Corps of Engineers Approved Jurisdictional Determination

DEPARTMENT OF THE ARMY
U.S. ARMY CORPS OF ENGINEERS, LOS ANGELES DISTRICT
60 S CALIFORNIA STREET, SUITE 201
VENTURA, CA 93001-2598

December 18, 2019

SUBJECT: Approved Jurisdictional Determination

Kenzie Wood
135 Main Street, 6th Floor
San Francisco, CA 94105

Dear Ms. Wood:

I am responding to your request (File No. SPL-2019-00954-EBR) dated October 9, 2019, for an approved Department of the Army jurisdictional determination (JD) for the AVEP Solar Project Tumbleweed, Rabbitbrush, and Chaparral Solar Facilities project site (central location: lat. 34.8823°N, long. -118.322612°W) located near the city of Rosamond, Kern County, California.

The Corps' evaluation process for determining whether or not a Department of the Army permit is needed involves two tests. If both tests are met, a permit would likely be required. The first test determines whether or not the proposed project is located within the Corps' geographic jurisdiction (i.e., it is within a water of the United States). The second test determines whether or not the proposed project is a regulated activity under Section 10 of the Rivers and Harbors Act or Section 404 of the Clean Water Act. This evaluation pertains only to geographic jurisdiction.

Based on available information, I have determined waters of the United States do not occur on the project site. The basis for our determination can be found in the enclosed Approved Jurisdictional Determination (JD) form.

The aquatic resources identified as "Chaparral S-1" and “Rabbitbrush S-1” in project documentation you provided are intrastate isolated waters with no apparent interstate or foreign commerce connection. As such, these aquatic resources are not currently regulated by the Corps of Engineers. This disclaimer of jurisdiction is only for Section 404 of the Clean Water Act. Other federal, state, and local laws may apply to your activities. In particular, you may need authorization from the California State Water Resources Control Board, the California Department of Fish and Wildlife, and/or the U.S. Fish and Wildlife Service.

This letter includes an approved jurisdictional determination for the AVEP Solar Project Tumbleweed, Rabbitbrush, and Chaparral Solar Facilities project site. If you wish to submit new information regarding this jurisdictional determination, please do so within 60 days. We will consider any new information so submitted and respond within 60 days by either revising the prior determination, if appropriate, or reissuing the prior determination. If you object to this or any revised or reissued jurisdictional determination, you may request an administrative appeal under Corps regulations at 33 CFR Part 331. Enclosed you will find a Notification of Appeal

Process (NAP) and Request for Appeal (RFA) form. If you wish to appeal this decision, you must submit a completed RFA form within 60 days of the date on the NAP to the Corps South Pacific Division Office at the following address:

Tom Cavanaugh
Administrative Appeal Review Officer
U.S. Army Corps of Engineers
South Pacific Division, CESPD-PDO
450 Golden Gate Ave.
San Francisco, CA 94102

In order for an RFA to be accepted by the Corps, the Corps must determine that it is complete, that it meets the criteria for appeal under 33 CFR Part 331.5 (see below), and that it has been received by the Division Office by **February 16, 2020**.

This determination has been conducted to identify the extent of the Corps' Clean Water Act jurisdiction on the particular project site identified in your request, and is valid for five years from the date of this letter, unless new information warrants revision of the determination before the expiration date. This determination may not be valid for the wetland conservation provisions of the Food Security Act of 1985. If you or your tenant are USDA program participants, or anticipate participation in USDA programs, you should request a certified wetland determination from the local office of the Natural Resources Conservation Service prior to starting work.

Thank you for participating in the regulatory program. If you have any questions, please contact Emma Ross at (805) 585-2149 or via e-mail at Emma.B.Ross@usace.army.mil. Please help me to evaluate and improve the regulatory experience for others by completing the customer survey form at http://corpsmapu.usace.army.mil/cm_apex/f?p=regulatory_survey.

	PRELIMINARY JURISDICTIONAL DETERMINATION	E

SECTION I - The following identifies your rights and options regarding an administrative appeal of the above decision. Additional information may be found at http://www.usace.army.mil/cecw/pages/reg_materials.aspx or Corps regulations at 33 CFR Part 331.

A: INITIAL PROFFERED PERMIT: You may accept or object to the permit.

- ACCEPT: If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.

- OBJECT: If you object to the permit (Standard or LOP) because of certain terms and conditions therein, you may request that the permit be modified accordingly. You must complete Section II of this form and return the form to the district engineer. Your objections must be received by the district engineer within 60 days of the date of this notice, or you will forfeit your right to appeal the permit in the future. Upon receipt of your letter, the district engineer will evaluate your objections and may: (a) modify the permit to address all of your concerns, (b) modify the permit to address some of your objections, or (c) not modify the permit having determined that the permit should be issued as previously written. After evaluating your objections, the district engineer will send you a proffered permit for your reconsideration, as indicated in Section B below.

B: PROFFERED PERMIT: You may accept or appeal the permit

- ACCEPT: If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.

- APPEAL: If you choose to decline the proffered permit (Standard or LOP) because of certain terms and conditions therein, you may appeal the declined permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

C: PERMIT DENIAL: You may appeal the denial of a permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

D: APPROVED JURISDICTIONAL DETERMINATION: You may accept or appeal the approved JD or provide new information.

- ACCEPT: You do not need to notify the Corps to accept an approved JD. Failure to notify the Corps within 60 days of the date of this notice means that you accept the approved JD in its entirety, and waive all rights to appeal the approved JD.

- APPEAL: If you disagree with the approved JD, you may appeal the approved JD under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

E: PRELIMINARY JURISDICTIONAL DETERMINATION: You do not need to respond to the Corps regarding the preliminary JD. The Preliminary JD is not appealable. If you wish, you may request an approved JD (which may be appealed), by contacting the Corps district for further instruction. Also you may provide new information for further consideration by the Corps to reevaluate the JD.

SECTION II - REQUEST FOR APPEAL or OBJECTIONS TO AN INITIAL PROFFERED PERMIT

REASONS FOR APPEAL OR OBJECTIONS: (Describe your reasons for appealing the decision or your objections to an initial proffered permit in clear concise statements. You may attach additional information to this form to clarify where your reasons or objections are addressed in the administrative record.)

