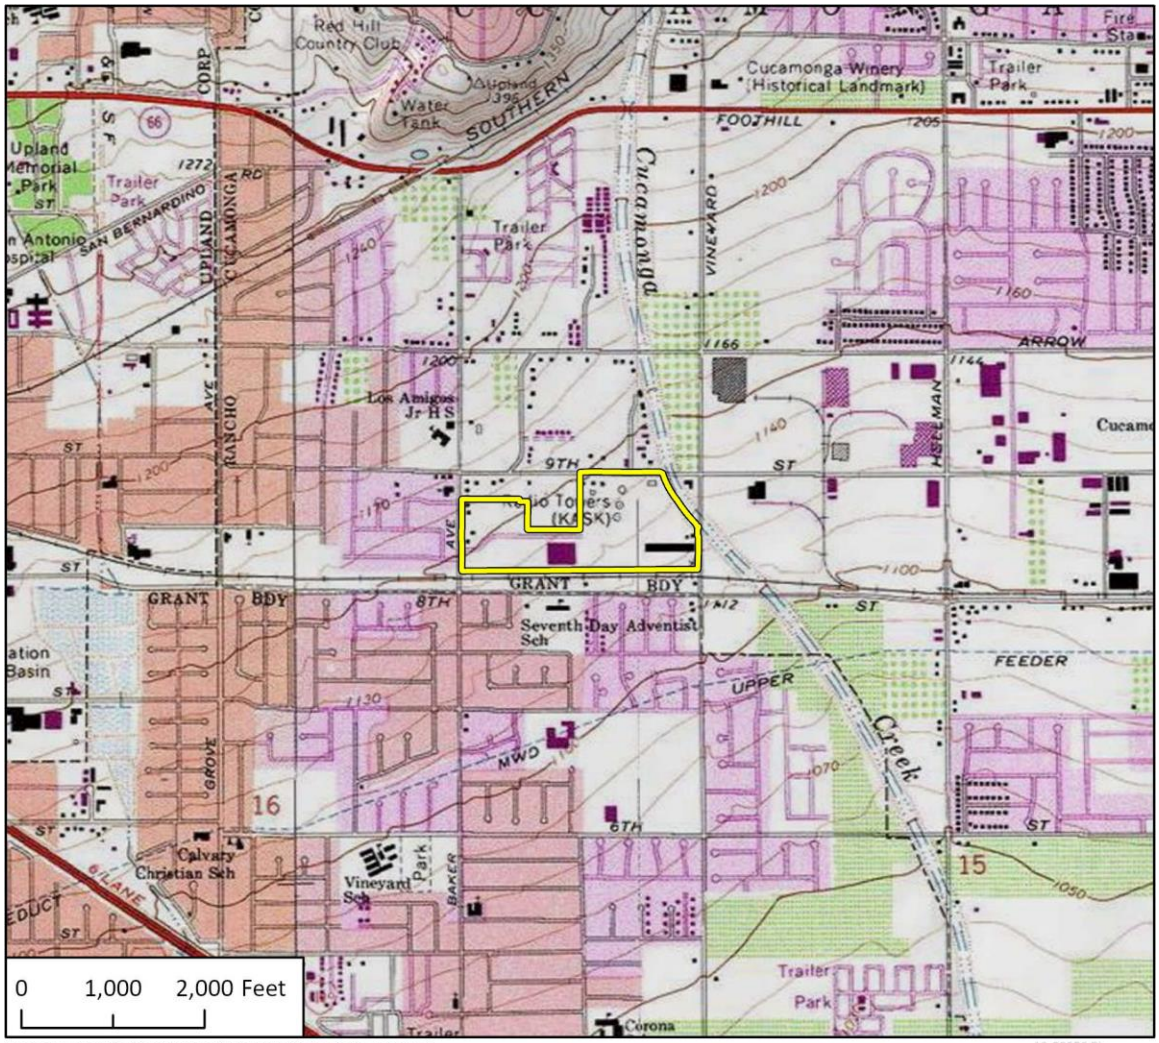
Subject: Biological Resources Assessment for the 9th and Vineyard Development Project, Rancho Cucamonga, California



Dear Mr. Eoff:

Rincon Consultants, Inc. (Rincon) is pleased to submit this biological resources assessment (BRA) letter report (hereafter referred to as "Report") for the 9th and Vineyard Industrial Development Project (hereafter referred to as "project"), in Rancho Cucamonga, California. We understand that the ultimate purpose of this Report is to evaluate the potential for any regulated biological resources to be present within the approximately 47-acre proposed development area (hereafter referred to as "project area"), determine if the project has the potential to impact said regulated biological resources, and to recommend measures to avoid, minimize, or mitigate for any potential impacts to a less-than-significant level in accordance with the California Environmental Quality Act (CEQA). For the purposes of this Report, the project area along with a 100-foot buffer (hereafter referred to as "study area") was assessed for the presence, or the potential presence, of regulated biological resources.

Project Location

The project area is located in the southeastern corner of the City of Rancho Cucamonga (City), in San Bernardino County, California (Figure 1). It covers approximately 47-acres and is located across nine separate parcels; bound by Cucamonga Creek and Vineyard Avenue to the west, Baker Avenue to the east, 9th Street and an industrial development to the north, and the Atchison, Topeka and Santa Fe Railway to the south (Figure 2). The project area is in the *Guasti, California* United States Geological Survey (USGS) 7.5-minute topographic quadrangle. The Public Land Survey System depicts the Project Area in Township T1S, Range R7W, Section 9 of the San Bernardino Meridian. The nine separate parcels in the Project Area contain the following Assessor's Parcel Numbers (APNs): 0207-271-25, 0207-271-27, 0207-271-39, 0207-271-40, 0207-271-89, 0207-271-93, 0207-271-94, 0207-271-96, and 0207-271-97. All parcels are located within the City's Neo-Industrial Employment District and the center point is located at 34°5'35.90"N, 117°36'56.73"W.

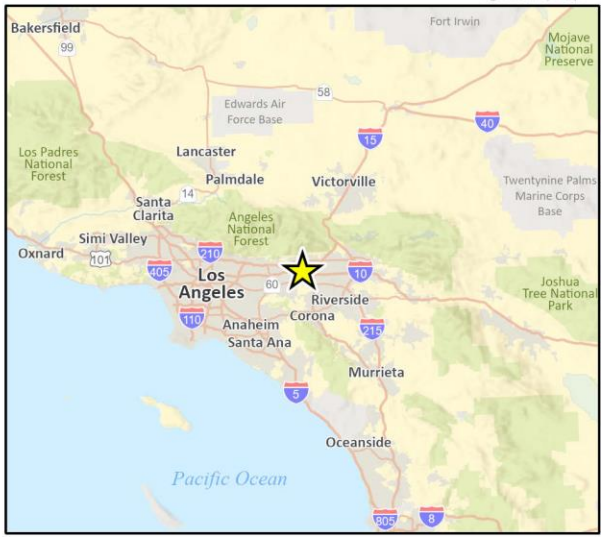
Fig 1 Vicinity Map



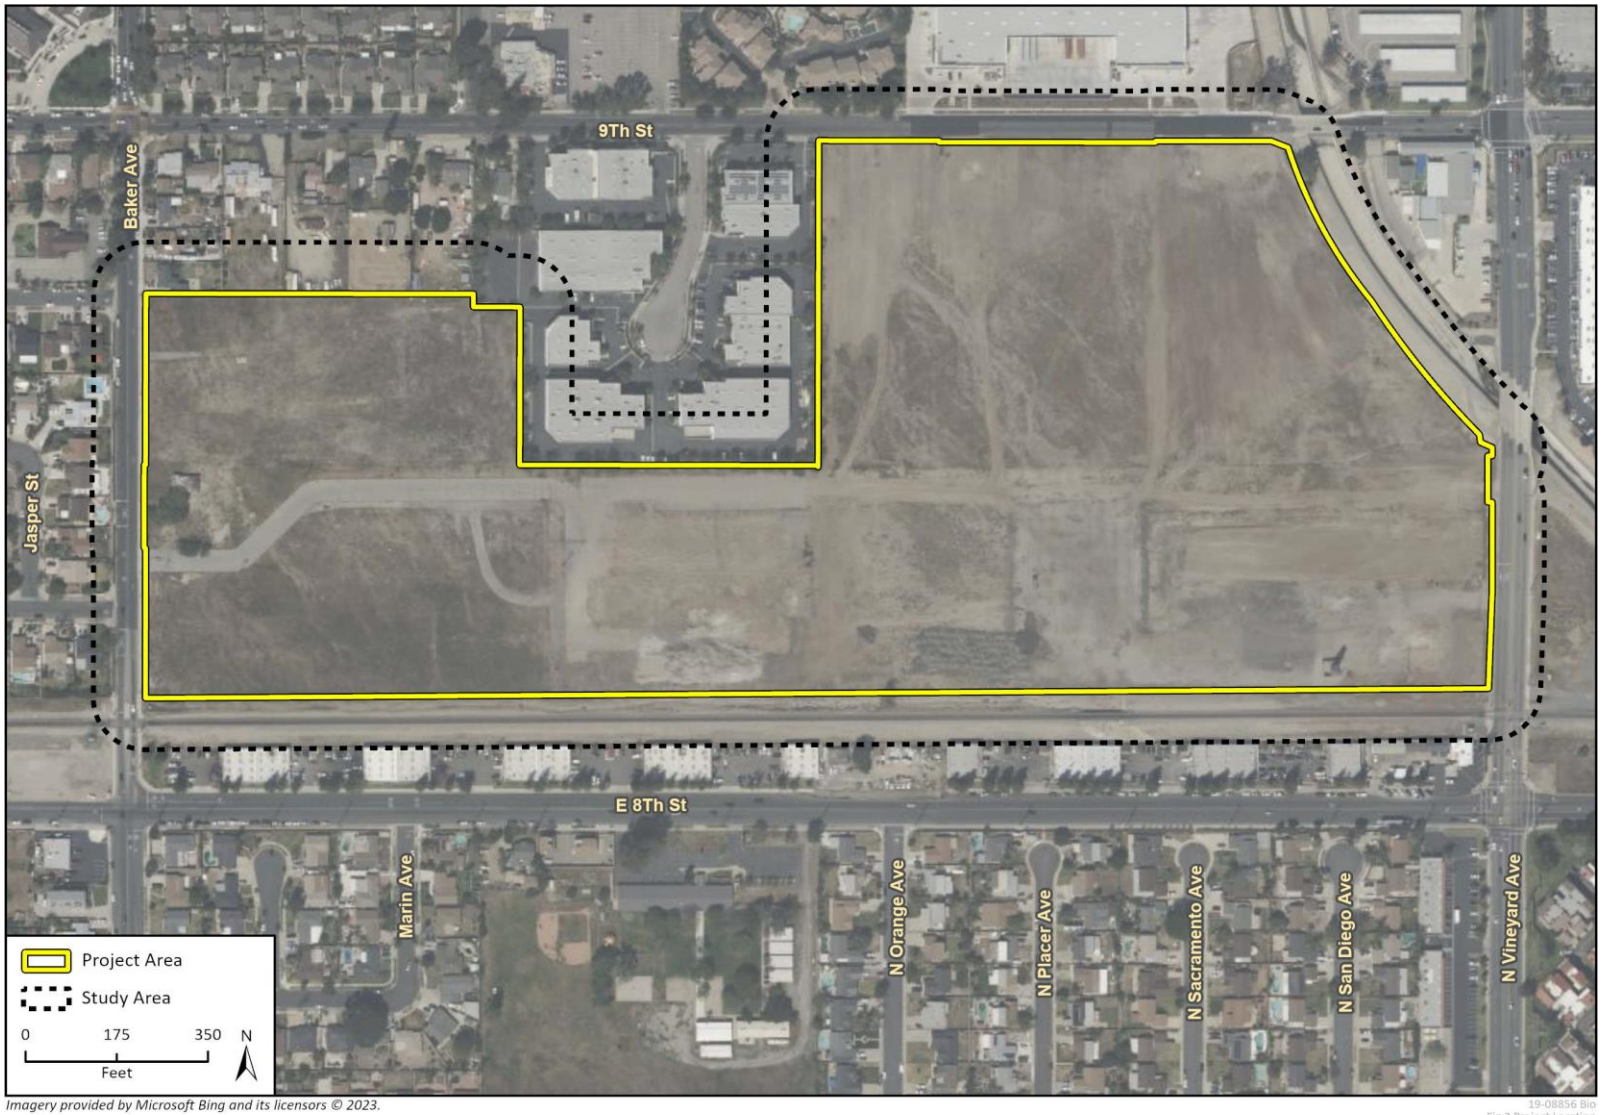


Figure 2 Project Location

Project Description

The proposed project involves construction of three warehouse buildings with ancillary office space, along with associated driveways, parking, and landscaping. The three warehouse buildings would cover a total of 982,096 square feet (sf), with 13,000 sf to be used as office space, and 969,096 sf to be used as warehouse space. The project would also create 362 automobile parking spaces and 168 trailer parking spaces. Vehicular access to the Project would consist of five driveways, with one on 9th Street, two on Vineyard Avenue, and two on Baker Avenue. Landscaping would be installed surrounding the warehouse buildings, parking spaces, and driveway entrances.

Methodology

Regulatory Overview

Regulated or sensitive resources studied and analyzed herein include special-status plant and animal species, nesting birds and raptors, sensitive plant communities, jurisdictional waters and wetlands, wildlife movement, and locally protected resources, such as protected trees. Regulatory authority over biological resources is shared by federal, state, and local authorities. Primary authority for regulation of general biological resources typically lies in the local land use control and planning authority, in this instance, the City of Rancho Cucamonga Community Development Department.

Definition of Special-status species

For the purposes of this project, special-status species include:

- Species listed as threatened or endangered under the federal Endangered Species Act (FESA);
- Species listed as candidate, threatened, endangered, or rare by the California Department of Fish and Wildlife (CDFW) under the California Endangered Species Act (CESA) or Native Plant Protection Act;
- Plant species occurring on lists 1 and 2 of the CDFW and California Native Plant Society (CNPS) California Rare Plant Rank (CRPR) system;
- Wildlife species designated as Fully Protected (FP), Species of Special Concern (SSC), or Watch List (WL) by the CDFW; and
- Species designated as sensitive or protected by the City and/or otherwise protected through ordinance or local policy.

Environmental Statues

For the purpose of this Report, potential impacts to biological resources were analyzed based on the following statutes:

- FESA
- Federal Clean Water Act (CWA)
- CESA
- CEQA
- California Fish and Game Code (CFGC)
- Migratory Bird Treaty Act (MBTA)

- The Bald and Golden Eagle Protection Act
- Porter-Cologne Water Quality Control Act
- County of San Bernardino Development Code

Literature Review

Prior to visiting the study area, Rincon reviewed Project plans, the previous biological technical report conducted for this project (Rocks 2021), aerial imagery, publicly available literature, and agency databases. These resources were reviewed to gain context of the biological resources within the study area and to identify special-status species that have been previously documented in the region. The following resources were referenced to complete this task:

- Aerial imagery of the study area was reviewed in Google Earth (Google Earth Pro 2023).
- The California Native Plant Society (CNPS) Online Inventory of Rare and Endangered Plants (CNPS 2023) was reviewed for records of special-status plant species within the *Guasti*, *California* USGS quadrangle, and the eight surrounding quadrangles (*Ontario, Mount Baldy, Cucamonga Peak, Devore, Fontana, Riverside West, Corona North, and Prado Dam*);
- The California Natural Diversity Database (CNDDB; CDFW 2023a) was queried for records of special-status species within the *Guasti, California* USGS and eight surrounding quadrangles;
- The USFWS Information for Planning and Consultation (IPaC; USFWS 2023c) was searched for a list of federally threatened and endangered species known to occur within or near the study area;
- The USFWS and National Marine Fisheries Services (NMFS) Critical Habitat Portals (USFWS 2023b, NMFS 2023) was reviewed for information on designated critical habitat areas; and
- The information available in peer-reviewed journals and standard reference materials (Jameson and Peeters 2004, Holland 1986; Baldwin et al. 2012; Sawyer et al. 2009; Stebbins 2003; American Ornithologists Union 2014; Sibley 2016).

To aid in characterizing the nature and extent of jurisdictional waters potentially occurring within the study area, the following additional resources were reviewed:

- The most recent *Guasti, California* USGS 7.5-minute topographic quadrangle map (USGS 2023a)
- The U.S. Department of Agriculture (USDA), Natural Resources Conservation Service (NRCS) Web Soil Survey (USDA NRCS 2023a)
- The USFWS Information for Planning and Consultation (IPaC; USFWS 2023c)
- The National Wetlands Inventory (NWI; USFWS 2023a)
- The National Hydrography Dataset (USGS 2023a)
- The State Soils Data Access (SDA) Hydric Soils List (USDA NRCS 2023b)

Field Reconnaissance Survey

A field reconnaissance survey was conducted on foot between 8:00 am to 4:00 pm on June 8, 2023, by Rincon Biologist Casey Clark. The field survey was conducted to characterize the existing conditions in the study area and to investigate the presence, or potential presence, of special-status plant and wildlife species, sensitive plant communities, jurisdictional waters and wetlands, wildlife migration and movement corridors, and nesting bird habitat (regulated biological resources). All plant and animal species observed during the survey were documented and all regulated biological resources observed were photographed and recorded using a submeter-accurate global positioning system (GPS) unit.

Weather conditions during the survey included temperatures ranging between 60 to 65 degrees Fahrenheit, winds between one to five miles per hour, and partly overcast skies. Representative photographs of the site were taken and are included in Attachment 1 and the list of all plant and animal species observed during the field survey is included in Attachment 2.

Existing Site Conditions

Climate, Topography, and Land Use

The weather in the City is typical of a Mediterranean climate. Summers are warm and dry, while winters are cool and wet with most of the precipitation falling between November and March. The study area is located within the South Coast geographic subregion of California (Baldwin et al. 2012) and is generally flat with an elevation ranging from 1,110 to 1,160 feet above mean sea level. The project area is partially developed and contains a historic building, eroding asphalt, large sediment piles, and remnant gravel. The remaining portion of the project area is heavily disturbed and contains recent signs of discing. The 100-foot study area buffer contains developed land with residential communities and industrial buildings to the north and west, a railroad to the south, and a channelized stream along with a five-lane road to the east. Developed land surrounds the study area on all sides. The study area is not located within any habitat conservation plan areas, and no USFWS or NMFS critical habitat designations occur in the study area.

Soils

The USDA NRCS Web Soil Survey (USDA NRCS 2023a) depicts three soil map units[1] within the study area. This soil map units are Soboba stony loamy sand, 2 to 9 percent slopes (SpC), Tujunga loamy sand, 0 to 5 percent slopes (TuB), and Tujunga gravelly loamy sand, 0 to 9 percent slopes (TvC). All three soil map units typically occur on alluvial fans and are derived from granite. They are all somewhat excessively drained and have a low available water supply. SpC and TuB are not listed as hydric soils SDA; however, TvC is.

The conditions observed in the field generally match the soil map unit descriptions. However, the soil was heavily disturbed from apparent discing and contained debris, gravel, and other cobble-sized rocks spread throughout the survey area.

Hydrology

The study area is within the Chino Creek Watershed (Hydrological Unit Code [HUC] 10-1807020307). Cucamonga Creek, an intermittent stream, travels from north to southwest for 0.15 mile through the northeastern portion of the study area buffer. Its headwaters and associated tributaries originate in Cucamonga Canyon, which is located along the southern aspect of Mount Baldy. Cucamonga Creek travels south for approximately fifteen miles before converging with Mill Creek, which then converges with Chino Creek, followed by the Santa Ana River, and lastly the Pacific Ocean. The NWI identifies this portion of Cucamonga Creek as an intermittent riverine system with artificial substrate (R4SBCr). The NHD identifies this portion of Cucamonga Creek as a “canal ditch” and “artificial path.” These interpretations were observed to be accurate during the field survey. Cucamonga Creek has been channelized, contains a concrete streambed and banks, and does not support riparian or wetland vegetation. The Cucamonga Creek channel is homogeneous throughout the study area and is approximately 50-feet wide, from top of bank to top of bank, and the streambed is relatively flat;

[1] Published soil surveys are documented at a broad scale and they may not match the level of detail or refinement captured during formal jurisdictional delineation surveys.

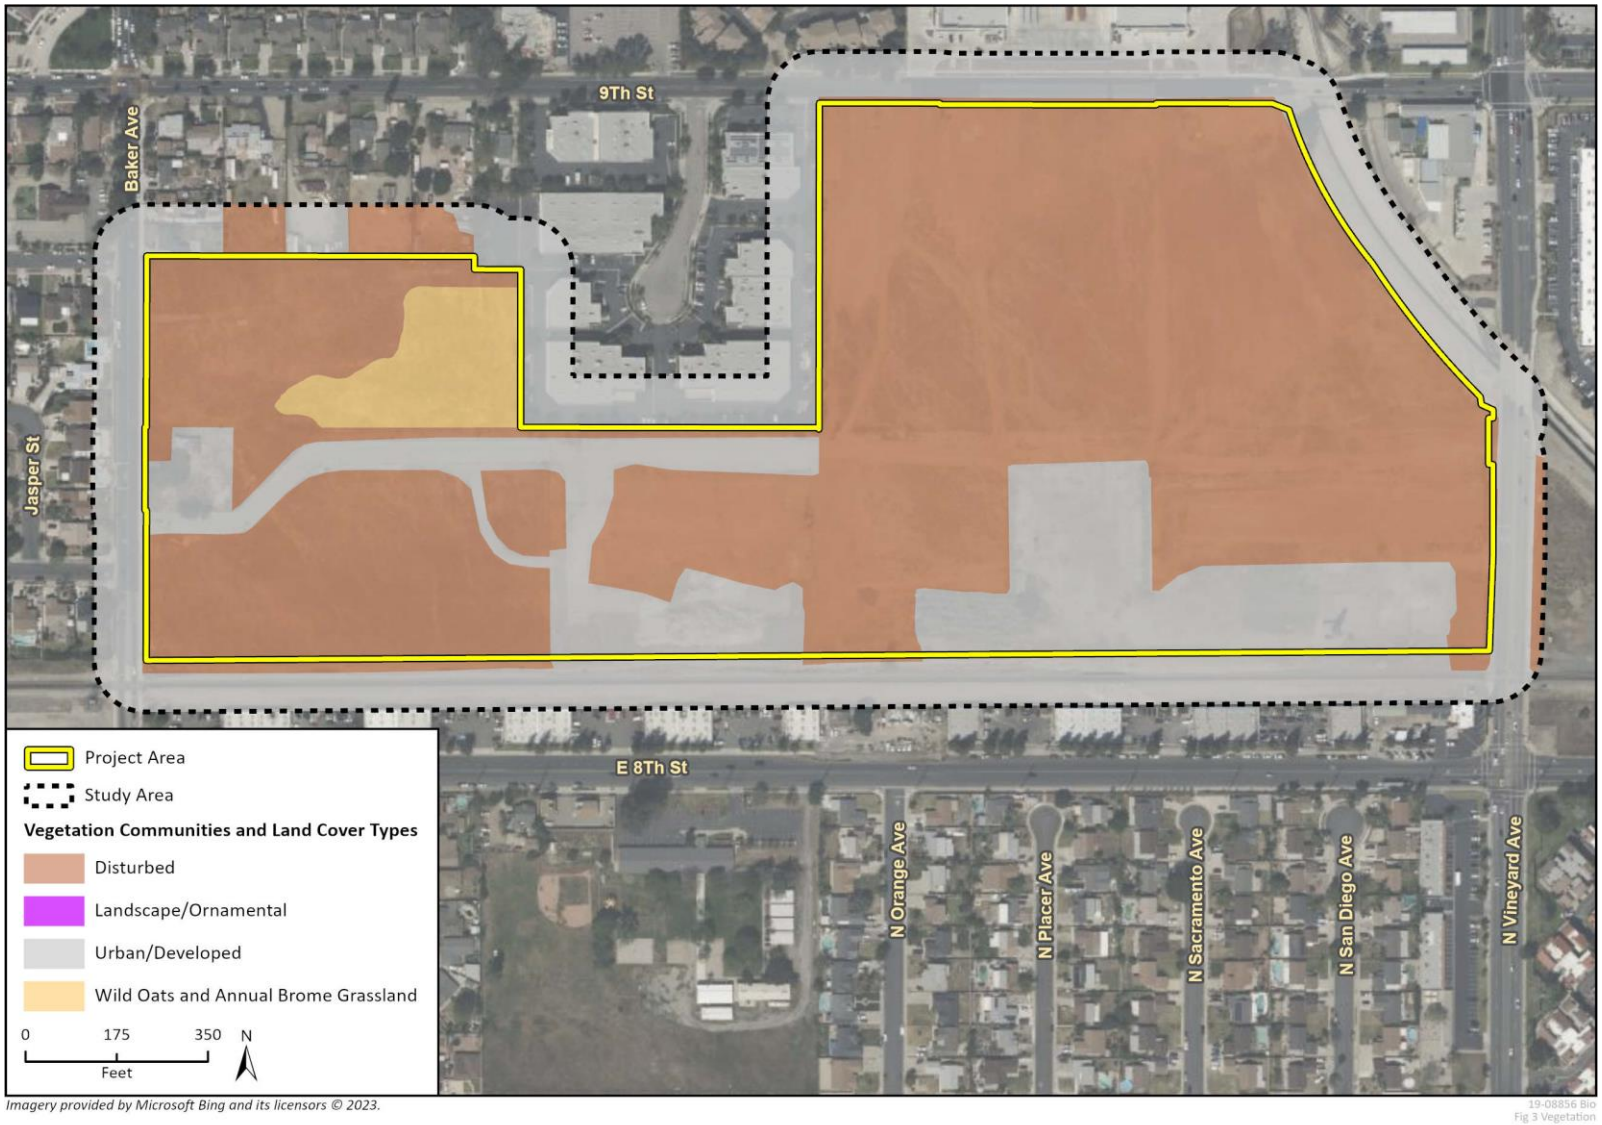
therefore, coinciding the ordinary high water marks (OHWM) with the top of bank locations. The southwestern bank of Cucamonga Creek is approximately 45 feet northeast of the project area. No other aquatic features or indicators of hydrology were observed within the study area. Figure 4 depicts the limits of Cucamonga Creek within the study area.

Vegetation Communities and Land Cover Types

One vegetation community and two land cover types were documented within the study area during the field survey. Table 1 lists each vegetation community and land cover type documented and provides their approximate acreage and the percent area covered in the study area. Figure 3 depicts the locations of each vegetation community and land cover type in the study area. Brief descriptions of the vegetation communities and land cover types are provided in the subsections below and representative photographs are provided in Attachment 1.

The vegetation classification used for this analysis is based on *A Manual of California Vegetation, Second Edition* (MCV2; Sawyer et al. 2009). The land cover types that are not described in MCV2 were classified using conventional naming practices (i.e., disturbed and urban/developed). No CDFW sensitive natural communities are present in the study area (CDFW 2023).

Table 1 Summary of Vegetation Communities within the Study Area



Type	Approximate Acreage	Approximate Percent Area
Disturbed	37.75	58
Urban/Developed	25.78	39
Wild Oats and Annual Brome Grassland	1.94	3
Total	**65.47**	**100%**

Disturbed

Disturbed land refers to any land where the native vegetation has been significantly altered by agriculture, construction, or other anthropogenic activities; and the species composition and site conditions are not characteristic of the disturbed phase of a particular vegetation community (e.g., disturbed coastal sage scrub). Disturbed land is typically found in vacant lots, roadsides, material storage areas, or abandoned fields, and is often dominated by non-native species and/or bare ground.

This landcover type covers approximately 37.75 acres of the study area and is found within the previously disced fields within the project area. This land cover type generally contains sparse coverage and is dominated by cheat grass (*Bromus tectorum*), short-podded mustard (*Hirschfeldia incana*), rattail fescue (*Festuca myuros*), and slender woolly wild buckwheat (*Eriogonum gracile* var. *gracile*) depending on location. This land cover type is not officially identified in the MCV2 (Sawyer et al. 2009).

Figure 3 Vegetation Communities

Urban/Developed

The urban/developed land cover type consists of areas that have been developed or otherwise physically altered to the extent that they no longer support most vegetation. Developed land is characterized by the presence of permanent or semi-permanent structures, gravel lots, pavement, or hardscape. This land cover type may also contain areas that are sparsely vegetated, primarily with ornamental and/or invasive species.

Urban/developed land covers approximately 25.78 acres of the study area and is associated with the residential, industrial, and commercial developments within the 100-foot study area buffer; and the historic building, eroding asphalt roads, gravel lots, and sediment piles in the project area. The groundcover generally contains pavement, asphalt, or modified soils. A trace amount of landscape/ornamental and/or non-native annual herbaceous species are present surrounding these features but do not contain enough cover to constitute their own land cover type. Characteristic trees of this land cover type in the study area include Afghan pine (*Pinus eldarica*), tipu tree (*Tipuana tipu*), Chinese elm (*Ulmus parvifolia*), and jacaranda (*Jacaranda mimosifolia*). Urban/developed land is not officially identified in MCV2 (Sawyer et al. 2009).

Wild Oats and Annual Brome Grassland

Wild oats and annual brome grassland is an open-to-dense naturalized vegetation community dominated or codominated by non-native, often invasive, annual grasses (e.g., wild oats [*Avena* spp.], ripgut brome [*Bromus diandrus*], and foxtail barley [*Hordeum murinum*]). This vegetation community is often interspersed with native and non-native forbs. Emergent trees and shrubs may be present but at low cover.

This vegetation community contains intermittent coverage and covers approximately 1.94 acres of the study area in a rockier portion of the project area, which does not show signs of being recently disced. The dominant species include ripgut brome, red brome (*Bromus madritensis* ssp. *rubens*), and slender oats (*Avena barbata*). Non-native forbs are common at low cover and most notably included short-podded mustard and telegraph weed (*Heterotheca grandiflora*). This vegetation community is located within the northwestern portion of the project area, just west of the industrial development that protrudes into the middle of the study area.

General Wildlife

Common urban and disturbed grassland wildlife species were observed during the field survey. The most notable and abundant species observed included California ground squirrel (*Otospermophilus beecheyi*), western kingbird (*Tyrannus verticalis*), American crow (*Corvus brachyrhynchos*), and northern mockingbird (*Mimus polyglottos*). A complete list of all plant and wildlife species observed in the study area is provided in Attachment 2.

Regulated Biological Resources

Federal, State, and local agencies regulate special-status species and other sensitive biological resources and may require an assessment of their presence or potential presence prior to the approval of proposed development on a property. This section discusses sensitive or regulated biological resources observed within the study area and evaluates the potential for the study area to support additional regulated biological resources. Assessments for the potential occurrence of special-status species are based upon known ranges, habitat preferences for the species, species occurrence records (e.g., CNDDB) from other sites in the vicinity of the project area, previous reports from nearby

projects, and the Project survey results. The potential for each special status species to occur in the study area was evaluated according to the following criteria:

- **No Potential.** Habitat on and adjacent to the site is clearly unsuitable for the species requirements (foraging, breeding, cover, substrate, elevation, hydrology, plant community, site history, disturbance regime), and species would have been identifiable on the site if present.
- **Low Potential.** Few of the habitat components (foraging, breeding, cover, substrate, elevation, hydrology, plant community, site history, disturbance regime) meeting the species requirements are present, and/or the majority of habitat on and adjacent to the site is unsuitable or of very poor quality. The species is not likely to occur on the site.
- **Moderate Potential**. Some of the habitat components (foraging, breeding, cover, substrate, elevation, hydrology, plant community, site history, disturbance regime) meeting the species requirements are present, and/or only some of the habitat on or adjacent to the site is unsuitable. The species has a moderate probability of occurring on the site.
- **High Potential.** All the habitat components (foraging, breeding, cover, substrate, elevation, hydrology, plant community, site history, disturbance regime) meeting the species requirements are present and/or most of the habitat on or adjacent to the site is highly suitable. The species has a high probability of occurring on the site.
- **Present.** Species was observed on the site or has been recorded (e.g., CNDDB, other reports) on the site recently (within the last five years) with no significant changes to the site.

Special-Status Species

Based on the results of the literature review and field survey, one special-status wildlife species, Cooper's hawk (*Accipiter cooperii*; SSC), has a high potential to occur in the study area and four special-status wildlife species have a low potential to occur (i.e., burrowing owl [*Athene cunicularia*; SSC], western mastiff bat [*Eumops perotis*; SSC], and western yellow bat [*Lasiurus xanthinus*: SSC]). The remaining 97 special-status species identified during the literature and database review were determined to have no potential to occur within the study area based on a variety of factors: including the lack of suitable habitat, soils, or other required microhabitat conditions, and/or the study area's location in relation to the species' known geographic range and/or elevational range. Cooper's hawk is discussed in more detail in the subsection below. The four CEQA covered special-status species that have a low potential are not addressed further. A complete list of the special-status species evaluated for this project is provided in Attachment 3 and a more detailed analysis of Cooper's hawk is provided below.

Cooper's Hawk

Cooper's hawk, a CDFW WL species, occurs year-round throughout most of the continental United States. They are historically forest and woodland birds; however, they are also common in well-vegetated urban areas. They primarily eat birds but are also known to eat mammals and scavenge eggs from nests. They build their nests 25-50 feet high in a variety of tree species that are primarily in flat areas.

The study area is within this species' known geographic range and one of this species' documented habitat types is present within the study area (i.e., urban/developed land). The urban/developed land within the study area contains several mature ornamental trees (including eucalyptus trees and conifers) on flat land, which is suitable nesting habitat for this species. Additionally, a robust amount of suitable prey species were observed within the study area. This species was observed during the

reconnaissance survey conducted by Rocks Biological Consulting in 2021. Therefore, this species is considered to have a high potential to forage and nest within the study area.

Other Protected Species

Nesting Birds

The study area contains habitat that can support nesting birds, including raptors, protected under CFGC Section 3503 and the MBTA (16 United States Code Sections 703–712). Suitable nesting bird habitat within the study area includes the utility poles, landscape/ornamental trees and shrubs, buildings, and the annual brome and wild oats grassland.

Bald and Golden Eagles

Bald eagles (*Haliaeetus leucocephalus*) and golden eagles (*Aquila chrysaetos*) are protected under the Bald and Golden Eagle Protection Act. Bald eagles are known to nest and forage in areas of large undeveloped habitat surrounding larger riparian or open water areas (e.g., rivers or lakes). Large riparian or aquatic areas are absent from the study area; therefore, the study area does not contain suitable habitat for this species and it is not expected to nest or forage within the study area.

Golden eagles nest on open and steep cliff faces on the upper portions of mountainous terrain and forage in large tracts of open terrestrial habitat (e.g., meadows and grasslands). Nesting habitat is absent from the study area and suitable foraging habitat does not occur in the study area. Therefore, this species is not expected to nest or forage within the study area.

Protected Trees

According to the City of Rancho Cucamonga Development Code Section 17.80 (City of Rancho Cucamonga 2023), heritage trees shall be protected from indiscriminate cutting or removal. An approved Tree Removal Permit issued in compliance with Section 17.16.080 (Tree Removal Permit) is required to remove heritage trees, which are defined as any tree that meets at least one of the following criteria:

- Any tree in excess of 30 feet in height and having a single trunk diameter at breast height (DBH) of 20 inches or more as measured 4.5 feet from ground level; or
- Any tree on multi-family residential and mixed-use property in excess of 15 feet in height and having a single trunk diameter at breast height (DBH) of 20 inches or more as measured 4.5 feet from ground level; or
- Any tree on commercial, industrial, and institutional property in excess of eight feet in height and having a single trunk diameter at breast height (DBH) of 20 inches or more as measured 4.5 feet from ground level; or
- Multi-trunk trees having a total diameter at breast height (DBH) of 30 inches or more as measured 4.5 feet from ground level; or
- A stand of trees the nature of which makes each dependent upon the others for survival; or
- Any other tree as may be deemed historically or culturally significant by the planning director because of age, size, condition, location, or aesthetic qualities.

A Tree Removal Permit is required if any of the following actions are to occur to protected trees:

- No person, firm, or corporation shall remove, relocate, reduce in height by more than 25 percent of the original height of the tree (by "topping"), or destroy any heritage tree within the city limits, including an applicant for a building permit, without first obtaining a tree removal permit from the planning director.
- Prior to issuing any tree removal permit, the planning director may require an applicant to submit a report detailing the condition of the tree(s) subject to the permit and justification for their removal, relocation or pruning. The report shall be prepared by a qualified arborist and paid for at the applicant's expense.
- No tree removal permit shall be issued for the removal of any heritage tree on any lot associated with a proposal for development, unless all discretionary approvals have been obtained from the city, or unless an emergency waiver is granted pursuant to section 17.16.080(H) (Emergency Waiver).
- No tree designated as a historic landmark shall be altered, removed, relocated, or destroyed by any person, firm, or corporation without first obtaining both a certificate of compliance and a tree removal permit. Alteration, removal, relocation, or destruction of trees designated as historic landmarks may require a certificate of compliance even if exempt from the requirement for a tree removal permit under this section.
- If it is demonstrated by the applicant that a tree proposed for removal is dead by providing visual evidence and/or an arborist report prepared by a qualified arborist, then a permit is required but no fee will be assessed.

Several larger mature trees are located surrounding the historic building in the western portion of the project area. It is possible that at least one, or all, of these trees would be considered a heritage tree according to the City's definition above. Additionally, heritage trees may be located within the 100' study area buffer.

Wildlife Movement

Wildlife corridors, or habitat linkages, are generally defined as connections between habitat patches that allow for physical and genetic exchange between otherwise isolated animal populations. Such linkages may serve a local purpose, such as between foraging and denning areas, or they may be regional in nature, allowing movement across the landscape. Some habitat linkages may serve as migration corridors, wherein animals periodically move away from an area and then subsequently return. Others may be important as dispersal corridors for young animals. A group of habitat linkages in an area can form a wildlife corridor network.

The habitats in the linkage do not necessarily need to be the same as the habitats that are being linked. Rather, the linkage merely needs to contain sufficient cover and forage to allow temporary inhabitation by ground-dwelling species. Typically, habitat linkages are contiguous strips of natural areas, though dense plantings of landscape vegetation can be used by certain disturbance-tolerant species. Depending upon the species using a corridor, specific physical resources (e.g., rock outcroppings, vernal pools, or oak trees) may need to be in the habitat link at certain intervals to allow slower-moving species to traverse the link. For highly mobile or aerial species, habitat linkages may be discontinuous patches of suitable resources spaced sufficiently close together to permit travel along a route in a short period of time.

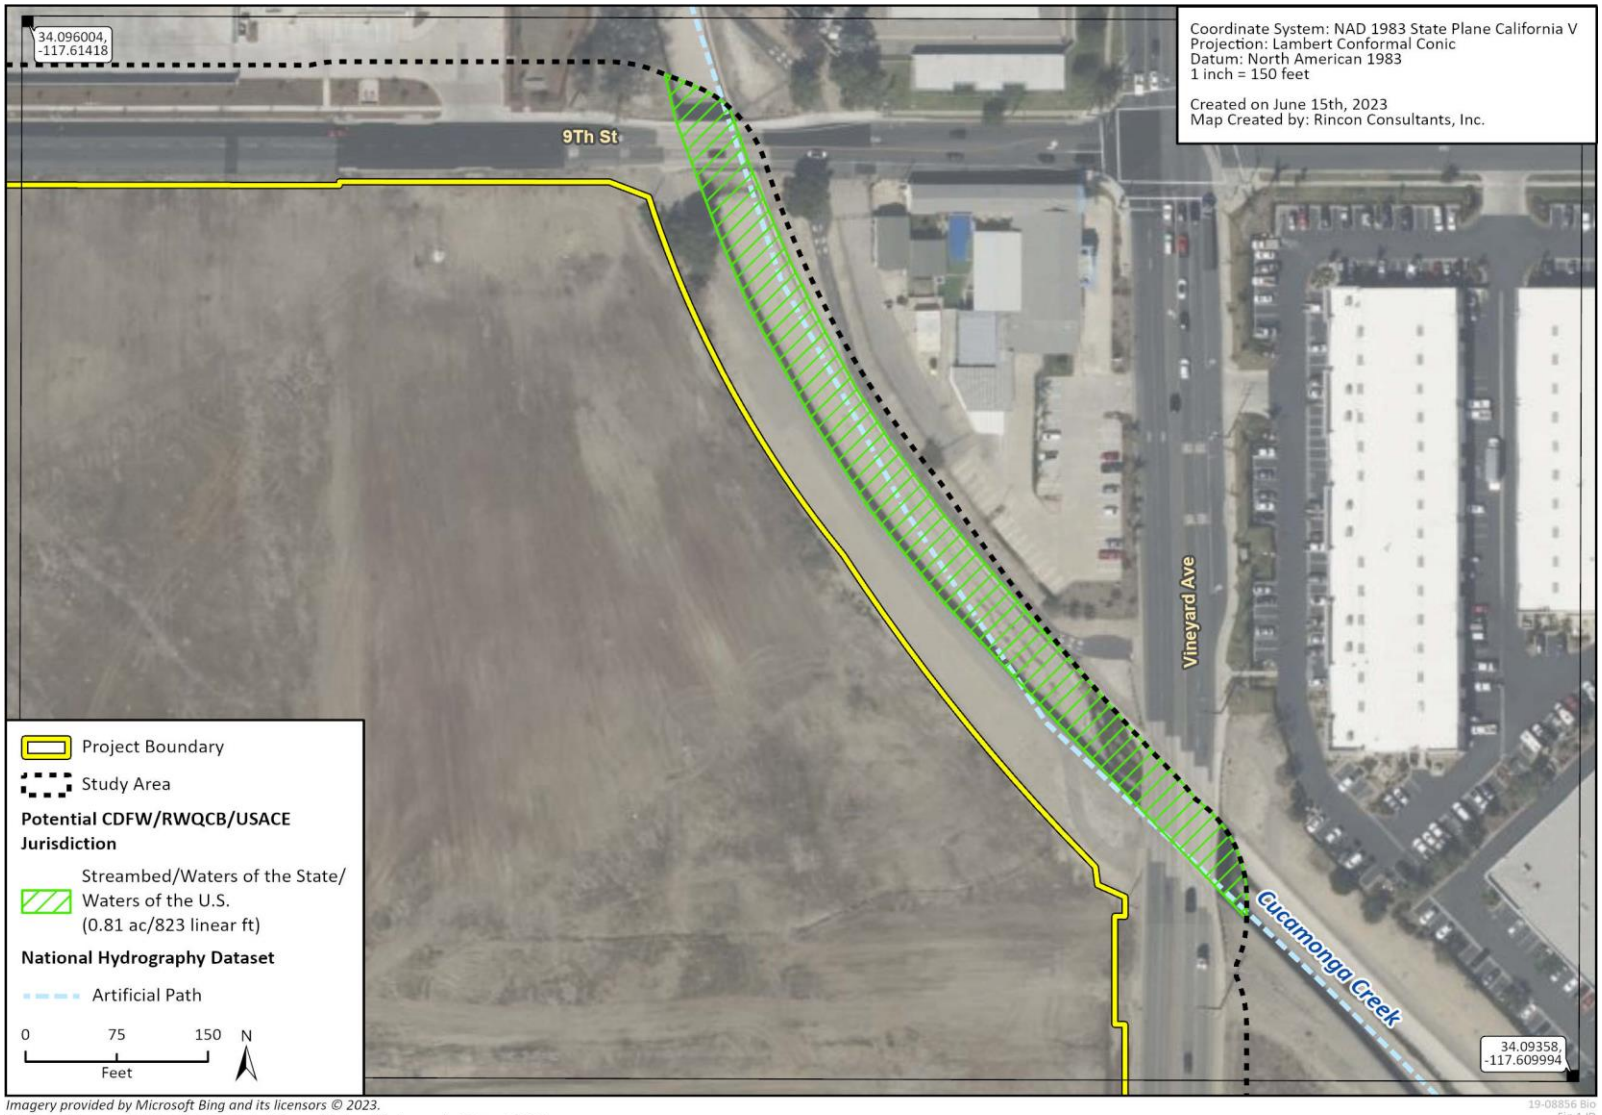
The project area is completely fenced off and is surrounded by urban/developed land in all directions. The portion of Cucamonga Creek within the study area is completely channelized, does not support a riparian corridor, and likely experiences high velocity flows during rain events due to its channelized nature and, therefore, is not likely to support wildlife movement. The emergent ornamental trees scattered throughout the urban/developed land and surrounding the historic building in the study area could be used by birds migrating through the area or during local movement or regional migration. The study area is not located within any known regional wildlife movement corridors.

Potentially Jurisdictional Waters

Since Cucamonga Creek is a relatively permanent water (i.e., intermittent stream) and eventually converges with the Santa Ana River, which is a Traditional Navigable Water (TNW), the OHWM channel of the stream will likely be considered a non-wetland water of the U.S. under the regulation of the USACE pursuant to Section 404 of the CWA. The OHWM channel of the stream would also likely qualify as a non-wetland water of the State, under the jurisdiction of the Santa Ana RWQCB pursuant to the Porter-Cologne Water Quality Control Act and/or Section 401 of the CWA. In addition, Cucamonga Creek would likely qualify as CDFW-jurisdictional streambed and the extent of the top of bank likely falls under CDFW jurisdiction pursuant to Section 1600 et seq. of the CFGC. The locations of the potentially jurisdictional areas are depicted in Figure 4 and photographs of the potentially jurisdictional feature are included in Attachment 1. If necessary, a formal jurisdictional delineation should be conducted within the study area to determine the limits of the potentially jurisdictional feature. The results of the jurisdictional delineation should be compiled into a jurisdictional delineation report, which would be submitted to the appropriate regulatory agencies for them to make their final jurisdictional determinations.

Impact Analysis

Special-Status Species



Cooper's hawk is a highly mobile species and foraging individuals are not anticipated to be impacted due to the project. However, project-related impacts to Cooper's hawk could occur if they are nesting within the study area during project initiation and abandon their nest due to construction, or some other project-related disturbance. Potential impacts to Cooper's hawk would be avoided or reduced through the implementation of avoidance and minimization measures (AMMs) 1 in the Avoidance and Minimization Measures section below.

Other Protected Species

Nesting Birds

The study area contains suitable habitat for nesting birds. If construction activities are scheduled to occur during the avian nesting season (typically February 1 to September 1), and an active nest is present within the vicinity of the project area, impacts to nesting birds could occur through disturbance of breeding behavior or nest abandonment. Potential impacts to nesting birds would be avoided or reduced through the implementation of AMM 1 in the Avoidance and Minimization Measures section below.

Figure 4 Jurisdictional Resources

Protected Trees

Several larger mature trees are located surrounding the historic building in the western portion of the project area. In addition, multiple large mature trees are located within the study area buffer. Although it is possible that at least one, or all, of these trees would be considered a heritage tree according to the City's definition, no trees will be removed under the proposed project. Therefore, no impact to protected trees would occur.

Wildlife Movement

The study area likely does not support local or regional terrestrial wildlife movement. The various emergent ornamental trees scattered throughout the study area may support small-scale local avian movement or regional avian migration. However, large scale tree removals are not anticipated as a part of the project, and landscape/ornamental vegetation is anticipated to be planted surrounding the industrial buildings, parking spaces, and driveways as a part of the project. Additionally, the project area is currently fenced, and development of the project would not introduce new barriers to movement of resident or migratory wildlife species. Given the urbanized setting within the City, the project would also not likely result in the introduction of any new anthropogenic factors (light, fencing, noise, human presence and/or domestic animals), which could hinder the normal activities of wildlife. Therefore, project impacts on wildlife movement are not anticipated to occur.

Potentially Jurisdictional Waters

The potential limits of Cucamonga Creeks jurisdiction are located approximately 45 feet from the project area boundary and are therefore not anticipated to be impacted by the project. No other potentially jurisdictional aquatic features are located within the study area; therefore, potentially jurisdictional waters are not anticipated to be impacted by the project.

Avoidance and Minimization Measures

AMM 1 Nesting Birds

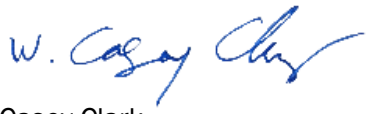
To avoid disturbance of nesting birds, including special-status species and birds protected by the MBTA and CFGC Section 3503, project activities shall occur outside of the breeding season for migratory birds (generally February 1 through September 1), if feasible.

If construction occurs during the breeding season, then a pre-construction nesting bird survey shall be conducted no more than seven (7) days prior to the initiation of project activities. The nesting bird pre-construction survey shall be conducted on foot inside the study area and include a 300-foot buffer for raptors and a 100-foot buffer for all other species. The survey shall be conducted by a qualified biologist who is familiar with the identification of avian species known to occur in Southern California. If nests are found, an avoidance buffer (dependent upon the species, the proposed work activity, and existing disturbances associated with land use outside of the workspace) shall be determined and demarcated by the biologist with construction fencing, flagging, or other means to mark the boundary. The buffer will be maintained until the birds have fledged the nest and are foraging on their own. Intrusion into the buffer may only be conducted at the discretion of the biologist.

AMM 2 General Best Management Practices

General requirements that shall be followed by construction personnel are listed below and shall be included on the construction plans.

- The contractor shall clearly delineate the remediation limits, staging areas, and access points and prohibit any construction-related traffic outside of these boundaries.
- All food-related trash items, such as wrappers, cans, bottles, and food scraps generated during proposed project construction, shall be disposed of in closed containers only and removed from the workspace.
- Best management practices (BMPs) shall be implemented throughout project construction and shall include, but not be limited to, erosion and sediment controls to minimize erosion during construction. BMPs shall be implemented for the duration of the project until disturbed areas have been stabilized by long-term erosion control measures.
- Materials shall be stored at least 100 feet from waterways, as feasible, or equipment will utilize secondary containment.
- Construction materials and spoils shall be protected from stormwater runoff using temporary perimeter sediment barriers such as berms, silt fences, fiber rolls, covers, sand/gravel bags, and straw bale barriers, as appropriate.
- Vegetation trimming shall be limited to the maximum extent feasible.
- Any substances that could be hazardous to wildlife resulting from project-related activities shall be prevented from contaminating the soil and/or entering waterways.



