Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be

VISTA PAINT CORP (Continued) **1000395320**

considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Lead, Nickel, Other Metal, Gasoline, Stoddard solvent / Mineral Spriits / Distillates
Site History:	The Khyber Foods site is located at 1818 East Rosslynn Avenue, Fullerton, California. The site occupies approximately 1.44 acres in an urban industrial area in Orange County. As of March 2015, the site contained a single 26,851-ft2 building with roll-up doors located along the western and eastern portions of the building. Paved parking areas are located along the northern and eastern portion of the property. USTs are located in the southeastern and central western portions of the property. In addition, the former drum storage area was located adjacent to the building along the central eastern portion of the property. From 1984 to 1988, J.C. Ford Manufacturing Company (J.C. Ford) operated onsite as a machine shop and weld fabricator. Santa Ana Plating Corp. may have occupied the property subsequent to J.C. Ford, but the records are not clear, and it may have operated on the adjacent property. In the 1990s, Khyber Foods, Inc. operated at the site. From at least 1998 to 2006, PCA Industries, LLC operated onsite and conducted metal plating operations. Since at least 2008 until approximately 2014, Metaclad Insulation Corporation has operated at the site and designed and fabricated specialty insulation items. The operations and hazardous substances used onsite during the time that J.C. Ford, Santa Ana Plating Corp., and Khyber Foods occupied the property are unknown. Metaclad Insulation Corporation generated asbestos-containing waste, other inorganic solid waste, waste oil and mixed oil, unspecified organic liquid mixture, and lead. Analytical results from a March 1990 soils investigation indicated the presence of trichloroethylene (TCE) at 260 micrograms per kilogram (ug/kg), tetrachloroethylene PCE) at 170 ug/kg, 1,1,1-trichloroethane (1,1,1-TCA) at 750 ug/kg, 1,1-dichloroethylene (1,1-DCE) at 670 ug/kg, and 1,1,2-trichloroethane (1,1,2-TCA) at 44 ug/kg. In 1990, three monitoring wells were installed on the Khyber Foods site and quarterly sampling began in October 1991. Numerous groundwater sampling events occurred in the early 1990s that detected PCE, TCE, and 1,1-DCE in groundwater beneath the site at concentrations exceeding Maximum Contaminant Levels (MCLs).

Description: Site History: The site is an inactive electro-chemical facility located in an industrial and manufacturing area. The site occupies

PCA METAL FINISHING, INC. (Continued) **S122221892**

approximately 97,000 square feet. The facility consists of two contiguous properties with separate addresses. In a letter dated April 20, 1990, the Santa Ana Regional Water Quality Control Board requested the facility to submit a report about its use of organic solvents and submit a workplan for conducting a subsurface investigation to identify any presence of solvents in the soil. As a result of the investigation, a release of chlorinated solvents in nearby public water wells were discovered. A regional investigation of groundwater impact in the area has documented that there were multiple sources for the chlorinated solvents in the groundwater. On August 12, 1993, the facility obtained a CA and late on September 12, 1995 it was upgraded to a PBR authorization to treat hazardous wastewater and to manage sludge. Subsequently, a total of 157 soil samples were collected from 54 different borings and groundwater samples were collected on several occasions from six groundwater monitoring wells located within 200 feet of the center of the site and the investigations confirmed releases of chlorinated solvents at the site. In 2006, the facility began closing its operations under the oversight of Orange County Health Care Agency and ceased manufacturing operations entirely by mid-March 2007. County has referred the site to DTSC Enforcement Branch for further action.

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be

ALCOA GLOBAL FASTENERS, INC. (Continued) **1000307386**

considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

ALCOA GLOBAL FASTENERS INC. (Continued) **1007198696**

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Region:	STATE
Facility Status:	**Open - Remediation**
Status Date:	01/29/2007
Global Id:	SL0605956921
Lead Agency:	SANTA ANA RWQCB (REGION 8)
Lead Agency Case Number:	Not reported
Latitude:	33.8647432
Longitude:	-117.8879772
Case Type:	Cleanup Program Site
Case Worker:	MG
Local Agency:	Not reported
RB Case Number:	2080067
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	Arconic (formerly Alcoa) manufactures fastners for the aerospace industry. Investigation of the Site began in 1996 and found metals, petroleum hydrocarbons and VOCs (PCE, TCE, cis-1,2-DCE , 11DCE) in the soil and soil vapor. The primary areas of concern are the former degreaser area and the plating area. Four groundwater monitoring wells were installed at the Site between 2003 and 2005. Groundwater was encounterd at 106 to 108 feet bgs. VOCs PCE and TCE were detected in the groundwater at concentrations as high as 99 ug/L and 41 ug/L respectively . The groundwater flow direction is to the south southwest. A soil vapor extraction (SVE) and treatment pilot test operated between January 2007 to January 2008. The full scale SVE and treatment system was installed and operational May 6, 2009. The SVE system consists of seven vapor extraction wells and the extracted soil vapors are treated wtih carbon filters. Groundwater is monitored semiannually.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code:	D001
. Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

FINDS:

Registry ID: 110009551190

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110000861764

Environmental Interest/Information System
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

INX INTERNATIONAL INK CO (Continued) **1000198236**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110009555169

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

. Waste code: 791
. Waste name: Liquids with pH < 2

AEROFIT LLC (Continued) **1019327249**

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D008
. Waste name: LEAD

. Waste code: D018
. Waste name: BENZENE

. Waste code: D029
. Waste name: 1,1-DICHLOROETHYLENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D040
. Waste name: TRICHLOROETHYLENE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT

Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and

JOHNSON CONTROLS BATTERY GROUP (Continued) **S101619648**

disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FINDS:

Registry ID: 110002807972

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D005
. Waste name: BARIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D011

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: 3/24/87 a chemical use questionaire was sent to RP under AB 1803. RP response indicated potential SGW contamination. 10/26/88 a request for subsurface investigaiton was issued and was conducted. 2/2/90 a Plan of Action was received from the RP that includes vapor and water extraction wells and a treatment process. Plan was approved with modifications to include additional monitoring wells and other specifics. 1/7/97 Annual monitoring was required by Board for 2 years. Results to be analyzed to determine if additional monitoring or action is necessary. Subsurface investigaiton conducted. Plan of Action implemeted including monitoring wells, vapor and water extraction wells, and a treatment process. 1/7/97 Annual monitoring was required by Board for 2 years. Results to be analyzed to determine if additional monitoring or action is necessary.