ADDITIONAL INFORMATION: The appeal is limited to a review of the administrative record, the Corps memorandum for the record of the appeal conference or meeting, and any supplemental information that the review officer has determined is needed to clarify the administrative record. Neither the appellant nor the Corps may add new information or analyses to the record. However, you may provide additional information to clarify the location of information that is already in the administrative record.

Appendix C

§ 331.5 Criteria.

(a) *Criteria for appeal* —(1) *Submission of RFA.* The appellant must submit a completed RFA (as defined at §331.2) to the appropriate division office in order to appeal an approved JD, a permit denial, or a declined permit. An individual permit that has been signed by the applicant, and subsequently unilaterally modified by the district engineer pursuant to 33 CFR 325.7, may be appealed under this process, provided that the applicant has not started work in waters of the United States authorized by the permit. The RFA must be received by the division engineer within 60 days of the date of the NAP.

(2) *Reasons for appeal.* The reason(s) for requesting an appeal of an approved JD, a permit denial, or a declined permit must be specifically stated in the RFA and must be more than a simple request for appeal because the affected party did not like the approved JD, permit decision, or the permit conditions. Examples of reasons for appeals include, but are not limited to, the following: A procedural error; an incorrect application of law, regulation or officially promulgated policy; omission of material fact; incorrect application of the current regulatory criteria and associated guidance for identifying and delineating wetlands; incorrect application of the Section 404(b)(1) Guidelines (see 40 CFR Part 230); or use of incorrect data. The reasons for appealing a permit denial or a declined permit may include jurisdiction issues, whether or not a previous approved JD was appealed.

(b) *Actions not appealable.* An action or decision is not subject to an administrative appeal under this part if it falls into one or more of the following categories:

(1) An individual permit decision (including a letter of permission or a standard permit with special conditions), where the permit has been accepted and signed by the permittee. By signing the permit, the applicant waives all rights to appeal the terms and conditions of the permit, unless the authorized work has not started in waters of the United States and that issued permit is subsequently modified by the district engineer pursuant to 33 CFR 325.7;

(2) Any site-specific matter that has been the subject of a final decision of the Federal courts;

(3) A final Corps decision that has resulted from additional analysis and evaluation, as directed by a final appeal decision;

(4) A permit denial without prejudice or a declined permit, where the controlling factor cannot be changed by the Corps decision maker (e.g., the requirements of a binding statute, regulation, state Section 401 water quality certification, state coastal zone management disapproval, etc. (See 33 CFR 320.4(j));

(5) A permit denial case where the applicant has subsequently modified the proposed project, because this would constitute an amended application that would require a new public interest review, rather than an appeal of the existing record and decision;

(6) Any request for the appeal of an approved JD, a denied permit, or a declined permit where the RFA has not been received by the division engineer within 60 days of the date of the NAP;

(7) A previously approved JD that has been superceded by another approved JD based on new information or data submitted by the applicant. The new approved JD is an appealable action;

(8) An approved JD associated with an individual permit where the permit has been accepted and signed by the permittee;

(9) A preliminary JD; or

(10) A JD associated with unauthorized activities except as provided in §331.11.

Re: Federal and State Aquatic Resources Report Addendum: AVEP Solar Project Revision, Kern County, California.

I. INTRODUCTION

Terry Huffman, PhD of the Huffman-Broadway Group, Inc., prepared the January 2020 technical report entitled, *Federal and State Aquatic Resources Report*: *AVEP Solar Project Tumbleweed, Rabbitbrush, and Chaparral Solar Facilities, Kern County, California. Prepared for Tumbleweed Solar, LLC, Rabbitbrush Solar, LLC, and Chaparral Solar, LLC.,* for the proposed AVEP Solar Project. Since preparing the Report, the AVEP Solar Project (Project) has undergone modifications. These modifications consist of (1) the removal of the approximate 721-acre Tumbleweed Solar Facility from the Project; and (2) increasing the proposed site for the Chaparral Solar Facility from approximately 764 acres to approximately 774 acres to include an optional location (one of two potential locations on the Chaparral Solar Facility) for a proposed energy storage system (ESS), through the proposed addition of an approximately 10-acre parcel to the proposed Chaparral Solar Facility site.

The proposed Chaparral Solar Facility 10-acre parcel is located at the northwest corner of Holiday Avenue and 110th Street West, directly across Holiday Avenue from the existing Willow Springs Solar Project Substation. The proposed capacity of the ESS on both the Rabbitbrush and Chaparral Solar Facilities has been doubled, to store approximately 1,000 megawatt-hours (MWh) of energy on each facility (for a combined project total of approximately 2,000 MWh), however, the proposed acreage of each ESS would remain at approximately five acres of land within each facility site. As shown on Figure 1 – Project Map, and Figure 2 – Site Plan, a portion of the remainder of the proposed 10-acre parcel to the Chaparral Solar Facility would be occupied by access easements for electric collection and temporary water lines.

This memorandum evaluates whether there is a need to update the technical analysis and findings with respect to the above described modifications regarding whether aquatic resources are present and, if present, to determine if they are potentially subject to (1) US Army Corps of Engineers (Corps) and/or US Environmental Protection Agency (US EPA) regulation under Section 404 of the Clean Water Act (CWA) (33 U.S.C. 1344); (2) Corps jurisdiction under Section 10 of the Rivers and Harbors Act (RHA) (33 U.S.C. 403); (3) California Department of Fish and Wildlife (CDFW) jurisdiction under the Department's Lake and Streambed

Alteration Agreement Program (California Fish and Game Code [FGC] Sections 1600-1616) (LSAA); and/or (4) State Water Resources Control Board (WRCB) and the Lahontan Regional Water Quality Control Board (RWQCB) as part of their federally delegated 401 Water Quality Certification Program (401 WQC) and state legislated Porter-Cologne Water Quality Control Act Program (PCA).

In summary, the Project modifications do not result in the need to study any new additional areas since the areas affected by changes in the project's geographic extent (as shown on Appendix A, Figure 2 of the above cited technical report) were already included in the above cited technical report's data collection, analysis, and technical findings, and included in the identification and delineation of the geographical reach of aquatic resources found and their potential to be subject to federal and/or state regulatory jurisdiction.