Limitations

This BRA has been conducted in accordance with professionally accepted biological investigation practices conducted at this time and in this geographic area. The biological investigation is limited by the scope of work performed. Reconnaissance biological surveys for certain taxa may have been conducted as part of this assessment but were not performed during a particular blooming period, nesting period, or particular portion of the season when positive identification would be expected if present, and therefore, cannot be considered definitive. The biological surveys are limited also by the environmental conditions present at the time of the surveys. In addition, general biological (or protocol) surveys do not guarantee that the organisms are not present and will not be discovered in the future within the site. In particular, mobile wildlife species could occupy the site on a transient basis or re-establish populations in the future. Our field studies were based on current industry practices, which change over time and may not be applicable in the future. No other guarantees or warranties, expressed or implied, are provided. The findings and opinions conveyed in this report are based on findings derived from site reconnaissance, jurisdictional areas, review of CNDDB RareFind5, and specified historical and literature sources (CDFW 2022a). Standard data sources relied upon during the completion of this report, such as the CNDDB, may vary with regard to accuracy and completeness. In particular, the CNDDB is compiled from research and observations reported to CDFW that may or may not have been the result of comprehensive or site-specific field surveys. Although Rincon believes the data sources are reasonably reliable, Rincon cannot and does not guarantee the authenticity or reliability of the data sources it has used. Additionally, pursuant to our contract, the data sources reviewed included only those that are practically reviewable without the need for extraordinary research and analysis.

Conclusion

Thank you for the opportunity to support your environmental analysis needs for this important project. Please contact us if you have any questions.

Sincerely,
Rincon Consultants, Inc.

Species Compendium

Plant and Wildlife Species Detected in the Study Area on June 8, 2023

Scientific Name[1]	Common Name	Status[2]	Native or Introduced
Plants			
Acmispon americanus	American bird's foot trefoil	–	Native
Acmispon glaber	Deerweed	–	Native
Ailanthus altissima	Tree-of-heaven	Cal-IPC Moderate	Introduced
Ambrosia psilostachya	Western ragweed	–	Native
Amsinckia intermedia	Rancher's fiddleneck	–	Native
Avena barbata	Slender wild oat	Cal-IPC Moderate	Introduced
Brassica tournefortii	Sahara mustard	Cal-IPC High	Introduced
Bromus diandrus	Ripgut grass	Cal-IPC Moderate	Introduced
Bromus madritensis ssp. *rubens*	Red brome	Cal-IPC High	Introduced
Bromus tectorum	Cheat grass	Cal-IPC High	Introduced
Camissoniopsis bistorta	California sun cup	–	Native
Camissoniopsis hirtella	Hairy sun cup	–	Native
Carduus pycnocephalus	Italian thistle	Cal-IPC Moderate	Introduced
Centaurea melitensis	Tocalote	Cal-IPC Moderate	Introduced
Chenopodium album	Lamb's quarters	–	Introduced
Croton californicus	California croton	–	Native
Croton setiger	Doveweed	–	Native
Cupaniopsis anacardioides	Carrotwood	–	Introduced
Cupressus sempervirens	Italian cypress	–	Introduced
Datura wrightii	Western jimson weed	–	Native
Erigeron canadensis	Horseweed	–	Native
Eriogonum fasciculatum var. *foliolosum*	Inland California buckwheat	–	Native
Eriogonum gracile var. *gracile*	Slender buckwheat	–	Native
Erodium cicutarium	Red-stem filaree	Cal-IPC Limited	Introduced
Eucalyptus camaldulensis	River red gum	Cal-IPC Limited	Introduced
Eucalyptus globulus	Blue gum	Cal-IPC Limited	Introduced
Festuca myuros	Rattail fescue	Cal-IPC Moderate	Introduced
Geijera parviflora	Australian willow	–	Introduced
Heterotheca grandiflora	Telegraph weed	–	Native
Hirschfeldia incana	Short-pod mustard	Cal-IPC Moderate	Introduced
Hordeum marribium	White horehound	Cal-IPC Limited	Introduced
Jacaranda mimosifolia	Jacaranda	–	Introduced
Lactuca serriola	Prickly lettuce	–	Introduced
Lamarckia aurera	Goldentop grass	–	Introduced
Marrubium vulgare	Horehound	Cal-IPC Limited	Introduced
Melaleuca quinquenervia	Paperbark tree	–	Introduced
Melia azedarach	China berry	–	Introduced
Melilotus indicus	Indian sweetclover	–	Introduced

Scientific Name[1]	Common Name	Status[2]	Native or Introduced
Metrosideros excelsa	New Zealand Christmas tree	–	Introduced
Nerium oleander	Oleander	–	Introduced
Nicotiana glauca	Tree tobacco	Cal-IPC Moderate	Introduced
Oncosiphon pilulifer	Stinknet	Cal-IPC High	Introduced
Phoenix canariensis	Canary Island date palm	Cal-IPC Limited	Introduced
Pinus eldarica	Afghan pine	–	Introduced
Pinus halepensis	Aleppo pine	–	Introduced
Podocarpus macrophyllus	Podocarpus	–	Introduced
Populus fremontii ssp. *fremontii*	Fremont cottonwood	–	Native
Prunus cerasifera	Plum tree	Cal-IPC Limited	Introduced
Rhaphiolepis indica	Indian hawthorn	–	Introduced
Rumex crispus	Curly dock	Cal-IPC Limited	Introduced
Schinus molle	Peruvian pepper tree	Cal-IPC Limited	Introduced
Schismus barbatus	Mediterranean schismus	Cal-IPC Limited	Introduced
Sequoiadendron sempervirens	Coast redwood	–	Introduced (planted)
Sisymbrium irio	London rocket	Cal-IPC Moderate	Introduced
Solanum nigrum	Black nightshade	–	Introduced
Tipuana tipu	Tipu	–	Introduced
Ulmus parvifolia	Chinese elm	–	Introduced
Urtica dioica	Stinging nettle	–	Native
Verbesina encelioides	Golden crownbeard	–	Introduced
Animals			
Birds			
Buteo jamaicensis	Red-tailed hawk	–	Native
Calypte anna	Anna's hummingbird	–	Native
Corvus brachyrhynchos	American crow	–	Native
Haemorhous mexicanus	House finch	–	Native
Mimus polyglottus	Northern mockingbird	–	Native
Psaltriparus minimus	Bushtit	–	Native
Sayornis nigricans	Black phoebe	–	Native
Spinus psaltria	Lesser goldfinch	–	Native
Streptopelia decaocto	Eurasian collared-dove	–	Introduced
Tyrannus verticalis	Western kingbird	–	Native
Zenaida macroura	Mourning dove	–	Native
Reptiles			
Sceloporus occidentalis	Western fence lizard	–	Native
Mammals			
Otospermophillus beecheyi	California ground squirrel	–	Native
Sylvillagus audubonii	desert cottontail	–	Native

Special-Status Species Evaluation Table

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Plants and Lichens				
Abronia villosa var. *aurita* chaparral sand-verbena	None/None G5T2?/S2 1B.1	Annual herb. Chaparral, coastal scrub, desert dunes. Sandy. Elevations: 245-5250ft. (75-1600m.) Blooms (Jan)Mar-Sep.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Ambrosia monogyra singlewhorl burrobrush	None/None G5/S2 2B.2	Perennial shrub. Chaparral, Sonoran Desert scrub. Sandy. Elevations: 35-1640ft. (10-500m.) Blooms Aug-Nov.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Ambrosia pumila San Diego ambrosia	FE/None G1/S1 1B.1	Perennial rhizomatous herb. Chaparral, coastal scrub, valley and foothill grassland, vernal pools. Alkaline (sometimes), clay (sometimes), disturbed areas (often), sandy (sometimes). Elevations: 65-1360ft. (20-415m.) Blooms Apr-Oct.	None	No suitable habitat present within the study area. Soils heavily disturbed. Not observed during the field survey when it would have been readily identifiable.
Aphyllon validum ssp. *validum* Rock Creek broomrape	None/None G4T2/S2 1B.2	Chaparral, pinyon and juniper woodland. On slopes of loose decomposed granite; parasitic on various chaparral shrubs. 1030-2000m. Blooms May-Sep.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Arctostaphylos glandulosa ssp. *gabrielensis* San Gabriel manzanita	None/None G5T3/S3 1B.2	Perennial evergreen shrub. Chaparral. Rocky outcrops; can be dominant shrub where it occurs. Elevations: 1950-4920ft. (595-1500m.) Blooms Mar.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Arenaria paludicola marsh sandwort	FE/SE G1/S1 1B.1	Perennial stoloniferous herb. Marshes and swamps. Openings, sandy. Elevations: 10-560ft. (3-170m.) Blooms May-Aug.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Astragalus brauntonii Braunton's milk-vetch	FE/None G2/S2 1B.1	Perennial herb. Chaparral, coastal scrub, valley and foothill grassland. Recent burns or disturbed areas; usually on sandstone with carbonate layers. Soil specialist: requires shallow soils to defeat pocket gophers and open areas, preferably on hilltops, saddles or bowls between hills. Elevations: 15-2100ft. (4-640m.) Blooms Jan-Aug.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Atriplex coulteri Coulter's saltbush	None/None G3/S1S2 1B.2	Perennial herb. Coastal bluff scrub, coastal dunes, coastal scrub, valley and foothill grassland. Alkaline (sometimes), clay (sometimes). Elevations: 10-1510ft. (3-460m.) Blooms Mar-Oct.	None	No suitable habitat present within the study area. Soils heavily disturbed.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Berberis nevinii Nevin's barberry	FE/SE G1/S1 1B.1	Perennial evergreen shrub. Chaparral, cismontane woodland, coastal scrub, riparian scrub. Gravelly (sometimes), sandy (sometimes). Elevations: 230-2705ft. (70-825m.) Blooms (Feb)Mar-Jun.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Calochortus clavatus var. *gracilis* slender mariposa-lily	None/None G4T2T3/S2S3 1B.2	Perennial bulbiferous herb. Chaparral, coastal scrub, valley and foothill grassland. Shaded foothill canyons; often on grassy slopes within other habitat. Elevations: 1050-3280ft. (320-1000m.) Blooms Mar-Jun (Nov).	None	No suitable habitat present within the study area. Soils heavily disturbed.
Calochortus weedii var. *intermedius* intermediate mariposa-lily	None/None G3G4T3/S3 1B.2	Perennial bulbiferous herb. Chaparral, coastal scrub, valley and foothill grassland. Rocky. Elevations: 345-2805ft. (105-855m.) Blooms May-Jul.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Calystegia felix lucky morning-glory	None/None G1Q/S1 1B.1	Annual rhizomatous herb. Meadows and seeps, riparian scrub. Sometimes alkaline, alluvial. Elevations: 100-705ft. (30-215m.) Blooms Mar-Sep.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Calystegia sepium ssp. *binghamiae* Santa Barbara morning-glory	None/None G5TXQ/SX 1A	Perennial rhizomatous herb. Marshes and swamps. Elevations: 15-15ft. (5-5m.) Blooms Aug.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Centromadia pungens ssp. *laevis* smooth tarplant	None/None G3G4T2/S2 1B.1	Annual herb. Chenopod scrub, meadows and seeps, playas, riparian woodland, valley and foothill grassland. Alkaline. Elevations: 0-2100ft. (0-640m.) Blooms Apr-Sep.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Chloropyron maritimum ssp. *maritimum* salt marsh bird's-beak	FE/SE G4?T1/S1 1B.2	Annual herb (hemiparasitic). Coastal dunes, marshes and swamps. Limited to the higher zones of salt marsh habitat. Elevations: 0-100ft. (0-30m.) Blooms May-Oct (Nov).	None	No suitable habitat present within the study area. Soils heavily disturbed.
Chorizanthe parryi var. *parryi* Parry's spineflower	None/None G3T2/S2 1B.1	Annual herb. Chaparral, cismontane woodland, coastal scrub, valley and foothill grassland. Openings, Rocky (sometimes), sandy (sometimes). Elevations: 900-4005ft. (275-1220m.) Blooms Apr-Jun.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Chorizanthe xanti var. *leucotheca* white-bracted spineflower	None/None G4T3/S3 1B.2	Annual herb. Coastal scrub, mojavean desert scrub, pinyon and juniper woodland. Gravelly (sometimes), sandy (sometimes). Elevations: 985-3935ft. (300-1200m.) Blooms Apr-Jun.	None	No suitable habitat present within the study area. Soils heavily disturbed.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Cladium californicum California saw-grass	None/None G4/S2 2B.2	Perennial rhizomatous herb. Marshes and swamps, meadows and seeps. Freshwater or alkaline moist habitats. Elevations: 195-5250ft. (60-1600m.) Blooms Jun-Sep.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Claytonia peirsonii ssp. *peirsonii* Peirson's spring beauty	None/None G2G3T2/S2 1B.2	Perennial herb. Subalpine coniferous forest, upper montane coniferous forest. Granitic, metamorphic, scree, talus. Elevations: 4955-9005ft. (1510-2745m.) Blooms (Mar)May-Jun.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Cryptantha incana Tulare cryptantha	None/None G2/S2 1B.3	Annual herb. Lower montane coniferous forest. Gravelly or rocky sites. Elevations: 4690-7055ft. (1430-2150m.) Blooms Jun-Aug.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Dodecahema leptoceras slender-horned spineflower	FE/SE G1/S1 1B.1	Annual herb. Chaparral, cismontane woodland, coastal scrub. Flood deposited terraces and washes; associates include *Encelia, Dalea*, *Lepidospartum*, etc. Sandy soils. Elevations: 655-2495ft. (200-760m.) Blooms Apr-Jun.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Dudleya multicaulis many-stemmed dudleya	None/None G2/S2 1B.2	Perennial herb. Chaparral, coastal scrub, valley and foothill grassland. In heavy, often clayey soils or grassy slopes. Elevations: 50-2590ft. (15-790m.) Blooms Apr-Jul.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Eriastrum densifolium ssp. *sanctorum* Santa Ana River woollystar	FE/SE G4T1/S1 1B.1	Perennial herb. Chaparral, coastal scrub. In sandy soils on river floodplains or terraced fluvial deposits. Elevations: 300-2000ft. (91-610m.) Blooms Apr-Sep.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Eriogonum microthecum var. *johnstonii* Johnston's buckwheat	None/None G5T2/S2 1B.3	Perennial deciduous shrub. Subalpine coniferous forest, upper montane coniferous forest. Slopes and ridges on granite or limestone. Elevations: 6000-9600ft. (1829-2926m.) Blooms Jul-Sep.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Horkelia cuneata var. *puberula* mesa horkelia	None/None G4T1/S1 1B.1	Perennial herb. Chaparral, cismontane woodland, coastal scrub. Sandy or gravelly sites. Elevations: 230-2660ft. (70-810m.) Blooms Feb-Jul(Sep).	None	No suitable habitat present within the study area. Soils heavily disturbed.
Lasthenia glabrata ssp. *coulteri* Coulter's goldfields	None/None G4T2/S2 1B.1	Annual herb. Marshes and swamps, playas, vernal pools. Usually found on alkaline soils in playas, sinks, and grasslands. 1-. Elevations: 5-4005ft. (1-1220m.) Blooms Feb-Jun.	None	No suitable habitat present within the study area. Soils heavily disturbed.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Lilium parryi lemon lily	None/None G3/S3 1B.2	Perennial bulbiferous herb. Lower montane coniferous forest, meadows and seeps, riparian forest, upper montane coniferous forest. Wet, mountainous terrain; generally in forested areas; on shady edges of streams, in open boggy meadows and seeps. Elevations: 4005-9005ft. (1220-2745m.) Blooms Jul-Aug.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Linanthus concinnus San Gabriel linanthus	None/None G2/S2 1B.2	Annual herb. Chaparral, lower montane coniferous forest, upper montane coniferous forest. Dry rocky slopes, often in Jeffrey pine/canyon oak forest. Elevations: 4985-9185ft. (1520-2800m.) Blooms Apr-Jul.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Lycium parishii Parish's desert-thorn	None/None G4/S1 2B.3	Perennial shrub. Coastal scrub, Sonoran Desert scrub. Elevations: 445-3280ft. (135-1000m.) Blooms Mar-Apr.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Malacothamnus parishii Parish's bush-mallow	None/None GXQ/SX 1A	Perennial deciduous shrub. Chaparral, coastal scrub. In a wash. Elevations: 1000-1495ft. (305-455m.) Blooms Jun-Jul.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Monardella australis ssp. *jokerstii* Jokerst's monardella	None/None G4T1?/S1? 1B.1	Perennial rhizomatous herb. Chaparral, lower montane coniferous forest. Steep scree or talus slopes between breccia. Secondary alluvial benches along drainages and washes. Elevations: 4430-5740ft. (1350-1750m.) Blooms Jul-Sep.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Monardella breweri ssp. *glandulifera* Brown's Flat monardella	None/None G5T1/S1 1B.2	Lower montane coniferous forest (sparse), chaparral. Dry, grassy openings, ridgetops. 1300-1500m. Blooms May-Aug.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Monardella macrantha ssp. *hallii* Hall's monardella	None/None G5T3/S3 1B.3	Perennial rhizomatous herb. Broad-leafed upland forest, chaparral, cismontane woodland, lower montane coniferous forest, valley and foothill grassland. Dry slopes and ridges in openings. Elevations: 2395-7200ft. (730-2195m.) Blooms Jun-Oct.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Monardella pringlei Pringle's monardella	None/None GX/SX 1A	Annual herb. Coastal scrub. Sandy hills. Elevations: 985-1310ft. (300-400m.) Blooms May-Jun.	None	No suitable habitat present within the study area. Soils heavily disturbed.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Muhlenbergia utilis aparejo grass	None/None G4/S2S3 2B.2	Perennial rhizomatous herb. Chaparral, cismontane woodland, coastal scrub, marshes and swamps, meadows, and seeps. Alkaline (sometimes), Serpentinite (sometimes). Elevations: 80-7630ft. (25-2325m.) Blooms Mar-Oct.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Navarretia prostrata prostrate vernal pool navarretia	None/None G2/S2 1B.2	Annual herb. Coastal scrub, meadows and seeps, valley and foothill grassland, vernal pools. Alkaline soils in grassland, or in vernal pools. Mesic, alkaline sites. Elevations: 10-3970ft. (3-1210m.) Blooms Apr-Jul.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Opuntia basilaris var. *brachyclada* short-joint beavertail	None/None G5T3/S3 1B.2	Perennial stem. Chaparral, Joshua Tree woodland, mojavean desert scrub, pinyon and juniper woodland. Sandy soil or coarse, granitic loam. Elevations: 1395-5905ft. (425-1800m.) Blooms Apr-Jun (Aug).	None	No suitable habitat present within the study area. Soils heavily disturbed.
Oreonana vestita woolly mountain-parsley	None/None G3/S3 1B.3	Perennial herb. Lower montane coniferous forest, subalpine coniferous forest, upper montane coniferous forest. High ridges; on scree, talus, or gravel. Elevations: 5300-11485ft. (1615-3500m.) Blooms Mar-Sep.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Phacelia stellaris Brand's star phacelia	None/None G1/S1 1B.1	Annual herb. Coastal dunes, coastal scrub. Open areas. Elevations: 5-1310ft. (1-400m.) Blooms Mar-Jun.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Pseudognaphalium leucocephalum white rabbit-tobacco	None/None G4/S2 2B.2	Perennial herb. Chaparral, cismontane woodland, coastal scrub, riparian woodland. Sandy, gravelly sites. Elevations: 0-6890ft. (0-2100m.) Blooms (Jul)Aug-Nov (Dec).	None	No suitable habitat present within the study area. Soils heavily disturbed.
Sagittaria sanfordii Sanford's arrowhead	None/None G3/S3 1B.2	Perennial rhizomatous herb (emergent). Marshes and swamps. In standing or slow-moving freshwater ponds, marshes, and ditches. Elevations: 0-2135ft. (0-650m.) Blooms May-Oct (Nov).	None	No suitable habitat present within the study area. Soils heavily disturbed.
Senecio aphanactis chaparral ragwort	None/None G3/S2 2B.2	Annual herb. Chaparral, cismontane woodland, coastal scrub. Drying alkaline flats. Elevations: 50-2625ft. (15-800m.) Blooms Jan-Apr (May).	None	No suitable habitat present within the study area. Soils heavily disturbed.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Sidalcea neomexicana salt spring checkerbloom	None/None G4/S2 2B.2	Perennial herb. Chaparral, coastal scrub, lower montane coniferous forest, mojavean desert scrub, playas. Alkali springs and marshes. Elevations: 50-5020ft. (15-1530m.) Blooms Mar-Jun.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Sphenopholis obtusata prairie wedge grass	None/None G5/S2 2B.2	Perennial herb. Cismontane woodland, meadows, and seeps. Open moist sites, along rivers and springs, alkaline desert seeps. Elevations: 985-6560ft. (300-2000m.) Blooms Apr-Jul.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Symphyotrichum defoliatum San Bernardino aster	None/None G2/S2 1B.2	Perennial rhizomatous herb. Cismontane woodland, coastal scrub, lower montane coniferous forest, marshes and swamps, meadows and seeps, valley, and foothill grassland. Vernally mesic grassland or near ditches, streams and springs; disturbed areas. Elevations: 5-6695ft. (2-2040m.) Blooms Jul-Nov.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Symphyotrichum greatae Greata's aster	None/None G2/S2 1B.3	Perennial rhizomatous herb. Broad-leafed upland forest, chaparral, cismontane woodland, lower montane coniferous forest, riparian woodland. Mesic canyons. Elevations: 985-6595ft. (300-2010m.) Blooms Jun-Oct.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Thysanocarpus rigidus rigid fringepod	None/None G2/S2 1B.2	Annual herb. Pinyon and juniper woodland. Dry, rocky slopes and ridges of oak and pine woodland in arid mountain ranges. Elevations: 1970-7220ft. (600-2200m.) Blooms Feb-May.	None	No suitable habitat present within the study area. Soils heavily disturbed.
Viola pinetorum ssp. *grisea* grey-leaved violet	None/None G4G5T3/S3 1B.2	Perennial herb. Meadows and seeps, subalpine coniferous forest, upper montane coniferous forest. Dry mountain peaks and slopes. Elevations: 4920-11155ft. (1500-3400m.) Blooms Apr-Jul.	None	No suitable habitat present within the study area. Soils heavily disturbed.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Invertebrates				
Bombus crotchii Crotch bumble bee	None/SCE G2/S2	Coastal California east to the Sierra-Cascade crest and south into Mexico. Food plant genera include *Antirrhinum, Phacelia, Clarkia, Dendromecon, Eschscholzia*, and *Eriogonum*.	None	Observations have been documented approximately 3.5 miles southeast of the Project Area in higher quality grassland habitat. However, the Project Area is surrounded by developed habitat, the habitat within the study area is very disturbed, and this species' food plants are generally absent. Additionally, this species or sign of this species was not observed during the field survey. Lastly, this species is a subterranean nester and the soil within the study area appears to be disced and is heavily disturbed.
Euphydryas editha quino quino checkerspot butterfly	FE/None G5T1T2/S1S2	Sunny openings within chaparral and coastal sage shrublands in parts of Riverside and San Diego counties. Hills and mesas near the coast. Need high densities of food plants *Plantago erecta*, *P. insularis*, and *Orthocarpus purpurescens*.	None	Food plants not present in the study area.
Rhaphiomidas terminatus abdominalis Delhi Sands flower-loving fly	FE/None G1T1/S1	Found only in areas of the Delhi Sands formation in southwestern San Bernardino and northwestern Riverside counties. Requires fine, sandy soils, often with wholly or partly consolidated dunes and sparse vegetation. Oviposition req. shade.	None	Delhi Sands formation and the required soil type is not present in the study area.
Fish				
Catostomus santaanae Santa Ana sucker	FT/None G1/S1	Endemic to Los Angeles Basin south coastal streams. Habitat generalists, but prefer sand-rubble-boulder bottoms, cool, clear water, and algae.	None	The study area is outside of this species' known geographic range and suitable habitat is absent.
Gila orcuttii arroyo chub	None/None G2/S2 SSC	Native to streams from Malibu Creek to San Luis Rey River basin. Introduced into streams in Santa Clara, Ventura, Santa Ynez, Mojave, and San Diego River basins. Slow water stream sections with mud or sand bottoms. Feeds heavily on aquatic vegetation and associated invertebrates.	None	No suitable habitat is present within Cucamonga Creek, within the study area.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Oncorhynchus mykiss irideus pop. 10 steelhead - southern California DPS	FE/SCE G5T1Q/S1	Federal listing refers to populations from Santa Maria River south to southern extent of range (San Mateo Creek in San Diego County). Southern steelhead likely have greater physiological tolerances to warmer water and more variable conditions.	None	No suitable habitat is present within Cucamonga Creek, within the study area.
Rhinichthys osculus ssp. *8* Santa Ana speckled dace	None/None G5T1/S1 SSC	Headwaters of the Santa Ana and San Gabriel rivers. May be extirpated from the Los Angeles River system. Requires permanent flowing streams with summer water temps of 17-20 C. Usually inhabits shallow cobble and gravel riffles.	None	No suitable habitat is present within Cucamonga Creek, within the study area.
Amphibians				
Anaxyrus californicus arroyo toad	FE/None G2G3/S2 SSC	Semi-arid regions near washes or intermittent streams, including valley-foothill and desert riparian, desert wash, etc. Rivers with sandy banks, willows, cottonwoods, and sycamores; loose, gravelly areas of streams in drier parts of range.	None	No suitable habitat is present within the study area.
Rana boylii pop. 6 foothill yellow-legged frog - south coast DPS	Proposed Endangered !/SE G3T1/S1	Southern Coast Ranges from Monterey Bay south through San Gabriel Mountains; west of the Salinas River in Monterey Co, south through Transverse Ranges, and east through San Gabriel Mountains. Historically may have ranged to Baja California. Partly shaded shallow streams and riffles with a rocky substrate in a variety of habitats. Needs at least some cobble-sized substrate for egg-laying and at least 15 weeks to attain metamorphosis.	None	No suitable habitat is present within the study area.
Rana muscosa southern mountain yellow-legged frog	FE/SE G1/S1 WL	Disjunct populations known from southern Sierras (northern DPS) and San Gabriel, San Bernardino, and San Jacinto Mtns (southern DPS). Found at 1,000 to 12,000 ft in lakes and creeks that stem from springs and snowmelt. May overwinter under frozen lakes. Often encountered within a few feet of water. Tadpoles may require 2 - 4 years to complete their aquatic development.	None	No suitable habitat is present within the study area.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Spea hammondii western spadefoot	None/None G2G3/S3S4 SSC	Occurs primarily in grassland habitats but can be found in valley-foothill hardwood woodlands. Vernal pools are essential for breeding and egg-laying.	None	Marginal quality grassland habitat is present within the study area; however, the study area is surrounded by urbanized habitat and breeding habitat is absent from the study area.
Taricha torosa Coast Range newt	None/None G4/S4 SSC	Coastal drainages from Mendocino County to San Diego County. Lives in terrestrial habitats and will migrate over 1 km to breed in ponds, reservoirs, and slow-moving streams.	None	No suitable habitat is present within the study area.
Reptiles				
Anniella stebbinsi Southern California legless lizard	None/None G3/S3 SSC	Generally, south of the Transverse Range, extending to northwestern Baja California. Occurs in sandy or loose loamy soils under sparse vegetation. Disjunct populations in the Tehachapi and Piute Mountains in Kern County. Variety of habitats; generally, in moist, loose soil. They prefer soils with a high moisture content.	None	No suitable habitat is present within the study area.
Arizona elegans occidentalis California glossy snake	None/None G5T2/S2 SSC	Patchily distributed from the eastern portion of San Francisco Bay, southern San Joaquin Valley, and the Coast, Transverse, and Peninsular ranges, south to Baja California. Generalist reported from a range of scrub and grassland habitats, often with loose or sandy soils.	None	No suitable habitat is present within the study area. Project Area is surrounded by urban/developed habitat.
Aspidoscelis hyperythra orange-throated whiptail	None/None G5/S2S3 WL	Inhabits low-elevation coastal scrub, chaparral, and valley-foothill hardwood habitats. Prefers washes and other sandy areas with patches of brush and rocks. Perennial plants necessary for its major food: termites.	None	No suitable habitat is present within the study area.
Aspidoscelis tigris stejnegeri coastal whiptail	None/None G5T5/S3 SSC	Found in deserts and semi-arid areas with sparse vegetation and open areas. Also found in woodland and riparian areas. Ground may be firm soil, sandy, or rocky.	None	No suitable habitat is present within the study area.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Charina umbratica southern rubber boa	None/ST G2G3/S2S3	Found in a variety of montane forest habitats. Previously considered morphologically intermediate, recent (2022) genomic analysis clarifies individuals from Mt Pinos, Tehachapi Mts, and southern Sierra Nevada are southern rubber boa. Found in vicinity of streams or wet meadows; requires loose, moist soil for burrowing; seeks cover in rotting logs, rock outcrops, and under surface litter.	None	No suitable habitat is present within the study area.
Coleonyx variegatus abbotti San Diego banded gecko	None/None G5T5/S1S2 SSC	Coastal and cismontane Southern California. Found in granite or rocky outcrops in coastal scrub and chaparral habitats.	None	No suitable habitat is present within the study area.
Crotalus ruber red-diamond rattlesnake	None/None G4/S3 SSC	Chaparral, woodland, grassland, and desert areas from coastal San Diego County to the eastern slopes of the mountains. Occurs in rocky areas and dense vegetation. Needs rodent burrows, cracks in rocks or surface cover objects.	None	No suitable habitat is present within the study area.
Emys marmorata western pond turtle	None/None G3G4/S3 SSC	A thoroughly aquatic turtle of ponds, marshes, rivers, streams, and irrigation ditches, usually with aquatic vegetation, below 6000 ft elevation. Needs basking sites and suitable (sandy banks or grassy open fields) upland habitat up to 0.5 km from water for egg-laying.	None	No suitable habitat is present within the study area.
Phrynosoma blainvillii coast horned lizard	None/None G4/S4 SSC	Frequents a wide variety of habitats, most common in lowlands along sandy washes with scattered low bushes. Open areas for sunning, bushes for cover, patches of loose soil for burial, and abundant supply of ants and other insects.	None	No suitable habitat is present within the study area.
Thamnophis hammondii two-striped gartersnake	None/None G4/S3S4 SSC	Coastal California from vicinity of Salinas to northwest Baja California. From sea to about 7,000 ft elevation. Highly aquatic, found in or near permanent fresh water. Often along streams with rocky beds and riparian growth.	None	No suitable habitat is present within the study area.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Birds				
Accipiter cooperii Cooper's hawk	None/None G5/S4 WL	Woodland, chiefly of open, interrupted or marginal type. Nest sites mainly in riparian growths of deciduous trees, as in canyon bottoms on river floodplains; also, live oaks.	High (nesting/ foraging)	This species' preferred habitat type is absent from the study area. However, this species is commonly found in wooded urban areas. Ample ornamental trees are present within the study area and an ample amount of prey species were observed within the study area. Suitable nesting habitat is present within the ornamental trees found within the study area.
Agelaius tricolor tricolored blackbird	None/ST G1G2/S2 SSC	Highly colonial species, most numerous in Central Valley and vicinity. Largely endemic to California. Requires open water, protected nesting substrate, and foraging area with insect prey within a few km of the colony.	None	No suitable habitat is present within the study area.
Aimophila ruficeps canescens southern California rufous-crowned sparrow	None/None G5T3/S3 WL	Resident in Southern California coastal sage scrub and sparse mixed chaparral. Frequents relatively steep, often rocky hillsides with grass and forb patches.	None	No suitable habitat is present within the study area.
Ammodramus savannarum grasshopper sparrow	None/None G5/S3 SSC	Dense grasslands on rolling hills, lowland plains, in valleys and on hillsides on lower mountain slopes. Favors native grasslands with a mix of grasses, forbs, and scattered shrubs. Loosely colonial when nesting.	None	No suitable habitat is present within the study area.
Aquila chrysaetos golden eagle	None/None G5/S3 FP WL	Rolling foothills, mountain areas, sage-juniper flats, and desert. Cliff-walled canyons provide nesting habitat in most parts of range; also, large trees in open areas.	None	No suitable habitat is present within the study area.
Artemisiospiza belli belli Bell's sparrow	None/None G5T2T3/S3 WL	Nests in chaparral dominated by fairly dense stands of chamise. Found in coastal sage scrub in south of range. Nest located on the ground beneath a shrub or in a shrub 6-18 inches above ground. Territories about 50 yds apart.	None	No suitable habitat is present within the study area.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Asio otus long-eared owl	None/None G5/S3? SSC	Riparian bottomlands grown to tall willows and cottonwoods; also, belts of live oak paralleling stream courses. Require adjacent open land, productive of mice and the presence of old nests of crows, hawks, or magpies for breeding.	None	No suitable habitat is present within the study area.
Athene cunicularia burrowing owl	None/None G4/S3 SSC	Open, dry annual or perennial grasslands, deserts, and scrublands characterized by low-growing vegetation. Subterranean nester, dependent upon burrowing mammals, most notably, the California ground squirrel.	Low	Marginal quality grassland habitat is present within the study area along with ground squirrel activity; however, no potential burrows, individuals, or sign was observed during the field survey. Protocol surveys were conducted by Rocks Biological in 2019 and were negative (Rocks 2021). Additionally, the quality of habitat within the Project Area has been drastically reduced with regular site disturbance to manage weeds and reduce fire hazards.
Buteo swainsoni Swainson's hawk	None/ST G5/S4	Breeds in grasslands with scattered trees, juniper-sage flats, riparian areas, savannahs, and agricultural or ranch lands with groves or lines of trees. Requires adjacent suitable foraging areas such as grasslands, or alfalfa or grain fields supporting rodent populations.	None	No suitable habitat is present within the study area.
Campylorhynchus brunneicapillus sandiegensis coastal cactus wren	None/None G5T3Q/S2 SSC	Southern California coastal sage scrub. Wrens require tall opuntia cactus for nesting and roosting.	None	No suitable habitat is present within the study area.
Coccyzus americanus occidentalis western yellow-billed cuckoo	FT/SE G5T2T3/S1	Riparian forest nester, along the broad, lower flood-bottoms of larger river systems. Nests in riparian jungles of willow, often mixed with cottonwoods, with lower story of blackberry, nettles, or wild grape.	None	No suitable habitat is present within the study area.
Coturnicops noveboracensis yellow rail	None/None G4/S1S2 SSC	Summer resident in eastern Sierra Nevada in Mono County. Freshwater marshlands.	None	No suitable habitat is present within the study area.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Cypseloides niger black swift	None/None G4/S2 SSC	Coastal belt of Santa Cruz and Monterey counties; central and southern Sierra Nevada; San Bernardino and San Jacinto mountains. Breeds in small colonies on cliffs behind or adjacent to waterfalls in deep canyons and sea-bluffs above the surf; forages widely.	None	No suitable habitat is present within the study area.
Elanus leucurus white-tailed kite	None/None G5/S3S4 FP	Rolling foothills and valley margins with scattered oaks and river bottomlands or marshes next to deciduous woodland. Open grasslands, meadows, or marshes for foraging close to isolated, dense-topped trees for nesting and perching.	None	No suitable habitat is present within the study area.
Empidonax traillii extimus southwestern willow flycatcher	FE/SE G5T2/S3	Riparian woodlands in Southern California. .	None	No suitable habitat is present within the study area.
Icteria virens yellow-breasted chat	None/None G5/S3 SSC	Summer resident; inhabits riparian thickets of willow and other brushy tangles near watercourses. Nests in low, dense riparian, consisting of willow, blackberry, wild grape; forages and nests within 10 ft of ground.	None	No suitable habitat is present within the study area.
Laterallus jamaicensis coturniculus California black rail	None/ST G3T1/S2 FP	Inhabits freshwater marshes, wet meadows and shallow margins of saltwater marshes bordering larger bays. Needs water depths of about 1 inch that do not fluctuate during the year and dense vegetation for nesting habitat.	None	No suitable habitat is present within the study area.
Polioptila californica californica coastal California gnatcatcher	FT/None G4G5T3Q/S2 SSC	Obligate, permanent resident of coastal sage scrub below 2500 ft in Southern California. Low, coastal sage scrub in arid washes, on mesas and slopes. Not all areas classified as coastal sage scrub are occupied.	None	No suitable habitat is present within the study area.
Setophaga petechia yellow warbler	None/None G5/S3S4 SSC	Riparian plant associations in close proximity to water. Also nests in montane shrubbery in open conifer forests in Cascades and Sierra Nevada. Frequently found nesting and foraging in willow shrubs and thickets, and in other riparian plants including cottonwoods, sycamores, ash, and alders.	None	No suitable habitat is present within the study area.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Vireo bellii pusillus least Bell's vireo	FE/SE G5T2/S3	Summer resident of Southern California in low riparian in vicinity of water or in dry river bottoms; below 2000 ft. Nests placed along margins of bushes or on twigs projecting into pathways, usually willow, Baccharis, mesquite.	None	No suitable habitat is present within the study area.
Mammals				
Antrozous pallidus pallid bat	None/None G4/S3 SSC	Found in a variety of habitats including deserts, grasslands, shrublands, woodlands, and forests. Most common in open, dry habitats with rocky areas for roosting. Roosts in crevices of rock outcrops, caves, mine tunnels, buildings, bridges, and hollows of live and dead trees which must protect bats from high temperatures. Very sensitive to disturbance of roosting sites.	Low	This species may roost in the historic building; and marginal quality grassland habitat is present within the study area; however, it is heavily and disturbed and is surrounded by urban/developed land cover. Additionally, this species requires a water source and accessible water is generally lacking for most, if not all, of the year.
Chaetodipus fallax fallax northwestern San Diego pocket mouse	None/None G5T3T4/S3S4 SSC	Inhabits coastal sage scrub, sagebrush scrub, grasslands, and chaparral communities. Found in open, sandy areas in southwestern California and northern Baja California. Prefers moderately gravelly and rocky substrates.	None	Marginal quality grassland habitat is present within the study area; however, it is heavily and disturbed and is surrounded by urban/developed land cover.
Chaetodipus fallax pallidus pallid San Diego pocket mouse	None/None G5T3T4/S3S4 SSC	Occurs in desert and arid coastal border areas in eastern San Diego, Riverside, and San Bernardino Counties. Habitats include desert wash, desert scrub, desert succulent scrub, and pinyon-juniper. Prefers sandy soils, usually with rocks or coarse gravel.	None	No suitable habitat is present within the study area.
Dipodomys merriami parvus San Bernardino kangaroo rat	FE/SCE G5T1/S1 SSC	Alluvial scrub vegetation on sandy loam substrates characteristic of alluvial fans and flood plains. Needs early to intermediate seral stages.	None	No suitable habitat is present within the study area.
Dipodomys stephensi Stephens' kangaroo rat	FT/ST G2/S2	Found primarily in annual & perennial grasslands, but also occurs in coastal scrub & sagebrush with sparse canopy cover. Prefers buckwheat, chamise, brome grass & filaree. Will burrow into firm soil and use the burrows of California ground squirrels and pocket gophers. Occurs only in southern California.	None	Marginal quality grassland habitat is present within the study area; however, it is heavily and disturbed and is surrounded by urban/developed land cover.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Eumops perotis californicus western mastiff bat	None/None G4G5T4/S3S4 SSC	Occurs in open, semi-arid to arid habitats, including coniferous and deciduous woodlands, coastal scrub, grasslands, and chaparral. Roosts in crevices in cliff faces and caves, and buildings. Roosts typically occur high above ground.	Low	A small patch of marginal quality grassland habitat is present within the study area; however, this species is known to require extensive open areas of suitable habitat.
Lasiurus xanthinus western yellow bat	None/None G4G5/S3 SSC	Occurs in arid regions of the southwestern United States. Typically found in riparian woodlands, oak or pinyon-juniper woodland, desert wash, palm oasis habitats, and urban or suburban areas. Roosts in trees, often between palm fronds.	Low	Urban habitat and suitable roosting habitat are present in the trees within the study area; however, this species is typically found in its preferred habitat type of valley foothill riparian, desert riparian, desert wash, and palm oasis habitat. Additionally, this species is known to forage over water and among trees, which is generally lacking from the study area.
Neotoma lepida intermedia San Diego desert woodrat	None/None G5T3T4/S3S4 SSC	Occurs in scrub habitats of southern California from San Luis Obispo County to San Diego County.	None	No suitable habitat is present within the study area.
Nyctinomops femorosaccus pocketed free-tailed bat	None/None G5/S3 SSC	Variety of arid areas in Southern California; pine-juniper woodlands, desert scrub, palm oasis, desert wash, desert riparian, etc. Rocky areas with high cliffs.	None	No suitable habitat is present within the study area.
Nyctinomops macrotis big free-tailed bat	None/None G5/S3 SSC	Low-lying arid areas in Southern California. Need high cliffs or rocky outcrops for roosting sites. Feeds principally on large moths.	None	No suitable roosting habitat is present within the study area. An adequate supply of this species diet is not likely present in the study area.
Ovis canadensis nelsoni desert bighorn sheep	None/None G4T4/S3 FP	Widely distributed from the White Mtns in Mono Co. to the Chocolate Mts in Imperial Co. Open, rocky, steep areas with available water and herbaceous forage.	None	No suitable habitat is present within the study area.

Scientific Name Common Name	Status	Habitat Requirements	Potential to Occur in Study Area	Habitat Suitability/Observations
Perognathus longimembris brevinasus Los Angeles pocket mouse	None/None G5T2/S1S2 SSC	Lower elevation grasslands and coastal sage communities in and around the Los Angeles Basin. Open ground with fine, sandy soils. May not dig extensive burrows, hiding under weeds and dead leaves instead.	None	Marginal quality grassland habitat is present within the study area; however, it is heavily and disturbed and is surrounded by urban/developed land cover.

ft. = feet; meter = m.
Regional Vicinity refers to within a 9-quad search radius of site.

Status (Federal/State)
FE = Federal Endangered
FT = Federal Threatened
FPE = Federal Proposed Endangered
FPT = Federal Proposed Threatened
FD = Federal Delisted
FC = Federal Candidate
SE = State Endangered
ST = State Threatened
SCE = State Candidate Endangered
SCT = State Candidate Threatened
SR = State Rare
SD = State Delisted
SSC = CDFW Species of Special Concern
FP = CDFW Fully Protected
WL = CDFW Watch List

CRPR (CNPS California Rare Plant Rank)
1A = Presumed extirpated in California, and rare or extinct elsewhere
1B = Rare, Threatened, or Endangered in California and elsewhere
2A = Presumed extirpated in California, but common elsewhere
2B= Rare, Threatened, or Endangered in California, but more common elsewhere

CRPR Threat Code Extension
.1 = Seriously endangered in California (>80% of occurrences threatened/high degree and immediacy of threat)
.2 = Moderately threatened in California (20-80% of occurrences threatened/moderate degree and immediacy of threat)
.3 = Not very endangered in California (<20% of occurrences threatened/low degree and immediacy of threat)

Other Statuses
G1 or S1 Critically Imperiled Globally or Subnationally (state)
G2 or S2 Imperiled Globally or Subnationally (state)
G3 or S3 Vulnerable to extirpation or extinction Globally or Subnationally (state)
G4/5 or S4/5 Apparently secure, common and abundant
GH or SH Possibly Extirpated – missing; known from only historical occurrences but still some hope of rediscovery
LR Locally Rare (Santa Barbara Botanical Gardens 2018)

Additional notations may be provided as follows
T – Intraspecific Taxon (subspecies, varieties, and other designations below the level of species)
Q – Questionable taxonomy that may reduce conservation priority
? – Inexact numeric rank

Re: Cultural Resource Study Findings Memo for the 9th & Vineyard Development Project, City of Rancho Cucamonga, San Bernardino County, California

Dear Ms. Fidler,

This letter report documents the results of the cultural resource study conducted for the 9th & Vineyard Development Project (Project) by ASM Affiliates, Inc. (ASM). The study was completed in compliance with California Environmental Quality Act (CEQA) requirements. This document is part of an Initial Study to address the potential environmental impacts of the proposed project pursuant to the required provisions of CEQA, Public Resources Code Section 21000 *et seq*., and State CEQA Guidelines Section 15063.

The study included a records search at the South Central Coastal Information Center (SCCIC), a search of the Sacred Lands File of the California Native American Heritage Commission (NAHC), and a pedestrian survey of the Project site to determine the presence or absence of historical resources.

PROJECT DESCRIPTION AND LOCATION

The proposed project site is located south of 9th Street, directly west of Vineyard Avenue, directly north of the Burlington Northern Santa Fe (BNSF) Railway, and directly east of Baker Avenue in the City of Rancho Cucamonga, San Bernardino County, California. The Project is located near the southern border of the City of Rancho Cucamonga with the City of Ontario. The project site is approximately 47.07 acres (Assessor Parcel Numbers [APN] 0207-271-25, -27, -39, -40, -89, -93, -94, -96, and -97) and is shown on the USGS 7.5-minute Guasti, Calif. topographic quadrangle in an unsectioned area within Township 1 South, Range 7 West (Figure 1). It is located approximately 0.90 miles (mi.) south of Foothill Boulevard and approximately 2.3 mi. east of State Route 83.

The proposed project will involve the construction and operation of three warehouse buildings with ancillary office space and associated parking and landscaping on approximately 47.07 acres, consisting of a total of 1,037,467 square feet (sf). Vehicular access to the proposed Project would consist of six project driveways, one on 9th Street, two on Vineyard Avenue, and three on Baker Avenue. All entrances to the site would be unsignalized. Adjacent properties to the north are zoned for Industrial Park (IP), General Industrial (GI), Medium Density Residential (M), and General Commercial (GC) uses. Properties to the west are zoned Low Density Residential (L). The BNSF railway and properties zoned for Industrial uses are directly south of the site.

CULTURAL AND ENVIRONMENTAL SETTING

Natural Setting

The City of Rancho Cucamonga (City) is located approximately 40 mi. east of the City of Los Angeles, situated at the foothills of the San Gabriel Mountains. The Project site lies at the southern boundary of Rancho Cucamonga where it meets Ontario. The Project site is essentially flat, exhibiting a gentle slope from the northwest to the southeast, from approximately 1,150 ft. to 1,120 ft. above mean sea level. The topography and soils are reflective of the area's original geologic setting, which was an alluvial floodplain. The Project site is partially bordered to the east by Cucamonga Creek, a now concrete-lined stormwater drainage channel; Cucamonga Creek originates in the San Gabriel Mountains to the north of the site and flows roughly north to south into the Santa Ana River at the Prado Dam. The City is largely urbanized and surrounded by other developed cities; the area within which the Project lies is similarly highly urbanized.

Prehistoric Period

Archaeological investigations in San Bernardino County and elsewhere in southern California have documented a diverse range of prehistoric human occupations, extending from the terminal Pleistocene to the time of European contact (Chartkoff and Chartkoff 1984; Koerper and Drover 1983; Mason 1984; McKenna 1986; Wallace 1955; Warren 1968).

Paleoindian (pre-6000 B.C.)

Paleoindian assemblages include large stemmed projectile points, high proportions of formal lithic tools, bifacial lithic reduction strategies, and relatively small proportions of ground stone tools. These tools suggest a reliance on hunting rather than gathering. In general, hunting-related tools are more common during this period and are replaced by processing tools during the early Holocene (Basgall and Hall 1990).

Milling Stone Horizon (6000 B.C.-750 A.D.)

The Milling Stone Horizon is characterized by the presence of hand stones, milling stones, choppers, and scrapers. These tools are thought to be associated with seed gathering and processing and limited hunting activities. The artifacts from this period show a major shift in the exploitation of natural resources.

Late Prehistoric Horizon (A.D. 750-1750)

Like much of Southern California, this horizon in the general Project area is characterized by the presence of small projectile points associated with the use of bow and arrow. Steatite containers, asphaltum items, mortars and pestles, and bedrock mortars are also common artifacts.

Ethnohistoric Period

The area that is now Rancho Cucamonga/Ontario was occupied during the Late Prehistoric period by Native Americans commonly known as the Gabrielino (Bean and Shipek 1978; Bean and Smith 1978a; Kroeber 1925). This name was derived from their association with the San Gabriel Valley and the Mission San Gabriel de Archangel (Bean and Smith 1978a). The City itself is named after the Gabrielino village of Kukamo or Cucamonga (Kroeber 1925), which was located at the eastern extent of the tribe's territory. The name is thought to mean "sandy place" (CRM Tech 2007). The language of the group is derived from the Takic family, part of the Uto-Aztecan linguistic stock.

The Gabrielino established large, permanent villages in the fertile lowlands along rivers and streams and in sheltered areas along the coast. Seasonal migration was practiced across the area for both the exploitation of resources and based on seasonal weather conditions. Their territory encompassed the greater Los Angeles Basin, the coastal regions from Topanga Canyon in the north to perhaps as far south

as Aliso Creek, as well as San Clemente, San Nicholas, and Santa Catalina islands (Bean and Smith 1978a). Primarily hunters and gatherers, the Gabrielino used numerous styles of bows, bedrock mortars, portable mortars, pipes, chisels, metates, manos, and various forms of chipped stone tools.

The Mexican-American War ended on February 2, 1848, with the signing of the Treaty of Guadalupe Hidalgo, which established California as a United States possession and provided for the retention of private lands held by the conquered Mexicans. In 1851, the United States required that the courts approve all Hispanic land grants; however, many of the land grants were not approved and the division of many of the larger ranchos occurred. The effects of mission influence upon the local native populations were devastating. The reorganization of their culture alienated them from their traditional subsistence patterns and social customs. European diseases, against which the natives had no immunities, reached epidemic proportions and Gabrielino populations were decimated (Johnston 1962). By 1900, they had almost ceased to exist as a culturally identifiable group (Bean and Smith 1978a:540). Although most Gabrielino submitted to the Spanish and were incorporated into the mission system, some refused to give up their traditional lifeways and escaped into the interior regions of the State.

Other groups that inhabited lands near the Project site include the Luiseño and Serrano. All of these groups spoke a variation of the Takic language subfamily part of the Uto-Aztecan language family. Luiseño lifeways were very similar to those of the Gabrielino. At the time of the first contacts with the Spanish in the sixteenth century, the Luiseño inhabited areas to the west of the Gabrielino, including the coastal area of southern California, ranging approximately 50 miles from the southern part of Los Angeles County to the northern part of San Diego County, and inland about 30 miles (Bean and Shipek 1978). The people are called “Luiseño” due to their proximity to the Mission San Luis Rey de Francia.