GRAPHICS 2000 (Continued) **1000360692**

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

FINDS:

Registry ID: 110006469589

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

LAP CO (Continued) **1000409986**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002941844

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: 181

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 352

KRYLER CORP. (Continued) **1000280929**

. Waste name: Other organic solids

. Waste code: 461
. Waste name: Degreasing sludge

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Amount (Lbs): 8500

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 1574.6

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 1574.6

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RISK AND TECHNOLOGY REVIEW

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or

KRYLER CORP. (Continued) **1000280929**

dischargers having waste storage systems with land disposal such as dairy waste ponds.

Case Worker:	PAH
Local Agency:	FULLERTON, CITY OF
RB Case Number:	08FulFULCr08
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Polychlorinated biphenyls (PCBs), Chromium, Chromium VI, Ethylbenzene, Naphthalene, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	For additional information and reports on this address see also Aeroject General, 601 S. Placentia, Fullerton, (SL0605973469) The Fullerton Crossings development is located at the site of a former manufacturing facility that was operated by Aerojet. Four underground storage tanks (USTs) were removed January 30, 2008. Stained soil was observed below one of the USTs. Soil samples were collected and analyzed for total petroleum hydrocarbons (TPH), volatile organic compounds (VOC) and metals TPH, tetrachloroethene (PCE) and low concentration of various metals were detected in some of the soil sample. In July 2009, contaminated soil was found during excavation of a trench for a storm drain along the southwestern boundary of the site. The trench was originally designed to extend to 12 feet bgs. Odorous and stained soil was observed at approximately 6 feet bgs. Soil samples were collected at two, four and six feet bgs along the alignment of the trench. The samples were analyzed for VOCs and TPH. TPH and VOCs, specifically tetrachloroethylene (PCE) and trichloroethylene (TCE), were detected in the soil samples. Tthe highest concentrations detected were - PCE 12,200 microgram/kilogram (a%g/kg) at 2 feet below grade surface (bgs), TCE 2080 ug/kg at 6 feet bgs, and TPH 27,200 milligrams/kilograms (mg/kg) at 6 feet bgs. In August 2009, eight soil borings were drilled to depths of 15 and 25 ft bgs within and adjacent to the trench boundary, to determine the extent of the contaminated soil in the vicinity of the trench. Selected samples were submitted for VOC and TPH analysis. The highest concentrations of PCE, TCE and TPH detected in the soil samples are: PCE 1020 a%g/kg at 15 ft. bgs, TCE 106 a%g/kg at 15 ft. bgs, TPH 8040 mg/kg at 10 ft. bgs. The highest detected concentrations of PCE, TCE and TPH were from the soil samples that were collected closest to the fence line. Soil excavated from northside

KESTER SOLDER COMPANY (Continued) **1000401428**

. Waste name: Laboratory waste chemicals

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D008

Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Alcohols, 1,1,1-Trichloroethane (TCA), Acetone, Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: The Kester Solder facility manufactured solder alloys and fluxes from 1968 to 2002, when operations ceased. The facility stored hazardous materials in containers, aboveground storage tanks (ASTs), and four underground storage tanks (USTs). The building housed a manufacturing area, offices, warehouse, shipping and receiving room, laboratory, and chemical mixing and storage room. An NFA for soil was issued to Northrop Grumman on December 17, 2010. Northrop Grumman is preparing a work plan for an ISCO injection pilot test (2018) to remediate the 1,4-dioxane hot spots at the Site.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	02/08/1991
Comments:	The PA Report was reviewed by Region 4 staff. Pacific Tank Ltd. manufactures custom fiberglass tanks in the City of Fullerton. All operations are permitted by the So. Coast AQMD. The acetone tank was removed in 1989 under county oversight. Verification samples revealed no contamination. Staff recommends NFA by DTSC.

FINDS:

Registry ID: 110022527728

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/13/2018
Date Data Arrived at EDR: 05/30/2018

Next Scheduled EDR Contact: 10/15/2018
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/13/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 05/18/2018

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018
Date Data Arrived at EDR: 03/28/2018

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics

Northwest Map:	5640256 LA HABRA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

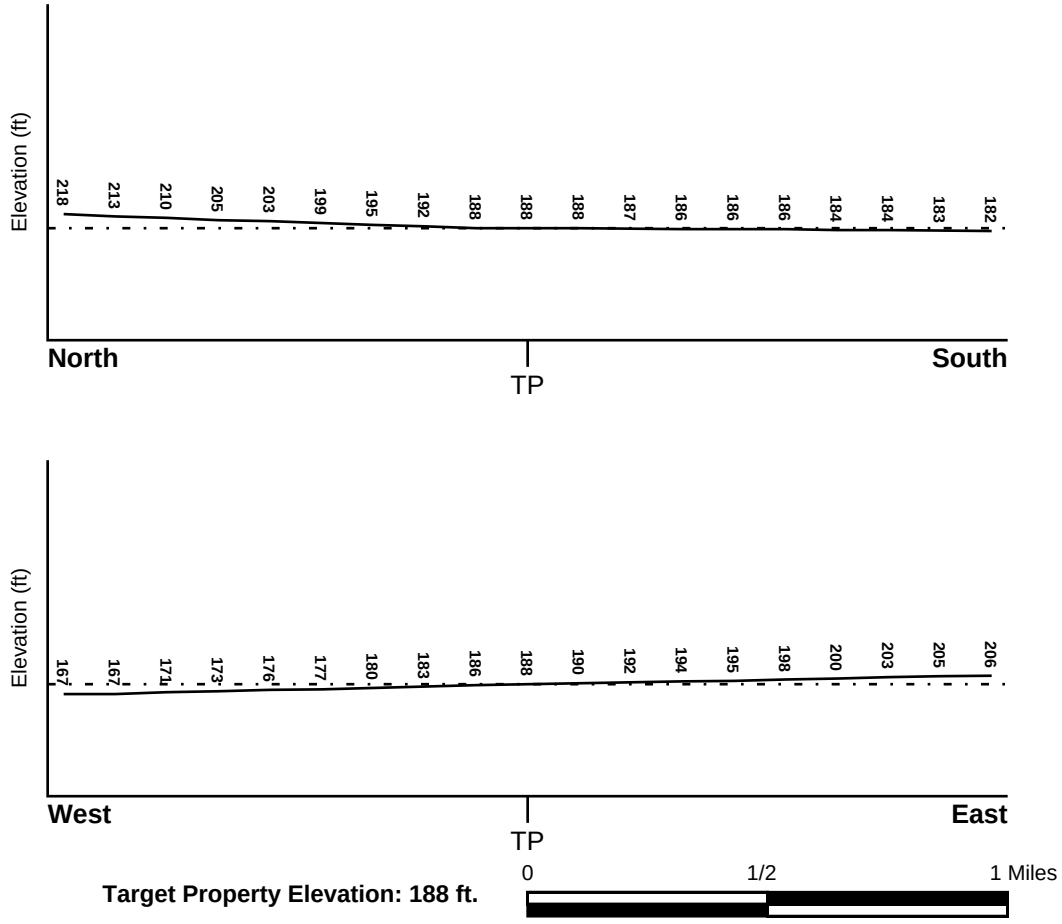
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 188 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06059C0132J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1875F	FEMA FIRM Flood data
06059C0044J	FEMA FIRM Flood data
06059C0131J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ANAHEIM	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles WSW
Site Name:	Mlodzik Corp Monitor Plating
Site EPA ID Number:	CAD041325143
Groundwater Flow Direction:	SW IN THE VICINITY OF THE SITE.
Measured Depth to Water:	not available.
Hydraulic Connection:	Information is not available about the hydraulic connection between aquifers underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