Removing the Tumbleweed Solar Facility from the Project or adding the 10-acre parcel to the Chaparral Solar Facility area would not result in either an increase of or fewer potential impacts to aquatic resources since the study did not find aquatic resources to be present within either the Tumbleweed Solar Facility area or the 10-acre parcel. In addition, the Project design of the solar generating facilities avoids all impacts to aquatic resource areas.

II. MODIFIED PROJECT DESCRIPTION

The Project will construct, operate, and eventually decommission two solar photovoltaic (PV) power generating facilities that would be capable of delivering a total of up to approximately 250 megawatts of alternating current (MW-ac) electricity, along with associated facilities including an ESS on each facility. The proposed Project consists of two non-contiguous solar generating facilities, the Rabbitbrush Solar Facility (125 MW-ac) and Chaparral Solar Facility (125 MW-ac) and an ESS to store approximately 1,000 megawatt-hours (MWh) for each facility, for a total of approximately 2,000 (MWh).

III. MODIFICATIONS TO THE ANALYSIS

As compared to the Project as previously analyzed in the above referenced Report, the Project modifications as described above do not result in the need to modify the results nor require a change in the level of analysis of the above referenced Report. The technical findings regarding the identification and delineation of the geographical reach of aquatic resources found, and the findings regarding the potential of aquatic resources found to be subject to federal and/or state regulatory jurisdiction also do not change in the above referenced Report.

Implementing the Project modifications, either separately or as a whole, would not result in any new areas to be surveyed or an increase to the scope of analysis of previous data collected, which was relied on to prepare the above referenced report. Furthermore the modifications would not affect the resulting technical delineation and findings regarding the potential for being within federal and/or state environmental regulatory jurisdiction presented in the above referenced Report. Accordingly, the modifications would not require any new data collection and analysis compared to the above referenced Report.

