Appendix 21A
Details of Public Services and Utilities

21A.1 Appendix Overview

This appendix presents information on existing public services in the study area, as summarized in Chapter 21, *Public Services and Utilities*. Public services include police and fire protection, hospitals, schools, libraries, and solid waste facilities. This appendix also presents information on existing known utilities in the study area, which include water agencies that serve the study area and wastewater treatment facilities located within the study area. Other utilities, such as power and gas facilities, are described in Chapter 21. Due to the length and complexity of this information, and in an effort to maintain the readability of Chapter 21, this information is presented in an appendix.

[a] In December 2019, the U.S. Centers for Disease Control and Prevention identified the first human cases of the coronavirus disease 2019 (COVID-19). In January 2020, the first case was identified in the United States, and the virus was identified in California in February 2020. In relation to these events, Governor Gavin Newsom declared a State of Emergency in California. As of July 2021, there were 3,724,833 confirmed cases and 63,376 fatalities in the state (California Department of Public Health 2021). On March 19, 2020, the State Public Health Officer issued an order directing all individuals living in the state to stay at home, except as needed to perform essential activities. As of the writing of this document, although the stay-at-home order has ended, COVID-19 continues to present a significant risk to the health of individuals throughout California, and some restrictions are still in place. Due to these ongoing changes in our communities, there are many unknowns related to what the "new normal" will be after the COVID-19 pandemic. School enrollment numbers could reflect changes related to the COVID-19 pandemic, including an increase in homeschool enrollment. These factors are currently speculative and, therefore, cannot be considered in future conditions or in relation to potential impacts, as CEQA requires consideration of reasonably foreseeable outcomes and does not require consideration of changes that are speculative.

Ag = agricultural; CalRecycle = California Department of Resources Recycling and Recovery; cy = cubic yards; N/A = not applicable.
[a] *Permitted* indicates that a facility or site held a solid waste facility permit. *Exempt* indicates that an enforcement agency has granted an exemption from the requirement that a solid waste facility obtain a permit. Such an exemption may be granted if the facility falls within one of the classifications [14 Cal. Code Regs. § 18215(b)/27 Cal. Code Regs. § 21565] that may be exempted, and all of the following findings are made: (1) the exemption is not against the public interest; (2) the quantity of solid waste is insignificant; or (3) the nature of the solid wastes poses no significant threat to health, safety, or the environment.
[b] *Active* indicates that a facility/operation is currently accepting, handling, processing, or disposing waste. *Planned* indicates that a facility is in the planning stages. It may be awaiting a permit and not yet accepting waste, or it may be permitted, but not yet constructed or accepting waste.
[c] Remaining capacity is not a measurement applicable to facilities that are not associated with long-term disposal sites and activities (i.e., landfills). N/A is indicated for these types of facilities. Remaining capacity dates shown represent date of most recent estimate of remaining capacity as reported to the Financial Assurances Branch of CalRecycle annually by owner/operator of the facility (most of which are 2016 and older).
[d] Vasco Landfill estimated closure is December 31, 2022.