Serrano territory encompassed the area east of the Gabrielino, generally across the San Bernardino Mountains (Kroeber 1925). However, the boundaries of their territory are not as reliably defined due to a lack of historical records and a more mobile settlement pattern than the Gabrielino. The territory roughly encompassed the base of the San Bernardino Mountains from the Cajon Pass, north to present-day Victorville, east to Twentynine Palms, and south to the Yucaipa Valley (Bean and Smith 1978b). The name “Serrano” derived from the Spanish word for highland or mountain and is used to refer to the linguistic group in the Takic family (Bean and Smith 1978b). The Serrano people can be further divided into the Kitanemuk, who lived around Tejon and Paso creeks, the Alliklik within the vicinity of the Santa Clara River, and the Vanyume along the Mohave River (Kroeber 1925).

The Serrano were organized loosely into exogamous clans; however, their social structure is not well known. Each clan had a hereditary leader called a kika and a hereditary assistant chief that had ceremonial functions called a paha’ (Kroeber 1925). Other spiritual leaders also had positions of power in the clan.

Serrano subsistence practices was largely based around gathering, hunting, and fishing. Depending on the environment, common food stables included acorns, piñon nuts, honey, mesquite, yucca, cactus, and chia seeds. Deer, mountain sheep, antelope, rabbits, other small rodents, and birds were also commonly hunted. Like the Gabrielino, bows and arrows were used to hunt for large game and curved throwing sticks, traps, snares, and deadfalls were used for smaller game (Bean and Smith 1978b).

Due to a lack of reliable year-round water sources, the Serrano lived in smaller villages than was common in the Gabrielino territory. They also largely lived in circular houses with a thatched roof; however, many of their daily activities took place within ramadas, which provided shade and blocked the wind. The house was primarily used for sleeping and storage only. The Serrano made tools from shell, wood, bone, stone, pottery, and plant fibers.

Historical Period

Portions of this historical context section are excerpted and adapted from the *Historic Context Statement for the City of Rancho Cucamonga, California* prepared by Chattel Architecture, Planning & Preservation, Inc. (Chattel 2010).

Spanish explorer Juan Rodríguez Cabrillo first discovered California in 1542, claiming it for the King of Spain. However, Spanish contact within the vicinity of the Project did not take place until the 1770s when Father Garces traveled across the Mojave Desert and entered coastal southern California through the Cajon Pass (Walker 1986).

Early Settlement (1811-1876)

For most of the Spanish-Mexican period, the San Gabriel and San Bernardino valleys, including the Rancho Cucamonga area, were considered part of the outlying land holdings of Mission San Gabriel de Archangel, which was was established in 1771.

The name "Cucamonga," a Shoshone word for "sandy place," first appeared in a written record of the San Gabriel Mission dated 1811 (Chattel 2010). After Mexico gained independence from Spain in 1821, the new authorities in Alta California began to dismantle the mission system in 1834 through the process of secularization. In the 1830s and 1840s, during secularization of the mission system, the Mexican authorities in Alta California made a number of large land grants on former mission properties in the valley. The 13,000-acre Rancho Cucamonga was granted to Los Angeles City Council president and businessman Tiburcio Tapia in 1839 (CRM Tech 2007). Tapia built his home on the top of the prominent Red Hill, planted some of Rancho Cucamonga's first vineyards, and built a small winery. The winery was enlarged and re-established as the Thomas Winery in 1933, and again as the Filippi Vineyards winery in 1967 (Clucas 1979:70). Portions of the historic winery buildings, located at the northeast corner of Foothill Boulevard and Vineyard Avenue, are currently being reused for commercial purposes (Chattel 2010).

When Tapia died in 1845, his daughter, Maria Merced Tapia de Prudhomme, became the sole heir of the Rancho Cucamonga. Maria Merced's husband, Leon Victor Prudhomme, assumed control of the rancho and eventually sold it to John Rains in 1858. Rains significantly expanded the vineyards, planting 125,000 to 150,000 vines. He was found murdered in 1862, and his widow, Dona Maria Merced Williams de Rains, inherited the ranch property. She encountered financial problems, and the property fell into foreclosure, ultimately marking the close of the rancho way of life in the Cucamonga region.

Acquisition of Land and Water (1877-1946)

The U.S. annexation of Alta California in 1848 brought more and more Euro-American immigrants into the area. Development of the town of Cucamonga began in the late 1870s and 1880s as a direct result of acquisition and distribution of land and water and the availability of rail transit through the region. Following Native American occupation of the Cucamonga Valley, the earliest documented use of local water sources was by Tiburcio Tapia at his winery, utilizing water from Cucamonga Creek, around the year 1839.

In the 1880s, the presence of both the Southern Pacific and Santa Fe railroads helped to promote a land boom throughout much of southern California. Also by the 1880s, large-scale efforts to distribute a reliable supply of water to Rancho Cucamonga lands were underway. Several individuals were particularly instrumental in bringing water to Rancho Cucamonga, including Isaias Hellman, largely responsible for bringing water to Cucamonga in 1887, Adolph Petsch, involved in early acquisition of land and distribution of water throughout Alta Loma beginning in 1881, and George and William Chaffey (Chaffey Brothers), who implemented an innovative irrigation system in Etiwanda in the early 1880s.

In 1870, Jewish immigrant Isaias Hellman, a prominent Los Angeles businessman and one of the original founders of the Farmers and Merchants Bank in downtown Los Angeles, along with several of his associates, came into ownership of the Rancho Cucamonga at a cost of approximately $50,000. The group immediately sold a small amount of the land, turning a quick profit, and kept the remaining 8,000 acres. Under a newly formed partnership called Cucamonga Company, Hellman and his associates subdivided the acreage and oversaw restoration of the local vineyards and winery, later to become the site of the Thomas Winery (Hofer 1983:53-54). As a result, the Cucamonga Valley was declared "the biggest winemaking estate in California" (Dinkelspiel 2008:102). To bring water to Cucamonga lands, Hellman and his associates oversaw a dramatic effort to tunnel horizontally into Cucamonga Canyon in the San Gabriel Mountains to the north to access water from natural mountain springs. Local Chinese immigrants served as the majority of the labor force for this project. Water was delivered to Cucamonga in 1887, and land in the area began to sell quickly (Clucas 1979:61). In 1895, the Cucamonga Company became the Cucamonga Vineyard Company, incorporated and controlled solely by Hellman, who continued to manage vineyard and winemaking operations.

In 1881, as a phenomenal land boom swept through southern California, George Chaffey, a Canadian-born engineer, created the agricultural colony of Etiwanda in what is now the eastern portion of the City of Rancho Cucamonga. It was in the development of Etiwanda that Chaffey first put into practice his influential concept of a "mutual water company," with equitable water rights affixed to each parcel of land. Between 1881 and 1883, two other colonies, Hermosa and the Iowa Tract, were established in the western portion of the city. In 1887, the two colonies merged under the name of Ioamosa, which was changed to Alta Loma in 1913.

Because of its favorable climate, the western San Bernardino Valley became known for the cultivation of citrus fruits, olives, and grapes. The vineyards and the wineries, in particular, figured prominently in the region's social and economic identity. During World War II, the Kaiser Steel Mill was established in the neighboring town of Fontana, which brought about significant changes in the region's agrarian landscape. In more recent decades, residential and commercial development has been the driving force behind the rapid urban expansion of the western San Bernardino Valley and the conversion of agricultural land. In 1977, the formerly separate towns of Etiwanda, Cucamonga, and Alta Lorna united to incorporate as the City of Rancho Cucamonga.

Railroad Development and the Agriculture Industry (1887-1970)

Construction of railroads through the Cucamonga Valley triggered tremendous growth of the local agriculture industry, mushrooming land sales, and subsequent development of the towns of Cucamonga (including the North Town neighborhood), Alta Loma, and Etiwanda. Similar to other Southern California boomtowns, construction of railroads through the region enabled both people and goods to move in and out of Rancho Cucamonga at unprecedented speed, which dramatically increased development. From the early 1900s to the 1950s, the northern portion of the City's landscape consisted mainly of citrus orchards, while the southern portion was dominated by vineyards.

The Town of Cucamonga first became a boomtown in anticipation of the arrival of the Santa Fe Railway, completed through the region in 1887 (Brodsly 1981:67-68). The availability of rail transit created a strong demand for land in Cucamonga and a dramatic increase in prices. The Cucamonga Fruit Land Company rapidly realized high profit margins, selling parcels that in 1886 had been $70 per acre for $150 to $250 dollars per acre just one year later in 1887 (Clucas 1979:60). The local agriculture industry flourished during this time, with a wide range of crops, including grapes, citrus, apricots, pears, peaches, olives, figs, walnuts, chestnuts, almonds, hay grain, and potatoes (Clucas 1979:63).

Cucamonga developed in the 1880s as an agricultural community with a small commercial core on Archibald Avenue, connecting the center of Cucamonga to the Santa Fe Railway and community of North

Town to the south. Early residential development was centered on Estacia Court, the nearby portion of Foothill Boulevard. Available records indicate that the Klusman Brothers (John, George, and Henry) developed the majority of these residences from the early 1910s through the 1930s. Each brother also made significant contributions to local development citywide (Clucas 1979:108).

As early as 1887, San Bernardino Road served as an important link between Cucamonga and the neighboring community of Ontario to the west. Important community buildings, including a post office, school, a rooming house for migrant workers, and a hotel, were located on San Bernardino Road between Vineyard and Archibald Avenues. A group of homes housing Chinese immigrant workers, known locally as "Chinatown," was located at the southwest corner of San Bernardino Road and present-day Klusman Avenue in the late 1880s.

The San Bernardino Line of the Pacific Electric Railway "Red Cars," with stations in Claremont, Upland, Alta Loma, Etiwanda, Fontana, and Rialto, was the Pacific Electric's longest line, and was completed through Rancho Cucamonga via stations at Alta Loma and Etiwanda in July 1914, offering competition to the older Santa Fe Railway to the south.

Postwar Development (1945-1977)

Following World War II, Rancho Cucamonga's landscape rapidly shifted from rural to suburban, reflecting the nation-wide trend. Driven by rapid highway construction, increasing automobile ownership, availability of modern building technologies, and the Baby Boom, the postwar period brought about an increase in housing demand and rising land values, spawning development of tract housing and light industry in Rancho Cucamonga on land previously used for agriculture (Ames and McClelland 2002:25). After World War II and prior to incorporation in 1977, the City experienced uncontrolled growth. It ultimately became a sprawling suburb, with tract housing, neighborhood-scale shopping centers, office parks, and surface parking proliferating throughout the City, aiming to meet the needs of nearby residents and to accommodate automobiles. Underscoring the dramatic increase in local development taking place, in 1979, prominent local development company Lewis Homes (founded 1955), announced sales of 533 single-family houses in the first nine months of the year, not including sales of commercial and multi-family developments (Los Angeles Times 1979).

Although large-scale tract housing did not take place in Rancho Cucamonga until the 1950s, development of housing tracts on local agricultural lands was sparked as early as 1942, when Kaiser Steel Mill began operations in nearby Fontana. Initially producing steel to aid the war effort, Kaiser Steel Mill was the ninth-largest steel production facility in the country by the late 1950s, employing 7,700 workers at its peak (Wagner 2005:111). This new industry helped propel regional growth, necessitating an increase in local housing stock for Steel Mill workers. Farmers received pressure to sell agricultural land from realtors who wanted to develop it for much needed Steel Mill worker housing. Kaiser Community Homes, one of the many successful enterprises started by Henry J. Kaiser, developed many postwar housing tracts in the Inland Empire and nationwide. In 1946, Henry Kaiser announced that his company would build more than 10,000 low-cost homes throughout the nation for Kaiser workers, beginning in Southern California (Foster 1989).

Another important driver of postwar suburbanization in Rancho Cucamonga were increasing employment and transportation options offered by expansion of the nearby Ontario International Airport (originally Ontario Airport). In 1942, the federal government allocated Works Progress Administration funding to improve the existing dirt runway at the Ontario Airport to create two paved runways for Army and Army Air Corps operations. At the close of the war in 1945, airport operations lessened for a time, although the airport became Ontario International Airport in 1946. In 1949, airlines began offering regular passenger service into and out of the airport. Beginning in 1951, military operations at the airport resumed, using the

airport for California Air National Guard operations for the Korean War. Various airport improvements and runway extensions took place through 1962.

Cucamonga Valley Wine History

Although the first exploration into viticulture began as early as 1839 with Tiburcio Tapia, real expansion of wine production in the Cucamonga Valley is credited to Secundo Guasti, who established one of the first large-scale wine production companies in the region and in California in 1883 (Chattel 2010). By 1917, the Guasti Italian Vineyard Company (IVC) owned approximately 5,000 contiguous acres of land in the Cucamonga Valley and was in operation well into the 1950s (Cal Poly Pomona 2012; Chattel 2010; Filippi 2007; Hartig 2002). The unincorporated community of Guasti, located approximately 1 mi. southeast of the Project, is where the Guasti IVC headquarters were located as early as 1913, according to Sanborn maps (Sanborn 1913, 1929). Today the community of Guasti is named after Secundo Guasti and the original headquarters remain extant.

In 1919, the U.S. government passed the National Prohibition Act, which prohibited the production, sale, and transport of alcoholic beverages nationwide, and resulted in a 14-year period called, "Prohibition." However, the law did allow for families to produce up to 200 gallons of alcohol at their homes. This loophole in the regulation spurned the growth of family-owned vineyards in Cucamonga Valley which was occupied by 16,000 acres of vineyards by the time (Chattel 2010; Hartig 2002; Filippi 2007). In 1927, an Italian immigrant named Domenico Galleano and his wife Lucia purchased the 160-acre Cantu Ranch located in Wineville (now Mira Loma), located approximately 7 mi. south of the Project. During Prohibition, the Galleano family made money by selling their wine grapes to families for wine production. They opened their winery in 1933, following the end of Prohibition (Galleano Winery 2017; Hartig 2002).

Following Prohibition, the valley began to thrive once more with the open production and distribution of wine. In 1934, the Cucamonga Pioneer Vineyard Association (CPVA) was founded as a co-operative of small family-owned vineyards. The CPVA winery was located on the east side of Haven Avenue north of the Southern Pacific Railroad (now Metrolink). They owned 4,000 acres of vineyards in the valley (Chattel 2010; Hartig 2002). In the 1940s, at the height of the wine industry in the Cucamonga Valley, there were approximately 60 independently owned wineries and more than 45,000 acres of vineyards in the area (Chattel 2010; Filippi 2007; Hartig 2002).

In the 1950s and 1960s, several factors led to the decline of the viticultural industry in Cucamonga Valley. One was the changing palate of the American people; demand for drier wines boosted the wine production in Napa Valley in northern California as opposed to the sweet wines made in the Cucamonga Valley (Chattel 2010; Filippi 2007). Encroaching sprawl from the greater Los Angeles area made it more profitable for farmers to sell land to developers rather than continue to farm (Chattel 2010; Filippi 2007; Hartig 2002). By 1950, the valley had 20 wineries. Today, only four wineries remain: Biane, Filippi, Galleano, and Hofer (Chattel 2010; Filippi 2007; Hartig 2002).

The City of Rancho Cucamonga was incorporated in 1977, consolidating the three towns of Cucamonga, Alta Loma, and Etiwanda into one municipality. Although the local agriculture industry has changed over time due to a variety of factors, including technological advancement and transportation improvements, agriculture remains a recognizable, although fading, feature of Rancho Cucamonga's physical landscape (Chattel 2010).

STUDY METHODS

Methods used to assess the presence of and potential for cultural resources within the property included a search of existing records and a pedestrian field survey. The records search was conducted by the SCCIC and included the Project site and a radius of 1 mi. around it. In addition, historical aerial photographs and USGS topographic maps were consulted from historicaerials.com.

The field survey was conducted by ASM Senior Archaeologist Sherri Andrews and ASM Architectural Historian Marilyn Novell on August 1, 2019. Field methods consisted of a pedestrian survey of the proposed Project site using transects spaced at 15-m intervals.

STUDY RESULTS

Records Search Results

The records search at the SCCIC identified 48 previous cultural resource studies that had been conducted within a 1-mi. radius (Table 1). Four of the studies, SB-06814, SB-07483, SB-08119, and SB-08120, have encompassed small areas within the Project site while one study, SB-04160, was conducted directly adjacent to the north-central edge of the area, encompassing the area currently occupied by a recently developed office park.

SB-06814: This project encompassed the area of a proposed cell tower at 8830 Vineyard Avenue. No prehistoric or historical resources were encountered.

SB-07483: This project included archaeological survey and evaluation of two residential properties within an approximately 1.25-acre area at 8705 and 8715 E. 9th Street, at the north edge of the Project. The report concluded that the project area has a low sensitivity for prehistoric archaeological resources and a moderate sensitivity for historical-period resources. The structures at the site were recommended not to be considered as historical resources for the purposes of CEQA; the structures have since been demolished.

SB-08119: This project included evaluation of two residential properties at 8803 and 8817 Baker Avenue, at the west edge of the Project; no archaeological survey was undertaken. The residence at 8817 Baker has been demolished; the structure at 8803 Baker will be preserved in place.

SB-08120: This project included evaluation of three historical-period buildings at 8810 Vineyard Avenue, at the east edge of the Project; no archaeological survey was undertaken. The structures at 8810 Vineyard have since been demolished.

A total of 46 cultural resources have been previously recorded within the 1-mi. records search radius (Table 2). All but two are from the historical period, primarily consisting of various buildings and structures and including the Union Pacific railroad or railroad-related features, individual single-family homes, refuse scatters, and historic districts. The two prehistoric sites were documented approximately 0.75 mi. north of the Project site. A single extant resource remains within the Project, the house at 8803 Baker Avenue. This resource has been found to be significant and is expected to remain in situ and be integrated into Project design.

Historical Imagery

Historical aerials from 1938, 1948, 1959, 1966, 1978, 1980, 1994, 2002, 2005, 2009, 2010, 2012, and 2014 were analyzed on historicaerials.com, as were historical topographic maps dated 1897, 1900, 1903, 1906, 1908, 1911, 1912, 1917, 1927, 1929, 1932, 1939, 1947, 1955, 1961, 1962, 1963, 1965, 1969, 1973, 1975, 1982, 2012, and 2015.

No structures or land use is depicted on any of the topos from 1897 through 1947, while an intermittent waterway is present in the northeastern corner of the parcel. The 1955 topo shows much of the parcel in use as an orchard, with modern street configurations and a number of structures present along the western (Baker Avenue) and northern (9th Street) edges; the waterway at the northeastern corner appears to have been channelized and a rail line runs along the south edge. The configuration on the maps appears essentially consistent through 1965. The 1959 aerial and 1969 topo no longer show orchards throughout the parcel, and towers for radio station KASK appear in the north-central portion of the Project and a long, thin building oriented east/west appears at the eastern edge. By 1975, the large, square structure in the south-central portion of the Project appears, and land use remains largely consistent to present.

NAHC Sacred Lands File Search

On June 19, 2019, ASM sent a request to the NAHC to search their Sacred Lands File (SLF) to determine whether their files contained any information relating to the presence of Native American cultural resources within the Project site. Response from the NAHC was received on July 12, 2019, indicating that no such resources were found as a result of the SLF search. However, the absence of specific site information in the SLF does not indicate the absence of Native American cultural resources within the Project site. An earlier SLF search for this same general Project area resulted in a list of 10 tribal contacts who may have interest in the area. Query letters were sent to each of the contacts on the list. The NAHC response and contact list, sample query letter, and any responses received to date (if not containing information deemed confidential) are provided with this report as Attachment A.

Pedestrian Survey Results

The Project site comprises both vacant and improved lots (Figures 2-6). The radio station building and antennas are still in place. The structure at the eastern edge of the Project still appears to be in use as some sort of manufacturing facility, while the structure at the southern edge is abandoned. The historical structure on the western edge is also currently abandoned. Some debris remains in the areas where structures have been recently demolished. The open areas between these improved lots are generally moderately to heavily vegetated and all have been heavily modified by prior land usage in the area. There are a number of fences, berms, holes, ruts, and formal and informal roads and trails found throughout the parcels. The eastern area has been used for residential dumping with some modern refuse scattered throughout all of the parcels. There is also evidence of some transient occupation.

Pedestrian survey was conducted of all accessible portions of the Project site; i.e., where ground surface was visible. Where vegetation was heavier, particular attention was paid to berms, rodent holes, and other areas of visible disturbance where subsurface soils might be exposed. No evidence of either prehistoric or historical archaeological materials were observed during the survey.

CONCLUSIONS AND RECOMMENDATIONS

The results of the records search, assessment of historical imagery, and the pedestrian survey indicate a low archaeological sensitivity for the Project site. Historical aerial photographs and topographic maps indicate that development of the Project site did not begin until the mid-1950s, and the entire area has undergone extensive surface modification over time.

No archaeological resources were identified within the Project that would require further consideration under CEQA, and no additional archaeological work is recommended. However, should any unanticipated archaeological materials be revealed during ground-disturbing activities, work at that location should be brought to a halt until a qualified archaeologist can assess its potential significance.

Should you have any questions regarding this study, please do not hesitate to contact me.

Respectfully submitted,

Sherri Andrews, M.A., RPA
Senior Archaeologist

Subject: Archaeological Resource Validation Memorandum for the 9th and Vineyard Development Project, City of Rancho Cucamonga, San Bernardino County, California

Dear Mr. Sizemore:

At the request of Panattoni Development Company, Inc. (Panattoni), Duke Cultural Resources Management, LLC (DUKE CRM) has reviewed the cultural resources report previously prepared for the 9th and Vineyard Development Project (Project), located in the City of Rancho Cucamonga, San Bernardino County, California. This study is being conducted as part of compliance with the National Historic Preservation Act (NHPA or Section 106). The purpose of this letter is to document our review of the prior cultural resources study[1] as it pertains to archaeology. The historic built environment component is being updated by Kathryn McGee, Architectural Historian. The previous cultural resources study was prepared for the purposes of compliance with the California Environmental Quality Act (CEQA). Additionally, DUKE CRM conducted a field survey of off-site improvements on the property located southeast of the Project. These off-site improvements are associated with a proposed storm drain and culvert. See Attachment 1 for Project maps.

DUKE CRM reviewed the letter report and records search from 2019 and we compared the current Project design plans to previous design plans. ASM conducted a records search at the South Central Coastal Information Center (SCCIC), located at California State University, Fullerton. There were no archaeological sites recorded within ¾ mile of the Project. Additionally, the previous field survey did not discover any archaeological resources within the Project. ASM contacted the Native American Heritage Commission (NAHC); there were no Native American sites within their Sacred Lands File (SLF). ASM contact 10 Native American groups on the NAHC list. Two groups responded: the San Manuel Band of Mission Indians (San Manuel) and the Gabrieleno Band of Mission Indians- Kizh Nation. San Manuel indicated that the area is sensitive for cultural resources due to the location of the Project along Cucamonga Creek and near prehistoric sites. ASM concluded that the Project has a low archaeological sensitivity due largely to the high level of prior ground disturbance. No additional efforts related to archaeology were recommended.

The only substantive changes to the Project design since the 2019 cultural resources study by ASM is the addition of a culvert and storm drain outside of the Project to the southeast. These features are located east of Vineyard Avenue, north of the Burlington, Northern, and Santa Fe (BNSF) Railroad, and west of the Cucamonga Creek Channel on the south side of a parcel, immediately north of the BNSF Railroad. DUKE CRM Principal Archaeologist, Curt Duke and field technician,

[1] Andrews, Sherri. 2019. *Cultural Resource Study Findings Memo for the 9th & Vineyard Development Project, City of Rancho Cucamonga, San Bernardino County, California*. Prepared by ASM Affiliates, Inc.

Zachary Duke conducted a field survey of this approximately 3-acre parcel on May 7, 2020. No archaeological resources were discovered during the field survey. Survey transect were spaced approximately 15 meters apart. Ground visibility was approximately 75 percent. There are dead grasses in the soil, chunks of concrete, and other modern debris. The ground throughout the parcel is high disturbed. There are construction vehicle tracks on the surface of the parcel. The soil is a tannish brown, silty loam. There is imported and natural gravel, as well as cobbles present on the site. There is an existing buried sewer line on the south side of the parcel running east-west north of the BNSF Railroad. This is the approximate location of the proposed culvert and storm drain. Project photographs are included in Attachment 2

DUKE CRM reviewed the previous cultural resources report prepared for CEQA compliance for the Project. We recommend that the report is adequate for the purposes of Section 106/NHPA compliance and that there is a low potential for impacts to archaeological resources. Additionally, our field survey of the off-site improvement area southeast of the Project did not identify any archaeological resources and found the earth in a similar disturbed manner to the prior study. Therefore, we recommend that this area has a low potential for archaeological resources, as well.

Thank you for contacting DUKE C R M on this request. If you have any questions or comments, you can contact me at (949) 356-6660 or by e-mail at curt@dukecrm.com.

Sincerely,

DUKE CULTURAL RESOURCES MANAGEMENT, LLC

I. INTRODUCTION AND EXECUTIVE SUMMARY

This historic resource assessment evaluates the parcel located at 8803 Baker Avenue in Rancho Cucamonga, California (Assessor Parcel Number 0207-271-40, hereinafter referred to in this report as "subject property"). The subject property contains one residential building constructed in 1952-1953. The current property owner is planning a project involving redevelopment of a larger area of land encompassing multiple parcels and including the subject property. An historic resource assessment is needed in order to determine if historical resources are present for purposes of California Environmental Quality Act (CEQA) and local project review.

The subject property has been previously evaluated for potential significance. It was nominated as a City of Rancho Cucamonga Historic Landmark in 2014, found eligible as a local landmark for potential association with local builder Konstanty "Steve" Stys (1894-1961) who is known to be an important person in local history, and as a good example of Folk Architecture constructed with unique materials.[1] The request for designation was withdrawn and the designation did not move forward. The subject property was evaluated a year later in an Historic Building Evaluation report prepared by CRM Tech, dated May 19, 2015.[2] That report included evaluation of both the subject property and 8817 Baker Avenue, which has since been demolished, and found both properties ineligible as historical resources under CEQA. However, a peer review of the CRM Tech report, prepared by LSA Associates, Inc., dated August 5, 2015, disagreed with the CRM Tech findings and asserted eligibility of 8803 Baker Avenue for local designation for potential association with Stys, and as a good example of Folk Architecture using salvaged building materials.[3]

This report provides a comprehensive evaluation, finding the property significant as an important and rare example of local Folk Architecture and for its method of construction using salvaged local materials, likely implemented with the assistance of noted local builder, Konstanty Stys. An historic context for Folk Architecture of the mid-twentieth century is included and focuses on the significance of the Pomona Valley as an important breeding ground for construction of vernacular buildings using salvaged local materials. Extant and intact examples of Folk Architecture in the area are rare. Extensive research was done to ascertain whether or not the building was constructed in association with Konstanty Stys. While anecdotal evidence suggests Stys was most likely involved, there is no written record of his participation; thus, a definitive link could not be confirmed.

Based on the above information, the subject property meets local eligibility criteria for listing as a City of Rancho Cucamonga Historic Landmark and for listing in the California Register of Historical Resources (California Register). Due to alterations, especially the loss of all original window sash, the subject property may not retain sufficient integrity for listing in the or National Register of Historic Places (National Register). It does not appear to be part of any historic district. Because it appears eligible for listing in the California Register as well as for local designation, it is an historical resource for purposes of CEQA and local project review.

This report was initially prepared on April 26, 2019 and revised on June 23, 2021.

II. CONSULTANT QUALIFICATIONS

This report was prepared by Kathryn McGee with peer review by Jenna Snow. Ms. McGee visited and photographed the subject property on March 29, 2019.

Kathryn McGee
Ms. McGee is an architectural historian and historic preservation planner based in Los Angeles. With over twelve years of experience, she meets the Secretary of the Interior's Professional Qualification Standards in Architectural History. Ms. McGee was previously employed as a Senior Associate at historic preservation consulting firm Chattel, Inc. where she worked on the City of Rancho Cucamonga 2010 General Plan Update, managing preparation of the historic context statement and historic resource survey. She launched an independent historic preservation consulting practice in 2015. Her educational background includes a Bachelor of Arts degree in architectural history from the University of California, Santa Barbara and a Master of Urban and Regional Planning degree from the University of California, Irvine. She has also completed the Summer Program in Historic Preservation at the University of Southern California and is a LEED Accredited Professional with specialty in Neighborhood Development. Her consulting work entails writing reports for purposes of environmental and local project review; preparation of historic resource assessments and surveys; preparation of technical reports for General Plan Updates; evaluation of properties seeking or complying with Mills Act Contracts; and consultation on adaptive reuse and federal Investment Tax Credit projects.

Jenna Snow
In January 2015, Jenna Snow launched an independent historic preservation consulting practice office in Los Angeles. With over seventeen years of professional experience, Ms. Snow has a strong and broad understanding of best historic preservation practice, including federal, state, and local regulations. She has worked on a wide range of projects on both the east and west coasts, as well as internationally. Ms. Snow holds a M.S. in Historic Preservation from Columbia University and a B.A. in Fine Arts focusing on architectural history from Brandeis University. She meets the Secretary of the Interior's Professional Qualifications Standards in Architectural History. Throughout her career, Ms. Snow has authored, co-authored, and/or served as project manager for nearly 100 historic preservation projects, including a wide variety of historic resource assessments, National Register nominations, and historic resources surveys. She regularly contributes to environmental impact reports, historic preservation certification applications, Section 106 reviews and other work associated with historic building rehabilitation and preservation planning. Ms. Snow has prepared multiple National Register nominations, including the Twohy Building in San José, CA; the Beverly Hills Women's Club in Beverly Hills, CA; the Sam and Alfreda Maloof Compound in Rancho Cucamonga, CA; the Boyle Hotel/Cummings Block in Los Angeles, CA; the West Los Angeles Veterans Affairs Historic District in Los Angeles, CA, and Temple Ohave Israel in Brownsville, PA. She has completed historic resources surveys, including coauthoring historic context statements in Hollywood, Whittier, CA, and South Los Angeles. Prior to her consulting work, Ms. Snow worked for the New York City Department of Design and Construction in New York, NY, the Freedom Trail Foundation in Boston, MA, and the Neighborhood Preservation Center in New York, NY.

III. METHODOLOGY

Project methodology involved a site visit and research as described here:

Site Visit: Kathryn McGee, a Secretary of the Interior-qualified Architectural Historian, visited and extensively photographed both the exterior and interior of the building at the subject property on March 29, 2019. After walking the entirety of the property, she was given access to the interior by Michael Sizemore of Panattoni Development Company. Electricity to the property was turned off and windows were boarded at the time; the interior was dark with limited visibility. Photographs are included in Attachment C.

Aerial Photographs: Historic aerial photographs were obtained through an online database of the University of California, Santa Barbara and are included in Attachment B. Oblique historic aerials may also be available through the University of California, Los Angeles Air Photo Archive, but that archive was not open for research while this report was prepared. This is a recommended area for future research.

Building Permits: The original building permit documenting construction of the existing house in 1952-1953 is not available. Other historic building permits are available through the City of Rancho Cucamonga Building and Safety Services Department. Relevant data is referenced in this report. A table of available permit data is included in Appendix A.

Historic Property Data File: The California State Office of Historic Preservation (OHP) keeps statewide records on historic properties. Records for Rancho Cucamonga are indexed in the San Bernardino County Historic Property Data File (HPDF), but there are no entries for the subject property.[6] The property was previously evaluated in 2014 and 2015, as discussed below.

Interviews: Phone interviews were conducted with descendants of the original owners of the subject property, with Shirley Carwell (daughter of James and Jennie Carwell) and James Goody (grandson of James and Jennie Carwell), providing important information linking James Carwell to Konstanty Stys, which is discussed in this report. Shirley Carwell and James Goody stated they have historic photographs showing the property when it was first built and James Carwell in the act of construction, and will provide copies in the near future, though copies were not obtained in time for completion of this report.

Online Databases: Online databases were searched for information pertaining to the history of the subject property, including United States Federal Census, voter and death indexes, and city directory records available on *Ancestry.com,* as well as newspaper articles available on *Newspapers.com*. Relevant information is referenced in this report.

Ontario City Library, Robert E. Ellingwood Model Colony History Room: The Ontario City Library has an extensive archive of books and documents on local history, including historic city directories, and was searched for information pertaining to the history of the subject property. Relevant information is referenced in this report.

Prior Evaluations: The 2014 City staff report for historic landmark designation; 2015 evaluation prepared by CRM Tech; and 2015 peer review by LSA Associates, Inc., were reviewed and are

[6] California Office of Historic Preservation, *Directory of Properties in the Historic Property Data File, San Bernardino County,* December 3, 2007.

referenced in this report. The 2014 staff report includes photographs showing features that have since been demolished, and is included in Attachment D.

San Bernardino County Historical Archives: The San Bernardino County Historical Archives were searched for historic assessor lot and parcel books, which are available from 1895 through the early 1950s. Relevant data is referenced in this report.

Sanborn Maps: There is no Sanborn map coverage available for the subject property.

IV. REGULATORY SETTING

City of Rancho Cucamonga

The City of Rancho Cucamonga Historic Preservation Ordinance (Ordinance No. 848) was adopted by City Council in 2011 and allows the City Council to designate Historic Landmarks, Points of Historic Interest, and Historic Districts as described below.[7]

Designation Criteria for Historic Landmarks

A. The [City] Council may designate a property as a Historic Landmark if it meets the requirements of both paragraphs B and C of this Section.
B. Historic Landmarks must meet at least one of the following:
    1. It is or was once associated with events that have made significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.
    2. It is or was once associated with persons important to local, California, or national history.
    3. It embodies the distinctive characteristic of a type, period, or method of construction.
    4. It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.
    5. It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.
C. Historic Landmarks must retain integrity from their period of significance with respect to its location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its depilated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to particular characteristics that support the property's eligibility.

Designation Criteria for Points of Historic Interest

A. The Council may designate a property as a Point of Historic Interest, if it meets the requirements applicable to Historic Landmarks under paragraph B of Section 2.24.050. Points of Historic Interest shall not be required to retain integrity from their periods of significance.
B. Designated Points of Historic Interest shall not be subject to the same restrictions applicable to designated Historic Landmarks and Contributing Resources.
C. Nothing in this Section shall be construed as limiting or foreclosing analysis of the impacts of a proposed project on a Point of Historic Interest under the California Environmental Quality Act.
D. The Commission shall maintain a current register of Points of Historic Interest for public use and information.

Designation Criteria for Historic Districts and Conservation Districts

A. The Council may designate a property or collection of properties as a Historic District if the proposed district meets the requirements of both paragraphs B and C of this paragraph

[7] City of Rancho Cucamonga Ordinance No. 848, adopted July 6, 2011, *https://www.cityofrc.us/civicax/filebank/blobdload.aspx?BlobID=8222*, accessed April 21, 2019.

Section.

B. Historic Districts must meet at least one of the following criteria:
    1. It has an identifiable, clear, and distinct boundary that possesses a significant concentration of structures sharing common historical, visual, aesthetical, cultural, archaeological, or architectural plan or physical development; or
    2. It demonstrates character, interest, or value as part of the development, heritage, or cultural characteristics of the community, state, or country; or
    3. It is the site of a significant local, state, or national event; or
    4. It is associated with the lives of persons important to local, state or national history; or
    5. It is identifiable as the work of a master builder, designer, architect, artist or landscape architect whose individual work has influenced the development of the community, county, state, or country.
C. Historic Districts must retain integrity from their period of significance with respect to its location, design, setting, materials, workmanship, feeling, and association. Not all properties or structures in a proposed district need to retain all such original aspects, but a substantial number of such properties and structures must retain sufficient integrity to convey the historic, cultural, or architectural significance of the district. Neither deferred maintenance within a proposed district nor the dilapidated condition of its constituent buildings and landscapes shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to the particular characteristics that support the district's eligibility.
D. Conservation Districts: The Council may designate a property or collection of properties that do not qualify as a Historic District as a Conservation District if the proposed district has either:
    1. A distinctive, cohesive, and identifiable setting, character, or association that make it unique and an integral part of the City's identify; or
    2. A recognized neighborhood identity and a definable physical character and either high artistic value or a relationship to urban centers or Historic Districts that makes conservation of the proposed Conservation District essential to the City's history or function.

Relationship to this report: As noted above, the subject property was previously evaluated for potential significance. It was nominated as a City of Rancho Cucamonga Historic Landmark in 2014 and a City staff report was prepared for that nomination, finding the property eligible as a local landmark for potential association with Konstanty Stys, an important person in local history, and as a good example of Folk Architecture constructed with unique materials.[8] The designation did not ultimately move forward. The subject property was evaluated a year later in an Historic Building Evaluation report prepared by CRM Tech, dated May 19, 2015.[9] That report included evaluation of both 8803 and 8817 Baker Avenue, and found both properties ineligible as historical resources under CEQA. However, a peer review of the CRM Tech report, prepared by LSA Associates, Inc., dated August 5, 2015, disagreed with the CRM Tech findings and asserted eligibility of 8803 Baker Avenue for local designation for potential association with Konstanty Stys, and as a good example of Folk Architecture using salvaged building materials.[10] This report provides a fresh, comprehensive evaluation. For reasons stated in this report, the subject property

[8] Nakajima, Staff Report re Historic Landmark Designation.
[9] CRM Tech, Historic Building Evaluation.
[10] Tibbet, Peer Review.

meets eligibility criteria for designation as a City of Rancho Cucamonga Historic Landmark, though it does not appear to be a contributor to any historic district.

California Environmental Quality Act (CEQA)

The California Environmental Quality Act (CEQA) was enacted in 1970 and offers protection for identified historical resources. In general, for purposes of CEQA and environmental review, an "historical resource" is that which has been determined eligible for listing in the California Register, or one that is designated at the local level. The term "historical resource" includes the following:

1. A resource listed in, or determined to be eligible by the State Historical Resources Commission for listing in the California Register of Historical Resources (Pub Res Code SS5024.1, Title 14 CCR, Section 4850 et seq).
2. A resource included in a local register of historical resources, as defined in Section 5020.1(k) of the Public Resources Code or identified as significant in an historical resource survey meeting the requirements Section 5024.1(g) of the Public Resources Code, shall be presumed to be historically or culturally significant. Public agencies must treat any such resource as significant unless the preponderance of evidence demonstrates that it is not historically or culturally significant.
3. Any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California may be considered to an historical resource, provided the lead agency's determination is supported by substantial evidence in light of the whole record. Generally, a resource shall be considered by the lead agency to be "historically significant" if the resource meets the criteria for listing on the California Register (Pub Res Code SS5024.1, Title 14 CCR, Section 4852).
4. The fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources (pursuant to 5020.1 (k) of the Public Resources Code), or identified in an historical survey (meeting the criteria in Section 5024.1(g) of the Public Resources Code) does not preclude a lead agency from determining that the resource may be an historical resource as defined in Public Resources Code Sections 5020.1 (j) or 5024.1.

Relationship to this report: For the reasons stated in this report, the subject property meets eligibility criteria for listing as a City of Rancho Cucamonga Historic Landmark as well as for listing in the California Register. Therefore, the subject property qualifies as an historical resource under CEQA.

California Register

Based substantially on the National Register, the California Register is "an authoritative guide… used by state and local agencies, private groups, and citizens to identify the state's historical resources and to indicate what properties are to be protected."[11] For a property to be eligible for listing in the California Register, it must be found by the State Historical Resources Commission to be significant under at least one of the following four criteria:

[11] California Public Resources Code §5024.1(a), *http://codes.lp.findlaw.com/cacode/PRC/1/d5/1/2/s5024.1*.

1) is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage; or
2) is associated with the lives of persons important in our past; or
3) embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual or possesses high artistic values; or
4) has yielded, or may be likely to yield, information important in prehistory or history.

Also included in the California Register are properties which have been formally determined eligible for listing in or are listed in the National Register; are registered State Historical Landmark Number 770, and all consecutively numbered landmarks above Number 770; and Points of Historical Interest, which have been reviewed and recommended to the State Historical Resources Commission for listing.

The primary difference between eligibility for listing in the National and California Registers is integrity. Properties eligible for listing in the National Register generally have a higher degree of integrity than those only eligible for listing in the California Register. There is, however, no difference with regard to significance.

Relationship to this report: The subject property is not listed in the California Register. For the reasons stated in this report, the subject property appears eligible for listing in the California Register.

National Register

The National Register of Historic Places is "an authoritative guide to be used by federal, state, and local governments, private groups, and citizens to identify the nation's cultural resources and indicate what properties should be considered for protection from destruction or impairment,"[12] Administered by the National Park Service, the National Register is the nation's official list of historic and cultural resources worthy of preservation. Properties listed in the National Register include districts, sites, buildings, structures, and objects that are significant in American history, architecture, archaeology, engineering, and culture. Resources are eligible for the National Register if they meet one or more of the following criteria for significance:

A) are associated with events that have made a significant contribution to the broad patterns of our history; or
B) are associated with the lives of significant persons in our past; or
C) embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
D) have yielded or may be likely to yield, information important in history or prehistory.[13]

Once a resource has been determined to satisfy one of the above criteria, then it must be assessed for "integrity."[14] Integrity refers to the ability of a property to convey its significance. Evaluation

[12] *National Register Bulletin #16A: How to Complete the National Register Registration Form*, National Park Service, 1997.

[13] *National Register Bulletin #15, How to Apply the National Register Criteria for Evaluation*, National Park Service, 1990, revised 2002.

[14] Ibid.

of integrity is based on "an understanding of a property's physical features and how they relate to its significance." The National Register recognizes seven aspects or qualities of integrity: location, design, setting, materials, workmanship, feeling, and association. To retain integrity, a property must possess several, and usually most, of these aspects.

Relationship to this report: The subject property is not listed in the National Register. For the reasons stated in this report, the subject property does not appear to retain sufficient integrity for listing in the National Register, due to alterations.

V. PROPERTY DESCRIPTION AND HISTORY

Physical Description

Site
(Attachment A, Current Maps and Aerials; Attachment C, Current Photographs.)
The subject property is located at 8803 Baker Avenue in Rancho Cucamonga, California. Bordered by 9th Street to the north, Vineyard Avenue to the east, 8th Street, a railway (formerly the Atchison Topeka and Santa Fe Railway) to the south, and Baker Avenue to the west, the subject property consists of one parcel and contains one single-family home. Surrounding properties consist of a large area of undeveloped land immediately north, east and south, though there are housing tracts across the street to the west. The single-family home is set back from the street by a front yard with curved low walls incorporating bricks, concrete, and stone, and low brick and concrete posts that are remnants of fence. Landscaping has generally been removed, though there are some scattered trees.

Exterior

Fig 1 (left): Subject property, west elevation (center) and south façade (right), view northeast (McGee, 2019); Fig 2 (right): Subject property, west elevation, detail of concrete rubble exterior wall material, view west (McGee, 2019)

Fig 3 (left): Subject property, west elevation (center) and south façade (right), detail of telephone pole roof construction, view northeast (McGee, 2019); Fig 4 (right): Subject property, low wall located west of house in front yard, view southeast (McGee, 2019)

The building at the subject property is oriented facing south. It is one-story high and rectangular in plan with a flat roof, deep eaves, and side chimney. The building is low-slung with a sense of horizontality emphasized by the relationship of the simple massing to the flat roof. Composed of salvaged materials, the building can be described as an example of Folk Architecture. Exterior walls are made of a combination of concrete rubble mixed with stone and brick in some places,

often formed to appear as individual bricks, while the roof beams are made of telephone poles creating a deep canopy extending over a full-width south facade porch as well as over a portion of the north elevation. Door and window openings are recessed and generally boarded up, though inspection of windows from the interior reveals sash and glazing have all been removed. Windows have concrete slip sills.

The primary, south facade is asymmetrical in composition. The main entrance is roughly centered in the elevation, although there is another secondary door to the west. Former window openings include a large opening west of the secondary door, and a smaller opening between the doors and at the east end of the elevation. The full front porch consists of a simple concrete slab accessed by three concrete steps.

The north, rear elevation is also asymmetrical in composition and contains, from east to west, a former window opening, a smaller opening, a secondary door, and a large opening corresponding to the living room. The east elevation contains a central outdoor chimney flanked by former window openings. The west elevation does not contain any former window openings, though it contains a wide central chimney. The chimney has a low, boarded opening, presumably for a vent, in its north half.

Interior

Fig 5 (left): Subject property, interior, living room, view northwest (McGee, 2019); Fig 6 (right): Subject property, interior, living room, fireplace, view northwest (McGee, 2019)

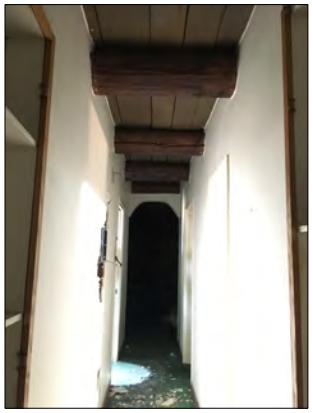

Fig 7 (left): Subject property, interior, hallway looking toward living room, view west (McGee, 2019); Fig 8 (right): Subject property, interior, bedroom (typical) (McGee, 2019)

The interior is generally in a state of disrepair with debris scattered in all rooms. The electricity is currently turned off and windows are boarded, so the interior is dark, making visibility and

photography difficult. Original telephone pole and wood beam ceilings are visible throughout. The main entrance provides access into a kitchen, where there are built-in wood cabinets, as well as a tile floor and tile backsplash on walls, which appears to be contemporary. The north wall of the kitchen opens into a central, carpeted hallway running east-west, which accesses a living room at the west end of the house through an arched opening; a closet and a bathroom to the north in the center of the house; and two bedrooms at the east end of the house. In the living room, the west wall is made of concrete incorporating stones of varying sizes and colors, encompassing a fireplace at the center, with brick inside the shaft and a small low opening for ventilation to the north, covered by a pair of wood swinging doors. In a phone interview with Shirley Carwell, the adult daughter of the original owners, James and Jennie Carwell, information was provided regarding family photographs that are integrated into the fireplace artwork. However, it is difficult to tell if that artwork is extant; further investigation into this topic is needed. Off the central hallway, the aforementioned closet has built in wood cabinets along its west wall, which are badly damaged, with many of the wood and glazed cabinet doors broken. The bathroom has contemporary tile covering walls; all fixtures and finishes are badly damaged. The bedrooms feature built-in closets, which are also damaged. Shirley Carwell also described a basement under the master bedroom, which was not toured at the time of the site visit.

History

History of Construction and Alterations
(Appendix A: Table of Building Permits; Attachment B, Historic Maps and Aerials)
The subject property is located just north of the Santa Fe Railway and about 2.5 miles southwest of the historic center of the Town of Cucamonga. Originally part of a tract of land known as Cucamonga Fruit Lands, the subject property once encompassed fifteen acres with orange and lemon groves when purchased by James Carwell (1918-2014) and Jennie Perona Carwell (born c. 1919) in 1947 (biography below). The Carwells constructed the existing house at 8803 Baker Avenue in 1952-1953, as well as an adjacent residence located immediately to the south at 8817 Baker Avenue, also in the early 1950s. They lived at 8803 Baker Avenue with their children for about fifteen years, while they rented out the other house, and farmed the orange and lemon groves. Historic aerial photographs show the property surrounded by agricultural land.

Fig 9: Historic aerial photograph showing the subject property, outlined in red, and its environs in 1953 (Source: UCSB Aerial Photograph Collection)

There is no original building permit available documenting construction of the house in 1952-1953. However, it is known that James Carwell designed and constructed the house using salvaged local materials, such as concrete rubble and telephone poles.[15] Working as a butcher, James Carwell did not have professional training in architecture or building. However, artistry is evident in Carwell's work. He incorporated artwork with images of the family into design of the fireplace (unknown if said artwork is extant). Photographs taken of the property in 2014 show artistic integration of materials into low rubble and rock walls surrounding a pool and serving as fencing, as well as a rock monument in a corner of the back yard (not extant).[16] It should also be noted the house was designed with a basement under the master bedroom where the Carwell family would often store wine for and made by friends who lived locally and worked as winemakers (basement was not toured on site visit).[17]

The artistry and distinctive use of materials is very similar to that of important local buildings designed and constructed by local builder Konstanty "Steve" Stys, especially the National Register-of Historic Places-listed Russian Village historic district in Claremont, and the building that now houses the Cask 'n Cleaver restaurant in Rancho Cucamonga. In the early 1950s when the Carwell's designed their house, Stys lived nearby, building his house and the restaurant that became Cask 'n Cleaver.[18] According to Shirley Carwell, Stys was a friend of her father and her family would often have parties at Stys' restaurant. According to James Goody, his grandfather mentioned getting ideas from a local man who showed him how to build, though Goody didn't know the name of the man, nor if it was Stys. From the National Register nomination for the Russian Village, it is known that Stys often helped other local individuals with advice on how to design and build their homes using salvaged local materials. He did not design and build all of the houses in the Russian Village himself. Thus, it is highly likely Stys at a minimum gave advice to James Carwell on the construction of his home, given the fact that the two were friends, lived close by each other, and constructed similar buildings around the same time in the same neighborhood.

The Carwells made other improvements to the property. They construed the aforementioned second residence in the early 1950s, a 1,200 square-foot wood frame and stucco house located at 8817 Baker Avenue (demolished). They rented out that house, though it was sometimes occupied by relatives. The Carwells also improved the property with a swimming pool east of the house in 1956, and with addition of a covered patio along the east elevation in 1958. They continued to live there until James Carwell got a new job as a meat inspector, and he and Jennie sold the property and moved away.

Title transferred to Charles H. Lescault and Donna J. Lescault in 1969 (biography below). The Lescaults do not appear to have made major changes to the property. Upon their divorce in 1973, they sold the property to Cucamonga fireman Dennis Myskow (biography below). Myskow lived there and constructed a freestanding workshop building the same year. He also constructed a substantial addition of 13 ½'x32' along the north elevation in 1977. Other known improvements included reroofing the building in 1995 and installation of roof-mounted photovoltaic panels in 2015. Several improvements were demolished in 2016, including the pool, covered patio, freestanding workshop, north elevation addition, as well as the house at 8817 Baker Avenue.