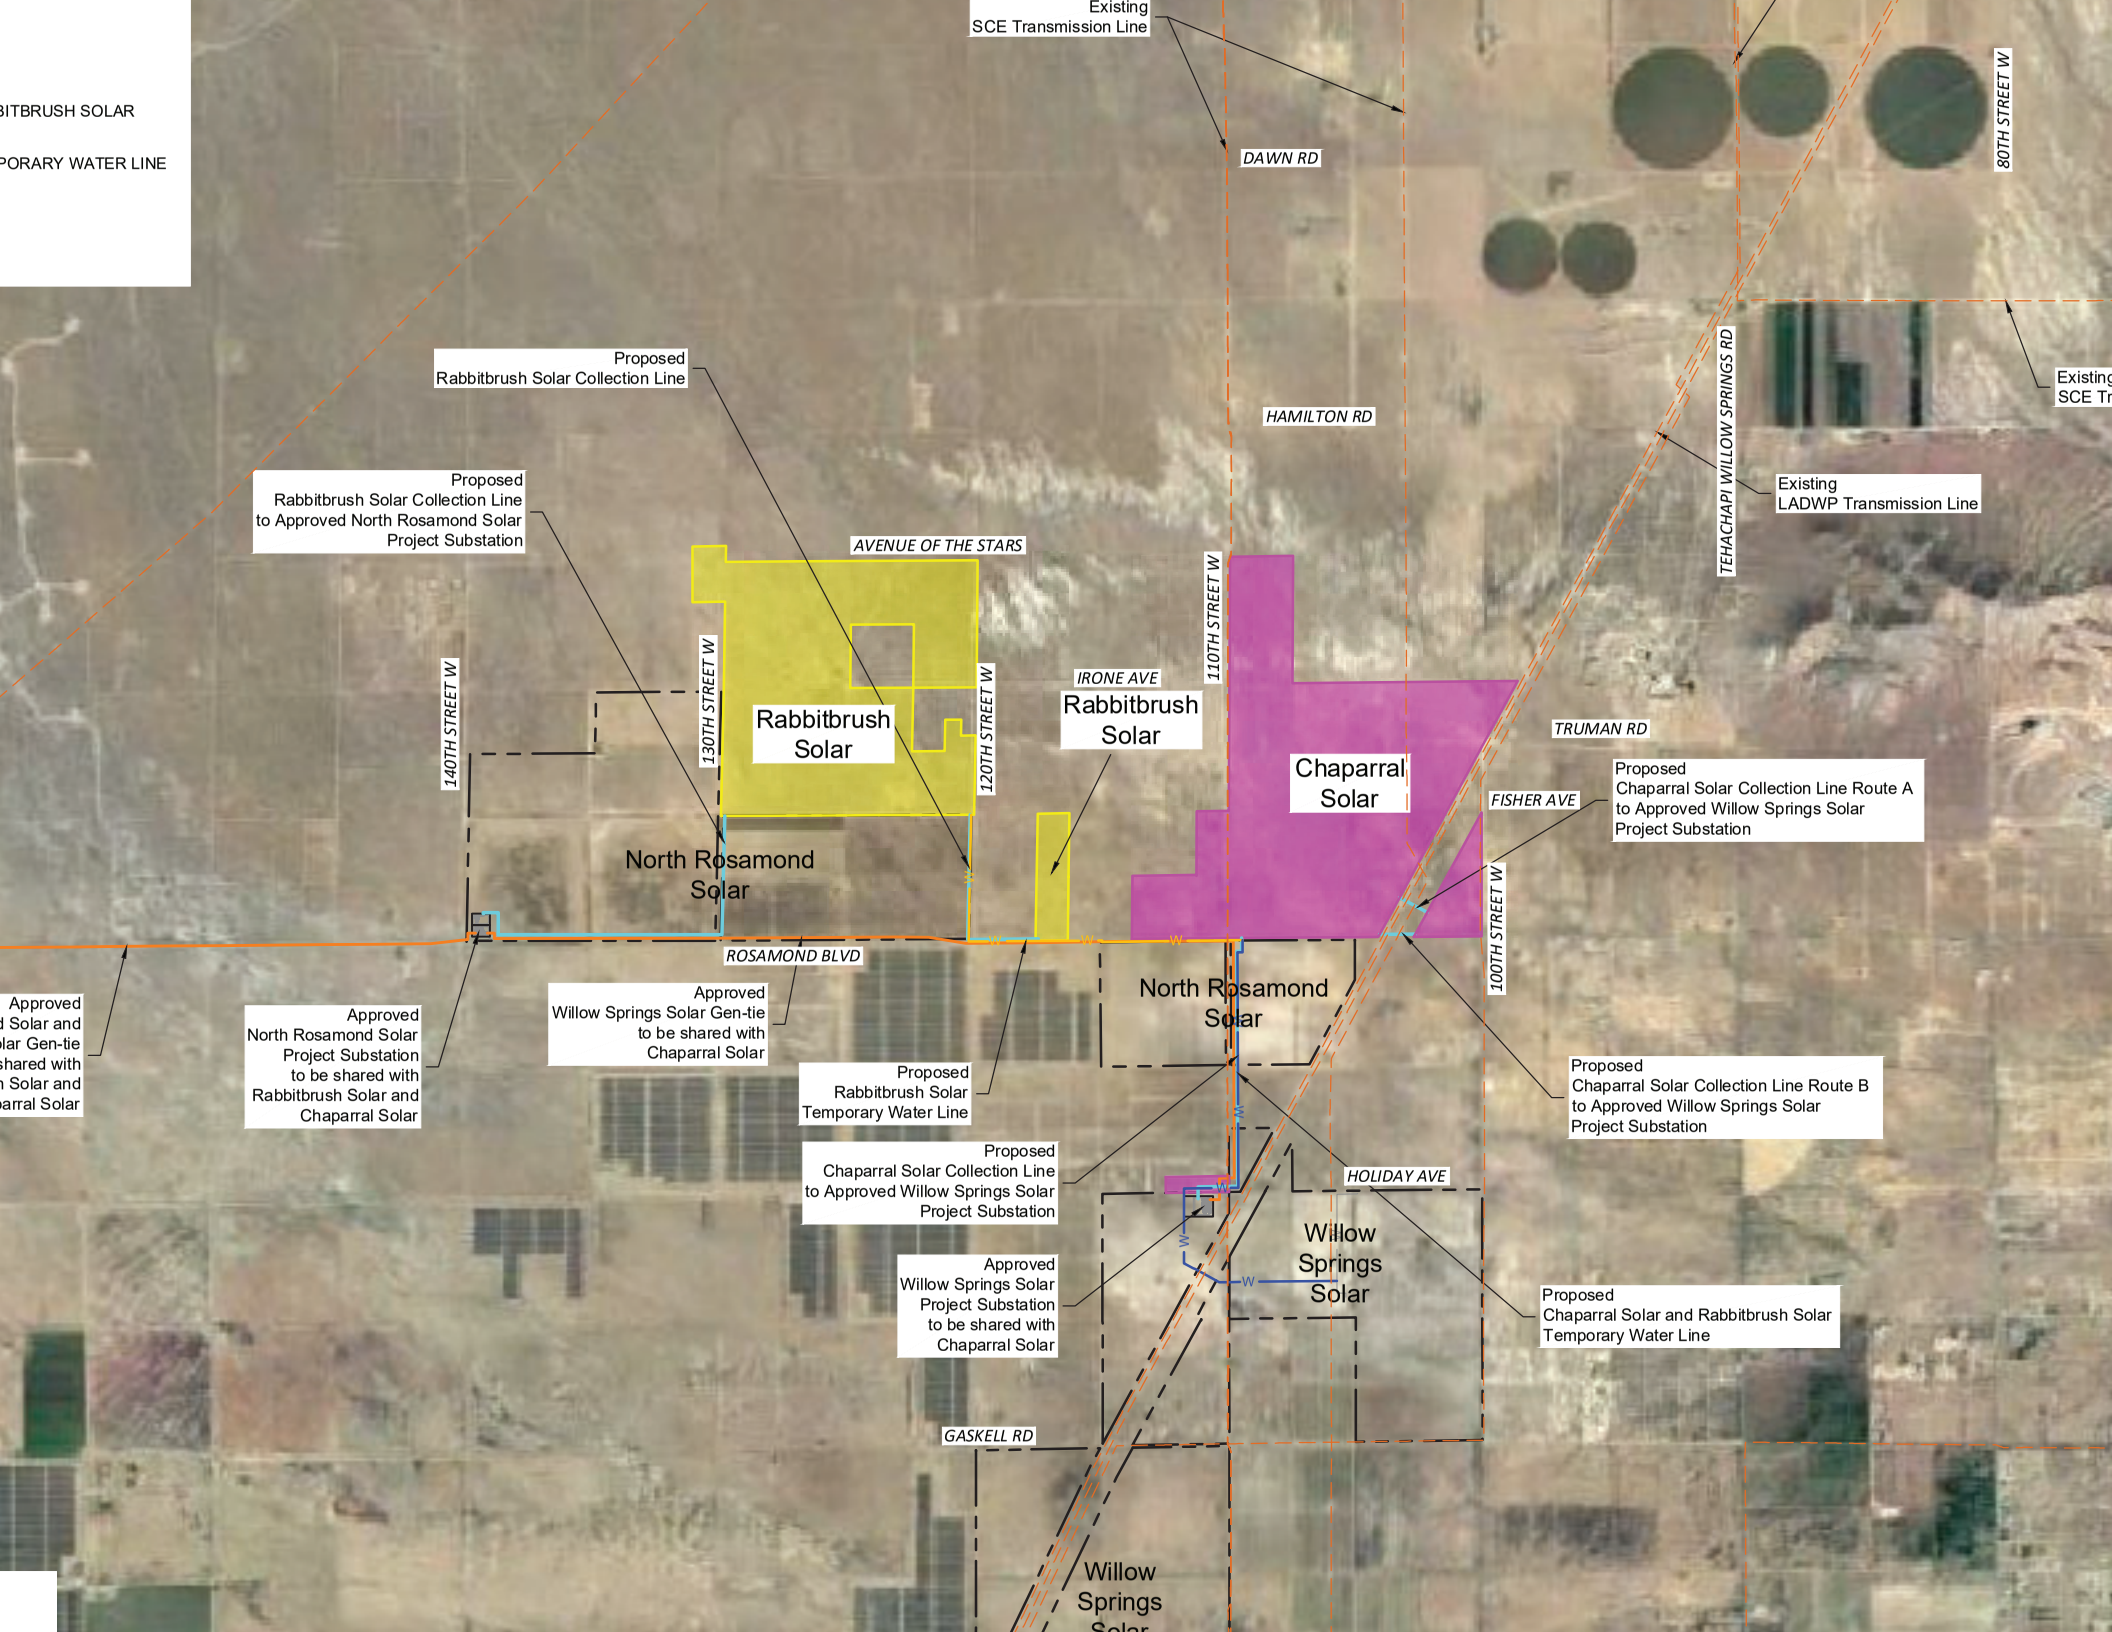
This memorandum analyzes the individual effect that removing the proposed Tumbleweed

Solar Facility and the addition of an optional 10-acre parcel to the proposed Chaparral Solar Facility would have on the technical and jurisdictional findings presented in the above referenced report. No additional data acquisition and analysis would be required based on the Project modifications described above.

