the building are character-defining features of the Firestone Tire and Service Station, and construction and operation of the proposed project would not obstruct significant views of the building's character-defining, street-facing elevations or introduce new elements that would be incompatible with the property's existing setting.

Build Alternatives 2 and 3 would not alter, directly or indirectly, any of the characteristics of the Firestone Tire and Service Station that qualify it for inclusion as a historical resource or historic property in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association.

A Finding of No Adverse Effect has been prepared and is awaiting concurrence from the SHPO upon preparation of the Final EIR/EA after public circulation of the Draft EIR/EA. As described in the Finding of Effect, the proposed project would result in no adverse effect on the Firestone Tire and Service Station.

A.7.4.3 Proposed De Minimis Finding – Firestone Tire and Service Station

For Build Alternatives 2 and 3, a *de minimis* impact finding is proposed based on the following:

- A Finding of No Adverse Effect has been prepared in compliance with Section 106 regulations (pending SHPO concurrence).
- SHPO will be informed that Caltrans intends to make a *de minimis* finding based on the Finding of No Adverse Effect under Section 106 regulations.

The Finding of No Adverse Effect is supported by the following:

- No part of the Firestone Tire and Service Station would be physically destroyed or damaged. A TCE of approximately 117 square feet is proposed in the southern portion of the parcel, at the historic property's boundary. Soundwall construction would be approximately 12.5 feet from the historic property boundary and approximately 43 feet from the building's south elevation. Proposed construction of the soundwall would not result in any temporary or permanent physical changes to the Firestone Tire and Service Station building; the TCE would not destroy or damage the property's character-defining features.
- No alteration to the historic property itself is proposed that would warrant application of the Secretary of the Interior's Standards.

- The Firestone Tire and Service Station would not be removed from its historic location as a result of Build Alternatives 2 and 3.
- There would be no change to the character of the Firestone Tire and Service Station's use; the property would remain an automotive service station. The property's immediate setting to the south would change during construction due to the TCE and, following completion of the project, construction of a new soundwall to the rear of the property. However, the setting outside of the historic property boundary would not contribute to its significance under NRHP Criterion 3. No changes are proposed within the historic property boundary.
- There would be no introduction of visual, atmospheric, or audible elements that would diminish the integrity of the property's significant historic features.
- The Firestone Tire and Service Station predates construction of US 101 to the south, and, because it is architecturally significant, additional changes to the highway corridor would not affect its character-defining features. As noted above, the property's setting would not contribute to its significance under Criterion 3. The building faces north and northwest, away from US 101.
- Construction activities would temporarily increase sound levels at the Firestone Tire and Service Station. However, a quiet setting is not a character-defining feature of the property, which is surrounded by high-speed vehicular traffic on US 101 and local vehicular traffic along E. Thompson Boulevard and S. California Street. Therefore, a temporary increase in noise at the building during construction would result in no adverse effect on the historic property.
- Although construction equipment would temporarily be staged and operated directly adjacent to the property's rear boundary and within a 117-square-foot TCE at the southern boundary of the property, windows along the building's rear elevation would be west of proposed project work. The windows are raised above a standard pedestrian level, providing light and ventilation rather than viewsheds from the building. Moreover, the presence of construction equipment would not diminish the integrity of the property's character-defining features, which are architectural and focused on the building's street-facing elevations and away from proposed construction areas. The area surrounding the property is urban, and the visual character of the proposed project would be compatible with the existing highway corridor. Neither a quiet setting nor specific viewsheds from the building are character-defining features of the Firestone Tire and Service Station, and construction and operation of the proposed project would not obstructed.

A.7.4.4 Measures to Minimize Harm to the Section 4(f) Property – Firestone Tire and Service Station

Although the proposed *de minimis* findings for this property are not contingent on providing avoidance, minimization, and/or mitigation, the measures listed below are proposed to avoid and minimize impacts on Firestone Tire and Service Station. Upon further coordination with SHPO (official with jurisdiction), additional measures may be

identified in collaboration with VCTC (project sponsor) and Caltrans (as assigned by FHWA). The appropriate strategies would be identified and incorporated into the project.

AQ-1: The contractor will adhere to Caltrans Standard Specifications for construction (Section 14-9.02) and nonstandard Special Provision (nSSP) 14-9.05, which require the contractor to comply with all applicable laws and regulations related to air quality, including air pollution control district and air quality management district regulations and local ordinances.

AQ-2: All trucks that are to haul excavated or graded material on site will comply with State Vehicle Code Section 23114, with special attention to Sections 23114(b)(F), (e)(2), and (e)(4), as amended, regarding the prevention of such material spilling onto public streets and roads.

AQ-3: Project grading plans will show the duration of construction. Ozone precursor emissions from construction equipment vehicles will be controlled by maintaining equipment engines in good condition and in proper tune per manufacturers' specifications.

AQ-4: During clearing, grading, earthmoving, or excavation operations, fugitive dust emissions will be controlled by regular watering or other dust preventive measures using the following procedures, as specified in VCAPCD Rule 55. All material excavated or graded will be sufficiently watered to prevent excessive amounts of dust. Watering will occur at least twice daily with complete coverage, preferably in the late morning and after work is done for the day. All material transported on site or off site will be either sufficiently watered or securely covered to prevent excessive amounts of dust. The areas disturbed by clearing, grading, earthmoving, or excavation operations will be minimized so as to prevent excessive amounts of dust. These control techniques will be indicated in project specifications. Visible dust beyond the property line emanating from the project will be prevented to the maximum extent feasible.

N-1: Sound control will conform to the provisions in Section 14-8.02, Noise Control, of the Caltrans Standard Specifications. According to requirements of these specifications, construction noise cannot exceed 86 dBA L_{max} at 50 feet from the job site activities from 9:00 p.m. to 6:00 a.m.

N-2: The following are control measures that will be implemented to minimize noise disturbances at sensitive areas during construction:

- All equipment will have sound-control devices no less effective than those provided on the original equipment. Each internal combustion engine used for any purpose on the job or related to the job will be equipped with a muffler of a type recommended by the manufacturer. No internal combustion engine will be operated on the job site without an appropriate muffler.
- Construction methods or equipment that will provide the lowest level of noise impact will be used.

- Idling equipment will be turned off.
- Truck loading, unloading, and hauling operations will be restricted so that noise and vibration are kept to a minimum through residential neighborhoods to the greatest possible extent.
- Construction activities will be coordinated to build recommended permanent soundwalls during the first phase of construction to protect sensitive receptors from subsequent construction noise, dust, light, glare, and other impacts to the extent feasible.
- Where feasible, temporary soundwalls will be used and relocated, as needed, to protect sensitive receptors against excessive noise from construction activities involving large equipment and by small items such as compressors, generators, pneumatic tools, and jackhammers. Soundwalls can be made of heavy plywood, moveable insulated sound blankets, or other best available control techniques.
- Construction activities will be minimized in residential areas during evening, nighttime, weekend, and holiday periods. Noise impacts are typically minimized when construction activities are performed during daytime hours; however, nighttime construction may be desirable (e.g., in commercial areas where businesses may be disrupted during daytime hours) or necessary to avoid major traffic disruption. Coordination with each city will occur before construction can be performed in noise-sensitive areas.
- Construction lay-down or staging areas will be selected in industrially zoned districts. If industrially zoned areas are not available, then commercially zoned areas may be used or locations that are at least 100 feet from any noise-sensitive land use (e.g., residences).

N-3: The following are procedures that will be used to minimize the potential impacts from construction vibration:

- The hours of vibration-intensive equipment or activities such as vibratory rollers will be restricted so that impacts on residents are minimal (e.g., weekdays during daytime hours only, when as many residents as possible are away from home).
- The owner of a building that is close to a construction vibration source with the potential to cause damage to a structure is entitled to a preconstruction building inspection to document the preconstruction condition of that structure.
- Vibration monitoring will be conducted during vibration-intensive activities, such as the use of vibratory compaction rollers, demolition, or pavement breaking.

LU-1: During final design, efforts will be undertaken to minimize construction and operational impacts on existing and planned land uses.

LU-2: The contractor will ensure that the areas acquired for TCEs will be restored to their original conditions or similar conditions where feasible.

A.7.4.5 Coordination – Firestone Tire and Service Station

A Finding of No Adverse Effect has been prepared in compliance with Section 106 regulations (pending SHPO concurrence).

A.8 RESOURCES EVALUATED RELATIVE TO THE REQUIREMENTS OF SECTION 4(F): NO-USE DETERMINATIONS

Section 4(f) of the Department of Transportation Act of 1966, codified in federal law at 49 USC 303, declares that "it is the policy of the United States Government that special effort should be made to preserve the natural beauty of the countryside and public park and recreation lands, wildlife and waterfowl refuges, and historic sites."

This section of the document discusses parks, recreational facilities, wildlife refuges, and historic properties found within or next to the project area that do not trigger Section 4(f) protection because 1) they are not publicly owned, 2) they are not open to the public, 3) they are not eligible historic properties, or 4) the project would not permanently use the property and would not hinder preservation of the property.

A.8.1 Parks and Recreational Facilities

A.8.1.1 Ventura Waterfront Promenade, Surfer's Point, and Promenade Park

The City of Ventura owns and maintains the Ventura Waterfront Promenade, which includes features such as an oceanfront walkway, promenade park, and surfer's point. Beach and park facilities include a walkway, trail, restrooms, showers, a spacious lawn, and picnic tables.

No land from the waterfront promenade (including surfer's point and promenade park) would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the waterfront during construction.

Construction activities could be as close as 500 feet from the waterfront during construction. However, construction activities near the waterfront would be temporary and intermittent and would not last the entire duration of the project.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, material stockpiles, and vegetation removal. This would disturb the beach's existing aesthetic to a minor degree because construction may be partially visible from some part of the waterfront. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, the improvements to US

101 would not change the aesthetic of the resource because they would be consistent with the existing landscape. Therefore, the minor visual changes associated with Build Alternatives 2 and 3 would not substantially impair the key activities, features, or attributes and would not be considered a Section 4(f) constructive use.

Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.2 San Buenaventura State Beach

San Buenaventura State Beach consists of 2 miles of sandy beach within Ventura. San Buenaventura State Beach is accessed by taking Exit 68 off US 101 to Seaward Avenue. Facilities include the Ventura Promenade, which runs along the western end of the beach, as well as the 1,700-foot-long Ventura Pier, which is open to the public year-round. San Buenaventura State Beach also contains a playground next to the pier.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the beach during construction.

Construction activities could be as close as 50 feet from the beach during construction. However, construction activities near the beach would be temporary and intermittent and would not last the entire duration of the project.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, material stockpiles, and vegetation removal. This would disturb the beach’s existing aesthetic to a minor degree because construction may be partially visible from some part of the beach. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. The resource is currently subject to indirect air quality, noise, and vibration impacts due to its proximity to US 101. The incremental increase in impacts related to noise (2 to 3 decibels), air quality, and vibration during construction and once Build Alternatives 2 and 3 are in operation would not inhibit existing recreational functions of the resource, functions that are already subject to noise and air quality impacts.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify San Buenaventura State Beach for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.3 San Buenaventura State Beach Trail

San Buenaventura State Beach Trail is a 4.1-mile paved trail that follows the shoreline from San Buenaventura State Beach and connects to the Ojai Valley Bike Trail.

No land from the trail would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the beach trail during construction.

Construction activities could be as close as 50 feet from the trail during construction. However, construction activities near the beach would be temporary and intermittent and would not last the entire duration of the project.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, material stockpiles, and vegetation removal. This would disturb the trail's existing aesthetic to a minor degree because construction may be partially visible from some part of the trail. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. The resource is currently subject to indirect air quality, noise, and vibration impacts due to its proximity to US 101. The incremental increase in noise, air quality, and vibration impacts during construction and once Build Alternatives 2 and 3 are in operation would not inhibit existing recreational functions of the resource, functions that are already subject to noise and air quality impacts.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify San Buenaventura State Beach Trail for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no "use" would occur. The provisions of Section 4(f) do not apply.

A.8.1.4 Ocean Avenue Park

Ocean Avenue Park is a small City of Ventura–owned park at 1501 E. Ocean Avenue in Ventura. The park, located in a residential area, includes a children's play structure, basketball hoops, restrooms, picnic areas, and open grass.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 700 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Ocean Avenue Park for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no "use" would occur. The provisions of Section 4(f) do not apply.

A.8.1.5 Camino Real Park

Camino Real Park, located at Dean Drive and Varsity Street, consists of a 38-acre publicly accessible recreational complex owned by the City of Ventura. Facilities within the park include tennis courts, softball fields, youth baseball fields, basketball and sand volleyball courts, concession buildings, children's play areas, group and individual picnic facilities, and restrooms. The park also includes a dog park in the southwest corner.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 250 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise (increase of no more than 1 decibel) and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Camino Real Park for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no "use" would occur. The provisions of Section 4(f) do not apply.

A.8.1.6 Marion Cannon Park

Marion Cannon Park, located at Saratoga Avenue and Shenandoah Street, consists of a 5-acre park that is owned by the City of Ventura. Facilities include picnic tables, BBQ grills, a playground, basketball court, and open grass areas.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 900 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Marion Canyon Park for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.7 Mission Park

Mission Park, located at Main Street and Figueroa Street and owned by the City of Ventura, is an open grass area with benches and a restroom.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 800 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Mission Park for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.8 Downtown Mini Park

Downtown Mini Park, located on the 300 block of E. Main Street and owned by the City of Ventura, is an open lawn with a paved pathway.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 850 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Downtown Mini Park for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.9 Plaza Park

Plaza Park, located on Santa Clara Street and Chestnut Street, is a 3.7-acre park that is owned by the City of Ventura. Facilities include restrooms, picnic tables, a playground, and a gazebo.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 250 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise (no more than 2 decibels) and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Plaza Park for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.10 Vineyards Park

Vineyards Park, located at 2790 Smokey Mountain Drive in Oxnard, is a 7-acre park that is owned by the City of Oxnard. Facilities include picnic tables, grills, basketball courts, restrooms, and open grass areas.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 1,000 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Vineyards Park for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.11 Mel Vincent Park

Mel Vincent Park, located at 668 Calistoga Road in Camarillo, is a 5-acre park that is owned by the Pleasant Valley Recreation and Park District. Facilities include two playgrounds, fitness equipment, restrooms, basketball and sand volleyball courts, picnic areas, and open grass areas.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 675 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Mel Vincent Park for protection under Section 4(f)

would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.12 Dizdar Park

Dizdar Park, located at Ventura Boulevard and S. Glenn Drive in Camarillo, is owned by the City of Camarillo. The park contains a picnic table and swings; planned improvements at the park include a plaza, garden entry gateway, bandshell with stage, seating, restrooms, and a fire station–themed playground.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 250 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise (up to 3 decibels) and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Dizdar Park for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.13 Pleasant Valley Fields

Owned and operated by the Pleasant Valley Recreation and Park District, Pleasant Valley Fields consists of a 55-acre public park that includes 23 acres of turf for sports such as softball and soccer, along with a playground and picnic areas.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the fields during construction.

Construction activities would be more than 200 feet from the fields. It is likely that construction activities would be visible from the fields, given the proximity. During operation, improvements to US 101 would not change the aesthetic of the fields because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be typical of roadway projects. Given the active nature of the recreational activities at the fields, any increase in noise and

vibration would not impair the features or attributes that qualify the fields as a Section 4(f) resource.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Pleasant Valley Fields for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.14 Walnut Open Space

Walnut Open Space is an open space with a trail located near Lynn Road and US 101. It is operated by the Conejo Open Space Conservation Agency.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the open space during construction.

Construction activities could be as close as 20 feet from the open space during construction. However, construction activities near Walnut Open Space would be temporary and intermittent and would not last the entire duration of the project.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, material stockpiles, and vegetation removal. This would disturb the trail’s existing aesthetic to a minor degree because construction may be partially visible from some part of the open space. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. The resource is currently subject to indirect air quality, noise, and vibration impacts due to its proximity to US 101. The incremental increase in noise, air quality, and vibration impacts during construction and once Build Alternatives 2 and 3 are in operation would not inhibit existing recreational functions of the resource that are already subject to noise and air quality impacts.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Walnut Open Space for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.15 Los Padres Open Space

Los Padres Open Space is an open space with trails located on the southern end of Moorpark Road in Thousand Oaks. It is operated by the Conejo Open Space Conservation Agency.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the open space during construction.

Construction activities would be adjacent to the open space. However, the construction activities near Los Padres Open Space would be temporary and intermittent and would not last the entire duration of the project.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, material stockpiles, and vegetation removal. This would disturb the space's existing aesthetic to a minor degree because construction may be partially visible from some part of the open space. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. The resource is currently subject to indirect air quality, noise, and vibration impacts due to its proximity to US 101. The incremental increase in noise, air quality, and vibration impacts during construction and once Build Alternatives 2 and 3 are in operation would not inhibit existing recreational functions of the resource that are already subject to noise and air quality impacts.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Los Padres Open Space for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no "use" would occur. The provisions of Section 4(f) do not apply.

A.8.1.16 Vallecito Open Space

Vallecito Open Space is located west of Old Conejo Road in Thousand Oaks. It is operated by the Conejo Open Space Conservation Authority. The open space comprises 67 acres with hiking trails.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the open space during construction.

Construction activities would be adjacent to the open space during construction. However, construction activities near the resource would be temporary and intermittent and would not last the entire duration of the project.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, material stockpiles, and vegetation removal. This would disturb the resource's existing aesthetic to a minor degree because construction may be partially visible from some part of the open space. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. The resource is currently subject to indirect air quality, noise, and vibration impacts due to its proximity to US 101. The incremental increase in noise, air quality, and vibration impacts during construction and once Build Alternatives 2 and 3 are in operation would not inhibit existing recreational functions of the resource that are already subject to noise and air quality impacts.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Vallecito Open Space for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no "use" would occur. The provisions of Section 4(f) do not apply.

A.8.1.17 Old Conejo Open Space/Conejo Vista Trail

Old Conejo Open Space/Conejo Vista Trail is located west of Old Conejo Road in Thousand Oaks. It is operated by the Conejo Open Space Conservation Authority. The space and trail comprise 38 acres of open space with short hiking trails that provide panoramic views of Boney Mountain.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the open space/trail during construction.

Construction activities could be as close as 20 feet from the open space/trail. However, construction activities near the resource would be temporary and intermittent and would not last the entire duration of the project.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, material stockpiles, and vegetation removal. This would disturb the resource's existing aesthetic to a minor degree because construction may be partially visible from some part of the open space or trail. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, the improvements

to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. The resource is currently subject to indirect air quality, noise, and vibration impacts due to its proximity to US 101. The incremental increase in noise, air quality, and vibration impacts during construction and once Build Alternatives 2 and 3 are in operation would not inhibit existing recreational functions of the resource that are already subject to noise and air quality impacts.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Old Conejo Open Space/Conejo Vista Trail for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no “use” would occur. The provisions of Section 4(f) do not apply.

A.8.1.18 Conejo Canyons Open Space

Conejo Canyons Open Space is located north of Grande Vista Drive in Thousand Oaks. It is operated by the Conejo Open Space Conservation Authority. The resource consists of 1,673 acres of open space with hiking trails.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the open space/trail during construction.

Construction activities could be as close as 50 feet from the open space/trails during construction. However, the construction activities near the resource would be temporary and intermittent and not last the entire duration of the project.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, material stockpiles, and vegetation removal. This would disturb the resource’s existing aesthetic to a minor degree because construction may be partially visible from some part of the open space or trails. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. The resource is currently subject to indirect air quality, noise, and vibration impacts due to its proximity to US 101. The incremental increase in noise, air quality, and vibration impacts during construction and once Build Alternatives 2 and 3 are in operation would not inhibit existing recreational functions of the resource that are already subject to noise and air quality impacts.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Conejo Canyons Open Space for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no "use" would occur. The provisions of Section 4(f) do not apply.

A.8.1.19 Knoll Park (Rabbit Hill)

Knoll Park (Rabbit Hill), located at 3350 Old Conejo Road in Newbury Park, is operated by the Conejo Open Space Conservation Authority. The park comprises 21 acres of open space with a trail that leads to panoramic views of Boney Mountain, Thousand Oaks, and Conejo Mountain.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 1,100 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Knoll Park (Rabbit Hill) for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no "use" would occur. The provisions of Section 4(f) do not apply.

A.8.1.20 Calleguas Creek Bike Path

Callegaus Creek Bike Path, located at 675 Avenida Valencia in Camarillo, is operated by the Pleasant Valley Recreation and Park District. The resource consists of a 2-mile bike path with gentle slopes within picturesque mountains and hillsides.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the trailhead during construction.

Construction activities could be as close as 50 feet from the bike path. However, construction activities near the resource would be temporary and intermittent and would not last the entire duration of the project.

Visual impacts during construction would be typical of roadway construction projects, including visual impacts from construction fencing, construction equipment, material stockpiles, and vegetation removal. This would disturb the resource's existing aesthetic to a minor degree because construction may be partially visible from some part of the path. However, temporarily disturbed areas would be returned to pre-project conditions once construction is completed. During operation, the improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. The resource is currently subject to indirect air quality, noise, and vibration impacts due to its proximity to US 101. The incremental increase in noise, air quality, and vibration impacts during construction and once Build Alternatives 2 and 3 are in operation would not inhibit existing recreational functions of the resource that are already subject to noise and air quality impacts.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Callegaus Creek Bike Path for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no "use" would occur. The provisions of Section 4(f) do not apply.

A.8.1.21 Newbury Gateway Park

Newbury Gateway Park, located at 2250 Michael Drive, is operated by the Conejo Recreation and Park District. The resource consists of a 4-acre park with playground, picnic table, open turf area, and benches.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the park during construction.

Construction activities would be more than 1,100 feet from the park. It is unlikely that construction activities would be visible from the park, given the intervening trees and structures. During operation, improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Newbury Gateway Park for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no "use" would occur. The provisions of Section 4(f) do not apply.

A.8.1.22 Arroyo Conejo Open Space

The 302-acre Arroyo Conejo Open Space is northeast of the intersection of Hillcrest Drive and Ventu Park Road in Thousand Oaks, California. Arroyo Conejo Open Space includes a network of trails.

No land would be incorporated into the project. Therefore, no permanent use would occur. No land would be temporarily required for project construction or staging. There would be no changes to access or parking at the open space during construction.

Construction activities would be within 200 feet of a small section of the open space but more than 1,100 feet from the majority of the open space and trails. Some of the trails, like sections of the Arroyo Conejo Trail and Kalinda Trail (a 0.25-mile trail that leads into Arroyo Conejo Open Space), would be close to construction activities. The trailhead, with parking, is located on Ventu Road, more than 0.25 mile from the project. Therefore, access and parking at the trailhead would remain unaffected by the project. It is unlikely that construction activities would be visible from most of the open space, given the intervening trees and structures. During operation, improvements to US 101 would not change the aesthetic of the resource because they would be consistent with the existing landscape.

Air quality, noise, and vibration impacts would be similar to visual impacts. Given the intervening distance and structures/trees, any increase in noise and vibration would not be perceptible.

Accordingly, proximity impacts would not be so severe that the protected activities, features, or attributes that qualify Arroyo Conejo Open Space for protection under Section 4(f) would be substantially impaired, and no constructive use would result under Build Alternatives 2 and 3. Therefore, the property is a Section 4(f) property, but no "use" will occur. The provisions of Section 4(f) do not apply.

A.8.2 Historic Properties

A.8.2.1 Pierpont Inn District

The Pierpont Inn contains seven buildings: the West Wing, Main Building, East Wing, Mattie Gleichmann House, Bluff House, and two cottages. It is NRHP/CRHR eligible as a historic district under Criterion A/1 and significant at the local level for its longtime presence in Ventura and its gradual transition from a seaside tourist resort hotel to a roadside hotel as it adapted to cater to the expanding automobile tourism industry in the mid-twentieth century.

No land from the resource would be permanently incorporated into the project. Construction of the recommended soundwall would necessitate a TCE of approximately 53 square feet in the southwest portion of the historic property boundary, approximately 20 feet southwest of the nearest district contributor (the West Wing). The TCE area is a fairly steep hillside/embankment and therefore is anticipated to be only used for

construction personnel access. No permanent changes are proposed within the historic property boundary. The TCE would be required for 6 months. The TCE is within an area that is non-historic, non-contributing property lying within a historic district, and the project does not use land that would contribute to the historic significance of the property. Therefore, there would be no use of this historic property.

Build Alternatives 2 and 3 would not alter, directly or indirectly, any of the characteristics of the Pierpont Inn District that qualify it for inclusion as a historical resource or historic property in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association. Adjacent soundwalls have been designed to not obstruct the inn's view of the ocean, maintaining the property's characteristic viewshed.

Therefore, no use under Section 4(f) would occur.

A.8.2.2 Pierpont Inn, Main Building

Piedmont Inn, Main Building, is a contributor to the Pierpont Inn District and individually NRHP/CRHR eligible under Criterion A/1. It is significant at the local level for its association with early twentieth-century tourism and development in Ventura.

Based on the Findings of Effect analysis, the proposed project would result in no adverse effect on the Main Building. Build Alternatives 2 and 3 propose soundwall construction, grading, roadbed striping, and Sanjon Creek Bridge widening in the vicinity of the Main Building.

No land from the resource would be permanently incorporated into the project.

Neither temporary nor permanent uses are proposed within the historic property boundary. Construction activities would temporarily increase sound levels at the Main Building. However, a quiet setting is not a character-defining feature of the property, which is surrounded by noise from ocean waves, high-speed vehicular traffic on US 101, and local vehicular traffic along Sanjon Road and E. Thompson Boulevard. A temporary increase in noise at the Main Building during construction would result in no adverse effect on the historic property. In addition, construction of a proposed soundwall as part of the project would reduce highway noise at the Main Building.

The Main Building is oriented to the northeast, away from the proposed project. However, views of the Pacific Ocean to the south are character-defining and contribute to the property's significance. The property would be approximately 105 feet from the proposed soundwall, which would be 18 feet high. Construction of US 101 within its present alignment in the 1960s altered the property's ocean views; construction of the soundwall would largely obstruct any remaining sea views from the Main Building. In addition, the building would no longer be easily visible from US 101, a characteristic that contributed to the property's successful transition from a seaside inn to a roadside hotel. The potential adverse effects due to obstruction of the Main Building's character-defining ocean views by the proposed soundwall would be minimized by construction of

a partially transparent soundwall at this location. Because of the Main Building's location, orientation, and distance from the proposed project, there would be no adverse visual effects on the property due to road grading and striping activities. The building would be approximately 190 feet from road grading and striping activities, well outside of the Caltrans ROW. The area surrounding the property is urban, and the visual character of the proposed Project would be compatible with that of the existing highway corridor. The completion of road grading and striping would not affect significant views or other aspects of the property's setting.