11G	1/4 - 1/2 Mile SE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: MOCHO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	31 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	31 inches	61 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Project Team Professional Profiles

Curriculum Vitae

Sara Sichley, ASP, AOEE

Title
Project Manager

Education
MUP – Urban and Regional Planning, San Jose State University

BA – Environmental Studies/Earth Sciences, University of California – Santa Cruz

Professional Registrations
ASP, Board of Certified Safety Professionals

AOEE, The Ergonomics Center of North Carolina

Languages
English

Experience Summary

Sara Sichley is an experienced environmental, health and safety practitioner and project manager with over ten years of experience working with a diverse client base. Sara has managed several diverse projects, including: groundwater monitoring program for oil and gas as well as railroad clients, hazardous waste management program for a pipeline company, Phase I and II environmental site assessment projects, as well as several EHS projects for high-tech and cosmetics companies. As a project manager, Sara is responsible for all aspects of a project, including but not limited to client and stakeholder communications, strategy development and proposal preparation, resource management, data evaluation, and document preparation and review.

Sara has achieved credentials as an Associate Safety Professional and Accredited Office Ergonomics Evaluator. Her technical specialties include ergonomics, written program development, and EHS management support.

Environmental Health and Safety (EHS) Related Projects

- EHS Coordinator for 11 campuses across the globe for a global software company with over 5,000 employees. As an EHS Coordinator, responsibilities include but are not limited to: office ergonomics evaluation and reporting, continued development and implementation of local EHS programs, lead quarterly safety committee meetings, conduct and oversee EHS audits, emergency response plan development, SPCC plan preparation and training, hazardous materials business plan, and hazardous waste materials reporting.
- Managed and coordinated projects with partner companies in Asia Pacific, Europe, Middle East, and Central and South America, to include EHS audits and developing a dangerous goods storage register.
- Coordinated overall operations of an online ergonomics database and conduct remote and in-person ergonomic evaluations in a retail setting for an international high-tech company.
- Lead as well as provide support for in-person EHS audits to evaluate for overall regulatory compliance and corresponding risk for high-tech facilities.

- Revitalize a failing client relationship with a pipeline company and build up rapport as a trusted partner to provide hazardous waste management and support. Utilize network to provide timely recommendations to complex hazardous waste situations.
- Oversee the design and development of customized emergency evacuation maps, emergency poster, and Emergency Response Plan for a cosmetics company with over 500 retail locations in the United States and Canada.
- Develop health and safety posters, flysheets, and newsletters, to include but not limited to: biological hazards and fatigue management posters for an engineering and remediation company; remote, laptop, and posture ergonomics flysheets for a high-tech company; and lastly, emergency evacuation planning and preparing for weather emergencies newsletters for low-income housing property managers on behalf of an insurance broker.
- As a Technical Compliance Coordinator for a fast-growing transportation company, responsibilities included the following: maintain, develop, and implement company and client-specific health and safety programs and training. Maintained up-to-date on local air quality, DOT, and DTSC regulations. Additionally, led efforts in developing and maintaining a robust subcontractor management and safety program. Maintained health and safety training and compliance database for a company of 50+ employees and subcontractors. Reviewed health and safety programs, insurance documents, and regulatory permits. Interfaced with transportation regulatory agencies regularly on behalf of subcontractors to achieve regulatory permitting compliance.

Environmental Liability Management (ELM) Related Projects

- Provided health and safety oversight and in-field point person for drilling and remediation projects for a diverse client base of retail service stations throughout Northern and Southern California.
- Subcontractor management for remediation projects, to include but not limited to the following operations: site excavation and grading, underground storage tank removal/pull.
- Recognized by a prominent oil and gas client on numerous occasions for outstanding stakeholder communications and safety oversight during remediation system and extensive well installation projects.
- Manage a quarterly groundwater monitoring program for 30+ retail service station and railroad sites. As the program manager, Sara was responsible for subcontractor scheduling/coordination, resource management, report preparation and review, financial management, and overall facilitation of report submission.
- Managed the projected lifecycle for petroleum retail sites in Northern California. Responsibilities included stakeholder/regulatory communications, fieldwork planning, case closure strategy evaluation, lifecycle cost forecasting, coordination/management of fieldwork and reporting, and safety oversight and support for staff-level resources.

Transaction Support Related Projects

- Provide project management for major railroad client as well as housing non-profit organization for Phase I and II environmental site assessments.
- Research and preparation of Phase I and II ESAs for a variety of clients across the United States, including but not limited to food service, commercial, and industrial facilities, some of which were historically complex.

Curriculum Vitae

Dan Keltner

Title
Senior Project Manager

Education
BA – Environmental Science-Geology, Simpson College, Indianola, IA

Professional Registrations
Accredited Office Ergonomics Evaluator (#080614-0280)

Languages
English

Experience Summary

Dan Keltner, a Senior Project Manager, has over 16 years of experience in the environmental consulting field. Mr. Keltner manages projects and accounts for a variety of environmental and health/safety projects and clients. Dan's areas of expertise include due diligence, subsurface environmental investigations, environmental insurance, soil and groundwater monitoring and remediation, underground storage tank removals, receptor survey/mapping, and environmental cost proposals and budgeting. Having been based in multiple regions, including Iowa, Connecticut, California, and Illinois, Dan has worked closely with several federal and state regulatory programs in those regions.

Dan is well versed in the current standard of care for Phase I Environmental Site Assessments (ASTM E1527-13) and the vapor encroachment screening standard (ASTM E2600-15). In addition to continued OSHA HAZWOPER training, Mr. Keltner has completed coursework in the Office Ergonomics Accreditation Program and the OSHA 30-Hour General Industry Outreach Training.

Additional valuable project experience includes petroleum reimbursement fund practices; pipeline release investigations; work at road, rail, and airport facilities; industrial hygiene projects; environmental compliance projects; and environment, health, and safety awareness and training.

Mr. Keltner currently serves as Antea Group's Phase I ESA Service Line Leader and Chicago Office Leader, providing services from Antea Group's Naperville, Illinois office.