[15] Shirley Carwell, phone interview.
[16] Nakajima, Staff Report re Historic Landmark Designation.
[17] Ibid.
[18] Konstanty Stys and Antonia Stys lived at 8689 9th Street in 1954 ("Konstanty Stys," *Lusky's Official Greater Ontario Criss-Cross City Directory,* Santa Ana: The Directory Service Co., 1954: 160.)

The setting of the subject property changed dramatically over time, as land formerly used for agriculture was rapidly redeveloped with tracts of single-family homes through the 1970s (see *Attachment B, Historic Maps and Aerials).* Widespread development and need for shared resources ultimately led to the City's incorporation in 1977, consolidating the three towns of Cucamonga, Alta Loma, and Etiwanda into one municipality. By that time, the citrus groves had been removed from the land surrounding the subject property; surrounding parcels to the north, south, and west have largely been developed with single-family homes.

Photographs of subject property in 2015, prior to removal of north elevation addition, east elevation covered patio, and front yard fencing:

Fig 10 (left): Subject property, west elevation, showing north elevation addition (at left), view east, 2015
Fig 11 (right): Subject property, south façade and front yard, view northeast, 2015 (Source for both figures: CRM Tech, 7.)

Summary of Alterations

The following summary of alterations is compiled based on available building permits (see *Appendix A, Table of Building Permits*) and visual inspection. Alterations to the subject property since 1952-1953 include: addition of the adjacent residence at 8817 Baker Avenue (early 1950s); addition of swimming pool (1956); addition of covered patio along east elevation (1958); addition of freestanding workshop (1973); addition of a 13½' x 32' room along the north elevation (1977); reroofing (1995); installation of roof-mounted photovoltaic panels (2015); demolition of adjacent residence at 8817 Baker Avenue (2016); demolition of the east elevation covered patio, north elevation addition, freestanding garage, swimming pool, front yard fencing, site walls, and paving, and disconnection and capping of all utilities (all in 2016).

History of Owners

The history of owners is based on chain of title and historic lot books of the San Bernardino County Assessor. All available data is included in *Appendix A: Table of Owners*.

James Carwell and Jennie P. Carwell

James Carwell (1918-2014) and Jennie Perona Carwell (born c. 1919) owned the subject property from 1947-1969. James was born in Rancho Cucamonga, while Jennie was born in Pennsylvania. The couple "met in Cucamonga (before the Rancho) in a grape vineyard under a pepper tree at lunchtime," marrying in 1937 in San Bernardino.[19] James and Jennie had two daughters, Elsie and Shirley. Prior to moving to the subject property, the Carwells lived in Corona and Ontario.[20] After purchasing the subject property in 1947, they constructed their home there using salvaged local materials. They lived there with their children for about fifteen years. During that period, James

"James Carwell," *Ontario (California) City Directory 1951, Including Upland, Chino, Alta Loma, Cucamonga and Etiwanda,* Los Angeles Directory Co*,* 1951: 435.

worked in the meat business, at C.K. Packing Company on Chaffee Street in 1955[21] and Klapp Packing Co. on Euclid Avenue in Ontario in 1960.[22] He also worked "doing such jobs as chauffer, grape picker, butcher, State Meat Inspector and finally end[ed] his career as a Federal Meat Inspector."[23] Jennie worked as a homemaker. Shirley and Elsie would often pick fruit from the citrus groves and sell it in the neighborhood.[24] After selling the subject property in 1969, James and Jennie lived throughout California, retiring to Riverbank in the late 1980s. James Carwell continued to work on arts and crafts as a hobby. A 2002 newspaper article about a yard sale he hosted notes, "Carwell is retired and spends much of his time refinishing furniture, converting old tea pots and coffee urns to lamps, and making swag or hanging lanterns decorated with Brazilian agate."[25]

Fig 12 (left): James and Jennie Carwell, 2007 ("Couple Celebrates 70 Years Together," *Riverbank News,* February 28, 2007: 20.)

Carwell is retired but keeps busy making things. The table displays more of his work, including lanterns faced with tiles of Brazilian agate…" (John Branch, "Successful Year for Yard Sale," *Riverbank News,* June 5, 2002: 1.)

Charles H. Lescault and Donna J. Lescault

Charles was born about 1936 in California.[26] The son of a feed salesman, he married Donna J. Billings (born c. 1940) in 1963 and the couple lived in Riverside.[27] After relocating to Ontario in 1964,[28] the couple ultimately purchased the subject property in 1969. They divorced in 1973,[29] and title to the property transferred to Dennis F. Myskow, who owned it until 2015.

Dennis Francis Myskow and Marilyn A. Myskow

Dennis F. Myskow (born in 1947)[30] and Marilyn A. Romig (born in 1952) [31] married in 1973 in San Bernardino.[32] The couple purchased and moved into the subject property the same year.

VI. HISTORIC CONTEXT

City of Rancho Cucamonga

The following overview of the City of Rancho Cucamonga's developmental history is excerpted from relevant sections of the City's historic context statement, prepared as part of the 2010 General Plan Update.[35]

> Context: Early Settlement (1811-1876)
> Originally inhabited by Indian tribes, the City of Rancho Cucamonga has been a center of land development opportunity since Franciscan priests and Spanish soldiers entered and began their occupation of the area in the late 18th century. The name "Cucamonga," a Shoshone word for "sandy place," first appeared in a written record of the San Gabriel Mission dated 1811. As a result of the secularization of the missions in 1831, the land owned by the missions was divided into land grants, including the 13,000 acre Rancho Cucamonga, granted to Los Angeles City Council president and businessman Tiburcio Tapia in 1839. The Rancho Cucamonga was defined by El Camino Real on its southern border, the San Gabriel Mountains to the north, the San Antonio Creek to the west and present-day Etiwanda Avenue to the east. Tapia built his home on the top of visually prominent Red Hill, planted some of Rancho Cucamonga's first vineyards, and built a small winery, which would later be enlarged and reestablished as the Thomas Winery in 1933 and then again as the Filippi Vineyards winery in 1967.[36] Portions of the historic winery buildings, located at the northeast corner of Foothill Boulevard and Vineyard Avenue, are currently being reused for commercial purposes.
>
> Upon the death of Tapia in 1845, Tapia's daughter, Maria Merced Tapia de Prudhomme, became the sole heir of the Rancho Cucamonga. Maria Merced's husband, Leon Victor Prudhomme, assumed control of the rancho and eventually sold it to John Rains in 1858. Rains significantly expanded the vineyards, planting approximately 125,000 to 150,000 vines. He was found murdered in 1862 and soon after his death, his widow, Dona Maria Merced Williams de Rains, inherited the ranch property. She encountered financial problems and the property fell into foreclosure, ultimately marking the close of the rancho way of life in the Cucamonga region.
>
> Context: Railroad and Agriculture Development (1887-1970)
> Theme: Town Development: Cucamonga, Alta Loma, and Etiwanda (1887-1945)
> Construction of railroads through the Cucamonga Valley allowed for tremendous growth of the local agriculture industry, the success of land sales, and subsequent development of the towns of Cucamonga (including the North Town neighborhood), Alta Loma and Etiwanda. Similar to other Southern California boomtowns,[37] construction of railroads through the region created a rapid increase in local development, enabling both people and goods to move in and out of Rancho Cucamonga at what was for the time an unprecedented speed, which dramatically increased agricultural production and sales.

[35] Chattel Architecture, Planning & Preservation, Inc., "City of Rancho Cucamonga Historic Context Statement, prepared for the City of Rancho Cucamonga 2010 General Plan Update, rev March 4, 2010: 3-4; 7; 15-17.

[36] Donald L. Clucas, *Light Over the Mountain,* Upland: California Family House Publishers, 1979: 70.

[37] Rail lines built in Southern California created a huge population boom in the region. The City of Los Angeles grew from 6,000 to over 50,000 people in the 20-year period from 1870 to 1890. The majority of cities incorporated in the Los Angeles area in the late 1800s experienced early growth due to availability of railways. (David Brodsly. "L.A. Freeway, An Appreciative Essay," Berkeley: University of California Press, 1981: 63; 68-69).

From the early 1900s to the 1950s, the northern portion of the City's landscape consisted of mostly citrus groves while the southern portion was dominated by vineyards.[38]

Context: Postwar Development (1945-1977)

Following World War II, Rancho Cucamonga's landscape began to shift from a rural to suburban environment, reflecting the nation-wide trend toward decentralization of the city. Driven by rapid highway construction, increasing automobile ownership, availability of modern building technologies, and the Baby Boom, the postwar period brought about an increase in housing demand and rising land values, spawning development of tract housing and light industry in Rancho Cucamonga on land previously used for agriculture.[39] After World War II and prior to incorporation in 1977, the City "experienced uncontrolled growth."[40] It ultimately became a sprawling suburb, with tract housing, neighborhood-scale shopping centers, office parks, and surface parking proliferating throughout the City, aiming to meet the needs of nearby residents while accommodating automobiles. Underscoring the dramatic increase in local development occurring postwar, in 1979, prominent local developer Lewis Homes (founded 1955 by Ralph and Goldy Lewis), announced sales of 533 single-family Inland Empire homes in the first nine months of the year, not including sales of commercial and multi-family developments.[41]

Historic aerial photographs of the City indicate that postwar tract housing was frequently inserted into plots of land formerly used for agriculture (fig 44).[42] Many such tracts represent the curvilinear residential suburb model that had become the nationwide standard for neighborhood design by the late 1940s (fig 43).[43] Characterized by curving streets as opposed to an orthogonal grid, this model was ideally interspersed with neighborhood parks, landscaping, and trails, with a small handful of housing models repeated throughout the tract. Standardization and large-scale production of housing stock allowed many homes to be built quickly and at a low cost, meeting the postwar demand for Veteran housing and accommodations to meet the needs of the continually growing population. As lands once occupied by agricultural uses were needed to accommodate this new pattern of development, the citrus groves and vineyards that had once characterized rural local landscape in Rancho Cucamonga eventually gave way almost entirely to suburbanization. Rising land values, coupled with pressure from realtors to sell land for residential development made it increasingly difficult for farmers to continue using their land for agriculture when it was worth more developed with housing.[44]

While a survey of all postwar housing in Rancho Cucamonga has yet to be performed, the City is home to several early postwar tracts, some of which retain a strong sense of time and place and as such should be considered for their historic significance as an intact grouping of postwar homes. For example, the housing tract located northwest of the historic town center of Cucamonga, bounded by Hellman Avenue to east and San Bernardino Road to the South, centering on Selma Avenue, Harvard Street and Montara

Avenue (Cucamonga Vineyard Tract Subdivision B, Tract No. 5576, figs 43-48; see figs 49-51 for additional examples) appears to be a relatively intact example of postwar tract housing, with the majority of the houses in the tract organized along curvilinear streets culminating in cul-desacs, retaining original Swiss Chalet architectural features, street set-backs, and general sense of time and place as a collection of early postwar housing. Although tract housing was not beginning to be developed on a large scale in Rancho Cucamonga until the 1950s, development of housing tracts on local agricultural lands was sparked as early as 1942, when Kaiser Steel Mill began operations in nearby Fontana.[45] Initially producing steel to aid the war effort, Kaiser Steel Mill was the ninth-largest steel production facility in the country by the late 1950s, employing 7,700 workers at its peak in production.[46] This new industry helped spark regional growth, necessitating an increase in local housing stock for Steel Mill workers. Farmers received pressure to sell agricultural land from realtors who wanted to develop land for much needed Steel Mill worker housing.[47] Kaiser Community Homes, one of the many successful enterprises started by Henry J. Kaiser, developed many postwar housing tracts in the Inland Empire and nationwide.[48] In 1946, Henry Kaiser announced that his company would build more than 10,000 low-cost homes throughout the nation, beginning in Southern California and working towards the east coast.

While competition from imported steel suppliers and stricter air quality regulations gradually crippled Kaiser Steel Mill's business, closing operations in the 1980s, availability of low cost land throughout the Inland Empire continued to attract development to the area.[49] By 1995, the Inland Empire had become an attractive location for large warehouse construction, with large-scale "big box" retailers such as Home Depot and Wal-Mart setting up warehouses and distribution centers throughout the area at a much cheaper rate than would have been available in Los Angeles. Warehouses for manufacturing and metal fabrication also proliferated throughout the region, further enhancing need for large quantities of affordable housing in Rancho Cucamonga, although the majority of warehouses were constructed in Mira Loma, Rialto and Fontana.[50]

Also important in influencing postwar suburbanization in Rancho Cucamonga was increasing employment and transportation options offered by expansion of the nearby Ontario International Airport (originally Ontario Airport). In 1942 the United States government allocated Works Progress Administration funding to improve the existing dirt runway at the Ontario Airport to two paved runway for Army and Army Air Corps operations. At close of the war in 1945, airport operations lessened for a time, although the airport became Ontario International Airport in 1946. In 1949 airlines began offering regular passenger service into and out of the airport. Beginning in 1951, military

[45] Kaiser Steel was one of many successful businesses started by Henry J. Kaiser, "a prominent Los Angeles industrialist [who]established Kaiser-Permanente medical services in Los Angeles in the 1930s and founded Kaiser Industries. Kaiser Industries owned and operated a number of subsidiary raw materials plants, including Kaiser Metal Products, Kaiser Steel, Kaiser Aluminum and Chemical, and the Permanente Cement Company. Kaiser had earlier experience in large-scale low-cost housing, having participated in the construction of 800 units surrounding the Kaiser steel plant in Fontana. He also experimented with prefabricated Kaisercraft homes. [Fritz B.] Burns, [a successful Los Angeles developer] combined his expertise in land development and community building with Kaiser's corporate assets and access to raw materials to establish Kaiser Community Homes." (Historic Resources Group, California Department of Parks and Recreation 523d district record, Panorama City Historic District, 20 May 2002: 5.)

operations at the airport resumed, using the airport for California Air National Guard operations for the Korean War. Various airport improvements and runway extensions took place through 1962. Airport traffic increased steadily over the years and in 1998 new terminals opened. By 2000, the airport had 6.7 million annual passengers, generating more than 55,000 jobs in the region.[51]

Context: Consolidation and Incorporation (1977-2010)
Encouraged by the initial boom in land values and development, Rancho Cucamonga colonists began discussing the possibility of incorporating the three towns of Cucamonga, Alta Loma and Etiwanda as early as 1887. Despite attempts at consolidation over the years, it was not until much later that this dream was realized. The City of Rancho Cucamonga was finally incorporated in 1977, consolidating Cucamonga, Alta Loma, and Etiwanda into one municipality, reaching a milestone sought after by local residents for nearly one hundred years. Incorporation halted the uncontrolled growth that had been occurring in the area and provided numerous other benefits, including increased park and recreation opportunities, improvements to existing neighborhoods, construction of new neighborhoods, and advances in local economic development. The three historic towns became part of the larger whole, providing opportunities for growth and improvement but also absorbing the character of each town center. As a result, the City has before it the opportunity to plan for the benefit of the City at-large while also continuing to recognize the historic communities from which it came.

Folk Architecture

Overview
Folk Architecture is a subset of vernacular architecture and refers to buildings designed without the work of a trained architect, often constructed with found, salvaged, or locally available materials, and sometimes incorporating artwork into the design. Folk Architecture is by nature common, perhaps only known to locals, and may not always be considered important by historians focused on the "high art." Nevertheless, as early as 1964, the significance of this form of building was recognized by the Museum of Modern Art in an exhibit publication entitled, *Architecture Without Architects: An Introduction to Non-Pedigreed Architecture,* in which Bernard Rudofsky underscores the difficulty with evaluation of the style:

> It is so little known that we don't even have a name for it. For want of a generic label, we shall call it vernacular, anonymous, spontaneous, indigenous, rural, as the case may be. Unfortunately, our view of the total picture of anonymous architecture is distorted by a shortage of documents, visual and otherwise.[52]

In the post-World War II period, there was a resurgence of American arts and crafts in general, due to multiple factors, such as the massive expansion of colleges and arts programs; the consumerism of the postwar era, which supported the rise of crafts;[53] and, the growth of imports in the 1960s allowing folk crafts from other countries to become available, resulting in a worldwide approach to evaluating crafts.[54] The Pomona Valley became an important center for the arts during this time period, providing "the perfect storm of proximity, isolation and college-

town community," allowing for the success of local artists.[55] The establishment of arts programs at local colleges engendered the growth of the local arts community which focused on handcrafted arts, in opposition to the post-World War II mass production and consumption of goods that had become prevalent across the country at the time. Internationally renowned woodworker Sam Maloof (1916-2009) established his woodworking business in Rancho Cucamonga during this time and made his home an important gathering place for local artists of the Pomona Valley, stimulating growth of that community.[56]

Local Examples of Folk Architecture

The most relevant example of Folk Architecture to evaluation of the subject property is the Russian Village, a collection of fifteen, single-family, private homes in the neighboring City of Claremont, which were designed and constructed from 1923-1938 by a Polish immigrant and carpenter, Konstanty "Steve" Stys (1894-1961),[57] and other local individuals, using salvaged and local materials, specifically concrete rubble similar to that which is used at the subject property, and local stone.[58] The Russian Village was listed in the National Register in 1977; the nomination form provides the following background on its design and construction:[59]

> There is no evidence that Stys had any formal training in architecture. In fact, he had only a grade school education. The houses in the Russian Village were not built according to plans, but in an ad hoc manner, and belonged to a category of American domestic building which might well be called "folk architecture".[60]

[55] Harold B. Nelson, *The House that Sam Built,* San Marino: The Huntington Library Press, 2011: 6.

[56] Maloof's career in woodworking began with work for Bauhaus-trained industrial designer, Harold Graham, and as a graphic designer and studio assistant for artist Millard Sheets. Maloof became a woodworker in 1948, establishing his first workshop. He is known for hand-crafted furniture, especially rocking chairs, and constructed his own residence and workshop buildings beginning in 1956 and adding to the property over decades. His personal philosophy engendered growth of local community; as one biographer writes, "His refusal to make furniture for the mass market and his insistence on maintaining a direct relationship with his clients are as much about community as they are about craftsmanship." Maloof's woodworking was featured in an exhibit at the Smithsonian Institute in Washington D.C. in 1970. The Maloof compound was originally located at 9553 Highland Avenue and moved to an approximately 5.5-acre site located at 5131 Carnelian Street in 1999-2000 to allow for construction of the State Route-30 freeway extension. The property was listed in the National Register in 2010 for association with Maloof and for exceptional architectural merit of the house and studio (Chattel, "Sam and Alfreda Maloof Compound," National Register Registration Form, Sect. 8, p. 17--23; Harold B. Nelson, *The House that Sam Built,* San Marino: The Huntington Library Press, 2011: 6-7.).

[60] Bernard Rudolfsky, *Architecture Without Architects,* New York, 1964.

> The Russian Village is comprised of fifteen private homes, either built by Stys or inspired by him, standing on both sides of one block of South Mills Avenue in Claremont and Montclair, California. The houses have a great deal of character. They are built of native fieldstone and rubble from broken-up concrete pavement slabs, roofed with tile and linked by low stone fences with iron gates. The street is shaded by elms and lined with fieldstone curbing.
>
> Konstany Stys is responsible for the aesthetic integrity of the village—both the harmony of its building materials and the plantings. He developed the larger portion during the Great Depression. Circumstances dictated its thematic unity: Stys means were limited to the creative use of salvaged and other cheap, readily-at-hand building materials. These houses stand virtually alone today, amidst a sea of tract-house sameness, the original surroundings of lemon and orange groves having disappeared in the years between…
>
> …The result is a unique community with important features worthy of historic recognition and preservation.

Current photographs showing use of concrete rubble in the Russian Village:

Fig 14 (left): Russian Village, concrete and stone walls on the east side of S. Mills Avenue in Claremont, view north (McGee, 2019); Fig 15 (right): Russian Village, 350 S. Mills Avenue, view northeast (McGee, 2019)

Fig 16 (left): Russian Village, 370 S. Mills Avenue, view east (McGee, 2019); Fig 17 (right): Russian Village, 305 S. Mills Avenue, view west (McGee, 2019)

The National Register nomination for the Russian Village describes that not all of the homes were actually built by Stys, as Stys was known for helping teach other locals to design and construct their own homes. For example, while 305 and 350 S. Mills Street were actually constructed by

Stys, 370 S. Mills Avenue was constructed by a teenage youth whose father had recently passed (pictured above).[61]

The National Register nomination asserts specific reasons for significance of the Russian Village, highlighting use of cement street rubble in homes as a "truly unique architectural phenomenon," and noting the following regarding the importance of design with salvaged materials:

> Hard times also dictated the use of the salvaged building materials common to all the houses. Although no two houses are identical, those built after the first two cottages commonly make use of pine shiplap board and paneling, adzed fir beams (occasionally including telephone poles—see the descriptive reports on 305 and 345 S. Mills), dormer casement windows, French doors, cast iron pipe structural supports, red clay tile roofing from demolished buildings, and kitchen/bathroom tiles in various unmatched shades of green), which Stys evidently procured in large numbers from the discarded seconds of a local manufacturer. Along with the fieldstone and cement rubble, the imaginative use of these discarded materials has contributed to the stylistic unity and charm of the entire Russian Village…

Stys is also credited with design and construction of several other houses on S. Indian Hill Boulevard in Claremont (exact addresses unknown), and four other homes are said to have been built with his "active advice" at 443 W. 10th St, 100 Oxford St, and 363 and 373 Cucamonga Avenue.

In addition to his work in Claremont, Stys experimented with vernacular architecture in Rancho Cucamonga, designing buildings in close proximity to the subject property. Stys moved to the property that is now the Cask 'n Cleaver restaurant, originally constructing it as an orchard house about 1945[62] and adapting it to restaurant use and making improvements at the property through at least 1955, when he expanded the sue to include a "banquet hall, deluxe motel, and swimming pool."[63] Cask 'n Cleaver is very close by the subject property, only 0.3 miles northeast, and has design characteristics similar to those used at the subject property, especially through use of salvaged local materials and telephone poles in the roof structure.[64] In 1953, Stys also owned and resided at the former Trona Restaurant at 2250 East Ninth Street in Rancho Cucamonga, though it is unclear if this building is extant.[65]

Fig 20 (left): Cask 'n Cleaver site, building 3, north of restaurant, view southeast (McGee, 2019)
Fig 21 (right): One of the seven redwood bungalows (not extant) formerly located north of Cask 'n Cleaver (Source: Chattel, Inc., "Madrone Avenue," State of California Department of Parks and Recreation Primary Record, 2009)

Stys also designed a row of diminutive redwood bungalows just north of the existing Cask 'n Cleaver restaurant in the 1950s (see *Attachment B: Historic Aerials*). The bungalows were allegedly constructed from wood salvaged from wreckage in the Long Beach earthquake of 1933,[66] and were recorded in a 2009 historic resource survey completed for the 2010 general plan update,[67] though they were in poor condition at the time,[68] and were ultimately demolished to make way for the existing Los Amigos Park, which opened in 2017.[69] Some of the lumber from the bungalows was salvaged and reused in the shade structure for the park, while some of the original river rocks were incorporated into various structures.

Use of salvaged materials is evidenced in other buildings in Rancho Cucamonga, such as the Etiwanda Road House, located at 12583 Highland Avenue (constructed c. 1926, extant), and Owen Electric building, located at 8889 Archibald Avenue (date of construction unknown, extant), both of which incorporate telephone poles into front porch designs. Also relevant to this discussion is the Chinatown House, the last building that remained on the former historic Chinatown site at 8581 San Bernardino Road, which was made of local materials without the work of a trained architect, (constructed c. 1919, demolished).

Precedent for Evaluation of Folk Architecture

In addition to the National Register listing for the Russian Village, the significance of folk art environments in California has been previously established by other official historic designations, especially the individual listings of the immersive environments of Watts Towers of Simon Rodia at 1765 E. 107th Street in Los Angeles, listed in the National Register in 1977 and designated as a California Historical Landmark and National Historic Landmark,[70] and of Forestiere Undergroud Gardens at 5021 W. Shaw Avenue in Fresno, listed in the National Register in 1977 and designated a California Historical Landmark in 1979.[71] Statewide significance of folk art has also been established through the 1980 adoption of the National Register Thematic Nomination prepared for Twentieth Century Folk Art Environments in California, which describes the significant folk art environments of the state as follows:[72]

> These works can best be described as monumental sized sculptures consisting of a variety of structures, sculptural forms, and painted surfaces. Many include the artist's living space. Visitors walking through these sites will find themselves surrounded on every side by the vision of the artist, hence the term "environmental." The environments are the work of folk artists with no formal training in the arts. Each worked without knowledge of the others. Their work blends an art statement with folk crafts, such as wood carving, tile working, stone cutting and stitchery, traditions of folk art with roots in the colonial period…

[70] National Archives Catalog, *https://catalog.archives.gov*, accessed April 21, 2019.
[71] The Forestiere Underground Gardens, *http://www.undergroundgardens.com/about*, accessed April 21, 2019.
[72] Robert Selway et al., Office of Historic Preservation, "Twentieth Century Folk Art Environments in California," National Register of Historic Places Inventory-Nomination Form, 1978, entered into National Register 1980.

> …Each environment made use of the natural landscape and discarded materials to create their folk art works. The recycling and innovative use of both natural and cultural materials, whether shells and sand or trash, is an important characteristic of all the works.

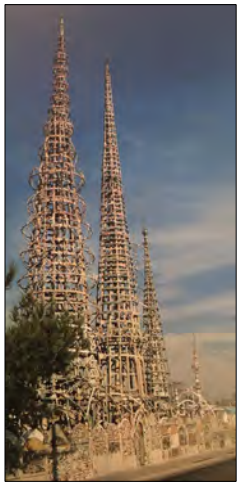

Fig 27 (left): Watts Towers, overall view (Source: Peter Selz, *Art in Our Times, A Pictorial History 1890-1980,* New York: Harry N. Abrams, 1981: 293); Fig 28 (right): Watts Towers, detail of outer fence with integrated artwork (Source: Watts Towers Arts Center, organization website, *https://www.wattstowers.org*)

In an effort to define Folk Art for purposes of project review, the City of Los Angeles' recently completed historic resource survey, known as SurveyLA, includes an historic context for Folk Art, 1850-1980, which defines Folk Art as a category, tracing its origins as a category in art history to the 1920s, mostly when applied to paintings and art objects, evolving to "utilitarian forms, especially household objects," and finally extending to architecture, as discussed here:[73]

> The broader concept of folk art, as applied to architectural resources from later periods and located outside of isolated communities, retains the assumption that the originator is talented but untrained. It differs, however, in two ways. First, it includes entire structures and landscapes as well as surface decoration. Second, there is less stress on the use of inherited vernacular modes and more on originality, to the point that eccentricity may be the most characteristic feature. This includes the unique uses of materials along with the creation of forms never before seen.
>
> Resources that fit this broader definition of Folk Art combine a number of elements—structures, landscape features, sculptures, assemblages of objects—into a unified whole. This whole is within a defined physical setting over which the creator has total control, typically the lot surrounding the creator's home. While apparently constructed without the use of formal plans, these resources show a unity of design, through common subject matter, forms and/or materials, based on the unique vision of the creator.[74]

Known examples in Los Angeles are few and tend to focus on the integration of artwork, rather than the architecture itself.

VII. EVALUATION OF SIGNIFICANCE

City of Rancho Cucamonga

The City of Rancho Cucamonga Historic Preservation Ordinance (Ordinance No. 848) was adopted by City Council in 2011 and allows the City Council to designate Historic Landmarks, Points of Historic Interest, and Historic Districts as described below.[75] Potential eligibility of the subject property under each criterion is discussed.

Designation Criteria for Historic Landmarks

A. The [City] Council may designate a property as a Historic Landmark if it meets the requirements of both paragraphs B and C of this Section.

B. Historic Landmarks must meet at least one of the following:

Criterion 1: It is or was once associated with events that have made significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.

The subject property is evaluated in this report for its association with patterns of development during the time of its construction, the early 1950s. The majority of post-World War II development in Rancho Cucamonga involved redevelopment of land formerly used for agriculture into tract housing. The subject property represents a smaller scale development of a single parcel and does not readily contribute to our understanding of broad patterns of urban development. The subject property is not known to be the location of any important events. Therefore, the subject property does not meet Criterion 1.

Criterion 2: It is or was once associated with persons important to local, California, or national history.

The subject property is evaluated in this report for association with original owner-builder, James Carwell (1918-2014). The house was designed and constructed by Carwell as his residence and is considered an important example of Folk Architecture. However, Carwell does not appear to be a person important in our past. Carwell worked as a butcher and does not have other important historical associations. The only other resource potentially attributable to him is the adjacent residence at 8817 Baker Avenue (not extant), which is not known to have been historically or architecturally significant. Therefore, the subject property does not meet Criterion 2.

Criterion 3: It embodies the distinctive characteristic of a type, period, or method of construction.

The subject property is evaluated in this report for its Folk Architecture, a form of vernacular architecture designed without the work of a trained architect, often constructed with found, salvaged, or locally available materials, and sometimes incorporating artwork into the design. The importance of local Folk Architecture is established by the listing of Claremont's Russian Village in the National Register; the thematic nomination for Folk Art Environments

[75] City of Rancho Cucamonga Ordinance No. 848, adopted July 6, 2011, *https://www.cityofrc.us/civicax/filebank/blobdload.aspx?BlobID=8222*, accessed April 21, 2019.

in California, also listed in the National Register; and through other separate listings for individually significant Folk Art environments, as discussed in this report.

The Russian Village includes fifteen stone and concrete rubble houses constructed using salvaged local materials during the years 1923-1938. Many of these homes were designed and constructed by local builder Konstanty "Steve" Stys, a Polish immigrant (1894-1961), who also trained other locals to build their own houses in the Russian Village and elsewhere in the community. Stys also owned property in Rancho Cucamonga very nearby the subject property, and continued his work constructing Folk Architecture, building his house there using salvaged local materials in 1945. His property was later expanded and became the Cask 'n Cleaver restaurant (previously found eligible as an historical resource in the survey conducted for the City of Rancho Cucamonga's 2010 general plan update). While a definitive connection of the subject property to Stys could not be made, the house at the subject property was very likely constructed in association with Stys. Anecdotal evidence provided in this report confirms his likely involvement. Design of the house follows his traditions of local Folk Architecture, looks much like his other work, and is a rare example of its type.

Effectively utilizing salvaged local materials (concrete rubble, telephone poles, stones, and wood) and incorporating artful placement of stones and materials, such as at the living room fireplace and in the curved low walls in the front yard, the house at the subject property is a good example of Folk Architecture. This architecture and method of construction is unique, fitting into a significant historic context for Folk Architecture, examples of which are rare in Rancho Cucamonga and in Southern California. The subject property appears to be significant for this association and therefore meets Criterion 3.

Criterion 4: It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.

The subject property is evaluated in this report for association with local builder, Konstanty Stys. The similarities between Stys work and the house at the subject property are striking. Because on testimony of Carwell's descendants, as discussed in this report, there is a strong likelihood that Stys advised Carwell on construction techniques, similar to his approach advising locals at the Russian Village. However, the extent of Stys involvement cannot be explicitly demonstrated. Therefore, the subject property does not meet Criterion 4.

Criterion 5: It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.

The subject property cannot reasonably be expected to yield significant archaeology or information important to prehistory of the local area or otherwise. Therefore, the subject property does not meet Criterion 5.

C. Historic Landmarks must retain integrity from their period of significance with respect to its location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its depilated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to particular characteristics that support the property's eligibility.

Integrity refers to the ability of a property to convey its significance. Evaluation of integrity is based on "an understanding of a property's physical features and how they relate to its significance." The National Register recognizes seven aspects or qualities of integrity: *location, design, setting, materials, workmanship, feeling, and association*. To retain integrity, a property must possess several, and usually most, of these aspects. The subject property appears to retain integrity from its date of construction, 1952-1953, as described below.

- *Location:* The building at the subject property has not been moved; therefore, the subject property retains integrity of *location.*
- *Design:* The massing, floor plan, and primary architectural features of the subject property have not been altered. The concrete rubble exterior walls, chimney, and roof structure with telephone poles and wood boards remain intact. The main alterations have been to window sash and glazing, which have generally all been removed and through additions along north and east elevations, which have also been removed. However, because the primary design features remain intact and the building is still easily readable as an example of Folk Architecture from its date of construction, the subject property retains integrity of *design.*
- *Setting:* The subject property was surrounded by agricultural land when the existing building was constructed. Citrus groves have been removed and the agricultural land has largely been replaced by tract housing developments. Therefore, the subject property may not retain integrity of *setting.*
- *Materials:* Given that the subject property is relatively unaltered in terms of its design and has the majority of its original materials, it retains integrity of *materials.*
- *Workmanship:* Because the subject property retains integrity of design and materials, it also retains integrity of *workmanship.*
- *Feeling and Association:* Because the subject property generally retains integrity of location, setting, and workmanship, it is able to convey *feeling* and *association*.

Designation Criteria for Historic Districts and Conservation Districts

The subject property was considered for potential eligibility as a contributor to a locally eligible historic district. However, there does not appear to be a cohesive grouping of buildings that includes the subject property and conveys a strong sense of time and place from any particular period in history. The subject property is not part of an intact grouping of early residential properties. Existing development along Baker Avenue currently includes a wide variety of land uses with varying dates of construction. There is not a strong sense of time and place from any particular period in history. There is no significant concentration, linkage, or continuity of sites, buildings, structures, or objects united historically or aesthetically by plan or physical development. Therefore, there does not appear to be any district present.

California and National Registers

Because eligibility criteria for National and California Registers align, the following evaluation considers eligibility under each of the criteria at federal and state under a single heading.

Criterion A/1: Is associated with events that have made a significant contribution to the broad patterns of our history and cultural heritage.

The subject property is evaluated in this report for its association with patterns of development during the time of its construction, the early 1950s. The majority of post-World War II

development in Rancho Cucamonga involved redevelopment of land formerly used for agriculture into tract housing. The subject property represented a smaller scale development of a single parcel and does not readily contribute to our understanding of broad patterns of urban development. The subject property is not known to be the location of any important events. Therefore, the subject property does not meet Criterion A/1.

Criterion B/2: Is associated with the lives of persons important in our past.

The subject property is evaluated in this report for association with original owner-builder, James Carwell (1918-2014). The house was designed and constructed by Carwell as his residence and is considered an important example of Folk Architecture. However, Carwell does not appear to be a person important in our past. Carwell worked as a butcher and does not have other important historical associations. The only other resource potentially attributable to him is the adjacent residence at 8817 Baker Avenue (not extant), which is not known to have been historically or architecturally significant. Therefore, the subject property does not meet Criterion B/2.

Criterion C/3: Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual or possesses high artistic values.

The subject property is evaluated in this report for its Folk Architecture, a form of vernacular architecture designed without the work of a trained architect, often constructed with found, salvaged, or locally available materials, and sometimes incorporating artwork into the design. The importance of local Folk Architecture is established by the listing of Claremont's Russian Village in the National Register; the thematic nomination for Folk Art Environments in California, also listed in the National Register; and through other separate listings for individually significant Folk Art environments, as discussed in this report.

The Russian Village includes fifteen stone and concrete rubble houses constructed using salvaged local materials during the years 1923-1938. Many of these homes were designed and constructed by local builder Konstanty "Steve" Stys, a Polish immigrant (1894-1961), who also trained other locals to build their own houses in the Russian Village and elsewhere in the community. Stys also owned property in Rancho Cucamonga very nearby the subject property, and continued his work constructing Folk Architecture, building his house there using salvaged local materials in 1945. His property was later expanded and became the Cask 'n Cleaver restaurant (previously found eligible as an historical resource in the survey conducted for the City of Rancho Cucamonga's 2010 general plan update). While a definitive connection of the subject property to Stys could not be made, the house at the subject property was very likely constructed in association with Stys. Anecdotal evidence provided in this report confirms his likely involvement. Design of the house follows his traditions of local Folk Architecture, looks much like his other work, and is a rare example of its type.

Effectively utilizing salvaged local materials (concrete rubble, telephone poles, stones, and wood) and incorporating artful placement of stones and materials, such as at the living room fireplace and in the curved low walls in the front yard, the house at the subject property is a good example of Folk Architecture. This architecture and method of construction is unique, fitting into a significant historic context for Folk Architecture, examples of which are rare in Rancho Cucamonga and in Southern California. The subject property appears to be significant for this association and therefore meets Criterion C/3.

Criterion D/4: Has yielded, or may be likely to yield, information important in prehistory or history.

The subject property cannot be reasonably expected to yield information important in prehistory or history; therefore, it does not appear eligible under Criterion D/4.

Period of Significance

The period of significance for the subject property is its date of construction, 1952-1953.

Character-Defining Features

The character-defining features, the physical features extant from the period of significance that convey significance, and should be preserved, include the following:

Exterior

- One-story scale and massing of house.
- Primary façade of house oriented south, positioned along street.
- Exterior walls of house made of concrete rubble.
- West elevation chimney made of concrete rubble.
- East elevation outdoor fireplace made of brick and concrete rubble.
- Flat roof structure made of telephone poles and wood boards.
- Full front porch with simple concrete structure, accessed by steps.
- Pattern of door and window openings and concrete slip sills (where extant)

Site Features

- Low curved walls located west of house bordering front yard.
- Low brick pillars that were once components of the front yard fence.

Interior

- Configuration of public spaces, including kitchen, hallway, and living room.
- Living room fireplace on west wall, with integrated concrete and stone and brick work.
- Telephone pole and wood ceilings where they occur throughout.

VIII. CONCLUSION

The subject property is evaluated in detail in this report, including thorough documentation of existing conditions, history of construction and alterations, and history of owners and tenants. The subject property was evaluated against relevant historic contexts and was found significant as an important and rare example of local Folk Architecture, most likely constructed in association with noted local builder, Konstanty Stys. The subject property meets eligibility criteria for local designation as a City of Rancho Cucamonga Historic Landmark and for the California Register, though it was not found to be a contributor to any historic district. Due to alterations, especially removal of all windows, it may not retain sufficient integrity for listing in the National Register. As the subject property appears eligible for local designation as well as for listing in the California Register, it is therefore an historical resource under CEQA.

STAFF REPORT

PLANNING DEPARTMENT

RANCHO CUCAMONGA

Date: April 23, 2014

To: Chairman and Members of the Historic Preservation Commission

From: Candyce Burnett, Planning Manager

By: Mayuko Nakajima, Assistant Planner

Subject: HISTORIC LANDMARK DESIGNATION DRC2014-00206 - DENNIS MYSKOW - A request for a historic landmark designation for a single-family residence within the General Industrial District, located at 8803 Baker Avenue - APN: 0207-271-40. The project is categorically exempt under Section 15331 as a Class 31 exemption of the guidelines for the California Environmental Quality Act. This item will be forwarded to City Council for final action.

BACKGROUND

A. Historical Significance: The subject structure, located at 8803 Baker Avenue, was built in the late 1940s or early 1950s and is considered to be built in the Folk Architecture style. The structure is constructed of recycled and/or salvaged materials ranging from deeply textured paving stones, telephone poles, and native rocks. The telephone poles run all through the house to act as a support for the roofing. The backyard is outlined by a wall constructed of remnants of rubble and rock placed in various configurations. The structure retains most of its original material. The garage that sits on the southern portion of the site was built at a later date. Towards the northerly portion of the main structure, an addition was also constructed. Both later additions were completed by the current owner.

The house is believed to be built by Polish immigrant Konstanty "Steve" Stys. Originally from Poland, he immigrated to the United States and settled in Youngstown, Ohio before moving to California in 1921. He lived in Pomona, then he moved to Claremont, and finally to Cucamonga in 1946. He is perhaps most known for his affiliation with the Russian Village in Claremont. He was a rock craftsman of the area who put a lot of character into his work. The Russian Village encompasses a group of 15 homes lining Mills Avenue that were built of recycled and/or salvaged materials during the Great Depression. In 1923, Stys purchased the eastern side of Mills Avenue. He then sold lots to friends and needy families and helped them find building materials from wrecking yards, earthquake-damaged buildings from the 1933 earthquake, and local field stones from the alluvial plain around the City of Claremont. The homes are unified by their use of rock and street rubble as exterior materials such as telephone poles, chunks of pavement, sides from railroad cars, red-tile roofs, and the informal arrangement of each property. Local residents nicknamed the neighborhood "Russian Village," assuming that Stys came from Russia. This neighborhood was placed on the National Register of Historic Places as a prime example of folk architecture. It was the hard times of the Great Depression that helped create this sense of community in these houses. The use of salvaged materials was an economic way to build houses. Stys is also known for designing and constructing the structure located at 8649 9th Street in Rancho Cucamonga, which is currently the Cask and Cleaver restaurant. This was Stys'

home until his death in 1961. The Cask and Cleaver building was built approximately in the late 1940s.

B. Ownership History: According to the City directory from 1950 to 1967, Jason and Jenny Carwell were listed as the owners (the original address was 158 Baker Avenue). According to the San Bernardino County Assessor's information, the previous owners were Charles and Donna Lescault. In 1973, the current owners, the Myskows, acquired the property. A real estate agent informed them that the building was built by Mr. Stys. It is possible that the structure was built about the same time as the Cask and Cleaver building, since it was in such close proximity and because it follows his move to the Cucamonga area in 1946. There are no building records that show the actual date of construction for the structure located at 8803 Baker Avenue, but historic aerials reveal that there was something on the site in 1938, and a definitive structure could be identified by 1959 (Exhibit B).

C. Site Characteristics: The project site is on an L-shaped parcel (approximately 0.5 acres), located approximately 500 feet north of 8th Street. The lot is zoned General Industrial and the single-family residence is considered a legal non-conforming use. Properties to the north are zoned Industrial Park; to the east and south is General Industrial; to the west is zoned Low Residential. It is generally surrounded by vacant land with the exception of a residential development just west of the site and a separate parcel just south of the property where there exists another legal non-conforming residence.

ANALYSIS

A. General: The house was never identified in the City of Rancho Cucamonga 2009 historic survey results, performed by Chattel Architecture, nor the previous City surveys conducted throughout the years. That does not preclude properties that might have been missed by these surveys. Based on a field visit to the project site and also to the "Russian Village," the construction methods and materials are very similar with the use of deeply textured paving stones, telephone poles, and native rocks. Although there is no written documentation stating that this was built by Mr. Stys, the construction methods and materials are so unique that staff has concluded that it must have been built by the same person or his apprentice. According to the National Register of Historic Places Inventory, "Lay-More Tile" was a business owned and operated by Stys and his friend, Merle Mead. The tile itself is a dry, self-stacking, concrete block that appears in a number of the structures in Russian Village and also appears on the subject structure.

B. Landmark Designation: The subject site qualifies for landmark designation based upon much of the criteria from the City's Historic Preservation Ordinance, including such significant areas as historical and cultural significance and integrity. Details related to these areas of significance are contained in the Facts for Findings Section. The purpose of the designation is to preserve, protect, enhance, and perpetuate a significant feature that contributes to the cultural and aesthetic benefit of Rancho Cucamonga.

C. Environmental Assessment: The project is categorically exempt under Section 15331 as a Class 31 exemption of the guidelines for the California Environmental Quality Act.

FACTS FOR FINDING:

A. Historical and Cultural Significance:

Finding 1: It is or was once associated with events that made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.

Fact/s: The property is an example of early life during a time where resources were scarce after the Great Depression.

Finding 2: It is or was once associated with persons important to local, California, or national history.

Fact/s: The property is associated with Konstanty Stys, an important person to local history.

Finding 3: It embodies the distinctive characteristics of a type, period, or method of construction.

Fact/s: The dwelling is a good example of Folk Architecture during the Great Depression era. Its method of construction is especially unique in that the builder utilized recycled and salvaged materials.

Finding 4: It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.

Fact/s: Konstanty Stys was known for his unique craftsmanship, also cited in "Judy Wright's *Claremont: A Pictorial History"* as "vernacular, anonymous, spontaneous, indigenous, or rural" architecture.

Finding 5: It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.

Fact/s: The structure and property has potential to yield information about the Great Depression era and the local area.

B. Integrity:

Finding 1: Historic Landmarks must retain integrity from their period of significance with respect to location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its dilapidated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to the particular characteristics that support the property's eligibility.

Fact/s: The proposed landmark retains integrity from thep period of significance with respect to location, design, materials, workmanship, and association. It retains sufficient integrity to convey its historic, cultural, or architectural significance.

CORRESPONDENCE: The Historic Landmark Designation was advertised as a public hearing in the Inland Valley Daily Bulletin newspaper, the property was posted, and notices were mailed to all property owners within 660 feet of the project site.

RECOMMENDATION: Staff recommends that the Historic Preservation Commission recommend approval of Landmark Designation DRC2014-00206 to be forwarded to the City Council for final action.

Respectfully submitted,

Candyce Burnett
Planning Manager

Russian Village

Built of Rubble in the Depression, Houses Are Now Claremont's Pride

By JEFFREY MILLER, *Times Staff Writer*

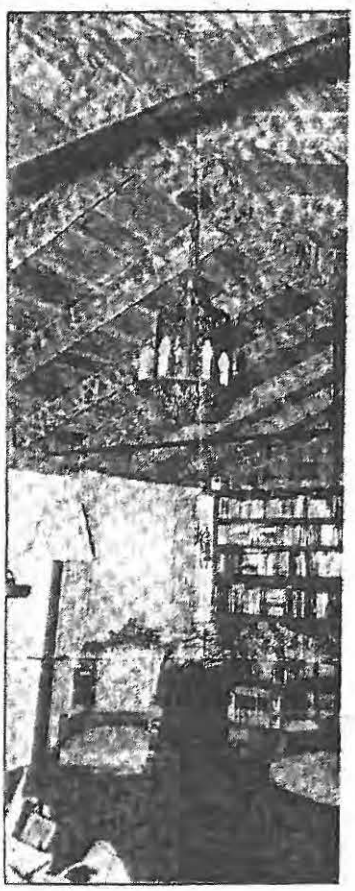
One might think that prospective homeowners would be less than thrilled to learn that their dream house was designed and constructed by untrained laborers using chunks of pavement, telephone poles and odds and ends scavenged from condemned buildings.

But to residents of Russian Village—15 houses built along South Mills Avenue in Claremont during the Great Depression by poor immigrant workers—these humble origins are a source of pride.

"You just develop real respect and affection for the people who built this," said resident Leo Snowiss as he admired the walls of his home, which was constructed with more than 2,500 concrete blocks that were chiseled from street rubble.

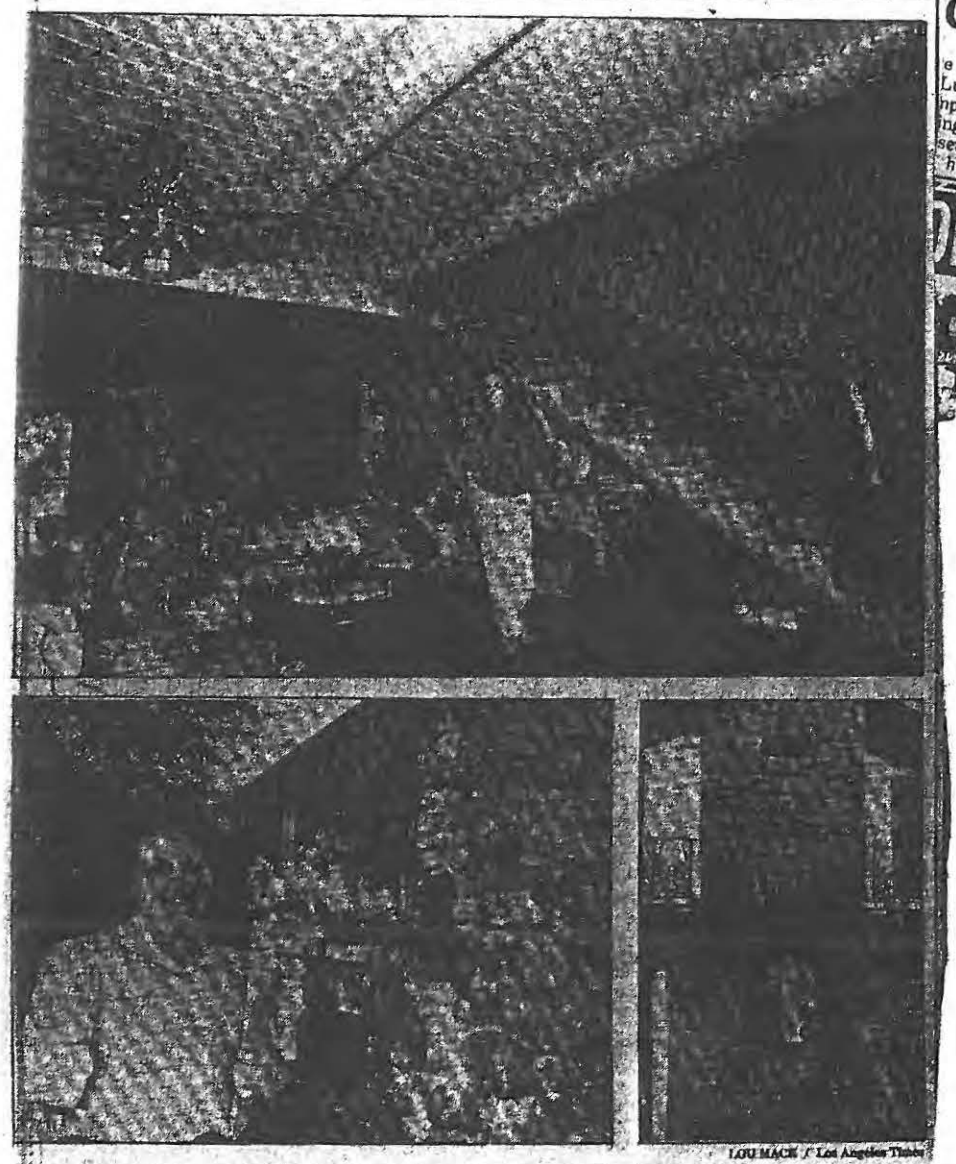
"They were very poor people," added Snowiss, a professor of political science at UCLA. "The Depression just wiped them out. They built [the houses] with the materials available. . . . Under the lash of necessity they could do it. It was really a classic American story."

Konstany Stys at work, 1931.



The key figure in the story of Russian Village is Konstany Stys, a Polish immigrant who came to the area in the early 1920s from Youngstown, Ohio, where he had been a steel worker.