The proposed project's build alternatives would not alter, directly or indirectly, any of the characteristics of the Pierpont Inn District, Main Building, that qualify it for inclusion as a historical resource or historic property in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association. Adjacent soundwalls have been designed to not obstruct the inn's view of the ocean, maintaining the property's characteristic viewshed. Therefore, the project's proximity impacts would not substantially impair the key activities, features, or attributes of the property, and no constructive use would occur.

Therefore, no use under Section 4(f) would occur.

A.8.2.3 Piedmont Inn, Mattie Gleichmann House

The Mattie Gleichmann House consists of a two-story, Mid-Century Modern residence. It is a contributor to the Pierpont Inn Historic District, and it is individually NRHP/CRHR eligible as an excellent example of Mid-Century Modern architecture.

There would be no change in the character of the building's use because the property would remain part of the Pierpont Inn. Road grading, striping, and soundwall construction would take place at the level of the existing roadway, above the Mattie Gleichmann House. No uses are proposed within the historic property boundary.

The project would not result in changes to the property's immediate or wider setting. Construction activities would temporarily increase sound levels at the Mattie Gleichmann House. However, a quiet setting is not a character-defining feature of the property, which is surrounded by noise from ocean waves, high-speed vehicular traffic on US 101, and local vehicular traffic along E. Harbor Boulevard. A temporary increase in noise at the Mattie Gleichmann House during construction would result in no adverse effect on the historic property.

The proposed project would result in no adverse effect on the Mattie Gleichmann House. Build Alternatives 2 and 3 propose soundwall construction, grading, roadbed striping, and Sanjon Creek Bridge widening in the vicinity of the Mattie Gleichmann House.

The proposed project's build alternatives would not alter, directly or indirectly, any of the characteristics of the Mattie Gleichmann House that qualify it for inclusion as a historical resource or historic property in a manner that would diminish the integrity of the

property's location, design, setting, materials, workmanship, feeling, or association. The project's proximity impacts would not substantially impair the key activities, features, or attributes of the property, and no constructive use would occur.

Therefore, no use under Section 4(f) would occur.

A.8.2.4 Griffin Brothers Funeral Chapel

The Griffin Brother Funeral Chapel consists of a 1968 Neo-Spanish Revival mortuary. The Griffin Brothers Funeral Chapel is NRHP/CRHR eligible as an excellent example of Neo-Spanish Eclectic architecture.

The proposed project would result in no adverse effect on the Griffin Brothers Funeral Chapel. Build Alternatives 2 and 3 propose grading and striping in the Caltrans ROW, along with E. Daily Drive and the sidewalk in front of the property. In addition, both build alternatives would incorporate a TCE along E. Daily Drive, extending approximately 2,170 feet on the south side of the parcel, including the sidewalk in front that abuts the historic property boundary. Character-defining features are immediately adjacent, such as landscape and hardscape elements.

No part of the Griffin Brothers Funeral Chapel property would be physically destroyed or damaged. No part of the property would be permanently incorporated into the proposed project. Although a TCE is proposed for the southernmost portion of the parcel and the public sidewalk, the sidewalk is outside the historic property boundary. The historic property boundary excludes the sidewalk because it replaced the original sidewalk c. 1989, after the close of the property's period of significance in 1968. In addition, the original sidewalk was not a character-defining feature of the property. The proposed project would not physically destroy or damage any part of the historic property, including its character-defining landscape and hardscape elements. There would be no change to the character of the Griffin Brothers Funeral Chapel's use or to the immediate setting. The commercial property is presently vacant, and the setting outside of the historic property boundary does not contribute to its architectural significance. No changes are proposed within the historic property boundary. The area surrounding the property is urban, and the visual character of the proposed project would be compatible with that of the existing highway corridor. Neither a quiet setting nor specific viewsheds, as seen from the building, are character-defining features of the Griffin Brothers Funeral Chapel. Construction and operation of the proposed project would not obstruct significant views of the building's character-defining architectural elements or introduce new elements that would be incompatible with the property's existing setting.

The proposed project's build alternatives would not alter, directly or indirectly, any of the characteristics of the Griffin Brothers Funeral Chapel that qualify it for inclusion as a historical resource or historic property in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association. The project's proximity impacts would not substantially impair the key activities, features, or attributes of the property, and no constructive use would occur. Therefore, there would be no use under Section 4(f).

A.8.2.5 Pleasant Valley Baptist Church

The Pleasant Valley Baptist Church consists of a Spanish Colonial Revival church building, a one-story rectory, and a two-story building. The church and rectory were determined NRHP eligible and were CRHR listed in 1994. The church is also a work by Ventura County master architect Harold E. Burket.

No part of the property would be permanently incorporated into the proposed project. Neither temporary nor permanent uses are proposed within the historic property boundary.

The proposed project would result in no adverse effect on the Pleasant Valley Baptist Church. Build Alternatives 2 and 3 propose grading and striping in the vicinity, which would occur in both the north- and southbound lanes of US 101, approximately 28 feet north of the sanctuary building and 100 feet north of the rectory, beyond an existing soundwall. In addition, the highway is depressed at this location, adding to the physical and visual distance to and from the property. Grading on the roadway shoulders would extend 5 feet below grade. Striping would be applied to the US 101 roadbed. All proposed work at this location would be in the Caltrans ROW.

Construction activities would temporarily increase sound levels at the Pleasant Valley Baptist Church. However, a quiet setting is not a character-defining feature of the property, which is surrounded by noise from high-speed vehicular traffic on US 101 and local vehicular traffic along Ventura Boulevard. A temporary increase in noise at the Pleasant Valley Baptist Church during construction would result in no adverse effect on the historic property.

Because of the building's location, orientation, and distance from the proposed project, there are no visual-related effects on the property. The area surrounding the property is urban, and the visual character of the proposed project would be compatible with that of the existing highway corridor. As stated above, the Pleasant Valley Baptist Church is oriented to the south, away from the proposed project. The property's setting does not contribute to its architectural significance. It is also above the present alignment of US 101 and approximately 70 feet from proposed road grading and striping activities and outside the Caltrans ROW. The completion of road grading and striping behind the Pleasant Valley Baptist Church, beyond an existing soundwall, which would remain in place, would not adversely affect significant views or other aspects of the setting.

The proposed project's build alternatives would not alter, directly or indirectly, any of the characteristics of the Pleasant Valley Baptist Church that qualify it for inclusion as a historical resource or historic property in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association. There would not be any uses within the property boundary. The project's proximity impacts would not substantially impair the key activities, features, or attributes of the property, and no constructive use would occur.

Therefore, there is no use under Section 4(f).

A.8.2.6 Cawelti Building

The Cawelti Building is a 1917 commercial building. Following renovation, the Cawelti Building was NRHP/CRHR eligible under Criterion A/1 and significant at the local level for its association with early twentieth-century development in Camarillo. The proposed project would result in no adverse effect on the Cawelti Building.

No part of the property would be permanently incorporated into the proposed project. Neither temporary nor permanent uses are proposed within the historic property boundary.

Build Alternatives 2 and 3 propose grading and roadbed striping in the vicinity of the Cawelti Building. Grading for Build Alternatives 2 and 3 would occur approximately 70 feet north of the rear of the Cawelti Building but outside the historic property boundary. Grading on the roadway shoulders would extend 5 feet below grade. Striping would be applied to the US 101 roadbed in both the north- and southbound lanes. All proposed work at this location would be in the Caltrans ROW.

Construction activities would temporarily increase sound levels at the Cawelti Building. However, a quiet setting is not a character-defining feature of the property, which is surrounded by noise from high-speed vehicular traffic on US 101 and local vehicular traffic along Ventura Boulevard and Lewis Road. A temporary increase in noise at the Cawelti Building during construction would result in no adverse effect on the historic property.

Because of the building's location, orientation, and distance from the proposed project, there would be no visual effects on the property. The area surrounding the property is urban, and the visual character of the proposed project would be compatible with that of the existing highway corridor. As stated above, the building is oriented to the southeast, away from the proposed project. Because of alterations, the Cawelti Building's setting no longer contributes to its significance. The building is also approximately 70 feet from road grading and striping activities and well outside the Caltrans ROW. Road grading and striping to the rear of the Cawelti Building would not adversely affect significant views or other aspects of the setting.

The proposed project's build alternatives would not alter, directly or indirectly, any of the characteristics of the building that qualify it for inclusion as a historical resource or historic property in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association. There would not be any uses within the property boundary. The project's proximity impacts would not substantially impair the key activities, features, or attributes of the property, and no constructive use would occur.

Therefore, no use under Section 4(f) would occur.

A.8.2.7 Timber Schoolhouse and Auditorium

The 1924 Timber Schoolhouse is a one-story structure; it is attached to a 1948 one-story auditorium by a covered walkway. Designed by Roy C. Wilson, Ventura County's first licensed architect, the Timber Schoolhouse is in the American Colonial Revival style. The auditorium, constructed south and southwest of the schoolhouse, exhibits elements of the Late Moderne style. The property is NRHP/CRHR eligible, with the schoolhouse being the oldest educational building remaining in the Conejo Valley; the auditorium appears to be the second oldest.

The proposed project would result in no adverse effect on the Timber Schoolhouse and Auditorium.

No part of the property would be permanently incorporated into the proposed project. Neither temporary nor permanent uses are proposed within the historic property boundary.

Build Alternatives 2 and 3 propose construction of a retaining wall just south of the existing soundwall between Newbury Road and US 101, and grading as well as striping within the US 101 roadbed. The closest project work would take place approximately 63 feet north of the historic property boundary. The retaining wall would extend 4 to 35 feet above grade and 7 to 10 feet below grade. The maximum disturbance within staging and access areas would be 1 foot below grade. Grading on the roadway shoulders would extend 5 feet below grade. Striping would be applied to the US 101 roadbed in both the north- and southbound lanes.

The property's setting does not contribute to its significance for its association with early education in the Conejo Valley. Construction equipment would temporarily be staged and operated across from the property, along Newbury Road, introducing temporary visual changes. In addition, construction of a new retaining wall would occur, introducing permanent visual changes. However, the setting does not contribute to the property's significance, and the presence of construction equipment, a retaining wall, and other project elements would not diminish the integrity of the property's character-defining features. The area surrounding the property is urban, and the visual character of the proposed project would be compatible with that of the existing highway corridor.

Neither a quiet setting nor specific viewsheds from the building are character-defining features of the Timber Schoolhouse and Auditorium. Construction and operation of the proposed project would not obstruct significant views of the building's character-defining features or introduce new elements that would be incompatible with the property's existing setting.

The proposed project's build alternatives would not alter, directly or indirectly, any of the characteristics of the Timber Schoolhouse and Auditorium that qualify them for inclusion as historical resources or historic properties in a manner that would diminish the integrity of the properties' location, design, setting, materials, workmanship, feeling, or association. There would not be any uses within the property boundary. The project's

proximity impacts would not substantially impair the key activities, features, or attributes of the property, and no constructive use would occur.

Therefore, there would be no use under Section 4(f).

A.8.2.8 Leibole & Kaufman Building

The Leibole & Kaufman Building consists of a one-story, Mid-Century Modern building with space for three stores. This rectangular commercial structure was designed by Harris & Rice.

The proposed project would result in no adverse effect on the Leibole & Kaufman Building.

No part of the property would be permanently incorporated into the proposed project. Neither temporary nor permanent uses are proposed within the historic property boundary.

All proposed work at this location would be in the Caltrans ROW. Build Alternatives 2 and 3 propose construction of a retaining wall, grading, and roadbed striping in the vicinity of the Leibole & Kaufman Building. Proposed retaining wall construction would occur approximately 570 feet southwest of the Leibole & Kaufman Building. The retaining wall would extend 4 to 35 feet above grade and 7 to 10 feet below grade. Grading and striping for Build Alternatives 2 and 3 would occur in both the north- and southbound lanes of US 101, approximately 520 feet south of the Leibole & Kaufman Building. Grading on the roadway shoulders would extend 5 feet below grade. Striping would be applied to the US 101 roadbed.

Because of the building's location, orientation, and distance from the proposed project, there would be no visual effects on the property. The area surrounding the property is urban, and the visual character of the proposed project would be compatible with that of the existing highway corridor. The building is oriented to the north and away from the proposed project. The setting does not contribute to the building's significance. The building would be approximately 485 feet from the proposed retaining wall location and approximately 525 feet from road grading and striping activities and well outside the Caltrans ROW.

Neither a quiet setting nor specific viewsheds from the building are character-defining features of the Leibole & Kaufman Building. Construction and operation of the proposed project would not obstruct significant views of the building's character-defining architectural elements or introduce new elements that would be incompatible with the property's existing setting. The Leibole & Kaufman Building's setting does not contribute to its architectural significance. Construction and operation of the retaining wall, road grading, and striping would not adversely affect significant views or aspects of the setting.

The proposed project's build alternatives would not alter, directly or indirectly, any of the characteristics of the Leibole & Kaufman Building that qualify it for inclusion as a historical resource or historic property in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association. There would not be any uses within the property boundary. The project's proximity impacts would not substantially impair the key activities, features, or attributes of the property, and no constructive use would occur.

Therefore, there would be no use under Section 4(f).

A.8.2.9 Archeological Site: 56-000223 CA-VEN-223

Site 56-000223, CA-VEN-223, is a prehistoric archaeological site that was first recorded in 1970 by Chester King and Dean Decker. It appears to represent the prehistoric Chumash village of Swina. It is located near US 101 on privately owned lands and agricultural fields.

The archaeological site has not been formally evaluated for NRHP significance. However, it seems likely that this site would be eligible under Criterion D because it has yielded, or may be likely to yield, information important in prehistory or history. Therefore, because the resource would not be one that warrants preservation in place, it is not considered a Section 4(f) resource even if it were to be found eligible.

A.9 SECTION 6(F) OF THE LAND AND WATER CONSERVATION FUND ACT: NO CONVERSION

The Land and Water Conservation Fund (LWCF) Act was established by Congress in 1964 to fulfill a bipartisan commitment to safeguard natural areas, water resources, and cultural heritage and provide recreational opportunities for all Americans. The LWCF program provides matching grants to states and local governments for the acquisition and development of public outdoor recreational areas and facilities. Section 6(f) of this act prohibits the conversion of property acquired or developed with these grants to a non-recreational purpose without the approval of the Department of Interior's National Park Service (NPS).

Projects that result in private and/or non-recreational activities on Section 6(f) property, or impacts on its public recreation use, would trigger a "conversion." If a conversion of parkland developed with LWCF assistance occurs, a project sponsor is required to provide replacement recreational property. An inventory of Section 6(f) properties for the project was conducted within the Section 4(f) resource study area. The Section 4(f) resource study area is defined above in Section A3 of this analysis.

A.9.1 Summary of Properties Subject to Section 6(f) Consideration

The LWCF Act was established by Congress in 1964 to fulfill a bipartisan commitment to safeguard natural areas, water resources, and cultural heritage, and to provide

recreation opportunities to all Americans. The LWCF program provides matching grants to state and local governments for the acquisition and development of public outdoor recreation areas and facilities. Section 6(f) of this act prohibits the conversion of property acquired or developed with these grants to a non-recreational purpose without the approval of the NPS.

An inventory of Section 6(f) properties for the project was also conducted within the Section 4(f) resource study area. Camarillo Grove Park is the only Section 6(f) property that was identified adjacent to the project area. Camarillo Grove Park received LWCF funding in 2011 for an outdoor nature interpretive center with an education pavilion platform and an approximately 300-yard-long connector trail and support facilities (LWCF project #06-01741).

A.9.1.1 No-Build Alternative

Under the No-Build Alternative, the project would not be implemented; therefore, use of Section 6(f) properties would not occur.

A.9.1.2 Build Alternative 2

Build Alternative 2 would not incorporate any land from Camarillo Grove Park. Therefore, no impact on this Section 6(f) resource would occur as result of Build Alternative 2. Build Alternative 2 would not trigger Section 6(f) conversion provisions. No further assessment is required.

A.9.1.3 Build Alternative 3

Build Alternative 3 would require acquisition of approximately 5,049 square feet from Camarillo Grove Park. As stated above, Camarillo Grove Park received LWCF funding in 2011 for an outdoor nature interpretive center with an education pavilion platform and an approximately 300-yard-long connector trail and support facilities (LWCF project #06-01741). The closest portion of Camarillo Grove Park that received LWCF funding is approximately 0.17 mile north of the proposed project. The project would have no impact on any portions of the park that received LWCF funding. However, because land from the Camarillo Grove Park would be permanently incorporated into the project under Build Alternative 3, Section 6(f) conversion provisions are triggered.

A.9.2 Section 6(f) Conversion Evaluation for Build Alternative 3

The encroachments into LWCF-assisted property at Camarillo Grove Park would be subject to the conversion requirements of Section 6(f)(3). These requirements are specified at 36 CFR 59.3 and Section 675.9.3.B(1) of the NPS manual for LWCF grant compliance. The requirements are summarized below. How the project would meet the requirements is discussed in the response sections.

1. **Alternatives Evaluation:** The project proponents must examine any other practical alternatives to conversion of the LWCF-assisted property. Factors considered in the alternatives evaluation would include such considerations as engineering constraints, right-of-way issues, environmental impacts, and community concerns.

   Response: As a result of the value engineering analysis conducted for the project, Build Alternative 3 includes refinements in this section of the project to save $1,500,000 in structures costs. These refinements would necessitate the minor acquisition of property at Camarillo Grove Park. Given the terrain and ROW constraints in this section of the project, no other feasible and prudent build alternatives exist to avoid taking land from the Camarillo Grove Park.

2. **Appraisals of Fair Market Value:** Appraisals of the fair market value of both the conversion property and proposed replacement property must be obtained.

   Response: If Build Alternative 3 is identified as the preferred alternative after public circulation of the Draft EIR/EA and Section 4(f)/6(f) evaluation, an appraisal of the fair market value of both the conversion property and proposed replacement property will be obtained.

3. **Identification and Evaluation of Replacement Property:** The project proponents must identify proposed replacement properties that are of reasonably equivalent usefulness and location as the property being converted. This includes:

   a. A determination of the recreational needs being fulfilled by the facilities at the converted property and the types of outdoor recreation resources and opportunities available; and

   b. An assessment of the property proposed for substitution for its suitability to meet recreation needs that are at least similar in magnitude and impact to the user community as the conversion property.

   Response: VCTC and Caltrans are currently working with the Pleasant Valley Recreation and Parks District, the owner of the conversion property, to look at viable replacement property options.

4. **Eligibility Determination:** The project proponents must document how the property proposed for substitution meets the eligibility criteria for LWCF-assisted acquisitions.

   Response: VCTC and Caltrans will comply with the eligibility criteria for LWCF-assisted acquisition. VCTC and Caltrans will consult with the NPS and demonstrate how the eligibility criteria are met. Depending on the replacement property and

ownership status, VCTC will obtain title or adequate control and tenure of the proposed substitution property.

If the seller is a public agency:

- The substitution property identified would not have been acquired by the seller for recreation.
- The substitution property would not have been managed for recreational purposes while in public ownership.
- The substitution property would not have been acquired using federal assistance for the original acquisition by the public agency unless the federal assistance was provided by the supplemental programs allowed by the act.
- The selling public agency would receive payment for land transferred to another public agency.
- All requirements for appraisal, history of conveyances, and evidence of title would be adhered to.

If the selling agency is a federal agency, fair market value will be paid.

5. **Partial Impact Consideration:** The project proponents must document the impact of partial park land acquisition on the remaining site, with the focus of this assessment on whether the unconverted property remains recreationally viable.

   Response: The area of partial acquisition is only approximately 5,049 square feet (0.47 percent of the total 24.6 acres of Camarillo Grove Park). The area to be acquired from the park is undeveloped, with a hilly and undulating terrain and no active or passive recreational features. The area of the park to be acquired is at the southern end of the park, abutting US 101. Recreational features of the park (interpretive center, play pens, trails) and the entrance and parking are all north of the park where the terrain is flatter. Acquisition of the land will have no effect on the recreational features and value of rest of the park. Given the small size of acquisition, terrain, location with respect to rest of the park, and general lack of recreational features, the acquisition required by the project will have no adverse impact on the recreational viability of the remaining park.

6. **Agency Coordination/Section 4(f):** The project proponents must consult with the applicable federal agencies, including any Section 4(f) consultation required if the proposed project involves funding and/or approvals from USDOT.

   Response: VCTC and Caltrans have prepared a Draft EIR/EA and Section 4(f)/Section 6(f) Assessment, which will be distributed to all appropriate local, state, regional and federal agencies for review. The project will comply with all applicable federal regulations.

7. **Environmental Evaluation:** The project proponents must provide environmental documentation in accordance with the National Environmental Policy Act (NEPA) procedures promulgated by NPS and Council on Environmental Quality.

Response: A Draft EIR/EA has been prepared for the project. The EA will serve as the NEPA compliance vehicle for NPS.

8. **State Intergovernmental Review:** The project proponents must comply with any required state intergovernmental clearinghouse review necessitated by the proposed property conversion.

   Response: The project will comply with any required state intergovernmental clearinghouse review requirements.

9. **Statewide Outdoor Recreation Plan Consistency:** The project proponents must document how the proposed conversion is in accordance with any applicable statewide recreation plans.

   Response: VCTC and Caltrans will consult the Pleasant Valley Recreation and Parks District and NPS regarding the adequacy of the replacement property such that it complies with any applicable statewide recreation plans.

It is expected that the Section 6(f)(3) conversion process will take place subsequent to completion of Section 4(f) and the NEPA process. Coordination with Pleasant Valley Recreation and Parks District and NPS will be ongoing.

TITLE VI/NON-DISCRIMINATION POLICY STATEMENT

It is the policy of the California Department of Transportation (Caltrans), in accordance with Title VI of the Civil Rights Act of 1964 and the assurances set forth in the Caltrans' Title VI Program Plan, to ensure that no person in the United States shall on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance. Related non-discrimination authorities, remedies, and state law further those protections, including sex, disability, religion, sexual orientation, age, low income, and Limited English Proficiency (LEP).

Caltrans is committed to complying with 23 C.F.R. Part 200, 49 C.F.R. Part 21, 49 C.F.R. Part 303, and the Federal Transit Administration Circular 4702.1B. Caltrans will make every effort to ensure nondiscrimination in all of its services, programs, and activities, whether they are federally funded or not, and that services and benefits are fairly distributed to all people, regardless of race, color, or national origin (including LEP). In addition, Caltrans will facilitate meaningful participation in the transportation planning process in a non-discriminatory manner.

The overall responsibility for this policy is assigned to the Caltrans Director. The Caltrans Title VI Coordinator is assigned to the Caltrans Office of Civil Rights Deputy Director, who then delegates sufficient responsibility and authority to the Office of Civil Rights' managers, including the Title VI Branch Manager, to effectively implement the Caltrans Title VI Program. Individuals with questions or requiring additional information relating to the policy or the implementation of the Caltrans Title VI Program should contact the Title VI Branch Manager at title.vi@dot.ca.gov or at (916) 639-6392, or visit the following web page: https://dot.ca.gov/programs/civil-rights/title-vi.

Appendix C Summary of Relocation Benefits

C.1 CALIFORNIA DEPARTMENT OF TRANSPORTATION RELOCATION ASSISTANCE PROGRAM

C.1.1 Declaration of Policy

"The purpose of this title is to establish a uniform policy for fair and equitable treatment of persons displaced as a result of federal and federally assisted programs in order that such persons shall not suffer disproportionate injuries as a result of programs designed for the benefit of the public as a whole."

The Fifth Amendment to the U.S. Constitution states, "No Person shall…be deprived of life, liberty, or property, without due process of law, nor shall private property be taken for public use without just compensation." The Uniform Act sets forth in statute the due process that must be followed in Real Property acquisitions involving federal funds. Supplementing the Uniform Act is the government-wide single rule for all agencies to follow, set forth in 49 CFR 24. Displaced individuals, families, businesses, farms, and nonprofit organizations may be eligible for relocation advisory services and financial benefits, as discussed below.

C.1.2 Fair Housing

The Fair Housing Law (Title VIII of the Civil Rights Act of 1968) sets forth the policy of the U.S. to provide, within constitutional limitations, for fair housing. This act, and as amended, makes discriminatory practices in the purchase and rental of most residential units illegal. Whenever possible, minority persons shall be given reasonable opportunities to relocate to any available housing regardless of neighborhood, as long as the replacement dwellings are decent, safe, and sanitary and are within their financial means. This policy, however, does not require Caltrans to provide a person a larger payment than is necessary to enable a person to relocate to a comparable replacement dwelling.

Any persons to be displaced will be assigned to a relocation advisor, who will work closely with each displacee in order to see that all payments and benefits are fully utilized and that all regulations are observed, thereby avoiding the possibility of displacees jeopardizing or forfeiting any of their benefits or payments. At the time of the initiation of negotiations (usually the first written offer to purchase), owner-occupants are given a detailed explanation of the state's relocation services. Tenant occupants of properties to be acquired are contacted soon after the initiation of negotiations and also are given a detailed explanation of the Caltrans Relocation Assistance Program. To avoid loss of possible benefits, no individual, family, business, farm, or nonprofit organization should commit to purchase or rent a replacement property without first contacting a Caltrans relocation advisor.

C.1.3 Relocation Assistance Advisory Services

In accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, Caltrans will provide relocation advisory assistance to any person, business, farm, or nonprofit organization displaced as a result of the acquisition of real property for public use, so long as they are legally present in the U.S. Caltrans will assist eligible displacees in obtaining comparable replacement housing by providing current and continuing information on the availability and prices of both houses for sale and rental units that are “decent, safe, and sanitary.” Nonresidential displacees will receive information on comparable properties for lease or purchase (for business, farm, and nonprofit organization relocation services, see below).

Residential replacement dwellings will be in a location generally not less desirable than the displacement neighborhood at prices or rents within the financial ability of the individuals and families displaced, and reasonably accessible to their places of employment. Before any displacement occurs, comparable replacement dwellings will be offered to displacees that are open to all persons regardless of race, color, religion, sex, national origin, and consistent with the requirements of Title VIII of the Civil Rights Act of 1968. This assistance will also include the supplying of information concerning federal and state assisted housing programs and any other known services being offered by public and private agencies in the area.