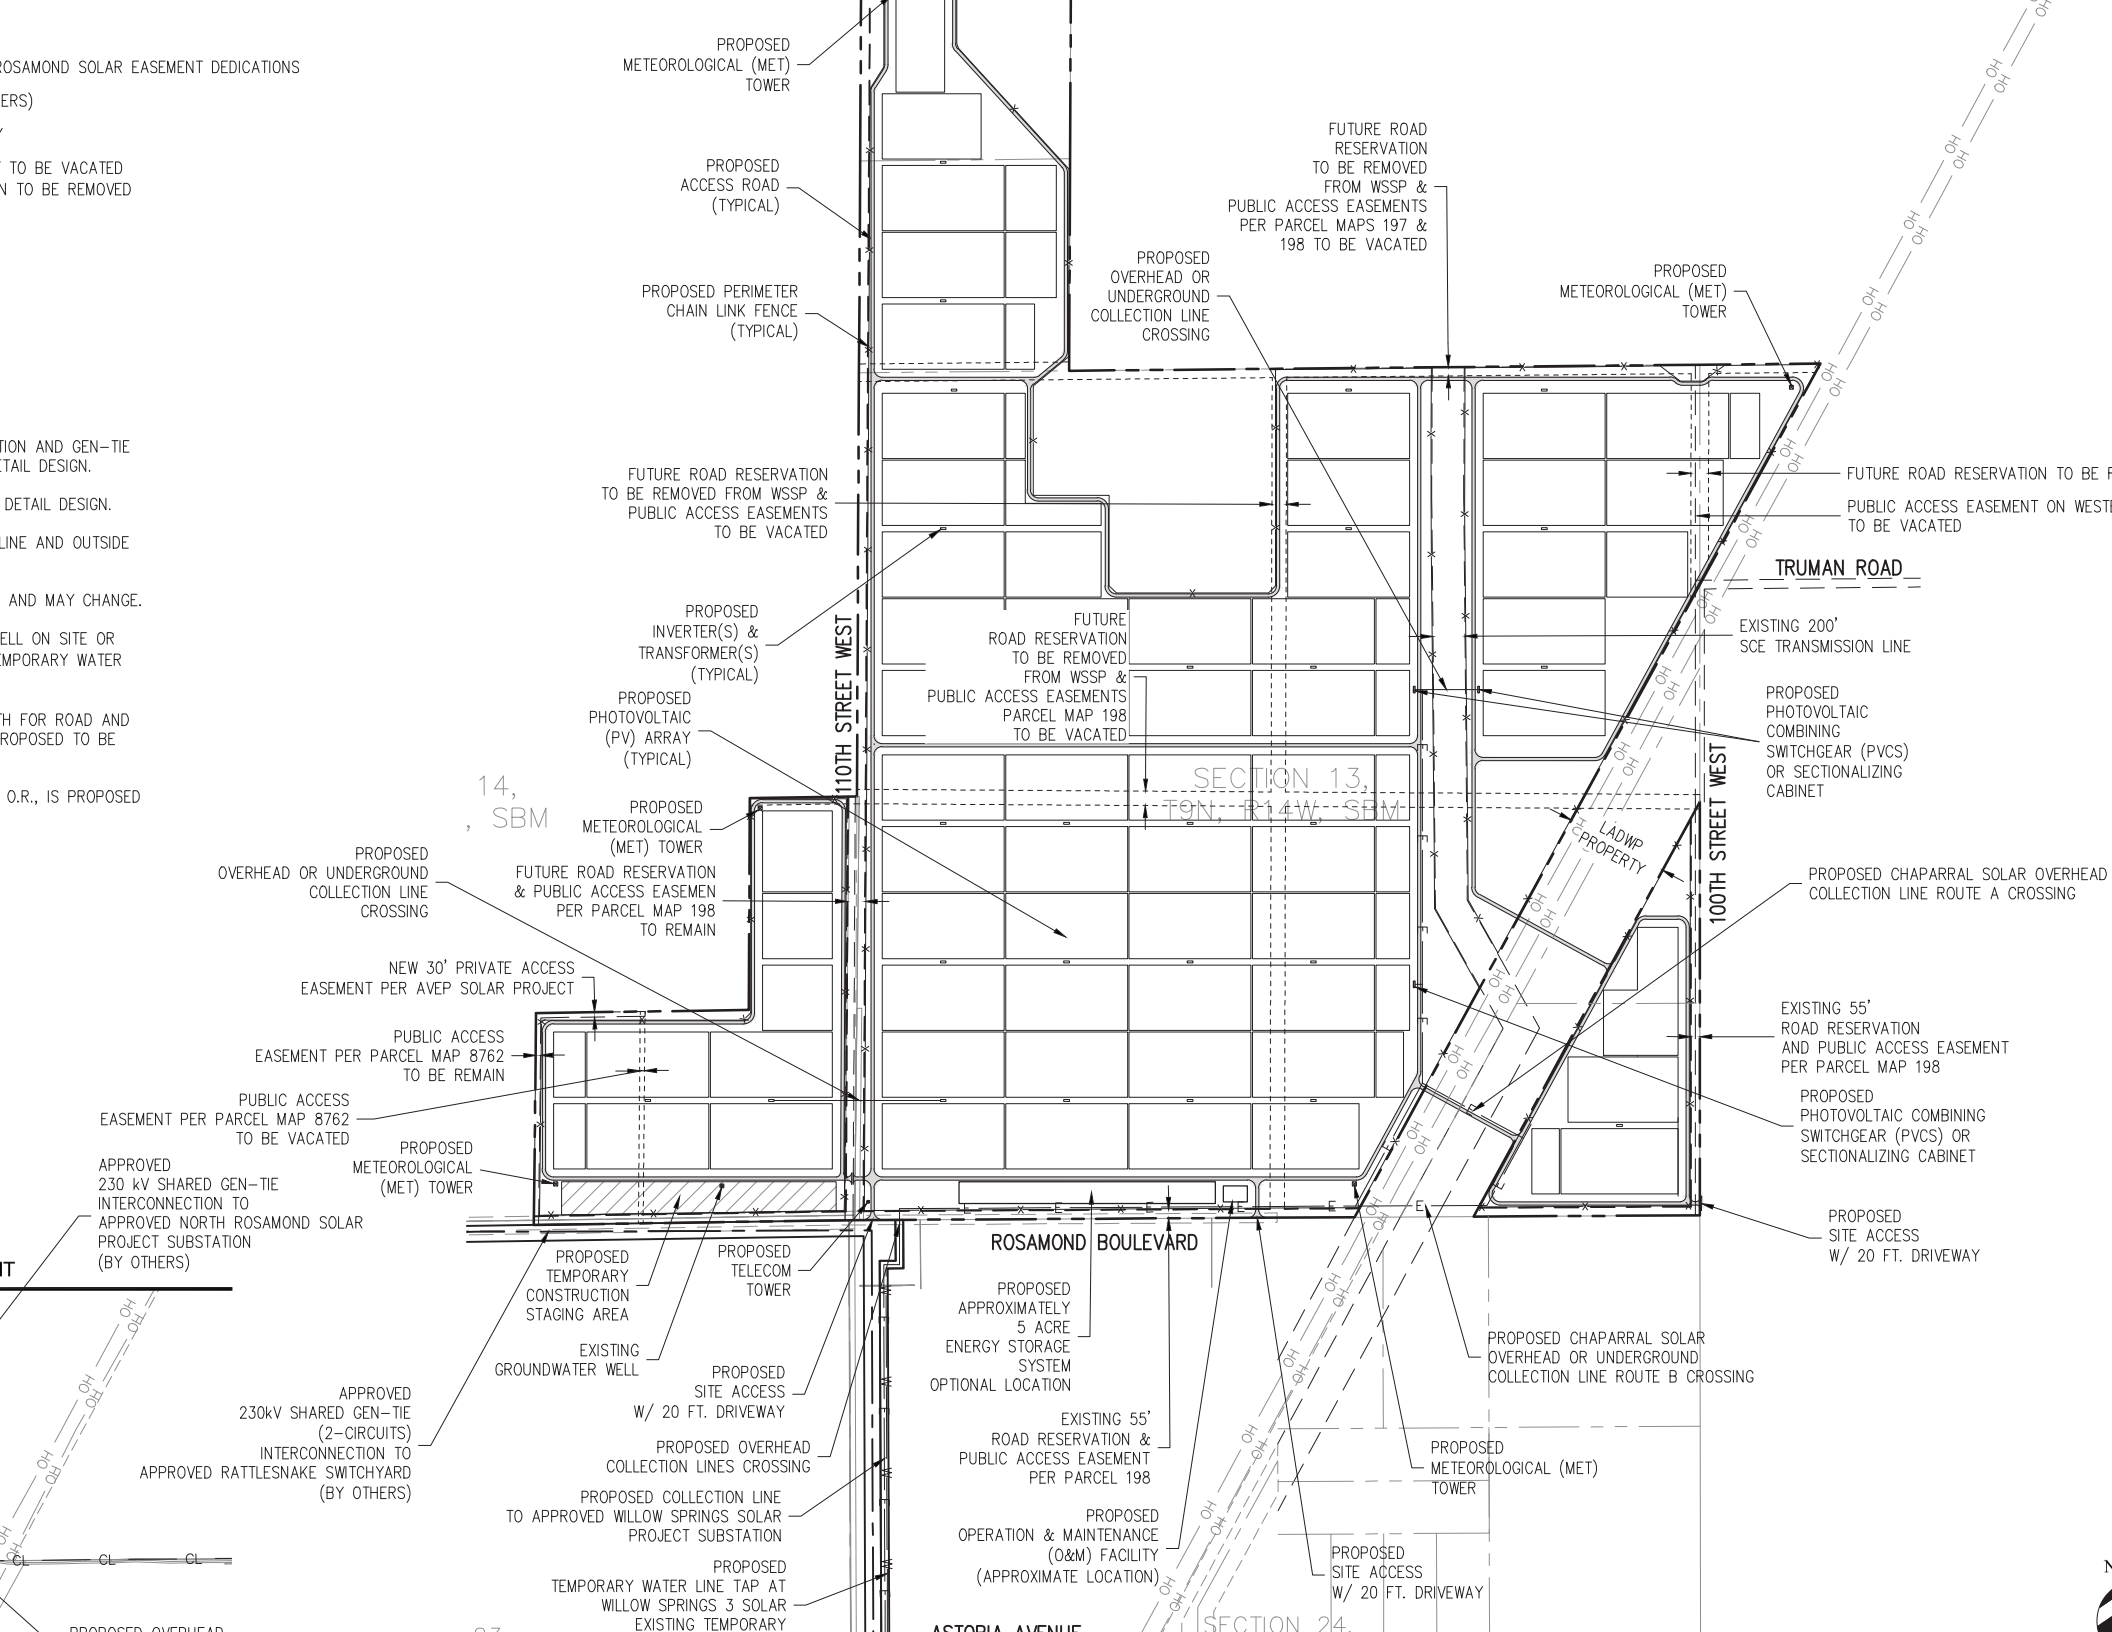
a. Removing the Tumbleweed Solar Facility