Although he didn't have much money, formal education or experience in housing design, Stys created a neighborhood of hand-crafted homes that has been included on the National Register of Historic Places as a definitive example of "folk architecture."



Attracted by the construction work available at the nearby Claremont Colleges, Stys bought a plot of land among the citrus groves of south Claremont. In seeking building materials, Stys needed to look no farther than the large piles of rocks that had been cleared from the surrounding land to make it arable.

Using those rocks, along with larger boulders hauled down from the mountains and surplus lumber from construction sites at the colleges, Stys built a modest house in 1922 that established the village's rocky,

VILLAGE: Houses of Rubble

Continued from Page 1

rustic style.

At the onset of the Depression, Stys subdivided his land and sold parcels under generous terms to friends, relatives and co-workers who had been left destitute. Mortgage payments—not always collected—were as low as $5 a month. Stys lent home buyers his labor and his knack for obtaining low-cost building materials.

Stys' neighbors copied his architectural style, more out of financial necessity than aesthetic consistency. While most of the houses were built with the plentiful field stones, builders also used pavement from flood-damaged streets and red tiles scavenged from the roofs of buildings condemned after the 1933 earthquake. Fixtures were obtained from a salvage company in Los Angeles.

Most homes in Claremont daily story is that neighbors mistook Stys' accent as being Russian. Others say that some Claremont residents at the time perceived a hint of Bolshevism in the cooperative community established by the immigrant workers.

With one notable exception, the homes were built without blueprints, accounting for some unique floor plans. "Building design was dictated by available supplies and the needs of growing families.

"These houses are all different," said Snowiss, whose home features an exposed-beam ceiling made of surplus lumber hewn with an ax-like tool called an *adz* by Stys and his son Raymond. "They all grew like weeds, like beautiful weeds."

Only one house departed from this unplanned approach. Peter Ficker, a Pomona architect, owed Stys $80 for construction work. Short of money, Ficker offered to

retaining the house's historic features.

Although major exterior alterations require approval from the city, maintenance of the homes' historical character is largely on the honor system. Some residents even collect blocks of street rubble with which to build additions to their houses.

Please see VILLAGE, Page

VILLAGE: Untrained Builders' Work Lasts

Continued from Page 4

Stys, who died in 1961, built 10 homes elsewhere in his trademark rock-and-bubble style. The largest of these, in Rancho Cucamonga, later became the first Cask 'N Cleaver restaurant. Stys' wife, Antonina, lived in an artist's studio that Stys built near the restaurant until she moved to Northern California earlier this year.

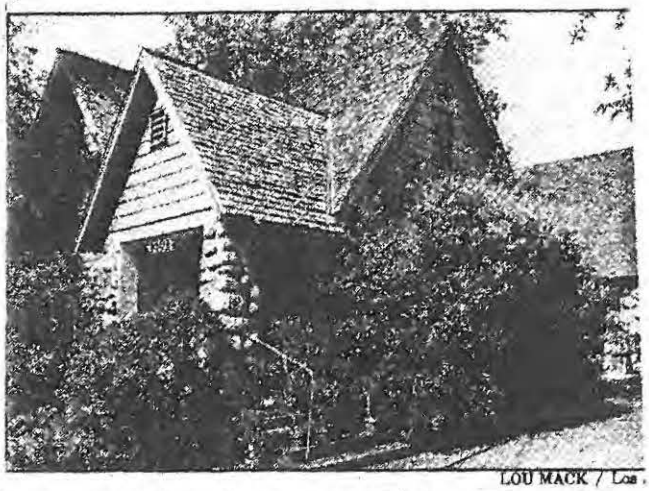
Each of the individually styled houses in Russian Village seems to have its own materials, history and anecdotes.

There is the European-style country home with seven steeply pitched gables, built in 1933 by Garret Batelaan, a 21-year-old who had taken correspondence courses in carpentry, plumbing and wiring but had never actually built a house. His first effort has held up well, despite Stys' admonition that the steep roof was structurally unsound and would collapse.

Then there is the house built in 1937 by Mr. and Mrs. Burton Blanchard, both 19 at the time. With no construction experience, the couple followed do-it-yourself manuals to build the home, using materials such as railroad ties and oil cans filled with cement.

The walls were made from 740 tons of concrete originally used to pave Holt Boulevard, purchased for a hauling charge of $35. The roof, taken from a condemned school building in Glendora, cost $120. The Blanchards paid $883.75 for the lot and all building materials.

The most expensive house in the neighborhood cost $5,000 to build. Last year a home that was built in 1939 for $1,500 sold for $198,000.



The largest home in the neighborhood is a triplex that Stys built to accommodate his extended family, including married children and in-laws. The home originally featured three separate dwellings attached to a common living room.

The home features sandstone walls salvaged from the Los Angeles County Courthouse and a red-tile roof from the earthquake-damaged Long Beach Library. Telephone poles were used for the structure's support beams and its main stairway.

"I like the style of it," said Joanne Lariviere, who bought the triplex five years ago and rents out two of its units. "It's more like you're living in the country when you live in Russian Village."

garage was the first house built by Stys, admits the traffic can be bothersome. But standing in her front yard, a few feet from two towering pines planted as Christmas trees by the Stys children more than 60 years ago, Will said the village's unique quality of life more than compensates.

"We love it here," she said. "These homes all have character. It's really interesting to live in a place with a history like this."

RESOLUTION NO. 14-01

A RESOLUTION OF THE HISTORIC PRESERVATION COMMISSION OF THE CITY OF RANCHO CUCAMONGA, CALIFORNIA, RECOMMENDING APPROVAL OF HISTORIC LANDMARK DESIGNATION DRC2014-00206, DESIGNATING THE PROPERTY A HISTORIC LANDMARK, LOCATED AT 8803 BAKER AVENUE; AND MAKING FINDINGS IN SUPPORT THEREOF - APN: 0207-271-40.

A. Recitals.

1. Dennis Myskow filed an application for a Landmark as described in the title of this Resolution. Hereinafter in this Resolution, the subject Landmark is referred to as "the application."

2. On April 23, 2014, the Historic Preservation Commission of the City of Rancho Cucamonga conducted a duly noticed public hearing on the application and concluded said hearing on that date.

3. All legal prerequisites prior to the adoption of this Resolution have occurred.

B. Resolution.

NOW, THEREFORE, it is hereby found, determined, and resolved by the Historic Preservation Commission of the City of Rancho Cucamonga as follows:

1. This Commission hereby specifically finds that all of the facts set forth in the Recitals, Part "A," of this Resolution are true and correct.

2. The application applies to approximately 0.5 acre of land, basically an L-shaped configuration, located at 8803 Baker Avenue.

3. Based upon substantial evidence presented to this Commission during the above-referenced public hearing on April 23, 2014, including written and oral staff reports, together with public testimony, and pursuant to Section 17.18.020 of the Rancho Cucamonga Municipal Code, this Commission hereby makes the following findings and facts:

A. Historical and Cultural Significance:

Finding 1: It is or was once associated with events that made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.

Fact/s: The property is an example of early life during a time where resources were scarce after the Great Depression.

Finding 2: It is or was once associated with persons important to local, California, or national history.

Fact/s: The property is associated with Konstanty Stys, an important person to local history.

Finding 3: It embodies the distinctive characteristics of a type, period, or method of construction.

Fact/s: The dwelling is a good example of Folk Architecture during the Depression era. Its method of construction is especially unique in that the builder utilized recycled and salvaged materials.

Finding 4: It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.

Fact/s: Konstanty Stys was known for his unique craftsmanship, also cited in "Judy Wright's *Claremont: A Pictorial History"* as "vernacular, anonymous, spontaneous, indigenous, or rural" architecture.

Finding 5: It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.

Fact/s: The structure and property has potential to yield information about the Depression era and the local area.

B. Integrity

Finding 1: Historic Landmarks must retain integrity from their period of significance with respect to location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its dilapidated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to the particular characteristics that support the property's eligibility.

Fact/s: The proposed landmark retains integrity from their period of significance with respect to location, design, materials, workmanship, and association. It retains sufficient integrity to convey its historic, cultural, or architectural significance.

4. This Commission hereby finds that the project has been reviewed and considered in compliance with the California Environmental Quality Act (CEQA) of 1970, as amended, and the Guidelines promulgated thereunder. The Commission finds that this Landmark Designation is exempt under CEQA, pursuant to State CEQA Guidelines Section 15331, as a Class 31 exemption (Historical Resource Restoration/Rehabilitation).

5. Based upon the findings and conclusions set forth in Paragraphs 1, 2, 3, and 4 above, this Commission hereby resolves that, pursuant to Section 17.18.020 of the Rancho Cucamonga Municipal Code, the Historic Preservation Commission of the City of Rancho Cucamonga hereby recommends approval of Landmark Designation on the 23rd day of April, 2014.

6. The Secretary to this Commission shall certify to the adoption of this Resolution.

APPROVED AND ADOPTED THIS 23RD DAY OF APRIL, 2014.

Historical Resources Impacts Analysis (McGee)

Memo

To: Michael Sizemore, Development Manager
Panattoni Development Company, Inc.

From: Kathryn McGee, Architectural Historian
kathryn@mcgeehistoric.com

Date: June 1, 2021

Re: 9th and Vineyard Development Project, Rancho Cucamonga, CA
Historical Resources Impacts Analysis for CEQA Review

Introduction

This memo provides review of potential historical resources impacts of the proposed 9th and Vineyard Development Project (proposed project) in Rancho Cucamonga, California. The project site is 47.15 acres, bounded by E. 9th Street to the north, Vineyard Avenue and Cucamonga Creek to the east, E. 8th Street to the south, and Baker Avenue to the west, including Assessor Parcel Numbers 0207-271-25, -27, -30, -40, -89, -93, -94, -96, and -97 (hereinafter referred to as "project site" or "subject property"). The subject property includes five existing buildings: 8803 Baker Avenue; 8855 Baker Avenue; 8729 E 9th Street; 8847 E 9th Street; and 8830 Vineyard Avenue. One of the existing buildings is considered an historical resource under the California Environmental Quality Act (CEQA): 8803 Baker Avenue, a single-family home. The proposed project involves rehabilitation and reuse of 8803 Baker Avenue as a community center, plans for which are currently being prepared and will be evaluated in a later report. The proposed project also entails the erection of three warehouse buildings that include office space and associated parking and landscaping. This memo provides evaluation of potential historical resources impacts of the proposed project on the *setting* of 8803 Baker Avenue.

Consultant Qualifications

Kathryn McGee is an architectural historian and historic preservation planner based in Los Angeles. With over twelve years of experience, she meets the Secretary of the Interior's Professional Qualification Standards in Architectural History. Ms. McGee was previously employed as a Senior Associate at historic preservation consulting firm Chattel, Inc. and launched an independent consulting practice in 2015. Her educational background includes a Bachelor of Arts degree in architectural history from the University of California, Santa Barbara and a Master of Urban and Regional Planning degree from the University of California, Irvine. She has also completed the Summer Program in Historic Preservation at the University of Southern California and is a LEED Accredited Professional with specialty in Neighborhood Development. Her consulting work entails writing reports for purposes of environmental and local project review; preparation of historic resource assessments and surveys; preparation of technical reports for General Plan Updates; evaluation of properties seeking or complying with

Mills Act Contracts; and consultation on adaptive reuse and federal Investment Tax Credit projects.

Regulatory Setting

City of Rancho Cucamonga

The City of Rancho Cucamonga Historic Preservation Ordinance (Ordinance No. 848) was adopted by City Council in 2011 and allows the City Council to designate Historic Landmarks, Points of Historic Interest, and Historic Districts. Relevant to evaluation of the subject property are designation criteria for historic landmarks, as described below:[1]

Designation Criteria for Historic Landmarks

A. The [City] Council may designate a property as a Historic Landmark if it meets the requirements of both paragraphs B and C of this Section.
B. Historic Landmarks must meet at least one of the following:
    1. It is or was once associated with events that have made significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.
    2. It is or was once associated with persons important to local, California, or national history.
    3. It embodies the distinctive characteristic of a type, period, or method of construction.
    4. It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.
    5. It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.
C. Historic Landmarks must retain integrity from their period of significance with respect to its location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its depilated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to particular characteristics that support the property's eligibility.

California Register

Based substantially on the National Register of Historic Places, the California Register of Historical Resources (California Register) is "an authoritative guide… used by state and local agencies, private groups, and citizens to identify the state's historical resources and to indicate what properties are to be protected."[2] For a property to be eligible for listing in the California Register, it must be found by the State Historical Resources Commission to be significant under at least one of the following four criteria:

[1] City of Rancho Cucamonga Ordinance No. 848, adopted July 6, 2011, *https://www.cityofrc.us/civicax/filebank/blobdload.aspx?BlobID=8222*, accessed April 21, 2019.

[2] California Public Resources Code §5024.1(a), *http://codes.lp.findlaw.com/cacode/PRC/1/d5/1/2/s5024.1*.

1) is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage; or
2) is associated with the lives of persons important in our past; or
3) embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual or possesses high artistic values; or
4) has yielded, or may be likely to yield, information important in prehistory or history.

Also included in the California Register are properties which have been formally determined eligible for listing in or are listed in the National Register; are registered State Historical Landmark Number 770, and all consecutively numbered landmarks above Number 770; and Points of Historical Interest, which have been reviewed and recommended to the State Historical Resources Commission for listing.

California Environmental Quality Act (CEQA)

The California Environmental Quality Act (CEQA) was enacted in 1970 and offers protection for identified historical resources. In general, for purposes of CEQA and environmental review, an "historical resource" is that which has been determined eligible for listing in the California Register, or one that is designated at the local level. The term "historical resource" includes the following:

1. A resource listed in, or determined to be eligible by the State Historical Resources Commission for listing in the California Register of Historical Resources (Pub Res Code SS5024.1, Title 14 CCR, Section 4850 et seq).
2. A resource included in a local register of historical resources, as defined in Section 5020.1(k) of the Public Resources Code or identified as significant in an historical resource survey meeting the requirements Section 5024.1(g) of the Public Resources Code, shall be presumed to be historically or culturally significant. Public agencies must treat any such resource as significant unless the preponderance of evidence demonstrates that it is not historically or culturally significant.
3. Any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California may be considered to an historical resource, provided the lead agency's determination is supported by substantial evidence in light of the whole record. Generally, a resource shall be considered by the lead agency to be "historically significant" if the resource meets the criteria for listing on the California Register (Pub Res Code SS5024.1, Title 14 CCR, Section 4852).
4. The fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources (pursuant to 5020.1 (k) of the Public Resources Code), or identified in an historical survey (meeting the criteria in Section 5024.1(g) of the Public Resources Code) does not preclude a lead agency from determining that the resource may be an historical resource as defined in Public Resources Code Sections 5020.1 (j) or 5024.1.

Summary of Historic Resource Eligibility

A comprehensive historic resource assessment of 8803 Baker Avenue was prepared by this author in 2019, finding 8803 Baker Avenue eligible for listing as a City of Rancho Cucamonga Historic Landmark and in the California Register.[3] The property is significant as an important and rare example of local Folk Architecture, for its method of construction using salvaged local materials, for association with its original owner-builder, James Carwell, and for association with notable local builder Konstanty Stys. Due to alterations, especially loss of all original window sash, the subject property may not retain sufficient integrity for listing in the or National Register of Historic Places. It does not appear to be part of any historic district. Because it appears eligible for listing in the California Register and local designation, it is considered an historical resource for purposes of CEQA and local project review.

The character-defining features of 8803 Baker Avenue, as defined in this author's 2019 historic resource assessment report, are physical features extant from the period of significance, 1952-1953, that convey the property's significant historical associations. These features are listed below and for purposes of this memo are limited to the building exterior and site features, as the interior will be discussed in a later report on rehabilitation and reuse of the house:

- One-story scale and massing of house
- Primary façade of house oriented south, positioned along street
- Exterior walls of house made of concrete rubble
- West elevation chimney made of concrete rubble
- East elevation outdoor fireplace made of brick and concrete rubble
- Flat roof structure made of telephone poles and wood boards
- Full front porch with simple concrete structure, accessed by steps
- Pattern of door and window openings and concrete slip sills (where extant)
- Low curved walls located west of house bordering front yard
- Low brick pillars that were once components of the front yard fence

Archaeology

In 2020, Archaeologist Curt Duke, RPA, of Duke Cultural Resources Management prepared a report and field survey at the subject property and found the ground to be highly disturbed and concluded there is low potential of the proposed project to impact archaeological resources.[4]

Thresholds for Determining Significance of Impacts

According to the CEQA Guidelines, a project would result in a significant impact to historical resources if it would cause a *substantial adverse change* in the significance of an historical resource (California PRC §21084.1). A substantial adverse change is defined in CEQA Guidelines §15064.5(4)(b)(1), as "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the *significance of an historical resource*

[3] Kathryn McGee, "Historic Resource Assessment: 8803 Baker Avenue, Rancho Cucamonga, CA 91730," prepared for Panattoni Development Company, April 26, 2019.

[4] Duke Cultural Resources Management, Letter report to Michael Sizemore, Panattoni Development Company, "Archaeological Resource Validation Memorandum for the 9th and Vineyard Development Project, City of Rancho Cucamonga, San Bernardino County, California," May 14, 2020.

would be materially impaired." The significance of an historical resource is materially impaired, according to CEQA Guidelines §15064.5(4)(b)(2), when a project:

> (A) Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register of Historical Resources; or
> (B) Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to §5020.1(k) of the Public Resources Code or its identification in an historical resources survey meeting the requirements of §5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of the evidence that the resource is not historically or culturally significant; or
> (C) Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA. [5]

CEQA Guidelines also specify a means of evaluating the relative significance of project impacts on historical resources. CEQA Guidelines §15064.5(b)(3) state:

> Generally, a project that follows the *Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings or the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings* (*Secretary's Standards*, Weeks and Grimmer, 1995), shall be considered as mitigated to a level of less than a significant impact on the historical resource. [6]

Under CEQA, the key issue relates to how a proposed development may impact the potential eligibility of a structure(s) or a site for designation as an historic resource. The *Secretary's Standards* were developed by the U.S. Department of the Interior to evaluate and approve work for federal grants for historic buildings and then for the federal rehabilitation tax credit (see 36 Code of Federal Regulations Section 67.7). The *Secretary's Standards* are used for regulatory approvals for designated resources but not for resource evaluations. CEQA has a "safe harbor" by providing either a categorical exemption or a negative declaration for a project which meets the *Secretary's Standards* (see State CEQA Guidelines Section 15331 and 15064.S(b)(3)). According to Appendix G of the State CEQA Guidelines, the appropriate threshold of significance is whether a project causes a substantial adverse change in the significance of a historical resource as defined in State CEQA Guidelines Section 15064.5. That Section provides a detailed definition of "substantial adverse change." In summary, the definition of substantial adverse change and, hence, the threshold of significance, is whether a project demolishes or materially alters in an adverse manner the physical characteristics that convey historical significance of the resource or that justify its eligibility for the California Register of Historical

[5] CEQA Guidelines §15064.5(4)(b)(2). Emphasis added.
[6] CEQA Guidelines §15604.5(b)(3).

Resources or a local register. In other words, if a project removes the essential character-defining features and/or would render an eligible historic resource ineligible, then there would be a significant adverse effect under CEQA.

Secretary of the Interior's Standards for Treatment of Historic Properties

The *Secretary's Standards* consist of four treatments, the most common of which is rehabilitation, which is defined as "the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features which convey its historical, cultural, or architectural values." The rehabilitation standards are:

1. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships.
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.
3. Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.
4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.
6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.
9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.
10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

The *Secretary's Standards* are intended to be flexible and adaptable to specific project conditions to balance change while retaining historic building fabric to the maximum extent feasible. The National Park Service has created a substantial amount of written guidance, most of it available online, including Illustrated Guidelines for Rehabilitating Historic Buildings, Preservation Briefs, Preservation Tech Notes, and Interpreting the Standards Bulletins (ITS).

Description of Proposed Project

The proposed project is described in a drawing set and renderings prepared by HPA Architecture, dated 12/07/20. For purposes of evaluation in this memo, the site plan focusing on the west portion of the project site nearest 8803 Baker Avenue, two sheets of elevation drawings, and three 3-D renderings were reviewed. This memo is limited to evaluation of potential impacts of the proposed project on the *setting* of 8803 Baker Avenue. As previously noted, a more detailed evaluation of the rehabilitation and reuse project on the 8803 Baker Avenue exterior and interior will be addressed in a future report.

The proposed project involves retention of 8803 Baker Avenue in place and entails the erection of three warehouse buildings that include office space (over one-million square feet of interior space in total), addition of surface parking and landscaping, and implementation of water and storm drain improvements. 8803 Baker Avenue is positioned in the west portion of the project site, just west of the proposed new "Building 3" warehouse. As Building 3 is the primary building visible from 8803 Baker Avenue, it is focused on in the following description.

Building 3 is proposed as a 270,356 square foot building consisting of 5,000 square feet of office space at first and second floors and 265,356 square feet of warehouse space. The building will be oriented west toward Baker Avenue and set back approximately 147-feet from the sidewalk edge. 8803 Baker Avenue will remain in place, roughly centered in front of Building 3. The west façade of Building 3 will be set back more than 37-feet from the east elevation of 8803 Baker Avenue. New surface parking lots with spaces for 107 vehicles will be constructed to the north and south of 8803 Baker Avenue, located approximately 90-feet away from 8803 Baker Avenue on either side. Vehicular access to Building 3 and the larger project site will be provided via driveways off Baker Avenue.

Building 3 will be 36-feet tall and utilitarian. The floor plan is generally rectangular. The building is composed as a horizontal mass with architecture that is clearly contemporary, expressed in simple, geometric forms. Exterior walls have smooth surfaces painted in off-white and grey. The primary west façade is twelve bays wide, distinguished by building entrances at its north and south ends. Outermost bays include windows with clean anodized mullions, blue reflective glazing, and metal canopies at first and second floors while three alternating central bays have similar windows though at the second floor only. The north and south elevations are generally void of fenestration, except near their west ends where there are windows. The east elevation has no windows and includes a loading dock with 28 dock doors.

Evaluation of Proposed Project

The following focuses on evaluation of potential historical resources impacts of the proposed project on the *setting* of 8803 Baker Avenue. The proposed project will not adversely impact the setting of the historical resource for the following reasons:

- The setting of 8803 Baker Avenue has changed substantially over time, outside the property's period of significance (1952-1953), and is not considered a character-defining feature of the historical resource. At the time of construction of the house in 1952-1953,

the property was surrounded by orange and lemon groves, which have been removed. Thus, the rural and agricultural character of the historic setting is gone. Additionally, the house was originally designed with associated site features such as low rubble and rock walls surrounding a pool and serving as fencing, as well as a rock monument in a corner of the back yard. Most of these early features are gone; alterations also include removal of an east elevation covered patio, a north elevation addition, a freestanding garage, a swimming pool, front yard fencing, site walls, and paving, all of which were removed in 2016. An adjacent house constructed by the original owner to the south in the early 1950s has also been demolished. Because the setting of the existing building has already been substantially altered, it is not considered a character-defining feature of the historical resource and therefore further changes to it would not adversely impact the setting of the historical resource.

- The sense of scale and mass of the existing one-story house, 8803 Baker Avenue, will not be adversely impacted by the proposed new construction due to the substantial setback (over 37-feet), of Building 3 from the east elevation of 8803 Baker Avenue. The setback from the east elevation of 8803 Baker Avenue is approximately the same as the new building's height of 36 feet. Therefore, the new budling will simply not have the ability to overwhelm the existing building.

- The architectural design of Building 3 has been sensitively designed to serve as a backdrop behind 8803 Baker Avenue. Building 3 will be utilitarian with simple geometric forms composed in such a way that it will not compete with the architecture of the existing historic house. The proposed design and materials, with painted and glazed surfaces in muted colors, will be obviously contemporary and will not promote a false sense of history. Given that the new building will be set so far back from 8803 Baker Avenue coupled with the fact that the design and materials are modest, it could not reasonably be said to compete with the architecture of 8803 Baker Avenue.

The following evaluates the proposed project for conformance with the Secretary's Standards; the most applicable standard being Standard 9:

1. *A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships.*
   The proposed project will not demolish existing historic buildings; 8803 Baker Avenue will be retained in placed, rehabilitated, and reused as a community center, which is a compatible use that will require minimal changes to the existing materials and features. Plans for that project have not yet been prepared and will be described and evaluated in detail in a future report.

2. *The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.*
   As previously noted, plans for rehabilitation and reuse of 8803 Baker Avenue have not yet been prepared and will be described in detail in a future report. However, the proposed new construction will not alter spatial relationships that characterize 8803

Baker Avenue. The new buildings will be set back a significant distance from 8803 Baker Avenue and therefore will not overwhelm the existing sense of scale and mass of the historic one-story residence. The setting of 8803 Baker Avenue has not been previously identified as a character-defining feature and therefore the spatial relationship of the existing single-family home to its setting will not be adversely impacted by the proposed project.

3. *Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.*
   The proposed project is clearly contemporary, with use of modern architectural design and materials. It does not mimic the appearance of 8803 Baker Avenue nor other historical styles. Therefore, it will not promote a false sense of history.

4. *Changes to a property that have acquired historic significance in their own right will be retained and preserved.*
   The proposed project does not involve demolition of any historic buildings. 8803 Baker Avenue will be retained in place, rehabilitated, and reused. Therefore, the proposed project will not remove any buildings or features that have taken on historic significance.

5. *Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.*
   This standard does not readily apply. Plans for rehabilitation and reuse of 8803 Baker Avenue have not yet been prepared and will be described in detail in a future report.

6. *Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.*
   This standard does not readily apply. Plans for rehabilitation and reuse of 8803 Baker Avenue have not yet been prepared and will be described in detail in a future report.

7. *Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.*
   This standard does not readily apply. Plans for rehabilitation and reuse of 8803 Baker Avenue have not yet been prepared and will be described in detail in a future report.

8. *Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.*
   The proposed project is not anticipated to encounter archaeological resources.

9. *New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.*

The proposed new buildings will not destroy historic materials, features, or spatial relationships that characterize 8803 Baker Avenue. While plans for the proposed rehabilitation and reuse of 8803 Baker Avenue are still being made, the proposed new buildings, especially Building 3, which will be closest to 8803 Baker Avenue, have been carefully designed for compatibility with the historic building. The new architecture will be obviously contemporary in design and materials and thus differentiated from the historic building to avoid promoting a false sense of history. The proposed project will be compatible with the historic building, substantially set back from 8803 Baker Avenue by a length of distance approximately equaling its height. Therefore, the new construction will not have the sense of hanging over or overwhelming the one-story historic residence. The setting of 8803 Baker Avenue was not previously identified as a character-defining feature and therefore will not be adversely impacted by the proposed project.

10. *New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.*
    The proposed project is not considered removable, but it's construction will not impair the essential form and integrity of 8803 Baker Avenue, as that building will be rehabilitated and reused in its current location.

Based on the above analysis, the proposed project reviewed in this memo is in conformance with the *Secretary's Standards*.

Conclusion

Potential historical resources impacts of the proposed 9th and Vineyard Development Project were described and evaluated in this memo, which focused on potential impacts to the *setting* of 8803 Baker Avenue. Potential impacts of the rehabilitation and reuse of 8803 Baker Avenue on that building exterior and interior will be evaluated in a future report once plans for that project are prepared. The proposed project reviewed in this memo was found to be in conformance with the *Secretary's Standards*, as the setting of 8803 Baker Avenue has previously been altered and is not considered character-defining; the new construction is substantially set back from 8803 Baker Avenue; and the new construction is designed with architecture and materials that are simple and modest such that they will recede visually and simply serve as a backdrop. Therefore, the proposed project, as reviewed in this memo, will not have a significant effect historical resources, pursuant to Section 21084.1 of CEQA.

Appendix D-5

Historic Resources Impacts Assessment (Rincon Consultants)

Rincon Consultants, Inc.
250 East 1st Street, Suite 1400
Los Angeles, California 90012

Subject: Historical Resources Impacts Assessment for the 9th and Vineyard Development Project in Rancho Cucamonga, California

Dear Mr. Eoff:

This letter report presents the findings of a historical resources impacts assessment completed in support of the 9th and Vineyard Development Project (proposed project), located at the intersection of 9th Street and Vineyard Avenue in Rancho Cucamonga, California. A Draft Environmental Impact Report (EIR) was previously prepared in support of the project and circulated to the public in 2022. Due to changes in site conditions and refinements to the project description, the project requires the recirculation of the Draft EIR. The project applicant, CP Logistics Vineyard, LLC retained Rincon Consultants, Inc. (Rincon) to support the recirculation of the Draft EIR and the proposed project's compliance with the California Environmental Quality Act (CEQA). This letter report documents the results of the tasks performed by Rincon related to historical resources, specifically review of background information and conceptual designs associated with the proposed project and an assessment of the proposed project's potential to impact historical resources in accordance with CEQA. All work was completed in accordance with CEQA and applicable local regulations, including the City of Rancho Cucamonga's Historic Preservation Ordinance.

Project Site and Description

The project site is located in the City of Rancho Cucamonga, San Bernardino County. Specifically, the proposed project site encompasses portions of Section 9 of Township 01 South, Range 07 West on the *Guasti*, *California* United States Geological Survey (USGS) 7.5-minute topographic quadrangle (Figure 1). The project site is bound by 9th Street to the north, Baker Avenue to the west, Vineyard Avenue to the east, and the railroad corridor to the south. The roughly 50-acre project site is relatively flat and encompasses the following nine Assessor Parcel Numbers (APNs): 0207-271-25, -27, -39, -40, -89, -93, -94, -96, and -97. Although it is primarily undeveloped, a vacant residence is situated in the western portion of the project site, at 8803 Baker Avenue (Figure 2). Discussed in detail in the *Results* section below, the property (known as the Baker House) has been previously evaluated for historical significance and is considered a historical resources pursuant to CEQA.

The following project description has been adapted from information provided by CP Logistics Vineyard, LLC. The proposed project would involve construction of three warehouse buildings totaling 982,096 square feet (sf). Building 1 would be located on the east side of the project site and consist of 611,574 sf, inclusive of 4,000 sf of office space. Building 1 would have a maximum height of 48 feet 6 inches and operate as a cross-dock ware residence with 45 dock doors on the north side of the building and 49 dock doors on the souths side of the building, and 126 trailer parking spaces within the truck court/loading area. The truck courts/loading areas for Building 1 would be enclosed and

screened from public viewing areas by 8-foot-tall solid screen walls. Building 2 would be situated in the center of the project site and consist of 107,541 sf, inclusive of 4,000 sf of office space. Building 2 would have a maximum height of 45 feet and contain 12 dock doors and 12 trailer parking spaces on the east side of the building. Building 3 would be located on the west side of the project site and consist of 262,981 sf, inclusive of 5,000 sf of office space. Building 3 would have a maximum height of 46 feet 6 inches and contain 28 dock doors and 30 trailer spaces on the east side of the building and enclosed with an 8-foot-tall tube steel fence. An employment patio or break area would be provided outside each building for employee benefit. The project would also rehabilitate the Baker House for future use as a community center.

Regulatory Framework

This section includes a discussion of the applicable state and local laws, ordinances, regulations, and standards governing cultural resources, which must be adhered to before and during implementation of the project.

California Environmental Quality Act

California Public Resources Code (PRC) Section 21804.1 requires lead agencies determine if a project could have a significant impact on historical or unique archaeological resources. As defined in PRC Section 21084.1, a historical resource is a resource listed in, or determined eligible for listing in, the California Register of Historical Resources (CRHR), a resource included in a local register of historical resources or identified in a historical resources survey pursuant to PRC Section 5024.1(g), or any object, building, structure, site, area, place, record, or manuscript that a lead agency determines to be historically significant. PRC Section 21084.1 also states resources meeting the above criteria are presumed to be historically or cultural significant unless the preponderance of evidence demonstrates otherwise. Resources listed in the National Register of Historic Places (NRHP) are automatically listed in the CRHR and are, therefore, historical resources under CEQA. Historical resources may include eligible built environment resources and archaeological resources of the precontact or historic periods.

According to CEQA, an impact that results in a substantial adverse change in the significance of a historical resource is considered a significant impact on the environment. A substantial adverse change could result from physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of the historical resource would be materially impaired (CEQA Guidelines Section 15064.5 [b][1]). Material impairment is defined as demolition or alteration in an adverse manner [of] those characteristics of a historical resource that convey its historical significance and that justify its inclusion in, or eligibility for inclusion in, the CRHR or a local register (CEQA Guidelines Section 15064.5[b][2][A]).

Section 15126.4 of the CEQA Guidelines stipulates an EIR shall describe feasible measures to minimize significant adverse impacts. In addition to being fully enforceable, mitigation measures must be completed within a defined time period and be roughly proportional to the impacts of the project. Generally, a project which is found to comply with the Secretary of the Interior's Standards for the Treatment of Historic Properties (SOI) Standards is considered to be mitigated below a level of significance (CEQA Guidelines Section 15126.4 [b][1]).

National Register of Historic Places

Although the project does not have a federal nexus, properties which are listed in or have been formally determined eligible for listing in the NRHP are automatically listed in the CRHR. The following is therefore presented to provide applicable regulatory context. The NRHP was authorized by Section

101 of the National Historic Preservation Act and is the nation's official list of cultural resources worthy of preservation. The NRHP recognizes the quality of significance in American, state, and local history, architecture, archaeology, engineering, and culture is present in districts, sites, buildings, structures, and objects. Per 36 CFR Part 60.4, a property is eligible for listing in the NRHP if it meets one or more of the following criteria:

Criterion A: Is associated with events that have made a significant contribution to the broad patterns of our history

Criterion B: Is associated with the lives of persons significant in our past

Criterion C: Embodies the distinctive characteristics of a type, period, or method of installation, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction

Criterion D: Has yielded, or may be likely to yield, information important in prehistory or history

In addition to meeting at least one of the above designation criteria, eligible resources must also retain integrity. The National Park Service recognizes seven aspects or qualities that, considered together, define historic integrity. To retain integrity, a property must possess several, if not all, of these seven qualities, defined as follows:

Location: The place where the historic property was constructed or the place where the historic event occurred

Design: The combination of elements that create the form, plan, space, structure, and style of a property

Setting: The physical environment of a historic property

Materials: The physical elements that were combined or deposited during a particular period of time and in a particular pattern or configuration to form a historic property

Workmanship: The physical evidence of the crafts of a particular culture or people during any given period in history or prehistory

Feeling: A property's expression of the aesthetic or historic sense of a particular period of time

Association: The direct link between an important historic event or person and a historic property

Certain properties are generally considered ineligible for listing in the NRHP, including cemeteries, birthplaces, graves of historical figures, properties owned by religious institutions, relocated structures, or commemorative properties. Additionally, a property must be at least 50 years of age to be eligible for listing in the NRHP. The National Park Service states that 50 years is the general estimate of the time needed to develop the necessary historical perspective to evaluate significance (National Park Service 1997:41). Properties which are less than 50 years must be determined to have "exceptional importance" to be considered eligible for NRHP listing.

California Register of Historical Resources

The CRHR was established in 1992 and codified by PRC Sections 5024.1 and 4852. The CRHR is an authoritative listing and guide to be used by state and local agencies, private groups, and citizens in identifying the existing historical resources of the state and to indicate which resources deserve to be protected, to the extent prudent and feasible, from substantial adverse change (Public Resources Code, 5024.1(a)). The criteria for eligibility for the CRHR are consistent with the NRHP criteria but have been modified for state use in order to include a range of historical resources that better reflect the

history of California (Public Resources Code, 5024.1(b)). Unlike the NRHP however, the CRHR does not have a defined age threshold for eligibility; rather, a resource may be eligible for the CRHR if it can be demonstrated sufficient time has passed to understand its historical or architectural significance (California Office of Historic Preservation 2006). Furthermore, resources may still be eligible for listing in the CRHR even if they do not retain sufficient integrity for NRHP eligibility (California Office of Historic Preservation 2006). Generally, the California Office of Historic Preservation recommends resources over 45 years of age be recorded and evaluated for historical resources eligibility (California Office of Historic Preservation 1995:2).

A property is eligible for listing in the CRHR if it meets one of more of the following criteria:

Criterion 1: Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage

Criterion 2: Is associated with the lives of persons important to our past

Criterion 3: Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values

Criterion 4: Has yielded, or may be likely to yield, information important in prehistory or history

Compliance with the Standards

For the purposes of CEQA, impacts to a historical resource are considered mitigated below a level of significance when the project conforms to the SOI Standards (CEQA Guidelines §15126.4 [b][1]). The goal of the SOI Standards is to preserve the historic materials and distinctive character of a historical resource. Character-defining features are the tangible, visual elements of a building—including its setting, shape, materials, construction, interior spaces, and details—that collectively creates its historic identity and conveys its historic significance.

The SOI Standards establish professional standards and provide advice on the preservation and protection of historic properties and make broad-brush recommendations for maintaining, repairing, replacing historic materials, and designing new additions or making alterations. They cannot be used, in and of themselves, to make essential decisions about which features of a historic property should be saved and which might be changed. Rather, once an appropriate treatment is selected, the SOI Standards provide philosophical consistency to the work. There are SOI Standards for four distinct but interrelated approaches to the treatment of historic properties: preservation, rehabilitation, restoration, and reconstruction.

According to the SOI Standards, rehabilitation is deemed appropriate "when repair and replacement of deteriorated features are necessary, when alterations or additions to the property are planned for a new or continued use, and when its depiction at a particular period of time is not appropriate, rehabilitation may be considered as a treatment." The following lists the SOI Standards for Rehabilitation, which are most applicable of the SOI Standards to the proposed project:

1. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships.
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.
3. Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.

4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.
6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.
9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.

New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

City of Rancho Cucamonga Landmarks

City County may designate a property as a Historic Landmark if it meets the requirements of both paragraphs B and C of Ordinance No. 848, the City of Rancho Cucamonga Historic Preservation Ordinance, passed in 2011:

B. Historic Landmarks must meet at least one of the following:
    1. It is or was once associated with events that have made significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.
    2. It is or was once associated with persons important to local, California, or national history.
    3. It embodies the distinctive characteristic of a type, period, or method of construction.
    4. It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.
    5. It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.

C. Historic Landmarks must retain integrity from their period of significance with respect to its location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its depilated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to particular characteristics that support the property's eligibility (City of Rancho Cucamonga 2011).

Background Research and Design Review

Methods

Rincon's background research consisted of review of the following throughout June and July 2023:

- *Historic Resource Assessment-8803 Baker Avenue Rancho Cucamonga, CA 91730*, prepared by Kathryn McGee in April 2019 and revised in June 2021 including the following attachment: Attachment D-2014 City Staff Report Staff Report Regarding Historic Landmark Designation (DRC2014-00206) (McGee 2021a)
- *9th and Vineyard Development Project, Rancho Cucamonga, CA Historical Resources Impacts Analysis for CEQA Review*, Prepared by Kathryn McGee in June 2021 (McGee 2021b)
- *Baker House Rehabilitation Existing Conditions Memo*, prepared by Page & Turnbull in October 2021

In addition to those noted above, Rincon reviewed the following, which were recently prepared in support of the project's design development:

- *Baker House Rehabilitation Existing Conditions Memorandum*, Prepared by Page & Turnbull in October 2021
- *Baker Community Center Conceptual Design Package*, Prepared by Page & Turnbull in October 2021

Results

Review of the documents noted above indicates that 8803 Baker Avenue has undergone previous recordation and evaluation. Most recently, the property was recorded and evaluated by Katherine McGee, in the 2021 *Historic Resource Assessment-8803 Baker Avenue Rancho Cucamonga, CA 91730* (McGee 2021a) (Attachment B). McGee 2021a concluded that the property is eligible for listing in the CRHR and for local designation as a City of Rancho Cucamonga Historic Landmark under Criterion 3/3, as an important and rare example of local Folk Architecture (McGee 2021a). Due to alterations, McGee concluded that the property may not retain sufficient integrity for listing in the NRHP (McGee 2021a). However, due to its CRHR and local register eligibility, the property is considered a historical resource pursuant to CEQA. McGee 2021a additionally noted the property's period of significance as 1952-1953, and outlined its character-defining features, or those that convey its significance, as follows:

- Exterior
  - One-story scale and massing of residence
  - Primary façade of residence oriented south, positioned along street
  - Exterior walls of residence made of concrete rubble
  - West elevation chimney made of concrete rubble
  - East elevation outdoor fireplace made of brick and concrete rubble
  - Flat roof structure made of telephone poles and wood boards
  - Full front porch with simple concrete structure, accessed by steps
  - Pattern of door and window openings and concrete slip sills (where extant)
  - Low curved walls located west of residence bordering front yard
  - Low brick pillars that were once components of the front yard fence

- Site Features
  - Low curved walls located west of house bordering front yard
  - Low brick pillars that were once components of the front yard
- Interior
  - Configuration of public spaces, including kitchen, hallway, living room
  - Living room fireplace on west wall, with integrated concrete and stone and brick work
  - Telephone pole and wood ceilings where they occur throughout

A partial historical resources impacts analysis of the current project was also prepared by McGee in 2021 in the *9th and Vineyard Development Project, Rancho Cucamonga, CA Historical Resources Impacts Analysis for CEQA Review* (McGee 2021b) (Attachment C). The analysis was focused on potential impacts on the Baker House relating to the construction of three warehouse buildings within the project site. At the time McGee 2021b was prepared, designs associated with the rehabilitation of the Baker House had not yet been developed. Therefore, the analysis focused on the setting of the Baker House and analyzed the potential impacts of the construction of three warehouse buildings within the project site on its setting. McGee 2021b concludes: "The proposed project reviewed in this memo was found to be in conformance with the SOI Standards, as the setting of 8803 Baker Avenue has previously been altered and is not considered character-defining; the new construction is substantially set back from 8803 Baker Avenue; and the new construction is designed with architecture and materials that are simple and modest such that they will recede visually and simply serve as a backdrop. Therefore, the proposed project, as reviewed in this memo, will not have a significant effect historical resources, pursuant to Section 21084.1 of CEQA" (McGee 2021b).

Conclusions and Recommendations

The impact analysis included here is organized based on the cultural resources thresholds included in CEQA Guidelines Appendix G: Environmental Checklist Form:

a. Would the project cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5?
b. Would the project cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?
c. Would the project disturb any human remains, including those interred outside of dedicated cemeteries?

Threshold A broadly refers to historical resources. To more clearly differentiate between archaeological and built environment resources, we have chosen to limit analysis under Threshold A to built environment resources. Archaeological resources, including those that may be considered historical resources pursuant to Section 15064.5 and those that may be considered unique archaeological resources pursuant to Section 21083.2, are considered under Threshold B and are discussed in Section 4.5-Cultural Resources and Section 4.17-Trical Cultural Resources of the EIR prepared by Rincon in support of the project. An analysis of the potential of the project to disturb human remains, including those interred outside dedicated cemeteries, is also included in Section 4.5-Cultural Resources of the EIR.

Impacts Analysis

In consideration of potential impacts of the proposed project on the Baker House, Rincon concurs with the findings presented in McGee 2021b, that the construction of three warehouses within the project site would not result in the material impairment of the Baker House resulting from alterations to its setting. The current setting of the Baker House consists primarily of undeveloped open space; the building is immediately surrounded by a few mature trees and shrubs. The proposed warehouse buildings appear sufficiently setback from the Baker House such that they would not significantly alter its current setting. Additionally, as a resource eligible for historical resources designation for its architecture, the setting of the Baker House is not essential in the resource's ability to convey its significance. Rather the building conveys its significance via the character-defining features outlined in McGee 2021a, none of which would be altered by the construction of the warehouses. Additionally, as noted in the McGee 2021b, the proposed warehouses would be differentiated from the Baker House by featuring contemporary designs and materials. As recommended in the SOI Standards, the contemporary design and materials of the proposed warehouse buildings would prevent the project from creating a false sense of historical development.

Since the time the McGee 2021b was prepared, project plans have progressed to include development of conceptual designs for the Baker House , presented in the *Baker Community Center Conceptual Design Package* (Conceptual Design Package) (Attachment D), prepared by Page & Turnbull in October 2021 The Conceptual Design Package includes three proposed concepts (Concept 1, Concept 2, and Concept 3) for rehabilitation of the Baker House into a community center. Each concept consists of a proposed interior layout including the following elements: a kitchen, office, great room, restroom, and accessible restroom. Each concept additionally includes a proposed site plan for the area immediately surrounding the Baker House, integrating the following elements not historically or currently present within the project site: playground, community garden, outdoor event space, and parking.

As previously noted in the *Regulatory Framework* Section of this memorandum, generally, a project which is found to comply with the SOI Standards is considered to be mitigated below a level of significance in accordance with CEQA. The SOI Standards for Rehabilitation, those most applicable to the proposed project as the Baker House is proposed to rehabilitated for a new use, allow for the alteration of a historical resource to make possible a compatible use while preserving those portions or features which convey its historical, cultural, or architectural values (Grimmer 2017).

The configuration of the residence's interior spaces, including the kitchen, hallway, and living room, were identified in McGee 2021a as character-defining (McGee 2021). All three of the concepts propose rearrangement of these interior spaces to create a more open floor plan appropriate for the residence's proposed use as a community center. As previously noted, the SOI Standards allow for flexibility in terms of alterations, in particular those necessary to facilitate the continued use of a resource. If alterations are implemented as sensitively as possible, it is possible for the project to comply with the SOI Standards despite the rearrangement of the residence's interior spaces. (For example, this would include the retention of the residence's other interior character-defining features such as telephone pole rafters, wood ceilings, and the living room fireplace.),

None of the concepts propose the alteration of the character-defining features of the residence's exterior or its site, for example its massing or concrete rubble walls. Rather, implementation of the concepts would primarily result in the incorporation of several new elements, for example a playground and community garden, into the area surrounding the residence, to support its new use as a community center. As its character-defining features would not be altered, this portion of the project appears in compliance with the SOI Standards as presented in all three concepts and none would result in the material impairment of the exterior of the Baker House.

Despite conceptual compliance with the SOI Standards, the current concepts are still in their preliminary stages and will be subject to further refinement. Accordingly, they do not provide detailed treatment methods for those character-defining features which will be affected or dictate replacement materials or finishes that may need repair or replacement. Therefore, Mitigation Measure CUL-1 Standards Rehabilitation Review, would be implemented to ensure that the project remains in compliance with the SOI Standards as it progresses though the design and construction phases. Additionally, to reduce potential impacts to historical resources that have the potential to occur as a result of the Baker House 's vacancy during construction, Mitigation Measure CUL-2 Mothballing Plan, would be implemented. In addition, as the proposed project includes a change in use for the Baker House, which would result in its material alteration, Mitigation Measure CUL-3 Interpretive Display would be implemented to further reduce impacts to the greatest extent feasible.

An analysis of potential impacts resulting from construction-related groundborne vibration associated with the project is presented in Section 4.13-14 of the EIR prepared by Rincon in support of the project (Rincon 2023). For the purposes of the analysis of the potential of construction related vibration to significantly impact historical resources, impacts would be considered significant if they would result in physical damage to historical resources. According to the analysis presented in Section 4.13-14, impacts resulting from construction-related vibration associated with the project would be less than significant for all buildings located over 37 feet from proposed construction activities. Accordingly, although unlikely, construction related activities have the potential to result in physical damage defined as minor cosmetic (i.e., non-structural) damage to the Baker House. Potential impacts to the Baker House as a result of construction vibration would be mitigated to less than significant with implementation of Mitigation Measure NOI-3 Construction Vibration, the details of which are included in Section 4.13-14 of the EIR, and no additional mitigation measures are necessary to reduce potential impacts to historical resources as a result of construction related vibration.

Recommended Mitigation

CUL-1 Standards Rehabilitation Review

The project team shall retain a qualified professional who meets the Secretary of the Interior's Professional Qualifications Standards in historic architecture or architectural history and possesses a minimum of 5 years of experience in historic preservation. The input from a historic professional should take place early and often in the design process, from conceptual and schematic phases through design development. The qualified professional shall be provided McGee 2021a report and rely on the report in regard to the identification and preservation of character-defining features. The qualified professional shall consult with the project design team and provide recommendations as needed to ensure compliance with the SOI Standards. Recommendations shall be integrated into the design as it progresses. The qualified professional shall review the rehabilitation plans at the 65% and 90% phase and provide recommendations as needed. Prior to the issuance of grading permits, the qualified professional shall prepare a SOI Standards Project Review Memorandum to document the rehabilitation's compliance with the SOI Standards. This memorandum shall be submitted to the City of Rancho Cucamonga for review and acceptance and included in the administrative record upon finalization.

CUL-2 Mothballing Plan

Prior to the issuance of grading permits, a qualified professional who meets the Secretary of the Interior's Professional Qualifications Standards in historic architecture or architectural history shall develop a Mothballing Plan for the Baker House to prepare the site for a sustained period of vacancy and minimize harm to the building. The Mothballing Plan shall require protective fencing around the

building and periodic checks to confirm the building is secure and stabilized. The Mothballing Plan shall follow guidance outlined in the NPS–prepared *Preservation Brief 31: Mothballing Historic Buildings*.

CUL-3 Interpretive Display

A historic preservation professional qualified who meets the Secretary of the Interior's Professional Qualifications Standards shall be selected to prepare an on-site interpretive display to be located near the historic building. The interpretive display shall include a brief history of the Baker House and its significance within the community. The interpretive display shall be installed within one year of the completion of the rehabilitation.

With implementation of Mitigation Measure CUL-1, CUL-2, and CUL-3, impacts to historical resources would be less than significant. Should you have any questions concerning this study, please do not hesitate to contact the undersigned at 805-947-4817 or rperzel@rinconconsultants.com.

Sincerely,
Rincon Consultants, Inc.

I. INTRODUCTION AND EXECUTIVE SUMMARY

This historic resource assessment evaluates the parcel located at 8803 Baker Avenue in Rancho Cucamonga, California (Assessor Parcel Number 0207-271-40, hereinafter referred to in this report as "subject property"). The subject property contains one residential building constructed in 1952-1953. The current property owner is planning a project involving redevelopment of a larger area of land encompassing multiple parcels and including the subject property. An historic resource assessment is needed in order to determine if historical resources are present for purposes of California Environmental Quality Act (CEQA) and local project review.