Persons who are eligible for relocation payments and who are legally occupying the property required for the project will not be asked to move without first being given at least 90 days written notice. Residential occupants eligible for relocation payment(s) will not be required to move unless at least one comparable “decent, safe, and sanitary” replacement dwelling, available on the market, is offered to them by Caltrans.

C.1.4 Residential Relocation Financial Benefits

The Relocation Assistance Program will help eligible residential occupants by paying certain costs and expenses. These costs are limited to those necessary for or incidental to the purchase or rental of a replacement dwelling and actual reasonable moving expenses to a new location within 50 miles of the displacement property. Any actual moving costs in excess of the 50 miles are the responsibility of the displacee. The Residential Relocation Assistance Program can be summarized as follows:

Moving Cost

Any displaced person, who lawfully occupied the acquired property, regardless of the length of occupancy in the property acquired, will be eligible for reimbursement of moving costs. Displacees will receive either the actual reasonable costs involved in moving themselves and personal property up to a maximum of 50 miles, or a fixed payment based on a fixed moving cost schedule. Lawful occupants who move into the displacement property after the initiation of negotiations must wait until Caltrans obtains control of the property in order to be eligible for relocation payments.

Purchase Differential

In addition to moving and related expense payments, fully eligible homeowners may be entitled to payments for increased costs of replacement housing.

Homeowners who have owned and occupied their property for 90 days or more prior to the date of the initiation of negotiations (usually the first written offer to purchase the property), may qualify to receive a price differential payment and may qualify to receive reimbursement for certain nonrecurring costs incidental to the purchase of the replacement property. An interest differential payment is also available if the interest rate for the loan on the replacement dwelling is higher than the loan rate on the displacement dwelling, subject to certain limitations on reimbursement based upon the replacement property interest rate.

Rent Differential

Tenants and certain owner-occupants (based on length of ownership) who have occupied the property to be acquired by Caltrans prior to the date of the initiation of negotiations may qualify to receive a rent differential payment. This payment is made when Caltrans determines that the cost to rent a comparable “decent, safe, and sanitary” replacement dwelling will be more than the present rent of the displacement dwelling. As an alternative, the tenant may qualify for a down payment benefit designed to assist in the purchase of a replacement property and the payment of certain costs incidental to the purchase, subject to certain limitations noted under the Down Payment section below. To receive any relocation benefits, the displaced person must buy or rent and occupy a “decent, safe and sanitary” replacement dwelling within one year from the date Caltrans takes legal possession of the property, or from the date the displacee vacates the displacement property, whichever is later.

Down Payment

The down payment option has been designed to aid owner-occupants of less than 90 days and tenants in legal occupancy prior to Caltrans’ initiation of negotiations. The one-year eligibility period in which to purchase and occupy a “decent, safe and sanitary” replacement dwelling will apply.

Last Resort Housing

Federal regulations (49 CFR 24) contain the policy and procedure for implementing the Last Resort Housing Program on Federal-aid projects. Last Resort Housing benefits are, except for the amounts of payments and the methods in making them, the same as those benefits for standard residential relocation as explained above. Last Resort Housing has been designed primarily to cover situations where a displacee cannot be relocated because of lack of available comparable replacement housing, or when the anticipated replacement housing payments exceed the limits of the standard relocation procedure, because either the displacee lacks the financial ability or other valid circumstances.

After the initiation of negotiations, Caltrans will within a reasonable length of time, personally contact the displacees to gather important information, including the following:

- Number of people to be displaced.
- Specific arrangements needed to accommodate any family member(s) with special needs.
- Financial ability to relocate into comparable replacement dwelling which will adequately house all members of the family.
- Preferences in area of relocation.
- Location of employment or school.

C.1.5 Nonresidential Relocation Assistance

The Nonresidential Relocation Assistance Program provides assistance to businesses, farms and nonprofit organizations in locating suitable replacement property, and reimbursement for certain costs involved in relocation. The Relocation Advisory Assistance Program will provide current lists of properties offered for sale or rent, suitable for a particular business's specific relocation needs. The types of payments available to eligible businesses, farms, and nonprofit organizations are: searching and moving expenses, and possibly reestablishment expenses; or a fixed in lieu payment instead of any moving, searching and reestablishment expenses. The payment types can be summarized as follows:

Moving Expenses

Moving expenses may include the following actual, reasonable costs:

- The moving of inventory, machinery, equipment and similar business-related property, including: dismantling, disconnecting, crating, packing, loading, insuring, transporting, unloading, unpacking, and reconnecting of personal property. Items identified as real property may not be moved under the Relocation Assistance Program. If the displacee buys an Item Pertaining to the Realty back at salvage value, the cost to move that item is borne by the displacee.
- Loss of tangible personal property provides payment for actual, direct loss of personal property that the owner is permitted not to move.
- Expenses related to searching for a new business site, up to $2,500, for reasonable expenses actually incurred.

Reestablishment Expenses

Reestablishment expenses related to the operation of the business at the new location, up to $25,000 for reasonable expenses actually incurred.

Fixed In Lieu Payment

A fixed payment in lieu of moving, searching, and reestablishment payments may be available to businesses that meet certain eligibility requirements. This payment is an amount equal to half the average annual net earnings for the last two taxable years prior to the relocation and may not be less than $1,000 nor more than $40,000.

C.1.6 Additional Information

Reimbursement for moving costs and replacement housing payments are not considered income for the purpose of the Internal Revenue Code of 1954, or for the purpose of determining the extent of eligibility of a displacee for assistance under the Social Security Act, or any other law, except for any federal law providing local “Section 8” Housing Programs.

Any person, business, farm or nonprofit organization that has been refused a relocation payment by the Caltrans relocation advisor or believes that the payment(s) offered by the agency are inadequate may appeal for a special hearing of the complaint. No legal assistance is required. Information about the appeal procedure is available from the relocation advisor.

California law allows for the payment for lost goodwill that arises from the displacement for a public project. A list of ineligible expenses can be obtained from Caltrans’ Division of Right of Way and Land Surveys. California’s law and the federal regulations covering relocation assistance provide that no payment shall be duplicated by other payments being made by the displacing agency.

Additional information can be found on the Caltrans Division of Right of Way’s Relocation Assistance Program.

Appendix D Avoidance, Minimization, and/or Mitigation Summary

In order to be sure that all of the environmental measures identified in this document are executed at the appropriate times, the following mitigation program (as articulated on the proposed Environmental Commitments Record which follows) would be implemented. During project design, avoidance, minimization, and/or mitigation measures will be incorporated into the project's final plans, specifications, and cost estimates, as appropriate. All permits will be obtained prior to implementation of the project. During construction, environmental and construction/engineering staff will ensure that the commitments contained in this Environmental Commitments Record are fulfilled. Following construction and appropriate phases of project delivery, long-term mitigation maintenance and monitoring will take place, as applicable. As the following Environmental Commitments Record is a draft, some fields have not been completed, and will be filled out as each of the measures is implemented. NOTE: Some measures may apply to more than one resource area. Duplicative or redundant measures have not been included in this Environmental Commitments Record.

Environmental Commitments Record (ECR)

DIST-CO-RTE: 07-VEN-101 **PM/PM:** 4.1/30.9 **EA/Project ID.:** EA 07-298300/PN 07-13000249
Project Description: The project would add High Occupancy Vehicle (HOV)/express bus lanes along US Highway 101 (US 101) from postmile (PM) 4.1 to 30.9, within Ventura County, California. Project improvements include implementing one HOV/express bus lane in each direction between Moorpark Road and SR 33 with the addition of auxiliary lanes in locations determined to be operationally beneficial.
Date (Last modification): August 2026

Construction Liaison: **Phone No.:**
Resident Engineer: **Phone No.:**

PERMITS

Permit	Agency	Application Submitted	Permit Received	Permit Expiration	Permit Requirement Completed by:	Permit Requirement Completed on:	Comments
Section 7 Consultation for Threatened and Endangered Species	U.S. Fish and Wildlife Service (USFWS)						A Biological Assessment (BA) was prepared. Informal consultation with USFWS regarding monarch butterfly and least Bell's vireo concluded on July 15, 2021. USFWS concurred with the California Department of Transportation's (Caltrans') "may affect, not likely to adversely affect" determination regarding least Bell's vireo; recommended avoidance and minimization measures for least Bell's vireo and monarch butterfly are included in the Environmental Impact Report (EIR)/Environmental Assessment (EA).
Section 404 Permit	U.S. Army Corps of Engineers (USACE)						Application for permit expected during the project design phase.
Section 408 Permit	U.S. Army Corps of Engineers (USACE)						Application for permit expected during the project design phase.
1602 Agreement for Streambed Alteration	California Department of Fish and Wildlife (CDFW)						Application for 1602 agreement expected during the project design phase.
Section 401 Permit	Los Angeles Regional Water Quality Control District						Application for permit expected during the project design phase.
Right of Entry and Maintenance Agreement	Southern California Regional Rail Authority (SCRRA)						To be obtained prior to construction.
Right of Entry and Maintenance Agreement	Union Pacific Railroad (UPRR)						To be obtained prior to construction.
Coastal Development Permit (CDP)	California Coastal Commission (CCC)/City of Ventura Local Coastal Program (LCP)						Application for CDP from the City of Ventura LCP expected during the project design phase for portions of the project that fall within designated preservation areas of the California Coastal Zone.
Planned Development Permit	County of Ventura						To be obtained prior to construction.
National Pollutant Discharge Elimination System (NPDES) Construction Storm Water General Permit, Order No. 2022-0057-DWQ, NPDES No. CAS000002	State Water Resources Control Board (SWRCB)						To be obtained prior to construction.
Caltrans Statewide NPDES Storm Water Permit, Order No. 2022-0033-DWQ, NPDES No. CAS000003	State Water Resources Control Board (SWRCB)						Caltrans District 7 and the Ventura County Transportation Commission (VCTC) will ensure compliance with the SWRCB-issued Caltrans NPDES permit.
Waste Discharge Requirements for Discharges of Groundwater from Construction and Project Dewatering to Surface Waters in Coastal Watersheds of Los Angeles and Ventura Counties, Order No. R4-2023-0429, NPDES No. CAG994004	Los Angeles Regional Water Quality Control Board						To be obtained if dewatering activities are expected.
Encroachment Permit	Ventura County Flood Control District						Caltrans District 7 and VCTC to obtain permit jointly prior to construction.

ENVIRONMENTAL COMMITMENTS

PA&ED

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Cultural Resources	If Alternative 2 or 3 is selected as the preferred alternative, the project would have a Section 106 finding of adverse effect on the Adolfo Camarillo Heritage Grove and a Memorandum of Agreement between SHPO, Caltrans, and any consulting parties would be required. The Memorandum of Agreement must be approved and signed by the involved parties prior to circulation of the final Environmental Impact Report/Environmental Assessment for the project. The Memorandum of Agreement will stipulate the responsibilities of SHPO, Caltrans, and any consulting parties for implementing the specified avoidance, minimization, and/or mitigation measures.	Section 2.2.12 EIR/EA	No	VCTC and Caltrans						Yes
Air Quality	Air Quality Conformity Determination to be obtained prior to receiving the Finding of No Significant Impact (FONSI) for the proposed project.	Section 2.3.6 Air Quality	No	VCTC						No
Biology	**TE-11: Wildlife Collaring and Tracking Study.** A wildlife collaring and tracking study, conducted in partnership with National Park Service to identify wildlife-crossing patterns and locations where the project can improve wildlife connectivity, is anticipated to be completed during the PA&ED phase of the project. Any pertinent measures associated with the study, which may include avoidance, minimization, and/or mitigation measures, will be included in the final Environmental Impact Report/Environmental Assessment for the project.	Section 2.4.5 EIR/EA	No	VCTC and Caltrans						Yes

PS&E/BEFORE RTL

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Other	**LU-1: Minimize Impacts on Land Uses.** During final design, efforts will be undertaken to minimize construction and operational impacts on existing and planned land uses.	Section 2.2.2 EIR/EA	Yes	VCTC						No
Other	**COM-2:** During final design, a parking study will be prepared to evaluate the extent of parking impacts and to identify feasible strategies to minimize such impacts.	Section 2.2.8 EIR/EA	Yes	VCTC, Contractor						No
Other	**UTIL-1: Alternate and Detour Route Strategies.** During the final design phase, VCTC will develop alternate and detour route strategies for the contractor to implement during construction. These strategies include street/intersection	Section 2.2.9 EIR/EA	Yes	VCTC, Contractor						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	improvements (e.g., widening, pavement rehabilitation, removal of median) to provide added capacity for detour traffic; signal improvements; adjustments to signal timing and/or signal coordination to increase vehicle throughput, improve traffic flow, and optimize intersection capacity; turn restrictions at intersections and roadways to reduce congestion and improve safety; and parking restrictions on alternate and detour routes during work hours to increase capacity, reduce traffic conflicts, and improve access.									
Other	**UTIL-2: Coordinate with Utility Service Providers**. During final design, VCTC will coordinate with utility service providers to ensure that potential utility disruptions would not adversely affect customer service or utility operations.	Section 2.2.9 EIR/EA	Yes	VCTC, Contractor						No
Other	**TR-1: Transportation Management Plan.** During the plans, specifications, and estimates phase, a detailed Transportation Management Plan (TMP) will be developed for implementation prior to and during construction. Some of the key elements recommended in the TMP include the following: • Public information/public awareness campaign • Motorist information strategies • Incident management • Construction strategies • Demand management • Alternate route strategies • Coordination elements The TMP will contain elements to reduce traveler delay and enhance traveler safety. These elements will be developed during final design and incorporated in the TMP for implementation during project construction.	Section 2.2.10 EIR/EA	Yes	VCTC, Contractor	Caltrans SS Section 12-4					No
Other	**TR-2: Intersection Improvement Measures.** The project will incorporate intersection improvement measures, including retiming signals to optimize operation or providing signals at intersections, where feasible. Potential intersection improvement measures would be further considered for implementation during the final design phase.	Section 2.2.10 EIR/EA	Yes	VCTC						No
Visual Resources	**VIA-1: Project Corridor Aesthetics Master Plan.** During final design, a decision regarding construction of noise barriers will be determined. A Project Corridor Aesthetics Master Plan (CAMP) will be developed to identify the aesthetic treatments to be utilized for each wall structure, including noise barriers and retaining walls, to be constructed. Project landscaping design elements, including type of replacement plantings, will also be included in the CAMP.	Section 2.2.11 EIR/EA	Yes	VCTC, Contractor						No
Visual Resources	**VIA-2: Noise Barriers and Retaining Walls.** The design of noise barriers, retaining walls, and other wall structures must comply with Caltrans standards for noise attenuation, safety requirements, and other features. Aesthetic features must be	Section 2.2.11 EIR/EA	Yes	VCTC, Caltrans District Landscape Architect, Contractor						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	reviewed by the Caltrans District Landscape Architect. Architectural details, such as texture and color, must be carefully considered in effort to minimize the appearance of the noise barrier and retaining wall surfaces. The noise barriers and retaining walls must also be designed to comply visually with the surrounding community character, following the guidelines of the Ventura County and the Cities of Ventura, Oxnard, Camarillo, and Thousand Oaks aesthetic recommendations, consistent with the Project Corridor Aesthetics Master Plan developed in the final design phase.									
Visual Resources	**VIA-3: Avoid Removing Trees and Shrubs.** Demolition of existing trees and shrubs will be avoided where feasible. Project Landscape Architects will work with the District Landscape Architect on identifying specific trees that will be impacted by the project or preserved in place during the Plans, Specifications, and Estimates phase.	Section 2.2.11 EIR/EA	Yes	VCTC, Project Landscape Architects, Caltrans District Landscape Architect						No
Visual Resources	**VIA-4: Landscaping.** Landscaping design for replacement planting where established landscaping occurs must follow Caltrans standards for aesthetic treatments and must be designed and implemented under the direction of the Caltrans District Landscape Architect. Where feasible and in accordance with Chapter 900, – *Landscape Architecture – Roadsides, of the Caltrans Highway Design Manual*, selection and location of replacement freeway planting should be done to enhance the project's overall appearance and ensure its compatibility with the surrounding environment. The project will include plant establishment period and provide supplemental water, as needed. The Caltrans District Landscape Architect will review and approve freeway planting and irrigation plans prior to their implementation.	Section 2.2.11 EIR/EA	Yes	VCTC, Caltrans District Landscape Architect, Contractor						No
Other	**HYD-2: Remap Floodplain.** The floodplain would be remapped during the plans, specifications, and estimates phase of the project through the Conditional Letter of Map Revision/Letter of Map Revision (CLOMR/LOMR) process.	Section 2.3.1 EIR/EA	Yes	VCTC						No
Other	**HYD-3: Regrade Infields.** Floodplain infields would be regraded following project construction in order to restore storage volume. The infields would be redesigned during the plans, specifications, and estimates phase of the project.	Section 2.3.1 EIR/EA	Yes	VCTC, Contractor						No
Other	**HYD-4: Remodel Drainages.** To evaluate design alternatives to minimize floodplain encroachment, during the plans, specifications, and estimates phase of the project, the following drainages would be remodeled: Nyland Drain, Beardsley Wash, and Moon Ditch to evaluate design alternatives to minimize floodplain encroachment.	Section 2.3.1 EIR/EA	No	VCTC						No
Other	**GEO-1: Geotechnical Exploration Program**. During final design, geotechnical engineers will develop a comprehensive Geotechnical Exploration Program to ensure sufficient data for various project elements, is available in general accordance with Caltrans standards and local practice.	Section 2.3.3 EIR/EA	Yes	VCTC						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Other	**GEO-2: Exploratory Soil Borings.** During final design, exploratory soil borings and cone penetration tests will be conducted throughout the project alignment as part of **GEO-1** to obtain groundwater data and to characterize the soil subsurface conditions for foundation, seismic design, and liquefaction evaluation.	Section 2.3.3 EIR/EA	Yes	VCTC						No
Other	**GEO-3: Geotechnical Design Report and Foundation Reports.** During final design, geotechnical engineers will prepare a geotechnical design report and foundation reports. Recommendations from the final design-level geotechnical report and foundation reports will be incorporated into the final project plans and specifications during the final design phase to ensure the geotechnical stability of the project. The reports will document soil-related constraints and hazards, such as slope instability, settlement, liquefaction, or related secondary seismic impacts, which may be present. Site-specific design measures will be based on State of California guidelines. The reports will include: • Evaluation of settlement, expansive and collapsible soils, and potentially corrosive soils and recommendations regarding construction procedures and/or design criteria to reduce the impact of these soils on project development. • Identification of seismically induced (dry) settlement, as well as potential liquefiable and lateral spreading within the project limits, and recommendations for mitigation measures. • Demonstration that the design of all proposed retaining walls, sound walls, and bridges is geotechnically suitable for soils within the project limits. • Geotechnical recommendations for the specific foundation design and earthwork construction considered for the project.	Section 2.3.3 EIR/EA	Yes	VCTC						No
Paleontology	**PAL-1: Prepare and Implement a Paleontological Mitigation Plan (PMP).** A PMP will be prepared once a project alternative has been selected and once 60 percent project design plans are available. The PMP will follow the Caltrans guidelines in the *Standard Environmental Reference (SER) Environmental Handbook,* Volume 1, Chapter 8 (Caltrans 2017), Caltrans Standard Specifications 14-7, Paleontological Resources, as well as guidelines from the Society of Vertebrate Paleontology. Following these guidelines, the PMP will be prepared by a qualified paleontologist and will include the following elements: • Detailed recommended monitoring locations; a description of a worker training program; detailed procedures for monitoring, fossil recovery, laboratory analysis, and museum curation; and notification procedures in the event of a fossil discovery by a paleontological monitor or other project personnel.	Section 2.3.4 EIR/EA	Yes	VCTC, Qualified Paleontologist						Yes

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	• Required 1-hour preconstruction paleontological sensitivity training for earthmoving personnel. • A signed repository agreement. • Field and laboratory methods proposed (must be consistent with repository requirements). • A required Paleontological Mitigation Report upon completion of project earthmoving. • Full-time monitoring shall be implemented during excavations affecting geologic units with high paleontological sensitivity. • Excavations affecting sedimentary units with low paleontological sensitivity shall be periodically spot-checked to inspect for the presence of older, more paleontologically sensitive geologic units at depth, particularly when excavations are greater than 5 feet. If it is determined that only geologic units with low paleontological sensitivity or previously disturbed sediments (low sensitivity) are affected, or sediments that are deemed non-conducive to fossil preservation, the monitoring program shall be reduced or suspended in those locations. Any subsurface bones or potential fossils that are unearthed during construction shall be evaluated by a professional paleontologist as described in the PMP. • A curation agreement with the Natural History Museum of Los Angeles County or another accredited repository shall also be obtained.									
Hazardous Waste	**HW-4: Asbestos-Containing Materials and Lead-Based Paint.** The project includes proposed property acquisitions and TCEs where one parcel, APN 145-022-136, would require the demolition and replacement of a commercial storage building. In addition, the project would affect bridge structures, which may include partial replacement of two bridges and the widening of up to 21 bridges. The potential exists for ACM and LBP to exist in all building and bridge structures. VCTC's resident engineer will ensure that building and bridge structures with a likelihood to contain ACMs and LBPs will be sampled for all areas of the affected building structure and bridge structures that will be disturbed by the project during the Plans, Specifications, and Estimates phase, prior to any demolition or disturbance activities. VCTC's resident engineer will ensure that the survey will be conducted in conformance with USEPA's National Emission Standards for Hazardous Air Pollutants, 40 Code of Federal Regulations, and South Coast Air Quality Management District Rule 1403; and in accordance with Caltrans Standard Specifications Section 14-11.13, Disturbance of Existing Paint Systems on Bridges, and Section 14-11.16, Asbestos-Containing Construction Materials in Bridges.	Section 2.3.5 EIR/EA	Yes	VCTC, Resident Engineer	USEPA's National Emission Standards for Hazardous Air Pollutants, 40 Code of Federal Regulations, South Coast Air Quality Management District Rule 1403; Caltrans SS Section 14-11.13, and Section 14-11.16					No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Hazardous Waste	**HW-5: Aerially Deposited Lead**. ADL soil sampling would be conducted along the US 101 project corridor in undisturbed soil areas during the Plans, Specifications, and Estimates phase and prior to any soil-disturbance activities. Soil determined to contain lead concentrations exceeding stipulated thresholds must be managed under the July 1, 2016, ADL Agreement between Caltrans and DTSC. This ADL Agreement allows such soils to be safely reused within the project limits as long as all requirements of the ADL Agreement are met, which include preparation of a Lead Compliance Plan (LCP) required for worker safety. Prior to construction, VCTC's resident engineer will ensure that an LCP is developed by a Certified Industrial Hygienist to protect workers from exposure to lead associated with ADL, LBP, and traffic stripe and pavement markings. The LCP will include procedures for the handling, management, sampling, and disposal of material containing lead. ADL and LBP investigations and traffic striping removal are separate tasks usually conducted by separate contractors, which each require a separate LCP.	Section 2.3.5 EIR/EA	Yes	VCTC, Resident Engineer						No
Hazardous Waste	**HW-7: Oil and Gas Wells**. The abandoned Conejo Oil Field near the Camarillo Springs Road interchange (PM 9.6 to PM 10.4) has historic oil wells in the area adjacent to and partially within the existing US 101 corridor, as well as within parcels proposed for property acquisition and TCEs. These areas have the potential to contain soil and groundwater contamination from petroleum hydrocarbons release incidents from equipment or from improperly cased or plugged wells. During the Plans, Specifications, and Estimates phase, a Phase II ESA and geophysical surveys within the project footprint (between PM 9.6 and PM 10.4) would be conducted to determine the presence or absence of petroleum hydrocarbon in soil and groundwater.	Section 2.3.5 EIR/EA	Yes	VCTC						No
Hazardous Waste	**HW-9: Pesticides and Herbicides**. Pesticides and herbicides related to farming activities may be present in soils along the project corridor, primarily between Camarillo Grove Park (PM 10.0) and Ventura Pier (PM 30.0). VCTC's resident engineer will ensure that soil on agricultural land (between PM 10.0 and PM 30.0) that may be disturbed by the project will be sampled for pesticides and herbicides during the Plans, Specifications, and Estimates phase.	Section 2.3.5 EIR/EA	Yes	VCTC, Resident Engineer						No
Air Quality	**AQ-3: Control Ozone Precursor Emissions.** Project grading plans will show the duration of construction. Ozone precursor emissions from construction equipment vehicles will be controlled by maintaining equipment engines in good condition and in proper tune per manufacturer's specifications.	Section 2.3.6 EIR/EA	Yes	VCTC, Contractor						No
Noise	**N-1: Noise Abatement.** Based on the studies completed to date, the project will incorporate noise abatement in the form of the soundwalls described in Section 2.3.7 and listed in Table 2.3.7-4 and Table 2.3.7-5 of the EIR/EA, depending on the selected alternative. These measures may change based on	Section 2.3.7 EIR/EA	Yes	VCTC, Contractor						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	input received from the public. A final decision about whether and how to construct noise abatement will be made on completion of the project design.									
Noise	**N-MM-1:** Based on the findings of the NEPA analysis and the feasibility and reasonableness determination, if the walls outlined as part of the NEPA analysis are not included as abatement, then the following existing walls will be redesigned as replace-in-kind barriers at their existing locations: • Southbound edge of shoulder from STA287+10 through STA276+09, with barrier heights ranging from 5 to 16 feet, Northbound edge of shoulder from STA298+07 through STA329+07, with a barrier height of 12 feet, • Southbound edge of shoulder from STA637+05 through STA648+09, with a barrier height of 10.5 feet, and • Northbound edge of shoulder from STA717+22 through STA723+51, with a barrier height 11 feet.	Section 3.7.13 EIR/EA	Yes	VCTC, Contractor						Yes
Other	**EN-1:** During final design, energy conservation features, including recycling existing asphalt concrete pavements, will be further investigated along with other potential ways to conserve resources.	Section 2.3.8 EIR/EA	Yes	VCTC						No
Biology	**NC-14: Develop and Implement a Wildlife Fencing Plan.** A Wildlife Fencing Plan will be developed and implemented for the chosen build alternative to reduce wildlife/vehicle collisions and guide wildlife to safe crossing locations. Final Wildlife Fencing Plans will include the following considerations, at a minimum: • Guidelines for fencing design • Design of access gates • Construction requirements for fence ends • Facilitation of escape opportunities (if applicable) The plan will be prepared by a qualified biologist and use current resources, based on the best-available science, including *Construction Guidelines for Wildlife Fencing and Associated Escape and Lateral Access Control Measures* (Huijser et al. 2015).	Section 2.4.1 EIR/EA	Yes	VCTC, Qualified Biologist, Contractor						No
Other	**GHG-3:** To minimize the cut and fill quantities, the alternatives have been designed to match the existing grade as much as possible.	Section 3.3.4 EIR/EA	Yes	VCTC						No
Other	**GHG-8:** Maximize the use of recycled materials (tire rubber for example).	Section 3.3.4 EIR/EA	Yes	VCTC						No
Other	**GHG-9:** Water-efficient technologies such as drought-tolerant landscaping, drip irrigation with moisture sensors, and water-saving fixtures will be used.	Section 3.3.4 EIR/EA	Yes	VCTC						No
Other	**GHG-10:** Project features that minimize the need for irrigation and nonnative plants will be selected.	Section 3.3.4 EIR/EA	Yes	VCTC						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Other	**GHG-11:** Replace lighting with ultra-reflective sign materials that are illuminated by headlights to reduce energy used by electric lighting.	Section 3.3.4 EIR/EA	Yes	VCTC						No
Other	**GHG-12:** Conduct workshops/advertising to promote use of mass transportation and carpooling.	Section 3.3.4 EIR/EA	Yes	VCTC						No
Other	**VMT-1:** During final design, VCTC will further investigate proposed strategies and funding resources to reduce forecasted VMT increases from the project and will update the project's list of VMT reduction strategies, accordingly.	Section 3.4.4 EIR/EA	Yes	VCTC						Yes