Related Project Experience

- Conducted Phase I ESAs at numerous commercial, industrial, and agricultural properties in over 25 states and for a wide variety of project types and clients. Projects have included reviews of historical data, interviews, site inspections, and analyses of manufacturing processes and waste streams to identify historical concerns and potential sources or releases of contaminants to the environment. Dan is a subject matter expert in conducting Phase I ESAs, especially in historical background research and file reviews on the site, local, state, and federal levels.

- Performed and managed subsurface investigations at numerous facilities, including industrial, commercial, agricultural, and municipal properties; active and former gas stations; and near a construction and debris landfill. This experience has included: 1) identification of potential contamination sources due to present and historical land use and placement of sample locations, 2) installation of test borings and interpretation of split spoon soil samples, 3) soil, groundwater, and soil gas data analysis, and 4) report preparation for the private sector, state-lead agencies, and U.S. EPA.
- Managed, assessed, visited, and/or conducted fieldwork at a few hundred underground storage tank (UST) and leaking tank (LUST) sites at retail gasoline stations, or similar, throughout several states, including California, Connecticut, Illinois, Indiana, Iowa, Kansas, Missouri, Nebraska, and Wisconsin. Duties have included field work ranging from investigation tasks (well installation, soil/soil vapor and groundwater monitoring), remediation via many techniques, and project management. Well-versed in the assessment, monitoring, and regulatory closure of sites based on a tiered, risk-based corrective action approach.
- Provided field and management oversight for projects involving soil excavation and land farming of petroleum contaminated soil (in Iowa), and in-situ remediation techniques such as dual phase extraction, air sparge and soil vapor extraction, high vacuum extraction, groundwater pump & treat, and microbial/peroxide injections.
- Performed sensitive receptor and water well surveys at numerous sites. This experience has included windshield and walking surveys of properties within a specified radius to obtain information concerning property addresses, utilities, basements, etc. Also included interviews and review of public records and internet research to most accurately determine the characteristics of a site and vicinity with respect to sensitive receptors, in the interest of protecting human health and the environment.
- Familiar with a variety of field sampling and reporting activities that include indoor air quality assessments in a commercial office setting, waste water and domestic drinking water compliance monitoring, Environmental Protection Agency (EPA) PCB regulations, and engineering and institutional controls.
- Proficient in Environment, Health, & Safety evaluations and training, specifically in lower-risk settings, such as retail/commercial business.

Specific examples of projects managed or supported include:

- *Phase I ESAs for a Global Industrial Client:* Conducted due diligence and transaction support prior to their decommissioning large adhesive manufacturing facilities in California, Illinois, New Hampshire, Massachusetts and Texas. Several of these projects included follow-on work, such as subsurface environmental testing, floor drain and storage tank decommissioning, underground storage tank removals, and regulatory spill case involvement.
- *Environmental Liability Transfer Portfolio for Retail Gasoline Stations in Northern California*: Managed monitoring schedules and report preparation for over 30 sites, including quarterly groundwater monitoring and remediation reporting to a variety of local and state regulatory agencies in the San Francisco Bay Area. Managed focused investigations for contaminant delineation data collection for remediation or natural attenuation feasibility.

- *Regional Health and Safety Oversight and Auditing for Global Consumer Electronics Company*: Ongoing support to retail stores and corporate centers, including environment/health/safety auditing; emergency response planning; workstation ergonomics; chemical inventories, and other on-demand services.
- *Petroleum Insurance Claim Reviews for facilities in Illinois and Wisconsin:* Reviewed and summarized site history and root causes of each recent release, opining on the applicability of contractor response and billing as related to the release, and recommending path forward to meet regulatory requirements both efficiently and cost effectively.
- *Former Adhesive Manufacturing Facility, Newington, Connecticut*: Maintained the operations and maintenance for a complex, multi-phase groundwater remediation system at this facility, which had been contaminated with chlorinated solvents. Responsibilities included oversight of the sampling, maintenance and modification of these systems, in addition to semi-annual site-wide groundwater sampling events, data analysis, and reporting. Site-specific tasks included client & site owner coordination, inspection, troubleshooting and repair of system components, and reporting. Additionally, led a study investigating the geology of that site with respect to vertical and horizontal groundwater and contaminant (DNAPL) migration both above and within an aquitard.
- *PCB Transformer Oil Remediation, Wallingford, Connecticut*: Managed initial assessment and ultimate remediation of contaminated materials underlying an electrical transformer at a healthcare facility where a significant amount of PCB-containing insulating oil had leaked. Worked with numerous involved parties, including various contractors, the State (CT DEEP) and the EPA's regional PCB coordinator. Took on both office and field responsibilities and helped manage the project through the initial soil characterization, environmental cleanup oversight & sampling, data analysis, and ultimate closure reporting. Ensured that the environmental aspect of the project moved swiftly to meet the client's strict deadlines due to the sensitivity of the project.
- *Commercial Property Portfolio, Orange, Connecticut*: Assisted in the completion of Phase I ESAs at seven commercial properties in southern Connecticut. Within three months, also assisted in the completion of Phase II and Phase III sampling and reporting at five of those sites, as well as regulatory reporting required in association with a transfer of ownership. Continued to manage groundwater monitoring, additional Phase III sampling, tank removals, and soil remediation at that group of sites, aiming for ultimate closure and LEP Verification with Connecticut's Transfer Act program.
- *Standard Oil Gas Station, Slater, Iowa*: Assisted with the initial assessment, contaminant delineation, and groundwater monitoring phases of the project. Oversaw the removal of gasoline USTs, followed by the excavation and landfarming of petroleum-contaminated soil. Follow-up work included the completion of post-remediation groundwater monitoring. Also supervised the soil excavation/sampling and contaminated soil disposal (landfarming).
- *Brayton Oil Company, Brayton, Iowa*: Assisted with initial assessments, free product (LNAPL) recovery, soil/groundwater contaminant delineation, and groundwater monitoring phases of the project. Planned and oversaw the removal and disposal/treatment of over 2,000 cubic yards of petroleum-contaminated soil. Supervised the soil excavation/sampling and coordinated with a local farmer for a viable location for the contaminated soil disposal and treatment (landfarming). Follow-up work included the installation of an active soil vapor recovery system, active soil vapor recovery, and groundwater monitoring.