The subject property has been previously evaluated for potential significance. It was nominated as a City of Rancho Cucamonga Historic Landmark in 2014, found eligible as a local landmark for potential association with local builder Konstanty "Steve" Stys (1894-1961) who is known to be an important person in local history, and as a good example of Folk Architecture constructed with unique materials.[1] The request for designation was withdrawn and the designation did not move forward. The subject property was evaluated a year later in an Historic Building Evaluation report prepared by CRM Tech, dated May 19, 2015.[2] That report included evaluation of both the subject property and 8817 Baker Avenue, which has since been demolished, and found both properties ineligible as historical resources under CEQA. However, a peer review of the CRM Tech report, prepared by LSA Associates, Inc., dated August 5, 2015, disagreed with the CRM Tech findings and asserted eligibility of 8803 Baker Avenue for local designation for potential association with Stys, and as a good example of Folk Architecture using salvaged building materials.[3]

This report provides a comprehensive evaluation, finding the property significant as an important and rare example of local Folk Architecture and for its method of construction using salvaged local materials, likely implemented with the assistance of noted local builder, Konstanty Stys. An historic context for Folk Architecture of the mid-twentieth century is included and focuses on the significance of the Pomona Valley as an important breeding ground for construction of vernacular buildings using salvaged local materials. Extant and intact examples of Folk Architecture in the area are rare. Extensive research was done to ascertain whether or not the building was constructed in association with Konstanty Stys. While anecdotal evidence suggests Stys was most likely involved, there is no written record of his participation; thus, a definitive link could not be confirmed.

Based on the above information, the subject property meets local eligibility criteria for listing as a City of Rancho Cucamonga Historic Landmark and for listing in the California Register of Historical Resources (California Register). Due to alterations, especially the loss of all original window sash, the subject property may not retain sufficient integrity for listing in the or National Register of Historic Places (National Register). It does not appear to be part of any historic district. Because it appears eligible for listing in the California Register as well as for local designation, it is an historical resource for purposes of CEQA and local project review.

This report was initially prepared on April 26, 2019 and revised on June 23, 2021.

II. CONSULTANT QUALIFICATIONS

This report was prepared by Kathryn McGee with peer review by Jenna Snow. Ms. McGee visited and photographed the subject property on March 29, 2019.

Kathryn McGee
Ms. McGee is an architectural historian and historic preservation planner based in Los Angeles. With over twelve years of experience, she meets the Secretary of the Interior's Professional Qualification Standards in Architectural History. Ms. McGee was previously employed as a Senior Associate at historic preservation consulting firm Chattel, Inc. where she worked on the City of Rancho Cucamonga 2010 General Plan Update, managing preparation of the historic context statement and historic resource survey. She launched an independent historic preservation consulting practice in 2015. Her educational background includes a Bachelor of Arts degree in architectural history from the University of California, Santa Barbara and a Master of Urban and Regional Planning degree from the University of California, Irvine. She has also completed the Summer Program in Historic Preservation at the University of Southern California and is a LEED Accredited Professional with specialty in Neighborhood Development. Her consulting work entails writing reports for purposes of environmental and local project review; preparation of historic resource assessments and surveys; preparation of technical reports for General Plan Updates; evaluation of properties seeking or complying with Mills Act Contracts; and consultation on adaptive reuse and federal Investment Tax Credit projects.

Jenna Snow
In January 2015, Jenna Snow launched an independent historic preservation consulting practice office in Los Angeles. With over seventeen years of professional experience, Ms. Snow has a strong and broad understanding of best historic preservation practice, including federal, state, and local regulations. She has worked on a wide range of projects on both the east and west coasts, as well as internationally. Ms. Snow holds a M.S. in Historic Preservation from Columbia University and a B.A. in Fine Arts focusing on architectural history from Brandeis University. She meets the Secretary of the Interior's Professional Qualifications Standards in Architectural History. Throughout her career, Ms. Snow has authored, co-authored, and/or served as project manager for nearly 100 historic preservation projects, including a wide variety of historic resource assessments, National Register nominations, and historic resources surveys. She regularly contributes to environmental impact reports, historic preservation certification applications, Section 106 reviews and other work associated with historic building rehabilitation and preservation planning. Ms. Snow has prepared multiple National Register nominations, including the Twohy Building in San José, CA; the Beverly Hills Women's Club in Beverly Hills, CA; the Sam and Alfreda Maloof Compound in Rancho Cucamonga, CA; the Boyle Hotel/Cummings Block in Los Angeles, CA; the West Los Angeles Veterans Affairs Historic District in Los Angeles, CA, and Temple Ohave Israel in Brownsville, PA. She has completed historic resources surveys, including coauthoring historic context statements in Hollywood, Whittier, CA, and South Los Angeles. Prior to her consulting work, Ms. Snow worked for the New York City Department of Design and Construction in New York, NY, the Freedom Trail Foundation in Boston, MA, and the Neighborhood Preservation Center in New York, NY.

III. METHODOLOGY

Project methodology involved a site visit and research as described here:

Site Visit: Kathryn McGee, a Secretary of the Interior-qualified Architectural Historian, visited and extensively photographed both the exterior and interior of the building at the subject property on March 29, 2019. After walking the entirety of the property, she was given access to the interior by Michael Sizemore of Panattoni Development Company. Electricity to the property was turned off and windows were boarded at the time; the interior was dark with limited visibility. Photographs are included in Attachment C.

Aerial Photographs: Historic aerial photographs were obtained through an online database of the University of California, Santa Barbara and are included in Attachment B. Oblique historic aerials may also be available through the University of California, Los Angeles Air Photo Archive, but that archive was not open for research while this report was prepared. This is a recommended area for future research.

Building Permits: The original building permit documenting construction of the existing house in 1952-1953 is not available. Other historic building permits are available through the City of Rancho Cucamonga Building and Safety Services Department. Relevant data is referenced in this report. A table of available permit data is included in Appendix A.

Historic Property Data File: The California State Office of Historic Preservation (OHP) keeps statewide records on historic properties. Records for Rancho Cucamonga are indexed in the San Bernardino County Historic Property Data File (HPDF), but there are no entries for the subject property.[6] The property was previously evaluated in 2014 and 2015, as discussed below.

Interviews: Phone interviews were conducted with descendants of the original owners of the subject property, with Shirley Carwell (daughter of James and Jennie Carwell) and James Goody (grandson of James and Jennie Carwell), providing important information linking James Carwell to Konstanty Stys, which is discussed in this report. Shirley Carwell and James Goody stated they have historic photographs showing the property when it was first built and James Carwell in the act of construction, and will provide copies in the near future, though copies were not obtained in time for completion of this report.

Online Databases: Online databases were searched for information pertaining to the history of the subject property, including United States Federal Census, voter and death indexes, and city directory records available on *Ancestry.com,* as well as newspaper articles available on *Newspapers.com*. Relevant information is referenced in this report.

Ontario City Library, Robert E. Ellingwood Model Colony History Room: The Ontario City Library has an extensive archive of books and documents on local history, including historic city directories, and was searched for information pertaining to the history of the subject property. Relevant information is referenced in this report.

Prior Evaluations: The 2014 City staff report for historic landmark designation; 2015 evaluation prepared by CRM Tech; and 2015 peer review by LSA Associates, Inc., were reviewed and are

[6] California Office of Historic Preservation, *Directory of Properties in the Historic Property Data File, San Bernardino County,* December 3, 2007.

referenced in this report. The 2014 staff report includes photographs showing features that have since been demolished, and is included in Attachment D.

San Bernardino County Historical Archives: The San Bernardino County Historical Archives were searched for historic assessor lot and parcel books, which are available from 1895 through the early 1950s. Relevant data is referenced in this report.

Sanborn Maps: There is no Sanborn map coverage available for the subject property.

IV. REGULATORY SETTING

City of Rancho Cucamonga

The City of Rancho Cucamonga Historic Preservation Ordinance (Ordinance No. 848) was adopted by City Council in 2011 and allows the City Council to designate Historic Landmarks, Points of Historic Interest, and Historic Districts as described below.[7]

Designation Criteria for Historic Landmarks

A. The [City] Council may designate a property as a Historic Landmark if it meets the requirements of both paragraphs B and C of this Section.
B. Historic Landmarks must meet at least one of the following:
    1. It is or was once associated with events that have made significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.
    2. It is or was once associated with persons important to local, California, or national history.
    3. It embodies the distinctive characteristic of a type, period, or method of construction.
    4. It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.
    5. It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.
C. Historic Landmarks must retain integrity from their period of significance with respect to its location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its depilated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to particular characteristics that support the property's eligibility.

Designation Criteria for Points of Historic Interest

A. The Council may designate a property as a Point of Historic Interest, if it meets the requirements applicable to Historic Landmarks under paragraph B of Section 2.24.050. Points of Historic Interest shall not be required to retain integrity from their periods of significance.
B. Designated Points of Historic Interest shall not be subject to the same restrictions applicable to designated Historic Landmarks and Contributing Resources.
C. Nothing in this Section shall be construed as limiting or foreclosing analysis of the impacts of a proposed project on a Point of Historic Interest under the California Environmental Quality Act.
D. The Commission shall maintain a current register of Points of Historic Interest for public use and information.

Designation Criteria for Historic Districts and Conservation Districts

A. The Council may designate a property or collection of properties as a Historic District if the proposed district meets the requirements of both paragraphs B and C of this paragraph

[7] City of Rancho Cucamonga Ordinance No. 848, adopted July 6, 2011, *https://www.cityofrc.us/civicax/filebank/blobdload.aspx?BlobID=8222*, accessed April 21, 2019.

Section.

B. Historic Districts must meet at least one of the following criteria:
    1. It has an identifiable, clear, and distinct boundary that possesses a significant concentration of structures sharing common historical, visual, aesthetical, cultural, archaeological, or architectural plan or physical development; or
    2. It demonstrates character, interest, or value as part of the development, heritage, or cultural characteristics of the community, state, or country; or
    3. It is the site of a significant local, state, or national event; or
    4. It is associated with the lives of persons important to local, state or national history; or
    5. It is identifiable as the work of a master builder, designer, architect, artist or landscape architect whose individual work has influenced the development of the community, county, state, or country.
C. Historic Districts must retain integrity from their period of significance with respect to its location, design, setting, materials, workmanship, feeling, and association. Not all properties or structures in a proposed district need to retain all such original aspects, but a substantial number of such properties and structures must retain sufficient integrity to convey the historic, cultural, or architectural significance of the district. Neither deferred maintenance within a proposed district nor the dilapidated condition of its constituent buildings and landscapes shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to the particular characteristics that support the district's eligibility.
D. Conservation Districts: The Council may designate a property or collection of properties that do not qualify as a Historic District as a Conservation District if the proposed district has either:
    1. A distinctive, cohesive, and identifiable setting, character, or association that make it unique and an integral part of the City's identify; or
    2. A recognized neighborhood identity and a definable physical character and either high artistic value or a relationship to urban centers or Historic Districts that makes conservation of the proposed Conservation District essential to the City's history or function.

Relationship to this report: As noted above, the subject property was previously evaluated for potential significance. It was nominated as a City of Rancho Cucamonga Historic Landmark in 2014 and a City staff report was prepared for that nomination, finding the property eligible as a local landmark for potential association with Konstanty Stys, an important person in local history, and as a good example of Folk Architecture constructed with unique materials.[8] The designation did not ultimately move forward. The subject property was evaluated a year later in an Historic Building Evaluation report prepared by CRM Tech, dated May 19, 2015.[9] That report included evaluation of both 8803 and 8817 Baker Avenue, and found both properties ineligible as historical resources under CEQA. However, a peer review of the CRM Tech report, prepared by LSA Associates, Inc., dated August 5, 2015, disagreed with the CRM Tech findings and asserted eligibility of 8803 Baker Avenue for local designation for potential association with Konstanty Stys, and as a good example of Folk Architecture using salvaged building materials.[10] This report provides a fresh, comprehensive evaluation. For reasons stated in this report, the subject property

[8] Nakajima, Staff Report re Historic Landmark Designation.
[9] CRM Tech, Historic Building Evaluation.
[10] Tibbet, Peer Review.

meets eligibility criteria for designation as a City of Rancho Cucamonga Historic Landmark, though it does not appear to be a contributor to any historic district.

California Environmental Quality Act (CEQA)

The California Environmental Quality Act (CEQA) was enacted in 1970 and offers protection for identified historical resources. In general, for purposes of CEQA and environmental review, an "historical resource" is that which has been determined eligible for listing in the California Register, or one that is designated at the local level. The term "historical resource" includes the following:

1. A resource listed in, or determined to be eligible by the State Historical Resources Commission for listing in the California Register of Historical Resources (Pub Res Code SS5024.1, Title 14 CCR, Section 4850 et seq).
2. A resource included in a local register of historical resources, as defined in Section 5020.1(k) of the Public Resources Code or identified as significant in an historical resource survey meeting the requirements Section 5024.1(g) of the Public Resources Code, shall be presumed to be historically or culturally significant. Public agencies must treat any such resource as significant unless the preponderance of evidence demonstrates that it is not historically or culturally significant.
3. Any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California may be considered to an historical resource, provided the lead agency's determination is supported by substantial evidence in light of the whole record. Generally, a resource shall be considered by the lead agency to be "historically significant" if the resource meets the criteria for listing on the California Register (Pub Res Code SS5024.1, Title 14 CCR, Section 4852).
4. The fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources (pursuant to 5020.1 (k) of the Public Resources Code), or identified in an historical survey (meeting the criteria in Section 5024.1(g) of the Public Resources Code) does not preclude a lead agency from determining that the resource may be an historical resource as defined in Public Resources Code Sections 5020.1 (j) or 5024.1.

Relationship to this report: For the reasons stated in this report, the subject property meets eligibility criteria for listing as a City of Rancho Cucamonga Historic Landmark as well as for listing in the California Register. Therefore, the subject property qualifies as an historical resource under CEQA.

California Register

Based substantially on the National Register, the California Register is "an authoritative guide… used by state and local agencies, private groups, and citizens to identify the state's historical resources and to indicate what properties are to be protected."[11] For a property to be eligible for listing in the California Register, it must be found by the State Historical Resources Commission to be significant under at least one of the following four criteria:

[11] California Public Resources Code §5024.1(a), *http://codes.lp.findlaw.com/cacode/PRC/1/d5/1/2/s5024.1*.

1) is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage; or
2) is associated with the lives of persons important in our past; or
3) embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual or possesses high artistic values; or
4) has yielded, or may be likely to yield, information important in prehistory or history.

Also included in the California Register are properties which have been formally determined eligible for listing in or are listed in the National Register; are registered State Historical Landmark Number 770, and all consecutively numbered landmarks above Number 770; and Points of Historical Interest, which have been reviewed and recommended to the State Historical Resources Commission for listing.

The primary difference between eligibility for listing in the National and California Registers is integrity. Properties eligible for listing in the National Register generally have a higher degree of integrity than those only eligible for listing in the California Register. There is, however, no difference with regard to significance.

Relationship to this report: The subject property is not listed in the California Register. For the reasons stated in this report, the subject property appears eligible for listing in the California Register.

National Register

The National Register of Historic Places is "an authoritative guide to be used by federal, state, and local governments, private groups, and citizens to identify the nation's cultural resources and indicate what properties should be considered for protection from destruction or impairment,"[12] Administered by the National Park Service, the National Register is the nation's official list of historic and cultural resources worthy of preservation. Properties listed in the National Register include districts, sites, buildings, structures, and objects that are significant in American history, architecture, archaeology, engineering, and culture. Resources are eligible for the National Register if they meet one or more of the following criteria for significance:

A) are associated with events that have made a significant contribution to the broad patterns of our history; or
B) are associated with the lives of significant persons in our past; or
C) embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
D) have yielded or may be likely to yield, information important in history or prehistory.[13]

Once a resource has been determined to satisfy one of the above criteria, then it must be assessed for "integrity."[14] Integrity refers to the ability of a property to convey its significance. Evaluation

[12] *National Register Bulletin #16A: How to Complete the National Register Registration Form*, National Park Service, 1997.

[13] *National Register Bulletin #15, How to Apply the National Register Criteria for Evaluation*, National Park Service, 1990, revised 2002.

[14] Ibid.

of integrity is based on "an understanding of a property's physical features and how they relate to its significance." The National Register recognizes seven aspects or qualities of integrity: location, design, setting, materials, workmanship, feeling, and association. To retain integrity, a property must possess several, and usually most, of these aspects.

Relationship to this report: The subject property is not listed in the National Register. For the reasons stated in this report, the subject property does not appear to retain sufficient integrity for listing in the National Register, due to alterations.

V. PROPERTY DESCRIPTION AND HISTORY

Physical Description

Site
(Attachment A, Current Maps and Aerials; Attachment C, Current Photographs.)
The subject property is located at 8803 Baker Avenue in Rancho Cucamonga, California. Bordered by 9th Street to the north, Vineyard Avenue to the east, 8th Street, a railway (formerly the Atchison Topeka and Santa Fe Railway) to the south, and Baker Avenue to the west, the subject property consists of one parcel and contains one single-family home. Surrounding properties consist of a large area of undeveloped land immediately north, east and south, though there are housing tracts across the street to the west. The single-family home is set back from the street by a front yard with curved low walls incorporating bricks, concrete, and stone, and low brick and concrete posts that are remnants of fence. Landscaping has generally been removed, though there are some scattered trees.

Exterior

Fig 1 (left): Subject property, west elevation (center) and south façade (right), view northeast (McGee, 2019); Fig 2 (right): Subject property, west elevation, detail of concrete rubble exterior wall material, view west (McGee, 2019)

Fig 3 (left): Subject property, west elevation (center) and south façade (right), detail of telephone pole roof construction, view northeast (McGee, 2019); Fig 4 (right): Subject property, low wall located west of house in front yard, view southeast (McGee, 2019)

The building at the subject property is oriented facing south. It is one-story high and rectangular in plan with a flat roof, deep eaves, and side chimney. The building is low-slung with a sense of horizontality emphasized by the relationship of the simple massing to the flat roof. Composed of salvaged materials, the building can be described as an example of Folk Architecture. Exterior walls are made of a combination of concrete rubble mixed with stone and brick in some places,

often formed to appear as individual bricks, while the roof beams are made of telephone poles creating a deep canopy extending over a full-width south facade porch as well as over a portion of the north elevation. Door and window openings are recessed and generally boarded up, though inspection of windows from the interior reveals sash and glazing have all been removed. Windows have concrete slip sills.

The primary, south facade is asymmetrical in composition. The main entrance is roughly centered in the elevation, although there is another secondary door to the west. Former window openings include a large opening west of the secondary door, and a smaller opening between the doors and at the east end of the elevation. The full front porch consists of a simple concrete slab accessed by three concrete steps.

The north, rear elevation is also asymmetrical in composition and contains, from east to west, a former window opening, a smaller opening, a secondary door, and a large opening corresponding to the living room. The east elevation contains a central outdoor chimney flanked by former window openings. The west elevation does not contain any former window openings, though it contains a wide central chimney. The chimney has a low, boarded opening, presumably for a vent, in its north half.

Interior

Fig 5 (left): Subject property, interior, living room, view northwest (McGee, 2019); Fig 6 (right): Subject property, interior, living room, fireplace, view northwest (McGee, 2019)

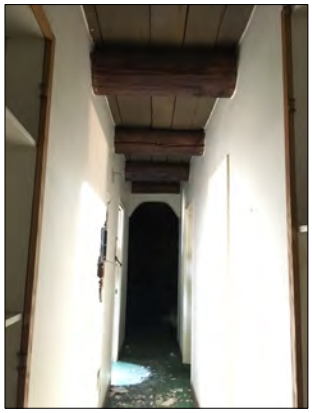

Fig 7 (left): Subject property, interior, hallway looking toward living room, view west (McGee, 2019); Fig 8 (right): Subject property, interior, bedroom (typical) (McGee, 2019)

The interior is generally in a state of disrepair with debris scattered in all rooms. The electricity is currently turned off and windows are boarded, so the interior is dark, making visibility and

photography difficult. Original telephone pole and wood beam ceilings are visible throughout. The main entrance provides access into a kitchen, where there are built-in wood cabinets, as well as a tile floor and tile backsplash on walls, which appears to be contemporary. The north wall of the kitchen opens into a central, carpeted hallway running east-west, which accesses a living room at the west end of the house through an arched opening; a closet and a bathroom to the north in the center of the house; and two bedrooms at the east end of the house. In the living room, the west wall is made of concrete incorporating stones of varying sizes and colors, encompassing a fireplace at the center, with brick inside the shaft and a small low opening for ventilation to the north, covered by a pair of wood swinging doors. In a phone interview with Shirley Carwell, the adult daughter of the original owners, James and Jennie Carwell, information was provided regarding family photographs that are integrated into the fireplace artwork. However, it is difficult to tell if that artwork is extant; further investigation into this topic is needed. Off the central hallway, the aforementioned closet has built in wood cabinets along its west wall, which are badly damaged, with many of the wood and glazed cabinet doors broken. The bathroom has contemporary tile covering walls; all fixtures and finishes are badly damaged. The bedrooms feature built-in closets, which are also damaged. Shirley Carwell also described a basement under the master bedroom, which was not toured at the time of the site visit.

History

History of Construction and Alterations
(Appendix A: Table of Building Permits; Attachment B, Historic Maps and Aerials)
The subject property is located just north of the Santa Fe Railway and about 2.5 miles southwest of the historic center of the Town of Cucamonga. Originally part of a tract of land known as Cucamonga Fruit Lands, the subject property once encompassed fifteen acres with orange and lemon groves when purchased by James Carwell (1918-2014) and Jennie Perona Carwell (born c. 1919) in 1947 (biography below). The Carwells constructed the existing house at 8803 Baker Avenue in 1952-1953, as well as an adjacent residence located immediately to the south at 8817 Baker Avenue, also in the early 1950s. They lived at 8803 Baker Avenue with their children for about fifteen years, while they rented out the other house, and farmed the orange and lemon groves. Historic aerial photographs show the property surrounded by agricultural land.

Fig 9: Historic aerial photograph showing the subject property, outlined in red, and its environs in 1953 (Source: UCSB Aerial Photograph Collection)

There is no original building permit available documenting construction of the house in 1952-1953. However, it is known that James Carwell designed and constructed the house using salvaged local materials, such as concrete rubble and telephone poles.[15] Working as a butcher, James Carwell did not have professional training in architecture or building. However, artistry is evident in Carwell's work. He incorporated artwork with images of the family into design of the fireplace (unknown if said artwork is extant). Photographs taken of the property in 2014 show artistic integration of materials into low rubble and rock walls surrounding a pool and serving as fencing, as well as a rock monument in a corner of the back yard (not extant).[16] It should also be noted the house was designed with a basement under the master bedroom where the Carwell family would often store wine for and made by friends who lived locally and worked as winemakers (basement was not toured on site visit).[17]

The artistry and distinctive use of materials is very similar to that of important local buildings designed and constructed by local builder Konstanty "Steve" Stys, especially the National Register-of Historic Places-listed Russian Village historic district in Claremont, and the building that now houses the Cask 'n Cleaver restaurant in Rancho Cucamonga. In the early 1950s when the Carwell's designed their house, Stys lived nearby, building his house and the restaurant that became Cask 'n Cleaver.[18] According to Shirley Carwell, Stys was a friend of her father and her family would often have parties at Stys' restaurant. According to James Goody, his grandfather mentioned getting ideas from a local man who showed him how to build, though Goody didn't know the name of the man, nor if it was Stys. From the National Register nomination for the Russian Village, it is known that Stys often helped other local individuals with advice on how to design and build their homes using salvaged local materials. He did not design and build all of the houses in the Russian Village himself. Thus, it is highly likely Stys at a minimum gave advice to James Carwell on the construction of his home, given the fact that the two were friends, lived close by each other, and constructed similar buildings around the same time in the same neighborhood.

The Carwells made other improvements to the property. They construed the aforementioned second residence in the early 1950s, a 1,200 square-foot wood frame and stucco house located at 8817 Baker Avenue (demolished). They rented out that house, though it was sometimes occupied by relatives. The Carwells also improved the property with a swimming pool east of the house in 1956, and with addition of a covered patio along the east elevation in 1958. They continued to live there until James Carwell got a new job as a meat inspector, and he and Jennie sold the property and moved away.

Title transferred to Charles H. Lescault and Donna J. Lescault in 1969 (biography below). The Lescaults do not appear to have made major changes to the property. Upon their divorce in 1973, they sold the property to Cucamonga fireman Dennis Myskow (biography below). Myskow lived there and constructed a freestanding workshop building the same year. He also constructed a substantial addition of 13 ½'x32' along the north elevation in 1977. Other known improvements included reroofing the building in 1995 and installation of roof-mounted photovoltaic panels in 2015. Several improvements were demolished in 2016, including the pool, covered patio, freestanding workshop, north elevation addition, as well as the house at 8817 Baker Avenue.

[18] Konstanty Stys and Antonia Stys lived at 8689 9th Street in 1954 ("Konstanty Stys," *Lusky's Official Greater Ontario Criss-Cross City Directory,* Santa Ana: The Directory Service Co., 1954: 160.)

The setting of the subject property changed dramatically over time, as land formerly used for agriculture was rapidly redeveloped with tracts of single-family homes through the 1970s (see *Attachment B, Historic Maps and Aerials).* Widespread development and need for shared resources ultimately led to the City's incorporation in 1977, consolidating the three towns of Cucamonga, Alta Loma, and Etiwanda into one municipality. By that time, the citrus groves had been removed from the land surrounding the subject property; surrounding parcels to the north, south, and west have largely been developed with single-family homes.

Photographs of subject property in 2015, prior to removal of north elevation addition, east elevation covered patio, and front yard fencing:

Fig 11 (right): Subject property, south façade and front yard, view northeast, 2015 (Source for both figures: CRM Tech, 7.)

Summary of Alterations

The following summary of alterations is compiled based on available building permits (see *Appendix A, Table of Building Permits*) and visual inspection. Alterations to the subject property since 1952-1953 include: addition of the adjacent residence at 8817 Baker Avenue (early 1950s); addition of swimming pool (1956); addition of covered patio along east elevation (1958); addition of freestanding workshop (1973); addition of a 13½' x 32' room along the north elevation (1977); reroofing (1995); installation of roof-mounted photovoltaic panels (2015); demolition of adjacent residence at 8817 Baker Avenue (2016); demolition of the east elevation covered patio, north elevation addition, freestanding garage, swimming pool, front yard fencing, site walls, and paving, and disconnection and capping of all utilities (all in 2016).

History of Owners

The history of owners is based on chain of title and historic lot books of the San Bernardino County Assessor. All available data is included in *Appendix A: Table of Owners*.

James Carwell and Jennie P. Carwell

James Carwell (1918-2014) and Jennie Perona Carwell (born c. 1919) owned the subject property from 1947-1969. James was born in Rancho Cucamonga, while Jennie was born in Pennsylvania. The couple "met in Cucamonga (before the Rancho) in a grape vineyard under a pepper tree at lunchtime," marrying in 1937 in San Bernardino.[19] James and Jennie had two daughters, Elsie and Shirley. Prior to moving to the subject property, the Carwells lived in Corona and Ontario.[20] After purchasing the subject property in 1947, they constructed their home there using salvaged local materials. They lived there with their children for about fifteen years. During that period, James

worked in the meat business, at C.K. Packing Company on Chaffee Street in 1955[21] and Klapp Packing Co. on Euclid Avenue in Ontario in 1960.[22] He also worked "doing such jobs as chauffer, grape picker, butcher, State Meat Inspector and finally end[ed] his career as a Federal Meat Inspector."[23] Jennie worked as a homemaker. Shirley and Elsie would often pick fruit from the citrus groves and sell it in the neighborhood.[24] After selling the subject property in 1969, James and Jennie lived throughout California, retiring to Riverbank in the late 1980s. James Carwell continued to work on arts and crafts as a hobby. A 2002 newspaper article about a yard sale he hosted notes, "Carwell is retired and spends much of his time refinishing furniture, converting old tea pots and coffee urns to lamps, and making swag or hanging lanterns decorated with Brazilian agate."[25]

Carwell is retired but keeps busy making things. The table displays more of his work, including lanterns faced with tiles of Brazilian agate…" (John Branch, "Successful Year for Yard Sale," *Riverbank News,* June 5, 2002: 1.)

Charles H. Lescault and Donna J. Lescault

Charles was born about 1936 in California.[26] The son of a feed salesman, he married Donna J. Billings (born c. 1940) in 1963 and the couple lived in Riverside.[27] After relocating to Ontario in 1964,[28] the couple ultimately purchased the subject property in 1969. They divorced in 1973,[29] and title to the property transferred to Dennis F. Myskow, who owned it until 2015.

Dennis Francis Myskow and Marilyn A. Myskow

Dennis F. Myskow (born in 1947)[30] and Marilyn A. Romig (born in 1952) [31] married in 1973 in San Bernardino.[32] The couple purchased and moved into the subject property the same year.

VI. HISTORIC CONTEXT

City of Rancho Cucamonga

The following overview of the City of Rancho Cucamonga's developmental history is excerpted from relevant sections of the City's historic context statement, prepared as part of the 2010 General Plan Update.[35]

> Context: Early Settlement (1811-1876)
> Originally inhabited by Indian tribes, the City of Rancho Cucamonga has been a center of land development opportunity since Franciscan priests and Spanish soldiers entered and began their occupation of the area in the late 18th century. The name "Cucamonga," a Shoshone word for "sandy place," first appeared in a written record of the San Gabriel Mission dated 1811. As a result of the secularization of the missions in 1831, the land owned by the missions was divided into land grants, including the 13,000 acre Rancho Cucamonga, granted to Los Angeles City Council president and businessman Tiburcio Tapia in 1839. The Rancho Cucamonga was defined by El Camino Real on its southern border, the San Gabriel Mountains to the north, the San Antonio Creek to the west and present-day Etiwanda Avenue to the east. Tapia built his home on the top of visually prominent Red Hill, planted some of Rancho Cucamonga's first vineyards, and built a small winery, which would later be enlarged and reestablished as the Thomas Winery in 1933 and then again as the Filippi Vineyards winery in 1967.[36] Portions of the historic winery buildings, located at the northeast corner of Foothill Boulevard and Vineyard Avenue, are currently being reused for commercial purposes.
>
> Upon the death of Tapia in 1845, Tapia's daughter, Maria Merced Tapia de Prudhomme, became the sole heir of the Rancho Cucamonga. Maria Merced's husband, Leon Victor Prudhomme, assumed control of the rancho and eventually sold it to John Rains in 1858. Rains significantly expanded the vineyards, planting approximately 125,000 to 150,000 vines. He was found murdered in 1862 and soon after his death, his widow, Dona Maria Merced Williams de Rains, inherited the ranch property. She encountered financial problems and the property fell into foreclosure, ultimately marking the close of the rancho way of life in the Cucamonga region.
>
> Context: Railroad and Agriculture Development (1887-1970)
> Theme: Town Development: Cucamonga, Alta Loma, and Etiwanda (1887-1945)
> Construction of railroads through the Cucamonga Valley allowed for tremendous growth of the local agriculture industry, the success of land sales, and subsequent development of the towns of Cucamonga (including the North Town neighborhood), Alta Loma and Etiwanda. Similar to other Southern California boomtowns,[37] construction of railroads through the region created a rapid increase in local development, enabling both people and goods to move in and out of Rancho Cucamonga at what was for the time an unprecedented speed, which dramatically increased agricultural production and sales.

[35] Chattel Architecture, Planning & Preservation, Inc., "City of Rancho Cucamonga Historic Context Statement, prepared for the City of Rancho Cucamonga 2010 General Plan Update, rev March 4, 2010: 3-4; 7; 15-17.

[36] Donald L. Clucas, *Light Over the Mountain,* Upland: California Family House Publishers, 1979: 70.

[37] Rail lines built in Southern California created a huge population boom in the region. The City of Los Angeles grew from 6,000 to over 50,000 people in the 20-year period from 1870 to 1890. The majority of cities incorporated in the Los Angeles area in the late 1800s experienced early growth due to availability of railways. (David Brodsly. "L.A. Freeway, An Appreciative Essay," Berkeley: University of California Press, 1981: 63; 68-69).

From the early 1900s to the 1950s, the northern portion of the City's landscape consisted of mostly citrus groves while the southern portion was dominated by vineyards.[38]

Context: Postwar Development (1945-1977)

Following World War II, Rancho Cucamonga's landscape began to shift from a rural to suburban environment, reflecting the nation-wide trend toward decentralization of the city. Driven by rapid highway construction, increasing automobile ownership, availability of modern building technologies, and the Baby Boom, the postwar period brought about an increase in housing demand and rising land values, spawning development of tract housing and light industry in Rancho Cucamonga on land previously used for agriculture.[39] After World War II and prior to incorporation in 1977, the City "experienced uncontrolled growth."[40] It ultimately became a sprawling suburb, with tract housing, neighborhood-scale shopping centers, office parks, and surface parking proliferating throughout the City, aiming to meet the needs of nearby residents while accommodating automobiles. Underscoring the dramatic increase in local development occurring postwar, in 1979, prominent local developer Lewis Homes (founded 1955 by Ralph and Goldy Lewis), announced sales of 533 single-family Inland Empire homes in the first nine months of the year, not including sales of commercial and multi-family developments.[41]

Historic aerial photographs of the City indicate that postwar tract housing was frequently inserted into plots of land formerly used for agriculture (fig 44).[42] Many such tracts represent the curvilinear residential suburb model that had become the nationwide standard for neighborhood design by the late 1940s (fig 43).[43] Characterized by curving streets as opposed to an orthogonal grid, this model was ideally interspersed with neighborhood parks, landscaping, and trails, with a small handful of housing models repeated throughout the tract. Standardization and large-scale production of housing stock allowed many homes to be built quickly and at a low cost, meeting the postwar demand for Veteran housing and accommodations to meet the needs of the continually growing population. As lands once occupied by agricultural uses were needed to accommodate this new pattern of development, the citrus groves and vineyards that had once characterized rural local landscape in Rancho Cucamonga eventually gave way almost entirely to suburbanization. Rising land values, coupled with pressure from realtors to sell land for residential development made it increasingly difficult for farmers to continue using their land for agriculture when it was worth more developed with housing.[44]

While a survey of all postwar housing in Rancho Cucamonga has yet to be performed, the City is home to several early postwar tracts, some of which retain a strong sense of time and place and as such should be considered for their historic significance as an intact grouping of postwar homes. For example, the housing tract located northwest of the historic town center of Cucamonga, bounded by Hellman Avenue to east and San Bernardino Road to the South, centering on Selma Avenue, Harvard Street and Montara

Avenue (Cucamonga Vineyard Tract Subdivision B, Tract No. 5576, figs 43-48; see figs 49-51 for additional examples) appears to be a relatively intact example of postwar tract housing, with the majority of the houses in the tract organized along curvilinear streets culminating in cul-desacs, retaining original Swiss Chalet architectural features, street set-backs, and general sense of time and place as a collection of early postwar housing. Although tract housing was not beginning to be developed on a large scale in Rancho Cucamonga until the 1950s, development of housing tracts on local agricultural lands was sparked as early as 1942, when Kaiser Steel Mill began operations in nearby Fontana.[45] Initially producing steel to aid the war effort, Kaiser Steel Mill was the ninth-largest steel production facility in the country by the late 1950s, employing 7,700 workers at its peak in production.[46] This new industry helped spark regional growth, necessitating an increase in local housing stock for Steel Mill workers. Farmers received pressure to sell agricultural land from realtors who wanted to develop land for much needed Steel Mill worker housing.[47] Kaiser Community Homes, one of the many successful enterprises started by Henry J. Kaiser, developed many postwar housing tracts in the Inland Empire and nationwide.[48] In 1946, Henry Kaiser announced that his company would build more than 10,000 low-cost homes throughout the nation, beginning in Southern California and working towards the east coast.

While competition from imported steel suppliers and stricter air quality regulations gradually crippled Kaiser Steel Mill's business, closing operations in the 1980s, availability of low cost land throughout the Inland Empire continued to attract development to the area.[49] By 1995, the Inland Empire had become an attractive location for large warehouse construction, with large-scale "big box" retailers such as Home Depot and Wal-Mart setting up warehouses and distribution centers throughout the area at a much cheaper rate than would have been available in Los Angeles. Warehouses for manufacturing and metal fabrication also proliferated throughout the region, further enhancing need for large quantities of affordable housing in Rancho Cucamonga, although the majority of warehouses were constructed in Mira Loma, Rialto and Fontana.[50]

Also important in influencing postwar suburbanization in Rancho Cucamonga was increasing employment and transportation options offered by expansion of the nearby Ontario International Airport (originally Ontario Airport). In 1942 the United States government allocated Works Progress Administration funding to improve the existing dirt runway at the Ontario Airport to two paved runway for Army and Army Air Corps operations. At close of the war in 1945, airport operations lessened for a time, although the airport became Ontario International Airport in 1946. In 1949 airlines began offering regular passenger service into and out of the airport. Beginning in 1951, military

[45] Kaiser Steel was one of many successful businesses started by Henry J. Kaiser, "a prominent Los Angeles industrialist [who]established Kaiser-Permanente medical services in Los Angeles in the 1930s and founded Kaiser Industries. Kaiser Industries owned and operated a number of subsidiary raw materials plants, including Kaiser Metal Products, Kaiser Steel, Kaiser Aluminum and Chemical, and the Permanente Cement Company. Kaiser had earlier experience in large-scale low-cost housing, having participated in the construction of 800 units surrounding the Kaiser steel plant in Fontana. He also experimented with prefabricated Kaisercraft homes. [Fritz B.] Burns, [a successful Los Angeles developer] combined his expertise in land development and community building with Kaiser's corporate assets and access to raw materials to establish Kaiser Community Homes." (Historic Resources Group, California Department of Parks and Recreation 523d district record, Panorama City Historic District, 20 May 2002: 5.)

operations at the airport resumed, using the airport for California Air National Guard operations for the Korean War. Various airport improvements and runway extensions took place through 1962. Airport traffic increased steadily over the years and in 1998 new terminals opened. By 2000, the airport had 6.7 million annual passengers, generating more than 55,000 jobs in the region.[51]

Context: Consolidation and Incorporation (1977-2010)
Encouraged by the initial boom in land values and development, Rancho Cucamonga colonists began discussing the possibility of incorporating the three towns of Cucamonga, Alta Loma and Etiwanda as early as 1887. Despite attempts at consolidation over the years, it was not until much later that this dream was realized. The City of Rancho Cucamonga was finally incorporated in 1977, consolidating Cucamonga, Alta Loma, and Etiwanda into one municipality, reaching a milestone sought after by local residents for nearly one hundred years. Incorporation halted the uncontrolled growth that had been occurring in the area and provided numerous other benefits, including increased park and recreation opportunities, improvements to existing neighborhoods, construction of new neighborhoods, and advances in local economic development. The three historic towns became part of the larger whole, providing opportunities for growth and improvement but also absorbing the character of each town center. As a result, the City has before it the opportunity to plan for the benefit of the City at-large while also continuing to recognize the historic communities from which it came.

Folk Architecture

Overview
Folk Architecture is a subset of vernacular architecture and refers to buildings designed without the work of a trained architect, often constructed with found, salvaged, or locally available materials, and sometimes incorporating artwork into the design. Folk Architecture is by nature common, perhaps only known to locals, and may not always be considered important by historians focused on the "high art." Nevertheless, as early as 1964, the significance of this form of building was recognized by the Museum of Modern Art in an exhibit publication entitled, *Architecture Without Architects: An Introduction to Non-Pedigreed Architecture,* in which Bernard Rudofsky underscores the difficulty with evaluation of the style:

> It is so little known that we don't even have a name for it. For want of a generic label, we shall call it vernacular, anonymous, spontaneous, indigenous, rural, as the case may be. Unfortunately, our view of the total picture of anonymous architecture is distorted by a shortage of documents, visual and otherwise.[52]

In the post-World War II period, there was a resurgence of American arts and crafts in general, due to multiple factors, such as the massive expansion of colleges and arts programs; the consumerism of the postwar era, which supported the rise of crafts;[53] and, the growth of imports in the 1960s allowing folk crafts from other countries to become available, resulting in a worldwide approach to evaluating crafts.[54] The Pomona Valley became an important center for the arts during this time period, providing "the perfect storm of proximity, isolation and college-

town community," allowing for the success of local artists.[55] The establishment of arts programs at local colleges engendered the growth of the local arts community which focused on handcrafted arts, in opposition to the post-World War II mass production and consumption of goods that had become prevalent across the country at the time. Internationally renowned woodworker Sam Maloof (1916-2009) established his woodworking business in Rancho Cucamonga during this time and made his home an important gathering place for local artists of the Pomona Valley, stimulating growth of that community.[56]

Local Examples of Folk Architecture

The most relevant example of Folk Architecture to evaluation of the subject property is the Russian Village, a collection of fifteen, single-family, private homes in the neighboring City of Claremont, which were designed and constructed from 1923-1938 by a Polish immigrant and carpenter, Konstanty "Steve" Stys (1894-1961),[57] and other local individuals, using salvaged and local materials, specifically concrete rubble similar to that which is used at the subject property, and local stone.[58] The Russian Village was listed in the National Register in 1977; the nomination form provides the following background on its design and construction:[59]

> There is no evidence that Stys had any formal training in architecture. In fact, he had only a grade school education. The houses in the Russian Village were not built according to plans, but in an ad hoc manner, and belonged to a category of American domestic building which might well be called "folk architecture".[60]

[56] Maloof's career in woodworking began with work for Bauhaus-trained industrial designer, Harold Graham, and as a graphic designer and studio assistant for artist Millard Sheets. Maloof became a woodworker in 1948, establishing his first workshop. He is known for hand-crafted furniture, especially rocking chairs, and constructed his own residence and workshop buildings beginning in 1956 and adding to the property over decades. His personal philosophy engendered growth of local community; as one biographer writes, "His refusal to make furniture for the mass market and his insistence on maintaining a direct relationship with his clients are as much about community as they are about craftsmanship." Maloof's woodworking was featured in an exhibit at the Smithsonian Institute in Washington D.C. in 1970. The Maloof compound was originally located at 9553 Highland Avenue and moved to an approximately 5.5-acre site located at 5131 Carnelian Street in 1999-2000 to allow for construction of the State Route-30 freeway extension. The property was listed in the National Register in 2010 for association with Maloof and for exceptional architectural merit of the house and studio (Chattel, "Sam and Alfreda Maloof Compound," National Register Registration Form, Sect. 8, p. 17--23; Harold B. Nelson, *The House that Sam Built,* San Marino: The Huntington Library Press, 2011: 6-7.).

[60] Bernard Rudolfsky, *Architecture Without Architects,* New York, 1964.

> The Russian Village is comprised of fifteen private homes, either built by Stys or inspired by him, standing on both sides of one block of South Mills Avenue in Claremont and Montclair, California. The houses have a great deal of character. They are built of native fieldstone and rubble from broken-up concrete pavement slabs, roofed with tile and linked by low stone fences with iron gates. The street is shaded by elms and lined with fieldstone curbing.
>
> Konstany Stys is responsible for the aesthetic integrity of the village—both the harmony of its building materials and the plantings. He developed the larger portion during the Great Depression. Circumstances dictated its thematic unity: Stys means were limited to the creative use of salvaged and other cheap, readily-at-hand building materials. These houses stand virtually alone today, amidst a sea of tract-house sameness, the original surroundings of lemon and orange groves having disappeared in the years between…
>
> …The result is a unique community with important features worthy of historic recognition and preservation.

Current photographs showing use of concrete rubble in the Russian Village:

Fig 14 (left): Russian Village, concrete and stone walls on the east side of S. Mills Avenue in Claremont, view north (McGee, 2019); Fig 15 (right): Russian Village, 350 S. Mills Avenue, view northeast (McGee, 2019)

Fig 16 (left): Russian Village, 370 S. Mills Avenue, view east (McGee, 2019); Fig 17 (right): Russian Village, 305 S. Mills Avenue, view west (McGee, 2019)

The National Register nomination for the Russian Village describes that not all of the homes were actually built by Stys, as Stys was known for helping teach other locals to design and construct their own homes. For example, while 305 and 350 S. Mills Street were actually constructed by

Stys, 370 S. Mills Avenue was constructed by a teenage youth whose father had recently passed (pictured above).[61]

The National Register nomination asserts specific reasons for significance of the Russian Village, highlighting use of cement street rubble in homes as a "truly unique architectural phenomenon," and noting the following regarding the importance of design with salvaged materials:

> Hard times also dictated the use of the salvaged building materials common to all the houses. Although no two houses are identical, those built after the first two cottages commonly make use of pine shiplap board and paneling, adzed fir beams (occasionally including telephone poles—see the descriptive reports on 305 and 345 S. Mills), dormer casement windows, French doors, cast iron pipe structural supports, red clay tile roofing from demolished buildings, and kitchen/bathroom tiles in various unmatched shades of green), which Stys evidently procured in large numbers from the discarded seconds of a local manufacturer. Along with the fieldstone and cement rubble, the imaginative use of these discarded materials has contributed to the stylistic unity and charm of the entire Russian Village…

Stys is also credited with design and construction of several other houses on S. Indian Hill Boulevard in Claremont (exact addresses unknown), and four other homes are said to have been built with his "active advice" at 443 W. 10th St, 100 Oxford St, and 363 and 373 Cucamonga Avenue.

In addition to his work in Claremont, Stys experimented with vernacular architecture in Rancho Cucamonga, designing buildings in close proximity to the subject property. Stys moved to the property that is now the Cask 'n Cleaver restaurant, originally constructing it as an orchard house about 1945[62] and adapting it to restaurant use and making improvements at the property through at least 1955, when he expanded the sue to include a "banquet hall, deluxe motel, and swimming pool."[63] Cask 'n Cleaver is very close by the subject property, only 0.3 miles northeast, and has design characteristics similar to those used at the subject property, especially through use of salvaged local materials and telephone poles in the roof structure.[64] In 1953, Stys also owned and resided at the former Trona Restaurant at 2250 East Ninth Street in Rancho Cucamonga, though it is unclear if this building is extant.[65]

Fig 20 (left): Cask 'n Cleaver site, building 3, north of restaurant, view southeast (McGee, 2019)
Fig 21 (right): One of the seven redwood bungalows (not extant) formerly located north of Cask 'n Cleaver (Source: Chattel, Inc., "Madrone Avenue," State of California Department of Parks and Recreation Primary Record, 2009)

Stys also designed a row of diminutive redwood bungalows just north of the existing Cask 'n Cleaver restaurant in the 1950s (see *Attachment B: Historic Aerials*). The bungalows were allegedly constructed from wood salvaged from wreckage in the Long Beach earthquake of 1933,[66] and were recorded in a 2009 historic resource survey completed for the 2010 general plan update,[67] though they were in poor condition at the time,[68] and were ultimately demolished to make way for the existing Los Amigos Park, which opened in 2017.[69] Some of the lumber from the bungalows was salvaged and reused in the shade structure for the park, while some of the original river rocks were incorporated into various structures.

Use of salvaged materials is evidenced in other buildings in Rancho Cucamonga, such as the Etiwanda Road House, located at 12583 Highland Avenue (constructed c. 1926, extant), and Owen Electric building, located at 8889 Archibald Avenue (date of construction unknown, extant), both of which incorporate telephone poles into front porch designs. Also relevant to this discussion is the Chinatown House, the last building that remained on the former historic Chinatown site at 8581 San Bernardino Road, which was made of local materials without the work of a trained architect, (constructed c. 1919, demolished).

Precedent for Evaluation of Folk Architecture

In addition to the National Register listing for the Russian Village, the significance of folk art environments in California has been previously established by other official historic designations, especially the individual listings of the immersive environments of Watts Towers of Simon Rodia at 1765 E. 107th Street in Los Angeles, listed in the National Register in 1977 and designated as a California Historical Landmark and National Historic Landmark,[70] and of Forestiere Undergroud Gardens at 5021 W. Shaw Avenue in Fresno, listed in the National Register in 1977 and designated a California Historical Landmark in 1979.[71] Statewide significance of folk art has also been established through the 1980 adoption of the National Register Thematic Nomination prepared for Twentieth Century Folk Art Environments in California, which describes the significant folk art environments of the state as follows:[72]

> These works can best be described as monumental sized sculptures consisting of a variety of structures, sculptural forms, and painted surfaces. Many include the artist's living space. Visitors walking through these sites will find themselves surrounded on every side by the vision of the artist, hence the term "environmental." The environments are the work of folk artists with no formal training in the arts. Each worked without knowledge of the others. Their work blends an art statement with folk crafts, such as wood carving, tile working, stone cutting and stitchery, traditions of folk art with roots in the colonial period…

[70] National Archives Catalog, *https://catalog.archives.gov*, accessed April 21, 2019.
[71] The Forestiere Underground Gardens, *http://www.undergroundgardens.com/about*, accessed April 21, 2019.
[72] Robert Selway et al., Office of Historic Preservation, "Twentieth Century Folk Art Environments in California," National Register of Historic Places Inventory-Nomination Form, 1978, entered into National Register 1980.

> …Each environment made use of the natural landscape and discarded materials to create their folk art works. The recycling and innovative use of both natural and cultural materials, whether shells and sand or trash, is an important characteristic of all the works.

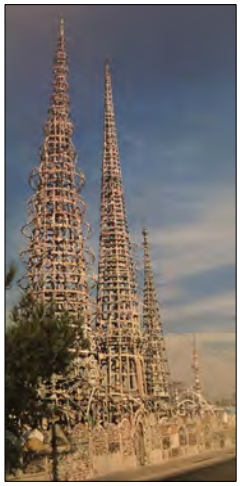

Fig 27 (left): Watts Towers, overall view (Source: Peter Selz, *Art in Our Times, A Pictorial History 1890-1980,* New York: Harry N. Abrams, 1981: 293); Fig 28 (right): Watts Towers, detail of outer fence with integrated artwork (Source: Watts Towers Arts Center, organization website, *https://www.wattstowers.org*)

In an effort to define Folk Art for purposes of project review, the City of Los Angeles' recently completed historic resource survey, known as SurveyLA, includes an historic context for Folk Art, 1850-1980, which defines Folk Art as a category, tracing its origins as a category in art history to the 1920s, mostly when applied to paintings and art objects, evolving to "utilitarian forms, especially household objects," and finally extending to architecture, as discussed here:[73]

> The broader concept of folk art, as applied to architectural resources from later periods and located outside of isolated communities, retains the assumption that the originator is talented but untrained. It differs, however, in two ways. First, it includes entire structures and landscapes as well as surface decoration. Second, there is less stress on the use of inherited vernacular modes and more on originality, to the point that eccentricity may be the most characteristic feature. This includes the unique uses of materials along with the creation of forms never before seen.
>
> Resources that fit this broader definition of Folk Art combine a number of elements—structures, landscape features, sculptures, assemblages of objects—into a unified whole. This whole is within a defined physical setting over which the creator has total control, typically the lot surrounding the creator's home. While apparently constructed without the use of formal plans, these resources show a unity of design, through common subject matter, forms and/or materials, based on the unique vision of the creator.[74]

Known examples in Los Angeles are few and tend to focus on the integration of artwork, rather than the architecture itself.