ROW/PURCHASING

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Other	**RW-1:** Where acquisition and displacement of real property are unavoidable, or if any relocation become necessary, VCTC will ensure that the provisions of the Uniform Act (49 CFR Part 24), as amended, and the Caltrans ROW Manual will be followed.	Section 2.2.8 EIR/EA	Yes	VCTC	49 CFR Part 24					No

PRE-CONSTRUCTION

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Cultural Resources	**CR-3: Establish and Implement an Environmentally Sensitive Area Action Plan and Post-Review Monitoring and Discovery Plan.** The ESA boundary will identify the protected portion of site CA-VEN-223 where archaeological monitoring will be conducted during construction. No construction activity is allowed within 200 feet of the ESA boundaries established for CA-VEN-223 without the Professionally Qualified Staff (PQS) Principal Investigator or Co-Principal Investigator (or consultant equivalent) or PQS Lead Archaeological Surveyor (or consultant equivalent) present. The ESA boundary will be identified and demarcated by ESA fencing, which is described in detail in the ESA Action Plan (FAE Attachment C). The ESA fencing will be installed and checked/confirmed as accurate prior to construction. The fencing will meet the standards identified in Caltrans Standard Specifications Section 14-2 (Caltrans 2024). No construction excavation or ground disturbance will occur outside of the proposed area of direct impact for the project. The area within the ESA proposed for the construction of the retaining wall will be delineated and demarcated prior to construction. This area	Section 2.2.12 EIR/EA	Yes	VCTC, Professional Qualified Staff (PQS) Principal Investigator or Co-Principal Investigator (or consultant equivalent) or PQS Lead Archaeological Surveyor (or consultant equivalent), Project Engineer, Contractor	Caltrans SS Section 14-2					No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	will be fenced or demarcated as appropriate per the proposed location of the retaining wall. The area proposed for construction of the retaining wall is the only area where excavation or ground disturbance will occur within the ESA. The Archaeological Monitoring Area (AMA) will include the entire ESA and a 200-foot buffer around the entire site boundary to ensure that the ESA is enforced, and that monitoring occurs within the AMA. An ESA Action Plan and Post-Review Monitoring and Discovery Plan will be prepared to describe the discovery methods and communication protocol, which will be implemented in the AMA established for the project and all project-related construction activities (FAE Attachment C). All construction personnel will be informed of historic preservation laws that protect archaeological sites from any disturbance or removal of artifacts. The Project Engineer will notify the Lead Environmental Manager, the Caltrans PQS Principal Investigator, or Co-Principal Investigator (or consultant equivalent) at least 2 weeks in advance of construction activities planned to occur within the ESA to ensure that required personnel will be available to monitor and review the ESA boundary protection and identification.									
Cultural Resources	**CR-7: Adjacent Structure Monitoring Plan.** VCTC shall prepare and implement an Adjacent Structure Monitoring Plan (ASMP) to protect adjacent resources, including the contributors to Pierpont Inn District within 200 feet of construction, and the Mattie Gleichmann House, from damage due to construction activities. The ASMP shall be prepared by a qualified and California-licensed professional engineer who is approved by VCTC. The ASMP shall include performance standards that specify: • A qualified and California-licensed professional engineer, in consultation with a qualified historic preservation architect, shall develop monitoring recommendations, based on preconstruction surveys of existing conditions. Monitoring may include the use of vibration monitors, elevation and lateral monitoring points, crack monitors, or other instrumentation determined necessary to protect adjacent buildings from construction-related damage. • Vertical and horizontal movement shall be determined by a California-licensed land surveyor, and vibration thresholds shall be below levels that could damage adjacent buildings. • If thresholds are met, or if noticeable structural damage becomes evident to the project contractor, work shall stop until feasible steps to reduce vibratory levels have been undertaken and minimization measures have been implemented to stabilize adjacent buildings and prevent construction-related damage. Any damage to historic finish materials at nearby buildings shall be repaired in consultation with the property owner and a qualified historic	Section 2.2.12 EIR/EA	Yes	VCTC, Contractor						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	preservation consultant and, if warranted, in a manner that meets the Secretary of the Interior's Standards. • If necessary, as determined by a California-licensed professional engineer, a shoring plan shall be developed to protect adjacent historic resources from excavation or general construction procedures. The shoring plan shall be developed by the contractor and submitted to VCTC and the Caltrans PQS Principal Architectural Historian for review. • The Caltrans PQS Principal Architectural Historian shall be notified of the project's 50 percent and 100 percent points of completion. The Caltrans PQS Principal Architectural Historian (or consultant equivalent) shall conduct walk-through inspections of the Pierpont Inn District and Mattie Gleichman House to determine compliance with this condition of the FAE. If Alternative 2 or 3 is selected as the preferred alternative, the project would have a Section 106 finding of adverse effect on the Adolfo Camarillo Heritage Grove and a Memorandum of Agreement between SHPO, Caltrans, and any consulting parties would be required. The Memorandum of Agreement must be approved and signed by the involved parties prior to circulation of the final Environmental Impact Report/Environmental Assessment for the project. The Memorandum of Agreement will stipulate the responsibilities of SHPO, Caltrans, and any consulting parties for implementing the specified avoidance, minimization, and/or mitigation measures for the Adolfo Camarillo Heritage Grove. The following are proposed mitigation measures that may be included in the MOA under the *Treatment of Historic Properties* stipulation. Consultation under Section 106 regarding the resolution of adverse effects shall continue with participating government agencies and other interested parties through development and execution of the MOA.									
Stormwater	**WQ-3: Prepare and Implement a Stormwater Pollution Prevention Plan.** The project will prepare and implement an acceptable SWPPP. The SWPPP will identify temporary construction site BMPs that have demonstrated effectiveness at reducing stormwater pollution. The SWPPP will address all construction-related activities, equipment, and materials that have the potential to affect water quality. All Construction Site BMPs will follow the latest edition of the Stormwater Quality Handbooks, Construction Site BMPs Manual to control and minimize the impacts of construction-related pollutants. The SWPPP will include BMPs to control pollutants, sediment from erosion, stormwater runoff, and other construction-related impacts. In addition, the SWPPP will include implementation of specific stormwater effluent monitoring requirements based on the project's risk level to ensure that the implemented BMPs are effective in preventing discharges from exceeding any of the water quality standards.	Section 2.3.2 EIR/EA	Yes	VCTC, Contractor						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Water Quality	**WQ-5: Implement Design Pollution Prevention BMPs.** As specified in the Caltrans Stormwater Management Plan (Caltrans 2016), the project would be required to incorporate Design Pollution Prevention BMPs to prevent erosion and promote infiltration.	Section 2.3.2 EIR/EA	Yes	VCTC, Contractor						No
Hazardous Waste	**HW-1: Construction Health and Safety Plan**. Prior to construction, VCTC's resident engineer will ensure the development of a Health and Safety Plan (HASP) to be implemented during construction activities. A Certified Industrial Hygienist will prepare the HASP to guide all construction activities. The HASP will identify all potential hazards and contain specific procedures for encountering expected and unexpected contaminants. The HASP will prescribe safe work practices, contaminant monitoring, personal protective equipment, emergency response procedures, and safety training requirements to protect construction workers and third parties. The HASP will meet the requirements of 29 Code of Federal Regulations 1910 and 1926, and all other applicable federal, state, and local regulations and requirements. The designated contractor will be responsible for preparing the HASP before the start of construction.	Section 2.3.5 EIR/EA	Yes	VCTC, Resident Engineer	29 Code of Federal Regulations 1910 and 1926					No
Hazardous Waste	**HW-2: Contaminated Media Management Plan**. Prior to construction, VCTC's resident engineer will ensure the preparation of a Contaminated Media Management Plan. This plan will include procedures for contaminant monitoring and identification, and temporary storage, handling, treatment, and disposal of waste and materials (including soil) in accordance with applicable federal, State, and local regulations and requirements. The designated contractor will be responsible for preparing the Contaminated Media Management Plan before the start of construction.	Section 2.3.5 EIR/EA	Yes	VCTC, Resident Engineer, Contractor						No
Hazardous Waste	**HW-3: Construction Contingency Plan**. Prior to construction, VCTC's resident engineer will ensure the preparation of a Construction Contingency Plan (CCP), in accordance with the guidance provided in Chapter 7-107 of the Caltrans Construction Manual for handling and dealing with unknown hazards (refer to Figure 7-1.1 of the Caltrans Construction Manual for the Caltrans Unknown Hazards Procedure). The CCP will include provisions for responding to events such as the discovery of unidentified underground storage tanks, hazardous materials, petroleum hydrocarbons, or hazardous or solid wastes during construction. The CCP will address underground storage tank decommissioning, field screening, and material testing methods; mitigation and contaminant management requirements; and health and safety requirements for construction workers. If an unexpected release of hazardous substances is found in reportable quantities, the National Response Center must be notified by calling 1-800-424-8802, and cleanup must be coordinated with environmental agencies. The designated contractor will be responsible for preparing the CCP before the start of construction.	Section 2.3.5 EIR/EA	Yes	VCTC, Resident Engineer, Contractor	Chapter 7-107 of the Caltrans Construction Manual					No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Biology	**NC-1: Install Barriers.** Prior to clearing or construction, highly visible barriers (e.g., orange construction fencing) will be installed under the supervision of a qualified biologist around all Sensitive Natural Communities that will be avoided and are adjacent to the project limits of disturbance to designate ESAs to be preserved. The riparian communities that occur within the BSA are dynamic and can change depending on precipitation events, associated scour, and flood-control maintenance activities. As such, ESA fencing in areas to be avoided may need to be field adjusted prior to construction. No grading or fill activity of any type will be permitted within these ESAs. All construction equipment will be operated in a manner to prevent accidental damage to ESAs. Silt fence barriers will be installed at the ESA boundary to prevent accidental deposition of fill material in areas where vegetation is immediately adjacent to planned grading activities.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor, Qualified Biologist						No
Biology	**NC-2: Conduct Preconstruction Plant and Wildlife Surveys**. Prior to construction, the biological monitor will perform a preconstruction survey for sensitive plant and wildlife species to avoid. Surveys will focus on special status species having the potential to occur within the work area. Any plant populations will be flagged with ESA fencing or other identifiable flagging, and crews will be instructed to avoid these areas if they can feasibly be avoided. The qualified project biologist will monitor construction activities near the location for the duration of the proposed project at a frequency necessary to ensure that practicable measures are being employed. Ongoing monitoring and reporting will occur for the duration of the construction activity to ensure implementation of avoidance and minimization measures.	Section 2.4.1 EIR/EA	Yes	VCTC, Qualified Biologist						No
Biology	**NC-8: Develop and Implement an SWPPP.** A Storm Water Pollution Prevention Plan (SWPPP) will be developed prior to construction to minimize erosion and identify specific pollution-prevention measures that will eliminate or control potential point- and nonpoint-pollution sources on site during and following the project construction phase. The SWPPP will ensure that no pollutants or sediment from construction will enter waterways or ESA-fenced areas. The SWPPP will identify specific BMPs to be implemented during project construction to avoid causing or contributing to any water quality standard exceedances. In addition, the SWPPP will contain provisions for changes to the plan, such as alternative mechanisms, if necessary, during project design and/or construction to achieve the stated goals and performance standards. Sediment- and erosion-control measures will be implemented until such time that soils are determined to be successfully stabilized.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-11: Prepare a Weed-Abatement Plan.** A weed-abatement plan will be developed to minimize the spread and importation of nonnative plant material during and after construction in	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	compliance with Executive Order (EO) 13112 and will include the following. • Any exotic species removed during construction will be properly handled to prevent sprouting or regrowth. Care will be taken to not spread exotic plant seeds during plant removal, and plants will be removed prior to flowering, if feasible. • Equipment (e.g., vehicles, trucks, heavy equipment) will be cleaned of mud or other debris that may contain invasive plants and/or seeds and inspected prior to entering the worksite and between worksites to reduce the potential of spreading noxious weeds. Cleaning of equipment will occur in a designated area at least 300 feet from ESA fencing. • Trucks carrying loads of vegetation to be removed from the project footprint will be covered and disposed of in accordance with applicable laws and regulations. • Only certified weed-free straw, mulch, and/or fiber rolls will be used for erosion control. Fill material will be obtained from weed-free sources. • All revegetated areas will avoid the use of species listed on California Invasive Plant Council's (Cal-IPC's) California Invasive Plant Inventory.									
Biology	**WET-3: Aquatic Resources Compensation.** To address effects on jurisdictional aquatic resources, a compensatory mitigation plan will be developed during the permitting phase of the selected alternative and include a minimum ratio of 1:1 for permanent impacts on jurisdictional resources. The required mitigation will be implemented through the use of an agency-approved mitigation bank, in-lieu fee provider, permittee-responsible mitigation site, or any other agency-approved mitigation provider.	Section 2.4.2 EIR/EA	Yes	VCTC						Yes
Biology	**PS-1: Rare Plants ESA Fencing.** Prior to clearing or construction, Environmentally Sensitive Area fencing will be installed around designated special status plant population boundaries adjacent to the project footprint to designate Environmentally Sensitive Areas to be avoided (see **NC-1**).	Section 2.4.3 EIR/EA	Yes	VCTC, Contractor						No
Biology	**PS-3: Preconstruction Rare Plant Surveys.** Before ground disturbance begins, a qualified botanist will survey all proposed construction and access areas for the presence of Catalina mariposa lily, small-flowered morning-glory, Blochman's dudleya, and Conejo buckwheat. Preconstruction surveys will occur during the appropriate season and in accordance with established protocols up to 1 year in advance of construction, provided that temporary construction easements (TCEs) have been granted for the construction areas. Surveys will be conducted in all construction areas that contain suitable habitat for special status plant species. The surveys will document plant locations relative to the construction areas, as well as	Section 2.4.3 EIR/EA	Yes	VCTC, Qualified Botanist						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	avoidance measures, where feasible. If construction starts prior to the appropriate season, and preconstruction surveys are not feasible, then plant documentation regarding the avoidance measures and Environmentally Sensitive Area fencing will rely on previous population locations.									
Biology	**PS-4: Mapping, Recording, and Avoidance of Rare Plants.** Populations of Catalina mariposa lily, small-flowered morning-glory, Blochman's dudleya, and Conejo buckwheat will be clearly mapped and recorded, along with the approximate number of individuals in each population and their respective condition. To the maximum extent feasible, construction areas and access roads will be adjusted to avoid any loss of Catalina mariposa lily, small-flowered morning-glory, Blochman's dudleya, or Conejo buckwheat individuals, as well as impacts on the habitats that support these species.	Section 2.4.3 EIR/EA	Yes	VCTC, Contractor						No
Biology	**AS-1: Bat Preconstruction Surveys.** Prior to the start of project construction, a daytime assessment will be conducted by a qualified bat biologist to reexamine structures that are suitable for bat use. If bat sign is observed at that time, then nighttime bat surveys will be conducted to confirm whether the structures with suitable habitat identified during the preliminary assessment are utilized by bats for day roosting and/or night roosting, ascertain the level of bat foraging and roosting activity at each of these locations, and perform exit counts and visually determine the approximate number of bats utilizing the roosts. Acoustic monitoring will also be used during these surveys to identify the bat species present and determine an index of relative bat activity for that site on that specific evening.	Section 2.4.4 EIR/EA	Yes	VCTC, Qualified Bat Biologist						No
Biology	**AS-2: Bat Maternity Roost Preconstruction Surveys.** A qualified bat biologist will survey the BSA prior to construction to assess the potential for maternity roosts in the BSA. The surveys may include a combination of structure and tree inspection, sampling, exit counts, and acoustic surveys.	Section 2.4.4 EIR/EA	Yes	VCTC, Qualified Bat Biologist						No
Biology	**AS-3: Tree Trimming and Removal Preconstruction Surveys and Restrictions.** The removal of mature trees and snags will be minimized to the greatest extent practicable. Prior to tree removal or trimming, large trees and snags will be examined by a qualified bat biologist to ensure that no roosting bats are present. To avoid potential mortality to flightless young, palm-frond trimming, if necessary, will be conducted outside of the maternity season (i.e., April 1–August 31).	Section 2.4.4 EIR/EA	Yes	VCTC, Qualified Bat Biologist, Contractor						No
Biology	**AS-8: Aquatic Species Pre-Construction Surveys.** If construction activities are to occur within drainages containing water, then preconstruction surveys for special status fish and aquatic wildlife species (e.g., arroyo chub, western pond turtle, two-striped gartersnake, south coast gartersnake) will be performed within 30 days prior to the start of any construction work.	Section 2.4.4 EIR/EA	Yes	VCTC, Qualified Biologist						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Biology	**AS-10: Nesting Bird Pre-Construction Surveys and Management.** A Nesting Bird Management Plan will be drafted to provide a comprehensive approach for handling nesting birds prior to the commencement of construction. It will include the following items. • If vegetation clearing is to occur during the avian nesting season (i.e., February 1–September 1), then the designated biologist will conduct a preconstruction survey of construction areas and adjacent habitat in the near vicinity no more than 72 hours prior to construction to identify the locations of avian nests. Should nests be found, an appropriate buffer will be established around each nest site by a qualified biologist/biological monitor until nesting is completed. • If there is a lapse in construction activities longer than 7 days during the bird-breeding season, then nesting-bird habitat within the BSA will be resurveyed. • Any bridges with swallow nesting habitat will be cleared of all swallow nests prior to any work conducted between February 1 and September 1. Swallow nests will be removed under the guidance of a qualified biologist prior to February 1, before swallows return to the nesting site. Removal of swallow nests that are under construction must be repeated as frequently as necessary to prevent nest completion or until a nest-exclusion device is installed (e.g., netting or a similar mechanism that keeps swallows from building nests). Nest removal and exclusion-device installation will be monitored by a qualified biologist. Such exclusion efforts must be continued to keep the structures free of swallows, as well as swifts utilizing bridge holes, until September 1 or completion of construction. All nest-exclusion techniques will be coordinated between resource agencies, as applicable.	Section 2.4.4	Yes	VCTC, Qualified Biologist, Contractor						No
Biology	**AS-11: Sensitive Wildlife Preconstruction Clearance Surveys.** Preconstruction clearance surveys for non-listed state special-status wildlife species will be performed within 48 hours prior to construction to flush the species (i.e., encourage to move) from the construction footprint. No nesting birds will be flushed during the nesting season. Bats will not be flushed, but will be protected as specified in measures **AS-1** through **AS-4**. Amphibians, reptiles, and burrowing wildlife will be relocated from the site of temporary or permanent impacts, as feasible, during preconstruction clearance surveys.	Section 2.4.4 EIR/EA	Yes	VCTC, Qualified Biologist, Contractor						No
Biology	**TE-1: Burrowing Owl Preconstruction Surveys.** To determine if burrowing owls are occupying the project limits or adjacent areas prior to construction, a take avoidance survey following CDFW protocol (2012) will be conducted no more than 14 days prior to initiating ground-disturbing activities. In addition, any time lapses between project activities will trigger subsequent take-avoidance surveys. The survey will be	Section 2.4.5 EIR/EA	Yes	VCTC, Qualified Biologist						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	conducted from civil twilight to 10:00 a.m. or 2 hours before sunset until evening civil twilight within areas providing suitable habitat for burrowing owl. The survey will include the proposed project limits and a 300-foot buffer if performed between February 15 and August 31 (nesting season) and a 100-foot buffer if conducted outside of the nesting season. If burrowing owls are present within 300 feet of project activities during the breeding season or within 100 feet of project activities outside of the nesting season, then measure **TE-2** or **TE-3** will be implemented, as applicable.									
Biology	**TE-4: Biological Training.** A Biological Resource Information program will be developed for all construction personnel and implemented prior to construction. At a minimum, the program will include the following topics: (1) the biology, conservation, and legal status of federally and state-listed species, Candidate species, and special-status species occurring or potentially occurring within the project site; (2) responsibilities of the biological monitor; (3) delineation and flagging of adjacent habitat; (4) limitations on the movement of those employed on the site, including the ingress and egress of equipment and personnel, to designated construction zones (personnel will not be allowed access to adjacent sensitive habitats); (5) onsite pet prohibitions; (6) use of trash containers for disposal and removal of trash; and (7) project features designed to reduce impacts on listed species and habitat and promote continued successful occupation of adjacent habitat areas. Supporting materials will be provided to all construction personnel during the training program.	Section 2.4.5 EIR/EA	Yes	VCTC, Contractor						No
Biology	**TE-5: Crotch's Bumble Bee Preconstruction Surveys and Management.** If project work is to occur during the active Crotch's bumble bee season (late February to early October) or during the blooming season for flowering plants that support Crotch's bumble bee, then preconstruction surveys will be performed prior to the start of any project construction or ground disturbance to ensure that Crotch's bumble bee is not active within the project area. If this species is detected, then consultation with CDFW will be required.	Section 2.4.5 EIR/EA	Yes	VCTC, Qualified Biologist						No
Biology	**TE-6: Crotch's Bumble Bee Environmentally Sensitive Area Fencing.** Prior to clearing or construction, Environmentally Sensitive Area fencing will be installed around all habitat that contains suitable soils and/or areas with annual flowering plants that support Crotch's bumble bee adjacent to the project footprint to designate Environmentally Sensitive Areas to be avoided (see measure **NC-1**).	Section 2.4.5 EIR/EA	Yes	VCTC, Contractor						No
Biology	**TE-7: Monarch Breeding Habitat Preconstruction Surveys and Environmentally Sensitive Area Fencing.** Preconstruction surveys will be performed to identify areas where milkweed, the host plant of monarch butterfly, is present within the project limits of disturbance. Any individual milkweed that is found will be flagged and demarcated as an Environmentally Sensitive Area to be avoided, to the maximum	Section 2.4.5 EIR/EA	Yes	VCTC, Contractor						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	extent feasible. Any milkweed plants within the project work that cannot be avoided will be relocated to the edge of the ROW and outside of the project impact area.									
Biology	**TE-10: Least Bell's Vireo Preconstruction Surveys and Management.** If the clearing of riparian vegetation occurs during the active breeding season for least Bell's vireo (March 15–September 15), then a qualified biologist will conduct preconstruction surveys within 3 days prior to vegetation removal within suitable habitat to identify the locations of any individual least Bell's vireo. If nesting activities or active nests are discovered within the project impact area, then a buffer zone will be clearly marked by the biologist, and no construction activities will occur within the buffer zone until the young have fledged or the nest is no longer active. Alternatively, conditions of the biological opinion will be implemented for active nests. If take of an active nest were to occur, then Section 2081 consultation with CDFW will be required.	Section 2.4.5 EIR/EA	Yes	VCTC, Qualified Biologist, Contractor						No