Curriculum Vitae

Matthew Bell

Title
Senior Consultant

Education
BS – Geology, University of Colorado, Boulder, CO

Graduate Course Work, Landfill Design and Engineering; Designing with Geosynthetics, Rensselaer Polytechnic Institute

Field of Competence
Mergers and Acquisitions Advising

Due-Diligence Assessments

EHS Risk and Liability Management

Post Deal Closure EHS Integration

Soil and Groundwater Remediation

Site characterization, hydrogeology and Remedial Investigations

Geotechnical Evaluations

Languages
English – Native

Mandarin – 3 semesters of conversational Mandarin (limited)

Experience Summary

Matthew Bell has more than 30 years of experience delivering EHS business solutions to a broad spectrum of domestic and multi-national companies. His work is focused primarily on large scale merger and acquisition (M&A) projects for strategic buyers, and the private equity community. This work includes extensive due diligence work, quantification of liabilities, protecting the client's downside, assisting in identifying upside value, and assisting with positioning uncertainties, risks and liabilities on the sell side. Mathew has worked for clients on over 100 M&A transactions and various other projects in China, Taiwan, Canada, Mexico, Puerto Rico, Brazil, Colombia, Portugal, Spain, Belgium, France, Netherlands, Germany, Poland, Switzerland, Colombia, Austria, Slovenia, Czech Republic, Hungary, Romania, Italy, U.K., Denmark, Sweden, Norway, Ireland, South Africa, Tunisia, UAE, Thailand, Japan, Indonesia, Korea, Australia, and India. He has also served as the senior technical lead on numerous large scale remediation projects in complex hydrogeological settings, under a wide spectrum of regulatory frameworks, including Phase II site investigations and remediation projects throughout the U.S. as well as South America, Europe, and Asia. Includes development of conceptual hydrogeologic models, contaminant transport calculations, feasibility studies, technology selection, in-situ remedial applications, and ex-situ remedial treatments. He has extensive experience as the project lead interfacing with the client, regulatory agencies, and various stakeholders.

Related Projects

- Confidential Client - Project Director and Advisor for a $300,000 due diligence project for the potential acquisition of a specialty chemical manufacturing company by a strategic buyer. Involved Environmental, Health and Safety liability assessments and regulatory compliance/permitting reviews of 19 manufacturing facilities situated in 15 countries (Brazil, China, France, Finland, Germany, India, Italy, Korea, Mexico, Singapore, Spain, UK, Sweden, Canada, and the USA). Scope consisted of EHS compliance reviews, environmental and operational permitting status evaluations, liability assessments, Phase II intrusive investigations, evaluation of post-acquisition site expansion and/or closure plans, and evaluation of business continuity risks associated with permitting issues.
- Project Manager and Advisor for the potential acquisition of a thick-walled steel tube manufacturer in the Netherlands associated with off-shore wind turbine farm construction. Evaluated EHS risks and liabilities, and advised on permitting and compliance requirements for post-acquisition facility reconstruction plans (expansions, closures, decommissioning, etc.).

- Project Manager and Advisor for a major Private Equity firm's divestiture of an autmotive parts manufacturer in Tunisia. Prepared Phase I and material compliance reviews under svere time contraints as part of a portfolio wide divestiture.
- Project advisor for a strategic buyer's acquisition of a construction material manufacturing company in Baia Mare, Romania. Evaluated the target for specific regional contamination issues, worker safety, and potential third party risks associated with historic contamination in soil and groundwater from regional mining activities throughout the region.
- Project Director and Advisor for a Strategic buyer with the acquisition of a specialty cable manufacturing company in Pennsylvania, U.S. Advised on EHS compliance and subsurface liabilities, as well as material risks associated with exposure associated with the use of specialty degreasing chemicals at a prior operating location.
- U.S. based holding company, acquisition of confidential holding company – Client Advisor, Project Director - coordinated and managed the implementation of due diligence assessments at various water valve manufacturing locations in Czech Republic, Germany, China, and India. Deliverables included a full liabilities report with an evaluation of risk, as well as liability cost estimates. Advised on known and potential subsurface liabilities/EHS compliance issues, potential CAPEX for material equipment upgrades, timeframes for potential liability triggers, as well as plant closure and decommissioning requirements where applicable..
- Project Director and Advisor for a confidential U.S. based Private Equity client with the acquisition (broken deal) of a major petroleum and grain bulk storage and barge transport operation in the Pacific Northwest. Environmental deal team leader for extensive analysis of target EHS management, environmental reserves, EHS operational budgets/projections, environmental permits, known/unknown subsurface contamination issues, potential USEPA Superfund involvement, petroleum bulk storage compliance issues, decommissioning costs for abandoned bulk storage tanks, and a detailed CAPEX analysis connected with upgrading and maintaining aging infrastructure (bulk storage, barges, and pipelines).
- Private Equity Client (Japan based), Project Director and Advisor for the acquisition of confidential small engine manufacturer - coordinated and managed the implementation of due diligence assessments at plant locations in Thailand, Mexico, China, and Japan. Deliverables included a full liabilities report with an evaluation of risk, as well as liability cost estimates. Advised on known and potential subsurface liabilities, known/potential EHS compliance issues, potential capital expenditures for material equipment upgrades, and timeframes for potential liability triggers.
- U.S. based Private Equity Client, Acquisition of equity share hold in confidential crystal glass manufacturer in Baccarat France. Environmental deal team leader for target EHS liability analysis including Phase I/Compliance assessment, analysis of EHS operational budgets/projections, environmental permits, known/unknown subsurface contamination issues, and a CAPEX analysis associated with a major wastewater treatment system upgrade. Contamination issues included a manufactured gas plant (MGP) on-site, as well as off-site 3rd party risks associated with airborne lead contamination and river sediment contamination issues.
- Project director for securing domestic and cross border permitting in Mexico for the establishment of a new dross waste recycling business. Permitting included waste transportation from customer facilities throughout Mexico, waste storage permitting in Monterrey, and shipments of wastes into the U.S. for recycling at the client's

established recycling center.