VII. EVALUATION OF SIGNIFICANCE

City of Rancho Cucamonga

The City of Rancho Cucamonga Historic Preservation Ordinance (Ordinance No. 848) was adopted by City Council in 2011 and allows the City Council to designate Historic Landmarks, Points of Historic Interest, and Historic Districts as described below.[75] Potential eligibility of the subject property under each criterion is discussed.

Designation Criteria for Historic Landmarks

A. The [City] Council may designate a property as a Historic Landmark if it meets the requirements of both paragraphs B and C of this Section.

B. Historic Landmarks must meet at least one of the following:

Criterion 1: It is or was once associated with events that have made significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.

The subject property is evaluated in this report for its association with patterns of development during the time of its construction, the early 1950s. The majority of post-World War II development in Rancho Cucamonga involved redevelopment of land formerly used for agriculture into tract housing. The subject property represents a smaller scale development of a single parcel and does not readily contribute to our understanding of broad patterns of urban development. The subject property is not known to be the location of any important events. Therefore, the subject property does not meet Criterion 1.

Criterion 2: It is or was once associated with persons important to local, California, or national history.

The subject property is evaluated in this report for association with original owner-builder, James Carwell (1918-2014). The house was designed and constructed by Carwell as his residence and is considered an important example of Folk Architecture. However, Carwell does not appear to be a person important in our past. Carwell worked as a butcher and does not have other important historical associations. The only other resource potentially attributable to him is the adjacent residence at 8817 Baker Avenue (not extant), which is not known to have been historically or architecturally significant. Therefore, the subject property does not meet Criterion 2.

Criterion 3: It embodies the distinctive characteristic of a type, period, or method of construction.

The subject property is evaluated in this report for its Folk Architecture, a form of vernacular architecture designed without the work of a trained architect, often constructed with found, salvaged, or locally available materials, and sometimes incorporating artwork into the design. The importance of local Folk Architecture is established by the listing of Claremont's Russian Village in the National Register; the thematic nomination for Folk Art Environments

[75] City of Rancho Cucamonga Ordinance No. 848, adopted July 6, 2011, *https://www.cityofrc.us/civicax/filebank/blobdload.aspx?BlobID=8222*, accessed April 21, 2019.

in California, also listed in the National Register; and through other separate listings for individually significant Folk Art environments, as discussed in this report.

The Russian Village includes fifteen stone and concrete rubble houses constructed using salvaged local materials during the years 1923-1938. Many of these homes were designed and constructed by local builder Konstanty "Steve" Stys, a Polish immigrant (1894-1961), who also trained other locals to build their own houses in the Russian Village and elsewhere in the community. Stys also owned property in Rancho Cucamonga very nearby the subject property, and continued his work constructing Folk Architecture, building his house there using salvaged local materials in 1945. His property was later expanded and became the Cask 'n Cleaver restaurant (previously found eligible as an historical resource in the survey conducted for the City of Rancho Cucamonga's 2010 general plan update). While a definitive connection of the subject property to Stys could not be made, the house at the subject property was very likely constructed in association with Stys. Anecdotal evidence provided in this report confirms his likely involvement. Design of the house follows his traditions of local Folk Architecture, looks much like his other work, and is a rare example of its type.

Effectively utilizing salvaged local materials (concrete rubble, telephone poles, stones, and wood) and incorporating artful placement of stones and materials, such as at the living room fireplace and in the curved low walls in the front yard, the house at the subject property is a good example of Folk Architecture. This architecture and method of construction is unique, fitting into a significant historic context for Folk Architecture, examples of which are rare in Rancho Cucamonga and in Southern California. The subject property appears to be significant for this association and therefore meets Criterion 3.

Criterion 4: It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.

The subject property is evaluated in this report for association with local builder, Konstanty Stys. The similarities between Stys work and the house at the subject property are striking. Because on testimony of Carwell's descendants, as discussed in this report, there is a strong likelihood that Stys advised Carwell on construction techniques, similar to his approach advising locals at the Russian Village. However, the extent of Stys involvement cannot be explicitly demonstrated. Therefore, the subject property does not meet Criterion 4.

Criterion 5: It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.

The subject property cannot reasonably be expected to yield significant archaeology or information important to prehistory of the local area or otherwise. Therefore, the subject property does not meet Criterion 5.

C. Historic Landmarks must retain integrity from their period of significance with respect to its location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its depilated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to particular characteristics that support the property's eligibility.

Integrity refers to the ability of a property to convey its significance. Evaluation of integrity is based on "an understanding of a property's physical features and how they relate to its significance." The National Register recognizes seven aspects or qualities of integrity: *location, design, setting, materials, workmanship, feeling, and association*. To retain integrity, a property must possess several, and usually most, of these aspects. The subject property appears to retain integrity from its date of construction, 1952-1953, as described below.

- *Location:* The building at the subject property has not been moved; therefore, the subject property retains integrity of *location.*
- *Design:* The massing, floor plan, and primary architectural features of the subject property have not been altered. The concrete rubble exterior walls, chimney, and roof structure with telephone poles and wood boards remain intact. The main alterations have been to window sash and glazing, which have generally all been removed and through additions along north and east elevations, which have also been removed. However, because the primary design features remain intact and the building is still easily readable as an example of Folk Architecture from its date of construction, the subject property retains integrity of *design.*
- *Setting:* The subject property was surrounded by agricultural land when the existing building was constructed. Citrus groves have been removed and the agricultural land has largely been replaced by tract housing developments. Therefore, the subject property may not retain integrity of *setting.*
- *Materials:* Given that the subject property is relatively unaltered in terms of its design and has the majority of its original materials, it retains integrity of *materials.*
- *Workmanship:* Because the subject property retains integrity of design and materials, it also retains integrity of *workmanship.*
- *Feeling and Association:* Because the subject property generally retains integrity of location, setting, and workmanship, it is able to convey *feeling* and *association*.

Designation Criteria for Historic Districts and Conservation Districts

The subject property was considered for potential eligibility as a contributor to a locally eligible historic district. However, there does not appear to be a cohesive grouping of buildings that includes the subject property and conveys a strong sense of time and place from any particular period in history. The subject property is not part of an intact grouping of early residential properties. Existing development along Baker Avenue currently includes a wide variety of land uses with varying dates of construction. There is not a strong sense of time and place from any particular period in history. There is no significant concentration, linkage, or continuity of sites, buildings, structures, or objects united historically or aesthetically by plan or physical development. Therefore, there does not appear to be any district present.

California and National Registers

Because eligibility criteria for National and California Registers align, the following evaluation considers eligibility under each of the criteria at federal and state under a single heading.

Criterion A/1: Is associated with events that have made a significant contribution to the broad patterns of our history and cultural heritage.

The subject property is evaluated in this report for its association with patterns of development during the time of its construction, the early 1950s. The majority of post-World War II

development in Rancho Cucamonga involved redevelopment of land formerly used for agriculture into tract housing. The subject property represented a smaller scale development of a single parcel and does not readily contribute to our understanding of broad patterns of urban development. The subject property is not known to be the location of any important events. Therefore, the subject property does not meet Criterion A/1.

Criterion B/2: Is associated with the lives of persons important in our past.

The subject property is evaluated in this report for association with original owner-builder, James Carwell (1918-2014). The house was designed and constructed by Carwell as his residence and is considered an important example of Folk Architecture. However, Carwell does not appear to be a person important in our past. Carwell worked as a butcher and does not have other important historical associations. The only other resource potentially attributable to him is the adjacent residence at 8817 Baker Avenue (not extant), which is not known to have been historically or architecturally significant. Therefore, the subject property does not meet Criterion B/2.

Criterion C/3: Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual or possesses high artistic values.

The subject property is evaluated in this report for its Folk Architecture, a form of vernacular architecture designed without the work of a trained architect, often constructed with found, salvaged, or locally available materials, and sometimes incorporating artwork into the design. The importance of local Folk Architecture is established by the listing of Claremont's Russian Village in the National Register; the thematic nomination for Folk Art Environments in California, also listed in the National Register; and through other separate listings for individually significant Folk Art environments, as discussed in this report.

The Russian Village includes fifteen stone and concrete rubble houses constructed using salvaged local materials during the years 1923-1938. Many of these homes were designed and constructed by local builder Konstanty "Steve" Stys, a Polish immigrant (1894-1961), who also trained other locals to build their own houses in the Russian Village and elsewhere in the community. Stys also owned property in Rancho Cucamonga very nearby the subject property, and continued his work constructing Folk Architecture, building his house there using salvaged local materials in 1945. His property was later expanded and became the Cask 'n Cleaver restaurant (previously found eligible as an historical resource in the survey conducted for the City of Rancho Cucamonga's 2010 general plan update). While a definitive connection of the subject property to Stys could not be made, the house at the subject property was very likely constructed in association with Stys. Anecdotal evidence provided in this report confirms his likely involvement. Design of the house follows his traditions of local Folk Architecture, looks much like his other work, and is a rare example of its type.

Effectively utilizing salvaged local materials (concrete rubble, telephone poles, stones, and wood) and incorporating artful placement of stones and materials, such as at the living room fireplace and in the curved low walls in the front yard, the house at the subject property is a good example of Folk Architecture. This architecture and method of construction is unique, fitting into a significant historic context for Folk Architecture, examples of which are rare in Rancho Cucamonga and in Southern California. The subject property appears to be significant for this association and therefore meets Criterion C/3.

Criterion D/4: Has yielded, or may be likely to yield, information important in prehistory or history.

The subject property cannot be reasonably expected to yield information important in prehistory or history; therefore, it does not appear eligible under Criterion D/4.

Period of Significance

The period of significance for the subject property is its date of construction, 1952-1953.

Character-Defining Features

The character-defining features, the physical features extant from the period of significance that convey significance, and should be preserved, include the following:

Exterior

- One-story scale and massing of house.
- Primary façade of house oriented south, positioned along street.
- Exterior walls of house made of concrete rubble.
- West elevation chimney made of concrete rubble.
- East elevation outdoor fireplace made of brick and concrete rubble.
- Flat roof structure made of telephone poles and wood boards.
- Full front porch with simple concrete structure, accessed by steps.
- Pattern of door and window openings and concrete slip sills (where extant)

Site Features

- Low curved walls located west of house bordering front yard.
- Low brick pillars that were once components of the front yard fence.

Interior

- Configuration of public spaces, including kitchen, hallway, and living room.
- Living room fireplace on west wall, with integrated concrete and stone and brick work.
- Telephone pole and wood ceilings where they occur throughout.

VIII. CONCLUSION

The subject property is evaluated in detail in this report, including thorough documentation of existing conditions, history of construction and alterations, and history of owners and tenants. The subject property was evaluated against relevant historic contexts and was found significant as an important and rare example of local Folk Architecture, most likely constructed in association with noted local builder, Konstanty Stys. The subject property meets eligibility criteria for local designation as a City of Rancho Cucamonga Historic Landmark and for the California Register, though it was not found to be a contributor to any historic district. Due to alterations, especially removal of all windows, it may not retain sufficient integrity for listing in the National Register. As the subject property appears eligible for local designation as well as for listing in the California Register, it is therefore an historical resource under CEQA.

STAFF REPORT

PLANNING DEPARTMENT

RANCHO CUCAMONGA

Date: April 23, 2014

To: Chairman and Members of the Historic Preservation Commission

From: Candyce Burnett, Planning Manager

By: Mayuko Nakajima, Assistant Planner

Subject: HISTORIC LANDMARK DESIGNATION DRC2014-00206 - DENNIS MYSKOW - A request for a historic landmark designation for a single-family residence within the General Industrial District, located at 8803 Baker Avenue - APN: 0207-271-40. The project is categorically exempt under Section 15331 as a Class 31 exemption of the guidelines for the California Environmental Quality Act. This item will be forwarded to City Council for final action.

BACKGROUND

A. Historical Significance: The subject structure, located at 8803 Baker Avenue, was built in the late 1940s or early 1950s and is considered to be built in the Folk Architecture style. The structure is constructed of recycled and/or salvaged materials ranging from deeply textured paving stones, telephone poles, and native rocks. The telephone poles run all through the house to act as a support for the roofing. The backyard is outlined by a wall constructed of remnants of rubble and rock placed in various configurations. The structure retains most of its original material. The garage that sits on the southern portion of the site was built at a later date. Towards the northerly portion of the main structure, an addition was also constructed. Both later additions were completed by the current owner.

The house is believed to be built by Polish immigrant Konstanty "Steve" Stys. Originally from Poland, he immigrated to the United States and settled in Youngstown, Ohio before moving to California in 1921. He lived in Pomona, then he moved to Claremont, and finally to Cucamonga in 1946. He is perhaps most known for his affiliation with the Russian Village in Claremont. He was a rock craftsman of the area who put a lot of character into his work. The Russian Village encompasses a group of 15 homes lining Mills Avenue that were built of recycled and/or salvaged materials during the Great Depression. In 1923, Stys purchased the eastern side of Mills Avenue. He then sold lots to friends and needy families and helped them find building materials from wrecking yards, earthquake-damaged buildings from the 1933 earthquake, and local field stones from the alluvial plain around the City of Claremont. The homes are unified by their use of rock and street rubble as exterior materials such as telephone poles, chunks of pavement, sides from railroad cars, red-tile roofs, and the informal arrangement of each property. Local residents nicknamed the neighborhood "Russian Village," assuming that Stys came from Russia. This neighborhood was placed on the National Register of Historic Places as a prime example of folk architecture. It was the hard times of the Great Depression that helped create this sense of community in these houses. The use of salvaged materials was an economic way to build houses. Stys is also known for designing and constructing the structure located at 8649 9th Street in Rancho Cucamonga, which is currently the Cask and Cleaver restaurant. This was Stys'

home until his death in 1961. The Cask and Cleaver building was built approximately in the late 1940s.

B. Ownership History: According to the City directory from 1950 to 1967, Jason and Jenny Carwell were listed as the owners (the original address was 158 Baker Avenue). According to the San Bernardino County Assessor's information, the previous owners were Charles and Donna Lescault. In 1973, the current owners, the Myskows, acquired the property. A real estate agent informed them that the building was built by Mr. Stys. It is possible that the structure was built about the same time as the Cask and Cleaver building, since it was in such close proximity and because it follows his move to the Cucamonga area in 1946. There are no building records that show the actual date of construction for the structure located at 8803 Baker Avenue, but historic aerials reveal that there was something on the site in 1938, and a definitive structure could be identified by 1959 (Exhibit B).

C. Site Characteristics: The project site is on an L-shaped parcel (approximately 0.5 acres), located approximately 500 feet north of 8th Street. The lot is zoned General Industrial and the single-family residence is considered a legal non-conforming use. Properties to the north are zoned Industrial Park; to the east and south is General Industrial; to the west is zoned Low Residential. It is generally surrounded by vacant land with the exception of a residential development just west of the site and a separate parcel just south of the property where there exists another legal non-conforming residence.

ANALYSIS

A. General: The house was never identified in the City of Rancho Cucamonga 2009 historic survey results, performed by Chattel Architecture, nor the previous City surveys conducted throughout the years. That does not preclude properties that might have been missed by these surveys. Based on a field visit to the project site and also to the "Russian Village," the construction methods and materials are very similar with the use of deeply textured paving stones, telephone poles, and native rocks. Although there is no written documentation stating that this was built by Mr. Stys, the construction methods and materials are so unique that staff has concluded that it must have been built by the same person or his apprentice. According to the National Register of Historic Places Inventory, "Lay-More Tile" was a business owned and operated by Stys and his friend, Merle Mead. The tile itself is a dry, self-stacking, concrete block that appears in a number of the structures in Russian Village and also appears on the subject structure.

B. Landmark Designation: The subject site qualifies for landmark designation based upon much of the criteria from the City's Historic Preservation Ordinance, including such significant areas as historical and cultural significance and integrity. Details related to these areas of significance are contained in the Facts for Findings Section. The purpose of the designation is to preserve, protect, enhance, and perpetuate a significant feature that contributes to the cultural and aesthetic benefit of Rancho Cucamonga.

C. Environmental Assessment: The project is categorically exempt under Section 15331 as a Class 31 exemption of the guidelines for the California Environmental Quality Act.

FACTS FOR FINDING:

A. Historical and Cultural Significance:

Finding 1: It is or was once associated with events that made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.

Fact/s: The property is an example of early life during a time where resources were scarce after the Great Depression.

Finding 2: It is or was once associated with persons important to local, California, or national history.

Fact/s: The property is associated with Konstanty Stys, an important person to local history.

Finding 3: It embodies the distinctive characteristics of a type, period, or method of construction.

Fact/s: The dwelling is a good example of Folk Architecture during the Great Depression era. Its method of construction is especially unique in that the builder utilized recycled and salvaged materials.

Finding 4: It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.

Fact/s: Konstanty Stys was known for his unique craftsmanship, also cited in "Judy Wright's *Claremont: A Pictorial History"* as "vernacular, anonymous, spontaneous, indigenous, or rural" architecture.

Finding 5: It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.

Fact/s: The structure and property has potential to yield information about the Great Depression era and the local area.

B. Integrity:

Finding 1: Historic Landmarks must retain integrity from their period of significance with respect to location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its dilapidated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to the particular characteristics that support the property's eligibility.

Fact/s: The proposed landmark retains integrity from thep period of significance with respect to location, design, materials, workmanship, and association. It retains sufficient integrity to convey its historic, cultural, or architectural significance.

CORRESPONDENCE: The Historic Landmark Designation was advertised as a public hearing in the Inland Valley Daily Bulletin newspaper, the property was posted, and notices were mailed to all property owners within 660 feet of the project site.

RECOMMENDATION: Staff recommends that the Historic Preservation Commission recommend approval of Landmark Designation DRC2014-00206 to be forwarded to the City Council for final action.

Respectfully submitted,

Candyce Burnett
Planning Manager

Russian Village

Built of Rubble in the Depression, Houses Are Now Claremont's Pride

By JEFFREY MILLER, *Times Staff Writer*

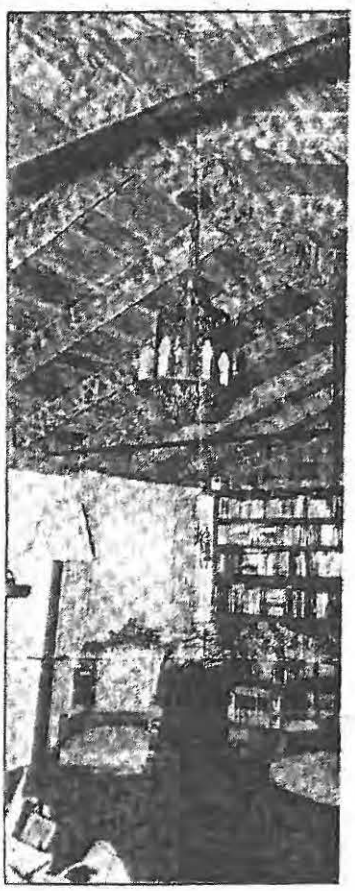
One might think that prospective homeowners would be less than thrilled to learn that their dream house was designed and constructed by untrained laborers using chunks of pavement, telephone poles and odds and ends scavenged from condemned buildings.

But to residents of Russian Village—15 houses built along South Mills Avenue in Claremont during the Great Depression by poor immigrant workers—these humble origins are a source of pride.

"You just develop real respect and affection for the people who built this," said resident Leo Snowiss as he admired the walls of his home, which was constructed with more than 2,500 concrete blocks that were chiseled from street rubble.

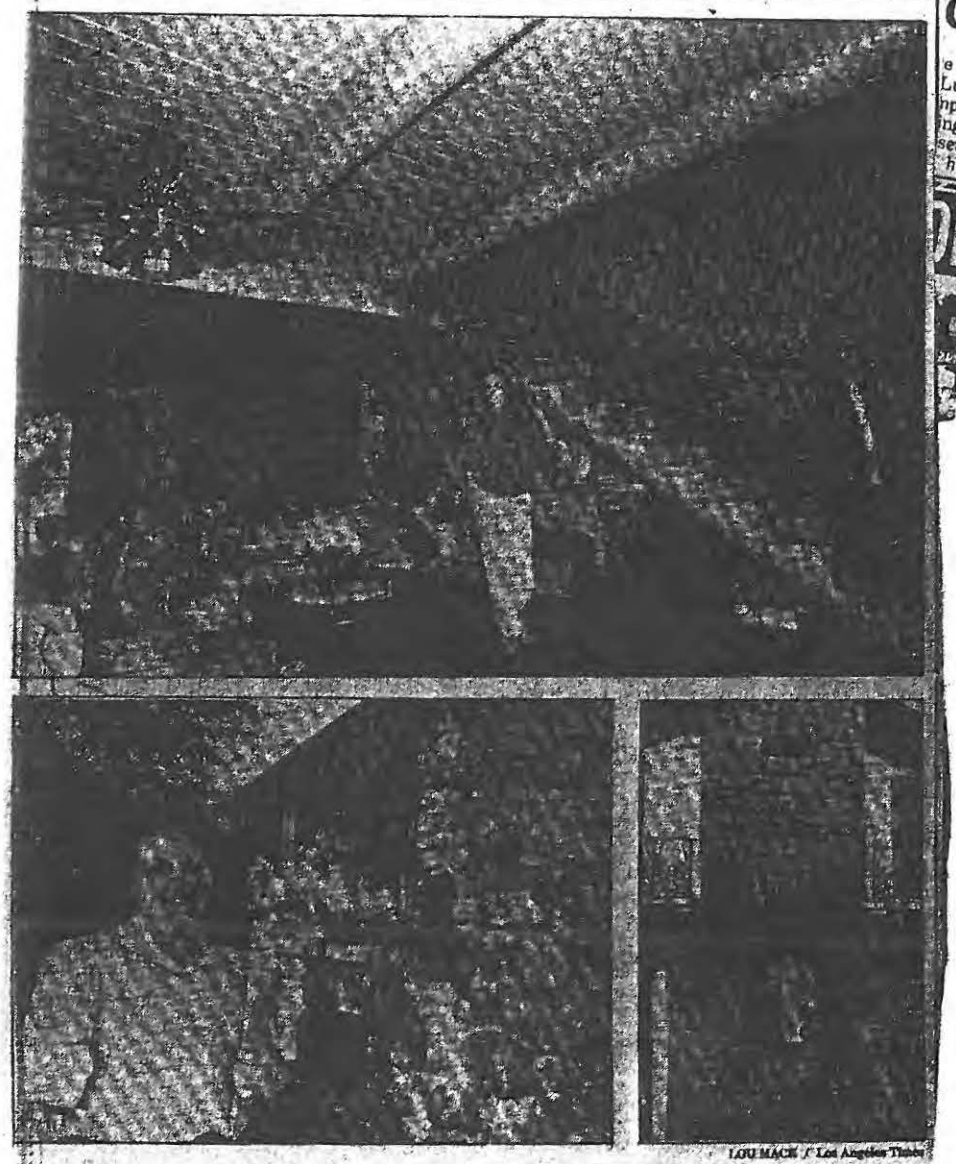
"They were very poor people," added Snowiss, a professor of political science at UCLA. "The Depression just wiped them out. They built [the houses] with the materials available. . . . Under the lash of necessity they could do it. It was really a classic American story."

Konstany Stys at work, 1931.



The key figure in the story of Russian Village is Konstany Stys, a Polish immigrant who came to the area in the early 1920s from Youngstown, Ohio, where he had been a steel worker.

Although he didn't have much money, formal education or experience in housing design, Stys created a neighborhood of hand-crafted homes that has been included on the National Register of Historic Places as a definitive example of "folk architecture."



Attracted by the construction work available at the nearby Claremont Colleges, Stys bought a plot of land among the citrus groves of south Claremont. In seeking building materials, Stys needed to look no farther than the large piles of rocks that had been cleared from the surrounding land to make it arable.

Using those rocks, along with larger boulders hauled down from the mountains and surplus lumber from construction sites at the colleges, Stys built a modest house in 1922 that established the village's rocky,

VILLAGE: Houses of Rubble

Continued from Page 1

rustic style.

At the onset of the Depression, Stys subdivided his land and sold parcels under generous terms to friends, relatives and co-workers who had been left destitute. Mortgage payments—not always collected—were as low as $5 a month. Stys lent home buyers his labor and his knack for obtaining low-cost building materials.

Stys' neighbors copied his architectural style, more out of financial necessity than aesthetic consistency. While most of the houses were built with the plentiful field stones, builders also used pavement from flood-damaged streets and red tiles scavenged from the roofs of buildings condemned after the 1933 earthquake. Fixtures were obtained from a salvage company in Los Angeles.

Most homes in Claremont daily story is that neighbors mistook Stys' accent as being Russian. Others say that some Claremont residents at the time perceived a hint of Bolshevism in the cooperative community established by the immigrant workers.

With one notable exception, the homes were built without blueprints, accounting for some unique floor plans. "Building design was dictated by available supplies and the needs of growing families.

"These houses are all different," said Snowiss, whose home features an exposed-beam ceiling made of surplus lumber hewn with an ax-like tool called an *adz* by Stys and his son Raymond. "They all grew like weeds, like beautiful weeds."

Only one house departed from this unplanned approach. Peter Ficker, a Pomona architect, owed Stys $80 for construction work. Short of money, Ficker offered to

retaining the house's historic features.

Although major exterior alterations require approval from the city, maintenance of the homes' historical character is largely on the honor system. Some residents even collect blocks of street rubble with which to build additions to their houses.

Please see VILLAGE, Page

VILLAGE: Untrained Builders' Work Lasts

Continued from Page 4

Stys, who died in 1961, built 10 homes elsewhere in his trademark rock-and-bubble style. The largest of these, in Rancho Cucamonga, later became the first Cask 'N Cleaver restaurant. Stys' wife, Antonina, lived in an artist's studio that Stys built near the restaurant until she moved to Northern California earlier this year.

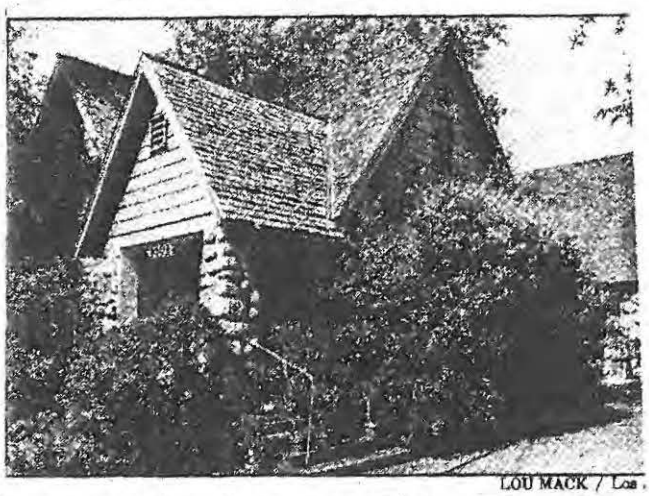
Each of the individually styled houses in Russian Village seems to have its own materials, history and anecdotes.

There is the European-style country home with seven steeply pitched gables, built in 1933 by Garret Batelaan, a 21-year-old who had taken correspondence courses in carpentry, plumbing and wiring but had never actually built a house. His first effort has held up well, despite Stys' admonition that the steep roof was structurally unsound and would collapse.

Then there is the house built in 1937 by Mr. and Mrs. Burton Blanchard, both 19 at the time. With no construction experience, the couple followed do-it-yourself manuals to build the home, using materials such as railroad ties and oil cans filled with cement.

The walls were made from 740 tons of concrete originally used to pave Holt Boulevard, purchased for a hauling charge of $35. The roof, taken from a condemned school building in Glendora, cost $120. The Blanchards paid $883.75 for the lot and all building materials.

The most expensive house in the neighborhood cost $5,000 to build. Last year a home that was built in 1939 for $1,500 sold for $198,000.



The largest home in the neighborhood is a triplex that Stys built to accommodate his extended family, including married children and in-laws. The home originally featured three separate dwellings attached to a common living room.

The home features sandstone walls salvaged from the Los Angeles County Courthouse and a red-tile roof from the earthquake-damaged Long Beach Library. Telephone poles were used for the structure's support beams and its main stairway.

"I like the style of it," said Joanne Lariviere, who bought the triplex five years ago and rents out two of its units. "It's more like you're living in the country when you live in Russian Village."

garage was the first house built by Stys, admits the traffic can be bothersome. But standing in her front yard, a few feet from two towering pines planted as Christmas trees by the Stys children more than 60 years ago, Will said the village's unique quality of life more than compensates.

"We love it here," she said. "These homes all have character. It's really interesting to live in a place with a history like this."

RESOLUTION NO. 14-01

A RESOLUTION OF THE HISTORIC PRESERVATION COMMISSION OF THE CITY OF RANCHO CUCAMONGA, CALIFORNIA, RECOMMENDING APPROVAL OF HISTORIC LANDMARK DESIGNATION DRC2014-00206, DESIGNATING THE PROPERTY A HISTORIC LANDMARK, LOCATED AT 8803 BAKER AVENUE; AND MAKING FINDINGS IN SUPPORT THEREOF - APN: 0207-271-40.

A. Recitals.

1. Dennis Myskow filed an application for a Landmark as described in the title of this Resolution. Hereinafter in this Resolution, the subject Landmark is referred to as "the application."

2. On April 23, 2014, the Historic Preservation Commission of the City of Rancho Cucamonga conducted a duly noticed public hearing on the application and concluded said hearing on that date.

3. All legal prerequisites prior to the adoption of this Resolution have occurred.

B. Resolution.

NOW, THEREFORE, it is hereby found, determined, and resolved by the Historic Preservation Commission of the City of Rancho Cucamonga as follows:

1. This Commission hereby specifically finds that all of the facts set forth in the Recitals, Part "A," of this Resolution are true and correct.

2. The application applies to approximately 0.5 acre of land, basically an L-shaped configuration, located at 8803 Baker Avenue.

3. Based upon substantial evidence presented to this Commission during the above-referenced public hearing on April 23, 2014, including written and oral staff reports, together with public testimony, and pursuant to Section 17.18.020 of the Rancho Cucamonga Municipal Code, this Commission hereby makes the following findings and facts:

A. Historical and Cultural Significance:

Finding 1: It is or was once associated with events that made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.

Fact/s: The property is an example of early life during a time where resources were scarce after the Great Depression.

Finding 2: It is or was once associated with persons important to local, California, or national history.

Fact/s: The property is associated with Konstanty Stys, an important person to local history.

Finding 3: It embodies the distinctive characteristics of a type, period, or method of construction.

Fact/s: The dwelling is a good example of Folk Architecture during the Depression era. Its method of construction is especially unique in that the builder utilized recycled and salvaged materials.

Finding 4: It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.

Fact/s: Konstanty Stys was known for his unique craftsmanship, also cited in "Judy Wright's *Claremont: A Pictorial History"* as "vernacular, anonymous, spontaneous, indigenous, or rural" architecture.

Finding 5: It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.

Fact/s: The structure and property has potential to yield information about the Depression era and the local area.

B. Integrity

Finding 1: Historic Landmarks must retain integrity from their period of significance with respect to location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its dilapidated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to the particular characteristics that support the property's eligibility.

Fact/s: The proposed landmark retains integrity from their period of significance with respect to location, design, materials, workmanship, and association. It retains sufficient integrity to convey its historic, cultural, or architectural significance.

4. This Commission hereby finds that the project has been reviewed and considered in compliance with the California Environmental Quality Act (CEQA) of 1970, as amended, and the Guidelines promulgated thereunder. The Commission finds that this Landmark Designation is exempt under CEQA, pursuant to State CEQA Guidelines Section 15331, as a Class 31 exemption (Historical Resource Restoration/Rehabilitation).

5. Based upon the findings and conclusions set forth in Paragraphs 1, 2, 3, and 4 above, this Commission hereby resolves that, pursuant to Section 17.18.020 of the Rancho Cucamonga Municipal Code, the Historic Preservation Commission of the City of Rancho Cucamonga hereby recommends approval of Landmark Designation on the 23rd day of April, 2014.

6. The Secretary to this Commission shall certify to the adoption of this Resolution.

APPROVED AND ADOPTED THIS 23RD DAY OF APRIL, 2014.

Date: June 1, 2021

Re: 9th and Vineyard Development Project, Rancho Cucamonga, CA
Historical Resources Impacts Analysis for CEQA Review

Introduction

This memo provides review of potential historical resources impacts of the proposed 9th and Vineyard Development Project (proposed project) in Rancho Cucamonga, California. The project site is 47.15 acres, bounded by E. 9th Street to the north, Vineyard Avenue and Cucamonga Creek to the east, E. 8th Street to the south, and Baker Avenue to the west, including Assessor Parcel Numbers 0207-271-25, -27, -30, -40, -89, -93, -94, -96, and -97 (hereinafter referred to as "project site" or "subject property"). The subject property includes five existing buildings: 8803 Baker Avenue; 8855 Baker Avenue; 8729 E 9th Street; 8847 E 9th Street; and 8830 Vineyard Avenue. One of the existing buildings is considered an historical resource under the California Environmental Quality Act (CEQA): 8803 Baker Avenue, a single-family home. The proposed project involves rehabilitation and reuse of 8803 Baker Avenue as a community center, plans for which are currently being prepared and will be evaluated in a later report. The proposed project also entails the erection of three warehouse buildings that include office space and associated parking and landscaping. This memo provides evaluation of potential historical resources impacts of the proposed project on the *setting* of 8803 Baker Avenue.

Consultant Qualifications

Kathryn McGee is an architectural historian and historic preservation planner based in Los Angeles. With over twelve years of experience, she meets the Secretary of the Interior's Professional Qualification Standards in Architectural History. Ms. McGee was previously employed as a Senior Associate at historic preservation consulting firm Chattel, Inc. and launched an independent consulting practice in 2015. Her educational background includes a Bachelor of Arts degree in architectural history from the University of California, Santa Barbara and a Master of Urban and Regional Planning degree from the University of California, Irvine. She has also completed the Summer Program in Historic Preservation at the University of Southern California and is a LEED Accredited Professional with specialty in Neighborhood Development. Her consulting work entails writing reports for purposes of environmental and local project review; preparation of historic resource assessments and surveys; preparation of technical reports for General Plan Updates; evaluation of properties seeking or complying with

Mills Act Contracts; and consultation on adaptive reuse and federal Investment Tax Credit projects.

Regulatory Setting

City of Rancho Cucamonga

The City of Rancho Cucamonga Historic Preservation Ordinance (Ordinance No. 848) was adopted by City Council in 2011 and allows the City Council to designate Historic Landmarks, Points of Historic Interest, and Historic Districts. Relevant to evaluation of the subject property are designation criteria for historic landmarks, as described below:[1]

Designation Criteria for Historic Landmarks

A. The [City] Council may designate a property as a Historic Landmark if it meets the requirements of both paragraphs B and C of this Section.
B. Historic Landmarks must meet at least one of the following:
    1. It is or was once associated with events that have made significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.
    2. It is or was once associated with persons important to local, California, or national history.
    3. It embodies the distinctive characteristic of a type, period, or method of construction.
    4. It represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.
    5. It has yielded or has the potential to yield information important to the prehistory or history of the local area, California, or the nation.
C. Historic Landmarks must retain integrity from their period of significance with respect to its location, design, setting, materials, workmanship, feeling, association, or any combination of these factors. A proposed landmark need not retain all such original aspects, but must retain sufficient integrity to convey its historic, cultural, or architectural significance. Neither the deferred maintenance of a proposed landmark nor its depilated condition shall, on its own, be equated with a loss of integrity. Integrity shall be judged with reference to particular characteristics that support the property's eligibility.

California Register

Based substantially on the National Register of Historic Places, the California Register of Historical Resources (California Register) is "an authoritative guide… used by state and local agencies, private groups, and citizens to identify the state's historical resources and to indicate what properties are to be protected."[2] For a property to be eligible for listing in the California Register, it must be found by the State Historical Resources Commission to be significant under at least one of the following four criteria:

[1] City of Rancho Cucamonga Ordinance No. 848, adopted July 6, 2011, *https://www.cityofrc.us/civicax/filebank/blobdload.aspx?BlobID=8222*, accessed April 21, 2019.

[2] California Public Resources Code §5024.1(a), *http://codes.lp.findlaw.com/cacode/PRC/1/d5/1/2/s5024.1*.

1) is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage; or
2) is associated with the lives of persons important in our past; or
3) embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual or possesses high artistic values; or
4) has yielded, or may be likely to yield, information important in prehistory or history.

Also included in the California Register are properties which have been formally determined eligible for listing in or are listed in the National Register; are registered State Historical Landmark Number 770, and all consecutively numbered landmarks above Number 770; and Points of Historical Interest, which have been reviewed and recommended to the State Historical Resources Commission for listing.

California Environmental Quality Act (CEQA)

The California Environmental Quality Act (CEQA) was enacted in 1970 and offers protection for identified historical resources. In general, for purposes of CEQA and environmental review, an "historical resource" is that which has been determined eligible for listing in the California Register, or one that is designated at the local level. The term "historical resource" includes the following:

1. A resource listed in, or determined to be eligible by the State Historical Resources Commission for listing in the California Register of Historical Resources (Pub Res Code SS5024.1, Title 14 CCR, Section 4850 et seq).
2. A resource included in a local register of historical resources, as defined in Section 5020.1(k) of the Public Resources Code or identified as significant in an historical resource survey meeting the requirements Section 5024.1(g) of the Public Resources Code, shall be presumed to be historically or culturally significant. Public agencies must treat any such resource as significant unless the preponderance of evidence demonstrates that it is not historically or culturally significant.
3. Any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California may be considered to an historical resource, provided the lead agency's determination is supported by substantial evidence in light of the whole record. Generally, a resource shall be considered by the lead agency to be "historically significant" if the resource meets the criteria for listing on the California Register (Pub Res Code SS5024.1, Title 14 CCR, Section 4852).
4. The fact that a resource is not listed in, or determined to be eligible for listing in the California Register of Historical Resources, not included in a local register of historical resources (pursuant to 5020.1 (k) of the Public Resources Code), or identified in an historical survey (meeting the criteria in Section 5024.1(g) of the Public Resources Code) does not preclude a lead agency from determining that the resource may be an historical resource as defined in Public Resources Code Sections 5020.1 (j) or 5024.1.

Summary of Historic Resource Eligibility

A comprehensive historic resource assessment of 8803 Baker Avenue was prepared by this author in 2019, finding 8803 Baker Avenue eligible for listing as a City of Rancho Cucamonga Historic Landmark and in the California Register.[3] The property is significant as an important and rare example of local Folk Architecture, for its method of construction using salvaged local materials, for association with its original owner-builder, James Carwell, and for association with notable local builder Konstanty Stys. Due to alterations, especially loss of all original window sash, the subject property may not retain sufficient integrity for listing in the or National Register of Historic Places. It does not appear to be part of any historic district. Because it appears eligible for listing in the California Register and local designation, it is considered an historical resource for purposes of CEQA and local project review.

The character-defining features of 8803 Baker Avenue, as defined in this author's 2019 historic resource assessment report, are physical features extant from the period of significance, 1952-1953, that convey the property's significant historical associations. These features are listed below and for purposes of this memo are limited to the building exterior and site features, as the interior will be discussed in a later report on rehabilitation and reuse of the house:

- One-story scale and massing of house
- Primary façade of house oriented south, positioned along street
- Exterior walls of house made of concrete rubble
- West elevation chimney made of concrete rubble
- East elevation outdoor fireplace made of brick and concrete rubble
- Flat roof structure made of telephone poles and wood boards
- Full front porch with simple concrete structure, accessed by steps
- Pattern of door and window openings and concrete slip sills (where extant)
- Low curved walls located west of house bordering front yard
- Low brick pillars that were once components of the front yard fence

Archaeology

In 2020, Archaeologist Curt Duke, RPA, of Duke Cultural Resources Management prepared a report and field survey at the subject property and found the ground to be highly disturbed and concluded there is low potential of the proposed project to impact archaeological resources.[4]

Thresholds for Determining Significance of Impacts

According to the CEQA Guidelines, a project would result in a significant impact to historical resources if it would cause a *substantial adverse change* in the significance of an historical resource (California PRC §21084.1). A substantial adverse change is defined in CEQA Guidelines §15064.5(4)(b)(1), as "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the *significance of an historical resource*

[3] Kathryn McGee, "Historic Resource Assessment: 8803 Baker Avenue, Rancho Cucamonga, CA 91730," prepared for Panattoni Development Company, April 26, 2019.

[4] Duke Cultural Resources Management, Letter report to Michael Sizemore, Panattoni Development Company, "Archaeological Resource Validation Memorandum for the 9th and Vineyard Development Project, City of Rancho Cucamonga, San Bernardino County, California," May 14, 2020.

would be materially impaired." The significance of an historical resource is materially impaired, according to CEQA Guidelines §15064.5(4)(b)(2), when a project:

> (A) Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register of Historical Resources; or
> (B) Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to §5020.1(k) of the Public Resources Code or its identification in an historical resources survey meeting the requirements of §5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of the evidence that the resource is not historically or culturally significant; or
> (C) Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA. [5]

CEQA Guidelines also specify a means of evaluating the relative significance of project impacts on historical resources. CEQA Guidelines §15064.5(b)(3) state:

> Generally, a project that follows the *Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings or the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings* (*Secretary's Standards*, Weeks and Grimmer, 1995), shall be considered as mitigated to a level of less than a significant impact on the historical resource. [6]

Under CEQA, the key issue relates to how a proposed development may impact the potential eligibility of a structure(s) or a site for designation as an historic resource. The *Secretary's Standards* were developed by the U.S. Department of the Interior to evaluate and approve work for federal grants for historic buildings and then for the federal rehabilitation tax credit (see 36 Code of Federal Regulations Section 67.7). The *Secretary's Standards* are used for regulatory approvals for designated resources but not for resource evaluations. CEQA has a "safe harbor" by providing either a categorical exemption or a negative declaration for a project which meets the *Secretary's Standards* (see State CEQA Guidelines Section 15331 and 15064.S(b)(3)). According to Appendix G of the State CEQA Guidelines, the appropriate threshold of significance is whether a project causes a substantial adverse change in the significance of a historical resource as defined in State CEQA Guidelines Section 15064.5. That Section provides a detailed definition of "substantial adverse change." In summary, the definition of substantial adverse change and, hence, the threshold of significance, is whether a project demolishes or materially alters in an adverse manner the physical characteristics that convey historical significance of the resource or that justify its eligibility for the California Register of Historical

[5] CEQA Guidelines §15064.5(4)(b)(2). Emphasis added.
[6] CEQA Guidelines §15604.5(b)(3).

Resources or a local register. In other words, if a project removes the essential character-defining features and/or would render an eligible historic resource ineligible, then there would be a significant adverse effect under CEQA.

Secretary of the Interior's Standards for Treatment of Historic Properties

The *Secretary's Standards* consist of four treatments, the most common of which is rehabilitation, which is defined as "the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features which convey its historical, cultural, or architectural values." The rehabilitation standards are:

1. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships.
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.
3. Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.
4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.
6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.
9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.
10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

The *Secretary's Standards* are intended to be flexible and adaptable to specific project conditions to balance change while retaining historic building fabric to the maximum extent feasible. The National Park Service has created a substantial amount of written guidance, most of it available online, including Illustrated Guidelines for Rehabilitating Historic Buildings, Preservation Briefs, Preservation Tech Notes, and Interpreting the Standards Bulletins (ITS).

Description of Proposed Project

The proposed project is described in a drawing set and renderings prepared by HPA Architecture, dated 12/07/20. For purposes of evaluation in this memo, the site plan focusing on the west portion of the project site nearest 8803 Baker Avenue, two sheets of elevation drawings, and three 3-D renderings were reviewed. This memo is limited to evaluation of potential impacts of the proposed project on the *setting* of 8803 Baker Avenue. As previously noted, a more detailed evaluation of the rehabilitation and reuse project on the 8803 Baker Avenue exterior and interior will be addressed in a future report.

The proposed project involves retention of 8803 Baker Avenue in place and entails the erection of three warehouse buildings that include office space (over one-million square feet of interior space in total), addition of surface parking and landscaping, and implementation of water and storm drain improvements. 8803 Baker Avenue is positioned in the west portion of the project site, just west of the proposed new "Building 3" warehouse. As Building 3 is the primary building visible from 8803 Baker Avenue, it is focused on in the following description.

Building 3 is proposed as a 270,356 square foot building consisting of 5,000 square feet of office space at first and second floors and 265,356 square feet of warehouse space. The building will be oriented west toward Baker Avenue and set back approximately 147-feet from the sidewalk edge. 8803 Baker Avenue will remain in place, roughly centered in front of Building 3. The west façade of Building 3 will be set back more than 37-feet from the east elevation of 8803 Baker Avenue. New surface parking lots with spaces for 107 vehicles will be constructed to the north and south of 8803 Baker Avenue, located approximately 90-feet away from 8803 Baker Avenue on either side. Vehicular access to Building 3 and the larger project site will be provided via driveways off Baker Avenue.

Building 3 will be 36-feet tall and utilitarian. The floor plan is generally rectangular. The building is composed as a horizontal mass with architecture that is clearly contemporary, expressed in simple, geometric forms. Exterior walls have smooth surfaces painted in off-white and grey. The primary west façade is twelve bays wide, distinguished by building entrances at its north and south ends. Outermost bays include windows with clean anodized mullions, blue reflective glazing, and metal canopies at first and second floors while three alternating central bays have similar windows though at the second floor only. The north and south elevations are generally void of fenestration, except near their west ends where there are windows. The east elevation has no windows and includes a loading dock with 28 dock doors.

Evaluation of Proposed Project

The following focuses on evaluation of potential historical resources impacts of the proposed project on the *setting* of 8803 Baker Avenue. The proposed project will not adversely impact the setting of the historical resource for the following reasons:

- The setting of 8803 Baker Avenue has changed substantially over time, outside the property's period of significance (1952-1953), and is not considered a character-defining feature of the historical resource. At the time of construction of the house in 1952-1953,

the property was surrounded by orange and lemon groves, which have been removed. Thus, the rural and agricultural character of the historic setting is gone. Additionally, the house was originally designed with associated site features such as low rubble and rock walls surrounding a pool and serving as fencing, as well as a rock monument in a corner of the back yard. Most of these early features are gone; alterations also include removal of an east elevation covered patio, a north elevation addition, a freestanding garage, a swimming pool, front yard fencing, site walls, and paving, all of which were removed in 2016. An adjacent house constructed by the original owner to the south in the early 1950s has also been demolished. Because the setting of the existing building has already been substantially altered, it is not considered a character-defining feature of the historical resource and therefore further changes to it would not adversely impact the setting of the historical resource.

- The sense of scale and mass of the existing one-story house, 8803 Baker Avenue, will not be adversely impacted by the proposed new construction due to the substantial setback (over 37-feet), of Building 3 from the east elevation of 8803 Baker Avenue. The setback from the east elevation of 8803 Baker Avenue is approximately the same as the new building's height of 36 feet. Therefore, the new budling will simply not have the ability to overwhelm the existing building.

- The architectural design of Building 3 has been sensitively designed to serve as a backdrop behind 8803 Baker Avenue. Building 3 will be utilitarian with simple geometric forms composed in such a way that it will not compete with the architecture of the existing historic house. The proposed design and materials, with painted and glazed surfaces in muted colors, will be obviously contemporary and will not promote a false sense of history. Given that the new building will be set so far back from 8803 Baker Avenue coupled with the fact that the design and materials are modest, it could not reasonably be said to compete with the architecture of 8803 Baker Avenue.

The following evaluates the proposed project for conformance with the Secretary's Standards; the most applicable standard being Standard 9:

1. *A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships.*
   The proposed project will not demolish existing historic buildings; 8803 Baker Avenue will be retained in placed, rehabilitated, and reused as a community center, which is a compatible use that will require minimal changes to the existing materials and features. Plans for that project have not yet been prepared and will be described and evaluated in detail in a future report.

2. *The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.*
   As previously noted, plans for rehabilitation and reuse of 8803 Baker Avenue have not yet been prepared and will be described in detail in a future report. However, the proposed new construction will not alter spatial relationships that characterize 8803

Baker Avenue. The new buildings will be set back a significant distance from 8803 Baker Avenue and therefore will not overwhelm the existing sense of scale and mass of the historic one-story residence. The setting of 8803 Baker Avenue has not been previously identified as a character-defining feature and therefore the spatial relationship of the existing single-family home to its setting will not be adversely impacted by the proposed project.

3. *Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.*
   The proposed project is clearly contemporary, with use of modern architectural design and materials. It does not mimic the appearance of 8803 Baker Avenue nor other historical styles. Therefore, it will not promote a false sense of history.

4. *Changes to a property that have acquired historic significance in their own right will be retained and preserved.*
   The proposed project does not involve demolition of any historic buildings. 8803 Baker Avenue will be retained in place, rehabilitated, and reused. Therefore, the proposed project will not remove any buildings or features that have taken on historic significance.

5. *Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.*
   This standard does not readily apply. Plans for rehabilitation and reuse of 8803 Baker Avenue have not yet been prepared and will be described in detail in a future report.

6. *Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.*
   This standard does not readily apply. Plans for rehabilitation and reuse of 8803 Baker Avenue have not yet been prepared and will be described in detail in a future report.

7. *Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.*
   This standard does not readily apply. Plans for rehabilitation and reuse of 8803 Baker Avenue have not yet been prepared and will be described in detail in a future report.

8. *Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.*
   The proposed project is not anticipated to encounter archaeological resources.