CONSTRUCTION

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Other	**COM-1:** During construction, temporary impacts on parking will be minimized to the extent feasible. Construction staging and phasing will be designed to limit the duration and extent of parking space closures. Other parking impact minimization measures could include reducing the work zone area and implementing temporary parking by restriping or shifting to parallel parking.	Section 2.2.8 EIR/EA	Yes	VCTC, Contractor						No
Visual Resources	**VIA-5: Avoid Nighttime Work When Possible.** Nighttime work near residential, open space, or other sensitive areas will be minimized whenever possible. Construction lighting will be directed toward work areas and will utilize full box cutoff light shields to minimize light spill to adjacent areas.	Section 2.2.11 EIR/EA	Yes	VCTC, Contractor						No
Visual Resources	**VIA-6: Parking and Staging**. Avoid parking or staging of construction equipment or materials within Coastal Zone segments within view of beach areas or San Buenaventura State Beach.	Section 2.2.11 EIR/EA	Yes	VCTC, Contractor						No
Cultural Resources	**CR-1: Unanticipated Discovery Protocol.** If cultural materials are discovered during construction, all earthmoving activity within 60 feet of the discovery area will be diverted until a qualified archaeologist can assess the nature and significance of the find. All unanticipated discoveries will follow the identification and communication protocols outlined in the ESA Action Plan and Post-Review Monitoring and Discovery Plan (FAE Attachment C) and be conducted in accordance with Caltrans policy and the Caltrans 2023 Standard Specifications. As part of the notification process, District 7 shall notify the Cultural Studies Office, the SHPO, and notified parties within 48 hours of the discovery, where appropriate per resource type and NRHP eligibility status. Caltrans will then invite the notified parties to be involved in resolving the discovery in accordance with 36 CFR 800.13(b), 800.13(b)(3), and 800.13(c). Further provisions of Caltrans 2023 Standard Specifications 14-2.03 are to be followed as appropriate.	Section 2.2.12 EIR/EA	Yes	VCTC, Qualified Archaeologist, Contractor	Caltrans SS Section 14-1.02, 14-2.03A					No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Cultural Resources	**CR-2: Human Remains.** If human remains are discovered, State Health and Safety Code Section 7050.5 states that further disturbances and activities shall cease in any area or nearby area suspected to overlie remains, and the county coroner contacted. Pursuant to PRC Section 5097.98, if the remains are thought to be Native American, the coroner will notify the Native American Heritage Commission, which will then notify the Most Likely Descendant (MLD). At this time, the person who discovered the remains will contact the Caltrans District 7 Native American Coordinator, Kip Harper, at (213) 332-0316 so that she may work with the MLD on the respectful treatment and disposition of the remains. Further provisions of PRC Section 5097.98 are to be followed as applicable.	Section 2.2.12 EIR/EA	Yes	VCTC, Contractor, Caltrans District 7 Native American Coordinator	Caltrans SS Section 14-2.03A					No
Cultural Resources	**CR-4: Archaeological and Native American Monitoring.** Caltrans PQS Principal Investigator or Co-Principal Investigator (Prehistoric and Historical Archaeology) or consultant equivalent (Lead Archaeological Monitor) and PQS Lead Archaeological Surveyor (or consultant equivalent) (Archaeological Monitor) will be responsible for all archaeological monitoring. The PQS Principal Investigator or Co-Principal Investigator (or consultant equivalent) will be notified when construction begins and will coordinate to monitor the ESA and AMA during excavation work within 200 feet of the ESA and the subsurface work within the ESA. The Project Engineer, Project Construction Lead, PQS Principal Investigator or Co-Principal Investigator (or consultant equivalent), and identified Native American monitor(s) will conduct a field review at least 10 days before the start of job-site activities. The PQS Lead Archaeological Surveyor (or consultant equivalent) and Native American monitor(s) will monitor ground-disturbing activities within the AMA. If the ESA is breached for any non-authorized reason, the PQS Lead Archaeological Surveyor (or consultant equivalent) will have the authority to immediately: • Stop all work within 50 feet of the ESA boundary, that has not already been approved. Driving through the site will be allowed only on paved surfaces. • The only allowable work within the ESA will be for construction of the retaining wall. • Secure the area. • Notify the Project Engineer, the Lead Environmental Manager, and Caltrans PQS Principal Investigator or Co-Principal Investigator (or consultant equivalent) (Lead Archaeological Monitor). Upon completion of construction, the PQS Lead Archaeological Surveyor (or consultant equivalent) (Archaeological Monitor) will monitor the removal of the fencing and observe the backfilling of any post holes with soil removed during the installation with approved clean fill sediments. An archaeological monitoring report will be completed detailing the results of the monitoring efforts when the monitoring effort has been terminated. The Post-Review Monitoring and Discovery Plan can be found in FAE Attachment C.	Section 2.2.12 EIR/EA	Yes	VCTC, Caltrans PQS Principal Investigator or Co-Principal Investigator (Prehistoric and Historical Archaeology) or consultant equivalent (Lead Archaeological Monitor) and PQS Lead Archaeological Surveyor (or consultant equivalent), Project Engineer, Project Construction Lead	Caltrans SS 14-2.03B					No
Cultural Resources	**CR-5: Partially Transparent Soundwall.** Ventura County Transportation Commission (VCTC) shall construct a partially transparent soundwall at the location of Soundwall S1522, near the Pierpont Inn District and Main Building, consisting of 4 feet of a transparent acrylic sound-dampening material atop a concrete block wall 14 feet in height.	Section 2.2.12 EIR/EA	Yes	VCTC, Contractor						No
Cultural Resources	**CR-6: Cast-in-Drilled-Hole Piles.** CIDH piles and a slurry displacement method shall be used at the San Jon Creek Bridge (Bridge No. 52-0163R) and at the Vista Del Mar undercrossing (Bridge No. 52-0152R) to reduce the possibility for vibrational damage at the Pierpont Inn District and the Mattie Gleichmann House. If CIDH piles and a slurry displacement method are not feasible because of geologic conditions, including groundwater tables, at either bridge, the contractor shall notify the Caltrans PQS Principal Architectural Historian and introduce pile cushioning when implementing traditional pile-driving techniques.	Section 2.2.12 EIR/EA	Yes	VCTC, Contractor						No
Cultural Resources	**CR-MM-1: Proposed Mitigation Measures for the Adolfo Camarillo Heritage Grove** • In-kind replacement of every tree removed for construction of the project, on axis with the existing trees. • Preparation of an arborist report of the Adolfo Camarillo Heritage Grove, to include a framework for long-term treatment, maintenance, and protection; a feasibility assessment for deep-root irrigation; and a maintenance plan including a historic preservation component to guide the City of Camarillo and Caltrans	Section 2.2.12 EIR/EA	Yes	VCTC						Yes

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	to ensure the historic property's continued integrity. All reports of this nature should be completed prior to the start of construction. • Completion of an update to the existing National Register of Historic Places nomination for the Camarillo Ranch property to include the Adolfo Camarillo Heritage Grove, to be completed prior to construction. • Development of a print-on-demand booklet, including historical information about Adolfo Camarillo and photographs of the Adolfo Camarillo Heritage Grove. • Development of an interpretive program focused on Adolfo Camarillo, the Adolfo Camarillo Heritage Grove, and the history of Camarillo during the period of significance, including, but not limited to the following: o An ArcGIS Story Map or educational website to cover the history of Camarillo, Camarillo Ranch, the Adolfo Camarillo Heritage Grove, and its change over time. o Interpretive panel(s) along the bike path through the Adolfo Camarillo Heritage Grove, to include information regarding Adolfo Camarillo, the Adolfo Camarillo Heritage Grove, and its connection to Camarillo Ranch.									
Other	**HYD-1: Schedule Construction during the Dry Season.** To the maximum extent possible, construction activities would occur during the dry season. In the event of heavy rain, the construction site manager would move all construction equipment outside of the Special Flood Hazard Area Zones with a 1 percent annual chance of a flood event within the US 101 project area.	Section 2.3.1 EIR/EA	Yes	VCTC, Contractor						No
Water Quality	**WQ-1: Implement Stormwater Treatment BMPs.** The project will conform to the requirements of the Caltrans Statewide NPDES Stormwater Permit, Order No. 2022-0033-DWQ, NPDES No. CAS000003, adopted by the SWRCB on June 22, 2022, and any subsequent permit in effect at the time of construction. The Caltrans Statewide Permit requires the implementation of treatment BMPs to minimize potential water quality and hydrological impacts associated with operation of the project.	Section 2.3.2 EIR/EA	Yes	VCTC, Contractor						No
Water Quality	**WQ-2: Implement Temporary Construction Site BMPs.** The project will comply with the requirements of the NPDES Permit for Construction Activities, Order No. 2022-0057-DWQ, NPDES No. CAS000002, as well as implementation of the BMPs specified in the Caltrans Stormwater Management Plan (Caltrans 2016).	Section 2.3.2 EIR/EA	Yes	VCTC, Contractor						No
Water Quality	**WQ-4: Construction Site Dewatering.** If dewatering is expected for the preferred alternative, the project will fully conform to the requirements specified in the applicable dewatering NPDES permit: Los Angeles RWQCB Order No. R4-2023-0429 (NPDES No. CAG994004).	Section 2.3.2 EIR/EA	Yes	VCTC, Contractor						No
Other	**GEO-4: Observation of Earthwork.** During construction, a qualified geotechnical engineer will observe earthwork to verify that it exposes firm and unyielding subgrade soils. Fill placed on sloping ground will be properly keyed and benched into the existing ground and placed as specified in Caltrans Standard Specifications (2024).	Section 2.3.3 EIR/EA	Yes	VCTC, Qualified Geotechnical Engineer						No
Hazardous Waste	**HW-6: Paint and Thermoplastic Striping**. Paint used for traffic striping and pavement marking may contain lead chromate. During construction, VCTC's resident engineer will ensure that sampling, analysis, removal, and disposal of any traffic striping and pavement materials will be completed in accordance with Construction Program Procedure Bulletin 99-2; Caltrans Standard Specifications Section 14-11.12, Removal of Yellow Traffic Stripe and Pavement Marking with Hazardous Waste Residue, and Section 36-4, Residue Containing Lead from Paint and Thermoplastic (2018); and Caltrans Construction Manual Chapter 7-107E, Removing Yellow Traffic Stripe and Pavement Marking with Hazardous Waste Residue (2019). Before disposal, the contractor is required to sample the removed material for proper waste classification. Yellow traffic stripe and pavement marking that is characterized as hazardous waste requires disposal to a DTSC-permitted Class I disposal facility.	Section 2.3.5 EIR/EA	Yes	VCTC, Resident Engineer, Contractor	SS Section 14-11.12 Section 36-4 and Caltrans Construction Manual, Chapter 7-107E					No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Hazardous Waste	**HW-8: Treated Wood Waste**. Wooden guardrail posts and wooden posts supporting roadway signs may contain creosote and pentachlorophenol. During construction, VCTC's resident engineer will ensure that treated wood objects are handled as TWW and managed per Chapter 34, Title 22 California Code of Regulations Sections 67386.1 through 67386.12, Alternative Management Standards for Treated Wood Waste, and in accordance with Caltrans Standard Specifications Section 14-11.14, Treated Wood Waste. All TWW shall be properly disposed at a landfill permitted to accept TWW.	Section 2.3.5 EIR/EA	Yes	VCTC, Resident Engineer, Contractor						No
Hazardous Waste	**HW-10: Construction Generated Hazardous Waste**. Construction of the project may generate hazardous waste. Hazardous wastes generated during construction of the project would require disposal and could include used oil (not hazardous), sediment from vehicle washing, petroleum materials, cleaning solvents, and paint. VCTC's resident engineer will ensure that all hazardous waste generated during construction will be handled, stored, and disposed of in accordance with Caltrans Standard Specifications Section 7-107A of the Caltrans Construction Manual.	Section 2.3.5 EIR/EA	Yes	VCTC, Resident Engineer, Contractor	SS Section 7-107A					No
Air Quality	**AQ-1: Adhere to Caltrans Standard Specifications.** The contractor will adhere to Caltrans Standard Specifications for construction (Section 14-9.02) and nonstandard Special Provision (nSSP) 14-9.05, which require the contractor to comply with all applicable laws and regulations related to air quality, including air pollution control district and air quality management district regulations and local ordinances.	Section 2.3.6 EIR/EA	Yes	VCTC, Contractor	SS Section 14-9.02, nonstandard Special Provision (nSSP) 14-9.05					No
Air Quality	**AQ-2: Comply with State Vehicle Code Section 23114.** All trucks that are to haul excavated or graded material on site will comply with State Vehicle Code Section 23114, with special attention to Sections 23114(b)(F), (e)(2), and (e)(4), as amended, regarding the prevention of such material spilling onto public streets and roads.	Section 2.3.6 EIR/EA	Yes	VCTC, Contractor	State Vehicle Code Section 23114, with special attention to Sections 23114(b)(F), (e)(2), and (e)(4)					No
Air Quality	**AQ-4: Control Fugitive Dust Emissions.** During clearing, grading, earthmoving, or excavation, fugitive dust emissions will be controlled by regular watering or other dust preventive measures using the following procedures, as specified in VCAPCD Rule 55. All material excavated or graded will be sufficiently watered to prevent excessive amounts of dust. Watering will occur at least twice daily with complete coverage, preferably in the late morning and after work is done for the day. All material transported on site or off site will be either sufficiently watered or securely covered to prevent excessive amounts of dust. The areas disturbed by clearing, grading, earthmoving, or excavation operations will be minimized so as to prevent excessive amounts of dust. These control techniques will be indicated in project specifications. Visible dust beyond the property line emanating from the project will be prevented to the maximum extent feasible.	Section 2.3.6 EIR/EA	Yes	VCTC, Contractor	VCAPCD Rule 55					No
Noise	**N-1: Sound Control Will Conform to the Provisions in Section 14-8.02, Noise Control, of the Caltrans Standard Specifications (2023).** According to requirements of these specifications, construction noise cannot exceed 86 dBA L_{max} at 50 feet from the job site activities from 9:00 p.m. to 6:00 a.m.	Section 2.3.7 EIR/EA	Yes	VCTC, Contractor	Caltrans SS Section 14-8.02					No
Noise	**N-2: Control Measures to Minimize Noise.** The following are control measures that will be implemented to minimize noise disturbances at sensitive areas during construction: • All equipment will have sound-control devices no less effective than those provided on the original equipment. Each internal combustion engine used for any purpose on the job site or related to the job will be equipped with a muffler of a type recommended by the manufacturer. No internal combustion engine will be operated on the job site without an appropriate muffler.	Section 2.3.7 EIR/EA	Yes	VCTC, Contractor						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	• Construction methods or equipment types that generate the lowest level of noise impact will be used. • Idling equipment will be turned off. • Truck loading, unloading, and hauling operations will be restricted so that noise and vibration are kept to a minimum throughout residential neighborhoods to the greatest possible extent. • Construction activities will be coordinated so that recommended permanent soundwalls are built during the first phase of construction to protect sensitive receptors from subsequent construction noise, dust, light, glare, and other impacts to the extent feasible. • Where feasible, temporary soundwalls will be used and relocated, as needed, to protect sensitive receptors against excessive noise from construction activities involving large equipment and small items such as compressors, generators, pneumatic tools, and jackhammers. Soundwalls can be made of heavy plywood, moveable insulated sound blankets, or other best available control techniques. • Construction activities will be minimized in residential areas during evening, nighttime, weekend, and holiday periods. Noise impacts are typically minimized when construction activities are performed during daytime hours; however, nighttime construction may be desirable (e.g., in commercial areas where businesses may be disrupted during daytime hours) or necessary to avoid major traffic disruption. Coordination with each city will occur before construction can be performed in noise-sensitive areas. • Construction lay-down or staging areas will be selected in industrially zoned districts. If industrially zoned areas are not available, then commercially zoned areas may be used or locations that are at least 100 feet from any noise-sensitive land use (e.g., residences).									
Noise	**N-3: Minimize Construction Vibration**. The following procedures will be used to minimize the potential impacts from construction vibration: • The hours of vibration-intensive equipment or activities such as vibratory rollers will be restricted so that impacts on residents are minimal (e.g., weekdays during daytime hours only, when as many residents as possible are away from home). • The owner of a building that is close to a construction vibration source with the potential to cause damage to a structure is entitled to a preconstruction building inspection to document the preconstruction condition of that structure. • Vibration monitoring will be conducted during vibration-intensive activities, such as the use of vibratory compaction rollers, demolitions, or pavement breaking.	Section 2.3.7 EIR/EA	Yes	VCTC, Contractor						No
Other	**EN-2:** Light fixtures and traffic signals will be replaced or installed with highly efficient light-emitting diodes (LEDs).	Section 2.3.8 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-3: Prohibit Access to ESAs.** No construction activities, materials, or equipment will be allowed within the ESAs. Construction personnel will strictly limit their activities, vehicles, equipment, and construction materials to the limits of disturbance and designated staging areas and routes of travel. The construction area(s) will be the minimal area necessary to construct the project, and ESAs will be specified in the final design plans. Employees will be instructed that their activities are restricted to the construction areas. Access to sites will be from pre-existing access routes to the greatest extent possible.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-4: Maintain ESA Fencing.** The ESA fencing will be inspected by the biological monitor at a frequency necessary to ensure that it is in place and properly maintained. ESA fencing and exclusion fencing will remain in place and be maintained until project construction is completed.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor, Biological Monitor						No
Biology	**NC-5: Monitor Work Activities within Sensitive Areas.** A biological monitor will be present on site during clearing/grubbing and earthwork within or adjacent to sensitive natural communities or other protected biological resources to ensure that avoidance and minimization measures are in place, according to	Section 2.4.1 EIR/EA	Yes	VCTC, Biological Monitor,						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	specifications, and will monitor construction in the vicinity of biological resources at a frequency necessary to ensure that avoidance and minimization measures are properly followed. The biological monitor will report any noncompliance to the resident engineer within 24 hours.			Resident Engineer						
Biology	**NC-6: Maintain Hydrologic Connectivity.** Hydrologic connectivity will be maintained within drainages during the duration of construction. No erodible materials will be deposited into watercourses or areas demarcated with ESA fencing. Vegetation, loose soils, or other debris material will not be stockpiled within stream channels or on adjacent banks.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-7: Site Work Areas away from Sensitive Habitats.** Equipment storage, fueling, and staging areas will be sited on upland sites with minimal risks of direct drainage into riparian areas or other sensitive habitats. These designated areas will be sited so as to prevent any runoff from entering sensitive habitat. Necessary precautions will be taken to prevent the release of cement or other toxic substances into surface waters. Project-related spills of hazardous materials will be reported to appropriate entities, including, but not limited to, the applicable jurisdictional city (i.e., Cities of Thousand Oaks, Camarillo, Oxnard, or Ventura), U.S. Fish and Wildlife Service (USFWS), CDFW, and RWQCB, and will be cleaned up immediately. Contaminated soils removed to an approved disposal area.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-9: Protect against Human-Caused Fires.** When work is conducted during the fire season (as identified by the Ventura County Fire Department), appropriate fire-fighting equipment (e.g., extinguishers, shovels) and a water tender will be available on the project site during all phases of project construction to help minimize the chance of human-caused wildfires. Shields, protective mats, and/or other fire-prevention equipment and methods will be used during grinding, welding, and other spark-inducing activities near vegetated areas.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-10: Control Dust**. Active construction areas will be watered regularly to control dust and minimize impacts on adjacent vegetation. Dust control measures may include wetting work areas, using soil binders on dirt surfaces, and/or wetting or covering stockpiles. If water trucks are to be used, then pooling of water will be avoided to minimize the potential of attracting opportunistic predators.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-15: Ensure Safe/Nonintrusive Staging Practices.** No equipment or materials will be staged or stored in a manner that will impede movement of any fish or wildlife species through existing bridges, wildlife crossings, and wildlife linkages/corridors.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-16: Limit Construction Hours and Unnecessary Lighting.** Contractors should avoid nighttime construction to the extent practicable and keep night lighting from spilling into potential wildlife movement areas through the use of shielding and height minimization. If night work is required, then construction lighting should avoid illuminating natural lands and should be restricted to the immediate work area. The use of bulbs of a spectrum, wavelength, and intensity that minimizes disruption to wildlife should also be considered.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-17: Identify Existing Wildlife Movement Areas.** Existing structures known to be used for wildlife movement (e.g., culverts, bridges, wildlife crossings) will be identified on construction plans and documents to support implementation of relevant avoidance, minimization, and mitigation measures.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-18: Maintain Openness and Line of Sight.** For many prey species (e.g., deer, fox), openness and clear line of sight from end to end and on the horizontal plane should be maintained when possible.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-19: Provide Cover to Accommodate Wildlife Movement.** Small animals, such as rodents, reptiles, and birds, prefer cover when using crossing structures, and sufficient vegetation and/or other cover should be provided. Examples may include contiguous rubble piles/strips arranged to provide interstices along one side of the structure.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-20: Erect Sound and Light Barriers.** Sound and light barriers will be placed between existing/new wildlife crossings and US 101 to limit noise and light disturbances on wildlife and habitats and prevent such disturbances from affecting the use of wildlife crossing structures. Such barriers should be designed to serve	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	as flight diversion barriers for aerial species to prevent their flight paths from crossing into highway traffic, thereby preventing wildlife/vehicle collisions.									
Biology	**NC-21: Avoid Artificial Lighting in Critical Spaces.** Artificial lighting should be avoided in and adjacent to all crossing structures and wildlife linkages/corridors because it may deter animal use/passage.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-22: Use Appropriate Lighting.** Temporary and permanent lighting should be directional, and shielding should be used to narrowly focus the light within the construction footprint or the permanent footprint of development. The number of lights should be minimized, and motion sensors should be used for all security lights such that, under normal circumstances, the light remains inactive. Lights of a wavelength and spectrum that are known to have reduced effects on wildlife should be used.	Section 2.4.1.4 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-23: Limit Human Activity near Wildlife Crossings.** Human activity should be avoided whenever possible near wildlife crossing structures and wildlife corridors because it may deter animal use/passage. Measures will be taken to prevent such disturbance at dedicated wildlife crossing structures, wildlife linkages/corridors, and, if possible, at other wildlife crossing locations.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-24: Provide Native Vegetation Cover.** Native vegetative cover will be provided adjacent to and near the entrances of wildlife crossings to facilitate use by a variety of species. This vegetation should be heterogeneous and contiguous (where possible) with surrounding native habitat to help facilitate movement to the structures from surrounding landscapes. This can be especially important for small species that require cover to move safely through their environment. Avoidance and minimization measure **NC-25** will ensure that the project will be in compliance with any applicable local tree policies and/or ordinances as well as any general plan or municipal codes that pertain to protected trees.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-25: Comply with Local Policies.** All applicable local policies and ordinances, including tree preservation policies, will be followed, and protected trees will be avoided where possible. If protected trees have been identified and cannot be avoided, then prior to ground-disturbing activities, where local tree policies exist and trees are present in the work area, a qualified biologist or arborist will conduct surveys in the work area to identify protected trees. The biologist or arborist will establish ESAs around protected trees that have the potential to be affected by construction activities, but do not require removal or trimming. ESAs will be based on local government ordinances, policies, and regulations. Compensatory mitigation for impacts on protected trees will be required, including impacts associated with removing or trimming a protected tree, based on requirements set out in applicable local government ordinances, policies, and regulations. Compensatory mitigation, based on these local ordinances, policies, and regulations, may include, but is not limited to, transplantation of protected trees to areas outside of the work area and/or replacement of protected trees on or off site, based on the number of protected trees affected, at a ratio required by local government ordinances or regulations.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor, Qualified Biologist or Arborist						No
Biology	**WET-1: Minimize Disturbance.** Construction activity and access roads will be minimized to the maximum extent practicable in all drainages, streams, pools, or other features under the jurisdiction of the USACE, RWQCB, CCC, and/or CDFW.	Section 2.4.2 EIR/EA	Yes	VCTC, Contractor						No
Biology	**WET-2: Avoid Aquatic Resources.** The project limits of disturbance, including the upstream, downstream, and lateral extents of any jurisdictional aquatic resource within or adjacent to the project footprint, will be clearly defined and marked in the field. The biological monitor will review the limits of disturbance prior to initiation of construction activities. The upstream and downstream limits of project disturbance, plus the lateral limits of disturbance of any aquatic resource, will be clearly defined and marked in the field; this includes installing ESA fencing during construction to ensure avoidance of jurisdictional areas.	Section 2.4.2 EIR/EA	Yes	VCTC, Contractor, Biological Monitor						No
Biology	**PS-2: Rare Plant Biological Monitoring**. An authorized biologist will be present on-site, within or adjacent to suitable habitat, at the frequency necessary during construction to ensure that avoidance and minimization measures are in place, according to specifications, and monitor construction within the vicinity of the Catalina	Section 2.4.3 EIR/EA	Yes	VCTC, Qualified Biologist,						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
	mariposa lily, small-flowered morning-glory, Blochman's dudleya, and Conejo buckwheat populations, thereby ensuring that avoidance and minimization measures will be properly followed. The biological monitor will report any non-compliance within 24 hours to the resident engineer.			Resident Engineer						
Biology	**PS-5: Collection Restrictions.** The intentional killing or collection of any plant or wildlife species will be prohibited.	Section 2.4.3 EIR/EA	Yes	VCTC, Contractor						No
Biology	**AS-4: Bat Maternity-Roost Management.** If maternity sites are identified during the preconstruction bat habitat assessment, then no construction activities at that location will be allowed during the maternity season (i.e., April 1–August 31) unless a qualified bat biologist has determined the young have been weaned. If maternity sites are present, and it is anticipated that construction activities cannot be completed outside of the maternity season, then bat exclusion at maternity roost sites will be completed by the qualified bat biologist, in consultation with CDFW, either as soon as possible after the young have been weaned, outside of the maternity season, or as otherwise approved by the qualified bat biologist, in coordination with CDFW.	Section 2.4.4 EIR/EA	Yes	VCTC, Contractor, Qualified Bat Biologist						No
Biology	**AS-5: Material Stockpiling Restrictions.** No erodible materials will be deposited into watercourses or areas demarcated with ESA fencing. Vegetation, mud, silt, or debris material or pollutants from construction activities will not be stockpiled within stream channels or on adjacent banks or otherwise allowed to enter a watercourse.	Section 2.4.4 EIR/EA	Yes	VCTC, Contractor						No
Biology	**AS-6: Portable Toilet Restrictions.** All portable toilets will be placed away from any streams, storm drains, or drainage swales.	Section 2.4.4 EIR/EA	Yes	VCTC, Contractor						No
Biology	**AS-7: Equipment Placement Restrictions.** No equipment will be placed within a flowing stream or on directly adjacent banks.	Section 2.4.4 EIR/EA	Yes	VCTC, Contractor						No
Biology	**AS-9: Water Diversion and Dewatering Plan.** If special-status fish or aquatic wildlife species are found to be present within the project work area during preconstruction surveys, then an isolated work area will be designated and a water diversion will be installed. Water diversion will be conducted outside of the fish spawning season (i.e., February 15–July 31) to the greatest extent feasible. If water diversion/dewatering activities are necessary within drainages that support suitable habitat for special-status fish and aquatic wildlife species, then a water diversion and dewatering plan will be required. The plan will include rescue/relocation of special-status species by a qualified biologist from an isolated dewatering area prior to water diversion or dewatering, screening of pump intakes (with details to be determined in the plan), and biological monitoring for special-status fish and aquatic wildlife during water diversion or dewatering. Any special-status fish or aquatic wildlife species within the diversion area will be relocated upstream or downstream of the work area by a qualified biologist prior to the start of any work within water. A combination of seining, dip netting, and hand capture will be used. Prior to activities that may involve handling any special-status species, the qualified biologist will ensure that all participants' hands are free of sunscreen, lotion, or insect repellent. Once construction work within the water is complete, exclusion nets will be removed. Construction work within drainages containing water will be minimized to the maximum extent feasible.	Section 2.4.4 EIR/EA	Yes	VCTC, Contractor, Qualified Biologist						No
Biology	**AS-12: Night Lighting Management.** To the extent feasible, no nighttime work will be conducted in areas adjacent to suitable habitat for special-status wildlife species. If the work has to be performed during nighttime hours, then the lights will be shielded and/or directed away from the habitat to prevent light intrusion into the habitat area.	Section 2.4.4 EIR/EA	Yes	VCTC, Contractor						No
Biology	**AS-13: Pet Restrictions.** No pets will be allowed in, or adjacent to, the project site.	Section 2.4.4 EIR/EA	Yes	VCTC, Contractor						No