- Project Director for behavioral based Health and Safety compliance audits conducted at two specialty chemical manufacturing facilities, one in Shanghai, China, and one in Manaus, Brazil. In addition to compliance reviews, an in-depth benchmarking analysis of behavioral based safety and EHS management systems was conducted as part of a global initiative by the client to implement a global safety program.
- Project Director and Advisor for a TSDF style audit at a battery recycling facility in Puerto Rico, for a U.S. based battery manufacturer. Evaluated the facility for potential risks and exposures to the client associated with operational liabilities at the recycling facility. Evaluated known subsurface contamination, identified exployee exposures to lead, as well as thrid party off-site exposure risks associated with lead dust contamination.
- Exide, Project Director for Environmental, Health and Safety compliance audits for the battery manufacturing and recycling company in both U.S. and international locations (Germany (2), Spain (3), Portugal, Canada, Puerto Rico, Dubai, Poland, Belarus, Italy, India, and Norway). Greystone conducted 8-12 audits per year over several years and worked with counsel for audit reporting.
- Confidential Manufacturing Client, Remediation and Liability Transfer – Yangmei, Taiwan - Managed the design, management, and on-site supervision of a $750,000 soil and groundwater remediation project in support of the divestiture of an active manufacturing facility in Yangmei, Taiwan. Managed a remedial design investigation, aquifer testing, source removal, soil excavation and disposal, ground water extraction and treatment, off-site receptor analyses, building demolition, agency negotiations, preparation of reports, and development of corrective action plans.
- Confidential Manufacturing Client, Phase I Environmental Site Assessment and Remedial Estimates –Managed the completion of 12 international Phase I environmental site assessments and remedial estimates at sites throughout Europe and Asia including Germany, Spain, France, Netherlands, Austria, and India. Responsible for coordination and management of all aspects of scheduling, site reconnaissance, communications, identification and quantification of environmental liabilities, preparation of remedial cost estimates, and final project deliverables.
- Pulp and Paper Manufacturing Facility, Nova Scotia, Canada - Managed an $80,000 Phase I/EHS Compliance evaluation of a large-scale pulp and paper manufacturing facility in Nova Scotia, Canada. Coordinated and managed a ten person field team, facilitated and led project meetings, prepared draft and final reports, presented findings at closing meeting with client representatives.
- Senior Project Manager for the design, management, and on-site supervision of a $750,000 soil and ground water remediation project in support of the divestiture of an active manufacturing facility in Yangmei, Taiwan. Managed a remedial design investigation, aquifer testing, source removal, soil excavation and disposal, ground water extraction and treatment, off-site receptor analyses, building demolition, agency negotiations, preparation of reports, and development of corrective action plans. Assisted with buyer-seller negotiations, including the quantification of environmental liabilities and facilitation of liability transfer.
- Senior Project Manager for the design, management, and on-site supervision of a $450,000 soil and ground water remediation project in support of the divestiture of an active manufacturing facility in Huizhou City, Guangdong Province, China. Managed on-site implementation of all aspects of remedial activities including remedial design investigation, source removal, subsurface piping inspections/replacements, tank inspections, soil excavation and

disposal, in-situ chemical oxidation applications, and ground water extraction/treatment. Evaluated off-site receptors, oversaw negotiations with local Village personnel, facilitated regulatory evaluations, and assisted with buyer-seller negotiations.

- Senior Consultant for the design management, and supervision of a $50,000 Phase II site characterization in São Paulo, Brazil associated with a corporate spin-off of a major manufacturing operation. Tasks included regulatory file reviews, detailed health risk assessments using multiple site use scenarios, review of on-site impacts and risks from a neighboring contaminated property, indoor air monitoring for worker exposure due to vapor intrusion concerns, soil characterization, and site wide groundwater characterization. Results of the work were used to support negotiations with the parent company and determine the responsibility and fate of identified EHS risks (both known and unknown) associated with the facility.
- Managed a multi-million dollar New York State Inactive Hazardous Waste site in West Nyack, NY from 2008-2012. Responsible for transitioning all aspects of the project from a prior consultant, including over 35 years of project history, files, and documentation. Conducted an internal feasibility analysis to evaluate the path forward on the project, developed various technical options for the client including a cash outlay analysis for each option, evaluated and conveyed the environmental and business risks to the client, developed and maintained relations and communications with regulators, managed routine operation and maintenance of the remedial systems at the site, managed routine groundwater sampling requirements, evaluated various vapor intrusion issues, and interfaced with adjoining residential and commercial stakeholders affected by the site. Staged critical strategic changes including ROD amendments, remedial enhancements, and issuance of a ROD for a second operable unit. Annual budgets average in excess of $1MM per year.
- Managed a major ISRA site in northern New Jersey, transitioning the site from a previous consultant, providing a strategic site analysis and path forward strategy to assist the client in site divestiture. Through the course of the work, implemented comprehensive vapor intrusion investigations in adjoining residential neighborhoods, installation of sub-slab depressurization systems in residences, soil and groundwater remedial design investigations, in-situ remedial applications, UST removals, receptor surveys, site decommissioning/demolition specifications and bids, Remedial Action Work plan (RAW) development, and all associated documentation preparation and submittals. Managed the site through various regulatory changes, including transitioning the site into the NJ Licensed Site Remediation Professional (LSRP) program. Responsible for all communications with the client, regulators, residential stakeholders, local municipal agencies, and the NJDEP regulators. Successfully diverted a potentially litigious situation with off-site residential stakeholders involving vapor intrusion impacts. Successfully assisted the client in negotiating the sale of the site to a developer for commercial use redevelopment.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

Proposed NPL: Proposed NPL sites . The source of this database is the U.S. EPA.

A review of the Proposed NPL list, as provided by EDR, and dated 04/11/2019 has revealed that there is 1 Proposed NPL site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/11/2019 has revealed that there are 9 SEMS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/11/2019 has revealed that there are 6 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA-TSDF sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 12 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 29 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there are 9 CA RESPONSE sites

within approximately 1 mile of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where

environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/29/2019 has revealed that there are 53 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there are 2 CA SWF/LF sites within approximately 0.5 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 20 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 21 CA UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there

are 16 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 53 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EPA ID:: CAD050743020

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 09/30/2017 has revealed that there is 1 2020 COR ACTION site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CA HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the CA HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 16 CA HIST CORTESE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 222
. Waste name: Oil/water separation sludge

. Waste code: 281
. Waste name: Adhesives

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 352
. Waste name: Other organic solids

KIMBERLY-CLARK WORLDWIDE INC., FULLERTON MILL (Continued) **1000162914**

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U001
. Waste name: ACETALDEHYDE (I) (OR) ETHANAL (I)

. Waste code: U108
. Waste name: 1,4-DIETHYLENEOXIDE (OR) 1,4-DIOXANE

KIMBERLY-CLARK WORLDWIDE INC., FULLERTON MILL (Continued) **1000162914**

. Waste code: U122
. Waste name: FORMALDEHYDE

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

OSHA ESTABLISHMENT

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:

Site ID:	418301
CERS ID:	10540129
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	418301
Site Name:	Kimberly-Clark Worldwide, Inc., Fullerton Mill
Violation Date:	08-07-2015
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to provide and maintain adequate secondary containment.
Violation Notes:	Returned to compliance on 09/01/2015. The AST located in the "Acacia fire pump room" (tank 9B) is listed on the SPCC as a single walled tank with the room as the secondary containment. The on site review showed that the fire room does not meet secondary containment and it could not be determined if the AST was single or double walled. A review of the 9-2012 tank integrity testing lists this AST as single walled. If the AST is in fact single walled and the SPCC claims the building as secondary containment, which it is not, the tank will have to be secondarily contained (tank or building) and have a "technical amendment" to the SPCC by the SPCC PE. If, in fact the AST is double walled, submit verification in order to abate the violation.