9. *New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.*

The proposed new buildings will not destroy historic materials, features, or spatial relationships that characterize 8803 Baker Avenue. While plans for the proposed rehabilitation and reuse of 8803 Baker Avenue are still being made, the proposed new buildings, especially Building 3, which will be closest to 8803 Baker Avenue, have been carefully designed for compatibility with the historic building. The new architecture will be obviously contemporary in design and materials and thus differentiated from the historic building to avoid promoting a false sense of history. The proposed project will be compatible with the historic building, substantially set back from 8803 Baker Avenue by a length of distance approximately equaling its height. Therefore, the new construction will not have the sense of hanging over or overwhelming the one-story historic residence. The setting of 8803 Baker Avenue was not previously identified as a character-defining feature and therefore will not be adversely impacted by the proposed project.

10. *New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.*
    The proposed project is not considered removable, but it's construction will not impair the essential form and integrity of 8803 Baker Avenue, as that building will be rehabilitated and reused in its current location.

Based on the above analysis, the proposed project reviewed in this memo is in conformance with the *Secretary's Standards*.

Conclusion

Potential historical resources impacts of the proposed 9th and Vineyard Development Project were described and evaluated in this memo, which focused on potential impacts to the *setting* of 8803 Baker Avenue. Potential impacts of the rehabilitation and reuse of 8803 Baker Avenue on that building exterior and interior will be evaluated in a future report once plans for that project are prepared. The proposed project reviewed in this memo was found to be in conformance with the *Secretary's Standards*, as the setting of 8803 Baker Avenue has previously been altered and is not considered character-defining; the new construction is substantially set back from 8803 Baker Avenue; and the new construction is designed with architecture and materials that are simple and modest such that they will recede visually and simply serve as a backdrop. Therefore, the proposed project, as reviewed in this memo, will not have a significant effect historical resources, pursuant to Section 21084.1 of CEQA.

Baker Community Center Conceptual Design Package

BAKER AVENUE COMMUNITY CENTER

Conceptual Design Package

OCTOBER 26, 2021

PAGE&TURNBULL

VISION AND OBJECTIVES

Community Center

A place for the people of Southwest Cucamonga to gather for special life events, space to promote healthy living and daily enjoyment.

Sustainability

Demonstrate sustainable building and transportation practices to inspire people to make improvements at their homes and to the larger built environment. Adopt criteria of the Healthy Development Checklist from Riverside University Health System and others.

Preserve Historic Character

The Baker House is an unique piece of historic architecture whose character should be maintained throughout the site.

USER GROUPS

- Students of local schools (before and after school programs)
- Families using the gathering space for parties and events
- Community members seeking green space
- Residents of the neighborhood across the street

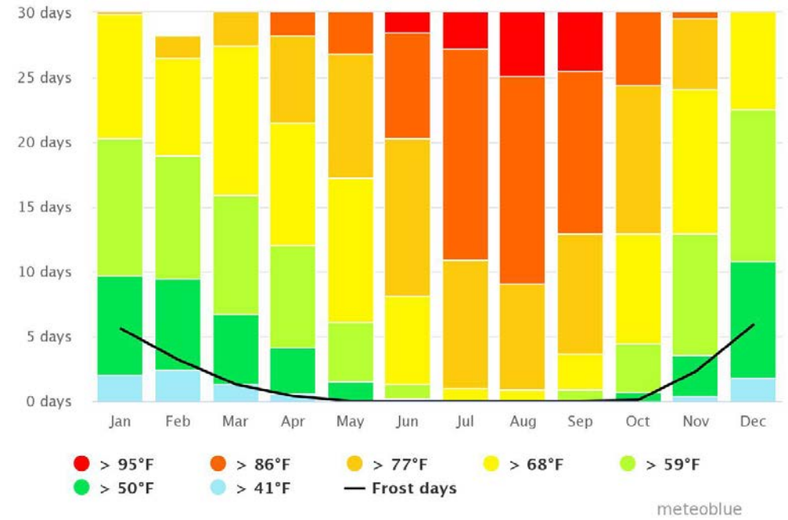
PROGRAM ELEMENTS

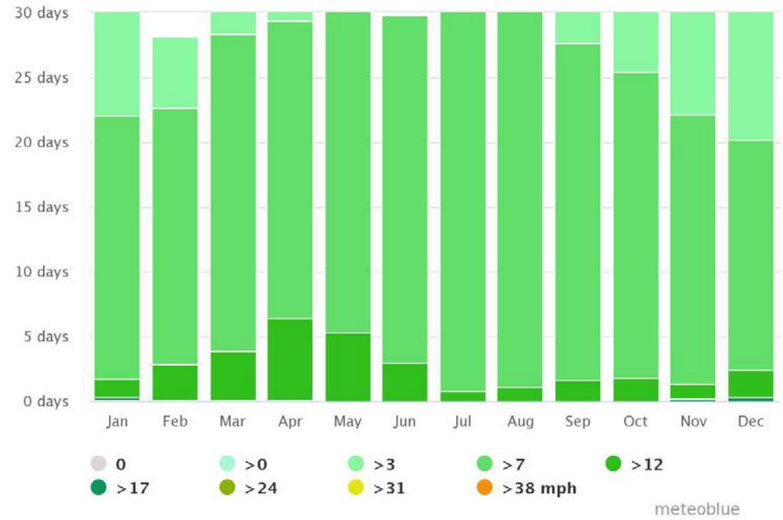
Existing Building

- Preserve and rehabilitate existing historic building
- Great Room - main indoor gathering area
- Provide accessible restrooms
- Warming Kitchen for catering events
- Office space for management of the site
- Storage (tables and chairs)

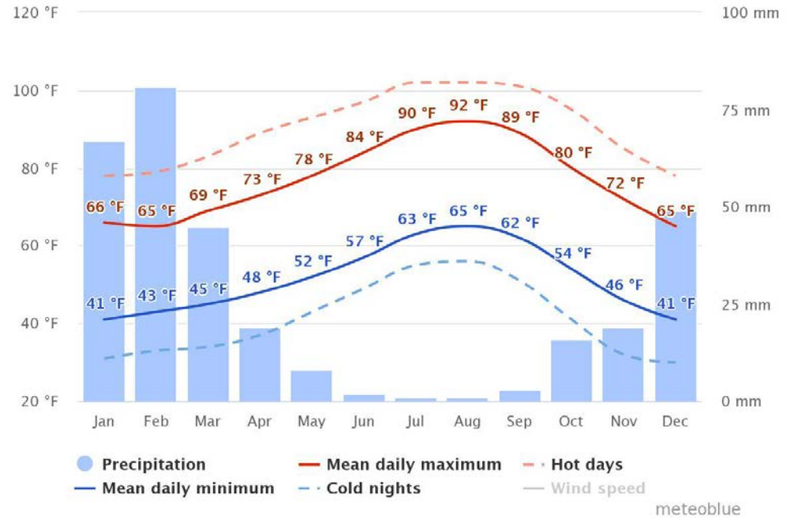
Site

- Provide parking (including EV Charging Stations)
- Shaded outdoor event space
- Playground
- Community Gardens
- Safe access and routes to neighborhood - encourage walking and biking

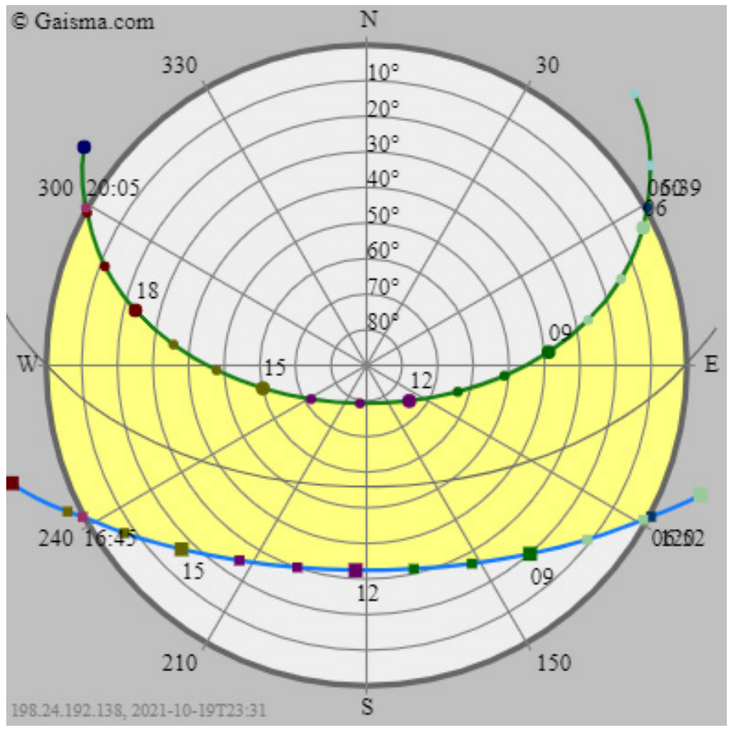




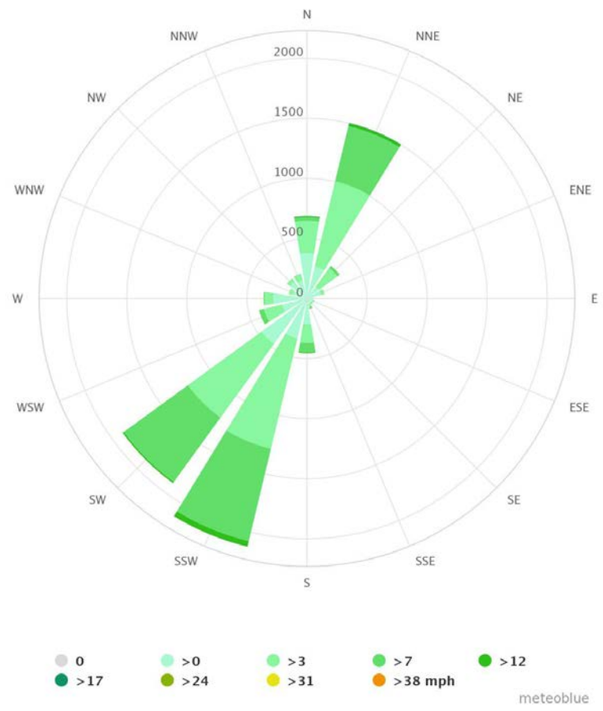
PROGRAM OVERVIEW



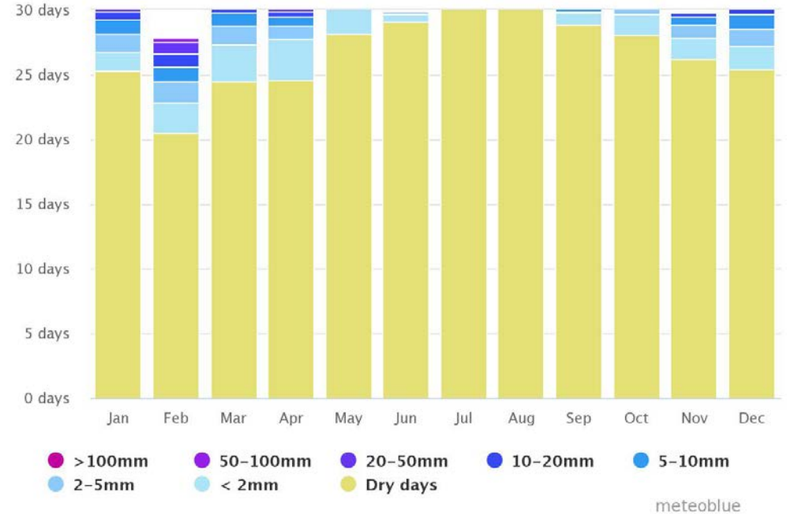
- Provide rentable space for community members to use for private events
- Create space that can be used for larger community gatherings, like farmer's market and neighborhood block parties
- After school programs for children
- Host programs to assist adults/families



Average temperatures throughout the year



Average wind speeds throughout the year



Average temperature and precipitation throughout the year

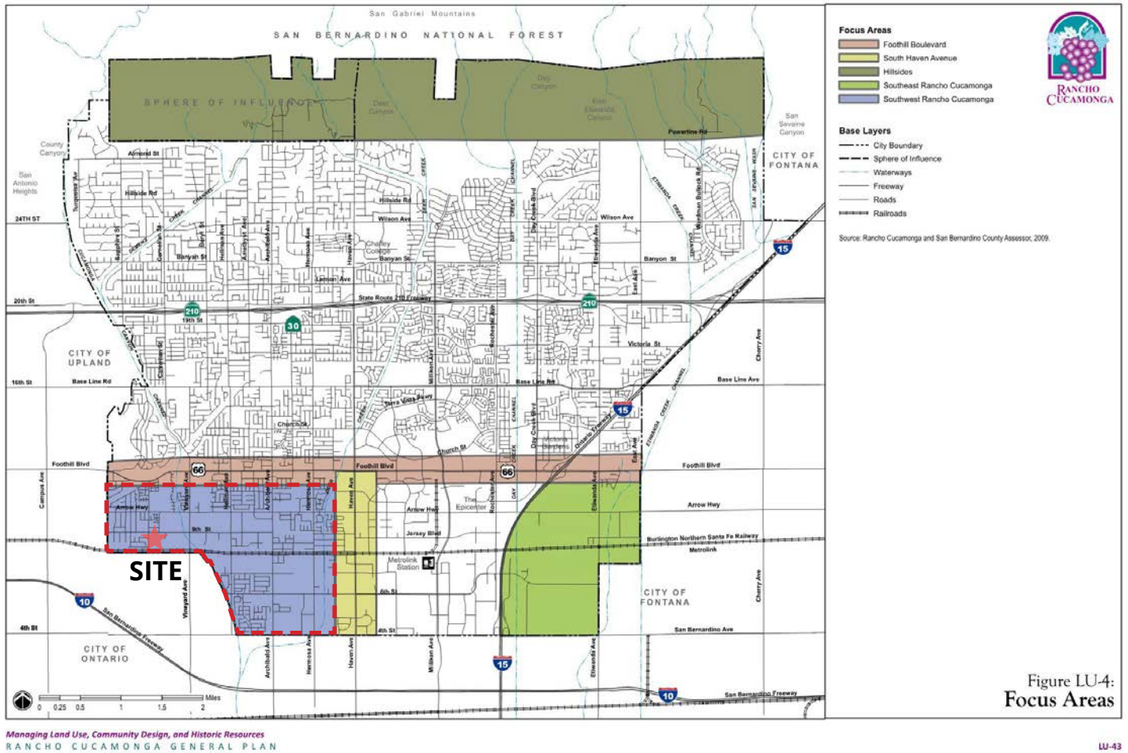

Figure 1: Focus areas plan from 2010 General Plan. Site is within Southwest Rancho Cucamonga, shown at lower left of plan and outlined in red dashed line.

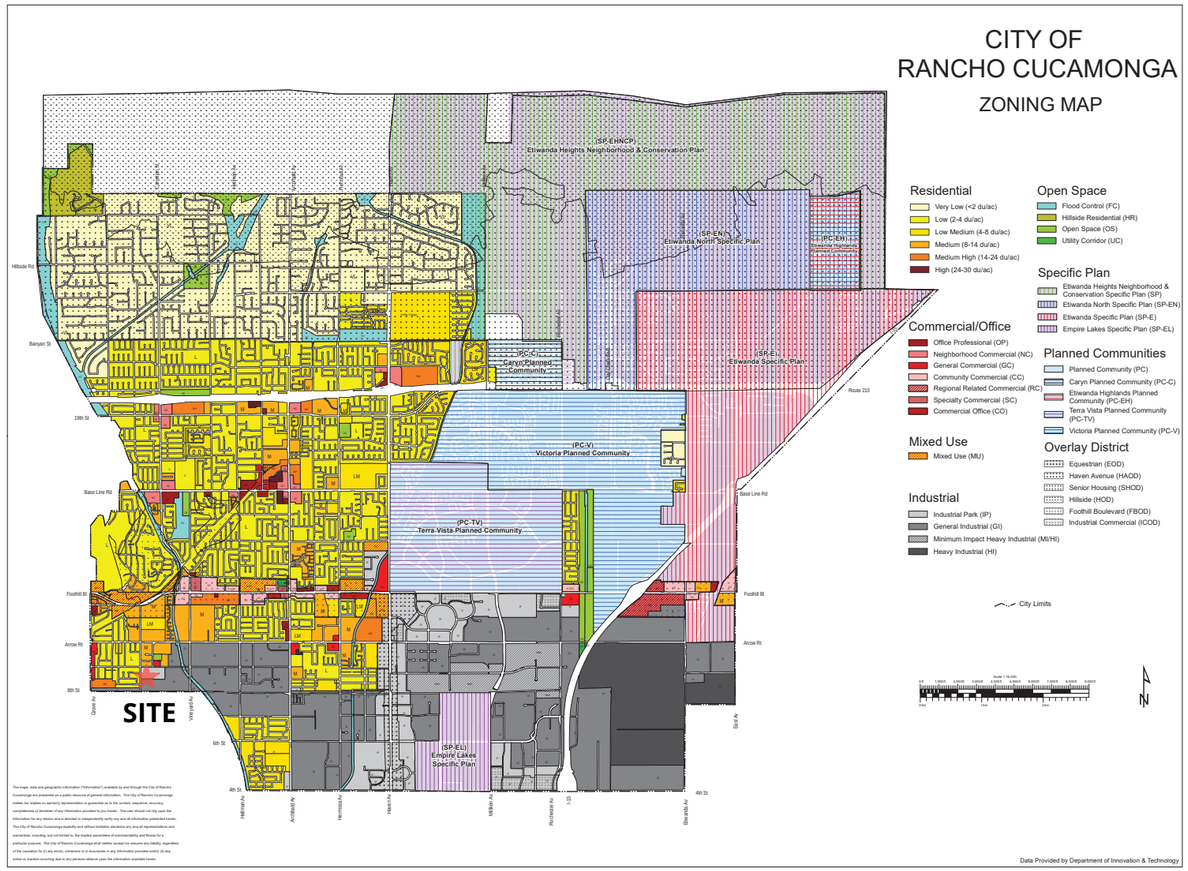

Figure 2: City of Rancho Cucamonga Zoning Map

Project site is within the Southwest Rancho Cucamonga area. Southwest is one of the focus areas in the City's 2010 General Plan. The vision for Southwest includes:

- Allowing for the development of commercial and community services needed by the adjacent residential neighborhoods.
- Implementing community design improvements and reducing truck traffic impacts on the residential neighborhoods
- Encouraging the re-use and rehabilitation of historic or high-quality buildings to the greatest extent possible

The City received a Robert Wood Johnson Foundation grant to focus on reducing childhood obesity in Southwest Cucamonga. The Baker House Community Center will build upon the objectives outlined in the 2010 General Plan and the goals of the grant to encourage healthy and active lifestyles in Southwest.

8803 Baker Avenue parcel is located in a General Industrial / Industrial Park zone.

- Community Center / Civic Use is a permitted use (Table 17.30.030-1 RC Municipal Code)
- Lot area minimum is .5 acre with minimum lot width of 100 feet (Table 17.36.040-1 RC Municipal Code)
- Setbacks (Secondary) Front yard = 35 feet; Rear yard = 0 feet; Interior side yard = 5 feet (Table 17.36.040-1 RC Municipal Code)
- Distance between buildings per current building code requirements
- Streetscape Setback Requirements (Table 17.36.040-2 RC Municipal Code)
- Parking Requirements by Land Use (17.64.050--B RC Municipal Code) Uses not listed ...*"furnish parking as required by the designated approving authority in determining the off-street parking requirements."*

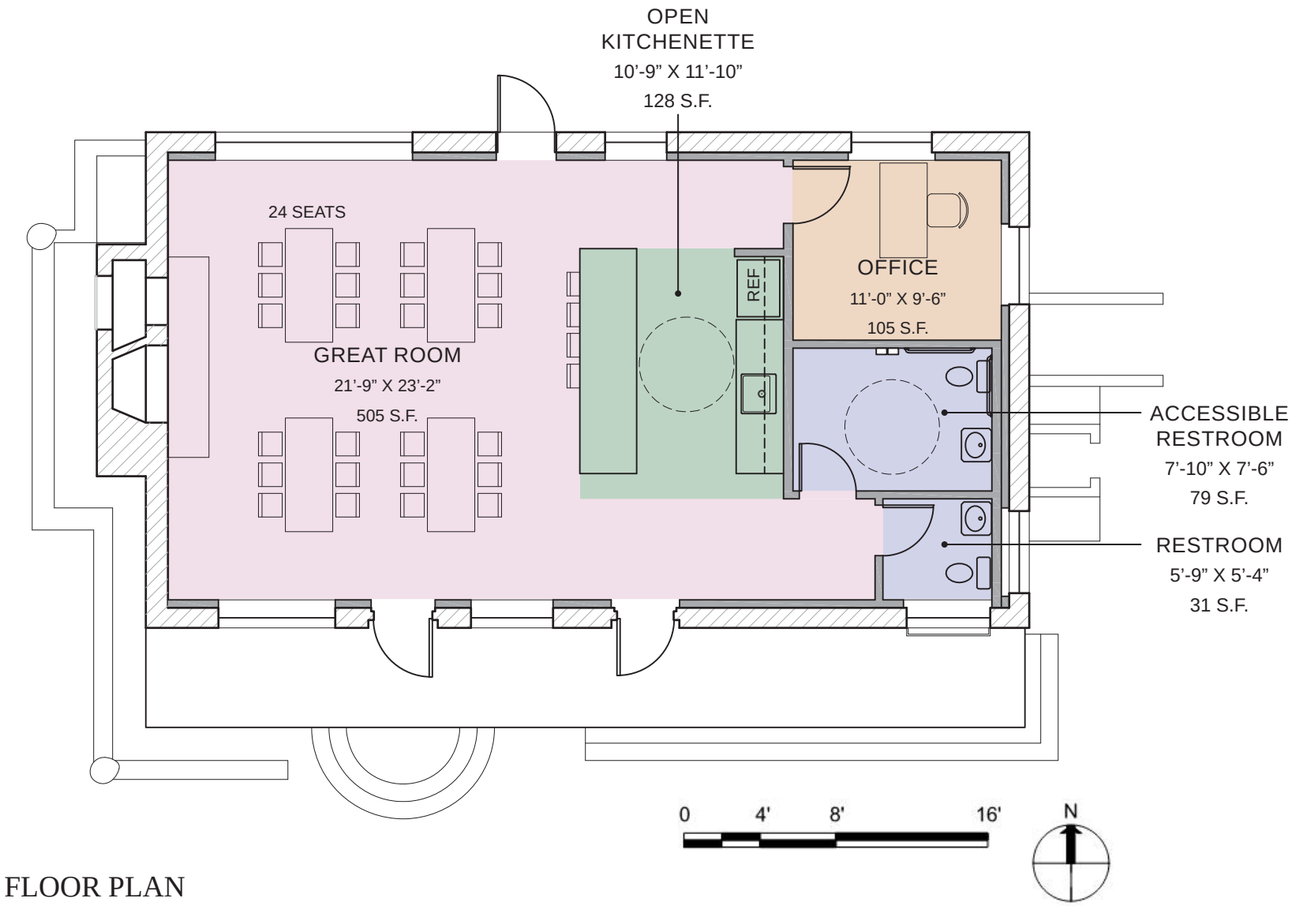
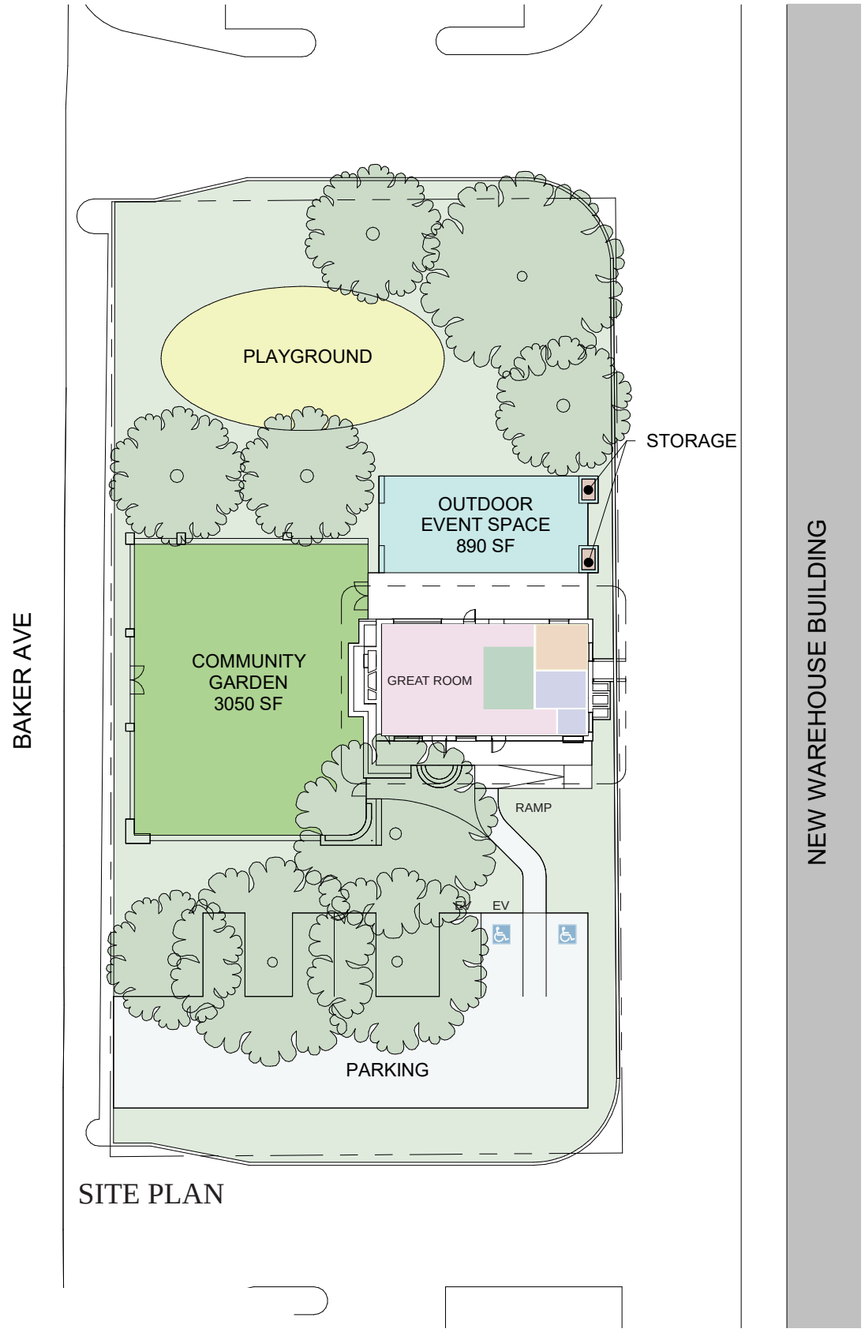
EXISTING HISTORIC BUILDING

EAST ELEVATION - PHOTO

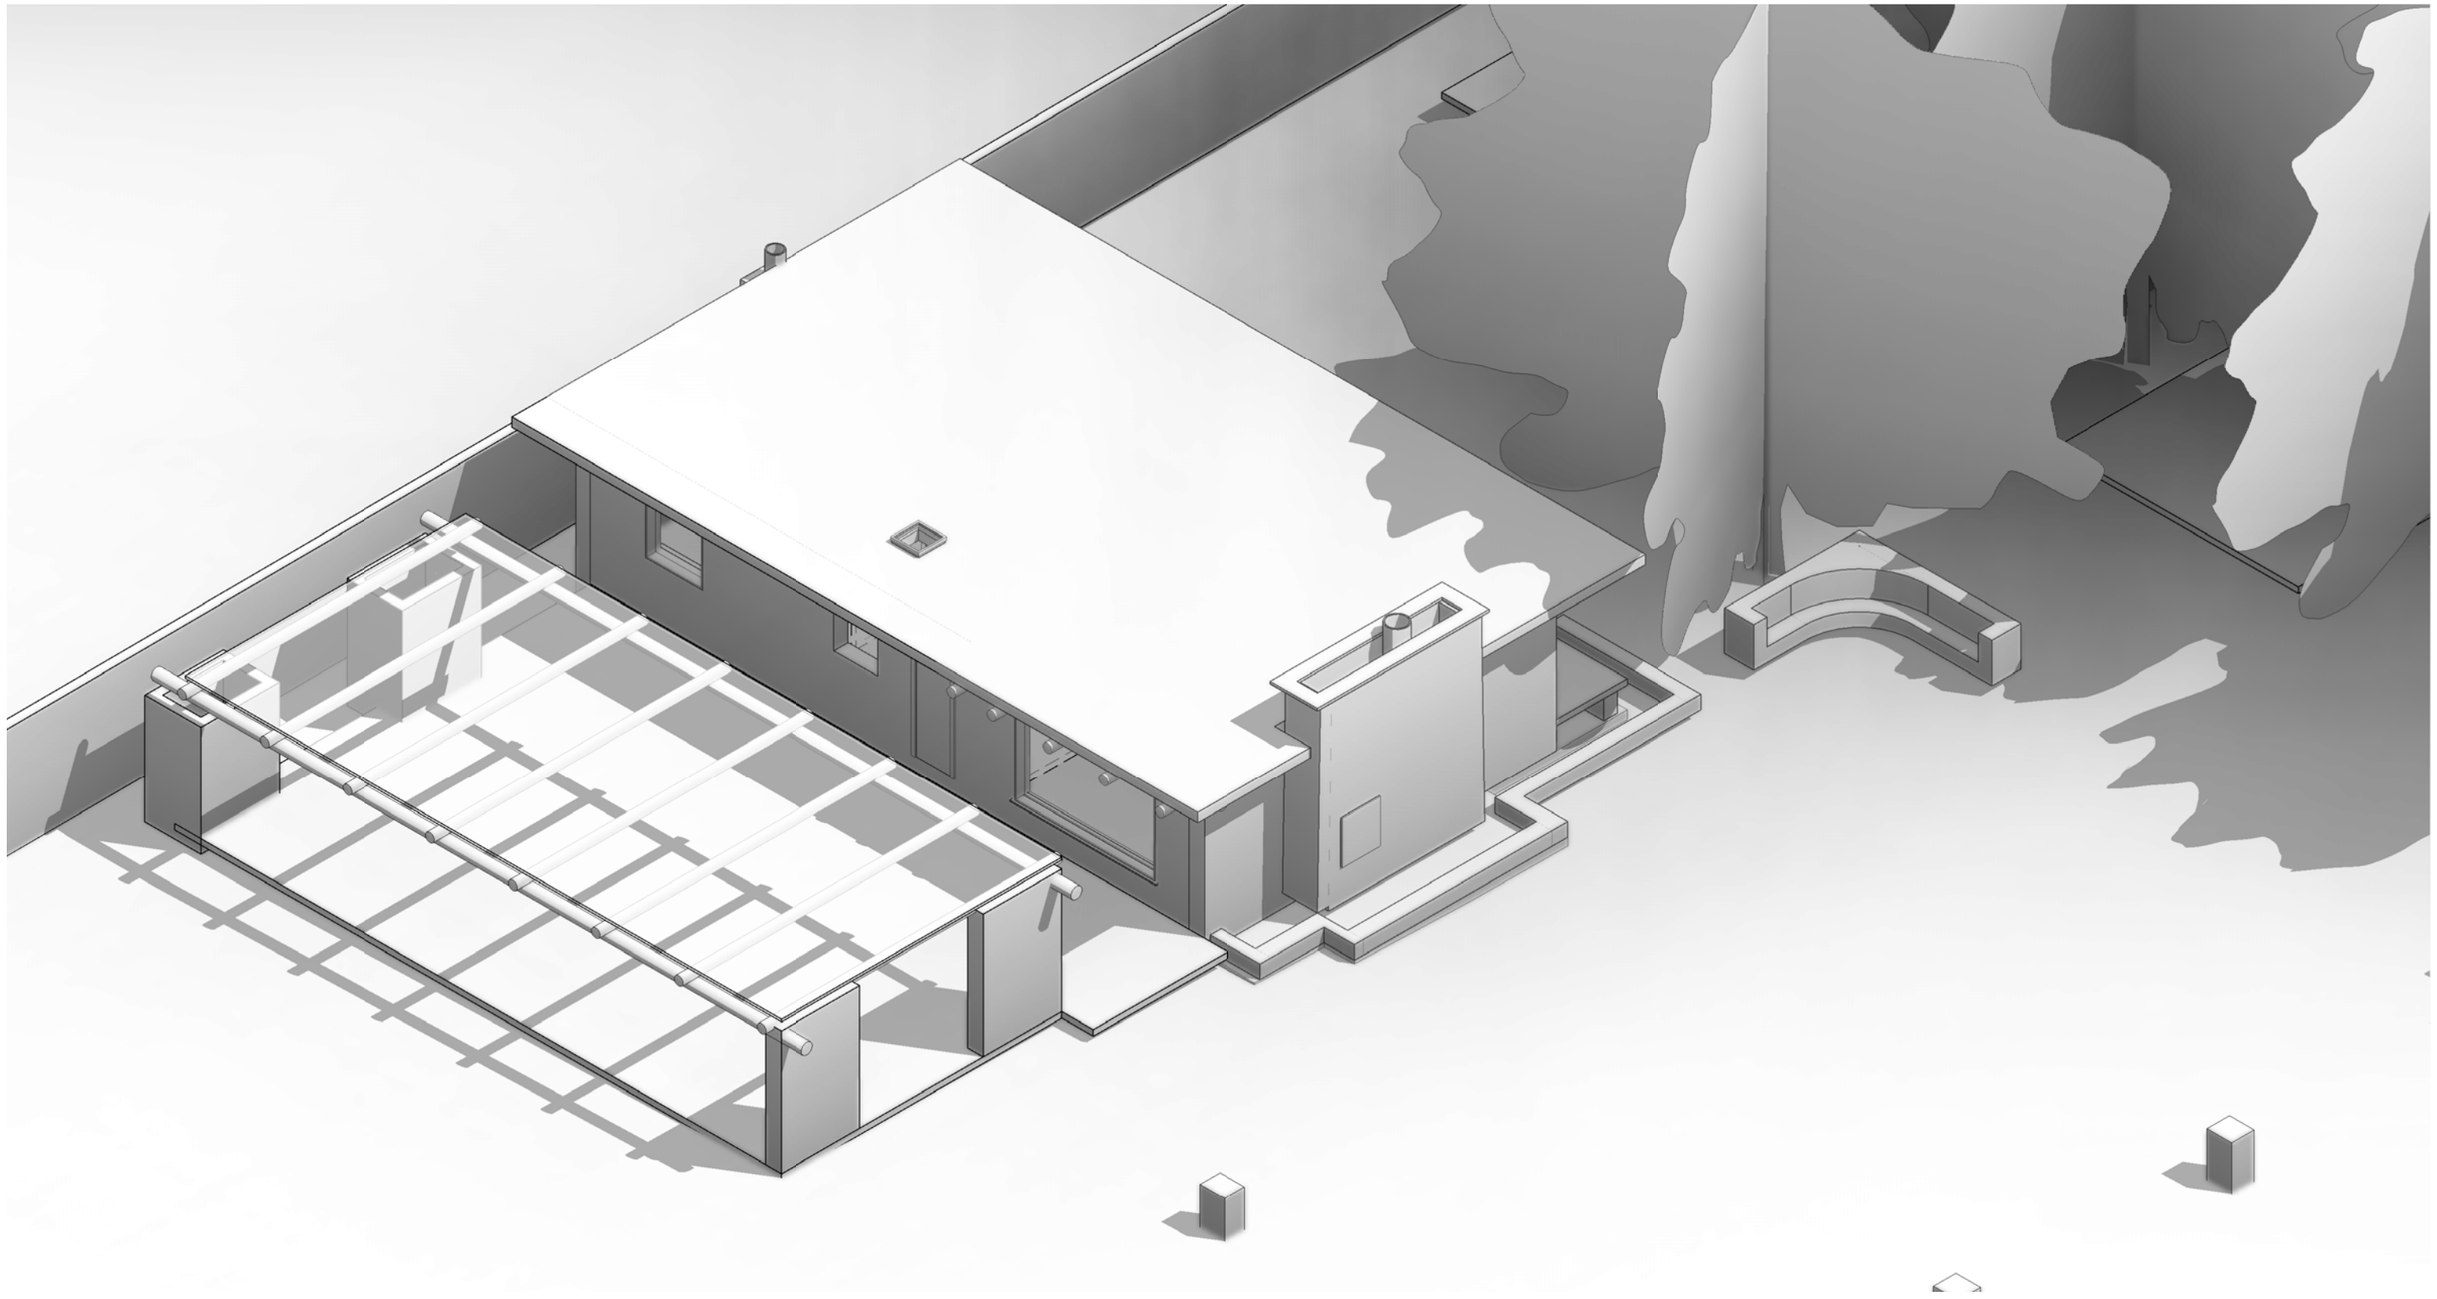
SOUTH ELEVATION - PHOTO



WEST ELEVATION - PHOTO

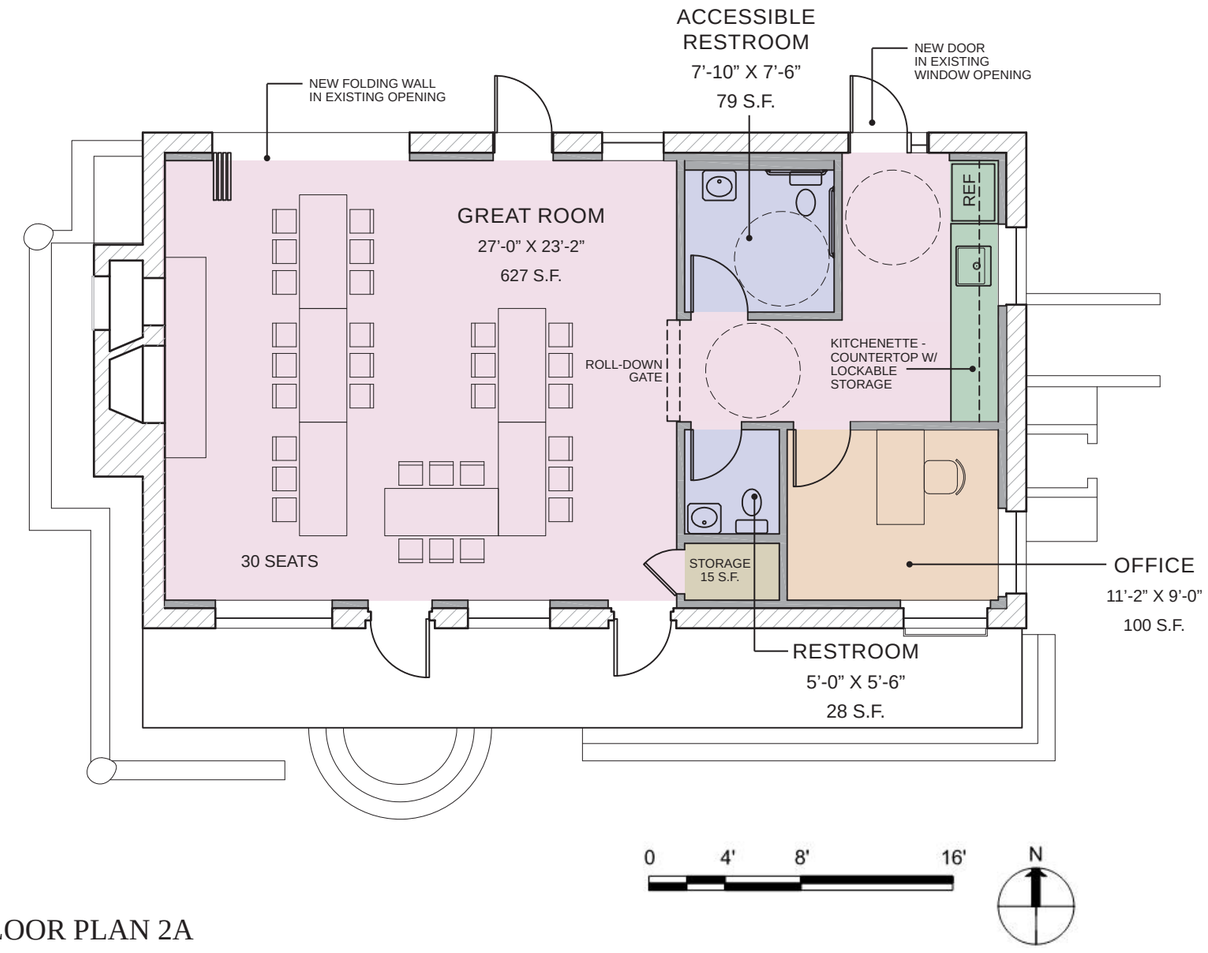


NORTH ELEVATION - PHOTO

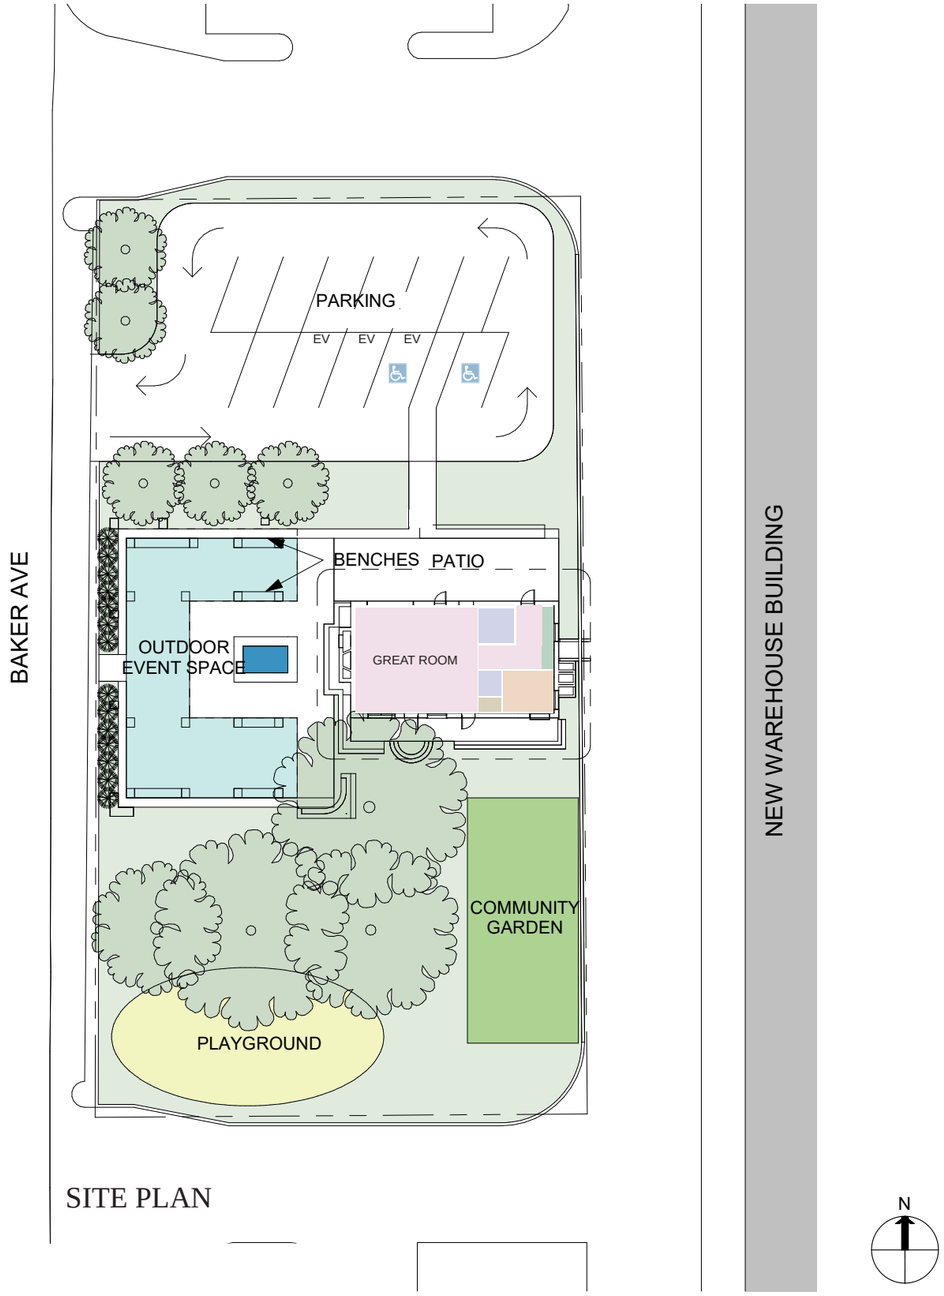


Concept 1 proposes a shade structure with an aesthetic and scale similar to the existing historic building. The placement of the shade structure adjacent to the existing building accentuates these similarities while creating a connection between the indoor and outdoor event spaces that will encourage use of both spaces by groups and families using the Community Center. Most of the program is housed in the existing building, however, storage is tucked into the columns of the shade structure. Additional community focused programs like a community garden and playground are included on the site. Limited parking is located at the southern end of the site where cars can be parked between the existing trees.

FLOOR PLAN



SITE PLAN



CONCEPT 1 - TWINS

Concept 2 proposes a dynamic outdoor “u-shaped” shaded courtyard to the west of the existing building, creating a large outdoor event space which features a fountain in the center and built-in benches. The courtyard is accessible from the Baker Avenue sidewalk through a gated entry. Planting is used along the street side of the shade structure as a visual/auditory buffer from the street and provide shade from the afternoon/evening sun. The outdoor event space is connected to the existing building via a patio to link the indoor and outdoor event spaces. This concept includes a community garden and playground at the southern end of the site. To the northern end of the site is a parking lot. There are two plan options for Concept 2. In both options, the north facade is activated through the placement of a new bi-fold door that will connect the Great Room with a new outdoor space to the north. Floor Plan Option 2A, provides flexible access to the interior service core (restrooms and kitchenette) by inserting a new door within an existing window opening at the east end of the north facade.

CONCEPT 2 - COURTYARD

PAGE&TURNBULL

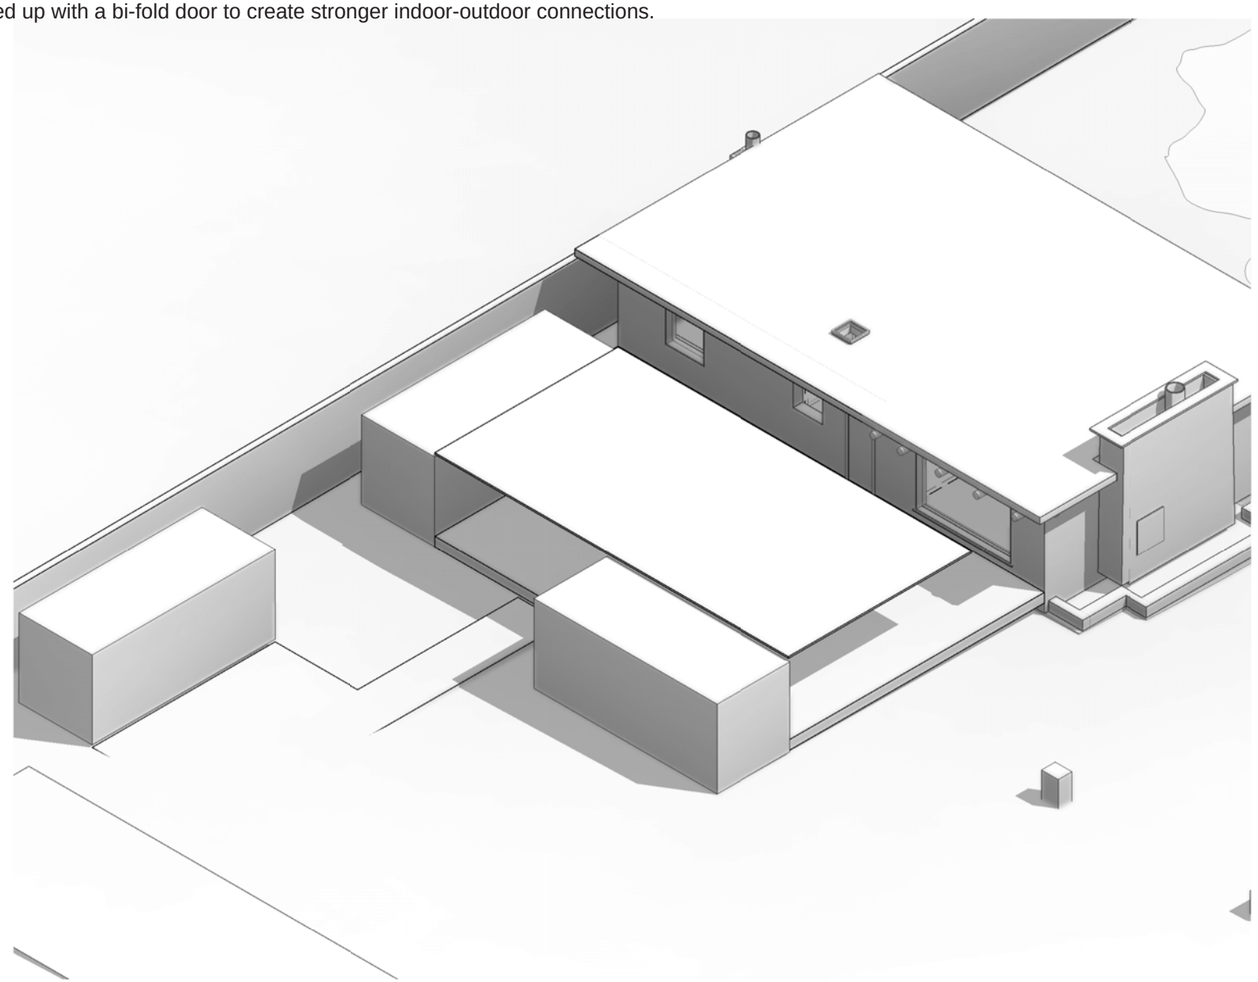
CONCEPT 2 - COURTYARD



PAGE&TURNBULL

Concept 3 proposes using shipping containers to hold the auxiliary programs, allowing the indoor event space to occupy the entire existing building. The outdoor event space is nestled between the restroom and kitchen container-buildings and the existing building. Shade is provided with a fabric shade stretched between the containers. The parking areas bookend the site and use the warehouse access roads to preserve green space on the site. Additional community focused programs like a community garden and playground are included on the site. Similar to Concept 2, the north facade of the existing building could be opened up with a bi-fold door to create stronger indoor-outdoor connections.