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Biology	**AS-14: Waste Management.** To avoid attracting predators of special-status animal species, the project site will be kept clean of debris to the extent possible. All food-related trash items will be enclosed in sealed containers and regularly removed from the site.	Section 2.4.4 EIR/EA	Yes	VCTC, Contractor						No
Biology	**TE-2: Burrowing Owl Nesting Season Avoidance.** If burrowing owls are found during preconstruction take-avoidance surveys within the nesting season (see measure **TE-1**), then the burrowing owls will be fully avoided by establishing an appropriate buffer in coordination with CDFW.	Section 2.4.5 EIR/EA	Yes	VCTC, Contractor						No
Biology	**TE-3: Burrowing Owl Passive Relocation.** If burrowing owls are found during preconstruction take-avoidance surveys outside of the nesting season (see measure **TE-1**), then passive relocation by a qualified avian biologist will be conducted, in coordination with CDFW, once it has been confirmed that pairing activities have not begun. If the burrowing owl is found to be paired and exhibiting potential nesting behavior, then construction disturbance will not occur within a designated buffer, as determined in coordination with CDFW, of the active burrow(s) until it is confirmed by the avian biologist that the pair is not nesting and that young are not present or, if present, are independently foraging.	Section 2.4.5 EIR/EA	Yes	VCTC, Contractor, Qualified Avian Biologist						No
Biology	**TE-8: Monarch Breeding Habitat-Removal Restrictions.** To avoid potential impacts on milkweed and immature stages of monarch butterfly, vegetation removal of milkweed will occur between November and January to avoid the monarch butterfly breeding season, following completion of the blooming period for milkweed and prior to the start of new milkweed growth.	Section 2.4.5 EIR/EA	Yes	VCTC, Contractor						No
Other	**GHG-1:** Truck trips will be scheduled outside of peak morning and evening commute hours.	Section 3.3.4 EIR/EA	Yes	VCTC, Contractor						No
Other	**GHG-2:** To reduce the need for transport of earthen materials, the cut and fill quantities will be balanced on-site.	Section 3.3.4 EIR/EA	Yes	VCTC, Contractor						No
Other	**GHG-4:** Recycled water will be used and/or the use of potable water will be minimized during construction.	Section 3.3.4 EIR/EA	Yes	VCTC, Contractor						No
Other	**GHG-5:** Limit idling to 5 minutes for delivery and dump trucks and other diesel-powered equipment.	Section 3.3.4 EIR/EA	Yes	VCTC, Contractor						No
Other	**GHG-6:** Use alternative fuels such as renewable diesel for construction equipment.	Section 3.3.4 EIR/EA	Yes	VCTC, Contractor						No
Other	**GHG-7:** Salvage rebar from demolished concrete and process waste to create usable fill.	Section 3.3.4 EIR/EA	Yes	VCTC, Contractor						No

POST-CONSTRUCTION

Category	Task and Brief Description	Source	Included in PS&E package	Responsible Branch/Staff	Action to Comply	Due Date	Task Completed by	Task Completed on	Remarks	Mitigation for significant impacts under CEQA?
Other	**LU-2:** The contractor will ensure that the areas acquired for temporary construction easements required for US 101 Improvement project construction will be restored to their original conditions or similar conditions where feasible.	Section 2.2.2 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-12: Revegetate Disturbed Areas Following Construction.** Post-construction, any disturbed areas remaining as bare ground will be revegetated with a native hydroseed mix and/or native container plantings. All planting plans will be approved by a Caltrans District Biologist prior to implementation. All revegetated areas will avoid the use of species listed in Cal-IPC's California Invasive Plant Inventory.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						No
Biology	**NC-13: Conduct Onsite Restoration Following Construction.** Impacts on sensitive habitats, such as those used by special-status species, will be restored at a 1:1 ratio through on-site restoration. On-site, in-kind restoration of affected habitats would occur at the current locations of the habitats on completion of construction. This will consist of returning affected areas to original contour grades, decompacting the soil, and replanting through hydroseeding and/or the use of container plantings, using a plant palette composed of native species from the local region prior to disturbance. All planting plans will be approved by a Caltrans District Biologist prior to implementation. All revegetated areas will avoid the use of species listed in Cal-IPC's California Invasive Plant Inventory. Restoration performance standards and monitoring requirements will follow the directives outlined in a Habitat Mitigation and Monitoring Plan.	Section 2.4.1 EIR/EA	Yes	VCTC, Contractor						Yes
Biology	**TE-9: Monarch Breeding Habitat-Revegetation Plan.** Milkweed species, along with other pollinator plant species, will be included in the plant palette for revegetation in disturbed areas (see measures **NC-12** and **NC-13**) with suitable habitat for monarch butterfly to offset any direct impacts.	Section 2.4.5 EIR/EA	Yes	VCTC, Contractor						Yes

Appendix E List of Technical Studies

The technical studies listed below were used as supporting documentation in the preparation of this Environmental Impact Report/Environmental Assessment. All of the technical studies listed were prepared specifically for the proposed US 101 Improvement Project.

- US 101 Improvement Project Air Quality Report (April 2025)
- US 101 Improvement Project Biological Assessment (May 2021)
- US 101 Improvement Project Community Impact Assessment (2026)
- US 101 Improvement Project District Preliminary Geotechnical Design Report (February 2021)
- US 101 Improvement Project Draft Project Report (2026)
- US 101 Improvement Project Energy Technical Report (March 2022)
- US 101 Improvement Project Energy Technical Report Addendum (October 2025)
- US 101 Improvement Project Farmland Memo (January 2022)
- US 101 Improvement Project Finding of Adverse Effect (December 2025)
- US 101 Improvement Project Historic Property Survey Report (June 2024)
- US 101 Improvement Project Delineation of Aquatic Resources (October 2020)
- US 101 Improvement Project Location Hydraulic Study, Volumes 1–7 (2020)
- US 101 Improvement Project Natural Environment Study (May 2021)
- US 101 Improvement Project Noise Abatement Decision Report (March 2022)
- US 101 Improvement Project Noise Study Report (March 2022)
- US 101 Improvement Project Paleontological Identification Report/Paleontological Evaluation Report (January 2021)
- US 101 Improvement Project Phase 1 Site Environmental Assessment/Initial Site Assessment (April 2021)
- US 101 Improvement Project Preliminary Geotechnical Design Report (October 2020)
- US 101 Improvement Project Public Scoping Summary (June 2019)
- US 101 Improvement Project Relocation Impact Memo (September 2021)
- US 101 Improvement Project Section 4(f) (August 2026)
- US 101 Improvement Project Stormwater Data Report (February 2021)
- US 101 Improvement Project Structure Preliminary Geotechnical Reports (2020 and 2021)

- US 101 Improvement Project Summary Floodplain Encroachment Reports (2021)
- US 101 Improvement Project Traffic Operations Analysis Report (November 2021)
- US 101 Improvement Project Visual Impact Assessment Report (March 2021)
- US 101 Improvement Project Water Quality Assessment Report (January 2021)

Appendix F List of Acronyms and Abbreviations

This page is intentionally blank.

List of Acronyms and Abbreviations

Acronym	Definition
°F	Fahrenheit
AADT	Annual Average Daily Traffic
ACM	asbestos-containing materials
ACS	American Community Survey
ADL	aerially deposited lead
ADT	average daily trips
AMA	Archaeological Monitoring Area
APE	Area of Potential Effects
APN	Assessor's Parcel Number
ARB	Air Resources Board
ASBS	Area of Special Biological Significance
ASMP	Adjacent Structure Monitoring Plan
ASR	Archaeological Survey Report
ASTM	ASTM International
AUX	auxiliary
AVHD	annual vehicle-hours of delay
BMP	Best Management Practice
BRT	Bus Rapid Transit
BSA	Biological Study Area
BTU	British thermal unit
Cal-IPC	California Invasive Plant Council
Caltrans	California Department of Transportation
CAMP	Corridor Aesthetics Master Plan
CAT	Camarillo Area Transit
CCA	California Coastal Act
CCAA	California Clean Air Act
CCC	California Coastal Commission
CCP	Construction Contingency Plan
CDFW	California Department of Fish and Wildlife
CEQA	California Environmental Quality Act
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act

Acronym	Definition
CESA	California Endangered Species Act
CFR	Code of Federal Regulations
CIA	Community Impact Assessment
CIDH	cast-in-drilled-hole
CIWMP	County Integrated Waste Management Plan
CLOMR	Conditional Letter of Map Revision
CMP	Congestion Management Program
CNDDB	California Natural Diversity Database
CO	carbon monoxide
CO Protocol	California Project-Level Carbon Monoxide Protocol
COLD	Cold Freshwater Habitat
CRHR	California Register of Historical Resources
CRPR	California Rare Plant Rank
CSC	California Species of Concern
CTP	Comprehensive Transportation Plan
Cu	Copper
CWA	Clean Water Act
dB	decibel
dBA	A-weighted decibels
DEG	diesel equivalent gallon
Department or Caltrans	California Department of Transportation
DPS	Distinct Population Segment
DSA	Disturbed Soil Area
DTSC	Department of Toxic Substances Control

O_3	ozone
PA	Programmatic Agreement
Pb	Lead
PDT	Project Development Team
PM	Post Mile
PM	particulate matter
PM_{10}	particles of 10 micrometers or smaller
PM_{10} and $PM_{2.5}$	particulate matter
$PM_{2.5}$	particles of 2.5 micrometers and smaller
PMI	point of maximum impact

Acronym	Definition
PMP	Paleontological Mitigation Plan
Porter-Cologne Act	Waste Discharge Requirements State Water Code
PQS	Professionally Qualified Staff
PRC	Public Resources Code
PROC	Industrial Process Supply
PSD	Permitted Stormwater Dischargers
PSR	Project Study Report
PTS	paint and thermoplastic striping
PWA	Public Works Administration
RARE	Rare, Threatened, or Endangered Species
RCB	reinforced concrete box
RCRA	Resource Conservation and Recovery Act
REC	recognized environmental condition
ROW	right of way
RTP	Regional Transportation Plan
RTP/SCS	Regional Transportation Plan/Sustainable Communities Strategy
RWQCB	Regional Water Quality Control Board
SCAG	Southern California Association of Governments
SCCAB	South Central Coast Air Basin
SCCP	Solutions for Congested Corridor Program
scf	standard cubic feet
SCS	Sustainable Communities Strategy
SDC	Seismic Design Criteria
Se	Selenium
SFHAs	Special Flood Hazard Areas
SHPO	State Historic Preservation Officer
SIP	State Implementation Plan
SLF	Sacred Lands File
SLR	sea-level rise
SO2	sulfur dioxide
SR	State Route
SR 33	State Route 33
STAA	Surface Transportation Assistance Act
SWDR	Stormwater Data Report

Acronym	Definition
SWMP	Statewide Storm Water Management Plan
SWPPP	Stormwater Pollution Prevention Plan
SWRCB	State Water Resources Control Board
TAC	Toxic Air Contaminant
TCE	temporary construction easement
TDM	Transportation Demand Management
TDS	Total Dissolved Solids
TEPA	Traffic Engineering Performance Assessment
TIFIA	Transportation Infrastructure Finance and Innovation Act
TMDLs	Total Maximum Daily Loads
TMP	Transportation Management Plan
TNM	Traffic Noise Model
TOAR	Traffic Operational Analysis Report
TOT	Thousand Oaks Transit
TSM	Transportation Systems Management
TWW	treated wood waste
U.S.	United States
U.S. EPA	U.S. Environmental Protection Agency's
Uniform Act	Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended
US 101	US Highway 101
USACE	U.S. Army Corps of Engineers
USC	United States Code
USDOT	U.S. Department of Transportation
USEPA	U.S. Environmental Protection Agency
USFWS	U.S. Fish and Wildlife Service
VAU	visual assessment units
VCAPCD	Ventura County Air Pollution Control District
VCTC	Ventura County Transportation Commission
VHD	vehicle hours of delay
VIA	Visual Impact Assessment
VMT	vehicle miles traveled
VOCs	volatile organic compounds
WARM	Warm Freshwater Habitat
WDRs	Waste Discharge Requirements

Acronym	Definition
WET	Wetland Habitat
WILD	Wildlife Habitat
WLA	Weather waste load allocations
WPA	Works Progress Administration
WPCP	Water Pollution Control Program
Zn	Zinc

U.S. DEPARTMENT OF AGRICULTURE
Natural Resources Conservation Service

NRCS-CPA-106
(Rev. 1-91)

FARMLAND CONVERSION IMPACT RATING FOR CORRIDOR TYPE PROJECTS

PART I *(To be completed by Federal Agency)*	3. Date of Land Evaluation Request 11/17/21	4. Sheet 1 of 1
1. Name of Project **US 101 Improvement Project**	5. Federal Agency Involved **Caltrans on behalf of FHWA**	
2. Type of Project	6. County and State **Ventura County, CA**	

PART II *(To be completed by NRCS)*	1. Date Request Received by NRCS **12/16/20**	2. Person Completing Form **Kaitlyn Valverde**
3. Does the corridor contain prime, unique statewide or local important farmland? (If no, the FPPA does not apply - Do not complete additional parts of this form). YES ☑ NO ☐		4. Acres Irrigated **87,148** / Average Farm Size **131**
5. Major Crop(s) **Strawberries, Celery, Lemons**	6. Farmable Land in Government Jurisdiction Acres: **101,084** % **8.6**	7. Amount of Farmland As Defined in FPPA Acres: **215,868** % **18**
8. Name Of Land Evaluation System Used **CA Revised Storie Index**	9. Name of Local Site Assessment System **None**	10. Date Land Evaluation Returned by NRCS **1/7/22**

PART III *(To be completed by Federal Agency)*	Alternative Corridor For Segment ____ Corridor A	Corridor B	Corridor C	Corridor D
A. Total Acres To Be Converted Directly	2.85	2.7		
B. Total Acres To Be Converted Indirectly, Or To Receive Services	0	0		
C. Total Acres In Corridor	7380.65	7380.65		
PART IV *(To be completed by NRCS) Land Evaluation Information*				
A. Total Acres Prime And Unique Farmland	1.04	0.89		
B. Total Acres Statewide And Local Important Farmland	1.81	1.28		
C. Percentage Of Farmland in County Or Local Govt. Unit To Be Converted	0.001	0.001		
D. Percentage Of Farmland in Govt. Jurisdiction With Same Or Higher Relative Value	76	76		
PART V *(To be completed by NRCS) Land Evaluation Information Criterion Relative value of Farmland to Be Serviced or Converted (Scale of 0 - 100 Points)*	49	49		

PART VI *(To be completed by Federal Agency) Corridor Assessment Criteria (These criteria are explained in 7 CFR 658.5(c))*	Maximum Points	Corridor A	Corridor B	Corridor C	Corridor D
1. Area in Nonurban Use	15	4			
2. Perimeter in Nonurban Use	10	0			
3. Percent Of Corridor Being Farmed	20	0			
4. Protection Provided By State And Local Government	20	20			
5. Size of Present Farm Unit Compared To Average	10	10			
6. Creation Of Nonfarmable Farmland	25	0			
7. Availablility Of Farm Support Services	5	5			
8. On-Farm Investments	20	20			
9. Effects Of Conversion On Farm Support Services	25	0			
10. Compatibility With Existing Agricultural Use	10	0			
TOTAL CORRIDOR ASSESSMENT POINTS	160	59	0	0	0
PART VII *(To be completed by Federal Agency)*					
Relative Value Of Farmland (From Part V)	100	49	49	0	0
Total Corridor Assessment (From Part VI above or a local site assessment)	160	59	0	0	0
TOTAL POINTS *(Total of above 2 lines)*	260	108	49	0	0

1. Corridor Selected:	2. Total Acres of Farmlands to be Converted by Project:	3. Date Of Selection:	4. Was A Local Site Assessment Used?
Corridor to be selected after Final Environmental Document is signed.	Acres will be noted after Corridor is chosen.	Noted after Corridor is selected.	YES ☑ NO ☐

5. Reason For Selection:

Signature of Person Completing this Part: 01/10/2022 DATE

NOTE: Complete a form for each segment with more than one Alternate Corridor

CORRIDOR - TYPE SITE ASSESSMENT CRITERIA

The following criteria are to be used for projects that have a linear or corridor - type site configuration connecting two distant points, and crossing several different tracts of land. These include utility lines, highways, railroads, stream improvements, and flood control systems. Federal agencies are to assess the suitability of each corridor - type site or design alternative for protection as farmland along with the land evaluation information.

(1) How much land is in nonurban use within a radius of 1.0 mile from where the project is intended?
More than 90 percent - 15 points
90 to 20 percent - 14 to 1 point(s)
Less than 20 percent - 0 points

(2) How much of the perimeter of the site borders on land in nonurban use?
More than 90 percent - 10 points
90 to 20 percent - 9 to 1 point(s)
Less than 20 percent - 0 points

(3) How much of the site has been farmed (managed for a scheduled harvest or timber activity) more than five of the last 10 years?
More than 90 percent - 20 points
90 to 20 percent - 19 to 1 point(s)
Less than 20 percent - 0 points

(4) Is the site subject to state or unit of local government policies or programs to protect farmland or covered by private programs to protect farmland?
Site is protected - 20 points
Site is not protected - 0 points

(5) Is the farm unit(s) containing the site (before the project) as large as the average - size farming unit in the County ? (Average farm sizes in each county are available from the NRCS field offices in each state. Data are from the latest available Census of Agriculture, Acreage or Farm Units in Operation with $1,000 or more in sales.)
As large or larger - 10 points
Below average - deduct 1 point for each 5 percent below the average, down to 0 points if 50 percent or more below average - 9 to 0 points

(6) If the site is chosen for the project, how much of the remaining land on the farm will become non-farmable because of interference with land patterns?
Acreage equal to more than 25 percent of acres directly converted by the project - 25 points
Acreage equal to between 25 and 5 percent of the acres directly converted by the project - 1 to 24 point(s)
Acreage equal to less than 5 percent of the acres directly converted by the project - 0 points

(7) Does the site have available adequate supply of farm support services and markets, i.e., farm suppliers, equipment dealers, processing and storage facilities and farmer's markets?
All required services are available - 5 points
Some required services are available - 4 to 1 point(s)
No required services are available - 0 points

(8) Does the site have substantial and well-maintained on-farm investments such as barns, other storage building, fruit trees and vines, field terraces, drainage, irrigation, waterways, or other soil and water conservation measures?
High amount of on-farm investment - 20 points
Moderate amount of on-farm investment - 19 to 1 point(s)
No on-farm investment - 0 points

(9) Would the project at this site, by converting farmland to nonagricultural use, reduce the demand for farm support services so as to jeopardize the continued existence of these support services and thus, the viability of the farms remaining in the area?
Substantial reduction in demand for support services if the site is converted - 25 points
Some reduction in demand for support services if the site is converted - 1 to 24 point(s)
No significant reduction in demand for support services if the site is converted - 0 points

(10) Is the kind and intensity of the proposed use of the site sufficiently incompatible with agriculture that it is likely to contribute to the eventual conversion of surrounding farmland to nonagricultural use?
Proposed project is incompatible to existing agricultural use of surrounding farmland - 10 points
Proposed project is tolerable to existing agricultural use of surrounding farmland - 9 to 1 point(s)
Proposed project is fully compatible with existing agricultural use of surrounding farmland - 0 points

Notes: Design changes following initial project limits of disturbance establishment and completion of field surveys resulted in the eastern end of the project not being mapped in the field. As such, areas within the Additional Biological Study Area were assessed via desktop analysis using aerial imagery (Google Earth 2019).

The field surveys performed in 2019 were based on initial project limits of disturbance and a 250-foot buffer. The Biological Study Area used for the Natural Environmental Studies Report analysis is based on a revised project limits of disturbance following completion of field surveys. The figure shows all communities that were mapped for reference, but only areas within the Biological Study Area are included in the biological impacts assessment for the project.

Project Name: US-101 Improvement Project

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed list identifies species listed as threatened and endangered, species proposed for listing as threatened or endangered, designated and proposed critical habitat, and species that are candidates for listing that may occur within the boundary of the area you have indicated using the U.S. Fish and Wildlife Service's (Service) Information Planning and Conservation System (IPaC). The species list fulfills the requirements under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 et seq.). Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the species list should be verified after 90 days. We recommend that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists following the same process you used to receive the enclosed list. Please include the Consultation Tracking Number in the header of this letter with any correspondence about the species list.

Due to staff shortages and excessive workload, we are unable to provide an official list more specific to your area. Numerous other sources of information are available for you to narrow the list to the habitats and conditions of the site in which you are interested. For example, we recommend conducting a biological site assessment or surveys for plants and animals that could help refine the list.

If a Federal agency is involved in the project, that agency has the responsibility to review its proposed activities and determine whether any listed species may be affected. If the project is a major construction project*, the Federal agency has the responsibility to prepare a biological assessment to make a determination of the effects of the action on the listed species or critical habitat. If the Federal agency determines that a listed species or critical habitat is likely to be adversely affected, it should request, in writing through our office, formal consultation pursuant to section 7 of the Act. Informal consultation may be used to exchange information and resolve conflicts with respect to threatened or endangered species or their critical habitat prior to a

written request for formal consultation. During this review process, the Federal agency may engage in planning efforts but may not make any irreversible commitment of resources. Such a commitment could constitute a violation of section 7(d) of the Act.

Federal agencies are required to confer with the Service, pursuant to section 7(a)(4) of the Act, when an agency action is likely to jeopardize the continued existence of any proposed species or result in the destruction or adverse modification of proposed critical habitat (50 CFR 402.10(a)). A request for formal conference must be in writing and should include the same information that would be provided for a request for formal consultation. Conferences can also include discussions between the Service and the Federal agency to identify and resolve potential conflicts between an action and proposed species or proposed critical habitat early in the decision-making process. The Service recommends ways to minimize or avoid adverse effects of the action. These recommendations are advisory because the jeopardy prohibition of section 7(a)(2) of the Act does not apply until the species is listed or the proposed critical habitat is designated. The conference process fulfills the need to inform Federal agencies of possible steps that an agency might take at an early stage to adjust its actions to avoid jeopardizing a proposed species.

When a proposed species or proposed critical habitat may be affected by an action, the lead Federal agency may elect to enter into formal conference with the Service even if the action is not likely to jeopardize or result in the destruction or adverse modification of proposed critical habitat. If the proposed species is listed or the proposed critical habitat is designated after completion of the conference, the Federal agency may ask the Service, in writing, to confirm the conference as a formal consultation. If the Service reviews the proposed action and finds that no significant changes in the action as planned or in the information used during the conference have occurred, the Service will confirm the conference as a formal consultation on the project and no further section 7 consultation will be necessary. Use of the formal conference process in this manner can prevent delays in the event the proposed species is listed or the proposed critical habitat is designated during project development or implementation.

Candidate species are those species presently under review by the Service for consideration for Federal listing. Candidate species should be considered in the planning process because they may become listed or proposed for listing prior to project completion. Preparation of a biological assessment, as described in section 7(c) of the Act, is not required for candidate species. If early evaluation of your project indicates that it is likely to affect a candidate species, you may wish to request technical assistance from this office.

Only listed species receive protection under the Act. However, sensitive species should be considered in the planning process in the event they become listed or proposed for listing prior to project completion. We recommend that you review information in the California Department of Fish and Wildlife's Natural Diversity Data Base. You can contact the California Department of Fish and Wildlife at (916) 324-3812 for information on other sensitive species that may occur in this area.

[*A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the

human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

- Migratory Birds

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

Ventura Fish And Wildlife Office
2493 Portola Road, Suite B
Ventura, CA 93003-7726
(805) 644-1766

PROJECT SUMMARY

Project Code: 2025-0030513
Project Name: US-101 Improvement Project
Project Type: Road/Hwy - Maintenance/Modification
Project Description: The Ventura County Transportation Commission, in cooperation with the California Department of Transportation, is proposing the US-101 Improvement Project. The project would widen US-101 by adding one high-occupancy vehicles (HOV) lane in each direction from Moorpark Road in the City of Thousand Oaks to State Route 33 in the City of Ventura, Ventura County, California.

Project Location:

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@34.27706785,-119.29540885298911,14z

Counties: Ventura County, California

ENDANGERED SPECIES ACT SPECIES

There is a total of 27 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries[1], as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

---

1. NOAA Fisheries, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

BIRDS

NAME STATUS

California condor *Gymnogyps californianus* Endangered
Population: Wherever found, except where listed as an experimental population
There is **final** critical habitat for this species. Your location does not overlap the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/8193
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

California least tern *Sternula antillarum browni* Endangered
No critical habitat has been designated for this species.
Species profile: https://ecos.fws.gov/ecp/species/8104
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

Coastal California gnatcatcher *Polioptila californica californica* Threatened
There is **final** critical habitat for this species. Your location does not overlap the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/8178
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

Least Bell's vireo *Vireo bellii pusillus* Endangered
There is **final** critical habitat for this species. Your location does not overlap the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/5945
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

Light-footed Ridgway's rail *Rallus obsoletus levipes* Endangered
No critical habitat has been designated for this species.
Species profile: https://ecos.fws.gov/ecp/species/6035
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

Southwestern willow flycatcher *Empidonax traillii extimus* Endangered
There is **final** critical habitat for this species. Your location overlaps the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/6749
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

western snowy plover *Charadrius nivosus nivosus* Threatened
Population: Pacific Coast population DPS-U.S.A. (CA, OR, WA), Mexico (within 50 miles of Pacific coast)
There is **final** critical habitat for this species. Your location does not overlap the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/8035
General project design guidelines:

NAME STATUS

https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

Yellow-billed Cuckoo *Coccyzus americanus* Threatened
Population: Western U.S. DPS
There is **final** critical habitat for this species. Your location does not overlap the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/3911
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

REPTILES

NAME STATUS

Southwestern pond turtle *Actinemys pallida* Proposed Threatened
No critical habitat has been designated for this species.
Species profile: https://ecos.fws.gov/ecp/species/4768
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

AMPHIBIANS

NAME STATUS

California red-legged frog *Rana draytonii* Threatened
There is **final** critical habitat for this species. Your location does not overlap the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/2891
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

Foothill yellow-legged frog *Rana boylii* Endangered
Population: South Coast Distinct Population Segment (South Coast DPS)
There is **proposed** critical habitat for this species. Your location does not overlap the critical habitat.
Species profile: https://ecos.fws.gov/ecp/species/5133
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

Western spadefoot *Spea hammondii* Proposed Threatened
Population: Southern DPS
No critical habitat has been designated for this species.
Species profile: https://ecos.fws.gov/ecp/species/5425
General project design guidelines:
https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf

FISHES

NAME	STATUS
tidewater goby *Eucyclogobius newberryi* There is **final** critical habitat for this species. Your location overlaps the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/57 General project design guidelines: https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf	Endangered

INSECTS

NAME	STATUS
Monarch butterfly *Danaus plexippus* There is **proposed** critical habitat for this species. Your location overlaps the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/9743 General project design guidelines: https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf	Proposed Threatened

CRUSTACEANS

NAME	STATUS
Vernal pool fairy shrimp *Branchinecta lynchi* There is **final** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/498 General project design guidelines: https://ipac.ecosphere.fws.gov/project/LAWSXLADQNBCPGPQ3R2V55443M/documents/generated/11304.pdf	Threatened

FLOWERING PLANTS

NAME	STATUS
Braunton's milk-vetch *Astragalus brauntonii* There is **final** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/5674	Endangered
California Orcutt grass *Orcuttia californica* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/4923	Endangered
Conejo dudleya *Dudleya abramsii ssp. parva* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/4871	Threatened
Gambel's watercress *Rorippa gambellii* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/4201	Endangered
Lyon's pentachaeta *Pentachaeta lyonii* There is **final** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/4699	Endangered

NAME	STATUS
Marcescent dudleya *Dudleya cymosa ssp. marcescens* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/7145	Threatened
marsh sandwort *Arenaria paludicola* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/2229	Endangered
Nevin's barberry *Berberis nevinii* There is **final** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/8025	Endangered
Salt marsh bird's-beak *Cordylanthus maritimus ssp. maritimus* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/6447	Endangered
Santa Monica Mountains dudleyea *Dudleya cymosa ssp. ovatifolia* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/2538	Threatened
Ventura Marsh Milk-vetch *Astragalus pycnostachyus var. lanosissimus* There is **final** critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/1160	Endangered
Verity's dudleya *Dudleya verityi* No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/4342	Threatened

CRITICAL HABITATS

There are 3 critical habitats wholly or partially within your project area under this office's jurisdiction.