Violation Description:	APSA Program - Administration/Documentation - General

KIMBERLY-CLARK CORP (Continued) **1000162915**

Violation Notes:	Returned to compliance on 09/04/2015. The "tank 9B" has been secondarily contained. The SPCC now needs a "technical amendment" to address this change. Once the PE has reviewed and approved the amendment, please send a copy of the amendment page to this Agency in order to abate the violation.
Violation Division:	Orange County Environmental Health
Violation Program:	APSA
Violation Source:	CERS
Site ID:	418301
Site Name:	Kimberly-Clark Worldwide, Inc., Fullerton Mill
Violation Date:	08-07-2015
Citation:	40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32
Violation Description:	Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment (including special extinguishing equipment, such as that using foam, inert gas, or dry chemicals), spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes:	Returned to compliance on 08/10/2015. The emergency response phone located outside the HW storage area worked but communication between the HW area and the operator was barely audible. Have this phone (emergency response notification system) repaired to allow for easy notification. Send verification that this system has been repaired in order to abate the violation.

Eval Notes:	On site for the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Kimberly Clark/Madden. This facility is a CAL ARP level 1. It has aqueous ammonia in a tank, used for NOX emission treatment. Ammonia alarms are set @ 20 PPM for ow level alarm. 35 PPM for high level alarm. the sensors are tested annually. Last tested 10-23-14. The next test is set for 10-14-15. OCHCA will attend this testing. The RMP was written in 2007, re validated 2012 and updated in 2015. The next revalidation is due 7-2017. The facility has a written ER program. Reviewed. OK Facility has an HMBEP with FFD. No spills in the history of the facility (5-year accident review). The worst case release scenario showed no off site consequence (140' release with a property line @ 580'). No planned changes to improve safety. Certification was signed by management. The facility offered to train with the FFD on 8-3-15. [Truncated]

Site ID: 418301
CERS ID: 10540129
CERS Description: Hazardous Chemical Management

Violations:
Site ID: 418301
Site Name: Kimberly-Clark Worldwide, Inc., Fullerton Mill
Violation Date: 08-07-2015
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide and maintain adequate secondary containment.
Violation Notes: Returned to compliance on 09/01/2015. The AST located in the "Acacia fire pump room" (tank 9B) is listed on the SPCC as a single walled tank with the room as the secondary containment. The on site review showed that the fire room does not meet secondary containment and it could not be determined if the AST was single or double walled. A review of the 9-2012 tank integrity testing lists this AST as single walled. If the AST is in fact single walled and the SPCC claims the building as secondary containment, which it is not, the tank will have to be secondarily contained (tank or building) and have a "technical amendment" to the SPCC by the SPCC PE. If, in fact the AST is double walled, submit verification in order to abate the violation.
Violation Division: Orange County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 418301
Site Name: Kimberly-Clark Worldwide, Inc., Fullerton Mill
Violation Date: 09-01-2015
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: APSA Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 09/04/2015. The "tank 9B" has been secondarily contained. The SPCC now needs a "technical amendment" to address this change. Once the PE has reviewed and approved the amendment, please send a copy of the amendment page to this Agency in order to abate the violation.
Violation Division: Orange County Environmental Health
Violation Program: APSA
Violation Source: CERS

Violation Date: 08-07-2015
Citation: 40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32
Violation Description: Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local

KIMBERLY-CLARK CORP (Continued) **1000162915**

police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment (including special extinguishing equipment, such as that using foam, inert gas, or dry chemicals), spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.

Violation Notes: Returned to compliance on 08/10/2015. The emergency response phone located outside the HW storage area worked but communication between the HW area and the operator was barely audible. Have this phone (emergency response notification system) repaired to allow for easy notification. Send verification that this system has been repaired in order to abate the violation.

Eval Notes:	On site for the Triennial Hazardous Waste (HW) inspection report. Permission to inspect granted by Kimberly Clark/Madden. This facility is a California only Large Quantity Generator (LQG). They are having all their HW disposed on a 1-2 month schedule. EPA ID #. OK. All HW drums were properly labeled with beginning accumulation dates. Satellite accumulation areas are located throughout the facility. All are properly labeled and moved to the HW storage area several times per year. All are stored closed with self sealing lids. All HW drums/containers were stored closed. Weekly inspection logs for the HW and satellite accumulation areas were maintained. Annual HW training. Reviewed the training program. OK. Reviewed the last 3 years of HW manifests. OK. Matched the California WTMS database. HW is stored in secondarily contained shed. Review of the municipal trash and perimeter showed no disposal of HW. Emergency response notification system has [Truncated]

Eval Notes:	On site for the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Permission to inspect granted by Kimberly Clark/Madden. The facility has the following regulated petroleum tanks/containers: ~ 275 gallon totes (buildings as secondary containment, visual Overfill Prevention (OFP). ~55 gallon drums (building or pallets as secondary containment). (5) 850 gallon ASTs (basement as secondary containment). (1) 175 gallon generator (building as secondary containment, visual OFP). (1) 1,100 gallon lube oil in the CoGen plant, berm as secondary containment. (3) fire pump generators, DWT. Approximate total of 13,006 gallons. The SPCC was on site and available for review. The SPCC was written 9-2012 and is due to revalidation by 9-2017. The SPCC was singed by a PE. Annual training reports OK. Training program includes SPCC specific items. Most of the tanks/totes/drums were secondarily contained by pallets or the buildings. See [Truncated]

Violations:

Site ID:	418301
Site Name:	Kimberly-Clark Worldwide, Inc., Fullerton Mill
Violation Date:	08-07-2015
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to provide and maintain adequate secondary containment.
Violation Notes:	Returned to compliance on 09/01/2015. The AST located in the "Acacia fire pump room" (tank 9B) is listed on the SPCC as a single walled tank with the room as the secondary containment. The on site review showed that the fire room does not meet secondary containment and it could not be determined if the AST was single or double walled. A review of the 9-2012 tank integrity testing lists this AST as single walled. If the AST is in fact single walled and the SPCC claims the building as secondary containment, which it is not, the tank will have to be secondarily contained (tank or building) and have a "technical amendment" to the SPCC by the SPCC PE. If, in fact the AST is double walled, submit verification in order to abate the violation.

Eval Notes:	Received E-mail from Kimberly/Madden. The AST in question (Acacia fire pump) was reviewed by a tank tester and is single walled. They have put a temporary secondary drip pan and will start true secondary containment (bermed floor) on 8-17-15. Please notify this Agency once the construction is completed. Be sure to have your SPCC/PE sign off that this new secondary containment is a "technical amendment" and is approved.