We analyzed the impact on the technical findings of the above referenced technical report due to the removal of the proposed Tumbleweed Solar Facility. It was determined that this modification would have no effect on the technical findings presented in the above referenced report. This is because the potential for aquatic resources to be located on the proposed Tumbleweed Facility has no effect on the technical findings for the Rabbitbrush and Chaparral Solar Facilities. Based on this finding, no modification to the above referenced report is necessary.

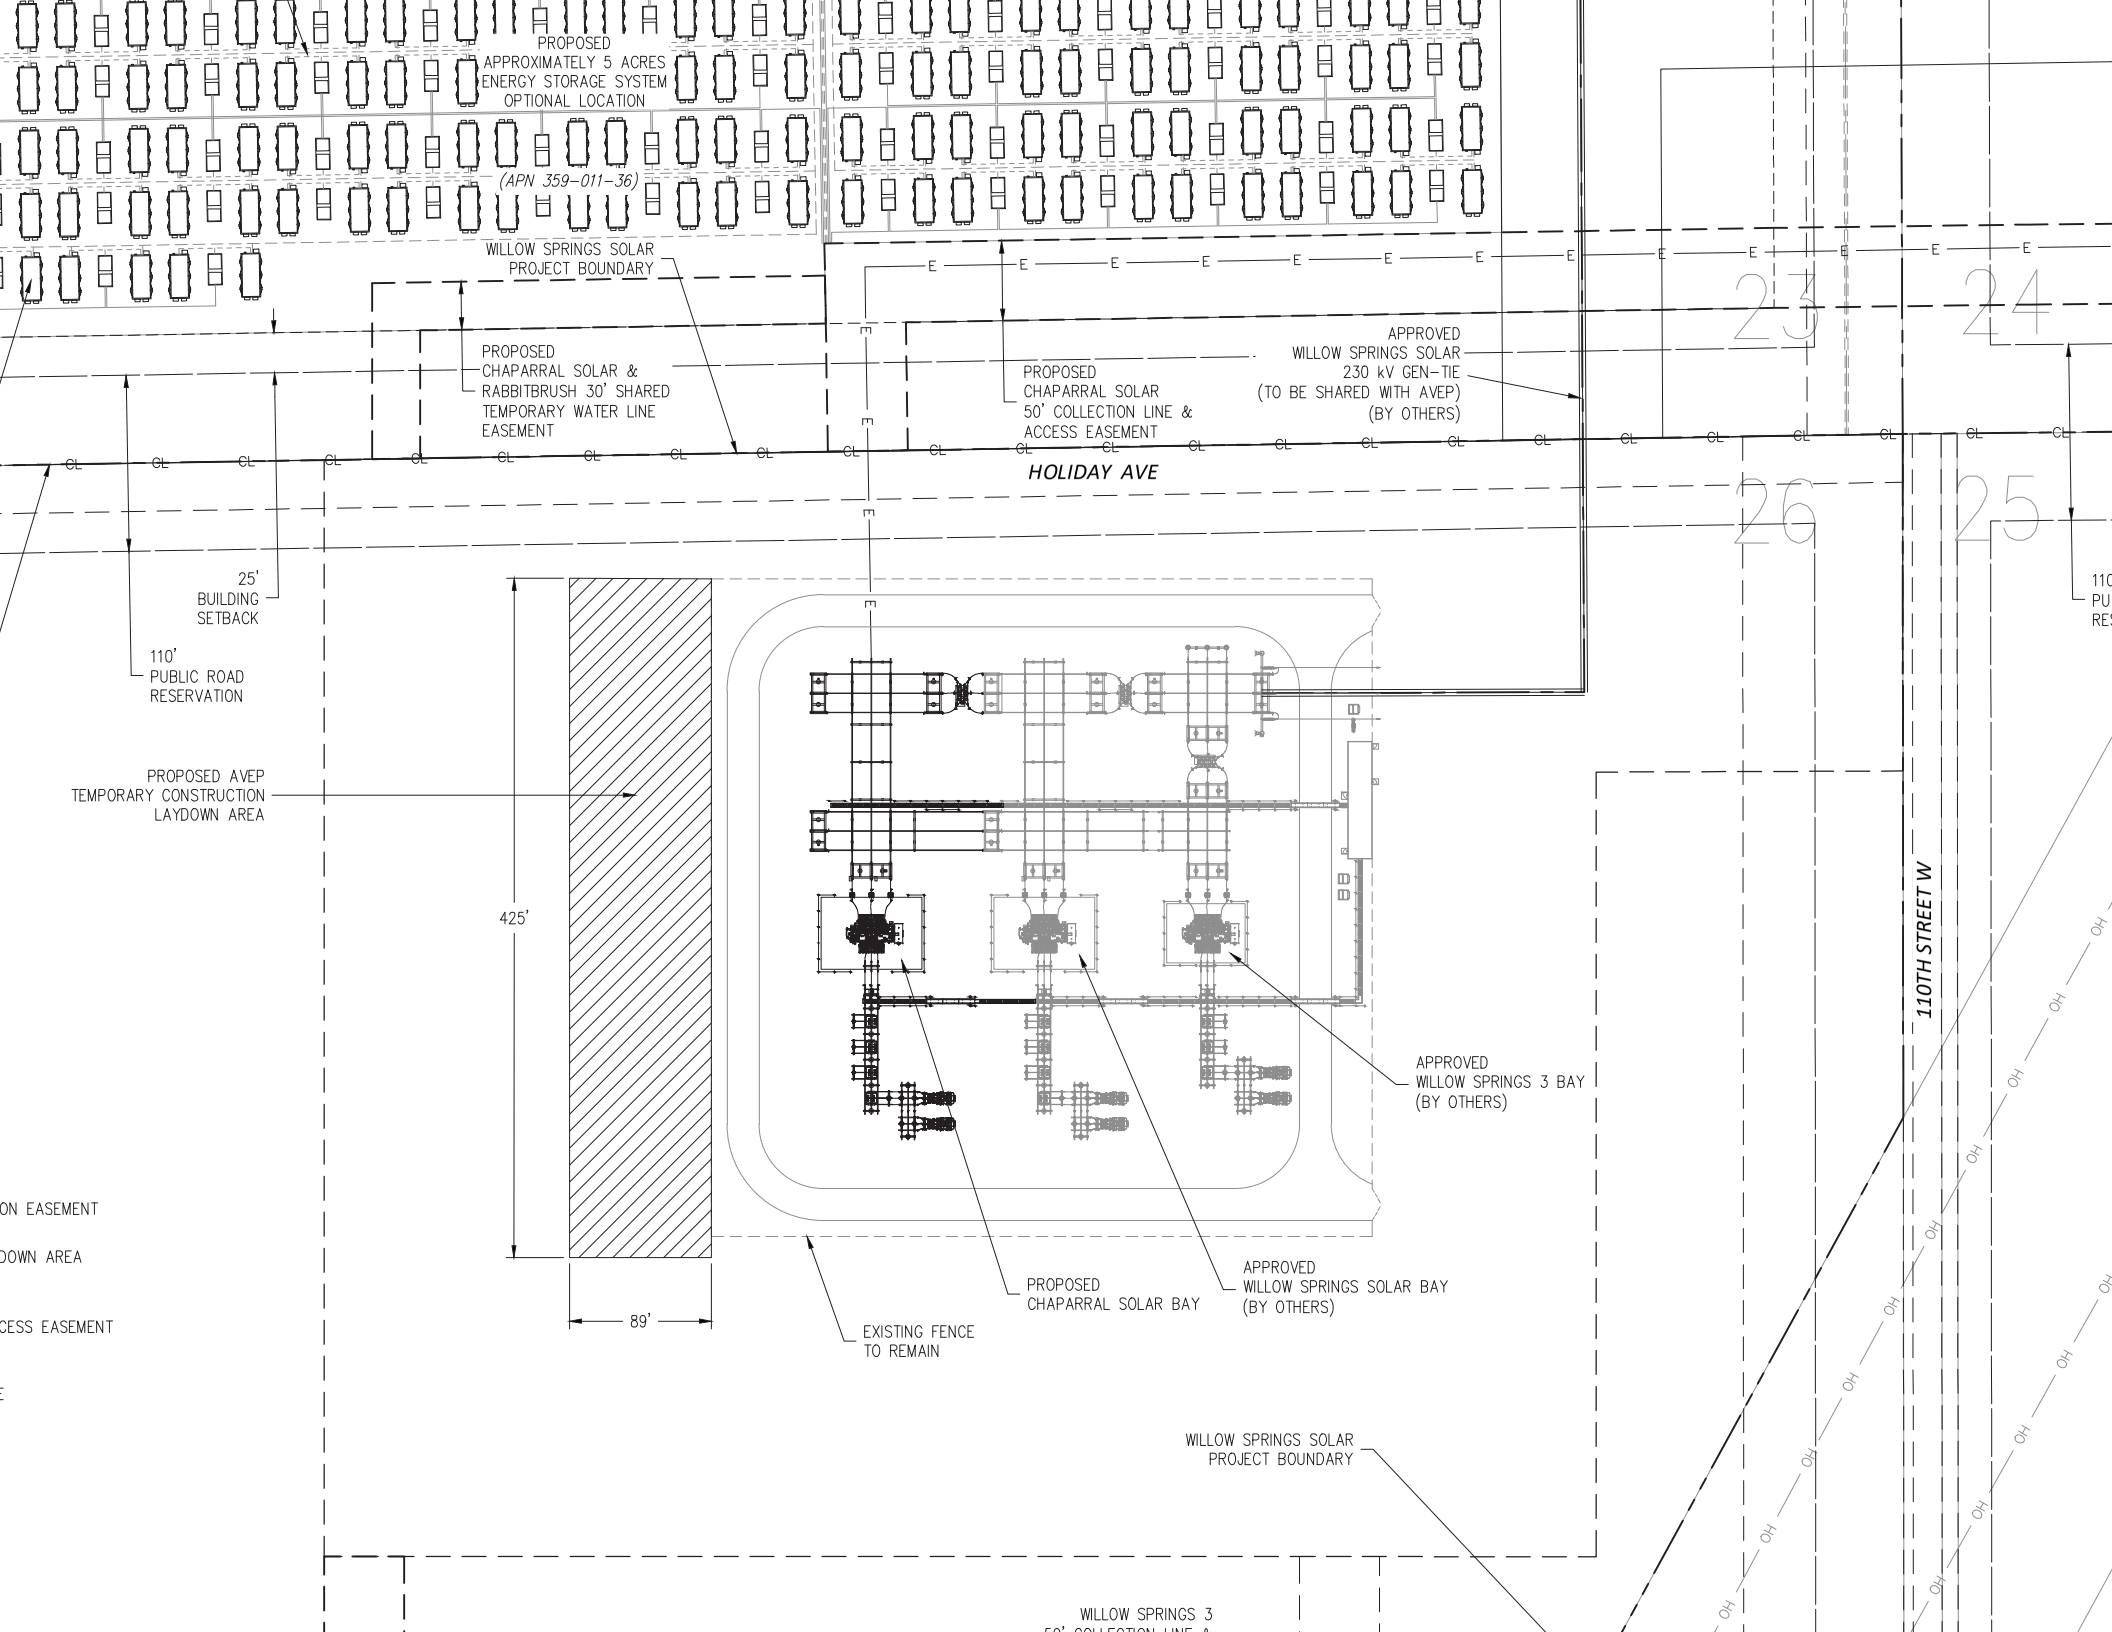
b. Adding an optional location for the ESS for the Chaparral Solar Facility