NAME	STATUS
Monarch butterfly *Danaus plexippus* https://ecos.fws.gov/ecp/species/9743#crithab	Proposed
Southwestern willow flycatcher *Empidonax traillii extimus* https://ecos.fws.gov/ecp/species/6749#crithab	Final
tidewater goby *Eucyclogobius newberryi* https://ecos.fws.gov/ecp/species/57#crithab	Final

BALD & GOLDEN EAGLES

Bald and Golden Eagles are protected under the Bald and Golden Eagle Protection Act [2] and the Migratory Bird Treaty Act (MBTA) [1]. Any person or organization who plans or conducts activities that may result in impacts to Bald or Golden Eagles, or their habitats, should follow

appropriate regulations and consider implementing appropriate avoidance and minimization measures, as described in the various links on this page.

---

1. The Bald and Golden Eagle Protection Act of 1940.
2. The Migratory Birds Treaty Act of 1918.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

There are Bald Eagles and/or Golden Eagles in your project area.

Measures for Proactively Minimizing Eagle Impacts
For information on how to best avoid and minimize disturbance to nesting bald eagles, please review the National Bald Eagle Management Guidelines. You may employ the timing and activity-specific distance recommendations in this document when designing your project/ activity to avoid and minimize eagle impacts. For bald eagle information specific to Alaska, please refer to Bald Eagle Nesting and Sensitivity to Human Activity.

The FWS does not currently have guidelines for avoiding and minimizing disturbance to nesting Golden Eagles. For site-specific recommendations regarding nesting Golden Eagles, please consult with the appropriate Regional Migratory Bird Office or Ecological Services Field Office.

If disturbance or take of eagles cannot be avoided, an incidental take permit may be available to authorize any take that results from, but is not the purpose of, an otherwise lawful activity. For assistance making this determination for Bald Eagles, visit the Do I Need A Permit Tool. For assistance making this determination for golden eagles, please consult with the appropriate Regional Migratory Bird Office or Ecological Services Field Office.

Ensure Your Eagle List is Accurate and Complete
If your project area is in a poorly surveyed area in IPaC, your list may not be complete and you may need to rely on other resources to determine what species may be present (e.g. your local FWS field office, state surveys, your own surveys). Please review the Supplemental Information on Migratory Birds and Eagles, to help you properly interpret the report for your specified location, including determining if there is sufficient data to ensure your list is accurate.

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to bald or golden eagles on your list, see the "Probability of Presence Summary" below to see when these bald or golden eagles are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Bald Eagle *Haliaeetus leucocephalus* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Jan 1 to Aug 31

NAME	BREEDING SEASON
Golden Eagle *Aquila chrysaetos* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1680	Breeds Jan 1 to Aug 31

PROBABILITY OF PRESENCE SUMMARY

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

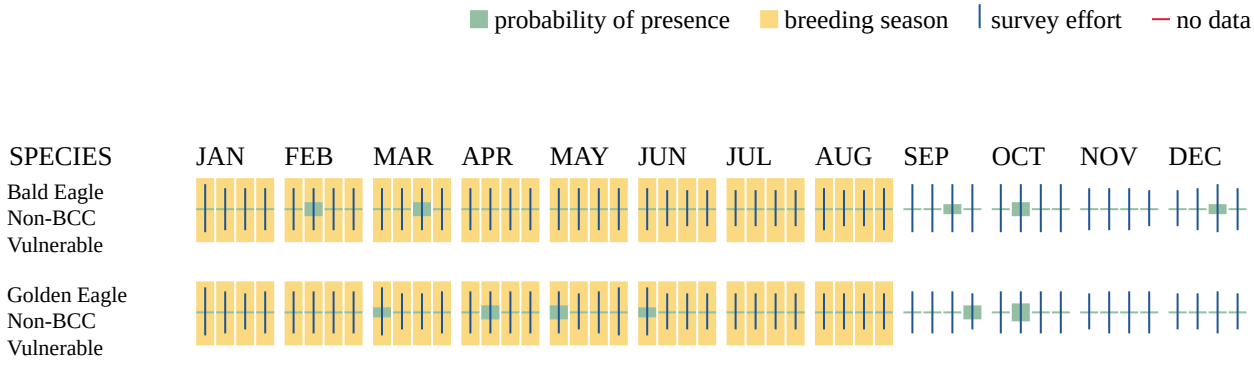
Probability of Presence (■)

Green bars; the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during that week of the year.

Breeding Season (■)
Yellow bars; liberal estimate of the timeframe inside which the bird breeds across its entire range.

Survey Effort (|)
Vertical black lines; the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps.

No Data (–)
A week is marked as having no data if there were no survey events for that week.



Additional information can be found using the following links:

- Eagle Management https://www.fws.gov/program/eagle-management

- Measures for avoiding and minimizing impacts to birds https://www.fws.gov/library/collections/avoiding-and-minimizing-incidental-take-migratory-birds
- Nationwide avoidance and minimization measures for birds https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf
- Supplemental Information for Migratory Birds and Eagles in IPaC https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action

MIGRATORY BIRDS

The Migratory Bird Treaty Act (MBTA) [1] prohibits the take (including killing, capturing, selling, trading, and transport) of protected migratory bird species without prior authorization by the Department of Interior U.S. Fish and Wildlife Service (Service).

---

1. The Migratory Birds Treaty Act of 1918.
2. The Bald and Golden Eagle Protection Act of 1940.
3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the "Probability of Presence Summary" below to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Allen's Hummingbird *Selasphorus sasin* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9637	Breeds Feb 1 to Jul 15
Ashy Storm-petrel *Hydrobates homochroa* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/7237	Breeds May 1 to Jan 15
Bald Eagle *Haliaeetus leucocephalus* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626	Breeds Jan 1 to Aug 31
Belding's Savannah Sparrow *Passerculus sandwichensis beldingi* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/8	Breeds Apr 1 to Aug 15

NAME	BREEDING SEASON
Black Oystercatcher *Haematopus bachmani* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9591	Breeds Apr 15 to Oct 31
Black Scoter *Melanitta nigra* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10413	Breeds elsewhere
Black Skimmer *Rynchops niger* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/5234	Breeds May 20 to Sep 15
Black Swift *Cypseloides niger* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/8878	Breeds Jun 15 to Sep 10
Black Tern *Chlidonias niger surinamenisis* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3093	Breeds May 15 to Aug 20
Black Turnstone *Arenaria melanocephala* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/10557	Breeds elsewhere
Black-chinned Sparrow *Spizella atrogularis* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9447	Breeds Apr 15 to Jul 31
Black-legged Kittiwake *Rissa tridactyla* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10459	Breeds elsewhere
Black-vented Shearwater *Puffinus opisthomelas* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9623	Breeds elsewhere
Brandt's Cormorant *Urile penicillatus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/11903	Breeds Apr 15 to Sep 15

NAME	BREEDING SEASON
Brown Pelican *Pelecanus occidentalis* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/6034	Breeds Jan 15 to Sep 30
Bullock's Oriole *Icterus bullockii* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9458	Breeds Mar 21 to Jul 25
California Gull *Larus californicus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/10955	Breeds Mar 1 to Jul 31
California Thrasher *Toxostoma redivivum* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9436	Breeds Jan 1 to Jul 31
Cassin's Finch *Haemorhous cassinii* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9462	Breeds May 15 to Jul 15
Clark's Grebe *Aechmophorus clarkii* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/10575	Breeds Jun 1 to Aug 31
Common loon *gavia immer* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/4464	Breeds Apr 15 to Oct 31
Common Murre *Uria aalge* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10453	Breeds Apr 15 to Aug 15
Common Yellowthroat *Geothlypis trichas sinuosa* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/2084	Breeds May 20 to Jul 31

NAME	BREEDING SEASON
Double-crested Cormorant *phalacrocorax auritus* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/3478	Breeds Apr 20 to Aug 31
Elegant Tern *Thalasseus elegans* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/8561	Breeds Apr 5 to Aug 5
Golden Eagle *Aquila chrysaetos* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1680	Breeds Jan 1 to Aug 31
Heermann's Gull *Larus heermanni* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/11955	Breeds Mar 15 to Aug 31
Lawrence's Goldfinch *Spinus lawrencei* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9464	Breeds Mar 20 to Sep 20
Long-eared Owl *asio otus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3631	Breeds Mar 1 to Jul 15
Long-tailed Duck *Clangula hyemalis* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/7238	Breeds elsewhere
Marbled Godwit *Limosa fedoa* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9481	Breeds elsewhere
Mountain Plover *Charadrius montanus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3638	Breeds elsewhere

NAME	BREEDING SEASON
Northern Harrier *Circus hudsonius* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/8350	Breeds Apr 1 to Sep 15
Nuttall's Woodpecker *Dryobates nuttallii* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9410	Breeds Apr 1 to Jul 20
Oak Titmouse *Baeolophus inornatus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9656	Breeds Mar 15 to Jul 15
Olive-sided Flycatcher *Contopus cooperi* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3914	Breeds May 20 to Aug 31
Pink-footed Shearwater *Ardenna creatopus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9598	Breeds elsewhere
Pomarine Jaeger *Stercorarius pomarinus* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10458	Breeds elsewhere
Red Knot *Calidris canutus roselaari* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/8880	Breeds elsewhere
Red Phalarope *Phalaropus fulicarius* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10469	Breeds elsewhere
Red-breasted Merganser *Mergus serrator* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10693	Breeds elsewhere

NAME	BREEDING SEASON
Red-necked Phalarope *Phalaropus lobatus* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10467	Breeds elsewhere
Red-throated Loon *Gavia stellata* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/9589	Breeds elsewhere
Ring-billed Gull *Larus delawarensis* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10468	Breeds elsewhere
Royal Tern *Thalasseus maximus* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10471	Breeds Apr 15 to Aug 31
Santa Barbara Song Sparrow *Melospiza melodia graminea* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/5513	Breeds Mar 1 to Sep 5
Scripps's Murrelet *Synthliboramphus scrippsi* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/10677	Breeds Feb 20 to Jul 31
Short-billed Dowitcher *Limnodromus griseus* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9480	Breeds elsewhere
Sooty Shearwater *Ardenna grisea* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10417	Breeds elsewhere
South Polar Skua *Stercorarius maccormicki* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10699	Breeds elsewhere

NAME	BREEDING SEASON
Surf Scoter *Melanitta perspicillata* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10463	Breeds elsewhere
Tricolored Blackbird *Agelaius tricolor* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3910	Breeds Mar 15 to Aug 10
Western Grebe *Aechmophorus occidentalis* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/6743	Breeds Jun 1 to Aug 31
Western Gull *Larus occidentalis* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/11969	Breeds Apr 21 to Aug 25
Western Screech-Owl *Megascops kennicottii cardonensis* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/11923	Breeds Mar 1 to Jun 30
White-headed Woodpecker *Dryobates albolarvatus gravirostris* This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/11993	Breeds May 1 to Aug 15
White-winged Scoter *Melanitta fusca* This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/10462	Breeds elsewhere
Willet *Tringa semipalmata* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/10669	Breeds elsewhere
Wrentit *Chamaea fasciata* This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/10668	Breeds Mar 15 to Aug 10

PROBABILITY OF PRESENCE SUMMARY

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Green bars; the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during that week of the year.

Breeding Season (■)
Yellow bars; liberal estimate of the timeframe inside which the bird breeds across its entire range.

Survey Effort (|)
Vertical black lines; the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps.

No Data (–)
A week is marked as having no data if there were no survey events for that week.

I-4 USFWS CONSULTATION LETTERS

This page is intentionally blank.

United States Department of the Interior
U.S. FISH AND WILDLIFE SERVICE
Ecological Services
Ventura Fish and Wildlife Office
2493 Portola Road, Suite B
Ventura, California 93003

IN REPLY REFER TO:
08EVEN-2021-I-0407

June 15, 2021

Andrew Johnstone
California Department of Transportation, District 7
100 South Main Street
Los Angeles, California 90012

Subject: Acknowledgment of Request for Informal Consultation on the US-101 Improvement Project, Ventura County, California

Dear Andrew Johnstone:

This letter acknowledges our receipt of your request for informal consultation, dated and received in our office on June 4, 2021, pursuant to section 7(a)(2) of the Endangered Species Act of 1973, as amended (Act). Your request concerns the potential effects of the California Department of Transportation (Caltrans) proposal to widen a 27-mile segment of U.S. 101, which you have determined may affect, but is not likely to adversely affect, the federally endangered least Bell's vireo (*Vireo bellii pusillus*) in Ventura County.

You also requested our concurrence that the proposed project may affect, but is not likely to adversely affect, the monarch butterfly (*Danaus plexippus*). The U.S. Fish and Wildlife Service (Service) determined that listing the monarch butterfly under the Act was warranted, but precluded by higher priority actions on December 17, 2020. The regulations implementing section 7(a)(2) of the Act do not require our concurrence with effects determinations made for proposed or candidate species; instead, if a proposed action is not likely to jeopardize the continued existence of a candidate species or destroy or adversely modify proposed critical habitat, the Service may engage in informal conference to advise the action agency on ways to avoid or minimize adverse effects to proposed or candidate species. Thus, we will address your request through informal conference and provide conservation recommendations for the monarch butterfly.

All information required of you to initiate consultation was either included with your request letter and the biological assessment; obtained during communications between Caltrans and the Service; or is otherwise accessible for our consideration and reference.

We have assigned file number 2021-I-0407 to this consultation. Please refer to that number in future correspondence on this consultation. The regulations that implement section 7 allow the Service up to 60 days to conclude informal consultation with your agency and prepare our concurrence letter (unless we mutually agree to an extension). Therefore, we expect to provide

you with our concurrence determination and conference recommendations on or before August 3, 2021.

If you have any questions or concerns about this consultation or the consultation process in general, please contact David Sherer at (805) 677-3338, or by electronic mail at david_sherer@fws.gov.

Sincerely,

Christopher J. Diel
Assistant Field Supervisor

July 15, 2021

Andrew Johnstone
California Department of Transportation, District 7
100 South Main Street
Los Angeles, California 90012

Subject: Informal Consultation for the US-101 Improvement Project, Ventura County, California

Dear Andrew Johnstone:

We are responding to your request, dated and received in our office June 4, 2021, for our concurrence with your determination that the US-101 Improvement Project (project) may affect, but is not likely to adversely affect, the federally endangered least Bell's vireo (*Vireo bellii pusillus*).

The California Department of Transportation (Caltrans), in cooperation with the Ventura County Transportation Commission (VCTC), proposes to fund construction that would widen US-101 by adding one high-occupancy vehicle (HOV)/express bus lane in each direction from Moorpark Road in the city of Thousand Oaks to State Route (SR) 33 in the city of Ventura, Ventura County, California. Caltrans has assumed authority as the lead federal agency as designated by the Federal Highway Administration. Your request and our response are made pursuant to section 7 of the Endangered Species Act of 1973, as amended (Act).

You also requested our concurrence that the proposed project may affect, but is not likely to adversely affect, the monarch butterfly (*Danaus plexippus*). The U.S. Fish and Wildlife Service (Service) determined that listing the monarch butterfly under the Act was warranted, but precluded by higher priority actions on December 17, 2020.

The regulations implementing section 7(a)(2) of the Act (50 Code of Federal Regulations (CFR) 402) do not require our concurrence with effects determinations made for proposed or candidate species; instead, if a proposed action is not likely to jeopardize the continued existence of a candidate species or destroy or adversely modify proposed critical habitat, the Service may engage in informal conference to advise the action agency on ways to avoid or minimize adverse effects to proposed or candidate species. Thus, this letter also serves as our informal conference report and provides our recommendations to avoid or minimize effects to the monarch butterfly during the proposed project.

Project Overview

Caltrans proposes to widen US-101 between Moorpark Road (PM 4.1) in Thousand Oaks and SR-33 (PM 30.9) in Ventura. Project activities may include adding lanes on US-101, lanes that may be designated for HOVs; creating auxiliary lanes between interchanges; improving on- and off-ramps; and improving ramp intersections. The action area for the project includes the project footprint and a 500-foot buffer around the project area.

Caltrans and VCTC propose to commence construction by 2028 and finish by 2040. The project would be phased to avoid having the entire 27-mile project footprint under construction over the entire 12-year period. Caltrans anticipates that no section would be under construction for more than three years. Possible scheduling for phasing includes four separate three-year periods during the overall 12-year construction period, but it could also include overlapping three-year periods.

Caltrans' proposal includes two build alternatives (Build Alternative 2 and 3), described below:

> Build Alternative 2: This alternative proposes to construct a HOV lane in each direction, from Moorpark Road in Thousand Oaks to SR-33 in Ventura, with limited design exceptions and auxiliary lanes where operationally beneficial. This alternative would affect 563.90 acres and require outside widening, retaining walls, and right-of-way acquisitions at some locations. Build Alternative 2 proposes the following for a typical section:
>
> - 10-foot (minimum) left shoulder, with the exception of overcrossing column bents
> - 11- to 12-foot HOV lane
> - 2-foot buffer between HOV and general-purpose lanes at select locations
> - 11- to 12-foot general-purpose lanes
> - 10-foot right shoulder
>
> Build Alternative 3: This alternative proposes to construct a HOV lane in each direction, from Moorpark Road in Thousand Oaks to SR-33 in Ventura, with limited design exceptions and auxiliary lanes where operationally beneficial. This alternative would affect 580.08 acres and require outside widening, retaining walls, and right-of-way acquisitions at some locations. Build Alternative 3 is identical to Build Alternative 2, except that Build Alternative 3 would also restripe the Santa Clara River Bridge to create a fourth general-purpose lane; shift the alignment on the Conejo Grade 24 to 60 feet to the north, from Station 452+00 to Station 474+00, by paving over the existing graded area; and shift the California Street northbound project terminus from just south of SR-33 to about 0.5 mile to the south (Caltrans 2021, pp. 22-23).

The construction methodology for lane widening and the addition of new auxiliary lanes would require the use of earthmoving equipment to flatten out the lanes and a paver to pave the lanes with asphalt. The construction of retaining walls, debris nosing walls, sound walls, wingwalls, and additional bridge piers could involve pile driving. Bridge and retaining wall material would

need to be erected, with reinforced steel and poured concrete used to form the structures. During project construction, Caltrans would use a variety of equipment types, including, but not limited, to graders, backhoes/dozers, compaction machines, cranes, pile drivers, jack hammers, cement mixer trucks, dump trucks, pavers, and water trucks. Caltrans would locate construction staging areas within the US-101 median or paved shoulder. No construction staging areas would be located within native vegetation communities. The project limits of disturbance and impact types (i.e., permanent or temporary) are illustrated in Figure 8, sheets 1 to 31, in Appendix A of the biological assessment (Caltrans 2021).

Operation and maintenance of the project would not differ appreciably from operation and maintenance under current conditions. There could be minor indirect impacts in the form of habitat degradation associated with litter, noise, and night lighting. However, although operational impacts may extend farther in areas of outside widening, these areas are predominantly within the disturbed road shoulders.

Least Bell's Vireo

Status Within the Action Area

Suitable habitat conditions for least Bell's vireo are present within the Goodding's Willow–Red Willow Riparian Woodland, Sandbar Willow Thickets, and Mulefat Thickets along the Santa Clara River and Calleguas Creek (Caltrans 2021, p. 65). Caltrans mapped and tracked four territories during protocol surveys in 2020: three within the Santa Clara River riparian bird study area (i.e., the project's limits of disturbance plus 500-foot buffer), and one within Calleguas Creek outside the riparian bird study area. The three least Bell's vireo territories in the Santa Clara River riparian corridor were within Sandbar Willow Thickets and Mulefat Thickets habitat. Caltrans observed singing territorial males within all three territories from April through June, with two of the territories retaining singing males through July. Of these, Caltrans confirmed that one bred successfully, with an adult observed feeding a fledgling; and two had probable nesting. Caltrans did not detect any least Bell's vireos or signs of nesting within the riparian bird study area for Calleguas Creek. However, observers anecdotally noted one territory within Calleguas Creek, approximately 1,700 feet upstream of the action area (Caltrans 2021, p. 65).

Effects of the Action

Santa Clara River

Suitable habitat for least Bell's vireo is present within the Santa Clara River portion of the action area, and observers detected least Bell's vireo during 2020 protocol surveys. However, Caltrans would not replace or widen the Santa Clara River Bridge as a part of the proposed project, and Caltrans has not proposed any project work on the existing Santa Clara River Bridge under Build Alternative 2. Should Caltrans add an additional lane in each direction to the Santa Clara River Bridge as a part of Build Alternative 3, all work would be limited to the bridge and would consist only of lane restriping within the median. Caltrans would not perform any bridge widening or

work within the river channel, and no visual or audible impacts would occur as a result of restriping the highway lanes. Therefore, Caltrans does not anticipate any direct effects on least Bell's vireo or its occupied suitable habitat within the Santa Clara River drainage as a result of the project action under either Build Alternative 2 or 3. Caltrans would implement measures to avoid and minimize indirect effects, such as a potential decrease in water quality due to erosion and runoff resulting from restriping activities, within occupied suitable habitat for least Bell's vireo adjacent to the project's limits of disturbance in the Santa Clara River under Build Alternative 3.

Calleguas Creek

Suitable habitat for least Bell's vireo is present within the Calleguas Creek portion of the action area. Caltrans did not detect least Bell's vireo within or near the Calleguas Creek portion of the action area throughout 4 months of protocol surveys performed during the breeding season in 2020. In addition, least Bell's vireo is not known to nest within this portion Calleguas Creek. Although Caltrans detected least Bell's vireo upstream of the action area, no fledglings or signs of successful nesting were observed, and the riparian habitat present within the action area is of marginal to low quality; therefore, Caltrans does not expect the action area to be used by least Bell's vireos dispersing from upstream. As such, Caltrans does not anticipate any direct effects to least Bell's vireo as a result of construction work at the Calleguas Creek portion of the action area under either Build Alternative 2 or 3.

Caltrans would remove and temporarily disturb potentially suitable unoccupied riparian habitat for least Bell's vireo as a result of adding an HOV/express bus lane and expanding the bridge at Calleguas Creek (e.g., expanding nosing walls, piers, and abutments) as a part of Build Alternatives 2 and 3. However, the riparian habitat in this area is of marginal to low quality with respect to supporting breeding least Bell's vireo, and this species is not expected to use the area. Potential indirect effects for unoccupied, potentially suitable riparian habitat for least Bell's vireo within the Calleguas Creek drainage may include edge effects and degradation of riparian habitat and water quality associated with litter, fire, the introduction of invasive plant species, erosion, sedimentation, chemical spills during construction, and dust and pollutants associated with vehicles and machinery.

Temporary and permanent impacts on riparian habitats in the Calleguas Creek portion of the action area are provided in the biological assessment (Caltrans 2021, p. 70) and reproduced in the table below:

Riparian Habitats	Build Alternative 2		Build Alternative 3	
	Permanent Impact (acre)	Temporary Impact (acre)	Permanent Impact (acre)	Temporary Impact (acre)
Arroyo Willow Thickets	—	—	—	—
Arroyo Willow Thickets (Disturbed)	—	—	—	—
Coast Live Oak Woodland and Forest (Riparian)	—	—	—	—
Goodding's Willow-Red Willow Riparian Woodland	0.01	0.25	0.01	0.25
Hardstem and California Bulrush Marshes	—	—	—	—
Mulefat Thickets	—	—	—	—
Sandbar Willow Thickets	0.00	0.09	0.00	0.09
Total	**0.01**	**0.34**	**0.01**	**0.34**

"—" indicates no impact; "0.00" indicates < 0.001-acre impact.

Avoidance and Minimization Measures

Caltrans, their contractors, and their representatives would implement the following avoidance and minimization measures proposed in the biological assessment (Caltrans 2021, pp. 26-28, 30-31):

- Prior to clearing or construction, Caltrans will ensure that highly visible barriers (such as orange construction fencing) are installed under the supervision of a qualified biologist around all sensitive natural communities to be avoided that are adjacent to the project's limits of disturbance. Caltrans will not permit grading or fill activity of any type within these areas. Caltrans will ensure that all construction equipment is operated in a manner that prevents accidental damage to sensitive natural communities. Caltrans will install silt fence barriers to prevent accidental deposition of fill material in areas where vegetation is immediately adjacent to planned grading activities.