Eval Notes:	Onsite for a routine CalARP Program Level 1 inspection. I met with Environmental Manager Grace Madden of Kimberly Clark, Inc. Regulated Substance - 19% Aqua Ammonia - 63,021 pounds (8,100 gallons) total NH3. The following was observed: - RMP was revalidated in July 2017 per the 5-year update and updated on 8/3/2018. RMP was complete. - The off-site consequence analysis (OCA) was conducted using Gaussian Dispersion modeling. The OCA was deemed acceptable. - The emergency action plan was reviewed. Facility has a personnel that is available 24 hours a day if an emergency occurs. Coordination and notification of outside agencies is in-place. The facility also contracts with Enviro Chem Response for any Emergency Response activities. Facility has (3) personal NH3 sensors (toxirae II). - Safety: - Facility has (2) Ammonia Sensors (Draeger) with alarm set points at 25ppm. Sensors are calibrated on annual basis. - Ammonia tank has (1) Pressure Relief [Truncated]

Eval Notes:	On site for the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Permission to inspect granted by Kimberly Clark/Madden. The facility has the following regulated petroleum tanks/containers: ~ 275 gallon totes (buildings as secondary containment, visual Overfill Prevention (OFP). ~55 gallon drums (building or pallets as secondary containment). (5) 850 gallon ASTs (basement as secondary containment). (1) 175 gallon generator (building as secondary containment, visual OFP). (1) 1,100 gallon lube oil in the CoGen plant, berm as secondary containment. (3) fire pump generators, DWT. Approximate total of 13,006 gallons. The SPCC was on site and available for review. The SPCC was written 9-2012 and is due to revalidation by 9-2017. The SPCC was singed by a PE. Annual training reports OK. Training program includes SPCC specific items. Most of the tanks/totes/drums were secondarily contained by pallets or the buildings. See [Truncated]

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations:

Site ID:	418301
Site Name:	Kimberly-Clark Worldwide, Inc., Fullerton Mill
Violation Date:	08-07-2015
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to provide and maintain adequate secondary containment.
Violation Notes:	Returned to compliance on 09/01/2015. The AST located in the "Acacia fire pump room" (tank 9B) is listed on the SPCC as a single walled tank with the room as the secondary containment. The on site review showed that the fire room does not meet secondary containment and it could not be determined if the AST was single or double walled. A review of the 9-2012 tank integrity testing lists this AST as single walled. If the AST is in fact single walled and the SPCC claims the building as secondary containment, which it is not, the tank will have to be secondarily contained (tank or building) and have a "technical amendment" to the SPCC by the SPCC PE. If, in fact the AST is double walled, submit verification in order to abate the violation.

Violation Date:	09-01-2015
Citation:	HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description:	APSA Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 09/04/2015. The "tank 9B" has been secondarily contained. The SPCC now needs a "technical amendment" to address this change. Once the PE has reviewed and approved the amendment, please send a copy of the amendment page to this Agency in order to abate the violation.

Violation Date:	08-07-2015
Citation:	40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32
Violation Description:	Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment (including special extinguishing equipment, such as that using foam, inert gas, or dry chemicals), spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes:	Returned to compliance on 08/10/2015. The emergency response phone located outside the HW storage area worked but communication between the HW area and the operator was barely audible. Have this phone (emergency response notification system) repaired to allow for easy notification. Send verification that this system has been repaired in order to abate the violation.

Eval Notes:	On site for the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Kimberly Clark/Madden. This facility is a CAL ARP level 1. It has aqueous ammonia in a tank, used for NOX emission treatment. Ammonia alarms are set @ 20 PPM for ow level alarm. 35 PPM for high level alarm. the sensors are tested annually. Last tested 10-23-14. The next test is set for 10-14-15. OCHCA will attend this testing. The RMP was written in 2007, re validated 2012 and updated in 2015. The next revalidation is due 7-2017. The facility has a written ER program. Reviewed. OK Facility has an HMBEP with FFD. No spills in the history of the facility (5-year accident review). The worst case release scenario showed no off site consequence (140' release with a property line @ 580'). No planned changes to improve safety. Certification was signed by management. The facility offered to train with the FFD on 8-3-15. [Truncated]

Site ID: 475820
Site Name: Kimberly Clark
Violation Date: 01-31-2001
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Inadequate general housekeeping implementation, no BMP to prevent pollutant discharge from outdoor pulp storage; dumpster contents overflowing onto storm drain grating; location of storm drains, direction of water flow, and sampling points not on map.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-31-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The SWPPP and year 2000 AR were reviewed with Ms. Madden. BMPs include berms, dikes, good housekeeping, preventative maintenance, and employee training practices. The AR and recent lab results, however, showed TSS and SC values far greater than benchmark targets. Upon inspection, two large, uncovered containers of salt water, with large chunks

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No

ORANGE COUNTY METAL PROCESSING (Continued) **1000315097**

Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 10/12/2000

Hazardous Waste Summary:

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

FINDS:

Registry ID: 110000862086

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:
Site ID: 422139
CERS ID: 10539457
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 422139
Site Name: Kim Iron Works, Inc
Violation Date: 08-07-2013
Citation: HSC 6.95 25505(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)
Violation Description: Owner/Operator failed to complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Notes: Not reported
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 422139
Site Name: Kim Iron Works, Inc
Violation Date: 07-16-2015
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 07/20/2015. The manifests were reviewed. They were complete except that the last 3 years had 2 different "temporary" EPA ID #s (CAC002663814 and CAC00279059). The facility does have a permanent EPA ID # of CAL923645247. Stop using the 2 temporary EPA ID #s and begin using the permanent EPA ID on all future manifests. Please mail a copy of the next manifest (proposed to be August 2015) in order to abate this violation.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 422139
Site Name: Kim Iron Works, Inc
Violation Date: 07-19-2018
Citation: 22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174
Violation Description: Failure to inspect weekly, areas where hazardous waste containers are stored or transferred. The owner or operator shall look for leaking containers and for deterioration of containers and the containment system caused by corrosion or other factors.
Violation Notes: Returned to compliance on 07/23/2018. Per Mr. Diaz hazardous waste containers are only inspected by hauler. Hazardous waste containers must be inspected at least weekly. Begin inspecting hazardous waste containers and provide documentation to this agency demonstrating inspections are being conducted.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

KIMS WELDING & IRON WORKS (Continued) **S112911340**

Site ID:	422139
Site Name:	Kim Iron Works, Inc
Violation Date:	07-16-2015
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 07/16/2015. The (1) 55 gallon drum of paint solids was stored closed. It has no HW label. The proper label was completed and attached to the drum during the inspection. Violation was abated during this inspection.