We analyzed whether further study was necessary to include the addition of an optional location for the ESS for the proposed Chaparral Solar Facility. This modification includes adding a 10-acre parcel to the Chaparral Solar Facility located at the northwest corner of Holiday Avenue and 110th Street West. It was determined that this modification would have no effect on the technical findings presented in the above referenced report. This is because the 10-acre parcel was included within the Study Area where data collection originally occurred and that was analyzed to identify and then delineate the geographic reach of aquatic resources found and subsequently used to determine their potential to be subject to federal and/or state regulatory jurisdiction. Based on this finding, no modification to the above referenced report is necessary.



c. Combined Effect of Both Project Modifications



The Project modifications were found to have no effect on the technical findings presented in the above referenced report. This is because the two areas subject to modification were included within the Study Area where data collection occurred, and therefore was already analyzed to identify and then delineate the geographic reach of aquatic resources found, and subsequently determine their potential to be subject to federal and/or state regulatory jurisdiction. Based on this finding, no modification to the above referenced report is necessary.

IV. CONCLUSION

When considered both individually and together, the two modifications to the Project do not change the technical findings of the above referenced report regarding the identification and delineation of aquatic resources found and their potential to be subject to federal and/or state regulatory jurisdiction. Based on this finding, no modification to the above referenced Report is necessary.