- Caltrans will not allow construction activities, materials, or equipment within sensitive areas. Construction personnel will strictly limit their activities, vehicles, equipment, and construction materials to the limits of disturbance and designated staging areas and routes of travel. The construction area(s) will be the minimal area necessary to construct the project, and Caltrans will specify sensitive areas in the final design plans. Caltrans will instruct personnel to restrict their activities to the construction areas. Personnel will access sites from existing access routes to the greatest extent possible.

- A biological monitor will inspect fencing at a frequency necessary to ensure that it is in place and properly maintained. Fencing will remain in place and Caltrans will be maintain fencing until project construction is completed.

- A biological monitor will be present on-site during clearing/grubbing as well as earthwork within or adjacent to sensitive natural communities or other protected biological resources to ensure that avoidance and minimization measures are in place, according to specifications, and monitor construction in the vicinity of biological resources at a frequency necessary to ensure that avoidance and minimization measures are properly followed. The biological monitor will report any non-compliance to the resident engineer within 24 hours.

- Temporary and permanent lighting will be directional and use shielding to narrowly focus the light footprint within the construction or permanently developed footprint. Caltrans will minimize the number of lights and use motion sensors for all security lights such that, under normal circumstances, the light remains inactive. Caltrans will ensure that lighting is of a wavelength and spectrum known to have reduced effects on wildlife.

- Caltrans will develop and implement a biological resource information program for all construction personnel. At a minimum, the program will include the following topics: (1) the biology, conservation, and legal status of federally and state-listed species occurring or potentially occurring within the project site and areas directly adjacent to the project's limit of disturbance; (2) responsibilities of the biological monitor; (3) delineation and flagging of adjacent habitat; (4) limitations on the ingress and egress of equipment as well as the movement of those employed on-site (i.e., to designated construction zones); (5) on-site pet prohibitions; (6) use of containers for disposal and removal of trash; and (7) project features designed to reduce impacts on listed species and habitat and promote continued successful occupation of adjacent habitat areas. Caltrans will provide supporting materials to all construction personnel during the training program.

- If clearing of riparian vegetation occurs during the active breeding season for least Bell's vireo (March 15–September 15), then a qualified biologist will conduct preconstruction surveys within three days prior to vegetation removal activities within suitable habitat to identify the locations of any individual least Bell's vireo. If the biological monitor detects nesting activities or active nests within the project impact area, the biological monitor will clearly mark a buffer zone, and no construction activities will occur within the buffer zone until the young have fledged or the nest is no longer active.

Monarch Butterfly

Overview

The western monarch butterfly population has declined by more than 99 percent since the 1980s. An estimated 4.5 million monarchs overwintered on the California coast in the 1980s, whereas in 2020, the population estimate for migratory overwintering monarchs was less than 2,000 butterflies. This extreme population decline is due to multiple stressors across the monarch's range, including the loss and degradation of overwintering groves; pesticide use, particularly

insecticides; loss of breeding and migratory habitat; climate change; parasites and disease. Historically, the majority of western monarchs spent the winter in forested groves near the coast from Mendocino County, California, south into northern Baja California, Mexico. In recent years, monarchs have not clustered in the southern-most part of their overwintering range, and they are likely year-round residents in some areas of the coast. This resident phenomenon is plausibly due to a combination of climate change, and an abundance of residential-planted non-native, evergreen tropical milkweed (*Asclepias curassavica*) that is available for monarchs year-round. Migratory western monarchs leave the overwintering groves in mid-winter to early-spring. Throughout the spring and summer, monarchs breed, lay their eggs on milkweed (*Asclepias* spp.), and migrate across multiple generations within California and other states west of the Rocky Mountains.

Effects of the Action

The proposed project would permanently remove and temporarily disturb native grassland and scrubland habitat located along the edge of US-101 (Caltrans 2021, p. 67). If nectaring sources (i.e., nectar-bearing flowering herbs and shrubs) or milkweed host plants are present within these areas, then direct stressors on suitable habitat for breeding, foraging, and/or migrating monarch butterflies would occur as a result of either Build Alternative 2 or 3. Caltrans did not detect milkweed within the project limits of disturbance during field surveys in 2019 or 2020; however, Caltrans did not perform focused surveys for monarch breeding habitat. If milkweed is present within the proposed work area, then direct stressors on monarch breeding habitat could occur.

Direct Stressors

Direct stressors on individual breeding, foraging, or migrating monarch butterfly from project construction could occur from the use of construction equipment, machinery, and vehicles and from vegetation clearing activities. Construction activities could increase the potential for fire in the area, which could directly and indirectly impact monarch butterfly. No overwintering sites for monarch butterfly are present within the project's limits of disturbance (Caltrans 2021, p. 67). Project work within the portion of the alignment that contains suitable tree groves to support monarch butterfly roosting is restricted to inside widening within the median of the northbound and southbound lanes of US-101. As such, project-related construction activities would not remove any of the eucalyptus tree groves present within the project action area, and no direct stressors on overwintering monarch butterfly would occur as a result of project construction.

Collision or crushing of individuals from construction equipment or vehicles could result in injury or death of monarch butterfly. Depending on what time of year construction is performed, all life stages of monarch butterfly associated with the breeding season (i.e., breeding adults, eggs, larvae) could be affected.

Indirect Stressors

Potential indirect stressors for potentially suitable foraging and/or breeding habitat for monarch butterfly along US-101 may include edge effects and degradation of habitat associated with litter, fire, the introduction of invasive plant species, erosion, sedimentation, chemical spills during construction, and dust and pollutants associated with vehicles and machinery. Caltrans would avoid temporary indirect stressors as a result of construction activities on overwintering habitat adjacent to the project because construction work within this portion of the project alignment would only occur within the existing median, with the southbound lanes of US-101 separating the project work area and suitable overwintering habitat.

If areas that are temporarily disturbed are not successfully restored and suitable habitat for breeding, foraging, or migrating monarch butterfly does not re-establish, then there would be less available habitat and the species may not occur in areas that it had previously occupied should the species be present within the action area.

Indirect effects from dust, erosion, increased fire risk, and invasive plant species could cause monarch butterfly to cease using the area if habitat degradation is severe enough to diminish resources needed for foraging and breeding.

Overwintering monarch butterflies would not be exposed, and therefore would not respond, to stressors as a result of the project action because winter roost sites do not occur within the project's limits of disturbance. The project would avoid indirect stressors on winter roost sites adjacent to the project work area.

<u>Avoidance and Minimization Measures</u>

Caltrans, their contractors, and their representatives would implement the following avoidance and minimization measures for monarch butterfly proposed in the biological assessment (Caltrans 2021, pp. 27-29, 31):

- Caltrans will develop a weed abatement plan to minimize the spread and importation of non-native plant material during and after construction. This will include the following:
    - Caltrans will ensure that any exotic species removed during construction are properly handled to prevent sprouting or regrowth. Personnel will take care to avoid spreading exotic plant seeds during plant removal. Caltrans will ensure that plants are removed prior to flowering, if feasible.
    - Caltrans will ensure that equipment (e.g., vehicles, trucks, and heavy equipment) is cleaned of mud or other debris that may contain invasive plants and/or seeds and inspected prior to entering the worksite and between worksites to reduce the potential for spreading noxious weeds. Personnel will clean equipment in a designated area at least 300 feet from fencing and drainages.

  - Caltrans will ensure that trucks carrying loads of vegetation to be removed from the project footprint are covered, and that vegetation is disposed of in accordance with applicable laws and regulations.

  - Caltrans will only use certified weed-free straw, mulch, and/or fiber rolls for erosion control. Caltrans will obtain fill material from weed-free sources.

  - Caltrans will ensure that all revegetation efforts avoid the use of species listed on the California Invasive Plant Inventory.

- Caltrans will perform pre-construction surveys to identify areas where milkweed, the host plant of monarch butterfly, is present within the project limits of disturbance. Caltrans will ensure that any individual milkweed that is found will be marked and avoided to the maximum extent feasible. Any milkweed plants that are located within the project work area and cannot be avoided will be relocated to the edge of right-of-way outside of the project impact area.

- To avoid potential impacts on milkweed and immature stages of monarch butterfly, Caltrans will ensure that vegetation removal within suitable habitat (i.e., native grassland and scrubland habitats) occurs between November and January to avoid the breeding season. Caltrans will ensure that vegetation removal occurs following completion of the blooming period for milkweed and prior to the start of new milkweed growth.

- Caltrans will include milkweed species in the plant palette for revegetation of disturbed areas in areas of suitable habitat for monarch butterfly, along with other pollinator plant species, to offset any direct impacts on monarch butterfly.

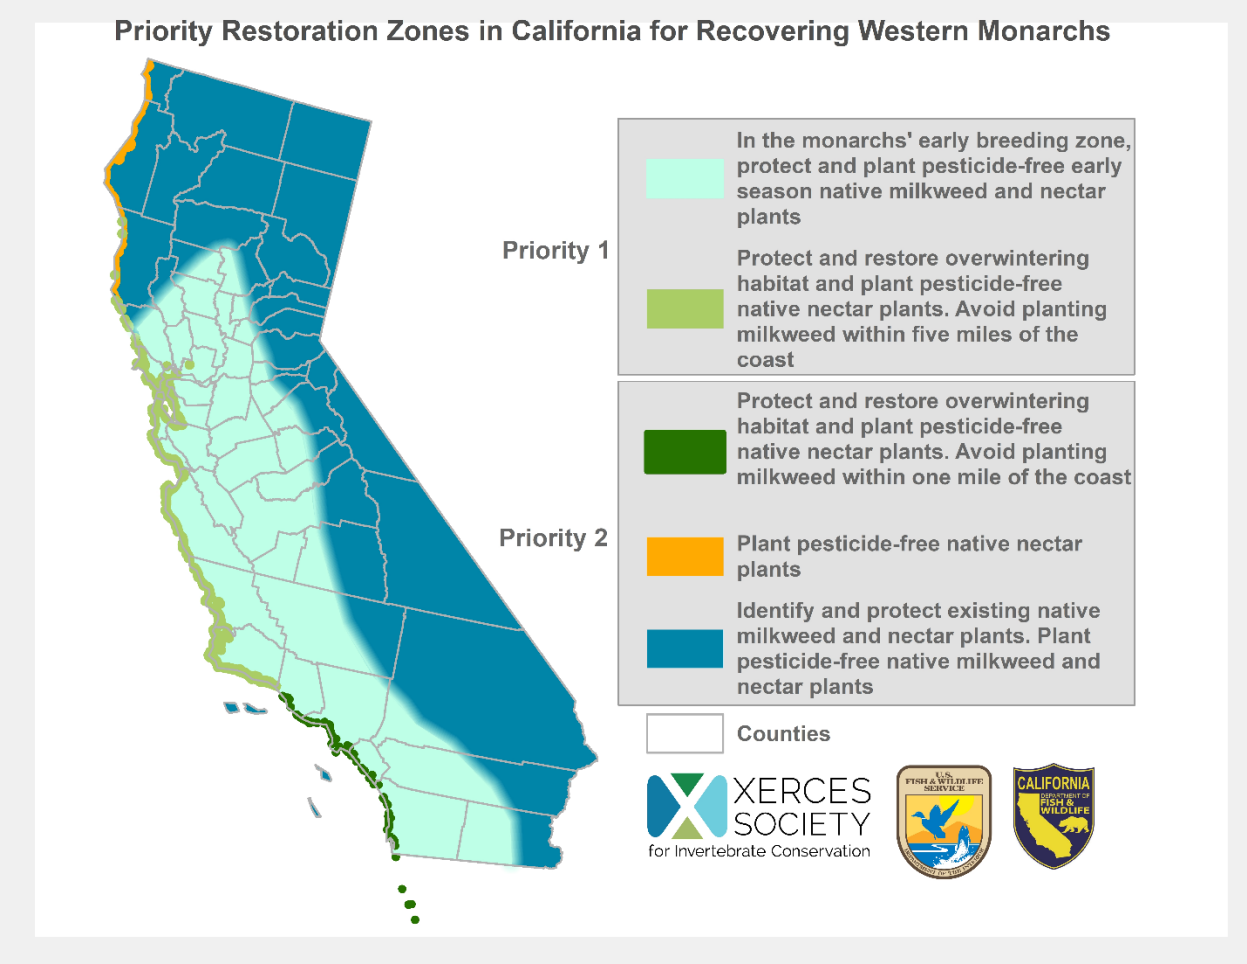
- Caltrans will ensure that sensitive habitats, such as those utilized by monarch butterflies, are replaced at a 1:1 ratio through on-site restoration. On-site, in-kind restoration of affected habitats will occur at the current locations of the habitats upon completion of construction. Caltrans will ensure that restoration consists of returning affected areas to original contour grades, decompacting the soil, and replanting through hydroseeding and/or the use of container plantings, using a plant palette composed of native species from the local region prior to disturbance. A Caltrans District Biologist will approve all planting plans prior to implementation. Caltrans will ensure that restoration performance standards and monitoring requirements follow the directives outlined in the habitat mitigation and monitoring plan.

- Caltrans will ensure that, post-construction, any disturbed areas remaining as bare ground are revegetated with a native hydroseed mix and/or native container plantings.

Conservation Recommendations from the Service

Section 7(a)(1) of the Act directs federal agencies to use their authorities to further the purpose of the Act by conducting conservation programs for the benefit of endangered and threatened species. Conservation recommendations are discretionary activities that an action agency may undertake to avoid and minimize the adverse effects of a proposed action, implement recovery plans, or to develop information that is useful for the conservation of listed species.

Caltrans has incorporated the monarch butterfly into their biological assessment for the proposed project. The purpose of the following conservation recommendations, which we have separated by habitat function, is to encourage Caltrans to implement additional measures to further avoid and minimize the effects of the proposed project on the monarch butterfly. Additionally, the map below details priority zones for conserving the western monarch in California and serves as a reference for several of our recommendations:



Coastal California Overwintering Habitat

Western monarch butterflies migrate to the California coast, and cluster in a specific set of forested tree groves during the fall and winter each year. These overwintering groves provide protection from inclement weather, and possess suitable vegetation and microclimate conditions for monarchs (e.g., roosting trees, wind protection, dappled sunlight, nectar sources, water and/or dew for hydration, high humidity, and an absence of freezing temperatures). In the overwintering zone of the coast (i.e., within 5 miles of the coast from Mendocino County south through Santa Barbara County, and within 1 mile of the coast from Ventura County south through San Diego County), we recommend the following:

1. Protect, manage, enhance and restore monarch butterfly overwintering groves.

2. Conduct overwintering grove habitat assessment(s), and develop and implement long-term grove management plans, as applicable. Management plan actions for groves may include, but are not limited to:

    a. Enhance roosting trees within overwintering groves and within 0.5 mile of groves by planting native insecticide-free trees (e.g., Monterey pine *(Pinus radiata)*, Monterey cypress *(Cupressus macrocarpa)*, Coast redwood *(Sequoia sempervirens)*, coast live oak *(Quercus agrifolia),* Douglas fir *(Pseudotsuga menzesii),* Torrey pine (*Pinus torreyana*), western sycamore *(Platanus racemosa),* bishop pine *(Pinus radiata)* and others, as appropriate for location).

    b. Avoid the removal of trees or shrubs within 0.5 mile of overwintering groves, except for specific grove management purposes, and/or for human health and safety concerns. The maintenance of trees and shrubs within 0.5 mile of these sites provides a buffer to preserve the microclimate conditions of the winter habitat.

    c. Conduct management activities in groves from March 16 to September 14, in coordination with a monarch biologist, such as tree trimming, mowing, burning and grazing in monarch overwintering habitat outside of the estimated timeframe when monarchs are likely present.

    d. Enhance native, insecticide-free nectar sources by planting fall/winter blooming forbs or shrubs within overwintering groves and within 1 mile of the groves.

3. Protect monarchs, other pollinators, and their habitats from pesticides (i.e., insecticides and herbicides).

a. Avoid the use pesticides within 1 mile of overwintering groves, particularly when monarchs may be present. If pesticides are used, then conduct applications from March 16 to September 14, when possible.

b. Screen all classes of pesticides for pollinator risk to avoid harmful applications, including biological pesticides such as *Bacillus thuringiensis*.

c. Avoid the use of neonicotinoids or other systemic insecticides, including coated seeds, any time of the year in monarch habitat due to their ecosystem persistence, systemic nature, and toxicity.

d. Avoid the use of soil fumigants.

e. Consider non-chemical weed control techniques, when possible.

f. Avoid herbicide application on blooming flowers. Apply herbicides during young plant phases, when plants are more responsive to treatment, and when monarchs and other pollinators are less likely to be nectaring on the plants.

g. Whenever possible, use targeted application herbicide methods, avoid large-scale broadcast applications, and take precautions to limit off-site movement of herbicides (e.g., drift from wind and discharge from surface water flows).

h. Separate habitat areas from areas receiving chemical treatments with a pesticide-free spatial buffer and/or evergreen vegetative buffer of coniferous, non-flowering trees to capture chemical drift. The appropriate monarch and pollinator habitat spatial buffer size is contingent upon several factors, including weather and wind conditions, but at a minimum, the habitat should be at least 40 feet from ground-based pesticide applications, 60 feet from air-blast sprayers, and 125 feet from any systemic insecticide applications or seed-treated plants.

4. To minimize the spread of the pathogen *Ophryocystis elektroscirrha* (OE), and to encourage natural monarch migration, do not plant non-native tropical milkweed. OE is able to build up on tropical milkweed, because these plants are evergreen, and they do not die back in the winter. OE can be debilitating and/or lethal to monarchs.

5. Remove tropical milkweed that is detected, and replace it with native, insecticide-free nectar plants suitable for the location.

6. To assist in maintaining normal migration behavior, do not plant any type of milkweed within 5 miles of the coast from Mendocino County south through Santa Barbara County, and within 1 mile of the coast south of Santa Barbara County.

7. After appropriate training, conduct grove monitoring for butterflies during the Western Monarch Counts each fall and winter. When possible, report when monarchs arrive and depart the groves each year.

8. To provide benefits for monarchs and other pollinators anywhere on the landscape within the overwintering zone, install native, insecticide-free nectar plants that bloom throughout the year, as is feasible, for the location.

Breeding and Migratory Habitat

Monarch butterflies breed and migrate across multiple generations each year throughout the western U.S. The early breeding zone is an estimated area in California where monarchs are likely to breed and/or lay their eggs on milkweed after departing the overwintering groves in mid-winter to early spring each year. Early emerging milkweed species are likely a limiting factor on the landscape in the early breeding zone and may be associated with the severe population decline of western monarchs, and these plants are essential to successfully create the next generation of migratory butterflies. For monarch breeding and migratory habitat, we recommend the following:

Priority 1 Zone:

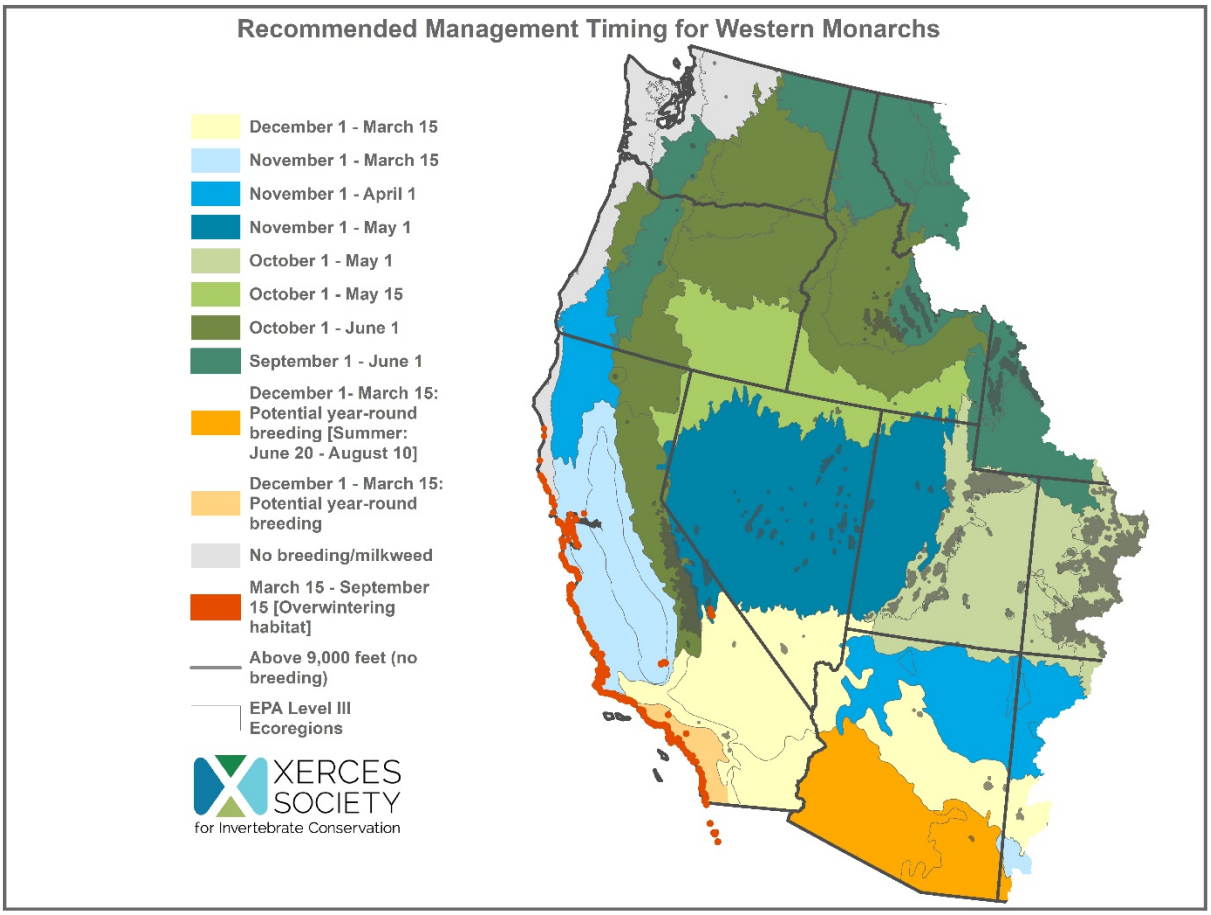
1. Enhance and maintain habitat in the Priority 1 early breeding zone of California by identifying and protecting existing habitat, and planting native, insecticide-free early-emerging milkweed species (e.g., *Asclepias vestita, A. californica, A. eriocarpa, A. cordifolia, A. erosa*), and native, insecticide-free flowering plants that are available to monarchs from January to April, as appropriate for the project location.

Priority 2 Zone:

2. Enhance and maintain habitat in the Priority 2 breeding/migratory habitat zone of California and in other western States, by identifying and protecting existing habitat, and planting native, insecticide-free milkweed species and flowering plants that are appropriate for the location.

For All Breeding and Migratory Zones:

3. Conduct management activities such as mowing, burning and grazing in monarch breeding and migratory habitat outside of the estimated timeframe when monarchs are likely present (Recommended Management Timing Map, below).



4. Protect monarchs, other pollinators, and their habitats from pesticides (i.e., insecticides and herbicides).

    a. Avoid the use of pesticides when monarchs may be present, when feasible (Figure 2, Recommended Management Timing Map, below).

    b. Screen all classes of pesticides for pollinator risk to avoid harmful applications, including biological pesticides such as *Bacillus thuringiensis*.

    c. Avoid the use of neonicotinoids or other systemic insecticides, including coated seeds, any time of the year in monarch habitat due to their ecosystem persistence, systemic nature, and toxicity.

    d. Avoid the use of soil fumigants.

    e. Consider non-chemical weed control techniques, when feasible.

f. Avoid herbicide application on blooming flowers. Apply herbicides during young plant phases, when plants are more responsive to treatment, and when monarchs and other pollinators are less likely to be nectaring on the plants.

g. Whenever possible, use targeted application herbicide methods, avoid large-scale broadcast applications, and take precautions to limit off-site movement of herbicides (e.g., drift from wind and discharge from surface water flows).

h. Separate habitat areas from areas receiving treatment with a pesticide-free spatial buffer and/or evergreen vegetative buffer of coniferous, non-flowering trees to capture chemical drift. The appropriate monarch and pollinator habitat spatial buffer size is contingent upon several factors, including weather and wind conditions, but at a minimum, the habitat should be at least 40 feet from ground-based pesticide applications, 60 feet from air-blast sprayers, and 125 feet from any systemic insecticide applications or seed-treated plants.

5. To minimize the spread of the pathogen OE, do not plant non-native tropical milkweed. OE can build up on tropical milkweed and infect monarchs, because these plants are evergreen and do not die back in the winter. OE can be lethal to monarchs.

6. Remove tropical milkweed that is detected, and replace it with native, insecticide-free milkweed and native, insecticide-free nectar plants appropriate for the location.

7. Report milkweed and monarch observations from all life stages, including breeding butterflies, to the Monarch Milkweed Mapper or via the project portal in the iNaturalist smartphone app.

8. To provide benefits for monarchs and other pollinators anywhere on the landscape within the breeding/migratory zone, install native, insecticide-free milkweed and native, insecticide-free nectar plants that bloom throughout the year, as is feasible for the location.

Conclusion

We concur with your determination that the proposed activities may affect, but are not likely to adversely affect, least Bell's vireo. Our concurrence is based on the following:

- Least Bell's vireo is not present in Calleguas Creek portion of the action area.

- Permanent and temporary direct and indirect effects to suitable least Bell's vireo habitat are likely to be insignificant and discountable. Additionally, suitable habitat within the Calleguas Creek portion of the action area is of poor quality.

- Operation and maintenance of the project would not differ appreciably from operation and maintenance under current conditions, and indirect effects of the project would be predominantly within disturbed road shoulders.

- Caltrans will implement the aforementioned avoidance and minimization measures for least Bell's vireo.

Additionally, we encourage Caltrans to implement the recommended conservation measures to avoid or minimize effects to the monarch butterfly. The Ventura Fish and Wildlife Office is available for technical assistance. With your continuing cooperation, we can help conserve the monarch butterfly in the Ventura County portion of its range.

Further consultation pursuant to section 7(a)(2) of the Act is not required. If the proposed action changes in any manner that may affect a listed species or critical habitat, you must contact us immediately to determine whether additional consultation is required. If you have any questions regarding this matter, please contact David Sherer at (805) 677-3338 or by electronic mail at david_sherer@fws.gov.

Sincerely,

Christopher J. Diel
Assistant Field Supervisor
